1. The existence of an African Cush cannot reasonably be questioned, though the term is employed in Scripture with great latitude, sometimes denoting an extensive but undefined country (Ethiopia), and at other times one particular kingdom (Merœ). It is expressly described by Esekiel as lying to the south of Egypt beyond Syene (xxix, 10; comp. xxx, 4-6. — Strabo, xvii, 817; Pliny, Hist. Nat. vi, 33; Josephus, War, i, iv, 10, 5). Its limits on the west and south were undefined; the possible limits on the eastward as far as the Red Sea, if not as including some of the islands in that sea, such as the famous Topaz Isle (Job xxviii, 19; Pliny, Hist. Nat. vi, 29; xxxvii, 8; Strabo, iv, 6, 4; Diod. Sic., iii, 39). It thus corresponded, though only in a vague and general sense, to the countries known to us as Nubia and Abyssinia, and also to parts of the Nile Valley and the Sudan. Hence the allusions in Scripture (Isa. xviii. 1; Zeph. iii, 11) to the far-distant "rivers of Ethiopia," a country which is also spoken of (Isa. xxvii, 2) in our version as the land "which the rivers have spoiled," being a supposed reference to the ravages committed by inundations (Bruce's Travels, iii, 158, and Taylor's Caumen, iii, 503-4); but recent translators prefer to render מָעֵץ by "divide," q. d. "a land intersected by streams." Isaiah likewise takes notice (in the above passage) of the "bulrush"-boats, or vessels of papyrus, which the Ethiopians employed upon the waters, a fact which is confirmed by Heliodorus in his Ἐθιοπικα (x, 490), and also by Bruce, who states that the only kind of boat in Abyssinia is that called Kuocos, which is made of reeds, "a piece of the acacia-tree being placed on the bottom to the edge of which the plants are joined, being first sewed together, then gathered up at stem and stern, and the ends of the plants tied fast there." It is to the swiftness of these papyrus vessels that Job (ix, 26) compares the rapid speed of his days. From its proximity to Egypt we find Miriam and Cush (i.e. Egypt and Ethiopia), so often classed together by the prophets (e. g. Psa. Ixviii, 81; Isa. xi, 11; xx, 4; xiii, 8; xlv, 14; Nah. iii, 9). The inhabitants are elsewhere spoken of in connection with the Lubim and Sukkiliim (2 Chron. xii, 8; xvii, 7; Jer. xvi, 7; Dan. xi, 49), supposed to be the Libyans and Ethiopian Togarepes, and certainly nations of Africa, for they belonged to the great family with which Shishak, king of Egypt, "came out" of that country against Rehoboam, king of Judah. In these, and indeed in most other passages where "Cush" occurs, Arabia is not to be thought of; the Ethiopia of Africa is beyond all doubt exclusively intended. See ERUPTUS.

In the ancient Egyptian inscriptions Ethiopia above Egypt is termed Κασσ or Κασσ, and this territory probably corresponds perfectly to the African Cush of the Bible (Wilkinson, Anc. Eg. i, 404, abridgment). The Cushites, however, had certainly a wider extension, like the Ethiopians of the Greeks, but apparently with a more definite ethnic relation. The settlements of the sons and descendants of Cush mentioned in Gen. x, may be traced from Merœ to Babylon, and probably on to Nineveh. Thus the Cushites appear to have spread along tracts extending from the higher Nile to the Euphrates and Tigris. Philological and ethnological data lead to the same conclusion. There are strong reasons for deriving the non-Semitic primitive language of Babylonia, variously called by scholars Cushite and Scythic, from an ante-Semitic dialect of Ethiopia, and for supposing two streams of migration from Africa into Asia in very remote periods; the one of Nigeritians through the present Malayan region, the other and later one of Cushites, "from Cush properly so called through Arabia, Babylonia, and Persia, to Western India" (Poole, Genesis of the Earth, p. 214 sq.). Sir H. Rawlinson has brought forward remarkable evidence tending to trace the early Babylonians to Ethiopia, particularly the similarity of their mode of writing to the Egyptian, and the indication in the traditions of Babylonia and Assyria of a "connection in very early times between Ethiopia, Southern Arabia..."
and the cities on the Lower Euphrates," the Cushite name of Nimrod himself as a defiled hero being the same as that by which Merod is called in the Assyrian inscriptions (Rawlinson's Horod. i, 338 n.). History affords many traces of this relation of Babylonia, the Arab- bia, and Ethiopia. Zerah the Cushite (A. V. "Ethiop- ian"), who was defeated by Asa, was most probably a king of Egypt, certainly the leader of an Egyptian army; the dynasty then ruling (the 72d) bears names that have caused it to be supposed to have had a Babylonic origin, such as Shihallit, Sheblah, Sheshak; Namret, Nimrod; Tekrut, Teklul, Tiglath. The early spread of the Mitzrites illustrates that of the Cushites (see Caphtor); it may be considered as a part of one great system of migrations. On these grounds we suppose that these Hamite races, very soon after their arrival in Africa, began to spread to the east, to the north, and to the west; the Cushites establishing settlements along the southern Arabian coast, on the Arabian shore of the Persian Gulf and in Baby- lonia, and thence onward to the Indus, and probably northward to Nineveh; and the Mitzrites spreading along the south and east shores of the Mediterranean, on the Arabian shore of the Red sea, and down the great island. These must have been scaring peoples, not wholly unlike the modern Malays, who have similarly spread on the shores of the Indian Ocean. They may be al- ways traced where very massive architectural remains are seen, where the native language is partly Turanian and partly Semitic, and where the native religion is partly called; or high-nature worship, and partly fe- tichism or low-nature worship. These indications do not fail in any settlement of Cushites or Mitzrites with which we are well acquainted. See ETHNOLOGY.

But that part of this vast region of Cush which seems chiefly intended in these and most other pas- sages of Scripture is the tract or country in Upper Nubia which became famous in antiquity as the king- dom of Ethiopia, or the state of Merod. The Ethiopian nations generally ranked low in the scale of civiliza- tion; "nevertheless," says Heeren, "there did exist a better cultivated, and, to a certain degree, a civ- ilized Ethiopian people, who dwelt in cities; who erected temples and other edifices; who, though without letters, had hieroglyphics; who had government and laws; and the fame of whose progress in knowl- edge and the social arts spread in the earliest ages over a considerable part of the earth. Merod Prop- er, which is now called the Nook (see above), is on the east, and the Nile on the west. Though not completely enclosed with rivers, it was called an island, because, as Pliny observes, the vari- ous streams which flowed around it were all considered as branches of the Nile, so that to it the above de- scription of a 'country of rivers' was peculiarly ap- propriate. Its surface exceeded that of Sicily more than a half, and it corresponded pretty nearly to the present province of Athbara, between 18° and 18° N. lat. In modern times it formed a great part of the kingdom of Sennaar, and the southern portion belongs to Aysenia. Upon the island of Merod lay a city of the same name, the metropolis of the kingdom, the site of which has been discovered near a place called Assur, about twenty miles north of the town of Shendy, under 27° N. lat. The splendid ruins of temples, pyramids, and other edifices found here and through- out the district have been described by Caillaud, Gen. Roppe, Bunsen, Washington, Enderlin, and others; and attest the high degree of civilization and art among the ancient Ethiopians. See Merod.

Josephus, in his account of the expedition of Moses when commander of the Egyptian army against the Ethiopians, says that the latter were of the same general nature of Cushites, "at length retired to Saba, a royal city of Ethiopia which Cambyses after- wards founded, and after the name of Cushites (Jnt. ii. 10, 2). The same origin of the name is given both by Strabo and Diodorus Siculus, but see Man- nert's Geog. of the Greeks and Romans, x, 199. There is still a place called Merawet considerably north of the island and near Mount Berkal, where Heeren thinks there may have been a settlement of the parent state of Cushites. This is the place of Mr. Milne and that Mr. Merod was identical with Seba accords well with the statement in Gen. x, 7, that Seba was the eldest son of Cush, whose name (N22) is not to be confounded with either of the shebas (N22), who are men- tioned as descendants of Shem (Gen. x, 28; xxxv, 8). Now this country of African Seba is classed with the Arabian Sheba as a rich but far-distant land (Psa. lxxi, 30). In Isa. viii, 8, God says to Israel, "I have given Egypt for thy ransom; Cush and Seba in thy stead;" and in Jer. xlv, 14, "The wealth of Egypt, and the merchandise of Cush and of the Sebae, men of stature, shall pass over to thee, and shall be thine." Charles Taylor, the ingenious but fanciful editor of Calmet, had the singular notion that by the expression "men of stature" in that passage is meant men of short measure, or dwarfs; and hence he identifies the Ethiopians with the pygmies of antiquity (Fragmenta to Calmet, cccxii). But the Hebrew phrase plainly denotes "tallness of stature" (comp. 1 Chron. vi, 23), and the Ethiopians are described by Herodotus as of gigantic stature (vpl Siréfis, iii, 114; vpl Siréfis, iii, 20); and Solinus affirms that they were twelve feet high (Polyb. xiv, 25). TheEssence of man with the other Cushite tribes of Africa the skin was black, to which there is an obvious allusion in Jer. xiii, 23: "Can the Cushite change his skin?" Bruce finds Seba in Azab, a sea-port on the east coast of Af- rica, near the entrance to the Red Sea, and in this he is followed by Heeren, while others think of a place called Solab, about lat. 15° N., where are some of the most remarkable ruins of Nubian grandeur; but both opinions are merely conjectural. See Saba.

Among other tribes of Africa said to have been in alliance with Egypt, the prophet Ezekiel (xxx, 5) mentions along with Ethiopia the name of Chub, which Michaelis connects with Koud, a trading town de- scribed by Ptolomy as on the west coast of the Red Sea. But in the Arabic translation made from the Septuagint, instead of Chub we find "the people of Nubia," a name easily interchanged for the other, and in some Heb. MSS. actually read there. There are still two districts adjoining Merod on the south-west, called Chub or Chobi, which are now called Abyssin- ian gold. The Sukkim, who, along with the Cushites and Lubim or Lihyans, formed part of the host of Shihirak (2 Chron. xii, 8), are in the Sept. designated as Trog- lodytes, i. e. cave-dwellers, and were no doubt the peo- ple known to the Greeks by the same name as inhab- iting the mountain caverns on the west coast of the Red Sea (Diod. Sic. iii, 82; Strabo, xvii, p. 765). They were noted for swiftness of foot and expertness in the use of the sling, and hence were employed, as Heliodoru- rus informs us (Ethiopia, viii, 165, as light troops. Pliny makes mention of a town of Jucie in that region (Hist. Nat. vii, 3, 27), and there is a very wide coast a place called Sussakin, described by Burckhardt in his Travels in Nubia. If, however, the term Suk- kim be of Hebrew derivation, it would especially de- note those who lived in booths, i. e. tabernacles made of the bunches of trees; and it deserves remark that the Shangallas who inhabit that country still dwell during the good of the year partly in tents, and partly in booths, repairing in winter to their rocky caves. See Cush.

In the age of Herodotus, the countries known to us as Nubia and Sennaar were occupied by two different races, one of whom he includes under the general ap- pellation of Ethiopians, the other an immigratory Ara- bian race leading, for the most part, a nomadic life. This distinction continued in his own sister's time. Among the original inhabitants the first place is due to the Nubi, who are well-formed, strong, and mus-
olar, and with nothing whatever of the negro physi-
ognomy. They go armed with spear, sword, and a
shield. The skin of the hippopotamus. South of
Dongola is the country of the Shilluk, whose war-
riors are horsemen, also armed with a double-pointed
spear, a sword, and a large shield (comp. Jer. xlvii. 9,
the "Cushites who handle the shield"). They were
completely independent till subdued by Mehemet Ali,
pacha of Egypt. It is in their country that the py-
ramidal monuments of the ancient Meroe, once the
first met with, and even its name has been pre-
served in that of their chief place, Merawé, though
the original Meréo must be sought farther south. Next
comes the territory of the Berbers, strictly so called,
who, though speaking Arabic, evidently belong to the
North African races; these are then followed by the Tu-
czé, and along the Nile, the great mass of the in-
habitants, though sometimes with a mixture of other
blood, may be regarded as of Arab origin. But be-
tween the valley of the Nile and the Red Sea there
is still, as of old, a variety of scattered aboriginal tribes,
among whom the Arabic is much less common; there
are, doubtless, partly the descendants of the above-
menciboned Sukkiiim, or Trogloidytes, and of the Ich-
thyophagi, or fish-eaters. Some of them spread them-
sefes over the plains of the Astaboras, or Taczeé, be-
coming compelled to remove their encampments, some-
times by the inundations of the river, at other times
by the attacks of the dreaded jag-daj, described by
Bruce, and which he supposes to be the "fly which is in the utmost part of the rivers of
Egypt" (Isa. vii. 18). Another remarkable Ethiopie
race in ancient times was the Macrobiana, so called
from their supposed longevity. They were represent-
ed by the ambassadors of Cambyses as a very tall
race, who elected the highest in stature as king: gold
was so abundant that they bound their prisoners with
golden fetters—circumstances which again remind us
of Isaiah's description of Ethiopia and Seba in ch. xlv.
14. (See Ludolf, Hist. Chthiopicana, F. a. M. 1681; with
his Commentaries thereon, ib. 1691; and his Red. Or. of
Habes, statum, ib. 1693.) See AFRICA.
2. That some of the posterity of Cush settled in the
south of Arabia may readily be granted; but that he
gave a permanent name to any portion either of the
country or people is by no means so evident: it is,
that, at least, more a matter of inferential conjecture than of
history. The name Midian or Mowzoea, so usu-
ally cited in support of the averment are susceptible of a
different interpretation. (1.) For example, in Num. i.
21, Miriam and Aaron are said to have taken offence
at Moses for having married a Cushite; and upon
the presumption that this was the same person as Zip-
porah, daughter of the priest of Midian (Exod. xi. 26, 21),
it is inferred that Midian was in Cush. But, to
say nothing of Ziporah's high rank, or of the services
of her family to Israel, there would have been some-
things so grossly incongruous and absurd in Moses's
brother and sister complaining for the first time of his
selection of a wife, after the marriage had subsisted for
more than forty years, that it is impossible to know
that he was now dead, and this second wife, though doubtless a
prostitute to Judaism, was (whether born in Asia or Africa)
a descendant of Cush, and therefore a Hamite,
and not one of the Midianites, who were of Semitic
origin, being the children of Abraham by Keturah.
But it is admitted that the title given to Cush, as
thus referred to, the case is not materially altered, for
still Cush must be sought near the place of Israel's
encampment, as it cannot be supposed that Moses
would go to Ethiopia to fetch a wife. See ZIPORAH.
(2.) Others discover a connection between Cush and
Mogadore, as in Nahum iii. 7, the clause, "the thorns of Cush in affliction," finds a parallelism in
"the curtains of the land of Midian did tremble"—
Cushan being held to be the poetical and high-sounding
form of Cush. But this idea is met by another
identification; for while it is acknowledged that part
of the sublime description in that chapter refers to the
Edomites and the Edomite stations, as possibly (such as the passage of the Jordan, verse 8, and
the standing still of the sun, verse 11) have plainly a re-
ference to incidents in the books of Joshua and Judges.
Now in the latter book (iii. 10; viii. 12) we find a re-
signal victories successively obtained by Othniel
over Cushan Ishbeshalim, king of Mesopotamia, and
by Gideon over the princes of Sihon. See CUSHAN.
(3.) But perhaps a stronger argument is the mention of Arabians as contiguous to the Cushites. Thus, in 2
Chron. xxii. 16, among those who were stirred up
against the Hebrews are mentioned the Philistines,
and "Arab that were near the Cushites," and the
expression "near" (7527) in this connection can scarcely apply to any but dwellers in the Arabian pen-
insula. Other arguments adduced by Michaels (Spicilegia Geographic. Hebr. i, 149) in favor of the Ara-
bian Cush are not decisive, and the passages on which he relies apply with greater probability to the
African Cush. Thus the retreat of Sennacherib from Judæa
in order to meet Tirimakhe (2 Kings xix. 9; Isa. xviii.
9) does not necessarily imply that the latter passed
through Palestine, since the Egyptians had reached
Carchemish, which is reached by the etymologists with
some confidence (2 Kings xxxiv. 20), and Tirimakhe was undoubtedly an African prince. See TIRIMAKHE.
Again, it has been rashly concluded that Zerah the Cushite, who attacked Asa, king of Judah, with so immense a host (2 Chron. xiv.
9), could not have been an Ethiopian of Africa,
and yet the fact of his army having included Libyans
(xvi. 8) as well as Ethiopians, seems decisive of the
fact that the latter were of African origin. Their an-
cestors may have belonged to the "people without number" whom Shishak had led forth against Asa's
grandfather, Rehoboam (xii, 8), and these their de-
cendants may have retained possession of the north
of Arabia Petreae, between Palestine and Egypt (see
Bruce's Travels, i. 30). See ZERAH.
Yet, though there is a great lack of evidence to
show that the name of Cush was ever applied to any
part of Arabia, there seems no reason to doubt that
a portion of the Cushite race did early settle there.
According to the ethnographic table in the 10th chapter of
Genesis, Cush was the father of Seba, Havilah, Sab-
ta, Raamah, and Ethiopia. The names of Saba and
Sabahtah, and also of Nimrood (Gen. x. 7, 8; 1 Chron. i.
9, 10). The last mentioned appears to have moved
northward, first into Babylonia and then into Assyria,
but the others seem to have migrated to the south,
though it is impossible accurately to trace out their
settlements. Yet, even if we give Seba to Africa,
and pass over as doubtful the names of Havilah, She-
ba, and Dedan (for these were also the names of She-
mitic tribes, Gen. x. 28, 29; xxv. 8, still, in Ezek.
xxvii, 22, Raamah is plainly classed with the tribes of
Arabia, and nowhere are any traces of Saba and
Sabahtah to be found but in the east of the country.
By referring, however, to the fact that the two have geographical posi-
tions of the south-west coast of Arabia and the east
cost of Africa, it will be seen that nothing separates
them but the Red Sea, and it is not unlikely that while
a part of the Cushite population immigrated to Africa,
others remained behind, and were occasionally called
by the same name. In the fifth century of our era,
the Himyarites, in the south of Arabia, were styled by
Syrian writers Cushmans and Ethiopians (Assemanni,
Bibl. Orient, i. 560; iii, 568). The Chaldean appharseph
Jonathan, at Gen. 5, and another paraphrase at 1
Chron. i. 8, explain "Cush" by Arabia. Niebuhr
(Histor. p. 125) explains the often allusions of the
Chal. The book of Job (xxxvii, 19) speaks of the
tops of Cush, and there was a Topaz Island in the Red
Sea (Diod. Sic. iii. 39; Pliny, Hist. Nat. xxxvii, 8;
Strabo, xvi, 4, 6). Yet most of these are circumstances
CUSHI

upon which we can lay but little stress; and the passage in 2 Chron. xxii, 16, is the only direct evidence we possess of the name of Cush being applied in Scripture to Arabia; and it does not amount to absolute demonstration. See Arabia.

3. Cush, as a country, therefore appears to be African or Arabian in all passages except Gen. ii, 13. We may thus distinguish a primaeval and a post-diluvian Cush. The former was encompassed by Gihon, the second river of Africa; but it would seem, therefore, to have been somewhere to the northward of Assyria. See Gihon. From etymological considerations, Huet was induced to place Cush in Chusistan (called Cutha, 2 Kings xvii, 24), Leclerc in Cassitio in Syria, and Reland in the "regio Cossorum." Bochart identified it with the region of Benzait, the contemporary of the Cas- casaus, and Hartmann with Bactria or Baffik, the site of Paradise being, in this case, the celebrated vale of Kashimar. It is possible that Cush is in this case a name of a period later than that to which the history relates; but it seems more probable that it was of the earliest age, and that the African Cush was named from this order country. Most ancient nations thus connected their own lands with Paradise, or with primaeval seats. In this manner the future Paradise of the Egyptians was a sacred Egypt watered by a sacred Nile; the Arabs have told of the terrestrial paradise of Sheddad the son of Ad (q. v.) as sometimes seen in their dreams; the Greeks have told of the all destroying floods of Ogges and Deucelion in Greece; and the Mexicans seem to have placed a similar deluge in America—all carrying with them their traditions, and fixing them in the territories where they established themselves. We are told that, in the Hindu mythology, the gardens and metropoleis of Indra are placed around the mountain Meru, the celestial north pole; that, among the Babylonians and Medo-Per- sians, the gods' mountain, Albor, "the mount of the congregation," was believed to be "in the sides of the north" (Isa. xlv, 13); that the oldest Greek traditions point northwards to the birthplace of gods and men; and that, for all these reasons, the Paradise of the Hebrews must be sought for in some far-distant hyperborean region. Guided by such unerring indications, Hasse (Entdeckungen, p. 49, 60, n.) scrupled not to graviy his national feeling by placing the Garden of Eden on the coast of the Baltic; Rudbeck, a Swede, found it in the Caspian; and the Mahals Silvanus has not been without its advocates (Morren, Rosen- muller's Geo. i, 96). But, with all this predilection in favor of the north, the Greeks placed the gardens of the Hesperides in the extreme west, and there are strong indications in the Puranas "of a terrestrial paradise, different from that of the general Hindu system, in the southern parts of Africa" (As. Res. iii, 300). Even Meru was no further north than the Himalayan range, which the Aray race crossed in their migrations. See Eden.

2. (Sept. Xeovi, Vulg. Chusit.) A Benjamite, apparently at the court of Saul, by the name of Cush in many passages, unless the title of Cush be interpreted when nothing more is known than that the name is the sphere said to have been composed "concerning his words" (or affairs). B.C. 1061. "There is every reason to believe this title to be of great antiquity (Ewald, Psalmen, p. 5). Cush was probably a follower of Saul, the head of his tribe, and had sought the friendship of David for the purpose of 'rewarding evil to him who was at peace with him'—an act in which no Oriental of ancient or modern times would see any sense, but, if successful, the reverse. Happily, however, we may gather from ver. 15 that he had not succeeded." By some Cush is, in Synopsia, supposed to have been Saul himself (see Hengstenberg, in loc.); by others he is identified with Shimei (see Pfeiffer, Dict. Vetus., in Opp. i, 297), who treated David so scour- rilously on his retreat from Abelaom (2 Sam. xvi, 5-8).

A recent view (Kitto's Daily Illustrations, in loc.) is that this was the name of some treacherous informer in David's corps, through fear of whose intrigues he saved the second time to Achish (1 Sam. xxxvii, 1); or (see Calmet's Comment., in loc.), most probably, of Saul's malicious courtiers, as no good reason can be given for calling so well-known characters as either Saul or Shimei by so fanciful a title as Cush. See David.

C'ushan (Heb. Kushan, "Kushan;" Sept. Alibero; Vulg. Ethiopia), usually regarded as a prolongued or poetical form (Hab. iii, 7) of the name of the land of Cush (q. v.), but perhaps rather the same as Cuskan-rishatham (S. v., "Cushshan"), king of Mesopotamia (Judg. iii, 8, 10). The order of events alluded to by the prophet seems to favor this supposition. First he appears to refer to former acts of divine favor (ver. 2); he then speaks of the wonders at the giving of the law, 'God came from Teman, and the Holy One from Mount Paran,' and he adds 'the kings of Cushan in affliction; [and] the tent-curtains of the land of Midian did tremble,' as though referring to the fear of the enemies of Israel at the manifestations of God's favor for his people. Cushan-rishathaim, the first recorded oppressor of the days of the Judges, may have been already reigning at the time of the en- trance into the Promised Land. The Midianites were supplied with the Moabites at this time, feared the Israelites, and plotted against them (Num. xxiii, xxxii, xxiv, xxv); and it is noticeable that Balaam was sent for from Aram (xxiii, 7), perhaps the Am'ara-naharim of the oppressor. Habakkuk afterwards alludes to the crossing of Jordan or the Red Sea, or both (ver. 8-10, 15), to the standing still of the sun and moon (11), and apparently to the destruction of the Canaanites (12, 13, 14).—Smith, s. v. There is, however, good reason for the supposition that Cushan here stands for an Asiatie Cush (see Meth. Quart. Rev. Jan. 1861, p. 81), as it is named in connection with Midian (q. v.). Delitzsch (Der Prophet Habakuk, Leipzig, 1848, p. 159), who admits only the African Cush, holds that its mention along with Midian is intended to show how places so far removed from each other were equally affected by the theophany; but this is exceedingly strained, and at variance with the parallelism of the passage. See CUSHAN-RISHATHAIM.

1. (With the article, "Ku'zhi," i. e. "the Cushite," "the Ethiopian;" Sept. Ξοι; Vulg. Chusi.) The messenger sent by Joab to announce to David the success of the battle against Abielom and the death of the young prince (2 Sam. xviii, 21, 22, 23, 31, 32). B.C. 1028. He was apparently attached to Joab's person, but unknown, as unaccustomed to the king, as may be inferred from his not being recognised by the watchman, and also from the abrupt manner in which he breaks his evil tidings to David—unlike Ahiamzaz, who was well aware of the effect they were sure to produce. See David. That Cushi was a foreigner— as we should infer from his name—is also slightly cor- roborated by his ignorance of the ground in the Jordan valley—"the way of the 'Ciccar'" (q. v.)—by knowing which Ahiamzaz was enabled to outrun him. Ewald, however, conjectures that a mode of running is here referred to peculiar to Ahiamzaz, and by which he was recognised a long distance off by the watchman.

—Smith, s. v.

2. The father of Sheleimiah, and great-grandfather of Jehudi, which last was sent by the Jewish magistrates to invite Baruch to read his roll to them (Jer. xxxvi, 14). B.C. long ante 605.

3. The son of Gedaliah, and father of the prophet Zephaniah (Zeph. i, 1). B.C. ante 625.
CUSHION. See BED; PILLOW.

Cushman, Elisha, a Baptist minister, was born at Kingston, Mass., May 2, 1788. He was ordained pastor of the First Baptist Church of Hartford, June 10, 1813. In 1824 he was made M.A. (honorary) by Yale College. In 1825 he resigned his charge in Hartford, and became pastor of the New Market Street Baptist Church of Philadelphia. In September, 1829, he returned to Connecticut, and, after preaching some time at Stratfield, was, in April, 1831, called to the pastoral charge of the Baptist church in New Haven. In 1835 he removed to Plymouth, Mass., but returned to Hartford in 1838, and resumed the editorship of The Christian Sentinel, a religious paper of which he had been the original editor in 1822. He died October 26, 1888. Mr. Cushman's preaching was simple, instructive, and often eloquent. He published a number of occasional sermons and addresses.—*Sprague Annals*, vi, 562.

Custarius. See FADUS.

Custom (Chald. -carousel, a way-tax. l. e. toll, Ezra iv, 13, 20; xiv, 24; Gr. ἐκπορεύοντα, a tax, 1 Mac. xi, 35; Matt. xvii, 25; Rom. xiii, 7; φόρος, tribute, 2 Mac. iv, 28; τιμή, price, 1 Mac. x, 29). Reciproc sy (from κοιναν, collector's office, l. e. toll-house, Matt. ix, 9; Mark ii, 14; Luke v, 27). See TOLL. Under the Persian and Syrian supremacy, import of various kinds were the business of local agents. To the Romans, the management of the provincial revenues was generally committed to the Roman knights, who were thence denominated clieni publicani, or chief collectors of the taxes; the tax-gatherers or exactions whom they employed were termed publicani. It was different in Judea, for there the management of the revenues was committed to the Jews themselves, and those who held this office eventually obtained an equal rank with the knights of Rome (Luke xix, 2; Josephus, *War*, ii, 14, 9). The subordinate agents, or publicani, in collecting the revenues, took their position at the gates of cities and in the public ways, and, at the place appointed for that purpose, called the "receipt of custom," examined the goods that passed, and received the moneys that were to be paid (Matt. ix, 2; Mark ii, 14; Luke v, 27, 29). These tax-gatherers, if we may believe Cicero (Pro Flacco, 26), were more inclined to exact too much than to forget the promise which they had made to their masters, and were, accordingly, in consequence of their extortion, everywhere, more particularly in Judea, objects of hatred, and were placed in the same class with notorious sinners (Mark ii, 15, 16; Luke iii, 12, 13). The Pharisees held no communication with them; and one ground of their reproaches against the Saviour was, that he did not refuse to sit at meat with persons of such a character (Matt. v, 46, 47; iv, 10, 11; xii, 19; xviii, 17; xxi, 31, 32). The half-shekel tax was a tax or tribute to be paid annually by every adult Jew at the Temple. It was introduced after the captivity in consequence of a strong interpretation of certain expressions in Psalms, and differed from the revenue which accrued to the kings, tetrarchs, and ethnarchs, and from the general tax that was assessed for the Roman Caesars. It was required that this tax should be paid in Jewish coin (Matt. xxi, 17-19; Mark xii, 14, 15). The prominent object of the temple money-collectors (Neh. xi, 32) was their national emolument; but the acquisition of property in this way was contrary to the spirit of the law in Deut. xxiii, 20, 21. It was for this reason that Jesus drove them from the temple (Matt. xx, 22; Mark xi, 15; John ii, 15). Messengers were sent into other cities for the purpose of collecting it (Neh. xi, 32). The Jews who collected this tax from their countrymen dwelling in foreign nations transmitted the sums collected every year to Jerusalem. This accounts for the immense amount of the treasures which flowed into the Temple (Josephus, *Ant. xiv*, 7, 2). See TAX.

Cuth the Flesh; Cut Off from the People. See CUTTING, etc.; EXCOMMUNICATION.

Cuth (Hebrew, Kutha, כֻּת, signify. unknown; Sept. Κονία, 2 Kings xvii, 30 or Cu'tha'h [Hob Kuthah], כֻּתָּה, fem. of same; Sept. Κονιά, ver. 24), one of the districts in Asia whence Shalmaneser transplanted certain colonists into the land of Israel, which he had desolated. See SAMARIA. From the intermixture of these colonists with the remaining natives sprung the Samarians (q. v.), who are called Cutheans (Kονια) in the Chaldees and the Talmud (see Buxtorf, *Lex. Talm.* col. 618. 3), for the sake of the same non-Semitic words which occur in the Samaritan dialect are called Cuthian (compare Κονια, Josephus, *Ant. ix*, 14, 3; comp. *xii*, 9, 1). Josephus places Cu'tha'h in central Persia (comp. Zonar, i, p. 77), and finds there a river of the same name (Νερός, Ant. ix, 14, 3; x, 9, 7). Rosenmüller and others incline to seek it in the Arabian Irak, where Abulfeda and other Arabic and Persian writers place a town of the name of Ku'tha, in the tract near the Nahr-Malak, or royal canal (the fourth in Xenophont, *Anab.* i, 7, which connected the Euphrates and Tigris to the south of the present Bagdad. The site has being identified with the ruins of Teoschak, or the valley adjacent to the town of the same name in the district of Aṣṣur, p. 165; Knobel, *Völkerbild*, p. 25-27). The canal may be the river to which Josephus refers. Others prefer the conjecture of Stephen Morin (in Ugozlini *Theos.* vii) and Le Clerc, which identifies the Cutheans with the Coeness in Susians (Arrian, *Indic.* xi; Plin. *Hist. Nat.* vi, 31; Strabo, i, 111; Mannert, ii, 490), a warlike tribe who occupied the mountain ranges dividing those two countries, and whose lawless habits made them a terror even to the Persian emperor (Strabo, xi, 524; xvi, 744). They were never wholly subdued until Alexander's expedition, and it therefore appears doubtful whether Shalmaneser could have gained sufficient authority over them to effect the removal of any considerable number; their habits would have made such a step highly expedient, if practicable. Fürst (in *Heb. Handwörterb.* s. v.) identifies this district with the modern Khustain of Susiana, the province *Jatius* of the cuneiform inscriptions of Behistun (Beneyt, *Die Pers. Keilschr.* p. 18, 32). All these conjectures refer essentially to the same quarter, and any of them is preferable to the one suggested by Michaelis (Spiecl, i, 104), that the Cutheans were Phoenicians from the neighborhood of Sidon; founding it upon the connection between the Samarians and the Sidonians, as stated in their letter to Alexander the Great (Joseph. *Ant. 8*, 6; *xii*, 5, 5), and between the Sidonians and the Cuthians, as expressed in the version of the Chaldee Paraphrast Pseudo-Jonathan in *Gen.* x, 19, which substitutes אַבְרָם for יִשְׂרָאֵל, and in the Targum, 1 Chron. i, 13, where a similar change is made; this is without doubt to be referred to the traditional belief that the original seat of the Phoenicians was on the shores of the Mediterranean (Herod. i, 13). Rawlinson is confident that the ancient Cuth is identical with the modern ruined site Ibrahim, about twelve miles from Babylon (Herod. i, 243, 515; *Hist. Ec.* p. 840 sq.). See NEBO. After all, it is possible that there is some historical and etymological connection (ヘシムに変へ) between Cuth and the Cud of Gen. ii, 13, which must have lain somewhere in the same quarter. See CUSH.

Cuthbert, Sr., an eminent monk, born in the north of England in the beginning of the 7th century. His life, written by a monk of the monastery near his own, is clear; it is clear that he was an earnest and faithful minister. He was educated by the Scottish monks at Iona. After being for some time a monk in the monastery of
Mallros, he became prior of the monastery of Lindisfarne. In 676 he withdrew to the island of Farne, where he lived a life of most rigorous asceticism as a hermit, and enjoyed the reputation of working many miracles. In 686 he yielded to the entreaties of King Egbert of East Anglia, and he was consecrated Bishop of Lindisfarne.

When he felt the approach of death he returned to his hermitage on Farne, and there died, March 20, 687. He is commemorated in the Roman Church March 20. The fame of St. Cuthbert had been great during his life; it became far greater after his death. Churches were dedicated to him throughout the country between the Trent and the Foss on the south, and the Forth and Clyde on the north. When his tomb was opened at the end of eleven years, it was believed that his body was found incorrupt, and so for more than 800 years it was believed still to continue. It remained at Lindisfarne till 875, when the monks, bearing it on their shoulders, fled inland from the fury of the Danes. After many wanderings through the south of Scotland and the north of England, it found a resting-place at Chester-le-Street in 882. It was transferred to Ripon in 995, and in the same year it was removed to Durham. Here, enclosed in a costly shrine, and being daily venerated by monks and people, it remained throughout the Reformation, when it was buried under the pavement of the cathedral. The grave was opened in 1827, when a coffin, ascertained to have been made in 1341—when the body was committed to the earth—was found to enclose another, which there was reason to suppose had been made in 1104; and this again enclosed a third, which answered the description of one made in 638, when the saint was raised from his first grave. This innermost case contained, not, indeed, the incorruptible body of St. Cuthbert, but his skeleton, still entire, wrapped in five robes of embroidered silk. Fragments of these, and of the episcopal vestments, together with a comb and other relics, found beside the bones, are to be seen in the cathedral library. The asceticism which distinguished St. Cuthbert in life long lingered round his tomb. Until the Reformation, no woman was suffered to approach his shrine; the cross of blue marble still remains in the cathedral floor which marked the limits beyond which female footsteps were forbidden to pass, under pain of instant and signal punishment from the offended saint. His wrath, it was believed, was equally prompt to avenge every injury to the honor or possessions of his church. It was told that William the Conqueror, anxious to secure the incorrupt body of the saint, ordered the shrine to be broken up; but scarcely a stroke was struck, when such sickness and terror fell upon the king that he rushed from the cathedral, and, mounting his horse, never drew bridle till he had crossed the Twees! A cloth, said to have been used by St. Cuthbert in celebrating mass, was fashioned into a standard, which was believed to insure victory to the army in whose ranks it was carried. Fodden was only one of many fields in which the defeat of the Scots was ascribed to the banner of St. Cuthbert. It hung beside his shrine until the Reformation, when it is said to have been burnt by Calvin's sister, the wife of the last Protestant dean of the cathedral. The life of St. Cuthbert was twice written by the Venerable Bede—briefly in vigorous hexameters in his Liber de Miracula Sancti Cuthberti Episcopi; at great length in prose, in his Liber de Vita et Miracula Sancti Cuthberti Lindisfarrensis Episcopi. In this latter work he makes use of a narrative written by a monk of Lindisfarne, which is still preserved. Besides these lives—all of which have been printed more than once—and what is told of St. Cuthbert in Bede's Historia Ecclesiastica Gentis Anglorum, the chief ancient authorities are the Historia Translatiorum S. Cuthberti, published by the Bohemundinians; the Merovia, the Maximianus, the Cassanlii; the Libellus de Exordio Dunelmensis Ecclesiae, by Symeon of Durham; the Libellus de Nativitate S. Cuthberti de Historia Hyperboreanis excerpta, and the Libellus de Admirandis B. Cuthberti Virtutibus, by Reginald of Durham, both published by the Surtess Society. There are two modern memoirs of St. Cuthbert—the late Rev. James Raine's St. Cuthbert (Durham, 1829), and the Very Rev. C. J. Wilson's History of St. Cuthbert (Lond. 1849).—Chambers, Encyclopaedia, s. v.; Butler, Lives of Saints, March 20; Herzog, Real-Encyclop. xix, 374.

Cuthbert's See. See CUTH.

Cutler, Benjamin Clarke, D.D., a minister of the Protestant Episcopal Church, was born in Roxbury, Mass., Feb. 6, 1798, and died in Brooklyn, N. Y., Feb. 10, 1863. On his marriage side he was a descendant of the Huguenots. His religious character developed early; it was marked by no epoch of sudden transition, but at the age of eighteen, two years after his confirmation, he became a decided Christian. He immediately began to study for the ministry, and graduated with high honor at Brown University in 1822. He discharged the functions of the ministry seven years in Quincy, Mass.; one year in Leeburg, Va.; two years in New York as a city missionary, and thirty years as rector of St. Ann's Church, Brooklyn. As a preacher he was pre-eminently evangelical, and as a pastor remarkably successful. He was one of the originators of the active promotion of the missionary work of the Protestant Episcopal Church. He was a Low-Churchman, and was deeply grieved by the rise of Puseyanism, and its introduction into this country. He wrote of it as "the reigning heresy of incipient Romanism." In 1846 he visited England for the sake of his health. On his return the ves-vel struck a shoal in the harbor of New York, and for twelve hours it labored heavily in a storm. Always after he observed the anniversary of that day as an occasion of special thanksgiving. Dr. Cutler was a chronic invalid. Before he went to college he was thought to be in a decline, and his life was one long battle with disease. His final illness was protracted and very distressing. He would often say, "the under-currents are all peace." He left no published works except a few occasional discourses and a volume of sermons, which are good specimens of direct, fervent Gospel preaching.

Cutler, Manasseh, L.L.D., a Congregational minister, was born in Killingly, Conn., May 28, 1742, graduated at Yale, 1760, studied law, and was admitted to the bar, but a short time devoted himself to the study of theology. He was installed pastor in Hamilton, Mass., Sept. 11, 1771. After the Revolution the Ohio Company chose him agent for the purchase of land in the West, and Washington offered him the honorable position of judge of the U. S. Court in the North-west Territory, but he declined. He was elected to Congress in 1800. Dr. Cutler devoted himself largely to botany, and to the study and practice of medicine, but retained his pastoral relation until his death, July 28, 1823. He was made L.L.D. by Yale in 1789. He published a number of articles on scientific subjects and a few occasional sermons.—Syracuse, Am. Hist. Soc., ii, 15.

Cutler, Timothy, D. D., minister of the English Church in America, was born at Charlestown, Mass., in the year 1683, and graduated at Harvard in 1701. He was educated and ordained for the Presbyterian ministry, and in 1710 was installed pastor of the Congregational church in Stratford, Conn. He became president of Yale in 1719, at the request of the trustees; but on the day after Commencement in 1727, a paper was presented to the clergy and others assembled in the college library, signed by the rector and one of the tutors, together with several of the neighboring ministers, in which they say: 'Some of us doubt of the validity, and the rest are fully persuaded of the invalidity, of Presbyterian ordination in opposition to Episcopal.' In October following a dis-
Cutting (in the Flesh), expressed technically by בָּטַשׁ, so'rat (Lev. xix, 28), or בָּטַשׁ, sarat (in the same connection), is a gash or incision (Sept. יֹרֶק, Vulg. incisa) in the flesh (בָּטַשׁ); also by יָנֹּ֣ב, gudah (Jer. xlvii, 87), a cut in the skin (e.g. the hand, there; the verb יָנֹּ֣ב, gudah, occurs in the same sense, with reference to the ceremonies of mourning. Jer. xvi, 6; xli, 5; xlvii, 5, or as a part of idol worship, Deut. xiv, 1; 1 Kings xviii, 28); and by קָצָּ֖ה, a "mark" punctured on the person (Lev. xix, 28); compare the denouement in Mark v, 5, κατακείμενον, "cutting himself" to the text embraced in those words, viz., "Ye shall not make any cuttings in your flesh for the dead" (Lev. xix, 28).

It is evident from this law that such a species of self-inflicted torture obtained among the nations of Canaan and it was doubtless to guard his people against the adoption of so barbarous a habit, in its idolatrous form, as well as to restrain desperate grief (comp. 1 Thess. iv, 13; see Macdonald, T. i. to the Pentateuch, Edinb. 1861, p. 118), that God led Moses to reiterate the prohibition: "They shall not make baldness upon their heads, neither shall they shave off the corner of their beards, nor make any cuttings in their flesh" (Lev. xx, 5; Deut. xiv, 1). (See J. G. Michaelis, De incisa propri mortuorum, F. ad O. 1783.) See Corner.

1. The ancients were very violent in their expressions of sorrow. Virgil represents the sister of Dido as having cut out her breast with nails and eating her breasts with her fists (Aen. iv, 672). Some of the learned think that that law of Solomon's was transferred by the Romans into the Twelve Tables (Cicero, De Leg. ii, 25), that women in mourning should not scratch their cheeks (Corp. Jur. Civ. v, 66, 67, ed. Godofredus, 1583), derived its origin from this law of Moses (Lev. xix, 28), but, however this opinion may be questioned, it would appear that the simple tearing of the flesh out of grief and anguish of spirit is taken in other parts of Scripture as a mark of affection: thus (Jer. xlvii, 37), "Every head shall be bald, every beard clipped, and upon all cuttings." Again (ch. xvi, 6): "Both the great and the small shall die in the land: they shall not be buried, neither shall men lament for them, nor cut themselves." (So ch. xlii, 5):

"There came from Samaria fourscore men having their heads shaven and their clothes rent, and having cut themselves, with offerings to the house of the Lord. (2 Kings ii, 24)"

Leviticus also existed that what was worlds, baldness or mutilation had a propagatory efficacy with respect to the manes of the dead, perhaps as representing, in a modified degree, the solemnity of human or animal sacrifice. Herodotus (iv, 71) describes the Scythian usage in the ease of a deceased king, for whose honor as well as among six human victims, besides offerings of animals and other effects, were considered necessary. An extreme case of funereal bloodshed is represented on the occasion of the burial of Patroclus, when four horses, two dogs, and twelve Trojan captives are offered up (II. xxiii, 171, 175). Originally used with human or animal sacrifices at funerary, after the dead gone out of use, the act for propitiatory acts of self-mutilation and deception continued alone (II. xxiii, 141; Od. iv, 197; Virg. Aen. iii, 67, with Servius ad loc. xii, 605; Eurip. A. p. 425; Seneca, Hud. v, 1176, 1139; Ovid, Eleg. i, 3, 8; Tibullus, Eleg. i, 1). Plutarch says that some barbarians mutilate themselves (De Consol. ad Apollon. p. 113, vol. vi, Boston). He quotes also that Solon, by the advice of Epimenides, curtained the Athenian practice in this respect (Solon. 12-21, i, 184, 194). Such being the ancient heathen practice, it is not surprising that the law should forbid similar practices in every case in which they might be used or misconstrued in a profane, profane manner. "Ye shall not make cuttings for (proper) the dead," מָכַת (Lev. xix, 28; see Gesenius, Thes. Heb. p. 761; Spencer, De Leg. Hebr. ii, xii, 404, 405). See Gazer.

2. But the practice of self-mutilation as an act of worship belonged also to heathen religious ceremonies not found among the priests of Baal, a Syrian and also an Assyrian deity, cut themselves with knives to propitiate the god "after their manner" (1 Kings xviii, 28). Herodotus says that the Carians, who resided in Europe, cut their foreheads with knives at festivals of Asia; in this respect exceeding the Egyptians, who beat themselves even from those occasions (Herod. ii, 61). This shows that the practice was not then at least an Egyptian one. Lucian, speaking of the Syrian priestly attendants of this mock deity, says, that using violent gestures, they cut their arms and tongues with swords (Lucian, Anaxim. c, 87, vol. ii, 102, Amst.; De Dea Syr. ii, 686, 688, comp. Ezek. xvii, 14). Similar cuttings in the worship are mentioned by Lucan (Phars. i, 560), and alluded to by Aelius Lampridius (Comm. p. 206), by Tertullian (Apol. 9), and Lactantius (Div. Inst. i. c. 21, 29, Paris). Herodotus, speaking of means used for allaying a storm, uses the words ἵππος πονηροῦ, which may mean cutting the flesh, but more probably offering human sacrifices (Herod. vii, 131; ii, 119, with Schweighäuser's note; see also Virg. Aen. ii, 116; Lucr. i, 85). Agreeably to the inference which all this furnishes, we find Tacitus declares (Hist. i, 4) that "the gods care, not for our safety, but punishment." In fact, it was a current opinion among the Egyptians, that self-cruelty was intended to bring happiness; and in no part of the heathen world did this opinion more prevail, according to Sanchoniatho's account, than among the inhabitants of those very countries which surrounded that land where God designed to place his people Israel. The prohibition, therefore, is directed against practices prevailing, not among the Egyptians whom the Israelites were leaving, but among the Syrians, to whom they were about to become neighbors (Selden, De Dies Syrius, lib. ii, c. 1). The spirit of Islam is less favorable than that of heathenism to displays of this kind; yet examples of them are not of rare occurrence in the Moslem countries of Western Asia, including Palestine itself. The annexed figure is copied from one which is represented in many of the books of travel in Egypt and the East as it was printed in the eighteenth century. It is described by the missionary Eugenie Roger (La Terre S. s. t., etc., 1646, p. 282) as representing "one of those calenders of the Arabs who is so known as the Abbas name Balhousa," and whom the simple people honor as holy martyrs. He appears in public with a
CYAXARES

Cynamon (Καῦμων; Vulgate, Clemens), a place named only in Judith vii, 3, as lying in the plain (αιρή, A. V. "valley") over against (διανείμοντα) Esdrelom. If by "Esdrelom" we may understand Jezeruel, this description corresponds to the situation of the village Tell Khirbet, on the eastern slopes of Carmel, on a conspicuous position overlooking the Kishon and the great plain (Robinson, Later Res. p. 114; Van de Velde, Narrat. i, 380). The place was known to Eusebius (Καῦμων) and Jerome (Cypriani), and is mentioned by them in the Onomasticon (s. v. Cynamon, Καῦμων), where they identify it with Camon, the burial-place of Jair the Gileadite (Judg. x, 5).—Smith, s. v. Schultz assumes Cynamon to be identical with the modern Kunah, south-east of Little Hermon (Zeitschr. d. morg. Ges. iii, 48); but Dr. Robinson (on emp. p. 839) thinks this inconsistent with the true position (according to his idea) of Bethulia (q. v.). The name Cynamon is only the Greek rendering (καῦμων) of the Heb. name (נוא, nō, a beam) corresponding to the present Fuleh, on the east side of the plain of Esdraelon, a trace of which appears in the notices of the Crusaders (Wilken, Gesch. der Kreuze. iii, 228, 267). But see JOHN. 

Cyaxares (Κυάκαρης), Grecised for the Old Pers. Uvachkata, "beautiful-eyes," Rawlinson, Herod. iii, 455), the name of two Median kings, found in Media. 

2. Cyaxares I was, according to Herodotus, the third king of Media, being the son of Phraortes, and grandson of Dejoces. His father having been killed while besieging Ninus (Nineveh), he, immediately on his accession, B.C. 684, collected all the military resources of the empire to revenge his father's death; but he was called away from the siege of Nineveh, either to meet an attack of the Scythians, by whom he was defeated, and reduced to a tributary condition of great rigor for many years, B.C. 684-677 (Herod. i, 108). Herodotus elsewhere (i, 79 sq.) gives a different account of this war, as having originated in the treachery of Alyattes of Lydia, who, having deposed some fugitives who had served up to Cyaxares as a banquet one of his own sons whom they had killed. The war, carried on for five years against the Lydians by the Median monarch, who evidently still retained his throne, was terminated by the mutual armistice inspired by an eclipse, which has been variously calculated, but probably was that of Sept. 30, B.C. 610 (Bailly, Philos. Trans. 1811; Ottmann, Schrif. der Berl. Acad. 1812-13; Hales, Anal. of Chronology, i, 74-78; Ideler, Handbuch der Chronologie, i, 200 sq.; Fischer, Griech. Zeitaf. s. a. 610). Cyaxares after this expelled the Scythians, B.C. 657, and in the following year, with the aid of the king of Babylonia, took and destroyed the Median capital, at that time governed by Sardanapalus. This event is referred to in the Apocrypha (Tob. xiv, 15), where the Median king is styled "Abaseraus" (q. v.), and his Babylonian ally is called Nebuchadnoseor, doubtless referring to Nabopolassar, the father of Nebuchadnezzar. See BABYLONIA. The result of this campaign, according to Herodotus, was, that the Medes made the Assyrians their subjects, except the district of Babylon, probably meaning that the king of Babylon now obtained complete deliverance from the yoke of Assyria. The league between Cyaxares and the king of Babylon is held by Polyhistor and Abydenas (μαχης ενεσσυ, Chromat. i, 184, 185). It can be so taken, of course, with the mind, an earnest and effective preacher, an adept in the management of ecclesiastical business. His ministry was characterized by several powerful revivals of religion, in which his wisdom, zeal, and success were very conspicuous. His printed works consist of a number of occasional sermons, tracts, pamphlets, articles, and tracts for charity and general usefulness, e. g., the subjects of Baptism, the Atonement, the Purity of the Ministry, Capital Punishment, etc.—Sprague, Annals, iv, 432.

CUTTING OFF (FROM THE PEOPLE). See EXCOMMUNICATION.

Cutty-stool, the stool or seat of repentence in the Scotch Kirk, placed near the roof and painted black, on which offenders against chastity sit during service, professing repentance and receiving the minister's rebuke. It is somewhat remarkable that a breach of the seventh commandment should be the only sin subjecting the offender in the Scotch Church to this sort of discipline.

Cuyler, Cornelius C., D.D., born at Albany, N. Y., Feb. 15, 1786; graduated at Union College 1801; studied theology under Rev. Dr. Livingston and Bassett; licensed 1808 in the Reformed Dutch Church; settled in Poughkeepsie 1808-1833, and from that year until his death, Aug. 31, 1850, was pastor of the Second Presbyterian Church, Philadelphia. Dr. Cuyler is represented as an excellent model of diligence, fidelity, and worth, combined with strong moral principle, breadth of mind, an earnest and effective preacher, an adept in the management of ecclesiastical business. His ministry was characterized by several powerful revivals of religion, in which his wisdom, zeal, and success were very conspicuous. His printed works consist of a number of occasional sermons, tracts, pamphlets, articles, and tracts for charity and general usefulness, e.g., the subjects of Baptism, the Atonement, the Purity of the Ministry, Capital Punishment, etc.—Sprague, Annals, iv, 432.
Babylonian king. They have, however, by mistake, put the name of his son Asnapper (Asyrtages) for Cy- 
axares (Clint, l, 271, 279). Cyaxares was a brave 
and energetic, but violent and cruel prince, and died 
B.C. 594, after a reign of 44 years, leaving the throne 
to Astyages (Herod. i, 73, 74, 103-106; iv, 11, 12; vii, 
20).—Smith, Dict. of Class. Biog. s. v.

2. CYAXARES II, the son of Astyages and grand-
son of the preceding, succeeded his father at the age 
of forty-nine years; but, being of a gentle disposition, 
he renounced the imperial principality of the house of his 
nephew and son-in-law Cyrus. This account is given 
by Xenophon (in his Cyropedia), with which, how-
ever, the statements of Herodotus and Ctesias ma-
terially disagree. See CYRUS. This Cyaxares is be-
lieved to be the ‘Darius the Mede’ (q. v.) referred to 
in the book of Daniel (ix, 2).

Cycle, a certain number of years in civil and 
eclesiastical chronology. The Lunar Cycle (cycle 
launar, or deccanasis) embraces nineteen years, after 
the expiration of which the days of the new and full 
moon generally fall again upon the same day of the month.
The Greek astronomer Meton is the inventor of this 
cycle. All the ancient astronomers of Syria, to-
ward the close of the third century, first used it for 
calculating Easter (q. v.). When the Council of Nice 
terminated the Easter controversy, and established 
uniformity in the celebration of Easter, the bishops of 
Alexandria were commissioned to calculate annually 
the time of Easter and to communicate it to the other 
metropolitans. At first the bishops of Alexandria 
used astronomical calculations, but subsequently they 
again adopted the lunar cycle, and by means of it 
calculated Easter for a number of cycles in advance. 
Thus the patriarch Theophilus of Alexandria prepared 
an Easter cycle for 480 years, or 22 lunar cycles, be-
ginning with the year 268 of the Christian era. This 
cycle was, however, not well received in the Western 
churches, and patriarch Cyril consequently reduced it 
to 95 years, or five lunar cycles. This new Easter 
cycle extended from 457 to 551. When it approached 
its termination, Dionysius Exiguus (q. v.), in 625, 
proposed a new Easter cycle, which embraced 16 lunar 
cycles, or 304 (Julian) years. The defects of this cycle resulted from the in-
accuracy of the Julian year, and were not remedied 
until the introduction of the Gregorian calendar. 
Nearly connected with the lunar cycle is the Golden 
Number (q. v.), which indicates what place a given 
year occupies in the lunar cycle of the Sus (or of the 
domical letter) embraces 28 years, after the expiration of which the Sundays, and conse-
sequently also the days of the week, fall again upon the 
same days of the month. In Christian chronology it 
became early customary to use the first seven letters 
of the alphabet for designating the seven days of the 
week. A was always used for the 1st of January, and 
the letter upon which fell the first Sunday of the year 
was called the Dominical Letter, which, in ordinary 
years, designated every Sunday of the year. But in 
every fourth year the 25th of February was intercala-
ted, and it had the same letter as the 24th of Feb-
ruary, the intercalary year having two domical letters; 
one applying from Jan. 1 to Feb. 24, and the second 
from Feb. 25 to the close of the year. As an ordinary 
year consists of 52 weeks and 1 day, the domical 
letter of the new year is generally the one preceding 
the domical letter of the year past; and if all years 
were of the same length, the same domical letter would 
revert every seventh year. As there is, 
however, a change of one day every fourth year by the 
tericalation of one day, and the consequent ad-
vance of the domical letter, it takes four times sev-
en, or 28 years, before the cycle is completed, and the 
same domical letters recommence. 

Other slight disturbances in the computing by the 
omenion of the intercalary day three times in every 
400 years (thus, in the years 1700, 1800, 1900).

To find the dominical letter of a particular year, it 
is first necessary to find the place of the year in the 
cycle of the sun. As, according to the chronology of 
Dionysius, Christ is said to have been born in the 
year 4, accordingly the 3rd year of the cycle of the 
Sun, and the 6th place of a particular year in the cycle 
of the sun is found by adding 6 to the given year, and dividing the whole by 28, the 
remainder indicating the place of the year in the cycle. 
For instance, to find the dominical letter for the year 
1868, we add 9 and divide by 28; thus, 28 
leaves a remainder of 1. The year 1869, there-
fore, is the first of the cycle of the sun for the present 
(tion to the intercalary day in the year 
1800, as stated above, interrupting the regular 
order of the cycle). The cycle of the dominical letter 
is as follows:

The intercalary year 1868, as the first of a new cycle, 
has therefore the two dominical letters a, d, from 
After thus ascertaining the dominical letter of the year, 
it is easy to find what days of every month are Sun-
days. For that purpose the initial letters of the sev-
eral words in the following two hexameters are used: 

Astro / Debi / Dominae / Gratiaeque / Debibi / Deos / Gratias / Christo / dicere / Aureis / Dana / Cibis / Dedi. / 
The initial letters of the words of these two verses are 
the letters designating the first days of every month. 
A being the 1st of January, and E being the dominical 
letter of the year 1868 from Jan. 1 to Feb. 24, the 
Sundays of 1868 are the 5th, 12th, 19th, and 26th of Jan-
uary. The initial D of the second word shows that the 
first dominical letter (E) of February falls on the 20 of 
February. For March and the following months, the 
domical letter of the year 1868 is D; consequently, 
the first Sundays of the following months are March 
1, April 5, May 3, June 7, July 5, August 2, September 
6, October 4, November 1, and December 6.

Finally, in order to ascertain upon what day of the 
month and in what week full and new moons occur, the 
Ephemerides are used. — Wetzer und Welte, Kirchen-
Leben ii, 990. See EPHEMERIDES; CHRONOLOGY, CHRISTIAN.

Cymbal (κυμβαλά, cymbala), in the pl. 2 Sam. vi, 
5; Ps. 11, 5; or κυμβαλάς, cymbalas, in the dual, 1 Chron. 
xxii, 8; xxv, 16, 19, 29; xvi, 5, 42; xxv, 1, 6; 2 Chron. 
vii, 12, 18; xxix, 25; Exod. xii, 10; Neh. xii, 27; both 
from κυμβάλα, cymbala, to tinkle; εὑρίσκει, in the pl. 1 
Exod. iv, 9; Judith xvi, 2; 1 Marc. iv, 54; 1 Cor. xii, 
1; a musical instrument consisting of two convex 
pieces of brass, which are struck together to make the 
ynym or time, and produce a loud clanging sound. 
They are generally employed in connection with the 
drum in our concert and oratorios. Josephus (Ant. vii, 13, 
3) describes in like manner the cymbals (εὑρίσκει) 
used in the Temple services as "large plates of brass."
They were used from the most ancient times in the 
East as a part of a martial band in public religious 
ocasions (1 Chron. xii, 8), and also by females in con-
secrated service, as in the procession of the 
Chryseis in Gen. XXXIV, hom. 48; Clem. Al. 
Prolog. ii, 4); also along with the drum (Pliny, v, 11).
Nietzsche (Reichs, l, 181, pl. 27) learned that in Arabia two 
kinds of castanets were employed in a similar manner; one 
of small metal clappers held between the thumb and 
finers, especially by females, as in the dancing 
girls of Egypt (Lit. Mod. Eg. ii, 106); the other con-
sisting of larger pieces of metal, like our cymbales. 
Pfeiffer (Mus. of the Hebr. p. 65) thinks this distinction
Asaph, Heman, and Jeduthun, the renowned conductors of the music of the sanctuary, employed the "loud cymbals" possibly to beat time, and to give the signal to the choir when it was to take part in the sacred chant. The ancient Egyptians likewise had cymbals and cylindrical maces (crotals, or clappers), two of which were struck together, and probably emitted a sharp metallic sound. The cymbals were of mixed metal, apparently brass, or a compound of brass and silver, and of a form exactly resembling those of modern times, though smaller, being only seven, or five inches and a half in diameter. The handle was also of brass, bound with leather, string, or any similar substance, and being inserted in a small hole at the summit, was secured by bending back the two ends. The same kind of instrument is used by the modern inhabitants of the country, and from them have been borrowed the very small cymbals played with the finger and thumb, which supply the place of castanets in the cimach dance. These were the origin of the Spanish castanet, having been introduced into that country by the Moors, and afterwards altered in form, and made of chestnut (castaño) and other wood instead of metal. The cymbals of modern Egypt (see *Deser. de l'Egypte*, xii, 496 sq.) are chiefly used by the attendants of sheiks' tombs, who travel through the country at certain periods of the year to exact charitable donations from the credulous or the devout among the Moslems by the promise of some blessing from the indulgent saint. Drums and some other noisy instru-

Dancing Figures, with Castanets.—From Herculanenum.

former probably consisted of four small plates of brass or of some other hard metal; two plates were attached to each hand of the performer, and were smitten together to produce a loud noise. The latter consisted of two larger plates, one held in each hand, and struck together as an accompaniment to other instruments.

Ancient Cymbals.—From Herculanenum.

ments, which are used at marriages and some other occasions, accompany the cymbals, but these last are more peculiarly appropriated to the service of the sheikhs, and the external ceremonies of religion, as among the ancient Egyptians; and a female, whose coffin contained a pair of cymbals, was described in the hieroglyphics of the exterior as the minstrel of a deity. The cylindrical maces, or clappers, were also admitted among the instruments used on solemn occasions, and they frequently formed part of the military band, or regulated the dance. They varied slightly in form, and some were of wood or of shells; others of brass, or some sonorous metal having a straight handle, surmounted by a head or other ornamental device. Sometimes the handle was slightly curved, and double, with two heads at the upper extremity; but in all cases the performer held one in

Ancient Egyptian Cymbals (5 inches in diameter).—From the British Museum.
each hand; and the sound depended on their size, and the material of which they were made. When wood they corresponded to the crotala of the Greeks, a supposed invention of the Sicilians, and reported to have been used for frightening away the fabulous birds of Stymphalus; and the paintings of the Etruscans show that they were adopted by them, as by the Egyptians, in the dance (Wilkinson, Anc. Egypt, i, 99 sq.). Among the Greeks and Romans cymbals of a similar description were anciently used in the worship of Cybele, Bacchus, Juno, and other earlier deities. They were probably derived from the East. At Rome they are first mentioned in Livy's account (xxxix, 9) of the Bacchic orgies introduced from Etruria (Smith, Dict. of Class. Antig., s. v. Cymbalum). See Mendelssohn's Preface to Book of Psalms; Kinkel; Lewis, Origines Hebraea (Lond. 1724, 175-7); Forkel, Geisch der Musik; Jahn, Archæologia, Am. ed., cap. v, § 96, 2; Munk, Palest., p. 456; Eeendt, Dict. of Music, i, 112. Lampe has an excellent dissertation, De Cymbalibus veteribus (Trav. ad Rh. 1708; also in Ugolini Thes. xxxii). Monographs on the subject have also been written in Latin by Ellis (Promptula Sacra, Rotterd. 1727, p. 257-578), Magnus (Amst. 1664), Zorn (Opusc. i, 111-135). See Musical Instruments.

Cypress (Cupressus sempervirens). From its korymbos; Sept. ἀργυροδέλανος, but most copies omit; Vulg. ἑξερ.) is mentioned only in Isa. xlv, 14: "He (i. e. the carpenter, ver. 15) Heweth him down cedars, and taketh the cypress," for the purpose of making an idol. There is no doubt that the wood must have been of a texture fit to be worked, as well as to retain the shape given to it. Though translated "cypress," we have no proof that this tree was intended, but it is well suited for the purpose indicated. See Frn. The Greek translators, Aquila and Theodotion, have employed a word which denotes the wild or forest oak (ὑπαρχοδέλανος). The oldest Latin version renders the Heb. word by ἑξερ, "the evergreen oak" (Rosenmüller, p. 317). As the wood of this species is well suited for being worked into images, and was so employed by the ancients, it is possible that it may be that intended, though we have no satisfactory proof of its being so. Celsus (Hierobol. ii, 269, 70) defends the rendering of the Vulg. in Isa. xlv, 14, but the etymology of the word from ἡπαρχος, to be hard (as in Latin we get robust, an oak), equally well suits the cypress, and there is great probability that the tree mentioned by Isaiah with the oak is the cypress, in keeping with the "cypress" (ἐνερίριος) of the Apcocypha. In Ecclus. xxv, 13, it is described as growing upon the mountains of Hermon; and it has been observed by Kitto (Phys. Hist. of Palest. p. 323) that if this be understood of the great Hermon, it is illustrated by Po-

Cypress Branch and Cone.

very small imbricated leaves, which remain on the trees five or six years. Du Hamel states that he has observed on the bark of young cypresses small partic-

ules of a substance resembling gum tragacanth, and that he has seen bees taking great pains to detach these particles, probably to supply some of the matter required for forming their combs. This cypress is a native of the Grecian Archipelago, particularly of Ctesis (the ancient Crete) and Cyprus, and also of Asia Minor, Syria, and Persia. It may be seen on the coast of Palestine, as well as in the interior, as the Mohammedans plant it in their cemeteries. That it is found on the mountains of Syria is evident from the quotations by Celsus (Hierobol. i, 238), from Cyril of Alexandria (in Eusiam, p. 846), Jerome (Comment. in Hos. xiv, 6), and others. See Cedar. The wood of the cypress is hard, fragrant, and of a remarkably fine close grain, very durable, and of a beautiful reddish hue, which Pliny says it never loses (Hist. Nat. xvi, 88). As to the opinion respecting the durability of the cypress-wood entertained by the ancients, it may be sufficient to adduce the authority of Pliny, who says that "the statue of Jupiter, in the Capitol, which was formed of cypress, had existed above 600 years, without showing the slightest symptom of decay, and that the doors of the temple of Diana at Ephesus, which were also of cypress, and were 400 years old, had the appearance of being quite new." This wood was used for a variety of purposes, as for wine-presses, poles, rafters, and joists, and was an especial favorite for funereal grounds. Horace says (Carm. ii, 14, 23) that whatever was thought worthy of being handed down to remote posterity was preserved in cypress or cedar wood; and Virgil refers to it in similar terms (Georg. ii, 442: En. v, 64). (See Penny Cyclopaedia, s. v. Cupressus.) See Botany.
Cyprian (Κύπριος), a Cypriot or inhabitant (2 Mac. iv. 29) of the island of Cyprus (q. v.).

Cyprian Manuscript (Codex Cyprius, so called from its place of discovery), usually designated as K of the Gospels, one of the important uncial MSS. of the N. T., containing the four Gospels complete, was brought into the Colbert collection from Cyprus in 1673, and is now in the Royal or National Library at Paris, where it is No. 63. It is an old quarto, written in a single column of about twenty-one lines on each page, in large upright and compressed characters, somewhat irregular. A single point of interunction often standing where the sense does not require it, seems to indicate that it was copied from a text also used in εὐαγγελία. The subscriptions, κτίσις, Ammonian sections, and indices of the εὐαγγελία of the last three Gospels, are believed to be the work of a later hand; the Egyptian canons are absent. The breathings and accents are by the first hand, but often incorrectly placed. The writing, etc., may be taken as proof that the MS. is not older than the middle of the ninth century. Westcott used readings from it for his N. T., and Scholz also collated it, but not accurately. This has been done more thoroughly by Tischendorf and Trechel. The MS. yields many valuable readings. — Scrivener, Introdoc. p. 101 sq.; Trechel, in Horne's Introdoc. iv. 201 sq. See Manuscripts, Biblical.

Cyprian, Tractatus Car- millennium, a bishop and martyr, born in North Africa, probably in Carthage, about the beginning of the third century. His father was wealthy, and one of the principal senators of Carthage. His noble parentage insured him a good education, by which his natural endowments, which were of a high order, were duly developed, both intellectually and morally, according to the heathen type of training. The representation he gives, after his conversion to Christianity, of his earlier immoral life, is generally regarded as an exaggerated springing from humility, and the legend to the effect that he had given himself to the practice of sorcery is not accredited. His life, while he still stood in heathenism, is very much buried in obscurity, even as to the precise time and place of his birth. His biographer, the deacon Pontius, regarded all this as unworthy of mention "in view of that spiritual greatness" which characterised his subsequent life. It is said that he became without an earnest student, and that, having enjoyed all the advantages furnished in his time, he excelled in the study of oratory and eloquence, and devoted himself to the teaching of law and rhetoric in his native city, where he was greatly admired, became wealthy, and lived in affluence and grandeur. His life seems to have received new impetus, concentrated purpose, and true meaning from the time of his conversion and baptism, which occurred A.D. 246, when he was not far short of fifty years old. He had been won to Christianity by a presbyter, Caecilius, who also instructed and prepared him for baptism, at which time Cyprian added to his name that of Cyprianus. In the first instance, his teacher. Before his conversion he was exercised by a deep sense of the vanity of heathenism. In his tract De Gratia Dei, addressed to his friend Donatus soon after his conversion, speaking of his spiritual state while yet in heathenism, he says: "I lay in darkness, and float on the world's boisterous sea, with no resting-place for my feet, ignorant of my proper life, and estranged from truth and light." God's mercy in his baptism he ever praises as being a marked epoch in his life. He felt himself to be a new man, having received "by means of the regenerating wave" the "second birth, by the Spirit derived from on high." As a new man, he now devoted himself fully to the study of the holy Scriptures, and also to a life of celibacy and voluntary poverty. He studied the holy Scriptures earnestly, and also the best ecclesiastical writers known, among whom Tertullian was his favorite, with whom he communed in mind every day, calling for him, as Jerome relates, with the word, "Hannibalis Mater," and he sold his estate, and gave the proceeds, together with almost all else that he possessed, for the support of the poor. This he did with the double end in view of renouncing and despising all secular influences, and at the same time fulfilling the law of charity, which he believed God prefers to all sacrifices. Besides the above-mentioned letter, ad Donatum, he about this time wrote several works, in which he unfolded his new principles and convictions, as, for instance, De idolorum vanitate and his Libri III testamentorum ante. Judeos. So wonderfully grew his Christian reputation that, on the death of Donatus, the bishop of Carthage, there was a pressing cry from both clergy and laity that Cyprian might be ordained as his successor. He modestly declined the nomination, but the people would not be put off. They so besieged him with their importunities that he fled into retirement to avoid the popular pressure; but the place of his concealment was discovered, and his people surrounded it, and closed every avenue of escape, and refused to withdraw until he should yield to their wishes. He at length humbly bowed to what seemed to him now a necessity imposed by him from the providence of God. Thus, in perhaps not more than two years after his baptism, with the unanimous approbation of the bishops of the province, he became bishop of Carthage A.D. 248. His elevation to this place of dignity and power, though effected under such wide favor, was for him the beginning of long and severe conflicts. Opposition to him arose among some presbyters. Some of the more aged, among whom were Fortunatus and Donatus, who had themselves aspired to the vacant office, with some of their friends among the laity, opposed his elevation as being still only a novice in the Church. See Donatists. These gave him much trouble. He treated them with kindness, but at the same time maintained the authority and dignity of his office with decision. In the time of his office he left to the official term, luxurious extravagance and immorality had gotten the upper hand in society. Cyprian pushed earnestly for reform and discipline. This became the occasion of increased opposition, his strictness having been attributed to a spirit of hierarchical assumption of power, though he did nothing, especially in the giving of his ordination to priests, without first gathering in the views of the presbyters, whom he calls his com-presbyters (comp. Ep. 14). Still worse troubles came with the persecution under Decius, which broke out not much more than a year after he had been raised to the episcopal office, in which the heathen populace
with violence demanded his death, crying Cypriani ad lamen! The cruel edict came to Carthage about the beginning of A.D. 256. The heathen hailed it as letting loose their rage upon one who, having but a few months been so prominent in heathenism, now occupied the front rank in the Christian Church. He accordingly was their first mark. He, however, saved himself by flight, which was made the occasion for fresh reproaches from those in the Church who still bore the old grudge against him. Some saw cause to his self-sacrifice, but many praised it from considerations of prudence, and as a course which would still preserve his great worth and influence to the Church after peace should be restored. He kept himself in constant correspondence with the Church, and in the deepest sympathy with the trials of the confessors and martyrs. He longed to be with them, and looked upon himself as deprived of all this by a necessity painful to his heart. He himself seems to have possessed the consciousness of having been in the path of duty, and he gave abundant evidence in his after life, in times of pestilence and in the persecution of Valerian, that he regarded the sufferings. Other contemporaries knew no fear of death in the path of duty. The strict and severe manner in which, after his return from flight, he dealt with those who had denied the faith under trial was not favorably regarded even by those who had faithfully endured the persecution, and was viewed as coming with less charity and more severity than would have become one who had himself withdrawn from the fire. The effects of the persecution had been terribly disastrous. Multitudes were driven from the faith like chaff before the wind. Cyprian looked upon it as a providential sifting of the Church made necessary by its previous worldly and immoral state, and hence was concerned that the lapse should not be restored without the strictest care. Of the havoc and confusion thus produced in the Church, and the troubles of restoration, he gives a sad picture in his work De Lapsis. His strictness with the lapse gave rise to new troubles. The faction of disaffected presbyters was headed now by Felicissimus, with whom were joined Novatian and four others who refused to acknowledge his authority in the form he exercised it. In the case of the lapsed. They undertook to establish an independent church, into which the lapsed were to be allowed to enter without further delay. Many of the impatient among the lapsed were charmed by the proposal. The result was a serious schism. Cyprian maintains his position firmly, and in a letter warns all against this snare of the devil (Epistle 43). An important series of controversies ensues relating to the unity of the Church, the nature of schism, the validity of baptism by heretics, and affiliated points, which became the occasion of one of the most important works of Cyprian on The Unity of the Church. This controversy also gradually involved the question of the independency of the episcopate, and the merits of the claims of Stephen, the bishop of Rome, as over against the bishop of Carthage. (See Hug's Geschichte des Westlichen Christentums, iii. 219, 220; also four articles on Cyprian by Dr. Nevin in The Mercersburg Review, vol. iv, 1852, particularly p. 527-556.) In this Novatian controversy Cyprian showed great bitterness as well as great firmness, and his statements as to his adversaries are to be taken with much graver allowances. Hagenbach, in Herzog's Real-Encyclopädie, briefly sums up the course of his life, and gives an estimate of his character, which we translate: "At length the time came when he should have opportunity to wipe out the stain which was supposed to rest on his name in consequence of his flight by the blood of his own martyrdom. It took place in the Valeriaiae Festival, for Romans usually, on August, clot; the title was demanded of him by the Roman consul, Aquasius Paternus, to offer to the gods. Having refused, he was banished to Caritis, a day's journey from Carthage. From this place he comforted the Church through letters. In a dream he saw foreshadowed the bloody fate which should in a year befall him. Having been called back to the city, he withdrew for a brief season to his country house. Under the consul Galerius Maximus, the successor of Aquasius Paternus, he received his final hearing. With serene composure and the words 'God be praised,' he welcomed the sentence, which was that he should be executed by the sword. Followed by a large crowd of spectators, he was led out to the place where he had planted with trees. Here he laid off his over-clothes, knelt down, prayed, and received the stroke of death, on the 14th of September, A.D. 258. To the executioner he gave twenty-five pieces of gold. The Christians buried him near the spot on which he suffered martyrdom. Over his grave, as well as on the place where he suffered death, churches were afterwards erected, which were, however, demolished at the invasion of the Vandals under Genseric. According to a legend, Charlemagne conveyed his bones to France, where they were preserved, first at Lyons and afterwards at the church of Our Lady of L stemming. The church also at Venice, Compiègne, and Rosnay in Flanders claim to be in possession of his remains.

The character of Cyprian and his acts, in the various circumstances of his life, have been variously estimated. While some admire and praise his exalted views and shining virtues as a Church dignitary, others charge him with the charge of the Holy Spirit. In his zeal for the unity of the Church, he showed no small amount of directness with which he honored his calling, the high degree of self-denial he manifested in life and in death, as well as his zeal for the unity of the Church. Herein we must seek his peculiar greatness. Speculative thinking was not his forte. In this respect he is excelled not only by the Alexandrians, but also by Tertullian, to whose theology he conformed his own. Prominent among his doctrinal presentations is that of the Church, the unity of which he develops, not so much dialectically and theoretically as he apprehends it in actual life, and sets it forth in telling pictures in a concrete and energetic way. (Comp. his work, De unitate ecclesiae.) Cyprian may be regarded as the father of the Roman episcopal system. "In consequence of confounding the ideas of the visible and invisible Church, he referred all Christian life to communion with a definite external Body. In his view the Church was the work of God, founded by Christ, of which the bishops were the pillars; to them the Holy Spirit was communicated through the ordination of the apostles, and hence they were the indispensable links for connecting the Church with Christ. Only through them could the Holy Spirit be imparted, and out of the Church no one could be saved. Extra ecclesiam nullum salus. It is of no avail, says Cyprian, what any man teaches; it is enough that he teaches out of the Church. It can be only human outrageous willfulness to substitute anything for a divine institution, to erect a human altar instead of the altar of God. Cyprian maintained that Cyprian laid the foundations of the primacy of the see of Rome. He placed the unity of the Church in the episcopate, making the bishops representatives of the apostles; and further, he made the chair of St. Peter the centre of episcopal unity, and the Church at Rome the rock of all (Epist. 45). Practically, in his quarrel with pope Stephen (see above), he denied this primacy; but the doctrine lay in his own writings, and, after he had passed away, the legitimate inferences from his doctrines were drawn by his successors. But, while the writings of Cyprian afforded undoubtedly a basis, on the one hand, for Romanism, by their directness, and on the other hand, to give it an unapproximable merit, on the other, of setting forth Scripture as the sole ground of faith. During his controversy with pope Stephen, who was continually talking of
CYPRIARCH

The title of Nicanor (q. v.) as Syrian viceroy of the island of Cyprus (2 Macc. xii, 2).

CYPRIUS (Κύπριος, i.e. Cyprus), the name of several females of the Herodian family. See Herod.

1. An Idumean (or Arabian) of noble family, wife of Antipater the elder, by whom he had four sons, Phasaelus, Herod (the Great), Joseph, and Pheroras, and a daughter, Salome (Joseph. Ant. xiv, 7, 3; War i, 9, 9).

2. The second of the two daughters of Herod (the Great) by Mariamne; she was married to her cousin Antipater, the son of Salome, Herod's sister (Joseph. Ant. xviii, 5, 4).

3. The second of the two daughters of Phasaelus (Herod the Great's brother) by his niece Salamis; she was married to Agrippa I, son of Aristobulus, by whom she had two sons and three daughters (Joseph. Ant. xviii, 5, 4; War ii, 11, 6). She once divorced her husband from his purpose of suicide (Ant. xviii, 5, 2).

4. The daughter of the above (No. 2) wife of Antipater; she was married to Alexas Selcias (Joseph. Ant. xviii, 5, 4).

5. A daughter by the marriage preceding (ii.).

Cyprius (Κύπριος), the modern Kefris, one of the largest islands in the Mediterranean, and next to Sicily in importance. It is about 140 miles in length, and varies in breadth from 50 to 5 miles. The interior of the island is mountainous, a ridge being drawn across the entire length, attaining its highest elevation near the central region anciently called Olympus. It had several names in early ages, mostly poetical. From its numerous headlands and promontories, it was called Κεφαλή, Κύβρις, or the Ηχώδ, and from its evergreen fertility, Μαρμαι, Μοκαρίς, or the Μαμήρης (Horace, Carm. iii. 28, 9). Its proximity to Asia Minor, Phoenicia, and Egypt, and its numerous havens, made it a general rendezvous for merchants. "Corn, wine, and oil," which are so often mentioned in the Old Testament as the choicest productions of Palestine (Deut. xii. 17; 1 Chron. ix. 29; Neh. x, 59; Jer. xxxi, 12), were found here in the highest perfection. The forests also furnished large supplies of timber for shipbuilding, which rendered the conquest of the island a favorite project of the Egyptian kings. It was the
beast of the Cypriots that they could build and complete their vessels without any aid from foreign countries (Amman, Marcell. xiv. 8, § 14). Among the mineral products were diamonds, emeralds, and other precious stones, alab, and asbestos; besides iron, lead, zinc, with a portion of silver, and, above all, copper, the far-famed Cyprus. The principal mines were in the neighborhood of Tamasus (Strabo, xiv. 6; iii. 245, ed. Tauczn.). Pliny ascribes the invention of brass to this island (Nat. Hist. xxxiv. 2). Cyprus is a famous place in mythological history. The presiding divinity of the island was Venus, who had a celebrated temple at Paphos, and is hence often called the Paphiaca and the goddess of gardens. Her inhabitants were luxurious and effeminate (Herod. i. 119; Athen. 12, p. 516; Clearch. apud Athen. 6, p. 255). Nevertheless, literature and the arts flourished here to a considerable extent, even at an early period, as the name of the Cyprus Curium, ascribed by some to Homer, sufficiently attests (Herod. ii. 118; Athen. 15, p. 689). Situated in the extreme eastern corner of the Mediterranean, with the range of Lebanon on the east and that of Taurus on the north distinctly visible, it never became a thoroughly Greek island. Its religious rites were half Oriental, and its political history has almost always been associated with Rome and Asia.—Smith's Dict. of Class. Geog. s. v. See Paphos.

Cyprus was originally peopled from Phoenicia (Ge- senius, Mon. Phoen. p. 122). Amasis, king of Egypt, subdued the whole island (Herod. ii. 183). In the time of Herodotus the population consisted of Athenians, Arcadians, Phoenicians, and Ethiopians (vii. 90); and for a long time the whole island was divided into nine petty sovereignties (Xenoph. Cyrop. viii. 6, 21; Pliny, v. 36; Diod. Sic. xvi. 45). It became a part of the Persian empire (Herod. iii. 19, 91), and furnished ships against Greece in the expedition of Xerxes (ib. vii. 80). For a time it was subject to Greek influence, but afterward became tributary to Persia. After the battle of Issus it joined Alexander, and after his death fell to the share of Ptolemy. In a desperate sea-fight off Salamis (q. v.), at the east end of Cyprus (B.C. 306), the victory was won by Demetrius Pollior- cetes; but the island was recovered by his rival, and afterward it received the power of the Ptolemies, and was regarded as one of their most cherished possessions (Livy, xiv. 12; Josephus, Ant. xiii. 10, 4; Strabo, xiv. 684; Diod. Sic. xix. 59, 79; xx. 21, 47). It became a Roman province (B.C. 58) under circum- stances inconsiderable to Rome (Strabo, xiv. 684; Flor. iii. 173, 1; Dion Cassius, lii. 31; xxxix. 22). At first its administration was joined with that of Cilicia, but after the battle of Actium it was separately governed. In the first division it was made an imperial province (Dion Cass. liii. 12). From this passage and from Strabo (xiv. p. 683) it has been supposed by some, as by Baronius, that Luke (Acts xii. 7) used the word *procolos* (procolos, "distant,") because the island was still connected with Cilicia; by others, as by Grotius and Hammond, that the evangelist employs the word in a loose and general manner. But, in fact, Dion Cassius himself distinctly tells us (ib. and liv. 4) that the emperor afterwards made this island a senatorial province, so that Luke's language is in the strictest sense correct. Further confirmation is supplied by coins and inscriptions, which mention oth- ern procolous of Cyprus not very remote from the time of Sergius (q. v.) Paulus. The governor appears to have resided at Paphos, on the west of the island. Under Flavius Josephus it received the road from Jerusalem at the death of Stephen, and then as furnishing disciples who preached the Gospel to Gentiles at Antioch. Thus, when Paul was sent with Barna- bas from Antioch on his first missionary journey, Cy- prus was the first scene of their labors (Acts xiii. 4–15). Again, when Paul and Barnabas separated and took different routes, the latter went to his native island, taking with him his relative Mark, who had also been there on the previous occasion (Acts xv. 39). Another Christian of Cyprus, Muson, called 'an old disciple,' and therefore probably an early convert, is men- tioned Acts vii. 59. For the persecutions which drove the disciples from Jerusalem at the death of Stephen, and then as furnishing disciples who preached the Gospel to Gentiles at Antioch. Thus, when Paul was sent with Barna- bas from Antioch on his first missionary journey, Cy- prus was the first scene of their labors (Acts xiii. 4–15). Again, when Paul and Barnabas separated and took different routes, the latter went to his native island, taking with him his relative Mark, who had also been there on the previous occasion (Acts xv. 39). Another Christian of Cyprus, Muson, called 'an old disciple,' and therefore probably an early convert, is men- tioned Acts vii. 59. For the persecutions which drove the disciples from Jerusalem at the death of Stephen, and then as furnishing disciples who preached the Gospel to Gentiles at Antioch. Thus, when Paul was sent with Barna- bas from Antioch on his first missionary journey, Cy- prus was the first scene of their labors (Acts xiii. 4−15). Again, when Paul and Barnabas separated and took different routes, the latter went to his native island, taking with him his relative Mark, who had also been there on the previous occasion (Acts xv. 39). Another Christian of Cyprus, Muson, called 'an old disciple,' and therefore probably an early convert, is men- tioned Acts vii. 59. For the persecutions which drove the disciples from Jerusalem at the death of Stephen, and then as furnishing disciples who preached the Gospel to Gentiles at Antioch. Thus, when Paul was sent with Barna- bas from Antioch on his first missionary journey, Cy- prus was the first scene of their labors (Acts xiii. 4−15). Again, when Paul and Barnabas separated and took different routes, the latter went to his native island, taking with him his relative Mark, who had also been there on the previous occasion (Acts xv. 39). Another Christian of Cyprus, Muson, called 'an old disciple,' and therefore probably an early convert, is men-
tage of the current, which sets northerly along the coast of Phoenicia, and westerly with considerable force along Cilicia." See SHIPWRECK (or PAUL). All the ancient notices of Cyprus are collected by Meursius (Opera, vol. iii, Flor. 1744). Comp. Cellarii Notit. ii, 266 sq.; see also Engel's Kypros (Berlin, 1843) and Ross's Reisen nach d. Insel Cypern (Halle, 1852). Further accounts may be found in Mannert, Geographicus, VI, ii, 492-454. Modern descriptions are given by Pococke, East, ii, 210-235; Wilson, Landa of Bible, ii, 174-179; Turner, Levant, ii, 40, 528; Mariti, Vingìn in Cyper. (Flor. 1679); Unger and Kotsche, Die Insel Cypern (Wien, 1865); Cesnola, Cyprus (Lond. 1877).

CYPRUS, CHRISTIANITY IN. Bishops of Cyprus are for the first time mentioned in the 4th century. Soon Constantia became the seat of a metropolitan who asserted and maintained his independence of all the patriarchs. At the beginning of the 5th century the patriarch John of Antioch made an effort to have Cyprus incorporated with his patriarchal district, but the Ecumenical Council of Ephesus (431), before which the newly-elected metropolitan Illeginus and two other Cypriote bishops pleaded their right, decided in favor of the independence of Cyprus. Ever since the churches of Cyprus have constituted an independent group of the orthodox Greek Church.—Wetzer und Welte, Kirchen-Lex. ii, 964 sq.

CYTRUS, St. See DUVERGIER DE HAURANNE.

Cypros (Kupí̂n̄, Ghorma, in modern Arabic), a city in Upper Libya, founded by a colony of Greeks from Thera (Santorini), a small island in the Egean Sea (Thirwall's History of Greece, vol. ii, ch. 12). Its name is generally supposed to be derived from a fountain (but according to Justin, Hist. xiii, a mountain), called Kupía, Cyre, near its site. It was built on a table-land, 1800 feet above the level of the sea, in a region of extraordinary fertility and beauty. It was the capital of a district, called from it Cypros (Barca), which extended from the Gulf of Plata (Bomia) to the Great Syrtis (Gulf of Sidra). With its port Apollonia (Musa Soosa), about ten miles distant, and the cities Barca, Thucira, and Hesperia, which at a later period were named Ptolemais, Arrinoc, and Berenice (Strabo, xvii; vol. iii, p. 496, ed. Tauchn.), it formed the Cyrenaic Pentapolis (Mol. i, 4, 5; Livy, x, 5; Ptolem. iv, 4; 11; Amm. Marcell. xxii, 16). It is observable that the expression used in Acts ii, 10, "the parts of Libya about (εἰς) Cyrene," exactly corresponds with a phrase used by Dion Cassius (Αἰσθήσεις ὑπ' ἑπιφάνειαν, iii, 12), and also with the language of Josephus (ἡ πρὸς Κυρπίναν Ἀἰσθήσει, Ant. xvi, 6, 1). See LBYA. Its inhabitants were very luxurious and refined, and it was, in a manner, a commercial rival of Carthage (Forbiger, Handb. der alt. Geogr. ii, 380 sq.; Ritter, Erdk. i, 946 sq.). The Greek colonization of this part of Africa under Battus began as early as B.C. 631, and it became celebrated not only for its commerce, but for its philosophers, physicians, and poets (Herod. iv, 155, 164). It would seem that the old Hellenic colonists cultivated friendly relations with the native Libyans, and to a much greater extent than usual became intermingled with them by marriage relationships (Herod. iv, 168 189). For above 180 years the form of government was monarchical; it then became republican, and at last the country became tributary to Egypt, under Ptolemy Soter. It was besieged by the Romans by Apion, the natural son of Ptolemy Physcon, about B.C. 97 (Tactitus, Ann. xiv, 18; Cicero, De leg. Agrar. ii, 19), and in B.C. 75 formed into a province (Strabo, xvii, 1). On the conquest (B.C. 67) the two were united in one province, and together frequently called Crete-Cyrene. See CRETE. An insurrection in the reign of Trajan led to great disasters, and to the beginning of its decay. In the 4th century it was destroyed by the natives of the Libyan desert, and its wealth and honors were transferred to the episcopal city of Ptolemais, in its neighborhood. The Saracens completed the work of destruction, and for centuries not only the city, but...
the once populous and fertile district of which it was the ornament, has been almost lost to civilization. During three parts of the year the place is tenanted by wild animals of the desert, and during the fourth part the wandering Bedouins pitch their tents on the low grounds in its neighborhood.—Smith, Dict. of Class. Geog. s. v.; Penny Cyclopedia, s. v. Cyrenaica, Cyrene; Rawlinson's Herodotus, iii, 108 sq.

Jews in Cyrene (confirmed by Philo, who speaks of the diffusion of the Jews southward to Ethiopia, ade. Plut. p. 528) prepare us for the frequent mention of the place in the N. T. in connection with Christianity. Simon, who bore our Saviour’s cross (Matt. xxvii, 52; Mark xv, 21; Luke xxiii, 26), was a native of Cyrene. Jewish dwellers in Cyrenaica were in Jerusalem at Pentecost (Acts ii, 10). They even gave their name to one of the synagogues in Jerusalem (vi, 9). Christian converts from Cyrene were among those who contributed actively to the formation of the first Gentile church at Antioch (xi, 20), and among those who are specially mentioned as laboring at Antioch, when Barnabas and Saul were sent on their missionary journey, is Lucas of Cyrene (xiii, 1), traditionally said to have been the first bishop of his native district. Other traditions connect Mark with the first attempted settlement of Christianity in this part of Africa. See AFRICA.

Kyrenische Küstengeland (Berlin, 1849); Hamilton, Wanderungen in North Africa (London, 1856), p. 78; Smith and Porcher, Hist. of Discoveries at Cyrene (London, 1865).

Cyrene (Κυρήνας, Cyrenian, “of Cyrene,” Matt. xxvii, 82; Acts xi, 20; xiii, 1), a native of Cyrene (q. v.) or Cyrenaica, in Africa (Mark xv, 21; Luke xxiii, 26; Acts vi, 9).

Cyrene (Græcoized Κρήνας, Luke ii, 2; see Deyling, Obs. ii, 431 sq., for the Latin Quiros; see Meyer, Comment. in loc.). His full name was PUBLIUS Sulpicius Quiros (see Sueton. Tib. 49; Tacit. Ann. ii, 80). He is the second of that name mentioned in Roman history (see Smith, Dict. of Class. Biog. s. v.), and was consul with M. Valerius Messala, B.C. 12. From the language of Tacitus (Ann. iii, 48), it would appear that he was of obscure origin, a supposition apparently favored by
his surname, Quirinius, if rendered (as it might perhaps be) the Cyrenian, but opposed by it if referred to the old Sabine opulent of Romulus. He is more likely to have been the son of the consul of the same name, B.C. 42. Tacitus, however, states (ut sup.) that he was a native of Lanuvium, near Rome, and was not a member of the ancient Sabulician family; and that it was owing to his military abilities and active services, he was able to become consul under Augustus. He was subsequently sent into Cilicia, where he was so successful in his campaign as to receive the honor of a triumph. In B.C. 1, or a year or two afterwards, Augustus appointed him to direct the counsels of his grandson C. Caesar, then in Armenia; and on his return he visited the city of Tyre, which was at that time living at Rhodes. Some years afterwards, but not before A.D. 5, he was appointed governor of Syria, and while in this office he took a census of the Jewish people. He was a favorite with Tiberius, and on his death, A.D. 21, he was buried with public honors by the senate at the request of the emperor. (Dion Cass. liv. 28; Tacitus, Ann. iii. 22; Strab. xii. p. 569; Josephus, Ant. xiv. i. 3.)—Smith, Dict. of Class. Biog. s. v.

The mention of the name of Quirinius in connection with the census which was in progress at the time of our Lord's birth presents very serious difficulties, of which the solution of these historical facts critical inquiry has not yet attained an entirely satisfactory solution. The passage is as follows: αὐτή ἡ ἀπογραφὴ πρώτη ἐγένετο ἡμιμονεύοντος τῆς Συρίας Κυρινίου, translated in the Authorized Version thus: "Now this taxing was first made when Cyrenian was governor of Syria." Instead of "taxing" it is now agreed that the rendering should be "enrolment" or "registration" (of which use of the word ἀπογράφασθαι many examples are adduced by Wetstein), as it is clear from Josephus that no taxing did take place till many years after this period. The whole passage, as it now stands, may be properly read "This first enrolment took place while Cyrenius was governor of Syria." This appears very plain, and would suggest no difficulty were it not for the knowledge which we obtain from other quarters, which is to the effect, 1. That there is no historical notice of any enrolment at or near the time of our Lord's birth; and, 2. That the enrolment which actually did take place under Cyrenius was not until ten years after that event. The difficulty begins somewhat before the text now cited; for it is said that "in those days there went out a decree from Caesar Augustus that the whole world should be taxed" (enrolled). But since no historian mentions an enrolment as a part of the general emi- nent of the whole empire, and since, if it had taken place, it is not likely to have been mentioned in connection with the emperor of Syria, it is now usually admitted that Judea only is meant by the phrase rendered "the whole earth" (but more properly "the whole land"), as in Luke xxii, 29; Acts xi. 28; and perhaps in xxii, 30. The real difficulties are thus reduced to the two now stated. With regard to the enrolment, it may be said that it was probably not deemed of sufficient importance by the Roman historians to deserve mention, being confined to a remote and comparatively unimportant province. Nor was it perhaps of such a nature as would lead even Josephus to take notice of it, if it should appear, as usually supposed, that no trace of it can be found in his writings.

Quirinius held a census in Judea after the banishment of Archelaus (Joseph. Ant. xviii, i. 1), which took place A.D. 6. It is called by Josephus, "the enrolment (ἀπογραφή)" in Acts x. 37. Hence it is evident that he cannot have held a census in Judea in the year of Christ's birth, as is said in Luke ii, 2, in the capacity of head of the province of Syria (the census, however, being a general one throughout the empire, according to the emperor's command, v, 1). At that time Q. Sentius Saturninus (Tert. adv. Marc. iv, 19), or, if Jesus was born after B.C. 5, Q. Quintilius Varus, must have been governor of Syria (Tiber. Chron. i. 394 sq.). The interpreters have attempted various methods of reconciling the words of Luke, "This taxing was first made when Cyrenian was governor of Syria," Luke ii, 2, with the chronology of Josephus. (See Wolf, Chr. i. 576 sq.; Zorn, Histor. Fisci Jud. p. 91 sq.; Thies, Krit. Anlaut über den Gesch., p. 77 sq.; Thiersch, Gesch. d. Christh. Welt, ii. 301 sq., whose references, however, are not precise; K. Nahmacher, De Augusto ter censum agens, Helmst. 1758, ii 4; Huschke, Úeb. d. zur Zeit der Ge- burt J. Ch. gehalt. Cens. Bresl. 1840; Wieseler, Chron. Synop. p. 111 sq.). Apart from these, those who cut the knot by proposing a division of the Coena Domini (as Beza in his first three ed., Pfaff, Venema, Kuinol, Olahusen, and others), we notice the following:

1. Some suppose that πρώτη, first, stands for προτάρια, former (comp. John i, 15, προτότος μου, before me), and that the genitive ἡμιμονεύοντος τῆς Συρίας Κυρινίου is governed by the comparative rendering, the census took place before Quirinius was governor of Syria. (So J. G. Her- wart, Admir. Æth. Theol. Myst. propul. Monach. 1626, p. 188; Petavius, Bynius, Clericus, J. Perizo- nius, De August. Orbis Terrar. Descr., in his Disquis. de Prætor. p. 908 sq.; Zeltner, Heumann, De Censu Antiqu. 1782, and in his Dissertation, l. 789 sq.; Althin, Censorinus, Coll. Hist. lat. antiquitatis, ii. 119 sq.; Stobæus, Verm. Aufsatzes, p. 68; Michaelis, Ueber d. Geburts- und Sterbejahrc Christi, i. 59 sq.; Tholuck, Gläubigard. p. 182 sq., and others.) But this would be strange Greek, even if προτάρια stood in the passage (comp. Fritzsche on Rom. ili. 421 sq., where also the passage of the Sept. Jer. xxix, 2, compared by Tholuck, is settled); and the possibility of writing πρώτη for it is not established by the reference to John, and certainly such a use would be especially avoided where, as here, every reader must naturally understand the passage as the Auth. Ver. renders it. More recently, Huschke, ut. sup. p. 89; Wieseler, ut. sup. 117 sq., and an anonymous writer in Rheinwald's Repertor. xxxvi. 105, have discovered that Luke purposely places the superlative before the genitive to express this meaning: this census as the first (i. e. of all Roman censuses) before Quirinius became governor of Syria; and that this construction is also usual with the comparative degree, which they would fill out thus: πρὸ τῆς ἄπογραφης γεγονότος τῆς ἡμιμονεύ- σης κ. τ. λ. Surely no one acquainted with Luke's style could suppose him to have written such jargon, and expressed this complicated idea with words on their face mean nothing very different. This is the result of considering a language not only in the light of one's study, but in that of living intercourse.

2. Several have tried conjectural emendation (comp. Bowyer, Critical Conject. on the N. T. i. 117 sq.). Hermann gives as another's suggestion Κρονιοῦ, corresponding to the Latin Saturninus. Whiton, Prim. N. T. (Lon. 1749), reads ut ήτο το γεγονός τῆς Συρίας, δυτικα τι δι του γεγονός μισθ. τῆς Συρίας, i. e. This first census took place when Saturninus was governor of Syria, and a second under Quirinius. But the last clause has no pertinence here. L. Cappellus and Huttenius, De mon. Evangel. p. 781, put Κυρινίου, Quirinius, or Κ. Oiaphos, Q. Varus, instead of Quirinius, and supposed Saturninus B.C. 6 (see Josephus, Ant. xvii, 5, 2; Tacit. Hist. v, 9). Michaelis, Einleit. ins N. T. i. 7, 41, would read πρὸ τῆς after πρώτη (i. e. before that under Quirinius, etc.), which might easily have dropped out (comp. R. Rouiller, Discer. Sacr. Amst. 1780, No. 4). H. Venema, De genealogiâ, § 83, and the text by οὐκ ἂπογραφή, πρώτη, ή βι (i. e. δυτικα) γεγονός μισθ., etc., i. e. This was the first census; but the second took place when Quirinius, etc. But again the second clause is out of place. Valesius (ad Euseb. H. E. i, 5) would at once write Saturninus for Quirinius. All such changes of the text, especially in the face of the una-
nymity of manuscripts and versions (see Griesbach in loc.), is entirely forced.

3. Rejecting all these methods of reconciliation, some here suppose a mistake or misrecolletion on Luke's part (Ammom, Bibl. Theol. ii, 271; Comm. de Censu Quir. Erlangen, 1810; Leben J., ii, 201 sq.; Thiese, Kris. Comm. ii, 885; Strauss, Leben J., p. 262 sq.; Wies, Evangel. Gesch. i, 294 sq.), it being, at any rate, a new fact, which was the despair of the days.

So Winer, who still holds the census as a fact, and thinks Quirinius may have conducted it (Neander, Leben J., p. 25; Meyer on Luke, ii, 2), the only error being in naming him governor of Syria (comp. Alte u. Neuere, 1727, p. 120).

Certainly it is not to be supposed that, in the short time mentioned by the census of Quirinius (Acts v, 37), and mistated it thus, for the mention of it in Acts shows that he was well acquainted with it; and even in ii, 2, the word first seems to imply the other.

4. Another mode of getting over the difficulty is sanctioned by the names of Calvin, Valesius, Wetstein, Hales, and others. First, changing ab Is into ab Is, they obtain the sense: "In those days there went forth a decree from Augustus that the whole land should be enrolled; but the enrollment itself was first made when Cyrenius was governor of Syria." The supposition here is, that the census was commenced under Augustus, and continued under that of Quirinius, which was carried on for two years after, under Quirinius. Dr. Robinson (Add. to Calmet, in "Cyrenia") objects to this view the entire absence of any historical basis for it. But he must at the time have been unmindful of Hales, who, in his Chronology (iii, 48-58), has worked out this explanation with more than his usual care and success. Hales reminds us that a little before the birth of Christ, Herod had marched an army into Arabia to redress certain wrongs which he had received; and this proceeding had been so misrepresented to Augustus that he wrote a very harsh letter to Herod, the substance of which was, that "having hitherto treated him as a friend, he would now treat him as a subject." And when Herod sent an embassy to clear himself, the emperor repeatedly refused to hear them, and so Herod was forced to submit to all the impieties (τραπεζαμίας) offered to him (Joseph. Anti. xvi, 9). Now it may be conceived, as an attempt on the part of Herod to shew the performance of his threat of treating him as a subject by the degradation of his kingdom to a Roman province. For soon after Josephus incidentally mentions that "the whole nation of the Jews was taken an oath of fidelity to Caesar and the king jointly, except 6000 of the Pharisees, who, through their hostility to the regal government of its order." The decision is determined by its having been shortly before the death of Pheroras, and coincides with the time of this decree of enrolment and of the birth of Christ. The oath which Josephus mentions would be administered at the same time, according to the usage of the Roman census, in which a return of persons, ages, and properties was required to be made upon oath, under penalty of confiscation of goods, as we learn from Ulpian.

That Cyrenius, a Roman senator and procurator, was employed to make this enrolment, we learn not only from Luke, but by the joint testimony of Justin Martyr, Julian the Apostate, and Eusebius; and it was made while Saturninus was president of Syria (to whom it was attributed by Tertullian), in the thirty-third year of Herod's reign, corresponding to the date of Christ's birth. Cyrenius, who is described by Tertullian as "an active soldier and rigid commissioner," was a strict and enlightened procurator. He was the friend of Herod and his subjects, and probably came to execute the decree with an armed force. The enrolment of the inhabitants, "each in his own city," was in conformity with the wary policy of the Roman jurisprudence, to prevent insurrections and to expedite the business; and if this precaution was judged prudent even in Italy, much more must it have appeared necessary in the province like Judea and Galilee.

At the present juncture, however, it appears that the census proceeded no farther than the first act, namely, the enrolment of persons in the Roman register. For Herod sent his trusty minister, Nicolas of Damascus, to Rome, who, by his address and presents, found means to mollify and undeceive the emperor, so that he proceeded no farther with the census, "so that the time was suspended; but it was afterwards carried into effect upon the dismissal and banishment of Archelaus, and the settlement of Judea, as a Roman province. On this occasion the trusty Cyrenius was sent again, as president of Judaea, to complete the enrolment in its full extent, to ratify the property of Archelaus, and to complete the census for the purposes of taxation. This taxation was a poll-tax of two drachmas a head upon males from fourteen, and females from twelve to sixty-five years of age—equal to about fifteen pence of our money. This was the "tribute money" mentioned in Matt. xxvi, 24-27. The payment of it became very obnoxious to the Jews, and the imposition of it occasioned the insurrection under Judas of Galilee, which Luke himself describes as having occurred "in the days of the taxing" (Acts v, 37). By this statement, connected with the slight emendation of the text already indicated, Hales reconciles the two words 'taxing' and 'census' afterwards, under Quirinius. Dr. Robinson (Add. to Calmet, in "Cyrenia") objects to this view the entire absence of any historical basis for it. But he must at the same time have been unmindful of Hales, who, in his Chronology (iii, 48-58), has worked out this explanation with more than his usual care and success. Hales reminds us that a little before the birth of Christ, Herod had marched an army into Arabia to redress certain wrongs which he had received; and this proceeding had been so misrepresented to Augustus that he wrote a very harsh letter to Herod, the substance of which was, that "having hitherto treated him as a friend, he would now treat him as a subject." And when Herod sent an embassy to clear himself, the emperor repeatedly refused to hear them, and so Herod was forced to submit to all the impieties (τραπεζαμίας) offered to him (Joseph. Anti. xvi, 9). Now it may be conceived, as an attempt on the part of Herod to shew the performance of his threat of treating him as a subject by the degradation of his kingdom to a Roman province. For soon after Josephus incidentally mentions that "the whole nation of the Jews was taken an oath of fidelity to Caesar and the king jointly, except 6000 of the Pharisees, who, through their hostility to the regal government of its order." The decision is determined by its having been shortly before the death of Pheroras, and coincides with the time of this decree of enrolment and of the birth of Christ. The oath which Josephus mentions would be administered at the same time, according to the usage of the Roman census, in which a return of persons, ages, and properties was required to be made upon oath, under penalty of confiscation of goods, as we learn from Ulpian.

That Cyrenius, a Roman senator and procurator, was employed to make this enrolment, we learn not only from Luke, but by the joint testimony of Justin Martyr, Julian the Apostate, and Eusebius; and it was made while Saturninus was president of Syria (to whom it was attributed by Tertullian), in the thirty-third year of Herod's reign, corresponding to the date of Christ's birth. Cyrenius, who is described by Tertullian as "an active soldier and rigid commissioner," was a strict and enlightened procurator. He was the friend of Herod and his subjects, and probably came to execute the decree with an armed force. The enrolment of the inhabitants, "each in his own city," was in conformity with the wary policy of the Roman jurisprudence, to prevent insurrections and to expedite the business; and if this precaution was judged prudent

5. The preceding explanations all render παρηγημ"art; first, as an adverb, but it is clearly not susceptible of such a construction, being an adjective regularly qualifying διωγμός, evidently for the purpose of distinguishing the present "taxing" from a subsequent one under the same authority, namely, that mentioned in the Acts. The writer of an elaborate article in the Journal of Sacred Literature (October, 1861) indeed urges that Luke ought to have said ἡ διωγμός, evidently for the purpose of distinguishing the present "taxing" from a subsequent one under the same authority, namely, that mentioned in the Acts. The writer of an elaborate article in the Journal of Sacred Literature (October, 1861) indeed urges that Luke ought to have said ἡ διωγμός, evidently for the purpose of distinguishing the present "taxing" from a subsequent one under the same authority, namely, that mentioned in the Acts. theetical character of the clause is probably the cause of this somewhat blurred antithesis in its phraseology. It is, however, not necessary for the truth of the fact, just as we do for the fact of the existence of the first enrolment itself.—Kitto, s. v. See Syria.

A. W. Zumpt, of Berlin, in his Commentatio de Syria Romanorum provinciae a Cesarre Augusto ad T. Verresamnum, has recently shown it to be probable that Quirinus was the brother, not the son, of Licinius. He supported this by the following considerations: In B.C. 9 Sentius Saturninus succeeded M. Titius in the province of Syria, and governed it three years. He was succeeded by T. Quintilius Varus (Joseph. Ant. xvii, 5, 2), who, as it appears, remained governor up to the end of B. C. 1. (Tacit. Ann. iii, 4. 1.) He was appointed to the command in Germany, in which he lost his life in A.D. 7. We also lose sight of the governor of Syria till the appointment of P. Sulpicius Quirinius in A.D. 6. Now, from the maxim acted on by Augustus (Dion. Cass. iii, 25), that none should hold an imperial province for less than three or more than five years, Varus cannot have been governor of Syria during the twelve years from B.C. 6 to A.D. 6. Who, then, were the missing governors? One of them has been found—L. Volusius Saturninus, whose name occurs as "legatus Syria" on a coin of Antioch, A.D. 4 or 5. But his proconsulate will not fill the whole period. We must therefore suppose, with Credner, that Quirinus was then sent to Palestine as procurator of Syria simply to take the census of the people, whose number Augustus wished to know. But this is simply multiplying hypotheses. Comp. also Huschke, p. 73 sqq. This view appears the more probable, since Quirinus, who was a favorite with the emperor, was then in the East on his commission (Tacit. Ann. iii, 48; ii, 42). There is also an inscription (Muratori, Theod. Inscript. i, p. 670) which states that Q. Zemili. Palicanus Secundus, by order of Quirinus, held a census in Apamea (in Syria), and, likewise by his order, conquered the Itureans in Lebanon. But, though the word ἀρχηγὸς is not limited to a permanent governor of a province, yet Luke could hardly use such a phrase as this (ἀρχηγοῦ τοῦ Σιρίας) of an extraordinary officer. In common language this could only mean "being governor of Syria" (see, besides, Huschke, p. 65 sq.). Just as little does it support the view of Tischendorf (Tisch. Text. p. 293) when he makes Quirinus to have filled, as governor, an interim between Saturninus and Varus.

7. Assuming, on the authority of Luke, that an enrolment actually did take place at the time of our Lord's birth, a modification of the last foregoing hypothesis is necessary. In this case Varus must be the procurator of Syria, and Quirinius was then joint governor of Syria along with Saturninus. It is known that a few years previous to this date Volumnius had been joined with Saturninus as the procurator of that province, and the two, Saturninus and Volumnius, are repeatedly spoken of together by Josephus, who styles them equally governors of Syria (Ant. xvi, 9; 1; 9, 8). Josephus does not mention the recall of Volumnius; but there is certainly a possibility that this had taken place before the birth of Christ, and that Cyrenius, who had already distinguished himself, had been sent in his place. He would then have been under Saturninus, a ἀρχηγός, "governor," of Syria, just as Volumnius had been before, and as Pilate was afterwards, of Judea. That he should here be mentioned as such by Luke rather than Saturninus is very naturally accounted for by the fact that he returned, ten years afterwards, as procurator or chief governor, and then held a second and more important place for the purpose of registration, taxation, and archelaus was deposed, and Judea annexed to the Roman province of Syria. The only real objection to this solution is the silence of all other history. But, although profane history does not affirm the fact of Cyrenius having formerly been procurator of Syria, yet it does not in any way deny it; and we may therefore safely rest upon the authority of the sacred historians for the truth of this fact, just as we do for the fact of the existence of the first enrolment itself.—Kitto, s. v. See Syria.

Cyprus (Kypreia, "lady," 2 John, ver. 1, 9). A Greek term signifying mistress, and used as an honorary title of address to a female (so Epict. Eckh. 40), as in English. But in 2 John it appears to be the proper name of the distinguished female to whom John directed his epistle (see Alford, Gr. Text. vol. v, proleg. p. 186 sqq.). That Cyprus is not the correct of the Greeks there is no doubt (Gruteri Inscript., p. 1127). Others regard the associated term ἱδρύησις ("elect") as a proper name, q. d. Electa (q. v.), and the word in question as a common title. See John, Epistles of.
Cyril, said to have been pope, and, according to Romish tradition, to have, for the sake of St. Ursula and her 11,000 maids, forsook the papal see to suffer martyrdom with them at Cologne (Aug. 8th). His existence is probably as mythical and fictitious as that of the 11,000 virgins. The church and college of St. Cyril (formerly St. Dionysii), at Neubauhaus, near Worms, claims to have possessed his relics since the beginning of the 9th century.

Cyril, patriarch of Constantinople at the end of the 6th century, and successor of John Chrysostom after 595, took, like his predecessor, the title of πρεσβυτερος των παλαιωτων, which he caused to be confirmed by a council. A Romish bishop, Great, opposed him at first without success, but by giving his support to the usurper Phocas he finally gained his end, and Cyril had to renounce his title. He is said to have died of grief in 606. — Herzog, Real-Encyklopädie, iii, 221.

Cyril (Sr.) (Κύριλλος), of Alexandria, was born in Alexandria towards the end of the 4th century, and was educated under his uncle Theophilus, bishop of that city, and died in 412, when Cyril was elected patriarch of Alexandria. One of his first steps, according to Socrates, was to plunder and shut up the churches of the Novatians (Socr. Hist. Eccl. vii, 7). He led on a furious mob, which drove out the Jews, who had enjoyed many privileges in the city for ages. This act, which was a Monophysite, and the government of the city, and made him henceforth the implacable opponent of the bishop. An attack was made on the governor in his chariot by a band of 500 monks; and one who severely wounded him having suffered death on the rack, Cyril, in his church, pronounced a subseq.-over his body as that of a martyr (Socrat. i. vii. c. 14). He is also charged with the murder of Hypatia, the celebrated daughter of the mathematician Theon; but his share in this atrocity was only indirect. See Hypatia. The titles of Doctor of the In- carnation and Champion of the Virgin have been given to Cyril on account of his violent dispute with Nestorius. "The condemnation and deposition of Nestorius having been decreed by Pope Celestine, Cyril was ap- pointed to execute the sentence, for which he prevailed at a council of sixty bishops at Ephesus. John, patri- arch of Antioch, having a few days afterwards held a council of forty-one bishops, who supported Nestorius and his party, the emperor appealed to the pope to the emperor Theodosius, who forthwith committed both Cyril and Nestorius to prison, where they remained for some time under rigorous treatment. Cyril, by the influence of Celestine, was at length liberated and restored (481) to the see of Alexandria, which he retained until his death, which occurred in 444" (Engl. Cy- clops. s. v.). See Nestorius. Cyril’s doctrinal writings are chiefly on topics connected with the controversies on the Trinity. The following are some of the principal treatises: Thesaurus on the Trinity, intended as a complete refutation of Arianism. In Dialogues on the Incarnation, in Five Books against Nestorius, and in an ample Commentary on St. John’s Gospel the same subject is continued. Ten books against Julian contain replies to that emperor’s three books against the Gospels, which, if Cyril’s quotations are faithful, were as weak and absurd as the answers. Seventeen books On Worship in Spirit and Truth show that all the Mo- saic laws are nothing but allegory of the Gospel; “the proof,” says Dr. Adam Clarke, “how Scripture may be tortured to say anything.” Thirteen books on the Pentateuch and the Prophets are written with a similar view. Thirty pastoral Homilies announce, as cus- tomary at Alexandria, the time of Easter. Sixty-one Epistles hardly all relate to the Nestorian controversy. Cyril’s Syriac Epistles contain curses against Nestorius, who as solemnly replied with twelve curses against Cyril. His writings abound in turgid praises of Mary, though he did not hold her to be with- out sin. “The history of none among the Christian fathers is more disgraceful to the Christian character than that of St. Cyril of Alexandria—a man immoder-ately ambitious, violent, haughty, suspicious, and as unfit for a bishop as a violent, bigoted, unskilful theologian could possibly be—but resolved that if the meek inherit the earth, the violent should have possession of the sees” (Clarke, Succession of Sacred Literature, ii, 137). “But the faults of the personal character are nothing compared to us to the merits of Cyril as a theologian. He was a man of vigorous and acute mind, and extensive learning, and is clearly to be reckoned among the most im- portant dogmatic and polemic divines of the Greek Church. Of his contemporaries Theodoret alone was his superior. He was the last considerable repre- sentative of the Alexandrian theology and the Alex- andrian Church, which, however, was already beginning to degenerate and stiffen; and thus he offsets Theodo- ret, who is the most learned representative of the Antiochian school. He aimed to be the same to the doc- trine of the incarnation and the person of Christ that his predecessor was to the doctrine of the Trinity; and Cyril had been to the doctrine of the Trinity a cen- tury before. But he overstrained the supra- naturalism and mysticism of the Alexandrian theology, and in his zeal for the reality of the incarnation and the unity of the person of Christ he went to the brink of the Monophysite heresy; and, in fact, the great words of Athanasius, though not by his spirit, because the Nicene age had not yet fixed beyond all inter- change the theological distinction between οὐραίος and εὐφροσύνης” (Schaaf, Church History, § 171). The best edition of the Opera Omnia of Cyril, in Greek and Latin (Paris, 1659), is that of Chatelet (7 vols. fol.). This edition is followed by Migne, in his Patrologia Graeca Completa (lxvii-lxxxv). His Comm. in Lucan Evangeliwm was re-edited in Latin by R. P. Smith (Oxford, 1858); and in an English version, by the same, with notes (Oxf. 1859). See Clarke, Succession Soc. Lit. ii, 137; Cave, Hist. Lit. Anno 412; Tillemon, Mémoires, xiv, 272; Butler, Lives of the Saints, Jan. 28; Neander, Church History, ii, 458-498; Lardner, Works, vol. iv; Dorner, Person of Christ (Edinb. trans.), div. i, vol. ii.

Cyril (Sr.) (Κύριλλος), of Jerusalem, is supposed to have been born in that city about A.D. 315. He was ordained deacon by Macarius about 336, and was consecrated priest by the patriarch about the same time. After the death of Maximus, Cyril was chosen to succeed him (A.D. 360). A luminous appearance in the heavens, called the “Apparition of the Cross,” is said to have marked the beginning of his episcopate (Socrates, Hist. Eccl. ii, 28). He soon became involved in disputes with the Arian Acacius, bishop of Caesarea, who com- menced a persecution against him, which terminated in his deposition by a council in 357. He was restored to his see, but was deposed a second time by the Arian Council of Constantinople in 369. On the accession of Julian, Cyril returned to his bishopric, but was ex- pelled a third time (A.D. 367). Finally, under Theo- donus, he was banished from the empire in 381, and died, cleansed of all charges against his orthodoxy, May, 866. “An incident noticed by all the biographers of St. Cyril is the celebrated attempt and failure of the emperor Julian to rebuild the temple of the Jews at Jerusalem, ostensibly for the pur- pose of preserving the temple, but, in truth, with the sinister view of falsifying the prophecies respecting its irreparable destruction” (see Gregory Nazianz. Ort. 4 adv. Julian; Theodoret, Socrates, Philostorgius, So- zomen, and bishop Warburton’s Dissertation on the subject, p. 88).

The extant writings of St. Cyril are in the Greek language, and consist of eighteen books of Catecheses, or sermons, delivered during Lent to the catechumens (called before baptism Ἴλαμματες); five similar dis-
A portion of the tribe embraced Christianity, but there is no proof of a christening of the whole tribe and of the organization of a national Church. After his return to Constantinople he again lived with his brother Methodius in ascetic retirement until he was sent by the emperor as a missionary to the South Slavic tribes. The Greeks and Romans, missionaries had for some time been at work among the Slav, but in which, anxious to preserve its independent national- ity, mistrusted both. Constantine gained their confidence by convincing them that he sympathized with their national sentiments, and had in view nothing but their conversion to Christianity. He became the founder of a Slavic church, but the exact limits cannot at present be defined. About 863 they arrived at the court of Rastislav, the seat of which we do not know, but which was probably at a point far to the south-east from the present Moravia. By disseminating the Scriptures and celebrating divine worship in the Slavonic language, they soon founded a flourishing Slav Church in the territory of Rastislav and other Pannonian princes. When pope Nicholas I heard of their successes he invited them to Rome. In 868 they followed this invitation, accompanied by many disciples. Their Slav Church and Slavic mass attracted great attention, and the successor of Nicholas (who in the meanwhile had died), Adrian II, received them with marks of great favor. They presented the pope with the relics of Clemens Romanus, and the pope approved their work, inclusive of the Slavic translation of the Bible and the Slavic liturgy, and declared his intention to organize the new church. The Slav Church became an independent ecclesiastical province, under Constantine and Methodius as bishops. But Constantine, who felt the end of his life approaching, preferred to remain as a monk in Rome, assumed the name of Cyril, under which he has since been known in Church history, and died about 870. The work of evangelization was continued by his brother Methodius. The works which were formerly ascribed to Cyril (Apologia Morales, Vienna, 1630; Opuscula de Diction, Venice, 1467) are spurious.—Herzog, Real-Encyclopedia, iii, 228; Schafarik, Slav. Alterthümer, ii, 471; Wattenbach, Beiträge zur Geschichte christl. Kirche in Mähren u. Böhmen (Vienna, 1841). Acta Synodorum, iv 14; Dobrowsky, Cyril and Method (Prague, 1823). Philipat (Russian bishop of Riga), Cyrilus und Methodius (German transl., Miltan, 1847). McLean, Missions in the Middle Ages, chap. xiii. Cyril Lucar (Cyrillus Lucard), a Greek patriarch of Constantinople, noted for his efforts to introduce into his Church the doctrines of the Reformed (Calvinistic) churches. He was born about 1568 in Candia, which at that time was under the sovereignty of Venice and the chief seat of Greek scholarship. He studied for several years in Venice, and was influenced by the works of the Greek scholars through several European countries. In Geneva, where he studied for some time, he became acquainted with several prominent theologians of the Reformed Church. In Lithuania he was rector of a literary institution at Ostrog, and took a prominent part in opposing the projected union of the Greek
churches of Poland and Lithuania with Rome. After his return to his native land, he was soon promoted by the patriarch of Alexandria to the dignity of an archimandrite. In 1602 Cyril succeeded Melchisedec as patriarch of Alexandria. While holding this position he carried an active correspondence with David de Leeu, de Willem, and the Remonstrant Uttenbogaert of Holland, Abbott, archbishop of Canterbury, Leger, professor of Geneva, the republic of Venice, the Swedish king; Gustavus Adolphus, and his chancellor, Axel Oxenstierna. Many of these letters, written in different languages, are still extant. They show that Cyril was an earnest opponent of Rome, and a great admirer of the Protestant Reformation. He sent for all the important works, Protestant and Roman Catholic, published in the Western countries, and sent several young men to England to get a thorough theological education. The friends of Cyril in Constantinople, and among them the English, Dutch, and Swedish ambassadors, endeavored to elevate Cyril to the patriarchal see of Constantinople. They would have succeeded in 1613, after the banishment of the patriarch Timotheus, but for the unwillingness of Cyril to pay the amount demanded by the Turkish government. After the death of Timotheus in 1621, he was elected his successor by a unanimous vote of the synod. His life as patriarch was full of vicissitudes. The Jesuits, in union with the agents of France, several times procured his banishment, while his friends, supported by the ambassadors of the Protestant powers in Constantinople, obtained, by means of large sums of money, his recall. During all these troubles, Cyril, with remarkable energy, pursued the great task of his life. In 1627 he obtained a printing-press from England, and at once began to print his Confession of Faith and several catechisms. But, before these documents were ready for publication, the printing establishment was destroyed by the Turkish government at the instigation of the Jesuits. Cyril then sent his Confession of Faith to Geneva, where it appeared, in 1629, in the Latin language, under the true name of the author, and with a dedication to Cornelius de Haga. It created throughout Europe a profound sensation, and many were inclined to regard it as spurious. Cyril, however, openly confessed the authorship, published in 1633 a Greek edition of the Confession, and in 1636, in a letter to the professors of Geneva, declared his concurrence in the principal doctrines of the Reformed Church. Many opponents, however, now rose against him in the Greek Church, and in 1638 a synod convened at Constantinople to try him. But, before sentence was pronounced, the Janissaries arrested him by order of the government, carried him to a boat, stripped him, and cast the corpse into the sea. Some friends found the corpse and buried it upon an island, and ten years later a solemn funeral was held at Constantinople. Several synods condemned the innovations attempted by Cyril, but the Confession of Faith was generally treated by them as spurious.

Cyril was the first to use in the procession of the Holy Spirit the compromising formula ιερος χαρα&omicron;ης καὶ νεωθ&omicron;ραν (a panis per filium). It teaches abso-
lute predestination, denies moral freedom prior to regeneration, declares strongly against the rights claimed by the popes, and acknowledges only two sacra-
ments, baptism and the Lord's Supper. It recommends the reading of the Bible, distinguishes the canonical from the deuterocanonical books, and rejects the ven-
eration of images. It has been published by Kimmel in his Libri symbol. eccles. Graecae.—Thom. Smith, Collectanea de Cyrillici Lucari (London, 1707); Bohmsstell, De Cyrillici Lucari (Halle, 1724); Herzog, Real-Encyklop. d. kirch. u. luth. Wiss., 4 (519). Picard, De institutionibus der Ostorientalischen Kirche, etc. (Munich, 1862, 8vo); Stanley, Eastern Church; Princeton Review, v, 312; Murdoch's Mohelm, Church History, iii, 947, note 5 (N. Y. 1854).

Cyrus (Hebraized Koresh, קְרֶשׁ, ' Cyrus, son of Ahasuerus, was the third Persian king (486-465) who conquered the Medes and Babylon, prosecuted the Edomites, and is described in the Bible (Ezra 1, 1) as a godly king. He made the Jews return from Babylon (Ezra 1, 1). His kingdom is described in the Bible as a kingdom of peace and prosperity (Ezra 1, 1).

Cyrus is said to have been the founder of the Achaemenid dynasty, which ruled the Persian Empire from 550 to 330 BC. His reign is celebrated in the Bible for his role in the restoration of the Hebrews to Jerusalem after the Babylonian exile (Ezra 1, 1). He is also known for his benevolence and generosity, which are reflected in his treatment of the Jews and his support of religious freedom (Ezra 1, 1). His tomb is said to be located in the city of Babylon (Ezra 1, 1).
Pasargades (Arrian, Esp. Al. vi, 29), the scene of his first decisive victory (Rawlinson, Herod. I, 278).

"It is impossible to insist upon the details of the outline thus sketched. In the time of Herodotus Cyrus was a boy; but in the annals of authentic details of his actions, the empire which he left is the best record of his power and plans. Like an Oriental Alexander, he aimed at universal dominion; and the influence of Persia, like that of Greece, survived the dynasty from which it sprang. In every aspect the reign of Cyrus marks an epoch in universal history. The fall of Sardis and Babylon was the starting-point of European life; and it is a singular coincidence that the beginning of Grecian art and philosophy, and the foundation of the Roman constitution, synchronize with the triumph of the Arian race in the East (Niebuhr, Gesch. Asa. p. 282)." The following points demand especial consideration, and we therefore elaborate them at considerable length.

1. His Parentage. — Herodotus (1,107) and Xenophon (Cyrop. i, 2, 1) agree that he was son of Cambyses, prince of Persia, and of Mandane, daughter of Astyages, king of the Median empire. In an Assyrian inscription, which is called the "Edict of Assurbanipal," the Median king, Artaxerxes, speaks of Cyrus as "the powerful king." (Rawlinson, Herod. I, 191). Ctesias denies that there was any relationship at all between Cyrus and Astyages (Pers. Exc. 2). According to him, when Cyrus had defeated and captured Astyages, he adopted him as a grandfather, and invested Amytis, or Amyntis, the daughter of Astyages (whose name is in all probability only another form of Mandane), with all the honors of queen dowager. His object in so doing was to facilitate the submission of the more distant parts of the empire, which were not yet conquered; and he reaped excellent fruit of his policy in winning the homage of the ancient, rich, and remote province of Bactria. Ctesias adds that Cyrus afterwards married Amytis. It is easy to see that the latter account is by far the more historical, and that the story followed by Herodotus and Xenophon is that which the courtiers published in aid of the Persian prince's design. Yet there is no reason for doubting that, on the whole, Cyrus belonged to the Achaemenian royal clan of the military tribe of the Persians. See Sartonius, De rationib. cur in expon. vita et reg. Cyri, Xenophonm potius quam Herodot, sit credendum (Lübben, 1771). A different view is taken in Smith's Dict. of Class. Biog. s. v. See Darius (the Med.).

9. In the conquest of the Tarsians. — It was the frequent visits of the Persian monarchs, and probably therefore of the Medes before them, to choose the provincial viceroys from the royal families of the subject nations, and thereby to leave to the vanquished much both of the semblance and of the reality of freedom. This was to account for the first step of Cyrus towards eminence. But as the Persian armies were at that time composed of ruder and braver men than the Medes (indeed, to this day, the men of Shiraz are proverbially braver than those of Isfahan), the account of Xenophon is credible, that in the general war of the empire Cyrus won the attachment of the Medes by his bravery, and by all that is told, the atrocious cruelties of Astyages may have revoluted the hearts of the Median nobility. See Persia.

5. Transition of the Empire from the Medes to the Persians. — Xenophon's romance omits the fact that the transference of the empire was effected by a civil war. Where Cyrus was bold, his Hero of the 8th chapter, I. c., confesses it (iii. 4. 7, 12). Herodotus, Ctesias, Isocrates, Strabo, and, in fact, all who allude to the matter at all, agree that it was so. In Xenophon (I. c.) we find the Upper Tigris to have been the seat of one campaign, where the cities of Larissa and Mespila were besieged and taken by Cyrus. From Strabo we learn that the decisive battle was fought on the spot where Cyrus afterwards built Pasargades, in place for his native capital. This agrees with Herodotus's account of two armies being successively lost, which may mean that the war was ended in two campaigns. Yet Ctesias represents Astyages as finally captured in the palace of Ecbatana. Cyrus (says Herodotus) did not Astyages harm, wards for him at first, in the end of his life. Ctesias, however, states that he was first made ruler of the Bactrians, and afterwards murdered by a suanah sent by Cyrus to bring him home to visit his family. The date of the accession of Cyrus is fixed by the unanimous consent of the ancient chronographers as occurring in B.C. 550 (Africanus, op. Euseb. x. 10; Clinton, ii. s. an.).

The Medes were by no means made subject to the Persians at first. It is probably true that, as Herodotus and Xenophon represent, many of the noblest Medes sided with Cyrus, and during his reign the most trusted generals of the armies were Medes. Yet on this hypothesis one cannot account for the phenomenon of a Darius the Mede, who, in the book of Daniel, for two years holds the government in Babylon, after the capture of the city by the Medes and Persians. Indeed, the language used concerning the kingdom of Darius might be explained as Oriental hyperbole, and Darius be interpreted simply as the Mede who was supposed to have conquered more Medes. The Medes were it not for the fact that Cyrus is clearly put forward as a successor to Darius the Mede. Many have been the attempts to reconcile this with the current Grecian accounts; but there is one only that has the least plausibility, viz. that which, with Xenophon, teaches that Astyages had a son still living (whom Xenophon calls Cyaxares), and that this son is no other than Darius the Mede; to whom Cyrus, by a sort of nephew's ploy, conceded a nominal supremacy at Babylon. See Cyaxares. In the reign of the son of Cyrus the depression of the Medes probably commenced. At his death the Median conspiracy took place, after the defeat of which the Medes doubtless sunk lower still. At a later time they made a general insurrection against the Persian power, and its suppression seems to have brought them to a level with Hyrcanians, Bactrians, and other vassal nations which spoke the tongue of Persia; for the nations of the eastern province were accomplished masters of language (Strabo, xv. 2, p. 311). See Meda.

4. Military Career of Cyrus. — The descriptions given us in Ctesias, and in Plutarch's Artaxerxes (the latter probably taken from Ctesias), concerning the Persian mode of fighting, are quite Homeric in their character. No skill seems to be needed by the general; no tactics are thought of; he does his duty best by behaving as the bravest of common soldiers, and by acting the part of champion, like a knight in the days of chivalry. We cannot suppose that there was any greater advance of the military art in the days of Cyrus. It is against this fact that we stand the Lydians, the Greeks of Asia Minor, and the Babylonians. We may doubtless add Susians, which must have been incorporated with his empire before he commenced his war with Babylon; where also he fixed his military capital (Susa, or Shushan), as more central for the necessities of his administration than Pasargades. Yet in the latter province, as Herodotus most correctly loved home of the Persian court, the place of coronation and of sepulture (Strabo, xv. 3, p. 318; and Plut. Artax. init.). All Syria and Phoenicia appear to have come over to Cyrus peaceably.

With regard to the Persian war, the few facts from Ctesias that we have already expected as differing from Herodotus, carry with them high probability. He states that, after receiving the submission of the Bactrians, Cyrus made war on the Sacians. A Scythian
(I. e. a Slavonic) people, who seem to have dwelt, or perhaps rather roved, along the Oxus, from Bokhara to Khiva; and that, after alternate successes in battle, he attached the whole nation to himself in faithful allegiance. Their King is called Amorges by Ctesias. They are undoubtedly the same people that Herodotus (vii, 64) calls Amuros Sacerosi; and it is highly probable that they gave to the district of Margians its name. Their women fought in ranks as systematically as the men. Strabo has correctly told us of a tradition (xv, 2, p. 387) that Cyrus escaped with but seven men through the deserts of Gedrosia, seeing from the "Indians"—which might denote an unsuccessful war against Candahar, etc., a country which certainly was not reduced to the Persian empire until the reign of Darius Hystaspis.

The closing scene of the career of Cyrus was in battle with a people living on one or both banks of the river Iaxartes, now the Syr-Daria. Herodotus calls the enemy the Massagetans, who roamed along the north bank of the river: according to Ctesias it was the Derbiceans, who seem to have been on the south. Both may, in fact, have combined in the war. In other respects the narrative of Ctesias is beyond comparison more credible, and more agreeable with other known facts, except that he introduces the fiction of Indians with elephants aiding the enemy. Two battles were fought on successive days, in the former of which Cyrus was mortally wounded, but was carried off by his people (B.C. 529, according to Clinton). In the next, the Scythian cavalry and the faithful Amorges came to support him, and the Derbiceans sustained a total and bloody defeat. Cyrus died the third day after his wound: his body was conveyed to Pasargadae, and buried in the celebrated monument, which was broken open by the Macedonians two centuries afterwards (Strabo, vi, 8). A description is given of the tomb in Arrian (vi, 29): it was a neat quadrangular edifice, with a low door leading into a little chamber, in which lay a golden sarcophagus, containing the body of Cyrus. The inscription, reported by Aristobulus, an eyewitness, is this: "O man, I am Cyrus, who acquired the empire for the Persians, and was king of Asia. Grudge me not, then, this monument." It is generally supposed to have perished, but Sir R. K. Porter has sought to identify it with an extant building known by the natives as that of "the mother of Suleiman" (Travel., i, 496). His name is found on monuments at Mergab, north of Persepolis (Hick, Vet. Med. N. Peru. Monum.).

5. Conduct and Relations of Cyrus towards the Jews. —Hitherto the great kings, with whom the Jews had been brought into contact, had been open oppressors or seductive allies; but Cyrus was a generous liberator and a just guardian of their rights. An inspired prophet (Isa. xlv, 28) recognised in him "a shepherd" of the Lord, an "anointed" king (Isa. xlv, 1; Ἰεροῦσαλήμ). Messiah"; and the title seemed to later writers to invest him with the dignity of being in some sense a type of Christ himself (Jerome, Comm. in Isa. xlv, 1). His successors are connected in the prophecy with their religious issue; and if that appear to be a partial view of history which represents the remnant of captive Israelites to their own land as the final cause of his victories (Isa. xlv, 28-xxiv, 4), it may be answered that the permanent effects which Persia has wrought upon the world can be better traced through the Jewish people than through any other channel. The laws, the liquor, the religion, the very ruins of the material grandeur of Persia have passed away, and still it is possible to distinguish the effects which they produced in preparing the Jews for the fulfillment of their last mission. In this respect, also, the parallel, which has already been hinted, holds good. Cyrus stands out clearly as the representative of the East, as Alexander afterwards of the West. The one led to the development of the idea of order, and the other to that of independence. Ecclesiastically the first crisis was signified by the consolidation of a Church, the second by the distinction of sects. The one found its outward embodiment in "the great synagogue," the other in the dynasty of the Assumans.

The kings of Assyria and Babylon had carried the Jews into captivity, both to remove a disaffected nation from the frontier, and to people their new cities. By undoing this work, Cyrus attached the Jews to himself as a garrison at an important post. But we may believe that a nobler motive inspired with this. The Persian religion was primitively monothestic, and strikingly free from idolatry; so little paganism in its spirit that, whatever of the mystical and obscure it may contain, not a single impure, cruel, or otherwise immoral practice was united to any of its ceremonies. It is credible, therefore, that a sincere admiration of the Jewish faith actuated the noble Persian when he exclaimed, in the words of the book of Ezra, "Go ye up and build in Jerusalem the house of Jehovah, God of Israel; he is God"—and forced the Babylonian temples to disgorge their ill-gotten spoil. It is the more remarkable, since the Persians disapproved the confinement of temples. Nevertheless, impediments to the fortification of Jerusalem afterwards arose, even during the reign of Cyrus (Ezra iv, 5). See Captivity.

Perhaps no great conqueror ever left behind him a fairer fame than Cyrus the Great. His mighty achievements have been borne down to us on the voice of the nation which he elevated; his evil deeds had no historian to record them. What was his singular honor and privilege to be the first Gentile friend to the people of Jehovah in the time of their sorest trouble, and to restore them to the land which light was to be broken forth for the illumination of all nations. To this high duty he is called by name by the prophet (Isa. xlv, 28; xlv, 1), and for performing it he seems to be entitled "the righteous man" (xli, 2; xlv, 13). There are also important passages in Jeremiah (xxv, 12; xxix, 10; xxviii, 7-13) that predict the same event, without mentioning the name of Cyrus as the agent. The corresponding history is found in the books of Daniel and Ezra. The language of the proclamation in Ezra i, 2, and 2 Chron. xxxvi, 22, seems to countenance the idea that he was...
acquainted, as he easily might be through Daniel, with the prophecy of Isaiah respecting him. See Daniel.

The "first year of Cyrus" there spoken of is not the year of his elevation to power over the Medes, nor the date of the conquest of Persia, nor yet that of the fall of Babylon, B.C. 538; but at the close of the two years succeeding this last event, during which "Darius the Mede" held the viceroyship of Babylon, i.e. in B.C. 536. It was not till then that Cyrus became actual ruler over Palestine, which continued to be attached to the Babylonian department of his empire (see Brown's Ordo Secularum, p. 178). The edict of Cyrus for the rebuilding of the Temple (2 Chron. xxxvi, 22, 23; Ezra 1, 1-4; iii, 7, iv, 3; v, 18, 17; vi, 3) was, in fact, the beginning of Judaism; and the great changes by which the nation was transformed into a church are clearly marked. (On the identity of the times of Cyrus and Daniel, see Jour. Sac. Lit. July, 1854, p. 455 sq.; Jan. 1855, p. 864 sq.)

(1.) The lesson of the kingdom was completed by the captivity. The sway of a temporal prince was at length felt, but looked to only a faint image of that Messianic kingdom to which the prophets pointed. The royal power had led to apostasy in Israel and to idolatry in Judah, and men looked for some other outward form in which the law might be visibly realised. Dependence on Persia excluded the hope of absolute political freedom, and offered a sure guarantee for the liberty of religious organization.

Dā bah. See GLAD.

Dab'areh, a less correct mode of Anglicising (Josh. xxxii, 28) the name Daberath (q. v.).

Dabarita. See DABERATH.

Dab'basheth (Heb. Dabb'se'beth, דַבְבָשֵׁת, "he makes a camel's bump, as in Isa. xxx, 6, q. d. Camel-bump Hill; Sept. דבשאתי, Alex. דבשאתי, Vat. בְּבַשָּׁתָה; Vulg. Dannusseth), a place on the boundary-line of the tribe of Zebulon, between Mahalah and Jokneam (Josh. xix, 11; see Eusebian Canons, in loc.); apparently the modern Jebel Dabasheth, which seems likewise to correspond to one of the places named Gabatha (Euseb. Ga'baštã and Ga'bašāدت), located by Jerome (Onomast. s. v. Gabatho) near Diosarea, in the plain of Legio (Robinson, Researches, iii, 201, whose map places it east of Ukunins, apparently by an error); see Van de Velde, Memoir, p. 140). Gabatha is again visited by Dr. Robinson (Later Res. p. 113), but is not described by him (comp. Ritter, Erdkunde, xvi, 748). Knobel suggests (Jos. erklârt, p. 458) that the name of the Onomasticon may have arisen from a Hebrew epithet (דבשאתי, i. e. Gibeah, q. d. the hill of the plain), a view which its isolation from the camel ridgel seems to confirm (Ritter, xvi, 700), although in modern times seems to be worn a slight, if any, reminiscence.

Dabaroth (Heb. Duberath), דַבְרָוָות (once, Josh. xix, 12, with the art. kab-Dabarath, דַבְרָוָות; once, 1 Chron. vii, 72, "Dubberath," דַבְרָוָה), according to Först a fem. form of דַבְרָה, pastore. Sept. in Josh. דבְרָוָת, and דַבְרָוָה וּר. דבְרָוָה, in Chron. אָבוֹס וּר. דבְרָוָה; Vulg. Duberath), a town in the tribe of Issachar (Josh. xix, 28, where the A. V. has "Dabarach"), near the border of Zebulon (Josh. xix, 12, where it is named next to Chisloth-tabor), and assigned to the Levites (1 Chron. vii, 72). It is probably the same with the village Dabero (לַדַבּרָה), mentioned by Eusebius and Jerome (Onomast. s. v. as lying near Mt. Tabor, in the region of Diosarea (Reland, Palest. p. 787); and also the Dabaratha, repeatedly mentioned by Josephus (דַבְרָוָתָו נַעַרְו), the title of one of the heads of the families of "porters" that re
turned from Babylon (1 Esdr. v, 28); the same with Akeb (q. v. No. 2) of the Heb. text (Exra ii, 42).

Da Costa, Isaac (a descendant of Uriel Acosta, q. v.), was born Jan. 14, 1798, at Amsterdam, where he also pursued his studies until 1817, when he went to Leyden to devote his time to the study of law and belles lettres. After a time he abandoned Judaism and embraced Christianity, and became one of the most active opponents of the new rationalistic opinions. A circle of religiously inclined persons gathered about him, and to these he expounded the Bible until after the Revolution of 1800, when he visited different cities of Holland and delivered in the principal churches and other places of public worship sermons on the Bible as proved by the reasoning powers of man (De wilde en onoverwinnele geuangelien (1840, 2 vols.); De waarheid en waarheid van het Oude Testament (1843); Paulus (1846); Beschouwing over het evangelie van Lukas (1856); De apostel Johannes en zijne schriften. —Pifer, Univers.-Lexikon, xix, 681.

Da'dus'us (Δαδούσας) t. d. Δαδόςος, Vulg. Lodo- dorus), the "captain of the treasury" among the exiles at Tiberias (Joseph. Ant. viii, 46. In the Jewish exiles of Alex. and Judas Macc.); evidently a corruption (through the blending with the preceding particle τη) of the Ido (q. v. of the Hebrew text (Exra viii, 17).

Da'mon, in Greek δαμόν, and its derivative δαμα- nóν, both rendered "devil" in the English version of the New Test.; in the original, however, they are carefully distinguished from the term δαίμον. See δαίμων. These two words, δαμόν and δαμανον, are used, as synonyms, by poets, in the sense of sacred writers. The stigmata which the Greek authors themselves assign to them all point to some supposed characteristic of those intelligent beings to whom the words are applied. For example, Plato, in his Cratylus (l, 698, ed. Servan.), derives the word from δαμαων, "knowing" (of which, indeed, the form δαμαων is found in Archil. [206], in allusion to the idea of superior intelligence and consequent efficiency ascribed to demons; Euseb. (Prop. Evang. iv, 5) from ἐπαινεων, "to be terrified;" others, as Proclus (in Hesiod.), from δαιω, "to distribute," because devils were supposed to assign the lots or destinies of mankind (in which case they would be similar to Moys). The subject is extremely encumbered with superstition.

1. By heathen writers the terms in question are employed with considerable latitude. In Homer, where the gods are but supernatural men, δαμαων is used interchangeably with δαιω (II, xxvii, 99, 39; comp. 104), hence any particular divinity, as Venus (II, 112); afterwards in Hesiod (Op. 121), when the idea of the gods had become more exalted and less familiar, the δαιων are spoken of as intermediate beings ("minores diles et majores hominibus," Liv. viii, 20; Adam, Rom. Antig. p. 267), the messengers of the gods to men. This latter usage of the word evidently prevailed afterwards as the correct one, although in poetry, and even in the vague language of philosophy, ρδαιμων was sometimes used as equivalent to ρδης to any superhuman nature. Aristotle applies δαιμων to the Divinity, Providence (Rhetor. ii, 23). But Plato (Symp. p. 202, 20) fixes it distinctively the more limited sense of being the spirits of good men, "made perfect" after death (Plato, Crat. p. 888, quotation from Hesiod). It was also believed that they became tutelary deities of individuals (to the purest form of which belief Socrates evidently referred in the doctrine of his δαιμωνον) and hence δαιμων was frequently used in the sense of the "guardian" or "destiny" of a man (as in the tragedians constantly, thus recurring, it would seem, directly to its original derivation.

2. Demons were of two kinds; the one were the souls of good men, which, upon their departure from the body were called heroes, were afterwards raised to the dignity of demons, and subsequently to that of gods (Plutarch, De Defect. Orac.). Plato (Cratylus, ut sup.) says, "The poets speak excellently who affirm that when good men die they attain great honor and dignity, and become demons." It is also asserted that Iamblichus, Hierocon, and Simplicius use the words angels and demons indiscriminately. Philo (De Gignantibus) says that souls, demons, and angels are only different names that imply one and the same substance; and he affirms (De Somn.) that Moses calls those angels whom the philosophers call demons. It was also asserted that Iamblichus, Hierocon, and Simplicius use the words angels and demons indiscriminately. Philo (De Gignantibus) says that souls, demons, and angels are only different names that imply one and the same substance; and he affirms (De Somn.) that Moses makes those angels whom the philosophers call demons. It was also asserted that Iamblichus, Hierocon, and Simplicius use the words angels and demons indiscriminately.

3. The heathens held that some demons were malignant by nature, and not merely so when provoked and offended. Plutarch says, "It is a very ancient opinion that there are certain wicked and malignant demons, who envy good men, and endeavor to hinder them in the pursuit of virtue, lest they should be partakers of greater happiness than they enjoy" (Plut. Dion. i, 958, Paris, 1624). On this passage bishop Newman remarks, "This was the opinion of all the later philosophers, and Plutarch undeniably affirms it of the very ancient ones" (Desert. on the Proph., Lond. 1826, p. 476). Pythagoras held that certain demons sent diseases among men and cattle (Plato, Resp. p. 514, ed. Amstel.). Zaleucus, in his preface to his Laws (opod Stoiboem, Serm. xi-ii), supposes that an evil demon might be present with a witness to influence him to injustice.

4. By Hellenistic writers.—In the Septuagint the words δαιμων and δαιμωνον, though not found very frequently, are yet employed to render different Hebrew words; generally in reference to the idols of heathen worship, as in Psa. xciv, 8, for δαιμωνον, the "empty," the "vanities" (rendered χρυσαυροισκοτα, etc., in Lev. xix, 4; xxvi, 1); in Deut. xxxii, 17, for δαιμωνον, "lords" (comp. 1 Cor. viii, 5); in Isa. lxxv, 11, for γαδ, the goddess of Fortune: sometimes in the sense of avenging or evil spirits, as in Psa. xci, 6, for δαιμωνον, "pestilence," i. e. evidently "the destroyer;" also in Isa. xxxiii, 21; xxxv, 14, for δαιμωνον, "haired," and δαιμωνον, "dwellers in the desert," in the same sense in which the A. V. renders "satyr." See Spectre. In the book of Tobit (iii, 8) we meet with "an evil demon" (αρμόδους δαιμωνον). See Αρμόδιος.

In Josephus we find the word "demons" used always of evil spirits; in vii, 6, 8, he says expressly, "Demons are no other than the spirits of the wicked,
that enter into men and kill them, unless they can obtain some help against them; * and he speaks of their exorcism by a constant von the Greek, as in Thuc. ii. 8, and of also Act. vii. 8, 2; vii. 2, 5. Writing as he did with a constant view to the Gentiles, it is not likely that he would use the word in the other sense, as applied to heathen divinities.

By Philo the word appears to be used in a more general, and, as it were, equivalent to "angels", and referring to both good and evil. See GIANT.

III. The New-Testament writers always use the word in a bad sense when they speak as from themselves. In the Gospels generally, in James ii, 19, and in Rev. xvi, 14, the demons are spoken of as spiritual beings at enmity with God, and rendering the earth and its inhabitants not only with disease, but, as is marked by the frequent epithet "unclean," with spiritual pollution also. In Acts xix, 12, 18, etc., they are exactly defined as "evil spirits" (τα νεκρατά τα νεκρα). They "believe" the power of God "and tremble" (James ii, 19); they recognise our Lord as the Son of God (Matt. viii, 29; Luke iv, 41), and acknowledge the power of his name, used in exorcism, in the place of the name of Jehovah, by his appointed messengers (Acts xix, 15), and look forward in terror to the judgment to come (Matt. xviii, 29). The description is precise that of a nature akin to the angelic (see ANGEL) in knowledge, but with the distinctive addition of the idea of positive and active wickedness. Nothing is said either to support or to contradict the common Jewish belief, that in their ranks might be numbered the spirits of the wicked dead. In support of it are often quoted the fact that the demoniacs sometimes haunted the tombs of the dead (Matt. xvii, 26), and the supposed reference of the epithet ἀδικον ματ, "unclean," to the ceremonial uncleanness of a dead body. In 1 Cor. x, 20, 21; 1 Tim. iv, 1; and Rev. ix, 20, the word δαιμονία is used of the objects of Gentile worship, and in the first passage it is opposed to the word θεός (cf. Hebrews reference to Deut. xxxii, 17). So also is it used by the Athenians in Acts xvi, 18. The same identification of the heathen deities with the evil spirits is found in the description of the damsel having a "spirit of divination" (νεκρατά τώνων, cf τώνων) at Philippi, and the exorcism of her as a demoniac by Paul (Acts xvi, 16); and it is to be noticed that in 1 Cor. xii, 27 a similar attitude is assumed with those who accepted the Pauline doctrine as an idol, but accepts the truth that it is so, yet declares that all which is offered to it is offered to a "demon." See PYTHIANS. Indeed, it has been contended that evidence is found in the Old Test. to show that demons who had possessed the bodies of men are objects of immediate worship among the heathens (Deut. xxvi, 14; Ps. cvii, 26; Isa. vii, 19), and it is in contradistinction to these that Jehovah is so frequently called "the Being God" (Deut. v, 6, etc. etc.; see Farmer's Essay on the Demoniacs, passim). More particularly, as to their nature, demons are νεκρατά, or spurs, (comp. Matt. xvi, 15; 1, 12; xii, 43-49; Mark ix, 20; Luke x, 27, etc.). Hence there is ascribed to them inteligence and will (Mark i, 24; Luke iv, 54; James ii, 19; iii, 14), as well as great power (Matt. vi, 4, 28-32; Mark ix, 4, 28; Ephi. vi, 12). Whether they are to be reckoned as belonging to the class, and as fallen from the original condition of the angels, does not clearly appear from any statement of Scripture. As the messengers and agents of Satan (q. v.), they may be either the one or the other; but the probability seems to be that they belong to the same class as himself (see Doddridge, Family Expositor, i, 23, London, 1798). Campbell, Pioneers, 238, is more careful to call the Prince of the Demons; the demons whom our Lord cast out are collectively called Satan (Matt. xii, 24-29; Luke xii, 16); and the phrase "unclean spirits," which is applied to them (Matt. x, 1; Mark iii, 11; vi, 7, etc.), is applied also to fallen angels (Rev. xvi, 18; xviii, 2), and even in the singular to Satan himself (Mark iii, 30; comp. 22). These considerations, with the other, it probable that the designation of the N. T. belong to the number of those angels "who kept not their first estate," and we conclude probably (though attempts have been made to deny the inference) that they must be the same as "the angels of the devil" (Matt. xxv, 41; Rev. xii, 7, 9), "the principalities and powers against whom we wrestle" (Eph. vi, 12, etc.).

2. As to character, demons are described as evil, unclean (νεκρατά, αδικονματ), (Matt. xii, 45; x, 1, etc.), as belonging to the kingdom of darkness, and used by Satan for his wicked designs (Matt. ix, 34; xxv, 41; Eph. vi, 12, etc.).

3. As to their abode, they are represented as "res- erved in everlasting chains under darkness unto the judgment of the great day" (Jude 6; comp. 2 Pet. ii, 4). They are said also to be in the aya (Luke viii, 31; comp. Rev. xiv, 1-11). See AYAS. Such descriptions, however, can be understood as intimating nothing more than their being in a state of punishment, and under control; for the activity which is ascribed to them is incompatible with the idea of their being in a state of confinement; and, besides, such passages as Eph. ii, 2; vi, 12, would lead to the conclusion that a sphere of extended physical freedom is assigned to these forms;

III. The fathers frequently refer to demons in their writings. By some they are represented as angels who, originally created holy, fell into rebellion and sin (Joan. Damasc. Expos. Fidel., ii, 4), while others represent them as the fruit of the intercourse of angels with women (Justin M. Apol. ii, 6), and others that they are the souls of the giants whom the daughters of men bore to devils (Pseudo-Clementin., viii, 18). They also teach that they are αώνια, yet in not such a sense as to be absolutely impassable, but as αγία (Clem. Alex. p. 791; comp. Chrysostom, Hom. cxxvii, Theodoret, in Jaa. xii). They all describe them as evil, as deceiving and destroying men, as being the object of worship to the heathen, and as employed by God to punish the wicked (Origen, Contra Cel., v, 324; viii, 399, etc.). See the passages collected in Sinner, Thes. s. v. θαύμα, and in Ustert, Paulin. Lehrbuch; (Anh. iii, p. 421 sq., 5th ed.; comp. also on the subject of the article in Encyclopaedia, and with those who accept the doctrine of the pseudepigraphic (Viteb. et Lips. 1812-22)); Lindinger, De Hebrav, arte med. de Demonum (Wittenburg. 1774); Pisaneki, Beliebung der sogenannten. biblih, Dämonologie (Danz. 1778); Schmid, De lupus demonum (Wittenberg. 1775). See DUCMONIAC.

Demoniaco (δαιμονιακος), rendered "possessed with a devil"; also δαιμονια γυμνος, a term (in the Gr.) frequently used in the New Test., and applied to persons suffering under the possession of a demon or evil spirit [see DEMON], such possession generally showing itself visibly in bodily disease or mental derangement. In the description of the unclean spirit in the nearly equivalent sense in classical Greek (as in Esch. Choep., p. 566; Sept. c. Theb., p. 1001; Eurip, Phen. p. 888, etc.), except that the word of spirit distinctly evil and rebellious, hardly existed, such possession was referred to the will of the gods or to the vague prevalence of an "Angor fury. Neither word is employed in this sense by the Sept., or the LXX, nor is it seen, for example, constantly in Josephus) the belief in the possession of men by demons, who were either the souls of wicked men after death or evil angels, was thoroughly established among all the Jews, with the exception of the Sadducees alone. Demonized persons, in the N. T., are generally regarded as having a demon or demons occupying them, suspending the faculties of their minds, and governing the members of their bodies, so that what was said and done by the demoniacs was ascribed to the indwelling demon. Plato (apud Clem. Alex. Strom. i, 405,
Oxon.) affirms that " daemoniacs do not use their own dialect or tongue, but that of the demons who have entered into them." Lucian says "the patient is silent; the demon returns the answer to the question asked." Apollonius thus addresses a youth supposed to be the whole world, "hardened by the demon, and not by thee" (comp. Matt. viii, 26 and 81; Mark v, 2; ix, 12; Luke viii, 27, 31). With regard to the frequent mention of daemoniacs in Scripture, three main opinions have been started.

1. That of Strauss and the mythical school, which makes the whole of daemoniacs, or demoniacal possession, merely symbolic, with a basis of fact. The possession of the devils is, according to this idea, only a lively symbol of the prevalence of evil in the world, the casting out of the devils by our Lord a corresponding symbol of his conquest over that evil power by his doctrine and his life. This notion is based on the mythical theory as a whole: with regard to this special form of it, it is sufficient to remark the plain, simple, and prosaic relation of the facts as facts, which, whatever might be conceived as possible in highly poetical and awesomely figurative passages, would make their assertion here not a symbol or a figure, but a lie. It would be as reasonable to expect a man with a symbolically symbolic name like Tintadil or Thycyides in their accounts of contemporary history.

2. The second theory is, that our Lord and the evangelists, in referring to demoniacal possession, spoke only in accommodation to the general belief of the Jews, without any intention on his part to convey a falsity. It is concluded that, since the symptoms of the affliction were frequently those of bodily disease (as dumbness, Matt. ix, 32; blindness, Matt. xii, 22; epilepsy, Mark ix, 17-27); or those seen in cases of ordinary insanity (as in Matt. viii, 26; Mark v, 1-5); since, also, people have a habit of attributing to the devil or to daemoniacs as a "fall of Satan," and again in Matt. xxiii, 25-30, when he was accused of casting out demons through Beelzebub, and, instead of giving any hint that the possessed were not really under any direct and personal power of evil, he uses an argument, as to the division of Satan against himself, which is really an application of the same argument to the Jews. And, moreover, one passage becomes inextricable and almost incoherent. Lastly, the single fact recorded of the entrance of the demon at Gadara (Mark v, 10-14) into the herd of swine, and the effect which that entrance caused, is sufficient to overthrow the notion that our Lord and the evangelists do not assert or imply any objective reality of possession. In the face of this mass of evidence, it seems difficult to conceive how the theory can be reconciled with anything like truth of Scripture.

But, besides this, it must be added that, to say of a case that it is one of disease or insanity, gives no real explanation of it at all; it merely refers it to a class of cases which the Bible and the Scripture historical tradition regards as a "fall of Satan," and leaves the further question, how did the disease or insanity arise? Even in disease, whenever the mind acts upon the body (as e. g. in nervous disorders, epilepsy, etc.), the mere derangement of the physical organs is not the whole cause of the evil; there is a deeper one lying in the mind. Insanity may indeed arise, if a case, from the physical injury or derangement of those bodily organs through which the mind exercises its powers, but far often it appears to be due to metaphysical causes, acting upon and disordering the mind itself. In all cases where the evil lies not in the body, but in the mind, to call it only disease or insanity is merely to state the fact of the disorder, and give us all explanation of its cause. It is an assumption, therefore, which requires proof, that, amid the many inexplicable phenomena of mental and physical disease in our own days, there are none in which one gifted with "discernment of spirits" might see signs of what the Jesuits call "the spiritual influence", no exception to the rule. The truth is, that here, as in many other instances, the Bible, without contradicting ordinary experience, yet advances to a region where human science cannot follow. As generally it connects the existence of mental and bodily suffering in the world with the introduction of evil, so also with the power of moral evil to a spiritual and personal source, so also it asserts the existence of inferior spir-
its of evil, and it refers certain cases of bodily and mental disease to the influence which they are permitted to exercise directly over the soul and indirectly over the body. Indirectly applicable to this influence certainly is, as all action of spirit on spirit is found to be; but no one can pronounce a priori whether it be impossible or improbable, and no one has a right to elucidate the strong expressions of Scripture in order to reduce its declarations to a level with our own ignorance. See CONDESCENSION.

Thus, we turn to the ordinary and literal interpretation of these passages, that there are evil spirits (see DEMON), subjects of the Evil One, who, in the days of the Lord himself and his apostles especially, were permitted by God to exercise a direct influence over the souls and bodies of certain men. This influence is clearly distinguished from the ordinary power of corruption and temptation wielded by Satan through the permission of God. Its relation to it, indeed, appears to be exactly that of a miracle to God’s ordinary Providence, or of special prophetic inspiration to the ordinary gifts of the Holy Spirit. Both are bestowed by the same divine principles, and tend to the same general object; but the former is a special and direct manifestation of that which is worked out in the latter by a long course of indirect action. The distinguishing feature of possession is the complete or incomplete loss of the sufferer’s reason or power of will; his actions, his words, and almost his thoughts are mastered by these evil spirits (Mark i. 24; v. 7; Acts xix. 16), till his personality seems to be destroyed, or, if not destroyed, so overborne as to produce the consciousness of a twofold will within him, like that sometimes felt in a dream. In the ordinary tempation and assaults of Satan, the will itself yields to the temptation, and by yielding gradually assumes, without losing its apparent freedom of action, the characteristics of the Satanic nature. It is solicited, urged, and persuaded against the strivings of grace, but not overborne.

Such possession, however, is only the special and, as it were, miraculous form of the “law of sin in the members,” the power of Satan over the heart itself, recognized by Paul as an indwelling and straying power (Rom. vii. 23). Nor can it be doubted that it was rendered possible in the first instance by the consent of the sufferer to temptation and to sin. That it would be most probable in those who yielded to sensuality. These traits may easily be correlated from general observation of the tyranny of a habit of sensual indulgence. The cases of the habitually lustful, the opium-eater, and the drunkard (especially when struggling in the last extremity of delirium tremens) bear, as has often been noticed, many marks very similar to those of the spiritual possession. There is in them physical disease, but there is often something more. It is also to be noticed that the state of possession, although so awful in its wretched sense of demoniacal tyranny, yet, from the very fact of that consciousness, might be less hopeless and more capable of instant cure than the deliberate habit of wilful sin. The spirit might still retain marks of its original purity, although through the flesh and the demoniac power acting by the flesh it was enslaved. Here, also, the observation of the suddenness and completeness of conversion seen in cases of sensualism, compared with the greater difficulty in cases of moral and spiritual sin, tends to confirm the record of Scripture.

It was but natural that the power of evil should show itself, in more open and direct hostility than ever, in the age of our Lord and his apostles, when its time was short. It was natural also that it should take the special form of possession in an age of such unprecedented activities, in which it succeeded his coming, and continued till the DeVean of Christianity was felt. Nor was it less natural that it should have died away gradually before the great di-rect, and still greater indirect influence of Christ’s kingdom. Accordingly we find early fathers (as Just. Mart. Dial. c. Tryph. p. 811 B.; Tertullian, Apol. 32, 57, 49) alluding to its existence as a common thing, mentioning in the name of Jewish exorcism in the name of Jehovah as occasionally successful (see Matt. xxii. 27; Acts xix. 13), but especially dwelling on the power of Christian exorcism to cast it out from the country as a test of the truth of the Gospel, and as one well-known benefit which it already conferred on the people. By degrees the mention is less and less frequent, till the very idea is lost or perverted. See EXORCIST.

Such is a brief sketch of the scriptural notices of possession. That round the Jewish notion of it there grew up, in that noted age of superstition, many foolish and evil practices, and much superstition as to exorcisms and exorcists (comp. Tob. viii. 1-8; Joseph. Ant. viii. 2, 5), of the “vagabond exorcists” (see Acts xia. 13), is obvious, and would be inevitable. It is clear that Scripture does not in the least sanction or even condone to notice such things; but it is certain that in the Old Testament (Old Testament) 1 Sam. xvi. 18; 2 Kings xxi. 6; xxiii. 24, etc.) and in the New, it recognises possession as a real and direct power of evil spirits upon the heart. See POSSESSION (with a devil).

Dagan. See CORN; AGRICULTURE.

Dagger (־כָּרֶב, che-rob, usually "sword"), any sharp instrument, especially a military weapon (Judg. iii. 16, 21, 22). See SWORD.

Daggert, Herman, a Congregational minister, was born at Walpole, Mass., Sept. 11, 1768, and graduated at Brown University, 1786. He entered the ministry in the fall of 1786, and after preaching a year in Southold, L. I., was ordained pastor in Southampton, April 12, 1792. In 1796 he removed to West Hampton. In 1801 he was ordained pastor over the churches of Fire Place and Middle Island, which he resigned in 1807. In 1818 he became principal of the For. Miss. School at Cornwall. This position he resigned in 1824, and died May 19, 1832.—Sprague, Annals, ii. 291.

Daggett, Naphthali, D.D., a Congregational minister, was born at Attleborough, Mass., Sept. 8, 1727; graduated at Yale 1748, and was ordained pastor in Smithtown, L. I., 1751. He was elected Prof. of Divinity in Yale College, 1766, and remained there until his death, Nov. 23, 1780. He occupied the presidential chair in the college for twenty years, from 1766 until 1777. When the British landed at West Haven, 1776, his patriotic ardor led him to take up arms, and he was very rudely treated by the enemy. His death was hastened by his sufferings. He published a few sermons.—Sprague, Annals, i. 479.

Dagobert. See DAIMBERT.

Da’gon (Heb. Dagon’, דָּגוֹן; Sept. and Josephus, Δαϊμόνιος), the national god of the Philistines. Some have derived the name from דָּגָן, grain (Sanchoniathon, Πρόγμνων. ed. Orelli, p. 26, 32; Bochart, Hieros. i. 81; Beyer, ad Stid. p. 285); but the derivation from דָּגָן, a fish, with the diminutive (i.e. ending) termination in (Genesis, Thea. p. 520), is not only more in accordance with the principles of Hebrew etymology (Ewald, Ηεβ. Гραμ., p. 321, 341), but is most decisively established by the terms employed in 1 Sam. v. 4. It is there said that Dagon fell to the earth before the ark, that he stood and the palms of his hands were broken off, and that “Dagon was left on him. If Dagon is derived from דָּגָן, fish, and if the idol, as there is every reason to believe, had the body of a fish with the head of a man, the head of a fish by which it is commonly meant... why a part of the statue is there called Dagon in contradistinction to the head and hands, but not otherwise. That such was the figure of the idol is asserted.
by Kimchi, and is admitted by most modern scholars. It is also supported by the analogies of other fish deities. It was also supported by the Syro-Arabsians (see Herod. ii. 72; Eillan, Anais. x. 46; XII. 2; Xenophon. Anab. i. 4, 9; Strabo, xvii. 812; Diod. Sic. ii. 4; Cicer. Nat. Deor. iii. 15; comp. Munkcr, Ed. a. Kurr. p. 102; Movera, Phmar. p. 491 sq.; Creuzer, Symbol. ii. 78 sq.). Besides the Aegeratia (q. v.) of the Syrians (which was the female counterpart of Dagon), the Babylonians had a tradition, according to Berossus (Herodi. Ques. superant. ed. Richter, p. 48, 84), that at the very beginning of their history an extraordinary being, called Uanna, having the entire body of a fish, but the head, hands, feet, and voice of a man, emerged from the Erythraean Sea, appeared in Babylonia, and taught the rude inhabitants the use of letters, arts, religion, law, and agriculture; that, after long intervals between, other similar beings appeared and communicated the same precious lore in detail, and that the last of these was called Odakon (Udakon). Selden is persuaded that this Odakon is the Philistine god Dagon (De Dita Syris, p. 265), a conclusion in which Niebuhr coincides (Gesch. Aegy. p. 417), but from which Rawlinson dissents (Herod. i. 482). The relationship between Dagon and Aegeratia (q. d. "fish" and "great fish" or Derketo (which is but an abbreviation of the last name) is so great in other respects that Selden accounts for the only important difference between them—that of sex—by referring to the androgynous nature of many heathen gods. It is certain, however, that the Hebrew text, the Sept., and Philo Byblius (in Euseb. Prep. Ev. i. 10) make Dagon masculine ("Dagon"). The fish-like form was a natural emblem of fruitfulness, and as such was likely to be adopted by seafaring tribes in

The most famous temples of Dagon were at Gaza (Judg. xvi. 21-80) and Ashdod (1 Sam. v. 5, 6; 1 Chron. x. 10). The former was employed as a theatre (see further, Arch. i. 444, 456), and was once overturned by Samson (Judg. xvi.). The latter temple was destroyed by Jonadab in the Maccabean wars (1 Mach. x. 84; xi. 4; Josephus, Ant. xii. 4, 5). There would also seem to have been a third in the vicinity of Jericho, which was demolished by Ptolemy (Joseph. War. i. 2, 3). The site of this temple of Schwarz claims (Pala. ii. 423) to have discovered in a stream still bearing the name of Dugra, or fish-river: it is but a relic of the ancient Dock, or Docris (q. v.). Traces of the worship of Dagon likewise appear in the names Caphar-Dagon (near Jamin), and Beth-Dagon in Judah (Josh. xvi. 41), and Asher (Josh. xix. 27). See Beth-Dagon.

Besides the female figure of Aegeratia, there have lately been discovered among the Assyrian moans (Bat- pta, pl. 82-85) figures of a male fish-god, not only of the forms given above (Layard, Niniveh, ii. 358), but occasionally with a human form and feet, the fish only covering the back like a cloak (Layard, Babylon, p. 301). Colonel Rawlinson has also deciphered the name dagon on the cunieform inscriptions (q. v.). See Ro-
this north Beth-dagon, it is not difficult to discover, from the precise topographical statement of the sacred writer, that this city was situated at the point where the boundary-line of the tribe, after crossing the ridge south of the promontory of Carmel towards the east, intersects the stream of the Kishon, on the confines of Zebulon. It is remarkable that, as there is a modern Beth-dejan in the south which yet cannot be identified with, but is far to the north-west of, the southern Beth-dagon, so there is still, in the central district of the Holy Land, a second Beth-dejan, which is equally distant from our northern Beth-dagon, only in the opposite direction of south-east. In the fertile and beautiful plain of Skilm, a little to the east of Naphtali (Shemer, loc. cit.), we are described on the east end of it, on some low hills, a village called Beth-dejan (Bibb. Researches, iii, 102; Later Researches, p. 296). This Beth-dejan Thomson thinks has no counterpart in the Beth-dagons of the Bible. The French traveller, De Saulcy, is not of this opinion, but identifies the village near Nabalus with the Beth-dagon of Chron. x, 10; because "this village is only one day's march from Jilboa, the locality in the mountain to the north-east of Jenin, which was unquestionably the scene of Saul's disaster" (Dead Sea, i, 101). If his conjecture be right, we must identify this as the

city of the father of Manasses.

In the western half-trIBE of Manasses (some distance from Mount Gilead), where the Philistines, after their victory, placed Saul's head in the temple of their god—his body and those of his sons having been carried (the same distance north-east) to Bethshan, whence the Jabez-Giladites afterwards rescued them. It is no doubt aids this view that we are not otherwise informed where the temple was in which they deposited their ghastly trophy; moreover, the phrase (in ver. 9)

Δυτικά τῆς Ἰουδαίας, denoting a circuit of the adjacent country, which had been evacuated by Israel, and was then occupied by the enemy (ver. 7), very well suits the relative positions of this Beth-dejan and Bethshan, equally distant from the fatal field, and in different directions.

With regard to the Beth-dagon of 1 Mac. x, 88, Genisenius (Thee, p. 194) expresses a doubt whether this passage means only Dagon's temple at Azotus, or a Beth-dagon, a town so called in the neighborhood. In that case we might regard this as a city in the vicinity of Azotus (Blau, however, equally to Dr. Robinson's western Beth-dejan, and Eusebius's Chaphar-dagon, already mentioned. It will be observed that in the 8th verse Beth-dagon occurs as a proper name, as it also does in the original, By2ραδος, whereas, in the next verse, the temple of the Philistine god is described by the appellative τῷ του βως. On the whole, however, there does not appear to be sufficient reason for the distinction.

Dailley, David, a Methodist Episcopal minister, was born in Gloucester County, N. J., March 1, 1790, was converted in 1805, entered the itinerancy in 1812, became superannuated in 1855, and died May 4, 1866. For more than forty years he was a useful minister and preacher, and was eminent in the theology of the plan of salvation." He filled many important stations with uniform and excellent success. He was one of the editors of the revised Hymn-book of the Methodist Episcopal Church now in use. —Minutes of Conferences, vi, 219.

Dailley, Jean, minister of the French Reformed Church, and one of the most learned theologians of his age. He was born at Chatellerault, Jan. 6, 1544, and became tutor in the family of Duplessis-Mornay (q. v.) in 1612, and was ordained in 1628. Most of the remainder of his life was spent as minister of Charenton. He died April 15, 1670. In theology Dailley belonged to the moderate school of Saumur (q. v.). "His discourses are characterized by a heart-stirring eloquence, and it has been remarked of him that he had all the eloquence of Saurin without any approach to his turbid and bombastic style. The work by which Dailley is best known is his treatise De nos Patres, a work designed to check or moderate the excessive reverence which is felt in many quarters for the writers of ecclesiastical antiquity. It rendered an important service to the Protestant cause in this country and time, and may still be consulted with great advantage." It was published in 1629; in Latin in 1636 (Genev. 1640); and a translation into English in 1651, under the title of A Treatise concerning the right Use of the Fathers in the Decisions of Controversies that are at this Day in Religion (now ed. by Jekyll, Lond. 1681, 2mo); De Patre & Sacerdoti sua humanae (Amst. 1640); De la Censure des Pères sur la Foi des Images (8vo); De Confessiones et act. uniones (Genev. 1659, 4to); De Agricultura Confessionis (Genev. 1661, 4to); De Pseudologiapha Apostolica (1658, 8vo); and 20 volumes of sermons. —See Haag, La France Protestant, iv, 151. Rich, Dic. Dictionary, v. v.; Life of Dailley, prefixed to his Dailley, Dictionary; Chase, in Bibliotheca Sacra, iv, 5 sq.; Bylye, Dictionary, v. v.; Hoefer, Nouv. Dic. Gen. xii, 790.

D'Ally. See AILLY.

Daily occurs in the Eng. version of our Lord's Prayer as the rendering of εὐπλησθέντας (Matt. vi, 11; Luke xi, 3), which literally means for subsistence, i.e. needful, as it probably should have been translated. The same Greek word occurs nowhere else, although several Heb. and Greek words are thus translated in other passages (notwithstanding, however) (Dr. Brew's edition of Matthew, N. Y. 1860, p. 30), maintains the correctness of the Auth. Vers., as does also Schwarz (in Lange's Matthew, p. 121). But this involves a palpable tautology. See DAIY. Treatises on the phrase "daily bread" have been written in Latin by Kirchmayer (Vienn., 1711). Korbholz (XII. 1677). Stoll (1675). Pfeiffer (Regiom. 1699). Zorn (Opusc. 1, 465-568). See LORD'S PRAYER.

DAILY OFFERING or SACRIFICE (τὸν θυσίαν θυσίαν, the continual offering; Josephus θυσίαν θυσίαν, ivνχ ανικτελον, ivνχ ανικτελον, War, vii, 2, 1), in Daniel (viii, 12 sq.; xi, 31; xii, 11) and the Talmud (simply τῇ θυσίαν, "the continual," sacrificationum jure), was a burnt-offering of two-year-old lambs, which were daily immolated in the name of the whole Israelitish people (κατὰ τῆς ἡμερας ἡμερας). Joseph. Ant. iii, 10, 1) upon the great altar; the first lamb early (as it became light, Mishnah, Tuma, iii, 2; no reliance is to be placed upon Zorn's treatise De certa temp, in juge sacrificial ap. Etr. offertio, in the Miscell. Lipp. Nov. ii, 1 sq.), the other (/signup, "the evening oblation," Dan. ix, 21) at evening (more definitely signup, between the two evenings [see PASSOVER]; according to Pesch, vi, 1, the evening-offer was sacrificed as a rule between the eighth-and-a-half and the ninth-and-a-half hour (9 oclock P. M.), but on Sabbath and Passover-Eve [14th Nisan] one hour earlier; Josephus, Ant. xiv, 5, 3, designates "about the ninth hour" as the time; comp., however, Jonathan's Targum, Gen. xxix, 27. This was the usual termination of a fast [q. v.], Dan. ix, 21; Acts iii, 1; iv, 2, 3, 30, x, 1, xiii, 1, xv, 10, 11, xii, 1, xvi, 5, on the 24th and 25th: was either on a piece of fine, even flour as a meat offering, and a quarter of a bin of wine as a drink offering (Exod. xxix, 38-42; Num. xxviii, 3-8; Ezra iii, 5). It was not superseded by the Sabbath or festival offerings (Num. xxviii, 9 sq., 18 sq; not even by those of the Passover, Exod. v, 1). The regulations concerning the preparation of
DAIMBERT

DALE

the priests for this annual religious service, the allotment of the several operations, and the ritual of the sacrifices itself, were eventually prescribed in the tract 

Tumid (Mishna, v, 10), which Iken has illustrated with erudite illustration (Brem. 1738, and in Ugošini The

Seur. xix); comp. also Luscan, De Sacrisio Quo dul. 

(Lips. 1716). In the (last) temple there was a lam

baptism in the north-east corner for the special purpose of this offering (Tumid, iii, 8). See Sacrist

DAILY SERVICE OR PRAYERS. In the ancient Church, wherever it was practicable, daily service was established, at which every clergyman was compelled to attend, under pain of suspension or deprivation, whether it was his duty to officiate or not. This subject is determined by several councils, by the first council of Toledo, and by that of Agde: the law of Justinian punishes the neglect of this duty with degradation, because of the scandal it gives to the laity. In some churches a daily celebration of the Lord's Supper seems to have been recommended, and to some extent practiced, and one extant testimony on this subject in Tertullian, Cyprian, and Ireneus; the last of whom says," It is the will of our Lord that we should make our offering at his altar frequently, and without intermission." But there was no fixed and express rule as to the time of celebration. The rubric of the Church of England requires that all priests and deacons are to offer up daily the morning and evening prayer, either privately or openly, not being led by sickness or some other urgent cause. And the curate that ministered in every parish church or chapel, being at home, and not being otherwise hindered, shall say the same in the parish church or chapel where he ministered, and shall cause a bell to be tolled thereunto a convenient time before he begin, that the people may come to hear God's word and to pray with him." But this rule is now a dead letter.—Prayer-book, Preface; Bingham, Orig. Eccl. bk vi, chap iii, § 5, 6; Procter, On Common Prayer, p. 155-197.

Daimbert or Dagobert, the first Latin patriarch of Jerusalem. While he was bishop of Pisa, pope Urban II conferred upon him the sovereignty of Corsica for life. He was one of fifty bishops appointed him papal legate in the East. In Nov. 1096, Daimbert was present at the Council of Clermont when Urban II preached the first crusade, and he joined the crusade at the head of troops from Pisa and Genoa. When Daimbert arrived in Palestine, Godfrey of Bouillon was in command of the forces of Jerusalem. A general meeting of the Christian chiefs, held on Christmas, 1099, Daimbert was elected patriarch of Jerusalem, in the place of one Arnulfus who was deposed. Godfrey had to leave to Daimbert the sovereignty of Jaffa, and that of quarter of Jerusalem in which the Church of the Resurrection was situated. On the death of God

frey, Daimbert aspired to the throne of Jerusalem, but finally had to yield to Baldwin, and to crown the new king. Falling out with Baldwin, he was expelled by the latter, and Arnulfus returned to the patriarchate. Daimbert went to Italy, and prevailed upon pope Pas
cal II to decide in his favor. He intended to return to Jerusalem and to enforce the papal decision, but died on his way at Palermo, in 1107.—Hoefer, Biogra

phie Générale, xli, 792.

Dal'nan (Daiis v. r. Deiis, Vulg. Desmons), the name of one of the heads of temple-servants that returned from Babylon (1 Esdr. v, 21); evidently a corruption (" being mistaken for ") for the REZIN (q. v.) of the Heb. texts (Ezra ii, 48; Neh. viii, 50).

Datyah. See Vultura.

Dala'ah (1 Chron. iii, 24), the same name elsewhere more correctly Anglicized DHALAH (q. v.).

Dalberg, Karl Theodor, baron of Dalberg, was born Feb. 8, 1744, at Jersheim, near Worms; he studied at Göttingen and Heidelberg; became, while yet very young, prebendary of Mayence, and canon of Worms and Würzburg. In 1772, as governor of Erfurt, he gave a great impulse to agriculture, commerce, and industry. In 1787 he became coadjutor of the elector of Mayence and the bishop of Worms; was the elector of Mayence and the bishop of Worms; and soon after archbishop had made bishop of Hamburgh 1788, and soon after arch

by of Tarsus. The last electors of Mayence died in 1802, and, as by the treaty of Luneville, he had been abdol

of Mayence on the one side of the Rhine, Alberg became and on the other secularized, 1798 a great credit

arch-chancellor, which position he held till (secured the forty years; but by abdicating the convents and the precedence of clergy, and by sympathy for the Emperor of

in 1804 he was present at the retirement of the emperor at Paris. When the accession of the Rhine he formed he had to resign his office, but, in exchange, was made prince-primate of the confiscation, and was Napoleon's adviser in spiritual and ecclesiastical matters. He afterwards became grand-duke of Frankfort, and appointed Eugene Beauharnais as his successor. In 1818 he renounced his title, went first to Constance, where he protected the vicar general Wessenberg from the enmity of the pope, and afterwards returned to Regensburg, where he lived in retirement, in 1838, to an age of 100 years, and died Feb. 10, 1817. His principal works are, Betrachtungen d. u. Universum (Frankf. 1777; 6th ed. 1819); Verhällniss zwischen Moral und Staatskunst (Frankf. 1786); Grundzüge d. Ästhetik (Erf. 1791); Von d. Bescamatien als allgemein. Grundleh. d. Weltschafi (Erf. 1793); Betrachtungen uer d. Charakter Karlis d. G. (Erf., 1806); Pericles (Rome, 1811). See Kramer, Gedichttnisschrift auf K. v. Dalberg (Gotha, 1817); Hoefer, New. Lii

sion, with the help of Job and the pool of Siloam), in which Absalom reared his family monument (2 Sam. xviii, 18). See ABSALOM'S TOMB.

Dale, the king's (Δαλ'νος, valley of the king), the name of a valley apparently near the Dead Sea, where Melchisedek met Abraham (Gen. xiv, 17); otherwise called the Valley of Shavek (q. v.), but identified by some with another of the same name (the modern Valley of Japheth, or, rather, its southern part, opening into the plot used for the king's garden, about the well of Job and the pool of Siloam), in which Absalom reared his family monument (2 Sam. xviii, 18). See ABSALOM'S TOMB.

Dale, or Daled, Antonius van, was born Nov. 8, 1688, in Haarlem. He was brought up to business against his will. At the age of thirty he applied himself to the study of the ancient languages, and at the same time to that of medicine. He became a practising physician, and attained distinction in his profession. His faithful and disinterested attention to his poor patients secured him high praise. He also exercised for a time his preaching gift among the Mennonites; but his sermons were overloaded with learned citations, and hence were hardly acceptable to the people. His European reputation rests, however, on the learned works which he wrote against what he regarded as superstition. In 1688 he published De oraculis Ethniciorum dissertationes duas, quorum prior de ipsoorum divinatione ac defectu, posterior de oisam in oraculis (Amst. 1690). In this work he expressed the opinion that demoniac influence was exerted in connection with the oracles of the ancients, and that sorcery is to be ascribed to Satan. The work produced a great sensation. Fontenelle made free use of it in the composition of his Histoire des Oracles (Paris, 1707, 12mo). He wrote several other works in Latin, and one in the French tongue, on the subject, discrediting belief in Satanic agency, especially when applied to the interpretation of Scripture. He also published a Dissert. super Aristeis de LXX interpretationibus, with a history of ceremonies of baptism among the Jews, and among the various Christian communities (Amst. 1704, 4to). He died Nov. 26, 1706, deeply la-
this north Beth-dagon, it lights, and Prof. More from the precise topography, 
writer, that this city was 
the boundary line of David Dale, pastor of an 
other of the promontory at Glasgow. Since the 
strings the stream 
formed a connection with 
of Zebulon. It is 
ery Bezl-Dejam in Καλαμαναναυα, deriv. unknown, 
nown, titled with, but is fed by Lightfoot, Hor. Hebr. p. 555; 
Beth-dagon so 526 for the Salmons, Σαλμόν, a 
the Holy Land in the Talmud as lying near Tiberi- 
far distant mentioned only in Mark xii, 10, where we 
opposite dirmus, after feeding the multitude in the 
beautitul East of the Sea of Galilee, took a boat and (Shezhep) the regions (i.e. ρα μην) of Dalmanutha: 
, 11, on 56 parallel passage (Matt. xv. 38) states that he 
called to the borders of Magdala. From this we 
may conclude that Dalmanutha was a town on the west 
side of the lake near Magdala. The latter stood close 
on the shore, at the southern end of the little plain 
of Gennesaret, at the present Mejdil. See Magdala. 
 Immediately south of it is a precipitous hill juts out into 
the sea. Beyond this, about a mile from Magdala, a 
newly overlaid village from the west. At its 
embrace some cultivated fields and gardens, amidst which, 
just by the sea, are several copious fountains, 
rounded by heavy ancient walls and the ruins of a 
village. The place is called "Ain el-Bardich, "the cold 
fountain" (Robinson, Res. iii, 27), and has, with great 
probability, been called Dalmanutha (Porter, in Smith and Kitto, s. v.; Tristram, Land and 
Israel, p. 429). See CAPERNUM. Thomson thinks 
it may be the present ruined site called Dalamania, on 
the river south of the lake, although he admits this 
somewhat too far from Magdala (Land and Book, ii. 60). 
Schwarz (Palest. p. 180) finds it in the "cave of Tel- 
imsa" (Στέθυνατα), mentioned in the Talmud, situated 
probably on the cliffs above Mejdil (Van de Velde, Memoir, p. 334), which, he learns, was also called 
Talmanutha.

Dalmaťa (Δαλματία, deriv. unknown), a 
mountainous country on the eastern shore of the Adriatic 
Sea (Pliny, iii, 38; Strabo, vi, 315), between the 
river Titius and Drinus, and the Belian and Scordian 
hills, south of Laburnia (Pliny, iii, 26), which, 
 altogether with it, formed, after the expedition of Tiberius, 
A.D. 9, the first province of the empire; for which, 
indeed, it was often spoken of synonymously (Cony-
beare and Howson's St. Paul, ii. 126). Its 
principal towns were Salona, Epidaurus, Lissus, etc. (Ptolomy, 
i, 17, 4). It derived its name from the Dalmate, a 
barbarous but valiant race, supposed to be of Thracian 
origin, and who were very skilful in navigating the sea 
along their coasts, and extremely bold in their pira-
ceries. The capital, Dalminium, was taken and de-
broyed by the Romans, B.C. 157; the country, how-
ever, was not completely subdued till the time of 
Augustus. The modern name of the country is the same 
as the ancient. Education and morality are here at a 
lower ebb than in any other part of the Austrian em-
pire (see the Penny Cyclopedia, s. v.; Smith's Dict. of 
Class. Geog. s. v., and the travellers there referred to). See ILLYRICUM.

During Paul's second imprisonment at Rome, Titus 
left him to visit Dalmatia (2 Tim. iv, 13), but for what 
purpose is not stated, unless we may conjecture that it 
was to regulate the affairs of the Church in that region 
(Cellarini Notit. i, 614 sq.), in the vicinity of which Paul 
had formerly preached (Rom. xv. 19). See TRITES.

At present Dalmatia is a crown-land of the Austrian 
empire, the emperor bearing among his other titles 
that of king of Dalmatia. According to the last cen-
sus of 1887, the population amounted to 476,101, 
mostly Slav. Of these, 896,836 were Roman Catholics, 
under the archbishop of Zara and five bishops (Sebeni-
cico, Spalato, Lesina, Ragusa, and Cattaro); 138 United 
Greeks (in three congregations, belonging to the dio-
cese of Kreuz, in Croatia; 78,744 members of the 
orthodox (non-United) Greek Church, under one bishop, 
who formerly resided at Sebenico since 1852; at 
Zara; 4,825 Lutherans; 34 Reformed; and 288 Israelites. 
The Roman Catholics have 297 parishes, 122 chapels, 
councils, and 69 monasteries; the orthodox Greeks, 92 
parishes, 9 chaplaincies, and 11 monasteries.—Allgemeine 
Real-Encyclopädie, iii, 73.

Dalmatic, the characteristic dress of the deacon 
in the administration of the Eucharist, so-called 
from its use at Dalmatia, or first used by the 
Dalmatian clergy (Durandus, Rat. iii, 1). It is a 
robe reaching down to the knees, and open at each 
side for a distance varying at different periods. It is 
not marked at the back with a cross like the chasuble, 
but in the Latin Church with two narrow stripes, the 
remains of the anguina cleri worn on the Roman 
dress. In the Greek Church it is called colobium, 
and is covered with a multitude of small crosses.

The dalmatic is seen, in some old brasses, worn over the alb 
and the stole, the fringed extremities of which reach 
just below it. It was adopted at a later period by the 
higher clergy on the Continent. It is sometimes worn 
over the dalmatic. Its symmetrical meaning is 
thus explained by the ritualists: "The deacon's robe 
of white with purple stripes, with the right sleeve 
plain and very full, but the left fringed or tasselled, 
is the image of bountifulness towards the poor. It is 
the robe given to deacons and sub-deacons when they were chosen by the apocrises to serve the 
tables; and a deacon should have a dalmatic with broader 
sleeves than a sub-deacon, because he should have 
a larger generosity, while a bishop should have one 
with sleeves much broader and wider than the deacon's, 
because of the same reason in an ascending ratio. A 
dalmatic signifies an immaculate life as well as hospi-
tality, and it has two stripes before and behind to 
show that a bishop should exercise his charity to all, 
both in prosperity and adversity. The transverse 
line, which forms a cross behind, is, of course, in 
allusion to the cross which the great Bishop of our souls bore 
when on his way to Calvary."

Dal'phon (Heb. דילפון, דילפון, prob. Persian; 
Sept. Διαλύφων v. r. και αἰθλῶν; Vulg. Delphon), 
the second of the ten sons of Haman; killed by the Jews 
on the 18th of Adar (Esth. ix, 7), B.C. 478.

Dam (דיא, mother), the female parent of young 
birds (Deut. xxii, 6, 7), or lambs (Exod. xxii, 30; 
Lev. xvii, 27). With the Mosaic regulations of mer-
ciful treatment toward these creatures spoken of in 
these passages, compare the similar ordinance respecting 
birling a kid in its own mother's milk (Exod. 
xxiii, 19), and the treatise of Heumen, De leges 
paradoxe (Götz 1748, and in his Byglog. Diss. ii, 262 sq.). See BEAST.

Damages, whether to person or property, according 
to the Mosaic statutes. See also FIXM.

1. Injury to limb, in the case of a free Israelite, enti-
ted an equal infliction (jus talionis) upon the same 
part of the body of the aggressor (Exod. xxii, 23-25; 
Lev. xxiv, 19 sq.; Dent. xiii, 21; comp. Matt. v, 22); 
in the case of a slave it effected his freedom (Exod. 
xxi, 26 sq.; comp. Philo, Opp. ii, 392). Pecuniary 
satisfaction, however, in the former case, was a well-
established custom (Josephus, Ant. iv, 8, 50), so that 
retaliation was probably resorted to only in cases of 
intentional or malicious injury (comp. Exod. xxii, 22 
 sq.; see Magdala, s. v.). According to the Greek leg-
islation also (Dios. Ch. xii, 17; Diog. Laert. i, 57), as 
well as the law of the Roman Twelve Tables (see Gell. 
xx, 1; comp. Heinecc. Antic. Jur. Rom. iv, 18, 8, and 
Oppos. min. p. 218 sq.; on the German usage, see
Strodtmann, *Deutsche Alterthümer*, p. 45, sanctioned this natural and simple judicial observance of "like for like" (Comp. Douglass *Aequ. et Mal.* i, 92, 11; Dane, in *Machabees*’ N. T. Text. Talm. p. 488 sq.). Among the Israelites, however, it does not seem to have often been enforced (Comp. Lightfoot, *Hort. Hebr.* p. 382), and corporal injuries, at least under the monarchy, were almost always compromised by a sum of money (generally among the Turks; see Hammer, *Oman. Reich*, i, 14 sq.). The Talmudic interpretation growing out of this enactment may be seen in *Baba Kamma*, viii, 1. See RESTITUTION.

2. Wounding a free person in an affray (where both parties might be presumed to be pretty nearly equally to blame, the injury, however, must have been inflicted with a stone or the fist, גון יונק; comp. Philo, ii, 317, רף יכו; not with a proper weapon, Josephus, *Ant.* iv, 8, 38; also in a suddenly outwrecking quarrel between them that gave no evidence of long-considered harm), which rendered the individual unfit for use, required compensation for the loss through sickness and the expense of cures (*Exod.* xxii, 18 sq.; ver. 19 prescribes that this mulct should cease when the wounded person became able to go about again); should he die, however, no further payment was to be exacted (Philo, *Opp.* ii, 317; comp. *Baba Kamma*, viii, 1). More severe excution followed when in a fray a pregnant woman was so injured as to suffer abortion, for then the law of life for life prevailed in full (*Exod.* xxii, 22; accord. to Josephus, however, *Ant.* iv, 8, 38, and *Phil.* ii, 317, pecuniary reparation was allowed in such cases likewise). See PUNISHMENT.

3. Damage to one’s property by cattle (*Exod.* xxii, 5), or accidental spread of fire in the field (ver. 6), called for full remuneration of the loss (as also among the Romans; see *Wallis, Gesch. d. röm. Rechts*, p. 612), and such claim is to be paid for in kind, although a commutation in money certainly might obtain (Philo, *Opp.* ii, 389). For fuller details, see the Talmudic treatise *Baba Kamma*, iv, 1. When a hired animal or article was injured no special restitution was required (*Exod.* xxii, 15). It was otherwise, however, with property placed in trust. See DEPOT. On the jurisdiction of all cases, see ELDERS.

Damarias (*Deumarsou*), an Athenian woman converted to Christianity by Paul’s preaching (Acts xvii, 34), A.D. 48. Chrysostom (De *Sororibus*, iv, 7) and others held her to have been the wife of Dionysius the Areopagite, but apparently for no other reason than that she is mentioned together with him in this passage. Grotius and Hemsterhuis allege that her name should be *DamaMaria* (signifying θεῷ νήφος, which is frequently found as a woman’s name; but the pronunciation of θ and ρ was not uncommon both in pronunciation and writing (Lobeck on *Phrynichus*, p. 602).

Damascene (*Δαμασκινον*), an inhabitant (2 Cor. xi, 22) of the city of Damascus (q. v.).

Damascenus, Joannes. See JOHN OF DAMASCUS.

Damascenus (Heb. *Damme*; נְדָמַס; *Darmas*; Δαμασκόν, by resolution of the Dageish, 1 Chron. xviii, 6, 6; once *Dammes*; נְדָמָס, probably by erroneous transcription for the last, 2 Kings xvi, 17), 15, 17), 14; *Ach. act.* Gesseniu, 725, p. 345 sq.), from its commerce; *Arab. Dimesski; Gr. Δαμασκον*, one of the most ancient, and at all times one of the most important of Oriental cities. It is called by the natives *Ar-Sham,* and is capital of an important paschallary of this latter name, and indeed is the chief capital of Syria. It was sometimes spoken of by the ancients as an Arabian city, but in reality it belongs to Syria (Coele-Syria, Strabo xvi, 756; Ptolemy, v, 15, 22). In 2 Sam. viii, 5, 6, "the Syrians of Damascus" are spoken of, and the words "Syria of Damascense" are found in Isa. vii, 8. It is expressly said, "the head of Syria is Damascus;" also, Isa. xvii, 3, "the kingdom is to cease from Damascus;" so that this place was obviously the metropolis of a Syrian empire. It gave name (Syria Damascena, Flin. *Hist. Natural.* v, 13) to a district of Syria, which, in 1 Chron. xix, 6, is distinguished as "Syria-Maacha" in the A.V. The city is even mentioned in the cuneiform inscriptions (q. v.). There has never been any doubt of its identity.

1. Situation. Damascus occupies the most beautiful site in Syria, or perhaps in all Western Asia. At the eastern base of Anti-Libanus lies a vast plain, having an elevation of about 2200 feet above the level of the sea. It is bounded on the north by the river Awaj, which runs between them, and from six to eight days’ journey from Jerusalem. Its celebrity is of early date. Strabo (xvi, p. 756) speaks of it in eulogistic terms. In a religious point of view, also, its repute was great. Julian (*Ep.* 24) terms it "the great and sacred Damascus, surpassing every city in the beauty of its site, and the magnitude of its shrines, as well as theateness of its seasons, the limpidness of its fountains, the volume of its waters, and the richness of its soil." The Abana (q. v.), now called Barada, rising high up on the western flank of Anti-Libanus, forces its way through the chain, running for some time among the mountains, till suddenly it lurates through a narrow slot upon the open country east of the hills, and diffuses fertility far and wide. "From the edge of the mountain-ramae," says a modern traveller, "you look down on the plain of Damascus. It is here seen in its widest and fullest perfection, with the visible explanation of the whole secret of its great and enduring charm, that which it must have had when it was the solitary seat of civilization in Syria, and which it will have as long as the world lasts. The river is visible at the bottom, with its green banks, rushing through the cleft; it bursts forth, and as if in a moment scatters over the plain, through the length of thirty miles, in a prodigious volume of water which had hitherto been confined to its single channel. . . . Far and wide in front extends the level plain, its horizon bare, its lines of surrounding hills bare, all bare far away on the road to Palmyra and Bagdad. In the midst of this plain lies at your feet the vast lake or island of deep verdure, walnuts and apricots waving above, corn and grass below; and in the midst of this mass of foliage rises, striking out its white arms of streets hither and thither, and its white minarets above the trees which embosom them, the city of Damascus. On the right tower the snowy height of Hormon, overlooking the whole scene. Close behind are the serrated limestone summits where you stand literally between the living and the dead" (Stanley, *Palestine*, p. 402). Another writer mentions among the produce of the plain in question "walnuts, pomegranates, figs, plums, apricots, citrus, pears, and apples" (Addison’s *Rom. and Palmyra*, ii, 95). Olive-trees are also a principal feature of the scene. Besides the main stream of the Barada, which runs directly through the town, supplying its public cisterns, baths, and fountains, a number of branches are given off to the right and to the left, which irrigate the meadows and corn-fields, turning what would otherwise be a desert into a garden. Although greatly weakened in volume, flow on towards the east for about twenty miles, when they pour their waters into two small and shallow lakes, which lie upon the verge of the desert. Two other streams, the
Wady Helbon upon the north, and the Awaj upon the south, which flows direct from Hermon, increase the fertility of the Damascene plain, and contend for the honor of representing the "Phparaz" (q. v.) of Scripture. The city stands on the banks of the main stream, about two miles distant from, and 500 feet below the pass through which it emerges into the plain. The modern Oriental architecture does not bear close inspection, but when seen from a distance it is singularly imposing. Tapering minarets and swelling domes, tipped with golden crescents, rise up in every direction from the confused mass of white terraced roofs, while in some places their tops gleam like diamonds amid the deep green foliage. In the centre of the city stands the great mosque, and near it the massive towers of the castle.

2. History.—According to Josephus (Ant. i, 6) Damascus was founded by Us, the son of Aram, and grandson of Shem. It is first mentioned in Scripture in connection with Abraham, whose steward was a native of the place (Gen. xv. 2). We may gather from the name of this person, as well as from the statement of Josephus, which connects the city with the Aramaeans, that it was a Shemitic settlement. According to a tradition preserved in the native writer Nicolaus, Abraham staid for some time at Damascus after leaving Charran and before entering the promised land, and during his stay was king of the place.

"Abraham's name was," he says, "even in his own day, familiar in the mouths of the Damascenes, and a village was shown where he dwelt, which was called after him" (Fragm. 30). This last circumstance would seem, however, to conflict with the notion of Abraham having been king, since in that case he would have dwelt in the capital. In the village of Buzeh, three miles north of the city, is a highly venerated shrine, called for the last eight centuries "the house of Abra-

ham." (On these fables, see Julian, Epist. 24, p. 329; Cellarii Notitiae, ii. 442 sq.; Mannert, VI. i. 407 sq.; Justin, xxxvi. 2; Eusebius, Orig. xxv. 1; D'Herb etot, Biblioth. Or. i. 70.) See Abraham.

Nothing more is known of Damascus until the time of David, when "the Syrians of Damascus came to succour Hadadezer, king of Zobah," with whom David was at war (2 Sam. viii, 5; 1 Chron. xviii, 5). On this occasion David "slew the Syrians 22,000 men," and in consequence of this victory became completely master of the whole territory, which he garrisoned with Israelites. "David put garrisons in Syria of Damascus; and the Syrians became servants to Da-

vid, and brought gifts" (2 Sam. viii, 6). Nicolaus of Damascus said that the name of the king who reigned at this time was Hadad; and he ascribes to him a do-

mination not only over Damascus, but "over all Syria except Phonicia" (Fragm. 81). He noticed his attack upon David, and related that many battles were fought between them, the last, wherein he suffered defeat, be-

ing "upon the Euphrates." According to this writer, Hadad the first was succeeded by a son, who took the same name, as did his descendants for ten generations. But this is irreconcilable with Scripture (see Müller, Orig. regni Damascus. Lips. 1714; also in Iren. The·

aur. i. 721 sq.). It appears that in the reign of Solomon a certain Rezon, who had been a subject of Ha-
dadezer, king of Zobah, and had escaped when David conquered Zobah, made himself master of Damas-
cus, and established his own rule there (1 Kings xi, 23-35). He was "an adversary to Israel all the days of Solomon ... and he abhorred Israel, and reigned over Syria" (Joseph. Ant. viii, 7, 6). Afterwards the family of Hadad appears to have recovered the throne, and a Benhadad, who is probably Hadad III of Nico-
lāüs, a grandson of the antagonist of David, is found in league with Baasha, king of Israel, against Aza (1 Kings xv, 19; 2 Chron. xvi, 8), and afterwards in league with Assas against Baasha (1 Kings xv, 20). He made a successful invasion of the Israelitish territory in the reign of that king; and in the reign of Omri he not only captured a number of Israelitish cities, which he added to his own dominions, but even seems to have exercised a species of lordship over Samaria itself, in which he acquired the right of "making himself streets" (1 Kings ii, 84; comp. Nic. D. Prosm. 81, ad

fin.). He was succeeded by his son, Hadad IV (the Benhadad II of Scripture, and the Ben-idri of the Assyrian inscriptions), who came at the head of thirty-two subject kings against Ahab, and laid siege to Samaria (1 Kings xx, 1). The attack was unsuccessful, and was followed by wars, in which victory declared itself unmistakably on the side of the Israelites; and at last Benhadad was taken prisoner, and forced to submit to a treaty whereby he gave up all that his fa-

ther had gained, and submitted in his turn to the su-

zerainty of Ahab (ib. xx, 13-34). The terms of the
tary later (B.C. cir. 742), it is as allies of Israel against Judah (2 Kings xv, 37). We may suspect that the chief cause of the union now established between two powers which had been so long hostile was the necessity of combining to resist the Assyrians, who at the time were steadily pursuing a policy of encroachment in this quarter. Scripture mentions the invasions of Pul (2 Kings xv, 19; 1 Chron. v, 26), and Tiglath-Pileser (2 Kings xv, 29; 1 Chron. v, 26); and there is reason to believe that almost every Assyrian monarch of the period made war in this direction. It seems to have been during a pause in the struggle that Rezin, king of Damascus, and Pekah, king of Israel, resolved conjointly to attack Jerusalem, intending to depose Ahaz and set up as king a creature of their own (Isa. vii, 1-6; 2 Kings xvi, 5). Ahaz may have already been suspected of a friendly feeling towards Assyria, or the object may simply have been to consolidate a power capable of effectually opposing the arms of that country. In either case the attempt signally failed, and only brought about more rapidly the evil against which the two kings wished to guard. Jerusalem successfully maintained itself against the combined attack; but Eliah, which had formerly been built by Assuriah, king of Judah, in territory regarded as Syrian (2 Kings xiv, 22), having been taken and retained by Rezin (ib. xvi, 6), Ahaz was induced to throw himself into the arms of Tiglath-Pileser, to ask aid from him, and to accept voluntarily the position of an Assyrian feudatory (ib. vii, 7-8). The aid sought was given, with the important result that Rezin was slain, the kingdom of Damascus brought to an end, and the city itself destroyed, the inhabitants being carried captive into Assyria (ib. ver. 9; comp. Isa. vii, 8, and Amos i, 6). Among the sculptures lately discovered on the site of Nineveh are thought to be delineations of this siege and capture of Damascus. Rawlinson even reads the name of the city on an obelisk connected with them (Bonomi, Nineveh, p. 234 sq.). Assyrian remains have lately been discovered in a mound near Damascus (Journal of Sa-

Final Assault of Damascus. From the Assyrian Monuments.

Captivity of the Inhabitants. From the same.

cred Literature, October, 1854, p. 218; January, 1855, p. 463). See Assyria.
It was long before Damascus recovered from this serious blow. As Isaias and Amos had prophesied in the day of her prosperity that Damascus should be "taken away from being a city and be a ruinous heap" (Isa. xvii. 1), that "a fire should be sent into the house of Hazael which should devour the palaces of Ben-hadad" (Amos i. 4), so Jeremias, writing about B.C. 600, declares "Damascus is walled, feeble, and turneth herself to flee, and fear bath seized on her; anguish and sorrows have taken her as a woman in travail. How is the city of praise not left, the city of my joy!" (Jer. xlix. 24-35). Since then the province of Assyria until the capture of Nineveh by the Medes (B.C. 625), when it submitted to the conquerors. Its wealth and commercial prosperity appear to have declined for a considerable period, probably on account of the ravages of Tiglath-Pileser, and the captivity of the most influential and enterprising of its people. The city was afterwards given in succession by the Egyptians, Babylonians, and Persians. We have no particulars of its history for a period of three centuries. Under the rule of the Persians it was the capital of the province of Syria, and the residence of the satrap. We do not know at what time Damascus was rebuilt, but Strabo says that it was the most sumptuous place in Syria during the Persian period (xvii. 2, § 19). When Darius, the last king of Persia, made his great effort to repress the rising power, and bar the progress of Alexander of Macedon, it was in this city he deposed his family and treasures (Arrian, Exp. Art. ii. 11). The fate of Damascus, with that of all Western Asia, was decided by the battle of Issus, in which the Persian army was almost annihilated. Damascus now became the capital of a province which Alexander gave to his general Laomedon (Plut. Alex. 83). During the long wars which raged between the Seleucids and the Ptolemies, Damascus had no separate history; it sometimes fell to the one, and sometimes to the other. Antioch was founded, and became their favorite residence, and the capital of the Seleucids; but when the Syrian kingdom was divided in B.C. 126, Damascus was made the second capital. Its territory embraced Coele-Syria, Phoenicia, and the country east of the Jordan, and it was afterwards governed in succession by four princes of the family of Seleucus. Damascus and Antioch thus became the seats of rival factions, and aspirants after complete sovereignty (Joseph. Ant. xiii. 13, 4, and 18, 1). The last of these princes, Antiochus Dionysus, was killed in battle against Attalus, king of Arabia, and the Damascenes forthwith elected Aretas his successor (Josephus, Ant. xiii. 15, 1), B.C. 84. In the year B.C. 84, the Romans, under Pompey, invaded and captured Syria, constituted it a province of the empire, and made Damascus the seat of government (ib. xiv. 2, 3, and 4, 5; Mom. Choren. i. 14; Apian. Bell. Mithrid. p. 224). From Josephus (War. i. 2; xxvi. 2; xx. 2; comp. Acts ix. 2) it appears that its population contained great numbers of Jews.

For twenty years Damascus continued to be the residence of the Roman procurators. The city prospered under their firm and equitable rule, and even after their removal to Antioch did not decline. Strabo, who flourished at this time, describes it as one of the most magnificent cities of the East. Nicolaus, the famous historian and philosopher, the friend of Herod the Great and Augustus, was now one of its citizens (Strabo, Geogr. xvi. 1; Josephus, Ant. xvi. 10, 8). But the strong arm of Rome was not sufficient to quell the fiery spirit of the Syrians. The whole country was rent into factions, and embroiled by the unceasing rivalries and wars of the princes. The government of Syria was thus thrown into confusion, and Vitellius returned to Antioch (Joseph. Ant. xviii. 5, 1-8). It appears that now Aretas, taking advantage of the state of affairs, followed up his successes, advanced upon Damascus, and seized the city. It was during his brief rule (or some earlier one) that Paul visited Damascus on his return from Arabia (Gal. i. 16, 17). See ARETAS. His zeal as a missionary, and the energy with which he opposed every form of idolatry, had probably attracted the notice and excited the enmity of Aretas; and consequently, when informed by the Jews that the apostle had returned to the city, he was anxious to get rid of him, and governed the governor to watch the gates day and night for that purpose (Acts ix. 24; 2 Cor. xi. 32). See Neander, Planting and Training of the Christian Church, i. 106). The Romans adorned Damascus with many splendid buildings, the ruins of which still exist. Some of them were erected by Titus, who in the reign of the emperor of the city, and one of the most celebrated architects of his age, to whose genius we are indebted for one of the most beautiful monuments of ancient Rome, the Column of Trajan (Dion Cass. lxix). A little later it was reckoned to Decapolis (Plin. Hist. Nat. v. 16), after which it was given to the bishop of the city, and the most celebrated church and dedicated to John the Baptist. When the first general council assembled at Nice, Magnus, the metropolitan of Damascus, was present with seven of his suffragans. But the Roman empire was now waxing feeble, and the religion which, by its establishment as a national cultus, had spread into the most remote provinces, from life into the declining state, was itself losing its purity and its power. Damascus felt, like other places, the demoralizing tendencies of a corrupt faith. In the beginning of the 7th century a new and terrible power appeared upon the stage of the world's history, destined, in the hands of an all-wise though mysterious Providence, to overthrow a degenerate empire and chastise an erring Church. In A.D. 634 Damascus opened its gates to the Mohammedans, and thirty years later the first caliph of the Omeyyads transferred the seat of his government to that city. It now became for a brief period the capital of a powerful empire including Syria, Mesopotamia, Persia, Northern Africa, and Spain (Elmacin, Hist. Sarrac. xiii). In A.D. 750 the Omeyyads were supplanted by the dynasty of Albas, and the court was removed to Bagdad. A stormy period of four centuries now passed over the old city without leaving a single incident worthy of special note. An attack of the Crusaders (A.D. 1148) under the three chiefs, Baldwin, Conrad, and Louis VIII, might have claimed a place here had it not been so disgraceful to the Christian arms. It is enough to say that the cross never displaced the crescent on the battlements of Damascus. The ruins of Nureddin and a few more commemorate the bright epochs in the city's history. Two centuries later came Timur, who literally swept Damascus with "the broom
DAMASCUS

of destruction." Arab writers sometimes call him el-Walsh, "the wild beast," and he fully earned that name. Never had Damascus so fearfully experienced the horrors of conquest. Its wealth, its famed manufactories, and its well-filled libraries, were all dissipate

A century later it fell into the hands of the Turks, and, with the exception of the brief rule of Ibrahim Pasha, it has ever since remained nominally subject to the sultan.

The Mohammmedan population of Damascus have long been known as the greatest fanatics in the East. The steady decay that has been going on in the wealth and influence during the last thirty years has tended to excite their bitter enmity. In July, 1860, taking advantage of the war between the Druses and Maronites, and encouraged also by the Turkish au

The first act in the long history of Damascus. (There is a work by Pieritz on the Persecution of the Jews at Damascus, Lond. 1840.) Damascus is still the largest city in Asia. In the town, about 20,000. Of these, 6000 were Jews and 15,900 Christians. The Christian population has been almost exterminated by the above massacre of the greater portion of the males. The pasha ranks with the first officers of the empire, and the city is the head-quarters of the Syrian army.

3. Commerce.—Damascus has always been a great centre for trade. The difficulties and dangers of the mountain passes to the west of Anti-Libanus and the line of traffic between Egypt and Upper Syria follow the circuitous route by Damascus rather than the direct one through Cæle-Syria, while the trade of Tyre with Assyr

But the passage-trade of Damascus has probably been as important and as direct as any other. Its merchants have profited largely by the caravans which continually passed through it on their way to distant countries. It is uncertain whether in early times it had any important manufactories of its own. According to some expositors, the passage in Amos iii, 12, which we translate in Damascus on a couch (ךְֵּ֣בֶּ֣שׁ פִּזְרַ֣פְרַֽפְרַֽפְרַֽפְרַֽפְרַֽפְרַֽפְרַֽפְרַֽרְרַֽרְרַֽרְרַֽרְרַֽרְרַֽרְרַֽרְרַֽרְרַֽרְרַֽרְרַֽרְרַֽרְרַֽרְרַֽרְרַֽרְרַֽרְרַֽרְרַֽרְרַֽרְרַֽרְרַֽרְרַֽרְרַֽרְרַֽרְרַֽרְרַֽרְרַֽרְרַֽרְרַֽרְרַֽרְרַֽרְרַֽרְרַֽרְרַֽרְרַֽרְרַֽרְרַֽרְרַֽרְרַֽרְרַֽרְרַֽרְרַֽרְרַֽרְרַֽרְרַֽרְרַֽרְרַֽרְרַֽרְרַֽרְרַֽרְרַֽרְרַֽרְרַֽרְרַֽרְרַֽרְרַֽרְרַֽרְרַֽרְרַֽרְרַֽרְרַֽרְרַֽרְרַֽרְרַֽרְרַֽרְרַֽרְרַֽרְr

But the passage-trade of Damascus has probably been as important and as direct as any other. Its merchants have profited largely by the caravans which continually passed through it on their way to distant countries. It is uncertain whether in early times it had any important manufactories of its own. According to some expositors, the passage in Amos iii, 12, which we translate in Damascus on a couch (ךְֵּ֣בֶּ֣שׁ פִּזְרַ֣פְרַֽרְרַֽרְr), means really "on the Damascus couch," which would indicate that the Syrian city had become famous for its fabric after the fabric of snow in the eighth century B.C. There is no doubt that such a fabric gave rise to our own word, which has its counterpart in Arabic as well as in most of the languages of modern Europe; but it is questionable whether either this, or the peculiar method of working in steel, which has impressed itself in a similar way upon the speech of the word, was invented by the Damascenes before the Mohammedan era. In ancient times they were prob

The private houses of Damascus share, with the plain, the admiration of all visitors. No contrast could be greater than that between the outside and inside. The rough mud-walls and mean doors give poor promise of wealth or beauty within. The entrance is always through a narrow winding passage—sometimes even a stable-yard—to the "outer court," where the master has his reception-room, and to which alone male visit

The rough mud-walls and mean doors give poor promise of wealth or beauty within. The entrance is always through a narrow winding passage—sometimes even a stable-yard—to the "outer court," where the master has his reception-room, and to which alone male visitors are admitted. Another winding passage leads to the hareem (q. v.), which is the principal part of the house. Here is a spacious court, with tesselated pavement, a marble basin in the centre, jets d'eau around it, orange, lemon, and citron trees, flowering shrubs, jessamines and vines trained over trellis-work for shade. The hareem opens on this court. Intimate communication between room and room being most unknown. On the south side is an open alcove, with marble floor and cushioned daïa. The decorations of some of the rooms is gorgeous. The walls of the older houses are wainscoted, carved, and gilded, and the ceilings are covered with arabesque ornaments. In the new houses painting and marble firework are taking the place of arabesque and wainscoting.

products of nearly all nations—Indian muslins, Manchester prints, Persian carpets, Lyons' silks, Birmingham cutlery, Cashmere shawls, Mocha coffee, and Dutch sugar.

4. Topography, Antiquities, etc.—The old city, the nucleus of Damascus, stands on a rock of the river, and is surrounded by a tottering wall, the founda
tions of which are Roman, and the superstructure a patchwork of all succeeding ages. It is of an irregular oval form. Its greatest diameter is marked by the "street called Straight," which intersects it from east to west, and is about a mile long. This street was anec
dently divided into a number of blocks or quarters, each surrounded by walls, and at each end were triple Roman gateways, still in a great measure entire. In the old city were the Christian and Jewish quarters, and the principal buildings and bazaars. On the north, west, and south are extensive suburbs. The internal aspect of the city is not prepossessing, and great is the disappoint
ment of the stranger when he leaves the delicious environs and enters the gates. Without, nature smiles joyously, the orchards seem to blush at their own beauty, and the breeze is laden with perfumes. Within, all is different. The works of man show sad signs of neglect and decay. The houses are rudely built; the lanes are narrow; the shops close; stones and interp

The bazaars are among the best in the East. See BAZAAR. They are narrow covered lanes, with long ranges of open stalls on each side; in these their owners sit as stiff and statuette-like as if they had been placed there for show. See MERCHANT. Each trade has its own quarter. Every group in the bazaars would form a lively picture. The costumes are strange; the costumes of the women are strangely grouped with panniered donkeys, gayly-ca

The principal khams or caravansaries are spacious build

They are now used as stores and shops for the principal merchants. The great khan, Assad Pasha, is among the finest in Turkey. A noble Saracenic portal opens on a large quadrangle, ornamented with a marble fountain, and covered by a series of domes supported on square pillars. Many of the mosques are fine specimens of Saracenic architecture. Their deep

They are mostly built of alternate layers of white and black stone, with string courses of marble arranged in chaste patterns. But they are all sadly kept, and many of them are now ruined. The private houses of Damascus share, with the plain, the admiration of all visitors. No contrast could be greater than that between the outside and inside. The rough mud-walls and mean doors give poor promise of wealth or beauty within. The entrance is always through a narrow winding passage—sometimes even a stable-yard—to the "outer court," where the master has his reception-room, and to which alone male visitors are admitted. Another winding passage leads to the hareem (q. v.), which is the principal part of the house. Here is a spacious court, with tesselated pavement, a marble basin in the centre, jets d'eau around it, orange, lemon, and citron trees, flowering shrubs, jessamines and vines trained over trellis-work for shade. The hareem opens on this court. Intimate communication between room and room being most unknow

On the south side is an open alcove, with marble floor and cushioned daïa. The decorations of some of the rooms is gorgeous. The walls of the older houses are wainscoted, carved, and gilded, and the ceilings are covered with arabesque ornaments. In the new houses painting and marble firework are taking the place of arabesque and wainscoting.
was a native of Damascus, studied in Alexandria and Athens, and taught the Neo-Platonic philosophy in the latter city. In consequence of the persecution of paganism by the emperor Justinian, Damaskios, in 529, emigrated to Persia, where he was well received by Khosroes, who, at the treaty of peace in 585, obtained his freedom and returned to the land of his religious belief. He is the author of a number of works, the most important of which is entitled Ἱππί ἄποστολος (edited by J. Kopp, Frankfurt, 1826). On his life and opinions, see Kopp, preface to the above work, and Jules Simon in Dictionnaire des Sciences Philosophiques.—Hoefter, Biog. Générale, xii, 842.

Damaskus I., pope, born in Spain (others say in Rome). A.D. 906, succeeded Liberius as bishop of Rome A.D. 366. He opposed Urciuoli, who obtained the election, and in their disgraceful strife many people were murdered. He was a man of vigorous intellect, and extended the power of the see of Rome very greatly. The emperor Gratian conferred upon him, in 578, the right to pass judgment upon those clergy who were in opposition to either party who had been nominated from Rome, and, at the request of a Roman synod held in the same year, instructed the secular authorities to give to him the necessary support. Damascus was a vigorous opponent of Arianism; a synod held by him in 388 condemned the two Ilyrian bishops Ursacius and Valerian, and another, held in 390, condemned Anicius of Milan. He also exerted himself for putting an end to the Antioch schism, and took part in the Ecumenical Council of Constantinople of 381. One of his best acts was to make Jerome his secretary, and to aid him in his version of the Bible. He died in 394, and after his death was soon enrolled in the company of saints, being commemorated on Dec. 11. See Damascl Opera, edited by Merenda (Rome, 1754, fol.; Paris, 1840, 8vo); Moschel, Ch. Hist. bk. ii, cent. iv, pt. ii, ch. ii, note 40; Millman, Hist. of Latin Christianity, i, 108 sq.; Christian Remembrancer, Oct. 1854, 288 sq.

Damascus II., pope, originally Poppo, a native of Bavaria. He was bishop of Brixen, and was elected pope in 1048, upon the recommendation of the emperor Henry III, on the day of the abdication of Benedict X, and died twenty-three days after his election, 1048.

Damian (Damianus of Damasc), Peter, an eminent cardinal and reformer in the Roman Church, born at Ravenna about 1007. His parents appear to have taken part in the/revolutions with his father Elisha; but these local incidents are necessarily even more doubtful than those which have reference to the comparatively recent age of the apostles. There are even spots pointed out as the scene of events in the life of Abraham (Stanley, p. 404).

The health of Damascus is healthful except during July, August, and September, when fever and phthisis are prevalent, engendered by filth and unwholesome food. The thermometer ranges from 80° to 87° Fahr. during the summer, and seldom falls below 45° in winter. There is usually a little snow each year. The rain begins about the middle of October, and continues at intervals till May. The rest of the year is dry and cloudless.

A full description of Damascus, with notices, plans, and drawings, is given in Porter's Five Years in Damascus (London, 1853, 2 vols. 8vo); and in the Jour. Soc. Lit. July, 1853, p. 245 sq.; Oct. 1853, p. 45 sq.; see also Addison's Damascus and Palmyra (London, 1853); Walch, Antiquités Damascos, illustrée (Gen. 1757); (a copious treatise, giving all facts known in his day); also in his Acta Apostol. ii, 81 sq.); Kelly, Syria (chap. xv), and travellers in Palestine generally. See Syria.
increase of spiritual power. Altogether Damas was among the foremost men of his age, both morally and intellectually. His works were collected by Cajetan (Rome, 1566-1615, 8 vols. fol.), and have been several times reprinted. He was the author of an Inauguratio in that of Bassanis (1788, 4 vols. fol.). His life is given in the first volume of his works; also in Vita P. Damiani, by Laderchi (Rome, 1792, 4to); and in the Acta Sanctorum, Feb. iii, 406 sq. See Dupin, Eccl. History, vol. ix. ch. viii.; Monheim, Ch. Hist., bk. iii, c. xi, pt. ii, chap. ii, n. 67; Chabre, Ch. History of the Church, s. v.; History of Sacred Literature, iv. 598; Schroder, Kirchengeschichte, xxii. 523 sq.; Lea, Sacrae Doctoris Celisby (1867), chap. xii.

Damiati or Damiatics. The followers of Damasius of Alexandria (q. v.) were so called.

Damià, Monophysite patriarch of Alexandria (+ 601), expressed himself on the doctrine of the Trinity in a sense similar to that of Sabellius. He maintained that in the divinity (μορφή) of the Father, the Son, and the Holy Ghost is an essential characteristic (ἐσχατολογία) divided among the three, so that they are God only in their unity, not each one in himself (κατὰ τοῦτον αὐτῶν), and that in this unity they constitute the one divine essence (μίαν οἰκείαν καὶ φῶς). His followers were called Damiatites, after him, or Angelists, from Angelium, the place where they held their assemblies. In Alexandria, their adversaries were called Tarasino-centricus (Ταράσιοναρχία), as, going still further than the Tritheists, they acknowledged four gods, namely, the Father, the Son, the Holy Ghost, and the higher Being, which, in his nature (φύσι) and in himself (κατὰ τοῦτον αὐτῶν), is God. Herzog, Real-Encyclopädie, iii. 268; Monheim, Ch. Hist., bk. iv, ch. vi, pt. ii, n. 4; Hagenbach, Hist. of Doctrine, § 96.

Dammim. See EPHES-DAMMIM

Damnation, condemnation. This word is used to denote the final loss of the soul, but it is not always to be understood in this sense in the sacred Scripture. Thus it is said in Rom. xii, 2, "They that resist shall receive to themselves damnation," i. e. condemnation, "from the rulers, who are not a terror to good works, but to the evil." Again, in 1 Cor. xi, 29, "He that eateth and drinketh unworthily... eateth and drinketh damnation to himself," i. e. condemnation; exposes himself to severe temporal judgments from God, and to the judgment and censure of the wise and good. Again, Rom. xiv, 23, "He that doubteth is damned if he eat," i. e. is condemned both by his own conscience and the word of God, because he is far from being satisfied that he is right in so doing.

Dan (Heb. id., a judge; Sept. Δην'), the name of a man and his tribe and of two towns. See MAHANEH-DAN; DAN-JAAN.

1. (Josephus translates Θεόδωρος, Ant. i. 19, 8.) The fifth son of Jacob, and the first of Bilhah, Rachel's maid (Gen. xxii, 6), born B.C. 1916. The origin of the name is there given in the exclamation of Rachel — "God hath judged me ("αἰτείων με', δαμνήσαι με')... and given me sons," i. e. called the name Dan," i. e. "judge." In the blessing of Jacob (Gen. xlix, 16) this play on the name is repeated — "Dan shall judge ("Δανίων, γαβόν') his people." Dan was own brother to Naphtali; and, as the son of Rachel's maid, in a closer relation with Rachel's sons, Joseph and Benjamin, than with the other members of the family. It may be noticed that there is a close affinity between his name and the name of Dinah, the only daughter of Jacob. See JACOB.

Tribe of Dan.—Only one son is attributed to this patriarch (Gen. xxxvi, 23); but it may be observed that "Hashim" is a plural form, as if the name, not of an individual, but of a family; and it is remarkable—whether as indicating that some of the descendants of Dan are omitted in these lists, or from other causes—that when the people were numbered in the wilderness of Sinai, this tribe was one of the most numerous of all the tribes, containing 62,700 men able to serve. The position of Dan during the march through the desert was on the north side of the tabernacle (Num. ii, 25). Here, with his brother Naphtali, and Asher, the son of Zilpah, before him, was his station, the headmost of the long procession (Ii. 31; x. 25). The names of the "captain" (Χριστοῦ) of the tribe at this time, and of the "ruler" (the Hebrew word is the same as before), who was one of the spies (xii, 13), are preserved; and also is the name of the unworthy man who played a prominent part at that time, "Aholib, the son of Abishamach, of the tribe of Dan," associated with Bezeal in the design and construction of the fittings of the tabernacle (Exod. xxxi, 6, etc.). The numbers of this tribe were not subject to the violent fluctuations which increased or diminished some of its brethren (comp. the figures given in Num. i. 50, and it arrived at the threshold of the Promised Land, and passed the ordeal of the rite of Baal-peor (Num. xxxv) with an increase of 1700 on the earlier census. The remaining notices of the tribe before the passage of the Jordan are unimportant. It furnished a "prince" (or "military officer") to the government of the land; and it was appointed to stand on Mount Ebal, still in company with Naphtali (but opposite to the other related tribes), at the ceremony of blessing and cursing (Deut. xxvii, 13).

After this nothing is heard of Dan till the specification of the inheritance allotted to him (Josh. xix, 48). He was the last of the tribes to receive his portion, and that portion, according to the record of Joshua—strange as it appears in the face of the numbers just quoted—was the smallest of the twelve. But, notwithstanding its smallness, it had eminent natural advantages. On the north and east it was completely embraced by its two brother tribes Ephraim and Benjamin, while on the south-east and south it joined Judah, and was thus surrounded by the three most powerful states of the whole confederacy. Of the towns enumerated as forming "the border of its inheritance," the most easterly which can now be identified are Aijalon, Zorah (Zarephath, and Leshem of Beth-shemesh, q. v.). These places are on the slopes of the lower ranges of hills by which the highlands of Benjamin and Judah descend to the broad maritime plain, that plain which on the south bore the distinctive name of "the Shefelah," and more to the north, of "Sharon." From Japho—afterwards Joppa, and now Yafa—on the north, to Ekron and Gathrimmon on the south—a length of at least fourteen miles—that noble tract, one of the most fertile in the whole of Palestine, was allotted to this tribe. By Josephus (Jos. v. 1, 22, and 8,1) this is extended to Ashdod on the south, and Dan at the foot of Carmel, on the north, so as to embrace the whole, or nearly the whole, of the great plain, including Jamnia and Gath. (This discrepancy may be accounted for by supposing that the Danites at some period may have overrun the country thus far, when the Philistines were hounded by the powerful Ephraimites and the more powerful Judah.) But this rich district, the corn-field and the garden of the whole south of Palestine, which was the richest prize of Phoenician conquest many centuries later, and which, even in the now degenerate state of the country, is enormously productive, was too valuable to be given up without a struggle by its original possessors. The Amorites were called the "children of Dan into the mountain, for they would not suffer them to come down into the valley" (Judg. i. 24)—forced them up from the corn-fields of the plain, with their deep black soil, to the villages whose ruins
The following is a list of all the places in the tribe of Dan mentioned in Scripture, with their probable identification:

The mention of this tribe in the "blessings" of Jacob and Moses must not be overlooked, but it is difficult to extract any satisfactory meaning from them. According to Jewish tradition, Jacob's blessing on Dan is a prophetic allusion to Samson, the great "judge" of the tribe; and the execration with which it closes was that actually uttered by Samson when brought
INTO THE TEMPLE AT GAZA. (See The Targum Pr. Jona-
than on Gen. xli, 16, 17; and the quotations in Ka-
lisch's Genesis ad loc.) Modern critics likewise see
an allusion to Samson in the terms of the blessings
which they presume on that account to have been
written after the destruction of the temple as a
caution to the Jews (1 Chron. xvi, 92). Jerome's ob-
servations (Qu. in Gen.) on this pas-
sage are very interesting. Herder's interpretation
as given by Stanley (Palestine, p. 388) is as follows: "It
is doubtful whether the delineation of Dan in Jacob's
blessing relates to the original settlement on the west-
er border of the land, or to the later outpost. Herder's
explanation will apply almost equally to both.
'Dan,' the judge, 'shall judge his people;' he be the
son of the concubine no less than the sons of Leah; he
the frontier tribe no less than those in the places of honor
shall be 'as one of the tribes of Israel.' "Dan shall
be a serpent by the way, an adder in the path, that is,
of the invading enemy by the north or by the west,
'that biteth the heels of the horse,' the indigenous
serpent biting the foreign horse unknown to Israelite
warfare, 'so that his rider shall fall backward.' And
his war-cry as from the frontier fortresses shall be,
'For Thy salvation, O Lord, I have waited!' In the
blessing on Dan the light of Beer-sheba brightens the sight of
Dan. The northern Dan alone appears, with the same char-
acteristics, though under a different image: 'a lion's
whelp in the far north, as Judah in the far south: he
shall leap from Bashan'—from the slopes of Her-
mon, where he is coughed watching for his prey."

2. (Georgus rô dadan.) The Sanscrit name for the
most northern district is Dan, the common expres-
sion "from Dan even to Beer-sheba." The
name of the place was originally Laish or Lehem
(Josh. xix, 47). Its inhabitants lived "after the man-
er of the Zidonians," i. e. engaged in commerce, and
without defense. But it is nowhere said that they
were infected with the Phoenician belief that the spirits
from the parliament of Huram—his mother 'of the
daughters of Dan,' his father 'a man of Tyre' (2 Chron.
ii, 14). They seem to have derived their security
from the absence of any adverse powers in their
neighborhood, and from confidence in the protection
of Sidon, which was, however, too far off to render aid
in the case of such a sudden assault as that by which
they were overpowered. This distance of Sidon was
carefully noted by the Danites spies as a circumstance
favorable to the enterprise; and it does not appear
that Sidon ever made any effort to dispossess the
invaders. Living in their own home, and a line of
priests was established, which, though belonging to
the tribe of Levi and even descended from Moses,
was not of the family of Aaron, and therefore not belong-
ing to the regular priesthood. To the form of this im-
age and the nature of the idolatry we have no clew,
not to the special relation which existed between it
and the calf-worship afterwards instituted there by
Jeroboam (1 Kings xii, 29, 30). It only appears that
Jeroboam took advantage of the confirmed idolatry
of the Danites (Judg. xviii, 30), erected a temple in
their city, and set up there one of his golden calves for
the benefit of the Danites. To whom a pilgrimage to Jerusalem
would not have been politic, and a pilgrimage to Beth-
el might have been irksome (1 Kings xii, 29). The
latter worship is alluded to by Amos (viii, 14) in a pas-
sage which possibly preserves a formula of invocation
or adjuration in use among the worshippers; but the
passage is very obscure. The worship of the Danites
may be traced to this day in the secret rites of the Norse-
ian Druids saints of the vicinity (Newbold, Jour. As.
Soc. xvi, 27). After the establishment of the Danites
at Dan it became the acknowledged extremity of the
country, and the formula "from Dan even to Beer-
sheba" is frequent throughout the historical books (Judg.
xx, 1; 1 Sam. iii, 20; 2 Sam. iii, 10; xvii, 11; xxiv,
2, 15; 1 Kings xv, 19). This is not ancient; it is
reversed, and becomes "from Beer-sheba even to Dan"
(1 Chron. xxi, 2; 2 Chron. xxx, 6). It is occasionally
employed alone in a somewhat similar meaning;
thus, in Jer. viii, 16, "The snorting of his horses
was heard from Dan; the whole land trembled at the
sound of the trumpeting of the horse-tongue." (Gen.
xiv, 15). Dan was, with other northern cities, laid waste
by Benhadad (1 Kings xv, 20; 2 Chron. xvi, 4), and this
is the last mention of the place.

Various considerations would incline us to the sur-
ception that Dan was a holy place of note from a far ear-
lier date than its conquest by the Danites. These are:
(1.) The extreme reluctance of the Orientals—appar-
enient in numerous cases in the Bible—to initiate a
sanctuary, or to adopt for worship any place which had not
enjoyed a reputation for holiness from pre-historic
times. (2.) The correspondence of Dan with Beer-
sheba in connection with the life of Abraham—the or-
iginal site of the city has been mentioned, and has
developed in some diversity of statement. (3.) More
particular the incident in the very clear
and circumstantial narrative of Gen. xiv, 14, as if well
known even at that very early period. Its mention
in Deut. xxxiv, 1, is also before the events related
in Judg. xviii, though still many centuries later than
the time of Abraham. But the subject is very difficult,
and we can hardly hope to arrive at more than con-
jecture upon it. With regard to Gen. xiv, 13, four
explanations suggest themselves. a. That another
place of the same name is intended. (See Ka-
lisch, ad loc. for an ingenious suggestion of Dan-ja
n.) b. Against this view is the interference from
the passage of Exodus concerning the "Daughters of
Dan," the "sons of Dan," the "daughters of Dan,"
and the "Danites." (3.) The name is peculiar to the
characteristic, genuine air of the story in Judges,
which fixes the origin of the name so circumstantially.
Josephus (Ant. v, 3, 1) speaks positively of the situ-
ation of Laish as "not far from Mount Libanus and the
springs of the lesser Jordan, near (kere) the great
plain of the city of Sidon" (compare also Ant. viii, 6,
4); and this, as just said, identifies with the Dan in
Gen. xiv, 14 (Ant. i, 10, 1). In consonance with this
are the notices of Jerome, who derives the word "Jor-
dan" from the names of its two sources. In Deut.
xxxiv, 1, also, we find the phrase "all the land of
Gilead unto Dan" employed by Moses some fifty years
before the conquest of Lebanon. The locality of the
town is spoken of as "the chief of the Danites," it is
"from Sidon," and "in the valley of Esech that is by
(2) Beth-rehob;" but as this latter place has not
been identified with certainty, the position of Dan
must be ascertained by other means. Josephus says
that its was the "lesser" fountain of the Jordan
... in the plain of Sidon, a day's journey from that
city, and that the plain around was of extraordinary
fertility (Ant. i, 10, 1; 5, 8; 8, 4; War, iv, 1, 1). Eusebius
and Jerome are still more explicit—"A village,
four miles distant from Dan, called Prennus or seven
miles from Tyre; it was the boundary of Judah (nepos rjç
Iouaiaic), and at it the Jordan took its rise." Jerome
DANA 656 DANÆUS

adds, "De quo et Jordanian flumen erumpens à loco sortitus est nomen. Jor quippe ῥηπίου, id est, fluvium sive rivum Nebiši vocatur, (v. Prov. 21, v. s. v.; Dan). Some others, both ancient and modern, have contended Dan with Paneas or Cassarea Philippus (Philos-torgius, History, vii, 8; Theodoret in Genes.; Sanson, Geog. Sac. s. v.; Alford on Matt., xvi, 13). This error appears to have arisen chiefly from indefinite remarks of Jerome in his commentary on Ezek. xlviii, 18: "Dan ... ubi bodis Paneas, quae quondam Cassarea Philippi vocabatur;" and on Amos vii, 13, "Dan in terminis terrae Judaeae, ubi nunc Paneas est." It is plain from Jerome's words in the Omomasticon that he knew the true site of Dan, and therefore those notices must be understood as meaning that Cassarea Philippus was in his day a principal town in the locality where Dan was situated, and that both were upon the border of Palestine. The Jerusalem Targum calls it "Dan of Cassarea," intimating its vicinity to the latter (on Gen. xiv, 14; see Rendel, Palest. p. 919-21). In perfect agreement with this is the position of Tell el-Kadi, a mound from the foot of which gushes out "one of the largest fountains in the world," the main source of the Jordan (Robinson, Later Res. iii, 380-383). The tell itself, rising from the plain by some steep terraces, has its long, level top strewn with ruins, and is very probably the site of the town and citadel of Dan. The spring is called el-Ledisin, possibly a corruption of el-Ledia, in Robinson, iv, 380, from the stream from the spring Nahr el-Dhem (Wilson, ii, 173), while the name, Tell el-Kadi, "the Judge's mound," agrees in signification with the ancient name. Those who have visited it give the exact agreement of the spot with the requirements of the story in Judg. xviii—a good land and a large, where there is no want of anything that is on the earth (Thomson, Land and Book, ii, 320). Tell el-Kadi is cup-shaped, resembling an extinct crater, and is covered with a dense jungle of thorns, thistles, and rank weeds. Its circumference is about half a mile, and its greatest elevation above the plain eighty feet. There are some traces of old foundations, and heaps of large stones on the top and sides of the southern part of the rim, where perhaps the citadel or a temple may have stood. There are also ruins in the plain a short distance north of the tell. There are doubtless other remains, but they are now covered with grass and jungle. At the western edge of the mound is the largest of the great fountains, and there is a smaller one within the cup, shaded by noble oak-trees (Porter, Damascus, i, 308). About a quarter of an hour north, Burckhardt noticed ruins of ancient habitations; and the hill which overhangs the fountain appears to have been built upon, though nothing is now visible (Burckhardt, Syria, p. 42; Robinson, Researches, iii, 301-358).

1. "Dan also" stands in the A.V. as the rendering of רדש (Vedan, lit. and Dan; Sept. translates undistinguishably), an Arabian city mentioned in Ezek. xxvii, 19 as a place from which clothes, wrought iron, cassis, and other spices were brought to Tyre. By it is probably meant the city and mart of Aden, in connection with which our prophets enumerate the very wares: "The town of Aden is small, but celebrated for its seaport, from which vessels sail bound for India, China, and neighboring countries, returning with cargoes of iron, Damascus sword-blades . . . cardamom, cinnamon . . . myrobolan . . . and various kinds of rich figured cloths." (H. C.) (See McCulloch's Gazetteer, s. v. Aden.) See VEDAN.

Dana, Daniel, D.D., a Presbyterian minister, was born at Ipswich, Mass., July 24, 1771, and was educated at Dartmouth College, where he graduated in 1788, for several years he was employed as a tutor. In 1798 he was licensed "as a qualified candidate preacher of the Gospel of Christ." In 1794 he was ordained pastor of the Presbyterian church in Newburyport, and after a successful ministry of twenty-six years was transferred to Hanover, New Hampshire, as president of Dartmouth College, where he remained from that position as unerring with his feelings, and settled in Londonerry as pastor of the church, where he remained four years and a half. In 1826 he became pastor of the Second Presbyterian church at Newburyport, which position he resigned in 1845, in the seventy-fifth year of his age. Dr. Dana was regarded as "one of the most able, devoted, and useful ministers of the period in which he lived." He died August 26, 1859. He edited Gibbon's Memoirs of Pious Women (1802), and Flavel's Works, and published numerous tracts and sermons.—Wilson, Presbyterian Almanac, 1861, p. 84; Princeton Review, Jan., 1867; Sprague, Life of Daniel Dana, D.D. (Boston, 1866).

Dana, James, D.D., a Congregational minister, was born in Cambridge 1738, graduated at Harvard 1758, and in 1768 was installed pastor at Wallingford, Conn. He became pastor of the First Church, New Haven, 1778; was dismissed July 30, 1805; and died Aug. 18, 1812. He was made D.D. by the University of Edinburgh, 1768. Dr. Dana published "An Examination of Edwards on the Will" (1770); "An Examination of the Stane, continued" (1778); and a number of occasional sermons. In his later writings, to Edwards, he held "that men themselves are the only efficient causes of their own volitions; nor do they always determine according to the greatest apparent good; the affections do not follow the judgment; men sin against light, with the wiser choice, the greatest good full in their view. Through the impotentions of their passions, they determine against the greatest apparent good. This is the case with every sinner who resolves to delay repentance to a future time. Self-determination is the characteristic of every moral agent. The absence of liberty he deemed inconsistent with moral agency; and by liberty he meant, not merely liberty in regard to the external action, but liberty of volition; an exemption from all circumstances and causes having a controlling influence over the will—a self-determining power of man, as a real agent, in respect to his own volitions. On the whole, he regarded the scheme of Edwards as acquitting the creature of blame, and impeaching the truth and justice of the Creator."—Sprague, Annals, i, 565.

Danibas (Δανίβας), a small town placed by Ptolemy (v, 15, 24) in Palmyrene, a subdivision of his Cale-Syria; also mentioned under the name Danibos in the war between the emperor Julian and the Persians (Zosim. Hist. iii, 27, 7). It does not appear to correspond to any of the three places of a similar name mentioned by Eusebius (Amnibos, Δανιβας, and Jerome (Onomac.) in Syria). It lay in the region of Moabitis. It was the seat of a bishopric (Notit. Eccles.,) and has lately been identified by Porter (Damasci, i, 346)—from an Arabic MS, written in the 7th century by Macarius—with Saida, now a large village at the foot of Anti-Lebanon, with a convent and extensive ruins (Van de Velde, Memoir, p. 906).

Danaeus, or Danaus, LAMBERT, an eminent French Protestant divine, was born in Lyons, 1530. He first studied afterwards theology, and became minister at Geneva, and subsequently at Leyden; finally at Orthez, in Navarre, where he died in 1598. He was the first writer who treated Christian ethics separately from theology (Ethics Christianae, lib. ii, Genev. 1577). He was a strong Calvinist, as shown in his Lettres de Lyonnais. He elicited much controversy, and wrote largely in controversy. We have in English his Commentary on the Minor Prophets, translated by Stockwood (Lond. 1594, 4to). See Haag, La France Protestante, iv, 192; Theol. Stud. u. Krit. 1850, p. 22.
DANCE 657

Dance. This act is usually denoted in Heb. by some form of בְּרָע, chal, which literally signifies to twist (and is often applied to scrivling under pain, as of birth, or trembling under fear), and hence probably refers to the swirling motions of the Oriental sacred dances (Judg. xxii, 21, 22; Ps. xxx, 11; cxlii, 3; cl, 4; Jer. xxxii, 4, 13; Lam. v, 15; Exod. xv, 20; xxxii, 19; Judg. xi, 34; 1 Sam. xviii, 6; xxi, 21; xxi, 5; Car. 34, and similar idea of moving in a circle is radically contained in the word בְּרָע, chappag, translated "dancing" in 1 Sam. xxx, 16. Another term thus rendered (Eccles. iii, 4; Job xxi, 11; Isa. xiii, 21; 1 Chron. xv, 29) is דָּשְׁנָא, rashah, which simply means to skip or leap for joy, as it is elsewhere rendered, and is nearly equivalent to a fourth term thus rendered (2 Sam. vi, 14, 16), "דָּשְׁנָא, karar", which means to jump or spring. In the New Test. the terms rendered "dance" are γυρός (radically expressive of the same idea of circular motion), applied to a festive occasion in connection with music (Luke xv, 25), and οἰκογενέα, literally to leap up and down, but conventionally used in later times to denote a regular dance according to rule. The same term, in general, is applied to the elaborate pas- tom://dance of Roman times (Matt. xiv, 6; Mark vi, 22). (See Smith's Dict. of Asia. Antiq. s. v. Saltatio, Pantomimus.) As motions of joy and sorrow universally express themselves in music and gymnastics of the body, efforts have been made among all nations, but especially among those of the South and East, in proportion as they seem to be more demonstrative, to reduce as to measure and to strengthen by union the more pleasurable—those of joy. The dance is spoken of in holy Scripture generally as symbolical of some rejoicing or jubilation, as for the sake of contrast with mourning, as in Eccles. iii, 4, "a time to mourn and a time to dance" (comp. Ps. xxx, 11; Matt. xi, 17). Children dance spontaneously (Job xxi, 11; Matt. xi, 17; Luke vii, 22).

1. At a very early period, dancing was enlisted into the service of religion among the heathen; the dance, enlivened by vocal and instrumental music, was a usual accompaniment in all the processions and festivities of the gods (Strabo, x); and, indeed, so indispensable was this species of violent erriment, that no ceremonial was considered duly accomplished—no triumph rightly celebrated, without the aid of dancing. The Hebrews, in common with other nations, had their sacred dances, which were performed on their solemn anniversaries, and other occasions of commemorating some special token of the divine goodness and favor, as means of drawing forth, in the liveliest manner, their expressions of joy and thanksgiving. The performers were usually a band of females, who, in cases of public rejoicing, volunteered their services (Exod. xv, 20; 1 Sam. xviii, 6), and who, in the case of religious observances, composed the regular chorus of the temple (Psa. cxlii, 3; cl, 4), although there are not wanting instances of men also joining in the dance on these occasions of religious festivity. Thus David deem ed it no way derogatory to his royal dignity to dance on the auspicious occasion of the ark being brought up to Jerusalem (2 Sam. vi, 14, 16). The word used to describe his attitude is significant of violent efforts.

II. 7 T

Arab Dance. Music is led by the principal person of the company, the rest imitating the steps. The evolutions, as well as the songs, are extemporaneous—not confined to a fixed rule, but varied at the pleasure of the leader; and yet they are generally executed with so much grace, and the time so well kept with the simple notes of the music, that the group of attendants show wonderful address and propriety in following the variations of the leader's feet. The missionary Wolff describes a festival of some Eastern Christians, where one eminent individual, who led the song as well as the dance, conducted through the streets of the city a numerous band of people, who leaped and danced in
imitation of the gestures used by him. When the late deputation of the Church of Scotland were on their way through Palestine, their Arab guides, to relieve the tedium of the journey, sometimes "commenced a native song and dance; one of them, advancing a little before the rest, began the song, dancing forward as he repeated the words; when the rest, following him in regular order, joined in the chorus, keeping the time with a dextrous clapping of hands. They sang several Arabian songs, responding to one another, dancing and clapping their hands." In their "dancing dervishes" the Turks seem to have adopted into their system the enthusiastic raptures, at once martial and sacred, which (e.g. in the Roman Salii) seem indigenous in many Southern and Eastern races from the earliest times.

In the earlier period dancing is found combined with some song or refrain (Exod. xv, 20; xxii, 18, 19; 1 Sam. xxii, 11), and with the çymb, or tambourine (A. V., "timbrel"), more especially in those impulsive outbursts of popular feeling which cannot find sufficient vent in voice or in gesture singly. Nor is there any more strongly popular element traceable in the religion of the ancient Jews than the opportunity so given to female prophetesses and to women in general for enthusiastic intercessions for Jehovah on momentous crises of national joy, and thus root the theocracy in their deepest feelings, more especially in those of the women, themselves most easily stirred, and most capable of exciting others. The dance was regarded even by the Romans as the worship of the gods, and thus had a place among sacred thinæ (Servius ad Virg. Bucol. v, 78). A similar sentiment is conveyed in Psal. xxxvi, 10: "All my bones shall say, Lord, who is like unto thee?" So the "tongue is the best member among many, the "glory" (Psal. liv, 8) of the whole frame of flesh, every part of which is to have a share in the praises of God. Similar to that found in the Greeks is the reference by Athenaeus to Socrates as a fragment in praise of dancing (Athen. xiv, 627; comp. Arrian, Alex. iv, 11). Plato certainly (Leg. vii, 6) reckon dancing (ρυθμις) as part of gymnastics (γυμναστικης). So far was the feeling of the purest period of antiquity from attaching the notion of effeminacy to dancing, that the ideas of this and of warlike exercise are mutually interwoven, and their terms almost correspond as synonyms (Homer, Ili. vii, 617; comp. Creuzer, Symb. ii, 367; iv, 474; and see especially Lucian, De Salte, paras.). Women, however, among the Hebrews made the dance their especial mode of expressing their feelings; and when their husbands often did not return or returned on beholding the life and home, they felt that they too ought to have some share in the event, and found that share in the dance of triumph welcoming them back. The "eating, and drinking, and dancing" of the Amalekites is recorded, as is the people's "rising up to play" (במה, including a reveling dance), with a tacit censure; the one seems to mark the lower civilization of the Amalekites, the other the looseness of conduct into which idolatry led the Israelites (Exod. xxxii, 6; 1 Cor. x, 7; 1 Sam. xxx, 16). So, among the Bedouins, native dances of men are mentioned (Lynch, Dead Sea, p. 295), and are probably an ancient custom. The Hebrews, however, save in such moments of temptations, seem to have left dancing to the women. But, more especially, there were no doubt dances of a religious nature, whose nearness of kin to the champion of the moment gave her a public character among her own sex, seems to have felt that it was her part to lead such a demonstration of triumph or of welcome; so Miriam (Exod. xv, 20), and so Jephthah's daughter (Judg. xi, 94), and similarly there no doubt was, though none is mentioned, a chorus and dance of women led by Deborah, as the song of the men by Barak (comp. Judg. v, 1 with Exod. xv, 1, 29). Similarly, too, Judith (xv, 12, 13) leads her own song and dance of triumph over Holopherne. There was no such leader of the choir mentioned in the case of David and Saul. Hence, however, the "answer" the entire chorus in Exod. xv, 21, the women in the latter case being one another as they played" (1 Sam. xviii, 7), that "answer" embodying the sentiment of the occasion, and forming the burden of the song. The "coming out" of the women to do this (Judg. xi, 84; 1 Sam. xviii, 6; comp. "went out," Exod. xv, 20) is also a feature worthy of note, and implies the object of meeting, attending upon, and conducting home. So Jephthah's daughter met her father, the "women of all the cities" came to meet and celebrate Saul and David, and their host, but Miriam in the same way "goes out" before "Jehovah" the "man of war," whose presence was desired. This marks the activity of David's conduct when, on the return of the ark of God from its long sojourn among strangers and Lorders, he (2 Sam. vi, 5-22) was himself chereges; and here, too, the women, with their timbrels (see especially ver. 5, 19, 20, 22), took an important share. This fact brings out more markedly the feelings of Saul's daughter Merab in keeping aloof from her sainted brother, "looking through a window" at the scene. She should, in accordance with the examples of Miriam, etc., have herself led the female choir, and so come out to meet the ark and her lord. She stays with the "household" (ver. 20), and "comes out to meet" him with representatives perhaps feeling the rebuke to her apathy. It was before "the handmaids," i.e. in leading that choir which she should have led, that he had "uncovered" himself; an unkiningly exposure as she thought it, which the dance rendered necessary—the wearing nacrely the ephod or linen tunic. The occasion was meant to be popularly viewed in connection with David's subjugation of various enemies and accession to the throne of Israel (see 1 Chron. xxi, 23—xxiii, 8); he accordingly thinks only of the honor of God who had so advanced him, and in that forgets self (comp. Muller, De Davide ante Arc. Eusebii, xxxii). From the mention of "damsels," "timbrels," and "dances" (Psal. lxii, 26; cxlix, 8; cl, 4) as elements of religious worship, it may perhaps be inferred that David's feeling led him to incorporate in its rites that popular mode of festive celebration. This does not seem to have survived him, for as Saulschulte remarks (Archd. der Hebr. i, 290), in the absence of religious rites, the Israelites of David and Josiah, no notice of them occurs; and this, although the "words," the "writing," and the "commandment of David" on such subjects are distinctly alluded to (2 Chron. xxxix, 30; xxx, 4, 15). It is possible that the banishing of this popular element, which found its vent, no doubt in the idolatrous rites of Baal and Asarte (as it certainly did in those of the golden calf, Exod. xxxii, 19), made those efforts take a less firm hold on the people than they might have done, and that David's more comprehensive scheme might have retained some ties of feeling which were thus lost. On the other hand was doubtless the peril of the loose morality which commonly attended festive dances at heathen shrines. Certainly in later Judaism the dance was included among some religious festivities, e.g. the feast of tabernacles (Mishna, Succah, v, 3, 4), where, however, the performers were men. This was probably a mere following the example of David in the letter. Also in the earlier period of the Judges the dances of the virgins in Shiloh (Judg. xxi, 19—28) were certainly part of a religious festivity. It seems also from this last instance clear, and from the others probable, that such dances were performed by maidens apart from men, which gives an additional point to the reproach now mentioned. With the修建 of the temple the figure of the dance was a doubtful question, nor is it likely to have lacked such variety as would adapt it to the various occasions of its use. The terms employed, however, all point to dancing in a ring. In
DANCE

modern Oriental dances a woman leads off the dance, the others then follow her with exact imitation of her the prevailing sense as to the impropriety of respectable individuals taking part in it; and hence the gay circles of Rome and its provinces derived all their entertainment, as is done in the East to this day, from the exhibitions of professional dancers. Under the patronage of the emperors, and of their luxurious tributaries, like Herod, the art was carried to the utmost perfection, the favorite mode being pantomime, which, like that of the modern Almehs or Arab women, was often of the most licentious description (see Lane's Mod. Eg. ii, 105–9; St. John's Nubia, p. 268 sq.). A story of love was chosen—generally an adventure of the gods—as the plan of the dance, and the address of the performer consisted in representing, by the waving of his hands, the agility of his limbs, and the innumerable attitudes into which he threw himself, all the various passions of love, jealousy, disgust, that sway the human breast. (See at large Lucian's Treatise on Dancing.)

Amateur dancing in high life was, as that writer informs us, by no means uncommon in the voluptuous times of the later emperors. But in the age of Herod it was exceedingly rare and almost unheard of, and therefore the condescension of Salome, who volunteered, in honor of the anniversary of that monarch's birthday, to exhibit her handsome person as she led the mazy dance in the saloons of Macherus—for, though she was a child at this time, as some suppose (Michaelis, Introd.), she was still a princess—was felt to be a compliment that merited the highest reward. The folly and rashness of Herod in giving her an unlimited promise, great as they were, have been equalled and even surpassed by the munificence which many other Eastern monarchs have lavished upon favorite dancers. Shah Abbas (to mention only one anecdote of the kind), having been on a particular occasion extremely gratified with a woman who danced before him, and being at the time much intoxicated, made her a present of a magnificent Khan that yielded him a considerable revenue. Next morning his minister reminded him of his extravagant liberality, whereupon, being now cool and ashamed of his folly, he sent for the dancer, and obliged her to be contented with a sum of money (Thevenot's True in Persia, p. 100). It is by no means improbable that Herod too was flushed with wine, and that it was from fear he should retract his promise if she delayed till the morning that Herodias sent immediately for the head of the Baptist.

It remains to notice further that the Jewish dance was performed by the sexes separately. There is no evidence from sacred history that the diversion was promiscuously enjoyed, except it might be at the erection of the defiled calf, when, in imitation of the Egyptian festival of Apis, all classes of the Hebrews intermingled in the frantic revelry. In the sacred dances, to not only to enliven feasts, but in the celebration of domestic joy (Luke xv, 25; Matt. xiv, 6). Notwithstanding, however, the strong partiality cherished for this insipiring amusement, it was considered beneath the dignity of persons of rank and character to practise it. The well-known words of Cicero, that "no one dances unless he is either drunk or mad," express

Female Sacred Dance.—From the Egyptian Monuments.
although both sexes seem to have frequently borne a part in procession or chorus; they remained in distinct and separate companies (Psa. lxviii, 25; Jer. xxxi, 13).

Dancing formed a part of the religious ceremonies of the Egyptians, and was also common in private entertainments (see Wilkinson's Ant. Eg. abridgment, i, 135 sq.). Many representations of dances both of men and women are found in the Egyptian paintings.

The "feast unto the Lord," which Moses proposed to Pharaoh to hold, was really a dance (27; see above).

Hist. de la Danse (Par. 1794); Hecker, Die Tanzeurb (Berlin, 1832). See Musical Instruments.

Dancers, a fact which appeared to the Rhine and in the Netherlands about 1374. They paraded the streets, entered houses and churches half naked, crowned with garlands, dancing and singing, uttering unknown names, falling senseless on the ground, and exhibiting other marks of demoniacal agitation. It was customary for persons of both sexes, in their public worship, to begin dancing; and, holding each other's hands, to continue their extraordinary violence till they fell down on the ground breathless. They

Male Dance in Figures among the ancient Egyptians.

A modern Oriental dancing-party is thus described by Layard (Nineveh, i, 119): "The dance of the Arabe, the Delbè, as it is called, resembles in some respects that of the Albanians, and those who perform in it are scarcely less vehement in their gestures or less extravagant in their excitement than those wild mountaineers. They form a circle, holding one another by the hand, and, moving slowly round at first, go through a shuffling step with their feet, twisting their bodies into various attitudes. As the music quickens their movements are more active; they stamp with their feet, pull their war-cry, and jump as they hurry round the musicians. The motions of the women are not without grace; but as they insist on wrapping themselves in their coarse cloaks before they join in the dance, their forms, which the simple Arab shirt so well displays, are entirely concealed. When those who formed the delbè were completely exhausted by their exertions, they joined the lookers-on and seated themselves on the ground. Two warriors of different tribes, furnished with shields and naked cimeters, then entered the circle, and went through the sword-dance. As the music quickened the excitement of the performers increased. The bystanders at length were obliged to interfere and to deprive the combatants of their weapons, which were replaced by stout stakes. With these, they labored one another unmercifully, to the great enjoyment of the crowd. On every successful hit, the tribe to which the one who dealt it belonged set up their war-cry and shouts of applause, while the women defied us with the shrill ralek, a noise made by a combined motion of the tongue, throat, and hand vibrated rapidly over the mouth. When an Arab or a Kurd hears this taclek he almost loses his senses through excitement, and is ready to commit any desperate act. A party of Kurdish jesters from the mountains entertained the Arabs with performances and imitations more amusing than refined. They were received with shouts of laughter. The dances were kept up by the light of the moon the greater part of the night."

See Renz, De saltationibus Jud. vet. relig. (Lips. 1738); Danov, De choræis sacræ Libr. (Grzb. 1766); Spooner, De saltat. vet. Hebr. (in Ugolini Theosur. xxi); Zellner, De choræs vet. Hebr. (Altorf. 1726); Altenon, De choræs Paulo Interdicta (Misen. 1744); Brömöl, Fratellæ der ersten Christen (Jen. 1701); Grünenberg, De saltatione Christiano legit (Rest. 1704, 1719, 1730); Purmann, De saltatione (Fret. 1785); Burette (in the Mem. de l'Acad. des Inscr. i, 58 sq.); Bonnot, affirmed that during these intervals of vehement agitation they were favored with wonderful visions. They evinced open contempt for the authority, rites, and doctrines of the Roman Church, and were considered as possessed with devils. The same phenomena appeared at Strasbourg in 1418.—Moebius, Ch. Hist., ii, 416; Gieler, Ch. History, § 212.

Dancing. A form of religious dancing sometimes made part of the public worship of the early Christians. The custom was borrowed from the Jews, in whose solemn processions choirs of young men and maidens, moving in time with solemn music, always bore a part. It must not be supposed that the "religious dances" had any similarity to modern amusements; they were rather processions in which all who took part marched in time with the hymns which they sung. The custom was very early laid aside, probably because it might have led to the adoption of such objectionable dances as were employed in honor of the pagan deities. Prohibitions of dancing, as an amusement, are found in the Church fathers and in the decrees of the councils. See Bingham, Orig. Exch. bk. xvi, ch. xi, § 15. On dancing as an amusement, see Crane, On Dancing, N. Y. 12mno.

Dandini, Girolamo, a Roman theologian and papal legate, was born at Cesena in 1554. After being professor of philosophy at the University of Paris, and professor of theology at the University of Padua, he entered the order of Jesuits, and became its provincial in Poland and at Milan. In 1596 he was sent by Clement XI as nuncio to the Maronites in order to effect their union with the Church of Rome, but in this mission he was not successful. He died at Forli Nov. 29, 1634. He is the author of a work on Ethica Sacra (Cesena, 1651; Antw. 1676, fol.). He published a report on his mission to the Maronites (Misione Apostolica al Patriarcha e Maroniti del Monte Libano (Cesena, 1656; Paris, 1675; English, 1698). According to the French translator, Richard Simon, Dandini gave an incorrect account of the creed of the Maronites.—Pierre, Univer. Lex. iv, 688; Hoefer, Biog. Gm. xii, 919.

Danforth, Calvin, a Methodist Episcopal minister, was born at Fort Covington, Franklin Co., N. Y., Nov. 28, 1809, was licensed to exhort in 1828, entered the Oneida Conference in 1880, was superannuated in 1884, went South for his health, and took a situation in an academy at Warrenston, Ga., still retaining his connection with the Church in the North. In 1887
DANFORTH 661

DANIEL

...he served for a time as professor of mathematics in Covington Manual Labor School, but his health soon failed. By medical advice he went to St. Augustine, Fla., where he died in great peace in May, 1889. Mr. Danforth endeared himself to thousands by his piety, zeal for good works, love for souls, and eloquence.

Minutes of Conferences, ii, 675; Gorrie, Black River Conf. Memorial.

Danforth, Joshua Noble, D.D., a Presbyterian minister, was born in Pittsfield, Mass., in 1792. He was educated at Williams College, and in his last year there determined to devote himself to the ministry. After three years study in the Princeton Theological Seminary, (1818-21), he took his first pastoral charge at Newcastle, Del.; his second was at the City of Washington. After a short time spent in the service of the American Colonization Society, he became pastor of a Congregational Church at Lee, Mass., and afterwards of the Second Presbyterian Church at Alexandria, Va., where he remained fifteen years. Everywhere where his ministry was productive of abundant fruit. He was also a frequent writer in the periodical press. Finally he re-entered the service of the Colonization Society, and remained in it till a short time before his death, which occurred Nov. 14, 1861, at Washington.

—Wilson, Presbyterian Almanac, 1862, p. 386.

Danforth, Samuel, a Congregational minister, was born at Framingham, Suffolk Co., England, September 10, 1626, and came with his father to New England in 1634. He graduated at Harvard in 1648, and was chosen tutor and fellow. In 1650 he was installed colleague pastor in Roxbury, where he labored during his life, which ended Nov. 19, 1674. He studied astronomy profitably, and published several astronomical and theological remarks upon the comet (1664).—Sprague, Annals, i, 138.

Danforth, Samuel, son of the preceding, was born Dec. 18, 1666, and graduated at Harvard College in 1683. He was one of the most learned and eminent ministers of his day. In the beginning of the year 1705, through his labors, a deep impression was made upon the minds of his people, and a revival occurred, of which an account is given in some letters of Mr. Danforth, preserved in Prince's Christian History. He published a eulogy on Thomas Leonard, 1718, and the election sermon, 1714. He left behind him a very large manuscript, a part of which is now in the library of the Massachusetts Historical Society. It seems to have been from Eliot's Indian Bible, as there is a reference under every word to a passage of Scripture. He died Nov. 14, 1727.

Daniel (Heb. and Chald. Dim'el, דניאל, also [Ezek. xiv, 14, 20; xxviii, 5] in the shorter form Daniel, דניאֵל; see below), the name of at least three men:

1. (Sept. דניאל v. r. דניאל, Vulg. Daniel.) King David's second son, "born unto him in Hebron." "Of Abigail the Carmelitess" (1 Chron. iii, 8), B.C. cir. 1051. In the parallel passage, 2 Sam. iii, 8, he is called Chilseb. For the Jewish explanation of the origin of the two names, see Bochart, Hieros. ii, 56, p. 635.

2. (Sept. and N. T. דניאֵל, Josephus דניאֶל.) The celebrated prophet and minister at the court of Babylon, whose life and prophecies are contained in the book bearing his name. The exact meaning of the name is disputed. The full form (דניאֵל) is probably more correct, and in this the god appears to be not merely formative, but a pronoun suffix (דניַל, דניאל), so that the sense will be God is my Judge (C. B. Michaelis ap. Rosenmuller, Schol. § 1). Others interpret the word as the Judge of God, and the use of a god formative is justified by the parallel of Melchizedek, etc. (Hitzig, § 2). This interpretation is favored by the Chaldean name, Beltheszazzar (גַּשְׁזָּעַר, i, 7, i.e. the prince of Bel; Sept. [Theod.]; בַּלעֲשַׂעָר; Vulg. Belushassar), which was given to Daniel at Babylon (Dan. i, 7), and contains a clear reference to his former name. Hitzig's interpretation ("Pala tischacora = Erfinder und Versacher") has nothing to recommend it. Such changes have been common at all times; and for the simple assumption of a foreign name, compare Gen. xii, 45; Ezek. i, 11, v, 14 (Sheshach). See Name.

Daniel was descended from one of the highest families in Judah, if not even of royal blood (Dan. i, 8; comp. Josephus, Ant. x, 10, 1; of Zedekiah, according to Epiphanius, Opp. ii, 242). Jerusalem was thus probably his birth-place, though the passage (Dan. ix, 24) quoted in favor of that opinion is explained away by many commentators as not at all conclusive. He appears to have possessed considerable personal endowments (Dan. i, 4). He was taken to Babylon (while yet a boy, according to Jerome, ad loc. Joen. i, 276, ed. Ven.; of twelve years, says Ignatius, ad Magnes. p. 56, ed. Cotek.), together with three other Hebrew youths of rank, Ananias, Azariah, and Mishael, and was appointed to the service of the people of Judah in the fourth year of Jehoiakim, B.C. 606. He and his companions were obliged to enter the service of the royal court of Babylon, on which occasion he received the Chaldean name Beltheszazzar (q. v.), according to Eastern custom when a foreigner takes place in any office of life, and more especially if his personal liberty is thereby affected (comp. 2 Kings xxiii, 34; xxiv, 17; Esth. ii, 7; Ezra v, 14). In this his new career, Daniel received that thorough polish of education which Oriental etiquette renders indispensable in a courtier (comp. iii, 5; Plato, Acad. § 87), and was more especially instructed "in the writing and speaking Chaldean." (Dan. i, 4), that is, in the dialect peculiar to the Chaldeans. See Chaldee Language. In this dialect were composed all the writings of the ecclesiastical order, containing the substance of all the wisdom and learning of the time, and in the knowledge of which certainly but few favored laymen were initiated. That Daniel had distinguished himself, and already at an early period acquired renown for high wisdom, pious, and strict observance of the, Mosaic law (comp. Ezek. xiv, 14, 20; xxviii, 5; Dan. i, 8-16), is too evident from passages in the truly authentic Scriptures to require any additional support from the ill-warranted apocryphal stories concerning the delivery of Susannah by the wisdom of the lad Daniel, etc. A proper opportunity for evincing both the acuteness of his mind and his religious notions soon presented itself in the custom of the Eastern courts to entertain the officers serving them from the royal household (Athenens, iv, 19, p. 145, ed. Casaub.). Daniel was thus exposed to the temptation of partaking of unclean food, and of participating in the idolatrous ceremonies attendant on heathen banquets. Like Joseph in earlier times, he gained the favor of his guardian, and was divinely supported in his resolve to abstain from the "...cups and dishes for fear of the king's (Dan. i, 8-16). His prudent proceedings, wise bearing, and absolute refusal to comply with such customs, were crowned with the divine blessing, and had the most important results. Another reason of a sanitary nature may also be assigned for this temperance, as it is probable he was at this time undergoing the emaciating process after emaculation, in accordance with the barbarous custom of Oriental courts. See Exunuch.

At the close of his three years' discipline (Dan. i, 6, 18), Daniel had an opportunity of exercising his peculiar gift (Dan. i, 17) of interpreting dreams (comp. Herod. i, 84; Diod. Sic. ii, 29) on the occasion of Nebuchadnezzar's dream (Daniel ii, 1-27 sq.). In consequence of his success, by the divine aid —like Joseph of old in Egypt—he rose into high fa-
vior with the king, and was intrusted with two important offices—the governorship of the province of Babylon, and the head-inspectorship of the sacredotal caste (II Kings, 25:22). See Daniel. Considerably later in time, in the reign of Nebuchadnezzar we find Daniel interpreting another dream of the king's, to the effect that, in punishment of his pride, he was to lose for a time his throne, but to be again restored to it after his humiliation had been completed (Dan. iv). Here he displays his astonishing love, loyalty, and concern for his princely benefactor, but also the energy and solemnity becoming his position, pointing out with vigor and power the only course left for the monarch to pursue for his peace and welfare. Under the unworthy successors of Nebuchadnezzar, Daniel and his merits seem to have been forgotten, and he was removed from his high posts. His situation at court appears to have been confined to a very inferior office (comp. Dan. viii, 27); neither is it likely that he should have retained his rank as head inspector of the order of the Magi in a country where those were the principal actors in effecting changes in the administration over a changeover to the tenement took place. We thus lose sight of Daniel until the first year of king Belshazzar (Dan. v, 7, 8), when he was once more comforted and rewarded with two remarkable visions (Dan. vii, viii), which disclosed to him the future course of events, and the ultimate fate of the most powerful of the earthly world, but which clarified the relations to the kingdom of God, and its development to the great consummation. He afterwards interpreted the handwriting on the wall which disturbed the feast of Belshazzar (v, 10-28), though he no longer held his official position among the magi (Dan. v, 7, 8, 12), and probably lived at Susa (Dan. viii, 7; comp. Joseph. Ant. x. 11, 7; Bochart, Geogr. Sacri iii, 14). After the conquest of Babylon by the united powers of Media and Persia, Daniel, being made first of the three presidents of the empire (comp. 1 Esdr. iii, 9), seriously busied himself under the short reign of Darius the Mede or Cyrusares II with the affairs of his people and their possible return from exile, the term of which was fast approaching, according to the prophecies of Jeremiah. In deep humility and prostration of spirit he then prayed to the Almighty, in the name of his people, for forgiveness of their sins, and for the Divine mercy in their behalf; and the answer is one of the most remarkable pages in the history of the world, containing the substance of his prayer, for the visions of the seer were extended to the end of Judaism (Dan. ix). In a practical point of view, also, Daniel appeared at that time a highly favored instrument of Jehovah. Occupying, as he did, one of the highest posts of honor in the state, the strictness and scrupulousness with which he fulfilled his official duties could not fail to rouse envy and jealousy in the breasts of his colleagues, who well knew how to win the weak monarch, whom they at last induced to issue a decree imposing certain acts, the performance of which they well knew was altogether at variance with the creed of which Daniel was a zealous proselyte. This was the Decree of the Drew of Miflas. For his disobedience the prophet suffered the penalty specified in the decree; he was thrown into a den(q. v.) of lions, but was miraculously saved by the mercy of God—a circumstance which enhanced his reputation, and again raised him to the highest posts of honor. He had at last the happiness to see his most ardent wishes accomplished—to behold his people restored to their own land. Though his advanced age would not allow him to be among those who returned to Palestine, yet did he never for a moment cease to occupy his mind and heart with his people and their concerns (Dan. x, 12). At the accession of Cyrus he still remained in office (vi, 28; comp. v, 31; Bel and Dr. 2), though he does not appear to have remained at Babylon (comp. Dan. i, 21). In the third year of Cyrus he had a series of visions, in which he was inform-

From the period the accounts respecting Daniel are vague and confused (see Prideaux, Connection, i, 206). According to the Mohammedan tradition (D'Herbeot, Bibl. Or. i, 56), he was surrounded with a climate, and was preserved from the open air, probably in the garden of his residence, near the ashes of his Prophet, and there died at the age of 116. Tradition also says that he was carried to heaven by the angel Gabriel. The Book of Daniel is said to have been written at the time of Nebuchadnezzar, and the events related in it are supposed to have taken place during the reign of Josiah. The book is divided into two parts, the first dealing with the prophecies of the Babylonian period, and the second with the prophecies of the Persian period. The latter part of the book is considered by some to be a forgery, and not by others to be a genuine work of Daniel. The book is a valuable source of information regarding the history of the Jewish people, and contains many valuable prophecies concerning the future. The book is a valuable source of information regarding the history of the Jewish people, and contains many valuable prophecies concerning the future.

Various apocryphal fragments attributed to Daniel are collected by Fabricius (Cod. Petavi. Y. T. 1, 1124), and his works are extravagantly lauded by the Rabbins (Gemara, Toma), but it is surprising that his fame in later times seems to have been obscured (Hottinger, Hist. Orient. 92). Comp. Epiph. Vit. Dan. ii, p. 243, ed. Petav.; Vit. Dan. ap. Fabric.; Josephus, Ant. x, ii, 7. See Daniel, Apocryphal Additions to.

DANIEL, Book of. This important and in many respects remarkable book takes its name not only from the principal person in it, but also and chiefly from him as its real author, there being no just cause of doubt that, as the book itself testifies, it was composed by Daniel (comp. vii, i, 28; vii, 2; ix, 2). It occupies, however, but a third rank in the Hebrew canon; not among the Prophets, last in the Hagia-graphta, owing apparently to the correct view of the composers of the canon, that Daniel did not exercise his prophetic office in the more restricted and proper sense of the term" prophecy," but stood to the theocracy in a different relation from those real prophets whose career and functions consisted exclusively in declaring the messages they received, and in the communication which they held with God. These latter are termed, in the ancient Hebrewidiom, הָגָּיוֹן, prophecy, or prophecy, in contradistinction to הָעַנְנִי, seers, who, though they were equally favored with divine revelations, were nevertheless not prophets by profession, a calling that claimed the entire service of a man's whole life. See Canon. The Babylonian exile supplied the outward training and the inward necessity for this last form of divine teaching; and the prophetic visions of Ezekiel form the connecting link between the characteristic types of revelation and prophecy (comp. Lucke, Versuch, i, 17 sq.; Hitzig, Daniel, Vorles., § 9; Hilgenfield, Die Jud. Apok. 1 sq.). This book has given rise to many and various polemical discussions both in ancient and modern times.

1. The book of Daniel divides itself into two parts, historical (ch. i-vi) and prophetic (ch. vii-xiv), arranged respectively in chronological order. In the first seven chapters, accordingly, Daniel is spoken of historically (i, 8-21; ii, 11-40; iv, 8-27; v, 1-29; vi, 2-28; vii, 1), in the last six, he is spoken of prophetically as the writer (vii, 15-28; viii, 1-xx, x, 19-xxii, 5). Its object is by no means to give a summary historical account of the period of the exile, or of the life of Daniel himself, since it contains only a few isolated points both as to historical facts and prophetic revelations. But the plan or tendency which so consistently runs through the whole book is of a far different character; it is to show the extraordinary and wonderful means which the Lord made use of, in a period of the deepest misery, when the theocracy seemed dissolved and fast approaching its extinction, to afford assistance to his people, proving to them that he had not entirely forsaken them, and making them sensible of the fact that his merciful presence still continued to dwell with them, even without the Temple and the Land of Promise.

The wonders related in Daniel (ch. i-vi) are thus mostly of a peculiar, prominent, and striking character, and resemble in many respects those performed of old time in Egypt. Their diverse tendency was, on the one hand, to lead the heathen power, which proudly fancied itself to be the conqueror of the theocracy, to the acknowledgment that there was an essential difference between the world and the kingdom of God; and, on the other, to impress degenerate and callous Israel with the notion that the kingdom of God was still the same as it was of old in Egypt. The following are the essential features of the prophetic tenor of the book of Daniel, while the visions in ch. ii and vii, together with their different symbols, may be considered as embodying the leading notion of the whole. The development of the whole of the heathen power till its complete overthrow, and the last triumph of the kingdom of God, appeared to the prophet in the shape of four powers of the world, each successive power always surpassing the preceding in might and strength, namely, the Babylonian, Medo-Persian, Greek, and Syrian (otherwise Roman). The kingdom of God proves itself conqueror of them all; a power which alone is everlasting, and shall find its utmost glorification in the appearance of the Messiah, as Judge and Lord of the world. Until the coming of the Messiah, the people of God have yet to go through a period of heavy trials. That period is particularly described, ch. viii and ix, in the struggles of the Maccabean time, illustrative of the last and heaviest combats which the kingdom of God would have to endure. The period until the appearance of the Messiah is a fixed and sacred number—seventy weeks of years (ch. ix). After the lapse of that period ensues the death of the Messiah; the expiration of the people is realized; and the name is revealed, and the Temple and the kingdom of God are in punishment given up to destruction. The true rise from this fall and corruption ensues only at the end of time, in the general resurrection (ch. xii). The interpretation of Daniel has hitherto proved an inexhaustible field for the ingenuity of commentators, and the certain results are comparatively few. According to the literal and natural view, which is followed as the fourth book of Ezra [see Ezechias] and the epistle of Barnabas (ch. iv), the four empires described in ch. ii and vii are the Babylonian, the Medo-Persian, the Greek, and the Roman. With nearly equal consent it has been supposed that there is a change of subject in the eleventh chapter (xi, 31 sq.), by which the seer passes from the persecutions of Antiochus to the times of Antichrist. A careful comparison of the language of the prophecy with the history of the Syriam kings must, however, converge every candid student of the text that the latter hypothesis is wholly unfounded and arbitrary. The whole of the eleventh chapter forms a history of the struggles of the Jewish Church with the Greek powers up to the death of its great adversary (xi, 45). This conflict, indeed, has a typical import, and foreshadows in its characteristic outlines the abiding and final conflict of the people of God and the powers of evil, so that the true work of the interpreter and prophet must be to determine how the picture of each event signalized in the prophetic picture, that he may draw from the past the lesson of the future. The traditional interpretation of the four empires seems to spring from the same error as the other, though it still finds numerous advocates (Hofmann, Auberlen, Keil, Havernick, Hengstenberg, and most English commentators). It originated at a time when the triumphant advent of Messiah was the object of immediate expectation, and the Roman empire appeared to be the last in the series of earthly kingdoms. The long interval of conflict which has followed the fall of the Roman has filled the imagination of the Christians, and in succeeding ages the Roman period has been unnaturally prolonged to meet the requirements of a theory that took its rise in a state of thought which experience has proved false. See Horn, Little.

The parallel character and striking fulfilment of Daniel's prophecies, many of which are carried out with a detail elsewhere unknown, may be seen from the following synoptical table. Those relating to the seventy weeks (ch. ix, 24-27) will be treated separately under that head.

2. The language of the book is partly Chaldean (i. 4, 7, 26) and partly Hebrew. The latter is not unlike that of Ezekiel, though less impure and corrupt, and not so replete with anomalous grammatical forms. The Chaldean is noways than of the Chaldaean proper,
HARMONY OF DANIEL'S PROPHECIES OF THE

I. Babylonian Empire.

This is depicted at its acme under Nebuchadnezzar, who attained the universal sovereignty of Western Asia and Egypt. Griffins or winged lions are a common emblem on the Assyrian sculpture. The empire subsequently degenerated, and, at the same time, became more civilized.

II. Persian Empire.

The original element was Media, where bears abound. Persia was the higher born and more elevated side. The three ribs are probably Lydia, Assyria, and Babylonia, which were successively absorbed by Cyrus. He was victorious in every direction except eastward. The kings following him were: 1. Cambyses; 2. Darius Hystaspis; 3. Xerxes, who first exerted all his resources against Greece.

Copper denotes the mercenary Greeks. The leopard represents their avarice and pertinacity. The four wings are indicative of double velocity. Alexander marched with unsurpassed rapidity. He was the sole ruler of his dynasty. His dominions were divided, shortly after his premature death, between 1. Ptolemy, in Egypt and the Mediterranean coast; 2. Seleucus, in Asia; 3. Lycaonacus, in Thrace; 4. Cassander, in Greece.

IV. Syrian Monarchy.

This was of a mongrel character, the native Oriental element corresponding to the clay, and the foreign Greek to the iron. These were combined in all sorts of affinities. The ten toes may symbolize the numerous satrapies which fell to the share of Seleucus. This dynasty is depicted as fierce, from contrast with the lenient government preceding, and especially from its intolerance towards the Jewish religion.

1. Seleucus Nicator was originally Ptolemy's general at Babylon, but soon managed to secure not only the entire East, but also the province of Syria (including Palestine). 2. Antiochus Siderr was engaged in subduing the Gauls. 3. Antiochus Theos made peace with Ptolemy Philadelphus by marrying Berenice, his daughter; but soon repudiated her in favor of Laodice, his former wife, who avenged herself by poisoning him and killing her rival with her infant.

Berenice's brother, Ptolemy Euergetes, avenged her death by invading Syria, carrying away immense spoil.

4. Seleucus Callinicus attempted to retaliate by attacking the Egyptian province, but was forced to retire with defeat. 5. Seleucus Crurus, his son, renewed the attempt, but was slain; and his brother, 6. Antiochus the Great, pushed the campaign to the border of Egypt. This roused Ptolemy Philopator, who assembled an army, with which he totally routed Antiochus at Gaza; but he then concluded a truce with him.

Fourteen years afterwards, Antiochus returned with the spoils of his Eastern campaigns to renew his designs against...

The Egyptian provinces, and, with the assistance of a party of the Jews, he defeated the Egyptian general at the sources of the Jordan, besieged and captured the remainder of the Egyptian force in Zidon, and got full possession of Palestine. He then concluded a hollow alliance with various Ephiphanes, giving him his daughter Cleopatra, with the Palestinian provinces as a dowry, hoping that she would favor his purposes, an expectation in which he was ultimately disappointed. He then turned his arms against the Greek colonies of Asia Minor and the Illyrian cities, which the Romans under Scipio, who compelled him to sue for peace on the most humiliating terms. He was killed while attempting to plunder a temple in his own dominions. 1. Seleucus Philopator was reconciled with efforts to raise the enormous fine imposed by the Romans upon his father as the price of peace, and was at length assassinated by his minister, 3. Heliodorus, who held the throne a short time, although, 9. Demetrius Soter, son of the last king, was rightfully heir, and, 10. Ptolemy Philometor was entitled to the Palestinian provinces by virtue of his mother's dowry right.

11. Antiochus Epiphanes, brother of Seleucus, artfully and quietly secured the succession, expelling Heliodorus, and ignoring the claims of his nephews Demetrius and Ptolemy. (Daniel styles him "vile," in contrast with his surname "illustrious," and notes the Hellasizing corruptions of his reign in Judaea, as detailed below.) The guardians of the latter prince resenting this, a struggle ensued, in which Antiochus twice defeated the Egyptians in a pitched battle on their own borders. He then pretended to make a truce with them, but only as a cover for enticed Egypt with a small force, and seizing quietly upon the capital and other points. On his return from his second campaign into Egypt, he endeavored to carry out the scheme of introducing Greek customs among the Jews. In a third campaign he continued his successes, and in a fourth he was likely to capture Alexandria and reduce the whole Egyptian power, when he was peremptorily ordered to desist by the Romans. On his way home he vented his chagrin at this interference upon the unhappy Jews, in whose quarrels he meddled, despising the high priest, abolishing the sacrificial offerings, interdicting the ritual, and bitterly persecuting all who refused to apostatize to paganism. The Temple remained closed to all but heathen victims for three years and a half (190 B.C.), and was shortly afterwards rededicated on Dec. 25, B.C. 105 (making 1835 days), and a half years (1900 days) from the first act of profanation in the removal of the legitimate pontiff. Antiochus's disregard for even the native deities is evident from his renewal of his father's attempt to plunder the temple of the Syrian Venus. Yet he made the most violent efforts to introduce the worship of Jupiter Capitolinus.

The remainder of his reign is obscure, owing to the nearly total loss of the ancient records concerning Egypt, etc., referred to by Daniel as being so successful. It is certain, however, that the last act of his reign was a campaign in the north-eastern provinces, and that he perished miserably (one account says as a falling mule) as he was hastening to the support of his generals, who had been defeated by the Jewish patriots and rebels. The Maccabees had raised the standard of civil and religious liberty in Judaea, and, after a long and severe struggle, the Jews secured their independence. This they retained for a century, a period of great political and spiritual prosperity in g-neral, which Daniel and the other prophets speak of in such glowing terms as being introductory to the Messianic times, the Gospel "kingdom of heaven," never to end.

8 I considered the horns, and, behold, and of the other there came up which came up, and among them was one more strong than all the others, and it had eyes and horns. 9 I beheld even till great waters were dried up, and the heaven was darkened, and the body was destroyed, and given to the burning flame. 10 As concerning the rest of the beasts, they had their dominion taken away: yet their dominion was prolonged for a season and time.

44 And in the days of these kings shall the God of heaven set up a certain kingdom which shall never be destroyed: and the kingdom shall not be left to other people, but it shall break in pieces and consume all these kingdoms, and it shall stand for ever. 45 And the same king shall be strong, and the people of the same language shall be girded with gold: and all nations shall serve him: and dominion shall be given to the people of the same language, which shall continue till the end of the whole realm.
and another shall rise after them, and he shall be different from the first, and he shall subdue three kings.

9 And out of one of them came forth a little horn, which waxed exceeding great, till it was woful: and he entered into the midst of the saints, and cast asunder the truth: and the saints were given into his mouth, and his dominion was set with white exaltation.

10 And in the latter time of their kingdom, when the transgression of sin is finished, they shall be finished for the understanding of the people, and the king of_true shall be smitten.

11 And in the land of transgressors shall he set himself to change times and laws; and in the land of language shall he understand a speech.

12 And with the arms of a flood shall they be overthrown from before him, and shall be broken; yea, also by the Prince of the covenant.

13 And after the league made with him he shall work deceitfully: for he shall come up, and shall become strong with a small people.

14 And he shall enter even into the house of the king of the south, and shall work against him: and the king of the south shall be moved in his heart against him, and shall publish a speech against the Prince of princes; but he shall not accomplish his purpose, because he shall be given into his hand.

15 And he shall speakexceedingly great things: and there shall no one be able to stand before him, neither shall there be any finding against him, but he shall do according to his own will, and stand up for his own kingdom, and there shall be none to stand against him; and he shall stand in the glorious land, and by his hand shall he consume.

16 And he shall set his face to enter with the strength of his whole kingdom, and upright men with him; and he shall cause arouse himself with the strength of his heart, and he shall come against the king of the south, and they shall fight, even the king of the north shall come toward the glorious land.

17 And he shall also set his face to enter into the house of the God of truth, and shall cause工ast to be cast down, and shall also judge with truth, and with judgment shall he do judgment; and with the truth shall he cause to prosper the judgment.

18 And with the prince of the covenant shall he cause arouse himself, and with him shall stand the daughter of women: and a mother shall be found with them.

19 Then shall be turned toward the fort of the holy land; but he shall not succeed, nor be able to stand, for the son of the Cohen shall stand against him, and cause him to stumble.

20 And they shall effect a league with the prince of the north; and he shall open their house, and cause their treasures to come out by force.

21 And in the latter time of their kingdom, when the transgression of sin is finished, they shall be finished for the understanding of the people; and the king of the south shall be moved in his heart against him, and shall publish a speech against the Prince of princes; but he shall not accomplish his purpose, because he shall be given into his hand.

22 And the king of the north shall come, and cast up a mount, and take the most fortified cities; and the arms of the south shall not withstand, neither shall any living thing abide in his land; but he shall stand in the glorious land, and by his hand shall he consume.

23 And the king of the north shall come, and cast up a mount, and take the most fortified cities; and the arms of the south shall not withstand, neither shall any living thing abide in his land; but he shall stand in the glorious land, and by his hand shall he consume.

24 And his power shall be mighty, but not for all his substance: and he shall stand against the prince of princes, but he shall not prevail against him.

25 And he shall speak great words against the Most High, and shall wear out the holy ones of the Most High, and think to change times and laws; and they shall be given into his hand until a time and times, and the dividing of time.

26 And the Anointed One of High shall come, and fight with the saints of the high ones; and he shall prevail against them; and also against the prince of princes shall he stand up; and another shall stand against the prince of princes; and he shall be given into his hand, and into the dominion and kingdom of the Anointed One of High; and he shall prosper in his place.

27 And when the Anointed One of High shall come, he shall fight with the saints of the high ones; and he shall prevail against them; and also against the prince of princes shall he stand up; and another shall stand against the prince of princes; and he shall be given into his hand, and into the dominion and kingdom of the Anointed One of High; and he shall prosper in his place.

28 And when the Anointed One of High shall come, he shall fight with the saints of the high ones; and he shall prevail against them; and also against the prince of princes shall he stand up; and another shall stand against the prince of princes; and he shall be given into his hand, and into the dominion and kingdom of the Anointed One of High; and he shall prosper in his place.

29 And when the Anointed One of High shall come, he shall fight with the saints of the high ones; and he shall prevail against them; and also against the prince of princes shall he stand up; and another shall stand against the prince of princes; and he shall be given into his hand, and into the dominion and kingdom of the Anointed One of High; and he shall prosper in his place.

30 And when the Anointed One of High shall come, he shall fight with the saints of the high ones; and he shall prevail against them; and also against the prince of princes shall he stand up; and another shall stand against the prince of princes; and he shall be given into his hand, and into the dominion and kingdom of the Anointed One of High; and he shall prosper in his place.

31 And when the Anointed One of High shall come, he shall fight with the saints of the high ones; and he shall prevail against them; and also against the prince of princes shall he stand up; and another shall stand against the prince of princes; and he shall be given into his hand, and into the dominion and kingdom of the Anointed One of High; and he shall prosper in his place.
but a corrupt vernacular dialect, a mixture of Hebrew and Aramaic, formed during the period of the exile. It resembles mostly the Chaldean pieces in Ezra, but differs greatly from the dialect of the later Targums (see Hillenfeld, Ezra u. Dan. and ihre neuesten Bearbeitungen, 1866). It is not a Chaldaic language.

The style is, even in the prophetic parts, more prosaic than poetical, as Lowth has already observed. The historical descriptions are usually very broad and prolix in details; but the prophecies have a more rhetorical character, and their delivery is frequently somewhat regular. Their style is descriptive, painting with the most lively colors the still fresh impression which the vision has made on the mental eye.

3. The unity of the book has been disputed by several critics, and more especially by Eichhorn and Bertholdt, who conceived it to have been written by more than one author, on account of some contradictions which they thought they had discovered in it, such as in i, 21, compared with x, 1; and in i, 5-18, compared with ii, 1. With regard to the first supposed contradiction, we consider the meaning of i, 21, to be that Daniel had lived to see the first year of the reign of Cyrus, as a particularly memorable, and, for the exiled Jews, the most important year of their captivity, for it was the 60th year of their captivity, and also the 60th year of the Temple's destruction, by means of which he had lived. His death, however, was not the end, but the beginning of a new period of their captivity. His death, therefore, is not a contradiction, but a confirmation of his prophecy.

Respecting the second supposed contradiction, the matter in ch. i, 5-18, belongs properly to the collocation of Nebuchadnezzar, which term is there applied to Nebuchadnezzar, the king of Babylon, whose reign is counted only from the year of his actual accession to the throne. These attempts to disturb the harmony of the work are also disannounced by the connecting thread which evidently runs through the whole of the book, setting the single parts continually in mutual relation to each other. Indeed, most critics have pointed out that the hypotheses, based on the book as a closely connected and complete work in itself.

4. Much greater is the difference of opinion respecting the authenticity of the book. The oldest known opponent of it is the heathen philosopher Porphyry, in the third century of the Christian era. The greater the authority in which the book of Daniel was held at that time by both Jews and Christians in their various controversies, the more was he anxious to dispute that authority, and he did not disdain to devote one whole book (the twelfth)—out of the fifteen which he had composed—entirely to the subject at issue. He therefore maintains that the author of the book of Daniel was a Palestinian Jew of the time of Antiochus Epiphanes, that he wrote it in Greek, and fraudulently gave to past events the form of prophecies. Porphyry was answered by Eusebius of Caesarea, Methodius of Tyre, and Apollinaris of Laodicea. But their works, as well as that of Porphyry himself, are lost, and we know the latter only from the numerous quotations and refutations in the Commentary of Jerome.

Porphyry found no successor in his views until the time of the English deists, when Collins attempted to attack the authenticity of Daniel, as was done by Somier in Germany. After this a few critics, such as J. D. Michaelis and Eichhorn, disputed the authenticity of the first six chapters. The learned Swiss, Corrodi (Freimuth, Versuch, etc., Berlin, 1778), went still further, and, reviving the views of Porphyry, questioned the genuineness of the whole book. The question of its authenticity was then debated in many more offshoots, at later congregations, and especially by Hengstenberg (Die Authentike der Dan. erneuert, 1831, translated by Ryland, Edinb. 1847, 8vo), Havérmick (Newe krit. Untersuch., Hamb. 1838, 8vo), Delitzsch (in Herzog's Enzyklopädie, s. v. 1854), Keil (Lehrb. der Einl. in der A. T. Frank. 1855, 8vo), Davidson (Introduction to the O. T. II, Lond. 1846, 8vo), who maintain the affirmativeness, and by Bleek (Berl. theolog. Zeitschr. iii, 1829),

The real grounds on which most modern critics rely in rejecting the book are the inadequacy of its narratives" and "the minuteness of its prophetic history." "The contents of the book," it is said, "are irrational and impossible" (Hitzig, § 5). It is obvious that it is impossible to answer such a statement without entering into general views of the providential government of the world, which are incompatible with the contents of the book. The events of the narratives are exceptional and surprising; but revelation is itself a miracle, however it be given, and essentially as inconceivable as any miracle. There are times, perhaps, when it is required that extraordinary signs should arrest the attention of men, and fix their minds upon that Divine Presence which is ever working around them. Prophecies may become a guide to nature. Special circumstances may, and, according to the Bible, usually do determine, the peculiar form which the miraculous working of God will assume at a particular time; so that the question is, whether there is any discernible relation between the outward events and the wonders narrated in the book. It is impossible to apply this remark to the case of Daniel.

The position which he occupied was as exceptional as the book which bears his name. He survived the exile and the disappointment which attended the first hopes of the Jews. The histories which had been connected with the name of Daniel, the forerunners of earlier prophets were now felt to be far off, and a more special revelation may have been necessary as a preparation for a period of silence and conflict. The very character of the Babylonian exile seems to have called for some signal exhibition of divine power. As the first exodus was distinguished by great marvels, it might appear that the return should be also (comp. Mic. vii, 15; Delitzsch, p. 272, etc.). National miracles, so to speak, formed the beginning of the theocracy; personal miracles, the beginning of the Church. To speak of an "aimless and lavish display of wonders" is to disregard the representative significance of the different acts, and the relation which they bore to the future fortunes of the people. A new era was inaugurated by fresh signs. The Jews, now that they were left among the nations of the world, looked for some sure token that God was able to deliver them and work out his own purposes. The persecution of Antiochus Epiphanes and the defeat of the nation was looked upon, by the people no longer sought without what at length they had found within. They had withstood the assault of one typical enemy, and now they were prepared to meet all. The close of special predictions coincided with the consolidation of the national faith. See Antiochus Epiphanes.

The following are the more important of the arguments which evidence the genuineness of the book (see the works on the Authenticity of Daniel, by Boyle [Lond. 1865] and Waters [ib. ed.]).

1. The existence and authority of the book are most distinctly testified by the New Testament. Christ himself refers to it (Matt. xxiv, 16), and gives to himself (in virtue of the expression in Dan. vii, 13) the name of Son of Man; while the apostles repeatedly appeal to it as an authority (1 Cor. vii, 2; 2 Thess. ii, 8). Apart from the general type of apocalyptic composition which the apocryphal writers derived from Daniel (Rev. xxiv, 16), there is another type of the New Testament incidentally acknowledges each of the characteristic elements of the book, its miracles (Heb. xi, 33, 34), its predictions (Matt. xxiv, 15), and its doctrine of angels (Luke i, 19, 26). To the objection that Christ and the writers of the New Testament are here no real authority, inasmuch as they accommodate themselves to the Jewish notions and views, we reply that the genuineness of the book of Daniel is...
so closely connected with the truth of its contents—in other words, that the authenticity of the book is so immediately connected with its authority—that it is impossible to doubt its genuineness without suspecting at the same time a wilful cheat in its contents; so that the accommodation in this case to national views would be tantamount to wilfully confirming and sanctioning an unpardonable fraud.

(2.) The period of the exile would be altogether incomprehensible without the existence of a man like Daniel, whose great influence with his own people, and effecting their return to Palestine by means of his high station in the state, as well as through the peculiar assistance of God with which he was favored. Without this assumption, it is impossible to explain the continued state of independence of the people of God during that period, or to account for the interest which Cyrus took in their affairs. The exile and its termination are indicative of uncommon acts of God towards highly-gifted and favored men; and the appearance of such a man as Daniel is described in that book as having been, is an indispensable requisite for the right understanding of this portion of the narrative.

(3.) An important hint of the existence of the book in the time of Alexander is found in Josephus (Ant. xi, 8, 4), according to which the prophecies of Daniel had been pointed out to that king on his entrance into Jerusalem. It is true that the fact may have been somewhat obscured in its details by Josephus, yet it is historically undeniable that Alexander did bestow great favors on the Jews, a circumstance which is not easily explained without granting the fact recorded by Josephus to be true in the main. See Alexander the Great.

(4.) The first book of the Maccabees, which is almost contemporaneous with the events related in it, not only presupposes the existence of the book of Daniel, but actually betrays acquaintance with the Alexandrian version of the same (1 Macc. i, 54; comp. Dan. ix, 37; xi, 59; comp. Dan. iii, iii), a proof that the book must have been written long before that period.

(5.) If the book had been written in the Maccabean period, there would probably have been produced in that period some similar prophetic and apocalyptic productions, composed by Palestinian Jews. Of such, however, not the slightest notice can anywhere be found; so that our book—of if the Maccabean time—forms an isolated enigmatical phenomenon in the later Jewish literature.

(6.) The reception of the book into the canon is also an evidence of its authenticity. In the Maccabean age the canon had long been completed and closed; but, even doubting that point, it is not likely that, at a time when so much scrupulous adherence was shown towards all that was baulked by time and old usage, and when scriptural literature was already flourishing—it is not probable, we say, that a production then recent should have been raised to the rank of a canonical book.

(7.) We have an important testimony for the authenticity of the book in Eus. xiv, 14, 20; xxviii, 3. Daniel is there represented as an ancient character, as a model of justice and wisdom, to whom had been allotted superior divine insight and revelation. This sketch perfectly agrees with that contained in our book.

(8.) The book betrays such an intimate acquaintance with Chaldaean manners, customs, history, and religion as none but a contemporary writer can fairly be supposed to possess. Thus, e.g. the description of the Chaldaean magians and their regulations perfectly agrees with the accounts of the classics respecting them. The account of the illness and insanity of Nebuchadnezzar is confirmed by Berosus (in Joseph C. Apion. i, 20). The edict of Darius the Mede (Dan. v) may be satisfactorily explained from the notions peculiar to the Medo-Persian religion, and the importance attached in it to the king, who was considered a sort of incarnate deity. The scene and characters of the book are Oriental. The colossal image (222), iii, 1, not necessarily a human figure; the term is applied familiarly to the cross, Buxtorf, Lee. Rob. v., v., the first three persons of the trinity being the three confessors (iii, 16), the decree of Darius (vi, 7), the lions’ den (vi, 7, 19, 21), the demand of Nebuchadnezzar (ii, 5), his obeisance before Daniel (ii, 46), his sudden fall (iv, 33; comp. Eusebius, Prep. Ec. iv, 41; Joseph. c. Ap. i, 20), are not only consistent with the nature of Eastern life, but in many instances directly confirmed by other evidence. See Darius the Minx for the difficult cases of i, 1; ii, 41; 31.

(9.) The religious views, the ardent belief in the Messiah, the purity of that belief, the absence of all the notions and ceremonial practices of later Judaism, etc., the agreement of the book in these respects with the genuine prophetic books, and more especially with the prophets in and after the exile—all this testifies to the genuineness of Daniel. In doctrine the book is closely connected with the writing of the Maccabees, and forms a last step in the development of the ideas of Messiah (vii, 18, etc.), of the resurrection (xii, 2, 5), of the ministry of angels (viii, 16; xii, 1, etc.), of personal devotion (vi, 10, 11; i, 5), which formed the basis of later speculations, but received no essential addition in the intervening period. See Daniel (The Great).

(10.) The linguistic character of the book is most decisive for its authenticity. In the first instance, the language in it, by turns Hebrew and Aramaic, is particularly remarkable. In that respect the book bears a close analogy to that of Ezra. The author must certainly have been equally conversant with both languages—linguistic element exactly suited to a Hebrew living in the exile, but not in the least so to an author in the Maccabean age, when the Hebrew had long since ceased to be a living language, and had been supplanted by the Aramaic vernacular dialect. The Hebrew in Daniel bears, moreover, a very great affinity to that in the other later books of the Old Testament, and has, in particular, idioms in common with Ezekiel. The Aramaic, also, in the book differs materially from the prevailing dialect of the later Chaldean parapHRastic versions of the Old Testament, and has much more relation to the idiom of the book of Ezra. Nor is the mention of Greek musical instruments (iii, 5, 7, 10, "ρύθμος, κιθαρά, θάρτης, σαμβιχ; κύτταρος, χορίανιον, χορέους, ψαλτήριον"), for these words only can be shown to be derived from the Greek (De Wette, Einl. p. 255 b.), other than suitable to a time when the intercourse of the East and West was already considerable, and when a brother of Alceus (B.C. 600-500) had gained distinction “at the farthest end of the world, aiding the Babylonians” (Alc. Frag. 33, Bergk. ; Brandis, in Delitzsch, p. 274). (For a full view of the criticism, history, and literature of the book of Daniel, see Daniel’s Commentary on the Apocrypha. There is no Chaldean translation of Daniel, and the deficiency is generally accounted for, as in the parallel case of Ezra, by the danger which would have existed in such a case of confounding the original text with the paraphrase; but, on the other hand, the whole book has been published in Hebrew. Kennicott prepared a special commentary on the Chaldean portions (ed. Schulte, Hal. 1782, 8vo); comp. Bird (Lectures, Lond. 1845).

The Greek version has undergone singular changes. At an early time the Sept. translation was supplanted in the Greek Bibles by that of Theodotion, which in the time of Jerome was generally “read by the churchries” (c. Rufus). In Josephus (in Joseph C. Apion. i, 20), for which Jerome was unable to account (Pref., in Vers. Dan.), may have been made in consequence of

I. Their Character.—I. The first of these pieces is incorporated into the narrative of Daniel. After the three confessors were thrown into the furnace (Dan. iii, 23), Azarias is represented as praying to God for deliverance (Song of the three Children, 3-22); and in answer the angel of the Lord slights them from the fire which consumes their enemies (23-27), whereas “the three, as one mouth,” raise a triumphant song (29-68), of which a chief part (35-66) has been used as a hymn (Benedicite) in the Christian Church since the fourth century (Rahm, Apol. II, 55; comp. Connell, Tolstoi, p. 14). Like other similar fragments, the chief parts of this composition are given at the end of the Psalter in the Alexandrine MS. as separate psalms, under the titles of “The Prayer of Azarias” and “The Hymn of Our Fathers”; and a similar arrangement occurs in other Greek and Latin psalters.

2. The two other pieces appear more distinctly as appendices, and offer no semblance of forming part of the original text. The History of Susannah (or The Judgment of Daniel) is generally found at the beginning of the book (Gr. SS. Vet. Lat.), though also it occurs after the 12th chapter (Vulg. ed. Comp.). The History of Bel and the Dragon is placed at the end of the book, and in the Sept. version, it bears a special heading as “Part of the Prophecy of Habakkuk” (in prophétias Αμαξακοῦν νιού ἡγούμενοι τῆς φυλῆς λαού).

II. Their Currency.—The additions are found in both the Greek texts—the Sept. and Theodotion—in the Old Latin and Vulgate, and in the existing Syriac and Arabic versions. On the other hand, there is no evidence that they ever formed part of the Hebrew text, and they were originally composed, the Syriac (Polychronius ap. Mai, Script. Vet. Nov. Col. I, p. 113, says of the hymn expressly ωκίμα ἐν ρώς Ἑβραϊ-κοῦς ὤ κεν εἰς ρώς Σουραί-κος βῆλικοῦ). From the Sept. and Vulgate the fragments passed into common use, and they are commonly quoted by Greek and Latin fathers as part of the Sept. text (especially Lactant., Ep. ad Afric.; Tertull., de Pudic. 17, etc.), but rejected by those who adhered to the Hebrew canon. Jerome, in particular, called attention to their absence from the Hebrew Bible (Præf. in Dan.), and, instead of any commentary of his own, adds shortly Origen’s remarks “on the fables of Bel and Susanna” (Comm. in Dan. xili, 1). In a later manner, he notices shortly the Song of the three Children, “last he should seem to have overlooked it” (Comm. in Dan. iii, 29).

III. Their Derivation.—Various conjectures have been made as to the origin of the additions. It has been supposed that they were derived from Aramaic originals (Dilh. in Exod. ii, 2. Sapi. 8, gives a list of the documents at length), but the intracacies of the text is wholly insufficient to establish the point. The character of the additions themselves indicates rather the hand of an Alexandrine writer; and it is not unlikely that the translator of Daniel wrought up traditions which were already current, and appended them to his work (comp. Fritzsche, Essig. Handb. zu den Apost. i, 151).

The abruptness of the narrative in Daniel furnished an occasion for the introduction of the prayer and hymn; and the story of the Dragon seems like a strange exaggeration of the record of the deliverance of Daniel (Dan. vi), which may naturally have formed the basis of these legends. Nor is it strange that in the history of Susanna a pointed allusion to the name of the prophet, though the narrative may not be wholly fictitious.

The Sept. appears to be the original source from which all the existing recensions of the fragments were derived (comp. Hodi, De Bibl. text. p. 568). Theodotion seems to have made little more than to copy out the Sept. text, with improvements in style and language, which are considerably greater in the appended narratives than in the Song incorporated into the canonical text. Thus, while the history of Susanna and Bel and the Dragon contain large additions which are complete and embellish the story (e. g. Hist. Sus. 15-18; 20; 21; 24-27; 46, 47, 49, 59; Bel and Dr. 1, 9-13; Eichhorn, p. 431 sq.), the text of the Song is little more than a repetition of that of the Sept. (comp. De Magistris, Daniel, etc. p. 254 sq.; Eichhorn, Einleit. in der Apokryph. Schrift. p. 422 sq.). The Polyglot-Syriac, Arabic, and Latin versions are derived from Theodotion, and the Hexaplar-Syriac from the Sept. (Eichhorn, p. 430, etc.).

The stories of Bel and Susanna received various embellishments in later times, which throw some light upon the manner in which they were originally composed (comp. Origen, Ep. ad Afric., § 7, 8; Bochart, Hieroz. iii, 3, Eichhorn, pp. 410, etc.), and which shows that Theodotion introduced into the narrative of Bel, to give some consistency to the facts, illustrates the rationalizing process through which the legends passed (comp. Delitzsch, De Habacuci vidit et orat., 1844). It is thus useless to institute any inquiry into the historic foundation which lies below the popular traditions, for, though the stories cannot be regarded as mere fables, it is evident that a moral purpose determined the shape which they assumed. A later age found in them traces of a deeper wisdom, and to Christian commentators Susanna appeared as a type of the true Church tempted by idolatry and heresy, overcome by the adversaries, and lifting up her voice to God in the midst of persecution (Hippol. In Sus., p. 689 sq., ed. Migne).—Smith, s. v.

V. Their Spuriousness.—These addenda are regarded as canonical by the Roman Church, but the only evidence that can be adduced for this authority being attached to the books of the Sept., Vulg., and other versions, and their quotation by the early Church fathers. On the other hand, these arguments are more than counterbalanced by the fact of their non-existence in the Heb. text, and the earliest Syriac, the weak authority of the Sept. as a source of the Syriac versions (especially Lactant., De nat. divin. of the Vulg., which is based up on it, and the general manner in which these fathers refer to them. Jerome, indeed, frequently and openly ridicules their ab-
 DANIEL THE STYLISTE 672  DANTE

surd legends; and their own contradictions are sufficient to stamp them as spurious upon their very face.

3. (Sept. Daniel). A priest of the family of Ithma, who returned from the exile in the time of "Artaxerxes" (Ezra xiv, 3), B.C. 460. He is probably the same as the priest Daniel at last escorted in the covenant drawn up by Nehemiah (Neh. x, 6). B.C. 410. He has been confounded with the prophet in the apocryphal addenda to the Sept. (Dan. xiv, 1, Sept., not Theodotion), where he is called "a priest by the name of Daniel, the son of Abda" (Jerome, Prefat. in Dan. i).

Daniel the Stylist was born near Samosata about A.D. 410, and died near Constantinople about 490. He entered a monastery at twelve, and determined in middle life to imitate Simeon the Stylite (q. v.). In 461 he fixed himself on a pillar on the height called Anapla, near Constantinople, and exposed himself there day and night. It is said that he had the gift of prophecy, and at last ascended to heaven by the angels. He is celebrated as a saint in the Greek and Roman churches, Dec. 11. —Bulter, Lives of the Saints, Dec. 11.

Daniel, bishop of Winchester, a monk in the convent of Malmesbury, was raised to the see of Winchester in 705. The convent from whence came Boniface, the modern institute for the promotion of his diocese, and Daniel himself strongly encouraged Boniface in his resolution of preaching the Gospel on the Continent. He gave him, on the occasion of his first journey to Rome, two letters of introduction, one addressed to all Christians, kings, and bishops (epist. B. ed. Wurdsem, ed. 1), and another to Gregory II., which has been lost. He was in retirement, in relations with the world, and sustained by his advice, instructions, and sympathy (ep. B. ed. 12-14). In 721 he undertook a pilgrimage to Rome, and on his return furnished to Bede the sources of his history of the kingdom of Wessex, as the latter himself states in his Ecclesiastical History of the Anglo-Saxons. He became bishop of Worcester within the year of his renunciation of charge, and returned to the convent of Malmesbury, where he died in 745 or 746. The four letters mentioned above are all that remains of his writings; the ep. 14, by Wurtwein, is also to be found in Baronius A.D. 724. —Herzog, Real-Encyclopedia, s. v.; Wright, Bibliographia Literaria (Anglo-Saxon Period), p. 292 sqq.

Dan ite (Heb. always with the article and Dan),; Dan. 2, 39; Sept. αυτός, δαν, of δαναβίνα (Acts, 5, 17). Dan. 11, 24; D. 23, 2, 3; xivii, 4, 41; 1 Chron. xiii, 9; Dan. 8, 1 (of Dan). Judg. xviii, 30), a member of the tribe of Dan (q. v.).

Dan ja'an (Heb. but once and with m local appell. Dn'ah Ya'an, 2, 27, 72; Sept. Danan and Oidav n. in Danan and Ionay; Vulg. Dan silvestrium, a place named only in 2 Sam. xxiv, 6 as one of the points visited by Joab in taking the census of the people. It occurs after Gilgal, between "the land of Tabathibod" and Zidon, and therefore may have been somewhere in the direction of Dan (Lash), at the sources of the Jordan. The reading of the Alexandrian Sept. and of the Vulg. was evidently 227 73. Dan-jacar, the nearest translation of which is "Dan in the wood." This reading is approved by Gesenius (Thes. Heb. p. 386), and agrees with the well-wooded character of the country about Teld-Kabhi. See Daphine, Fürst (Habs. Handwörterbuch, p. 308) compares Dan-jaan with Bael-jaan, a Phoenician divinity whose name is found on coins. Tholeius suggests that Danjaan was originally Leaish, the 5 having fallen away, and 7 having been substituted for 2 (Exeg. Hilbbeck, on Sam. p. 257). There seems no reason for doubting that the well-known Dan, or Leahem, is intended. We have no record of any other Dan in the north, and even if this were not the case, Dan, as the accepted northern limit of the nation, was too important a place to escape mention in such a list as that in the text. Dr. Schultze, however, the late Frusius, Israelm, the ancient site called Damaun or Dungur, in the mountains above Khan-en-Naktra, south of Tyre, which he proposes to identify with Dan-jaan (Van de Velde, Memoir, p. 806). —Smith, s. v.

Dan'nah (Heb. Dammah, 1, 75), prob. murmuring, but Fürst thinks lovely; Sept. Parvi, r. Pravv, evidently by mistake of "for 7; Vulg. Damnau), a city in the mountains of Judah, mentioned between Scocoh and Kirjath-sannah (Josh. xv, 49), and evidently lying in the group south-west of Hebron (Keil, Comment. in loc.); possibly the modern ed-Dhakur, an isolated village on the hills west of Wady el-Khulil, consisting of stone hovels with remains of older structures, and surrounded by a fine grazing region (Robinson, Researches, i, 308, 311). Knobel (Exeg. Handb., in loc.) suggests the site Zammei, but this probably that of the ancient Zanoah.

Dannhauser, Conrad, a Lutheran divine, was born in the Breisgau 1628, and studied at the universities of Marburg, Altdorf, and Jena. In 1628 he became professor of eloquence, and later of theology at Strasburg, where also in 1628 he became pastor of the Cathedral church. He died in 1666. Dannhauser was a learned theologian, and an earnest Lutheran controver- sistent against Romanism and Socinianism (q. v.). For an account of his numerous writings, see Tholuck, Akademisches Leben d. 17 Jahrhunderts, sec. xvii, p. 274; and Tholuck's article in Herzog, Real-Encyclopedia, xix, 386.

Dante (properly Durante) Alighieri, one of the greatest Christian poets of all times, and, on account of his views of religion and the Church, generally counted among the forerunners of the Reformation of the sixteenth century. He was born at Florence May 8, 1265; according to others, May 27, 1268. He studied philosophy at the universities of Bologna and Padua; later, when an exile, he devoted himself to the study of philosophy at Paris. According to a state- ment of Boccaccio, he also visited England (v.); In his youth Dante took an active part in the politics of the native city, and in 1300 was for two months one of its two Priori. In the party strife between the Neri (Blacks), the unconditional adherents of the pope, and the Bionchi (Whites), who rather sympathized with the Ghibellines, Dante was one of the leading men of the latter. His party sent him to Rome to execute the plans of the Neri, who had implored the aid of Boniface VIII. The pope induced Charles of Valois, brother of Philip IV of France, to go to Florence to make peace. Charles recalled the exiled chiefs of the Neri and gave up the house and the property of the Bianchi to plundering. Many of the prominent men of the party, among them Dante, were banished. Dante never saw his native city again, and his subsequent life was very unsettled. After the last unsuccessful attempt of the "Whites" to re-enter Florence, he probably left Italy for Paris. When emperor Henry VII marched against Rome, Dante wrote enthusiastic letters in favor of the emperor against the pope. It is thought that his work De monarchia was compiled at the same time. The death of the emperor disappointed his last hope. The last years of his life
were spent at Ravenna, where prince Guido Novello da Polenta was his patron. He died Sept. 14, 1921.

The first powerful influence which awakened in him the poetical inspiration was the love which he entertained for Beatrice Portinari, then eight years old, the daughter of a rich citizen. How pure, chaste, and tender this love is testified by his first work, the Vite Nuove, which was published about 1300, and consists of a collection of poems, all having reference to his first love (best edition by Marchesi di Milano, 1868, Chambers). Dante died earthwards (1291) as the wife of the knight Simone de Bardi, and a few years after her death Dante married a lady named Gemma, of the powerful house of Donati, whom he had five or six children. A fruit of the philosophical studies in which he sought consolation for the death of Beatrice was the Commedia (Banquet), which was to consist of 15 trattati and 14 cansoni, of which, however, only 4 trattati and 3 cansoni were finished (best edition by Trivulzio, Milan, 1826).

But the great work, which has settled for all the ages the reputation of Dante as one of the greatest Christian poets, is his immortal Commedia, or, as it was afterwards called, the great Latin Comedy, written in terze rime, and consisting of 100 cantos, of which the first is introductory to the following visions, and 38 are devoted to Hell (Inferno), Purgatory (Purgatorio), and Paradise (Paradiso) each. "The poet is conducted first by Virgil, the representative of human reason, when he descends into the Inferno; then by Beatrice, the representative of revelation, and finally by St. Bernard, through the several heavens, where he beholds the triune God. Hell is represented in the poem as a funnel-shaped hollow, formed of gradually contracting circles, the lowest and narrowest of which is at the earth's centre. Purgatory is a mountain rising solitary from the ocean on that side of the earth which is opposite to us: it is divided into terraces, and its top is the terrestrial paradise, the first abode of man. From this the poet ascends through the seven planetary heavens, the heaven of the fixed stars, and the 'primum mobile,' to the empyrean, or fixed seat of God. In all parts of the region thus traversed there arise conversations with noted personages, for the most part recently deceased. At one time the reader is filled with the deepest sorrow, at another with horror and aversion; or the deepest questions of the then philosophy and theology are discussed and solved; and the most strange, and then the most pious, corruptions of Church and State, are depicted with a noble indignation" (Chambers). The conversations contained in the Divina Commedia give a full exposé of most of the fundamental doctrines of the Christian religion. The creation of the world, the fall of angels and man, and the atonement, are treated of with great fulness. The doctrine that salvation can be found in faith in Christ alone is repeatedly insisted on. The poet in many places complains of the morbid, social, and political deenergic of the time, and of the corruption of the Church and the papal see. He violently inveighs against indulgences and the false veneration of saints, reviling the clergy, and the decreets of the popes over the holy Scriptures, and thrusts three popes in succession into hell. A thorough reformation of the Church in head and members is expected, not from the popes, but from the emperors. "Fifty-two years after the poet's death, the republic of Florence was restored and the Bolognese, and, in 1581, a new annual sum for public lectures to explain the Divine Comedy to the people in one of the churches, and Boccaccio himself was appointed first lecturer. The example was imitated in several other places in Italy. The works of these men are among the earliest commentaries on Dante that were written, and are among the choicest of the work amounst by this time to about 800. Of a few deserve notice. They are, that printed at Full, in 1472—of the earliest of all, the Nicobattine II.
DANTÉ'S Leben und Werke (Jena, 1852); Floto, Dante Alighieri: sein Leben und seine Werke (Stuttgart, 1858); Paar, Ueber de Quellen der Lebensgeschichte Dante's (Göttingen, 1862). The best among recent Italian works is Balbo's Vita di Dante (2 vols. Turin, 1889). A list of English editions, translated and untranslated, is contained in an essay by S. G. F. Brandon in *Divina Commedia* is given in Colombi de Batine's *Bibliographia Danteana* (2 vols. Prato, 1845-1848). The best illustrations of the chief works of Dante are from Flaxman (Atlantic Danteano, Milan, 1872); Genelli, and Doré. In 1865, from the 14th to the 16th of May, the sixth centenary of the birth of Dante was celebrated at Florence with immense enthusiasm, and his statue (by Enrico Pazzi in Ravenna) erected at the Piazza della Cruce. See Brockhaus, *Conversations-Lexicon*, s. v.; Herzog, *Real-Encyclop.*, iii, 286.

DANS, Johann Andreas, a Lutheran theologian and distinguished Hebrew scholar, was born in 1564 at Sundhausen, near Gotha. He became professor at the University of Jena, first in the philosophical, and subsequently (1718) in the theological faculty, remaining, however, at the same time professor of the Oriental languages. He was the founder of a new school of Oriental philologists, and had the reputation of being the best Hebrew scholar of the age. He was intimate with Spener and Francke, but yet his private life was not beyond reproach. He died Dec. 22, 1727. The most important of his works are *Compendium grammaticae hebr. et chald. (3d edition, 1706); Biblia Hebraica emendat. (Frankfort, 1781); Literatur Eden- Chaldaeum (Jena, 1806);* the first Hebrew text that had been published under the title *Nuncius Tympanum* (nut-cracker). Jena, 1866.—Herzog, *Real-Encyclop.* xix, 388; Pfeifer, *Univers.-Lex.* iv, 735.

DANS, Johann Traugott Lieberrecht, a Protestant theologian of Germany, was born May 31, 1703, at Weimar. He studied at the universities of Jena and Göttingen, became in 1807 professor of theology at Jena, which position he retained until 1837, and died at Jena May 16, 1851. He was a man of immense learning in all departments of literature, an interesting writer on a number of subjects, and a popular professor. In his theological views he was a representative of the school of Biblical Rationalists, advocating the separation of Revelation and Supernaturalism in the same church, and opposing the views both of Schleiermacher and Strauss. Among his theological works the following are the most important: *Lehrbuch der Kirchgeschichte* (Jena, 1824); *Die Wissenschaft der geistlichen Beruf* (Jena, 1824); Théologie, *Encyclop.* de la Bible (Vienna, 1829); *Universal-Wörterbuch der theolog. und religionsgeschicht. Literatur* (Leipzig, 1837, sq.); *Initii Doctrinae Patrissicae* (Jena, 1839); *Geschichte des Tridentinen Concils* (Jena, 1846), according to Paul Sarpi. His edition of the *Libri Symbolici* ecclesiae Romano-Catholicae (Vienna, 1835) was dedicated to Gregorio XVI, Pontifex Maximus, ecclesiae Romano-Catholicae prior, with some good Protestant advice. He also published a biography of his deceased (1836) friend and colleague, H. A. Schott (Jena, 1836), and edited a posthumous work of the latter on the authenticity of the Gospel according to Matthew (Leips. 1837). One of his last works was *Two Conversations on the Species of Jesus by Strauss and G. R. H., the Geographiers,* 1839.—Herzog, *Real-Encyclop.* xix, 389 sq.

Daphné (*Δαφνή, the laurel; so called from the verdure of the place, or because this tree was sacred to Apollo*), the name of several localities mentioned in later writers.

2. A celebrated grove and sanctuary of Apollo near Antioch (q. v.), in Syria. Its establishment, like that of the city, was due to Seleucus, Nicator. The distance between the two places was about five miles (Strabo, xvi, 750), and in history they are associated most intimately together (Antioch being frequently called *A. i. Δαφνίς, and ή πόρος Δαφνίς, and conversely Daphne entitled Δ. ή πόρος Αντιόχου, Josephus, War, i, 12, 5; comp. Ant. xiv, 15, 11; xvii, 2, 1). The situation was of extreme natural beauty, with perennial fountains and abundant wood. The SeleucidsLocalized the celebrated sanctuary on the opposite side of the river, and according to Piranesi, the statue of Apollo and the river Peneus, and the nymph Daphne. Here he erected a magnificent temple and colossal statue of the god (Libanias, *De Daphno Tempio*, iii, 384). The succeeding Seleucid monarchs, especially Antiochus Epiphanes, embellished the place still further. A new temple was built, and the privileges of an asylum. It is in this character that the place is mentioned, 2 Mac. iv, 38. In the reign of Antiochus Epiphanes (B.C. 171), the aged and patriotic high-priest Onias, having rebuilt Melanaus for his sacrifice at Jerusalem, took refuge at Daphne, whence he was treacherously brought out, at the instance of Melanaus, and murdered by Andronicus, who was governor of Antioch during the king’s absence on a campaign. Josephus does not give this account of the death of Onias (Ant. xii, 5, 1). When Syria became Roman, Daphne continued to be famous as a place of pilgrimage and of worship. It was evidently an oracle under the name of Daphnius (Plin. *Hist. Nat.*, III, 26). The beginning of the decay of Daphne must be dated from the time of Julian, when Christianity in the empire began to triumph over heathenism. The site has been well identified by Pococke and other travellers at *Beit el-Macq*, "the House of the Water," on the left bank of the Orontes, to the south-west of Antioch, and on higher ground, where the fountains and the wild fragrant vegetation are in harmony with all that we read of the natural characteristics of Apollo’s sanctuary.—Smith, s. v. It is a small natural amphitheatre on the declivity of the mountains, where the springs burst with a loud noise from the earth, and running in a variety of directions for a distance of about two hundred yards, terminate in two beautiful cascades, which fall into the valley of the Orontes. The largest of the fountains rises from under a vertical rock, forming a small abyss or concavity, on the top and sides of which are the massive remains of an ancient edifice, perhaps those of the Temple of Apollo (Kelly's *Syria*, p. 261). For a translation of an ancient inscription recently discovered on the site, see the *Jour. Am. Or. Soc.* vi, 550. See Müller, *Antiq. Antioch-*no, p. 64; Smith’s *Dict. of Class. Geog.* s. v. See Antioch.

2. A town or village (Θυάπνη) near the fountains of the little J. (Josephus, War, iv, 1, sec. 1). Beldad (Palestine, p. 269) and others have considered this as identical with Dan, proposing to read Δαφνίς for Θυάπνη, and referring in support to Josephus, *Ant. viii, 8, 4*. Recent explorers have shown this to be an error, and have discovered the site of the Daphne of Josephus in the present Deafakhe, two miles to the south of Tell el-Kady, the site of Dan (Van de Velde, *Mémoire*, p. 806; *Syria and Palestine*, ii, 419; Robinson, *Later Researches*, p. 988; *Wilson, Bible Lands*, ii, 173; Thomson, *Land and Book*, i, 888).

3. In *Num. xxxiv, 11*, the clause rendered in the A. V. "on the east of" or "of the Sin. (q. v.)", should be rendered "on the east (of) the fountain," given in the Vulgate "contra fontem Daphnim." The word Daphnum is most probably a marginal gloss, and may perhaps refer to No. 2. Jerome, in his commentary on Ezekiel (c. 47), refers to the passage in Numbers, and gives reasons for concluding that "the fountain" is Daphne No. 1. The fountain of Jonathan, mentioned by Josephus, gives Daphne or Daphne as the equivalent of Riblah (q. v.) in *Num. xxxiv, 11* (q. v.). The error into which Jerome and the Targums have fallen appears to have arisen either from a confusion between Daphne on the Jordan with Daphne on the Orontes, or from mistaking the one for the other near the mouth of the Orontes for those at its source.

4. A fortified town on the Pelusiac branch of the
Nile (Δέρβα, Herod. ii. 90, 107), the TARPEZES (q. v.) of Scripture, distant from Pelusium sixteen Roman miles (Iblin. Ant. I. 6: Pelusio Memphis).

Dar. See MARBLE.

Dara (Heb. Dar'a, דָּרָא; Sept. Ἀραᾶ v. r. Ἀράα, Ἀραῖα), a contracted or corrupt form (1 Chron. ii. 6) of the name Dar'a (q. v.).

Darbytes. See PLYMOUTH BRETHEREN.

Darconim. See DARCUS.

Dar'da (Heb. Dar'da, דָּרְדָּא, pearl of knowledge; Sept. Δάρδαλα v. r. τὸν δαρδά; Josephus, Δάρδανος v. r. Δάρδανος, Ant. viii. 2, 5; Vulg. Darda), a son of Mabul, one of four men of great fame for their wisdom, but who were exiled by Solomon (1 Kings iv. 61). B.C. ante 1010. Ethan, the first of the four, is called "the Ezrahite," but it is uncertain whether the designation extends to others. In 1 Chron. ii. 6, however, the same four names occur again as "sons of Zerach," of the great family of Pharez, in the tribe of Judah, with the slight difference that "Darda" appears as "Dar." The identity of these persons with those in 1 Kings iv has been greatly debated (see the arguments in Bord in Bibl. 206-8); and though there cannot be much reasonable doubt that they are the same (Möser, Kritik. Unters. p. 287), although Keil argues that nothing can be proved from the mere identity of the names (Versuch ab. der Chron. p. 164). There is nothing to support the Jewish tradition (in the Book of Job) that they prophesied during the Egyptian bondage. See EZRA.

(1) A great number of Hebr. MSS. read Darda in Chron. (Davidson, Hebr. Text. p. 210), in which they are followed by the Targum and the Syriac and Arabic versions. See DARA.

(2) The son of Zerach would without difficulty be called in Hebrew the Ezrahite, the change depending merely on the position of a vowel point. And further, the change is actually made by the Targum Jonathan, which in Kings has "son of Zerach." See EZRAHITE.

(3) The word "son" is used in Hebrew so often to denote a descendant beyond the first generation that no stress can be laid on the "son of Mabul" as compared with the "sons of Zerach." For instance, of the five "sons of Judah" in 1 Chron. iv. 1, the first was really Judah's son, the second his grandson, the third his great grandson, and the fourth and fifth still later descendants. Besides, there is some plausibility in the conjecture that "Bene Mabul" means "sons of the choir" (comp. "daughters of music," Eccles. xii. 4), in which case the men in question were the famous musicians, two of whom are named in the titles to Psalms lxxxviii and lxiii. See MAHAL.

Dar. See THYSTLE.

Daric (דָּרִיכָה, darkemon), or דָּרִיכָה, odarcon, only in plur.; Talm. דָּרְכָה, darkon; Sept. χρυσός; Vulg. solidus, drachma; rendered "drum" (q. v.), Ezra ii. 69; viii. 27; Neh. vii. 70, 71, 72; 1 Chron. xxix. 7, a gold coin (Xenoph. Anab. i. 7, 18; i. 1, 9; vi. 6, 1; Cypor. v. 2; 7; Allian, i. 22; Plutarch, Artax. 22) current in Palestine in the period after the return from Babylon, and used even for the Temple tax (Mishn. Shkeal. ii. 4). That the Hebrew word is, in the Bible, the name of a coin and not of a weight, appears from its similarity to the Greek appellation of the only piece to which it could refer (Lysias in Eratosth. 11; Athen. xiii. 536). The mentions in Ezra and Neh. show that the coin was in use in Palestine under the name of or the corresponding to which the Hebrew and Greek words are only approximations, has been read by Grotefend, in the euniform inscriptions of Persopolis, as Darokus or Darusness (Heeren's Ideen, ii. 880), and by Beer as Dar-bashness (Aeg. Lit. Zeit. 38. 50, No. 5). Herodotus assigns to the name the sense of "bearing, or, according to another reading, îšîqîn, (vi. 98) probably meaning or a little less than that of an Attic mina, and is most probably that of an early didrachm of the Phoenician talent (see Böckh, Metrolog. Untersuch. p. 180). They must have been the common gold pieces of the Persian empire. The oldest that are often seen are referred to an earlier period than about the time of Cyrus, Cambyses, or Darius Hystaspis, and it is more probable that they are not anterior to the reign of Xerxes, or even to that of Artaxerxes Longimanus. There are, however, gold pieces of about the same weight, but of an older style, found about Sardis, which cannot be doubted to be either of Croesus or of an earlier Lydian king, in the former case the Kropo-ctis (eroroxjôs) of the Greeks (Rawlinson, Herod. i. 561). It is therefore probable, as these followed a Persian standard, that darics were struck under Cyrus or his nearer successors. The origin of this coin is attributed by the Greeks to a Darius, supposed by the moderns to be either Darius the Mede or Darius Hystaspis (see schol. ad Aristoph. Eccles. p. 741; Hengstenberg, Asia Minor, ii. p. 51). The Persians derived their distinctive appellation of the coin from this proper name cannot be doubted; but the difference of the Hebrew forms of the former from that of the latter (יוֹדָם renders this a questionable derivation. Genesius suggests the ancient Persian word Durâ (Lat. s. v.), "king," but in (this Theaur. s. v.) inclines to the view that the Hebrew name of the coin and that of Darius. In favor of the derivation from Durâ, it must be noted that the figure borne by these coins is not that of any one king, but of the king of Persia in an abstract sense, and that on the same principle the coins would rather be called regal coins than darics. The silver darics mentioned by Plutarch (Chim. 10) are probably the Persian silver pieces similar in type to the gold darics, but weighing a drachm and a third of the same gold darics.

Darius (Hebrew Daragewâš, דָּרָגֶעַשׁ, Ezra iv. 4; Neh. xii. 22; Dan. ix. 11, 11: Hag. i. 10, 15; ii. 10; Zech. 1. 7; vi. 1; Chald. the same as Zedrâ, 24: v. 5-15; Dan. vi. 31; vi. 1-28; Gr. Δαραγιας, 1 Esdr. ii. 80; iii. 1-8; iv. 47: v. 4, 2, 6, 73; vi. 1, 6, 7, 23, 34; vii. 1, 4, 5; 1 Macc. i. 1; xii. 7; Strabo Ναραγιας, xvi. 7, 6; Ctesias Δαραγιας), the name of several kings of Persia, three of whom are mentioned in the O. T. and the Apocrypha. The original form of the name to which the Hebrew and Greek words are only approximations, has been read by Grotefend, in the euniform inscriptions of Persopolis, as Darokus or Darusness (Heeren's Ideen, ii. 880), and by Beer as Dar-bashness (Aeg. Lit. Zeit. 38. 50, No. 5). Herodotus assigns to the name the sense of îšîqîn, or, according to another reading, îšîqîn, (vi. 98) probably meaning Persian Gold and Silver Darics.—From the British Museum. Actual size.
DARIUS

coeror or conservator. The former accords with holding fast, which is the sense of Dārđā, the modern Persian name of Darius, the latter with the derivation (according to Lassen, Inscr. Pers., p. 139) from Sanscrit drīt, to preserve. (See Gesenius, Thee. Heb. p. 320.) According to Pauly-Wissowa (v. i, 463), "the word does not appear to mean either ιπτερα, 'the worker,' as Herodotus states, or φυγημας, 'the wise,' as Herodotus, or πολεμος, 'the victor,' as the author of the Ethylogiwmion says. The root appears to be the Old Persian dar, 'to hold' or 'possess,' which is dār in Zend, dārī in Sanscrit, and dār in Modern Persian. The remainder of the word is thought to be a mere ascriptive, or appellative suffix, elongated on euphonic grounds, and no very satisfactory account can be given of it." The name occurs both in the Assyrian and Egyptian inscriptions. Cuneiform and Hieroglyphical Forms of "Darius." The title appears to have been the proper name of the son of Hystaspes, who first won it, but was assumed as a throne-name by Ochus (i. e. Darius Nothus), son and successor of Artaxerxes Longimanus (Ctesias, Pers. xviii, 57), in like manner as Artaces, successor of this Darius (ib. lxi, 57) and Bessus (Curt. vi. 6), both took the royal name of "Artaxerxes." (q. v.). See Smith's Dict. of Class. Biog. a. v. See Persia.

1. "Darius the Mede" ( Cyrus II, Dan. xi, 1, Sept. ㄚ Kīrō ; Chal. ㄚ Kīrō, Sept. ㄚ Dārōs ㄚ Mōđō; "the son of Ahasuerus of the seed of the Medes" (ix, 1, Sept. ㄚ Dārōs ㄚ wēz ㄚ αναιwus), who succeeded to ( Cyrus II) the Babylonian kingdom on the death of Belshazzar, being then sixty-two years old (Dan. vii, 81; ix, 1), B.C. 539. Only one year of his reign is mentioned (Dan. ix, 1; xi, 1), but that was of great importance for the Jews. Daniel was advanced by the king to the highest dignity (Dan. vi, 1 sq.), probably in consequence of his former services (compare Dan. vi, 17); and after his miraculous deliverance, Darius decreed an annual enjoining throughout his dominions "reverence for the God of Daniel" (Dan. vi, 25 sq.). See Daniel.

The statement (Dan. vi, 28) that "Daniel prospered in the reign of Darius, and in the reign of Cyrus the Persian," seems to represent him as the immediate predecessor of Cyrus. No Darius occupying this place, nor indeed any Darius anterior to the son of Hystaspes, is found either in profane history or (hitherto) on monuments. See Ahaseurus. Only the Scholiast on Aristoph. (Eccl. 602), followed by Suidas (v. ㄚ Dārās), and Harpocrat, says that the daric took its name from "another Darius, earlier than the father of Xerxes" (D. Hystaspes). Herodotus and Ctesias, differing widely on other respects, agree in making Astyages 1st king of the Median dynasty, with no male heir, conquered and deposed by Cyrus, first king of the Medo-Persian dynasty at Babylon. Xenophon, however, in the Cyropædia (1, 5, 5) introduces, as son and successor of Astyages, and uncle (mother's brother) of Cyrus, a second Cyrus, acting under whose orders Cyrus, Artaxerxes Mou, and his marriage with his daughter, unnamed, with Media as her portion. Josephus (Ant. x, 11, 1) clearly means the Cyaxares II of Xenophon when he says that "Darius was the son of Astyages, but known to the Greeks by a different name," and the statement of Aben Ezra, who reports from a book of the kings of Persia, that the king Darius was Cyrus' father-in-law, probably rests at last on the supposed authority of Xenophon. See Cyrus.

Darius. Under these circumstances, the extreme obscurity of the Babylonian annals has given occasion to three different hypotheses as to the name under which Darius the Mede is known in history.

1. The first of these, which identifies him with Darius Hystaspis, rests on no plausible evidence, and may be dismissed at once (Lange's, Dan. p. 219 sq.). See below, No. 2.

2. Another identification is that maintained by Marcus von Niebuhr (Gesch. Ass. u. Bab. p. 45), by which Darius is represented as the personal name of "Astyages," the last king of the Medes. It is contended that the name "Astyages" was national and not personal, and that Astyages represents the Mede called Cyrus, borne by the father of "Astyages" (Tob. xvi, 15). On the contrary, however, Ahaseurus (Heb. Achashweroosh) is Xerxes (cuneiform Klyxalrkh), and not Kvaszaph (cuneiform Ukwasalatka). The description of the unnamed king in Xerxes (Perse. 789 sq.) as one whose "feelings were guided by wisdom," is moreover assumed, on this view, to be applicable to the Darius of Scripture and the Astyages of Herodotus. Assuming the immediate fulfilment of the announcement of Dan. v, 28, in the catastrophe of vi, 1, Niebuhr (ib. p. 91 sq.) determines that Belshazzar is Evil-merodach, son and successor of Nebuchadnezzar; that, on his death (slain by Nergal, or his sister's husband), B.C. 559, Astyages, who is Daniel's Darius the Mede, reigned one year at Babylon, which year in the Canon is 1 Neriglissar; in the following year he was conquered by Cyrus, B.C. 558, in exact accordance with the apparent incompleteness of the political arrangements which Darius "purposed" to make (Dan. vi, 8, 1732). For the short duration of his supreme power may have caused his division of the empire (Dan. vii, 1)—a work congenial to his character—to fall into abeyance, so that it was not carried out till the time of his name-sake Darius Hystaspis: a supposition that may go for what it is worth. Daniel himself passed from the service of Darius to that of Cyrus, and did not again return to Babylon; so Dan. vi, 28 is explained. The mention, Dan. vii, 1, of the Medes and Persians makes a difficulty—not as Von Niebuhr puts it, because Evil-merodach has but two years in the Canon, for the actual reign may very well have reached its third year, but from the mention of Susa as the scene of the vision; for Susa, being Median, was not subject to any Chaldean king. The explanation gravely proposed by Niebuhr, that the Medes and Persians, at the time of the vision of Darius the Mede, continued to date by years of Belshazzar's reign, and this though he is related to have been present in Babylon the night in which Belshazzar was slain. The difficulty is not confined to Niebuhr's scheme: Belshazzar, whoever he was, was a Chaldean; and the explanation may be, that the prophet is at Susa, not in bodily presence, but transported in spirit to the city which was to be the metropolis of the Persian monarchy, the fate of which, under the emblem of the ram, is portrayed in the ensuing vision. See Daniel. After the fall of this Darius Astyages, Babylon regained its independence under Nabonned, to fall finally under the arms of Cyrus, B.C. 538. See Babylon.

The chronological difficulties which have been raised (Rawlinson, Herodotus, i, 83) against the identification of Darius with Astyages on the assumption that the events in Dan. v relate to the taking of Babylon by Cyrus (B.C. 539) have been removed by the supposition that after retaining the throne at seven years of age, are indeed set aside by the view of Niebuhr; but it is clogged with other objections (in addition to those already alluded to), which render it as untenable as it is ingenious and intricate, to say nothing of the fact that it is made up of a series of assumptions throughout. In the place, the supposition that Belshazzar was Evil-merodach is inadmissible; for it is now pretty well deter-
mined that he was the son of Nabonned, the actually last king of the Babylonian line. See Belshazzar.

Secondly, this hypothesis sets up a Medo-Persian prince at Babylon during the very time assigned by well-approved history to a native sovereign, and even then leaves a blank of eighteen years between him and Cyrus, whom Daniel's history and prophecies evi-
dently regard as the last king of Media.

8. There remains, therefore, but one other view, which was adopted by Josephus (Ant. x, 11, 4), and has been supported by many recent critics (Bertholdt, von Lengerke, Hävernick, Hengstenberg, Aubelen, and others). According to this, the "Darius" in question is the successor of Astyages, who is commonly regarded as the last king of Media. It is supposed that the reign of this Cyaxares has been neglected by historians from the fact that through his indolence and luxury he yielded the real exercise of power to his nephew Cyrus, who married his daughter, and so after his death received the crown by direct succession (Xen. Cyrop. l, 5, 2; iv, 5, 8; viii, 6, 19). It is true that the only direct evidence for the existence of a second Cyaxares is that of Xenophon's pedagogic romance. The title "Cyaxares," which has been quoted from an inscription (Aubelen, Daniel u. d. Obrifbrung, p. 18), is either a name non-loci (Diels, dervoerbr. Gesch. Ast. u. Bab. p. 514, n. 4); and the passage of Hecataius (Per. p. 786) is not very consistent with the character assigned to Cyaxares II. On the other hand, Herodotus expressly states that "Astyages" was the last king of the Medes, that he was conquered by Cyrus, and that he died without leaving any male issue (Herod. l, 73, 100, 127 sqq.); and Cyrus appears as the immediate successor of "Astyages" in the Chronicle of Eusebius (Chron. ad Ol. 54; Synec. p. 188; comp. Bel and Dragon, i). These objections, however, are not insuperable, and must give way before the manifest exigencies of the case (see Bertholdt's able exposition on the subject in his Commentar zu Dom.). We may add that an important chronological difficulty is best adjusted by assuming the existence and reign of this Cyaxares (Clinton's Fasti Hellenicæ, p. 301 sqq.). See Cyaxares.

2. "Darius, king of Persis," in whose second year the temple was resumed, and completed in his sixth (Ezra iv, 5, 24; vi, 15), under the prophecying of Haggai and Zechariah, is understood by most writers, ancient and modern, to be Darius son of Hystaspes, whose reign in the Canon extends from B.C. 521 to 465. Scaliger, however, makes him Darius Nothus (B.C. 497-465), a second of late Dr. Mill (The Evangelical Ac-
counts of the Birth and Parentage of our Saviour, etc., 1842, p. 163-165), who refers for further arguments to Hottinger (Pentas Dissertationum, p. 107-114).

Before we examine the grounds on which this conclusion rests, it will be convenient to consider the difficulties with which it is attended.

Zerubbabel, son of Shealtiel, as prince of the house of David, and Jeshua, son of Josedak, as high-priest, headed the first colony of exiles from Babylon in the first year of Cyrus (Ezra iii. 2), at which time neither can have been less than twenty years old. By these same twain the work of rebuilding the Temple was resumed and completed after its suspension. Now from the first year of Cyrus, in the Biblical reckoning (B.C. 538), to the second of Darius Nothus (B.C. 428), are 113 years; so that, if he be the Darius of this history, both Zerubbabel and Jeshua must have then reached the age of 180 years at least. This is incred-
ible; and as Scaliger said, it is "absurdly incredible, both from the history and the contemporary prophets as to a fact so extraordinary. Moreover, that the work of rebuilding the Temple should have been abandoned for a century and more is scarcely conceivable. Its suspension during fifteen or sixteen years is sufficient-
ly accounted for by the history and the representations of the prophets. The adversaries weakened the hands of the people of Judah, and troubled them in building, and hired counsellors against them to frustrate their purpose all the days of Cyrus, even until the reign of Darius'" (Ezra iv, 4, 5). Besides mole-
station: the builders in their work, they prevailed by their machinations, by the prattle of the Astartes, by the carelessness of their viceroy, to bring it to a stand-still, by interposing official obstacles, stopping the grants from the royal treas-
ury (vi, 4), and the supply of materials from the forest and the quarry (iii, 7). So the people were dis-
couraged: they said, "The time is not come for the house of the Lord's building. Consider the state of their own houses and the tilling of their lands (Hagg. i, 8). This is intelligible on the supposi-
tion of an interval of fifteen or sixteen years, during which, there having been no decree issued to stop it, the work was nominally in progress, only deferred, as the builders could allege at the time of its resumption, "Since that time (20 of Cyrus) even until now, hath it been in building, and yet it is not finished!" (Ezra v, 16). But in no sense could the Temple be said to have "been in building" through the entire reigns of Cambyses, Darius, Xerxes, and Artaxerxes I: there is no testimony to the fact, nor any means of accounting for it. Against the same fathers are "the residue of the people" who came from Babyl-
ion with Zerubbabel and Jeshua, some of whom had seen the first house in its glory (ii, 2, 8), i.e. who might be some 80 years old on the usual view, but on the other must have been 170 at the least. The prophet further admonishes his countrymen that the blights, droughts, and mildews which year by year disappoointed their labors in the fields were the chastisement of their want of faith in letting the house of God lie waste, while they dwelt in their "celled houses" (i, 4-17): so long as they had been guilty of this neglect, so long had they been visited with this punishment. On the one supposition, this state of things had lasted from twelve to fifteen years at most; on the other, we are required to imagine that the curve had been on the land for three successive generations, an entire century. Lastly, in the same second year of Darius, Zechariah distinctly intimates what length of time had elapsed since the destruction of the Temple—"threescore and ten years" (i, 12). So in vii, 5, mention is made of a period of 70 years, during which the people had "fasted and mourned in the fifth and seventh month." The events commemorated by those fasts were the destruction of the Temple in the fifth, and the order of Gershon and the sixth month of the same year. From that year to the dedication of Darius I are almost, if not exactly, 70 years. To the corresponding year of Darius II the interval is more than 100 years, and the mention of "those 70 years" is quite unintelligible, if that be the epoch of Zechariah's prophecying. Certainly, if the prophecies of Haggai and Zechariah, and the first five chapters of Ezra, are worth anything as testimony, "the second year of Darius" must lie within one generation from the decree of Cyrus, and not more than 70 years from the destruction of the first Temple.

The reasons alleged on the other side may be thus stated: 1. In Ezra iv, between the edict of Cyrus for the return of the exiles and rebuilding of the Temple, and that of Darius for the completion of the work after its discontinuance, two Persian kings are named, A-
hashverosh and Artacheshasheth, "which the names on the Zendic monuments will not permit us to apply to other kings than Xerxes and his son" (Dr. Mill, u. s. 156, note). See also Scaliger's sile-
ce, that of the history and the contemporary prophets as to a fact so extraordinary. Moreover, that the work of rebuilding the Temple should have been abandoned for a century and more is scarcely conceivable. Its suspension during fifteen or sixteen years is sufficient-
supposed to be Cambyses and the importor Smerdis, whom Justin (i, 9) calls Oroepas, Ctesias (de reb. Pers. 10) Sphendates, who reigned under the name of Cambyses' brother Tanyeres (see Ewangel. Græc. de V. J., i, 81 and 118). But nowhere on monuments is Cambyses called Kha,ya rya, or Smerdis Ar- takasahsa; the former is constantly Kabujula (Pars.), Kambudiya (Bab.), Kemath (hiero-gl.); the latter, Bart'nya (Pars.), Bardisla (Bab.). Moreover, as Ar- takasahsa (or —shaht) elsewhere in Ezra and Neh, is contrasted with Artaxerxes, and it seems almost of a doubt that Achashveresh in Esther is Xerxes, it would be strange if these two names were here applied to other quite different kings.

The true explanation of this difficulty, proposed long ago by Mr. Howes, and adopted by Dr. Hales, has been recently put forward by Bertheau (in the Kurzgefaßt. exeget. Hebr., on Ezra, Neh., and Esther, 1862, p. 69-73). This writer had formerly upheld the more usual view (Beiträge zu d. Gesch. d. Ir, p. 886); so had Vahlinger (in the Studia u. Kritiken, 1854, p. 124), who (6, 1857, p. 87) abandon it for the other. (See C. F. Keil, The Gesch. d. Griech. v. d. Venet. u. d. Krit. 1858, p. 524, and Bunsen, Bibelwerk.) It is clear that, as in iv, 24, the narrative returns to the point at which it stood in verse 5; in the interposed portion it either goes back to times before Darius, for the purpose of supplying omitted matter, or goes forward to record the successful machinations of the people of the land under the various kings, Xerxes and Artaxerxes. But nothing in the contents of ver. 6-23 intimates a reverting to an earlier time. After reading of Darius we naturally take for granted that Ahaseurus and Artaxerxes are later than he. It appears that the adversaries had succeeded in hindering the building of the Temple till the second year of Darius. In the be- ginning of the next reign (Xerxes) they "wrote an accusation," the purport and issue of which are not re- corded. In the following reign mention is made of another letter addressed to Artaxerxes, its contents not specified; but a second letter to the same king is given in extenso, together with the royal rescript. It is represented to the king that the Jews are building the city, and have "set up the walls thereof, and joined (excavated) the foundations." The rescript orders that this work be made to cease. Not a word is said of the Temple. It may indeed be alleged that the "walls are part of it, intended for its defence; but with the Temple the work has not been attempted by the king. But it is certain that at some time between the 7th and the 39th year of Artaxerxes some great reverse befell the colonists, in consequence of which the wall of Jerusalem was taken down, and the gate thereof burned with fire," Neh. i, 3 (for it is absurd to imagine that this can relate to the destruction inflicted by Nebuchadnezzar a hun- dred and forty years before), and the documents under consideration show what that reverse was. It was the result of that rescript of Artaxerxes, in virtue of which "Rehum and Shimshai and their companions went up to Jerusalem to the Jews," and made them to cease from building the city (ver. 21), not from building the Temple, which was finished long before. So far, all is plain and consistent. But at ver. 24, with the word...
DARIUS

Havernick, Handb. der Einlei., in das A. T. II, 1, 266; Herzfeld, Gesch. des V. J. von der Zerstörung des ersten Tempels u. 1, 579; Keil, Apologie. Vernachl. über die Bäu-
cher der Perser, in: Jahrb. der P. W. 1838, p. 97. See also: Ewald, Gesch. des V. J. I, 219, note, makes Shechaniah son of Hananiah and father of Shemaiah, so that Hattush is fourth from Zerubbabel; and so Bertheau in the Kgl. exequt. Hdb. on 1 Chron. III, 2, which view is consistent with the usual chronology, as of course it is quite possible that a grandson of Zerubbabel may have been adult at the time of Ezra's mission, eighty years after the 1st of Cyrus. See, however, a different explanation in Strong's H. & E. pos. of the Gospels, p. 17, note.) See ZERUBBAEL. So, in
fact, the Hattush who accompanied Ezra is described (according to a reading, propounded by the passage, viii, 2, 8), 'of the sons of David, Hattush, of the sons of Shechaniah;' for the last clause is out of place as preixed to the following enumeration 'of the sons of Parosh,' etc. So the Sept. read it (ἀντωνία διὰ του 
Δαβίδ, Ἀρρασίων ἵνα ἴχνον τοῦ Σαμαρίαν) and the apocryphal version more plainly still (1 Esdr. viii, 29, το ἴχνον τοῦ 
Δαβίδ, Αρρασίων ὁ ἤρετος Σαμαρίαν). But still more probably a different Hattush (q.v.) is meant.

5. The concluding argument on the same side is derived from the 'circumstance that in the next ascent from Babylon after that of Ezra, and in the same reign, the principal opponent of Nehemiah in his work of rebuilding the wall was a son of Hattush [Saunbulat] who can be demonstrated to have continued an active chief of the Samaritans till the time of Alexander the Great, and to have then founded the temple on Mount Gerizim, Joseph. Ant. xi, 8, 2-4 (Dr. Mill, u. a.). Josephus's story is that Saunbulat, satrap in Samaria of Darius III, had given his daughter in marriage to a brother of the high-priest Jaddua, named Manasses, who, refusing to put her away, took refuge with his father-in-law, and became the first high-priest of the rival temple built on Mount Gerizim by permission of Alexander, and then engaged in the siege of Tyre. All this, with perhaps the merveilleux romance that follows about Alexander's reception by the high-priest Jaddua, needs a better voucher than Josephus before it can be accepted as history. The story about Manasses and Saunbulat is clearly derived from the last recorded act of Nehemiah, his expulsion of a son of Jochai, and grandson of the then high-priest Eliahith, who was coming to dwell to Saunbulat on the other side. It is remarkable that Josephus, in his account of Nehem-
iah, makes no mention of this act, and does not even name Saunbulat: the reason of which may be that, after referring the mission of Nehemiah, as also of Ezra, to the reign of Xerxes, to extend the life of this active chief of the Samaritans from that time to the time of Alexander, full 180 years later, would have been too absurd. See SAUNBULAT. So is the assump-
tion of Petermann (e. v., "Samar.,” in Herzog's Real-Encylo. xll, I, 867) that there were two Sa-
balata, one contemporary with Nehemiah, the other with Alexander, and that both had dau. sons married into the family of the high-priest (Jaddua and Jada-
du), whose husbands were therefore expelled. As to Jaddua, the fact may be, as Josephus represents it, that he was still high-priest in the time of Alexander. The six who are named in lineal succession in Neh. xii, 10, 11; Jeshua, Joil, kim, Eliahith, Jola, Johannan, and Jaddua, will fill up the interval of 200 years from Cyrus to Alexander. Of these, Eliahith was still high-priest in the thirty-second year of Nehemiah's Artachasahast, and later (xii, 6, 28); it is scarcely possible that this could be Artaxerxes Mnaemon, whose thirty-second year is removed from the first of Cyrus by more than 70 years, which is far too much for a succession of three high-priests. It does not follow from the mention of the successors of Eliahith down to Jaddua in xii, 10, 30, that Nehemiah lived to see any of them in the office of high-priest, but only that these genealogies and lists were brought down to his own times by the compiler or last redactor of this book (see under No. 8 below). See NA-
HUM-Daron.

6. DARIUS HYSPATRIS (i. e. son of Hystaspes or Vash-
tapas), the fifth in descent from Achemenidas, the found-
er of the Perso-Arian dynasty, or ninth in the succe-
sion of the Achemenids (comp. Herod. vii, 11), as he
styles himself In the Bishaitum (q. v.) Inscription (Raw-
linon, Herod. ii, 491), being third descendant from the younger brother of Cambyses, father of Cyrus, Darius, according to the popular legend (Herod. i, 284, 210), already marked out for empire during the reign of Cyrus. Cambyses having died without issue, and no other son of Cyrus surviving, Darius was hereditary successor to the throne, to which, as Herodotus relates, he was elected on the death of the pretended Smerdis by his fellow-conspirators. In the Canon, the date of his succession is B.C. 551, and the length of his reign 46 years, both points confirmed by Herod-
otus (vii, 1-4), according to whom he died five years after the battle of Marathon (therefore B.C. 486), after a reign of thirty-six years (also attested by an Egypt-
ian inscription, Belzoni, Mon. Arch. ii, 164). He devoted himself to the internal organization of his kingdom, which had been impended by the wars of Cyrus and Cambyses, and the confusion of the reign of Smerdis. His designs of foreign conquest were interrupted by a revolt of the Babylonians, under a pretender who bore the royal name of Nabakudrassar (Naboniadius, Gesch. Assy. u. Bab. p. 94), which was at length put down, and punished with great severity (B.C. cir. 516). After the subjugation of Babylon, Darius turned his arms against Scythia, Litya (Herod. iv, 145 sq.), and India (Herod. iv, 45). Thrace and Macedonia acknowledged his supremacy, and some of the islands of the Aegean were added to his dominion in Asia Minor and the seaboard of Thrace (B.C. 515-
506). Shortly afterwards he came into collision with Greece, and the defeat of Marathon (B.C. 490) only roused him to prepare vigorously for that decisive struggle with the West which was now inevitable. His plans were again thwarted by rebellion. Domes-
tical quarrels (Herod. vii, 2) followed on the rising in Egypt, and he died (B.C. 486) before his preparations were completed (Herod. vii, 4).

With regard to the Jews, Darius Hystaspis pursued the same policy as Cyrus, and restored to them the privileges which they had lost. For the usurpation of Smerdis is a religious as well as a political revolution, and the restorer of the Magian faith will-
ingly listened to the enemies of a people who had wel-
comed Cyrus as their deliverer (Ezra iv, 17 sq.) But in the second year of Darius, B.C. 520, as soon as his power had assumed some solidity, Haggai (Hag. i, 1; ii, 1, 10) and Zechariah encouraged their countrymen to resume the work of restoration (Ezra v, 1 sq.), and when their proceedings came to the king's knowledge he confirmed the decree of Cyrus by a new edict, and the Temple was finished in four years (B.C. 516; Ezra vi, 10), though it was apparently used earlier at that time (Zech. vii, 2, 8). The benefit consequent upon the Jews are not mentioned in his inscriptions. Of the satrapies, twenty in number, into which he formed the empire, Palestine would be part of the fourth, including Syria, Israel, and Cyprus. The fourth king of Persia, who should "be far richer than they all, and by his strength, through his riches, should poise all against their cheek in the realm of all," which was (at 520), may be Darius, if the pseudo-Smerdis is reckoned, but the description better suits Xerxes (see Hittig in the Kgl. exequt. Hdb. in loc.).

3. "Darius the Persian" (Σαραχθωνια, Sept. Δαριας ο πουργος) occurs (Neh. xii, 22) in a passage which merely states that the succession of priests was regis-
tered up to his reign. The question as to the person...
DARKEMON 680

DARKNESS

here intended bears chiefly on the authorship of the passage. It may be briefly stated thus: If, as is more commonly believed, this king be Darius Nothus (originally Ochus), who came to the throne in B.C. 424, and reigned nineteen years, we must (assuming that the Jaddus here mentioned is the high-priest who went out to meet Alexander the Great [q. v.] on his entry into Jerusalem, Josephus, Ant. xvi. 6, 8) conceive either that Jaddus reached an age exceeding a century—for so long must he have lived, if he was already high-priest in the reign of Darius Nothus, and saw Alexander's entry; or that the Jaddus of Nehemiah and of Josephus are not the same person. Carpaeus has tried to prove that the Jaddus of ver. 22 was a Levite, and not the high-priest (Introduct. ad Libr. Vet. Test. p. 341). See JADDUS. If, however, the register was continued to a later time, as is not improbable, the occurrence of the name Jaddus (ver. 11, 22), who was high-priest at the time of the invasion of Alexander (q. v.), points to Darius III Codomannus, the antagonist of Alexander, and last king of Persia, B.C. 380-330 (1 Macc. i. 1). Compare Jahn, Archvii. ii, i, 272 sqq.; Kell, Lehrb. d. Einleit. § 155, 7, who defends at length the integrity of the passage. On this latter view, we must either assume that Nehemiah himself attained the age of 130 years at the time of his passage, or that his age was exaggerated by a later hand (Bertholdt, Einleit. iii, 1081). Perhaps the meaning of the verses in question only is, that the priests enumerated were those included in the genealogical records down to the time of the return from Babylon, I.e. as finally made out by Nehemiah and Ezra (ver. 26); and therefore containing those prospectively high-priests, although at the time but children. Supposing that Jaddus was five years of age at the time of the closing of the O.T. canon [see Ezr], in B.C. 406 (to which date Nehemiah undoubtedly lived), he would have been but about fifty years old on his accession as high-priest (q. v.), B.C. cfr. 560. Thus the register referred to in Neh. xii. 22, would date from a later time than the time of the Passover, the moon was at the full. This darkness may therefore be ascribed to an extraordinary and preternatural obscuration of the solar light, which might precede and accompany the earthquake that took place on the same occasion; for it has been noticed that often before an earthquake such a mist arises from sulphurous vapors as to occasion a darkness almost nocturnal (see the authors cited in a. A. of Matt. xxiv. 29, and compare Joel iii, 8; Rev. vi. 12 sqq.). See EARTHQUAKE. Such a darkness might extend over Judea, or that division of Palestine in which Jerusalem stood, to which the best authorities assign that name, as in some of the older manuscripts, it is necessary to limit the phrase πλοῦτος τοῦ γῆς, rendered "all the land." In the Acts of Pilate (q. v.), which have been quoted by Justin Martyr and Tertullian, we find the following document, in which this preternatural darkness is referred to. See ECLIPSE.

Darius II was named Ochus (Ochoc), but on his accession he was distinguished by the epithet Nurus (Nurus), from his being one of the seventeen illegitimates of Croesus I or Codomannus, who made him satrap of Hyrcania. He rebelled against Sogdianus, another brother, who had murdered their father, and, with the aid of several of the provincial satraps, succeeded in gaining supreme power, putting the usurper to death. He was a weak prince, completely under the control of his favorites, and especially of his wife Parysatis; and his reign was distinguished by continual insurrections, particularly that of the Egyptians, who succeeded in gaining for a while their independence (B.C. 414). Darius died in B.C. 405-4, and was succeeded by his older son Artaxerxes II (Cresilas, Pers. xiv. 1-13; Diod. Sic. xii. 72; xiii. 86, 70, 108; Xenoph. Hell. ii. 2; l. 8; Aesop. l. 1, 1). See CREATION.

Darkness. See DARC.

Darkness (properly ἃμμος, či šekh; σκοτος), the absence of light; the state of chaos as represented by the sacred writer in Genesis 1. See CREATION.

The plague of darkness in Egypt (Ex. vii. 21) was one so thick and intense as to seem almost palpable. The "palpable obscure" of Milton appears to express the idea in a forcible manner. The Tamil translation gives "darkness which causeth to feel," or so dark that a man is obliged to feel his way, and until he shall have so felt he cannot proceed. Some expositors are disposed to contend for the literal palpableness of this darkness by supposing that the agency employed was a wind, densely filling the air with particles of dust and sand. Such winds are not unknown in the Eastern deserts, and they are always very ap-
DARKON

connected with the coming of the Lord has reference to the judgments attendant on his advent. Darkness is often used symbolically in the Scriptures as opposed to light, which is the symbol of joy and safety, to express misery and adversity (Job xviii, 6; Ps. cvii, 10; caulis, 11; Isa. vii, 22; 1 x, 11; lxx, 9, 10; Ezek. xxx, 18; xxi, 7, 15; xxxix, 12); hence also captivity (Isa. xlvii, 5; Lam. iii, 6). 'He ... that marketh the morning darkness,' in Amos iv, 13, is supposed to be an allusion to the dense black clouds and mist attending earthquakes. 'The day of darkness' in Joel ii, 2, alludes to the obscurity occasioned by the flight of locusts in compact masses. See Locus.

In Ezek. xii, darkness is described as the accompaniment of his departure. The darkness of the evening, moon, and stars is used figuratively to denote a general darkness or deficiency in the government or body politic (Isa. xiii, 10; Ezek. xxxii, 7; Joel ii, 8-10).

In Eph. v, 11, the expression 'works of darkness' is applied to the heathen mysteries on account of the impure actions which the initiated performed in them. 'Outer darkness' in Matt. xii, 12, and elsewhere, refers to the darkness outside, in the streets or open country, as contrasted with the blaze of cheerful light in the house, especially when a convivial party is held in the night time. It may be observed that the streets in the East are utterly dark after noon, and that, except for showing thievery, there is nothing to light the way. Nor can even public or private lamps to impart to them the light and cheerfulness to which we are accustomed. This gives the more force to the contrast of the 'outer darkness' with the inner light. Darkness is used to represent the state of the dead (Job x, 21; xvii, 15). It is also employed as the proper and significant emblem of ignorance (Isa. ix, 2; lx, 2; Matt. vi, 23; John iii, 9; 2 Cor. iv, 1-6).

DARKON (Heb. Dar'kon), [Josh. v, 7]; according to Gesenius, strever; according to Fürst, porter; Sept. Δαρκών, Δαρκών; Vulg. Deron, a person whose 'children' or descendants were among 'Solomon's servants' that returned from Babylon with Zerubbabel (Ezra ii, 66; Neh. vii, 56). B.C. ante 586.

Darling (§§), yacht (I, only, hence beloved) stands (Psa. xxii, 21; xxxv, 17) for life (as a thing not to be replaced); hence self (like ψεύδω, soul; comp. "dear one").

DAROM (דָּאוֹר), Sept. לַיְיוֹן, and דָּאוֹרְיוֹ). This word is generally used in Scripture to denote the "south" (Ezk. xi, 24; Job xxxvii, 17). Its meaning in the name Dalor in Scripture, is doubtless irrelevant. Naphthali says, "Possesses thou the sea and Darom, the A.V. renders it the west and the south; the Seuhtugint, δαλοσαναν και λφα; the old Latin, "mare et Africam;" and the Vulgate, "mare et meridiem." The territory of Naphthali lay on the north-east of Palestine. It did not touch or go near the Mediterranean; consequently the "sea" and the Mediterranean. The sea of Galilee is doubtless referred to, the whole western shore of which belonged to Naphthali. The Seuhtugint rendering of Darom in this passage (יאֶּל, i.e. Africa) must be wrong. Naphthali never had any connection with Africa, or with that region on its northern frontier afterwards called Darom. The word seems here to denote a district near Tiberias, and probably the sunny plain of Gennesaret, which surpassed all the rest of Palestine in fertility (Joseph. War, iii, 10, 8). With this agrees the probable etymology of the word, which, according to Gesenius, signifies breadth; hence the Pois. 1 Darom.

In Ezek. xx, 46 (xxi, 2), Darom appears to be a proper name. "Son of man, set thy face towards Teman, and drop the word towards Darom." The A. V. translates both words "south," but the Seuhtugint more correctly גָּדוֹלָס and דָּאוֹרְיוֹ. Instead of דָּאוֹרְיוֹ Symmachus gives אֶלְיוֹ. We learn from Jerome and other ancient writers, that the plain which lies along the southern border of Palestine and extends towards Egypt was formerly called Darom. Thus, Jerome says, Dama "is a large village in Darom—that is, in the south country in the region of Kleutheropolis, several tens of miles distant from that city" (Onomast. a. v. Darom); and Eusebius describes Gerar as situated "in the territory of Darum." Darum is supposed to be an allusion to the dense black clouds and mist attending earthquakes. 'The day of darkness' in Joel ii, 2, alludes to the obscurity occasioned by the flight of locusts in compact masses. See Locus.

In Ezek. xii, darkness is described as the accompaniment of his departure. The darkness of the evening, moon, and stars is used figuratively to denote a general darkness or deficiency in the government or body politic (Isa. xiii, 10; Ezek. xxxii, 7; Joel ii, 8-10). In Eph. v, 11, the expression 'works of darkness' is applied to the heathen mysteries on account of the impure actions which the initiated performed in them. 'Outer darkness' in Matt. xii, 12, and elsewhere, refers to the darkness outside, in the streets or open country, as contrasted with the blaze of cheerful light in the house, especially when a convivial party is held in the night time. It may be observed that the streets in the East are utterly dark after noon, and that, except for showing thievery, there is nothing to light the way. Nor can even public or private lamps to impart to them the light and cheerfulness to which we are accustomed. This gives the more force to the contrast of the 'outer darkness' with the inner light. Darkness is used to represent the state of the dead (Job x, 21; xvii, 15). It is also employed as the proper and significant emblem of ignorance (Isa. ix, 2; lx, 2; Matt. vi, 23; John iii, 9; 2 Cor. iv, 1-6).

Dart (in Prov. vii, 23, "κίτα, an arrow, as elsewhere, in Job xlii, 26, "μασαρ, an arrow; in 2 Sam. xviii, 14, μασαρ, she bet, a rod or staff, as elsewhere, in 2 Chron. xxxi, 5, τοκός, sheuck, any missile weapon; in Job xxxi, 29, μασαρ, bozach, a bladeopon; in the New. Test. Μασίας, Eph. vi, 16, or μασία, Heb. xv, 20, a javelin, an instrument of war"), s. n. arrow or light spear. It is thought that the Hebrews were in the habit of discharging darts from the bow while on fire. These fiery darts were made of the shrub rotemh or Spanish broom (the Sporium junceum of Linn.), which grows abundantly in the Arabian desert. It is uncertain in reference to the Hebrews whether these arrows are sometimes compared to lightnings (Deut. xxxiii, 23, 42; Psa. vii, 13; xxxv, 4; Zech. ix, 14). The fiery darts among the Romans, according to Ammianus Marcellinus, consisted of a hollow reed, to the lower part of which, under the point or barb, was fastened a round receptacle, made of iron, for combustible materials, so that such an arrow had the form of a distaff. This was filled with burning naphtha, and when the arrow or dart was shot from a slack bow (for if discharged from a tight bow the fire went out) it struck the enemies' ranks and remained fixed, the flame consuming whatever it met with; water poured on it increased its force, and there were powders that would not extinguish it but by throwing earth upon it. Similar darts or arrows, which were twined round with tar and pitch and set fire to, are described by Livy as having been made use of by the inhabitants of the city of Saguntum when besieged by the Romans (Hist. xx, 9). The apostle alludes to these fiery darts in Eph. vi, 11-16. See Armor.

DATARIUS (daturay), a chamberlain in the papal court. His title is derived from datum, usually prefixed to the date of the documents issued (e. g. datum, gives, August 20). He is always a prelate, and sometimes a cardinal, and receives his name from his office, which is to date certain petitions for benefices that have been presented and registered: he writes upon them Datum Rome opus, etc. He has the liberty of granting without acquiring the pope therewith, all benefices which do not produce upwards of twenty-four ducats annually; for such as amount to more he is obliged to get the provisions signed by the pope, who admits him to audience every day. If there be several candidates for the same benefice, he has the liberty of bestowing it on any whom he may select. His salary is two thousand crowns, exclusive of perquisites. When the pope's consent has been obtained, the datary subscribes the petition with the words Aumum sanctissi-
The fruit (Talm. פּוּטָן, Surenhusius, Мишнэна, ii, 253; vi, 91), which comes to maturity in about five months (August and September, or October), hangs in clusters (Cant. vii, 7) together, in form like the acorn, but mostly larger, and with a fine ruddy (Diod. Sic. 27). The fruits are sometimes used in a fresh state (Heliod. Αἰλ. ii, 28; comp. Hasselquist, p. 540) as a very common article of food (Burckhardt, Arab. p. 45, 575; Harmer, iii, 415), sometimes dried as a desert-fruit (Xenoph. Αραμ. ii, 8, 15), and sometimes their juice was pressed out (comp. Jonathan's Targum on Deut. viii, 8), which, as date-wine (ὄλευς φωσικός), was made use of from ancient times (Herod. i, 138; iii, 66; Xenoph. Αραμ. ii, 8, 14; Pliny, xiii, 9, xiv, 19; Philost. Apol. ii, 6, 1; Athen. xiv, 653; Strabo, xvi, p. 742; Dioscor. v, 40; Wilkinson, iii, 174 sq.), or occasionally boiled down into a kind of palm-honey (Targ. Jon. and Jeruz. on Deut. viii, 8; Strabo, xii, 742; Pliny, xiii, 9, 11; Ammian. Marcell. xxiii, 10; Josephus, War, iv, 8, 3; Shaw, p. 128; Heeren, Ιδεμ, i, ii, 46). See Wine. Honey. The dates (καρπός, δοκεωμεθαίνω) left by this last operation of squeezing, being still further subjected to the action of hot water, and thus macerated, are made into an inferior but palatable wine. The ripe dates are also at the present day pressed into large, firm, caky masses, which serve the travellers in caravans as a satisfying and refreshing aliment (Sonnini, ii, 26; Burckhardt, Arab. p. 45).
This is the form, similar to that of raisins or figs, in which they appear in modern commerce. From the twigs (ribs of the leaves) baskets are made (Mishna, Chel. 1:16, 22). The vine-twig is a tender-ware, whose fibres are twisted into ropes and thread, but the leaves themselves are manufactured into baskets, mats, and brooms (Horace, Sat. ii, 4, 68; Mishna, Ohaz. 1:9; Pococke, East, i, 306; Doblin, Wanderer, ii, 194: hence the palm-twigs were called καλλινωτρας or καλλινωτρας; compare with the papyruses in papyri). In accordance, in Cant. viii. 6, by צלפין, we should to understand the crown of the palm-acacias used for the clothing. Jerome, Opp. ii, 10; they are now made into fans). The Jews employed palm-branches on the Feast of Tabernacles (Lev. xxiii. 40; Neh. viii. 15; like the Egyptians in honor of Osiris, Minutolli, p. 16); and on festive occasions they carried the palm. Before princes and distinguished personages, and waved them in token of joy and triumph (Rev. vii. 9; comp. Virgil, Georg. ii, 47; Aen. vi, 111; Flutarch, Sympos. viii, 4, 1: I Macc. xiii, 61; John xii, 13; Philo, Opp. i, 101; Minutoli, Trans. tab. 18). Even the kernels of the dates are made use of at the present day as fodder for the burchardhars or burchardhars, A. (p. 59). The seed of the male tree, which sheds a fragrant odor, is greedily eaten by the modern Arabs (Welssted, i, 200). The wort is very sappy, but it lasts pretty well as building material for inside beams (Xenophon, Cyrop. vii, 5, 11; Strabo, xvi, 781; xvi, 738; xvii, 822). See generally Georg. Plaut. fo. 6 (Sprengel, Erstd. ii, 73 sq.); Plut. xiii, 6 sqq.; Descr. de l’Egypte, xii, 108 sqq.; Celsius, ii, 445 sqq.; Oken, Lehrb. d. Botanik, ii, 1108 sqq.; See Palkart.

De’athan (Heb. De’athan, דֶּאָתָן, spelled, q. d. Fontanus; Sept. Δαὴθος; Joseph. Δαὴθομος, Ant. iv, 2, 2), a Reubenite chieftain, son of Eliab, who joined the conspiracy of Korah (q. v.) the Levite, and with his accomplices was swallowed up by an earthquake (Num. xxvi, 1; xxvi, 9; Deut. xi, 6; Ps. cvii, 17; comp. Ezek. xlv, 18). B.C. cir. 1618. See Exodus.

Dathem, JOHANN AUGUST, an eminent Oriental scholar and Biblical critic, was born at Weissenfeld July 4, 1781, became professor of Oriental literature at Leipzig in 1782, and died March 17, 1791, at Leipzig. His chief work is Libri Vet. Test. ex recensione textus Hebr. notisque philol. et crit. illustrati (Halle, 1791, 8 vol.). He also edited the Gelasian, Philostratus, Scacra, and the Prolegomena to Walton’s Polyglott (Lips. 1777); a Syriac Psalter, with the translation and notes of Erpenius (Halle, 1788); and (posthumous) Opuscula ad Crinit. et interp. Vet. Test. spectantia (ed. by Rosenmuller, jun., Lips. 1795).

Dathanem (Δαθημας; Alex. and Joseph. Δαθημας; other MSS. Δαθημας; Vulg. Dathanem), a fortress (Ῥδ ἄπωμα; Joseph. φωνημων) in which the Jews of Gilead took refuge from the heathen (1 Macc. v, 9; Joseph. Ant. xii, 8, 1). Here they were relieved by Judas and Jonathan (1 Macc. v, 24). They marched from Bozora to Dathanem (vera. 28, 29), and left it for Maspha (Mizpeh) (ver. 35). The reading of the Persian documents points to Ramath, in the land of Gilead, which can hardly fail to be the correct identification. Ewald, however, Gesch. iiri, ii, 2, p. 559, note), would correct this to Damoth, which he compares with Dhamo, a place reported by Burckhardt (Syri. p. 196).

Dathanem, PETRUS, one of the Dutch Reformers, was born at Yperen, in Flanders. At an early age, he entered the Carmelite monastery at Poperingen. Here he became acquainted with the doctrine of the Reformation, and was so captivated by it that he soon resolved to leave the monastery and repair to England. In London he followed the occupation of a printer. Enjoying liberty of conscience under the reign of Edward VI, he applied himself diligently to the study of the Scriptures, in the knowledge of which he made such proficiency, that he was soon regarded as a competent master. When, in 1556, the English church in the reign of Edward VI was returned to its native land. West Flanders was at first the scene of his labors. He soon became known as one of the most zealous of the Reformed preachers. His enthusiasm, the cogenicity of his reasoning, and his rude but captivating eloquence, stirred the multitude. His sermons sometimes amounted to more than fifteen thousand. His labors were not confined to Flanders, but extended to Zealand and other parts of Holland. Obliged to flee for his life, he again sought refuge in the Palatinate, and at Frankenthal, whither many Dutch, French, and Wallonians had fled, he exercised his ministry. From here he went to Heidelberg, where he became preacher to John Casimir. In 1578 he was sent as delegate from Ghent to the General Synod at Dort, over whose deliberations he presided. He preached in various cities of Holland, but made Ghent the place of his permanent abode. Here he became involved in political affairs. His influence in his harangues was so great that the populace that the Romanists were driven out of the city, and great excesses were committed in and around Ghent. As a consequence he was again obliged to flee, and again he sought and found refuge with his former protector, John Casimir. In the midst of his active and fruitful life he still found time for literary pursuits. His translation of the Heidelberg Cathechism into Dutch was adopted, and has, with slight modifications, continued in use to the present time. He also gave a Dutch version of the Book of Psalms, according to the French of Beza and Marot. This was also adopted by the Reformed Church, and was used in public worship till 1778, when it was superseded by a version of higher poetic merit. His burning zeal and abundant labors contributed much to advance the cause of the Reformation in Holland.

Daub, KART, a German theologian of the Hegelian school, was born at Cassel March 20, 1765. In 1781 he became the head of the Academy of Law, which he had been studying since 1786. He was afterwards professor of philosophy in Hanau, and finally, in 1794, became professor of theology at Heidelberg. He died Nov. 22, 1836. Daub was one of the representatives of the new speculative theology. At first, especially in his Predigten nach Kantisches Grundriss (1794), and in his Katechism (Heidelberg, 1801), he was a Kantian; he afterwards inclined to Fichte; and in his Theologiemons (Heidelberg, 1806), and Einleitung in d. Studium d. Dogmatik (Heidelberg, 1810), he applied Schelling’s doctrine to theology. As the latter ended with theosophic dualism, so Daub, in his Judas Jacobus (Heidelberg, 1816; 2d ed. 1818), displayed a speculation almost bordering on Manichaeism. This work bears witness to his struggle with Hegel’s phenomenology and logic, but Hegel finally prevailed. Daub was a man of old German simplicity, great moral energy, and warm faith: yet, with a great talent for teaching, he was too abstract in his literary productions to influence a large circle. This is especially the case with his last work, Die dogmatische Theologie jetziger Zeit (Heidelberg, 1838). He was associated with Creuzer in publishing a periodical entitled Studien (Heidelberg, 1805—10, 6 vols.). His works have been published by Marheinecke and Dittenberger (Berlin, 1822). See Graetz, Geschichte der Juden, ii, 650; Lichtmo, s. v.; Kahnis, German Protestantism (Edinb. 1856, 12mo, p. 248); Rosenkranz, Einleitung zu Carl Duhm (Berlin, 1837); Strass, Charakteristik u. Kritik; Herzog, Real-Encyclopaed. xix, 391.
DAVENPORT

The condition of daughters, that is, of young women, in the East, their employments, duties, etc., may be gathered from various parts of Scripture, and seems to have borne but little resemblance to that of young women of respectable parentage among ourselves. Rebekah drew and fetched water; Rachel kept sheep, as did the daughters of Jethro, though he was a priest, or a priestess of the tribe of Ammon. Rachel formed domestic services for the family; Tamar, though a king’s daughter, baked bread; and the same of others. We have the same occupations for the daughters of princes in the ancient poets, of which Homer is an unquestionable evidence. See Child; Education; Education, MARRIAGE.

The original terms rendered “daughter-in-law” are in the Heb. אלף, kollak'; Sept. and New Test. νυγγε, both literally meaning a bride (as elsewhere rendered), and applied to a son’s wife.

DAVENPORT, John, D.D., bishop of Salisbury, was born in London about 1570, and was educated at Queen’s College, Cambridge. In 1594 a fellowship was offered him, which he accepted after his father’s death in 1595. In 1600 he was elected professor of divinity. In 1614 he was chosen master of his college, and in 1618 was one of the four divines sent to the Synod of Dort by James I. See Dort.

He returned to England in May, 1619, after having visited the most eminent cities in the Netherlands. In 1621 he was appointed to the see of Salisbury; but in 1630-81 incurred the displeasure of the king by a sermon on predestination, “all curious search into which” the king, in his declaration prefixed to the Thirty-nine Articles in 1628, had strictly enjoined “to be laid aside.” The bishop died of consumption in 1641.

He was a man of great learning. He published several works in English and Latin; etc., translated from the original Latin (Lond. 1844, 42, 2 vols. 8vo).—Biographia Britannica, iv, 629.

Davenport, Christopher, an English Romanist, was born at Coventry about 1588, and was sent to Merton College, Oxford, at 15, but was persuaded at 17 by a priest to go to the Romanist college at Douai, France, and thence to Ypres. Here he became a Romanist and a Franciscan. Under the name of Franciscus a Sancta Clara he came as a missionary to England, and was made chaplain to Henrietta Maria, consort of Charles I. Davenport was a man of learning and of good address, and he labored zealously and successfully for the cause of Rome. On the death of Charles I he went abroad, and only appeared in England in disguise until the restoration of Charles II, when he became chaplain of queen Catherine and provincial of the English Franciscans. He died May 31, 1680. Among his writings are, Paraphrastica Explicativa Articulorum Conf. Anglicum (1656; new transl., Lond. 1819, 12mo), Natura, Gratia, etc. (Lond. 1640; transl. into English, 1641, 8vo).—Biographia Britannica, iv, 629.
at Hilton Castle as chaplain, he became rector of St. Stephen's Church, London. After an interview with Mr. John Cotton he became a Nonconformist, and, to escape bishop Laud, he fled to Holland in 1638. In 1635 he returned to London, and sailed for Boston, Mass., where he arrived June 26, 1637. With a number of others he sailed on March 20, 1638, for Quinipiac, now New Haven. In 1639 a Church was formed and on August 22 Mr. Davenport was installed pastor. He was ordained, with Mr. James Allen as colleague, pastor of the first Church, Boston, Dec. 9, 1638, and died March 18, 1676. He published Instructions to the Elders of the English Church (1638); Report of some Proceedings against John Page (1634); Allegations of Scripture against the Baptizing of some kind of Infants (1634); Catechism concerning the chief Heads of the Christian Religion (London, 1639); and a number of occasional sermons.—Sprague, Amada, i, 94; New Gen. Biog. Dict., iv, 255.

David (Heb. David), נָ création [in the full form, נָי], in 1 Kings iii, 14, and in Chron., Ezra, Neh., Cant., Hos., Amos, Ezek. xxiv, 28, and Zech.), affectionate or beloved; Arab. in common usage Dāʾūd; Sept. Dāʾūd; N. T. Dāʾūd, older MSS. Dāʾud; Joseph, Dāʾūd, the second but most prominent of the line of Jewish kings. The prominence of this personage in the Old Testament history as well as in the Christian economy requires a full treatment of the subject here.

A. Personal Biography.—The authorities for the life of David may be divided into the following classes: (1.) The original Hebrew authorities: (1.) The narrative of 1 Sam. xvi, to 1 Kings ii, 10; with the supplement of 1 Chron. ii, 45 to unknown 1 to Jesse, 85. (2.) The "Chronicles" or State-papers of David (1 Chron. xxvii, 24), and the original biographies of David by Samuel, God, and Nathan (1 Chron. xxix, 29). These are lost, but portions of them are preserved in the foreground. (3.) The Davidic portion of the Psalms, including such fragments as are preserved to us from other sources, viz., 2 Sam. 1, 19-27; iii, 8, 38; xxii, 1-51; xxxii, 1-7. See Psalms. (4.) The collection of the events in the heathen histories, Nicolaus of Damascus in his Universal History (Josephus, Ant. vii, 5, 2), and Eupolemus in his History of the Kings of Judah (Euseb. Prap. Ev. i, 80). (5.) David's apocryphal writings, contained in Fabricius, Codex Apocryphus V. T. p. 890-1896. (1.) Psal. ch., on his history over Goliath; (2.) Cant. ch., with God, on madness, on his temptation, and on the building of the Temple. (8.) A charm against fire. Of these the first alone deserves any attention. (IV.) The Jewish traditions, which may be divided into three classes: (1.) The additions to the Biblical narrative contained in Josephus, Ant. vii, 8-18. (2.) The Hebrew traditions preserved in Jerome's Quaestiones Hebraicae in Libros Regum et Paralipomenon (vol. iii, Venice ed.).

It thus appears that David (born B.C. 1083) was the youngest son, probably the youngest child, of a family of ten. His mother's name is unknown. See Nahash. We can only conjecture her character from one or two brief allusions to her in the poetry of her son, from which we may gather that she was a godly woman, whose devotion to God's service her son commensurates at once to a token of God's favor to himself, and as a stimulus to him to consecrate himself to God's service (Ps. lxxxvii, 16; and perhaps cxxvi, 16). His father, Jesse, was of a great age when David was still young (1 Sam. xvii, 12). His parents both lived till after his final rupture with Saul (1 Sam. xxiii, 8). Certain points with regard to his birth and lineage deserve special mention.

(a) His connection with Moab through his ancestresses Ruth. This he kept up when he escaped to Moab and intrusted his aged parents to the care of the king (1 Sam. xxix, 8). This connection possibly gave greater breadth to his views, and even to his history, than if he had been of purely Jewish descent. Such is probably the significance of the express mention of Ruth in the genealogy in Matt. i, 5.

(b) His birthplace, Bethlehem (q. v.). His recol-
lection of the well of Bethlehem is one of the most touching incidents of his later life (1 Chron. xi. 17). From the territory of Bethlehem, as from his own patrimony, he gave a piece of ground to Chabnam, son of Barzillai (2 Sam. xix. 37, 38; Jer. xii. 17). It is this connection of David with Bethlehem that gave importance to the place again in later times, when Joseph went up to Bethlehem, "because he was of the house and lineage of David" (Luke ii. 4)." (David, son of Jesse, to whom the tribe of Judah, which the tribal feeling appears to have been stronger than in any of the others. This connection must be borne in mind throughout the story both of David's security among the hills of Judah during his flight from Saul, and of the early period of his reign at Hebron, as well as of the jealousy of the tribe at having lost their exclusive possession of him, which broke out in the revolt of Absalom.

(d) His relations to Zeruiah and Abigail. Though called in 1 Chron. ii. 16, sisters of David, they are not expressly called the daughters of Jesse; and Abigail, in 2 Sam. xvii. 25, is called the daughter of Nahash. It is too much to suppose that Jesse's mother had been the wife or concubine of Nahash, and then married by Jesse? This would agree with the difference of age between David and his sisters, and also (if Nahash was the same as the king of Ammon) with the kindnesses which David received first from Nahash (2 Sam. x. 2), and then from Shobi, son of Nahash (xvii. 27).

2. As the youngest of the family, he may possibly have received from his parents the name, which first appears in him, of David, the darling. But, perhaps for this same reason, he was never intimate with his brethren. The eldest brother, who alone is mentioned in connection with him, and who was afterwards made by him head of the tribe of Judah (1 Chron. xxvii. 18), treated him scornfully and impetuously (1 Sam. xvii. 28), as the eldest brothers of large families are apt to act; his command was regarded in the family as law (xx. 25); and the father looked upon the youngest son as hardly one of the family at all (xvi. 11), and as a mere attendant on the rest (xvii. 17). The familiarity which he lost with his brothers, he gained with his nephews. The three sons of his sister Zeruiah, and the one son of his sister Abigail, seemingly from the fact that their mothers were the eldest of the whole family, are probably of the same age as David himself, and therefore are very likely to be the three sons of Zeruiah—throughout life in the relation usually occupied by brothers and cousins. In them we see the rougher qualities of the family, which David shared with them, while he was distinguished from them by qualities peculiar to himself. The two sons of his brother Shimeah are both connected with his after history, and both seem to have been endowed with the sagacity in which David himself excelled. One was Jonadab, the friend and adviser of his eldest son Amnon (2 Sam. xiii. 3); the other was Jonathan (2 Sam. xxi. 21), who afterwards became the coadjutor of his son David (xvii. 25). It is a conjecture or tradition of the Jews preserved by Jerome (Qu. Hbr. on 1 Sam. xvii. 12) that this was no other than Nathanael the prophet, who, being adopted into Jesse's family, makes up the eighth son, not named in 1 Chron. ii. 18. But this is hardly probable.

The first record of David's appearance in history at one of the courts of the kings of the eight circuit is in the reign of Saul, with the assistance of the king and the prophet, in the idea of an Oriental king, instantly sent for him, and in the successful effort of David's harp we have the first glimpse into that genius for music and poetry which was afterwards consecrated in the Psalms. It is impossible not to connect the early display of David's skill in the harp and the extraordinary exercise of their vocation with tabret, psaltery, pipe, and harp (1 Sam. x. 5), in the pastures (Virid ; comp. Psa. xxiii. 2), to which he afterwards returned as to
his natural home (1 Sam. xix, 18). Whether any of the existing Psalms can be referred to this epoch of David's life is uncertain. The 23rd, from its subject of the shepherd, and from its extreme simplicity (though placed by Ewald somewhat later), may well have formed the basis of one of these psalms. The 8th, 19th, and 29th, which are universally recognised as David's, describe the phenomena of nature, and, as such (at least the two former), may more naturally be referred to this tranquil period of his life than to any other. The imagery of danger from wild beasts, lions, wild bulls, is a reminiscence of this time. And now, at any rate, he must have first acquired the art which gave him one of his chief claims to mention in after times—"the sweet singer of Israel" (2 Sam. xxiii, 1), "the inventor of instruments of music" (Amos vi, 5); "with his whole heart he sang songs and loved him that made him" (Eccles. xii, 6).

4. One incident alone of his solitary shepherd life has come down to us—his conflict with the lion and the bear in defence of his father's flocks (1 Sam. xvii, 34, 35). But it did not stand alone. He was already known to Saul's guards for his martial exploits, probably including the time when he had suddenly appeared in the camp his elder brother immediately guessed that he had left the sheep in his ardor to see the battle (xvii, 28). This new aspect of his character we are now introduced. B.C. 1068.

The scene of the battle is at Ephes-dammim (q. v.), in the frontier hills of Judah, called probably from this or similar encounters "the bound of blood." Saul's army is encamped on one side of the ravine, the Philistines on the other; the war-courser of Elah, or "the Terebinth," runs between them. A Philistine of gigantic stature, and clothed in complete armor, insults the comparatively defenceless Israelites, among whom the king appears to be well armed (xvii, 48, 50). The Philistine then challenges Saul. No one can be found to take up the challenge. At this juncture David appears in the camp, sent by his father with ten loaves and ten slices of cheese to his three eldest brothers, fresh from the sheepfolds. Just as he comes to the circle of wagons which formed, as in Arab settlements, a rude fortification round the Israelite camp (xvii, 20), he hears the well-known shout of the Philistine war-cry (comp. Num. xxiii, 21). The martial spirit of the boy is stirred at the sound; he leaves his provisions with the baggage-master, and darts to join his brothers (like one of the royal messengers) into the midst of the lines. Then he draws his damsel-sword from out the scabbard which —sees the dismay of his countrymen—hears of the reward proposed by the king—goes with the impetuosity of youth from soldier to soldier talking of the event, in spite of his brother's rebuke—he is introduced to Saul —undertakes the combat. His victory over the gigantic Philistine is rendered more conspicuous by his own diminutive stature, and by the simple weapons with which it was accomplished—not the armor of Saul, which he naturally found too large, but the shepherd's sling, which he always carried with him, and the five polished pebbles which he picked up as he went along, trusting in the mercy of the Lord, and put in his shepherd's wallet. Two trophies long remained of the battle—one, the huge sword of the Philistine, which was hung up between the ephod in the Tabernacle at Nob (1 Sam. xxvi, 9); the other the head, which he bore away himself, and which was either laid up at Nob, or subsequently at Jerusalem. See Non. Psalm cxii, 9 (or cxlv). It was a great thing for David; yet "The Lord smote Saul greatly that day; he was full of the Spirit of the Lord." He came out of Saul's hypochondria, David may naturally have returned home. 11. David's History in connection with Saul. —The victory over Goliath had been a turning-point of his career. Saul inquired his parentage, and took him finally to his court. Jonathan was inspired by the royal friendship which bound the two youths together to
the end of their lives. The triumphant songs of the Israelitish women announced that they felt that in him Israel had now found a deliverer mightier even than Saul; and in those songs, and in the fame which David thus acquired, was laid the foundation of that universal fame of which, in his lifetime, Saul towards him, mingling with the king's constitutional malady, poisoned his whole later relations to David. Three new qualities now began to develop themselves in David's character. The first was his prudence. It had already been glanced at on the first mention of him to Saul (1 Sam. xvi. 12), but it was the prominent feature of the beginning of his public career. Thrice over it is emphatically said, "he behaved himself wisely," and evidently with the meaning that it was the wisdom called forth by the necessities of his delicate and difficult situation. It was that peculiar Jewish caution which has been compared to the sagacity of a hunted animal, such as is remarked in Jacob, and afterwards in the persecuted Israelites of the Middle Ages. One instance of it appears immediately, in his answer to the trap laid for him by Saul's servants, "Seemeth it to you a light thing to be the king's son-in-law? seeing that I am a poor man and lightly esteemed?" (2 Sam. iv. 18). Secondly, he never hid magnanimous forbearance called forth, in the first instance, towards Saul, but displaying itself (with a few painful exceptions) in the rest of his life. He is the first example of the virtues of chivalry. Thirdly, his hairbreadth escapes, continued through so many years, impressed upon him a sense of dependence on the Divine help, clearly derived from this epoch. His usual oath or asswearer in later times was, "As the Lord liveth who hath redeemed my soul out of adversity" (2 Sam. iv. 9; 1 Kings i. 29); and the Psalms are filled with imagery taken even literally from shelter under purser, slipping down precipices (Psa. xxi. 36), hiding in places in rocks and caves, leafy covertes (xxi. 20), strong fastnesses (xviii. 2). This part of David's life may be subdivided into four portions:

1. His Life at the Court of Saul till his final Escape (1 Sam. xvii. 6-19).—His office is not exactly defined. But it would seem that, having been first armor-bearer (xxvi. 2; xviii. 2), then made captain over a thousand—the subdivision of a tribe—(xviii. 18), he finally, on his marriage with Michael, the king's second daughter, was raised to the high office of captain of the king's body-guard, second only, if not equal, to Abner, the captain of the host, and Jonathan, the heir apparent, and second in the estimation of the king at his meals (xx. 25). David was now chiefly known for his successful exploits against the Philistines, by one of which he won his wife, and drove back the Philistine power with a blow from which it only rallied at the disastrous close of Saul's reign. He also still performed from time to time the office of minister. But the successive snares laid by Saul to entrap him, and the open violence into which the king's madness twice broke out, at last convinced him that his life was no longer safe. He had two faithful allies, however, in the court—the son of Saul, his friend Jonathan, and his daughter—of whom the wife of Saul's guardian, Warned by the one and assisted by the other, he escaped by night, and was from that time forward a fugitive. B.C. 1062. Jonathan he never saw again except by stealth. Michael was given in marriage to another (Phaltiel), and he saw her no more till long after her father's death. See MICHAEL. To this escape the triumphs of the Psalms (e.g., xxviii. 5, 6) (according to Ewald) gives Ps. vi. and vii. to this period. In the former he is first beginning to contemplate the necessity of flight; in the latter he is moved by the plots of a person not named in the history (perhaps those alluded to in 1 Chron. xii. 7)—according to the translators, Gush, a Benjamite, and therefore of Saul's tribe. See CUSH, 2.

2. His Escape (1 Sam. xix. 28-xxi. 15).—He first fled to Naioth (or the pastures) of Ramah, to Samuel. This is the first recorded occasion of his meeting with Samuel since the original interview during his boyhood at Bethlehem. It might almost seem as if he had intended to devote that untainted and poetic gift to the prophetic office, and give up the cares and dangers of public life. But he had a higher destiny still. 'Up to this time both the king and himself had thought that a reunion was possible (see xx. 5, 26). But the madness of Saul now became more settled and frenzied in character, and David's danger was proportionately greater. It was this interview with Jonathan, of which the recollection was probably handed down through Jonathan's descendants when they came to David's court, confirmed the alarm already excited by Saul's endeavor to seize him at Ramah, and he now determined to leave his country, and take refuge, like Coriolanus, or Themistocles in like circumstances, in the court of his enemy. Before this last resolve he visited Nob (q. v.), the seat of the tabernacle (1 Sam. xxii.), partly to obtain a final interview with the high-priest Ahimelech (1 Sam. xxii. 9, 15), partly to procure food and weapons. On the pretext of a secret mission from Saul, he obtained from Ahimelech the sacred sword of Goliath (1 Sam. xix. 14-16), and the consecrated sword of Goliath, of which he said, "There is none like that; give it me." The incident was of double importance in David's career. First, it established a connection between him and the only survivor of the massacre in which David's visit had involved the house of Ahimelech. Secondly, it confirmed Ahimelech's surrender of the sacred bread to David's hunger (see Osiander, De Davide pomes propositio recipientis, Tubing. 1761) our Lord drew the inference of the superiority of the moral to the ceremonial law, which is the only allusion made to David's life in the N. T. (Acts v. 36, 39; Heb. vi. 4). It is also commemorated by the traditional title of Ps. lii. His hospitable reception, when in distress, by Ahimelech the priest, and the atrocious massacre innocently brought by him on Nob, the city of the priests (1 Sam. xxii. 9-19), must have deeply affected his generous nature, and laid the foundation of his cordial affection for the whole priestly order, whose ministrations he himself helped to elevate by his devotional melodies. See AHIMELECH, 1.

His stay at the court of Achish (q. v.) was short. Discovered possibly by "the sword of Goliath," his presence revived the national enmity of the Philistines against her. The expressions of Saul's knaves caused by his madness, by violent gestures, playing on the gates of the city, or on a drum or cymbal, letting his beard grow, and foaming at the mouth (1 Sam. xxi. 18, Sept.). (See Ortolin, De Davids dolore, Lips. 1706; Hebenstreit, De Dar. furorim simile, Vitr. 1712; Kraft, D Dieu, in medios Gehorsam, Erlang. 1768.) The 56th and 84th Psalms are both referred by their titles to this event, and the titles state (what does not appear in the narrative) that he had been seized as a prisoner by the Philistines, and that he was, in consequence of this stratagem, set free by Achish, or (as he is twice called) Ahimelech. See ACHISH.

3. His Life as an independent Outlaw (xxii, 1-xxvi, 25).—(1) His first retreat was the cave of Adullam, probably the large cavern (the only very large one in Palestine), not far from Bethlehem, now called Khurutin (see Bonar's Land of Promise, p. 244). From this he carried on its vices and internal evidences (as seen by Ewald) gives Ps. vi. and vii. to this period. In the former he is first beginning to contemplate the necessity of flight; in the latter he is moved by the plots of a person not named in the history (perhaps those alluded to in 1 Chron. xii. 7)—according to the translators, Gush, a Benjamite, and therefore of Saul's tribe. See CUSH, 2. (2) His Escape (1 Sam. xix. 28-xxi. 15)._—He first fled to Naioth (or the pastures) of Ramah, to Samuel.
Canaanites, of whom the name of one, at least, has been preserved, Ahimelech the Hittite (1 Sam. xxvi, 6). See ADULLAM.

(2.) His next move was to a stronghold, either the mountain afterwards called Haddumim, or, as is more likely, to Adullam. The latter was a city of Judah named by Josephus (War, vii, 8, 3) Masada, the Greekised form of the Hebrew word Metodah (1 Sam. xxii, 4, 5; 1 Chron. xii, 10), in the neighborhood of En-gedi. While there, he had deposed his aged parents, for the sake of greater security, beyond the Jordan, with their ancestral kinsman of Moab (ib. 3). Then, the young king, Nahash of Ammon, also treated him kindly (2 Sam. x, 2). Here another companion appears for the first time, a schoolfellow, if we may use the word, from the schools of Samuel, the prophet Gad, his subsequent biographer (1 Sam. xxii, 5); and while he was there he received the chivalrous exploit of the three heroes just mentioned to procure water from the well of Bethlehem, and David's chivalrous answer, like that of Alexander in the desert of Gedrosia (1 Chron. xi, 16-19; 2 Sam. xxii, 14-17). He was joined here by two separate bands: one a little body of eleven fierce Gadite mountaineers, who swam the Jordan in flood-time to reach him (1 Chron. xxi, 3), or, more probably, a detachment of men from Judah and Benjamin, under his nephew Amaazal, who henceforth attached himself to David's fortunes (1 Chron. xii, 16-18).

(3.) At the warning of Gad, he fled next to the forest of Hazarath (somewhere in the hills of Judah), and then again fell in with the Philistines, and again, apparently advised by Gad (xxii, 4), made a descent on their foraging parties, and relieved Keilah (q. v.), in which he took up his abode. While there, now for the first time in a fortified town of his own (xxii, 7), he was joined by a new and most important ally—Abiathar, the last survivor of the house of Ithamar, who came with the high-priest's ephod, and henceforth gave the oracles, which David had hitherto received from Gad (xxiii, 6, 9; xxii, 23). By this time the 400 who had joined him at Adullam (xxii, 2) had swelled to 600 (xxiii, 18).

(4.) The situation of David was now changed by the appearance of Saul himself on the scene. Apparently the danger was too great for the little army to keep together. They escaped from Keilah, and dispersed, "whithersoever they could go," among the fastnesses of Judah. Henceforth it becomes difficult to follow his movements with exactness, partly from ignorance of the names, partly because the same event seems to be twice narrated (1 Sam. xxiv, 19-24; xxvii, 1-4, and perhaps 1 Sam. xxiv, 1-22; xxvi, 5-25). But thus much we discern. He is in the wilderness of Ziph. Once (or twice) the Ziphites betray his movements to Saul, who literally hunts him like a partridge; the treacherous Ziphites beating the bushes before him, and 3000 men being stationed by Saul to catch even the print of his footsteps on the hills (1 Sam. xxiii, 14, 22 [Heb. 24 [Sept.]; xxiv, 11; xxvi, 2, 20). David finds himself driven to the extreme south of Judah, in the wilderness of Maon. On two, if not three occasions, the pursuit of Saul is sight of his head. Of the first of these escapes, the memory was long preserved in the name of the "Cliff of Divisions," given to the cliff down one side of which David climbed, while Saul was surrounding the hill on the other side (xxiii, 25-29), when he was suddenly called away by the cry of a Philistine invasion. On another occasion the pursuit brought him all the way to the "spring of the wild goats" (En-gedi), immediately above the Dead Sea (1 Sam. xxiv, 1, 2). The rocks were covered with the pursuers. Saul entered, as is the custom in Oriental countries, for a natural necessity. The followers of David, seated in the dark recesses of the cave, saw the approach of him that was pursuing them from above, and their sobs broke their silence. They stared at the appearance of their king and David, with a characteristic mixture of horror and generosity, de-
the wives and children of the new settlement. A wild scene of frantic grief and recrimination ensued between David and his followers. It was calmed by an oracle of assurance from Abiathar. It happened that an important accession had just been made to David's family. When the news reached the rival tribe of Reuben and the new branch of the line to Gilboa, he had been joined by some chiefs of the Menasites, through whose territory he was passing. Urgent as must have been the need for them at home, yet David's fascination carried them off, and they now assisted him against the plunderers (1 Chron. xii, 9).

They overtook the invaders in the desert, and in an instant recovered the spoil. These were the gifts with which David was now able for the first time to requite the friendly inhabitants of the scene of his wanderings (1 Sam. xxx, 26 31). A more lasting memorial was the law which traced its origin to the arrangement made by him, formerly in the attack on Nabal, but now again, more completely, for the equal division of the plunder among the two thirds who followed to the field, and the one third who remained to guard the baggage (1 Sam. xxx, 25; xxv, 13). Two days after this victory a Bedouin arrived from the north with the fatal news of the defeat of Gilboa. The reception of the tidings in camp was as sad as the inundation of the solenm mourning, the vent of his indignation against the bearers of the message, the pathetic lamentation that followed, well close the second period of David's life (2 Sam. i, 1-27). B.C. 1053.

III. David's Reign.—(1) As King of Judah at Hebron. 7 years (2 Sam. ii, 1-5),—Hebron was selected, doubtless, because it was the ancient sacred city of the tribe of Judah, the burial-place of the patriarchs and the inheritance of Caleb. Here David was first formally anointed king—by whom it is not stated; but the expression seems to limit the inauguration to the tribe of Judah, and therefore to exclude any interference of Abiathar (2 Sam. ii, 4). To Judah his dominion was nominally confined. But probably for the first five years of the time the dominion of the house of Saul, whose seat was now at Mahanaim, did not extend to the west of the Jordan, and consequently David would be the only Israelite potentate among the western tribes. He then strengthened himself by a marriage with Maacah, daughter of Talmai, king of Geshur (2 Sam. iii, 3), a petty monarch whose dominions were near the sources of the Jordan, and whose influence at the opposite end of the land must have added a great weight into David's scale. From Abigail, wife of David, he was a crown of beauty. From other ranks of society he was able to increase his private fortune. Concerning his other wives we know nothing in particular, only it is mentioned that he had six sons by six different mothers in Hebron. The chief jealousy was between the two tribes of Benjamin and Judah, as Saul had belonged to the former; and a tournament was turned by mutual ill-will into a battle, in which Abner unwarily slew young Asahel, brother of Joab. "Long war," after this, was carried on between "the house of Saul and the house of David." We may infer that the rest of Israel took little part in the contest; and although the nominal possession of the kingdom might be held by the small tribe of Benjamin to struggle for some time against Judah, the skill and age of Abner could not prevail against the vigor and popular fame of David. Gradually David's power increased, and during the two years which followed the elevation of Ishboseth, a series of skirmishes took place between the two kingdoms. First came the encounter into the territory of Ishboseth (2 Sam. ii, 28). Next occurred the defection of Abner (2 Sam. iii, 12). A quarrel between Abner and Ishboseth decided the former to bring the kingdom over to David (see Ortol, De rebus Davidicis et Abertiis, Lips. 1705). The latter refused to treat unless, as a punishment, he took the head of his chief, Nathan, son of Saul, was restored to David. The possession of such a wife was valuable to one who was aspiring to the kingdom; and although David had now other wives, he appears not to have lost his affection for this his earliest bride. She, too, seems to have acquiesced in his claim as being greater than that of the man whom his father had arbitrarily bestowed her, and the former was considerably reduced (1 Chron. iii, 3). She was the first effaced her former attachment to David, although we afterwards find her betrayed into an unworthy act by her pride of position. After giving her back, Abner proceeded to win the elders of Israel over to David; but Joab discerned that if this should be so brought about, Abner of need would be made a post of chief captain. He therefore seized the opportunity of murdering him when he had come on a peaceful embassy, and covered the atrocity by pleading the duty of revenging his brother's blood. This deed was perhaps David's first taste of the miseries of royal power. He dared not proceed actively against his ruthless nephew, but he vented his abhorrence in a solemn curse on Joab and his posterity, and followed Abner to the grave with weeping. See ANMER. Anxious to purge himself of the guilt, he ordered a public wearing of sackcloth, and refused to touch food all the day. His sincere expressions of grief, however, moved the elders of all Israel. The whole Ishbossith (q. v.), left alone, was unequal to the government, and shortly suffered the same fate of assassination. David, following the universal policy of sovereni.ts (Tact. Hist. I, 44), and his own profound sense of the sacredness of royalty, took vengeance on the murderers, and buried Ishboseth in Abner's tomb at Hebron. During this period, it is stated against what people his marauding excursions were directed. It is distinctly alleged (2 Sam. iii, 27) that his men brought in a great spoil at the very time at which he had a truce with Abner; possibly it may have been won from his old enemies the Amalekites (1 Sam. xxxi, 2). The throne being now vacant, and the united voice of the whole people at once called him to occupy it. B.C. 1046. A solemn league was made between him and his people (2 Sam. v, 3). For the third time David was anointed king, and a festival of three days celebrated the joyful event (1 Chron. xii, 90). His little band had now swelled into "a great host, like the host of God" (1 Chron. xii, 22). The command of it, which had formerly rested on David alone, he now devolved on his nephew Joab (2 Sam. ii, 28). It was formed by contingents from every tribe of Israel. Two are specially mentioned as bringing a weight of authority above the rest. These were the eldest, the Levitical, tribe, formerly represented in David's being followed only by the solitary fugitive Abiathar, now came in strength, represented by the head of the rival branch of Eleazar, the high-priest, the aged Jehoiada and his youthful and warlike kinsman Zadok (1 Chron. xii, 27, 28; xxvii, 5). The kingdom was not at first a despot, but a constitutional one; for it is stated, "David made a league with the children of Israel" (1 Chron. xii, 3). This was anointed David king over Israel" (2 Sam. v, 3). This is marked out as the era which determined the Philistines to hostility (ver. 17), and may confirm our idea that their policy was to hinder Israel from becoming united under a single king.

Underneath this show of outward prosperity, two cankers were growing. The story of the rival states which David now assumed, had first made themselves apparent at Hebron, and affected all the rest of his career. The first was the formation of a harem, according to the usage of Oriental kings. To the two wives of his wandering life he had now added four, and including Michal, five (2 Sam. v, 5). This was an increase in the increasing power of his kinsmen and chief officers, which the king strove to restrain within the limits
of right; and thus, of all the incidents of this part of his career, the most plaintive and characteristic is his lamentation over his powerlessness to prevent the murder of Abner (2 Sam. iii. 31-80).

(11.) Reign over all Israel, 30 years (2 Sam. v. 5, to 1 Kings iv. 2). The trade between the Mediterranean and Israel was extremely lucrative to both, and the league between the two states was quickly very intimate. Unhallowed and profane as Jebsus had been before, it was at once elevated to a sanctuary which it has never lost, above any of the ancient sanctuaries of the land. The ark of the Lord was now removed from its first abode to a new and more solemn home. Uzzah, the servant of Saul, who touched it, was instantly smitten with marked solemnity, B.C.1043. A temporary halt (owing to the death of Uzzah) detained it at Obed-edom's house, after which it again moved forward with great state to Jerusalem. An assembly of the nation was convened, and (according to 1 Chron. xiii. 3; xv. 2-27) especially of the Levites. The musical arts, in which David himself excelled, were now developed on a great scale (1 Chron. xv. 16-22; 2 Sam. vi. 5). Zadok and Abiathar, the representatives of the two Aaronic 'families, were both present (1 Chron. xv. 11). Chenaniah presided over the music (1 Chron. xv. 22, 27). Obed-edom followed his sacred charge (1 Sam. vi. 17; 1 Chron. xxiii. 30). The prophetic assembly for the first time at the controlling adviser of the future (2 Sam. vii. 8). A sacrifice was offered as soon as a successful start was made (1 Chron. xv. 26; 2 Sam. vi. 18). David himself was dressed in the white linen dress of the priestly order, without his royal diadem, and played on stringed instruments (1 Chron. xv. 27; 2 Sam. vi. 14, 20). As in the prophetic schools where he had himself been brought up (1 Sam. x. 5), and as still in the impressive ceremonial of some Eastern dervishes, and of Seville cathedral (probably derived from the East), a wild dance was part of the religious solemnity. Into this David threw himself with unrestrained joy (cf. all the 'dancing' of all the cities of Palestine great in former ages, Jerusalem alone has vindicated by its long permanence the choice of its founder. The importance of the capture was marked at the time. The reward bestowed on the successful scaler of the precipice was the highest place in the army. Joab henceforward became captain of the host (1 Chron. xi. 6). The royal residence was instantly fixed there, fortifications were added by the king and by Joab, and it was known by the special name of the 'city of David' (1 Chron. xi. 7; 2 Sam. v. 9).

In the account of this siege, some have imagined the Chronicles to contradict the book of Samuel, but there is no real incompatibility in the two narratives. Joab was, it is true, already David's chief captain; but David was heartily disgusted with him, and may have sought a pretext for superseding him by offering the post to the man who should first scale the wall. Joab would be agitated by the desire to retain his office, at least as keenly as others by the desire to get it; and it is credible that he may actually have been the successful hero of that siege also. If this was the case, it will further explain why David, even in the fulness of power, made no further effort to expel him until he had slain Absalom.

The neighboring nations were partly enraged and partly awestruck. The Philistines had already made two ineffectual attacks on the new king (2 Sam. v. 17-20), both near the valley of Rephaim; and these were probably the first battles fought by David after becoming king of all Israel. A rebellion on their borders (a war, as it were, by the cities, and even of their own idols (1 Chron. xiv. 12). Tyre, now for the first time appearing in the sacred history, allied herself with Israel; and Hiram sent cedarwood for the buildings of the new capital (2 Sam. v. 11), especially for the palace of David himself (2 Sam. vii. 2). That the mechanical arts should have been in a very low state among the Israelites was to be expected, since, before the reign of Saul, even smiths' forges were not allowed among them by the Philistines. Nothing, however, could be more profitable for the Phcenicians than the security of cultivation enjoyed by the Israelites in the reigns of David and Solomon.
David 692  David
given to him, David henceforth made it one of the
great objects of his reign to gather means and materi-
als for this important undertaking, the credit of which
he is fairly entitled to divide with his son, by whom it
was actually executed: "See Solomon.
Great as might appear the advantage of establishing
the same city as the religious and civil metropolis,
the effect was, in one respect, most unfortunate; it offend-
ied the powerful and central tribe of Ephraim. They
had been accustomed to regard Shiloh as the rightful
abode of the ark. After David-jarim no envy was
felt, especially while the ark and its priests were
in obscurity; but when so much honor attended it;
when it became a peculiar glory to Judah and Benja-
min—tribes already too much favored; when a magni-
dificent edifice was erected to receive it, the seeds
were sown of that disaffection which ended in a rend-

ing of the tribes apart. Nor was the argument unres-

2. Foundation of the Court and Empire of Israel (2 Sam. viii-vii to xii).—The erection of the new capital at
Jerusalem introduces us to a new era in David's life.
It isindeed, during the reign of Saul, wefind the ark
had been preserved in obscurity. King David, who
had been a king, such as Saul had been before him,
or as the kings of the neighboring tribes, each ruling
over his territory, unconcerned with any foreign rela-
tions except so far as was necessary to defend his own
nation. But David, and through him the Israelites
who were now the monarch of the eastern world,
were rivals and enemies of the great sovereigns of
Egypt and Persia, with a regular administration and
organization of court and camp; and he also founded
an imperial dominion which for the first time realized
the prophetic description of the bounds of the chosen
people (Gen. xv, 18-22). The internal organization
now established lasted till the final overthrow of the
monarchy. The empire was of much shorter dura-
tion, continuing only through the reigns of David
and his successor Solomon. But, for the period of its
existence, it lent a peculiar character to the sacred
history. For once, the kings of Israel were on a level
with the great potentates of the world. David was
an imperial conqueror, if not of the same magnitude,
yet of the same kind as Rameses or Cyrus.

David 692  David

I have
made thee a great name like unto the name of the
great men that are in the earth" (2 Sam. vii, 9).

"Thou hast shed blood abundantly, and hast made
great war. But thou art not able to deliver thyself
out of the hand of my son David, because he is a man
of high spirit in direct service before me; and from this
time we may presume that the ceremonies of the great
day of atonement began to be observed. Previously, it
would appear, the connection between the priesthood
and the tabernacle had been very loose. The priests
fixed their abode at Nob, when the ark was at Kirjath-jea-
rim, a very short distance; yet there is nothing to
denote that they at all interfered with Abinadab in his
exclusive care of the sacred deposit.

After this event, the king, contrasting his cedar pal-
ace with the curtains of the tabernacle, was desirous
of having the people for the ark; such a step, more-
ever, was likely to prevent any religious change of its
abode. This design, when imparted to the prophet
Nathan, was received by him with warm encourage-
ment. He had to learn, however, that the seemingly
obvious fitness of a public measure did not excise a
prophet from the obligation of consulting the Lord be-
fore he proceeded to utter an authoritative opinion; and
the next day he had to return to the king with an in-

timation that he must abandon the intention of execu-
ting this great undertaking. The design is indeed
condemned; yet as he had been a warrior from his
youth, and had shed much human blood, he was pro-
moted above this task; so it was determined that this
sacred deposit should for a time be reserved for the
peaceful reign of his suc-
cessor. Encouraged by the divine approbation, and
by the high promises which were on this occasion

in his exclusive care of the sacred deposit.

a. In the internal organization of the kingdom the
first new element that has to be considered is the roy-

...
Of these, Absalom and Adonijah both inherited their father's beauty (2 Sam. xiv, 25; 1 Kings i, 6), but Solomon alone possessed any of his higher qualities. It was from a union of the children of Solomon and Absalom that the royal line was carried on (1 Kings xv, 2). The princes were under the charge of Jehiel (1 Chron. xxvii, 22), perhaps the Levite (1 Chron. xiv, 21; 2 Chron. xx, 14), with the exception of Solomon, who (according at least to one rendering) was under the charge of Nathan (2 Sam. xii, 25). David's strong parental affection for all of them is very remarkable (2 Sam. xiii, 1, 8; xx, 18; xvii, 5, 6; xix, 4; 1 Kings i, 6). b. The military organization, which was, in fact, inherited from Saul, but greatly developed by David, was as follows:

1. "The Host," i.e. the whole available military force of Israel, consisting of all males capable of bearing arms, and summoned only for war. This had always existed from the time of the first settlement in Canaan, and had been commanded by the chief or the judge who presided over Israel for the time. Under Saul we first find the recognised post of a captain or commander-in-chief in the person of Abner; and under David this post was given as a reward for the assault on Jerusalem to his nephew Joash (1 Chron. xi, 6; xxvii, 34), who conducted the army to battle in the absence of the king (2 Sam. xii, 26). There were 12 divisions of 24,000 each, who were held to be in duty month by month, and over each of them presided an officer selected for this purpose from the other military bodies formed by David (1 Chron. xxvii, 1–15). Besides this host, the register proceeds to recount twelve princes over the tribes of Israel, who may perhaps be compared to the governors of our own states in their military capacity. The enumeration of these great officers is remarkable, being as follows: 1, Of the Reubenites; 2, of the Simeonites; 3, of the Levites; 4, of the Aaronites; 5, of Judah; 6, of Issachar; 7, of Zebulon; 8, of Naphtali; 9, of Ephraim; 10, of Manasseh; 11, of Manasseh beyond the Jordan; 12, of Benjamin; 13, of Dan. Here the names of Gad and Asher are omitted without explanation. On the other hand, the Levites and Aaronites are recounted, as though they were tribes co-ordinate with the rest, and Zadok is named as prince of the Aaronites. It is not to be supposed that the Levites or Aaronites were wholly shut out from civil and military duties. It has already been remarked that Zadok (here chief of the Aaronites) was described in the beginning of David's reign as "a mighty man of valor" (1 Chron. xii, 26), and the same appellation is given to the sons of Shemaiah, a Levite (xxvi, 6). Beniah also, now captain of David's body-guard, was son of the late high-priest Jeshoiada (xxvi, 6, and xii, 27). The army was still distinguished from those of surrounding nations by its primitive aspect of a force of infantry without cavalry. The only innovations as yet allowed were the introduction of a very limited number of chariots (2 Sam. viii, 4), and of mules for the princes and officers instead of asses (2 Sam. xiii, 29; xviii, 9). According to a Musulman tradition (Koran, xxii, 80), David invented chain armor. The usual weapons were still spears and shields, as appears from the Psalms. For the general question of the numbers and equipment of the army, see ARMS and ARMY.

2. The body-guard. This also had existed in the court of Saul, and David himself had probably been its commanding officer (1 Sam. xxii, 14; Ewald). But it now assumed a peculiar organization. They were, at least in name, foreigners, as having been drawn from the Philistines, probably during David's residence at the court of Bath. They are usually called from this circumstance "Cerethites and Pelethites" (q. v.), but had also a body especially from Bath among them, of whom the name of one, Ittal, is preserved as a faithful servant of David (2 Sam. xv, 19). The captain of the force was, however, not only not a foreigner, but an Israelite of the highest distinction and purest descent, who first appears in this capacity, but who outlived David, and became the chief support of the throne of his son, named, Beniah, son of the chief priest Jehoiada, representative of the eldest branch of Aaron's house (2 Sam. viii, 18; xvi, 18; xx, 23; 1 Kings i, 88, 44).

3. The most peculiar military institution in David's army was that which arose out of the peculiar circumstances of his early life. The nucleus of what afterwards became the only standing army in David's forces was the band of 600 men who had gathered
round him in his wanderings. The number of 600 was still preserved, with the name of Gibborim, "heroes" or "mighty men." It became yet further subdivided into three large bands of 200 each, and small bands of 20 each. The small bands were commanded by thirty officers, one for each band, who together formed the "three," and the three large bands by three officers, who together formed "the three," and the whole by one chief, "the captain of the mighty men" (2 Sam. xxiii, 8-39; 1 Chron. xi, 9-47). There seems to have been a second set to "the three," and in this grade, as well as among the subalterns "thirty," one is missing, named as outranking his colleagues. There is considerable difficulty in adjusting their relative position, and two or three names appear to have been omitted. The sixteen additional names given in 1 Chron. xi may be those of alternates to "the thirty." Of the "thirty," some few only are known to have come elsewhere: Asahel, David's nephew (1 Chron. xxvi, 2; 2 Sam. ii, 18); Elhanan, the victor of at least one Goliath (1 Chron. xi, 26; 2 Sam. xxi, 19); Joel, the brother or son (Sept. of Nathan (1 Chron. xi, 32); Naharai, the armorer of Joab (1 Chron. xi, 39; 2 Sam. xxii, 87); Eliam, the son of Abihail (2 Sam. xxii, 94); Ira, one of David's priests (1 Chron. xi, 40; 2 Sam. vi, 22; Ps. lxxxviii, 14); Uriah the Hittite (1 Chron. xi, 41; 2 Sam. xxiii, 99; xi, 8). See Hofmann, Geschichte der Heiligen David's (in his Exeg. krit. Abhandlungen, No. vi).

The following is a corrected and classified list of the noted warriors of David's veterans. See each name in its alphabetical place.

C. Side by side with this military organization were established social and moral institutions. Some were entirely for pastoral, agricultural, and financial purposes (1 Chron. xxvii, 25-31), others for judicial (1 Chron. xxvi, 29-32). Some few are named as constituting what would now be called the court or council of the king; the councils, Abibophel of Gilead and Jonathan the king's nephew (1 Chron. xxvii, 32, 33); the companion or "friend" Hushai (1 Chron. xxvii, 32; 2 Sam. xv, 16; xxxi, 19); the scribe Sheva, or Sebi-Enaith, and Beera, of the sons of Jehohanan (1 Chron. xxvii, 32); Jehohashaphat, the recorder or historian (2 Sam. xx, 24); and Adoram the tax collector, both of whom survived him (2 Sam. xx, 24; 1 Kings xi, 18; iv, 3, 6). The cabinet of David (if we may use a modern name) is thus given (1 Chron. xxvii, 32-34) with reference to a time which preceded Abishalom's revolt: 1, Jonathan, David's uncle, a councillor, wise man, and scribe; 2, Jehiel, son of Hachmoni, tutor (?) to the king's sons; 3, Abibophel, the king's counsellor; 4, Hushai, the king's companion; 5, after Abibophel, Jehohashaphat, the son of Seraiah; 6, Abiathar the priest. It is added, "and the general of the king's army was Joab." Each tribe had its own head (1 Chron. xxvii, 16-22). Of these, the most remarkable were Elihu, David's brother (probably Eliab), prince of Judah (ver. 18), and Jassiel, the son of Abner, of Benjamin (ver. 21). Twelve royal bailiffs are recited as a part of David's establishment (1 Chron. xxvii, 25, 31), having the following departments under their charge: 1, The treasures of gold, silver, etc.; 2, the magazines; 3, the tillage (wheat, etc.); 4, the vineyards; 5, the wine-cellar; 6, the olive and sycamore trees; 7, the oil-cellar; 8, the herds in Sharon; 9, the herds in the valleys; 10, the herds in the Carmel; 11, the herds in the oak-trees. The eminently prosperous state in which David left his kingdom to Solomon appears to prove that he was on the whole faithfully served, and that his own excellent intentions, patriotic spirit, and devout piety (measured, as it must be, by the standard of those ages), really made his reign beneficial to his subjects. But the more peculiar of David's institutions were those directly bearing on religion. Two prophets appear as the king's constant advisers. Of these, Gad, who seems to have been the elder, had been David's companion in exile, and, from his being called "the seer," belongs probably to the earliest form of the prophetic office. Nathan, who appears for the first time after the establishment of the kingdom at Jerusalem (2 Sam. vii, 2), is distinguished both by his title of "prophet," and by the nature of the prophecies which he utters (2 Sam. vii, 5-17; xii, 14), as the purest type of prophetical dispensation, and as the hope of the new covenant, which he represents in the person of Solomon (1 Kings 1). Two high-priestly representatives of the two rival houses of Aaron (1 Chron. xxvi, 3)—here again, as in the case of the two prophets, also appear: one, Abiathar, who attended him at Jerusalem, companion of his exile, and connected with the old time of the judges (1 Chron. xxvi, 36), joining him after the death of Saul, and becoming afterwards.
the support of his son; the other Zadok, who ministered at Gibeah (1 Chron. xvi. 39), and who was made the head of the Aaronic family (xxvii. 17). Besides these four great religious functionaries, there were two classes of subordinates—prophets, specially instructed in singing and music, under Asaph, Heman, the grandson of Samuel, and Jeduthun (1 Chron. xxv. 1-81); Levites, who sang, and who again were subdivided into the guardians of the gates and guardians of the treasures (1 Chron. xxvi. i, 28) which had been accumulated, since the re-establishment of the nation, by Samuel, Saul, Abner, Joab, and David himself (1 Chron. xxvii. 20-28).

But the various ministers and representatives of worship round the capital must have given a new aspect to the history in David's time, such as it had not borne under the disconnected period of the judges. But the main peculiarity of the whole must have been that it so well harmonized with the character of him who was its centre. As his early martial life still placed him at the head of the military organization which had sprung up around him, so his early education and his natural disposition placed him at the head of his own religious institutions. Himself a prophet, a psalmist, he was one in heart with those whose advice he sought and whose arts he fostered. Whether or not he had formally set himself apart as a priest, he yet assumed almost all the functions usually ascribed to the priestly office. He wore, as we have seen, the priestly dress, offered the sacrifices, gave the priestly benediction (2 Sam. vi. 14, 17, 18); and, as if to include his whole court within the same sacrosanct sanctity, banished, the captain of his guard, was a priest by descent (1 Chron. xxvii. 5), and joined in the sacred music (1 Chron. xvi. 6); David himself and "the captains of the host" arranged the prophetic duties (1 Chron. xxv. 1); and his sons are actually called "priests" (2 Sam. viii. 18; 1 Chron. xviii. 17, translated "chief," and ἀρχοντες, "chief rulers"), as well as Ira, of Manasseh (2 Sam. xx. 26, translated "chief ruler," but ἀρχοντες). Such a union was never seen before or since in the Jewish history. Even Solomon fell below it in some important points.

c. From the internal state of David's kingdom we pass to its external relations. David's further victories were now all but unimportant in comparison with his earlier triumphs. The defection of Moab, Zobah, Edom, Northern League stirred up by the Ammonites, Ammon (see Hase, De regni David. et Salomon. descriptio geogr. hist., Norimb. 1789, 1794). 1. The short and dry notice concerning the Philistines just gives us to understand that this is the era of their decline, and their subjugation, and their wealth were despoiled of their wealth (2 Sam. xvii. ii), and doubtless all their arms and munitions of war passed over into the service of the conqueror. 2. The Moabites were a pastoral people, whose general relations with Israel appear to have been peaceful. The slight notice of Saul's hostilities with them (1 Sam. xiv. 47) is the only breach recorded since the time of Eden and Ehab. In the book of Ruth we see them as friendly neighbors, and much more recently (1 Sam. xxi. 3, 4) David committed his parents to the care of the king of Moab. We know no cause, except David's strength, which now drew his arms upon them. A people long accustomed to peace, in conflict with a veteran army, was struck down at once, but the fierceness of his triumph may surprise us. Two thirds of the population (if we rightly interpret the words, 2 Sam. viii. 2) were put to the sword; the rest became tributary. 3. Who are meant by the Syrians of Zobah is still a question. We might follow the belief that it was a power of northern Syria, then aiming at extensive empire, which had not only defeated and humbled the king of Hamath, but had obtained homage beyond the Euphrates. The trans-Jordanic tribes in the time of Saul had founded a little empire for themselves by conquering their eastern neighbors, the Hagarines, and, perhaps, occasionally overran the district on the side of the Euphrates, which Hadadezer, king of Zobah, considered as his own. His efforts "to recover his border at the river Euphrates" first brought him into collision with David, perhaps by an attack which he made on the roaming Eastern tribes. David defeated not merely his army, but that of Damascus too, and put Seroboth, and put his Israelites garrisons into the towns of the Damascenes (see Michaelis, Hist. bellorum Dar. c. rege Nisibeno, in his Comment. Societ. Soc. Gott. 1763, ii, 71 sq.). In this career of success, we see, for the first time in history, the uniform superiority over raw troops of a power which is always fighting; whose standing army is ever gaining experience and military reputation. Another victory, gained "in the valley of salt," ought, perhaps, to be read, as in 1 Chron. xviii. 12, and in the superscription of Psa. lx, "over the Edomites," not "over the Syrians." The difference of the Hebrew textual letters is very slight, כנה ויהי. The verse which follows (2 Sam. viii. 14) seems to tell the result of this victory, viz. the complete subjugation and garrisoning of Edom, which, like Moab, was incorporated with David's empire. Immediately before this last conquest, as would appear, he wrote the 60th Psalm; and it is not improbable that himself, though not a priest, yet assumed almost all the functions usually ascribed to the priestly office. He wore, as we have seen, the priestly dress, offered the sacrifices, gave the priestly benediction (2 Sam. vi. 14, 17, 18); and, as if to include his whole court within the same sacrosanct sanctity, banished, the captain of his guard, was a priest by descent (1 Chron. xxvii. 5), and joined in the sacred music (1 Chron. xvi. 6); David himself and "the captains of the host" arranged the prophetic duties (1 Chron. xxv. 1); and his sons are actually called "priests" (2 Sam. vii. 18; 1 Chron. xviii. 17, translated "chief," and άρχοντες, "chief rulers"), as well as Ira, of Manasseh (2 Sam. xx. 26, translated "chief ruler," but ἀρχοντες). Such a union was never seen before or since in the Jewish history. Even Solomon fell below it in some important points.
natural strength of their border could not keep out veter-

an troops and an experienced leader; and though the

siegè of the city occupied many months (if, indeed, it

was not prolonged into the next year), it was at last

taken. It is characteristic of Oriental despotsim that

Josiah, who had so lately been invited to in-

vite David to command the final assault in person. David
gathered a large force, easily captured the royal town,
and despoiled it of all its wealth. His vengeance was
as much more dreadful on the unfortunate inhabitants
than formerly on the Moabites, as the danger in which
the Ammonites found themselves was not less im-

mense.

The persons captured in the city were put to

death by torture; some of them being sawed in pieces,
others chopped up with axes or mangled with harrows,
while some were smothered in brick-kilns (2 Sam. xii.
81; 1 Chron. xx. 3). This severity was perhaps ef-

fectual in quelling future movements of revolt or war;

for, until insurrections in Israel embolden them, for-

eign foes after this remain quiet. Others, however,

understand that these prisoners of war were merely

put to hard labor with the various instruments named.

(See Danz, De migetti D vris in Ammonitas crudel-
itate, Jen. 1710; Nippisch, De Ammomitas et Dom. abaque
necesse erat. 1747.) The royal crown, or "crown of Milcom,"
"was placed on David's head (2 Sam. xii. 30), and, according to Josephus (Ant.
vi. 5), was always worn by him afterwards. The He-

brew tradition (Jerome, Qu. Hebr. ad 1 Chron. xx. 2)
represents it as having been the diadem of the Am-

monite god Milcom, or Molech; and that Ittal the Git-

tite (doing what no Israelite could have done, for fear

of pollution) tore it from the idol's head and brought

it to David. The general peace which followed was

commemorated in the name of the "Pecusful" (Sola-

mon), given to the son born to him at this crisis.

To these wars in general may be ascribed psalms ix.
and xcv. 1-15; Job xxxviii. 1-11; 4 Kings iv.
19-20, 23-24, describing the assault on Petra. Psalm
xviii. (repea-

ted in 2 Sam. xxii. 11) is ascribed by its title, and appears

from some expressions to belong to the day "when

the Lord had delivered him out of hand of all his

enemies," as well as "out of the hand of Saul" (2 Sam.
xxii. 1; Psa. xlviii. 1). That "day" may be either

at this time or at the end of his life. Psalms
xx and xxii relate to the general union of religious

and of military excellencies displayed at this time of

his career. (Psalm xvi. 8, "Thou settest a crown of

pure gold;" not inumben, as it refers to the golden
crown of Ammon, 2 Sam. xxii. 30.)

8. David's subsequent History.—Three great calam-

ities may be selected as marking the beginning, mid-
dle, and close of David's otherwise prosperous reign,
which appear to be intimated in the question of Gade
(2 Sam. xxiv, 19), "a three years' famine, a three
months' flight, or a three days' pestilence."

a. Of these, the first (the three years' famine) intro-

duces us to the last notices of David's relations with
the house of Saul. There has often arisen a painful
suspicion in later times, as there seems to have been
at the time (xvi, 7), that the oracle which gave as the
cause of the famine, "a three days' pestilence," may
have been connected with the desire to extin-

guish the last remains of the fallen dynasty. But

such an explanation is not needed. The massacre
was probably the most recent national crime that had
left any deep impression; and the whole tenor of Da-

vid's career towards Saul's family is of an oppo-

tive kind. It was then that he took the opportunity of re-
moving the bodies of Saul and Jonathan to their own

ancestral sepulchre at Zelah (2 Sam. xxiv. 14); and it

was then, or shortly before, that he gave a permanent
home and restored all the property of the family to
Mephibosheth, the only surviving son of Jonathan (2
Sam. xiv. 18; xxii. 7). The seven who perished were
two sons of Saul by Rizpah, and five grandsons

—sons of Michal and Adriel (2 Sam. xvi. 8), as stated

in the common Hebrew and Greek text, and in our re-

ceived version; and Josephus imagines that they were

born of her after a second divorce from David. But

it is certain, from 1 Sam. xviii. 18, that Michal is here

mistakenly regarded, which would not have been done

in David's version. The description of the other

bereaved mother, Rizpah, the daughter of Aiah, who

took her station upon the rock, and watched the bodies

of her sons day and night, lest they should be devoured

by beasts of prey or torn by the birds of the air, is

also deeply affecting. But the passage was not so

heard by it. He would not allow public decency to

be any further offended to satisfy the resentment of

the Gibeonites, but directed the bodies to be taken
down and honorably deposited in the family sepulchre.

b. The second group of incidents contains the tragetic

of David's life, which grew in all its parts out of the

polygamy, with its evil consequences, into which

he had plunged on becoming king. (1.) Underneath

the splendor of his last glorious campaign against

the Ammonites was a dark story, known probably at

that time only to a very few, and even in later times kept

as much as possible out of the view of the people. But

it came to light, and now recounts itself, as the charac-

teristic of his career—the double crime of adultery with

Bathsheba, and of the virtual murder of Uriah. B.C. 1065.

The crimes are undoubtedly those of a common Ori-

ental despot. But the rebuke of Nathan, the sudden

revival of the king's conscience, his grief for the sick-

ness of the child, the gathering of his unholy and elder

brothers around him, his return of hope and prayers

are characteristic of David, and of David only. If we

add to these the two psalms, the 20th and the 51st,

of which the first by its acknowledged internal evi-

dence, the second by its title, also claim to belong to

this crisis of David's life, we shall feel that the instruc-

tion drawn from the sins more than compensated

us at least for the scandal occasioned by it. (See

Bebb, D. vtric peccans et pomulos, Argent. 1708.) But,

though the "free spirit" and "clean heart" of David

returned, and although the birth of Solomon was as

auspicious as if nothing had occurred to trouble the

victorious festival which succeeded it, the clouds from

this time gathered over David's fortunes, and hence-

forward "the sword never departed from his house"
(2 Sam. xii. 10). The outrage on his daughter Tamar,
the murder of his eldest son Amnon, and then the re-

volt of his best beloved Absalom, brought on the crisis
which once more swept him forth through days when
he fled from Saul; and this, the heaviest trial of his
life, was aggravated by the impetuosity of Joab, now,
perhaps, from his complicity in David's crime, more
unmanageable than ever.

(2.) Of all his sons, Absalom had naturally the

greatest pretensions, being, by his mother's side,
grandson of Talmal, king of Geshur; while, through

his personal beauty and winning manners, he was high

in popular favor. It is evident, moreover, that he was

the darling son of his father. When his own sister

Tamar had been dishonored by his half-brother Ar-

non, the eldest son of David, Absalom slew him in

vengeance, and fled with Saul's son in his father's

grandfather at Geshur. B.C. 1038. Joab, discerning
Absalom's longings for his son, effected his return after
three years; but the conflict in the king's mind is

strikingly shown by his allowing Absalom to dwell

two full years in Jerusalem before he would see his

face. See Absalom.

(3.) The rejection of Absalom against the king

was the next important event, in the course of which

there was shown the general tendency of men to look

favorably on young and unrivuted princes rather than

on those whom they know for better and for worse.

B.C. 1028. Absalom erected his royal standard at

Hebron first, and was由此 present his father

outright, which might probably have been done if the
energetic advice of Ahithophel had been followed. The revolt was then based apparently by the growing jealousy of the tribe of Judah seeing their king as sorbed into the whole nation; and if, as appears from 2 Sam. xii, 8; xxiii, 34, Ahithophel was the grandfather of Bathsheba, its main supporter was one whom David had provoked by his own crimes.

It was apparently early on the morning of the day after that news of the rebellion at Hobeon that the king left the city of Jerusalem on foot. He was accompanied by a vast concourse, in the midst of which he and his body-guard were conspicuous. They started from a house on the outskirts of the city (2 Sam. xv, 17, Sept.), and every stage of the mournful story of the event witnessed which was called forth a proof of the deep and lasting afflication which the king's peculiar character had the power of inspiring in all who knew him. The first distinct halt was by a solitary olive-tree (2 Sam. xv, 18, Sept.) that marked the road to the wilderness of the Jordan. Among his guard of Philistines and his faithful company of 600 he observed Itai of Gath, and, with the true nobleness of his character, entreated the Philistine chief not to peril his own or his countrymen's lives in the service of a fallen and a stranger sovereign. But Itai declared his resolution (with a fervor which almost ineluctably recalls a like profession made almost at the same moment—by the great towering gaints in David centuries afterwards) to follow him in life and in death. They all passed over the ravine of the Kecleron; and here, when it became apparent that the king was really bent on departure, "the whole land wept with a loud voice"—the mountain and the valley resounded with the wail of the people. At this point they were overtaken by the two priests, Zadok and Abiathar, bringing the ark from its place on the sacred hill, to accompany David in his flight—Abiathar, the elder, going forward up the mountain, as the multitude defiled past him. Again, with a spirit worthy of the king, who was prophet as well as priest, David turned them back. He had no superstitions belief in the ark as a charm; he had too much reverence for it to risk it in his personal peril. And now the whole crowd turned up the mountain pathway; all wailing, all with their heads muffled as they went; the king only distinguished from the rest by his unsanctified feet. At last, after an altar of worship, they were met by Hushai the Archite, the "friend," as he was officially called, of the king. The priestly garment, which he wore after the fashion, as it would seem, of David's chief officers, was torn, and his head was smeared with dust, in the bitterness of his grief. In fact, David saw his first gleam of hope. A moment before, the tidings had come of the treason of Ahithophel; and, to frustrate his designs, Hushai was sent back, just in time to meet Absalom arriving from Hebron. It was noon when David passed over the mountain top, and now, as Jerusalem was left behind, and the new scene opened before him, two new characters of life in connection with the hostile tribe of Benjamin, whose territory they were entering. One was Ziba, servant of Mephibosheth, taking advantage of the civil war to make his own fortunes. At Bahurim, also evidently on the downward pass, came forth one of its inhabitants, Shimei, in whose furious curses broke out the long-suppressed hatred of the fallen family of Saul, as well perhaps as the popular feeling against the murderer of Uriah. With characteristic replies to both, the king descended to the Jordan valley (2 Sam. xvi, 14; and comp. xvii, 22; Joseph. Ant. vii, 9, 4), and there rested for the long and eventful day at the ford or bridge (Abel) between them, where he was aroused by the arrival of the two sons of the high-priests, and by break of day they had reached the opposite side in safety.

To the dawn of that morning is to be ascribed Psa. iii, and (according to Ewald, though this seems less certain) to the psalmist (see further Psalms. xxv., 4; xlvii., by its title in the Sept., "When he was mourning him," belongs to this time. Also, by long popular belief, the Trans-Jordanic exile of Psa. xliii has been supposed to be David, and the complaints of Psa. liv and lxix to be levished against Ahithophel (q. v.), who, on finding his advice disregarded, committed suicide in a fit of offended pride and despair (see Schwarz, De morte Achitophelis, Wittenb., 1704).

The history of the remaining period of the rebellion is comparatively brief. Mahanaim was the capital of David's exile, as it had been of the exiled house of Saul (2 Sam. xvii, 24; comp. ii, 8, 12). Three great military chiefs of this period, with Zadoc and Abiathar, are mentioned in connection with the king, as supporting him: one, of great age, not before named, Barzillai the Gileadite; the two others, bound to him by former ties, Shobi, the son of David's ancient friend Nahash, probably put by David in his brother's place (xii, 50; x, 2), and Machir, the son of Ammiel, the former protector of the child of David's friend Jonathan (2 Sam. xvii, 57; cx, 4). Strengthened by the warlike Eastern tribes, and surrounded by his experienced captains, the king no longer hesitated to meet Absalom in the field. His forces were armed under the three great military officers who remained faithful to his fortunes—Joab, captain of the host; Abner, Joab's brother; and Amasa, who seems to have taken the place of Benaiab (had he warned in his allegiance, or was he appointed afterwards?), as captain of the guard (2 Sam. xviii, 2). On Absalom's side was David's nephew, Amasa (ib. xvii, 25). The warlike spirit of the old king and of his faithful followers at this extremity of their fortunes is well depicted by Hushai, "chafed in their minds, as a bear robbed of her whelps in the field (or a fierce wild boar in the Jordan valley, Sept.);" the king himself, as of old, "lodging not with the people," but "hid in some pit or some other place" (2 Sam. xvii, 8, 9). The final battle was fought in the "forest of Ephraim," resulting in a decisive victory on the part of David's forces, and terminating in the accident leading to the death of Absalom at the hand of Joab during the retreat. David was waiting the event of the battle in the gateway of Mahanaim. Two messengers, each endeavoring to outstrip the other, were seen running breathless from field to field. Absalom's chief of staff was Ahimeaz, the son of Zadok, already employed as a messenger on the first day of the king's flight. He had been entreated by Joab not to make himself the bearer of tidings so mournful; and it would seem that when he came to the point his heart failed, and he spoke only the words in which he was commissioned by the army. At this moment the other messenger burst in—a stranger, perhaps an Ethiopian—and abruptly revealed the fatal news (2 Sam. xviii, 19–32). See CRUSA. The passionate burst of grief which followed is one of the best proofs of the deep affection of David's character. He wrapped himself up in his sorrow, and even at the very same moment of triumph he could not forget the hand that had slain his son. He made a solemn vow to supersede Joab by Amasa, and in this was laid the lasting breach between himself and his powerful nephew, which neither the one nor the other ever forgave (2 Sam. xix, 15). Perhaps Joab on the former occasion, when he had persuaded the king to lead the king by pleading revenge for the blood of Asahel, but no such pretence could here avail. The king was now probably brought to his determination partly by his disgust at Joab, partly by his desire to give the insurgents confidence in his amnesty. If Amasa is the same as Amasai, David may have thereby retained a grateful remembrance of the cordial support of Abishai, which he had led a strong band to his assistance at the critical period of his abode in Ziklag (1 Chron. xii, 18); moreover, Amasa, equally with Joab, was David's nephew, their two mothers, Abigail and Zeruiah, being
sisters to David by at least one parent (2 Sam. xvii, 25; 1 Chron. ii, 13, 16). The unscrupulous Joab, however, was set at naught before long, by catching an opportunity, he assassinated his unsuspecting cousin with his own hand; and David, who had used the instrumentality of Joab to murder Uriah, did not dare to resent the deed (2 Sam. xx, 5-12).

The return was marked at every stage by rejoicing and public rejoicing, even Mephibosheth partially reinstated, Barzillai rewarded by the gifts long remembered, to his son Chimham (2 Sam. xix, 16-40; 1 Kings ii, 7). Judah was first reconciled. The embers of the insurrection still smouldering (2 Sam. xix, 41-43) in David's hereditary enemies of the tribe of Benjamin were put out by the majesty of boldness and sagacity in Joab, now, after the murder of Amasa, once more in his old position. David again reigned in undisturbed peace at Jerusalem (2 Sam. xx, 1-22).

(4). A quarrel, however, which took place between the men of Judah and those of the other tribes in bringing the king back, led, encouraged a Benjamite named Sheba to raise a new insurrection, which spread with wonderful rapidity. "Every man of Israel," are the strong words of the text, "went up from after David, and followed Sheba, the son of Bichri," a man of whom nothing besides is known. This strikingly shows the great length of the line of David's descent of reign had to a great degree exhausted the enthusiasm once kindled by his devotion and chivalry, and that his throne now rested rather on the rotten foundation of mere military superiority. Amasa was collecting troops as David's general at the time when he was treacherously assassinated by his cousin, who, then, with his usual energy, pursued Sheba, and blockaded him in Beth-massah before he could collect his partisans. Sheba's head was cut off and thrown over the wall; and so ended the now rising (2 Sam. xx, 1-22).

Yet this was not the end of trouble, for the intestine war seems to have inspired the Philistines with the hope of throwing off the yoke. Four successive battles are recorded (2 Sam. xxii, 15-22), in the first of which the aged David was nigh being slain. His faithful officers kept him away from all future risks, and Philistias was once more, and finally, subdued.

c. The closing period of David's life, with the exception of the opening. Graduated preparation for the reign of his successor. This calamity was the three days' pestilence which visited Jerusalem at the warning of the prophet Gad (see Blessig, De censu Dav. pestepatu hunc secuit, Arg. 1788; Becker, Quaer Deis Davidem pestislastis puniuit, in theTPS, 1741) which led to this warning was the census of the people taken by Joab at the king's orders (2 Sam. xxiv, 1-9; 1 Chron. xxii, 1-7, xxvii, 23, 24); an attempt not unnaturally suggested by the increase of his power, but implying a confidence and pride alien to the spirit inculcated on the kings of the chosen people. Joab's repugnance to the measure was such that he refused altogether to number Levi and Benjamin (1 Chron. xxxi, 6). The king also scoured to number those who were under twenty years of age (1 Chron. xxvii, 23), and the final result was never recorded in the "Chronicles of King David" (1 Chron. xxvii, 24). The plague, however, and its cessation were commemorated down to the latest times of the Jewish nation. Probably Psalms xxx and xxxxi have reference to this time. But a more certain memorial was preserved on the exact spot which witnessed the close of the pestilence, or, as it was called, "The Death." Outside the walls of Jeru-
salem, on Aranyah or Ornan, a wealthy Jebusite—perh-
haps even a descendant of the ancient king of Jebus (2 Sam. xxiv, 23)—possessed a threshing-floor; there he and his sons were engaged in threshing the corn gathered in the harvest (1 Chron. xxii, 20). At this spot an awful vision appeared, such as is described in

the later days of Jerusalem, of the Angel of the Lord stretching out a drawn sword between earth and sky over the threshing-floor. Before long at such a period was at once marked out for a sanctuary. David demanded, and Araunah willingly granted, the site; the altar was erected on the rock of the threshing-floor; the place was called by the name of "Moriah" (2 Chron. iii, 1); and for the first time a holy place, sanctified by a vision of the Divine presence, was recognised in Jerusalem. It was this spot which afterwards became the altar of the Temple, and therefore the centre of the national worship, with but slight interruption, for more than 1000 years, and it is even contended that the same spot is the rock, still regarded with reverence and devotion, in the centre of the Musulman "Dome of the Rock" (see Prof. Willis in William's Holy City, ii).

The selection of the site of this altar probably revived the schemes of the king for the building of a permanent edifice to receive the ark, which still remained inside his own palace in its temporary tent. Such schemes, we are told, he had entertained after the capture of Jerusalem, or at the end of his wars. Two reasons were given for their delay: one, that the ancient nomadic form of worship was not yet to be abandoned (2 Sam. vii, 6); the other, that David's wars unfitted him to be the founder of a seat of peaceable and powerful worship. The importance of David's reign was that his dynasty should continue "for ever" to prosecute the work (2 Sam. vii, 13; 1 Chron. xxii, 9, 10). Such a founder, and the ancestor of such a dynasty, was Solomon to be, and to him, therefore, the stores and the plans of the future Temple (according to 1 Chron. xxii, 2-19; xxviii, 1-xxix, 19) were committed.

d. The last commotion recorded took place when David's end seemed nigh, and Adonijah, one of his elder sons, feared that the influence of Bathsheba might gain the kingdom for her own son Solomon. B.C. 1015. Adonijah's conspiracy was foiled by Abi-
athar, one of the two chief priests, and by the redoubt-
led Joab; upon which David took the decisive measure of raising Solomon at once to the throne. Of two young monarchs, the younger and the less known was easily preferred, when the sanction of the existing government was thrown into his scale; and the cause of Adonijah, in the words of Nathan, Beniaia, Shimei, and Rei remaining firm, the plot was stifled, and Solomon's inauguration took place under his father's auspices (1 Kings i, 1-58). See Ado-
nijah. Anmerity was proclaimed to the conspirators, and was faithfully observed by Solomon till a later vi-
ation of Solomon's reign.

4. By this time David’s infirmities had grown upon him. The warmth of his exhausted frame was at-
tempted to be restored by the introduction of a young Shunamite, of the name of Abishag (q. v.), mentioned apparently for the sake of an incident which grew up in connection with her over the rest of his reigns (1 Kings i, 1: i, 17). His last song is preserved (see Pfeiffer, Erfahr. der sogenannten letzten Werke Davids, Altdorf, 1774; De Baer, In ultima erba Davidis, in the Bibl. Hag. ii, 489-504; Trendelenburg, In erba novissima Davidis, Gotting, 1779)—a striking union of the ideal of a just ruler which he had placed before him, and of the difficulties which he had to face in the city of David (1 Kings xxiii, 1-7). His last words, as recorded, to his suc-
cessor are general exhortations to his duty, combined with warnings against Joab and Shime, and charges to remember the children of Barzillai (1 Kings ii, 1-9).

He died B.C. 1013, at the age of seventy (2 Sam. xxx, 34; 1 Kings i, 4), and was buried in the city of David (1 Kings ii, 10). After the return from the captivity, "the sepulchres of David" were still pointed out "between Siloah and the house of the "mighty men," or "the guard-house" (Neh. iii, 15). His tomb, which became the general sepulchre of the kings of Judah, was point-
DAVID  699  DAVID, CITY OF

ed out in the latest times of the Jewish people. "His sepulchre is with us unto this day," says Peter at Pentecost (Acts ii, 29); and Josephus (Ant. vii, 15, 8; xiii, 8, 4, xix, 7, 11) states that Solomon, having buried a vast treasure in the tomb, one of its chambers was broken open by Hyrcanus, and another by Herod the Great. It is said to have fallen into ruin in the time of Hadrian (Dio Cassius, lix, 14, 11). In Jerome's time a tomb, so called, was the object of pilgrimage (Ep. ad Euch. 162, 4), but apparently in the neighborhood of Bethleem. The edifice shown as such from the Crusades to the present day is on the southern hill of modern Jerusalem, commonly called Mount Zion, under the so-called "Conaculum." For the description of it, see Barclay's City of the Great King, p. 299. For the traditions concerning it, see William's Holy City, ii, 505-518. The so-called "tomb of the kings" have of late been claimed as the royal sepulchre by De Saully (i, 162-215), who brought to the Louvre (where it may be seen) what he believed to be the lid of David's sarcophagus. But these tombs are outside the walls, and therefore cannot be identified with the tomb of his bones emplasically within the walls (see Robinson, iii, p. 252, note). The character of David has been so naturally brought out in the incidents of his life that it need not be here described in detail (see Niemeyer, Charakter, iv, 125 sq.). In the complexity of its elements, passion, tenderness, generosity as a soldier, the shepherd, the poet, the statesman, the priest, the prophet, the king—the romantic friend, the chivalrous leader, the devoted father—there is no character of the O. T. at all to be compared to it. Jacob comes nearest in the variety of elements included within it. But David's character stands at a higher point of the sacred history, and represents the Jewish people just at the moment of their transition from the lofty virtues of the elder system to the fuller civilization and cultivation of the later. In this manner he becomes naturally, if one may say so, the likeness or portrait of the last and greatest development of the nation and of the monarchy in the person and period of the Messiah. In a sense more than figurative, he is the type and prophecy of Jesus Christ. Christ is not called the son of Abraham, or of Jacob, or of Moses, but he was truly "the son of David." To his own people, his was the name most dearly cherished, after their first and only claim to life, if the choice of David was the choice of David, "the seed of David," "the throne of David," "the son of David," "the oat sworn unto David" (the pledge of the continuance of his dynasty), are expressions which pervade the whole of the Old Testament and all the figurative language of the New; and they serve to mark the lasting significance of his appearance in history.

His Psalms (whether those actually written by himself be many or few) have been the source of consolation and instruction beyond any other part of the Hebrew Scriptures. In them appear qualities of mind and religious perceptions not before expressed in the sacred writings. The writings of David—the love of nature, the sense of sin, and the tender, ardent trust in, and communion with, God. No other part of the Old Testament comes so near to the spirit of the New. The Psalms are the only expressions of devotion which have been equally used through the whole Christian Church—Abyssinian, Greek, Latin, Persian, Arabic, and Hebrew.

The difficulties that attend his character are valuable as proofs of the impartiality of Scripture in recording them, and as indications of the union of natural power and weakness which his character included. The Rabbis in former times, and critics (like Bayle) in later times, have exaggerated their weaknesses and exaggerated them to the utmost. It has often been asked, both by scoffers and the serious, how the man after God's own heart could have murdered Uriah, and seduced Bathseba, and tortured the Ammonites to death? An extract from one who is not a too-in dulgent critic of sacred characters expresses at once the common sense and a good lesson of the whole matter. "Who is called the 'man after God's own heart'? David, the Hebrew king, had fallen into sins enough—blackest crimes—there was no want of sin. And therefore the unbeliever sneer, and ask, 'Is this your man according to God's heart?' The sneer, I must say, is almost contemptuous. What are faults, what are the outward details of life, if the inner secret of it, the remorse, the temptations, the often baffled, never ended struggle of it be forgotten? . . . David's life and history, as written for us in these Psalms of his, I consider to be the truest emblem ever given us of a man's moral progress and warfare here below. All earnest souls will ever discern in it the faithful struggle of an earnest human soul towards what is good and best. Struggle often baffled—sore baffled—driven as into entire wreck; yet a struggle never ended, ever with tears, repentance, true unconquerable purpose begun anew" (Carlyle's Heroes and Heroes: or Hero-Worship). See generally Havercamp, Dav. res gestae vindicatam (L. B. 1735); Niemeyer, Uber Leben und Char. Dav. (Hal. 1779); Ewald, Leben Dav. (Gera, 1795); Hau ser, De Histor. Dav. (Tub. 1780); Hosmann, Hist. Sam. Sauth et Dav. (Kil. 1782); Feuerlein, Illustria Davisci facta et juris (Augs. 1715); Mober ton, David, the King of Israel (Lond. 1810); Oetinger, Life of David illustrated by Psalms (Lond. 1858); A. L. O. Y. 1868). See Psalms.

B. In ityrs. The "House of David" (Isa. vii, 3, 18; Jer. xxi, 12; Zech. xiii, 1) signifies his family, posterity. "In David," that is, in the Book of David, the Psalms (Matt. xxii, 44-46; Heb. iv, 7; Ps. xcv, 7). The name "Davida" in Ezek. xxxiv, 28, 24; xxxvii, 24; Hos. iii, 5 denotes the expected Messiah. "The Son of David" is often applied to Jesus as a title of the Messiah (Matt. i, 1; ix, 27; xii, 23; xv, 22; xx, 50, 51; Mark x, 47, 48), but not in John's writings. So the "Root of David" is used in the same sense (Rev. xii, 5; xiii, 15; 1 Peter ii, 6). Herein the kingdom of the Messiah is designated by the apppellations "the Kingdom of David" (Mark xxi, 10); "the Throne of David" (Luke i, 32); "the Tabernacle of David" (Acts xv, 16; Amos ix, 10); "the Key of David" (Rev. iii, 7; Isa. xxii, 22; Matt. xvi, 19). DAVID, CITY OF. This name is applied in Scripture to two different places.

1. In 2 Sam. v, we read that David, having taken Jerusalem, and stormed the citadel on Mount Zion, "dwelt in the fort, and called it the city of David" (1 Chron. xi, 7). After that time the castle and palace of Zion appear to have been called "the City of Da vid," as containing the residence of David. So generally, and from Moriah and other sections of it (1 Kings viii, 1; iii, 1; 2 Chron. v, 2). In it David and most of his successors on the throne were buried (1 Kings ii, 10; 2 Chron. ix, 31, etc.). Mount Zion, or the City of David, is on the south-west side of Jerusalem, opposite Moriah, or the temple-hill, with which it was connected by a bridge spanning the deep valley of Tyropoeon. The tomb of David on Zion is to this day one of the most honored sanctuaries of the Mohammedans; and the square keep, called the Castle of David, on the northern end of Zion, is one of the most ancient and interesting relics in the Holy City. See JERUSALEM.

2. In Luke ii, 4 and 11, Bethlehem is called the City of David. Joseph and Mary went from Nazareth "unto the city of David, which is called Bethlehem."
This was David's birthplace, and the home of his youth. We know not at what time the little mountain village began to be called by his name; but there is no trace of such a designation in the O. T. It appears, however, to have been pretty generally used in the time of our Lord. See Bethle-

David, or David, Sr., patron saint of Wales, was, according to tradition, the son of the prince of Ceretica (Cardiganshire), and was born about the end of the 6th or beginning of the 7th century. Having resolved on a religious life, he spent, as was customary in those days, a probationary period in solitude, after which he commenced preaching to his countrymen. He built a chapel at Glastonbury, and founded twelve monas-
teries, the chief of which was at Menevia, in the vale of Ross. At the synod of Brey, in Cardiganshire, held in 519, David showed himself a strong opponent of the Pelagian heresy. Subsequently he became archbishop of Caerleon-upon-Usk, but transferred his see to Menevia, now called St. David's, where he died about the year 601. His life was written by Rice-
march, bishop of St. David's, who died about the year 1099. The Historia S. Davidis, by Giraldus Cambren-
sis, written about 1175, and published in Wharton's Antiquitates Cambriae, is little more than an abbreviation of Ricemarch's work.—Burler, Lices de Saiuis, March 1.

David, Christian, one of the founders of Hern-
hut, was born Dec. 31, 1690, at Sentlefle, Moravia, and was bred a carpenter. In early manhood he be-
came a Protestant. In 1722 he was sent to find a home in the persecuted Moravians, and secured one from Count Zinzendorf, at Bertholdsdorf, Lusatia. See Moravians. When the church was organized at Hernhut (their new abode), David was elected first of the twelve elders. His subsequent life was entirely devoted to missionary and Christian labors. In 1738 he led the first Moravian Mission to Greenland. In 1788 Wesley had several interviews with David at Hernhut. The after labors of David included two additional visits to Greenland, and eleven to Moravia; with others to Denmark, Holland, Wetteravia, Livo-
nia, and England. In the beginning of 1750 he visited all the congregations in Germany, and almost im-
mediately was sent to London. In July he re-em-
barked for Germany, visited the churches in Wettera-
via, and assisted at the synod held at Barly. From that period he resided at the church which his hands had founded. The toils of an honored and useful life were unexpectedly closed by his death, after a short illness, on Jan. 3, 1751. See also Stevens, History of Methodism, i, 97; Wesleyan magazine, March, 1892; Wesley, Works, iii, 86; v, 284.

David of Dinant (13th century) is said to have been a disciple of Amalrich of Bena (q. v.), who died A.D. 1207. The Council of Paris (A.D. 1209) not only condemned Amalrich, but also David of Dinant. Thomas Aquinas (Sent. ii, Dist. xvii, qu. i, art. i) speaks of some philosophers and other heathen thinkers of Da-
v, and attributes to him a doctrine in substance pan-
thetic: "God is the eternal substance; all things are God, and God is everything." Albertus Magnus speaks of a treatise of his, De Tomis. But, in fact, little is really known of David or his writings, except that he was one of the leaders of the pantheistic tendency in the Middle Ages. Neander (History of Dogmas, ii, 560, Ryland's translation) gives the chief authorities for what is known of David's doctrines, viz. Conc. Paris, a. 1209. In Martene Theaurum. Anecdot. iv, 163; Albertus Magnus, Summa F. J. Tract. iv, Quesmo 20, Membr. ii, ed. Logl. t. xvii, f. 76; Thomas Aquinas, in Sent. ii, Dist. xvii, qu. i, art. i, ed. Venet. t. x, p. 285, David "described God as the principium materiale omnium rerum, and in reference to the three depart-
ments of existence distinguished three principles:

master, the first indivisible principle of the corporeal world; in reference to the spiritual world—spirit, the invisible soul from which proceeds the soul; and in reference to the ideas of God—the first Individual in the eternal substance. Between these three principles no distinction could exist, for otherwise they must be referred back to a higher principle of unity. There are, therefore, three relations of the one divine Being to the corporeal, the spiritual, and the ideal worlds." See Baur, Vorles. b. d. Dogmenlehre, 1866, vol. ii, p. 328; Gifford, Hist. Rel. civ, vol. ii, § 74; Jansen, De Rebus, ii, 64 sqq.; Engelhardt, Amalrich von Bena, in d. kirchh. Abhandlungen. No. 3; Krelenin, Amalrich von Bena u. David von Dinant, in Stud. u. Krit. 1847, i, 571 sq.

David (Maronite archbishop, A.D. 1053) of Mount Libanos, wrote an Epistle to Arsenius concerning the Melchite and Maronite sects; also a Treatise on the opinions of the Eastern Christians, part of which was published by Abraham Echeclemis (a Roman Maroni-

t), Antiq. Orient. p. 459 (London, 1882). In the year 1059, at the request of the abbot Joseph, he translated from Arabic the Epistles of the fathers, and died in France, little more than an abridgment of his Ricemarch's work.—Butler, Lives of Saints, March 1.

David of Augsburg, a Franciscan of the 13th century, was a friend of Berthold of Ratisbon, whom he accompanied on his missionary journeys. He died in Augsburg in 1271. Three tractates of his are given in the Galler, Ch. Hist. Patrum, vol. x., viz. The Novice's Formula for the Reformation of the Outer Man, A Formula for the inner Man, and A Mirror of the seven Steps of a Religious. These tractates have accurately been as-
cribed to Bonaventura. Several of his works were written in the German language, and of this class six have been published by Pfleffer in his Deutsche Mystiker des 13ten Jahrhunderts (Leipzig, 1846).—Oudin, Com-
ment. de Script. Eccles. iii, 447.

Davidiata, followers of David Joris. See Joris.

David's, Sr., an episcopal city in Pembroke, Wales. It has been the seat of a bishopric since about 519, when St. David (q. v.) transferred the archbish-
op's see to St. David's (before called Mynyw, and by the Romans Menevia) from Caerleon. It was in the Middle Ages a large city—the great resort of pilgrims to St. David's, St. Blane's, and St. Flavian. History of Methodism, i, 47, 179, 171. See also only a few good houses besides those of the clergy. It has a fine cathedral, and splendid remains of religious houses, episcopal palace, and St. Mary's College (founded by John of Gaunt), within a high embattled wall nearly a mile in circuit. The cathedral, founded in 1180, on the site of the monastery of St. David, is cruciform. Its dimensions, in the interior, arc as follows: length, 290 feet; breadth, 76; nave, 124; choir, 80; transept, 129; central tower, 127 feet high. Among the former bishops may be named Laud, Bull, South, and Horsley. The present incum-
bent (1678) of the see is Canon Johnell, the historian of Greece. The cathedral establishment in-
cludes a bishop, a dean, four canons, five vicars choral, and other officers residuary, with four archdea-
cons, and 12 prebendaries, or honorary canons, non-
residents.

Davidson, Robert, D.D., an eminent Presby-

terian divine and scholar, was born at Elkton, Md., in 1756, and graduated at the University of Pennsylvania 1771. In 1773 he was ordained by the Second Presby-

terian of Philadelphia, and became associate pastor of the First Church and professor of history in the Uni-

During the Revolution he was a zealous
Whig, and when the British occupied Philadelphia he retired to Delaware. In 1784 he was appointed vice-president and professor of belles-lettres in Dickinson College, and was also called to be pastor of the First Presbyterian Church in Carlisle. On leaving Phila-
delphia, he was asked D.D. by the General Assembly, but declined the offer.

In 1785 he was appointed by the Old Synod of New York and Philadelphia, along with Drs. Alison and Ewing, on a committee to prepare an improved version of the Psalms to take the place of Rome. In 1796 he was chosen moderator of the General Assembly, and in 1804 he succeeded Dr. Nisbet in the presidency of the college, which he resigned in 1809, in order to devote himself exclusively to his pastoral duties. He died at Carlisle Dec. 13, 1812. His publications are: A Dialogue, with two Odes to Music, 1775; An Essay on the Astronomical Telescope, 1784; The Christian in a Masonic World; Papers on Astronomy; Funeral Eulogium on Washington, 1799; The Christian's A, B, C, 1811; New metrical Version of the Psalms, 1812; Occasional Ser-
mons. —See Sprague, Annals, iii, 322.

DAVIS, SAMUEL, a Presbyterian minister, president of the College of New Jersey, was born near Summit Ridge, Newcastle County, Del., Nov. 8, 1725. He was educated at Fogg's Manor School, where he completed his theological studies also, and was licensed July 30, 1746. He was ordained as an evangelist in 1747, undertook a mission to Hanover County, Va., and on his arrival obtained a license from the General Court to officiate at four different places of worship. In 1748 he accepted a call to Hanover, and, having received an extension of his license, he divided his labors between five counties with great success. He subsequently claimed the privilege of the Act of Toleration for Virginia, and received a letter "under authority" in England confirming his views. In 1758 he went to England in behalf of the College of New Jersey, and returned to Virginia in 1756, when the First Presbyterian Church of Hanover was formed for him through his instrumentality. In 1769 he became president of New Jersey College, and removed to Princeton, where he died Feb. 4, 1761. It is deserving of record that in a discourse on the occasion of Braddock's defeat he made the following prophetic remark of Washington: "He may point out to the public that heroic youth, colonel Washington, whom I cannot but hope Providence has hitherto preserved in so signal a manner for some important service to his country." In the pulpit he was at once instructive and persuasive, full of light, and power, and love; and his manner of delivery was worthy of his fine thought, splendid diction, and deeply evangelical spirit. His sermons, which are strikingly eloquent, have been often reprinted; the latest editions are those of Albert Barnes, with a life of the author (New York, 1851, 3 vols. 8vo), and that of the Presbyterians Board, with memoir by Dr. Sprague (Phila. 3 vols. 8vo).—Sprague, Annals, iii, 149.

DAVIS, Charles A., a Methodist Episcopal minister, was born Oct. 7, 1802, and was admitted on trial by the Baltimore Conference in 1824. During his itinerant life he filled many important appointments. He was stationed three times in Baltimore. He served also in Philadelphia, Washington, New York, Mont-
gomeryville, Circuit, Md., Alexandria, D. C., Annapolis, Md., and in the circuit of Winchester, Va., in 1828. In 1829, Va., he was one of the secretaries of the General Conference at its session in Philadelphia. For several years he was clerk in one of the departments of the general government in Washington, where he was received into the Virginia Conference of the Methodist Episcopal Church South, and filled an appointment in Rich-
mond, and also in Portsmouth, Va. While in Portsm-
outh he received the degree of D.D. from the University. The double duties devolving on him at Carlisle were dis-
charged with signal ability, industry, and success. His learning embraced a wide range, including eight languages, theology, and physics. He was especially devoted to astronomy, and invented an ingenious ap-
proximation to the earth's parallax from the north pole, and the latter conclusion he published in the American Journal of Science, 181, 1812.

DAVIS, John, a Methodist Episcopal minister, was born in Northumberland County, Va., Dec. 30, 1757, was converted at 19, entered the itinerancy of the Balt-
more Conference in 1810, and died in Hillsborough, Va., Aug. 13, 1853. Mr. Davis was a very important and useful minister for more than forty years. As soon as he was converted he began to exhort and preach publicly, and with great effect, even before he had become a member of the Church, and on a circuit in 1818 about one thousand souls were converted by his preaching. In person he was commanding, and his voice was excellent. His mind was well balanced and robust, and his social qualities fine. As a minis-
ter and presiding elder he had few equals, and he was always a leading member of the councils of the Church. He was an able agent and trustee of Dickinson College, and a member of every General Conference, save two, from 1816 to the time of his death.—Minutes of Con-
fere</raw_text>
mention other objections—it has been alleged that even in ritual points the Bible occasionally reckons the night as following, not as preceding the day (Lev. vii, 15). There seems, in fact, no other way of reconciling these apparent inconsistencies than to assume (comp. Mishnah, Chukin, v, 6) that no absolute rule had been laid down with respect to the commencement of the civil day, and that usage varied according to the customs of the people where the Hebrews were for the time sojourning. The prevalent method of computation; however, is evinced by the fact that the Jewish civil day still begins, not with the morning, but the evening—thus the Sabbath commences with the sunset of Friday, and with the sunset of Saturday. That this was the case in Judaea in our Saviour's day is evident from the evangelists' account of the Passion. In New England the same mode of reckoning the Sabbath was formerly common. See FESTIVAL.

The Jews are supposed, like the modern Arabs, to have adopted from an early period minute specifications of the parts of the natural day (see Jew. Sac. Lit. Jan. 1862, p. 471). Roughly, indeed, they were content to divide it into its "morning, evening, and noon-day" (Psa. lv, 17); but when they wished for greater accuracy they pointed to six unequal parts, each of which was again subdivided. These are held to have been:

(I.) Nisheph, נִשֵּׁה (from נָשַׁה, to blow), and shachak-ah, שַחַךָ-א, or the dawn. After their acquaintance with Peraea they divided this into (a) the time when the eastern and (b) when the western horizon was illuminated, like the Greek Leucotis—Matuta—and Aurora; or "the gray dawn" (Milton) and the rosy dawn. Hence we find the daw Shaharah as a proper name (see Psa. xli, 8). The word Talmud divides the dawn into four parts, of which there was, 1. Ajetiahl ha-shachak (q. v.), "the gazelle of the morning," a name by which the Arabs call the sun (comp. "eyebles of the dawn," Job iii, 9; בָּלָבָל מֵאָוֶת, Soph. Antig. 105). This was the time when Christ arose (Mark xvi, 2; John xx, 1; Rev. xii, 16; יָאָשִׁים, Matt. xxvi, 1). The other three divisions of the dawn were, 2. "when one can distinguish blue from white" (πρωί, αυριακως εις ηλιος, John xx, 1; "obscurum adhuc corporis lucis," Tacit. H. iv, 2). At this time they began to recite the phylacteries. 3. When the east began to grow light (אֲפִסָּה בָּאָה, Luke xxiii, 4) i.e., when the white light (Apost. 639; Wilkinson, Anc. Ec. iv, 274). 4. The time signified no longer the use of morning years (Gen. p, 67). Sometimes, however, they reckoned from sunrise (הַמַּעֲמַכְרָת, comp. Psa. i, 2; Lev. vii, 15). The less obvious starting-points of noon and midnight, the former adopted by the Etruscans, etc., the latter by the Roman priests, Egyptians, etc. (see, however, LeRoy, Chron. p. 130), and others, were chosen either as the culminating points, as it were, of light and darkness, or for astronomical purposes (Ideler, Hist. d. Chron. i, 29, 80, 100 sq.; comp. Tacit. Germ. 11; Macrobius, Sat. xxxiii, etc.). To the Hebrews, the moon had distinctly been pointed out as the regulator of time (Psa. civ, 19). Nevertheless, it has always been a moot point whether the Hebrews, at all times and in all respects, began their calendar or civil day with the night. (See Felseisen, De civili Judorum dip. Lpz. 1703; Federreuther, De diebus Egyptiacis, Aldt. 1757.) It has been argued that, if this had been the case, the lawgiver could not have designated those very evenings as being the "preparation of the night" (John xvi, 1); and that of the fast days, mentioned in Zech. vii, 19. only one begins with the previous evening. Finally—not to
DAY 703

(8, dýniva), or real sunset; Josephus, War, vi, 9, 3; Gesenius, s. v.; Jahn, Bibl. Arch. 5. 101; Bochart, Hieros, I, 558.

See Evening.

The Hebrew also mid-day (Mishna, Pesach, iv, 1, 5, 6). See MIDNIGHT.

Since the Sabbath was reckoned from sunset to sunset (Lev. xxiii, 32, 34), p. 461, etc. See DAVEN.

In Ezek. iv, 4-5, a day is put symbolically for a year. Errorously supposing this statement to be a precedent, many interpreters of the prophecies have taken it for granted that one day stands for a year in the prophetic writings of Daniel and John. Such, however, is not the case; the word day is to be taken in its literal sense, unless the context expressly indicates the contrary. On the prophetic or year-day system (Lev. xxx, 4, 8; Num. xiv, 34), see a treatise in Elliot's Hor. Apoc. iii, 154, sq., and Prof. Stuart on "The Designations of Time in the Apocalypse," Bib. Repository, v, 80-88. See Year.

The ancients superstitiously held that certain days were lucky (füsiti) and others unlucky (nefüsiti), and the distinction was sometimes indicated by different colors in the calendar ("red-calendar" or rubric). See CALENDAR.

The duration of the Mosaic or demigamic days of the Hebrews was 12 months (Gen. 5-81), has been a matter of considerable dispute. The various opinions on this subject, and the difficulties in which most of them are involved, are stated under the head of CREATION. See also the articles COMMOSONY; SABBATH; MILLENNIUM; the M. R. Quarterly Review, April, 1865; Evangelical Quarterly Review, January, 1868 (art. GEOLOGY).

The word day of the sacred writers to denote an indefinite time (Gen. ii, 4; Isa. xxii, 5). The "day of temptation in the wilderness" was forty years (Heb. iii, 8). The "day of the Lord" signifies, generally, a time of calamity and distress (Isa. ii, 12; Joel ii, 11). It is also used of a festal day (Hos. vii, 5), a birthday (Job iii, 4), a day of ruin (Hos. i, 11; Job viii, 20); comp. tempus, tempora, reipublica, Cic., and dies Commemoratiunis, the judgment-day (Joel i, 15; 1 Thess. v, 2), the kingdom of Christ (John viii, 56; Rom. xiii, 12), and in other senses which are mostly self-explaining (see WENYAS, Symbol. Dict. s. v.). In Re 14. Cor. iv, 3, the "day of the Lord" is described as the "man's judgment:" Jerome (ad Alph. Quest. x) considers this a citation of Bochart, Hieros, ii, 471. On Rom. xiii, 12, there are two treatises—Kuinöl, Explication (Gies. 1688); Rachm. De nocte et die (Tubingen, 1764). See Time.

The phrases "last day" (or dafon), "that day," are "the general formulas of the prophets for an indefinitely left future opened up in perspective" (Stier, Words of Jesus, ii, 861, Am. ed.); designating the Mesianic period, with its introductory age, that of the Maccabees (after the return from exile), and its consummation in the millennium. See ESchatology. In a more literal and limited sense, the final judgment is designated. See Last Day.

DAY OF ATONEMENT. See ATONEMENT, DAY OF.

DAY'S JOURNEY (πολλαπλασιασθαι, ἐξῆς ἔγενον, Herod. iv, 101), a distance such as (in the East) a person might travel in a single day. Comp. SABBATH-DAY'S JOURNEY. According to Jonah iii, 3, the circuit of Nineveh was three days' journey. This mode of describing distances is also found in Greek, Roman, Arabian, and Persian writers (see Strabo, xvii, 885; Pliny, v, 4, 9; vi, 85; Livy, xxv, 15; xxx, 29; Athen. i, 7). It needs scarcely be remarked that in itself it would be a very vague and fluctuating measurement, the length of a day's journey depending so much on the peculiar circumstances under which each pedestrian travels
DAY (see Casaubon ad Strab. i, 85; Ubert, Geogr. d. Griech. u. Röm. i, ii, 58). But the ancient writers seem to have fixed a standard ordinarily employed by the length of a day's journey. According to Ptolemy (vol. ii, 15), in another (v, 55) to 150 (comp. Pausanias, x, 38, 2). According to Vegetius (Mili. i, 9), twenty Roman miles, which is 160 stadia, were reckoned for a day's journey. In the Arabian geographers the length of a day's journey is usually employed among themselves, as in the East at the present day (Tavernier, i, 48), it may be stated generally at about seven leagues, or from eighteen to twenty English miles, which is probably not far from the distance intended by that expression in Scripture, which occurs chiefly in the Pentateuch (Gen. xx. 36; xxxii. 23; Exod. v. 9; vii. 27; Num. xi. 31; Deut. i. 2), but also elsewhere (1 Kings xii. 4; 2 Kings iii. 9), and even in the Apocalypse (1 Macc. iv. 24, 28; vii. 45; Tobit vi. 1), in the New Test. (Luke ii. 44; Acts i. 12), often in Josephus, (Ant. xii. 4, 6; Ap. ii. 9; Lift. 52), and in the Talmud (see Olof, Lex. Rabb. p. 421). See Journey.

Day, Jeremiah, D.D., president of Yale College, was born in New Preston, Conn., August 3, 1774, and was educated at Yale College, where he graduated in 1793. After two years spent at Greensfield School, Williams College, and Yale, he was licensed as a minister of the Congregational Church in 1800, and in 1801 he was elected professor of mathematics and natural philosophy in Yale College. His health failing, he spent a year or two in travel and retirement, and did not begin his labors in college until 1808. He held that office until 1817, publishing meanwhile a series of mathematical text-books well-adapted to the wants of the time, and which had great success. On the 22d of April, 1817, he was chosen president of Yale College, and held that office till 1846, when his sense of the infirmities of age induced him to resign, against the judgment and wishes of his colleagues, as his judgment and governing faculties were yet in abundant vigor. Notwithstanding chronic feebleness of constitution, his careful habits of life, formed after physiological study of his own constitution, enabled him to preserve his intellectual vigor, and a fair degree of both mind and body, to the year of the year of his death, which occurred August 22, 1867. Besides his mathematical works, president Day wrote An Inquiry respecting the self-determining Power of the Will (1838; 2d ed. 1849), which was substantially a refutation of Cousin's view of the will as given in his Psychology, or Examination of the Will (1841; 1908, which is an abstract of Edwards, made in a lucid and truth-loving spirit. He also contributed numerous articles to reviews and journals. As a college officer, his moral and intellectual qualities combined to make him a model. See an admirable sketch by president Wooley, New Englander, Oct. 1867, art. v.

Dayman (דָּאָם, mōkāʾ ḥak, an adjutator), "an old English term meaning umpire or arbitrator (Job ix. 30). It is derived from day, in the specific sense of a battle, hence a warrior, a fighter, a man, a man's day, and so given in Wyckliffe's translation—is rendered 'man's judgment' in the A. V.). Similar expressions occur in German (eine Sache tagen=to bring a matter before a court of justice) and other Teutonic languages." The primitive meaning of the word דָּאָם (according to Gesenius, Thes. p. 329) is 'to be clear or manifest'; and in Hebr. "to be clear" (v. 30). By these last two words the word is rendered in nearly every passage of the A. V., including the ten instances of the Hebr. participle דָּאָם be't. It is not easy to conjecture why in Job ix. 38 alone the translators resorted to the not then common word דָּאָם. The marginal rendering umpire seems to convey best the meaning of Job in the passage, some one to compose our differences and command silence when either of us exceeds our bounds (Patrick, in loc.). Fürst's term, Schiedsman, (Handwörterb. p. 809), very well expresses this idea of authoritative arbitration. As to the old English noun dayman, Johnson's definition, surely, is hardly borne out by his solitary quotation from Spenser (Feste Quene, ii, 8); arbitrator or umpire would better express the sense. In Ireland's old translation of Litius (p. 137), Daymennes and Umpriers are used as synonyms. In the Bible of 1551, 1 Sam. ii. 25 is thus translated. "It is in primitive times such a person appears to have been appointed to prescribe just limits to such as were inommodate in their demands, and to impose his authority with those who exceeded the assigned bounds of their course. The laying the hand on both may allude to some particular ceremony; but it evidently also refers to the power of coercion which the dayman could exercise over both parties. See Mediator.

Day-spring (בִּשָּׁוֵץ, slakah ar, Job xxxviii. 12, elsewhere usually "morning"; awakarih, Luke i. 78, elsewhere "east"), signifies the first streaks of day-light, the first gleam of the day-break; and the expression in the above-cited passages it is used in its literal sense. This portion of time was at a later period, in imitation of the Persians, divided into two parts, the first of which began when the eastern, the second when the western division of the horizon was illuminated. See Astral. "Day-spring," the term by which the Baptist (Luke iii. 2, 5; xii. 21) style of the name, is explained in the latter half of the Gospel of John, in the Baptist is beautifully compared to the early twilight preceding the rising of the great moral sun, the Messiah (comp. Mal. iv. 2; Isa. lxi. 1-8; 2 Cor. iv. 6). See DAY.

Day-star (φωτόφορος, light-bearing, whence phosphorus), Lucifer, the morning-star, put (2 Pet. i. 19) as the emblem of the dawn of spiritual light and comfort to the benighted soul. See Lucifer.

Dean, Anglicized from the Gr. διάκονος, Lat. diacōnus (usually derived from διακόνης and σέθος, q. d. "one duty from running;" but better from an obsolete διακόινος or διακόνως, "to run," or hasten; kindred with διακόνως, to pursue: hence, strictly, a runner, i. e. messenger, Buttill, Lex. i. 218-221), a servant (as often rendered), 1. properly, of those who attend on guests or at a table. See John ii. 5; x. 5; xvi. 5; xix. 5; Xenoph. Mem. i. 5, 5). Among the Greeks these διάκονοι were a higher class than the δομινοι, or slaves (Athen. x. 192 b). 2. Generally, and with the name of the master or person served, a minister (as it is usually rendered in the N. T.) (Matt. xx. 26; xxii. 11; Mark xii. 26; John ii. 5; x. 5; xvi. 5; Acts vi. 8). Also an attendant of Christ, a disciple (John xii. 26), of a king (Matt. xxii. 11), and hence of God (Rom. xii. 4). 3. Specially, in relation to the Gospel and the Church, a minister or teacher, (a.) of the person for whom one minsters (1 Cor. iii. 5; 2 Cor. iii. 6; vi. 4; 1 Thess. iii. 2; 2 Cor. xii. 20); Col. i. 7; Eph. vi. 20; 1 Tim. i. 20; 2 Tim. i. 20; and, by antithesis, of Satan (1 Cor. xii. 15), (b.) Technically an officer of the primitive church, a deacon (Phil. i. 1; 1 Tim. iii. 8, 12, iv; 6; see Acts vi. 1-6).

1. Deacons in the N. T.—1. The office described by this title appears in the N. T. as the correlative of ερετήρ, bishop or presbyter (q. v.). The two are mentioned together in Phil. i. 1; 1 Tim. iii. 2, 8. The union of the two in the Sept. of Isa. x. 17, may have suggested both as fit titles for the officers of the Christian Church, or have led to the adoption of one after the other had been chosen on independent grounds. The coins, however, at all events, soon attracted notice, and was appealed to by Clement of Rome (1 Cor. xiiii) as prophetic. Like most words of similar import, it appears to have been first used in its generic sense,
DEACON

implying subordinate activity (1 Cor. iii, 5; 2 Cor. vii, 4), and afterwards to have gained a more defined connotation as applied to a distinct body of men in the Christian society.

2. The status of the office of deacon in the Church is usually supposed to be described in Acts vi, 1-6. The Hellenistic Jews complained that their widows were neglected in the daily ministrations. This neglect may be ascribed either to "the fact that their widows were not known, being forenamed in some way, bearing spirit, or possibly also the jealousy existing between the prophets whose news and their kindred from other lands. At first the apostles themselves, who had the charge also of the common fund (Acts iv, 35, 37; v, 2), superintended this service, employing intermediate agents, young men of the congregation probably (Acts v, 6–10), who had given cause for the complaint now mentioned. In proportion, however, as the Church extended, the more impracticable did it become for them to give themselves to such outward concerns without wrong to their proper spiritual work. It is not reason," said the twelve, 'that we should leave the Word of God and serve tables'—that is, superintend the daily love-feast and the distribution of alms. In order, therefore, that they might give themselves wholly to prayer and the preaching of the Gospel, and to provide against wrong and dissatisfaction by a fixed regulation, they proposed the election of seven men of good report, full of the Holy Ghost and of prudence, for this particular service, and set them apart to it soliumly, after they had been chosen by the people, with prayer and the imposition of hands. In the Acts, indeed, these officers are styled simply of ἵταρα, the seven (xxi, 8), and not deacons that is, servants or helpers; but that this was their character we know partly from the terms διακονος, διακονειν, perhaps used of their office (Acts vi, 1, 2), and partly from almost universal exegetical tradition. (The ancient Church even held the sacred number seven in this case of obligatory force; and at Rome, for example, there were still as late as the third century only seven deacons, although the number of presbyters amounted to forty)" (Schaaff, Apostolic Church, § 134).

Some writers (e.g. Mosheim, Comm. cent. i, § 37) maintain that the "seven" were appointed, not to care for all the poor at Jerusalem, but only for the widows and poor of the Greeks or foreigners. This view supports that similar officers had previously existed to discharge these functions for the general Church (e.g. Conybeare and Howson, Life of St. Paul, i, 467; Whately, Kingdom of Christ; Hinds, Early Christianity). Stanley (Apostolic Age, p. 62 sq.) supposes that the "seven" were not deacons such as we find in the later period of the apostolic age, "though they may possibly have borne the name, and though there was in some respects a likeness between their respective duties." (Compare, on the other hand, Schaff, Apostolic Church, § 134). Dr. W. L. Alexander, in Kitto's Cyclopaedia (s. v.), asserts that it is not easy to justify the assumption that the "seven" were deacons in the later sense. He, therefore, prefers the etymology from the common root of the words διακονος as applied to their functions (ver. 1), or the word διακονειν, as if this title had been originally derived from such a serving of tables as is here referred to, because these words are used in the N. T. with the utmost latitude of meaning, so as to include every kind of service rendered to the Church on account of God. He refers to the lower word, not to the upper, in 2 Cor. xi, 23, 24 (offs. Ephes. vi, 21; Col. i, 7, etc.), of evangelists (1 Thess. iii, 2), of apostles (Acts xx, 24; xxii, 10; Rom. xi, 13; 2 Cor. vi, 4, etc.), of prophets (1 Peter i, 12), of angels (Heb. i, 14), of Christ himself (Rom. xvi, 8), as well as service in temporal matters. Nor can much weight be attached to the name, being sought in private, or were readers in the public assemblies, and pastors and evangelists were chosen from among them. This interpretation has been contested, Council (in Trullo), held A.D. 680; all the earlier witnesses speak of the diakonate in connection with spiritual services or the rites of the Church. If, moreover, this was the institution of a permanent office in the Church, it seems somewhat surprising that it should disappear entirely from the history of the Church for many years, and come up again, for the first time, in the form of an incidental notice in an epistle written in the latter half of the first century. Taking the narrative in the Acts in connection with the history of which it forms a part, the appointment of the seven brethren has been taken to show the appearance of a temporary expedient to meet a peculiar emergency."

Some writers maintain that the office of the "seven" corresponded to that of the πρεσβύτερον, in the Jewish Synagogue, the ἐπίσκοπος, or "minister," of the N. T. (Luke iv, 20; John vii, 82). This is the opinion of Vitringa (De Syn. Vet. p. 805 sq.; Bernard's Condensed Tr. p. 87 sq.), whose principle, that the order of the Christian churches was constructed on the model of the synagogues, led him to press the analogy between the two in every possible way. But for the synagogues there is no solid support. Vitringa's main principle is itself unsound, for nothing can be more evident that the apostles proceeded upon no prearranged scheme of Church policy, but instituted offices and appointed usages just as circumstances required; and, as respects the first Christian office, it cannot be shown that one of the duties pertaining to the office of χαζαζον in the synagogue belonged to it. As Hartmann remarks (Enge Verbind. des A. T. mit d. N. p. 261), the chazan was a mere servant whose functions resembled those of our sexton or church officer (Kitto, Cyclopaedia, s. v.; see also Neander, Planning and Training of the Christian Church, Ryland's translation, p. 84 sq.). See SYNAGOGUE.

8. But, whatever view may be taken of Acts vi, it appears clear that the later church office (Phil. i; 1 Tim. iii) developed itself from the office so designated in Acts vi, and may be traced back to it. The functions of the deacon were primarily secular, but room was into spiritual importance. Hence the "more qualifications described in 1 Tim. iii as necessary for the office of deacon are substantially the same as those of the bishop. The deacons, however, were not required to be "given to hospitality," nor to be "apt to teach." It was enough for them to hold the mystery of the faith in a pure conscience. They were not to gain their living by exercise of the trade. They were not to be disputative, nor to be gainsayers, nor to be slow to mind offering themselves for their work they were to be subject to a strict scrutiny (1 Tim. iii, 10), and, if this ended satisfactorily, were to enter on it. It does not appear to have [necessarily] belonged to the office of a deacon to teach publicly in the church. The possession of any special μαρτυρία (spiritual endowment) would lead naturally to a higher work and office, but the idea that the diaconate was but a probation through which a man had to pass before he could be an elder or bishop was foreign to the constitution of the Church of the first century. Whatever countenance it may receive from the impress of the word διακονεται as applied to the work (ver. 1), or the word διακονος, as if this title had been originally derived from such a serving of tables as is here referred to, because these words are used in the N. T. with the utmost latitude of meaning, so as to include every kind of service rendered to the Church on account of God. He refers to the lower word, not to the upper, in 2 Cor. xi, 23, 24 (offs. Ephes. vi, 21; Col. i, 7, etc.), of evangelists (1 Thess. iii, 2), of apostles (Acts xx, 24; xxii, 10; Rom. xi, 13; 2 Cor. vi, 4, etc.), of prophets (1 Peter i, 12), of angels (Heb. i, 14), of Christ himself (Rom. xvi, 8), as well as service in temporal matters. Nor can much weight be attached to the name, being sought in private, or were readers in the public assemblies, and pastors and evangelists were chosen from among them. This interpretation has been contested,
yet it seems to be the apostle's meaning; and, without adverting to modern habits and controversies, it is evident that the due discharge of the primitive office of deacons is the duty of all men for the ministry."

II. In the Early Post-Apostolic Church. — That the duties of the seven deacons were not of an exclusively secular character is clear from the fact that both Philip and Stephen preached, and that one of them also baptized. It is strange, therefore, that the 15th Canon of the Council of Constantinople, in "Trullo," should declare that the deacons had no spiritual function assigned them. Eumenius (a celebrated Greek writer of the tenth century) gives his testimony to the same effect (in Act. Ap. vi, p. 483). But opposed to this opinion is that of some of the fathers of the Christian Church. Ignatius, a martyr-disciple of St. John, and bishop of Antioch († 117), styles them at once "ministers of the mysteries of Christ;" adding that they are not ministers of meats and drinks, but of the Church of God (Ignat. Ep. ad Trull. n. 2). Again he says (Ep. ad Trull. n. 3), "Study to do all things in divine concord, under your bishop's counsels, in a place of a church, and the presbyters in the place of the apostolic senate, and the deacons must dear to me, as those to whom is committed the ministry of Jesus Christ." Tertullian († 220) classifies them with bishops and presbyters as guides and leaders to the laity. He asks (Tertull. De Fuga, c. ii): "Quum ipse suam, id est, ipsi Diaconis, Presbyteri, et Episcopi, in sacris; nostro Latoris qui dat inchoat remittit? — Cum Duces fugiunt quis de gregario numero sustinebit?" Cyriplan, bishop of Carthage, A.D. 250 (while referring their origin to Acts vi), styles them ministers of episcopacy and of the Church (Cypr. Ep. 65, al. 5, ad Regol.); at the same time he asserts that they were called ad alarum ministrationes — to the ministry of the altar. Though Jerome in one place speaks of them (Ep. ad Euseb. et Com. Euseb. c. 48) as servants of tables and widows, yet again he ranks them among the guides of the people: still he distinguishes them from the priests of the second order, that is, from the presbyters, by the title of Servites. And so, frequently, in the Councils, the names Sacratores and Levita are used as the distinguishing titles of presbyters and deacon.

The fourth Council of Carthage expressly forbids the deacon to assume any one function peculiar to the priesthood, by declaring, "Diaconos non ad sacerdotium, sed ad ministorium consecutus." (See also 10th Can. Con. Nic.)

His ordination, moreover, differed from that of presbyter both in its form and in the powers which it conferred. For in the ordination of a presbyter, the presbyters who were present were required to join in the imposition of hands with the bishop; but the ordination of a deacon might be performed by the bishop alone, because, as the 4th Canon of the 4th Council of Carthage declares, he was ordained, not to the priesthood, but to the inferior services of the Church. Duties. — 1. The deacon's more ordinary duty was to assist the bishop and presbyters in the service of the sanctuary, and to be charged with the care of the vessels and ornaments appertaining to the holy table.

2. In the administration of the Eucharist, that it was the deacon's duty to hand the elements to the people, is evident from Justin Martyr (Apol. ii, p. 152), and from Cyprian (Serm. v, "De Lapsis"). Not, however, that the deacon had any authority or power to consecrate the elements; for the 15th Can. of the Council of Arles, A.D. 312, forbids this. And the 18th Can. of the Council of Nice orders the deacons not even to administer the Eucharist to priests because of their inferiority.

3. Deacons had power to administer the sacrament of baptism (Tertull. De Bap. c. 17; also Hieron. Dial. c. Lact. 103). The Council of Echternach (Jan 77), plainly acknowledges this right, although the author of the Apost. Constitutions, and Epiphanius also, would seem to deny it.

4. The office of the deacon was not to preach so much as to instruct and catechise the catechumens. His part was, when the bishop or presbyter did not preach, to read a homily from one of the fathers. St. Ambrose, bishop of Milan, A.D. 388, says, that deacons, in that they did not preach, though he thinks that they were all originally evangelists, as were Philip and Stephen. 5. It was the deacon's business to receive the offerings of the people, and, having presented them to the bishop or presbyter, to give expression in a loud voice to the names of the offerers. Ep. 10, al. 16, p. 37 (Hieron. Com. in Ezech. xviii, p. 537).

6. Deacons were sometimes authorized, as the bishop's special delegates, to give to penitents the solemn imposition of hands, which was the sign of reconciliation (Cypr. Ep. 13, al. 18, ad Eier.). 7. Deacons had power to suspend the inferior clergy; this, however, was done only when the bishop and presbyter were absent, and the case urgent (Constit. Apost. viii. 28). 8. The ordinary duty of deacons with regard to general Councils was to act as scribes and disputants according as they were directed by their bishops. In some instances they voted in the proxies for bishops who could not attend in person; but in no instance did they sit without the concurrence of the Council by virtue of their office. But in provincial synods the deacons were sometimes allowed to give their voice, as well as the presbyters, in their own name. 9. The Apostolical Constitutions (ii, 51, p. 875) inform us that one of the subordinate duties of the deacon was to manage the choir when, through illness, they entered — to rebuke any that might whisper, talk, laugh, etc. during divine service. This was a duty which, however, usually devolved upon the subdeacon.

10. But, besides the above, there were some other offices which the deacon was called upon to fill abroad. One of these was to take care of the necessitous, orphans, widows, martyrs in prison, and all the poor and sick who had any claim upon the public resources of the Church. It was also his especial duty to notice the spiritual, as well as the bodily, wants of the people; and wherever he detected evils which he could not by his own power and authority cure, it was his duty to refer them for redress to the bishop.

In general, the number of deacons varied with the wants of a particular church. Sozomen (vii, 19, p. 100) informs us that the Church of Rome, after the apostolic model, never had more than seven deacons. It was not till the close of the third century that deacons were lessened in number. The Council of Ancyra, A.D. 344, in its 10th Can., ordains that if a deacon declared at the time of his ordination that he would marry, he should not be deprived of his function if he did marry; but that if he married without having made such a declaration, "he must fall into the rank of laity."

The qualifications required in deacons by the primitive Church were the same that were required in bishops and presbyters; and the characteristics of a deacon, given by St. Paul in his Second Epistle to Timothy, were the rule by which a candidate was judged fit for such an office. The second Council of Carthage, in its 4th Can., and the Council of Ancylus, A.D. 155, required, as qualifications for a deacon, the age of twenty-five; and both the Civil and Canon Law, as may be seen in Justinian, Novell. 123, c. 14, fixed his age to the same period.

The Council of Laodicea, A.D. 381, forbids a deacon to sit in the presence of a presbyter, and the 11th Can. of the first Council of Carthage regulates the number of judges in the diocesan councils, — one with a minor, a deacon, six upon a presbyter, and twelve upon a bishop. This would mark the rank of each of the parties. Originally the deacons had been the helpers of the presiding elder of a given district. When the two names of the latter title were divided and the bishop presided, the deacons were thus, with a minor, a deacon, six upon a presbyter, and twelve upon a bishop. This would mark the rank of each of the parties. Originally the deacons had been the helpers of the presiding elder of a given district. When the two names of the latter title were divided and the bishop presided, the deacons were thus, with a minor, a deacon, six upon a presbyter, and twelve upon a bishop. This would mark the rank of each of the parties.
eyes and ears of the bishop" (Constat. Apost. ii. 44), were tempted to set themselves up against the elders. Hence the necessity of laws like those of Conc. Nic. c. 18; Conc. Curch. iv. c. 51, enjoining greater humility, and enjoining the strong language of Ignatius as to the reverence due to deacons (Ep. ad Traill. c. 8; ad Smyrn. c. 8).

III. In the Modern Church deacons are found as a distinct order of the clergy.

In the Roman Catholic Church there are subdeacons as well as deacons, both in orders. The subdeacon's duties are to assist the bishop, to wash the feet of the newly baptized, to wash the feet of the sick, and to assist at the sacrifice of the mass. The deacon washes the feet of the sick, and to assist at the sacrifice of the mass—"To the deacon also, as the servant of the bishop, let him inquire and ascertain who within his diocese lead lives of piety and edification, and who do not; who attend the holy sacrifice of the mass and the instructions of their pastors, and who do not—that thus the bishop, made acquainted by him with these matters, may be enabled to admonish each offender privately, or, should be deemed more conducive to their reformation, to rebuke and correct them publicly.

He also calls over the names of catechumens, and presents to the bishops those who are to be promoted to orders. In the absence of the bishop and priest, he is also authorized to expound the Gospel to the people, not, however, from an elevated place, to make it understood that this is not one of his ordinary functions" (Council of Trent, sess. xxiii, ch. ii). There are fourteen cardinal-deacons in Rome, who have the charge of the temporal interests and the revenues of the church. A person, to be consecrated deacon, must be twenty-three years of age (Council of Trent, sess. xxiii, c. 17).

In the Church of England and in the Episcopal communions in Scotland and North America, a deacon receives ordination by the imposition of hands of a bishop; in consequence of which he can preach, assist in the sacrament of the Lord's Supper, and, generally, may perform any sacred office except consecrating the elements of the Eucharist; according to the statute 44 George III, c. 48, it is enacted that no person shall be admitted until he shall have attained the age of twenty-three years complete; but this act is declared not to affect the right of granting faculties, exercised by the archbishops of Canterbury and Armagh respectively, vix. to admit at earlier ages; and by 59 George III, c. 60, sec. 1, the two archbishops of the realm, or the bishop of London, or any bishop authorized by any of the bishops, may ordain as deacons any persons whom be or they shall deem duly qualified, especially for the purpose of officiating in his majesty's service, or design promotion to the orders of priests or deacons. A deacon may thus, on an act of good behavior during his residence abroad from the bishop in whose diocese he has officiated, or (if there be not any such bishop) from the governor in council of the colony wherein he may have resided previous to his ordination (see sec. 2). At the time when the liturgy of the Church of England was composed, it was the deacon's office, "where provision is so made, to search for the sick, poor, and impotent people of the parish, and to intimate their estates, names, and places where they dwell, unto the curate." That is, to the rector or vicar having the care of the souls, "that by his exhortations they may be advised with the alms of the parishioners or others" (Rubric in the Form of Ordination). This was the more ancient office of a deacon, and this rule was made in England before the establishment of the poor-laws, in pursuance of which that care has now devolved upon the churchwardens and overseers of the poor, which last office was specially created for that purpose.

In the Methodist Episcopal Church the deacons constitute an order in the ministry. They are ordained by the bishop, without the imposition of hands of the elders. According to the ordination service, "it appertains to the office of a deacon to assist the elder in divine service. And especially when he ministreth the holy communion, to help him in the distribution thereof, and to read and expound the Holy Scriptures; to instruct the youth, and, in the absence of the elder, to baptize. And furthermore, it is his office to search for the sick, poor, and impotent, that they may be visited and relieved." In the Presbyterian Church of the United States the "Form of Government" states that "the Scriptures clearly point out deacons as distinct officers in the Church, whose business it is to take care of the poor, and to distribute among them the collections which may be raised for their use. To them also may be properly committed the management of the temporal affairs of the Church." (chap. vi). In some Presbyterians, congregations, and in the Free Church, there are deacons regularly ordained to have charge of the funds of the Church. In other Presbyterian churches, the office is merged into that of the elders.

In German Protestant churches the assistant ministers are generally called deacons. If there be two assistants, the first of them is called archdeacon. In the German Reformed Church in the United States, the Constitution, ch. iii, art. 2, provides as follows: "The office of the deacons is to collect the alms and other contributions which are designed for the relief of the poor, or the necessities of the congregation; to distribute the alms willingly and conscientiously; and to provide for the support of the ministry of the Gospel." See also the form of ordination in the German Reformed Church.

Among Congregationalists, the deacons, besides attending to the temporal concerns of the Church, assist the minister with their advice, take the lead at prayer meetings when he is absent, etc.

**Literature.**—Besides the works named in the course of this article, see Neander, Church History (Torrery's trans.), 1, 184 sq.; Bingham, Orig. Eccles. bk. ii, chap. xx; Siegel, Chr.-Kirchl, Alterthümer, i, 498 sq.; Sawyer, Organic Christianity, chap. xiii; Dexter, On Congregationalism, p. 184 sq.; Hooker, Eccles. Polity, bk. v, § 78; Howell, The Deaconship (Am. Bapt. Pub. Soc.), Phil. 1844, 18mo; Punchard, Congregationalism, 1844, part iii.

**Deaconess** (δακόνος; δακώνεις, δακώνεια), the title of an office of women in the early Church; an office supposed by some to have originated under the apostles, by others to be of later origin.

1. Deaconesses in the Apostolic Church.—The title (usually rendered minister or "deacon") is found in Rom. xvi, 12, "I beseech thee also that women silence, and that they be save deaconesses (δακώνεις)," and this has led to the conclusion that there existed in the apostolic age, as there undoubtedly did a little later (Pliny, Ep. ad Troj.), an order of women bearing that title, and exercising, in relation to their own sex, functions which were analogous to those exercised by deacons. On this hypothesis it has been inferred that the women mentioned in Rom. xvi, 12, belonged to such an order (Hetzog, Real-
DEACONESS

Encycl. iii. 386. The rules given as to the conduct of women in 1 Tim. iii. 11; Titus ii, 3, have in like manner been referred to them (Chrysostom, Theophylact, Hammond, Wiesinger, ad loc.). Some writers (e.g. Bishop Schaff, Apostol. Church, § 156) suppose that the “widows” of 1 Tim. v, 3-10, were deaconesses. Her- zog, on the other hand, holds that the passages in Timothy cannot be applied to “deaconesses.” Dr. W. L. Alexander, in Kitto’s Cyclopaedia (s. v.), maintains that Rom. xvi, 1, does not show that Phoebe held any official relation to the Church; for all that appears, she may have been simply the doorkeeper or cleaner of the place of worship. Plumptre (in Smith’s Dictionary, s. v., says that “it seems hardly doubtful that writers have transferred to the earliest age of the Church the organization of a later. It was of course natural that the example recorded in Luke viii, 2, 9, should be followed by others, even when the Lord was no longer with his disciples. The new life which pervaded the whole Christian society (Acts ii, 44, 45; iv, 31, 32) would lead women as well as men to devote themselves to labors of love. The strong feeling that the true σδεπασία, or service of Christians, consisted in ‘helping the helpless’ and the like, would make this the special duty of those who were best fitted to undertake it. The social relations of the sexes in the cities of the empire (comp. Grot. on Rom. xvi, 1) would make it fitting that the agency of women should be employed largely in the direct personal application of Christ’s teaching (2 Tim. iii, 11, possibly in the preparation of female catechumens. Even the later organization implies the previous existence of the gremia from which it was developed. It may be questioned, however, whether the passages referred to imply a recognized body bearing a distinct name. The ‘widows’ of 1 Tim. v, 3-10, were clearly, so far as the rule of ver. 9 was acted on, women who were no longer able to discharge the active duties of life, and were therefore maintained by the Church, that they might pass their remaining days in ‘prayers night and day.’ The conditions of ver. 10 may, however, imply that those only who had been previously active in ministering to the brethren were entitled to such maintenance.” See also Ludlow, Woman’s Work in the Church, ch. i (Lond. 1866).

II. Deaconesses in the early Church.—The Apostolical Constitutions distinguish “deaconesses” from “widows” and “virgins,” and prescribe their duties. A similar provision for deaconesses is also given (uk. viii, c. 19, 20), in which the bishop prays as follows: “Eternal God, Father of our Lord Jesus Christ, Creator of man and of woman; thou who didst fill with thy Spirit Miriam, Deborah, Hannah, and Huldah; thou who didst vouchsafe to a woman the birth of thy only-begotten Son; thou who didst clothe the tabernacle and in the Temple, place female keepers of thy holy gates—look down now also upon this thy handmaid, and bestow on her the Holy Ghost, that she may worthily perform the work committed to her, to thy honor, and the glory of Christ” (Chase, Constitutions of the Apostles, 1845 (N. Y. 1848)).

In the Eastern Church the notices of deaconesses in the first three centuries are few and slight, although Origen († 253) speaks of the ministry of women in the Church as both existing and necessary. In the Western Church the notices are fuller and more clear. Pliny the younger (about A.D. 194) appears to regard deaconesses in his inquiring spirit of the question by torture of “two maids who were called minister” (ex duabus ancilla que ministra dicebantur). Tertullian (220) speaks of them often, and prescribes their qualifications (see below). In the fourth and fifth centuries all the leading councils refer to deaconesses. e.g. Basil († 379), Gregory of Nyssa († 396), Chrysostom († 407), Theodoret († 457), Sozomen (cir. 483). Theodoret (Eccl. t. Hist. iii, 14, p. 652) calls Publia, who lived at the time of Julian, η Διαδόχος — deaconess. Sozomen (iv, 14, 59) speaks of a certain deaconess who had been excluded Church fellowship because of having broken her vows. It was a rule that the deaconesses must be widows. Tertullian (ad Uxorem, i; de Virgin. veeland. s. 9) says, “The discipline of the Church and apostolic usage forbid that any widow be elected unless she have married but one husband.” Virginian, it is true, were sometimes admitted, but this was the exception. The “widows of the Church” were never fewer than the Church; from the belief that no person but a mother can possess those sympathizing affections which ought to animate the deaconess in her duties. The early Church was very strict in enforcing the rule which prohibits the election of any to be deaconesses who had been twice married, though lawfully and successively, to two husbands, one after the other. Tertullian says, “The apostle requires them to be (trustees) the wives of one man” (ad Uxorem, iv, 7). Others, however, give the words of the apostle another meaning. They suppose him to exclude those widows who, having divorced themselves from their former husbands, had married their deceased husbands again; but this is not the case. It is disputed whether they were ordained by the imposition of hands, but the Apostolical Constitutions (viii, 19) declare that such was the case, and the 15th canons of Chalcedon (sess. xv) forbids the ordination of a deaconess under forty. Still they were not consecrated to the office of priest. It is well known that the P. episcopat, 41, “Let no woman speak in the Church, nor teach, nor baptize, nor offer” (that is, administer the Eucharist, “nor arrogate to herself any manly function, lest two should claim the lot of the priestly office.” Their duties were to take care of the sick and poor, and to minister to martyrs and confessors in prison, to whom they had thus safely access than the deacons; to instruct catechumens, and to assist at the baptism of women; to exercise a general oversight over the female members of the Church, and this not only in public, but in private, making occasional reports to the bishops and presbyters. How long this office continued in existence it is not known. It was not, however, discontinued everywhere at once. It was first abrogated in France by the Council of Orange, A.D. 441. It continued in the Roman Church for some time after this, and gradually disappeared; but in the Greek Church it did not become extinct till the twelfth century.

III. In the modern Church.—It must ever be regarded as a misfortune in the Reformation that this early office was not restored. “Is it not remarkable that the office, which is so well adapted to the matronly character of the female sex, should be wholly excluded from our list of assistants in the Church?” (Robinson’s Calmet, p. 399.) Its restoration was, however, seriously thought of, and even attempted, in the Reformed Church at an early period of the Reformation, namely, when the Netherland “churches under the Cross” were founded through the synod at Wesel and Emden, 1568 and 1571. Its restoration in the Reformed Church was urged on the very first synod, which it already actually existed at the time among the Bohemian Brethren and the strict Anabaptists, at least in the large congregations. The subject came before the synod from the congregation at Wesel through the Classis of Wesel. That congregation had decided to restore it. In 1573, in a council meeting, the e.g. Bambergers, 1582 († 379), Gregory of Nyssa († 396), Chrysostom († 407), Theodoret († 457), Sozomen (cir. 483). Theodoret (Eccl. t. Hist. iii, 14, p. 652) calls Publia, who lived at the time of Julian, η Διαδόχος — deaconess. Sozomen (iv, 14, 59) speaks of a certain deaconess who had been excluded Church fellowship because of having broken her vows. It was a rule that the deaconesses must be widows. Tertullian (ad Uxorem, i; de Virgin. veeland. s. 9) says, “The discipline of the Church and apostolic usage forbid that any widow be elected unless she have married but one husband.” Virginian, it is true, were sometimes admitted, but this was the exception. The “widows of the Church” were never fewer than the Church; from the belief that no person but a mother can possess those sympathizing affections which ought to animate the deaconess in her duties. The early Church was very strict in enforcing the rule which prohibits the election of any to be deaconesses who had been twice married, though lawfully and successively, to two husbands, one after the other. Tertullian says, “The apostle requires them to be (trustees) the wives of one man” (ad Uxorem, iv, 7). Others, however, give the words of the apostle another meaning. They suppose him to exclude those widows who, having divorced themselves from their former husbands, had married their deceased husbands again; but this is not the case. It is disputed whether they were ordained by the imposition of hands, but the Apostolical Constitutions (viii, 19) declare that such was the case, and the 15th canons of Chalcedon (sess. xv) forbids the ordination of a deaconess under forty. Still they were not consecrated to the office of priest. It is well known that the P. episcopat, 41, “Let no woman speak in the Church, nor teach, nor baptize, nor offer” (that is, administer the Eucharist, “nor arrogate to herself any manly function, lest two should claim the lot of the priestly office.” Their duties were to take care of the sick and poor, and to minister to martyrs and confessors in prison, to whom they had thus safely access than the deacons; to instruct catechumens, and to assist at the baptism of women; to exercise a general oversight over the female members of the Church, and this not only in public, but in private, making occasional reports to the bishops and presbyters. How long this office continued in existence it is not known. It was not, however, discontinued everywhere at once. It was first abrogated in France by the Council of Orange, A.D. 441. It continued in the Roman Church for some time after this, and gradually disappeared; but in the Greek Church it did not become extinct till the twelfth century.

III. In the modern Church.—It must ever be regarded as a misfortune in the Reformation that this early office was not restored. “Is it not remarkable that the office, which is so well adapted to the matronly character of the female sex, should be wholly excluded from our list of assistants in the Church?” (Robinson’s Calmet, p. 399.) Its restoration was, however, seriously thought of, and even attempted, in the Reformed Church at an early period of the Reformation, namely, when the Netherland “churches under the Cross” were founded through the synod at Wesel and Emden, 1568 and 1571. Its restoration in the Reformed Church was urged on the very first synod, which it already actually existed at the time among the Bohemian Brethren and the strict Anabaptists, at least in the large congregations. The subject came before the synod from the congregation at Wesel through the Classis of Wesel. That congregation had decided to restore it. In 1573, in a council meeting, the e.g. Bambergers, 1582
same character belonging to it, as described by the apostle Paul, namely, widows, and not married women, shall be chosen for that purpose." Classius favored the restoration of the office, and referred the matter to the next provincial synod, that by its authority it might be restored in her localities. Accordingly, by the proper course, it came before the General Synod at Middleburg in 1851, which synod unfortunately decided against it "on account of various inconveniences which might arise out of it; but in times of pestilence, and other sicknesses, when any service is required among sick women which would be indelicate or degrading, they ought to attend to this through their wives, or others, whose services it may be proper to engage" (Max Göbel, Geschichte des christ. Lebens in der rhein-westphälischen Ev. Kirche, i, 413, 414). Here this interesting movement seems to have ended, as there is no further historical trace of it.

The Puritans in England in the sixteenth century recognised deaconesses, as appears by the following extract from the "Conclusions" drawn up by Cartwright and Travers, and given by Neal, History of the Puritans, vol. i, ch. vi: "Touching deaconesses of both sorts, viz. men and women, the Church shall be administered by the elders and presbyters; and they are not to choose men of custom or course for their riches, but for their faith, zeal, and integrity; and that the Church is to pray in the mean time to be so directed that they may choose them that are meet. Let the names of those that are thus chosen be published by the next Lord's day, and after that their duties to the Church, and the Church's duty towards them; then let them be received into their office with the general prayers of the whole Church."

"The advantages resulting to a Christian community from such an order are too obvious to require exposition. It has been a serious misfortune to the Church that the rich have been enabled to fall into disuse; and the wide-spread institution at the present day in the churches of Great Britain and America of ladies' district-visiting societies, Dorcas societies, etc. satisfactorily shows the necessity of practically supplying, to some extent at least, the want of this primitive office. There is a movement going on at present for the introduction of the order of deaconesses into the Church of England" (Chambers, Encyclopaedia, s. v.). Its prospects of success would be greater but for the monastic tendencies of the so-called "sisterhoods" organized by the Puseyites, e.g. Miss Sellon's. This subject has been lately reviewed by Rev. Dr. Whippleman, in American Ephemeris. On Christmas, 1866, Hon. J. Dixon Roman, of Hagerstown, Md., gave to the congregation of that city $5000, and with it sent a proposition to the Consistory that, according to his wish, "three ladies of the congregation shall be chosen and ordained to the order of deaconesses in this congregation, with absolute control of the income of said fund, for the purposes and duties as practised in the early days of the Church." This, and the action of Lebanon Classis, which in 1867 requests the synod "to take into consideration the propriety of restoring the apostolic office of deaconesses," will bring this plain question before the highest judicature of the Church.

In the Roman Catholic Church there are various sisterhoods answering in some degree to the ancient order of deaconesses, but without ordination; such as the Beguines, the Gray Sisters, the Sisters of Charity, Sisters of Mercy, etc. (see Ludlow, Woman's Work in the Church, iii).

The first modern reorganization of the work of deaconesses on a large scale was begun in 1835 by pastor Fliedner, of Kaiserswerth, Prussia. An infirmary was established, to be served by Christian women, unmarried or widows. He required of all who would become deaconesses that they should be "willing to serve servants of Christ alone, to devote their time and faculties entirely and exclusively to him, and not to look forward for pecuniary emoluments or honors of the world, nor yet to merit salvation by their works, but to do the work of charity and self-denial out of gratitude to him who hath redeemed their souls, and merited their salvation." After their probationary period they engage themselves to serve at least five years. But even during this time they are allowed to leave if nearer personal or family duties should make them wish for a change of situation." Many women obeyed the call, the infirmary grew rapidly into importance, and auxiliary societies were formed throughout Prussia, and in other parts of Europe, and there are now orphan-houses and hospitals under its charge at Berlin, Dresden, Frankfort, Worms, Cologne, Elberfeld, London, and other places. The mother institution has (1) a seminary to train young females as teachers for infant and other schools; (2) an orphan asylum; (3) a training-school of nurses, and for visitors to prisons, etc. The whole expense is borne by voluntary subscriptions. A branch was established at Pittsburgh, Pa., in 1849 by pastor Fliedner in person. Mrs. Fry, after a visit to Kaiserswerth, established in Bishopsgate, London, an "Institution for Nursing Sisters," and in 1850s deaconesses' institutions were organized at Paris in 1851, and others followed in France and Switzerland (see Ludlow's article in the Edinburgh Review, 1848, p. 228).

In 1888 the Gen. Conference of the M. E. Church created the order of Deaconesses, which now have "homes" in the larger cities of the U. S. See Howson, Deaconesses, or the Official History of the Female Mission at Wheeling (Loud. 1862); Ludlow, Woman's Work in the Church; Jane M. Dead (properly some form of ὢς, ὢνηκῶ). See Burial. When a Hebrew died in any house or tent, all the persons and furniture in it contracted a pollution which continued seven days (Num. xix, 14-16). All who touched the body of one who died, either killed in the open fields; all who touched men's bones, or a grave, were unclean seven days. To cleanse this pollution, they took the ashes of the red heifer, sacrificed by the high-priest on the day of solemn expiation (Num. xix, 1-22); on these they poured water in a vessel, and a person who was clean dipped a branch of hyssop in the water, and sprinkled it with the furniture, the chamber, and the persons, on the third day and on the seventh day. It was required that the polluted person should previously bathe his whole body, and wash his clothes, after which he was clean. Since the destruction of Jerusalem, the Temple, the High Priest, and generally to consider themselves as polluted by a dead body. See Corse. On the play upon the two senses of the word in its literal and spiritual application in Matt. v, 22, see the Dissertatio of Schicht (Ald. 1770). See Death.

The word rendered "dead" in Job xxvi, 5; Ps. lxxxviii, 10; Prov. ii, 18; ix, 18; xxxi, 16; Isa. xiv, 9; xxvi, 14, 19 is לָמוּת, lamōt; derived from מְנַלָּה, manelāh; having, according to Gesenius, the sense of eilent, but, according to Fürst, meaning dark; in either case denoting the shades, mazes, or disembodied spirits of the under world. See Sheol.

DEAD, BAPTISM FOR. See Baptism for the Dead.

DEAD, BAPTISM OF. See Baptism.
DEAD, BURIAL OF THE. See BURIAL; FUNERAL.

DEAD, PRAYERS FOR THE, a custom that arose in the Church at an early period. Tertullian (220) remarks (De Cor. Mili, c. iii.) that it is the practice of a widow to pray for the soul of her deceased husband. He also speaks (De Monogam. c. x.) of "oblations" made for the dead on the anniversary of their martyrdom. Origen (+ 254) speaks of Christians "mentioning saints in their prayers" (lit. ix., in Rom. xii.). Arnobius (cir. 360) says that Chris- tians pray for the repose of souls after half of the litug- ing and the dead (s. de Gentils, iv). Cyril of Jerusalem even declares it to be a considerable advantage for the souls of the dead to be prayed for (Cist. Mytrag, v. 6). The same custom is found in many of the ancient liturgies. Chrysostom (+ 407) says of the wicked dead, "it is always in the secrets of their spiritual excellencies. Yet there is no doubt that not a few of the fathers believed that the souls of departed believers were not taken at once to heaven, but were in some separate place—Hades or Paradise—out of which the fervent prayers of survivors might help to remove them. So that the idea of purgatory sprang out of such views in no long space of time. Nevertheless, it is not true, as Romanists assert, that prayers for the dead necessarily imply a belief in purgatory. Almost all the English writers on purgatory refute this; e.g. Burnet, On 39 Articles, art. xxi; Stillingfleet, Defence of Laud, p. 543; Jeremy Taylor, Discourse from Popery; Collier, Ecles. Hist. of Great Britain, v. 288 sq.

In the Church of England burial service of 1549, under Edward VI, one prayer was, "We commend into thy hands of mercy, most merciful Father, the soul of this our brother departed ... that when the judges- ment shall come, thou hast committed to thy well-beloved Son, both this our brother and we may be found acceptable in thy sight, and receive thy blessing." "Almighty God, we give thee hearty thanks for this thy servant, whom thou hast delivered from the miseries of this wicked world, from the body of death and from all temptation and strife of sin, and hast brought his soul, which he committed into thy holy hands, into sure consolation and rest: Grant, we beseech thee, that at the day of judgment his soul and all the souls of thy elect, departed out of this life, may with us, and we with them, fully receive thy promises, and to be perfect together through the glorious resurrection of thy Son Jesus Christ our Lord." And the next prayer was, "O Lord, with whom do live the spirits of them that be dead, and in whom the souls of them that be elected, after they be deliv- ered from the burden of the flesh, be in joy and felici- ty, grant unto this thy servant that the sins which he committed in this world be not imputed unto him, but that he, escaping the gates of hell, and pains of eternal darkness, may ever dwell in the region of light, with Abraham, Isaac, and Jacob, in the place where there is no weeping, sorrow, nor heaviness; and when that dreadful day of the general resurrection shall come, make him to rise also with the just and righteous, and receive this body again to glory, then made pure and incorruptible." The prayer was ultimately changed into the thanksgiving form in which it now appears in the Prayer-book: "After the offering in the Eucharist is said, and the oblations of bread and wine, with the aima for the poor, are placed upon the table, the minister addresses this exhortation to the people: 'Let us pray for the whole state of Christ's Church militant here in earth.' The latter part of this sentence is wanting in Edward's first book.

DEAD SEA

The words 'militant here,' which were designed expressly to exclude prayer for the dead, were inserted in the second book, in which that part of this prayer, which contained intercession for the dead, was expanded. It was the intention of the divines who made this alteration to denote that prayers are not to be offered up for the dead, whose spiritual welfare is already accomplished: but for those only who are yet 'fighting the good fight of faith,' and are consequently in a capacity of needing our prayers' (Shepherd, cited by Hook, Church Dictionary, s. v.). Protestants reject prayers for the dead as having no ground either in Scripture or reason.—Bingham, Orig. Ecles. bk. xv., ch. iii., § 15; Riddle, Christian Antiquities, p. 277 sq.; Coleman, Ancient Christianity, ch. xxv.; Browne, On 39 Articles, art. xxi.; Palmer, Orig. Literature, ch. iv., § 10; Theod. Stud. in Kur, 1866, ii. 326. See SYNAGOGUE.

DEAD SEA (more mortuus, Justin, xxxvi, 8, 6; ζητέως ἡ μεγάλη, I'anian, v, 7, 8; Galen. Simp. Med. iv, 20), a name applied since the second century to the Apocalyptic Lake (ἡ Ἀποκάλυπτις λίμνη, as Josephus, Dio- dorus Siculus, and Polybius, v, 16, 8, call it; or sim- ply ἡ Ἀποκάλυπτις, War, iv, 8, 2; more distinctly λίμνη ἀποκαλυφθής, Am. xvii, 5, 5; Pliny's Ἀποκάλυπτις λι-
DEAF 711 DEAN
cus, or simply Aphthilita), from its supposed noxious properties. In the Bible it is called the SALT SEA (יֹּרֶם, יִרְמָא; Gen. xvii. 20; Num. xxxii. 12, etc.), the Sea of the Plain, or Arabah (אָרָבָּה, שֵׁרְמָא; Deut. iii. 17; iv. 49, etc.), or the Front (Eastern) Sea (יוֹרֶם הַמַּניָּה). Ezek. xviii. 18; comp. ver. 8; Joel ii. 20; Zech. xiv. 8). By the Arabs it is termed Bahar Lut, "the Sea of Lot" (Alulfeda, Tab. Syr. p. 156). It is the remarkable lake or internal sea formed by the filling up of the old basin of the Vale of Siddim (Gen. xiv. 3, 9), on the south-east border of Palestine (Num. xxxiv. 3, 12; Deut. lii. 17; comp. Josh. xii. 8), especially in the same quarter of the tribe of Judah (Josh. xv. 2, 5) into which the Jordan empties (iii. 16), 390 stadia from Jerusalem (Joseph. Ant. xvi. 6, 2). Josephus (War, iv. 8, 4) gives its length as 880 stadia, or about 88 miles; its breadth as 150 stadia, or about 15 miles; and its circumference as 6 days' journey (see Setzeh in Sach's Mos. Ant. Comm. xvii. 440); the estimates of Pliny, v. 15, and Diod. Sic. xix. 98, are erroneous). It is long and necked or sickle-form at the southern end, with a peninsula at the eastern side. See BAY. The east and west shores are steep with caked limestone [see ESQUEL], but the southern shores end in a marsh. On the south-west is a range of salt hills, and on the south-east a considerable plain. See SALT, VALLEY OF. The water, which lies far below the level of the Mediterranean, is clear, but uncommonly salt and bitter, and of great density (Joseph. War, iv. 8, 4; Jul. Afric. in Canisii Lecson. Aegy. ii, 1; Pliny, v. 15). It contains no living creature, neither fish, shell, nor seaweed, and when fishes from the Jordan get into it they die and float upon the surface (Diod. Sic. ii. 48; xix. 98; Jerome on Ezek. xlvii. 9; Cotovic. Itin. p. 312). The shore is covered with a dark offensive mud, upon which a strong saline incrustation forms, and is occasionally intermixed with lumps of bitumen, broken off from the cliffs or disorganized from the bottom (Buckland, ii. 664). A pretty thick fog has been observed, especially in the morning, by travellers (Shaw, p. 297; Volney, i. 240), as enveloping the lake (comp. Wicl. x. 7; Philo, Opp. xxi. 145); but, situated as it is in a deep caldron-like spot, the air is usually excessively sultry, and so loaded with saline effluvia as to banish vegetation (Philo, Opp. ii. 21); and although it is not so detrimental to animal life (Tact. Hist. v. 6) as has sometimes been represented (Maundrell, p. 116), a solen. stillness reigns around, unbroken by wind, wave, or animated cry. The marks of volcanic agency are strongly evident, and Felslecker, Pulsat. ii. 285), which, with the warm springs on the shore [see Callirrhoe], the asphaltic vapors and floating substances (Strabo xvi. 761), give evidence of the plutonic catastrophe (comp. Gen. xiv. 10) which covered the guilty cities of this plain (Gen. xix.); and it is popularly believed that these ruins may still be discerned beneath its waters (Joseph. War, iv. 8, 4), though now sunk below their former level (Reland, Palest. p. 254 sq.). See SIDON.
It was anciently believed that the immense volume of water poured in by the Jordan found an outlet by subterranean canals into the Mediterranean (Diod. Sic. xix. 98); but it is now ascertained that this is impossible, and that evaporation is sufficient to account for the maintenance of the usual height in the lake (Bachiene, i. 1. 121). See generally Fabri, Exeget. ii. 155 sq.; Oedmann, Samml. iii. 120; Hamelsveld, i. 447; Blasch, Erdk. dv. Hr. i. 322 sq.; Wänber, De Mari Apoll. (Heimst. 1712); Michaelis in his Comment. 1752 (Brem. 1747), p. 61 sq.; Mannert, Descr. Geog. vii. 332; Ritter, Erdkunde, xvi. 831 sq.; Schwartz, Palest. p. 41; Thomson, Land and Book, ii. 449; Kelly's Syria, p. 838; J. Kempe, De indole Maria Mortui (Holm. 1761). See SEA.

Deaf (דוער, chorek; δύχως, both, especially the latter, implying dullness also). Moses extended the protection of a special statute to the deaf mute: "Thou shalt not curse the deaf" (Lev. xix. 14). This enactment not only absolutely prohibited the reviling of these unfortunate, but might also be understood figuratively, as the Bisph's recommended. See 173; 77. Instruction should be shown to them (Isa. xxix. 18, 35; Matt. xi. 5; Mark vii. 32). See DUMB.

Deal, a word often employed by our translators in the sense of part, with fractional numbers ("tenth deal," Exod. xxix. 40, etc.; like "a great deal"), but having no special equivalent in the original. See NUMBER.

Dealtry, William, D.D., F.R.S., was born in Yorkshire in 1776, educated in Catharine Hall and Trinity College, Cambridge, where he was second wrangler in 1796 and fellow in 1798. He afterwards became professor of mathematics in the East India College, rector of Clapham in 1818, chancellor and prebendary of Winchester in 1830, and finally archdeacon of Surrey in 1845. He died in 1848. His principal publications are, A Discourse on the Duty and Policy of Propagating Christianity (London, 1836); Gospels in Syriac (3 vols., London, 1828, 1830, 1832); Sermons (London, 1828, 8vo); Obligations of the national Church (London, 1838, 8vo); The Foundation of the Faith (London, 1846, 8vo).—Darling, Cyclop. Bibliographica, i. 882.

Dean (decanus, from δεκα, ten), an ecclesiastical title which has had several applications. (1.) The oldest use of it was to designate an officer in the ancient monasteries, who, in some monasteries, was subject to one called the decanus, or dean, from his presiding over ten; and every hundred had another officer called centenarius, from his presiding over one hundred. The business of the dean was to exact every man's daily task, and to bring it to the abbot, or steward of the house, who gave a month's worth of corn to the father of all. The word dean is occasionally used in early writers for archbishop. (2.) In the Church of England there are two sorts of deans: 1st, the dean of a cathedral, who is an ecclesiastical magistrate, next in degree to the bishop. He is chief of the chapter, and is called a dean (decanus) because he formerly presided over ten prebendaries or canons. He is by law a sole corporation—that is, he represents a whole succession, and is capable of taking an estate as dean and conveying it to his successors. 2d, rural deans, whose office is of ancient date in the Church of England, long prior to the Reformation, and which many of the bishops are now reviving. Their chief duty is to visit a certain number of parishes, and to report their condition to the bishop. There are two means of creating deans, because there are two foundations of cathedral churches in England, the old and the new. Those of the old foundation are appointed to their dignity much like bishops, the king first issuing his congé d'âtre to the chapter, the chapter then choosing, and the bishop confirming and giving his mandate to install them. (3.) The word deans is also applied in England to the chief officers of certain peculiar churches or chapels, as the dean of the king's chapel, the dean of the arches, the dean of St. George's Chapel at Windsor, and the dean of Bocking, in Essex. (4.) The word and chapter constitute the governing body of a cathedral. A chapter consists of the dean, with a certain number of canons or prebendaries, heads of the church or opus ecclesi. They are the council of the bishop, to assist him with their advice in affairs of religion as well as in the temporal affairs concerning the diocese. When the rest of the clergy were settled in the several parishes of each diocese, these were reserved for the celebration of divine service in the bishop's own cathedral; and the chief of them, who presided over the rest, obtained the name of dean, or dean, being probably at first called superintendents of the canons or prebendaries. The dean and chapter are the nominal electors of a bishop. (5.) The deans of a college faculty

DEAN OF THE CARDINALS. See Cardinals.

DEAN OF THE CHAPEL ROYAL (Scotland), an of-
lice held by three clergymen of the Established Church, to which they are appointed by the crown.
The duties are nominal, being limited to an occasional sermon before her majesty when in Scotland, and at-
tendance at the election of the representative peers.
Recent appointments, however, have been conferred in
favour of those with chairs in the University of Edin-
burgh which are not otherwise endowed. The title of
dean is somewhat out of place in the Church of Scot-
land, where the rule of Presbyterianity is established.
It is a remnant of Episcopacy, which the
Church courts have never had occasion to chal-
lenge, as the deans do not sit or act in that capacity
and have scarcely any ecclesiastical duties to per-
form.

Death (usually ἀπεβίωσα, huanger; μάθαινε, famine; as both are elsewhere rendered; but in Jer. xvii, 1, τὸ ἀπεβίωσα
βασταῖος, restrain, sc. of rain, drought, as in Jer. xviii, 8), a scarcity of provisions. Although Palestine is a very fruitful land, yet a famine naturally followed a
lack of crops, especially when the rain failed (1 Kings xvii; Josephus, Ant. xv, 9, 1), or the country was
visited by a pestilence, an inundation, land-plague,
(2 Sam. xxiv, 13; Psa. xxxiiii, 19; Ezek. xxxvi, 29; Jer. xiv, 13, 15), with swarms of locusts (q. v.); and we
read of deaths in the historical narratives not only in the
patrimonial period (Gen. xii, 10; xlvi, 4, 13), and the era of the judges (Ruth i, 1), when the soil was
not regularly farmed, but also at the time of the
kings (2 Sam. xxii, 1; 1 Kings xviii, 2; 2 Kings v, 18;
Jer. xiv, 1), and, indeed, the destitution sometimes
continued more than one year together (2 Sam. xxii,
1). In such cases the inhabitants availed themselves of
supplies from the neighboring Egypt (Gen. xii, 10;
xiii, 1 sq.; xli, 1 sq.; Josephus, Ant. xv, 9, 2; xx,
2, 6; 5, 2), although this region likewise suffered
in like manner whenever the Nile failed to reach its
usual flow (Gen. xii, xliii). Under the Roman
rule an extensive famine prevailed (Acta xi, 12) in
the time of the emperor Claudius (q. v.), which occurred
during several years in different provinces of the
empire. This appears to have been a harvest failure in
Palestine at the end of the fourth year of his reign (Joseph. Ant. xx, 2, 6; comp. iii, 15, 3).
See AGRABUS. Josephus mentions an earlier famine
(Ant. xv, 9, 1), that took place in the thirteenth year of Herod the Great, which resulted from
drought, and was followed by pestilence. See FAMINE.

Death (properly μάθαινε, Sávaroc). No logical defi-
nition of death has been generally agreed upon. This
point was much contested in the 17th century by
the Cartesian and other theologians and philosophers.
Since death can be regarded in various points of view,
the descriptions of it must necessarily vary. If we
consider the state of a dead man as it strikes the
senses, death is the cessation of natural life. If we
consider the state of death, we may place it in that
permanent and entire cessation of the feeling and
motion of the body which results from the destruction of the
body. Among theologians, death is commonly
said to consist in the separation of soul and body, im-
plying that the soul still exists when the body perishes.
Among the ecclesiastical fathers, Tertullian (De Animi,
5), who describes it as "the dissolution of the body and
soul." Cicero (Tusc. Dia. i) defines death to be "the
departure of the mind from the body." The passage
Heb. iv, 12, is sometimes cited on this subject, but
has nothing to do with it. Death does not consist in
this separation, but this separation is the consequence of
death. As soon as the body loses feeling and mo-
tion, it is henceforth useless to the soul, which is there-
fore separated from it. See DEAD.

Scriptural representations, names, and pictures of
death.

(1.) One of the most common in the O. T. is to return to the dust, or to the earth. Hence the
phrase the dust of death. It is founded on the
description in Gen. ii, 7, and iii, 19, and denotes the dis-
solution and destruction of the body, hence the phrase
Gen. ii, 7, "The dust shall return to the earth as it was,
the spirit unto God, who gave it." (2.) A withdrawing, exhalation, or removal of the
breath of life (Psa. civ, 29). Hence the common terms to
give up the ghost, etc.

(3.) A removal from the body, a being absent from
the body, a departure from it, etc. This description
is founded on the comparison of the body to a tent or
jugement in which the soul dwells during this life.
Death destroys this tent or house, and commands us
to travel on (Job iv, 21; Isa. xxxviii, 12; Psa. liii, 7).
Hence Paul says (2 Cor. v, 1), "our earthly house of
this tabernacle" will be destroyed; and Peter calls
death a "putting off of this tabernacle" (2 Pet. i, 13,
14). Classical writers speak of the soul in the same
manner. So Hippocrates and Archimedes. Compare 2
Cor. v, 8, 9.

(4.) Paul likewise uses the term ἐκδοθέντα, to un-
lock one's self, in reference to death (2 Cor. v, 3, 4),
because the body is represented as the garment of the
soul, and this is thrown off. The soul, therefore, as long
as it is in the body, is clothed, and as soon as it is disem-
bodied is naked.

(5.) The terms which denote sleep are applied fre-
frequently in the Bible, as everywhere else, to death
(Psa. lxxxv, 5; Jer. li, 59; John xi, 13 sq.). Nor is
this language used exclusively for the death of the
person, but also for some other infrequent, things in
use. Homer calls sleep and death twin brothers (IL
xvi, 672). The terms likewise which signify to lie
down, to rest, also denote death.

(6.) Death is frequently compared with and named
from a departure, a going away. Hence verbs of that
import signify to die (Job x, 21; Psa. xxix, 3, the
same is the case in the New Testament (Matt. xxvi,
24), and even among the classics. In this connection we
may mention the terms αἴωνιος καιρός and αἰώνιος
(Phil. i, 23; 2 Tim. iv, 6), which do not mean dissolu-

Death, when personified, is described as a ruler and
tyrant, having vast power and a great kingdom, over
which he reigns (Job xviii, 14). Hosea also personi-

cated it under some figures which are not com-
mon among us. We represent it as a man with
a scythe, or as a skeleton, etc.; but the Jews, before the
exile, frequently represented death as a hunter, who
lays snares for men (Psa. xviii, 5, 6; xci, 3). After
the exile they represented him as a man, or sometimes
as an angel (the angel of Death), with a cup of poison,
which he reaches to men. See DESTRUCTION.

From this representation appears to have arisen the phrase, which occurs in the New Testament, to taste death
(Matt. xxvi, 28; Heb. ii, 9), which, however, in com-
mmon speech signifies of things merely to die, without
reminding one of the origin of the phrase. The case is the same
with the phrase to see death (Psa. lxxxix, 48; Luke ii,
26). See Knapp's Christian Theology, by Dr. Wood:
Walther, De origine phrasmum "videre et gestare mor-
tem" (Giess. 1745).

The doctrine of death (Job xxvil, 17; Psa. ix, 13;
evii, 18) signifies the grave itself; and the "shadow
of death" (Jer. ii, 6) denotes the gloomy silence of
the tomb. See Wemyss's Classics Symbolica, s. v.; Zellich,
De vocibus, ἀπαντάς, θ bod αναρνήσεως (Vitsem. 1789).

Death may be considered as the effect of sin (Rom.
v, 12). In Hebrews ii, 14, Satan is said to have the
power of death; not that he can, at his pleasure, inflict
death on mankind, but as he was the instrument of
first bringing death into the world (John viii, 44), and as he may be the executioner of God’s wrath on impenitent sinners where God permits him. Death is but once (Heb. ix, 27), yet certain (Job xii, 1, 2), although uncertain as to the time (Prov. xxxvii, 21); universal (Gen. iii, 19); necessary, in order that God’s justice may be displayed and his mercy manifested; desirable to the righteous (Luke ii, 28-30). The fear of death is a source of anxiety and alarm to many, and to a guilty conscience it may indeed be terrible; but to the man who has been cleansed from sin by the consideration that death is the termination of every trouble; that it puts him beyond the reach of sin and suffering; that God has promised to be with the righteous, even to the end (Heb. XIII, 7); that Jesus Christ has taken away the sting (1 Cor. xv, 54, 55); and that it introduces him to a state of endless felicity (2 Cor. v, 9).

Death, when applied to the animal nature, properly signifies a dissolution or failure of all its powers and functions; so, when applied to the spiritual nature, or souls of men, it denotes a corresponding disorder thereon, in a being spiritually dead in trespasses and sins (Rom. viii, 9); Cor. ii, 15; Eph. ii, 13. Just as the death of the body.

The term death is metaphorically applied to denote an utter failure of customary functions, so that the thing spoken of can no longer act according to its nature. Thus, in Amos ii, 2, “Moab shall die with tumult”—that is, the king and government shall lose their strength and not be brought to subjection and slavery. So in Rom. vii, 8, “Without the law, sin was dead”—that is, without the law, sin does not exert its power; and, on the other hand, it is said (ver. 9), “Sin revived, and I died”—“Sin got strength to act, and I lost my power to resist. I was not the same man as before; sin destroyed my power.” The second death (Deut. ii, 11) is so called in respect to the natural or temporal as coming after it, and implies everlasting punishment (Rev. xxi, 8).

**DEATH, THEOLOGICAL ASPECTS OF.** (On this topic we present some views different from those usually entertained, but which modern science appears to justify and even to demand.

**Death may be defined as the termination of life.** Beyond question, it had been possible for God, if such had been his pleasure, to have made all creatures under a law of life. Scripture assures us that man at least was at first placed conditionally under this law. There is, however, decisive evidence that, from the beginning of the world, the condition of life was superceded under the law of death. The reproductive and assimilating organs and powers common to all living creatures, and the destructive organs, instincts, and habits of birds and beasts of prey, unmistakably contemplate, as they provide for, a system or constitution of things in which death is a condition. It was long and generally held, indeed, that this law in the natural economy superceded upon the introduction of sin. But this idea, which Scripture does nowhere assert or sanction, is hard to be reconciled with the conclusion which physiology and anatomy have deduced from powers and organs of the animal frame, with the same certainty that any final cause is inferred from any of the works of God. And it must be regarded as conclusively refuted by the discoveries of geology, which demonstrate the prevalence of death in ages long anterior to the creation of man, or, so far as is known, to the existence of sin. The death of animals is now found to be full of the buried remains of extinct life; and it is made evident by the state in which many of these fossils are found, that then, as now, life was sustained by death. Nor can it well be doubted that this state of things obtained even in the days of man’s primeval innocence. If we try, we shall find ourselves baffled in the attempt to conciliate this with the theory that death could be strange or unknown. Must not the revolving years have been marked by the opening and the fall of the earth’s foliage, the ripening consumption and decay of earth’s fruits? Could our first parents drink of the rivers of paradise, or tread its verdant surface, or keep and dress its trees and plants, without in every draught, at every step, by every touch, in every gust, a certain overthrow and decay of myriads of animal or insect as well as vegetable life? Although the flesh of animals was not yet given to man for food, is it supposable that the laws of animal life itself were all the while in abeyance—its instincts restrained, its powers unused, its appropriate functions suspended? We know that from the day of man’s creation he had given to him the idea of death. It was set before him as the just desert and consequence of disobedience. And whence should he have derived his conception of the import of the threatened evil so readily as from death’s visible domain over the fowls of the heaven and the beasts of the field?

**With regard to creatures of mere instinct or animal nature, there can be nothing judicial or of the nature of punishment in their ordinance to death. It is beyond question that for man’s sake a curse had been brought upon the ground, and the whole creation groaned and travailed in pain together until it was released**. Still man himself is by this means the greatest sufferer; and so far as it affects the other creatures, it can be only a physical evil, equally without moral cause or penal effect, of which, by their nature, they are unsusceptible. How this appointment is to be reconciled with the benevolence of their Creator is a hard question, which no light yet given to man must enable him fully to resolve. So far, however, it may relieve the mystery that, as a general rule, the enjoyments of the inferior creatures greatly exceed their sufferings that death is but little, if at all, the object of their fear, or much even a cause of pain. That the sum of animal enjoyment quenched in death is amply compensated by the law of increase and succession, which both perpetuates life and preserves it in the vigor of its powers and the freshness of its joys, is certain; and (as bearing on the physical and moral condition of man, to whose behalf, as chief in this lower world, all arrangements and disposals affecting the lower forms of life were subordinated), that their subjection to death has enlarged immensely the extent of man’s physical resources, and multiplied manifold the means of his moral development and discipline.

**But man himself is involved in the common doom. It is assigned unto all men once to die. The reigning fact, man’s sin and consequent force upon him, that death is a physical necessity, or a universal law extending to all material organizations, however otherwise psychologically distinguished or divinely allied. And this opinion has generally obtained among men of pantheistic and materialistic views in philosophy, and of Pelagian and Socinian views in theology. But surely it is impossible, consistently with God’s omnipotence, to allege the necessity or the power of this law, as existing in despite of his pleasure and purpose, to constitute our nature under a law of life. It is more than probable that the other orders of creatures who dwell in the mortal parts and heavenly places are not all spirit, or without their own mode and form of organized existence. We are assured that the bodies of the risen saints are clothed with incorruption and immortality. We know that, even as now constituted, the life of these frail bodies in aneduthoven age was prolonged to the very end of a week. And why should it be thought impossible for God, if so pleased, to endow his creatures with death, to endow them with the powers, or provide for them the means of repairing the wear and waste of life, so as to preserve their powers and sensibilities in unabated vigor and freshness, 'even to length of days forever and ever'? This, Scripture informs us, was the assignment of the death of man. The threatening of death as the penalty of a breach of the covenant is rightly understood to imply the promi
DEATH

bse of deathless and incorruptible life so long as the covenant should stand. And the tree of life in the midst of the garden, and by its means of perpetual renovation, was certainly the sacramental pledge of God's purpose to preserve life in violate while man was steadfast to the covenant. Thus runs the tenor of the covenant, or the constitution under which man's life was originally given and held. 'Know that this is out of the tree of knowledge of good and evil, for in the day thou eatest thereof thou shalt surely die.' And, in terms equally explicit to the transgression of the law is the entrance and reign of death over man ascribed: 'By one man sin entered into the world, and death by sin; and so death passed upon all men, for that all have sinned.' Let it be observed that from this day of death as it reigns over all men only. It affirms nothing respecting the cause of death as it reigns over other orders of creatures in the present or in preceding stages of the world's existence. Whether, in any way, they may have been constituted under a law of death by anticipation, and as in keeping with a state of things in which death should reign over man, we do not venture to pronounce. That indirectly, as a consequence of their relation to man as a sinner against God, their sufferings have been increased and their lives shortened, it is impossible to doubt or deny. But if, in this view, man, in his super ableness, their death cannot be the cause of it. They are incapable of sin, and cannot die judicially for sin. The contrary opinion, which long and generally prevailed, that the creatures were immortal until man sinned, has as little to justify it in Scripture as in science. Death, it is there said, is the law of their being; and the true doctrine of the Scripture is not that they die because man has sinned, but that man, because he has sinned, has forfeited his original and high distinction, and has become like the beasts that perish.' It is unnecessary here to multiply Scripture proofs of this awful and haunting truth. Every one is familiar with the frequent and equivalent testimonies that death is 'the fruit,' 'the wages,' the 'end' and consummation of sin; and the circumstances which attend and induce it impressively connect it with sin as its cause. How, if not through guilty foreboding, should the life of man have been abreviated in its term so much more than that of many of the short lived animals on earth. Man's existence still further shortened by disease and by calamity? To what great extent is it consumed by the fire of evil passion, smitten by the stroke of veneful violence, taken away by the arm of judicial authority? in all these cases sin visibly working death. And while every other man is led by manifest and undenied visible proofs, how irresistibly does conscience within disquiet and alarm us by the conviction of guilt and the terror of righteous judgment?

'But now what is death, or what does it import as an appointed doom? To answer this question rightly, we require to ascertain the true constitution of our nature. Obviously death must be very different in the view of the materialist, who regards man as only a higher species of animal, whose mental and moral distinctions are the result of a higher physical organization, and in the judgment of those who consider man as the possessor of a soul distinct from the body, the subject and seat of a higher nature. If the body be the whole of man, death is the end of his conscious existence. If he consist of body and spirit, death may prove but his birthday into another and more important state of being. Now this point, which till the present hour has proved too hard for man himself to clear up, Scripture decides conclusively for all who will receive its testimony. Man is both body and spirit, the first placing him in communion with the outward world, the second allying him to God and his spiritual creation. The record of his primeval state exhibits the reality and effect of this complex being. While his earthly paradise yielded its riches and pleasures to every sense and sensibility of its animal nature, his spiritual nature, his immaterial virtue by its eminent occupation and delight in the service and communion of the Father of his spirit. These views, as they magnify the life which God gave us, must be felt to complicate the nature and effects of death. How, then, does it affect us? Does it reach the whole man, body and spirit, man as a subject of death, and together affected by it? and in what order, and by what process does it consummate its work?

1. Death extends to the entire man, and to every part of his nature. Against himself the threatening was directed, 'In the day thou eatest thereof thou shalt die.' Beyond doubt the outward man perishes, and sure will the inward man, man in the image of God, of which the body is but the instrument, cannot have escaped the force of the dread sentence. God's word assures us that the soul that sinneth it shall die. Nay, it speaks of man as already dead who yet lives in the body; dead, therefore, spiritually. On the other hand, it speaks of man now alive through grace who shall never die, while yet the graves are ready for them. Men who walk after the course of the world and live in pleasure are pronounced 'dead in sin,' dead while they live. And while whose loveth his brother has passed from death unto life, he that hateth his brother is in darkness, and there is no light in him. He that distinguishes between bodily and spiritual death, represents both as included in the sentence, and threateneth and executed against the sinner.

2. To what effect, then, does death exert its power upon the body and the spirit severally and together? It is not important to observe that this is not extinction of existence or annihilation either of the one or the other. For a time the body retains its form, and its substance, however changed, is never lost; much more, may it be presumed, shall the spirit survive. Not, indeed, that spirit more than body is immortal independently of God's will, but that, seeing he preserves our inferior part, he will much more preserve the higher and more kindred product of his creative power. The effects of death upon the body itself are a matter of common observation; it quickly turns its comeliness into corruption, and finally reduces its form and structure into shapeless dust. The effects of bodily death on the spirit are not so evident, and the spirit of our natural nature is thus divided it may be more difficult to estimate. This may depend in part on the value of the earthly portion he has lost, and partly on the future portion on which he has entered, but it cannot be indifferent either to the child of sorrow or to the subject of grace. It would be impossible, of a world in which man has stripped of his whole inheritance of good. While we look on the desolate and impassive corpse and say, 'It is all over with him now,' the disembodied spirit must still find itself the subject of a maimed and imperfect nature. Consciousness belongs to its nature, and must endure while it has being. Its proper life lies in the harmony of its powers and dispositions to the nature and will of God; its death in contrariety and enmity to him. This involves the disruption of a holy and dutiful relation to the Father of spirits, and, by inevitable consequence, a deprivation of the fruits of his love and favor, on which life and blessedness depend. 'Your sins have separated between you and God.'

3. It may tend further to clear this subject to notice briefly the order and process through which the work of death is consummated. Though incurred instantaneously on the act of transgression, its effects follow by successive stages, for all who have transgressed. As caused by sin, the spiritual man, as the proper subject and source of the evil, first feels its power. Its very touch intercepts all happy intercourse with a holy God. This was felt and seen on the day that Adam sinned. His fear and flight at the
DEATH, BROTHERS OF

DEBORAH

time. Whatever be the result of this day of forbearance, the work of death goes on; the body is dead because of sin—the mortal crisis which awaits every individual man in his own time. As distinguish-

DEBORAH (Heb. De-bruth, דְּבֹרָה, a sanctuary, often applied to the Tabernacle and Temple), the name of two men, a woman, as well as of a

of Hebron is a deep and secluded valley called the Wady Nunkur, enclosed on the north by hills of which one bears a name certainly suggestive of Debar—De-

THEME. The "border of Debir" (דְּבֹרָה), to Debir; Sept. Δαβίς v. r. Δαβίς and Δαβίς; Vulg. Debir) is named as forming part of the boundary of Gad (Josh. xiii, 26), and as apparently not far from Mahanaim. ReLand (Pusey, p. 734) conjectures that the name may be the same as LODABER (q. v.), which is written similarly (לֹדַבֵּר), and lay in the same vicinity (2 Sam. xix, 4, 5). Lying in the grazing country on the high downs east of Jordan, the name is doubtlessly connected with דַּבָּר, the same word which is the root of Midbar, the wilderness or pasture (see Gesenius, Tha. Heb. p. 818).

...
DEBORAH

Such spots were usually chosen for the purpose (Gen. xxiii, 17, 18; 1 Sam. xxxii, 13; 2 Kings xxii, 18, etc.). Many have been puzzled at finding her in Jacob’s family; for it was she who summoned Jacob from Haran (as Jarchi suggests), or that she had returned during the lifetime of Rebekah, and was now coming to visit her (as Abiaanbel and others say); but she may very well have returned at Rebekah’s death, and that she was dead is probable from the omission of her name in the xxvi. 87; and if, according to the Jewish legend, Jacob first heard of his mother’s death at this spot, it will be an additional reason for the name of the tree, and may possibly be implied in the expression נָתָן, comforted, A. V. “blessed” (Gen. xxxix, 9; see, too, Ewald, Gesch. i, 890).

2. A prophetess, “wife of Lapidoth,” who judged Israel (Judg. iv, v) in connection with Barak (q. v.). B.C. 1409-1389. Her name may imply nothing whatever, being a mere appellative, derived like Rachel (a lamb), Tamar (a palm), etc., from natural objects; although she was as (Corn. a Lapido quantity puts it) usus melice, hositius acutius. Some, however, see in the name an official title, implying her prophetical authority, as in usus melice, hositius acutius, a symbol of regal power (comp. Callim. Joc. 60, and El. Mag. s. v. isra); and among the Greeks the term was applied not only to poets (more ap. maitea, Horace), and to those peculiarly chaste (as by the Neoplatonists), but especially to the priestesses of Delphi (γυναικεῖς, μελισσαίς, P. iv. 103, and Artemis (Creuzer, Symbolik, iii, 354, etc.), just as isra was to the priests (Liddell and Scott, s. v.). In both these senses the name suits her, since she was essentially a vates or seer, combining the functions of poetry and prophecy (see Stanley, Jewish Church, i, 584 sq.).

She probably sat in a tent, under the palm-tree of Deborah, between Ramah and Bethel in Mount Ephraim (Judg. iv, v), which, as palm-trees were rare in Palestine, is mentioned as a well-known and solitary landmark, and was probably the same spot as that called (Judg. xx, 33) Baal-Tamar, or the sanctuary of the palm (Stanley, Palest. p. 145). Von Bohlen (p. 284) thinks that this tree is identical with Alon-Bachuth (Gen. xxxv, 8), the name and locality being nearly the same (Ewald, Gesch. i, 391, 405), although it is absolutely unhistorical to say that this “may have suggested a name for the nurse” (Havernick’s Intro. to Pent. p. 201; Kalisch, Gen. ad loc.). Possibly it is again mentioned as the oak of Tabor” in 1 Sam. x, 3 (where Thenius would read יֵתָן for יִתָּן). At any rate, it was a well-known tree, and she may have chosen it from its previous associations. See OAK.

She was probably a woman of Ephraim, although, from the expression in Judg. v, 15, some suppose her to have belonged to Issachar (Ewald, Gesch. ii, 489). The expression יִתָּן יָתָן is much disputed; it is generally thought to mean “wife of Lapidoth,” as in A. V.; but other versions render it “uxor principis,” or “Femina Lapidothana” (“that great dame of Lapidoth,” Tennyson), or “mother of the prophets,” i.e. one of the prophetically illuminated, since יִתָּן = lightnings. But the most prosaic notion is that of the Rabbi, who takes it to mean that she attended to the tabernacle lamps from יֵתָן, lappid, a lamp! The fem. termination is often found in men’s names, as in Shelomith (1 Chron. xxviii, 9), Koheloth, etc. Lapidoth, then, was probably her husband, and not Barak, as some say. See LAPIDOTh.

She was not so much a judge (a title which belongs rather to Barak, Heb. xi, 32) as one gifted with prophetic command (Judg. iv, v, 7), and by virtue of her inspiration “as in the instances of Miriam, Huldah, Anna, Noadiah (2 Kings xxiii, 14; Neh. vi, 14). Her official designation probably means that she was the organ of communication between God and his people, and that the authority of her character, was accounted in some sort as the head of the nation, to whom questions of doubt and difficulty were referred for decision. See Judge.

From the intimations which the narrative (especially her song) contains, and from other circumstances, the people would appear to have sunk into a state of total despondency and apathy; and the uttering of the Canaanites, so that it was difficult to rouse them from their despondency, and to induce them to make any exertion to burst the fetters of their bondage. From the gratitude which Deborah expresses towards the people for the effort which they finally made, we are warranted in drawing the conclusion that she had endeavored to instigate them to this step in vain. At length she summoned Barak, the son of Abinomah, from Kedesh, a city of Naphtali, on a mountain not far from Hazor, and made known to him the will of God that he should undertake an enterprise for the deliverance of his countrymen; but such was his distrust of feeling, and, at the same time, such his confidence in the superior character and authority of Deborah, that he was content to go only on the condition that she would accompany him. Jabin’s tyranny was peculiarly felt in the northern tribes, who were near his capital and under his jurisdiction, viz. Zebulon, Naphtali, and Issachar, and hence, when she summoned him to the deliverance, it was on them that the brunt of the battle fell; but they were joined by the adjacent central tribes, Ephraim, Manasseh, and Benjamin, though not by those of the extreme west, south, and east. Under her direction Barak encamped on the broad summit of Tabor” (Josephus, War, ii, 20, 6). When asked to accompany him, she answered indignantly, “Then, O Barak, deliverest up meanly the authority which God hath given thee into the hands of a woman: neither do I reject it” (Joseph. Ant. v, 5, 2). The Sept. interpolates the words “because I know not the day when the Lord will escort me by his angel” as a sort of excuse for Barak’s request (iv, 8; comp. 14; v, 29). When the small band of ill-armed (Judg. v, 8) Israelites saw the dense iron chariots of the enemy, “they were so frightened that they wished to march off at once, had not Deborah detained them, and commanded them to fight the enemy that very day” (Josephus, l. c.). They did so, and their prophecy was fulfilled (Judg. iv, 9), and the enemy’s general perished among the oaks of the wanderers (Zaanaim),” in the tent of the Bedouin Kenite’s wife (Judg. iv, 21) in the northern mountains. For the natural phenomena which aided (Judg. v, 20, 21) the victory, and the other details (for which we have ample authority in the twofold narration in prose and poetry), see Barak, where we have also entered on the question of the chronology (Ewald, Gesch. ii, 494-494). B.C. 1409. This great victory, which seems to have been followed up, broke the power of the native princes, and secured to the Israelites a “repose of Israel” (Josephus, War, ii, 31). During the last part of this time Deborah continued to exercise her former authority; but nothing more of her history is known. See Thomson, Land and Book, i, 150; Hunter, Sacred Book, iv, 98; Hughes, Female Char. i, 296.

Deborah’s title of “prophetess” (תּוֹרָתָה) includes the notion of inspired poetry, as in Exod. xv, 20; and in this sense the glorious triumphal ode (Judg. v) well vindi cates them to the office. The fact that it was composed in consequence of the great victory over Sisera, is said to have been “sung by Deborah and Barak.” See JUDAH. It is usually regarded as the composition of Deborah (see Zeltner, Debreor prophetissae eruditis, Alt. 1709), and was probably inscribed by her to be sung on the return of Barak and his
DEBT 717

DEBTOR

warriors from the pursuit. It belongs indisputably to the first rank of Hebrew poetry, and is one of its most splendid and difficult specimens. "In the ecstasy and energy of inspiration," says Prof. Robinson (Bib. Repose, 1831, p. 560), "the prophet pours out her whole soul in thanksgiving to God for his divine aid, and in gratitude to the people of Israel for their patriarchal life in rising spontaneously to throw off the yoke of oppression. Her strains are bold, varied, and sublime; she is everywhere full of abrupt and impassioned appeals and personalization; she lurcs a way from earth to heaven, and again returns to human things; she touches now upon the present, now dwells upon the past, and closes at length with the grand promise and result of all prophecy, and of all the dealings of God's providence, that the wicked shall be overthrown, while the righteous shall come to triumph in Jehovah's name." This ode has often been explained at length, especially by Hollman, In carmen Deborâ (Lips. 1818); Kron, Sur le châtie de Débora (Strasb. 1833); Kalkar, De cantico Déb. (Copenh. 1888); Kemink, D. carm. Déb. (Utr. 1840); Meier, Uber, u. Erklär. des Deborahs. - Gabi (Tübingen, 1859); Herder, Arb. Poëtice, ii, 235; Ewald, Die Gesch. Israels, ii, 527; Böttger, in Käßner's Bibl. Studien, pt. 1-3; Robinson, Bibl. Repos., i, 568 sq. Other treatises are: In Latin, by Schultens (B. L. 1745); and in his Syll. Disert. No. 12); Lette (B. L. 1795), Liidner (Helmut (1772), Schnurrer (Tub. 1772); also in his Disert. p. 80 sq.; in Greek, by Heber (Heb. Bibl. Sprüer, 1746); Muis (Ser. b. c., 1), Cocceus (Op. 1. 311); in German, by Heber (Telle, 1766), Wenck (Darmst. 1783), Köhler in Eichborn's Repertor. iv, 163 sq.; Mendelssohn in Sammler, 1778), Biehler (Starg. 1750); in English, by Weston (London 1788), Horsey (Bib. Crit., 44, 47); in Italian, by Hinta (ed. Brini, Rom. 1792). See Judges (Book of).

Debt (נַשָּׁה, נַשָּׁה), 2 Kings iv, 7; פָּרָשְׁתָה, פָּרָשְׁתָה, Prov. xxvi, 26; נַשָּׁה, נַשָּׁה, a creditor, 1 Sam. xxii, 2; elsewhere, נָשָׁה, hand, Neh. x, 31; בֵּית, בֵּית, loan, never debt, Matt. xviii, 27; פָּרָשְׁתָה, Matt. xxiii, 22, a due, as rendered Rom. xiii, 7; פָּרָשְׁתָה, something owed, Matt. vi, 12; Rom. iv, 4). The Mosaic law very strongly recommended willingness to loan (Deut. xv, 7 sq.; comp. Psa. xxxix, 26; Matt. v, 42). Interest (נַשָּׁה, usury), however, could only be exacted by capitalists from foreigners, not at all from Israelites as co-religionists (in Neh. vi, 11, 19, a percentage is mentioned; but it does not appear whether this was in money, Heinecli Anci. Rom. ii, 15, 19, as generally among the Romans, or as a yearly rental; comp. Appian, Civ. i, 54); also a vendge of looted natural products (see, however, Biblia Med. a, 1) was forbidden (Exod. xxii, 25; Lev. xxx, 37 sq.; Deut. xxiii, 20). The agrarian regulation of the state secured each one, in the last resort, from the rapacity of the creditor; probably by this very arrangement money-eyed men were restrained from depending upon loaned money for a subsistence, and were thus induced to turn their attention to agriculture or other useful occupations. See Land. In this way, however, wholesale business, which was incompatible with the isolation-system of the Jewish law-giver, was rendered rare, or rather impossible (see Michaelis, Synagom. comm., col. 180). For Mamre, see Jeth., Judges, iv, 9, 11, 12; Jer. xv, 10; Psa. xv, 5; cxx, 11), but no other civil penalty was annexed to it (according to the Talmud, it involved a forfeiture of redress; on the whole subject, see Marzez, De usuraria pravitate, Lips. 1837). Written notes of obligation (עַדְמוֹאָה, signatures; Gesseni, Theocr. p. 921, finds such evidences of debt in the יִנְעֵה or יִנְעֵה, q. d. note of

hand, Deut. xv, 2; the Talmudic precepts on such paper are given in the Mishna, Baba Batra, c. 10) were, at least in the post-exilian period, regularly in vogue (Tosit, l. 17; Josephus, Ant. xvi, 10, 8; War, ii, 17, 6; comp. xviii, 6, 8; Luke vi, 6 sq.). Dratraz was allowed, but under certain restrictions (Exod. xxiii, 16 sq.; Deut. xxxi, 6, 10 sq.). See Pledge. Severity against debtors being regarded as improper among the Israelites (comp. Job xxiii, 6; xxiv, 3), especially in the collection of debts, the law scarcely enjoined anything directly on the treatment of bankrupts; it is merely indicated (Lev. xv, 90) that he who was totally insolvent might be sold into temporary bondage in order to satisfy the debt by his wages. (On the rigor towards this class among the Romans, see Heineceius, Anic. jur. Rom. iii, 30, 2). They were often subjected to the harshest usage as slaves, Livy, ii, 28; vi, 36; Gall. xx, 1, 19; Appol. Ital. ix, p. 40, ed. Schwengel. In Athens, before Solon's time, the creditor could even lay claim to the person of his deltor, Plutarch, Vit. Sol. c. 16; later, there prevailed a summary process of sequestration, which the creditor himself was authorized to execute (see Schläger, De delictor, etc. Helmstäd, 1741). Yet certain restrain were laid on the receiver, as proved by a letter of Archelaus commended; but it is not accounted for; see Heffter, Ath. Geschichtschr. p. 55 sq. On the Egyptian legislation, see Dios. Sic. i, 79; Wilton, ii, 49 sq.). This rule was often still further exercised in practice with such heartlessness as to involve wife and children in the poor debtor's fate (2 Kings iv, 14; 18 sq.; Neh. vi, 5; Eph. v, 26, 27; Col. iii, 20); nay, the sureties likewise were exposed to the same mode of reparation (Prov. xx, 16; xxii, 26 sq.; xxvii, 13). Debtors were liable to punishment by imprisonment (Matt. v, 26; xviii, 30), probably a Roman usage. The Talmudic rules concerning debt are mild (Baba Mei, x, 13; in the Sabatical year (q. v.) all pecuniary obligations were cancelled (Deut. xv, 1 sq. 9). See Loan; Delator; Usury; Creditors, etc.

Debtor (נַשָּׁה, נַשָּׁה, debt, Ezek. xviii, 7; χρεοκομήτης, over of money, Luke vii, 41; 5; elsewhere simply χρεοκομήτης). See generally the prop. Hebrew words פָּרָשְׁתָה, פָּרָשְׁתָה, Gesseni, Theoc. p. 920). The Mosaic laws respecting pecuniary obligations differ in many points from those of modern nations, but this is no proof that they were not suitable to the people for whom they were designed, and it is certain that they were pervaded in a degree of kindness and humanity to which no parallel is to be found in the codes of antiquity. See Loan. Though they at least tacitly allow of the sale of a debtor as a slave (Lev. xxv, 39, 40), they also direct that his treatment shall be that of 'a hired servant and a journeyer,' while the law of the Twelve Tables authorized, buying an insolvent debtor to death, and both Grecian and Roman history abound with instances of the disturbances caused in those states by the severity with which this class was dealt with. The laws of Moses are, however, by no means regardless of the rights of creditors, as we find that persons who had property due to them might, if they chose, secure it either by means of a mortgage, or by a pledge, or by a bondsman or surety. The chief provisions in the Scripture on the subject are the following:

1. The creditor, when about to receive a pledge for a debt, was not allowed to enter the debtor's house and take what he pledged, but was to wait before the door till the debtor should deliver up the pledge with which he could most easily dispense (Deut. xxix, 10, 11; Job xxii, 6; xxiv, 3, 7, 9).

2. When a mill, or mill-stone, or an upper garment was given as a pledge, it was not to be kept all night. These articles were to be mentioned in the bond for all other things which the debtor could not without great inconvenience dispense with (Exod. xxiii, 26, 27; Deut. xxiv, 6, 12).
8. The debt which remained unpaid until the seventh or Sabbath year (during which the soil was to be left without cultivation, and, consequently, a person was not supposed to be in a condition to make payments) could not be exacted during that period (Deut. xvi, 1-11). But at other times, in case the debt was not paid, the creditors might seize, first, the hereditary land of the debtor, and enjoy its produce until the debt was paid, or, at least, until the year of jubilees; or, secondly, his houses. These might be sold in perpetuity, except those belonging to the Levites (Lev. xxv, 14, 32). Thirdly, in case the house or land was not sufficient to cancel the debt, or if it so happened that the debtor had none, the person of the debtor might be sold, if he had any children. This is implied in Lev. xxv, 39, and this custom is alluded to in Job xxiv, 9. It existed in the time of Elisha (2 Kings iv, 1), and on the return of the Jews from the Babylonish captivity some rich persons exercised this right over their poor debtors (Neh. v, 1-13). Our Lord alludes to the same custom in Matt. xviii, 26. As the person of the debtor might thus be seized and sold, his cattle and furniture were undoubtedly liable for his debts (Prov. xxii, 27). It does not appear that imprisonment for debt existed in the age of Moses, but it seems to have prevailed in the time of our Saviour (Matt. xviii, 24).

This practice does not appear to have obtained before the time of Solomon, when it was attended with serious consequences. It seems that the familiarity observed was for the person who became surety to give his hand to the debtor, and not to the creditor, to intimate that he became, in a legal sense, one with the debtor; for Solomon cautions his son against giving his hand to a stranger, to a person whose circumstances he did not know; and entreats him to take care and urge the person to whom he had given his hand, or for whom he had become surety, to pay his own debt (Prov. xi, 15; xvii, 18; xxii, 26). See Deut.

Decalogue (Δεκάλογος), the name most usually given by the Greek fathers to the law of the ten tables given by God to Moses on Mount Sinai, called in Scripture the Ten Commandments (Τεκαλογος), the ten words; Sept. oi δικαίοι λόγοι and τὰ δικαία λόγα: Vulg. decem verba; Exod. xxxiv, 28; Deut. iv, 13; x, 4); and embracing what is usually termed the Moral Law (Exod. xx, 3-17; Deut. v, 7-21). The Decalogue was written on two stone slabs (Exod. xxxii, 31; Deut. v, 22), which were broken by Moses (xxxi, 19), were renewed by God (xxxiv, 1, etc.). They are said (Deut. ix, 10) to have been written by the finger of God, an expression which always implies an immediate act of the Deity. The Decalogue is five times alluded to in the New Testament, there called ιεροκατάλογος (see Matt. v, 17, 19; etc.; Mark x, 19; Luke viii, 20; Rom. xiii, 9; vii, 7; 8; Matt. v; 1 Tim. i, 9, 10). Those which refer to God are supposed by some to be omitted in these enumerations, from the circumstance of their containing precepts for ceremonial observances (Jewish, Talmud's Life of Chorah, 15; Talmud, 138a, loc. 1384). That this was a very early mode of dividing the Decalogue is further evident from a passage in Cyril of Alexandria's treatise against Julian, from whom he quotes the following Invective: "That Decalogue, the law of Moses, is a wonderful thing: thou shalt not steal; thou shalt not murder; thou shalt not commit adultery; but let each of the precepts which he asserts to have been given by God himself be written down in the identical words, 'I am the Lord thy God, who brought thee out of the land of Egypt;': the second follows, 'Thou shalt have no strange gods beside me; thou shalt not make to thee any graven image, for I, the Lord thy God, art a jealous God, visiting the sins of the fathers upon the children.' Thou shalt not take the name of the Lord thy God in vain. Remember the Sabbath day. Honor thy father and thy mother. Thou shalt not commit adultery. Thou

..."
shalt not steal. Thou shalt not bear false witness. Thou shalt not covet thy neighbor's goods. 'What nation is there, by the gods, if you take away these two, 'Thou shalt not bear false witness, and 'Remember the Sabbath, which does not think all the others are to be kept, and which does not punish more or less severely those who violate them?"

2. The Origin of the Commandments, or that approved by Origen, which is that in use in the Greek and in all the Reformed churches except the Lutheran. Although Origen was acquainted with the differing opinions which were maintained in the Greek Church on this subject, it is evident from his own words that he knew nothing of that division by which the number ten is completed by making the prohibition against coveting either the house or the wife a distinct commandment. In his eighth Homily on Genesis, after citing the words, "I am the Lord thy God, who brought thee out of the land of Egypt," he adds, "this is not a part of the commandment. The first commandment is, 'Thou shalt have no other gods but me,' and then follows, 'Thou shalt not make an idol.' These together are thought by some to make one commandment; but in this case the number ten will not be completed elsewhere, then, will be the truth of the law which is called thus," etc. But as we have done in the last sentence, the full number will be evident. The first commandment therefore is, 'Thou shalt have no other gods but me,' and the second, 'Thou shalt not make to thyself an idol, nor a likeness,' etc. Origen proceeds to make a distinction between gods, idols, and that of that which does not exist, such as the figure of a man with two faces, or with the head of a dog, etc. The likeness must be of something existing in heaven, or in earth, or in the water. It is not easy to decide on the meaning of "things in heaven," unless it refers to the sun, moon, or stars. The design of Moses be conceived to have been to forbid Egyptian idolatry, such as that of Hecate, or other fancied demons (Opera, ii, 156, De La Rude's ed.).

The pseudo-Athanasius, or the author of the Synodicon Scripturae, who is the oracle of the Greek Church, divides the commandments in the same manner. "Fifth, that of all corrupt commandments, on two tables: first, I am the Lord thy God. Second, Thou shalt not make to thyself an idol, nor any likeness. . . Ninth, Thou shalt not hear false witness against thy neighbor. Tenth, Thou shalt not covet thy neighbor's wife, nor any thing that is thy neighbor's" (Athanasii Opera, fol. Paris, 1898).

Gregory Nazianzen, in one of his poems, inscribed "The Decalogue of Moses," gives the following division (Opera, ed. Caillaud, Paris, 1840):

These two laws Moses formerly engraved on tables of stone: but now thou art to engrave them on thine heart. Thou shalt not know another God, since worship belongs to me. Thou shalt not make a vain image, a lifeless image. Thou shalt not bow before it, nor do thou read the names of idolaters. Keep all sabbaths, the sublime and the shadowy. Happy he who renders to his parents due honor. Flees from murder, and of a foreign Bed: evil-minded theft and witness False, and the desire of another's, the seed of death. Jerome took the same view with Origen. In his commentary on Genesis, "I am the Lord thy God, or thy father and thy mother," etc. is the fifth commandment in the Decalogue. How, then, are we to understand the apostle's meaning in calling it the first, when the first commandment is 'Thou shalt have no gods but me,' where some read thus, 'which is the first of all commandments'; and 'as the four previous commandments had no promise annexed, etc. . . . . . . But they do not seem to me to have observed with sufficient accuracy that in the second commandment there is also a promise: 'Thou shalt not make to thyself an idol, nor the likeness of any thing in heaven above, or in the earth beneath, or in the water under the earth; thou shalt not bow to them, nor serve to them; for I, the Lord thy God, am a jealous God, visiting the sins . . . but showing mercy unto thousands . . . . (observe these words of promise—showing mercy unto thousands, etc.)' (Hieronymi Op. era, vol. IV, Paris, 1693).

The pseudo-Ambrose also writes to the effect on his Commentaries on Epitome: 'He is this the first commandment, when the first commandment says, Thou shalt have no other gods but me? Then, Thou shalt not make a likeness of any thing in heaven above, or in the earth beneath, etc. The third, Thou shalt not take the name of the Lord thy God in vain; the fourth, Keep sabbaths; the fifth, Honor thy father and thy mother. As the first four pertain to God, they are contained in the first table; the others, pertaining to men, are contained in the second, such as that of honoring parents, not committing murder, adultery, theft, false witness, or concubinage. These six seem to be written in the second table, the first of which is the third commandment (Anselmi Opera, vol. ii, Paris edition, Append. p. 248, 249).

To these testimonies from the fathers may be added that of Clements Alexandrinus (Stromata, vi, p. 88 9); but this writer is so confused and contradictory in reference to the subject, that some have supposed the text to have been corrupted. The apparent break in the Decalogue, he observes, "shows that one God only is to be worshipped, who brought his people out of Egypt . . . and that men ought to abstain from the idolatry of the creature. The second, that we ought not to transfer his name to creatures; the third signifies that the name of God has been given us the seventh day to rest; the fifth follows, which commands us to honor our parents; then follows the precept about adultery, after this that concerning theft; but the tenth is concerning coveting."

But the strongest evidence in favor of the Origin of the division is that of the learned Jews Philo and Josephus, who speak of it as the received division of the Jewish Church. Philo, after mentioning the division into two pentads already referred to, proceeds: 'The first pentad is of a higher character than the second; it treats of the monarchy whereby the whole world is governed, of statues and images (Διοςως, et ειγαλαμαως), and of those that be not gods (οι ουδενες); of not taking the name of God in vain; of the religious observance of the seventh day as a day of holy rest; of honoring both parents. So that one tabule begins with God the father and ruler of all things, and ends with parents who emulate him in perpetuating the human race. But the other tabule contains those commandments which forbid adultery, murder, theft, false-witness, concubinage' (De Decalogo, lib. i). The first precept, he afterwards observes, enjoins the belief and reverent worship of one supreme God, in opposition to those who worship the sun and moon, etc. Then, after condemning the arts of sculpture and painting, as taking off the mind from admiring the natural beauty of the universe, he adds: 'As I have said a good deal of the second commandment, I shall now proceed to the next, 'Thou shalt not take the name of God in vain. . . . The fourth commandment respects the Sabbath day, to be devoted to rest, and the study of the Law; the fifth, the Honor of parents, with a revision of our lives during the past week, in order to the correction of our transgressions; the fifth speaks of honoring parents. Here ends the first, or more divine pentad. The second pentad begins with the precept respecting adultery; its second precept is against murder, its third against stealing, the next against false-witness, the last against coveting' (lib. ii, iii). This division seems to have been followed by
DECALOGUE

Frenæus: "In quinque libros, etc.; unaqueque tabula quam accepta deo precepta habet quinque." Josephus is, if possible, still more clear than Philo. The first commandment teaches us that there is but one God, and that we ought to worship him only; the second commands us not to make the image of any living creature, to worship it; the third, that we must not swear by God in a false matter; the fourth, that we must keep the seventh day, by resting from all sorts of work; the fifth, that we must honor our parents; the sixth, that we must abstain from murder; the seventh, that we must not commit adultery; the eighth, that we must not be guilty of theft; the ninth, that we must not bear false-witness; the tenth, that we must not admit the desire of that which is another's." (4 M. iii, 5, 5, Whiston's translation).

This division, which appears to have been forgotten in the Western Church, was revived by Calvin in 1536, and is also received by that section of the Lutherans who followed Bucer, called the Tertopolitanis. It is adopted by Calmet (Dict. of the Bible, French ed., art. Lofi). It is supported by Zonaras, Nicephorus, and Peter Mogiuslaus among the Greeks, and is followed by all the Church of Greece, as well as in the Greeks in general (see the Catechism published by order of Peter the Great, by archbishop Resensky, London, 1735). It is at the same time maintained in this catechism that it is not forbidden to bow before the representations of the saints. This division, which appeared in Doctors' Book of Bishops' Resolutions, was adopted by the Anglican Church at the Reformation (1548), substituting seventh for Sabbath-day in her formulares. The same division was published with approbation by Bonner in his Homilies in 1555.

3. We shall next proceed to describe the two Mosaic divisions. (1) The first is that in Exodus. We can quote the Mosaic division in liturgy, as the commandments in the greater number of manuscripts and printed editions are separated by a B or C, which mark the divisions between the smaller sections in the Hebrew. According to this arrangement, the first two commandments (in the Origensian or Greek division), that is, the commandment concerning the worship of one God, and that concerning images, make but one; the second is, "Thou shalt not take the name of the Lord thy God in vain!" and so on until we arrive at the eighth, which is, "Thou shalt not covet thy neighbor's house," and the last or tenth, "Thou shalt not covet thy neighbor's wife, nor his servant," etc. to the end. This was the division approved by Luther, and it has been ever since his time received by the Lutheran Church. The correctness of this division has been at all times maintained by the most learned Lutherans, not only from its agreement with the Hebrew Bibles, but from the internal structure of the commandments, especially from the fact of the first two commandments (according to Origen's division) forming but one subject. If these form but one commandment, the necessity of dividing the precept, "thou shalt not covet," etc. into two is obvious. (For a learned defence of this division, see Piéfifer, Opera, vol. i, loc. 96, p. 120). Piéfifer considers the acuteness also of the Hebrew as equally decisive in favor of this division, notwithstanding the opposite view is taken by many others, including the learned Buxtorf. This division is also followed in the Trident Catechism, and may therefore be called the Roman Catholic division. The churches of this communion have not, however, been consistent in following uniformly the Tridentine division, having revived, as in England, the second Mosaic division, to which we shall presently allude. In the Trent Catechism the first commandment is, "Ego sum Dominus Deus tuus, qui exuixi te de terra Egypti, de domo servitutis; non habebis Deos alieenos coram me. Non facies tibi sculptile, etc." "Ego sum Dominus Deus tuus, fortis, zeolotes," etc. to the "precepta mea." The last two commandments (according to the Roman division) are, however, in the same Catechism, combined in one, thus: "Non concurrebit in te sanctus, et in te proximus tuus desiderabis uxorem ejus, non servum, non ancillam, non bovem, non asinum, nec omnia quae illius sunt. In his duobus preceptis," etc. It had appeared in the same form in England in Marshall's and Bishop Hill's Primers, 1584 and 1586.

These divisions have been accustomed to give the Decalogue very generally in an abridged form: thus the first commandment in the Lutheran Shorter Catechism is simply "Thou shalt have no other gods but me;" the second, "Thou shalt not take the name of thy God in vain;" the third, "Thou shalt sanctify the Lord thy God;" the fourth, "Thou shalt remember to keep the Sabbath-day." This practice is followed by the Roman Catholics, although they, as well as the Lutherans, in their Larger Catechisms (as the Douayy) give them at full length. This practice has given rise to the charge made against those denominations of leaving out the second commandment, whereas it would have been more correct to say that they had mutilated the original text, as well as the Greeks in general (see the Catechism published by order of Peter the Great, by archbishop Resensky, London, 1735). It is at the same time maintained in this catechism that it is not forbidden to bow before the representations of the saints.

(2) The last division is the second Masoritic, or that of Deuteronomy, sometimes called the Augustinian. This division differs from the first one in placing the precept "Thou shalt not covet thy neighbor's wife" before "Thou shalt not covet thy neighbor's house," etc.; and for this transposition it has the authority of Deut. v, 21. The authority of the Masorites cannot, however, be of sufficient force to supersede the earlier tradition of Philo and Josephus.

This division was that appriven by Augustine, who thus expresses himself on the subject: Following up what he had said (ut sup. p. 586), he observes, "But to me it seems more congruous to divide them into three and seven, inasmuch as to those who diligently look into the matter, those which appertain to God seem to insinuate the Trinity. And, indeed, the command, 'Thou shalt have no other gods but me,' is more perfectly explained when images are forbidden to be worshipped. Besides, the sin of coveting another man's wife differs so much from coveting his house, that to the house was joined his field, his servant, his maid, his ox, his ass, his sheep, his vineyard, and his olive-yard; but it seems to divide the coveting of the house from the coveting of the wife when each begins thus: 'Thou shalt not covet thy neighbor's wife, thou shalt not covet thy neighbor's house,' to which it then begins to add the rest. For when he had said 'Thou shalt not covet thy neighbor's wife,' he did not add the rest to this, saying, not his house, nor his field, nor his servant, etc. but these seem plainly to be united, which appear to be contained in one precept, and distinct from that wherein the wife is named. But when it is said 'Thou shalt have no other gods but me,' there appears a more diligent following up of this in what is subjoined. First, the command, 'Thou shalt not take the name of God as an idol, nor a likeness; thou shalt not adore nor serve them,' unless to that which had been said, 'Thou shalt have none other gods but me.'" The division of Augustine was followed by Bede and Peter Lombard.

The learned Sonntag has entirely followed Augustine's view of this subject, and has written a dissertation in vindication of this division in the theologische Studien und Kritiken (Hamb. 1836-7), to which there was a reply in the same miscellanea from Zöllig, in vindication of what he terms the Calvinistic division, or that of Origen, which is followed by a rejoinder from Sonntag. The necessity of that order of the words, according to which the precept against coveting the wife precedes (as in Deuteronomy) that against coveting the house, etc. that he puts down the order of the words in Exodus as an.
Decapolis

The order in the Septuagint version in Exodus agrees with that in Deuteronomy. The Greek Church follows this order. Somnach conceives that the Mosaic division of the Decapolis was lost in the period between the exile and the birth of Christ. See Heimke, De ratione praep. De decalogos numunaris varia e veter. (Viteb. 1790); Pfuetke, De decalogis (Dresden, 1738); Thornton, Lectures on the Commandments (London, 1842). For a list of expositions, sermons, etc., on the Decalogues, see Darling, Cyclopediæ Bibliographicae, ill., 222 sqq. See Law.

Decapōlis (ἡ Δεκαπόλις; Mark v, 20, but without the art. in Matt. iv, 23, Mark vii, 6; i.e. at έλικα πόλεις, as in Josephus, Life, 65), a district (hence in Pliny, v, 16, 17, 'Decapōlita region'), or rather certain teĩta (including their adjacent villages or suburbs, Josephus, Life, 74). They were situated in the neighborhood of the Sea of Gennesareth (Mark vii, 31; comp. Joseph. War, iii, 9, 7), near the eastern side of the Jordan, and in what was called the Roman province of Syria (Josephus, Life, 65). The name Decapolis does not occur in the Apocrypha, and, according to our present state of knowledge, it is only the work of the writers of the first century; in later times there is scarcely an allusion to it (Geographie der Grieche und Römer, VI, i, 244). Immediately after the conquest of Syria by the Romans (B.C. 63), ten cities appear to have been rebuilt, partly colonized, and endowed with peculiar privileges (Josephus, Ant. xvir, 7, 8; xvii, 11, 4); the country around them was hence called Decapolis. The limits of the territory were not very clearly defined, and probably in the course of time other neighboring cities received similar privileges. This may account for the fact that ancient geographers speak so indefinitely of the province, and do not even agree as to the names of the cities themselves. Pliny (Hist. Nat. v, 16), while admitting that there was some variation in the list, enumerates them as follows: Domasius, Philadelphia, Raphana, Scythopolis, Gadara, Hippos, Daimon, Pella, Galaesus (? Gerasa), and Canatha; he adds (v, 18), "The tetrarchies lie between and around these cities, namely, Trachonitis, Pella, Ablaba," etc. These cities are scattered over a very wide region. If Raphana be, as many suppose, the same as the Raphanias of Josephus, it lay near Hamath (Joseph. War, vii, 5, 1), and from thence to Philadelphia on the south is above 200 miles, and from Scythopolis on the west to Canatha on the east is about 60. Josephus does not enumerate the names of Decapolis; but it would seem that he excludes Damascus from the number, since he calls Scythopolis the largest of them (War, iii, 9, 7). He also incidentally includes most of the other cities named: e.g. Philadelphia (War, ii, 18, 1), Gadara and Hippos (Life, 65, 74); while Epiphanius (Hær. i, 39, 2) names Pella as belonging to this district, and in Steph. of Byzantium Gerasa appears in the same general connection. Cellarius thinks Cesarea-Philippi and Gerassa ought to be substituted in Pliny's list for Damascus and Raphana (Noblit, ii, 630). Pliny is undoubtedly the only author who extends Decapolis so far north. Palœmon appears to include Decapolis on the southern part of Ceæ-Syria (Geogr. v, 15); he also (v, 17) makes Copiotaion one of the ten; and an old Palmyrene inscription quoted by Roldan (Palest. p. 525) includes Ablaba, a town which, according to Eusebius (Onom., s. v. Ablaba), was 12 Roman miles east of Gadara. Lightfoot (Hor. Hebr. p. 663 sqq.) enumerates from the north to the south: Cesarea-Philippi, Gadara, Hippos, and Pella, the following lesser-known towns and villages, which, like Scythopolis (q. v.), were generally esteemed as heathen and under Gentile rule: Cæphar-Carmiim (主营业), Cæphar-Znachim (主营业).

721

DECHANT

Bath-Gurim (בַּית-גֻּרִים), Arbo (ארב), and Cesarea-Philippi. Brocardus, a writer of the 13th century, even describes Decapolis as extending in breadth from the Sea of Galilee to Sidon, and in length from Tiberias to Damascus, including the following ten chief towns: Cesarea-Philippi, Sophet, Caisarea, Gadara, Hippos, Pella, Canatha, Casarea, Cesarea-Philippi, Caesarea, Bosra, Cesarea-Philippi, Capernaum, Jonitha, Bethsaida, Corin, and Bethanai. (Descript. Terrae Sanctae, in Le Clerc's ed. of Eusebius. Onomast. p. 175.) Andronicus gives an account of the extent of the Decapolis substantially the same (Theot. Terrae Sanctae). But these statements are justly pronounced by Lightfoot (Opp. ii, 117 sqq.) to be the most absurd and nugatory of all the supposed extent of the Decapolis, with the single exception of Scythopolis, lay on the east of the Jordan; and both Eusebius and Jerome (Onomast. s. v. Decapolis) say that the district was situated "beyond the Jordan, around Hippos, Pella, and Gadara"—that is, to the east and south-east of the Sea of Galilee. With this also agrees the statement in Mark v, 20, that the demoniac who was cured at Gadara "began to publish in Decapolis how great things Jesus had done to him." The phraseology in Matt. iv, 25; Mark vii, 31, implying a situation on the west of the Jordan, must therefore be understood in a popular and not in a precise sense of a definite place or bounded, and one of whose towns was on that side of the river. In the latter passage indeed the entire difficulty vanishes, if, with the latest critics, we read ένα Σαρωνος instead of κατα Σαρων, and place these words after ἀπεκ, thus: "And again departing from the coasts of Tyre, he came through Sidon unto the Sea of Galilee, through the midst of the coasts of Decapolis." In that case our Lord travelled from Tyre northward to Sidon; then he appears to have crossed Lebanon by the great road to Cesarea-Philippi; and from thence he descended through Scythopolis to the eastern shore of the lake, where he fed the multitude (comp. Matt. xiv, 23-38; Mark vi, 39). It thus appears that the "region of Decapolis" was beyond the Jordan, with the exception of the little territory of Scythopolis close to the western bank, at the southern end of the Sea of Galilee. In addition to Damascus and Scythopolis, whose sites are well known, its chief towns were: Gadara, about 4½ miles south-east of the lake; Pella, on the side of the range of Gilead, opposite Scythopolis; Philadelphia, the ancient Raboath-Asmon; Gerasa, whose ruins are the most magnificent in all Palestine; and Canatha, the Kenath of the Bible, situated eastward among the mountains of Bashan. Decapolis was not strictly a province, like Galilee, Pella, or Trachonitis. It was an assemblage of little communities, classed together, not because of their geographical position, but because they enjoyed the same privileges, somewhat after the manner of the Hanse Towns in Germany. This region, once so populous and prosperous, from which multitudes flocked to hear the Saviour, and through which multitudes followed his footsteps, is now almost without an inhabitant. Six out of the ten cities are completely ruined and deserted. Scythopolis, Gadara, and Canatha have still a few families, living, more like wild beasts than human beings, amid the crumbling ruins of palaces, and in the cavernous recesses of old tombs. Damascus alone continues to flourish, like an oasis in a desert. See PERSEA.

Decabant. Jacob William, a minister of the German Reformed Church, was born at Kreutznach, in the Palatinate, Germany, Feb. 18, 1784, and emigrated to America in 1805. Having received a good preparatory training in Europe, he studied theology with Dr. Becke, of Baltimore, Md., and Dr. Pelzer, of Philadelphia. His first pastorate of charge consisted of six congregations in Lehigh County, Pa. In 1815 he was sent as a missionary to Ohio, returning after some years to Pennsylvania to take charge of congregations in Berks and Montgomery counties. Here he labored with success.
DECIUS

DE COURY

722

DECIUS. See Titiius.

Decius, C. Messius Quintus Trajanus, a Roman emperor, was born at Bubalia, in Lower Pannonia, towards the close of the second century. Being sent in 249 by the emperor Philipus to restore to subordination the army of Mosia, which was in a state of revolt, the troops proclaimed him emperor against his will, and forced him to march upon Italy. Philipus having been defeated and slain, Decius assumed the government of the empire in the end of the year A.D. 249, but his brief reign was one of restless warring with the Goths, fighting against whom he was killed near Abriicum, in the close of the year 251. Decius was an emperor of more than ordinary ability, but his reign was stained by a bloody persecution of the Chris-

tians. In point of time this persecution ranks as the seventh, but in point of cruelty it was only equalled by that of Diocletian. See PERSECUTIONS. For about forty years prior to the accession of Decius the Christians had enjoyed peace, which only in some parts of the Roman empire was, for a short time, interrupted by a decree of the emperor Maximin. The effect of this peace upon the religious life of the Church was, in general, not favorable. Cyprian, Origen, and other ecclesiastical writers complain that worldliness, avarice, and other vices had become prevalent, and that marriages of Christians with pagans had become frequent. Soon after his accession to the throne (probably at the beginning of the year 249), Decius issued a severe decree against the Christians. The decree itself is lost, the Eictum Deci Augusti contra Christianos, which was published in 1664 at Toulouse by Bernard Meunlon from Acts of the Martyrs, being spurious, as has been shown by Tillemont and Mosheim. The contents of the decree are, however, fully noticed by Gregory of Nyssa and other ancient writers. It ordered the civil magistrates to destroy Christianity by threatening Christians with the severest punishments, and by using against them tortures of every kind. It was sent to the governors of all the provinces, and most of them hastened to execute it. They promulged the decree, and demanded that within a certain time every Christian should appear before the civil magistrate, and publicly declare his renunciation of the Christian faith; in the case of refusal, he was to suffer severe punishment, even death. Dionysius of Alexandria and Cyprian, under great danger of the persecutions of the region of Carthage and Alexandria. Cyprian says that at the first news of the impending persecution a majority of the brethren hastened to renounce the faith, but his account is suspected of exaggeration. That the number of apostates was very large is also reported by Eusebius. Of those who renounced faithful, most left the cities and sought refuge in solitude. Among this class were many of the most celebrated bishops, as Cyprian, Dionysius of Alexandria, and Gregory Thaumaturgus. This action was generally approved by the Church. The number of those, however, who neither fled nor apostatized, is not accurately stated; but, as soon as the first steps pointed for the execution of the decree arrived, the prisons were not sufficient to contain those who were arrested. Decius wished executions to be avoided, but every conceivable torture, if necessary, to be resorted to. Most of the civil magistrates vied with each other in inventing the most cruel tortures; only a few showed a spirit of sympathy and leniency. The number of those who succumbed to the torture (topis) was very large. Many procured false certificates that they had abjured the faith (libellatae). On the other hand, however, the number of those who died or were mutilated for the faith was considerable. In Rome, Abriicum, Jerusalem the religious bishops were massacred; Origen, famous among the early fathers, was subjected to the most acute tortures. All the ancient martyrologies abound in names of those who are reported to have suffered martyrdom under Decius, and Tilltemm spent much time and labor to sift the genuine reports from the spurious (Memosirs, iii. 133 189). Fortunately, the persecution of Decius did not last long. About Easter, 251, Cyprian could return from his concealment. The war which the emperor had to carry on against the Goths, his absence from Rome, the inroads of barbarians into the African provinces, and several insurrections, greatly moderated the persecution at the beginning of the year 251. When Decius, towards the close of the year, fell in a battle against the Goths, the Christians were set at liberty. Herzog, Real-Encyclop. iii. 300; Weitzer und Welte, Kirchen-Lex. iii. 59; Neander, Church History (Torrey's transl.), vol. ii.

Deck, i.e. Medrick (properly Tiberias, 'adada', to adorn, Ezek. xvi. 11, 13; xiii. 40; Job xi. 10; Jer. iv. 30; Hos. ii. 13). See ORNAMENT.

Declaration, a speech made in the tone and manner of an oration, uniting the expression of action to propriety of pronounciation, in order to give the deliberation its full impression on the mind. The word is used also in a disparaging sense, as when it is said such a speech was mere declamation, it implies that it was deficient in point of reasoning, or had more sound than sense. Buck, Theol. Dictionary, s. v. See Homiletics.

Declaratio Thuronensis, a confession of faith of the Reformed churches in Poland, drawn up at Thorn in 1645, for the settlement of disputed questions (ad liquidationem controversiarum). It is given in Nie- nemyer, Collectio Confessionum, p. 669 (Lips. 1840).

Decorated Style. See Architecture.

Decoury, Richard, a divine of the Church of England, born in Ireland, was educated at Trinity Col- lege, Dublin; became curate of Shambury, Shropshire, in 1770; afterwards vicar of St. Alkmund in 1774, and died in 1808. In his sermons his language is digni- fied, and his reasoning perspicuous, embellished by ap- positio allusions, and ornamented by many of the graces of oratory. His principal works are, Sermons, to which is prefixed an essay on the nature, etc. of a pure and undefiled religion (Shrewsbury, 1808, 8vo); Christ
Crucifix, the distinguishing Topic of the Gospel (Lond. 1816, 8vo).—Darling, Cyclopædia Bibliographica, s. v.; Jones, Christian Biography, p. 1:2 (Lond. 1829).

Decree (properly τὸ δικαίωμα [Dem. ii, 9, 13, 15, elsewhere "law"], δικάζω [Luk. ii, 1; Acts xvi, 4; xvii, 7, elsewhere "ordinance"], an edict; also τὸ φάσα [Esth. ii, 1], εὐφώμ [1 Cor. viii, 7, elsewhere usually "judge"], to determine; but represented by several other Heb. words), an official resolution passed by magisterial authority (see Crabbe's Engl. Synonymes, s. v.). Among the oriental nations the governments proceeded by public proclamation by heralds (Jer. xxxii, 8, 9; Jonah iii, 5-7), who are designated in Daniel (iii, 4; v, 29) by the term μῆνια karosa', the herald. They were made known in distant provinces, towns, and cities by messengers sent for that purpose (1 Sam. xi, 7; Ezra i, 1; Amos iv, 5). The message thus to be communicated in any town or city was publicly announced when the messenger had arrived in the gate of the city, or in some other public place. At Jerusalem it was announced in the Temple, where there were always a great many persons present. It was for the same reason that the prophets were accustomed to utter their prophecies in the Temple. See proclamatio.

DECREES OF THE COUNCIL OF THE APOSTLES AT JERUSALEM (Acts xv). These related to the following prohibitions, "that they abstain from pollutions of idols, and from fornication, and from blood, and from things strangled, and from blood" (ver. 29); or, as it is repeated (ver. 29), "that ye abstain from meats offered to idols, and from blood, and from things strangled, and from fornication." These are declared (ver. 29) to be "necessary" prohibitions. This necessity (as the γεν. [ver. 21, instead of γεν. 21 instanlntes] lay in the fact that whatever the Jews resided the law of Moses was read, and thus the ordinances in question were so deeply impressed upon the people's mind that they could not tolerate the neglect of them by the Gentile Christians. Instead of laying upon the Gentiles the burden of the whole law, and consequently of circumcision, the convention of apostles and elders resolved to enforce upon them only the reception of certain individual precepts of easy observance. The object of this canon was plainly nothing but to meet in some measure the difficulties of the Jewish Christians, and to lead the Gentile Christians to shun whatever might prove offensive to them. It is not, however, as if the other fasting, abstinence, or the prohibitions of the early church concerning the abstaining usages and prejudices of education and caste, it would be impossible for them to associate together in a mixed community and church without scandal. In all this it was clearly indicated that the prohibitions were not absolute; once let the Jewish Christians be more thoroughly freed from the O.T. forms, and the end for which these regulations were made would no longer exist. Now the ground on which these particular points were brought into view is explained by the circumstance that they were wont to be laid upon the proselytes of the Gaita in the so-called "sacrae reperita" (Acts viii, 22, R. T. B. S. v. "κατακλήματα", p. 407 sq.). See proclamatio. This, therefore, is the import of the arrangement, that the Gentile Christians should not be obliged to become "proselytes of righteousness" by circumcision, but only to live as "proselytes of the Gaita." Those of the seven precepts of Noah (see Noah, precepts of), which are here omitted, viz. the ones regarding blasphemy, murder, robbery, and sedition, was of such a kind that it was self-evident to Christians that the like could have no place among them; in the present instance it was not so much precepts of a purely moral character that required to be brought forward, as precepts that referred simply to the outward life. See Apostolical constitution.

1. That the "pollutions of idols" (ἀποξείημα τῶν ἄθικῶν) are thus to be understood of an outward act, viz. the eating of the flesh of sacrifices, is quite clear from the analogous expression, "things offered to idols" (ἀποξείημα, ἱδραγωγεῖσθαι), in the parallel verse. The more particular distinction made by Paul in 1 Cor. x, between such flesh of sacrifices as was bought like any other in the butcher's and such as was eaten in the temple at an idol festival, is not entered into by the assembly; they interdict in the widest sense all eating of sacrifices because the Jews took offence at it. See Alexema.

2. The same good faith of the eating of blood, and which is the same thing of that which we mean in which the blood remained coagulated. The Jews had the utmost abhorrence of blood as food, which was ground particularly upon Lev. xvii, 10, 11, where it is not merely said that Jehovah would set his face against the perpetrator of this act, but the blood is also represented as the support of the soul (comp. Gen. ix, 4), that is, of the physical life, and it is placed in connection with the propitiation, which can only be made by the shedding of blood (Heb. ix, 22). This law appears to have been strictly observed by the primitive Church (Euseb. Hist. Eccl. v, 1), and even in the Middle Ages the injunction was frequently given by the spiritual authorities to avoid the eating of blood. See specially in the Greek Church; see canon 67 of the second Council at Trullo in 692; in the Latin Church, Augustine already took the right view, contr. Faustum, xxxii, xiii, 18. See blood.

3. The mention of fornication (πορνεία) appears to be quite foreign to the nature of the other injunctions, and opposed to the above view of these apostolical ordinances. It blends a purely moral precept with enactments that refer only to matters of outward observance. The conjunctural emendation (πορνείας, or χαοποία, or πορνείας, for πορνείας in both passages) that proposes to refer the clause to the eating of swine's flesh is rejected by all; for no such act is included in the Novillian precepts; and the forced explanation of the term (πορνείας for Σωσίων πορνείας), as alluding to a sacrifice purchased by the hire of a harlot, is sufficiently refuted by the objection that this would refer to a state of matters so grossly sinful as could not be thought of among Christians. Undoubtedly the only proper course is to bring into view the greater freedom of intercourse between the sexes that prevailed among the Greeks and Romans, which was an abomination to the more serious Jews, and appeared to them, in fact, a refined species of harlotry. By the word πορνεία, therefore, we are not to understand not only gross violations of the seventh commandment, but also more polished sins of this kind, the assembled brethren enjoin upon the heathen Christians greater care and circumcision in their intercourse with the female sex, that they might give no offence to the Jewish Christians (Husshausen, Comment., in loc., iii, 866, Am. ed.). Another reason for the insertion of this rule respecting chastity probably was the shameless violation of purity that every where took place in connection with the pagan festivals, and constituted an additional reason for a total disconnection with all idolatrous rites (Conybeare and Howson, St. Paul, i, 217). See Schaff, Apost. Church, § 69; and fornication.

Among special treatises on this subject are the following: Bagre. P. θηματαί (Jan. 1748); Benzsel, De decreto apostolico (Lund. 1738); Dannhauser, Πορνείας ἡ τῶν εὐαγγελισμῶν concilia Hieros. (Argent. 1648); Deleyng, De πορνείας νενεφελεῖν (in Busb. Lieb. 869 sq.); De la Cire, De senae decreto apost. (Bützov. 1709 sq.); Dorschell, De sanguine et suffocato (Rostock, 1683); Hausseus, id. (Brem, 1703); Moebius, id. (Lips. 1688); Hanneken, De sanguine escario (Gies. 1678); Heidegger, In concil. Hieros. (Tragur. 1768); id. De sanguine et suffocato (Amst. 1602); id. (in Cosm. de concilia Hieros. 1681); Leonard, De decreto conc. Hieros. (Jen. 1732); Nitzsch, De decreto apostolico (Viteb. 1755); also in Velv.
DECRETALS, PSEUDO-ISSIDORIAN. By this name a collection of spurious letters of popes is designated. They were first brought into use in the 9th century, in connection with the collection known as canon and decres. See CANONS. The author of this collection placed at its head a spurious preface of Isidore Mercator (according to some manuscripts, Peccator); and for this reason they were ascribed, as early as the 9th century, to Isidore of Seville (q. v.). During the Middle Ages they were generally considered genuine, but in the 15th century their genuineness were expressed by Nicholas de Cusa [see CUSA] and others; and in the 16th the Magdeburg centurists (q. v.) and other Protestant historians so conclusively established their spuriousness that it is now admitted even by Roman Catholic writers. The birthplace, age, and motives of these letters are still controverted questions; and have called forth a large number of thorough investigations, by which several important points have been established with a high degree of probability. There is a large number of manuscripts (more than fifty) of this collection extant, and it is believed that a more careful study and comparison of them will lead to new results. The order of the documents, according to Codex Vaticanus (No. 630), a manuscript of the 12th century, is as follows: The preface is followed by a letter of Aurelius to Damascus, and the answer of the latter, both spurious; the letter of Theophylact, borrowed from the fourth Council of Toledo; a list of decrees of councils, and a spurious correspondence between Jerome and Damascus. Then begins Part I, consisting of 50 apostolic canons; 59 spurious letters of the popes, from Clement to Melchiades (in chronological order); a treatise, De primacia ecclesiae et sacerdotii Nicolae, and the spurious Donation of Constantine. Part II begins with a section of the preface of the genuine Spanish collection of canons, and another section of the collection of Quemel, and contains the Greek, African, Gallic, and Spanish councils, agreeing in all essential points with the Spanish collection. Part III begins likewise with the preface of the genuine collection, which is followed by the decreets of the popes from Sylvester to Gregory II (731); among them 56 spurious ones. The total number of spurious decreets in the collection is 94. Whether all of them belonged to the original collection, or whether a part were of later manufacture, is still a matter of debate. The sources used by the compiler are the works of Cassiodorus and Rufinus, the Liber Pontificalis, the Vulgate, the works of the fathers, the theological literature up to the 9th century, the genuine decreets and decrees of councils, the so-called Capitula Anglrarum (q. v.), and the Roman Law collection, especially the Visigothic Breviarum Augusti et Iacobi (q. v.) and Constitutus et consilii Pa. Iudiciarum collectione, Gottingen, 1832). The opinion of Rosehart (Zur den kirchenrechtlichen Quelln. des ersten Jahrhunderts und zu den pseudo-

DECUROINES, magistrates in the Roman provinces, who formed a body to represent the Roman Senate in free and corporate towns. Each decurion consisted of ten persons; and their duty was to watch over the interests of their fellow-citizens, and to increase the revenues of the commonwealth. The early Church was compelled to make laws to prevent the ordination of any man of this class as a presbytery or deacon. Instances had occurred in which presbyters had been compelled, after thirty years' service as ministers of Christ, to leave their churches, et of ordination, they were required to serve as firmans, and were crowned as heathen priests, while they exhibited the public games and shows to the people,
De'dan (Heb. Deken, דְּדֵן, according to Geisenius, Thes. Heb. p. 822, from the Arab. signifying sport; according to Fürst, Hebr. Handw. p. 288, by reduplication from קְדָם, in the sense of deep; in Ezek. xxv, 13, with מִלְכָּא or paragogic, דְּדֵנָה, "they of De'dan"), the name of one or two men or tribal progenitors. See also Dedanim.

1. (Sept. דְּדֵנָא, דְּדֶנָא; a son of Raamah, son of Cush (Gen. x, 7; 1 Chron. i, 9), "the sons of Raamah, Sheba, and Dedan"). B.C. considerably post 2018. See also Dedan.

2. (Sept. דְּדֵנָא, v. r. in Jer. xlix, 8, דְּדֶנָא.) A son of Jokshan (1 Chron. i, 82), son of Keturah (Gen. xxv, 15), i.e. Jokshan begat Shem, Aram, Eber, and the sons of Dedan were Assurim, Lethanim, and Leumim). B.C. post 1898. The usual opinion respecting this and the preceding founder of tribes is that the first settled among the sons of Cush, probably on the borders of the Persian Gulf; the second on the Syrian borders, about the territory of Edom (Michaelis, Spicileig. 1, 520), but Water (Gen. xlix, 8), fol. 161 b, following Geisenius, Thes. Heb. p. 822) has suggested that the name may apply to one tribe, and this may be adopted as probable on the supposition that the descendants of the Keturahite Dedan intermarried with those of the Cushite Dedan. See Arabia. The theory of this mixed descent gains weight from the fact that in each case the brother of Dedan is named Sheba. It may be supposed that the Dedanites were among the chief traders traversing the caravan-route from the head of the Persian Gulf to the south of Palestine, bearing merchandise of India, and possibly of Southern Arabia, and hence the mixture of such a tribe with another of different (and Keturahite) descent presents no impossibility. The passages in the Bible in which Dedan is mentioned (besides the genealogies above referred to) are contained in the prophecies of Isaiah, Jeremiah, and Ezekiel, and are in every case obscure. The Edomish settlers seem to be referred to in Jer. xlix, 8, where Dedan is mentioned first in ver. 15, where, after enumerating among the traffickers with the merchant-city many Asiatic peoples, it is said, "The children of Dedan were thy merchants, many isles (יבּים) were the merchandise of thine hand: they brought thee for a present horns of ivory, and ebony." Passing thence to Syria and western and northern peoples, the prophecy (in ver. 20) mentions Dedan in a manner which seems first in ver. 13, where, after wide spread and possibly the mixed ancestry of this tribe. Ver. 15 may be presumed to allude especially to the Cushite Dedan (comp. ch. xxxviii, 13, where we find Dedan with Sheba and the merchants of Tarshish; apparently, from the context, the Dedan of chap. xxvii, 15); but the passage commencing in v. 20 appears to include the settlers on the borders of Edom (i.e. the Keturahite Dedan). The whole of the passage is as follows: "Dedan [was] thy merchant in precious clothes for chariots. Arabia, and all the princes of Kedar, they occupied with thee in lams, and rams, and goats: in these [were they] thy merchants. The merchants of Sheba and Dedan [were] thy merchants: they dealt with chief of all spices, and with all precious stones, and gold. Haran, and Canneh, and Eden, the merchants of Sheba, Asur [and] Chilidam, [were] thy merchants" (Ezek. xxvii, 20-28). We have here a Dedan connected with Arabia (probably the north-western part of the peninsula) and Kedar in the area with the father and brother of the Cushite Dedan (Raamah and Sheba), and these latter with Asiatic peoples commonly placed in the regions bordering the head of the Persian Gulf. This Dedan, moreover, is a merchant, not in pastoral produce, in sheep and goats, but in "precious clothes," in contradistinction to Arabia and Kedar, like the far-off Eastern nations who came with "spices, and precious stones, and gold," "blue clothes and broiled work," and "sweats of rich apparel."

The probable inferences from these mentions of Dedan support the argument first stated, namely, 1. That Dedan, i.e. Raamah, settled among the sons of the Persian gulf, and his descendants became caravans-merchants between that coast and Palestine. 2. That Jokshan, or a son of Jokshan, by intermarriage with the Cushite Dedan, formed a tribe of the same name, which appears to have had its chief settlement in the borders of Idumea, and perhaps to have led a pastoral life. All traces of the name of Dedan, whether in Idumaea or on the Persian gulf, are lost in the works of Arab geographers and historians. The Greek and Roman geographers, however, throw some light on the eastern settlement; and a native generation of the name is preserved in a place in the island of Dédan, on the borders of the gulf (see Bochart, Phaës, iv, 6; Asser. Bibl. Orient. III. ii, 146, 153 ii, 184, 560, 564, 604, 744; Büsching, Asia, p. 562; Wahl, Descr. Asiae, p. 698; Niebuhr, Arabien, p. 808 sq; Hercur. Ideen. 1, ii, 227, 419; Barbarso, Riususio raccolte, p. 268). The identification must be taken in connection with the recovery of the name of Sheba, the other son of Raamah, on the island of Aºgal, near the Arabian shore of the same gulf. See Raamah.

D'd'anim (Heb. Dedanim, דְּדֵנִים, a patriam from Dedan; Sept. דְּדֵנָא), the descendants of the Arabian Dedan (q. v.), spoken of (Isa. xxii, 18) as engaged in commerce. Some, however, following the various rendering of the versions (Michaelis, Spicileig. 1, 116 sq.), have thought the Rhodines to be meant, and others have even conjectured an allusion to the Dodona, a famous oracle of Epidus (Strabo, vii, 504-7, ed. Almelo.).

Dedicate (prop. דָּדֶה, chanak, to initiate, Deut. xx, 5; 1 Kings viii, 63; 2 Chron. vii, 5; elsewhere דָּדֶה, hakshêk, to hâlôke, and other Heb. terms), a religious ceremony whereby any thing is dedicated or consecrated to the service of God; and it appears to have originated in the desire to commence, with peculiar solemnity, the practical use and application of whatever had been set apart to the divine service. Thus Moses dedicated the tabernacle in the wilderness (Exod. xi; Num. vii); Solomon his Temple (1 Kings viii); the returned exiles theirs (Ezra vi, 16, 17); Herod his (Joseph. Ant. xv. 11, 6). The Maccabæans, having cleansed the Temple, and purged all pollutions under Antiochus Euphæanus, again dedicated the altar (1 Macc. iv. 52-60), and an annual festival was established in commemoration of the event. This feast was celebrated not only at Jerusalem, but everywhere throughout the country, in which respect it differed from the feasts of the Jews over, Pentecost, and Tabernacles, which could only be observed at Jerusalem. See below.
DEDICATION

Not only were sacred places thus dedicated, but some kind of dedicatory solemnity was observed with respect to cities, walls, gates, and even private houses (Deut. xx, 5; Psa. xxx. title; Neh. xii, 27). We may trace the origin of these usages in the custom of consecrating or dedicating churches and chapels, and in the ceremonies connected with the "opening" of roads, markets, bridges, etc., and with the launching of ships. See CONSECRATION.

DEDICATION, THE FEAST OF THE (τὰ ἵγκονα, the renewal, John x, 22 [which the Sept. has in Num. vii, 10]; Vulg. exorati), the festival instituted to commemorate the purging of the Temple and the rebuilding of Jerusalem by the Jews under the leadership of Judas Maccabaeus. The festival was observed in Syria, B.C. 164 (1 Macc. iv, 52-59, where it is οἱ ἵγκονας τοῦ Σαλομονοῦ), the restoration of the altar, because the old and profaned altar was then replaced; but in 2 Macc. x, 5, ό ωσαρποιον τοῦ ναοῦ, the purification of the Temple; the modern Jews call it simply chanukah, γεννήσις[1] "dedication," as occurs in Num. vii, 10, 11, 84, 88; 2 Chron. vii, 9; Neh. xii, 27; Psa. liii, 1, 16, 17, 27; x. 2, 3, as in the Mishna; but οἱ πληροῦς plur. Ant. xi, 7, 7, styles it γέννησις, lights). The following account of it is chiefly from Rabbinical sources. See ANTIQUOS EPHIPHANES.

Mode in which this festival was and still is celebrated.

It commenced on the 25th of Chislev (see CALENDAR), and lasted eight days, but it did not require attendance at Jerusalem. (See Chanukah.) It was present there during this season, χειμων, or winter, John x, 20.) It was an occasion of much festivity. The Jews assembled in the Temple or in the synagogues of the places wherein they resided (Rabah ha-Shana, viii, 2), carrying branches of trees and palms in their hands, and sang psalms to the God of their salvation. No fast or mourning on account of any calamity or bereavement was permitted to commence during the festival (Mishna, Taanaith, ii, 10; Mord Katon, iii, 9); the Temple and all private houses were lighted up within and without by lanterns and torches every evening, during the eight days in token of this joy (1 Macc. iv, 52-59; 2 Macc. x, 6, etc.; Mishna, Baba Batama, v, 6), for which reasons Josephus also calls it οἱ δέκα ανακαταστάσεως, the Feast of Lamps (comp. Ant. xii, 7, 7, with Apion, ii, 39). Maimonides, in discoursing upon this subject, distinctly declares that "the light of lamps is a custom transmitted from the scribes." "The order is," says he, "that every house should light one light, whether the inmates thereof be many or only one. He, however, who honors the injunction as many lights as there are inmates in the house—he has a light for every man and woman. And he who respects it still more adds a light for every individual every night, so that if a house wherein are ten inmates began with ten lights, it would end with eighty" (Mishna, Torah Hilchoth Megillah Ve-Chmukah, sec. iv, p. 928, b). These lamps must be lighted immediately after sunset by the head of the family, who pronounces the three following benedictions: "Blessed art thou, Lord our God, King of the world, who hast sanctified us with thy commandments, and enjoined upon us to light the lamps of the Feast of the Dedication." 2. "Blessed art thou, Lord our God, King of the world, who hast done wonders for our forefathers in those days about this time:" and, 3. "Blessed art thou, Lord our God, King of the world, who hast preserved us in life and health, and hast permitted us to see this day!" The third benediction, however, is only pronounced on the first day of this festival. The practice of illumination in connection with this festival is, as we have seen, of very old date, and was most probably suggested by the fact that "the light of lamps" were lighted by the people at the restoration of the Temple service (1 Macc. iv, 50, 51), as well as by the natural feeling existing among most nations to have illumination on occasions of great joy. The Egyptians also had a similar festival (Herod. ii, 62). Midrashim of very great antiquity, however, give another reason for this custom of lighting lamps. They tell us that "when the Maccabees went into the Temple after vanquishing the enemy, and wanted to light the candlestick, they could not find any oil, except one vial, and it was sealed with the ring of the high-priest, which assured them that it was not polluted, but it was just enough to light one day." Wherefore the Maccabees and all the people, like one man, have ordained that these eight days should henceforth be days of joy and rejoicing, like the festivals ordained in the law, and that lamps should be lighted on those days, to make known to God the wondrous works which the God of the heavens hath wrought for them" (Meyrilaith Antiquos, p. 145, ed. Jellinek; Talmud, Sabbath, 21, b). Now, whatever we may think about the embellishments of this story, it is not at all unlikely that a vial of oil was actually on the first day of Chanukah, and that it was most wanted, and that this is one of the reasons why the lighting of lamps has been instituted.

At every morning prayer during the whole of this festival, a portion of the 7th chapter of Numbers is read in the synagogue by the prelector, in accordance with a very old custom (Mishna, Megilla, viii, 2); thus was it on the first day, and on the next 13-17, when the regular lesson of the Pentateuch, if it is a Sabbath, and the Haphtorah, or the portion from the Prophets, is Zech. ii; on the second, Num. vii, 18-23, is read, beginning with "On the second day," etc., and the same Haphtorah; on the third day, Num. vii, 24-29, and the same Haphtorah, and so on. In the Temple at Jerusalem, the "Hallel" was sung every day of the feast. The present festival is the celebration of the exploits performed by Judith (q. v.) upon Holofernes, because, as some suppose, she was of the stock of the Maccabees. Hence some of the Midrashim which give the history of Judas Maccabaeus mix up with it the history of Judith.

Modern Jews keep the feast of lights very strictly, but servile work is not forbidden to be done. The feast is observed as one of rejoicing for the wonders which God wrought for them. During the eight days, parents and children light lamps to commemorate the event, particularly the last night, when neighbors and friends meet together to enjoy themselves. The Karaites, however, do not observe this festival, because it is an uninspired ordinance.

There are four other dedications of the Temple recorded:

1. The dedication of the Solomonic Temple (1 Kings viii, 2; 2 Chron. v, 8), which took place in the seventh month, or in the autumn. B.C. 1003. This was coincident with the Feast of Tabernacles (q. v.).

2. The dedication at the time of Hezekiah, when the Temple was purified from the abominations which his father Ahaz had brought into it (2 Chron. xxix). B.C. 796. See Hezekiah.

3. The dedication of Zerubbabel's Temple, built after the captivity (Ezra vi, 16), which took place in the month Adar, in the spring. B.C. 517.

4. The dedication of Herod's Temple (Josephus, Ant. xv, 11, 6). B.C. 66. Some of the fathers have therefore thought that Jesus is said to have gone to the celebration commemorative of the dedication of Solomon's Temple or of Zerubbabel's. The fact, however, that there was no annual festival to commemorate these dedications, and that the evangelist John distinctly says that it was in the winter, establishes beyond doubt that our Lord's baptism was the celebration commemorated by the dedication of the Temple instituted by Judas Maccabaeus. See TEMPLE.

Literature.—Maimonides, Mishna Torah, or Yad Ha-Chassidah; Hillel Megilla Ve-Chamash, sec. 3 and 4;
DEDICATION OF CHURCHES

Meglithi Aniciochus, printed in Bartolocci, Bibliotheca Magna, i, 882, etc.; Midrasch, Le-Chanakah, and Midrasch, Achar le-Chanakah, published by Dr. Adolph Jellinek in Beth ha-Midrasch (Leipzig, 1858), i, 132, etc. This volume also contains (p. 142, etc.) a reprint of Meglithi's article as seen in this article, and in Fabricius, Bibllog, Antiquar, p. 419 sq.
Likewise Otho, Lex. Rab. p. 288 sq.; Lightfoot and Wetstein, in loc. Joh.; Wähner, De septo Encensorum (Heilmandel. 1715); Weber, De Encensorum (Lips. 1863); Venne, De jure circa Encensum (Erf. 1718); and the tracts on the subjects of the title, by other Hempelmann, (Lips. 1754), Lincke (Altdorf, 1768), Lund (Upsal. 1706), Reich (Altdorf, 1772). See FESTIVALS.

Dedication of Churches. See CONSECRATION.

De Dieu. See DEUS, DE.

De Dominia. See DOMINUS, DE.

Deep (the representative in the A. V. of several Heb. words, especially נְשָׁכָה, tekkon, Gen. i, 2, etc. an abyss, often rendered "deep," 2 a depth, an intensity of אָדָם, Lake, 31; Rom. x, 7, elsewhere "bottomless pit"). The deep, or the great deep, in its literal sense, signifies, chiefly in Scripture—I. Hall, the place of punishment, the bottomless pit (Luke viii, 31; Rev. x, 1; xi. 7). 2. The common receptacle of the dead; the grave, the deep or depths of the earth, under which the body is deposited; the hollow depths of the soul, speaking thereof, to still more unseen, still deeper, still further distant from human inspection, is that remote country, that "bourn whence no traveller returns" (Rom. x, 7). 3. The deepest parts of the sea (Ps. Ixix, 15; cvii, 26). 4. The chaos, which, in the beginning of the world, was uniform and vacant (Gen. i, 2). See AYAS.

Deer. Although this word occurs in the English Bible only in the connection "r<awy deer" (q. v.), it properly represents several terms in the original, which are variously translated, and which denote widely different members of the antelope and cervic families. See CHAMNOS; GOAT; OX; FALCON; ROE, etc. For the proper deer we find the following variations of אָדָם, some rendered "depth," an intensity of אָדָם, Lake, 31, q. d. a large ram; Sept. אָדָם, the male, always rendered "hart" (q. v.), occurs Deut. xii, 15, 22; xiv, 5; xv, 22; 1 Kings iv, 23; Psa. xiii, 1; Cant. ii, 9, 17; viii, 14; Isa. xxxiv, 6; Lam. i, 6; גַּלְגַּלְגָלָה (תָּן), Gen. xliii, 21; 2 Sam. xxiv, 34; Job xxxix, 1; Psa. xviii, 33; xxix, 9; Cant. ii, 7; iii, 8; Hab. iii, 19), or גַּלְגַּלְגָל (תְּנַנְּל), Prov. vi. 19; Jer. xiv, 9), the female, always rendered "hindi" in our version (Sept. סִיִּלָּו). Many recent writers, however, either suppose different species of antelope to be meant, or, with Dr. Shaw, consider the term to be generic for several species of deer taken together. Sir J. G. Wilkinson believes the ογγία to be the Ethiopian oryx, with nearly straight horns. See ANTELOPE. It should be observed, however, that an Ethiopian species could not well be meant where the clean animals fit for the food of the Hebrews are indicated, nor where allusion is made to suffering from thirst, and to high and rocky places as the refuge of females, or of both, since all the species of oryx inhabit the open plains, and are not remarkable for their desire of drinking; nor can either of these propensities be properly ascribed to the true antelopes, or gazelles, of Arabia and Syria, all being residents of the plain and the desert; like the oryx, often seen at immense distances from water, and unwilling to venture into forests, where their velocity of flight and delicacy of structure impede and destroy them. Taking the older interpretation, and reviewing all the texts where hart and hind are mentioned, we find none where these objections truly apply. Animals of the stag kind prefer the security of forests, and are always most robust in rocky mountain covers, and seek water with considerable anxiety; for of all the light-footed ruminants, they alone protrude the tongue when hard pressed in the chase. Now, comparing these qualities with several texts, we find them perfectly appropriate to the species of these genera alone. Aggel appears to be a mutation of a common name with Αραγός; and although no great stress should be laid on names which, more particularly in early times, were used without much attention to specific identity, yet we find the Chaldees λεγον and Sarmaic jelen strictly applied to stag. Hence the difficulty lay in the modern denial that ruminants with branched deciduous horns existed in the south-west of Asia and Egypt; and Cuvier for some time doubted, notwithstanding Virgil's notice, whether they were found in any part of Africa; nevertheless, though not abundant where water is rare, their existence from Morocco to the Nile, and beyond it, cannot be denied; and it is likely that an Asiatic species still appears sometimes in Syria, and, no doubt, was formerly common there (see the Penny Cyclopaedia, s. v. Deer).

Barbary Deer.

1. The species usually referred to by the above Heb. terms is probably that now known by the name of Cervus barbara, or Barbary stag, in size between the red and fallow deer, distinguished by the want of a bissnter, or second branch on the horns, reckoning from below, and by a spotted livery, which is effaced only in the third or fourth year. This species is figured on Egyptian monuments, is still occasionally seen about the nautor lakes west of the Nile, and, it seems, has been observed by travellers in the desert east of the Dead Sea, on the route from Cairo towards Damascus. We take this to be the ιγαλ or ογαλ of the Arabs, the same which they accuse of eating fish—that is, the ceps, lizards, and snakes, a propensity common to other species, and similarly ascribed to the Virginian and Mexican deer.

2. Another species is the Persian stag, or mosr of the Tahtar nations, and gecesawen of Armenia, larger than the stag of Europe, clothed with a heavy mane, and likewise destitute of bisantlers. We believe this species to be the sogyar of Asiatic Turkey, and mura of the Arabs, and therefore residing on the borders of the mountain forests of Syria and Palestine. One or both of these species were dedicated to the local bown dina on Mount Libanus—a presumptive proof that deer were found in the vicinity.

Of the hind it is unnecessary to say more than that she is the female of the stag, or hart, and that in the manners of these animals the males are always the last to hurry into battle. See stag.

Deering. See DEER.

Defence. This word, besides its ordinary and proper use, stands in the English Bible as a mistranslation of two Heb. terms.

1. Masaor (םָאָר), in connection with דָּמָא, streams,
rendered in 2 Kings xix, 24, "rivers of besieged places," Sept. σεβομένη συνοχής, Vulg. aquas clausas; in Isa. xix, 6, "rivers of besieged cities," Sept. σεβομένης δήμου, Vulg. aquas clausas; in Isa. xxxviii, 27, "rivers of the besieged places," Sept. σεβομένων τῆς οἰκουμένης, Vulg. rives aggerum; a proper name for Egypt, alluding to its canals, i.e. the branches of the Nile. The derivation of the term is obscure; perhaps it is only another application of the Heb. word of the same form, elsewhere signifying "spring" or "source," hence a branch, channel, or irrigation, and applied to Egypt, especially Lower Egypt, as being strongly fortified, both by nature and art. See Mazor.

2. Be'tesor (בִּטֶּשֶׁר), probably something dug out of a mine, occurring only in Job, and rendered in chap. xxvii, 24, "gold," Sept. πετρυπό, Vulg. silex; in ver. 25, "defence," Sept. בֵּית בָּעָד (בֵּית בָּעָד), Vulg. castrum, hostes; in chap. xxxvi, 19, "gold," Sept. כַּפָּרָאכֶר iv āḏāryq, Vulg. tributo, precious ore, i.e. of gold or silver, in its native state; an interpretation evidently required by the corresponding terms in the parallel members of the hemistichs where it occurs. See Gold.

Defence of Christianity. See Apology.

Defender of the Faith (fides defensor), a title belonging to the sovereign of England, as Catholicus does to the king of Spain, and Christianissimus to the king of France. It was originally conferred by Leo X. for his pontificate VIII. in 1513, against Martin Luther; and the bull for it bears date quinto die Octob. 1521. It was afterwards confirmed by Clement VII. On Henry's suppression of the monasteries, the pope of Rome deprived him of this title, and deposed him from his throne. The English Parliament (35 Henry VIII., ch. 3) confirmed the title, and it has ever since been used by English monarchs.

Defensor matrimonii, an officer of the Roman Church in every diocese, whose duty it is, in cases where a marriage is claimed to be null, to search for and produce the proofs of its validity, and to follow the case into any court to which it may be carried by appeal, with the right of originating such an appeal himself in cases where, through some defect in the proceedings or in the testimony, a verdict of nullification has been granted upon insufficient grounds. The office was instituted by Benedict XIV. by his bulls of Aug. 26, 1741, and Nov. 3, 1741 (Bullar. Magna. tom. xvi, p. 41, 46).

Defile (denoted by several Heb. and Gr. words, especially נַשֵּׁב, דָּמָר, μυαίων, denoting filthiness, but spoken chiefly in a figurative or ceremonial sense). Many were the blasphemies of person and conduct which, under the Mosaic law, were esteemed defilements; some were voluntary, others involuntary; some originated with the party, others were received by him; some were inevitable and the effect of nature, others the consequence of personal transgression. Under the Gospel, defilements are those of the heart, of the mind, and the conduct. Moral defilements are numerous, and as thoroughly prohibited under the Gospel as ceremonial; but authoritatively superseeded as requiring any religious rites, though many of them claim attention as usages of health, decency, and civility (Matt. xx. 18; Gen. xlil, 4; Rom. 1, 24; James iii, 5; Ezek. xiiil, 8). See Pollution.

Degradering. See Gerardino. DE.

Degradation, in ecclesiastical law, the act of depriving a clergyman of his orders, or the act of deposing an officer from a higher to a lower grade of office. In the case of bishops, this degradation consisted in the removal from a larger and more important see to a smaller or less considerable. Presbyters were degrad ed to the rank of deacons, and deacons to that of subdeacons. This kind of punishment was also inflicted on bishops in Africa by superseding them in their exalted succession to the office of archbishop or metropolitan. In later times, degradation implied privation of all spiritual dignity, as also the civil degradation in the eighth century at Constantinople is recorded. The patriarch Constantine was made to ascend the ambo; he was stripped by the bishops of his pallium, and anathematised; he was then made to walk out of the church backwards. When Cranmer, archbishop of Canterbury, was degraded by order of queen Mary, his persecutors dressed him in episcopal robes made of canvas, put the mitre on his head, and the pastoral staff in his hand; and in this attire showed him to the people. They then stripped him piece by piece. On the Roman forms of degradation, see Elliott, Delineation of Romanism, bk. ii. ch. xv (Long. Edition); see also Bingham, Anti. Eccles. bk. xxiv, ch. ii; Canon 122 of Church of England; Augusti, Christ. Archaeolog. iii, 401, and the article DEPOSITION.

Degree is the rendering in the A. V. of one Heb. and one Gr. term (besides being employed as an adject in the phrases "man of high [or low] degree," where it has no [other] correspondent in the original), μαθηματικός, maddah (2 Kings xx, 9, 10, 11; Isa. xxxvii, 8, referring to the graduated scale of the dial [q. v.]) of Ahas, and in the titles of the Psalms entitled "Song of Degrees," i.e. Dehag (as below): a step, a degree (as below); βασιλικός (only 1 Tim. iii, 18, gradationem or promotion, etc. of a deacon [q. v.]) to a higher office; or perhaps rather a spiritual stand-point or condition, see Alford, in loc., a step (as of a staircase or door, Esclus. vi, 36). See Stairs.

DEGREES, SONG OF (הלל הללים, "song of the steps"); Sept. γοθα ἀναβασιματων, Vulg. cantica graduum), a title given to fifteen Psalms, from cxx to cxxxiv inclusive. Four of them are attributed to David, one is ascribed to the pen of Asaph, and the other ten give no indication of their author. Eschaton supposes them all to be the work of one and the same bard (Einz. in das A. T.), on the view adopted by many that the indications of authorship in these titles are not trustworthy, since they appear to have been added by a later hand, and in any case the very same phraseology would be employed to denote a hymn composed in honor of David or of Solomon" (Mark's Sermons, i, 208-9). The most generally accredited opinion, however, is that some of these hymns were preserved from a period anterior to the Babylonian captivity; that others were composed in the same spirit by the exiles who returned to Palestine from the captivity of Babylon by Cyrus, and that a few refer even to a later date, but were all incorporated into one collection, because they had one and the same character. This view is adopted by Rosenmüller, Herder, Medelssohn, Joel Bull, and others. With respect to the term הילל הללים, or "degrees," a great diversity of opinion prevails among Biblical critics. 1. According to some, it refers to the melody to which the Psalm was to be chanted. Bolleman (Metriz der Hebräer, p. 190 sq.) calls these Psalms "trophic songs." Luther translates the words "Ein Lied im höhern Chor," thus connecting the Psalm with the manner of its execution; and Michaelis (in Lowth, De Sacra Poësia, p. 511) compares כֶּלֶל הַלְּלֵי with the Syriac כְּלַלְלַלְלַל (Scala), which would ratherwise characterize the melody rather than the text. Jahn (Bibl. i, 62); Gesenius (Ephemerid. Hal. 1812, No. 206) denies to the Hebrews any metrical prosody. See Poetry, Hebrew. It is thought that the poetry of the Syrians may hereafter throw some light upon this title, as of the eight species of verse which they distinguish, one is called grade, secalis, which bears some resemblance to the Psalms, and it seems probable to refer to a particular kind of metre, see Ephemer. lilt. Hal. 1815, No. 11); but what that metre is, and whether it exists in the Psalms bearing this title, we have not yet the means of determining. 2. On slight
DEGREES

DEHON

DEAH "vites (Chal. Deahaye, "Nath", or Dehawe, NYY t, Sept. דאהא, Vulg. Diem), one of the Assyr
ian tribes from which a colony was led out by Assyer
per to repopulate Samaria, and who there joined their
neighbors in opposing the reconstruction of the Temple
at Jerusalem (Ezra iv, 9). These Dake were proba
bly the Δαχα, Νοται (Hierod. 1, 25), a nomad Persian
tribe east of the Caspian Sea (Ammian. Marc. xx, 8, p.
990, ed. Bip.), in the neighborhood of the Mardians,
or Hyrcanians (Strabo, xi, 688, 511; Pline, vi, 19;
xviii, 38, 120), and towards the south, towards Merv
(10), under the rule of Darius (Curt. iv, 126), and later
of Alexander (Curt. viii, 14, 5; ix, 2, 24) and his suc
cessors (Livy, xxvii, 40). This people appears to have
been widely diffused, being found as Dake (Δαχα)
both in the country east of the Caspian (Strab. xi, 8,
2; Arrian, Exped. Art. lib. iii, 11, etc.), or on their annual
tours of the Sea of Azof (Strab. xi, 9, 3); and again as Dikí
(Δική, Thucyd. ii, 96), or Dací (Δαχαί, Strab., D. Cass.,
etc.), upon the Danube. Their name probably survives
in the present district Daghestan. They were an Aryan
race, and are regarded by some as having their lineal
descendants in the modern Dames (see Grimm's Ge
schicht. der Deutschen Sprach., 1, 192-3). The name is
derived from the Persian dák, "a village"; Dēhavites
will therefore be equivalent to the Latin "Rustic." Their
love of war and plunder induced them to serve as
mercenaries under various princes (Arrian, iii, 11;
v, 12); and their valor has immortalized them in the
pages of Vitrip's anonymous "Immortal Dabah." A band
of them had doubtless entered the service of the Per
sian monarch, followed him to Palestine, and
received for their reward grants of land in Samaria
(Stephanus Byzant. s. v.; Ritter, Erdkunde, vii, 668;
Rwilmson's Herodotus, i. 889).

Episcopal Church in the diocese of South Carolina,
born in Boston, Mass., Dec., 1773. His early educa
tion was obtained in the public school, where, for
some years, he stood at the head of his class. In
1791 he entered Harvard University, where he gradu
ated with the highest honors in 1798. He at once
began his preparation for the ministry, for which,
from early childhood he had been fitted by a strong
inclination. In 1797 he was ordained, and soon became
the rector of Trinity Church, Newport, R. I., where he
remained until 1810, when he was compelled, by failing
health, to seek a milder climate. An invitation to the
rectorship of St. Michael's Church, Charleston, S. C.,
was accepted. In this charge, as at Newport, he was
very successful. He was loved and respected. What
was established to prevent unqualified persons from teach
ing, and an initiatory stage of discipline was prescribed,
these terms became significant of a certain rank, and
of the possession of certain powers, and were called
"grades," "steps" or "degrees." The passing of the
initiation in the latter has been likened by Gregory
IX (1227-41), the title of cardinal of bachelor
(q. v.), and an additional course of discipline and ex-

DEEO
DEI GRATIA

sermons, in two volumes, have passed through two editions in this country, and through three in England.

They are models of practical pulpit discourse. See Memoir by Rev. Dr. Godden, and Pref. to 2d edit. Sermons, vol. i.; also Sprague, Annals, vol. ii., 322.

Dei Gratia (LXX. by the grace of God) is a formula used by bishops and monks. 4 Felix of Rome (A.D. 336) styled himself episcopus per Dei gratiam. Afterwards it came to be appended by archbishops, bishops, abbots, abbes, deans, monks, and even chaplains, to their titles in letters and other documents, as an expression of dependence. After the middle of the 12th century, when the sanction of the See of Rome began to be considered necessary to ecclesiastical offices, the higher clergy wrote Dei et Apostolico sedis gratia, 5 by the favor of God and the apostolic see.

At a later period many of them preferred to write missarum diei, permissione diei, and the like; but they still continued to be styled by others Dei gratia. In the British Islands this style was generally dropped about the time of the Reformation, but it was occasionally given to the archbishops of Canterbury and York even after the beginning of the 17th century. Beginning with the times of the Carolingians, many temporal princes, earls, and barons made use of the formula Dei gratia (bene dicat), and before the 16th century no idea of independence or of divine right seems to have attached to it. But in 1442, king Charles VII of France forbade its use by the Comte d'Armagnac, and in 1449 obliged the duke of Burgundy to declare that he used it without prejudice to the rights of the French crown. These instances show that it had now begun to be regarded as belonging exclusively to sovereigns who owed no allegiance to any other earthly potentate or power. In this way, what was originally a pious expression of humility came to be looked upon as an assertion of the doctrine of the 'divine right of kings.'

Deiphana, mother of God, a title applied to Mary, the mother of Christ, at the Council of Nicaea. See Theotokos.

Deism (from Deus, God) properly means the belief in the existence of a supreme intelligent First Cause, in opposition to Atheism. It is now, however, applied to that form of infidelity which professes to believe the existence of a personal God, but denies his revelation. The word Deism, at bottom, the same as Theism (Dei Gratia, God); but a distinction in practical use has arisen between them. Des Prades calls Theism the faith of reason, which precedes all revelation; but, on the other hand, designates by D-eism the faith in reason which contests revelation. In more modern times, an arbitrary distinction between the two terms mentioned has been adopted by the usage of scientific language in Germany, according to which Deism is the doctrine of God's relation to the world, which represents God as not only different, but also as separated from the world, therefore as only in an external relation to it; on the other hand, Theism would be the doctrine which represents God as holding an internal and real relation to the world. Labadie makes the distinction between a deist and a theist as follows: the deist, he says, believes in a God, but the theist in a living God. 6 About the middle of the 16th century the title was arrogantly assumed by those who professed to believe in a God, while they refused to acknowledge a revelation of his will. It was used in opposition to Christianity what they were pleased to call 'natural religion,' but never agreed upon the articles of faith which it taught, or the practical duties which it required. Deism, in effect, is a rejection of all known religions, supplying nothing in their place, but bowing to a blind deus ex machina. But the friends of Christianity have no reason to regret the free and unrestrained discussion which their religion has undergone. The cavils and objections of the deists have been fairly heard and fully answered; but for their opposition we should not have had such a vast mass of Christian evidences as has been collected by the pious and learned; evidences which can prove the truths of Christianity, so illustrate its doctrines as to be of lasting service to the cause of genuine religion and the best interests of mankind (Eden). The ground taken by the English deists was substantially the naturalistic, viz. that the Gospel history was the product of an invention imposed upon the world by its authors.

Lord Herbert of Cherbury (born 1581, died 1648) has been regarded as the first deistical writer in England, or at least the first who reduced Deism to a system, affirming the sufficiency of reason and natural religion, and rejecting divine revelation as unnecessary and superfluous. His system, taught in De Veritate and De Religione Laici, embraced these five articles: 1, The being of God; 2, that he is to be worshipped; 3, that piety and moral virtue are the chief parts of worship; 4, that God will pardon our faults on repentance; and, 5, that there is a future state of rewards and punishments. See Hobbes.

Charles Blount (1638) published a translation of Philostratus's Life of Apollinus Tyros, at the same time as the French edition, in order to show that in the 4th century, viz. to contrast the character and history of Christ disadvantageously with that of Apollo- nius. After his death appeared his Oracle of Reason (1695), explaining the 'Deists' Religion.' John Toland (1722), in his Christianity not Mysterious (1686), asserted the capacity and supremacy of reason (anticipating the modern Rationalism) [q. v.], and also, in his Aemular (1699), threw doubt upon the Canon. The theory that Christ was an ordinary man, whose followers elevated him to the imaginary dignity of a divine being, had been started by the early opponents of Christianity—Celsus, Porphyry, and Julian. It was revived by Woolston (+ 1788) (q. v.), in his Six Discourses on the Miracles (1727), and by Tyn dal (q. v.) in his Christianity as old as the Creation (1730). Tyndal was followed by Chubb, True Gospel of Christ (1748), and other writings [see Chubb]; and by More, The Moral Philosopher, and other works. Darwin, in the 19th century, undertook the attack on the higher classes in England by Bolingbroke and Shaftes bury, and at a later period, in the form of complete scepticism, by Hume and Gibbon. Among the late erate, Thomas Paine (q. v.) was the great propagator of Deism. The progress of vulgar Deism among the higher classes was arrested by Butler's immortal Analogia [see Butler], and among the lower, to a large extent, by the rise and progress of Methodism.

In France, the English Deism was adopted and diffused by Voltaire and the Encyclopedists (q. v.); but it soon became frivolous, immoral, and, in fact, atheistic. In Germany, the same seed sprang up in the 18th century in the form of Free-thinking. It took up the modern Rationalism (q. v.): 'The deistical movement, if viewed as a whole, is obsolete. If the same doubts are now repeated, they do not recur in the same form, but are connected with new forms of philosophy, and altered by contact with more recent criticism. In the present day, the term Deism, which was once so general and so improper, is employed to designate various theories, or believe more, both in philosophy and in criticism. In philosophy, the fact that the same difficulties occur in natural religion as well as in revealed, would now throw them back from Monotheism into Atheism or Pantheism; while the mysteries of revelation, which fill the mind with astonishment. But the truths of Christianity would be now concealed and explained away as psychological peculiarities of races or individuals. In criticism, the delicate examination of the sacred liter-
DEITY 731

DE'kar (Heb. De'ker, דֶּקֶר, a bursting thigh), the father of Solomon’s surveyor in the second royal district (1 Kings iv, 9), from which passage it appears that his son BEN-Deker (בֵּין-דִּקֵר, Sept. νῦν Δακέρα; Vulg. Benredcar) was the royal commissariat officer in the western part of the hill-country of Judah and Benjamin, Shaalbim and Bethschemesh. B.C. ante 1014.

De la Mennais. See La Mennais.

Delal'ah (Heb. Delalagh, דֶּלָּלָה, freed by Jehovah); also in the prolonged form Delalay, דֶּלָּלָי, 1 Chron. xxiv, 18; Jer. xxxvi, 12, 25; comp. ἔλειληθρός Cyprian, 1 Cor. vii, 22; also the Phoenician name Delaia, דֶּלַיָּה, quoted from Menander by Josephus, Ap. i, 18, and the modern name Godfrey = Gottesfrey), the name of several men.

1. Sept. Δελαίας v. r. Ἀβζαλλαί. The head of the twenty-third division of the priestly order in the arrangement by David (1 Chron. xxiv, 18). B.C. 1014.

2. Sept. Δελαίας, Γαλαίας. A son of Shemaiah, and one of the courtiers to whom Jeremiah’s first role of prophecy was read (Jer. xxxvi, 12): he vainly interceded for its preservation from the flames (ver. 25). B.C. 604.

3. Sept. Δελαίας. The progenitor or head of one of the parties of exiles who returned from Babylon to Jerusalem with Zerubbabel from certain parts of the Assyrian dominions, but who had lost their genealogical records (Ezra ii, 60; Neh. vii, 62). B.C. 536.

5. Sept. Δαλαίας v. r. Δαλαία. One of the sons of Eloi, a descendant of the royal line of Judah from Zerubbabel (1 Chron. iii, 24; where, however, the name is Anglicized Dalaiath). He probably belongs to the tenth generation before Christ (see Strong’s Harmony and Expositor of the Greek, p. 17). B.C. cir. 900.

Delancey, William. Heathcote, D.D., bishop of the Protestant Episcopal Church in the diocese of Western New York, was born in Westchester County, N.Y., Oct. 8, 1797; graduated at Yale College in 1817, and was ordained deacon in 1819. His first ministerial labor was given to Grace Church, New York, of which he was in charge during the vacancy of the rectorship which continued until that of the Rev. Peter D. Wright. He then officiated for a short time in the newly-organized parish of St. Thomas’s, Mamaroneck. Having been advanced to the priesthood on March 6, 1822, in Trinity Church, New York, he removed to the city of Philadelphia, where he became an assistant minister of the united churches of Christ Church, St. Peter’s, and St. James’s, of which bishop White was then rector. In 1828 he was appointed Provost of the University of Pennsylvania. In 1833 he became assistant minister of St. Peter’s Church of Philadelphia, and in 1837 rector. When the diocese of New York was divided in 1838, Dr. Delancey was elected the first bishop of the episcopal see of Western New York by consecration took place on May 9, 1839. In 1862 he visited England as a delegate to the English House of Bishops from the Protestant Episcopal Church of America. He died at Geneva, N.Y., April 5, 1865. In all positions, as pastor, university officer, and bishop, Dr. Delancey was diligent, skilful, and successful. He instituted a system of diocesan missions sustained to the present time without incurring debt. In 1840, by his recommendation, a fund for the relief of infirm and aged clergy of the diocese was established.

Delany, Patrick, an eminent Irish clergyman, was born in the year 1858, and was educated at Trinity College, Dublin. In 1727 lord Carteret raised him to the chancellorship of Christ Church. He distinguished himself by the publication of the first vol-

A succinct account of the English delsits and their principles will be found in Van Mildert, Engle Lecture, sermon x; Lechler, Geschicht d. englisch. Deutsch (1841). Deity, a name of the Supreme Being, from the Latin Deus, God. It was originally an abstract term, and thence transferred to signify, in a concrete sense, Him whom we call God.

DEITY OF JESUS CHRIST. "In the use of this phrase concerning our Lord we mean to assert that he was ‘the very and eternal God.’ It is a more proper expression than ‘the divinity of Christ,’ since this latter does not necessarily imply anything more of our Lord’s nature than that it was good of heavenly origin; whereas the term ‘Deity’ contains in it the notion of essential Godhead. The other expression, however, has prevailed, on account of the word ‘Deity,’ having come to be so commonly used as the concrete instead of the abstract sense, to denote a divine Being."—Eden, Churchman’s Dictionary, s. v. See Christology; Trinit"
DE LA RUE.

De La Rue. See La Rue.

Delidea, or Theleda of the Peninsular Table, is identified by Ritter (Redit. xvi. 1448) with Hagey, a village on the Damascus-Horna road, four hours east of Riblah (Van de Velde, Memoir, p. 307).

Delegates. Court of. The great court of appeal in all ecclesiastical causes in England is so called because it consists of persons who form the court are appointed to represent the king, under what seal.

Delfau, Dom François, a French theologian, was born at Moullet, in Auvergne, in 1637. He entered the congregation of St. Maur, and became specially known for his edition of the works of St. Augustine. He undertook this work by direction of the general of the congregation, upon whom the need of a new critical edition of the works of the great Church father had become so urgent. Delfau was invited in 1670 to go to Rome to assist him, but he died at his journey, and the work was continued by the scholars, and was finished in 1683. Delfau was a member of the Benedictine order, and was a student at the University of Paris.

De Lelis, a term specifically applied in modern times to Noah's flood, as related in Gen. vii. viii. See Flood.

1. Biblical History of the Flood. — The sacred historian informs us that in the ninth generation from Adam, in the days of Noah, the face of man had greatly multiplied, and the earth was filled with violence, and that God determined to purge the earth from the presence of the creature whom he had made. He will destroy man whom I have created from the face of the earth; both man and beast, and the creeping thing, and the bird of the air; for it is corrupted before me. See Genesis, ch. 6, 17.}

Delli'ah (Hob. Delilah', הָדלִילָה, pron. lancushung, sa with lustful desire; Sept. Dalilé, Josephus Delilá, a woman who dwelt in the valley of Sorek, beloved by Samson (Jdg. xvi. 4-19). B.C. 1165. Her connection with Samson forms the third and last of those amatory adventures which in his history are so inextricably blended with the craft and prowess of a judge in Israel. She was bribed by the "lives of the Philistines" to win from Samson the secret of his strength, and the means of overcoming it. See Samson. It is not stated, either in Judges or Josephus, whether she was an Israelite or a Philistine. Nor can this question be determined by reference to the geography of Sorek, since, in the time of the judges, the frontier was shifting and indefinite. The following considerations, however, supply presumptive evidence that she was a Philistine:

1. Her occupation, which seems to have been that of a courtesan of the higher class, a kind of political Hebra. This view is still more decided in Josephus (who calls her γυνή ἢραμούσα, and associates her influence over Samson with πόρος καὶ συνοπτικοὶ, Acts v. 8, 11). He also states more clearly her relation as a political agent to the "lords of the Philistines" (Ἐπιστασίων, оἱ προερχόμενοι, οἱ ἐραμούσαι Παλαιστίνων; Sept. ἐραμούσαι, οἱ ρόοι συνοπτικοί; political lords, Milton, Samson. Ag. 850, 1190), employing under their directions "hiers in wait" (Ῥωμ. v. 19, το ἔραμος; comp. Judg. iii. 8), and the tact which is attributed to her in Judges, but more especially in Josephus, indicates a position not likely to be occupied by any Israelitish woman at that period of national depression. See Philistines.

2. The general tendency of the Scripture narrative: the sexual allusion represented as acting upon the Israelites from without (Num. xxv. 1, 6; xxvi. 15, 16). See Harlot.

3. The special case of Samson (Judg. xvi. 1; xvi. 1). In Milton Delilah appears as a Philistine, and justifies herself to Samson on the ground of patriotism (Sam. Ag. 850, 960).

4. Delilus (Δηλαύος), Quintus, a favorite pimp of Antony, whose unprincipled officiousness came near embroiling Herod with Ventidius (Josephus, Ant. xi. 15, 1; xvi. 2, 6; Wirt. i. xxv. 8). He was a Roman knight who was concerned in the civil wars under the triumvirate, and is frequently mentioned in classical history (Smith, Diet. of Classical Biog. s. v.).

Delos. See Delos.

Deluge, a term specifically applied in modern times to Noah's flood, as related in Gen. vii. viii. See Flood.
earth to destroy all flesh, wherein is the breath of life, from under heaven; and everything that is in the earth shall die." The ark thus constructed was slowly prepared by Noah. See Ark. At length, in the six hundredth year of his age, the ark was finished, and all living things were gathered into it as in a place of safety. Jehovah shut him in, says the chronicler, speaking of Noah. And then there ensued a solemn pause of seven days before the threatened destruction was let loose. At last the flood came; the waters were upon the earth. The narrative is vivid and forcible, though the language is that sort of description which in a modern historian or poet would have occupied the largest space. We see nothing of the death-struggle; we hear not the cry of despair; we are not called upon to witness the frantic agony of husband and wife, and parent and child, as they fled in terror before the rising waters. Nor is a word said of the sadness of the one righteous man who, safe himself, looked upon the destruction which he could not avert. But one impression is left upon the mind with peculiar vividness, from the very simplicity of the narrative, and it is that of utter desolation. This is heightened by the contrast and repetition of the words, "forsakes" and "nevermore." On the one hand we are reminded less than six times in the narrative in chaps. vi, vii, viii, who the tenants of the ark were (vi, 18–21; vii, 1–5, 7–9, 13–16; viii, 16, 17, 18, 19), the favored and rescued few; and, on the other hand, the total and absolute blotting out of everything else is less emphatically felt upon (vi, 18, 17; vii, 4, 21–28). This evidently designed contrast may especially be traced in chap. vii. First, we read in ver. 6, "And Noah was six hundred years old when the flood came—waters upon the earth." Then follows an account of Noah and his family and the animals entering into the ark. Next we have verses 10–12, subject 7: "And it came to pass after seven days that the waters of the flood were upon the earth." In the six hundredth year of Noah's life, in the second month, on the seventeenth day of the month, on the selfsame day were all the mountains of the great deep broken up, and the windows (or floodgates) of heaven were opened. And the rain was upon the earth forty days and forty nights. Again the narrative returns to Noah and his companions, and their safety in the ark (ver. 18–16). And then in ver. 17 the words of ver. 12 are resumed, and from thence to the end of the chapter a very vivid and very impressive description is given of the appalling catastrophe: "And the flood was forty days upon the earth; and the waters increased and bare up the ark, and it was lifted up from off the earth. And the waters prevailed and increased exceedingly upon the earth: and the ark went on the face of the waters. And the waters prevailed very exceedingly upon the earth, and all the high mountains which were under the whole heaven were covered. Fifteen cubits upwards did the waters prevail, and the mountains were covered. The earth was a morass, which moveth upon the earth, of fowl, and of cattle, and of wild beasts, and of every creeping thing which creepeth upon the earth, and every man. All in whose nostrils was the breath of life, of all that was in the dry land, died. And every substance which was on the face of the ground was blotted out, as well man as cattle, and creeping thing, and thing that creepeth upon the earth, and every bird of the heaven. They were blotted out from the earth, and Noah only was left, and they that were with him in the ark. And the waters prevailed on the earth a hundred and fifty days. The waters of the Flood increased for a period of 190 days (40 + 150, comparing vii, 12 and 28). And even when the waters, after carrying a wind to pass over the earth, so that the waters were assuaged, the ark rested on the seventeenth day of the seventh month on the mountains of Ararat. After this the waters gradually diminished till the first day of the tenth month, when the tops of the mountains were seen. It was then that Noah sent forth, first, the raven, which flew from thence and thither, resting probably on the mountain-tops, but not returning to the ark; and next (7) after an interval of seven days; comp. ver. 10), the dove, "to see if the waters were abated from the ground" (i.e. the lower plain country). "But the dove," it is beautifully said, "found no rest for the sole of her foot, and she returned unto him into the ark." After waiting eight days, she sent forth the dove, which returned this time with a fresh (נילוח) olive-leaf in her mouth, a sign that the waters were still lower. Once more, after another interval of seven days, she sent forth the dove, and she "returned not again unto him any more," having found a home for herself upon the earth. No picture in natural history was ever drawn with more exquisite beauty and fidelity than this: it is admirable alike for its poetry and its truth. Respecting two points, we may here remark (2) that the raven was reproved for a forlorn change of heart by its flight and its cry (Elijan, H. A. vii, 7; Virg. Georg. i, 882, 410). According to Jewish tradition, the raven was preserved in the ark in order to be the progenitor of the birds which afterwards fed Elijah by the brook Cherith. The olive-tree is an evergreen, and seems to have been a symbol of living water, according to Theophrastus (Hist. Plant. iv, 8) and Pliny (H. N. xiii, 56), who mention olive-trees in the Red Sea. The olive grows in Armenia, but only in the valleys on the south side of Ararat, not on the slopes of the mountain. It will not flourish at an elevation where even the mulberry, walnut, and apricot are found (Bitter, Erdkunde, x, 920). According to a careful adjustment of the chronology of the Hebrew Bible, the Noachian deluge appears to have occurred (begun) in the year from the creation of Adam 1657, and before Christ 2516. It continued twelve lunar months and ten days, or, exactly one solar year (Brown, Ordo Seculorum, p. 855 sq.), as the following tabular exhibit of the incidents we show:

The word specially used to designate the Flood of Noah (אָשֶׁר יַכְבֹּל, "kam-mabbūl") occurs in only one other passage, of Scripture (Psa. xcvii, 10). The poet there sings of the majesty of God as seen in the storm. It is not improbable that the heavy rain accompanying the thunder and lightning had been such as to swell the torrents, and perhaps cause a partial inundation. This carried back his thoughts to the great flood of which he had often read, and he sang, "Jehovah sat as king at the Flood," and looking up at the clear face of the sky, and on the freshness and glory of nature around him, he added, "and Jehovah remaineth a king forever." In Isa. liv, 9, the Flood is spoken of as "the waters of Noah." God himself appeals to his promise made after the Flood as a pledge of his faithfulness to Israel: "For this is as the waters of Noah unto me; for as I have sworn that the waters of Noah should no more go over the earth, so have I sworn that I would not be wroth with thee nor rebuke thee." In the N. T. our Lord gives the sanction of his own
authority to the historical truth of the narrative, Matt. xxiv, 37 (comp. Luke xvi, 26), declaring that the state of the world at his second coming shall be such as it was in "the days of Noah," which "waited in the days of Noah while the ark was a preparing, wherein few, that is, eight souls, were saved by water," and sees in the waters of the flood by which the ark was borne up a type of baptism, by which the Church is separated from the world. Again, in his second Epistle (ii, 5), he cites it as an instance of the righteous judgment of God, who spared not the old world, etc.

II. Traditions.—The legends of many nations have preserved the memory of a great and destructive flood from which but a small part of mankind escaped. It is not always clear whether the point back to a common centre, whence they were carried by the different families of men as they wandered east and west, or whether they were of national growth, and embody merely records of catastrophes, such as especially in mountainous countries are of no rare occurrence. In some instances, no doubt, the resemblances between the Deluge stories are due to the striking tendency to render it morally certain that the former were borrowed from the latter. We find, indeed, a mythological element, the absence of all moral purpose, and a national and local coloring, but, discernible among these, undoubted features of the primitive history.

The Flood in the East is apparently drawn partly from Biblical and partly from Persian sources. In the main, no doubt, it follows the narrative in Genesis, but dwells at length on the testimony of Noah to the unbelieving (Sale's Koran, chap. xi, p. 181). He is said to have harbored among his people one thousand five hundred yoke of oxen (xxix, p. 227). People scoffed at him and thus were they employed until our sentence was put in execution and the oven poured forth water." Different explanations have been given of this oven, which may be seen in Sale's note. He suggests (after Hyde, De Bel. Pers.) that this idea was borrowed from the Persian Magi, who also fancied that the first waters of the Deluge gushed out of the oven of a certain old woman named Zala Cofa. But the tanasir (oven), he observes, may mean only a receptacle in which waters are gathered, or the fissure from which they broke forth. Another peculiarity of this version is, that Noah is said to have gone into the ark: he refuses, in the hope of escaping to a mountain, and is drowned before his father's eyes. The ark, moreover, is said to have rested on the mountain Al Judi, which Sale supposes should be written Jord or Giorni, and connects with the Gordyaei, Cardu, etc. or Kurd Mountains on the borders of Armenia and Mesopotamia (ch. xi, p. 181-183, and note). See Ararat.

1. The traditions which come nearest to the Biblical account are those of the nations of Western Asia. Foremost among these is the Chaldaean. It is preserved in a Fragment of Herodotus, and is as follows: "After the death of Ardatas, his son Xirshas was crowned, and reigned eighteen sari. In his time happened a great Deluge. The history of which is thus described: The Deity Kronos appeared to him in a vision, and warned him that on the 15th day of the month Desis there would be a flood by which mankind would be destroyed. He therefore enjoined him to write a history of the beginning, course, and end of all things, and to bury it in the City of the Sun at Sippa; and to build a vessel (σκαραος), and to take with him into it his friends and relatives; and to put on board food and drink, together with different animals, birds, and quadrupeds; and as soon as he had made all these preparations, to commit himself to the deep. Having asked the Deity whether he was to sail, he was answered, 'To the gods, after having offered a prayer for the good of mankind.' Whereupon, not being disobedient (to the heavenly vision), he built a vessel five stadia in length and two in breadth. Into this he put everything which he had prepared, and embarked in it his wife, his children, and his personal friends. After the flood had been upon the earth and was in time abated, Xisuthrus sent out some birds from the vessel, which, not finding any food, nor any place where they could rest, returned thither. After an interval of some days Xisuthrus sent out the birds a second time, and now they returned no more; whence Xisuthrus judged that the earth was visible above the waters, and accordingly he made an opening in the vessel (?), and, seeing that it was straitened upon the site of a certain mountain, he quitted it with his wife and children, and then paid his adoration to the earth, and having built an altar and offered sacrifices to the gods, he, together with those who had left the vessel with him, disappeared. Those who had remained behind, when they found that Xisuthrus and his companions did not return, in their turn left the vessel and began to look for him, calling him by his name. Him they saw no more, but a voice came to them from heaven, bidding them lead pious lives, and so join him who was gone to live with the gods, and further informing them that his wife, his daughter, and the pilot had shared the same honor. It told them, moreover, that they should return to the mountain where the vessel was ashore, and should take up the writings that had been buried in Sippara and impart them to mankind, and that the country where they then were was the land of Armenia. The rest, having heard these words, offered sacrifices to the gods, and, taking a circuit, journeyed to Babylon. The vessel they had strangled in Armenia, some part of it still remains in the mountains of the Corcyreans (or Cordyeans, i.e. the Kurds or Kurdistan) in Armenia, and the people scrape off the bitumen from the vessel and make use of it by way of charms. Now, when those of whom we have spoken returned to Babylon, they dug up the writings which had been buried at Sippara; they also founded many cities and built temples, and thus the country of Babylon became inhabited again." (Corby’s Ancient Fragments, p. 26-29). Another version abridged, but substantially the same, is given from Abydenus (ibid. p. 38, 54). The version of Eusebius (quoted by Eusebius, Prol., p. 10) is taken from the Aramaic which, he says, "owes its foundation to those who were saved from the Deluge; they were giants, and they built the tower celebrated in history."

Other Western Asiatic notices of a Flood may be found (a) in the Phrygian mythology, where the victory of Pontus (the sea) over Demarous (the earth) is mentioned (see the quotation from Sanchonithos in Cory, as above, p. 15); (b) in the Sibyllyne Oracles, partly borrowed, no doubt, from the Biblical narrative, and partly perhaps from some Babylonian story. In these mention is made of the Deluge, after which Kronos, Titan, and Japetus ruled the world, each taking a separate part, and being overthrown by a deluge, still after the death of Noah, when Kronos and Titan engaged in war with one another (Jb. p. 52). To these must be added (c) the Phrygian story of king Annaks or Nanaks (Enoch) in Iconium, who reached an age of more than 800 years, foresaw the Flood, and went and prayed for his seed. He was slain that was coming upon them. Very curious, as showing what deep root this tradition must have taken in the country, is the fact that so late as the time of Septimius Severus a medal was struck at Apamea on which the Flood is commemorated. 'The city is known to have been called Kibdis, or the Arc,' and it is also known that the coins of cities in that age exhibited some leading point in their mythological history. The medal in question represents a kind of square vessel floating in the water. Through
an opening in it are seen two persons, a man and a woman. Upon the top of the deck or ark is perched a bird, whilst another flies towards it carrying a branch between its feet. Before the vessel are represented the same pair as having just built it, and got upon the dry land. Singularity enough, too, on some specimens of this medal, the letters NO, or NOE, have been found on the vessel, as in the annexed cut. (See Eckhel, iii, 182, 183.) Wiseman, Lectures on Science and Revealed Religion, ii, 128, 129.) This fact is no doubt remarkable, but too much stress must not be laid upon it; for, making full allowance for the local tradition as having occasioned it, we must not forget the influence which the Biblical account would have in modifying the native story. See Armenia.

As belonging to this cycle of tradition must be reckoned also (1) the Syrian, related by Lucian (De Dei Syræ, c. 18), and connected with a huge chasm in the earth near Hierapolis, into which the waters of the Flood are supposed to have drained; and (2) the Armenian, quoted by Nerses (c. 129) and Nicolai, bishop of Damaseceus, who flourished about the age of Augustus. He says: "There is above Minyas, in the land of Armenia, a great mountain, which is called Baris [i. e. a ship], to which it is said that many persons fled at the time of the Deluge, and so were saved; and that one in particular was carried thither upon an ark (i.e. λάρανσας), and was landed upon its summit, and that the remains of the vessel's planks and timbers were long preserved upon the mountain. Perhaps this was the same person of whom Moses, the legislator of the Jews, wrote an account.

2. A second cycle of traditions is that of Eastern Asia. To this belong the Persian, Indian, and Chinese. The Persian is mixed up with its cosmogony, and hence loses everything like a historical aspect. "The world having been corrupted by Ahriman, it was necessary to bring over it a universal flood of water, that all impurity might be washed away. The men came down from the head of a bull; the earth was under water to the height of a man, and the creatures of Ahriman were destroyed."

The Chinese story is, in many respects, singularly like the Biblical, according to the Jesuit M. Martinius, who says that the Chinese computed it to have taken place 4000 years before the Christian era. Fäh-he, the reputed author of Chinese civilization, is said to have escaped from the waters of the Deluge. He reappears as the first man at the production of a new world, attended by seven companions—his wife, his three sons, and three daughters, by whose intermarriage the whole circle of the universe is finally completed (Hardwick, Christ and Canaan, ii, 14, 16). Dr. Gutzlaff, in a paper "On Buddhism in China," communicated to the Royal Asiatic Society (Journal, xvi, 79), says that he saw in one of the Buddhist temples, "in beautiful stucco, the scene where Kwan-yin, the Goddess of Mercy, looks down from heaven upon the lonely Noah in his ark, amid the raging waves of the deluge, with the dolphins swimming around as his last means of safety, and the dove with an olive-branch in its beak flying towards the vessel. Nothing could have exceeded the beauty of the execution."

The Indian tradition appears in various forms. One of these, the one which most remarkably agrees with the Biblical account is that contained in the Mahâbhârata. We are there told that Brahma, having taken the form of a fish, appeared to the pious Manu (Satya, i.e. the righteous, as Noah is also called) on the banks of the river Wrinæ. Thence, at his request, Manu transferred him when he grew bigger to the Ganges, and finally, when he was large enough even for the Ganges, to the ocean. Brahma now announces to Manu the approach of the Deluge, and bids him build a ship and put in it all kinds of seeds, together with the seven Rishi or holy beings. The Flood begins and covers the whole earth. Brahma himself appears in the form of a horned fish, and, the ship fast to his side, and by the grace of Manu for many years, and finally lands on the loftiest summit of Mount Himarat (i.e. the Himalayas). Then, by the command of God, the ship is made fast, and in memory of the event the mountain called Naubandhâna (i.e. ship-binding). By the favor of Brahma, Manu, after the Flood, creates the monstros race of man-kind, which are hence termed Maundaha, i.e. born of Manu (Bopp, Die Sündflut). The Parânic or popular version is of much later date, and is, "according to its own admission, colored and disguised by allegorical imagery." Another, and perhaps the most ancient version of all, is that contained in the Āṭapâṭa-Brāhmaṇa. The story is that of this is manifestly north of the Himalaya range, over which Manu is supposed to have crossed into India. Both versions will be found at length in Hardwick's Christ and other Masters, ii, 140-152.

3. A third cycle of traditions is to be found among the American Indians. They might be expected, show occasionally some marks of resemblance to the Asiatic legends. The one in existence among the Cherokees reminds us of the story in the Mahâbhârata, except that a dog here renders the same service to his master as the fish there does to Manu. "This dog was very pertinacious in visiting the banks of a river for several days, where he stood gazing at the water and bowing piteously. Being sharply spoken to by his master and ordered home, he revealed the coming evil. He concluded his prediction by saying that the escape of his master and family from drowning depended upon their throwing kins into the water; that, to escape drowning himself he must take a boat and put it in all he wished to save; that it would then rain hard a long time, and a great overflowing of the land would take place. By obeying this prediction the man and his family were saved, and from them the earth was again peopled" (Schoolcraft, Notes on the Iroquois, p. 83).

"Of the different nations that inhabit Mexico," says A. von Humboldt, "the following had paintings resembling the deluge of Cozcox, viz. the Aztecs, the Mixtecs, the Zapotecs, the Tascaltecs, and the Mechoacans. The Noah, Xialithrus, or Manu of these nations is termed Cozcox, Too-Cipocli, or Texpi. He saved himself, with his wife Xochiquetzatl, in a bark, or, according to other traditions, on a raft. The painting represents Cozcox in the midst of the water waiting for a bark. The mountain, the summit of which rises above the waters, is the peak of Colbucan, the Ararat of the Mexicans. At the foot of the mountain there are the heads of Cozcox, and a cornfield, known by two tresses in the form of horns, denoting the female sex. The men born after the Deluge were dumb: the dove from the top of a tree distributed among them tongues, represented under the form of small comas. Of the Mechoacan tradition he writes, that 'Cozcox, well-called Texpi, embarked in a spacious accoli with his wife, his children, several animals, and grain. When the Great Spirit ordered the waters to withdraw, Texpi sent out from his bark a vulture, the zopilote, or vulturnus aura. This bird did not return on account of the carcasses with which the earth was strewn. Texpi sent out other birds, one of which, holding a laming-branch in its beak, holding in its beak a branch clad with leaves. Texpi, seeing that fresh verdure covered the soil, quitted his
This old Greek legend of Deucalion and Pyrrha is the best known of all the traditions next to the narrative of the Bible. (See Jackson, "Noah's and Deucalion's Flood," Works, i, 103: "The Deluges of Ogyges and Deucalion," Bibliotheca Sacra, 1843, p. 75.) According to this version, mankind, for their impiety, were doomed to destruction. The waters accounted for by this version of the Deluge, according to Eusebius, were violent rains from heaven. In a short time the world was submerged in the floods, and every human being was perished save Deucalion and his wife, with his sons and their wives. They escaped in a large vessel, in which they had previously placed pairs of every kind of living creature. While in the vessel they passed by a dove, which in a little time returned. Being let free a second time it came not back, or, as another version has it, it alighted again on the ark with mud-stained claws, whence Deucalion inferred that the subsidence of the waters had begun. It may be mentioned, in reference to this tradition, that a very singular coincidence, that just as, according to Ovid, the earth was repeopled by Deucalion and Pyrrha throwing the bones of their mother (i.e. stones) behind their backs, so among the Tamanaki, a Carib tribe on the Orinoko, the story goes that a man and his wife, escaping from the flood to the top of the highest mountain, planted the bones of the Mauritius-palm, whence sprung a new race of men and women. This curious coincidence between Hellenic and American traditions seems explicable only on the hypothesis of some common centre of tradition.

It seems tolerably certain that the Egyptians had no records of the Deluge, at least if we are to credit Manetho. Nor has any such record been detected on the monuments, or preserved in the mythology of Egypt. They knew, however, of the flood of Deucalion, but seem to have been in doubt whether it was to be regarded as partial or universal, and they supposed it to have been preceded by several others.

On all these and many similar traditions in civilized and savage nations, see the works of Bryant (Ancient Mythology, Lond. 1774-6, 8 vols. 4to, vol. iii) and Har- court (Doctrine of the Deluge, Lond. 1838, 2 vols. 8vo), in which, after rejecting what is fanciful, enough remains to attest the wide-spread existence and intimate agreement of these traditional recollections of a food coextensive with the human race.

III. Extent of the Flood.—On this question two opinions have been entertained: one, that it was general over the whole globe; the other, that it was partial, affecting only the Tigris and Euphrates, or the Tigris and the lower part of the Euphrates, or the race had extended. In all inquiries into this subject, it is well to bear in mind the design to be fulfilled by the "flood of waters." That design was plainly not to destroy and remodel the surface of the earth. Although the inferior animals were involved in a like fate with the human race, it was not for their destruction that the great cataclysm came. The wickedness of man had evoked the divine anger; to sweep him and his crimes, therefore, from the face of the earth, the fountains of the great deep were broken up, and the windows of heaven were opened; hence we may reasonably infer that no greater devastation would be permitted than was unavoidable to secure the destruction of the human family. Against the first opinion there is, accordingly, this preliminary objection, that either it takes for granted that the whole world was peopled in the days of Noah, or it represents as involved in ruin large tracts of land, fair and fertile, though uninhabitable. Most of these the first alternative there is no evidence in Scripture. Indeed, the whole narrative of the preparation of the ark, and Noah's intercourse with his fellow-men, leads us to infer that the population of the globe at the time was not so extensive but that the warnings of the patriarch could be everywhere heard and known. It would have been
DELUGE

a rain task if his single voice had been required to sound in all lands. The second alternative is equally adverse to the opinion of the universality of the deluge, for it necessitates our belief in the destruction of large portions of the earth's surface where man had never been, and which could not, therefore, have become tainted and defiled by sin—a view that is opposed to the known modes of God's dealings with his creatures. But against the idea of a general flood over the whole globe simultaneously, many arguments of much greater force may be brought forward. These are derived from a consideration of the laws by which the present edifices of waters are governed. The more these laws are the harder it is to reject these arguments that the deluge was a miracle, and must, accordingly, be judged apart from the operation of law, if it is sufficient to reply that, whether a miracle or not, it was brought about by the ordinary agencies of nature; "the fountains of the deep were broken up"—that is, the land was depressed and the sea rolled over it; "the windows of heaven were opened"—in other words, a constant and heavy rain was sent upon the earth; and again, when the waters were to be dried off the land, a wind was made to blow upon them. In short, from the beginning to the end of the narrative in Genesis, we meet with no setting aside of the laws of nature and no contradiction of them with those laws, as if to teach a truth which is very apt to be forgotten in the present day, that what we call the laws of nature is only the constant mode in which the Creator acts, and that by the operation of these laws, directed as he sees fit, he works out his purposes in creation.

1. The astronomical difficulties in the way of the theory of the absolute universality of the flood over the earth's surface are insuperable. Granting, for an instant, that from some unknown source a vast body of water was introduced upon the surface of our planet, we are not at liberty to ask what was the cause of the result? it can be shown that there was no general collapse of the earth's crust, and the water must therefore have risen five miles above the sea-level, so as to cover the top of the highest mountain. The effect of this would be to increase the equatorial diameter of the earth by some ten or twelve miles. The orbit round the sun would consequently be altered. The influence of the attraction on the planets would be increased, and thus the element of disorder would reach to the remotest regions of space. But let us suppose that a change of this kind was permitted to extend through the universe, what is the next step in this series of impossibilities? The earth in the year that its waters sawage, and the earth is once more as it used to be. Here, again, another change must have extended through the firmament. The old relations of the heavenly bodies are re-established, and the orbits continue as they were before the flood. Thus we must suppose a serious alteration to have disturbed every celestial body throughout the whole universe, to have lasted while our earth performed some three hundred revolutions on its axis, and then to have ceased by the return of everything to the original condition. And this stupendous system of aberration had for its object the destruction of a race of creatures inhabiting a mere speck and moment of space. It will easily be seen that this hypothesis has any shadow of probability.

2. The geological objections to a universal deluge are also formidable. Many years have not elapsed since it was believed that the revelations of geology taught us a pure narrative, and we very commonly received view of the deluge. Over the greater part of Great Britain and Ireland, and throughout Central and Northern Europe as well as North America, there exists immediately under the vegetable soil a deposit of clay, sand, or gravel, very often tumultuously arranged. This deposit, in the infancy of geological science, was set down as the result of some great rush of waters; and, as it was plainly one of the most recent formations of the globe, it came to be regarded as beyond question the result of that old deluge by which the human race had been destroyed. It received, accordingly, the same diluvium; and, from its very general occurrence in certain strata of the earth's surface, it was held to be a confirmation of the Biblical narrative of the flood that covered "all the high hills that were under the whole heaven." But the identification proved too hasty. A more careful examination of the diluvium showed that it belonged to many different periods, and had, to a considerable extent, resulted from local causes, acting in the manner in which they were supposed to act; however, that one kind of diluvium, having a wide diffusion over the northern parts of Europe and America must have been produced by one great cause acting in the same geological period. The agency which gave rise to this "drift" was nevertheless shown to be not a rush of water, but ice coming from the north, either in the form of a glacier or as icebergs, and bearing with it enormous quantities of sand, mud, and stones. Thus the last hope of sustaining the doctrine of a universal deluge by an appeal to geological facts fell to the ground. Not only does geology afford no evidence in favor of such a doctrine, but it tends to support the opposite view. The notion of a simultaneous and universal desolation of the globe finds no countenance among those stony records in which the principal history of our planet is graven as with a pen of iron in the rock forever. There are, indeed, many gaps in the chronicle, many passages that have been blotted out in whole or in part, and some pages that seem never to have been inscribed among rocks at all, these are only local. What is wanting in one place is often made up in another; and, though even at the best the record is full of imperfections, the geologist can confidently affirm that its whole tenor goes to disprove any universal catastrophe, and it is plain that the notion of successive races of plants and animals has been imperceptibly effected during immensely protracted periods of time.

Another geological argument has often been adduced as bearing strongly against a general deluge. In Auvergne, and other districts of Central France, there occurs a series of veins which have not been in action within the historical period. From the association of the remains of long extinct animals among the products of these veins, it has been inferred that the era of eruption must have been assigned to a time long anterior to the appearance of man. Yet these veins are of recent origin, and it is clear that when they were first thrown up. Travellers who have climbed their sides and descended into their craters bear testimony to the fact that they consist of dust and cinders still so loosely aggregated that the traveller sometimes sinks over the ankle in volcanic debris. Such light material has hitherto been exposed to the action of no large body of water, which would have swept it at once away, like Graham's Island, which arose in the Mediterrenean, July, 1831, to a height of 200 feet and a circumference of three miles, but in a few months was washed down to a mere shoal (Bibliotheca Sacra, July, 1867, p. 465). Hence, since these volcanic craters have been in action but a few centuries, the deluge cannot have extended over Central France.

Formerly, the existence of shells and corals at the top of high mountains was taken to be no less conclusive evidence the other way. They were constantly appealed to as a proof of the literal truth of the Scripture narratives. The true theory of the condition of the coasts of the Archipelago was not known; and this proof did seem to Voltaire, that he attempted to account for the existence of fossil shells by arguing that either they were those of fresh-water lakes and rivers evaporated during dry seasons, or of land-snails developed in unusual abundance during wet ones; or that they were shells that had been dropped from the huts of pilgrims on their way from the Holy Land to their
own homes; or, in the case of the ammoneans, that they were petrifed reptiles. It speaks ill for the state of science that such arguments could be advanced, on the one side for, and on the other against, the universality of the Deluge. This is the more extraordinary — and the fact is, how very subtle, how prej udices stand in the way, the soundest reasoning will be listened to — when we remember that so early as the year 1517 an Italian named Fracastoro had demonstrated the untenableness of the vulgar belief which associated these fossil remains with the Mosaic Deluge. "It is a fact," he observed, "that a coal has too transiently existed in the waters themselves; and, if it had transported shells to great distances, it must have strewed them over the surface, not buried them at vast depths in the interior of mountains. But the clear and philosophical views of Fracastoro were disregarded, and the talent and argumentative powers of the learned were doomed for three centuries to be wasted in the discussion of these two simple and preliminary questions: first, whether fossil remains had ever belonged to living creatures; and, secondly, whether, if this be admitted, all the phenomena could not be explained by the deluge of Noah" (Lyell, Principals of Geology, 3d ed.). Even within the last thirty years geologists like Cuvier and Buckland (Repticis Dinosaurum, Lond., 12-23, 4to) have thought that the superficial deposits might be referred to the period of the Noachian Flood. Subsequent investigation, however, showed that if the received chronology were even approximately correct, this was out of the question, as these deposits must have taken place thousands of years before the time of Noah, and, indeed, before the creation of man. Hence the geologic diluvium is to be carefully distinguished from the historic. Although, singularly enough, the latest discoveries give some support to the opinion that man may have accompanied the animal drift, yet even then that formation could not have resulted from a mere temporary submersion like that of the Mosaic Deluge, but must have been the effect of causes in operation for ages. So far, then, it is clear, there is no evidence now on the earth's surface in favor of a universal deluge. See Geology.

3. But perhaps the most startling of all the difficulties in the way of the belief in a universal deluge are presented to us in the researches of the zoologist. From him we learn that, even taking the cubit by which the ark was measured to have been of the longest, the ark was totally inadequate to contain the animals even of a single continent. It would occupy too much space to enter here into the details of this part of the subject. We refer the reader to one of the lectures of Hugh Miller (Testimony of the Rocks, p. 267).

Sir Walter Raleigh thought he had exhausted the capabilities of the ark when, after calculating the amount of space that would be occupied by the animals known to himself at the time, he concluded that "all these two hundred and eighty beasts might be kept in one story or room of the ark, in their several cabins, their mact in the second, the birds and their provisions in the third, with space to spare for Noah and his family, and all their necessaries."

(Raleigh's Theory of the World, p. 57).

Since Raleigh's time, however, the known number of terrestrial animals has been enormously increased. Of mammalia alone there are now known between 1600 and 1700 species. To these must be added upwards of 6600 birds, 650 reptiles, and 560,000 insects, which would require the provision of food in the ark. It is needless to reason that no vessel ever fashioned by man could have accommodated a tithe of these inmates. See Noah's Ark.

But over and above the impossibility of constructing a vessel large enough to contain all the species of terrestrial animals inhabited that globe, it is equally impossible in the days of Noah, just as it would be utterly impossible in our own day, to collect all these creatures alive into one corner of the earth. No one needs to be informed that the animal tribes are not all represented in any one country; that certain races are confined to high latitudes, that others are found only in certain localities, while others are found only between the tropics. Nor is it necessary to do more than allude to the fact that there is a similar grouping on all high land, altitude above the sea being thus representative of recession from the equator, so that the bald head of a lofty mountain may be warmed by a perpetual spring, while the shoulders clad with the spring-like vegetation of the temperate latitudes, while its feet lie rich in the glories of a tropical summer. But besides this arrangement, according to climate and temperature, there is still further subdivision into provinces, and these again into generic and specific centres. Thus, while each zone of latitude has its peculiar faces of animal and vegetable life, it contains so many distinct and independent areas, in which the animals and plants are to a large extent genetically or specifically different from those of contiguous areas. The evidence of these localized groups of organisms points in part to old geological strata, but in the main the last thirty years geologists have been driven to the conclusion that the causes which are still far from being understood. Professor Edward Forbes treated them as centres of creation, that is, distinct areas in which groups of plants and animals had been created, and from which, as a common centre, they had gradually radiated, so as to encroach upon one another's sphere. Hence, to collect specimens of all the species of terrestrial creatures inhabiting the earth, it would be necessary not only to visit each parallel of latitude on both sides of the equator, but to explore the whole extent of each parallel, so as to leave out none of the separate provinces. With all the appliances of modern civilization and science throughout every part of the world, the task of ascertaining the extent of the animal kingdom is probably still far from being accomplished.

Not a year passes without witnessing new names added to the lists of the zoologist. Surely no one will pretend that what has not yet been achieved by hundreds of laborers during many centuries could have been performed by one of the patriarchs during a few years. It was of course necessary that the animals should be brought alive. But this, owing to their climatic susceptibilities, was in the case of many species impossible, and even with respect to those which might have been made to endure the difficulties of their transport must have been altogether insuperable. Noah, moreover, was busy with his great vessel, and continued to be "a preacher of repentance" to his fellow-men — occupations which admitted of no peregrinations to the ends of the earth in search of inmates for the ark. It is indeed beyond our power to follow up the train of impossibilities which such a notion implies. Dr. J. Pye Smith remarks that the idea of a collection of all the terrestrial animals of the globe brought by Noah to the ark cannot be entertained. "Without bringing up the idea of miracles more sup penduous than "the story of the World," even the most appalling in comparison; the great decisive miracle of Christianity — the resurrection of the Lord Jesus— sinks down before it."

The existence of distinct provinces of plants and animals is a fact full of the deepest interest, and opens up to us many of the most curious and sublime questions. The question of the deluge is of course that phase which more especially requires to be noticed here. In addition to what has just been said, it may be remarked further, that these provinces have a geological as well as a zoological significance. Laying aside as utterly impossible the idea of the representation in the ark of every terrestrial species, we may, without any confirmatory evidence that the existing races of plants and
animals have never been interrupted by a general cata-
tastrophe. A careful study of these provinces shows
that some are older than others, just as some parts of
the earth’s surface are geologically older than other parts.
In certain cases a province is found to contain
within itself the relic of an older province which once
occupied the same spot. In the profounder depths of the
sea, in the farthest reaches of the Atlantic and Pacific,
there exist little groups of fish which are not now found alive in the shallower parts. Yet
they once lived even in the shallower water, and their
remains are now found fossil along the shores of the
Firth of Clyde and elsewhere. They have become gradually extinct in the upper parts of the sea, owing
presumably to a change of climate, and have been confined
successively to new, deeper levels. These and other facts of
the same kind point to slow and gradual changes uncon-
broken by any great cataclysmal event. Among
plants, too, similar phenomena abound. It should not
be lost sight of, that, had the whole earth been covered
for a year by a sheet of water, the greater part of our
terrestrial plants must have perished. On the disappre-
cenance of the flood there would hence require to be
a new creation, or rather re-creation, all over the world—a supposition for which there is no evidence
either in Scripture or nature, and which is opposed to all
that we know about the method of divine working.
Plants are grouped, like animals, in greater and lesser
provinces; and these, too, differ greatly from each other in antiquity. Some assemblages of plants
have spread over wide districts, and either extinguished
those which had previously occupied the ground or
driven them into sheltered corners. In Great Britain
and Ireland, for instance, there are five distinct groups
of plants which have also corresponding suites of ani-
imals. The successive migrations of these groups can
still be traced, leading us to a knowledge of certain
vast changes which have taken place among the Brit-
ish plants within a comparatively recent geological
period. England was still united to the Continent when
the oldest group of plants began to flourish. The
northern half of the island, with the whole of Scot-
land, was submerged beneath the sea, and again elev-
ated before the great mass of the British plants crept
westward across the plains that united the islands with the
Continent. It was after the whole group of plants
had begun to flourish in their existing habitats that the
isthmus was broken through by the waves and Britain became an island. These changes
could not have been brought about save during
the lapse of a protracted series of ages. They
give evidence of no sudden break, no temporary anni-
hilation and subsequent creation, such as the idea of a
general flood would require, but, on the contrary, show
very clearly that the present races of plants and ani-
mals have gone on in unbroken succession from a time
that long preceded the advent of man.
There is, however, other evidence conclusive against
this idea of a universal deluge, miracle apart.
"The first effect of the covering of the whole globe
with water would be a complete change in itsclimate,
the general tendency being to lower and equalize the
temperature of all parts of its surface. "Paris paua"
with this process... would ensue the destruction of
the great majority of marine animals. This would
take place sooner or later, the change in the climatic conditions, too sudden and general to be escaped
by migration; and, in still greater measure, in consequence of the sudden change in the depth of the
water. Great multitudes of marine animals can only live between tide-marks, or at depths less than fifty
fathoms; and by the hypothesis the land and sea were
depressed many thousands of feet in a few months, and
to be raised again with equal celerity, it follows that
the animals could not possibly have accommodated
themselves to such vast and rapid changes. All the
littoral animals, therefore, would have been killed.
The race of acorn-shells and periwinkles would have
been exterminated, and all the corals of the Pacif-
ic would at once have been converted into dead coral,
ever to grow again. But, so far is this from being
the case, that acorn-shells, periwinkles, and coral still
survive, and there is good evidence that they have
continued to exist and flourish for many thousands of
years. On the other hand, Noah was not directed to
take marine animals of any kind into the ark, nor, in
fact, is it easy to see how they could have been pre-
served. Again, had the whole globe been submerged,
the sea-water covering the land would at once have
destroyed every fresh-water fish, mollusk, and worm;
and as none of these were taken into the ark, the sever-
lar species to which we have been referring, must have
been exterminated in the kind has occurred. Lastly, such experiments as have been made with regard to the action of sea-water upon terrestrial plants leave very little doubt that sub-
mergence in sea-water for ten or eleven months would
have effectually destroyed not only the great majority
of the plants, but their seeds as well. And yet it is
not said that Noah took any stock of plants with him
into the ark, or that the animals which issued from it
had the slightest difficulty in obtaining pasture. There
are, then, it must be confessed, very strong grounds
for believing that no universal deluge ever occurred.
Suppose the Flood, on the other hand, to have been
local; suppose, for instance, the valley of the river
which is destroyed; then the necessity for preserving
all the species of animals disappears. For, in the first place, there was nothing to prevent the birds
and many of the large mammals from getting away;
and, in the next, the number of species peculiar to that
geographical area, and which would be absolutely de-
stroyed by its being flooded, supposing they could not
escape, is insignificant."
We are thus compelled to adopt the opinion that the flood of Noah was (like other deluges of which we read) a local event confined to one part of the earth’s
surface; and that it was "universal" only in so in-
amuch as it effected the destruction of the whole human race, the family of Noah alone excepted. Against this opin-
ion no objections of any weight can be urged. It is
borne out by the evidence to be derived from a study
of the phenomena of nature; and it is not at variance
with any statement in holy Scripture. The univer-
sality of the event is nowhere mentioned in which
extent of the Deluge—"all the high hills that were
under the whole heaven were covered"—has indeed
been regarded as a testimony to the universality of the
catastrophe. But such general expressions are of fre-
quent occurrence in the sacred writings to denote a
tract of country which, though large relatively to its
inhabitants, yet formed only a very small portion of
the earth’s surface. No authentic traces of the action
of the flood have yet been detected in the East, where
the area of submersion was probably situated, nor
indeed is it likely that any such traces will ever be
found. The high country of which our writer speaks,
but by no means necessary, for the fact of the former
destruction of the human race is made known to us in
the sacred volume, and has been handed down by tra-
dition in almost every nation of the earth, even the
most barbarous and the farthest removed from the
early cradle of the human race. It is probable that the
pose of the writer, when he speaks of "all flesh,"
"all in whose nostrils was the breath of life," refers
only to his own locality. This sort of language is
common enough in the Bible when only a small part
of the globe is intended. Thus, for instance, it is said
that "all countries come into Egypt to Joseph to buy
corn;" and the phrase to the land of Egypt was used.
Augustus that all the world should be taxed." In these
and many similar passages the expressions of the
writer are obviously not to be taken in an exactly
literal sense. Even the apparently very distinct phrase "all the high hills that were under the whole
aees were covered" may be matched by another precisely similar, where it is said that God would put the fear and the dread of Israel upon every nation under heaven, as a result of such language as is framed with a kind of poetic breadth. The real difficulty lies in the connecting of this statement with the district in which Noah is supposed to have lived, and the assertion that the waters prevailed fifteen cubits upward. If the Ararat on which the ark rested be taken as the highest point of land in the world, the highest peak of which is more than 17,000 feet above the sea, it would have been quite impossible for this to have been covered, the water reaching fifteen cubits, i.e., twenty-six feet above it, unless the whole earth were submerged. The author of the Genealog. of the Earth, etc., has endeavored to escape this difficulty by shifting the scene of the catastrophe to the low country on the banks of the Tigris and Euphrates (a miraculous overflow of these rivers being sufficient to account for the Deluge), and supposing that the "fifteen cubits upward" are to be reckoned, not from the top of the mountains, but from the surface of the plain. By "fifteen cubits upward" may be meant only slight elevations, called "high" because they were the highest parts overwashed. But fifteen cubits is only a little more than twenty-six feet, and it seems absurd to suppose that such trifling elevations are described as "all the high hills under the whole heaven." At this rate the area itself must have been twice the height of the highest mountain. The plain meaning of the narrative is that, far as the eye could sweep, not a solitary mountain reared its head above the waste of waters. On the other hand, there is no necessity for assuming that the ark stranded on the high peaks of the mountain now called Ararat, or even that that mountain was visible. A lower mountain range, such as the Zagros range for instance, may be intended. In the absence of all geographical certainty in the matter, it is better to adopt some such explanation of the difficulty. Indeed, it is out of the question to imagine that the ark rested on the top of a mountain which is covered for 4000 feet from the summit with perpetual snow, and the descent from which would have been a very serious matter both to men and other animals. The local tradition, according to which the fragments of the ark are still believed to remain on the summit, can weigh nothing when balanced against so extreme an improbability. From all that has been said here mentioned is not the mountain of that name in Armenia, we may also assume the inundation to have been partial, and may suppose it to have extended over the whole valley of the Euphrates, and eastward as far as the range of mountains running down to the Persian Gulf, or further. As the inundation is said to have been caused by the breaking up of the fountains of the deep great, as well as by the rain, some great and sudden subsidence of the land may have taken place, accompanied by an irush of the waters of the Persian Gulf, similar to what occurred in the Rann of Cutch, on the eastern arm of the Indus, in 1819, when the sea flowed for a few hours contrary to the tract of land 2000 square miles in area into an inland sea, or lagoon (see the account of this subsidence of the Delta of the Euxinus in Lyell's Principles of Geology, p. 460-68). Compare Flood.

DE IUS (or DELOS, DENAC, so called from having appeared, DENAC, monaster, from the sea, at the command of Neptune), mentioned in 1 Macc. x. 23, as one of the places addressed by Lucius in behalf of the Jews, is the smallest of the islands called Cyclades, in the Egean Sea (see Smith's Dict. of Class. Geog. s. v.), being only about five miles in circumference (Pliny, ii. 89). It lay not between Myconos and Rheneas. It was one of the chief seats of Apollo, and was celebrated as the birth-place of this god and of his sister Artemis, or Diana (Spanheim on Callimachus's Hymn to Del.) We learn from Josaphus (Ant. xiv. 10, 8) that Jews resided in this island, which may be accounted for by the fact that, after the fall of Corinth (B.C. 146), it became the centre of an extensive commerce (Cherson, Massal. 18; Pliny, iv. 22; xvi. 89; Livy, xili. 25; xli. 29; Strabo, xiv. p. 688; Pausanias, iii. 23). The sanctity of the spot (Grote, Greece, iii. 222) and its consequent security, its festivity, which was a kind of fair, the excellence of its harbor, and its convenient situation on the highway from Italy and the Adriatic to Asia, made it a favorite resort of merchants (Strabo, x. p. 486). So extensive was the commerce carried on in the island that 10,000 slaves are said to have changed hands there in one day (Strabo, xiv. p. 688). It was especially celebrated for its bronze (see Delicia, Pliny, xxxiv. 3, 4; Cicero, Rosc. 46; Verr. ii. 94). Delos is at present uninhabited except by a few shepherds, but it is still held to be the ancient Delos (Tournefort, i. 345 sqq.). It, together with an adjoining island, is now called Bicles. See Leake, Northern Greece, iii. 95 sq.; Rose, Reisen aus d. Griech. Inseln, i. 90; ii. 167; Sailler, Hist. de I'ile de Delos, in the Mem. de l'Acad. des Inscrip. iii. 576; Schweng, Deliacorum, Part i. (Francod. 1623); Schlegel, De Delus Del. (Mivay. 1840).

DE LYRA. See LYRA.

DE MAISTRE. See MAISTRE.

DE'AMAS (Δημας, probably a contraction from Δημαρχος, or perhaps from Δημαρχειος), a companion of the apostle Paul (called by him his fellow-laborer, ιππομαχς, in Phil. 24; see also Col. iv. 14) during his first imprisonment at Rome. B.C. 57. At a later period (2 Tim. iv. 10), we find him mentioned as having deserted the apostle through love of this present world, and gone to Thessalonica. B.C. 64. This departure has been magnified by tradition into an apostasy from Christianity (so Epiphanius, Hierez. ii. 6), which is by no means implied in the passage (Budd. Ecd. Apost. p. 311 sqq.).—Smith, s. v.

DEMARY. See TALMUD.

DEMETRIUS (Δημητριος, probably from Δημητριος, the Greek name of the god Cybele), the name originally of several of Alexander's generals (see Smith's Dict. of Class. Biog. s. v.), and borne by several of the Macedonian and Syrian princes, two of whom are often referred to in the Apocrypha, and three in Josephus; also by two men mentioned in the New Test., and by several others in Josephus.

1. DEMETRIUS I, surnamed SOTER (Σωτήρ, "the Saviour," in recognition of his services to the Babylonians), king of Syria, was the son of Seleucus IV Philopator, and grandson of Antiochus the Great. While still a boy, he was sent by his father as a hostage to Rome (B.C. 175) in exchange for an uncle, Antiochus Epiphanes (Appian, Syr. 45). From his position he was unable to offer any opposition to the usurpation of the Syrian throne by Antiochus IV; but on the death of that monarch (B.C. 164) he claimed his liberty, and the recognition of his claim by the Roman Senate in preference to that of his cousin Antiochus V. His petition was refused from selfish policy (Polyb. xxxi. 12), and by the advice and assistance of Polybios, whose friendship he had gained at Rome (Polyb. xxxi. 19; Justin, xxxiv. 8), he left Italy secretly, and landed with a small force at Tripolis, in Phoenicia (1 Macc. vii. 31; Josephus, Ant. xii. 7). The Syrians soon declared in his favor (B.C. 162), and Antiochus and his protector Lysias were put to death (1 Macc. vii. 2, 3; 2 Macc. xiv. 2).
DEMETRIUS

Having thus gained possession of the kingdom, Demetrius succeeded in securing the favor of the Romans (Polyb. xxxii, 4), and he turned his attention to the internal organization of his dominions. The Grecizing party were still powerful at Jerusalem, and he supported them by arms. In the first campaign his general Bacchides established Alcinous in the highpriesthood (1 Macc. vii, 5-20); but the success was not permanent. Alcinus was forced to take refuge a second time at the court of Demetrius, and Nicanor, who was commissioned to restore him, was defeated in two successive engagements by Judas Maccabeus (1 Macc. vii, 81, 82, 43-45), and fell on the field (see Michaelis on 1 Macc. vii, 32, against Wernsdorf, De fide Maccab. p. 124 sq.; also Joseph. Ant. xii, 10, 2). Two other campaigns were undertaken against the Jews by Bacchides (B.C. 103-108); but in the mean time Judas had completed a treaty with the Romans shortly before his death (B.C. 161), which forbade Demetrius to oppress the Jews (1 Macc. viii, 31). Not long afterwards Demetrius further incurred the displeasure of the Romans by the expulsion of Ariarathes from Cappadocia (Polyb. xxxi, 20; Justin, xxxi, 1), and he alienated the affections of the Romans by his private excesses (Justin, l. c.; comp. Polyb. xxxiii, 14). When his power was thus shaken (B.C. 152), Alexander Balas was brought forward, with the consent of the Roman senate, as a claimant to the throne, with the powerful support of Ptolemy Philometor, Attalus, and Ariarathes. Demetrius was not in time to secure the services of Jonathan, who had succeeded his brother Judas as leader of the Jews, and now, from the recollection of his wrongs, warmly favored the cause of Alexander (1 Macc. x, 1-6). The rivals met in a decisive engagement (B.C. 150), and Demetrius, after displaying the greatest personal bravery, was defeated and slain (1 Macc. x, 46-50; Joseph. Ant. xiii, 3, 4; Polyb. iii, 5). In addition to the very interesting fragments of Polybius, the following references may be consulted: Justin, xxxiv, 3; xxxv, 1; Appian, Syr. 46, 47, 67; Livy, Epit. xivii; Euseb. Am. Chron. p. 165. He left two sons, Demetrius, named Nicator, and Antiochus, called Sidetes, both of whom subsequently ascended the throne. See ANTIQUUS.

Tetradrachm (Attic Talent) of Demetrius I. Oboeae: Head of Demetrius to the right. Reverse: Inscription in Greek, "Of king Demetrius Soter," in the field, monogram and M1; in exergue, ΔΡ (Dr of Ar. Seleucia); seated female figure to the left, with sceptre and cornucopia.

2. DEMETRIUS II, surnamed NICATOR (Nικατωρ, "the Victor" so on coins, Eckhel, iii, 229 sq.; else-where Nicaton), king of Syria, was the elder son of Demetrius Soter, preceding. He was sent by his father to the assistance of his brother Alexander, who was engaged against a force of Cretan mercenaries (Justin, l. c.; comp. 1 Macc. x, 67), and aided by Ptolemy Philometor (1 Macc. x, 19; Dio. 86. 9. 33, xii, 1), whose daughter Cleopatra was promised to him, he made a descent on Syria (B.C. 148 or 147), and was received with general favor (1 Macc. x, 67 sq.). Jonathan, however, still supported the cause of Alexander, and defeated Apollonius, whom Demetrius had appointed governor of Cilicia-Syria (1 Macc. x, 74-82). In spite of these hostilities, Jonathan succeeded in gaining the favor of Demetrius when he was established in the kingdom (1 Macc. xi, 23-27), and obtained from him an advantageous commutation of the royal dues and other concessions (1 Macc. xi, 32-37). In return for these favors the Jews rendered important services to Demetrius when Tryphon first claimed the kingdom for Antiochus VI, the son of Alexander (1 Macc. xi, 42); but afterwards, being offended by his faithless ingratitude (1 Macc. xi, 58), they espoused the cause of the young pretender. In the campaign which followed, Jonathan defeated the forces of Demetrius (B.C. 144; 1 Macc. xii, 26); but the treachery to which Jonathan fell a victim (B.C. 140) again altered the policy of the Jews. Simon, the successor of Jonathan, obtained very favorable terms from Demetrius (B.C. 142); but shortly afterwards Demetrius was himself taken prisoner (B.C. 138) by Arses (q. v.) VI (Mithridates), king of Parthia, whose dominions he had invaded (1 Macc. xiv, 1-8; Justin, xxxvi; Joseph. Ant. xiii, 5; Livy, Epit. iii). Appian and Justin place this captivity of Demetrius before the revolt of Tryphon, but the order of the narrative in the latter seems more probable (Justin, xxxvi, 9). Demetrius was treacherously assassinated (B.C. 135) by his vassal, Rhodogena in marriage (Appian, Syr. 67); and after his death, though Demetrius made several attempts to escape, he still received kind treatment from his successor, Phraates. When Antiochus Sidetes, who had gained possession of the Syrian throne, invaded Parthia, Phraates employed Demetrius to effect a diversion. In this Demetrius succeeded, and when Antiochus fell in battle he again took possession of the Syrian crown (B.C. 128). Not long afterwards a pretender, supported by Ptolemy Physcon, appeared in the field against him, and after suffering a defeat he was assassinated, according to some by his wife Cleopatra (Appian, Syr. 68), while attempting to escape by sea (Justin, xxxix, 1; Joseph. Ant. xiii, 9, 3). See CLEOPATRA.

3. DEMETRIUS III, surnamed ECCERUS (Εκκερος, 1. e. "the Opportunist") on coins THEOS PHILOPATOR and Soter (Eckhel, iii, 245, 246), king of Syria, was the fourth son of Antiochus Grypus, and grandson of Demetrius II. During the civil wars that followed the death of his father, he was set over his brother, King Demetrius, or Cilene-Syria, by the aid of Ptolemy Lathy- rhus, king of Cyprus; and after the death of Antiochus Eusebes, he and his brother Philip for a time held the whole of Syria (Josephus, Ant. xiii, 13, 4). His assistance was invoked by the Jews against the tyranny of Alexander Jannaeus (q. v.); but, though he defeated this prince in battle, he did not follow up the victory, but withdrew to Beroea. War immediately broke out between him and his brother Philip; and Strator, the governor of Beroea, who supported Philip, having obtained assistance from the Arabians and Parthians, blockaded Demetrius in his camp, until he was compelled by famine to surrender. At this time he was sent as a prisoner to Mithridates (Araeac IX), king of Parthia, who detained him in an honorable captiv-
DEMETER

Demetrius, bishop of Alexandria, is said to have succeeded Julian in that see A.D. 198 (Eusebius, H. E. v. 22). He was at first the friend of Origen, and committed the instructions in the school of Alexandria entirely to him (Eusebius vii. 3); but he afterwards, "overcome by human infirmity" (Eusebius, vi. 8) seems to have become envious of Origen, and his enemy. When Origen (A.D. 295) was appointed presbyter at Caesarea, Demetrius excluded him from the Church — an act which was not recognized by the churches generally. Demetrius died about 248.—Mosheim, Commentaries, cent. iii. § 30. See ORIGEN.

DEMOCRITUS (Δημοκρίτης), a Philosopher, the most notable of the so-called "Atoms" of the 4th century B.C., is said to have been born at Abdera in Thrace, where he died in 270 B.C. He is said to have been the teacher of Epicurus, and to have been the first to theorize on the atomistic principle. He is also said to have been a student of Plato and of Zeno.
in 1832, and became associate pastor with Rev. Dr. Schäffer of St. Michael's and Zion's churches, where he continued to labor for thirty-seven years with great fidelity and success. Worn out by great labors, for several years before his death he was unable to perform any active duties in the ministry. He died Sept. 1, 1863. Dr. Deane was a man of enlarged culture, an accomplished scholar, and a prince among preachers. As a pulpit orator he was not surpassed by any of his contemporaries. Illustrating in his life the power and blessedness of the Gospel, he brought to the service piety and learning, and made the ministry of the Word the grand aim of his life, with which no other pursuit was allowed to interfere. In 1839 he was elected to the professorship of the Theological Seminary, Columbus, Ohio, and in 1849 was appointed professor in the seminary at Gettysburg, but both positions he felt it his duty to decline. He was a member of the American Philosophical Society, and was honored with the doctorate of divinity from the University of Pennsylvania. He edited in German the works of Josephus, carefully comparing the translation with the original, and adding a large number of notes.

Demon: Demoniac. See Demon; Demoniac.

Dem'phon (Δημόφων), a Syrian general or military governor in Palestine under Antiochus V. Eupator (2 Macc. xii, 9).

Dempster, John, D.D., an eminent Methodist minister and promoter of theological learning in the Church, was born Jan. 2, 1794, in the town of Florida, N. Y. His father, the Rev. James Dempster, was a Scotchman, educated at the University of Edinburgh, and, though bred a Presbyterian, was received by Mr. Wesley as one of his colaborers, and sent by him as a missionary to America. He preached for a season in the city of New York, but for some reason became disconnected from Mr. Wesley's service, and was afterwards a pastor of a Presbyterian church in the town of Florida till his death in 1808. The son was too young to profit intellectually from his father's training, and grew up ignorant almost of books till his conversion at a Methodist camp-meeting in 1812, when he began a course of sedulous and systematic study, which he kept up during his whole life. In 1816 he entered the Baptist ministry of the Baptist Episcopal Church, and his subsequent appointments, as stated in the Minutes, were as follows: 1816, St. Lawrence, Lower Canada District; 1817, Paris, New York; 1818, Watertown; 1819, Saco; 1820, superannuted; 1821-22, Watertown; 1823, Homer; 1824, Auburn; 1825-26, Rochester; 1827-28, Canajoharie; 1829-32, Cayuga District, Oneida Conference; 1833-35, Black River District; 1836-41, Missionary to Buenos Ayres; 1842, Vestry Street, New York; 1843-44, Mulberry Street; 1845-54, professor in Biblical Institute, Newbury, N. H.; and Concord, N. H.; 1855-63, professor in Garrett Biblical Institute, Evanston, III. "His fields of labor were extremely diverse, and yet he occupied every one of them with marked success. From the borders of Canada on the north, to St. Augustine, Fla., on the south, whither he went in 1865, primarily in search of health, and thence to Buenos Ayres, in South America; from New England on the east to Illinois on the west, his name has, during the last half century, been familiar to the good, and associated with active labors for the promotion of the cause of Christ." By incessant labor he made up largely the deficiencies in his early education, acquiring the Latin, Greek, and Hebrew languages, and a fair amount of general culture. His mind, naturally metaphysical, turned especially to questions of philosophical theology, such as the divine nature and government, the will, etc. and on these topics he both spoke and wrote with great success. But the great work of his life was the organization of theological seminaries in the Methodist Episcopal Church. After eighteen years of labor, he saw two of these (Concord and Evanston) in full operation, largely at the fruit of his own industry, energy, and perseverance. He died Nov. 28, 1865, at Chicago. As a preacher he was at once simple, stirring, and profound. He seized with a master hand upon the great cardinal truths of revelation and providence, and wielded them with equal application to the judgment and the conscience. He left many MSS., especially a work on the will; but, thus far, all that has been published in permanent form is his Lectures and Addresses (Cincinnati, 1864, 12mo). See Appendix to his Lectures; Minutes of Conferences, 1864, p. 148; Methodist Quarterly Review, July, 1864; Stevens, History of the Methodist Episcopal Church, vol. iii.

Dempster, Thomas, a Scotchman of much miscellaneous erudition, was born at Muiresk, Ayrshire, about the year 1579. He studied at Cambridge, went to Paris, and obtained a temporary professorship in the College of Beauvais, where he manifested a very quarrelsome temper. He was afterwards professor at Pisa and Bologna, near which city he died, Sept. 6, 1625. Among his works is a Historia Ecclesiastica Gentis Scotorum, "a work in which his desire to magnify the merits of his country often induced him to forge the names of persons and books that never existed, and to unscrupulously claim as Scotchmen writers whose birth-place was doubtful."—New Gen. Dictionary, iv, 339.

Den, the rendering in the Auth. Ver. of the following Heb. and Greek words: $\pi\nu\nu\nu\nu$ $\mu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\nu\n
DENARIUS

In Dan. vi, the "den (Chald. דן, ḡōb, a pit; Sept. Δάνης; Vulg. laurus) of lions" is repeatedly named as a peculiar measure of punishment for state offenders at Babylon. This usage, although not mentioned by any other ancient authority, has received remarkable confirmation (see "Truths of Revelation demonstrated by an Appeal to Monuments," etc., "by a Fellow of seven learned Societies," Lond. 1861) from certain remains discovered in that region by modern travellers (Kitto, Fict. Bible, note on Dan. vi. 15), especially one on a block of white marble found near the tomb of Daniel at Susa, and thus described by Sir R. K. Porter in his Travels in Persia (ii, 416): "It does not exceed ten inches in width and depth, measures twenty in length, and is hollow within, as if to receive some deposit. Three of its sides are cut in bas-relief, two of them with similar representations of a man apparently naked, except a sash round his waist and a sort of cap on his head. His hands are bound behind him. The corner of the stone forms the neck of the figure, so that its head forms one of its ends. Two lions in sitting posture appear on either side at the top, each having a paw on the head of the man." See LION.

Denarius (διώραυς), the principal silver coin of the Romans, which took its name from having been originally equal to ten times the "as" (Pliny, xxxiii, 12), which was the unit. See Farthing. It was in later times (after B.C. 217) current also among the Jews, and is the coin which is called "a Penny" (q. v.) in the Bible. The denarii were first coined in B.C. 269, or four years after the first Punic War, and the more ancient specimens are much heavier than those of later date (Böhkh, Metrol. Univers. p. 299, 469). Those coined in the early period of the Commonwealth have the average weight of 60 grains, and those coined under the empire of 59.5 grains. With some allowance for alloy, the former would be worth 8.6254 pence, or 17 cents, and the latter 7.5 pence, or 15 cents. It has been supposed, however, that the reduction of weight did not take place till the time of Nero; and, in that case, the denarius mentioned in the Gospels must have been of the former weight and value, although the equivalent of the Greek διήροιας (Pliny, xxxi, 109), or about 15 cents, is the usual computation (see Wurm, De ponder. mensur., p. 54). A denarius was the day-wages of a laborer in Palestine (Matt. xx, 2, 9, 13; Tobit v, 15); and the daily pay of a Roman soldier was less (Tacitus, Ann. i, 17). In the time of Christ the denarius bore the image of the emperor (Matt. xxii, 19; Mark xii, 16), but formerly it was impressed with the symbols of the republic.

The name of this coin occurs in the Talmud, in the form מ"ש (see Light-foot, at Matt. xx, 2). Pliny speaks of a golden denarius (Hist. Nat. xxxiii, 13; xxxiv, 17; xxxvii, 5; so also the Mishna, Kiddush, ii, 2, etc.), which was of the average weight of 120 grains, and was current for 25 of the silver coin. In later times a copper coin was called denarius. It has seven its representative in the modern Oriental disar. See Greave, Roman Foot and Denarius (Lond. 1847); Basche, Lex. Rom. Numarum, ii, i, 188; Pinkerton, Essay on Medals, i; Ackerman, Catalogue of Rom. Coins (Lond. 1834), i, 15–19; and the essays De denario censeus, by Christierna (Upsal. 1792) and Mayer (Gryph. 1702). See Money.

Dendera. See Dink.

Denderah (Gr. Τεντηρά; Coptic Tentiw, probably from Tri-a-Author, the abode of Athor), a ruined town of Upper Egypt, situated near the left bank of the Nile, in lat. 26° 18′ N., long. 32° 49′ E. It is celebrated on account of its temple, dating from the period of Cleopatra and the earlier Roman emperors, and one of the finest and best preserved structures of the kind in Egypt. The principal temple measures 220 feet in length by about 50 in breadth, and has a noble portico supported on 24 columns. The walls, columns, etc., are covered with figures and hieroglyphics. Prominent among the former is that of Athor or Aphrodite, to whom the temple was dedicated. On the ceiling of the portico are numerous mythological figures arranged in zodiacal fashion, which

Roman Denarii of the time of the Republic, now in the British Museum (actual size; weight of the first, 60.6 grains; of the second, 58.9).
DENIAL

DENIAL OF CHRIST (Luke xii., 9). See Peter.

DENIS, the French name for Dionysius (q. v.).

DENIS or DENYS, St., the so-called apostle of France and first bishop of Paris, is said to have been sent from Rome about 250 A.D. to preach the Gospel to the Gauls. After delays from persecutions brought on him by his zeal at Arles and other places, he arrived in Paris, where he made many proselytes. Pascennius or Sicinnius Lescennius, who was then the Roman governor of this part of Gaul, ordered Denis to be brought before him, along with other two Christians, Rusticus, a priest, and Eleutherius, a deacon. Finding them firm in their faith in spite of torture, Pascennius caused them to be beheaded, A.D. 272; or, as others say, A.D. 290. Gregory of Tours, Fortunatus, and the Latin martyrologists state that the bodies of the three martyrs were thrown into the Seine, but were recovered by a pious woman, and buried near the place where they lost their lives. Their successor relics, in silver caskets, were afterwards taken to the abbey of St. Denis (see below). The Acts of St. Denis, written about the end of the 7th or beginning of the 8th century, is founded upon popular traditions, and the best historians of France hold that nothing can be certainly known of either the time or the place of the martyrdom, or of the genuine relics of the St. Denis, St. Denis was for a long time confounded with Dionysius the Areopagite (q. v.). He is honored as a saint in the Roman Church on the 9th of October. His name was the war-cry of the French soldiers, who charged to the cry Montjuge St. Denis—Hoefer, Nouv. Biog. Générale, xiii, 674. See DIONYSIUS THE AREO-

OPAGITE.

2. The ABBEY of St. DENIS, near Paris, named from the tradition that Dionysius the Areopagite was buried there. The abbey was founded by Dagobert 1, king of France, A.D. 613. The vaults of the church of St. Genevieve, connected with the abbey, contained (before the French Revolution) the bodies of 28 kings, 10 queens, 84 princes and princesses, and those of Bernand of Guiscin and Turenne. In 1793 a mob, headed by the Jacobins, destroyed the abbey and carried away the contents of the vaults to the nearest cemetery. The abbey was restored in 1806, and after the Restoration Louis XVIII caused such of the remains as could be found to be restored. There is still at the abbey of St. Denis a chapter of St. Dionysius Areopagite, composed of the grand almoner (primicerie), 10 canons of the first class (archbishops and bishops aged over 60), and 24 canons of the second class.—Prier, Universel-Lexicon, s. v.

DENIS, MICHAEL, a German Jesuit, was born at Schärding, on the Inn, Sept. 27, 1729. He entered the order of the Jesuits in 1747, and was ordained priest in 1756. In 1759 he was appointed professor at the Collegium Theresianum at Vienna, and in 1778 librarian of the library of Garelli. After the suppression of the Collegium Theresianum in 1784, the emperor Joseph II appointed him second "custos" and aulic councillor. He died Sept. 29, 1800. Denis was in friendly relations with Klopstock and other prominent scholars of Protestant Germany, and was esteemed for his amiable character and for his efforts in behalf of German literature. He became especially known by his attempt to imitate the poetry of the ancient bards; but his poems were more admired for their noble sentiments than their poetical value. He also wrote several philosophical works, and a Latin elegy on the downfall of his order (Fatuma Jesualtimore). A posthumous autobiography of Denis was published, together with other posthumous writings, by Reizer (Eitermacher Nachlass, Vienna, 1801-1802).—Alym. Real-Encyklop. iv, 285.

DENK, JOHANN, an Anabaptist of the 16th century.

Nothing is known of his early years. In 1521 he was in Basle, and in 1523 at Nurnberg, as rector of the school of St. Sebalda. He rejected infant baptism, and pronounced anti-trinitarian ideas. He was brought before the council of Nurnberg, and, being unable to defend himself, was expelled from the city for life. We next find him in Augsburg in the year 1526, where he wrote and edited his book Gerecht Gottes. In 1528 he came to Strasbourg, where he seems first to have become acquainted with Louis Heter (q. v.). Their connection resulted in the publication of an edition of the Old Testament prophets. It was published in 1527 at Worms, and Luther speaks favorably of the translation as such. Denk's theological errors soon came to be known, and he was subjected to a public disputation by the clergy of Strasbourg. Bucer was his principal opponent, and based his charge, that Denk's teaching made sin in a mere empty sound, upon the book vom Gerecht Gottes. Denk was defeated and driven from the city. After a few months spent in travelling, during which he ventured to revisit Nurnberg, he went to Basle, where he died of the plague in November, 1527. In his doctrines he was an Anabaptist and anti-trinitarian, and the following dogmas were peculiar to him. He taught an internal word which, as the power of the Highest, produces knowledge and love in man; that salvation is not connected with the Holy Scriptures in the law, under which he comprehends the entire Scriptures, is opposed to the spirit; the sacraments are of a subordinate and superfluous character to believers; the wicked are finally to be saved, etc. Ranke (Reformation, iii, 559, cited by Hardwick, Oh. Hist., ii, ch. v) gives the following statement of Denk's views: "The basis of his doctrine is, that God is love, which, he said, flesh and blood could never have understood had it not been embodied in certain human beings, who might be called divine men, or the children of God. But in one of them love was supremely exemplified—in Jesus of Nazareth. He had never stumbled in the path marked out by God; he had never lost his union with God; he was a sav-

our of his people, for he was the forerunner of all those who should be saved. This was the meaning of the words that all should be saved by Christ." His followers were called Demonicci, because they named seven evil spirits to their candidates for baptism, which they were supposed to possess, and which would come up, while seven good spirits would be received in their stead.—Hersong, Real-Encyklopädie, xix, 403; Trechsel, Protest. Antitrinitarier, i, 17 sq.; Thes. Stud. u. Kritiken, 1851, p. 121, 412.

DENMARK, a kingdom in Europe, with an area of 14,731 square miles, and in 1880 (according to the cen-
DENMARK

1,968,039 inhabitants in Denmark proper, and 127,342 in its dependencies.

I. Church History. — Willebrord is said to have been the first Christian missionary in Denmark (8th century), but he was not able to establish any permanent mission. Charlemagne extended the territory of Christianity to the frontier of Denmark, and his son, the emperor Louis, sent archbishop Eddo of Rheims as his ambassador to King Harold Klak, who had requested his aid. Eddo established a missionary school in Holstein. King Harold, who had been deprived of his throne, was baptized in 826, with his family and many of his countrymen, and soon after Ausgar (q. v.) was placed at the head of the Danish mission. Through his labors Christianity got a firm footing, but had still to struggle for about 150 years with paganism, until Canute the Great (1019-35), completed the Christianization of the entire country. The last stronghold of paganism, the island of Bornholm, was converted about 1060. The bishoprics which were established in Denmark were subordinate to the archbishop of Bremen until the 11th century, when a new archiepiscopal see was established for the north at Lund. The first bishops appointed in Denmark were Englishmen, and English influence prevailed until the 12th century, when Denmark allied herself more closely to France. In the following century French influence was supplanted by German. Convents were very numerous, but the enforcing of celibacy cost the pope more trouble in Denmark than in any other country. Until the 12th century the clergymen were generally married. In 1222 a papal legate came to Denmark to carry through the introduction of celibacy. Several hundred priests then appealed from the pope to a general council, but a national synod aided the legate in accomplishing his purpose. On the whole, Denmark was but little affected by the great ecclesiastical movements of the Middle Ages. The Inquisition remained almost unknown. Protestant ministers were called to Denmark as early as 1520, but the bishops, whom...

DENOMINATIONS, THE THREE

their wealth made almost independent of the king, opposed the Reformation. King Frederick I declared himself in 1526 in favor of Protestantism, yet the Diet of 1526 was not favorable. The king then gave the crown churches equal rights with the Roman Catholics. The Lutheran Church obtained a complete victory under Christian III, who in 1536 deposed the hostile bishops, called Bugenhagen (q. v.) to Denmark to reorganize the Danish Church on an evangelical basis. Not long after their arrival they formed the Lutheran Church, and for more than a hundred years the exercise of any other religion was forbidden. The Danish Church did not produce any symbolical books of its own, but adopted the Confession of Augsburg of 1530, and the smaller Catechism of Luther, which, with the three confessions of faith of the ancient Church, are regarded as the symbolical books of the Danish Church. The subsequent development of the Danish Church was a reflection of that of Germany, including also the Rationalism of the 18th century. Yet in that very century Denmark was a model for all Europe by its zeal for foreign missions. See EDERE. A powerful reaction against the rationalism of the Enlightenment commenced in 1786, under Grundtvig and Dr. Rudolph. Some years after Grundtvig became the leader of a Low-Church evangelical party, and Rudolph of the High-Church Lutheran party. The strife between these two parties still divides the Church. The party headed by Grundtvig inclines towards the Congregational principles, and has that intensity which may be induced to separate altogether from a connection with the state. Only a very limited toleration was granted to members of dissenting denominations in Denmark until 1818. In a few cities only (Copenhagen, Fredericia, Kolding, Lickestaad, Aalona) equal rights were granted to dissenters; but all restrictive laws were repealed in 1848 for Denmark proper, and the number of dissenters has since considerably increased. In 1850, Denmark was visited for the first time since the 16th century by a Roman bishop, who met, on the part of the king, with a friendly reception. According to the new Constitution of 1866, the Lutheran Church is the state church, and the king must belong to it; but otherwise there is an absolute liberty for all religious sects.

II. Constitution.—The first constitution of the Protestant Church of Denmark was drawn up by a committee, then revised by Luther and the other theologians, and published in 1536. It is the basis of the establishment of the Church, in 1537. The code of 1698 made the king the supreme head of the Church, with almost absolute powers. The king exercises ecclesiastical jurisdiction through the bishops, all of whom are equal in rank, though the bishop of Zealand is considered primus inter pares, as he has the most extensive diocese and prerogative of crowning the king. Every bishop has under him several provosts, who have each the superintendence of a district, which they visit once a year. They are elected by the pastors of the district, and confirmed by the bishop. The provosts have the right to summon the clergy to court. A general clause in the ecclesiastical constitution of Denmark took place in 1748, in consequence of the political revolution of that year. Full religious liberty was granted to all denominations, and the right of self-government was promised to the Established Church. The diets of Denmark have ever since been occupied with the discussion of various drafts of a new Church Constitution, but the greatest is the divergence of religious parties, that as yet (1868) the reconstruction of the Church on the basis of self-government has not been accomplished. The principle of religious liberty, in the mean while, has worked so beneficially that the clergy and laity of all parties are much better off now than in the days of the old regime. When, in 1856, the ministry solicited the opinions of the diocesan synods concerning the abrogation of compulsory baptism, they generally advocated it.

III. Worship.—The first liturgy (altar-book) of the Danish Church was elaborated in 1536 by bishop Paludate. By order of king Christian V, a ritual, regulating the entire Divine service, was issued in 1600, and soon after, in connection with a new edition of the altar-book, was prescribed for general use. Towards the close of the 18th century, a new liturgy, entirely pervaded by rationalistic views, was drawn up, but its introduction, notwithstanding the prevalence of Rationalism among the clergy, was regarded as dangerous. Yet the ecclesiastical authorities connived at any deviation from the formulaires which individual clergymen saw fit to make. A new draft of a liturgy was published in 1889 by bishop Mynder, but general uniformity in external worship has never been restored. A considerable party among the clergy is against the principle of binding the whole Church to one liturgy, and in favor of extensive liberties of individual congregations. In the duchy of Sleswick a rationalistic liturgy was drawn up in 1797 by the superintendent general Adler, and at first generally introduced, yet soon its use was left to the option of the congregation. In Holstein, liturgics which strictly adhere to the Lutheran theology have always been, and are still in use.

IV. Statistics.—(1.) The Lutheran Church, or, as it is now (since 1849) officially called, the People's Church, has 9 bishops, viz. 4 for the islands, 4 for Jutland, and 1 for Iceland. Every bishopric is divided into a number of provostships. The number of provosts amounts to 505 for Denmark and 210 for Iceland. A theological faculty is connected with the University of Copenhagen. Among the periodicals, we mention the Danish Church Gazette, the organ of the (Low-Church) party of Grundtvig. A Danish missionary society was established at Copenhagen in 1821, and sustains a mission in India. (2.) Other denominations. According to the census of Feb. 1, 1880, there were in that year in Denmark proper 17,526 souls not belonging to the state church in a total population of 1,069,009. viz.: Jews, 3946; Moronians, 1722; Baptists, 3667; Reformed, 1858, Roman Catholics, 2585; Anglicans, 114; 1866 members of the Apostolic Church; 162 of the Free Lutheran Church; and the remainder, in small numbers, is divided among several other sects. The Baptists had in all Denmark in 1889, 21 churches and 2572 members. The Reformed Church has, according to an article of one of the Danish bishops in Herzog's Real Encycloep. only 106 souls in Denmark proper. The Methodist Episcopal Church has a flourishing mission in Copenhagen, under the charge of pastor Willerup, whose labors there (since 1858) have been very successful. An elegant Methodist Episcopal Church has just been erected in that city, and has a large congregation; in 1888 it had 356 members, and had appointments in fourteen other towns; the Methodist Sunday-schools had 2188 children, and the publication of a weekly Sunday-school paper has been commenced. The Roman Catholics have two periodicals (the Scandinavium Church Gazette and a political paper) and an establishment of the Sisters of Charity at Copenhagen. There were in 1889 seven congregations of Lutheran seceders, with one periodical (Oversand).—Hertzog, Real Encyclopaedie, i.ii, 580 (art. by the Danish bishop, Dr. Englestoft). See Pontoppidan, Annales ecclesiae Dan. diplom. Copenhagen, 1741); Munter, Kirchengeschichte von Dänemark und Norwegen (Leipsic, 1825); Wigger, Kirchener Nachrichten, ii, 573; Aaborg, Ecdes. Forl. Copenhagen, 1859, p. 152 and 211, and Ecclesiastical Almanac for 1868.

Denominations, The Three, the designation of an association of dissenting ministers residing in London, or having that neighborhood, belonging to the Presbyterian, Independent, and Baptist denominations. It is usually known as The General Body of Protestant Dissenting Ministers of London and Westminster.
star. At its first proceedings included loyal addresses to the throne. Dr. Calamy preached in 1731 the first sermon to ministers in Dr. Williams's library. In Redcross Street; and this concio ad clericum continued for several years. Every congregation of Protestant dissenters, Presbyterians, Independents, and Baptists, in every street, was five miles of ministers and deponents two deputies. Since 1737 the election has regularly taken place, and the committee have unremittingly watched over bills brought into Parliament in any way affecting dissenters, kept alive an interest in behalf of the repeal of the Test and Corporation acts, supported every measure which promised to be beneficial in extending and consolidating religious liberty, and successfully exerted themselves in protecting individual ministers and congregations against those molestations to which they have been exposed on the part of bigoted and persecuting churchmen.

Dens, Peter, a Roman Catholic theologian, was born in 1690 at Boom, in Belgium. "Apparently nothing is known—least by Protestant writers—regarding the incidents of his life, as his name appears in no encyclopedia or biographical dictionary that we are acquainted with. The scanty information we possess is derived from the epitaph inscribed on his tomb in the chapel of the archiepiscopal college of Malines by the present (1857) rector. From this epitaph it appears that he was reader in theology at Malines for twelve years, and was, for a short time, pensioned at the University of Louvain. He was afterwards a professor of theology at the Cloister of Saint Rembold, or Rombold's Church in the same city, and president of the College of Malines for forty years. He also held various honorific church offices. He was canon and penitentiary, synodical examiner and scholastic architect of St. Rembold—i.e., the metropolitan church of Belgium. He died February 15, 1779, in the eighty-fourth year of his age. The work which has rendered Dens's name familiar, even to the Protestant public, is his Theologia Moralis et Dogmatica (new ed. Dublin, 1832, 8 vols. 12mo). It is a systematic exposition and defense—in the form of a catechism—of every point of ethics and doctrine maintained by Roman Catholics, and is extensively adopted as the text-book of theology in their colleges. It appears to owe its popularity more to its being a handy compilation than to any great talent exhibited by its author" (Chambers, Encyclopedia, a. v.). A synopsis of the work by Dr. J. F. Berg, with copious notes illustrating the dangerous tendency of the Romanist moral theology, was published in 1840 (Philadelphia), and passed through repeated editions.

Decodatus, Pope. See DEUSDEMET.

Deontology (δέοντες, what is due or binding: and λόγος, discourse). We take the following citations on the use of this word from Fleming, Vocabulary of Philosophy (Phila. 1800). s. v.: "Deontology, or that which is proper, has been chosen as a fitter term than any other which could be found to represent, in the field of morals, the principle of utilitarianism, or that which is good (Bentham, Deontology common to all the Systems of Morals). On the other hand, Whewell (Preface to Mackintosh's Preface. Dissert. p. 30) says that "the term deontology expresses moral science, and expresses it well, precisely because it signifies the science of duty, and contains no reference to utility." Deontology involves the being bound or being under obligation, the very idea which duty does not include. The ancient Pythagoreans defined virtue to be "Eik on eikocrat (that is, the habit of duty, or of doing what is binding), the oldest definition of virtue of which we have any account, and one of the most unexceptionable which is yet to be found in any system of philosophy" (S Phương, "Moral and Moral Philosophy", 87). Sir W. Hamilton observes that ethics are "well denned deontology" (Reid's Works, p. 540, note).

Dependence, feeling of, the essence of religi-

ion, according to Schleiermacher. See SCHLEIER-
macher.

Deposit (διέκοσμον, píktodon), something placed in trust; "store", Gen. xii, 36; "delivered", Lev. vi, 2, 4; Sept. παραθέτων [so in 2 Tim. 1, 12], or παρακαταθέν [see Grindel, N. T. Hierarchism, p. 1146]; Volg. de-
positum. The arrangement by which one man kept at another's request the property of the latter until he demanded it back (Exod. xxii, 7), was one common to all the nations of antiquity (Sir W. Jones, Law of Sail-
ments, in his Works, vii, 448); and the dishonest dealing with such trusts is marked by profane writers with extreme reprobation (Herod. vi, 86; Juvenal, xiii, 199, etc.; Joseph. Ant. iv, 8, 38; War, iv, 8, 7), a view which is likewise taken by Clemens Alexandrinus (Strom. vi, 749). Chrysostom (Exod. i, 14), p. 640), and others (Rawlinson, Herod. iv, 477, note). Even our Saviour seems (Luke xvi, 12) to allude to conduct in such cases as a test of honesty. In later times, when no banking system was as yet devised, shrines were often used for the custody of treasure (2 Mac. iii, 10, 12, 15; Xenoph. Anab. v, 8, 7; Cicero, Legg. ii, 16; Plutarch, Les. c. 18). Among the agricultural people, the exigencies of war and other causes of absence must often have rendered a temporary deposit, especially as regards animals, an owner's only course of safety. See TREASURY. Nor was the custody of such property burdensome, for the use of it was no doubt, so far as that was consistent with the welfare of the community, committed to the depositary, who office also no one was compelled to accept. The articles specified by the Mosaic law are, (1) "money or stuff;" and (2) "an ass, or an ox, or a sheep, or any beast." The first case was viewed as only liable to loss by theft (probably for loss by accidental death) and, if the possessory came into the hands of the thief, if found, was to pay double, i.e., probably to compensate the owner's loss, and the unjust suspicion thrown on the depositary (comp. Goechen, Vorles. u. Dichterlehre, ii, ii, s. 815). If no theft could be proved, the depositary was to swear before the judges that he had not appropriated the article, and then was quit (comp. Schwarzer, Röm. Privatrecht, p. 370). In the second, if the beast were to "die, or be hurt, or driven away, no man seeing it"—accidents to which beasts at pasture were easily liable (comp. B. 1 Chron. v, 21)—the depositary was to purge himself by a similar oath. (Such oaths are probably alluded to in Heb. vi, 16, as "an end of all strife". In case, however, the animal were stolen, the depositary was liable to restitution, that is, probably to pay double for the prevention of theft (kalikul, Exod. p. 419). See DAMAGIA. If it were torn by a wild beast, some proof was easily producible, and in that case, no restitution was due (Exod. xxii, 7-13). The Jewish commentators make various distinctions on this enactment (see Rosennüller, in loc.). In case of a false oath so taken, the person who being under obligation, was "to add the fifth part more thereto," to compensate the one injured, and to "bring a ram for a trespass-offering unto the Lord" (Lev. vi, 5, 6). In the book of Tobit (v, 3) a written acknowledgment of a deposit is mentioned (i, 14 [17]; iv, 20 [21]). This, however, merely facilitated the proof of the fact of the original deposit, leaving the law untouched. The Mishna (Baba Mezia, c. iii; Shebuth, v, 1) shows that the law of the oath of purification in such cases continued in force among the later Jews (Michaelis, Mos. Recht, ch. 102). See Smith's Dict. of Class. Antiq. s. v. Depositiun. The word is the name of a deposit, a place of deposit, or a place where depositum, the Institutes, iii, tit. xiv, 3; comp. iv, tit. vii, 17, 28. (See Sandars, p. 429, 540, 543; Vinnius, p. 815, 818.) A deposit, in Athenian law, was likewise called παραθέτουσα (Demaesthenes, pro Phron. Orator. Attic. Bekker, Oxon. vi, 1942). Comp. the λόγος τραπεζι-
tes in Isocrates (Or. Attic, Bekker, Oxon. ii, 515-538). Comp. FLEUX.
Deposition (1.). In the ecclesiastical law of the Roman Church, is the depriving a priest of the privileges, and forbidding him to perform the duties of his function, but not depriving him of orders. According to the ancient discipline, the deposed person lost not only his office and benefice, but also forfeited the privileges of his rank, and was reduced into the laity. But since the 12th century, this extended meaning of the term has been expressed by the word degration (q. v.). At a later date, distinction was also made between verbal and the more solemn degradation. The latter was accompanied by the loss of the privileges of clerical and layman, but the privilege of having a reinstallation might be held out, or otherwise. In the former case it was termed privation. In the deponent perpetuum, a simple judgment of the competent authority deprives the guilty party forever of his privileges, his jurisdiction, and his benefice, but he is still regarded as belonging to the clergy. The crimes which were punished in this manner are murder, perjury, incest, adultery, etc. Deposition, being an act of jurisdiction, can be inflicted by any diocesan bishop who has been confirmed by the Pope, even though he be not consecrated. At the present day deposition cannot be inflicted by the superior (the Pope, the Vicar, or the bishop). The reasons are concerned, without the consent of the secular authorities.

(2.) In the Church of England, by Canon 122, sentence against a minister, of deposition from the ministry, shall be pronounced by the bishop only, with the assistance of his chancellor and dean (if they may conveniently be had), and some of the prebendaries, if the court be kept near the cathedral church; or of the archdeacon, if he may be had conveniently, and two other at least grave ministers and preachers to be called by the bishop, when the court is kept in other places.

(3.) In Scotland, the minister of a parish who has been deprived of his benefice, or deprived of the cure of his parish for immoral and scandalous conduct, or of preaching or otherwise publishing doctrines contrary to the standards of the church to which he has declared his adherence, or of contumaciously setting aside the authority of the Presbyterian church-court, may be deposed from his holy office by the church-courts. By this means he is deprived not only of his ecclesiastical dignity, but of the temporalities of his benefice (Statute 1592, c. 115), and the benefice becomes vacant just as if he were dead. He may, however, be restored to the exercise of the ministry, and to his position as a minister of the Church, by the General Assembly, but he cannot, of course, be restored to his benefice without, if he wishes it, moving a petition. The minister should be so even by a new presentation by the patron, because the stigma attached to his character by his deposition is likely to affect his usefulness. Where sentence of deposition is pronounced by an inferior church-court, the judgment of which is overruled on appeal to the General Assembly, it is held that he has never been pronounced; but if the sentence be affirmed, it takes effect from the date when it was pronounced by the inferior court, and from that date his right to the profits of his benefice ceases. Sentence of deposition cannot be pronounced by a presbytery in the absence of the minister, except by the authority of the General Assembly (Chambers, Encyclopaedia, s. v.).

(4.) The grounds of deposition in the Protestant Episcopal Church are stated in the 57th Canon of the Convention of 1828; and Canon 39 provides that, "1. When any minister is degraded from the holy ministry, he is deprived therefrom entirely, not from a higher to a lower order of the same. Deposition, displacing, and all like expressions, are the same as degradation. No degraded minister shall be restored to the ministry. 2. Whenever a clergyman shall be degraded, the bishop who pronounces sentence shall, without delay, give notice thereof to every minister and vestry in the diocese, and also to all the bishops of this Church, and where there is no bishop, to the standing committee." See Discipline.

Depravity (Lat. pravitas), the moral crookedness and corruption of man's nature. The Scriptures describe moral goodness and obedience as the pursuing of a straight or right line (hence the word "rectitude"). Depravity is the turning aside out of that straight line. It is the fault and corruption of the nature of every man that naturally attends the offspring of Adam, whereby man is very far gone (quem longissimam, as far as possible to be within reach of a recovery) from original righteousness, etc. (1st Art. of Rel. of Church of England; viz. of the M. E. Church). On the nature and extent of depravity, see Sin, Original.

Deprivation, the act of taking away from an ecclesiastical any benefice or other spiritual enjoyment which he may hold (see Canon 122 Church of England).

"In England this may be done either (1) by a sentence declaratory in the proper court, on the ground of attainder or conviction of treason, felony, or any other infamous crime, or of conviction for heresy, infidelity, or gross immorality, or for forming or trading with a contrary to law" (106, s. 81); or (2) in pursuance of divers penal statutes, which declare the benefice void for some nonfeasance or neglect, or else some malfeasance or crime, as simony; for maintaining any doctrine in derogation of the king's supremacy, or of the Thirty-nine Articles, or the Book of Common Prayer; for neglecting to read the liturgy and articles in the church, and to declare assent to the same, within two months after induction; for using any other form of prayer than the liturgy of the Church of England; for continued neglect, after order from the bishop, followed by sequestration, to reside on the benefice. In all such cases deprivation is void without any formal sentence of deprivation (Stephen's Comment, iii, 87). A bishop may be deprived of his bishopric, but cannot be deprived, the character of a bishop, like that of a priest, being indelible. The tribunal by which the bishop of Clongher was deprived in 1622 consisted of the archbishop and the other bishops of the province; and this precedent having been established, would probably be adhered to on any future occasion, notwithstanding that the archbishop alone might have full authority to deprive" (Cripps's Laws of the Church, p. 100). See Degradation; Deposition.

Deputy stands in our version as a translation of the Hebrew and one Greek text.

1. This rendering occurs in 1 Kings xxii, 47, of the כָּרָב, nisach (literally set over), or prefect, apparently constituted a shēhīk by common consent of the Edom- itish clans prior to royalty. See Dūk. It is also spoken of the "officers" or chiefs of the commissariat appointed by Solomon (1 Kings iv, 5, etc.) See Pūretan.

2. The same rendering occurs in Esther viii, 9; ix, 3, of the נָבָט, pechak (pēkhāh, a Sanscrit term, whence the modern pāka), or Persian prefect on this side the Euphrates; applied also to the "governors" of inferior rank in the Assyrian, Babylonian, and Median empires, and even to the governor of Jerusalem. See Governor.

3. Proconsul (diseaseγαρος) was the proper title of the governor of the Roman provinces when appointed by the senate. See Province. Several persons are mentioned in the Acts, viz. Sergius Paulus in Cyprus (xiii, 7, 8, 12), Galio in Achaia (xviii, 12), and the chief officer of Achaia, whose court is indefinitely referred to in ch. xix, 38, by the use of the plural (see Smith's Dict. of Class. Antiq. s. v. Proconsul). See Proconsul.

Dzerbē (Διζῆ), Acts xiv, 20, 21; xvi, 1; adj. Dizerbēs, Acts xx, 4), a small town situated in the
DERETO

DEREVISHES

eastern part of the great upland plain of Lucania, which stretches from Iconium (q. v.) eastward along the north side of the chain of Taurus (Smith's Dict. of Classical Antiquities ii. 987). This was the seat of the Cilician Gates near the place where the pass called the Cilician Gates opened a way from the low plain of Cilicia to the table-land of the interior; and probably it was a stage upon the great road which passed this way. It appears that Cleore went through Derbe on his route from Cilicia to Iconium (Apian, xii. 73). Such was Paul's route in his second missionary journey (Acts xx, 43; xvi, 1, 2), and probably also on the third (xviii. 23; xix. 1). In his first journey (xiv. 20, 21) he approached from the other side, viz. from Iconium, in consequence of persecution in that place and at Lystra (q. v.). No incidents are recorded as having happened at Derbe. In harmony with this, it is not mentioned in the enumeration of places in 2 Tim. iii. 11. In the apostolic history Lystra and Derbe are commonly mentioned together: i.e. the quotation from the epistle, Lystra is mentioned a not Derbe. The distinction is accurate, for St. Paul is here enumerating his persecutions (1st Cor. xvi. 10). In the same sentence, i.e. St. Paul's journey, he says (Acts xx, 43; xvi, 1, 2), and probably also in the third (xviii. 23; xix. 1). In his first journey (xiv. 20, 21) he approached from the other side. The boundary of these districts was not very exactly defined. The whole neighborhood, as far as the coast of Lucania (q. v.), was notorious for robbery and piracy. Antipater, the friend of Cleore (or Fama, xii. 73) was the chieftain of Lystra. Amynatas, king of Galatia (successor of Deiotarus II), murdered Antipater, and incorporated his dominions with his own. Under the Roman provincial government, Derbe was at first placed in a corner of Cappadocia (q. v.); but other changes were subsequently made. See Galatia. Derbe does not seem to have been mentioned in the Byzantine writers. Leake says (Asia Minor, p. 102) that its bishop was a suffragan of the metropolitan of Iconium. A full account of the surrounding country is given in Conybeare and Howson's Life of St. Paul, 1, 211, 290 sq. Consult also Hamilton in the Journal of the Geop. Society.

The place has been assailed as Derbe. (1.) By Colonel Leake (Asia Minor, p. 101) it was supposed to be at Bin bir-Kilisah, at the foot of the Karadagh, a remarkable volcanic mountain which rises from the Lucanian plain; but this is almost certainly the site of Lystra. (2.) In Kiepert's Map Derbe is marked farther to the east, at a spot where there are ruins, and which is in the line of a Roman road. (3.) Hamilton (Researches in Asia Minor, ii, 313) and Texier (Asia Mineure, ii, 129, 133) are disposed to place it at Dielo, a little to the N.W. of the last position, and nearer to the roots of Taurus. In favor of this view the most important fact that Steph. Byz. says that the place was sometimes called Διελος, which in the Lucanian language (see Acts xiv. 11) meant a 'juniper-tree.' Moreover, he speaks of a λιμυρ (harbor) here, which (as Leake and the French translators of Strabo suggest) ought probably to be λιμυρ (lake); and, if this is correct, the requisite condition is satisfied by the proximity of the Lake for Lusina (Chroniv. de apat. Zeiteller, p. 24) takes the same view, though he makes too much of the possibility that Paul, on his second journey, travelled by a minor pass to the W. of the Cilian Gates. On this other hand, this location seems too far from the ancient road (compare Cæsar, Notiti, ii, 292 sq). See Lucania.

Derico. See ATAROOGIS.

Derek. See TALMUD.

Derseress. THADDES Anton, a Roman Catholic divine, was born March 11, 1757, at Fahr, in Franconia. He studied theology at Heidelberg, where he began his academic career as lecturer. In 1788 he became professor of Oriental literature at Bonn, and in 1791, episcopal vicar and professor of theology at Strasburg; in 1796, professor at Heidelberg; in 1808, professor of dogmatic theology at Freiburg; and in 1815, professor of dogmatics and interpretation at Breslau, in which post he remained until his death, June 24, 1827. He was a very liberal theologian for a Romanist, and his life was not free from annoyances in consequence of his freedom of speech and writing. Besides some devotional books, his chief labor was a continuation of the Bibel-Werk of Brentano, of which Derseress did the most of the O. T. (translation and criticism), Frankfurt, 1787-1838. - Aschbach, Kirchenlexikon, ii, 316.

Derham, William, a philosopher and divine, was born at Stoughton, near Worcester, in 1657; was educated at Trinity College, Oxford; in 1685, obtained the livings of Wargrave and Upton; and, upon the accession of George I, was made king's chaplain, and a canon of Windsor in 1716. In 1730 he retired from the duties of his diocesan see. He died in 1731. He must have been somewhere between sixty and sixty-five. His principal works are, Physico-Theological, the Boyle lecture for 1711-12 (best ed. Lond. 1738, 2 vols. 8vo); Astro-Theology (London, 1717, 2 vols. 8vo); and Christo-Theology, a demonstration of the Divine authority of the Christian religion (Lond. 1730, 8vo). Of these, the first demonstrates the being and attributes of God from his works; the second "is a survey of the heavens." - Kippis, Biographia Britannica, v, 116.

Derling, Edward, a Puritan divine, born in Kent, was chosen fellow of Christ's College, Cambridge, 1598. In 1671 he secured a prebend in Salisbury. He had obtained high reputation both as a preacher and a scholar, and used his abilities and influence to great purpose against the High-Church and Romanizing party. In 1673 the privy council forbade his preaching, and in 1676 he died. The substance of his writings may be found in his Works, more at large than herefore printed (Lond. 1614, 4to). - Strype, Annals; Neal, Hist. of Puritans, i, 204, 230; Hook, Eccles. Biography, iv, 425.

Derodon, David, a Protestant French theologian and philosopher, was born at Die, in the Dauphine, about 1575. He opposed the Cartesian philosophy, and was one of the ablest dialecticians of his time. He wrote a considerable number of works in favor of the doctrines of the Roman Catholic Church, which had a wide circulation, and were translated into several foreign languages. Among them were Quatre raisons pour lesquelles on doit quitter la R. P. R. (Paris, 1631); Quatre raisons qui traitent de l'immortalité de l'âme, du péché original et de la prédestination (1662), and La Tombea de la Messe (Geneva, 1654; English translation, London, 1673). The latter book was on March 6, 1653, burned by the public executioner, the author exiled, and the bookseller sentenced to a fine of 100 livres. The loss of his license, the death of Derodon went to Geneva, where he died in 1664. He is also the author of several works on philosophical subjects, and against the atheists. His complete works were collected into two volumes, and published soon after his death (Derodoni Opera Omnia, Geneva, 1694 and 1695, 2 vols.; the first volume contains the philosophical, and the second the theological writings). - Hoefer, Biogr. Générale, xiii, 716.

De Rossi. See Rossi, Dr.

Dervishes, Mohammedan monks, corresponded in many respects to the monks of the Roman Church. These may be divided into two classes: those who belong to fraternities or societies for religious exercisers.
DERVISHES

whose tenets and oaths are kept so secret that the uninitiated can only describe their outward appearance and the ceremonies which are practiced in public; and those recusals who, without belonging to any special sect, profess holiness and abstinence, and wander solitarily through the land. The word dervish is Persian, signifying poor, corresponding to the Arabic fakir, which gives name to the same order in Arabia and India. Oriental tradition traces the order of Hermits back to John the Baptist, and even to Seth. Two centuries before Mohammed, there existed in Arabia the hermits or ascetics of the Desert (Contemplatives). These, under the influence of Mohammedanism, merged into Mutekellim (metaphysicians) and Sufis, who were essentially pantheists.

In the second century of the Hegira (729), sheik Olivian, a Sufi, established the first religious order in Islam. Dervishism doubtless took its proximate rise in Persian Sufism.

The Turkish dervishes claim caliph Ali, one of the immediate successors of Mohammed, as their founder. Ali himself founded no order; but some of his followers formed a society called Safafih, men devoted to a monastic life to the excesses, indulging in the use of drugs (chiefly hashish), intoxicating liquors, and, in fact, anything which would promote trances, ecstasies, and hallucinations, resulting in violent paroxysms and delirium. They formed the practice of cutting themselves, mutilating their limbs, standing for a long time in agonizing positions, and otherwise barbarously abusing their bodies. They, however, managed to reconcile with this external and public self-abuse an almost universal private sensuality. The members of this order were subsequently called dervishes, but at what time the word dervish was first used is not definitely known. There are in Turkey thirty-two orders of dervishes, having various names, and differing in their worship and practice. Outside of Turkey there are many more orders, called in the different countries by the local names Fakirs, Sufis, Santones, etc. The chiefs of the different orders are called sheikhs, or piras, who are privileged to nominate their successors. The dervishes mostly dwell in community, and have monasteries (tekies) in various places. Their rules are not very rigid. The declaration of Mohammed, "No monachism in islam," had become a strong religious prejudice, and this prejudice they have never been able fully to overcome. Celibacy is not enjoined, though encouraged, and many of them marry; but the amounts of young regular members of the monasteries, although they are required to pass the night there previous to any public exhibition. They may withdraw from the order at any time, and are often expelled for misdemeanors.

The mendicant dervishes are mostly foreigners, or those who have been expelled from the various orders, or impostors, who cheat and bewitch the people under the garb of dervishism. These travelling dervishes are mostly jugglers, and their skill in trickery is very wonderful. They often become wealthy in the practice of their arts. Their power over the common people is very great, while the better-informed are beyond their reach.

The higher orders of dervishes have come to have an extensive influence not only with the masses, but with the government itself. This power was acquired (1) through the wealth which came into their possession. Large legacies were left to them for the benefit of the poor. These legacies were applied to building up dervishism. They soon learned also to impress the people with a strong belief in the efficacy of their prayers. These came to be purchased at high prices, and thus became a fruitful source of revenue. Their power was increased (2) by the popularity of the institution. In taking a stand against the dervishes, the government was virtually opposing a large majority of its own subjects. Sultan Mahmoud II attempted to break about a dozen engage at a time, and after a few minutes they are relieved by others, each set taking their turn three or four times during the service. The master of the dance (nimazemushky) watches them closely to keep them in their places. A traveller makes the following computation: 'By looking at a stop-watch, I ascertained that on an average they turned sixty-four times in a minute. After spinning round for about five minutes, at a signal from the high-priest, both musulman and dervishes suddenly stopped, but recommenced in a few seconds. The third time they kept it up for nine minutes and three quarters; my brain was swimming too, so much so that I could hardly count their evolutions. The fourth and last time they whirled for five minutes and three quarters, thus making in all 1584 turns in 281 minutes' (Aulje, Journal of a Visit to Constantinople, Lond. 1886, p. 70).

II. The Bedevy (or Bodawy), or howling dervishes, as travellers call them, have a convent at St. Dimitry, near Constantinople. Their religious exercises consist of prayers (namaz), chants, and vociferations of the name of God, accompanied with a rocking motion of their bodies. This motion attempts to imitate the rolling of a ship on the water, and indicates their relation to God—Allah being the ocean and they the ships. They recite the attributes of God in a loud voice, putting a terrible emphasis on the word Allah as often as it occurs; and this they keep up with a kind of frenzy until voice and strength are gone, when many of them, covered with perspiration and foam, fall senseless to

DE SALES. See SALES, DE.

Des Cartes, Rémi (Du Perron)—in its Latin form Renatus Cartusius—was the son of a Catholic, and the first in genius and reputation of the modern philosophers of France, was born at La Haye, in Touraine, on the 30th of March, 1596, and died at Stockholm on the 11th of February, 1650. He assumed the name of Du Perron from a small estate inherited from his mother. He divides with Bacon the glory of founding modern philosophy. He is perhaps the only philosopher who has the faculty of making his works more potent than his writer. He was the first who, with Montaigne, showed the absurdity of the terms quodlibet and paulo major. The former is nothing else than a piece of roughness, and the latter is a piece of mendacity. He has, moreover, the better orders the imans, or Mohammedan priests, are chosen, and many of them also exercise civil functions.

A special work on dervishes has been published by John P. Brown, secretary and dragoon of the legation of the United States of America at Constantinople (The Dervishes; or Oriental Spiritualism, Philadelphia, 1818). According to this author, the spiritualism of the dervishes has its roots in religious conceptions prevalent in the East anterior to the rise of Islamism, and as the practices like those common among them have been found equally widely spread, and are traceable to a very high antiquity. None of the dervishes, he says, separate themselves from the doctrines or precepts of the Koran, the contents of which they seek rather to spiritualize. They divide, moreover, the Koran and other books of religion into three portions—the historical, the biographical, and the purely spiritual. A second classification of the portions of these books may even comprise errors, omissions, exaggerations, and even may have been more or less changed from time to time by copyists; while that which is purely spiritual and essential to the soul of man, commenced with his creation, has always existed unchanged, and will so continue to the end of time" (p. 106). According to their best writers, it is held that there are four creations: 1. The Creation of Adam from the clay, or mud, of which the earth is composed. 2. The Creation of Eve from a rib or part of Adam. 3. The Creation of the human species, that is, the children of Adam, by natural propagation. 4. The Creation of the soul. Chevalier, that the mind of God, conveyed to a virgin—Mary—by the angel Gabriel" (p. 107). And as the spirit of man is capable of communing directly with this spirit of God, a holy person will regard all ordinary pleasures and pursuits of life as indifferent objects; and the more he is destitute of worldly goods, the less will he be liable to be drawn from that contemplation of God which leads to union with the divine spirit. Hence all orders of dervishes are tacitly or openly mendicants. But degrees are well recognized in saintly attainment. Adam was a holy man whom the angels were bidden to worship; Abraham was the "friend of God," and "Jesus Christ owns, 'I have broken the breed of my divine Creator, but is not, nevertheless, considered as being God. He is held to be only a divine emanation of the most sublime character" (p. 109).
meditation, and determined the rude outline of his subsequent philosophy. His isolation and intense concentration of thought affected his brain so far that he fancied himself seized with a violent visitation of the terrors of his philosophic principles and method. Some suspicion of the possibility of delusion led him to vow a pilgrimage to Loretto if his speculations should prove true. This vow he discharged four years afterwards. His solicitude to attain more certain knowledge than was acquired by his schools tempted him to seek a connection with the mysterious society of the Rosicrucians, who were reputed to possess strange learning and a miraculous acquaintance with the secrets of nature. He finally renounced all belief in the existence of the Brotherhood of the Rosy Cross.

From the Bavarian army he passed into the Imperial, and attended its early operations in Hungary against Bethlam Gabor; but, after seeing his general, Bucquoiq, slain before Neusohl, he resigned a military career. He had taken up arms for the sake of studying men, manners, and countries. He prosecuted these researches by returning circuitously to Holland through Moscow, Siberia, Persia, Brandenburg, and Holstein, thus visiting regions deemed wholly barbarous in Western Europe. His unsuspected knowledge of the Dutch tongue and his resolute demeanor saved him from murder on the voyage between Embden and the coasts of Friesland. He returned to the Hague after an absence of three years; passed through the Netherlands, and visited his friend Mersenne five times before he had deserted it, and reached his father's house at Rennes, in Brittany, in March, 1622. He thence proceeded to Poitou to take possession of his share of his mother's estate, designing to sell it and purchase "some place of quick revenue." We are here reminded of the frequent projects of Bacon. He failed in his plans at this time, returned to Rennes, became oppressed with the want of occupation in his father's house, and reappeared in Paris, where he was suspected to be a Rosicrucian emissary. He was still harassed by uncertainties and indecision in regard to the choice of a vocation. Finding his studies interrupted in the capital of France, he visited Rennes and Poitou again, and sold the greater part of his inheritance.

Now commenced a second series of journeys. He went first to Switzerland, thence to the Valatine and the Tyrol, and thence to Venice. He now made his pilgrimage to Loretto, whence it may be inferred that he had been influenced by the claims of his philosophical tenets. He was in Rome during the Jubilees of Urban VIII (1624). He visited Florence on his homeward route. He returned to Paris by way of Florence, Turin, and Lyons, and resided for more than three years in the French metropolis, engaged in prosecuting his researches and meditations, in polishing lenses and mirrors, and in determining mathematically and experimentally the best form of curvature to be given to them. His conclusions on this point were afterwards embodied in his Dioptrics. He again withdrew from nearly all his acquaintances, but his retreat was still more crowded this time by the indigent. Finding it impossible to secure the desired seclusion in Paris, he sought a retreat in Holland in 1629. He now resolved to devote himself entirely to a speculative life. This was the end of five years of military service, of eight years of travel, and of fifteen years of hesitation. It is probable that he was subjected to this new trial with the imputation enforced in his Ethics in the earnest censure of all revolutions. The indecision which is thus forcibly condemned was characteristic of Descartes, and may have been unconsciously connected with the adoption of doubt as the basis of his method.

He would put any single abide; but his home, if he had anywhere, was in the northern part of the country, at the remote town of Egmont. He used every artifice to conceal his retreat. He communicated his hiding-place to none of his countrymen except his Franciscan friend Mersenne, through whom he conducted nearly all his correspondence with those of the learned world. In 1631 he visited England on the invitation of Charles I; in 1634 he went to Denmark, Spain, Portugal, Russia, and Turkey were the only European states not reached in his wanderings. He thrice visited France after his Dutch settlement—in 1644, 1647, and 1649. On one of these occasions he was tempted to Paris by the promise of an honorable provision from the king, but he found that he had been drawn from his retreat solely to gratify the curiosity of sight-seers and couriers.

Descartes ascribes the determination of the fundamental principles of his philosophy to his twenty-third year, and to his winter-quarters on the Danube. His mathematical discoveries were still earlier. In 1627, after three years of elaboration, he had prepared a sketch of his views of the constitution of the universe, but the condemnation of Galileo caused him to withhold it from the press. At length, in 1637, being then forty-one years of age, he yielded to the solicitations of his friend Mersenne, and published the general principles of his reform in the celebrated Discours de la méthode, to which were appended three other treatises—on Meteors, Geometry, and Dioptrics.

Soon after the publication of the Method and accompanying essays, the Philosophical Meditations were prepared for the press. Descartes sent them to his friend Mersenne, who recommended them to be submitted to the most acute and learned of his acquaintances for the benefit of their suggestions and observations. Searching criticisms were in consequence received from Caterus, Hobbes, Arnauld, Gassendi, Bourdin, S. J., and others. To these objections replies by the author were appended, and the whole were published together at Paris in 1641, with a dedication to the theological faculty of the University of Paris, in order to place his doctrines under the protection of the Church.

Descartes continued the exposition of his philosophy by publishing in Latin in 1644 his Principia Philosophiae. This work contains the elaborate and systematic deduction of his whole scheme of the intellectual and material universe. It commences as characteristically as the Novum Organum of Bacon, with the fundamental principle of his speculation, that "once in life we should endeavor to doubt of all things." It arrives at the conclusion that we can have knowledge of certain phenomena of nature have been omitted in the treatise, but that nothing is to be included in natural phenomena except what is detected by sense." The last sentence of these Principles is equally characteristic of the philosopher and the philosophy. "Mindful of my weaknesses, I affirm nothing; but I admit all these things first to the authority of the Catholic Church, next to the judgment of the prudent; and I desire nothing to be believed by any one which is not approved by manifest and irrefragable reasons." The work is preceded by a complete and methodical index, stating the reference to each, and thus affording a clear and concise summary of its contents. The whole of Cartesianism is thus compressed into one picture and into a few pages.

During his long residence in Holland, the tranquillity of Descartes was disturbed by controversies due to the imprudence of his admirers. His annoyance and alarm were so great that his letter, signed with the name of Leibnitz, in which he deprecates the sanctioning of scepticism and encourages infidelity. His views of matter and mind appeared to one party to favor transubstantiation; to another, to lead to fatalism. His explanation of the connection of body and spirit apparently reduced all the phenomena of the universe to mechanical action. Hence arose the truculent attacks of Voet, one of the most prominent Dutch theologians, and reactor of the University of Utrecht. Descartes at length
broke his customary silence, and addressed a long and
acrimonious reply to Vésq.

These dissensions, so peculiarly irritating and alarming
to a cautious and timid nature like Des Cartes's, inclin
him to cast about for a more tranquil retreat than
that in which he had so long cherished. He accord-
ingly consented, after much habitual hesitation, to
return to his native country. On October 3, 1649, he
sailed from Copenhagcn, for Sweden, which he had
been delighted with his treatise on the Passions,
originally composed for the princess palatine Elizabeth.
A Swedish admiral, with a royal vessel, was sent to con-
vey Des Cartes to Stockholm, where he was welcomed
with honor and favor. The queen was charmed with his
conversation, and sought his advice, which he gave
with modesty and prudence. She availed herself sys-
tematically of his instructions, employing the early
hours of this purpose, to avoid interference with other
studies, with state affairs, and the royal pleasures.
Des Cartes was required to forego his life-long habits,
and to attend her majesty regularly at five o'clock in
the cold mornings of a Swedish winter. This great
change, and the severity of the climate, proved fatal to
him. He was attacked with fever on Feb. 2, 1650,
and died on the 11th of the month. The queen was
deply affected by the announcement of his death.
She desired to place his body among the royal sepul-
chres; but as he died in the bosom of the Roman Catholic Church, his
remains were deposited in the Roman Catholic ceme-
tery. Sixteen years after his death his remains were
removed to France, and placed with imposing ceremo-
nies in the church of St. Genevieve. The funeral ora-
tion designed for the occasion was prohibited by order of
the court, but the like honor was rendered a centu-
ry later, 1765, by the eulogy of M. Thomas, which was
crowned by the French Academy.

The Philosophy of Des Cartes. — The Cartesian philos-
ophy is to be ascertained from the Method, the Medita-
tions, and the Principia. The remaining works are
either subsidiary or accessory: either developments
and expositions which confuse rather than elucidate,
or special treatises on particular branches of science,
such as geometry, dotoptics, meteorology, anatomy,
physiology, logic, etc. To one solicitous of appreci-
ating the whole intellectual habit of the philosopher,
this is of little profit to his letters; but it is indispensa-
able to the letters themselves are often changing.
To one desirous of obtaining a minute acquaintance with all
the perplexities, ambiguities, and vacillations of the
Cartesian system, these letters, together with the ob-
jections and replies appended to his Meditations, are
invaluable. St. Thomas Aquinas, of course, should be
studied by those who would determine the exact
position of Des Cartes in the history of speculation,
and the precise services rendered by him in the promo-
tion of science.

The first principle of Cartesianism is to make the
mind a blank, a tabula rasa, and then to re-
construct the whole fabric of conviction and opinion
from the framework. The same recommendation is given, in a different spir-
it, by Bacon in the preface to the Novum Organum.
As Des Cartes recognised the uncertainty and incohe-
rence of contemporary speculation, he proposed to com-
ence the reacquisition of knowledge by doubting all
things.

Having rendered his mind a blank by universal
doubt, he next sought a foundation for an indubitable
body of doctrine. This he effected in the conscious-
ness of thought, including sensation, perception,
reflection, and emotion under this term. Hence pro-
cements the celebrated incautiousness of his whole philo-
osophy with the maxim Cogito, ergo sum — I think,
therefore I am. This is probably an original position
with Des Cartes; but thought is, nevertheless, ex-
plicitly alleged by Aristotle as an evidence of exist-
ence (Eik. Nienwok. IX, ix, § 7, 9, ed. Didot).
The argument is much more legitimately employed by Ar-
istotle than by Des Cartes as an evidence of particular
existences, not of existence in general. It has often
been indicated that the Cartesian enthymeme is invalid
from the tacit assumption of the major premise.
When reasoning necessarily proceeds in a circle. The acceptance
of the dogma assured him of his own existence, but
furnished no evidence of the existence of anything
else, nor did it violate the principle that he was the
author of his own existence. The finite existence recognised
must repose upon something more stable and immuta-
ble than the fleeting, fitful life of which his conscious-
ness assured him. He concludes, therefore, that his
own and all other existence must depend for its begin-
ning and continuance on an indestructible and immi-
table Being — upon some great "I am." He discovers in his own mind the notion of such a Being
—of God. It could not have been invented by him-
self, for it transcends his finite capacities. It must
have been implanted by God himself; and thus the
presence of the notion attests the existence which it
represents. This is the concise statement of the Car-
tesian argument à priori for the Being of God. Like its
predecessor, it is not original. It is found fully de-
veloped in the Prolegomena of St. Anselm. It was as-
sailed by Gaunilo, a contemporary, in the Liber de In-
opsione, and refuted a century and a half later by St.
Thomas Aquinas. The argument proceeds upon the actual or virtual admission of
innate ideas, and is accompanied by the reception of
another postulate, that innate ideas are necessarily true,
because, as they are implanted by God, they partake
of the divine veracity, and God can neither deceive
nor be deceived. Both innate ideas and the impossibil-
ity of divine deception have been denied. Innate
ideas, in their Cartesian form, were exploded by
Locke; and the impossibility of divine misguidance
had been questioned three centuries earlier by Gregory
Arminius, general of the Augustinians, and was ac-
knowledged by Des Cartes to his great disadvantage.
But, as Bayle remarks, a universal maxim
obnoxious to exceptions furnishes no foundation for
certainty, and confirms rather than eradicates scepti-
cism.

Another argument for the being of God is used at
times by Des Cartes, and appears much more cogent
and tenable than that of the relation of a First
Cause (Des Cartes rejects final causes), using, however,
the corrections and modifications of St. Thomas Aqui-
inas, who deduces the argument, not from primordial
causation, but from the continuous support of creation.
The Argument from a First Cause simply is consistent with either theרי

eras, he may be regarded as innate. The criterion is
evidently arbitrary and delusive. What seems clear,
distinct, and simple to one mind, may be obscure, in-
tricate, and complex to another. Under this criterion,
any strong conviction, any engrossing hallucination,
may present the credentials of truth. It is, therefore,
surely not surprising to find the whole philosophy of
the Cartesian philosophy. But the acceptance of this principle of
clearness, distinctness, and simplicity had a potent and
felicitous influence upon the literature of France. Des
Cartes was himself a model of grace and lucidity of
expression, and his criterion of truth, promulgated at
the dawn of the age of Louis XIV, and illustrated in composition by himself and by Pascal, contributed largely to produce the characteristic excellences of the French classics. Such as these are, these are the constituent principles of the philosophy of Des Cartes. They are neither valid nor original. Both Bayle and Leibnitz sanctioned the enrolment of this philosopher among the number of those who pretend to invent what they borrow — "gloriamque adeptos, tamquam reperienti que accepto." It is impossible to proceed far in either the metaphysics or the physics of Des Cartes without meeting the dreams of Leucippus, Democritus, Epicurus, and other philosophers of Greece, and being continually reminded of the sonorous verses and luminous expositions of Lucretius.

A definition of existence was suggested to Des Cartes by his demonstration of existence. Mind, or spiritual existence, is thinking substance; body, or material existence, is substance without mind. But as some positive characteristic is required for the discrimination of matter, extension, which is its most familiar property, was assumed as its specific difference, and mind was sought in the nonextension branch. This necessitated the identification of space and matter, or the negation of space as a separate entity. Hence arose the doctrine of the Pilgrim, and the maxim that Nature abhors a void. The thesis of Lucretius, "est in rebus immans," and his argumentation on the thesis, carried on by the Stoics, are the sources of these doctrines. But in Des Cartes the two forms of existence are presented as opposite, irreconcilable, and reciprocally incommunicable. In consequence, beasts can possess no capacity of reason. They are purely mechanical—mere machines. This is one of the holdest, most paradoxical, and most dangerous of the Cartesian tenets; but it appears to be a necessity of his philosophy, though he is accused of having taken it—a worthless appropriation—from the Antoniana Margarita of Gomez Pereira, 1554. Certain it is that the acceptance of the Cartesian definitions of mind and matter must result in the declaration that beasts are mere machines. But, if they are such, how are they set in motion, and how do they perform actions apparently voluntary and deliberate? Moreover, if beasts are machines, man must also be a machine, so far as his body is concerned, for mind and matter cannot operate upon one another. An attempt was made to solve these problems through the doctrine of Assitancy, or of divine co-operation in determining all the material actions of animate bodies. In Malebranche this doctrine unfolded itself into the scheme of Occasional Causes; in Leibnitz, into the splendid fantasy of the Pre-established Harmony; in Spinoza, into the most abstract, complete, and systematic Pantheism.

This theory in regard to the mechanical complication of vital movements affected the ethics of Des Cartes. The chief details of his treatise on the Passions were derived from Aristotle, but his own views of mind and matter, and his own studies and experiments in anatomy and kindred sciences, modified his explanation of the peripatetic doctrines. He made his Moral Philosophy in great measure an exposition of the physical phenomena which accompany emotion; he employed largely the device of vital spirits, which reappear so habitually in Locke; he regards them very much as if they were idealistic and absolute; and thus he becomes the legitimate precursor of Condillac and Calais, of Bain, Moleschott, and Herbert Spencer. The positions of Des Cartes, whether he be sober or fantastical, furnish suggestion or stimulation, and often direction, to the most various branches and types of subsequent speculation.

Des Cartes left behind him a treatise on Man, to which a singular contract is offered by the nearly contemporaneous essay of Hobbes, De Homine. Man is the union of the intellectual and material universe—the point where both meet—the synthesis of opposites—the microcosm—the complex organism, whose explanation demands the theory of mind and of matter alike. His treatise furnishes a passage from metaphysical to physical inquiries, and vice versa.

If the metaphysics of Des Cartes be founded upon the observation of the supposed facts of consciousness, his physical theory of the universe is purely fanciful—a romance, as it was designed by himself. In developing the complete exposition of the order of creation, for which due credit should be given to Des Cartes, it was necessary to explain the phenomena of continual movement on principles exclusively material, without admitting distinct space, or permitting any unoccupied interstices between the constituent particles of the mighty whole. In order that there might be an unlimited tensity of matter, to allow the free circulation of bodies of diverse density, the atoms of the Ionic school must be rejected, and the infinite divisibility of matter maintained. These prerequisites were secured by the hypothesis of an endless circularity or volubility of matter, which might exist in the density of the ether, and which constituted the bodies. Another advantage was attained by this fancy. The Copernican system, which had been apparently repudiated by the papacy in the recent condemnation of Galileo, was not asserted, and other theological objections were anticipated by obscuring the distinction between an upper and a lower world. The very statement of his system of the universe as an hypothesis was a concession made by the timidity of Des Cartes to the pretensions of ecclesiastical dogmatism; and it was in response to this and subordinate Cartesian hypotheses that Newton uttered his celebrated maxim, "hypothesi non fingo."

The Cartesian theory of the world turns on the celebrated doctrine of the Vortices. Matter originally exists, if such be the will of God, in a state of incoolable divisibility and of unimaginable attenuation. In this condition of instability motion commences, because there can be no equilibrium between dissimilar and disconnected particles. This motion becomes circular, or irregularly spiral, from the greater or less violent tendency of the particles pressing against each other towards the line of an undetermined axis. As the process advances the revolution becomes more decided, the axis of revolution more definite, and a determinate form is terminated in the doctrine of Cyclant. From the interference of these gyrations, the more compact particles of matter are forced inwards, and are further condensed, while the more rarefied are thrown off towards the extremities of the ring. But the more solid portions are still interpenetrated by the thinner and more fluid, and the whole vagrant motion endures, and carries along both the sensible and impalpable materials of the universe. Different centres and different axes of revolution constitute themselves, and thus multitudinous systems of planetary bodies, each in its own vortex, spring into existence. New vortices may originate in the bosom of larger vortices, or vortices may be destroyed in contact with each other by a joint action, in which none lose their primitive movement; or larger vortices may seize, encompass, and hurry along with them the weaker spirals which they enclose. All the heavenly movements are provided for by this complex scheme, but, though simple in principle and consistent, its development is more complicated in action and in exposition than the "cycles on epicycles rolled" of the Ptolemaic mechanism of the heavens. These are the Cartesian Physics which were exploded by Sir Isaac Newton, and which have lain so dead and dormant since the Newtonian Principla that we scarcely mention them even as the objects of scientific scorn.

But some apology may be made for this splendid hallucination. It is not for the present generation of
men of science to sneer at the Cartesian Vortices. Founded as they were upon the magnetical researches of Gilbert, they furnish a prelude for the coeval magnetic excitement of the present day, for the whole nebular hypothesis, for the system of vorticity. As a part of his exposition, Des Cartes asserts the correlation and conservation of forces, and the indestructibility of matter, which have so startling and modern an air in the speculations of Mayer, Helmholtz, Grove, Faraday, etc. If the theory of Des Cartes is intrinsically absurd, its absurdity is strongly analogous to the most recent generalizations of science.

Like the rest of his dogmas, the dream of the vortices was not original with Des Cartes. Leibnitz speaks of them as "vorticism a veteribus coptorum." Spesius charged Des Cartes with having borrowed them from Giordano Bruno and Kepler; and even his own enthusiastic biographer, Biaillet, ascribes to Kepler three of the principal Cartesian speculations: 1. Vortices; 2. Gravitation; 3. Optics. He was largely indebted to Bacon, Gassendi, Fermat, Galileo, among his contemporaries, and to multitudes of near and distant predecessors. But he was too greedy of pre-eminence to object to them.

The Vortices constitute only a small part of the Physical Philosophy of Des Cartes, but they are the most characteristic portion, and affect nearly all its developments. He has presented reflections, observations, and experiments in regard to most of the principal phenomena of nature, animate and inanimate, material and immaterial. He has studied the wind, the rain, and the hail, the play of light and of colors, the formation of minerals, the growth of plants, comets and earthquakes, the motions of the planets, the mysteries of the stars, the anatomy and the physiology of man, as well as the constitution of the mind and the metaphysics of creation. It was a magnificent and all-embracing survey which he undertook, and of which he left only a sketch, carefully elaborated in some parts and barely indicated in others. His philosophy, as a system, never possessed much intrinsic value, though its vastness of conception and audacity of execution excited lively and lasting enthusiasm. The influence exerted by it can only be overrated, and should not be undervalued. It provoked investigation in all departments of knowledge; it directed inquiry to the most promising fields of study; it commenced, by an illustrious example, diligence in observation and patient accuracy of experiment; while the authors of those greater men of their own period admirably typify an earnest, exclusive, simple, and devoted philosophical career.

The Cartesian Philosophy has passed away after a brief and splendid, but not unclouded reign; but to Des Cartes will be due the homage of all ages for the stimulus to more accurate research which he supplied. He has also a more special title to fame on the score of his mathematical discoveries—his invention of Coordinate Geometry and Indeterminate Co-efficients. These can be only mentioned in passing, as they affected neither religious opinion nor the developments of theism. Thus the whole work of this epoch-making influence of the individual speculation must be regarded mainly in the light of their action upon Christian thought. The names of Malebranche, Spinoza, Bayle, and Leibnitz furnish ample evidence of the powerful but diverse stimulation communicated to theological investigations by the writings of Des Cartes, and demonstrate the justice of the pronouncement of the feeling which recognizes in him one of the fathers of modern philosophy, notwithstanding the rejection of nearly all his distinctive opinions.

Literature.—Des Cartes and his philosophy occupy so large a space in the records of modern philosophy that it would be equally impracticable and nugatory to attempt a enumeration of the sources of information. All the historians of philosophy, from Brucker downwards, devote an adequate share of attention to Des Cartes. Brucker's account of Cartesianism is one of the most satisfactory parts of his laborious work, though it is by no means partial to Des Cartes. The scattered observations of Bayle and Leibnitz should never be overrated, nor can the comments of Vico and the criticisms of Victor Cousin be disregarded. The life of Des Cartes must still be sought in the volumes of his early biographer, Biaillet, though much interesting matter may be derived from the Dialogues of Thomas and later prize essayists. Many interesting autobiographical details are found in the Des Cartes and in the letters of Des Cartes. Other materials inviting consultation for a due estimate of his philosophy, and of its relations to previous and subsequent speculation, are Cousin, Cours de Philosophie, and Fragmens de Philosophie Cartesienne (Paris, 1845); Grevy, Exposition Philosophique (Paris, 1882); Boulliet, Hist. et Crit. de la Revolution Cartesienne (Paris, 1842); Damoulin, Le Cartesisme (Paris, 1848); and Damiron, Hist. Philosophie du XVIIe Siecle (Paris, 1846); also his Essai sur la Philosophie en France au XVIIe Siecle, 2 vols. 8vo (Paris, 1867). There is an admirable article on the great master in the writings of Des Cartes, Edinburgh Review, Jan. 1852. But the indispensable and only sufficient text for the real student is contained in the works of Des Cartes, of which the best editions are Opera Omnia (Amsterdam, 1692-1701, 8 vols. 4to), and Oeuvres Complete de Des Cartes, ed, Victor Cousin (Paris, 1824, 31 vols. 8vo). The best independent selection of his purely philosophical treatises is Simon (Paris, 1844). On the relations of Cartesianism to theology, see Gass, Geschichte d. prot. Dogmatik (Berlin, 1854-62, 8 vols.); Dornier, Geschichte d. protest. Theologie, Munchen, 1867, p. 461 sqq.; Farrer, Critical History of Free Thought, Lecture III; Hagensch, History of the Doctrines about the Apostles' Creed, 225,196 (Dundee's Leben des 17ten Jahrhunderts (1834, part ii); Morell, History of Modern Philosophy (N. Y. edition), p. 115, 194.

Descent (Christ's) into Hell. See Hell, Descent into; Creed, Apostles'.

Desert (Gr. Ἰππως; see Reichenbach, Des see ιπμος, Lips. 1800), a word which is sparingly employed in the A. V. to translate four Hebrew terms, and even in the rendering of these is not employed uniformly. The same term is sometimes rendered "wilderness," sometimes "desert," and once "south." In one place we find a Hebrew term treated as a proper name, in another translated "in the desert." This gives rise to considerable indecision in many passages of Scripture, and creates confusion in attempts at translation. But, besides all this, the ordinary meaning attached to the English word "desert" is not that which can be legitimately attached to any of the Hebrew words it is employed to represent. We usually apply it to "a sterile sandy plain, without inhabitants, without water, and without vegetation"—such, for example, as the desert of Sahara, or that which is overlooked by the Pyramids, and with which many travellers are familiar. No such region was known to the sacred writers, nor is any such once referred to in Scripture. It will consequently be necessary to explain in this article the several words which our translators have rendered "desert," and to show that, as used in the historical books, they denote definite localities. See Topographical Terms.

1. Midbar, מִדְבָּר, (Sept. Ἰππως, and ἄνάρωρος γη), is of very frequent occurrence, and is usually rendered "wilderness" (Gen. xiv. 6, etc.), though in some places "desert" (Exod. iii. 1, v. 1, etc.), and in Psa. lxxv. 6, "south." It properly denoted a barren ground, being derived from מְדֹ Lorem ipsum dolor sit amet, consectetur adipiscing elit.
The pastoral "desert" is found as the translation of Medāb in Deut. xxxii. 10; Job xxiv. 5; Isa. xxxi. 1; Jer. xxxv. 24. See MEDAB.

2. ARABA'AH (אֲרָבָא; Sept. Ἀραβά; and ὕδωρ), from אֲרָבָא, ἀρᾶβ, to dry up (Genesis, Theop. p. 1060), i. e. parched ("desert") in Isa. xxxxx. 1, 6; xi. 3; xx. 19, lii. 8; Jer. ii. 6; xvii. 6; i. 12; Ezek. xivii. 8; elsewhere usually "plain"). This is either applied to any arid tracts in the wilderness of the land of Canaan (or else is still called), or lone desert tract or plain of the Jordan and Dead Sea, shut in by mountains, and extending from the lake of Tiberias to the Elanitic Gulf; called by the Greeks Ἰδαίων (Euseb. Onomast.).

The more extended application of the name by the Hebrews is successfully traced by professor Robinson from Genesis: "In connection with the Red Sea and Elath" (Deut. xxxii. 10). As is in Genesis, it means "the wildness of Tiberias" (Josh. xii. 8; 2 Sam. iv. 7; 2 Kings xxvi. 4)."Sea of the Arabah, the Salt Sea" (Josh. iii. 16; xii. 3; Deut. iv. 49). "The arōbath (plains) of Jericho" (Josh. vi. 10; 2 Kings xvii. 5). "Plains of Moab," i.e. the southern part of the Dead Sea, between the Arabah and the Dead Sea, shut in by mountains, and extending from the lake of Tiberias to the Gulf of Akaba. With the article the wilderness of Medab is the specific name given either to the whole, or a part of the deep valley extending from Tiberias to the Gulf of Akaba. With the article the wilderness of Medab is the specific name given either to the whole, or a part of the deep valley extending from Tiberias to the Gulf of Akaba. With the article the wilderness of Medab is the specific name given either to the whole, or a part of the deep valley extending from Tiberias to the Gulf of Akaba. With the article the wilderness of Medab is the specific name given either to the whole, or a part of the deep valley extending from Tiberias to the Gulf of Akaba.
DESK

(Hebrew: דֶּק, Num. xxii, 1, etc.; "the plains of Jericho" (Josh. iv, 13); "the plains of the wilderness" (2 Sam. xvii, 16). The southern section of this sterile valley still retains its ancient name, 'Irbâb (Robinson, Bib. Res., i, 186; Smith, Dict. p. 84). It appears, therefore, that this term, when used, as it invariably is in the topographical records of the Bible, with the definite article, means that very depressed and enclosed region—the deepest and the hottest chasm in the world—the sunken valley north and south of the Dead Sea, but more particularly the former. True, in the present depopulated and neglected state of Palestine, the Jordan Valley is as arid and desolate a region as can be met with, but it was not always so. On the contrary, we have direct testimony to the fact that when the Israelites were flourishing, and later in the Roman times, the case was emphatically the reverse. Jericho (q. v.), the "city of palm-trees," at the lower end of the valley, Bethshean (q. v.) at the upper, and Phasaelis in the centre, were famed both in Jewish and profane history for the luxuriance of their vegetation (Joseph. Ant. xviii, 3, 2; xvi, 5, 2). When the abundant water-resources of the valley were propertied and the region subdued by tropical heat caused not barrenness, but tropical fertility, and here grew the balsam, the sugar-cane, and other plants requiring great heat, but also rich soil, for their culture. Arâbâh, in the sense of the Jordan Valley, is translated by the word "desert" only in Ezek. xxvii, 8. In a general sense, the term "deserted country"—a meaning easily suggested by the idea of excessive heat contained in the root—"desert," as the rendering of Arâbâh, occurs in the prophets and poetical books; as Isa. xxv, 1, 6; xl, 3; xli, 19; li, 3; Jer. ii, 6; vi, 6; xvii, 5; i, 12; but this general sense is never found in the historical books. In these, to repeat once more, Arâbâh or Arâbâh clearly denotes the Jordan Valley, the Gibe of the modern Arabs. See ARABAH.

3. Yeshimon, יֵשִׁימוֹן (Sept. ἱσσείρας and ἱσσοὺς), from דִּיטָא, to lie waste ("wilderess," Deut. xxxii, 10; Psa. lxviii, 7; "solitary," Psa. evii, 4), in the historical books is used with the definite article, apparently to denote the waste tracts on both sides of the Dead Sea. In all these cases it is treated as a proper name in the A. V.; thus in Num. xxii, 20, "The top of Pisgah, which is opposite Jericho to Jordan." See also BETIM-JETHROM. Without the article it occurs in a few of the passages of poetry, in the following of which it is rendered "desert:" Psa. lxxxvii, 40; cv, 14; Isa. xlix, 19, 20. This term expresses a greater extent of uncultivated country than the others (1 Sam. xviii, 19, 24; Isa. xlix, 12, 20). It is especially applied to that desert of peninsular Arabia in which the Israelites sojourned under Moses (Num. xxii, 20; xxiii, 29). This was the most terrible of the deserts with which the Israelites were acquainted, and the only real desert in their immediate neighborhood. It is described under ARABIA, as is also that Eastern desert extending from the eastern border of the country beyond Judaea to the Euphrates. It is emphatically called "the Desert," without any proper name, in Exod. xxxii, 31; Deut. xi, 24. To this latter the term is equally applicable in the following poetical passages: Deut. xxxii, 10; Psa. lxxxvii, 7; lxxxviii, 40; cv, 14. It would appear from the reference in Deuteronomy—"waste, howling wildness," that this word was intended to be more expressive of utter wilderness than any of the others. In 1 Sam. xxix, 18, and xxxii, 1, it evidently means the wilderness of Judah. See JESHMON.

4. Chorban, כֹּרְבָן (Sept. ἱσσοὺς, etc.; A. V. usually "waste," "desolate," etc., from רָב, to be dried up, and hence desolate, is a more general term denoting a dry place (Isa. xlvll, 21), and hence desolation (Psa. lxv, 6), or concretely desolate (Lev. xxxvi, 31, 38; Isa. xlix, 14; lxiv, 10; Jer. vii, 84; xxix, 5; xxx, 9, 11; 18; xxvii, 12; xlv, 2, 6, 22; Ezek. xiv, 14, xxvi, 33; xxxvii, 4; xxxix, 7; xxxvii, 10, 38; xxxviii, 12; Mal. i, 4; Isa. lix, 17; xli, 4). It is generally applied to what has been rendered desolate by man or neglect (Exx xxv, 9; Psa. cxx, 19; Isa. xlvii, 26; ii, 3, 3; iii, 9; Jer. xlix, 13; Ezek. xxxxx, 20; xxxv, 24, 27; xxxvi, 4; Dan. ix, 2). It is employed in Job iii, 14, to denote buildings that speedily fall in the wind (comp. Isa. vi, 17; the ruined houses of the rich). The only passage where it expresses a natural waste or "wilderness" is Isa. lxvii, 21, where it refers to that of Sinai. It does not occur in any historical passage, and is rendered "desert" only in Psa. cxxi, 6; Isa. lxviii, 21; Ezek. xxiv, 4.

5. The name of the deserts or wildernesses mentioned in Scripture (besides the above) are the following, which will be found under their respective names: (1.) The Desert of Shur or Elath (Num. xxxii, 8; Exod. xvii, 17; xv, 22; (2.) the Desert of Paran (Num. xiv, 12; xiii, 30; (3.) the Desert of Sinai (Exod. xix, 2); (4.) the Desert of Sin (Exod. xvii, 6); (5.) the Desert of Zina (Num. xxii, 1)—these are probably only different parts of the great Arabah Desert, distinguished by separate proper names; (6.) the Desert of Judea, or Judnea (Psa. lixii, in the title; Luke i, 80; (7.) the Desert of Ziph (1 Sam. xxxii, 14, 15); (8.) the Desert of Engedi (Josh. xv, 62); (9.) the Desert of Carmel (Josh. xv, 55); (10.) the Desert of Moab (1 Sam. xxvii, 7) is the same as the Desert of Tekeah (2 Chron. xxvi, 10)—these are probably only parts of the Desert of Judah; (12.) the Desert of Jericho, separating the Mount of Olives from the city of Jericho (Jer. iv, 8); (13.) the Desert of Beth-aven seems to be a part of Mount Ephraim (Josh. xvii, 12); (14.) the Desert of Demavue (1 Kings xix, 15) is the same as the Desert Syria, where Tadmor was built (1 Kings ix, 18).

6. "Desert" or "wilderness" is also the symbol in Scripture of temptation, solitude, and persecution (Isa. xxxvii, 10; xxxvii, 9). The figure is sometimes emblematical of spiritual things, as in Isaiah xix, 12; also in chap. xxxxx, 15, where it refers to nations in which there was no knowledge of God or of divine truth, that they should be enlightened and made to produce fruit unto holiness. A desert is mentioned as the symbol of the Jewish Church and people, when they had forsaken their God (Isa. xi, 2); it is also spoken of with reference to the state of the Gospel Church in later times, and as the place where the church would remain until the latter day (Matt. vii, 28). An opinion held also by the heathen (Virg. Aen. vi, 27).

Desire. See CONCUPISCENCE; SIN.

Desire (Eccl. xii, 5). See CAPEL-PLANT.

DESIRE OF ALL NATIONS (אַהֲרֹן הָגוֹיִם, the delight of all the nations; Sept. αἱ ἐνεργῶν πνεύματα τῶν ἡγεμών; Vulg. desideratus cunctis gentibus) is an expression ( Hag. ii, 7) usually referred to a title to the Messiah (see CHAIN, Comment in loc.), but denoting rather the choicest treasures of the Gentiles (comp. Isa. lx, 3-7), which are figuratively represented as an oblation to the Messianic dispensation (see Moore, Comment in loc.; Sartorius, De ventero genitum Desiderio, Thab. 1756).

Desir, in the Church of England, a raised seat, otherwise called a "reading-pew" (see rubric before "Communion"), set up in the body of the church, from which the minister begins the reading of the office. I, if it has been appointed that the daily morning and evening service should be read, the chancel having been used for that purpose before the above period. In the Protestant Episcopal Church of the United States there is no rubric on the subject.
Desmares, Toussaint Guy Joseph, a celebrated French preacher and controversial writer, was born at Vire in 1699. He entered at an early age the new Congregation of the Oratory, where Father (subsequently Cardinal) Hesbert became his spiritual adviser, and, later, his friend. As a preacher, from 1638 to 1648, he met with marked success. A profound study of the works of St. Augustine made him an adherent of the Jansenists, whose doctrines he defended with a zeal which made him many enemies. He was forbidden the pulpit, and a lettre de cachet was obtained against him, but he had time to escape. By another lettre he was exiled to Quimper, whence he was in 1658 permitted to return. He then went to Rome to plead the cause of the Jansenists, and delivered in the presence of the pope a remarkable speech, which was published in the Journal de St. Amour. On his return to France he had to conceal himself until 1668, when the archbishop of Paris appointed him to preach during Advent in the church of St. Roch. But soon he was again obliged to flee, but he found a powerful protector, first in the duke of Luynes, and subsequently in the duke of Liancourt. He died at Liancourt on Jan. 19, 1669. All his works were published after his death, and his controversial character; some others, e.g. Traité de l'Église, still remain unpublished.—Hoefer, Biog. Générale, xiii, 482.

Descartes. See Maresius.

Desolación, Abomination of (βαλεθμα της ἱρημωσεως, Matt. xxv, 15; Mark xiii, 14, as a translation of镶嵌ταβινθα, especially in Dan. ix, 27), "and for the overspreading (ἐπικεχέντα) of abomina-14 tions he shall make it desolate" (so the A.V. vaguely and inaccurately renders). Here an especial difficulty in the interpretation of the phrase is created by the ambiguity of the term ἱρημωση, which is usually regarded as equivalent to the πτωμηνως, or καταπτωμηνως (isolated examples are found in St. John, viii, 9; S. Luke, xxi, 27; S. John, xvi, 18, and S. Mark, xii, 2). We believe," says Havermack, "that of all the meanings of ἱρημωση which are sufficiently supported, none so commends itself as that of border, properly of a garment, e.g. 1 Sam. xv, 27; Num. xiv, 86; Ezra v, 3; Zech. viii, 23; Hag. ii, 12; then secondarily of places, regions of the earth, hence νησιθηρήμως, the ends, limits, utmost parts of the earth, Job xxxvii, 3; xxxviii, 13; Isa. xi, 12; Ezek. vii, 2. (Sept. πτωμηνως της γης, the extremity of the earth.) . . . . According to this, νησιθηρήμως would denote here exter-teria regionis, the utmost point or part of a district or of a place, and ταβινθα, ταβινθων, on the utmost heights or summits of a place, e.g. of the kingdom, i.e. the place where the abomination could be committed. But the highest point in Jerusalem was the Temple, and it must be this which is thus designated here. We admit that this meaning would be obscure before the fulfilment of the prediction; but this we hold to be only a characteristic feature of such predictions. . . . As respects the form ταβινθα, most interpreters take it as nomen partic-ularis, 'a boundary'; but here it is to be noted that the usage of the form elsewhere in Daniel (xi, 21), and the mean-18 ing is brought out much more vividly and poetically by our construction. 'On the summits of abomination is a destroyer,' probably collectively for 'destroyers' in general. . . . According to this explanation, there can be no doubt that the Sept. has already rightly grafted the (ap. Bugatti, p. 132), except that he seems to have read εις ἱρημωσης. The Peshito gives 'on the wings of abhorrence, and this Ephephas refers to the Roman eagles. The Vulg., Et erit in templo abomi-

Desperrori, a name of reproach by which the early Christians, in times of persecution, were stigmatized. Lactantius says, 'Those who set a value on their faith, and will not deny their God, [they] first torment and butcher with all their might, and then call them desperroris, because they do not spare their own bodies; as if anything could be more desperate than to torture and tear in pieces those whom you cannot but know to be innocent.'—Bingham, Orig. Ecc. bk. i, ch. ii, § 9.

Despota (Despota) v. r. Δεσποτος, perch. for Chald. Δαρδος v. i. e. Heb. רודו (trismutation; Vulg. Despotus), a village (nomy, castellum) at which Nicana's army was once encamped during his campaign with Judas (2 Mac. xiv, 16). There is no mention of it by this name in the account of these transactions in 1 Macc. or in Josephus, but Ewald conjectures (Gesch. Isr., iv, 368 note) that it may have been the Adasa (q. v.) in the same region (1 Macc. vii, 40, 45; Josep. War, iii, 6).

Destroyer (τυφλός, máskodfik), Exod. xii, 28; φλογοσqv, 1 Cor. vi, 10), an exterminator (see Bresel, De angeló exterminatoré, Jen. 1865; also in the Theærum. theolog. philolog. V. T. 1, 301 sqq.). See Death. The Hebrews were accustomed by a figure to speak of any superhuman agency as that of an angel (see Bush, Note on Exod. iii, 2); and whenever this had a providential aspect it was attributed to a divine messenger (2 Kings xiv, 36; 2 Sam. xxiv, 15, 16; Ps. lxviii, 49; Acts xii, 23). See Angel. Even Satan's malignity is represented as thus employed (Job ii, 6, 7). See Abaddon.

Deservants, a name given in the Church of France to such of the Roman Catholic clergy as have charge of churches or chapels subordinate to the parish church. There are three classes of such clergymen: between parish churches (parochiales ecclesiae) and auxiliary churches (accursuales ecclesiae), and the clergy-
DESTRUCTION

parish priest (De Cange, Gloss, s. v.) When Bonaparte restored the Roman Catholic Church in France, he provided for the stipend of the pastors (curés) out of the government funds; it became therefore desirable to reduce their number as much as possible. It was settled that there should be one for every district subject to the bishopric in France, and that the Roman Catholic churches (accursales) should be supplied with what priest they required on condition that these priests should be chosen among those who had pensions, by means of which, together with what their congregations would give them, they could support themselves. The law was approved by the Synod of May 11, 1802 (Dec. 26, 1804), granted to the desavoures a stipend of 500 francs. The desavoures firmly established themselves in their respective fields of labor, and came, in fact, to differ only from the curates or pastors in having a smaller salary, and being more under the control of the bishops. This control they tried to escape, but their efforts met with but little success. Pope Gregory XVI decided in favor of the existing order of things. The bishops never remove a desavouer from his parish except for grave reasons. The desavoures form the greater part of the Roman Catholic clergy of France, Belgium, and Rhenish Prussia. See Sibour, Institutions doctrinaires par Morin, Murisier, Praz, Zime, De Cange, etc.; Jacobson, in Herzog, Real-Encyclopaedie, iii, 360.

DESTRUCTION, CITY OF (Isa. xix, 18). See ON.

DESTRUCTION OF BEL AND THE DRAGON, THE HISTORY OF THE, one of the apocryphal books of the Old Testament, found only in the Greek. See APOCYPHRA.

I. Title and Position.—This apocryphal piece, which is called by Theodotion, or in our editions of the Sept., Bih saith Andreal, Bel and the Dragon, and in the Vulg. The History of Bel and the Great Serpent, has in the Sept. the short reading of the ancient text, but in the LXX. and the Apocrypha a word Ἰαλαμαρων αὐτοῦ ὑπὲρ τῆς γῆς τοῦ Αἰδώς, A Part of the Prophecy of Habakkuk, the Son of Jesus, of the Tribe of Levi, and is placed at the end of Daniel as a supplemental chapter, forming in the Vulg. the 14th chapter of that prophet. In the English Authorized Version it is entitled in full as above, where it is placed between the History of Susanna and the Prayer of Manasseh. See BEL AND THE DRAGON.

II. Contents.—The plan of the writer is both ingenious and attractive. Cyrus, who was a devout worshipper of Bel, urged Daniel to serve his idol, and refused to accept the miraculous facts that accompanied the enormous sacrifices of twelve great measures of fine flour, forty sheep, and six vessels of wine (ver. 1-5); but Daniel, knowing the deception connected therewith, smiled at it (ver. 7); thereupon the king summoned the priests of Bel, and demanded an explanation from them (ver. 8-10); they, to satisfy him that the idol does consume the sacrifice, told the monarch that he should place it before Bel himself (ver. 11-18). Daniel, however, had ashes strewn on the pavement of the temple, and convinced Cyrus, by the impress of the footstep upon the ashes, that the sumptuous feast prepared for Bel was consumed in the night by the priests, their wives, and their dependents, who came into the temple through secret doors, and the king slew the crafty priests (ver. 11-22). As for the Dragon, who, unlike the dumb Bel, was, as Cyrus urged, a living being (ver. 23, 24), Daniel poisoned it, and then explained, "These are the gods you worship!" (ver. 25-27). But, however greatly enraged at the destroyer of their god, the men of Cyrus did not rend Dana, 1, whom they cast into a den where five lions were seven lions (ver. 28-32). But the angel of the Lord commanded the prophet Habakkuk, in Judea, to go to Babylon to furnish Daniel with food, and when he presented himself before the temple of the locality, the angel carried him by the hair of his head through the air to the lions' den, where he fed and comforted Daniel (ver. 38-39). After seven days Cyrus went to the den to bewail Daniel, "and, behold, Daniel was sitting!"
The king then commanded that he should be taken out, and all his persecutors be thrown in to be instantaneously devoured, and the great Cyrus openly acknowledged the greatness of the God of Israel (ver. 39-42).

This story is read in some of his brethren who had embraced Egyptian superstitions. The book was therefore well adapted to the time, and shows that philosophy was not sufficient to keep men from apostatizing into the most absurd and degrading superstitions.

The time of the writing of John ascends to the age of the Ptolemies, when serpents were still worshipped at Thebes.

Among the difficulties attending this as a portion of the book of Daniel, Jahnn enumerates the denunciating Daniel a priest (xiv, 1), which he conceives to be a confounding of Daniel the prophet with Daniel the priest (Ezra vii, 2; Neh. ii, 2); the order of the text of idolatry is that the king of Judah, Nebuchadnezzar, brought to Babylon; but he conceives all these difficulties to be removed by regarding the whole as a parable, pointing out the vanity of idols, and the impostures of the priests. We are informed by Herodotus that the temple of Bel was destroyed by Xerxes. By the apostles, of course, these apocalypses for the canonicity of this and the other apocryphal additions to Daniel are regarded as wholly insufficient. See deutero-canonical.

IV. Source and Original Language.—The basis of this story is evidently derived from Dan. vii and Ezek. xiii, but the theme is elaborated and interpreted. The Book of Bel and the Great Serpent is a shorter and simpler form of the dragon story in Daniel, and effects the different end. It is not in the nature of such sacred legends to submit to the trammels of fact, or to endeavor to avoid anachronisms. That Daniel, who was of the tribe of Judah, should here be represented as a priest of the tribe of Levi; that he should here be said to have destroyed the temple of Belus which was pulled down by Xerxes, and that the Babylonians should be described as worshippers of living animals, which they never were, are therefore quite in harmony with the character of these legends. Their object is effect, and not fact. The Greek of our editions of the Sept. is the language in which this national story has been worked out by a later hand, and reembellished with stories of Abraham before the idolatrous Greeks. Various fragments of it in Aramaean and Hebrew are given in the Midrash (Bereishith Rabba, c. 68), Josippon ben Goriion (p. 34-57, ed. Breithaupt), and in Delitzsch's work, De Habacucii et ate, which will show the Babylonian and Palestinian shape of these popular traditions. See BEL.

DESTRUCTIONISTS. See ANNHIILATIONISTS.

DESTRUCTIONISM, the general name for all those theories according to which man, in his religious and moral action, is absolutely determined by external or internal motives not belonging to him, and which either deny his freedom or explain it as a mere semblance. In opposition to destructionism, the word indeterminism has been used of a will which is absolutely determined from abroad, but wholly determines itself. Such an absolute indeterminism can only be postulated, however, of that which is determined or determined, on the other hand, can only be attributed to objects whose activity is altogether dependent upon external impulses, as is the case with the objects of nature. Applying the term to man, every branch of the Christian Church holds to some kind of destructionism, inasmuch as he is dependent upon the absolute bunch, and his actions are influenced by impulses not his own
DETRACTION

But it is common to understand by determinism those views of man's dependence upon external influences which destroy his moral responsibility; and, in this sense, various kinds of determinism are distinguished. It is fatalistic or predeterminist if it places an irresistible fatality above even the divine being or economy, as was done by the Greeks in the doctrine of fate, and is still done by the Mohammedans. It is pneumatic if it deduces necessity from the unalterable connection of things, making the individual acts of man, as it were, a sport of the world-soul with itself, as was the case in the cosmic theories of the Indians, in the ethics of the Stoics, in the system of Spinoza, and in certain modern systems. The astrological determinism is a transition from the first to the second kind. Determinism, as a denial of the freedom of will, is explained by the life of the human soul being determined by an evil or hostile materia, as was done by the Parsees, the Gnostics, and the Manichaeans. Different from these ancient materialists are the modern representatives of a materialistic determinism, like La Mettrie, who reduce all human actions to an absolute compulsion by sensorial motives. A subdivision of this determinism is the phrenological determinism which in modern times has found some champions. A subtle form of determinism is found in some rationalistic writers, who explain the self-determination of man as a coercion by inner representations (Priestley) or by determining ideas (Hume). In physics, this subject have divided determinism into mechanical, rational, and metaphysical determinism.—Herzog, Real-Encyklop. iii, 831. See Will; Predestination.

Destrac (Lat. destracctio, from detracctare) means primarily taking off from a thing; and in morals it is the act of deprecating another's reputation. Barrow observes (Works. N. Y. ed., i, 203 sq.) that it differs from slander, which involves an imputation of falsehood; from reviling, which includes bitter and foul language; and from cenusing, which is of a more general purport, extending indifferently to all kinds of persons, qualities, and actions; but destruction especially respects worthy persons, good qualities, and laudable actions, the reputation of which it aims to destroy. It is a fault opposed to commend. "Nothing can be more incongruous with the spirit of the Gospel, the example of Christ, the command of God, and the love of mankind, than a spirit of destruction; and yet there are many who profess to be more happy in showing forth the sin which they have employed in this work; they feed and live upon the supposed infirmities of others; they allow excellence to none; they depreciate every thing that is praised-worthy; and, possessed of no good themselves, they think all others are like them. 'O! my soul, come thou not into their secret; unto their assembly, mine honour, how not thou united!'" (Buck, Theol. Diss. s. v.). "When we consider the motives in which destruction originates, we shall find that most of them spring from, or centre in, malevolence. In some persons there is a lust of distinction, which cannot endure an equal, and burns with a desire to level the presumption of every superior. Under degeneracy this disposition may prevail, it is combined with a desire to eclipse the worth, or to deduct from the excellence of those above, or those on a level of ability or merit with itself. Hence, if we would eradicate every propensity to destruction, it is essentially requisite that we should be imbued with the spirit, and endowed with a consciousness of our own unworthiness, we learn to think and to speak of others more justly as well as more charitably. Some persons of mean talents, slender capacity, gorgelling desires, or little industry, who are too timid to undertake any thing good or great, or too feeble or too indolent to expect any considerable advancement, endeavor to screen themselves from contempt, or to hide their own individual insignificance by depreciating the worth, railing at the audacity, or ridiculing the exertions of those who have more ability, more enterprise, more intellect, and more activity than themselves. There is no integrity, however pure, no worth, however genuine, which can exist in this manner. The state of degeneracy, with its obscurations, to unjust surmises, and wilily misrepresentation; and designing and interested men, who abound in the wisdom of this world, well know how to convert these practices to their own advantage, and to the injury of their neighbor. If destruction be found in a greater degree, or of a more mischievous kind, in a court than in a village, it is only because in the former there is a stronger incitement to its exercise, and more ample space for its operations. Destruction tends to reduce the best men to a level with the worst, and thus to bring worth itself into disrepute. It tends to chill the ardor of doing good, and to produce a general belief that all the virtue which exists among us is imaginary and counterfeit. It involves in itself a high degree of depravity, and is connected with the violation of every moral tie. Is it not adverse to justice? Is it not incompatible with charity? Is it not a plain dereliction of our duty to God? For is it not principally occupied in lessening the estimation of the good and wise, who are more especially the objects of his favor, and the excellence of his rational creation? Must not the practice, therefore, bring us under the divine displeasure? Is there not in the hestab so large a mixture of malevolence as necessarily implies that we are strangers to the love of God; and, if we will persist in it, by this despisal, in a worse manner, makes of us the place of torment in which there are weeping and gnashing of teeth? (Fellows's Body of Theology, ii, 852, 367; Warne's System of Divinity and Morality, ii, 90.)"

Devel (Heb. Devel, דֶּלוֹל, according to Gesenius, invocation of God; according to Furst, acquiescent with God; Sept. Parousia; Vulg. Deus), father of Eliasaph, the "captain (דֶּלוֹל) of the tribe of Gad at the time of the return of the number of the people of Israel (Num. i, 24; vii, 42, 47; x, 20)." B.C. ante 1657. The same man is mentioned again in ii, 14, but here the name appears as Reuel (q. v.), owing to an interchange of the two very similar Hebrew letters ד and ר. In this latter passage the Samaritan, Arabic, and Vulg. retain the D; the Sept., as in other places, has R. The greater weight of evidence is therefore in favor of the reading "Deuel" in both passages. Furst ingeniously suggests (Heb. Handbook) that the name may have been originally Dureel (דֶּלוֹל), which would explain the various readings.

Deurhoff, Willem, was born at Amsterdam in 1650. He did not follow any particular course of study, received no regular education, and followed the business of basket-making during his whole life, yet made himself a name by the originality and vigor of his reasoning faculties. He died in 1717. While following his daily vocations, he studied philosophy and theology, yet without any system or method. Among the philosophers he followed more especially Spinoza and Des Cartes, particularly the latter; yet he thought he could improve on Des Cartes's system. The peculiar philisophico-theological systems which he thus originated is presented explained in his various writings, which, however, are now become scarce, and contain, besides, many heterodox principles. See Bruckner Histioria Philosophiae (tom. iv, pt. ii. Lpz. 1744, p. 291, 704, 720); Herzog, Real-Encyklop. iii, 365.

Deuédít, or Deodátus, Pors, succeeded Boniface IV, 615, and died 618. His reign is marked by quite wonderful miracles, and by false decreals. His name is among the saints (Nov. 9).

Deus misericátur (God have mercy), the Latin name of the sixty-seventh psalm, derived from its first words, which, in the Church of England, may be used in the evening prayer, after the second lesson, instead of the name d'miskit, except on the twelfth day of the
DEUSING

DEUTERO-CANONICAL

month, on which it occurs among the psalms for the day.

DEUSING, Herman, son of Anthony Deising, a distinguished physician, mathematician, and professor, was born in Groningen, March 14, 1584. He was brought up to the study of law, but, taking a dislike to it, he relinquished it, and devoted himself exclusively to theological studies. In 1609 he published his Historia allegorica Vetoris et Non Testamenti, juncta revolutionibus mysterii s. s. triados. By this work he made himself known as a typical and mystical theologian. The typical interpretation of the Scriptures was pushed to its extreme limits. The doctrine of the Trinity was allegorically explained. The result was, that he was accused of heresy, and debarred from the Lord's Supper. He wrote two works in his own defence, one in Dutch and the other in Latin. In 1700 appeared his Commentarius mysticus de dCcubatione et explicatio mysticum historiae matris hemorrhoeas et filia sarae, tum parabolae de Epulone divite et Lazaro mendico. In 1715 he gave to the world his Mysterium s. s. triados, in which he fully developed his allegorical views of this doctrine. He also contributed several exegetical articles to the Bibliotheca Bremensis. He gradually receded from his extreme views. The Groningen Consistory repealed the sentence of suspension that they had passed against him. He now connected himself with the Walloon Church. He was permitted to spend the remainder of his days in peace, and he died January 3, 1722, in the city of his birth.

Deutero-Canonical Books of the Old Testament, a term applied in modern times to denote those sacred books which, originally denominatet ecclesiastical and apocryphal, were not in the Jewish or Hebrew Canon, but, as being contained in the old Greek versions, were publicly read in the early Christian Church. See Apocrypha. For the suspected books of the New Testament, see Antilegomena.

1. It is acknowledged by all that these books never had a place in the Jewish Canon. The Roman Catholic professor Alber, of Pesth (who considers them as of equal authority with the received books of the Hebrew Canon), observes: “The Deutero-canonical books are those which the Jews had not in their Canon, but are, notwithstanding, received by the Christian Church, concerning which, on this very account of their not having been in the Jewish Canon, there has existed some doubt even in the Church” (Institut. Hermeneut. vol. i, ch. viii, ix). Josephus, a contemporary of the apostles, after describing the Jewish Canon (Apion, i, 8), which says consists of twenty-two books, remarks: “But from the reign of Artaxerxes to within our memory there have been several things committed to writing which, however, have not acquired the same degree of credit and authority as the former books, insomuch as the tradition and succession of the prophets were less certain.” It has been shown by Hornemann (Observ. ad illustr. doctr. de Canon. V. T. ex Philo) that, although Philo was acquainted with the books in question, he has not cited any of them, at least with the view of establishing any proposition.

2. Among the early Christian writers, Jerome, in his Preface, gives us the most complete information that we possess regarding the authority of these books in his time. After enumerating the twenty-two books of the Hebrew Canon, consisting of the Law, the Prophets, and the Hagiographa, he adds: “This prologue I write as a preface to the books to be translated by us from the Hebrew into Latin, that we may know that all the books which are not of this number are apocryphal.” Thus Leukanius, the translator of the Wisdom of Solomon, to whom the preface is ascribed to Solomon as its author, and the book of Jesus the son of Sirach, Judith, Tobit, and the Shepherd, are not in the Canon.” Again, in the preface to his translation of the books of Solomon from the Hebrew, he observes: “These books (Proverbs, Ecclesiastes, and Canticles) only are Solomon’s. There is also the book of Jesus the son of Sirach, and another pseudo-epigraphal book, called the Wisdom of Solomon; the former of which I have seen in Hebrew, called not Ecclesiasticus, as among the Latins, but the Parables; with which likewise have been joined Ecclesiastes and the Song of Songs, that the collection might be the better compared, and a picture of Solomon both as a judge and a king. The second is not to be found at all among the Hebrews, and the style plainly evinces its Greek original: some ancient writers say it is a work of Philo the Jew. As, therefore, the Church reads Judith and Tobit, and the books of Maccabees, but does not receive them among the Canonical Scriptures, so likewise it may receive these books for the edification of the people, but not as of authority for proving any doctrines of religion (ad eminiscendum plebis, non ad auctoritatem ecclesiasticorum dogmatum confirmandum).” Of Baruch he says that he does “not translate it because it was not in Hebrew, nor received by the Jews.” He never translated Wisdom, Ecclesiastes, or either of the books of Maccabees, and observes that “such books as are not of the twenty-four letters are to be utterly rejected” (Pref. ad Exeunt). In his Preface to Judith he says, in like manner, “Among the Hebrews this book is read among the Hagiographa (or, according to others, Scripture authorities); the authority is not judged sufficient to support disputed matters.” He adds, at the same time, that “the Council of Nice is said to have included it in the catalogue of the holy Scriptures.” We have, however, no authority for supposing that the Council of Nice ever formed such a catalogue. There is no account of the matter in any of its acts which have reached us. There is, indeed, a catalogue, as is observed by Mr. Jones, attributed by Pappus, in his Synodicon, to this council, with this relation: “That the bishops there assembled were, by a very extraordinary miracle, convinced which were inspired and which were apocryphal books, after this manner: Having put all the books that laid claim to inspiration under the communion-table (την θαυματουργον κοινωνίαν) in a church, they prayed to God that those which were of divine inspiration might be found above or upon the table, and those which were apocryphal might be found under; and, accordingly, as they prayed, they perceived this very evident, acknowledged to be a false, and cardinal Bellarmine (De Verbo Dei) admits that there could have been no canon determined on by the Nicene Council, as in that case none would have ventured to reject it; but he supposes that Jerome may have found in some of its acts, now lost, some citation of the book of Judith. Bellarmine further admits that in Jerome’s time the ecclesiastical books, although read in the churches, were neither in the Jewish nor Christian Canon, insomuch as no general council had yet determined anything concerning them.

Buninus made the same distinction with regard to the books of the Old Testament which Jerome did. After enumerating the books of the Old and New Testaments exactly according to the Jewish Canon, saying, “These are the volumes which the fathers have included in the Canon, and out of which they would have us prove the doctrines of our faith,” he adds, “however, it ought to be observed that there are at least two of which are not canonical, but have been called by our forefathers ecclesiastical, as the Wisdom of Solomon, and another called the Wisdom of the Son of Sirach, which among the Latins is called by the general name of Ecclesiasticus, by which title is denoted not the author of the book, but the quality of the writing.” Of the same description is the book of the Shepherd of Hermes, which is called ’Two Ways, or the Judgment of Peter;’ all which they would have to be read in the churches, but not alleged by way of
authority for proving articles of faith. Other Scriptures they call apocryphal, which they would not have to be read in churches" (In Synod. Apost.).

There have been thus three divisions made by the ancients, viz. the Canonical Scriptures, the Ecclesiastical, and the Apocryphal; or, otherwise, the Canon is said to consist of two parts, which are two kinds, viz. those which, having nothing contrary to the faith, may be profitably read, although not authentic, and those which are injurious and contrary to the faith. It is, however, maintained by professor Alber that, when Jerome and Rufinus said the ecclesiastical books were to be read for confirming articles of faith, they only meant that they were not to be employed in controversies with the Jews, who did not acknowledge their authority. These fathers, however, certainly put them into the same rank with the Shepherd of Hermas.

The earliest catalogue which we possess of the books of Scripture is that of Melito, bishop of Sardis, preserved by Eusebius. From his statement, written in the year 170, it seems evident that there had then been no catalogue authorized by the Church or any public body. He enumerates the books of the Jewish Canon only, from which, however, he omits the book of Esther (q. v.).

The first catalogue of the Holy Scriptures, drawn up by any public body in the Christian Church, which has come down to us, is that of the Council of Laodicea, in Phrygia, supposed to be held about the year 365. In the last two canons of this council, as we now have them, there is an enumeration of the books of Scripture nearly conformable, in the Old Testament, to the Jewish Canon. The canons are in these words: "That these psalms ought not to be said in the church, nor any books but canonical, but only the canonical books of the Old Testament. The books of the New Testament which ought to be read are these: 1. Genesis; 2. Exodus; 3. Leviticus; 4. Numbers; 5. Deuteronomy; 6. Joshua; 7. Judges; 8. Ruth; 9. 1 Samuel; 10. 2 Samuel; 11. 1 and 2 Kings; 10. 3 and 4 Kings; 11. 1 and 2 Chronicles; 12. 1 and 2 Esdras; 13. the book of Esther; 14. Proverbs; 15. Ecclesiastes; 16. Canticles; 17. Job; 18. the Twelve Prophets; 19. Isaiah; 20. Jeremiah and Baruch, the Lamentations and the Epistle; 21. Ezekiel; 22. Daniel." This catalogue is not, however, universally acknowledged to be genuine. "Possibly learned men," says Lardner, "according to the different notions of the party they have been engaged in, have been led to reconsider the last canon; some because of its omitting the apocryphal books of the Old Testament, and others because it has not the book of Revelation." In answer to this, Dr. Hammond in his "History of the Church," and Dr. Paley in his "Protestants and Catholics have equally disparaged this synod." "It is said," remarks Lardner, "that the canons of this council were received and adopted by some General Councils in after times; nevertheless perhaps it would be difficult to show that those General Councils received the last canon, and exactly approved the catalogue of said books therein contained, without any addition or diminution, as we now have it" (see Manis's Concilia, ii. 574).

But, besides the Hebrew canon, the reader will have observed that there were certain other books publicly read in the primitive Church, and treated with a high degree of respect, although not considered by the Hebrews, from whom they were derived (see the passage above cited from Josephus), as of equal authority with the former. These books seem to have been included in the copies of the Septuagint, which was generally made use of by the sacred writers of the New Testament. It is not easy to appear whether the apocryphal gives any caution against the reading of these books, and it has even been supposed that they have referred to them. Others, however, have maintained that the principal passages to which they have referred (for it is not pretended that they have cited them) are from the apocryphal books. The following are the passages here alluded to:

Some of the apocryphal books, however, had not been extant more than a hundred and thirty years at most at the Christian era, and could only have obtained a place in the Greek Scriptures a short time before this period; but the only copies of the Scriptures in existence for the first three hundred years after Christ, either among the Jews or Christians of Greece, Italy, or Africa, contained these books without any mark of disapprobation that we know. The Hebrew Bible and language were quite unknown to them during this period, and the most learned were, probably, but ill informed on the subject, at least before Jerome's translation of the Scriptures from the original Hebrew. The Latin versions before his time were all made from the Septuagint. We do not find any catalogue of these writings before the Council of Hippo, but only individual notices of separate books. Thus Clement of Alexandria (Stromata, A.D. 211) cites the Wisdom of Solomon and Ecclesiasticus, and Origen refers to several of these books, treating them with a high degree of veneration. There is," says Eusebius, "an apocryphal book, Africanius, addressed to Origen, in which he intimates his doubt on the history of Susannah in Daniel, as if it were a spurious and fictitious composition; to which Origen wrote a very full answer." These epistles are both extant. Origen, at great length, vindicates these parts of the Greek version—for he acknowledges that they were not in the Hebrew—from the objections of Africanius, asserting that they were true and genuine, and made use of in Greek among all the churches of the Gentiles, and that we should not attend to the fraudulent comments of the Jews, but take that only for true in the holy Scriptures which the seventy had translated, for that this only was confirmed by apostolic authority. In the same letter he cites the book of Tobit, and in his second book, De Principiis, he even speaks of the Shepherd of Hermas as divinely inspired. Origen, however, uses very different language in regard to the book of Enoch, the Testament of the Twelve Patriarchs, and the Assumption of Moses.

The local Council of Hippo, held in the year of Christ 398, at which Augustine, afterwards bishop of Hippo, was present, formed a catalogue of the sacred books of the Old and New Testament, in which the ecclesiastical books were all included. They are inserted in the following order in its 36th Canon, viz.:

That nothing be read in the church besides the Canonical Scriptures. Under the name of Canonical Scriptures are reckoned Genesis, Exodus, Leviticus, Numbers, Deuteronomy, Joshua, Judges, Ruth, 1 and 2 Samuel, 1 and 2 Kings, Psalms of David, 5 books of Solomon, 12 books of the Prophets, Isaiah, Jeremiah, Daniel, Ezekiel, Tobit, Judith, 6 books, 2 books, Maccabees, 4 books. (For the books of the New Testament, see Apocrypha.) But for the confirmation of this canon the churches beyond the seas are to be consulted. The Franks of the 2nd and 3rd Martyrs were also permitted to be read on their anniversaries.

The third Council of Carthage, generally believed to have been held in 397, at which Aurelius, bishop of Carthage, presided, and at which Augustine was present, consisting in all of forty-four bishops, adopted the same catalogue, which was confirmed at the fourth
Council of Carthage, held in the year 419. The reference said to have been made from the third Council of Carthage, held in 417, was perhaps erroneous, as a manuscript anthocytism in the copies of the acts of this council (see L’Abbe’s Concilia), as the pontificate of Boniface did not commence before 417. It has therefore been conjectured that this reference belongs to the fourth council.

As Augustine had great influence at these Councils, it must be of importance to ascertain his private sentiments on this subject. This eminent man, who was born in 354, consecrated bishop of Hippo (the present Bona) in 385, and died in 430, in the seventy-sixth year of his age, writes as follows in the year 397:

"The entire Canon of Scripture is comprised in these books. The Law, Psalms, Proverbs, Ecclesiastes, Leviticus, Numbers, Deuteronomy, 1 of Joshua, 1 of Judges, 1 small book called Ruth, which seems rather to belong to the beginning of the Kings, the books of the Kings and of the Re- mains, not following one another, but parallel to each other. These are historical books which contain a succession of times in the order of events. There are others which do not observe the order of time, and are unconnected together, as Job, Tobit, Esther, and Judith, the 2 books of Maccabees, and the 2 books of Esdras. They do not do more than arrange in order of a regular succession of events, after that contained in the Kingdoms and Re- mains. Next are the Prophets, among which is 1 book of Isaiah, 1 of Jeremiah, and 1 of Solomon; 4 of Isaiah, 3 of Jeremiah, in 3 books; 1 of Ezekiel, and 6 of Ezechiel; 6 more of Hosea, Joel, Obadiah, etc. All these belong to or contain the fulfillment of the promises of the Old Testament. Wisdom, Ecclesiastes, are called Solomon’s for no other reason than because they contain the wisdom and wisdom of the Old Testament: for it is a very general opinion that they were written by Jesus the son of Simeon. The Psalms, however, since they are admitted into the Re- mains, are to be reckoned among prophetic books. The rest are the books of those who are properly called prophets, as the Prophets of the 12 Prophets, of the 19 Prophets, which being found together, and never separated, are reckoned 1 book. The names of which prophetic books are these: Hosea, Joel, Amos, Obadiah, Jo- nah, Micah, Nahum, Habakkuk, Zephaniah, Haggai, Zechar- aiah, Malachi. After these the four Prophets of large vol- umes, Isaiah, Jeremiah, Daniel, Ezekiel. In these 44 books is contained the authority of the Old Testament (De Doct. Christ.). (For the New, see Antilegomena; they are the same with those now received.)"

It has, indeed, been maintained that Augustine altered his opinion on the subject of the deuto-canoncal books in his Retractions (see Henderson On inspiration, p. 498); but the only passage in this work bearing on the subject, which we can discover, is that wherein he confesses his mistake in terming Ecclesiasticus a prophetic book. Augustine has also been supposed to have testified to the inferior authority of these books, from his saying that one of them was rendered useless place. "The book of Wisdom is not to be rejected, which has served to be recorded for such a long course of years from the step of the readers of the Church of Christ, and to be heard with the veneration of divine authority by the bishop to the humblest of the laics, faith- ful, pious, and the ignorant."

What the result of the reference from Africa to the "churches beyond the seas" may have been, we can only judge from the letter which is said to have been written on the subject by Innocent I, bishop of Rome, to St. Exuperes, bishop of Toulouse, in the year 405. In this letter, which, although disputed, is most probably genuine, Innocent gives the same catalogue as those of the councils of Hippo and Carthage, omitting only the book of Esther.

The next catalogue is that of the Roman Council, drawn up by pope Gelasius and eleven bishops. The genuineness of the acts of this council has been questioned by Pearson, Cave, and the two Basnages, but vindicated by Pagi and Jeremias Jones. The catalogue is identical with the preceding, except in the order of the books.

Some of the most important manuscripts of the Holy Scriptures which have descended to us were written soon after this period. The very ancient Alexandrian MS. now in the British Museum contains the following books in the order which we here give them, together with the annexed catalogue: "Genesis, Exodus, Leviticus, Numbers, Deuteronomy, Joshua, Judges, Ruth—8 books. Kingdoms, 4; Remainia, 2—6 books. Sixties, 6; Psalms, 5; Obadiah, 5; Jonah, 6; Nahum, 7; Ambaces, 8; Zephaniah, 9; Haggai, 10; Zechariah, 11; Malachi, 12; Isaiah, 16; Jeremiah, 14; Ezekiel, 15; Daniel, 16; Esther; Tobit; Judith; Ezra, 2; Maccabees, 4; Psalter and Hymns; Job; Proverbs; Ecclesiastes; 2 Esdras; Wisdom; Wisdom; Jewish; Breviary 3; 6 Gospels; Acts, 1; 7 Catholic Epistles; 14 Epistles of Paul; Revelation; 2 Epistles of Clement; together . . . . . . . . . . . . . . . . . . . . books; Psalms of Solomon." These books are equally incorporated in all the manuscripts of the Latin Vulgate (which was originally translated from the Septuagint). Those which Jerome did not translate from the Hebrew were known as Canonicus or Protestant, and the deuto-canoncal books, which were adopted from the older Latin version.

Although the Canon of Scripture seemed now to be so far settled by the decrees of these councils, all did not conceive themselves bound by them; and it is observed by Jahn (Intro. that) they were not otherwise to be understood than that "the ecclesiastical books enumerated in this catalogue were to be held as useful for the edification of the people, but not to be applied to the confirmation of doctrines of faith." Such appears at least to have been the sentiment of many eminent divines between this period and the 16th century.

8. Bishop Cosin, in his excellent Scholastic History of the Canon, furnishes to this effect a host of quotations from writers of the Middle Ages, including Ven. Bede, John of Damascus, Alcuin, Peter Mauricius, Hugh de St. Victor, cardinal Hugo de St. Cher, the author of the ordinary Gloss, and Nicholas Lyra. Of these, some call the deuto-canoncal books "excellent and useful, but not in the Canon!" others speak of them as "apocryphal, that is, doubtful Scripture," as not having been "written in the time of the prophets, but in that of the priests, under Ptolemy," etc. as not "equaling the sublime dignity of the other books, yet deserving reception for their Edible Instruction," classing them with the writings of Jerome, Augustine, Ambrose, and Bede, and making a marked distinction not only between the Jewish and Christian Canons, but even between parts of the deuto-canoncal writings. Dr. Archibald Alexander also (Canon of the Old and New Testament mentioned) cites several of these books as authoritative; he has, however, in one instance, evidently mistaken Peter Lombard for Peter Comestor, the author of Scholastic History. At the era of the Reformation we find Fabric, Stapulenius, and cardinal Cajetan expressing themselves to the same effect, and the learned Sanetes Pagninii, in his translation of the Bible from the original languages, published at Lyons in 1598 (the first Bible that contained the division into verses with the present figures), dedicated to pope Clement VII, distinguished the ecclesiastical books, which he says were not in the Canons, by the term Hagiographa. For a description of this rare work, see Dr. Robertson, ii., 416. A treatise On the division of verses in the Bible, by Rev. W. Wright, L.L.D.

4. We now arrive at the period of the Reformation when the question of the Canon of Scripture was warmly discussed. Long before this period (viz. in 1590), Withfield published his translation of the Bible, and added as an interesting introduction, the Apocrypha, which is a work in the Hebrew Testament, besides these twenty-five, shall be set among the Apocrypha, that is, without authority of belief. He also, in order to distinguish the Hebrew text from the intercalated interpola- tions, inserted Jerome's notes, rubbed into the body of the text.

Although Martin Luther commenced the publication of his translation of the Bible in 1522, yet, as it was
published in parts, he had not yet made any distinction between the two classes of books, when Lonicer published his edition of the Greek Septuagint at Strasburg in 1526, in which he separated the Deutero-canonical, or Apocryphal, books from those of the Jewish Canon, for which he was commissioned to work for by Montanus. In the second edition of La Long's Bibliotheca Biblica, ii. 268, Arias Montanus went still further, and rejected them altogether. In 1584 the complete edition of Luther's Bible appeared, wherein those books which Jerome had placed inter apocrypha were separated, and placed by themselves between the Old and New Testaments, under the name of "Books which are not to be considered as equal to holy Scripture, yet are useful and good to read." A few years after, the divine of the Council of Trent assembled, and among the earliest subjects of their deliberation was the Canon of Scripture. "The Canon of Augustine," says bishop Marsh, "continued to be the canon of the ruling party. But as there were not wanting persons, especially among the learned, who from time to time recommended the Canon of Jerome, it was necessary for the Council of Trent to decide between the contending parties (Comparative View, p. 97). The Tridentine fathers had consequently no alternative but the choice of the latter. On the 8th of April, 1546, all who were present at the fourth session of the Council of Trent adopted the Canon of Augustine, declaring, "He also is to be anathema who does not receive these entire books, with all their parts, as they have been accustomed to be read in the Catholic Church, and are found in the ancient editions of the Latin Vulgate, as sacred and canonical, and who knowingly and wilfully despises the aforesaid traditions." We are informed by Jahn (Introduction) that this decree did not affect the distinction which the learned had always made between the canonical and apocryphal books, and one of which he refers to the various opinions which still prevailed in his church on the subject, Bernard Lamy (Apparatus Biblicus, ii. 5, denying, and Du Pin (Prolegomena) asserting, that the books of the second canon are of equal authority with those of the first. Those who desire further information will find it in the two accounts of the controversies between the Catholics and the Protestants on this subject—one from the pen of cardinal Pallavicini, the other by father Paul Sarpi, the two eminent historians of the council. Professor Alber, to whom we have already referred, having denied that any such distinction as that maintained by his brother protestants existed in the Catholic Church, insists that both canons possess one and the same authority. The words of Bernard Lamy, however, cited by Jahn, are—"The books of the second canon, although united with the first, are not, however, of the same authority" (Apparat. Bism. ii. 5, p. 835). Alber endeavors to explain this as meaning only that these books had not been canonized by the council of the Council of Trent, and cites a passage from Pallavicini to prove that the anathema was "directed against those Catholica who adopted the views of cardinal Cajetan" (ii. 105). But, however this may be, among other opinions of Luther concerning the Old and New Testament books. That no books should be admitted into the Canon of the Old Testament but those received by the Jews; and that from the New should be excluded the Epistle to the Hebrews, those of James, 2 Peter, 2 and 3 John, Jude, and the Apocalypse." The whole of the books in Dec., Hebrews, Romans, 1 and 2 Corinthians, and the Prayer of Manasses, are considered as canonical by the Council of Trent. But it must be recollected that the decision of the Council of Trent is one by no means peculiar to this council. The third Council of Carthage had considered the same books canonical. "The Council of Trent," says bishop Marsh, "declared no other books to be sacred and canonical than such as had existed from the earliest ages of Christianity, not only in the Latin version of the Old Testament, but even in the ancient Greek version, which is known by the name of the Septuagint. In the manuscripts of the Sept. there is the same intermixture of canonical and apocryphal books. It is a 'Latin version' [although there are in different manuscripts variations in the particular arrangement of single books]. "The Hebrew was inaccessible to the Latin translators in Europe and Africa during the first three centuries." The ecclesiastical books were generally written within a period which could not have extended to more than two thousand years of the advent of Christ. In the choice of the places which were assigned them by the Greek Jews resident in Alexandria and other parts of Egypt, who probably added these books to the Sept. version according as they became gradually approved of, they were directed 'partly by the subjects, partly by their relation to other writings, and partly by the periods in which the recorded transactions are supposed to have happened.' Their insertion shows how highly they were esteemed by the Greek Jews of Egypt; but whether even the Egyptian Jews ascribable to them canonical and divine authority it would not be easy to prove (Marsh's Comparative View, p. 105). The following were the proceedings of the Anglican Church in reference to this subject: In Coverdale's English translation of the Bible, printed in 1535, the deuterocanonical books were divided from the others and printed separately, with the exception of the book of Baruch, which was not separated from the others in this version until the edition of 1550. They had, however, been separated in Matthew's Bible in 1537, prefixed with the words, "the volume of the book called Hagiographa." This Bible contained Olivetan's preface, in which these books were spoken of in somewhat disparaging terms. In Coverdale's first, printed in 1569, the same words and preface were continued; but in the edition of 1549 the word Hagiographa was changed into Apocrypha, which passed through the succeeding editions into King James's Bible. Olivetan's preface was omitted in the Bishop's Bible in 1568, after the framing of the canon in the Thirty-nine Articles of 1563. In the Great Bible, which was the popular English translation before the present authorized version, and which was published in 1569, these books are printed separately with a preface, in which, although not considered of themselves as sufficient to prove any point of Christian doctrine, they are yet treated as a higher authority than any other. In the parallel passages in the margin of this translation, references are made to the deuterocanonical books. In the first edition of the Articles of the Church of England, 1552, no catalogue of the "Holy Scripture" had yet appeared, but in the Articles of 1562 the Canon of St. Jerome was finally adopted in the following order: 5 books of Moses, Joshua, Judges, Ruth, 1 and 2 Samuel; 1 and 2 Kings, 1 and 2 Chronicles, 1 and 2 Esdras, Esther, Job, Psalms, Proverbs, Ecclesiastes, Cantica, four Prophets the Greater, twelve Prophets the Less. In the 6th Article it is declared that in the name of the Holy Scripture we do understand those books only which are canonical books that of whose authority was never any doubt in the Church," and that the other books (as Jerome saith) the Church doth read for example of life and instruction of manners, but yet it doth not apply them to establish any doctrine." The books which the article then enumerates, with one exception, are 1 and 2 Maccabees. In the rest of the book of Esther, Wisdom, Jesus the son of Sirach, Baruch the Prophet, the Song of the Children, the Story of Susanna, Bel and the Dragon, the Prayer of Manasses, and 1 and 2 Maccabees. It is not, however, altogether correct, in point of fact, in including in the number of books thus referred to by Jerome as read by the Church for edification the third and fourth
DEUTERO-CANONICAL 766

books of Esdras. These books were equally rejected by the Church of Rome and by Luther, who did not translate them. The Church of England further declared that "all the books of the New Testament, as they are commonly received, we do receive and account them canonical." The Church of England has herein followed the Councils of Hippo and Carthage. The phrase "of whose authority was never any doubt in the Church," refers therefore more strictly to the books of the Old Testament than to the New, for we have already seen that doubts did exist respecting the Apocrypha. In the first book of Homilies, published in 1547, and the second in 1560, both confirmed by the Thirty-fifth Article of 1563, the deuterocanonical books are cited as "Scripture," and treated with the same reverence as the other books in the Bible, and in the preface to the book of Common Prayer they are alluded to as being "agreeable to" the Holy Scriptures.

The Helvetic Confession, dated 1st of March, 1566, has the following expression respecting the apocryphal books: "We do not deny that certain books of the Old Testament were named by the ancients apocryphal, by others ecclesiastical, as being read in the churches, but not allowed for authority in matters of belief; as Augustine, in the 18th book of the City of God, ch. xxxviii, relates that the names and books of certain prophets were added in the books of Kings, but adds that these were not in the Canon, and that therefore they were not written for piety." This Confession of the Dutch churches (dated the same year) is more full. After recounting the canonical books, "respecting which no controversy existed," it adds, "We make a distinction between these and such as are called apocryphal, which may indeed be read in the Church, and proofs added from them, so far as they agree with the canonical books; but their authority and force are by no means so that any article of faith may be certainly declared from their testimony alone, still less that they can impugn or detract from the authority of the others." They add, as their reason for receiving the canonical books, that "it is not so much because the Church receives them, as that the Holy Spirit testifies to our consciences that they have come from God; and chiefly on this account, because they themselves bear testimony to their own authority and sanctity, so that even the blind may see the fulfilment of all things predicted in them, as it were with the eyes of their own hearts." The Westminster Confession proceeded on the same principle, but treated the books of the second canon with less ceremony. After enumerating the canonical books (ascribing thirteen epistles only to Paul), they proceed to say that "books called Apocrypha, not being of divine confirmation, are no part of the Canon of Scripture, and therefore of no authority in the Church of God, nor to be any otherwise approved or made use of than other human writings." And again: "The authority of Holy Scripture, for which it ought to be believed and obeyed, depended not on the testimony or approbation of the world; but on the authority of God, and the agreement of the Church, and the whole authority of Scripture. And for this reason the authority of the world is not at all to be considered with the authority of the Word of God. We may be moved and induced by the Church to a birtch and reverent esteem of the Holy Scriptures; and the heaviness of the matter, the efficacy of the doctrine, the majesty of the style, etc., are arguments whereby it doth abundantly appear that the Word of God is there. But the authority of the Scripture, and the authority of the Church, are the same thing. As that is the light, and putting forth, our full persuasion and assurance of the infallible truth and divine authority thereof is from the inward work of the Holy Spirit, being witness by and with the Word in our hearts."

Luther (on 1 Cor. iii, 5, 10) had declared that the "teaching of the Church in Scriptures should be acknowledged as divine or not was the following: "Do they preach Jesus Christ or not?" And, among the moderns, Dr. Trenchen (Vorweisen über die Dogmatik, 1829, i, 421 sq.) has maintained a somewhat similar principle (see Gaussen's Theopompaecia). The Confession of Augsburg, dated in 1531, contains no article whatever on the deuterocanonical books. Lutherans appear to have any other canon than Luther's Bible. For the sentiments of the Greek Church, see Esdras; Esther; Macabees.

5. We shall add a few words on the grounds and authorities adopted by different parties for deciding this question. Whether it is necessary for the Church to accept or reject the deuterocanonical books, or whether, if rejected, it is necessary to add them to the canon, is a question of some importance. Mr. Jeremiah Jones furnishes us with three different views on this subject. "The first," he says, "is the opinion of the Papists, who have generally affirmed, in their controversy with the Protestants, that the authority of the Scriptures depends upon, or is derived from, the power of their Church. By the authority of the Church, those authors plainly mean a power lodged in the Church of Rome and her synods, of determination, what books are the word of God, than which nothing can be more absurd or contrary to common sense; for, if so, it is possible, nay, it is easy for them to make a book which is not divine to be so." And he maintains that "it is impossible for other churches to decide on the fables, or the infidel books of Celsius, Julian, and Porphyry, might become a part of the New Testament." But the fact must not be lost sight of that the Church has never pretended to exercise a power of this description. Bishop Mash, referring to this subject, observes: "The Council of Trent assumed the privilege of raising to the rank of canonical authority what was generally acknowledged to have no such authority, is a charge which cannot be made without injustice; the power of declaring canonical a book which has never laid claim to that title is a power not exercised even by the Church of Rome. In this respect it acts like other churches; it sits in judgment on existing claims, and determines whether they are valid or not." From certain expressions of divines, who have asserted that the Scriptures would have no authority whatever without the testimony of the Church, it has been supposed that they ascribed to the Church an arbitrary power over these divine books; Bellarmine, therefore, has drawn a distinction between the objective and subjective authority of the Scriptures, their authority in themselves, and that which they have in respect to us. Thus Augustine said that he would not believe the Gospel but for the authority of the Church, adding, however, that the invitation of the Church to adopt the doctrine is the first step to its being illumined by the Spirit of God (Confessions, ii. 9).

Another principle was that adopted by all the reformed communions (except the Anglican Church), viz., to use Mr. Jones's words, that "there are inward or innate evidences in the Scriptures, which, applied by the illumination or testimony of the Holy Spirit, are the only true proofs of their being the Word of God; or, to use the words of the French reformed communion in its Confession, which harmonize with the methods adopted by the Scotch and Belgian communions, that upon the internal persuasion of the Spirit they knew the Canons to have been thus inspired; which indicates the same thing; for the soul of man, when that is enlightened by the Holy Ghost?" This he conceives to be of a very extraordinary nature. "Can it be supposed," he asks, "that out of ten thousand books, private Christians, or even our most learned reformers, should by any internal evidence agree precisely on the number of twenty-seven, which are now esteemed canonical, induced thereby that this book is the Word of God; yet those others of the being written by the inspiration of the Holy Ghost?" This he conceives to be folly and madness, and an assumption of "immediate inspiration." "It first supposes the books to be inspired, and then proves that they are so because they are so." This is only an argument which the bishop Burnet, to him who was opposed in it, if it be one at all. "For my part," said the celebrated Richard Baxter, "I confess I could never boast of any such testimony or light of the Spirit, nor reason ne-
Deuteronomy (in Heb. the title is taken, like most of the other books, from the initial words, דְּבַטְרָו יִרְמָיָה, "These are the words," or simply יִרְמַיָה, "Words;" in the Sept. Διατροφάνειαν, second law, as being a repetition of the Law; Vulg. Deuteronomium: called also by the later Jews דְּבַטְרְסָה, duplicate of the Law, and דְּבַטְרָא דְּבַטְרָא, book of admonitions), the fifth book of Moses, or the last of the Pentateuch.

It gives an account of the sublime and dignified manner in which Moses terminated that work, the accomplishment of which was his peculiar mission, and in which he transfigured several additional items of history in the recapitulation of his public career. It forms a sacred legacy which he here bequeathed to his people, and very different from those laws which he had announced to them at Sinai. The tone of the law falls here considerably in the background, and the subjectivity (individuality) of the Lawgiver, and his peculiar relation to his people, stand out more prominently. A thoroughly sublime and prophetic spirit pervades all its speeches from beginning to end. The thoughts of the man of God are entirely taken up with the inward concerns of his people, their relations, future fate, and eventful vicissitudes. The Lawgiver here stands amid Israel, warning and commanding, exhorting, surveying and proclaiming the future with marvellous discernment.

1. Contents.—The book consists chiefly of three discourses delivered by Moses shortly before his death. They were spoken to all Israel in the plains of Moab, on the eastern side of the Jordan (1, 1). In the eleventh month of the last year of their wandering, the fortieth year after their exodus from Egypt (i, 5). Subjoined to these discourses are the Song of Moses, the Blessing of Moses, and the story of his death.

2. The first Discourse (i, 1-iv, 40).—After a brief historical introduction (i, 1-5), the speaker recapitulates the chief events of the past forty years in the wilderness, and especially those events which had the most immediate bearing on the entry of the people into the promised land. He enumerates the contests in which they had been engaged with the various tribes who came in their way, and in which their success had always depended upon their obedience; and reminds them of the exclusion from the promised land, first of the former generation because they had been disobedient in the matter of the spies, and next of himself, with whom the Lord was wroth for their sakes (iii, 26). On the appeal to the witness of this past history is then based an earnest and powerful exhortation to obedience to the law. There will be a final trial as at which had brought God's judgment upon them in times past (iv, 3), and would yet bring sorer punishment in the future (iv, 25-26). To this discourse is appended a brief notice of the severing of the three cities of refuge on the east side of the Jordan (iv, 41-48).

2. The second Discourse is introduced, like the first, by an explanation of the circumstances under which it was delivered (iv, 44-49). It extends from ch. v, 1, to xxvi, 19, and contains a recapitulation, with some modifications and additions, of the Law already given on Mount Sinai. Yet it is no bare repetition or naked enactment, but every word shows the heart of the lawgiver full at once of zeal for God and of the most fervent desire for the welfare of his nation. It is the father no less than the legislator who speaks; and while obedience and life are throughout bound up together, it is the obedience of the heart which is the burden of his exhortations. The following are the principal heads of discourse:

a. He begins with that which formed the basis of the whole Mosaic code—the Ten Commandments—and impressively repeats the circumstances under which they were given (v, 1-30).
5. Then follows an exposition of the spirit of the First Table. The love of Jehovah who has done so greatly for Israel, and the utter uprooting of all idol-worship (vii), are the points chiefly insisted upon. But they are also reminded that if idolatry be a snare on the one hand, so is self-righteousness on the other (viii, 10 sq.), and therefore, lest they should be lifted up, the speaker enters at length on the history of their past rebellions (ix, 7—24), and especially of the sins of the golden calf (ix, 9-21).

The true nature of obedience is again emphatically urged (x, 12-26, 8), and the great motives to obedience set forth in God's love and mercy to them as a people (x, 15, 20, 22), as also his signal punishment of the rebellious (xi, 1-6). The blessing and the curse (xii, 1-29) are here further detailed.

c. From the general spirit in which the law should be observed, Moses passes on to the several enactments. Even these are introduced by a solemn charge to the people to destroy all objects of idolatrous worship in the land (xii, 1-8). They are, upon the whole, arranged systematically. We have first the laws touching religion; then those which are to regulate the conduct of the government and the executive; and, lastly, those which concern the private and social life of the people. The whole are framed with express reference to the future occupation of the land of Canaan.

(i) Religious Statutes (xii-xvi, 17).—There is to be but one sanctuary where all offerings are to be offered. Flesh may be eaten anywhere, but sacrifices may only be slain "in the place which the Lord thy God shall choose" (xii, 5-8). All idol propels, all aniconic to idolatry from among themselves, even whole cities if idolatrous, are to be cut off (xiii, 16), and all idolatrous practices to be eschewed (xiv, 1, 2). Next come regulations respecting clean and unclean animals, tithe, the year of release, and the three feasts of the Passover, of Weeks, and of Tabernacles (xv, 3-8, 17).

(2) Governmental and Executive Functions (xvi, 18-xxi, 28).—The laws affecting public personages and defining the authority of the judges (xvi, 18-20) and the priests (xvii, 8-18), the way of proceeding in courts of justice (xviii, 1-18); the law of the king (xviii, 14-20), of the priests, and Levites, and prophets (xviii); of the cities of refuge and of witnesses (xix). The order is not very exact, but, on the whole, the section xvi-xvii is judicious in its character. The passage xvi, 21-xxi, 1, seems strangely out of place. Baumgarten (Comm. in loc.) tries to account for it on the ground of the close connection which must subsist between the true worship of God and righteous rule and judgment. But who does not feel that this is said with more ingenuity than truth?

Next come the laws of war (xx), both as waged (a) generally with other nations, and (b) especially with the inhabitants of Canaan (ver. 17).

(3) Private and Social Injunctions, or laws touching domestic life and the relation of man to man (xxi, 15-xvvi, 19). So Ewald divides, assigning the former part (xxi, 15-39) to the previous section. But they, on the other hand, includes it in the present. The fact is that ver. 10-14 belong to the laws of war, which are treated of in chap. xx, whereas 1-9 seem more naturally to come under the matters discussed in this section. It begins with the relations of the family, possession of land, and treatment of the stranger; and then it touches on the general principles of justice and charity by which men should be actuated (xxiv, 16-22). It concludes with the following confession, which every Israelite is to make when he offers the first-fruits, and which reminds him of what he is as a member of the theocracy, as living in covenant with Jehovah, and greatly blessed by Jehovah. It will be observed that no pains are taken here, or indeed generally in the Mosaic legislation, to keep the several provisions of the law considered as moral, ritual, and ceremonial, apart from each other by any clear line. But there is in this discourse a very manifest gradual descent from the higher ground to the lower. The speaker begins by setting forth Jehovah himself as the great object of love and worship; thence he passes [1.] to the Religious, [2.] to the Political, and [3.] to the Social law.

3. In the third Discourse (xxvii, 1-xxx, 20), the elders of Israel are associated with Moses. The people are commanded to set up stones upon Mount Ebal, and on them to write "all the words of this law." Then follow the several curses to be pronounced by the Levites on Ebal (xxvii, 14-26), and the blessing on Gerizim (xxviii, 14-16). How terrible will be the punishment of any neglect of this law is further portrayed in the vivid words of a prophecy but too fearfully verified in the subsequent history of the people. The subject of this discourse is briefly "The Blessing and the Curse." The prophetic speeches visibly and gradually increase in energy and urgency, until the perspective of the remotest future of the people of God lies open to the eye of the inspired lawgiver in all its checkered details, when his words resolve themselves into a flight of poetical ecstasy, into the strains of a splendid triumphal song, in which the tone of grief and lamentation meet the heart-rending as the somnolent grace of divine salvation therein is jubilant (ch. xxvii, xxviii).

4. The delivery of the Law as written by Moses (for its still further preservation) to the custody of the Levites, and a charge to the people to bear it read every seven years (xxxi); the Song of Moses spoken in the ears of the people (xxxii, 30-xxxiii, 24); and the blessing of the twelve tribes (xxxiii).

5. The book closes (xxxiv) with an account of the death of Moses, which is first announced to him is xxxii, 48-62. On the authorship of the last chapter, see below.

11. Relation of Deuteronomy to the proceeding books.—It has been an opinion very generally entertained by the more modern critics, as well as by the earlier, that the book of Deuteronomy forms a complete whole in itself, and that it was appended to the other books as a later addition. Only chapters xxxiv, xxxiii, xxxii have been so regarded. The former is, in fact, the work of De Wette, Ewald, and Von Lengerke. De Wette thinks that xxxiii and xxxii have been borrowed from other sources, and that xxxiv is the work of the Esbonist (q.v.). Ewald also supposes xxxii to have been borrowed from another writer, who lived, however (in accordance with his theory), which we shall now consider.

On the other hand, he considers xxxiii to be later, whilst Bleek (Reptert. i, 25) and Tuch (Gen. p. 556) decide that it is Elohistic. Some of these critics imagine that these chapters originally formed the conclusion of the book of Numbers, and that the Deuteronomist tore them away from their proper position. This, however, does not hold with the rest of the Pentateuch, and to give it a fitting conclusion. Genesis and his followers are of opinion that the whole book, as it stands at present, is by the same hand. But it is a question of some interest and importance whether the book of Deuteronomy should be ascribed to another, or one of the authors, of the former portions of the Pentateuch, or whether it is a distinct and independent work. The more conservative critics of the school of Hengstenberg contend that Deuteronomy forms an integral part of the Pentateuch, which is throughout to be ascribed to Moses. Others, as Stähelin and Delitzsch, have given reasons for believing that it was written by a later historian; whilst others again, as Ewald and De Wette, are in favor of a different author.

The chief grounds on which the last opinion rests
are the many variations and additions to be found in Deuteronomy, both in the historical and legal portions, as well as the observable difference of style and phrasing. It is necessary, therefore, before we come to consider more directly the question of authorship, to take into account the alleged peculiarities; and it may be well to enumerate the principal discrepancies, additions, etc., as given by De Wette in the last edition of his Einleitung (many of his former objections he afterwards abandoned), and to subjoin the replies and explanations which they have called forth.

(4.) Discrepancies alleged to exist between the historical portions of Deuteronomy and the earlier books are the following:

(1.) The appointment of judges (i, 6-18) is at variance with the account in Exod. xviii. It is referred to a different time, being placed after the departure of the people from Horeb (ver. 6), whereas in Exodus it is said to have occurred during their encampment before the mount (Exod. xviii, 5). The circumstances are different, and apparently it is mixed up with the choosing of the seventy elders (Num. xi, 11-17). To this it has been answered, that although Deut. i, 6 mentions the departure from Sinai, yet Deut. i, 9-17 evidently refers to a scene completely different from there, as is shown by comparing the expression "at that time," ver. 9, with the same expression in ver. 18. The speaker, as is not unnatural in animated discourse, checks himself and goes back to take notice of an important circumstance prior to one which he has already mentioned. This is manifest, because ver. 19 is so clearly resumptive of ver. 6. Again, there is no force in the objection that Jethro's counsel is here passed over in silence. When making allusion to a well-known historical fact, it is unnecessary for the speaker to enter into details. This at most is an omission, not a contradiction. Lastly, the story in Exodus is perfectly distinct from that in Numbers, the confusion of the two here. Nothing is said of the institution of the seventy in Deut., probably because the office was only temporary, and if it did cease before the death of Moses, was not intended to be perpetuated in the promised land. (So in substance Ranke, Lengerke, Hengstenberg, Hævernick, Sählin.)

(2.) Chap. i, 22 is thought to be at variance with Num. xiii, 2, because here Moses is said to have sent the spies into Canaan at the suggestion of the people, whereas there God is said to have commanded the messenger to proceed on his own authority. The people make the request; Moses refers it to God, who then gives it His sanction. In the historical book of Numbers the divine command only is mentioned. Here, where the lawyer's deals so largely with the feelings and conduct of the people themselves, he remarks the point that the request originated with themselves, and also of the circumstances out of which that request sprang (ver. 20, 21). These are not mentioned in the history. The objection, it may be remarked, is precisely of the same kind as that which in the N. T. is urged against the reconciliation of Gal. ii, 2 with Acts xvi, 2, 3. Both admit of a similar explanation.

(3.) Chap. i, 44, "And the Amorites which dwelt in that mountain," etc., whereas in the story of the same event, Num. xiv, 45-45, Amalekites are mentioned. Answer: in this latter passage not only Amalekites, but Canaanites, are said to have come down against the Israelites, and here not for "Amalekites," but for "Canaanites," being the most powerful of all the Canaanitic tribes (comp. Gen. xvii, 18; Deut. i, 7); and the Amalekites are not named, but hinted at, when it is said, "they destroyed you in Sir," where, according to 1 Chron. iv, 45, they dwelt (so Hengst., ii, 492).

(4.) Chap. ii, 3-8, confused and at variance with Num. xx, 14-21, and xxi, 4. In the former we read (ver. 4), "Ye are to pass through the coast of your brethren, the children of Esau." In the latter (ver. 20), "And he said, Thou shalt not go through. And Edom came out against him," etc. But, according to Deuteronomy, that part of the Edomitic territory only was traversed which lay to the north of Edom; and Edom may be well to enumerate the principal discrepancies, additions, etc., as given by De Wette in the last edition of his Einleitung (many of his former objections he afterwards abandoned), and to subjoin the replies and explanations which they have called forth.

(5.) There is a difference in the account of the encampments of the Israelites as given Deut. x, 6, 7, compared with Num. xx, 23; xxxii, 30 and 37. In Deut. i, 1 it is said that the order of encampment was this: Bene-jaakan; 2. Mosera (where Aaron dies); 3. Gudodah; 4. Jotbath. In Numbers it is, 1. Mosera; 2. Bene-jaakan; 3. Hor-hagidgad; 4. Jotbath. Then follow the stations Ebronah, Ezion-geber, Kadesh, and Mount Hor, and it is at this last that Aaron dies. (It is remarkable here that no account is given of the stations between Kadesh and Mount Hor, where there is no mention of a desert route.) Various attempts have been made to reconcile these accounts. The explanation given by Kurtz (Atlas zur Gesch. d. A. B. 20) is, on the whole, the most satisfactory. He says: "In the first month of the fortieth year the whole congregation comes a second time to the wilderness of Zin, which is Kadesh (Num. xxxiii, 36). On the down-route to Ezion-geber they had encamped at the several stations Moserah (or Moserah), Bene-jaakan, Hor-hagidgad, and Jotbath. But now, again departing from Kadesh, they go to Mount Hor, 'in the edge of the land of Edom' (ver. 37, 38), or to Moserah (Deut. x, 6, 7), this last being in the desert route of the wilderness of Moser-ah, Gudodah, and Jotbath were also visited about this time, i.e., a second time, after the second halt at Kadesh." See EXOD.

(6.) But this is not so much a discrepancy as a peculiarity of the writer: in Deut. the usual name for the mountain on which the law was given is Horeb, only once (xxxiii, 2) Sinai; whereas in the other books Sinai is far more common than Horeb. The answer given is that Horeb was the general name of the whole mountain range, Sinai the particular mountain on which the law was delivered; and that Horeb, the more general and well-known name, was employed in accordance with the historical style of the Hebrews, in order to bring out the contrast between the Sinaitic giving of the law, and the giving of the law in the land of Moab (Deut. i, 5; xxii, 1). So Keil. See HOREB.

(11.) Additions.—I. In the History. (a) The command of God to leave Horeb, Deut. i, 6, 7, not mentioned in Numbers. The Amorites were formerly the most powerful of all the Canaanitic tribes (comp. Gen. xvi, 18; Deut. i, 7); and the Amalekites are not named, but hinted at, when it is said, "they destroyed you in Sir," where, according to 1 Chron. iv, 45, they dwelt (so Hengst., ii, 492).
to fight with the Moabites and Ammonites, Deut. ii. 9, 10, 19, or with the Edomites, but to buy of them food and water, ii. 4-8; the valuable historical notices which are given respecting the earlier inhabitants of the countries of Moab, and Ammon, and of Mount Seir, ii. 10-12; and of the sixty foreign cities of Bashan, iii. 4; the king of the country who was "of the remnant of giants," iii. 11; the different names of Hermon, iii. 9; the wilderness of Kedemoth, ii. 26; and the more detailed account of the attack of the Amalekites, xxv, 17, 18, compared with Exod. xxi, 8.

2. In the Law. The appointment of the cities of refuge, as provided with Num. xxxv, 14 and Deut. iv. 41; of one particular place for the solemn worship of God, where all offerings, tithes, etc., are to be brought, Deut. xii, 5, 6, whilst the restriction with regard to the slaying of animals only at the door of the tabernacle of the congregation (Lev. xix, 1-7) is done away, 15, 20, 21; the regulations respecting tithes to be brought with the sacrifices and burnt-offerings to the appointed place, Deut. xii. 6, 11, 17; xiv. 22, etc.; xxv. 12; concerning false prophets and seducers to idolatry and those that hearken unto them, xiii; concerning the king and the manner of the kingdom, xvi. 14, etc.; the prophets, xviii. 15, etc.; war and peace, xxii. 34, etc.; the law of female captives; of first-born sons by a double marriage; of disobedient sons; of those who suffer death by hanging, xxii; the laws in xxii, 5-8, 13-21; of divorce, xxiv, 1, and various lesser enactments, xxiii and xxv; the form of thanksgiving in offering the first-fruits, xxxi; the command to write the law upon stones, xxxii, and to read it before all Israel at the Feast of Tabernacles, xxxi, 10-18.

Many others are rather extensions or modifications of, than additions to, existing laws, as, for instance, the law of the Hebrew slave, Deut. xv. 12, etc. compared with xxxiii. 19; the fuller directions in Deut. xv. 19-29; xxxvi. 1-11, as compared with the briefer notices, Exod. xiii. 12; xxi. 19.

All these, however, afford no real difficulty in identifying the author with that of the preceding books, on the supposition that it was Moses himself, who, as the proponent of the law and the director of the history, was competent to expand and illustrate both, and, indeed, could hardly fail to do so, were he other than a mechanical copyst.

III. Date of Composition. — Was the book really written, as its language certainly implies, before the entry of Israel into the Promised Land? Not only does it seem that the different poems of the book were delivered in the plains of Moab, in the last month of the 40 years' wandering, and when the people were just about to enter Canaan (i, 1-5), but he tells us with still further exactness that all the words of this Law were written at the same time in the book (xxxii, 9). Moreover, the fact that the goodly land lay even now before their eyes seems everywhere to be uppermost in the thoughts of the legislator, and to lend a peculiar solemnity to his words. Hence we continually meet with such expressions as "when Jehovah thy God bringeth thee into the land which He hath sworn to thy fathers to give thee," or "whither thou goest today to the city of dB." The theology is so constant, and seems to fall in so naturally with the general tone and character of the book, that to suppose it was written long after the settlement of the Israelites in Canaan, in the reign of Solomon (De Wette, Lengerke, and others), or in that of Manasseh (Cowley, only to name the book a historical romance, but to attribute very considerable inventive skill to the author (as Ewald in fact does).

De Wette argues, indeed, that the character of the laws is such as of itself to suppose a long residence in the land of Canaan. He instances the allusion to the temple (xii. and xvi. 1-7), the provision for the right discharge of the Kingly and prophetic office, the rules for civil and military organization and the state of the Levites, who are represented as living without cities (though such are granted to them in Num. xxxvi) and without tithes (allotted to them in Num. xviii, 29, etc.). But in the passages cited the Temple is an assumption, much less is it spoken of as already existing; and the contrary is "The place which the Lord your God shall choose." Again, to suppose that Moses was incapable of providing for the future and very different position of his people as settled in the land of Canaan, is to deny him even ordinary sagacity. Without raising the question about his human frailty and commission, we are not too much to assume that so wise and great a legislator would foresee the growth of a polity, and would be anxious to regulate its due administration in the fear of God. Hence he would guard against false prophets and seducers to idolatry. As regards the Levites, Moses might have expected or even desired that, though possessing certain cities (which, however, were inhabited by others as well as themselves), they should not be confined to those cities, but scattered over the face of the country. This must have been the case at first, owing to the very gradual occupation of the new territory. The mere fact that, in giving them certain equal rights in the commonwealth (Lev. xi. 29), Moses may have pointed to the future, does not by any means prove that this earlier provision was unknown or had ceased to be in force.

Other reasons for a later date, such as the mention of the worship of the sun and moon (iv. 19; xvii. 2) the punishment of stoning (xv. 5; xxii. 21, etc.); the name Feast of Tabernacles; and the motive for keeping the Sabbath, are of little force. In Amos V, 26, Saturn is said to have been worshipped in the wilderness; the punishment of stoning is found also in the older documents; the Feast of Tabernacles agrees with Lev. xxii. 2; and the motive alleged for the observance of the Sabbath, at least, does not exclude other motives.

IV. Author. — 1. It is generally agreed that by far the greater portion of the book is the work of one author. The only parts which have been questioned as possible interpolations are, according to De Wette, iv, 41; x; 2: the punishment of stoning (xv. 5; xxii. 21, etc.); the name Feast of Tabernacles; and the motive for keeping the Sabbath, are of little force. In Amos V, 26, Saturn is said to have been worshipped in the wilderness; the punishment of stoning is found also in the older documents; the Feast of Tabernacles agrees with Lev. xxii. 2; and the motive alleged for the observance of the Sabbath, at least, does not exclude other motives.

2. It cannot be denied that the style of Deuteronomy is very different from that of the other four books of the Pentateuch. It is more flowing, more rhetorical, more sustained. The rhythm is grand, and the diction more akin to the sublimer passages of the prophets than to the rober prose of the historians.

3. Who, then, was the author? This question, of course, is intimately connected with the preceding discussion. We will consider, first, the views of those who deny its authorship by Moses. On this point the following principal hypotheses have been maintained: a. The opinion of Stahelin (and, as it would seem, of Bleek), that the author is the same as the writer of the Jehovist portions of the other books. He thinks that both the historical and legislative portions plainly show the hand of one and the same author (supplementum p. 76). Hence it attaches but little weight to the alleged discrepancies, as he considers them all to be the work of the reviser, going over, correcting, and adding to the older materials of the Elohist document already in his hands.

b. The opinion of De Wette, Gesenius, and others, that the Deut. poet is a distinct writer from the Jehovist. De Wette's arguments are based (1) on the difference in style; (2) on the contradictions already referred to as existing in matters of history, as well as in the legislation, when compared with that in Exodus; (3) on the peculiarity notewable in this book, that God does not speak by Moses, but Moses himself speaks to the people, and that there is no mention
DEUTERONOMY 771

DEUTERONOMY

of the angel of Jehovah (comp. i, 30; vii, 20-23; xi, 13-17, with Exod. xxiii, 20-33); and (4) lastly, on the fact that the Deuteronomist ascribes his whole work to Moses, while the Jehovist assigns him only certain portions.

c. From the fact that certain phases occurring in Deut. are found also in the prophecy of Jeremiah, it has been too hastily concluded by some critics that both books were the work of the prophet. So Von Hase, Gesetzi, p. 140, 161, 164, 177, 196, p. 2, and Hitzig (Hist. Krit. Forsch. p. 660). Koenig, on the other hand (Alteist. Stud. ii, 12 sq.), has shown not only that this idiomatic resemblance has been made too much of (see also Keil, Evid. p. 117), but that there is the greatest possible difference of style between the two books. De Wette expresses himself similarly (Evid. p. 191).

d. Ewald is of opinion that it was written by a Jew living in Egypt during the latter half of the reign of Manasseh (Gesch. des V. I., i, 171). He thinks that a pious Jew of that age, gifted with prophetical power, and fully alive to all the evils of his time, sought thus to revive and to impress more powerfully upon the minds of his countrymen the great lessons of that law which he saw they were in danger of forgetting. He avails himself, therefore, of the groundwork of the earlier history, and also of the Mosaic mode of expression. But as his object is to raise a corrupt nation, he only makes use of historical notices for the purpose of introducing moral and political precepts with the more effect. This he does with great skill and as a master of his subject, while at the same time he gives fresh vigor and life to the old law by means of those new prophetic truths which had so lately become the heritage of his people.

Ewald further considers that there are passages in Deuteronomy borrowed from the books of Job and Isaiah (iv, 82, from Job viii, 8; and xviii, 29, 30, 25, from Job v, 14; xxx, 10; ii, 7; and xxxv, 49, etc. from Isa. v, 26 sq.; xxxiii, 19), and much of it akin to Jeremiah (Gesch. i, 171, note). The song of Moses (xxxvii) is, according to him, not by the Deuteronomist, but is nevertheless later than the time of Solomon.

e. The old traditional view that this book, like the other books of the Pentateuch, is the work of Moses himself. Of the later critics, Hengstenberg, Hävernick, Rankes, and others, have maintained this view. Most of the critics, however, Deuteronomy appears to my mind, as it did to that of Eichhorn and Hitzig, as the earnest outpourings and admonitions of a heart which felt the deepest interest in the welfare of the Jewish nation, and which realized that it must soon bid farewell to them ... Instead of bearing upon its face, as is alleged by some, evidences of another authorship than that of Moses, I must regard this book as being so deeply fraught with holy and patriotic feeling as to convince any unprejudiced reader who is competent to judge of its style, that it cannot, with any tolerable degree of probability, be attributed to any pretender to legislation, or to any mere imitator of the great legislator. In support of this view it is in vain to seek for in any artificial or compositional composition "(Hist. of the O. T. Canon, § 9).

In support of this opinion, it is said: 1. That, supposing the whole Pentateuch to have been written by Moses, the change in style is easily accounted for when we remember that the last book is hortatory in its character, while that these were delivered under very peculiar circumstances. 2. That the usus legendi is not only generally in accordance with that of the earlier books, and that as well in their Elohist as in their Jehovistic portions, but that there are certain peculiar forms of expression which are found in all three, and that these were delivered under very peculiar circumstances. 2. That the alleged variations in matters of fact between this and the earlier books may all be reconciled (see above), and that the amplifications and corrections in the leg-
Deuteronomy 772

De Deuteronomy (xxxvi) respecting the death of Moses requires a particular explanation. That the whole of this section is to be regarded as a piece altogether apart from what precedes it, or as a supplement by another writer, is a ready solution maintained by some (comp. e.g. Carpozov, Introduct. in Libr. V. T. i. 137); and this opinion is confirmed not only by the contents of the chapter, but also by the express declaration of the book itself on that event and its relations; for chapter xxxvi contains the conclusion of the work, where Moses describes himself as the author of the previous contents, as also of the Song (ch. xxxii), and the blessings (ch. xxxiii) belonging to it. All that follows is, consequently, not from Moses, the work being completed and concluded with chapter xxxvi. There is another circumstance which favors this opinion, namely, the close connection between this chapter and the last section of Deuteronomy and the beginning of Joshua (comp. Deut. xxxxiv. 9 with Josh. i. 1, where also the connective force of the term "etem", "and it came to pass," in the latter passage, must not be overlooked), plainly showing that ch. xxxiv of Deuteronomy is intended to serve as a point of transition to the book of Joshua, and that it was written by the same author as the latter. The connection of this chapter, therefore, is to be considered as a real supplement, but by no means as an interpolation (such as some critics erroneously suppose to exist in the Pentateuch in general). To apply it to the term interpolation would be as wrong as to give that appellation, e. g., to the 8th book of Cesar's work De Bello Gallico, simply because it was written by an unknown author, for the very purpose of serving as a supplement to the previous books. See Prat-Tatakauch.

V. Separate commentaries upon the book of Deuteronomy are not numerous; the most important are designated by an asterisk (*) prefixed: Origen, Selecta in Deut. (in Opp. ii. 306); Ephaemus Syrus, Expositio in Deut. (ib. 482): Isidorus Hispalensis, Commentarius in Deut. (in Opera). Bede, De In Deut. Expositio (in Oec. iv); id. Quaestiones super Deut. (ib. vii); Victor Hugo, Amostracimae in Deut. (in Opp. i); Rupertus Tuttiniensis, in Deut. (in Opp. i. 298); Luther, Deuteronomicon commentarius (in Opp. iii. 78, 80); A. X. Mau, in Opp. xiii); Bugenhagen, Commentarius in Deut. (Basil. 1524, Vitel. 1525, 1526, 1527, 1528, 1529). Machaczek, Exegesi in Deut. (London, 1563, 1564). Chytraeus, Exegetica in Deut. (Viteb. 1565, 1590, 1590). Calvijn, Sermones in Deut. (from the French by Gokling, London, 1563). Brent, Commentarii in Deut. (in Opera, by Babington, Notes upon Deut. (in Works, p. 119); Lorius, Commentarius in Deut. (Lugd. 1615, 1629), 2 vols. fol.); Malus, Annotationes in cap. xxiii et seg. (in the Critica Sacra, i. pt. ii); Franze, Disputationes super Deut. (Viteb. 1506, 1506); Gerhard, Commentarius super Deut. (Jen. 1557, 1570); Cocceius, Notes in Deut. (in Opp. i. 185); id. De ut. Deut. capita (i. 187); Alting, Commentarius in cap. i-xiv in Deut. in Opp. i. 121, Amst. 1667; Duquet, Explication de c. xxiii-xxivii (Par. 1734, 1740, 1742); Vitrinog, Commentarius in Deut. (Par. 1734, 1740, 1742); Holt, Deuteronomy, Illustration (Lugd. 1564, 1564). Marek, Comment. in cap. xxiii-xxivii (in Parte Primae); Hagemann, Betrachtungen ub. d. f. B. Moses (Brunsw. 1744, 1744, 1744); Homburg, Pinen, Mennonite's Pa-tentch, Berlin, 1783, etc.; R. Rosius, Scholia in Schol. pt. ii); Horst, Notes on Deut. (in Bib. Criticam, i); Rehman, Moses in Grose Moab (Lpz. 1854, 1854, 1854); Cumming, Reading in Deut. (London, 1566, 1566, 1566); Graf, Der Segn Moses erklart (Lpz. 1857, 1857, 1857).
Luther, who in his reply (dated April 31, 1544) finds it difficult to believe in the change, but says that, at all events, Dávay has not received this doctrine from him, and that he (Luther) would continue to fight against its "abomination" public and privately. After his return to Hungary, Dávay was received as preacher and "senator" of the Reformed Church of Debrecen, where the Reformation had a powerful patron in count Valentin Tóth of Enyég, a near relative of count Nádasdy. While at Debreczin, Dávay wrote, in the Hungarian language, his exposition of the Ten Commandments, the Articles of Faith, the Lord's Prayer, and the Seal of Faith. This exposition appeared in 1543. God, according to Luther, had the year, date, and place of the death of Dávay not known, but it is probable that in the year 1547 he was no longer alive. Besides the works already mentioned, Dávay is the author of a hymn containing the principal articles of the Reformed Faith, which was received into the hymn-book of the Reformed Church of the Hedelfigen Confession in Hungary.—Herzog, Real-Encyklop., xix, 406; Wetter und Welte, Kirchen-Lez., iii, 123; Craig (transl.), History of the Protestant Church in Hungary (London, 1851). p. 50 sq.; Schröckh, Kirchengeschichte seit der Reformation, ii, 730.

Development, a word denoting primarily unfolding, hence, secondarily, growth or expansion. It has recently come into extensive use both in philosophy and in theology. In philosophy, it is part of the Pantheistic doctrine not simply that all existing forms of life have been developed from simpler forms, but also that the Infinite, as well as the Finite, passes from one stage of life to another by unending development. "The whole fabric of ancient and modern Pantheism rests upon the petitiio principii that the doctrine of evolution has the same ultimate application whether in the sphere of the Infinite and Eternal that it has within that of the finite and temporal, that annihilates the distinction between the two. The idea of undeveloped being has no rational meaning except in reference to the created and the conditional" (Shedd, History of Christian Doctrine, i, 18).

1. As applied to history, the doctrine of development, as stated by its ablest advocates, is that all created existences obey a law of development from the potential germ given by the Creator; and that this law applies to the race of man as well as to individuals of the race. As a tree is developed from its seed, so the human body, the human mind, the human race, grow, according to the law of their organic life. Under this view, the church, instead of being a mere organization, is a mass of names, dates, and facts, but as spirit and life, and therefore as process, motion, development, passing through various stages, ever rising to some higher state, yet identical with itself, so that its end is but the full unfolding of its beginning. This makes Church history, then, appear as an organism, starting from the person of Christ, the creator and progenitor of a new race; perpetually spreading both outwardly and inwardly; maintaining a steady conflict with sin and error without and within; continually beset with difficulties and obstructions; yet, under the unfalling guidance of Providence, infallibly working an appointed end. This idea of organic development combines what was true in the notion of something permanent and unchangeable in Church history, as held by both the Catholic and the Old-Protestant orthodoxy, with the element of truth in the Rationalistic conception of motion and flow; and on such ground alone can it, according to the Catholic, or, more clearly, the temporal life of Christianity. A permanent principle, without motion, stiffens into stagnation; motion, without a principle of permanence, is a process of dissolution. In neither case can there properly be any living history. The conception of such history is, that while it incessantly changes its form, never for a moment standing still, yet through all its changes it remains true to its own essence; never outgrows itself; incorporates into each succeeding stage of growth the results of the preceding, and thus never loses anything which was ever of real value" (Schaff, Apostolic Church, § 34). Certain guards are necessary to prevent the Christian theory of development, for passing into the Pantheistic view. They are stated by Dr. Shedd (History of Christian Doctrine, § 8, 4) substantially as follows: 1. The pantheists substitute development for creation. Development supposes existing materials; creation, on the other hand, is from nothing, and presupposes no materials. All germs, according to Christianity, are the creation of God. The year (which is simply the unfolding of something previously folded up) cannot account for the origin of anything.

"The significant fact in natural history, not yet invalidated by the most torturing experiments of baffled theologians, that one species never expands into another, proves that though a process of development can be accounted for out of the latent potentiality at the base, the latter can be accounted for only by recurring to the creative power of God. The expansion of a vegetable seed, even if carried on through all the cycles upon cycles of the geological system, never transmutes it beyond the stage of an animal or vegetable. This only verifies the self-evident proposition that nothing can come forth that has never been put in" (Shedd, Hist. of Christian Doctrine, § 8). The second caution is always to discriminate the idea of a development from that of an improvement. It depends upon the nature of the germ whether the evolution shall be from good to better, or from bad to worse. By the abuse of free-will in the spiritual sphere the normal development may be displaced; but original righteousness was not developed into original sin. Man, endowed with free-will, created sin, so to speak, under the permission of God. Abstractly, then, development may be synonymous thus with corruption and decline, as well as with improvement.

But, even with all these guards and cautions, the doctrine of development, when applied within the sphere of moral action, is a perilous one. Any theory of the history of man which leaves out of the case his free agency, must end either in Fatalism or in Pantheism. Dr. T. M. Skinner, Jr., in the Baptist Quarterly Review for January, 1868, while vindicating Dr. Shedd's theory of development from the charge of Pantheism, endeavors to show that it runs into Fatalism. "Dr. Shedd does not discriminate development from necessity. From the scheme of realistic development, which is neither a pure chance nor mere ignorance, but a true divine moral government of free agents, can be educated." If it be true, as Dr. Shedd says, that the same law of organic sequence prevails in the sphere of mind and of freedom that works in the kingdom of matter and necessity, then necessity rules the one sphere as it does the other, and rules under the same law.

2. As applied to doctrine, the Christian view of development is that there has been a gradual progression in the manifestation of the divine plan to man, both in revelation and in history. This doctrine is well set forth and illustrated, so far as the N. T. is concerned, in Bernard's Outline of Doctrines (Boston, 1846); and in the Hampton Lecture for 1866; Boston, Gould & Lincoln, (1867). The Bible, beginning with Genesis, gives the exposition, not of a revelation completed, but of a revelation in progress, and expanding into greater fullness and clearness from the beginning until its final completion, and the perfection of the Church, and hence clearly the temporal life of Christianity. After this, the Church has never held to any advance in divine teaching; all growth, subsequent to the apostolic age, has been growth in man's apprehension of divine truth, not in God's revelation of it. The Holy Spirit is still a divine guide to all seekers after truth; not in the way of a new revelation, however, but of "reminding" men of the truth once given, and of ul-
DEVELOPMENT

luminating the truly believing inquirer in his search into the meaning of revelation. The body of Christian truth, both fact and doctrine, is revealed and recorded, once for all, in the Scriptures of the Old and New Testament. In this statement, in every age, the norm of doctrine, and the criterion by which all new exhibitions of doctrine are to be tested. No new truth can be developed any more than a new man can be created. It is but very clear that there may be, and has been, development of Christian doctrine in the sense of clearer apprehension of it on the part of the Church. The science thus on all its difficulty implied the application of human reason to the given facts and doctrines of Christianity; first, the application of reason to Scripture (exegesis), to find out what its doctrines are; and, secondly, the use of reason in co-ordinating these doctrines into scientific form (system). It will be observed that the "development of doctrine," as thus stated, is very different from the theory that the Bible gives only the "germs" of doctrine, out of which, by a necessary organic law, the doctrines themselves are "developed." This image of a "germ" is very apt to mislead. Even if a doctrine were a living thing, it is a germ, "it is to be remembered that every germ reveals the whole plant, and that any and all things that are around it are formed by itself and its parts in its own way, and is simulating to itself many foreign elements which are around it. It is by additions from without, and different from itself, that it grows" (Donaldson, History of Christian Literature, 1, 5).

In doctrine, however, as in history, development is not only without, but within, without improvement. Human apprehension of divine truth is sometimes wrong, as well as sometimes right; and the history of doctrines, while implying development in its very idea, yet includes variations of rise and fall in human statements of the one divine truth. A right theory of the development of Christian doctrine implies that each later age must necessarily have a fuller and deeper knowledge of divine things than its predecessors, either as spread abroad through the body of the Church, or as centred in its chief teachers. Were this a consequence of this theory, this alone would be fatal to it, the very reverse having notoriously been the case. But even in science, which is so much less dependent on moral influences, and with which the varieties of character and feeling have so little to do, the progress has never been uniform and uninterrupted; win poetry, in the arts, in philosophy, where the understanding is greatly swayed by moral and social conditions, the development of truth has been so irregular that nothing like a law of it has been ascertained. So, too, must it needs be in theology, where the subject matter is divine truth, which cannot be received intellectually unless it be also received morally, to the pure reception of which all corrupt feelings of our nature are opposed, and which they are perpetually attempting to sophisticate and distort.

Thus it has often come to pass that the inheritance left us by one age has been squandered, or wasted, or forfeited by its successor, so that it by no means follows from the theory of the development of Christian truth that men and their doctrines are in the world to come, better than they were then. The development of Christian doctrine, therefore, is not merely a subject of curious and important study in the past, but of great and significant influence for the present and the future.

8. Certain Romanist writers have recently made use of the doctrine of development to vindicate the theology of that Church. The statement is made that the Church does not contain the entire revelation of God to man, but that revelation is receiving additions, and gradually becoming complete, by the successive decisions of the Church. This view has been set forth by Möhler, and with special skill by J. H. Newman (Essay on the Development of the Christian Doctrine [N. Y. 1865, 2 vol.]). Its ground is that the revelation given in the Bible was intentionally incomplete, and forms an inchoate
and imperfect system of truth, needing for its comple-
tion a gradual development under infallitable guidance, and
that the essential doctrine in the Roman Catholic Church is the ripened result of this develop-
ment, so far as made. See also Döllinger, Christenthum
und Kirche, 1860, p. 162. The doctrine has not met
general favor in the Roman Catholic Church, as it is in
conflict with the established reliance of that Church
upon tradition, and upon what is called "Catholic con-
sent." One of the best of modern Romanist writers,
Brownson, has written powerfully against the develop-
ment theory (in his Quart. Rev.). Extremes meet;
the Rationalistic theory agrees with the Romanist (in
Mr. Newman's view of it) in representing the system
of Christianity delivered in the New Testament as de-
fined and settled. The development defended (esse
v) is as follows: "The sacred and holy, ocumenical
and general Council of Trent, keeping always in
view the removal of errors and the preservation in
the Church of the purity of the Gospel, which Gospel,
before promised through the prophets in the Holy
Scriptures, was first orally published by our Lord Je-
sus Christ in the Son of God, and then commanded to be
preached by his apostles to every creature, as the
fountain both of every saving truth and discipline of
morals; and perceiving that this truth and discipline
are contained in the written books, and the unwritten
traditions which, received by the apostles from the
mouth of our Lord Jesus Christ, is transmitted to
ourselves, the Holy Ghost dictating, have come down
even unto us, transmitted as it were from hand to
hand; [the council] following the examples of the
orthodox fathers, receives and venerates with equal af-
fection of piety and reverence all the books both of the
Old and of the New Testament, seeing that one God
is the author of both, as also the said traditions, as well
those appertaining to faith as to morals, as having
been dictated either by Christ's own word of mouth
or by the Holy Ghost, and preserved by a continuous
succession in the Catholic Church." Mr. Newman's
book was ably answered by W. Archer Butler, Letters
on Romanism (Cambridge, 1864, 8vo). The following
remarks of Julius Charles Hare (Mission of the Com-
forter, note G) are in point: "Some of the German
apologists for Romanism, having perceived, as could
not but happen in a country where learning and crit-
cism have found a home, that the old plea of a posi-
tive test of the Gospel was untenable as a ground for the doctrinal and practical
innovations of later times, have fancied that they
might render their Church a service by taking up the
modern and modern theory of the development of
mankind—a theory which has been carried into the
most outrageous extravagances in the contemporary
schools of philosophy, as it has also been in France
by the St. Simonians. This theory has been used by
others to show that Christianity itself is a transient
religion, belonging to a by-gone period and almost
obsolete; they have tried to employ it in defence of
the Church of Rome. Herein, however, it was impossible
for them to succeed. The movement is one of the
natural effort, since the time when it cut itself off from the
living body of Christ, has been to check, to repress,
to cramp, to fetter the mind, could not find support in
a theory which implies the freedom of the mind; nor
can any Church, unless it recognizes, both doctrinally
and practically, that the property of truth is to set the
mind free."

4. The following section was prepared for this Cy-
clopedia by the late Dr. Harbaugh just before his
death. We print it as he left it, though it involves a
little repetition of what has been given above.

This word, related primarily to the sphere of organic life in the animal kingdom, has also
come to perform important service in science, especially
in psychology, philosophy, theology, and history.
In the earlier stages of science generally, the data and
phenomena were classified and arranged according to the
outward peculiarities which they presented. In later
time, however, and especially under the influence of
Christianity, as the key to the deepest life of the world,
scientific thinking felt itself urged to a deeper apprehen-
sion of all kinds of phenomena. The mechanical
and outward in systematizing accordingly had to give
way to the determining power of mere inward princi-
pies.

Thus it has come to pass that while science, so far as it has been apprehended and advanced by non-
Christian thinking, has been, for the most part, satis-
fi ed with the word progress, science grounded in the
distinctively Christian principle has found the word
development indispensable. The word, as thus used,
assumes presupposed; it is not a mere development of
Christianity, and so also of the Church, its history and
its doctrines, as well as of affiliated sciences, such as
psychology and philosophy. It finds inadequate the
view of the essence of Christianity which resolves it
into the idea of doctrine, as in Supranaturalism; so
also the view which makes it only an ethical force,
law, or rule of life, as set forth in the school of Kant
and by Rationalism; and so, moreover, the concep-
tion that it is, in its essential character, a mere power
of redemption operative in the sphere of religious
feeling, according to Schleiermacher and the Mystics.

Admitting and appreciating all these as secondary and
dependent, we cloth Christianity essentially a life—the divine-human life of its founder,
Jesus Christ—which becomes the deepest life of renewed
humanity, of history, and of science (see Ullman,
Distinctive Character and Essence of Christianity).
Life being essentially organic, it must have the word
development to indicate itself from a germ-like
principle which is the distinctive character-
tistic of organic life. To the genetic processes in-
volved in the activities of life it applies the word
development. This idea of an organic, steadily im-
proving, developing humanity, according to a wise,
unalterable plan of Providence, is properly as old as
Christianity, meets us in many passages of the New
Testament (Matt. xiii, 81, 82; Ephes. iv, 12-16; Col-
oss. ii, 19; 2 Pet. iii, 18), and in occasional remarks
of the early fathers, such as Tertullian and Augustin;
and was brought out in the 18th century with peculiar
emphasis and freshness by the genial Herder, in his
"Ideas on the Philosophy of History" (1778), so highly valued by the gifted historian of Swit-
zerland, John von Müller" (see Herder's Sämtliche
Werke, zur Phil. und Gesch. Theill iii, § 74 sq.).

"The more mature and philosophical conception of it, how-
ever, and the impulse which it gave to a deeper and
a livelier study of history, are due especially to the phi-
losophy of Schelling, and, still more, of Hegel. With
Hegel, all life and thought is properly development,
or a process of organic growth, which he calls Aufhe-
bung—that is, in the threefold sense of this philosop-
ical term so much used by him, (1) an abolition of
the previous imperfect form (an anfall, in the sense
of a fall or toil); (2) a growth (a Bildung); and (3) an elevation of it to a higher stage of
existence (elevation)" (Dr. Schäff's History of the Aport
Church, p. 90, 91).

The conception of development has, however, also
been carried out of its proper Christian sense, and per-
sisted in, especially as a form of anti-Christiam thought. Thus Pantheism, laying hold upon some in-
sufficiently guarded point in the He,elian theory, has
employed it in its scheme. The one school of Hegel,
denying with him the existence of a personal God, as
the creator of all principles of created life, proposes to
account for the animal existence by a theory of de-
velopment, holding that all of which, however, it leaves vague and floating, holding that nature through successive upward gradations ult-
imately reaches self-consciousness in the human spir-
it, and thus also God himself comes to exist in the form of the general human consciousness, the world-idea, the self-manifestation of the idea of God, "who is at once the manifestation and the moment of the process of the development and actualization of his substance as the absolute spirit" (Herzog, Real-Encyklop. v, 629). Nor has Rationalism failed to seize upon and to apply this development of the idea of Christianity as a means of its use. Leaving out of view and ignoring the nature of Christianity as a life, it acknowledges no life-principles in Christianity; consequently breaks with all genetic, traditional, or historical processes, and proposes a progress of moral enlightenment which shall advance beyond Christ, the Church, and the Old Testament. Its progress and the idea of God as an object of development, starting in revolution, can present only a history of deterioration and corruption. The Christian idea of development, properly used, leaves no room for such-like revolution and negative progress. Substantially into this snare Prof. Bush has fallen, in the otherwise just and valuable discussion which he has introduced into his work on the Resurrection (Agnostasia, the Introduction, p. 13-29). The Roman Catholic convert, John Henry Newman, has also a theory of development, which, however, seems to be rather a development in the sphere of ideas than of fact—of life; hence it is rather a theory of philosophical organic evolution than of Christian. It moves more in the region of subjective mental processes than in the objective essential life of Christianity. It is consequently of little actual account either as a polemic against the Protestant idea of development, or as fixing on a firmer and more consistent basis the dogmas of the Roman faith, over into which he passed while his work (which actually marked ed his transition) was going through the press (Essay on the Development of Christian Doctrine). The Roman theory can conceive of no development except in the way of progress that needs as such to be outwardly measured by referring itself to an outward insensible authority in the people. But 'such development requires no 'infallible earthly head' for its direction and conduct, just as little as a living oak needs to be built upon by line and compass. An authority of this sort, supposed to supersede the free working of the intelligence and will of the Church itself, would be the source of petition and legislation only; nothing more. This implies freedom, ethical activity, life poised upon itself as a principle and centre. It is just the stability system which in every shape turns into mechanism and leads to popery" (Nevin, Mercersburg Review, i, 513, 514).

See, besides the works cited in the course of this article, Trench, Hibbert Lectures, 1845-46, lecture v, Lord's Theological and Literary Journal, April, 1854, art. vi; Hampden, Hampden Lectures for 1832, lect. viii; Soames, Latin Church during Anglo-Saxon Times, chap. xii; Craik, Old and New (N. Y. 1860), p. 226 sq.; Schaff, Church History (Philadelphia, 1846, 12mo); English Revisers, various articles in vols. iv, vi, ix, xi; Cunningham, Historical Theology, i, 210 sq.; American Presb. and Theol. Review, Oct. 1867, art. iv; Donaldson, Critical History of the first three Centuries.

DEVIIL (διάβολος, of which the English term is but a variation). This term signifies one who, transgresses another's character for the purpose of injuring it; a miscreant, and is sometimes applied to any calumniator, e. g. a gossip-monger (1 Tim. iii. 11; 2 Tim. iii. 2; Titus ii. 3); but it is spoken especially, by way of eminence, of the arch enemy of man's spiritual interest, whom the Jews represented as continually impugning the character of saints before God (comp. Job i. 6, 7, 20; 2 Tim. iii. 13). In the New Testament, it is applied to the devil (1 Pet. v. 8, he is expressly called "the accuser (διαβόλος) of the brethren," with a reference to forensic usages. See Advocate. The word is found in the plural number and adjective sense in 1 Tim. iii. 11; 2 Tim. iii. 3; and Tit. ii. 8. In all other cases it is used with the article as a descriptive name of Satan, except that in John vi. 70, it is applied to Judas (as "Satan" to Peter in Matt. xvi. 23), because they—the one permanently, and the other for the moment—were doing Satan's work. (On John xi. 31, see Engeland's Commentario, Etr. 1794; Hane, Schleierm. p. 91-75; on Heb. ii. 14, Anon De Diabolo, Göt. 1784; Oestmann, De Io. loc. 1 Pet. v. 8, 9 (Gryph. 1786). The same, also, describes him as a slandering God to man, and man to God. See Diabolos.) a. The former work is, of course, a part of the great work of temptation to evil; and is not only exemplified, but illustrated, as to its general nature and tendency, by the narrative of Gen. iii. We learn from it its essential characteristic in the representation of God as unchangeable, the sinless ruler, seeking his own good, and not that of his creatures. The effect is to stir up in man the spirit of freedom to seek a fancied independence; and it is but a slight step further to impute falsehood or cruelty to God. The success of the devil's slander is seen, not only in the scriptural narrative of the Fall, but in the corruptions of most mythologies, and especially in the horrible notion of the divine φθόνος, or envy, which ran through so many (see, e. g. Herod. i. 52; vii. 46). The same slander is implied rather than expressed in the temptation of our Lord, and is overcome by the faith which trusts in God's love even where his signs may be hidden from the eye (comp. the unmasking of a similar slander by Peter in Acts v. 4). b. The other work, the slandering or accusing of man before God, is, as it must naturally be, unintelligible to us. The All-seeing Judge can need no accuser, and the All-Perfect could, it might seem, have no intercourse with the Evil One. But, in truth, the question touches on two mysteries, the relation of the Infinito to the finite spirit, and the permission of the existence of evil under the government of him who is "the Good." As a part of these it must be viewed by the latter especially it belongs; and this latter, while it is the great mystery of all, is also one in which the facts be proved to us by incontrovertible evidence. See Satan.

The word "devil" also often stands, but improperly, in our version as a rendering of σατάν手中 (tukan), a pure spirit from the other world acting upon a human being. See Daemon.

In Late Latin, the word translated "devil" is διαβόλος (diabulus), ordinarily a "goat," but rendered "satan" in Isa. xiii. 21; xxxiv. 14; probably alluding to the good-daemons, resembling he-goats, supposed to live in deserts, and which were an object of idolatrous and beastly worship among the heathen. See Satyr.

The term rendered "devil" in Deut. xxix. 17; Ps. cvii. 37, is νῆσος (shed, properly lord, Sept. and Vulg. dmon), an id. Δ, since the Jews regarded idols as demons that caused themselves to be worshipped by men. See Idolatry.

The belief of the Hebrews down to the Babylonian exile seems but dimly to have recognised either Satan or demons, at least as a dogmatic tenet, nor had it any occasion for them, since it treated moral evil as a properly human act (comp. Gen. iii), and always as subjective and concrete, but regarded misfortune, according to theological summarisations, it was served on account of sin at the hands of a righteous God, who inflicted it especially by the agency of one of his angels (2 Sam. xxiv. 16; comp. 2 Kings xix. 35), and was accordingly looked upon as the proper author of every afflictive dispensation (Amos iii. 6). Apparitions were part of the popular creed, and the worship of angels is, in like manner, not yet adopted in the association of religious ideas. See Spectre. The Azazel (q. v.) is thought by many to have been held to be such a daemon; yet, if we grant even this, it still remains but an isolated being, one might almost say, a mere liturgical idea. Neverthe-
haps the demonology of the New Test. is exhibited in a more strictly dogmatic light than any other. The demons have Satan as their chief (ἀρχῶν, Matt. xii, 26), dwell in the body, and are called δαιμονία or πνεύματα. Matt. xii, 43; Luke vii, 2; x, 20; xi, 24; Eph. vi, 12; one inferior to the other, Luke xii, 26, and induce maladies as "spirits of infirmity" (πνεύματα ἁστίων), Luke viii, 2; xiii, 11; comp. 1 Cor. v, 5; 1 Tim. i, 20. They appear in association with Satan in two distinct episodes (Rev. xii, 7; xvi, 13 sq.). Satan himself (ὁ ἀρχῶν, ὁ διάβολος τῆς ἀρχῆς, ὁ ἐχθρὸς αὐτοῦ, ὁ ἀντιχριστός, ὁ βελτιστόν θρόνον, ὁ ἀνδριαστήρ, [see 2 Thess.,] ὁ διάβολος, 2 Cor. vi, 15 [see [BEELZEBUB]],) is the originator of all wickedness and mischief (Luke x, 19; xiii, 16; xxii, 31, Acts v, 3; 2 Cor. xi, 3; Eph. ii, 2), therefore the opponent (ὁ χτίστης) of the kingdom of God (Matt. xiii, 39; Luke x, 18; xiii, 33 sq.; for whose subjugation Christ came, John xii, 32; xvi, 11, and the tempter (ὁ παραδότης) of the faithful (1 Cor. vii, 5; 1 Thess. iii, 5; 1 Pet. v, 8 sq.), as Jesus himself was tempted by him in the beginning of his ministry (Matt. iv.). Satan's first act towards mankind was the leading of Eve into sin (2 Cor. xi, 3; comp. Rev. xii, 9; John viii, 44), and so he became the originator of the great cause of death (1 Pet. iv, 18; 2 Pet. ii, 8; Heb. ii, 14, the Σατανᾶς, Σάταν, of the later Jews, see Bux., torf, Lex. Chald. col. 1495). He and his angels (Rev. xii, 9; comp. 2 Cor. vii, 7, i. e. apparently the demons, were originally created good (as much as from the hand of God only good can come, but against him, the Creator of the universe, no opposing being could originally exist;) but through their own fault they fell (John viii, 44; 2 Pet. ii, 4; Jude 6), yet they rule in the kingdom of darkness (Eph. vi, 12; comp. Col. i, 13; roving about in the atmosphere, Eph. ii, 2), as well as over all mankind alienate from God (ὁ καιρός, ὁ διατηρητής, Eph. vi, 12; but Satan is ἀρχις τοῦ κόσμου τοῦτον ὡς ζωῆς τοῦ αἰώνος τούτον, John xii, 31; xiii, 40; xvi, 11; 2 Cor. iv, 4; Eph. ii, 2), although destined to a future fearful sentence (2 Pet. ii, 4; Jude 6), when Christ shall appear to overthrow the kingdom of Satan (1 John ii, 8); indeed, Satan has already through him received his condemnation (John xii, 31; xvi, 11; comp. Heb. ii, 14). The later speculations of the Jews on the subject of Satan and demons may be seen in Eusebius' Gesch. vii, 2, ch. vii, 4, and the Testament. Relig. c. 5, in Fabriciul Biblioth. ii, 8, p. 408 sq.). The Targums often introduce Satan into the O. T. text; in fact, whenever an opportunity presents itself (e. g. Jonath. on Exod. xxxii. 19; Lev. ix, 2). On this subject, see especially Mayer, Historia Diabol. (2d ed. Tub. 1780); Ode, De anima et Dei creat., (Tray. ad Rh. 1730), sect. i, p. 403 sq.; Schmid, in his Biblioth. für Krit. u. Exegese, i, 525 sq. ("Comparison of the New-Test. demonology with the Zelind books"); Winzer, De demonologia in N. T. proposita (Viteh, 1812, Lipe, 121, incomplete); Matthäi, Reil. u. Gesch. der Apostel, ii, 98 sq.; Collin, Bibl. Theol. ii, 426 sq.; ii, 62 sq.; 229 sq.; M. Stuart, in the Biblioth. Sacra (1849), i, 120 sq. See Angel; Exor- cism; Satan.

Devil-worshipers. See Yezebels.

Devoted thing. See ANATHEMA.

Devotee. "In the primary sense of the word, means a person wholly given up to acts of piety and devotion; but it is usually understood, in a bad sense, to denote a bigot or superstitious person—one addicted to excessive and self-imposed religious exercises."—Buck, Theol. Dictionary, s. v.

Devotion (Lat. devoto, to give up oneself wholly to any object). "It is employed to mean either. 1, that religious habit of the mind which is otherwise called devotion; piety; 2, the expression of such a state of mind in particular acts and instances of a religious nature. A spirit of devotion is one of the greatest blessings, and the want of it one
of the greatest misfortunes, which a Christian can experience. When it is present, it gives life to every act of worship we perform; it renders every such act inseparable from us. It is experienced in our most retired moments; in our beds, in our closets, our rides, and our walks. It is felt within us when we are assembled with our children and servants in family prayer. It leads us to church, to the congregation of our fellow Christians there assembled. In an especial manner it accompanies us in our joint offices of religion, and it returns to us to our homes holier, happier, and better. But that which greatly enhances its value to every anxious Christian is that it affords to himself a proof that his heart is right towards God. When it is followed by an abstinence from sin and its companions, by the exercise of the moral virtues, by favor to the afflicted, by good, the proof and the satisfaction to be drawn from it are complete. Wherever the vital and unadulterated spirit of Christian devotion prevails, its immediate objects will be to adore the perfections of God; to entertain with reverence and complacency the various intimations of his pleasure, especially those contained in holy writ; to acknowledge our absolute dependence on and infinite obligations to him; to confess and lament the disorders of our nature and the transgressions of our lives; to implore his grace and mercy through Jesus Christ; to intercede for our brethren of mankind; to pray for the propagation and establishment of truth, righteousness, and peace on earth; in fine, to long for a more entire conformity to the will of God, and to breathe after the everlasting enjoyment of his friendship. The effects of such a spirit, habitually cherished and feelingly expressed before him, must surely be important and happy. Among these may be reckoned a profound humility in the sight of God, a high veneration for his presence and attributes, an ardent zeal for his worship and honor, a constant imitation of our Saviour's divine example, a diffusive charity for men of all denominations, a generous and unwearied self-denial, a total resignation to Providence, an increasing esteem for the Gospel, with clearer and firmer hopes of that immortal life which has brought to light" (Paley, Sermons, Ser. vi).

Dew (dew, tal, gentle moisture; Gr. Φερος) is mentioned as falling in the East (Maundrell, p. 77; Robinson, iii, 479), e. g. in Babylon (Dan. iv, 22), like water pouring in the summer (Isa. xlii, 25), so heavy as to wet like a mode at rain (Cant. v, 2; Judg. vi, 33), the absence of which it somewhat supplies (Eccles. xviii, 16; xliii, 22), greatly cooling the heat by day (comp. Curr. v, 5, 5), and refreshing vegetation (Hasslequist, p. 284; Volney, i, 6). It is mentioned as being the boon of the Moringa (Firm). It indicates its presence 

nor, unless in the same situations, is any cultivation attempted where there are no night dews in summer to compensate for the want of rain (Kitto, *Dict. Bibl.* note on Gen. xxxiii, 29). It is experienced in Palestine and indeed throughout Western Asia, rain rarely falls from April to September, and the heat of the sun being at the same time very strong, all vegetation would be parched and dried up were it not for the copious dews which fall during the night and completely moisten the ground, keeping in a fertile condition lands which otherwise would be barren and sterile. But all this moisture evaporates with astonishing rapidity as soon as the sun has risen. It seems that the advantage of these abundant dews is not generally enjoyed except in regions more or less hilly or elevated, or in confined valleys. In extensive open plains and deserts there is no such advantage from any copious dews during summer. But in such tracts no men can inhabit except the wandering tribes, and towns and villages are only found on the banks of natural or artificial streams;
Regeneration. His early death blighted many hopes which his genius and eminent abilities had inspired.

Dexiolasb. See Spearman.

Dexioliou. Salomon, a German theologian, was born Sept. 14, 1877, at Weida, in Vogtland. He struggled amid poverty to gain his elementary education, and completed his studies at the University of Wittenberg, where he became master in 1899. In 1708 he became assistant to his father, a professor of philosophy, and in 1716 a doctor in theology. In 1716 he became general superintendent at Einleben, in 1720 pastor in the Nicolai-kirche at Leipzig, and during the rest of his life was professor of theology there. He died August 5, 1755. He wrote Descrip. de corrupto Ecclesiae Romanae statu ante Lutherum, etc. (Wittenberg, 1784, 4to); Observa.

Dioscorides, the Greek botanical author (first century A.D.), lived at Corinth and is mentioned by Pliny (Nat. Hist. v). He wrote a great work systematizing all the knowledge of his time on the plants of the East and their use in medicine. Another Dioscorides of Perga (2nd century) wrote a History of the Kings of Persia. Dioscorides (Gr. κηρυγματα), or a conventional mark of distinction in private life, is carefully observed (see Trench, "Synonyms of the New Testament," p. 112 sq.). See Turban.

What the "diadem" of the Jews was we know not. That of other nations of antiquity was a fillet of silk, two inches broad, bound round the head and tied behind, the invention of which is attributed to Libon (Plin. Nat. hist. vii, 56, 57). Its color was generally white (Tacitus, Ann. vi, 37; Sil. Ital. xvi, 241); sometimes, however, it was of blue, like that of Darius, crurea fascia alba distincta (Curt. iii, 5; vi, 29; Xenoph. Anab. vii, 13), and it was worn with pearls or other gems (Zech. ix, 16; Gibbon, i, 392), and enriched with gold (Rev. iv, 7, where, however, the text has στέφανος). It was peculiarly the mark of Oriental sovereigns (1 Mac. xii, 32, τό διάδυμα τῆς Αἰαίας), and hence the deep offence caused by the attempt of Caesar to substitute it for the laurel crown appropriated to Roman emperors (Cicero, Phil. ii, 34); when some one crowned his statue with a laurel-wreath (candida fascia praebatam), the tribunes instantly ordered the fillet or diadem to be removed and the man to be thrown into prison (Sueton. Cæs. 79). Caligula's wish to use it was considered an act of insanity (Sueton. Cal. 22). Heirlooms only wore it in private. Antony assumed it in Egypt (Flor. iv, 11), but Diocletian (or, according to Aurel. Victor, Aurelian) first assumed it as a badge of the empire. Representations of it may be seen on the coins of any of the later emperors (Tillemont, Hist. imp. iii, 581). A crown was used by the kings of Israel even in battle (2 Sam. i, 10); similarly it is represented on coins of Theodosius as encircling his helmet); but in all probability this was not the state crown (2 Sam. xii, 30), although used in the coronation of Josiah (2 Kings xi, 12). Kitho supposes that the state crown may have been in the possession of Athaliah; but perhaps we ought not to lay any great stress on the word "θηρ" in this place, especially as it is very likely that the state crown was kept in the Temple. In Esth. i, 11; ii, 17, we have θηρός (Sept. στάρας, στάρος) for the turban (τουρμα, vi, 8) worn by the Persian king, queen, or other eminent persons to whom it was conceded as a special favor (viii, 15, διάδυμα βασιλικον πορφυρον). The diadem of the Persian king differed from that of others in having an evert triangular peak (= ἱππασία, Aristoph. Av. 467; Suid.

Ancient Diadems.

remote, with the Chaldeans. The first mention in Scripture of the "hour" is made by Daniel, at Babylon (ch. iii, 6), although it is possible that Psa. cii, 11, and cix, 23, may contain allusion to the progress of a shadow as measuring diurnal time. The Greeks used the dial before the Romans; and, according to the Egyptians, "there are no indications in the sculptures to prove the epoch when the dial was first known in Egypt" (Wilkinson, Anc. Egyptians, iii, 342). It has been suggested that the αἰδόσθενα, "images," of Isa. xvii, 8; xxvii, 9, Ezek. vi, 4, 6, rendered in the margin "sun-images," were gnomons to measure time (Jahn, Archd. i, i, 580), but there seems no adequate ground for the conjecture. On the mode of regulating time among the Greeks and Romans, see Smith's Dict. of Class. Ant. s. v. Horologium. See Time.

The circumstances connected with the dial of Abaz (2 Kings xx, 11; Isa. xxxviii, 8), which is perhaps the earliest of which we have any clear mention, entirely concur with the derivation of gnomonics from the Babylonians. Abaz had formed an alliance with Tiglath-pileser, king of Assyria (2 Kings xxvi, 17, 9); he was a man of taste, and was ready to adopt foreign improvements, as appears from his admiration of the altar at Damascus, and his introduction of a copy of it into Jerusalem (2 Kings xvi, 10). "The princess of Babylon sent unto him to inquire of the wonder that was done in the land." (2 Chron. xxxii, 25). Hence the dial also, which was called after his name, was probably an importation from Babylon. Different conjectures have been formed respecting the construction of this instrument. Grotius follows the Rabbinis in describing it as a concave hemisphere, with a globe in the midst, the shadow of which fell on the different lines engraved in the concavity of the hemisphere, these lines being twenty-eight in number." Mr. Taylor (in Calmet's Dict.) discovered some representations of ancient dials, one of which was found at Herculeanum, and was probably originally from Egypt, which he conceives to answer, in many respects, to the circumstances of the sacred narrative (see also Kite, Pict. Bible, note on 2 Kings xx, 11). The subjoined figures seem to apply to the description of the dial of Berosus given by Vitruvius (ix, 9), "a half circle hol-
where (see Carpozov, Apparat. Historic. Crit. Lips. 1748, p. 392, etc.). The Sept. in Isaiah reads ἀναθηματος τοῦ οίκου τοῦ πατρός σου, "the steps or stairs of the house of thy father." Josephus also says "steps or degrees in his house" (Ant. x, 2, 1). The Chaldee renders the passage in Kings, נֶגֶּשׁ מָשָׁה, "hour-stone," and gives the same meaning to the "stairs" (2 Kings ix, 18), and renders Isa. xxxviii, 8, by נֶגֶּשׁ, "by shooting, in the shadow of the stone of hours." Symmachus most certainly understood a sun-dial; στροφὴ τῆς σκιᾶς τῶν γραμμῶν ἐκ τῆς ἑαυτοῦ ἦλθε στροφῇ "I will cause to return the shadow of the degrees which (shadow) is gone down on the dial of Ahaz," and so Jerome renders it Horologium. M. von Gumpach's opinion (Zeirehung der Babylons. Heidelb. 1869, p. 25) is that it was anaccurate and scientific apparatus, indicating the halffours by the coincidence of the shadow of the upright pole or gnomon with the edge of the several "degrees" or steps, somewhat in the manner of the subdivided figure. Mr. Layard is favorable to the conjecture of Von Gumpach that it was a present to Ahaz from Tiglath-pileser; and he compares it with the presumed form of the tower of Babel, which may have been constructed in part for astronomical purposes (Nim. and Babil. p. 484 sq.). On the

Supposed Form of the Dial of Ahaz.

Dial—a rectangled hexangle, whose hypotenuse is a staircase, apparently parallel to the axis of the earth, and bisects a zone or coping of a wall, which wall connects the two terminating towers right and left. The coping itself is of a circular form, and accurately graduated to mark, by the shadow of the gnomon above, the sun's position before and after noon. If the sun is in the zenith, he shines directly on the staircase, and the shadow falls beyond the coping. A flat surface on the top of the staircase, and a gnomon, fitted the building for the purpose of an observatory. According to the known laws of refraction, a cloud or body of air of different density from the common atmosphere, interposed between the gnomon and the coping of the plate below, would, if the cloud were denser than the atmosphere, cause the shadow to recede from the perpendicular height of the staircase, and, of course, to reascend the steps on the coping, by which it had before noon gone down; and if the cloud were rarer, a contrary effect would take place (see Bishop Stock's Tract. of Isaiah, Bath, 1808, p. 199). Such a building might also be called "a house." It agrees also with Adam Clarke's supposition that "the stairs" were really "a dial," and probably this very dial, on which, as being in the most public place, or rather on the platform on which they set Deh, the top of which they set Deh, while they proclaimed him king by sound of trumpet" (Commentary at 2 Kings xii, 18). Bishop Stock's speculation that the retrogression of the shadow might be effected by refraction is supported by a natural phenomenon of the kind on record. On the 27th of March, 1708, P. Romuald, prior of the cloister of Metsa, made the observation that, owing to such a refraction of the solar rays in the higher regions of the atmosphere, in connection with the appearance of a cloud, the shadow on his dial deviated an hour and a half (Rosenmüller). The phenomenon on the dial of Ahaz, however, was doubleless of a miraculous nature, even should such a medium of the miracle be admitted: nothing less than a divine communication could have enabled Isaiah to predict its occurrence at that time and place; besides, he gave the king his own choice whether the shadow should advance or retro ten degrees. There seems, however, to be no necessity for seeking any medium for this miracle, and certainly no necessity for opposing any actual interference with the revolution of the earth, or the position of the sun. In the more distinct and ample account of it in 2 Kings, it is simply said that the Lord, at the prayer of Isaiah, brought the shadow ten degrees backward. Adopting the present state of our knowledge, in the parallel passage, Jer. xxxviii, 8, it is observable that what is called the sun in one part of the verse is called the shadow in the other. It is certainly as philosophical to speak of the sun returning, as it is of its setting and rising. Thus the miracle, from all the accounts of it, might consist only of the retrogression of the shadow ten degrees, by a simple act of Almighty power, without any medium, or, at most, by that of refracting those rays only which fell upon the dial. It is not said that any time was lost to the inhabitants of the world; it was not even observed by the astronomers of Babylon, for the reputation came to inquire concerning the wonder that was done in the land. It was temporary, local, and confined to the observation of Hezekiah and his court, being designed chiefly for the satisfaction of that monarch. It is remarkable that no instrument for keeping time is mentioned in the Scripture before the dial of Ahaz (about B.C. 790); nor does it appear that the Jews generally, even after this period, divided their day into hours. The dial of Ahaz was probably an object only of curious recreation, or served at most to regulate the occupations of the palace. Mr. Bown-quet, in a curious paper read before the Asiatic Society, endeavors to make out a synchronism between the reigns of Hezekiah and the Assyrian kings by means of the astronomical event in question. He
shows that upon such steps as appear to have been used for exhibiting the sun's meridional altitude, any very large partial eclipse on the northern limb of the sun, occurring about five days from the winter solstice, near the hour of noon, would produce the effect described in the instance under consideration; and he calculates that such an eclipse actually took place Jan. 11, B.C. 688, which he accordingly fixes upon as the date of the Scriptural incident (Journ. Soc. Lit. Oct. 1864, p. 217, 218). This, however, does not tally with the Hebrew chronology, nor is it sufficiently confirmed by other savans to be entitled to reception. See CHRONOLOGY.

See Hezekiah.

Diamond occurs in the Auth. Vers. as the translation of two Heb. words. See Gem.

1. יַכְלוּם (yaqalom), so called from beating, with allusion to its hardness, a precious gem, placed sixth in the breastplate of the high-priest, with the name of Naphatli carved on it (Exod. xxvii, 18; xxxiv, 11), and mentioned by Ezekiel (xxviii, 15) among the precious stones of the king of Tyre. The Sept. and Vulg. understand by it the jasper; several of the ancient versions render it by onyx, which is not improbable; still others by adamast, which is less likely. There is much reason to doubt whether the diamond was known in the time of Moses (see below). Our translation "diamond" is derived from Aben Ezra, and is defended by Braun (Vest. Sacert. ii, 13). Kalleisch (on Exod. p. 536) says "perhaps emerald." See Onyx.

2. שָׁמָר (shamar), a sharp point; hence often a bri- er, a precious stone, named in Jer. xvii, 1; Ezek. iii, 9; Zech. vii, 12. The Sept. in Jeremiah, and the Vulg. in all the passages, take it for the diamond. The signification of the word (from שָׁמָר, to pierce) countenances this interpretation, the diamond being, for its hardness, used in perforating and cutting other minerals. Indeed, this use of the shamar is distinctly alluded to in Jeremiah, where the stxus pointed with it is distinguished from one of iron (comp. Pliny, Hist. Nat. xxxvii, 10). The two other passages also favor this view by using it figuratively to express the hardness and obduracy of the Israelites. Our version has "diamond" in Jer. xvii, 1, and "adamast" in the other text. Bothart, however, 843 sq., rejects the usual explanation, and, comparing the word shamar with the Greek σμήρος or σμήρας, conceives it to mean "emery." This is a calcined iron mixed with siliceous earth, occurring in livid scales of such hardness that in ancient times, as at present, it was used for polishing and engraving precious stones, diamonds excepted (Hoffmann, Mineral. i, 851 sq.). Bohlen supposed an Indian origin of the word, and compares as- mari, stone which eats, spoken of gems, iron, etc. from their hardness. Rosenmüller is in favor of the diamond in his Scholia, but in his Aberrationkunde he takes up Bochart's notion, and urges that if the Hebrews had been acquainted with the diamond, and the manner of working it, we should doubtless have found it among the stones of the high-priest's breastplate; and that, as the shamar was not one of the stones thus employed, therefore it was not the diamond. But to this it may be replied that it was perhaps not used because it was too expensive, or was possibly not introduced until a later period. The argument drawn from the rarity of the word in the Old Testament is of little weight, and there is no necessity for seeking an oriental origin of the word σμήρος or σμήρας, or ground for considering it identical with shamar, as it may easily be traced from the Greek itself (see Passow, s. v.; Eichhorn, De Gemmis Sculp. Hebr.). For an account of the diamond of the ancients, see Moreau's Ancient Mineralogy, p. 145-146. See Adamast.

The diamond is the hardest and most valuable of the precious stones, and for many ages was considered indestructible by fire or any other means; modern chemistry, however, has proved that at a heat rather below that required to melt silver it is gradually distilled or burned. It is, in fact, nothing but pure carbon, but in a more highly crystallized state than coal. In former times, all the diamonds that were known were brought from different parts of India, particularly from the famous mine of Golconda, near Hyderabad, the present capital of the Deccan, in Hindustan; the islands of Molucca and Borneo have also produced many valuable stones. The diamond mines of Golconda are now so far exhausted as to be considered not worth the expense of working, and the diamonds which are brought to Europe come chiefly from Brazil. They are always found in an alluvial soil, generally gravel, resting on granite, and not imbedded in any other substance, but appear like small pebbles, with the surface flattened in many parts.

Dian'a. The Artemis of the Greeks (Apollo, Acts xix, 24), and Diana of the Romans, is a goddess known under various modifications and with almost incompatible attributes. According to the Homerid accounts and Hesiod, she was the daughter of Jupiter and Latona, born at the same time with Apollo at Delos. As the tutelary divinity of Ephesus, in which character alone she concerns us here, she was undoubtedly a representative of the same power presiding over conception and birth which was adored in Palestine under the name of Ashthoreth. She is therefore related to all the cognate deities of that Asiatic Juno-Venus, and partsake, at least, of their connection with the moon. Creuzer has combined a number of testimonies in order to show how her worship was introduced into Ephesus from the coasts of the Black Sea, and endeavors to point out the several Medo-Persian, Egyptian, Libyan, Scythian, and Cretan elements of which she is compounded (Symbolik, ii, 115 sq.). The Arabic version of the Acts renders Artemis, in the chapter cited, by As-Zuharat, which is the Arabic name for the planet Venus. From certain Ephesian coins which represent her seated upon her favorite deer, and in other rustic positions, it appears that she was identical with the virgin huntress of the earlier mythology, the grosser feature of her worship being apparently borrowed from association with the Ephesian Medals of Diana.

vulputitious religions of the East. Guhl, indeed (Ev he- sie, p. 78. 86), endeavors in almost all points to iden- tify her with the true Greek goddess. In some re- spect the temple on which the statue was burnt on the night of Alexander's birth, the calamity occurred because the goddess was absent in the character of Lucina. But the true Ephesian Diana is represent-
ed in a form entirely alien from Greek art (see Jerome, *Præf. ad Ephes.* p. 589, ed. Ver.). Guli indeed supposes this mode of representation to have reference simply to the fountains over which the goddess presided, conceiving the multiplication of breasts to be similar to the multiplication of eyes in Aργος or of heads in Typhoeus. But the correct view is undoubtedly that which treats this peculiars form as a symbol of the productive and nutritive powers of nature. This is the form under which the Ephesian Diana, so called for distinction, was always represented, wherever worshipped; and the worship extended to many places, such as Samos, Mitylene, Perga, Hierapolis, and Gortyna, to mention those only which occur in the N.T. or the Apocrypha. Josephus mentions a very rich image of hers at Elymais in Persia (Jos. xii, 9, 1). Her most noted temple was at Ephesus. Here also, as in the temple of Apollo at Daphne, were the privileges of asylum. This is indicated on some of the coins of Ephesus (Akerman, in *Trans. of the Numismatic Soc.* 1841); and we find an interesting proof of the continuance of these privileges in imperial times in Tacit. *Ann.* iii, 61 (Strabo, xiv, 614; Pausan. vii, 2; Cicero, *Verr.* ii, 88). The temple had a large revenue from endowments of various kinds. It was also the public treasury of the city, and was regarded as the safest bank for private individuals. See *Ephesus.*

Her temple at Ephesus was one of the wonders of the world, but its great glory was the *διώστρη διακοφα,* "the image which fell down from Jupiter" (Acts xix, 36). Images claiming so lofty an origin were to be found in other cities besides Ephesus. There was a similar one at the temple of the Tauric Diana, and another of Minerva, called the Palladium, at Troy. At Rome, too, was the sacred anicle or shield of Mars, which Num. pretended had fallen from heaven, and it was jealously guarded in consequence. The early images of Diana are supposed to have been simply black conical stones, and after another reason for the semi-conical figure of the Ephesian Diana. They may have been *aerides,* similar to the one which existed in the temple of the Sun at Baalbec, or the famous *black stone* in the Kaaba at Mecca. Her original Ephesian image, said to have fallen from heaven, was probably very rude, and, to judge from its representation on ancient coins, little more than a head with a shapeless trunk, supported by a staff on each side. There is some dispute as to the material of which her image was made. Most authorities say it was of ebony, the black color being, as Creuzer thinks, symbolic. Pliny relates that Mucianus, who had seen it, affirms that it was of the wood of the vine, and that it was so old that it had survived seven restorations of the temple (Hist. Nat. xvi, 79). According to Xenophon, it was of gold (Anab. v, 8). The latest image with the full development of attributes, of which we give a representation below, is, as Creuzer says, a Pantheon of Asiatic and Egyptian deities. Even in it, however, we see how little influence Greek art had in modifying its antique rudeness. It still is more like a mummy than a Greek statue. Some of the most significant features in this figure are—the turreted head, like that of Cybele; the nimbus behind it representing the moon; the zodiacal signs of the bull, the twins, and the crab on her bosom; below them two garlands, one of flowers, and the other of acorns; the numerous breasts; the lions, stags, and cows in various parts; the bees and flowers on the sides; and others described in Millin's *Galerie Mythol.* i, 26. See *Shrine.*

Of this heaven-descended image the great city Ephesus was a "worshipper," *πανεικος,* literally a "temple-sweeper," a title which was assumed by many cities as a mark of high distinction. There were, however, a class of men particularly called *πανεικος* (Xenoph. *Anab.* v, 3, 6), who were persons of rank and consideration, and to whom was assigned the duty of offering sacrifices on behalf of the emperor. Her priests were called Megabaxyi, and were eunuchs (Strabo, xiv, 614). They were restricted to a severe diet, and prohibited from entering any private house; they must have been a wealthy body, for they sent a statue of gold to Artemidorus, who placed their cause at Rome, and rescued their property out of the hands of the farmers of the public revenues, who had seized upon them. Once in the year was there a public festival held in honor of the goddess in the city of Ephesus, and to this festival all the Ionians who could do so made a point of repairing with their wives and children, bringing with them not only costly offerings to Diana, but also rich presents for the priests. No arms were allowed to be worn in the precincts of her temple. No bloody sacrifices were offered. The symbol of this divinity was a bee (Aristoph. *Rhn.* 1273), and her high-priest bore the name of king (*εσαρ*). Her worship was said to have been established at Ephesus by the Amazons (Pausan. ii, 7, 4; viii, 12, 1). See
Greek Imperial Copper Coin of Ephesus and Smyrna allied, bearing on one side the title "Domitila," with the name of the proconsul, and on the other the figure and titles of Diana.

The cry of the mob (Acts xix, 28), "Great is Diana of the Ephesians!" and the strong expression in ver. 27, "whom all Asia and the world worshippeth," may be abundantly illustrated from a variety of sources. The term μεγάλη, great, was evidently a title of honor recognised as belonging to the Ephesian goddess. We find it in inscriptions (as in Boeckh, Corp. Ins. 2963, c.), and in Xenophon's Ephe- sica, i, 11. The name Ἀρείας itself, according to Clemens Alex. (Stromata, i, 306 ed. Pott.), is of Phrygian origin, and it may be connected with the Persic Artę, "excellent." As to the enthusiasm with which "all Asia" regarded this worship, independently of the fact that Ephesus was the capital of the province, we may refer to such passages as the following: ὁ ἄثροι Ἀσίας ναὸς, Corp. Ins. 1, c.; "communiter a civitatibus Asiae factum," Livy, i, 45; "tota Asia extrema, etc." Pliny, xvi, 79; "factum a tota Asia," ib. xxxvi, 31. As to the notoriety of the worship throughout "the world," Pausanias tells us (iv, 31) that the Ephesian Diana was more honored privately than any other deity, which accounts for the large manufacture and wide-spread sale of the "silver shrines, etc." ordained by Luke (Acts xix, 35) and not by any other. This specific worship was publicly adopted also, as we have seen, in various and distant places; nor ought we to omit the games celebrated at Ephesus in connection with it, or the treaties made with other cities on this half religious, half political basis. See the treatises De Diana Ephesia, by Arpach (Haen. 1654), Nessel (Amoh, 1708), Polcke (Lips. 1718), Schulin (Viteb. 1687); also Wilsich, De saeculis veterum (Lips., 1717); Sibier, De voce (Lips. 1766); Sylling, De ususuis (Ros. 1702). For the magical arts practised there (Acts xix, 19), see Sorcery.

Dias, Manoel, a Portuguese missionary, was born at Alpalham in 1559. He entered the order of the Jesuits in 1576, and was, in 1585, sent as missionary to India. The vessel in which he sailed was wrecked in the Mozambique Channel, and only two, Dias and Pierre Martins, bishop of Japan, escaped. They reached, after many dangers, the coast of Sofala, where they were enslaved for the term of one year. After their liberation they reached Goa. Dias labored as a missionary first in that city, subsequently at Tana, Chaul, and in China. In the latter country he traveled for three years, as "visitor" of his order, most of the provinces. He was then for some time at the head of the seminary of Macao, which he left in order to take charge of the mission of Nankin. In the latter years of his life he was visitor-general of China and Japan. He died at Macao July 19, 1620. He published a Carta escrita de Pekin em 1602, and Littera Annuus for each of the years from 1618 to 1625 (Rome, 1629).—Hoefer, Biog. Générale, xiv, 45.

Dias, Manoel, a second Portuguese missionary and Jesuit of this name, a nephew of the preceding one, was born in 1590 at Alpalham. He entered the order of the Jesuits at Evora in 1608, and in 1614 set out for the East as a missionary. After being for some time rector of the seminary of St. Thomas, Dias, together with father Joao Cabral, penetrated into Thibet, a country which was at that time almost entirely unknown. Dias died on the journey, exhausted by fatigues, Nov. 13, 1630.—Hoefer, Biog. Générale, xiv, 46.

Dias, Manoel, a third Portuguese missionary of the name, was born at Castello-Branco in 1574. He entered the order of the Jesuits in 1592, and was sent as missionary to China in 1601. He was professor of theology at Macao, vice-provincial, and visitor-general of the Jesuit missions in China and Japan. He traversed nearly the whole of the Chinese empire, and died March 7, 1659, at the age of 85 years, of which 58 had been spent in China. Dias wrote a number of works in the Chinese language, the most important of which is a collection of sermons, in twelve volumes.—Hoefer, Biog. Générale, xiv, 47.

Diaspora, the title of the governing body in the Moravian brothers' Church. See MORAVIAN.

Diaspora. See DISPERSAL (Jews).

Diastezis (διατείσις), a word anciently used for liturgies, or forms of prayer. Gregory Nazianzen calls the liturgy of St. Basil, composed by the direction of his bishop while he was presbyter of Cesarea, κοινωνία διατείσις, the order of prayers; and those forms and orders of divine worship collected by the author of the Apostolical Constitutions were styled διατείσις.

—Bingham, Orig. Eccles. bk. xiii, ch. i, § 9.

Diattessaron, in Biblical literature, a harmony of the four Gospels. See harmony; Tatian.

Dias, Francisco, a Spanish missionary, was born at S. Cebran de Mayuelas, in old Castile. After entering the Dominican order, he was, in 1632, sent as a missionary to the Philippine Islands. In 1635 he went to China, where he labored as a missionary in several provinces. In consequence of his zeal he had often to suffer from persecution, and finally was killed by the throwing of a stone, Nov. 4, 1646. He wrote a number of works in the Chinese language, the most celebrated of which is a catechism (Ky-Mung, published in 1656, and in many subsequent editions). He is also the author of a Chinese-Spanish dictionary, which contains 7160 Chinese characters.—Hoefer, Biog. Générale, xiv, 56.

Dias, Pedro, a Spanish missionary, was born at Lupiona, near Toledo, in 1546. He entered the order of the Jesuits in 1566, and was, in 1572, one of the first Roman Catholic missionaries who were sent to Mexico. He went to Rome as a delegate of his order, and died as prefect of the Jesuits for the province of Mexico, in the city of Mexico, Jan. 12, 1683. He wrote Littera de Missionebus per Indiam occidentalem ab Jesuitis (from 1591 to 1610), and Epistola de 52 Jesuitis interfectis in Brazilia (Antwerp, 1605, 8vo).—Hoefer, Biog. Générale, xiv, 56.

Dibdin, Thomas F., D.D., a noted bibliographer, was born at Calcutta in 1778. He was educated at St. John's College, Cambridge, and studied law, but afterwards changed his views, and was ordained in 1804. He then became preacher of Tenison's chapel, London; also of Brompton chapel, and Quebec and Fitzroy chapel. In 1823 he became vicar of Exning, and rector of St. Mary's, Blymestone Square, in 1824. He died in 1858. His principal works are The introduction to the Knowledge of Rare and valuable Editions of the Greek and Latin Classics, together with an Account of Polyglot Bibles, Polyglot Psalters, Hebrew Bibles, Greek Bibles and Greek Testaments, the Greek Fathers and the Latin Fathers (Lond. 1817, 4th ed. 2 vols. 8vo); Bibliomaniac, or Book-madness (Lond. 1842, royal 8vo); The Library Companion (Lond. 1824, 4th ed. 8vo); Sermons, doctrinal and practical (Lond. 1829, 8vo); etc.—Darling, Cyclopædia Bibliographica, s. v.; English Cyclopædia, s. v.

Diblah. See DIBLATH.

Diblaim (Hebrew, דִּבְלַיאָמ, דַּבְלַיאָמ, two round
caked, e. g. of dried figs pressed together into a mass, as in 1 Sam. xxv. 18; but according to Fürst, Heb. Handw. s. v., double cason; Sept. דֵּסְעַעַס v. r. דֵּסְעַעַס, the name of the father of Hosea's meretricious wife (Hos. i. 9). B.C. ante 725.

Dib'lah (Hebrew, with n directive, דִּבְלָא, דִּבְלָא, דִּבְלָא, "towards Diblah," or rather towards Diblah; Sept. דַּבְלָא; Vulg. Diblatha), a place mentioned as contiguous to a desert of the kingdom of Israel (Ezek. vi. 14), where, instead of דִּבְלָא, i. e. Diblah, the text ought probably (see Diblahaim) to read דִּבְלַא, Bribal (q. v.).

Diblaha'ım (Heb. דִּבְלָהָאָמ, דִּבְלָהָאָמ, דִּבְלָהָאָמ, two cakes [see Diblahaim], probably so called from the shape of the city, on two low knolls), a place mentioned in the combined name Almon-Diblahaim (Num. xxxiii. 45 and Beth-Diblahaim (Jer. xlviii. 22), which probably refer to the same city of Moab. Eusebius and Jerome (Onomast. s. v. ierar, Jassa), in speaking of Jaha, say, "it is still shown between Medan and Diblahai (Διβλαχαι)." The name suggests an identification with the Diblahaim, or rather Diblah, of Ezek. vi. 14, the location of which place is not altogether forgotten; were it certain that this is the correct reading in that passage. As that place is spoken of as situated at the other extremity of the land from a "wilderness" or midbar, a term frequently used for the nomad country on the south and south-east of Palestine, it is natural to infer that it was in the north. To this position Beth-diblahaim or Almon-diblahaim, in Moab, on the east of the Dead Sea, are obviously unsuitable; and, indeed, a place, which, like Diblahaim, was on the extreme east border of Moab, and never included even in the allotments of Reuben or Gad, could hardly be chosen as a landmark of the boundary of Israel. The only name in the north at all like it is Riblah (q. v.), and the letters D (°) and R (°) are so much alike, and so frequently interchanged, owing to the carelessness of copyists, that there is a strong probability that Riblah is the right reading. The conjecture is due to Jerome (Comm. in loc.), but it has been endorsed by Michaelis, Gesenius (The евр. p. 812), and other scholars (see Davidson, Hebr. Diction. (141), Riblah). The old town is not heard of during the early and middle course of Jewish history, but shortly before the date of Ezekiel's prophecy it had started into a terrible prominence from its being the scene of the cruelties inflicted on the last king of Judah, and of the massacres of the priests and men of Jerusalem perpetrated there by order of the king of Babylon.

Di'bón (Heb. דִּבּוֹן, דִּבּוֹן, דִּבּוֹן, a pining, Gesenius; or river-place, Fürst; Sept. דָּבִיָּה, but דָּבַיָּה in Num. xxxi. 30, Neh. and Jer.; דָּבַיָּה in Josh. דָּבַיָּה in Isa.), the name of two cities.

1. A city, originally of the Moabites, on the northern bank of the Arnon, at the point where the Israelites crossed that river on their journey to the Jordan, and where the first encampment was made after having passed it (Num. xxxii. 30; xxii. 8). It is called also Dibon-Gad (Num. xxxiii. 45), probably from its having been rebuilt by the tribe of that name (Num. xxxii. 34), although it was afterwards assigned to the tribe of Reuben (Josh. xiii. 9, 17). In later times we find, it with other towns in this quarter, in the hands of the Moabites (Jer. xxiv. 18, 19). Eusebius and Jerome erroneously distinguish the Dibon of Moab, from that where the Israelites encamped, and they describe the former as still a very large village near the Arnon (Onomast. s. v. דָּבִיָּה), Delon). The site has been recognised by Seetzen, Burckhardt (ṣiyār, p. 382, ed. von Soden, p. 649), at a place which bears the name of Dibon, in a low tract of the district called the Kaura, about three miles north of II.—D ID D

the Arnon (Mojel). The ruins are here extensive, but offer nothing of interest. By an interchange of kindred letters, it is once called Dimon (Isa. xv. 9), and is there spoken of as occupying an elevated situation (ver. 2).

2. A city in the tribe of Judah, inhabited after the captivity (Neh. xi. 20). It is apparently the same called Dimonah (q. v.) in Josh. xv. 22. Schwarz says it is "the village of Dir-Dibon, 5 Eng. miles N. of Bet-Jibrin" (Palest. p. 116), meaning Dir-Dubban (Robinson, Res., ii, 358, 421); but this position does not agree with the site of the inscriptions of localities. The site is probably (Knobel, in loc. Joes.) the modern Ed-Dib, a place on the south side of a shallow wady by the same name, a short distance north-east of Tell-Arad (Van de Velde, Mem. p. 352), marked by rude foundations and walls (Robinson, Researches, ii, 478).

Di'bón-gad (Heb. דָּבֹון-גַּד, דָּבֹון-גַּד, דָּבֹון-גַּד, Dibon-Gad; Sept. דַּבְיָה v. r. דַּבְיָה; Vulg. Digonder), one of the halting-places of the Israelites on their way to Canaan, between Ijon-arabim and Almon-diblahaim (Num. xxxiii. 45, 46); probably the same with the Dibon (q. v.) of Num. xxxi. 18.

Dibrell, Anthony, a minister of the Methodist Episcopal Church South. Dates of his early life are wanting. He spent some time at the University of North Carolina, where he studied law, but after his conversion his mind was turned to the ministry, and he joined the Methodist Conference in 1823. His labors were attended with success on several circuits and stations, he was made presiding elder, and was successively a member of the Louisville Convention, and of the General Conferences at Petersburgh, Va., St. Louis, and Columbus, Ga. His last appointment was to Norfolk, Va., where he fulfilled his pleasant life. He was a man of courteous and demonstrated devotion to his calling and flock during the fearful ravages of the yellow fever, to which he fell a victim, Sept. 1, 1855. As a preacher he excelled. His sermons were well prepared, exhibited compass and grasp of thought, and were delivered in a most impressive and commanding style.—Annals of Southern Methodism, 1855, p. 841.

Di'bri (Heb. דִּבְרִי, "right"?; perhaps eloquent; but according to Fürst, m. s. v. דִּבְרִי, Vulg. Dibri), a Dane, father of Shelomith and grandfather of the blasphemers who were put to death by Moses (Lev. xxvii. 1). B.C. considerably ante 1619.

dick, John, D.D., a Scotch preacher and theologian of eminence, was born at Aberdeen Oct. 10, 1764, and was educated at King's College, where he passed A.M. in 1781. In 1788 he became minister of the Session Church in Stirling, but was transferred to Glasgow in 1801. In 1820 he was appointed professor of theology in the United Secession Church, but still retained his pastoral office. He died Jan. 26, 1888. His principal writings are Lectures on Theology (Edinb. 1888, 4th ed. 4 vols. 8vo);—Essay on Inspiration (Glasgow, 1813, 8 ed. 8vo)—Lectures on Acts (Glasgow, 1849, 3d ed. 8vo);—Catechism (N. York, Carter, 1860). See Jameson, Cyclopaedia of Biblical Literature, p. 158.

dick, Thomas, LL.D., was born in 1722 or 1774, near Dundee, Scotland, and was educated at the University of Edinburgh with a view to the ministry in connection with the Secession Church. After a brief pastoral charge at Stirling he devoted himself to literature; but, although his productions gained a great popularity both in England and America, they brought him very little pecuniary benefit. Towards the close of his life a small pension was granted him in consideration of his literary services. He died at Broughty Ferry, near Dundee, July 29, 1857. His principal works are The Christian Philosopher (1823);—The Philosophy of Religion (1825);—The Philosophy of the State (1828);—Cyclopaedia of Biblical Literature (1840), and The Practical Astronomer (1845).
Several of his writings have been translated into other languages; one even into Chinese. In a scientific point of view, his writings are of no great value.

Dickey, John McElroy, a Presbyterian minister, was born in York District, S. C., Dec. 16, 1769. After overcoming many difficulties, he graduated his theological studies, was licensed in 1814, and became minister of White River church, near Washington, Davis County, Ind. When ordained in 1817 he joined the Salem Presbytery, and devoted much time as a voluntary missionary to destitute places. In 1819 he removed to Lexington, Scott County, supplied the church there, and ordained in 1799. He subsequently visited the valley of the Wabash and the central part of Indiana, where he organized three churches. From 1835 his labors were confined, with little exception, to the Pisgah church, which his health obliged him to resign in 1847, when he became an agent for the American Tract Society. He died Nov. 21, 1849. He published A History of the Presbyterian Church, Indianas (1829), and A Series of Letters addressed to his friend.—Sprague, Annals, iv, 514.

Dickey, William, a Presbyterian minister, was born Dec. 6, 1774, in York County, S. C. His parents soon removed to Kentucky, where he grew to manhood. He obtained an education with much self-denial, and in 1802 was licensed to preach. He labored fourteen years with the churches of Salem and Bethany, Ky., and then removed to Washington, Lafayette County, Ohio, and soon after to Blooming- burg, Ohio, where he remained forty years. He died in December, 1842.—Wilson, Presbyterian Hist. Almanac, 1864, p. 112.

Dickins, John, a distinguished preacher of the Methodist Episcopal Church, was born in London 1746. He studied at Eton College; emigrated to America before the Revolution; became a Methodist in 1774; preached extensively in Virginia and North Carolina from 1777 till 1782, when he located, but continued his ministerial labors diligently in Virginia. Bishop Asbury met him there in 1780, when Dickins framed a subscription paper for a seminary, on the plan of Wesley's Kingswood School, the first project of a literary institution among American Methodists. It resulted in Collegeville College. At the close of the war Asbury induced him to go to New York, where he took charge of John-street Church, the first married preacher who occupied its parsonage. His labors were successful in gathering together the fragments of the Church, seriously broken by the recent war. Dickins was here the first American preacher to receive bishop Coke, and approve Wesley's scheme of the organization of the denomination. He had an important agency in that work. In 1785 he travelled Bertie Circuit, Va. He was reappointed to New York in 1786, '87, '88. In 1789 he was stationed in Philadelphia, and there began one of the greatest institutions of American Methodism, its "Book Concern," which has also been the memorable outbreak of the yellow fever Sept. 27, 1798. He was one of the soundest minds and ablest preachers of early Methodism; a good scholar in English, Latin, Greek, Hebrew, and mathematics; an influential counselor, and a mighty preacher.—Stevens's Hist. of the Meth. Episc. Church, vol. ii, III, and iv; passim; Minutes of Conference, i, 179.

Dickinson, Austin, a Congregational minister, was born at Amherst, Mass., Feb. 15, 1791. He graduated at Dartmouth 1813; studied theology at Princeton; was admitted to the ministry Feb. 2, 1819, and travelled south for his health. He came North in 1822, and became agent for Amherst College, and was very successful. Besides being largely success- fully in raising the charity fund of $50,000, which has been a source of permanent prosperity to the college, and $30,000 for general purposes, he ex-

erted as much influence as any other man in obtaining a charter for the college" (Sprague). In 1828 he started the "National Preacher" in New York, and was its editor until 1834. In 1844 he began writing religious articles for the secular press, and continued in his useful task until the end of his life, Aug. 14, 1849.—Sprague, Annals, ii, 674.

Dickinson, Jonathan, D.D., a Presbyterian minister and president of Princeton College, was born at Hatfield, Mass., April 22, 1808, and graduated at Yale 1806. After being engaged for some time in the study of theology, he was ordained in 1829. He held for nearly forty years. In the great Whigsfiedel revival he stood up firmly in defense of the genuineness of the work, and on one occasion at least Whitsfield is known to have preached in his parish to an immense congregation. Still he had no sympathy with the prevailing fanatical tendencies of the time, and manifested the utmost caution in discriminating between a true and false religious experience. He published a tract bearing upon his subject, written with great vigor and discrimination. After the division of the Presbyterian Church in 1741 into the Synods of New York and Philadelphia, each synod was intent on making provision to train up young men for the ministry. Dickinson was the acknowledged leader of the Synod of New York, as he had been of the old Synod of Phila- delphia before the separation, and he is supposed to have had a primary influence in originating the Col- lege of New Jersey. A charter for a college having been obtained from the acting governor of the colony, the institution, which took the name of Nassau Hall, went into operation in 1746 with Jonathan Dickinson as president, though, in taking upon himself this new office, he did not relinquish any of his duties as a pas- tor. It did not commence its operations till 1746, and his death occurred on the 7th of October, 1747. His publications include A Defence of Presbytarian Ordination (1734); Four Sermons on the Resurrection of Christ (1735); Free Discourses on Points of Chris- tian Faith, etc. (1741); A Display of God's special Grace (1742); Reflections on Generation, with a Vestige of the received Doctrine (1745); A Vindication of God's sovereign free Grace (1746); A second Vindica- tion, etc. (1748); and several detached sermons.— Sprague, Annals, iii, 14.

Dickinson, Edward, an English Wesleyan minis- ter, was born at Topsam, Devonshire, Nov. 16, 1758. He received a careful training from a well-educated father, and in 1775 went to Bristol, where he soon joined a Methodist society. He entered Oxford as commo- nioner of St. Edmund Hall in 1779, passed A.B. in 1782, and A.M. in 1785. In 1788 he was ordained in the Church of England, and became curate to Perronet (q. v.) at Shoreham. In 1786 he went to London as pastor of one of Mr. Wesley's societies, and continued to reside there in charge of various societies during the rest of his life. He died May 10, 1802. He was a man of great learning, and especially an excel- lent linguist. His researches in the early writings of Christianity, by accumulated thorough and beau- tiful and beloved pastor, an intimate friend of the Weleys, and a sort of intermediate link between the Church of England and Wesleyan Methodism.—Smith, History of Weslyen Methodism, i, 574; Jackson, Christian Biogra- phy; Stevens, History of Methodism, ii, 315.

Dickson, David, an eminent Scotch divine, was born at Glasgow in 1635, and educated at the University of Edinburgh, where he was regarded as a genial and courteous professor of Philosophy. Having been appointed minis- ter of Irvine in 1618, he became a very popular preacher. In 1648 he became professor of Divinity in the
University of Glasgow, and afterwards in that of Edinburgh. He was ejected at the Restoration in 1662, and died the same year. He was considered one of the ablest and most useful men of his time, and his works continue to be esteemed, particularly his comments, in which he appears to have been greatly interested. Dickson's name will ever be remembered for his version of the hymn O Mother dear (see HYMNOLGY). His principal works are, A brief Exposition of the Gospel according to Matthew (Lond. 1651, 12mo); A short Explanation of the Epistle to the Hebrews (Aber. 1658, sm. 8vo); Lond. 1659, royal 8vo); A brief Exposition of the Psalms (Lond. 1655, 8 vols. 8vo; Glasg. 1864, 2 vols. 12mo); Therapeutica sacra (Edin. 1656, 8vo); Therapeutica sacra, translated by the Author (2d ed. Edinb. 1857, 8vo); Truth's Victory over Error ( Glasg. 1772, 12mo).—Hetherington, Ca. of Scotland, vol. i; M'Crie, Sketches of Ch. Hist. i, 196; ii, 81.

Dictionaries. BIBLICAL. The term dictionary is the most general one for designating an alphabetical arrangement of words with copious explanations attached, whereas an encyclopedia is a simple list of words with brief definitions; while a lexicon, on the hand, is an etymological and grammatical exhibit of the words of a (usually foreign) language, and Encyclopaedia (in Viewr wandins, instruction in a complete circit) is properly a series (whether alphabetical or otherwise) of treatises embracing the whole range of a science by topics (Crabbe's English Synonymes). This last word is used by English authors specially as a title of works covering the entire compass of human knowledge, arranged alphabetically under leading heads, and has thence been sometimes applied in a more limited way to works on one or more branches of science. The term Cyclopaedia, however, is now generally recognised as more distinctly applicable to books of this class (see History of Cyclopaedias, in The Lond. Quart. Rev. April, 1858). In order to entitle it justly to the rank of either of these latter appellations, a work should contain the literature of the subjects of which it treats. Finally, a glossary is an elucidation of obscure or obsolete words occurring in a particular author or class of writers; thesaurus is applied to a collection of learned dissertations, and also to an extensive lexicon, both being usually written in Latin; bibliotheca is applied also to collective editions, e.g., Biotheo Patrum.

The first production of this kind, relating to the Bible, of which we have any definite knowledge, aside from those purely lexical, was the Onomasticon of Eusebius, edited and translated by Jerome, which, however, was merely geographical, and embraced Palestine only. It has been of great service, nevertheless, to all writers since on Biblical topography. Jerome likewise prepared a treatise of less value on the Hebrew proper names occurring in the Scriptures (De Nominaibus Hebraicis, in vol. ii of his works, No. 15) chiefly from materials previously afforded by Philo Judaeus and Origen, but supplemented by testimony of ancient early Christians (De Viris Illustribus, vol. ii, pt. ii of his works). After this, however, no work worthy of note belonging to the class we are considering appeared till the renewal of Biblical learning after the Reformation. The following are those of leading importance and celebrity.

(1.) Aug. Calmet (q. v.), Dictionnaire Historique, Critique, Chronologique, Geographique, et Litteraire de la Bible (Paris, 1729, 2 vols., and [most complete] 1739, 4 vols. fol.). "This work was composed in a great degree out of the materials already used by the author in the notes, dissertations, and preface of his great work, the Compendium Litteratum. The first portion of it appeared in 1732, in three large and costly folio volumes, executed by two calligraphers, Samuel d'Oyley and John Colson, the former of whom translated to the letter M, and the other to the end of the book. This translation formed the great treasury from which all other dictionaries of the Bible which subsequently appeared. These exhibited little more diversity from each other than such as naturally arises where persons of different habits of mind form different abridgments of the same work, the original or new matter being chiefly constituted by the interpolation of doctrinal articles in support of the particular views which the comp-
pilier entertained. At length a new edition of Calmet was undertaken by Mr. Charles Taylor, and appeared in three volumes, divided into five, and published in 1837. This was a very eccentric performance, composed thus: two volumes consisted of an abridgment of Calmet, one volume of engravings, and two volumes of 'Fragments.' These fragments contained a sprinkling of useful matter drawn from histories and books, but the fourth of the whole consisted of singularly wild and fanciful speculations respecting mythology, ethnology, natural history, antiquities, and sundry other matters, and are replete with unlearned language, outrageous etymologies, and the vagaries of an unlettered intellect. Calmet's, thus transformed, was re-issued as such by the editor as of the original author, and its turn formed the basis of nearly all the Biblical dictionaries which have since appeared, including a very painstaking digest of the more useful parts of Taylor's matter incorporated with the dictionary under one alphabet, the whole abridged into one volume royal 8vo, which appeared in 1832. This work was in the same year re-produced in Boston, under the supervision of Dr. E. Robinson, who made some few but valuable additions to particular articles" (Kitto). Calmet's own dictionary is still a standard work with Roman Catholics, and a modified edition of it is incorporated into the extensive series of Dictionnaires de la Bible, lately published by the Abbé Migne at Paris. It never was a profound work, however, and has now so far fallen behind the progress of Biblical science as to be of little use to the student beyond mere textual purposes. (2.) Although the work of Calmet was the most learned and practically useful of all similar productions that had hitherto appeared, yet the partial standpoint of the author rendered it unsuited to the enlarged demands of the present age, which, with the superciliousness and want of plan in later works, had brought the reputation of this kind into some disrepute; and it was reserved for Dr. G. B. Winzer (q. v.), a learned theologian of Leipzig, to restore them to their former credit by his *Biblische Real-wörterbuch* (Leipzig, 1829, 2 vols. 8vo), of which a second and improved edition was published in 1833-38, and a third, still further enlarged, in 1848. This is a wholly original work, executed in the most careful and scholarly manner, and reaches the point, although in a way which condensed extracts of the classical and earlier modern illustrations of Biblical topics. It is a masterly performance of its kind, and has been of very great service in the compilation of the present Cyclopædia. "The sphere of Winzer's work is, however, narrowly drawn, being designed altogether for students. The critical treatment in it is of a very unequal character, and many of the subjects examined in its pages, especially in the department of natural history, have little relation to the Bible." Similar publications by various other writers have been produced on the Continent of Europe, but they cannot be regarded as exhibiting equal claims to scientific criticism or well-considered arrangement. Several of these will be noticed below. (3.) A great advance on all predecessors, constituting, it may be said, a new era in the history of the subject, is marked by the appearance (Edinb. 1845, 2 vols. 8vo) of the *Cyclopædia of Biblical Literature*, edited by John Kitto, D.D. (q. v.), chiefly from the contributions of original articles by forty writers, including many of the most eminent theologians and Biblical scholars of Protestantism in Great Britain, Germany, and America; a duplicate edition was also issued in this country (N. Y. 1862). This work not only covers a larger range of topics connected with the Bible, and the church, but above all, handles each subject with a freshness and ability previously unattempted. In the biography of Biblical characters, a department mostly occupied by the editor himself, the narratives are invested with an interest like modern history. The geography and history of the Bible are fundamentally investigated anew. The details in all the earlier works are given with completeness, accuracy, and considerable copiousness. For the first (and we may almost say the only) time, the difficulties of the natural history of the Bible are here vigorously grappled with by persons (Dr. Boyle in the department of Oriental botany, and Col. C. Hamilton Smith in that of insects) who combine a sound classical and scientific education to throw light upon them. Oriental customs are diligently and carefully explored, and old errors scrupulously weeded out. A tolerably complete view of the literature of each subject is also usually given. In short, an earnest, liberal, and judicious series of papers is brought to bear upon every topic (with but few exceptions) that are within the scope of such a work. It has been the basis of a large number of important Biblical articles in this Cyclopædia. The only serious drawback upon its general value is a tendency to prolixity, and in some cases to a speculative vein, together with the almost inevitable consequences of a multiplicity of authors, leading to omissions in some cases and discrepancies in others. The edition of 1856, although professing to be "carefully revised" by Dr. Burgess, altogether failed to remedy these defects, being printed from the same stereotype plates, with the change of a few pages and an unusual number of misprints, so very many of the most palpable errors being left uncorrected. A really new and greatly augmented edition has now (Edinb. 1862-5, 3 vols. royal 8vo) been carried through the press by Dr. J. L. Alexander, with the aid of a number of scholars, which, while substantially a reprint of many of the old articles, has large additions of new ones, especially the biographies of eminent Biblical writers, thus more fully realizing the special title of the work. The articles on Biblical geography and criticism are also brought down to the present state of investigation. (4.) The only remaining work which for originality and research deserves to be mentioned in comparison with the foregoing is the *Dictionary of the Bible* (Lond. 1860-4, 3 vols. 8vo), edited by W. M. Smith, L.L.D., of the University of London, and consisting, like the preceding, of articles prepared afresh by fifty-three eminent English and American scholars, although the names intended to represent all nations are far from being those of persons so well known to be proficient in the topics assigned them. The work is of a very elaborate and learned character, and has been peculiarly available in the preparation of the present Cyclopædia from the fact that it seems to avoid as much as possible the line of treatment pointed out by Kitto's. It has the advantage of the latter in a more copious vocabulary, especially in the less important Biblical names, and in bringing down the investigations to a later date, but is far from excelling it in point of clearness and coherence of style, while it is rather the inferior in point of matter and in comprehensiveness. The topographical details are particularly well brought out; those relating to natural science are by no means so satisfactory. The articles are, with a very few exceptions, terse and compact, with a tendency, however, to expansion as the work advances. It contains an immense body of very valuable information, to a large degree new, and for the most part critical, and admirably supplies the stock accumulated by previous efforts in the same line. Like the preceding, it is characterized by a liberal tone of theological sentiment. (5.) The *Imperial Bible Dictionary* by Rev. P. Fairbairn, D.D., with numerous additions (Edinb. 1845 2 vols. imperial 8vo), is of a more popular character, and not so extensive in its general range as those named above. It is, however, entirely evangelical in sentiment. Its chief, a number of which have been borrowed in this Cyclopædia, are particularly fine. It
adds, moreover, some new items to the investigations of its predecessors.

(6.) A new Bibel-Lexikon is announced in Germany, to be edited by Dr. Daniel Schenk, with the cooperation of Drs. Bruch, Dietzel, Dillmann, Fritzsche, Gass, Haussrath, Hitzig, Holzmann, Keim, Lipsius, M. R. Meyer, Schenkel, Sterl, and other eminent Biblical scholars. These names give promise of thorough and original research, but of Rationalistic views. The work is to be comprised in 4 vols. 8vo. What has thus far appeared (Leipzig, 1868) does not afford much new material or literature.

The most important Biblical works for 1864–5, 2 vols. (London, 1866, vol. 1; New York, 1866, vol. 2, 8vo, imp. 8vo, 1865–66), is a vast compendium of Roman Catholic theology, canon law, and of the other topics enumerated in the title. The Abbé Migne’s edition is the most useful, and the cheapest.

Buck, Theological Dictionary, containing Definitions of All Religious and Ecclesiastical Terms, etc. (London, 1892, 2 vols. 8vo; many English and American editions; the best by E. Henderson, Lond. 1888 to 1894). This manual has been very widely circulated, and has well deserved its good reputation, though superseded now by later and larger works.

Brown (J. Newton), Encyclopedia of Religious Knowledge, or Biblical-Lexicon, of the Bible, Theology, Religious Biography, all Religious, Ecclesiastical History, and Missions; containing Definitions of All Religious Terms, and Impartial Accounts of the Principal Christian Denominations that have existed in the World from the Birth of Christ to the Present Day (Brattleborough, 1865, royal 8vo; and in many editions since). This useful work has had perhaps a wider sale than any book of its class has ever reached. It has not the scientific character of more recent books, but at the time of its issue it was up to the wants of general readers, as well as of ministers in actual work. It has a Missionary Gazette at the end, prepared by the Rev. B. B. Edwards, and very full and accurate at the time of publication.

Auerbach (Roman Catholic), Allgemeines Kirchenlexikon oder alphabetisch geordnete Darstellung des Wissenswürdigen aus der geschriebenen Theologie, und ihrer Hilfswissenschaften (Frankfurt a. M., and Mainz, 1846-1850, 8vo, 7 vols. 8vo, and many other editions). This work aims at selections from the whole field of theological knowledge. It is very fair, on the whole; learned, generally accurate, and great skill in condensation is shown throughout the work.

Wetzer and Welte (Roman Catholic), Kirchen-Lexikon, oder Systematische Darstellung der orthodoxischen Theologie und ihrer Hilfswissenschaften (Freiburg, 1848-56, 12 large vols. 8vo), is the most scientific and complete book of its class in Roman Catholic literature. The German Romanist theologians are, in general, far more learned and also more liberal than those of other countries, and this work is a valuable fruit of their industry and erudition. It covers, for Roman Catholic theology, the same field as that treated by Herzog for Protestant theology; and its editors excel in the cyclopedic faculty, so that the length of its articles is better proportioned to their importance than is the case with its great Protestant compere. Nevertheless, the work is still far behind Herzog in completeness.

Farrar (John), An Ecclesiastical Dictionary, explanatory of the History, Antiquities, Heroes, Sects, and Religious Denominations of the Christian Church (Lond. 1858, 12mo, p. 560), is a compact manual, chiefly abridged from Bingham, Coleman, Riddle, and other writers on antiquities, but perhaps the best handbook on the subject. It is very well prepared, and forms a useful hand-book, especially for general readers; the absence of references to authorities makes it less valuable for students.

Eadie (John), Ecclesiastical Cyclopaedia, or Dictionary of Christian Antiquities and Sects (London, 1862, 12mo, 2d ed.). This work covers Theology, Patris—
tions, Church History, Archeology, etc. but, of course, in a brief and summary way. It draws largely from the Encyclopædia Metropolitana and its volumes, and professing to treat of all subjects in the range of theological literature. Few of them are of scientific value, and the whole series is, perhaps, the least important and useful of Migne's great undertakings.

Diderot, Denis, a French writer and infidel philosopher, was born at Dijon, Oct. 5, 1713, and died at Sceaux, near Paris, on March 30, 1784. He was educated at the Church at the Jesuits' College of Langres; but, declining to take orders, he studied law, soon abandoned that pursuit, and devoted himself to literature. "After ten years of obscure drudgery, he became one of the most famous among those literary and scientific disciples whose attacks on the system of rationalism have undermined the former confidence in the order of things, religious and ecclesiastical as well as political, acted so powerfully in precipitating the French Revolution. Diderot projected the Encyclopédie, ou Dictionnaire Raisonné des Sciences, des Arts et des Métiers, which was designed not merely to supersede the Encyclopédie, but to replace it by an imperfection as perfect, as imperfection as the Encyclopédie. It was not intended for private use, but to teach, on every occasion which could admit the teaching, the social and infidel doctrines which were held by the writers. In the course of it, and afterwards, Diderot wrote several didactic treatises, in which he attacked the religious and political institutions of society, and his published correspondence, especially with Voltaire and Grimm, throws much light on the gloomy picture which French society and morals then presented." He died at Paris July 30, 1784. "The great peculiarity of Diderot was his encyclopedic knowledge, and his versatility in comprehending a variety of subjects. Less critical than Voltaire, and less philosophical than Rousseau, he exceeded both as a practical teacher. But in unbelief he unhesitatingly advanced further than either; his temper lacked moral Earnestness, and in later life he was an atheist. A growth of unbelief may be traced in him: at first he was a doubter, next he became a deist, lastly an atheist. In the latter part of his life he engaged in political and literary works, and even condemned some of the English deists. His views seem gradually to have altered, probably under the influence of Voltaire's writings, and of the infidel books smuggled into France; and he then..."

In France, a comprehensive "Universal Dictionary of Ecclesiastical Science" (Dictionnaire Universel des Sciences Ecclésiastiques, Tours, 1838), in 2 vols., has been published by abbé Claire, well known by a number of exegetical works. Besides the above, there are numerous hand-books, on special topics, arranged in alphabetical order, such as Fuhrmann, Handwörterbuch der christlichen Religions- und Kirchengeschichte (Halle, 1826-29, 4 vols. 8vo); Siegel, Handbuch der christlichen Kirchengeschichte (2 vols. 8vo); Doering, Die germanischen Kirche (Berlin, 1831-35, 4 vols. 8vo); Doering, Die deutschen Kaiser- und Reiner (Berlin, 1839, 8vo); Bergier, Dictionnaire de Théologie (ed. by Gousset, Paris, 1834, 6 vols. 8vo); Newcomb, Cyclopedia of Missions (New York, 1854, 8vo); Jones, Christian Biography (Lond. 1852, 2 vols. 8vo); Jamieson, Cyclopedia of Religious Biography (Lond. 1858, 12 vols. 8vo); Hook, Ecclesiastical Biography (Lond. 1846-1852, 8 vols. 12mo); Cyclopedia of Religious Denominations (Glasgow, 1852, 8vo); Martigny, Dictionnaire des Antiquités Chrétiennes (Paris, 1865, 8vo). The Abbé Migne has published three series of the Encyclopædia Theologica, containing 165 volumes, and professing to treat of all subjects in the range of theological literature. Few of them are of scientific value, and the whole series is, perhaps, the least important and useful of Migne's great undertakings.
Didier, or Géry (in Latin Desiderius), bishop of Cahors, was born at Albi in 595. He was of a noble family in Aquitania, and was educated at the court of king Clovis II, who appointed him treasurer of the crown, and son and successor of Clovis, gave to Didier, in addition to his office of treasurer, that of governor of Marseilles. In 629, when his brother Rusticus, bishop of Cahors, was assassinated, Didier was chosen his successor. As bishop he became very rich, and made himself popular by a judicious use of his power. Didier is a popular name in Southern France under the name of Géry. His works have been lost; only six epitases, addressed to prominent persons of his time, as the kings Dagobert and Siegbert III, are still extant. These epitases have been published by Canisis (Antiquae Lectiones, tom. v.), in Migne, Patrologia Latina, vol. lxxvii, and by Bouquet, Collection des Historiae Romanae, tom. iv.—Hoefler, Biog. Générale, xiv, 102.

Didier, Sr., archbishop of Vienne, was born at Ansse, and became bishop of Vienne in 596. As he gave instruction in belles-lettres and ancient literature, he was denounced to Gregory the Great as teaching his pupils pagan literature. Didier found it easy to justify himself; but, having reproved queen Brunehild for her conduct, Brunehild had him cast into the Chalons sur Saone and in 603 Didier was deposed and exiled to an island in the river Rhone. Four years after he was restored to his see, but as he did not cease to censure the queen, and as he endeavored to withdraw the young king Thierry from the influence of his grandmother, Brunehild had him waylaid and assassinated in the village called Piscia, or bank of the Chalarone (subsequently called St. Didier de Chalarone), on May 23, 608. On Feb. 11, 1629, the body of Didier was transferred to St. Peter and Paul’s church at Vienne. Several other churches claim to possess some relics of Didier, who is commemorated by the Church Calendar on May 23 and May 28. Lives of Didier have been published by Mombrice and Chifflet.—Hoefler, Biog. Générale, xiv, 101.

Didrachm (Greek δίδραχμα, Lat. didrachma—a double drachma, "tribute," Matt. xvi, 24), a silver coin equal to two Attic drachmas, and also to the Jewish half shekel (Joseph. Antiq. iii, 8, 5). It was therefore equivalent to about 1s. sterling, or 33 cents. See DRAM; SHEKEL. By the law every Jew was required to pay half a shekel to the Temple (Exod. xxx, 13 sq.), and this amount is represented by the didrachma in Matt. xvii, 24, where it is used for the "tribute-money" demanded of Christ (compare Josephus, Antiq. iii, 8, 1). The Septuagint distinctly renders the "shekel" of the Old Testament by didrachma; but as

Roman Didrachm with Greek Inscription. The Attic drachma was equal to only half a shekel, it seems from this probable that the drachma of Alexandria was equal to two Attic drachmas, or one of Regina. See Frenzel, De didrachma e Chaine soluta (Vitebs, 1878); Schmidt, id. (Argent. 1701; Lire, 1737; also in his Diapog. p. 766-800); Leisser, Illustratio locid Matt. (Fricleropi, 1734; Paulus, Erwerbungsmittel des Sester (in his Theol. Journ. 1735, p. 859-75, 931-45). See TRIBUTE.

Didymus (Diduos, the Twin) was a surname (John xi, 16) of the apostle Thomas (q. v.).

Didymus of Alexandria (called the Blind) was born at Alexandria about A.D. 811, and unfortunately lost his sight in the fourth or fifth year of his age; yet he arrived at great proficiency, it is said, in philosophy, rhetoric, mathematics, music, and divinity (Socrates, Eccl. Hist. iv, 25). He became master of the catechetical school of Alexandria, where his fame drew to him "numbers from distant parts to see him only," and among his disciples were St. Jerome, Rufinus, Palladius, Evagrius, and Isidore. Anthony, the chief of the Recluses, visiting him; and seeing him blind, said: "Let it nothing move you, O Didymus, that your bodily eyes are lost, for you are deprived only of the same kind of eyes as serve the basest insects for vision; but rather rejoice that you possess those with which angels are seen, and God himself is discerned." He died at Alexandria A.D. 896. He opposed the Arian doctrine, but seems to have embraced certain of the views of Origen, which caused him to be condemned at the fifth General Council of Constantinople. He was a voluminous writer, but most of his works are lost; there is a list of them in Jerome, De Vir. Illustr., and in Fabricius, Bibliothecas Graecas, ix, 209 sq. (ed. Harles). Those that are preserved—(1) De spirito Simeto (of the Holy Spirit), of which Jerome made a Latin version, which is preserved among his works. The Greek original is lost. It is given in Gallandii Bibliotheca Patrum, vol. vi; in Migne, Patrologia Graeca, xxix; and in separate editions, Cologne, 1821, 8vo; and (better) Helmstia, 1814, 8vo. The book teaches that spirit is a property, a real existence "in union with the Father and the Son, and different from all created things;" that it is the cause of wisdom, knowledge, and sanctification; and (Luke xi, 10) "that it is the fulness of the gifts of God; and all divine benefits subsist through it, since whatever gift God's grace bestowed flows down from this fountain;" that it is unbounded, therefore no creature (Mark xiii, 11); that it is not of the nature
of angels, for they are not essentially holy; that is not a creature, for men's spirits are said to be filled with it, and no mind can be filled with a creature; nor is it a quality, for the working of an agent is attributed to it; that it exists with and as God, and is so called Acts v, 3, 4; and that it, with the Father and the Son, forms one essential Godhead in a Trinity of persons, each capable of distinct action in the same time and place; and that the Holy Spirit is of the same nature with the Father and the Son, because they have the same operation, etc. (2.) Breve narration in Epistolas Canonicas (Exposition of the Catholic Epistles), given in Migne, Patr. Gr. vol. xxxix, and in other.- (3.) Liber ad Monachos, of which the original Greek is given in Canisii Lec. Amst. i, 304 (compare Basnage's notes in his ed. of Canisius); also in Combe's, Actarium Noverii, vol. ii, and in Migne, Patr. Gr. xxxix:- (4.) De Trinitate, Libri tres (serpi Taddeo), which was long lost, but was found by Joh. Alpoer. Minguetti, and published by him at Bologna, 1763, fol. It is given (Greek and Latin) in Migne, vol. xxxix, where also are several fragments of the Commentaries of Didymus on various parts of Scripture. See the notices in Migne, Patr. Gr. Græc. xxxix, 140 sq.; Fabricius, Bibliotheca Graecæ. ix, 269 sq.; Cave, Historia Literaria, anno 707; Collin, Anti- leut (Berolini, 1788); Schleiermacher (1823); Schleiermacher, Kirchengeschichte, vii, 71 sq.; Guericke, De Schola Alsci. (5607); Schaff, History of the Christian Church, III, § 167; Lardner, Works, iv, 800; Dupin, Ecclesiastical Writers, ii, 103; Clarke, Succession of Sacred Literature, i, 857; Locke, Questions Didymiana (Gottingen, 1829); Alzog, Patrologie, ii, 942 (Freiburg, 1866, 6vo).

Didymus (Zullino), Gabriel, a friend and co-worker of Luther, was born at Joachimsthal, in Bohemia, in 1487. He studied at Prague and Wittenberg. He joined the Augustinians in 1502, and became priest in 1513. He was among the first to embrace the principles of the Reformation, and in 1521 caused private masses to be abolished in the Augustinian convent of Wittenberg, as well as the practice of begging, and substituted a more orderly plan of living on texts taken from Scripture. He afterwards severed his connection with the convents, and engaged in Carlstadt's crusade against learning, but subsequently acknowledged his error on this point. He left Wittenberg, however, and went as pastor to Dilben and Torgau. He was ordained in 1549 by Moritz of Saxony for his opposition to the Leipzig Interim (q. v.), and died in retirement in 1558. See Sekendorf, Commentarius de Lutheraismo; Terne, Nachricht von des G. Didymus sitzamen Leben (Leipsic, 1737, 4to); Herzog, Reel-Encyklopaedie, iii, 584; Planck, Geschichte d. prot. Theologie, iv, 243 sq.

Diefenbacher, Jacob Follmer, a minister of the German Reformed Church, was born near Milton, Northumberland County, Pa., December 18, 1809. He spent his youth on a farm, and in a saw-mill and cloth factory. He pursued his preparatory studies in the Milton Academy, and studied theology in the Theological Seminary of the German Reformed Church then at Carlisle, Pa. He was licensed and ordained in 1828, and was pastor successively in Sharpsburg charge, Mif., Mercersville, Pa., and Harseville, Pa., and Harrison County, W. Va., and Harrington County, W. Va., and Harrison County, Pa. In this last charge he devoted part of his time to teaching. He died Feb. 4, 1842. While at Woodstock he published a small work entitled The Scripture Doctrine of Water Baptism, of Infant Baptisms, and Baptism by Pouring or Sprinkling. At Woodstock, he was compelled to stand a trial in court for an alleged violation of law in expressing certain sentiments on the subject of slavery in an address on colonization. He was, however, acquitted, but soon after left the state. He preached in German and English, and was a warm-hearted and zealous minister.

Dies Irae, the famous Latin judgment hymn of the 18th or 14th century, which, in its received form, reads as follows:

1. Dies Irae, dies illa,
Solvet saeculum in favilla,
Testa David cum Sibylla.
2. Quanta tremor futurus,
Quando judex est venturus,
Cuncta stricte diceresur.
3. Tuba mirum spargens sonum
Per sepulcrum regionum,
Cogo omnes ante thronum.
4. Mors stupebit et natura,
Quam requerd creatura,
Judicantis responsum.
5. Sicut scripturum est,
In quo toto consistenter,
T'unde mundus judicetur.
6. Judex ergo quum sebit,
Quem patrocinat oratione,
Quem vix justis sit auriu?
7. Quid sum miser tunc dicturus,
Quem patrocinat oratione,
Quem vix justus sit auriu?
8. Rex tremendae majestatis,
Qui salvum facies gratia,
Salva me, fons pietatis.
DIES IÆ

9. Recordare, Jesu pie,
Quod sum caesus tua vite,
Et perdas illa die.

10. Quem quem me sedisti laus,
Redemistis crucem passus:
Et santonem non sibi caesus.

11. Juste judax utionis,
Dominum fac remissionis
Ante dimum rationis.

12. Ingenuo teanquam reus,
Colpe rubet vultus meus:
Supplicante parce, Deus.

13. Qui Mariam absolviasti,
Et luxuronam exaudisti,
Mih quoque spem dedisti.

14. Prece meae non sunt dignae,
Red tu, bone fac benigne,
Et in omni temporum.

15. Inter oves locum praeva,
Et ab hostis me sequistra,
Statuens in parte dextra.

16. Confutatus male dicta,
Sincrae scritus addetis,
Voces me cum bene dicta.

17. Oro supplex et acclivar,
Cor contentum quasi chies,
Gere curam mea finis.

[Lucanmos dies illa,
Qua resurrect ex favilla
Juxta duos homo reus;
Huc ergo parce, Deus.
Pie Jesu Domine
Dominus, si requiem. Amen.]

This is the text of the Roman Missal. The last six lines we consider as an addition by another hand from older hymns in public use. Daniel (Thesaurus hymnol. ii, 108) gives two other forms; one considerably longer, from a marble slab in the Franciscan church at Mantua (first published by Mohlck, who, without good reason, considers it the original form), and commencing,

Cogita (Quemque) anima dileta
Ad quod respondere vella
Christo venturo de coelia.

1. Contents.—The hymn is variously called Process de mortu, De diei judicium, In commemoratione defectuorum, and is used in the Latin Church on the day of All Souls (Nov. 2), in masses for the dead, and on funereal solemnities. It is a judgment hymn, based upon the prophetic description of the great day of the Lord in Zeph. i. 15, according to the translation of the Vulgate: "DIES IÆ, DIES ILLA, DIES tribulationis et angustion, diebus mortis dies tenet erum et colignia, dies nebulæ et turbinae, dies tubae et clangoria super civitates munificent et super angulos excelsos." The first words of this passage furnished the beginning and the theme of the poem. The other Scripture passages which the author had in view are Psal. cxi, 26; cxvi, 15; cxvii, 8, etc. (hence David is introduced in the third line of the first stanza as the Scripture prophet of that day); 2 Pet. iii, 7–11 ("The day of the Lord will come as a thief in the night," etc.—hence in some versions Peter is substituted for David), and the descriptions which Christ himself gives of the general judgment (Matt. xxiv and xxv). But the Sibyl is also mentioned, as the representative of the uncontinuous prophecies of heathenism, with allusion to the Sibylline oracle of the destruction of the world, commencing "Va quasi illa dies depredant." This apocalyphal feature, though somewhat repugnant to Protestant taste, and hence omitted or altered in many Protestant versions of the hymn, is perfectly kept with the patriotic and scholastic use of the Sibylline oracles, the 4th Eclogue of Virgil, and other heathen testimonies of the kind, for apologetic purposes. It is intended to give the idea of the judgment of the world a universal character, found in the expectations of Gentiles, Jews, and Christians, and indicated by the light of reason as well as by the whole Christian and classical spirit. The mediaeval painters likewise place the Sibyl alongside of the prophets of Israel. The poem first describes the judgment as a certain fact, with its accompanying terrors; then gives expression to the sense of guilt and dismay, and ends with a prayer for mercy, which prompted Christ to die for poor sinners, and to forgive the penitent thief.

11. Character and Value.—The Dies Irae is universally acknowledged to be the sublimest production of sacred Latin poetry, and the grandest judgment hymn of all times and tongues. Daniel (Thes. hymnol. ii, p. 112) justly styles it "uno omnium cænus suors postes cumnus salutis Latinae زاتية من حائط تكاس." "It would be difficult," says Coles, "to find, in the whole range of literature, a production to which a profounder interest attaches than to that magnificent canticle of the Middle Ages, the Dies Irae. Of Latin hymns it is the best known, and the acknowledged masterpiece." The Germans call it the hymn of giants (Gigantenhymnus). In simplicity and faith it fully equals an older anonymous Latin judgment hymn of the seventh or eighth century, commencing Apparit repetitivs magna dies Domini, while in lyric fervor and effect, as well as in majesty and terror, it far surpasses it and all the numerous imitations of it. The words are solid and alone in its glory, and will probably never be surpassed. It is truly "a thing of beauty that is a joy forever." Among poetic gems it is the diamond. It breathes, indeed, the mediæval spirit of localization rather than of joyous evangelical piety, but otherwise it is quite free from every objectionable feature of Roman Catholicism which cannot be said of the two famous Stabat Mater (the Mater dolorosa, and the recently discovered Mater speciosa), tinctured as these are with Mariolatry. It represents salvation as an act of the free grace of Christ, qui sacrificium salvi gratia. Hence it is as much admired by Protestants as by Roman Catholics. The secret of its beauty and power lies first in the intensity of Christian feeling with which its great theme is handled. The poet feels, as an awful and overpowering reality, the coming judgment of the quick and the dead; he hears the trumpet of the archangel sounding through the open sepulchres; he sees the tumult and terror, the devouring flames and final wreck of the universe, the judge seated in terrific majesty on the throne, with the open book of the deeds of ages, dividing the good from the bad, and pronouncing the irrevocable sentence of eternal weal and woe; and with the spirit of an humble penitent he pleads for mercy, mercy, mercy, at the feet of his judge, and through his blood and his dying hour. The poem is in the highest degree pathetic, a cry from the depth of personal experience, and irresistibly draws every reader into sympathtic excitement. That man is indeed to be pitied who can read it without shaking and quivering with emotion. It is pregnant with life, and brings us face to face with the awful scenes of the judgment day. "It is electrically charged, and contact is instantly followed by a shock and shuddering." The second element of its power lies in the inseparable form, which commands the admiration of every man of taste. Whatever there is of dignity, majesty, and melody in the old Roman forma is here brought out and concentrated as in no other poem, heathen or Christian, and made subservient to the one grand idea of the poem. It is onomatopoetic, and echoes, as well as human language can do, the storm, and wrath, and wailing of the judgment day. Every sound speaks like the solemn peal of an arm, is in perfect keeping with the archangel summoning the dead to everlasting bliss or to everlasting woe. The stately metre, the triple rhyme, the selection of the vowels in striking adaptation to the sense and feeling, heighten and complete the effect upon the ear and the heart of the hearer. The music of the vowel assonances and consonances, e.g., the double u in the 2d and 3d lines; (fustis, mea, unum) dies eburnius; diebus, signatus; dicturus, rotaturus, securus; the o and u in the 9d stanza (omem, regionum, thoroum);
and the i and e in the 9th stanza, defy the skill of the best translators in any language. We quote the judgments of eminent writers. "Qua sunt verba tot ponenda, imma toniturum," says Daniel. "Combining somewhat of the rhythm of classical Latin with the rhymes of the medieval Latin, treating of a theme full of awful sublimity, and grouping together, in the most sustained manner, the principal scripture as to the last judgment, and throwing this into yet stronger relief by the barbaric simplicity of the style in which it is set, and adding to all these its full and trumpet-like cadences, and uniting with the impassioned feelings of the south, whence it emanated, the Gravity of the north, whose severer style it adopted, is well fitted to move the heart." (Dr. W. R. Williams). "The metre so grandly devised, of which I remember no other example, fitted though it has here shown itself for bringing out some of the noblest powers of the Latin language—the solemn effect of the triple rhyme, which has been likened to blowing following blow of the hammer on the anvil—the confidence of the poet in the universal interest of his theme, a confidence which has made him set out his matter with so majestic and undaunted a plainness as at once to be intelligible to all—these merits, with many more, have combined to give the Dies Irae a high place, indeed one of the highest, among the masterpieces of song." (Adolph Trench). (Dr. Trench is mistaken when he says that there is no other example of this metre. There are some verses of striking resemblance attributed by some to St. Bernard, but probably of much later date:—"

Cam recordor mortuorum
Quod per mortem vis futurus,
Terrot terret me venturus,
Quem expecto non securus.
Territe dies me terror
Dies Irae ac furores,
Dies luctus ac morror
Dies ultimorum pecorator,
Dies Irae, dies illa.
"

"Every line weeps. Under every word and syllable a living heart throbs and pulsates. The very rhythm, or that alternate elevation and depression of the voice which poets call the arsis and the thesis, one might almost fancy were synchronous with the contraction and the dilatation of the heart. It is more than dramatic. The horror and the dread are real; actual, not acted." (A. Coles). "Dies schauerliche Gedicht," says Fred. von Meyer, "arm an Bildern, gans Gefuhl, schliigt wie ein Hammer mit drei geheimmiussvollen Reimkungen an die Brust." (This awful poem, peculiar feeling, beats on the breast like a hammer with three mysterious rhyme-strokes!)."

"The Dies Irae," to quote from V. Cousin (Lectures on the True, the Beautiful, and the Good, p. 177), "recited only, produces the most terrible effect. In those fearful words every blow tells, so to speak; each word contains a vivid sentiment. An idea at once profound and determinate. The intellect advances at each step, and the heart rushes on in its turn." No wonder that literary men and secular poets have been captivated by the Dies Irae, as well as men in full religious sympathy with its solemn thoughts and feelings. Goethe introduces it with thrilling effect in the cathedral scene of Faust to stir up the conscience of poor Margaret, who is seized with horror at the thought of the sounding trumpet, the trembling graces, and the fiery torment. Dr. Johnson could never repeat the stanza ending; Tantos labor non sit iussus, without bursting into a flood of tears. The earl of Roscommon, "not more learned than good," in the moment in which he expired, uttered with the most fervent devotion two lines of his own version:

"My God, my Father, and my Friend,
Do not forsake me in my end!"

Sir Walter Scott also happily reproduced some stanzas of the Dies Irae for his "Lay of the Last Minstrel," and was heard repeating them on his dying bed, when the strength of his body and mind was failing. The Dies Irae has also given rise to some of the greatest musical compositions of Palestrina, Durante, Pergolesi, Haydn, Vogler, Winter, Cherubini, Gottfried Weber, Neukomm, and especially of Mozart, in his famous Requiem, during the composition of which he died (1791).

III. The Authorship of the Dies Irae cannot be certain fixed. The writer evidently was unconcerned about his own fame. It is now, however, pretty generally assigned to the Franciscan monk Thomas a Celano (a little town in Abruzzi ulterior, in Italy), the biographers: of his intimate friend St. Francis of Assisi (see Vita Sanctitatis, iv. 278., vol. ii). He was superior of the Franciscan convents of Cologne, Mayence, Worms, and Speyer, and died after A.D. 1255. The oldest testimony in favor of this view is taken from Bartholomaeus Albizzi of Pisa († 1401), in his Liber conformitatum of 1285,. where he says: "Frater Thomas qui mandato apostolico scriptum servavit legendum primam beatiss Francisci, et prosam de mortuis, quae cantatur in missa, 'Dies Irae.' etc. dictur fecisse." This proves only that at that time the Dies Irae was part of the Missal, and was believed by some to be the work of Thomas. Lucas Wadding, in his Annals of the Franciscan order (1650), defends this tradition, and credits it to Thomas a Celano. More, Wackernagel, Coles, and other modern writers on the subject, adopt it as the most probable opinion. The rivalry of monastic orders has interfered with the question of authorship, and Dominicans and Benedictines have disputed the claims of the Franciscans. But there is no more or less evidence for any of the other names which have been suggested, as Gregory the Great, St. Bernard, Bonaventura, Mathaeus a Aquasparta, Latinus Frangipani, Felix Hammerlin (Malleolus, of Zürich, 1389-1460), etc. It is certainly not older than Thomas a Celano, but rather of a later date. The extraordinary religious fervor which characterized the early history of the Franciscan order may be considered an argument of internal probability for the authorship of Thomas a Celano. If this be true, and if Jacobone is the author of the Statut Mater (as asserted by L. Wadding), then we are indebted to the Franciscan order for the most sublime as well as for the most pathetic hymn of the Latin Church. More (Latiniische Hymmen des Mittelalters, 1853, i, 400) has suggested the idea that the Dies Irae arose, not, as heretofore supposed, simply from the individual contemplation of a monk in his lonely cell, but was inspired by older judgment hymns in public use, and was associated with an original religious service in missa Defunctorum. In one of them, which he found in a M.S. at Reichenau from the 12th or 13th century, the passage occurs:

"Laetamero dives illa,
Qua resonamus ex festiva
Homo vero judicatura,
Justus autem coronaest."}

The closing suspirium:

"Pax Jesus, Domine,
Dona eius requiem,"

is likewise found in older hymns and Missals. More conjectures that the author of Dies Irae himself appended these lines from older sources to his poem, since they did not fit in his triple rhyme. Daniel (tom. i, 171, and v, 110) and Wackernagel (Das deutsche Kirchenlied von der ältesten Zeit, etc., i, 138) are disposed to adopt this view. But it seems much more probable that the original poem closes: "Gesegnet sei Gott, der dem guten und bösen, in the remaining six lines with their different versification, and the change from the first to the third person (heis und eins), were added from an older funeral service already in use by the compilers of medieval Missals, and not by the author. Then we have a perfectly uniform production, which probably emanated from a subjective state of mind without re-
garded to public use, but which soon found its way, on account of its intrinsic excellency, into the Church service, since the deepest subjectivity in lyric poetry is the best kind of objectivity. It certainly was in public use already in the 14th century in Italy, and gradually passed into the Church service of other countries, so that the English churchmen added the point of its victorious progress as the subdover of hearts."

IV. Translations.—No poem has so often challenged and defied the skill of the best translators and imitators. The unusually large number of translations proves that none comes up to the original. Its music, meaning, and subject are of such complexity and subtlety that it is still a plain in modern languages. "Its apparent artlessness and simplicity indicate that it can be turned ready into another language, but its secret power refuses to be thus transferred." The Germans have generally succeeded better than the English, owing to the larger number of double rhymes in the German language. But some English translations are admirable. Dr. Lisio, in a monograph on the Dies Irae, A.D. 1840, counted forty-four versions, mostly German, to which, three years afterwards, he added seventeen more. There must be at least thirty English versions which Dr. Lisio did not know. There is a Greek version by Hildesheim, printed in 1501, and a Latin one by a certain Rogerus Iesuquita, given by Daniel, ii. 106. Of German versions we may mention those of A. W. von Schlegel (Jenem Tag, den Tag der Zornen), Bunsen (Tag des Zornes, o Tag roll Grown), Knapp (2. An dem Zornag, an dem hohen, und Jenem Tag, den Tag der Wherken), Seld (Zorn und Zittern bange Klag sing); Daniel (2. Tag des Zornes, de Tag der Filme, und David und Sibylla spricht); Toestrup (Zornag, schrecklich der Tag), Königsdorf (An dem Zornag, jenem kehren), J. P. Lange (Jenem Tag des Zornes, der Tages), Schaff (2. in his Deutsche Kirchenfreund for 1858, p. 587 sq.; An dem Tag der Zornenkommen, and An dem Tag der Zornenfälle); also Herder, Fre. von Meyer, A. L. Folten, Wessenberg, Harms, Döring, Stier. One German, Lecke, wrote twelve versions. The best English translators of the hymn are Richard Crashaw (his version is the oldest, made 1614, remarkable for strength, but differing from the measure of the original); Horace Walpole ("Things Both the Psalm and Sibyl sing"); the Evre of Roscomon ("The Day of Wrath, that dreadful day"); Sir Walter Scott (only a part of it, but admirably done: "That day of wrath, that dreadful day"); Macnagut (1826, "On that great, that awful day"); archbishop Trench ("O day of days!—a very close approximation, though not in the double rhyme of the original"); Dean H. Alford (1845, "Day of anger, that dread day"); Mrs. Charles (in "The Voice of Christian Life in Song," 1864, "Lo, the day of wrath, the day"); Henry Mills ("Day of wrath—the inner trembling"); Epes Sargent ("Day of war, that day impending"); E. Casswaj ("Aaker still, and still she sang"); J. L. Whittam; Robert Davison ("Day of war! that day is hasting"); W. G. Dix ("That day of war—upon that day"); Charles Rockwell ("Day of war! oh direful day"); J. H. Abraham ("Day of wrath and tribulation," in the Christian Remembrancer for Jan. 1898, p. 159); W. J. Irons ("Day of war! day of mourning," adopted in the "Hymnal Noted"); W. R. Williams ("Day of war! that day dawning"); Edward Slooson ("Day of war! day of days"); Erastus C. Benedict (two, "Day of war! that day final"); and Gen. John A. Dix (1862, "Day of revenge and war, with a war of retribution, an ecclesiastic translation, the rhymes being selected from other versions, especially those of Coles and Irons). Among these translators, America is well represented by W. R. Williams, Slooson, Davidson, Rockwell, Mills, Sargent, W. G. and John A. Dix, Benedict. But the palm among translators belongs to an American layman, Abraham Cole, a physician at Newark, New Jersey, who prepared no less than thirteen distinct versions, all good in their way, six of which are in the trochaic measure and double rhyme of the original; five like in rhythm, but in single rhyme; one in iambic triplets, like Roscomon's; the last in quatrains, like Crashaw's version. The first two appeared anonymously in the Newark Daily Advertiser in 1847, and "a part of one" found its way into Mrs. Stowe's "Uncle Tom's Cabin," the other into H. W. Beecher's "Plymouth Collection of Hymns and Tunes." They are now all published together with an Introduction, and a photographic picture of Michael Angelo's famous Last Judgment. Of the many translations we select in conclusion one which is less known than it deserves to be, from the pen of the Rev. Dr. W. R. Williams, a Baptist clergyman of New York, which appeared, with a valuable note on Dies Irae, in his Miscellanies, 2d edit. N. Y. 1850, p. 88-90. The author kindly consents to its use here, with a few changes, and the modest remark: "Its imperfections are excusable only from its having preceded the more finished rendering of my friend, Dr. Abraham Cole, of Newark, N. J."

1. Day of wrath! that day dawning; As the scars of old were saying, All the world in ashes laying.
2. What the fear! and what the quaking! When the Judge his way is taking, Strictures in all things making.
3. When the trump, with blare astounding, Through the tombs of earth ascending, Bids all stand, the throne surrounding.
4. Death and Nature all aghast are, While the dead rise fast and faster, Answering to their Judge and Master.
5. Forth is brought the record solemn; See, o'er'ryth in each dread column. With many seeds, the Doomsday volume.
6. Now the Sovereign Judge is seated; All, long hid, is loud repeated; Naught escapes the judgment meted.
7. Ah! what plea shall I be pleading? Who for me be interceding, When the just man help is needing?
8. Oh, thou King of awful ecclips'd, Of salvation free the Sinner, Grace to me, all gracious, render.
9. Jesus, Lord, my plea let this be, Mine that were my soul, mine Thine for ever; On that day, Lord, wilt Thou smile me?
10. Weary for me Thou dost outlast; On the cross my soul Thou boughtest; Low now for all which Thou wiltst not.
11. Vengeance, Lord, then be Thy mission; Now, of sin grant free remission Ere that day of inquisition.
12. Low in shame before Thee groaning; Blushes deep my sin are owning; Hear, O Lord, my suppliant moaning.
13. Her of old that sinned forgiven, And the dying thief receiving, Thou, to me too, hope art giving.
14. In my prayer though sin discerning, Yeh, Lord, in goodness turning, Save me from the endless burning.
15. Mid Thy sheep be my place given; Far from the goats m be driven; To Thy right hand, in, to heaven.
16. When the cursed are confounded, With devouring flame surrounded, With the blest be my name recorded.
17. Low, I beg, as suppliant bending; With crushed heart, my life for spending; Lord, be nigh me in my ending.
18. Ah that day! that day of weeping! When in dust no longer sleeping, Men to God in guilt is going—Lord, be then Thy mercy showing!

V. Literature.—G. C. F. Mohrike, Kirchen-und literarhistorische Studien und Mittheilungen, Bd. i, Heft. i (Beiträge zur alten kirchlichen Hymnologie, Stralsund, 1824, p. 1-190); G. W. Fink, Thomas von Colonei in Ersch und Gruber's Encyclop. sec. i, Bd. xvi, p. 7-10; F. G. Lisio, Dies Irae, Hymnen auf das Weltgericht, Berlin,
practise of dipping bread in the broth, or melted fat of the animal, strongly illustrates the reference to the sop in John xiii, 28 sq. The modern Egyptians seem their bread with a sauce composed of various stimulants, such as salt, mint, sesame, and chickpea (Lue, i, 140). (The later Jews named this sauce פלך [Mish. Pesah. ii. 8]: it consisted of black pepper, almonds, and aspice, thickened with flour. It was served at the celebration of the Passover [Pesch., x, 8].) The Syrians, on the other hand, use a mixture of savour and salt for the same purpose (Russell, i, 93). Where the above-mentioned accessories were wanting, fruit, vegetables, fish, or honey was used. In short, it may be said that all the articles of food which we are at present to mention were mainly viewed as superordinates to the staple commodity of bread. The various kinds of bread and cakes are described under the head of Bread; Cakes; Cracknels.

Milk and its preparations hold a conspicuous place in Eastern diet as affording substantial nourishment; sometimes it was produced in a fresh state (Gen. xxviii, 8), but more generally in the form of the modern λέος, i.e. sour milk (ץְּלֶבֶּשׁ, A. V. "butter," Gen. xxviii, 8; Judg. v, 25; 2 Sam. xvii, 29). The latter is universally used by the Bedouins, not only as their ordinary beverage (Burckhardt, Notes, i, 26), but mixed with flour, meat, and even salad (Burckhardt, i, 58; 63; Russell, Aleppo, i, 118). It is constantly offered to travellers, and in some parts of Arabia it is deemed scandalous to take any money in return for it (Burckhardt, Arabia, i, 120). For a certain season of the year λέος makes up a great part of the food of the poor in Syria (Russell, l.c.). Butter (Prov. xxx, 28), and various forms of coagulated milk, of the consistence of the modern κανιμάξ (Job x, 10; 1 Sam. xvii, 18; 2 Sam. xvii, 29), were also used. See ButTER; CHEESE.

Fruit (q. v.) was another source of subsistence: figs stand first in point of importance; the early sorts described as the "summer fruit" (ץְּלֶבֶּשׁ, Amos viii, 1, 2), and the first ripe fruits (ץְּלֶבֶּשׁ, Hos. ix, 10; Mic. vii, 1), were esteemed a great luxury, and were eaten as fresh fruit; but they were generally dried and pressed into cakes, similar to the date-cakes of the Arabians (Burckhardt, i, 57), in which the word "cake" is termed בֵּצָה (בֵּצָה, A. V. "cakes of figs," 1 Sam. xviii, 11; xx, 12; 1 Chron. xii, 40), and occasinally צְלָבָשׁ simply (2 Sam. xvi, 1; A. V. "summer fruit"). Grapes were generally eaten in a dried state as raisins (ץְּלֶבֶּשׁ, Vulg. ligusture uve passas, 1 Sam. xvii, 18; xxx, 12; 2 Sam. xvi, 1; 1 Chron. xii, 40), but sometimes, as before, pressed into cakes, named פֵּרֶח (2 Sam. vi, 19; 1 Chron. xvi, 3; Cant. ii, 5; Hos. iii, 1), understood by the Sept. as a sort of cake, λαμβανότα μίνιαμ, and by the A. V. as a "flagon of wine." Caked fruit forms a part of the daily food of the Arabians, and is particularly adapted to the wants of travellers in water it affords a refreshing drink (Niesbuer, Arabia, p. 57; Russell, Aleppo, i, 82); an instance of its stimulating effect is recorded in 1 Sam. xxx, 12. Apples (perhaps citrons) are occasionally noticed, but rather in reference to their fragrance (Cant. ii, 5; vii, 8) and color (Prov. xxiv, 12) than as an article of food. Dates are not noticed in Scripture, unless we accept the rendering of צְלָבָשׁ in the Sept. (2 Sam. i, 1) as φιέλς; it can hardly be doubted, however, that, where the palm-tree flourished, as in the neighborhood of Jericho, its fruit was consumed; in Joel i, 12 it is reckoned among other trees valuable for their fruit. The pomegranate-tree is also noticed by Joel; it yields a lucious fruit, from which a sweet wine is expressed (Cant. vii, 2; Hag. ii, 19). Melons were grown in Egypt (Num. xi, 5), but not in Palestine. The mulberry is
Diet

undoubtedly mentioned in Luke xvi, 6 under the name σεβηκαί; the Hebrew ברך ולע is translated (2 Sam. xv, 28; 1 Chron. xiv, 14) is rather doubtful; the Vulg. takes it to mean ρηχα. The σεβηκαί (A.V. “sycosmores,” Luke xii, 5) differs from the tree last mentioned; it was the Egyptian fig, which abounded in Palestine (2 Kings ii, 27), and was much valued for its fruit (1 Chron. xxvii, 28; Amos vii, 14). See Apple; Citron; Fig; Mulberry-tree; Pomegranate; Sycamore. 

Of vegetables (v. g.) we have most frequent notice of lentils (Gen. xxiv, 34; 2 Sam. xvii, 39; xxiii, 11; Ezek. iv, 9), which are still largely used by the Bedouins in their country, Burckhardt, Arabick, iv, 35. (2 Sam. xvii, 28; Ezek. iv, 9), which still form a favorite dish in Egypt and Arabia for breakfast, boiled in water and eaten with butter and pepper; from 2 Sam. xvii, 28 it is inferred that beans and other kinds of pulse were roasted, as barley was, but the second אֵשֶׁת is in that verse is probably interpolated, not appearing in the Sept., and, even if it were so, the reference to pulse is numerous; cumin (Gen. xxv, 35; xxxv, 10; xxxvi, 45), is wholly unwarranted; cucumbers (Num. xi, 5; Isa. i, 8; Bar. vii, 40; comp. 2 Kings iv, 39, where wild gourds, cucumbers, were picked in mistake for cucumbers); leeks, onions, and garlic, which were and still are of a superior quality in Egypt (Num. xi, 5; comp. Wilkins, iii, 172; Lev. ii, 57; Lam. iii, 17). Lettuce, of which the wild species, lactuca agreria, is identified with the Greek αὐλομή (Pliny, xxxi, 65), and.formed according to the Sept. and the Vulg., the “bitter herbs” (סבוק) eaten with the paschal lamb (Exod. xii, 8; Num. ix, 11); endive, which is still well known in the East (Russell, i, 91), may have been included under the same class. In addition to the above we have notice of certain “herbs” (ריבש, 2 Kings iv, 39) eaten in times of scarcity, which weremallows according to the Syrian and Arabic versions, but, according to the Talmud, a vegetable resembling the bursa comosa of Linnaeus; and again of sea-parslane (חָלָם; A.V. “mallow”), and broom-root (קָרָן; A.V. “juniper,” Job xxx, 4), as eaten by the poor in time of famine, unless the latter were gathered as fuel. An insipid plant, probably parasleone, used in salad, appears to be referred to in Job vi, 6, under the expression רַבְצִים רֹאַיִן (A.V. “white of egg.”) The usual method of eating vegetables was in the form of potage (גָּרֶה, Sept. יָרָה, Vulg. pulmentum, Gen. xxxv, 29; 2 Kings iv, 30; Hagg. ii, 12), a meal wholly of vegetables was deemed very poor fare, Prov. xv, 17; Dan. i, 12; Rom. iv, 2). The modern Arabians consume few vegetables; radishes and leeks are most in use, and are eaten raw with bread (Burckhardt, Arabick, i, 56). See Bean; Cucumber; Garlic; Gourd; Lentil; Onion. 

The spices or condiments known to the Hebrews were numerous; in the books of Moses (Isa. xxviii, 22; Matt. xxiii, 23), dill (Matt. xxiii, 28, “anise,” A.V. Coriander (Exod. xvi, 31; Num. xvi, 7), mint (Matt. xxiii, 28, rue (Luke xii, 42), mustard (Matt. xxili, 31; xvii, 20), and salt (Job vi, 6), which is reckoned among “the principal things for the whole use of man’s life” (Herodotus, xxxix, 26). Nuts (πιναχέω) and almonds (Gen. xiil, 11) were also used as substitutes to the apple. See Almond; Anise; Coriander; Cummin; Mint; Mustard; Nuts; Spices. 

In addition to these classes, we have to notice some other important articles of food: in the first place, honey, whether the natural product of the bee (1 Sam. xiv, 23; Matt. iii, 4), which abounds in most parts of Arabia (Burckhardt, Arabick, iv, 35;-flash husbandry and artificial productions included under that head, especially the דב of the Syrians and Arabians, i.e. grape-juice boiled down to the state of the Roman de-
strangled (as in A.V.), but to any animal from which the blood was not regularly poured forth. Similar prohibitions are contained in the law (Lev. xvi, 17; vii. 4; xvi, 110), the result of which is that at the present day the Arabsians eat no meat except what has been bought at the markets. Certain portions of the fat of sacrifices were also forbidden (Lev. iii. 9, 10), as being set apart for the altar (Lev. xii. 2; xii. 25; comp. 1 Sam. ii. 13; xii. 7); it should be observed that the term in Neh. viii. 10, translated fat, is חלב, but בקלה = the fatty pieces of meat, delicacies. In addition to the above, Christians were forbidden to eat the flesh of animals, portions of which had been offered to idols (2Cor. viii. 1 sq.), whether at private feasts or as bought in the market (Acts xv. 29; xxi. 25; 1 Cor. viii. 1 sq.). All beasts and birds classed as unclean (Lev. xi. 1 sq.; Deut. xiv. 4 sq.) were also prohibited (see Animal; Bird); and in addition to these general precepts there was a special prohibition against "seething a kid in his mother's milk" (Exod. xxiii. 19; xxxiv. 26; Deut. xiv. 21), which has been variously understood, by Talmudical writers, as a general prohibition against the joint use of meat and milk (Mishna, Cholin, cap. 8, § 1); by Michaelis (Mish. Hech. iv. 2), against seething the umbilical cord of milk, in comparison with oil, in cooking; by Luther and Calvin as prohibiting the slaughter of young animals; and by Bochart and others as discontenunating cruelty in any way. These interpretations, however, all fail in establishing any connection between the precept and the offering of the first-fruits, as implied in the three passages quoted. More probably it has reference to certain heathen usages at their harvest festivals (Maimonides, More Nebuch. iii. 48; Spencer, De Legg. Hebr. Ritu. p. 358 sq.): there is a remarkable addition in the Samaritan version, and in some copies of the Sept. In Deut. xiv. 21, which supports this view: בַּעֲדֹת קָדוֹשׁ וּפָנָיו לֹא יֵשׁ בּוֹ תַּלְתָּל, etc. (comp. Knobel, Comment. in Exod. xxiii. 19). The Hebrews further abstained from eating the sinew of the hip (יָגָה יָגָהה, Gen. xxxii. 32), in memory of the struggle between Jacob and the angel (comp. ver. 25). The Sept., the Vulg., and the A.V. interpret the פַּלְעָלָה מַלְעָא מַלְעָא הַשָּׁמֶשׁ of the shrinking or benumbing of the muscle (פַּלְעָא תָּלָתִים, קָדָשׁ יָפְרוּל in Josephus, Antiq. vi. 11, 2); it more correctly explains it as the "broad nerve" (יוֹנָא פַּרְעֹה, פַּרְעֹה), and there is little doubt that the nerve be refers to the semis icisnicius, which attains its greatest thickness at the hip. There is no further reference to this custom in the Bible; but the Talmudists (Cholin, vii.) enforced its observance by penalties. See Meat.

Under these restrictions the Hebrews were permitted the free use of animal food: generally speaking, they only availed themselves of it in the exercise of hospitality (Gen. xlviii. 7), or at festivals of a religious (Exod. xvi. 8), public (1 Kings i. 5; 1 Chron. xii. 40), or private character (Gen. xxxii. 4; Luke xv. 20, 22); it was only in royal households that there was a daily consumption of meat (1 Kings iv. 23; Neh. vi. 18). The use of meat is reserved for similar occasions among the Bedouins (Burchard's Notes, i. 63). The animals killed for meat were—calves (Gen. xviii. 7; 1 Sam. xxviii. 24; Amos vi. 4), which are farther described by the term falling (קַעַדֵד = μουσος ορετός, Luke xvi, 20, and στάρνιον). Matt. xxvii. 4; 2 Sam. vi. 19; 1 Kings vi. 9; 1 Kings iv. 23, V., "fat cattle"

into close connection with ordinary cattle in Deut. xiv. 5, as though holding an intermediate place between tame and wild animals; birds of various kinds (עֵבָדָה; Auth. Ver. "fowls"; Neh. v. 18; the Sept., however, gives יִמְעָפָשׂ, as though the reading were פַּרְעֹה); quail in certain parts of Arabia (Exod. xxvi. 13; Num. xi. 22; poultry (עֵבָדָה; 1 Kings iv. 23; understood generally by the Sept. ἄγαθος ἡδύνησιάς; by Kimchi and the A.V. as "fatted fowl"; by Gesenius, Theur. p. 246, as geese, from the whiteness of their plumage; by Thenius, Comm. in loc., as Geese), as the word represented the call of that bird (Gen. xxv. 7; Jer. xxxiv. 10); salted, as was probably the case with the sea-fish brought to Jerusalem (Neh. xiii. 16), and fresh (Matt. xiv. 19; xv, 26; Luke xxiv. 42): in our Saviour's time it appears to have been the usual food about the Sea of Galilee (Matt. vii. 10); the term θεμελώς is applied to it by John (vi. 9; xxi. 9 sq.) in the restricted sense in which the word obtained among the later Greeks, as = ἄλα. Locusts, of which certain species only were esteemed clean (Lev. xi. 22), were occasionally eaten (Matt. iii. 4), but considered as poor fare. They are at the present day largely consumed by the Arabs in Persia and Arabia (Gen. xxv. 44; and in Arabia (Niebuhr, Voyage, i. 319); they are salted and dried, and roasted, when required, on a frying-pan with butter (Burchard's Notes, ii. 92; Niebuhr, c.c.). See Locust.

Meat does not appear ever to have been eaten by itself; various accompaniments are noticed in Scripture, as bread, milk, and sour milk (Gen. xlix. 8; xxi. 29) and of fish and bread and broth (Judg. vi. 19); and with fish either bread (Matt. xiv. 19; xv, 36; John xxi. 9) or honeycomb (Luke xxiv. 42): the instance in 2 Sam. vi. 19 cannot be relied on, as the term בָּאָרָה, rendered in the A.V. a good piece of flesh, after the Vulg., casatare bionela carmi, means simply a portion or measure, and may apply to wine as well as meat. For the modes of preparing meat, see Cooking; and for the modes and manner of eating, Malaria; see also Fish, Fowl, etc.

To pass from ordinary to occasionalsources of subsistence: prison diet consisted of bread and water administered in small quantities (1 Kings xxi. 27; Jer. xxxvii. 21); pulse and water was considered but little better (Dan. vii. 2); in time of scarcity bread was usual to abstain either altogether from food (2 Sam. xii. 17, 20), or from meat, wine, and other delicacies, which were described as מֵרַע אֹרֵבָשׁ, literally bread of desirability (Dan. x, 3). In time of extreme famine the most loathsome food was swallowed, such as an ass's head (2 Kings vi. 20), the ass, it must be remembered, being an unclean animal (for a parallel case, comp. Plutarch, Arixerx. 24), and doves' dung (see the article on that subject), the dung of cattle (Josephus, War, v. 18, 7), and even possibly their own dung (2 Kings xviii. 27). The consumption of human flesh was not altogether unknown (2 Kings vi. 28; comp. Josephus, War, vi. 8, 4), the passages quoted supplying instances of the exact fulfillment of the prediction in Deut. xlvii. 56, 57; comp. also Lam. ii. 30; iv. 10; Ezek. v. 10. See Food.

With regard to the beverages used by the Hebrews, we have already mentioned milk, and the probable use of barley-water, and of a mixture, resembling the modern sherbet, formed of fig-cake and water. The Hebrews probably resembled the Arabs in not drinking much water with their meals, but used it with a long draught of water. It is almost needless to say that water was most generally drunk. In addition to these, the Hebrews were acquainted with various intoxicating liquors, the most valued of which was the juice of the grape, while others were described un-
Diet 799

Diet

der the general term of asek, or strong drink (Lev. x, 9; Num. vi, 8; Judg. xiii, 4, 7), if, indeed, the latter does not sometimes include the former (Num. xxvii, 7). These were reserved for the wealthy, or for festive occasions; the poor consumed a sour wine (A. V. "vignear;" Ruth ii, 14; Matt. xxvii, 48), calculated to quench thirst, but not agreeable to the taste (Prov. x, 26). See BEVKAG.

Diet (die; day; German Reichstag), the assembly of the states of Germany. The Diet shared with the emperor the rights of sovereignty, except in a few cases reserved to the emperor. It consisted of three colleges—electors, princes, and free cities. To be valid, a resolution had to be adopted by all the three colleges, and to be sanctioned by the emperor. In a particular college a majority of votes was in most cases sufficient, but religious questions formed an exception. See CORPUS CATHOLICORUM and CORPUS EVANGELICORUM.

The elector of Mainz, as arch-chancellor of the empire, was director of the Diet.

The following list (taken from Buck, Theological Dictionary, and from Farrar, Ecclesiastical Dictionary) includes the chief Diets held in reference to the affairs of the Reformation:

1. The Diet of Worms, in 1521, in which Alexander, the pope's nuncio, having charged Luther with heresy, the duke of Saxony said that Luther ought to be heard. This the emperor granted, and sent him a pass, provided he would not preach on the journey. On Luther's arrival at Worms, he protested that he would not recant unless they would show him his errors from the Word of God alone. He was consequently ordered away from Worms, and, by an edict of the 26th of May, he was outlawed.

2. The First Diet of Nuremberg, in 1523, when Francis Chierigiati, Adrian the Sixth's nuncio, demanded the execution of Leo the Thrice-holy bull, and of Charles the Fifth's edict, published at Worms, against Luther. It was answered that it was necessary to call a council in Germany to satisfy the nation respecting its grievances, which were reduced to one hundred articles, some of which struck at the pope's authority and the discipline of the Roman Church: they added that in the interim the Lutherans should be commanded not to write against the Romanists. All these things were brought into the form of an edict, and published in the emperor's name.

3. The Second Diet of Nuremberg, in 1524. Cardinal Campeggio, pope Clement's legate, and the German princes, entered into an agreement with the emperor for the election of a new pope, who should accept the articles of the Augsburg Confession, and that the Lutherans should be excluded from the council. The Lutherans having the advantage, it was decreed that, with the emperor's consent, the pope should call a council in Germany; but, in the interim, an assembly should be held at Spire, to determine what was to be believed and practised; and that, to obey the emperor, the princes ought to order the observance of the edict of Worms as strictly as they could. Charles V., being angry at this, commanded the edict of Worms to be observed very strictly, and prohibited the assembly at Spire.

4. The First Diet of Spires, held in 1526. Charles V., having decided, on the death of his father, archduke Ferdinand, to preside over that assembly, where the duke of Saxony and the landgrave of Hesse demanded, at first, a free exercise of the Luthe an religion, so that the Lutherans preached there publicly against Popery; and the servants of the Lutheran princes had these five letters, V. D. M. I. L. E. embroidered on their sleeves (Verbum D i mae in Excursum), to show plainly that they would follow nothing but the pure Word of God.

The archduke, not daring to oppose these courses, proposed two things: the first, concerning the Polish religion, which was to be observed in maintaining the edict of Worms; and the second concerning the help demanded by the elector of Brandeburg against the Turks. The Lutherans prevailed against the first, it was decreed that the emperor should be desired to call a general council in Germany within a year; and that, in the mean time, every one was to have liberty of conscience. Whilst they were deliberating in vain about the second, king Louis was defeated and killed in the battle of Parnawa (1527).

5. The Second Diet of Spires was held in 1529. It was decreed against the Lutherans that wherever the edict of Worms was received, it should not be lawful for any one to change his opinions; but in the countries where the new religion (as they termed it) was received, it should be lawful to continue it till the next council if the old religion could not be re-established there without sedition. Nevertheless, the mass was not to be abolished there, and no Romanist was allowed to turn Lutheran; the Sacramentarians were to be banished out of the empire, and the Anabaptists put to death; and preachers should nowhere preach against the Church of Rome. Six Lutheran princes, namely, the elector of Saxony, the marquis of Brandenburg-Bayreuth, the two dukes of Luneburg, the landgrave of Hesse, and the prince of Anhalt, with the deputies of fourteen imperial towns, protested, in writing, two days after, in the assembly, against this decree, which they could not obey, it was contrary to the Gospel; and appealed to a general or national council, to the emperor, and to any other unprejudiced judge. From this solemn protestation came the famous name of Protestants, which the Lutherans soon adopted; and, subsequently, the Calvinists, and other Reformed churches. They also protested against contributing anything towards the war against the Turks till after the exercise of their religion was free in all Germany. The next year the emperor held the Diet of Augsburg.

6. The First Diet of Augsburg was called June 1, 1550, by Charles V., to reunite the princes about some matters of religion, and to join them all together against the Turks. The elector of Saxony, followed by many princes, presented the confession of faith called the Confession of Augsburg. The conference about matters of faith and discipline being concluded, the emperor ended the diet by a decree that nothing should be altered in the ceremonies and offices of the Church of Rome till a council should order it otherwise.

7. The First Diet of Ratibos, in 1541, for uniting the Protestants to the Church of Rome. The pope's legate having altered the twenty-two articles drawn up by the Protestant divines, the emperor proposed to choose some less rigidly, and by a free discussion on the articles, and being desired by the diet to choose them himself, he named three Papists, namely, Julius Pfugius, John Gropperus, and John Eckius, and three Protestants, namely, Philip Melancthon, Martin Bucer, and John Pistorius. After an examination and disputataion of a month, those divers could not agree on more than five or six articles, wherein the diet still found some difficulties. The emperor, to terminate these controversies, ordered, by an edict, that the decision of these articles should be referred to a general council, or to the national council of all Germany, or to the next diet. The advices of the council: that, in the mean time, the Protestants should keep the articles agreed on, forbidding them to solicit anybody to change the old religion, as they called it. But, to gratify the Protestants, he gave them leave, by patent, to retain their religion, notwithstanding the edict.

8. The Second Diet of Ratibos was held in 1546; none of the Protestant confederate princes appeared. It was therefore soon decreed by a plurality of votes that the Council of Trent should be followed. The Protestant deputies opposed, and this caused a war against them.

9. The Second Diet of Augsburg was held in 1547, respecting matters of religion. The electors being divided concerning the decisions of the Council of Trent,
DIETERICH

800

DEIU, DE

The emperor demanded that the management of this affair should be left to him, and it was directed that every one should conform to the decision of that counsel.

10. The Third Diet of Augsburg was held in 1548, when the commissioners appointed to examine some memoirs about a confession of faith not agreeing to-gether, the emperor named three divines, who drew up the plan of the famous Interim. See Hefner.

11. The Fourth Diet of Augsburg was held in 1550. The emperor complained that the Interim was not observed, and demanded that all should submit to the council, which they were going to renew at Trent; but the deputies of duke Maurice of Saxony protested that their master had agreed to submit to the council on condition that the divines of the Confession of Augsburg not only should be heard there, but should vote also, like the Romish bishops, and that the pope should not preside; but, by plurality of votes, submission to the council was agreed upon.

12. The Fifth Diet of Augsburg was held in 1555. At this diet the "Religious Peace of Augsburg" was completed, while the differences of the Evangelicals (by which term only the Lutherans were understood). According to this agreement, no state of the German empire was to be disturbed on account of its religion and ecclesiastical usages; religious controversies were to be compromised by Christian, amicable means; the municipal jurisdiction in these matters was suspended with regard to the faith and religious worship of the Evangelicals; free emigration on account of religion was guaranteed. This agreement was to continue even if a religious reunion should not be effected.

13. The Third Diet of Ratisbon was held in 1557. The assembly demanded a conference between some famous doctors of both parties; this conference, held at Worms between twelve Papists and an equal number of Lutherans, was soon dissolved.

DIETERICH, JOHANN CONRAD, a learned Lutheran theologian, was born at Butzbach, Germany, Jan. 19, 1612. He became professor of Greek and history at Gissens, where he died, June 24, 1659. Among his numerous writings are, De Peregrinatione studiorum; Brevarium Hareticorum et Conciliorum; Brevarium Posticum Romanum (Gissens, 1653, 8vo.); Antiquitates Bibliotie (Gissens, 1671, fol.); Antiquitates Novi Testamenti; sectae Lexicon Philologico-Theologico Greco-Latinum in N. T. (Frankf. 1690, fol.); Hoefner, Noue. Dion. General, etc., 146.

DIETERICH OF NUREMBERG, so called from his native place in Westphalia, studied theology, and became prebendary of Bonn in 1361. In 1371 he went to Avignon, where pope Gregory XI made him his secretary (Scriptor Apostolici); and when that pope removed his see to Rome, Dietrich accompanied him, and obtained office as papal protonotary and abbreviator.

In 1395 (or 1399) Boniface IX offered him the bishopric of Wurden, but he was not able to get possession of the see, which was held by a nominee of the anti-pope. In 1414 he attended the Council of Constance, and died about 1417. He wrote De necessitate reformandae ecclesia et memoriae (Hartel, Historia conciliorum, tom. i.); De schismate libri III (1498) (Nuremberg, 1492, folio), and republished afterwards with the addition of the four books of Numa's Onomasticon, of which the Librinhum forms a part (Basel, 1506, 1566; Nuremburg, 1592; Strasburg, 1608 and 1619). The latter editions bear the title Theodoricus a Niens Historiarum sui temporis libri IV. The Numa was put in the Index. See Fabricius, Bib. Lat. Med. et Inf. Lat. vol. v.; Plerer, Universal-Lexicon, s. v.; Herzog, Real-Encyclopädie, iii. 388.

DIETERICH, or DIETERICH, VITUS (Vitus Theodorus, or Theodoricus), was born in 1506 at Nuremberg. He studied at Wittenberg, where he attracted the attention of Luther, and became his amanuensis and companion. Luther took him to the conferences of Marburg (the Colloquy, and the Imperial Diet of Augsburg (1530)). He afterwards became professor in the theological faculty at Wittenberg, and in 1535 returned to Nuremberg, where he became preacher at St. Sebaldu's church, which position he retained, notwithstanding the offer of professorships in the universities of Wittenberg and Leipsic, until his death, March 24, 1549. He died in 1549, he was in active correspondence with Luther, Melanchton, and the other leaders of Protestantism. He was more radically Lutheran than Melanchton. Dietrich had also some fierce discussions with Oslander on the subject of absolution. During the latter part of his life he was sorely pressed, and his writings were even suspended for a while in 1547 on account of his independence of expression. Besides editing and publishing translations of a number of the works of Luther and Melanchton, he wrote a number of sermons; an Eucharistic Ludiens in prope libam Michaeae: Agendis- bicliaeis fur d. Pfarrherren auf dem Land (1549-1569); last ed. 1575, 2 vols. (1548), a dramatic exposition of the book of the prophet Isaiah, and contemplated doing the same for the other prophets, but was prevented by death. The Epistola theolologica Norimbergensiam ad D. Reuperum (1549), generally ascribed to him, was written by Oslander. Dietrich also contributed to the Reformation, the correspondence between Melanchton, Cruciger, and Dietrich (1587-1549); Strobel, Nach- richten v. d. Leben u. d. Schriften V. Dietrichs (Nurmburg, 1772); Herzog, Real-Encyclopädie, iii. 289.

Dieu, De, LOUIS (LODWEHT), was born at Vliesingen, April 7, 1590, where his father, Daniel de Dieu, labored in the ministry 22 years as minister of the Reformed Church in Brussels. Louis was at an early age devoted to the service of the Church, and placed under the care of his uncle, Daniel Colonius, regent of the Wallon College at Leyden, a competent and zealous instructor in theology. Here he made great proficiency in his theological studies. Whilst yet a candidate he was heard in Zeeland by prince Maurice, who offered him the position of court-preacher, which he declined. In 1613 he became preacher to the Wallon church in Middelburg, and in 1617 he was called to the Reformed church in Vlissingen, where he preached in Dutch, but also in French and English. In 1619 he was called to be pastor of the Reformed church in Leyden. Whilst here he declined the professorship of theology offered him in the newly-founded University of Utrecht. Had his life been spared, the same position in the University of Leyden would have been reserved for him. He died December 22, 1642. De Dieu was a man of eminent gifts and attainments, and enjoyed the esteem of many of his most excellent contemporaries. His attention was specially devoted to the Oriental languages. The fruits of his study in that direction were several Grammatica Grammatica (Leyden, 1628, 4to.; Grammatica Tivginia, Hebrewo, Syriaca, et Chaldaica (Leyden, 1628, 4to.); Rudimenta Latinae Latinae (Leyden, 1659, 4to.). These were all written in Latin. His Oriental studies were made subservient to the elucidation of the Holy Scriptures. In 1572 he published at Leyden his Apologia S. Jo- hannis Clemens in MS. copy, Biblioth. Jos. Scapulae, ed., Characteris Syriaco et Hebraico, cum versionibus Latinis, Graeco textu et notis; and in 1631 his Aminacendorum sive Comment., in quatuor Evangelia, in quo collatis, Syri imprimit, Arabis, Evangelii Hebraei, Vulgatis, D. Erasmii et Beati versionibus, difficilis loci illustratur et variis lectionum versionumque curis. In this work he discussed with great impartiality and accuracy the value of these different translations. Critical and exegetical works on the Acts of the Apostles, on the Epistle to the Romans, etc. succeeded. In these the various translations
DIGAMISTS

were also compared. All his exegetical and critical works were finally edited by professor Leydecker, and published in folio in 1693, entitled Critica Sacra ete. Animi adorationum in loca quaedam diffic. Ibarra V. et N. Testamenti. See Bayle, Dictionary, s. v.; Simon, Hist. Crit. des Chrétiens, p. 114. 

Digamists, a term anciently used to designate persons twice married after baptism though legally and successively to two wives, one after the death of the other. The Montanists condemned all second marriages as unlawful; but, although this opinion did not prevail generally, it was the common practice to refuse ordination to men who had been twice married. Tertullian (de Monogamia, chap. xii) condemned second marriages even in laymen; and Ambrose, Jerome, Epiphanius, and others assumed that the injunction of the apostle 1 Tim. iii, 2, in which he directs that a bishop must be the husband of one wife, forbade an ecclesiastic to marry twice. Chrysostom, Theodoret, and others gave a contrary opinion, and interpreted the apostle's language of polygamists, or such as were married to many wives at the same time, and such as had causelessly put away their wives, and married others after divorcing the former. Numerous instances have been adduced to prove that second marriages were not an impediment to ordination, Paul Tertullian (de Monogamia, chap. xii) admits that there were bishops who had been twice married. —Bingham, Or. G. Eccles. bk. iv. ch. v, § 1-4.

Digby, Sir Kenelm, was born in 1603, three years before his father, Sir Everard Digby, was executed for his share in the Gunpowder Plot. He was brought up in the Protestant faith, and in 1618 was entered at Gloucester Hall, Oxford, where he gained a wonderful name for ability and scholarship. After leaving the university he spent two years in travel, and, returning to England in 1623, was knighted. In 1632, on the death of Dr. Allen, of Gloucester Hall, Sir Kenelm Digby inherited his collection of books and manuscripts. In 1636, when in France, he was converted to the Roman Catholic faith, which step he justified in A Conference with a Lady about the Choice of a Religion (Par. 1638; Lond. 1634). He returned to England in 1638, and on the breaking out of the Civil War was imprisoned as a Royalist in Winchester House in 1643; and in 1646 he was elected a Fellow of the College of France. At Paris he was received with favor by the court, and made the acquaintance of Des Cartes. After Charles I had fallen, Digby returned to England, but the Parliament forbade him the kingdom under penalty of death. Retiring to the Continent, he travelled in France and Italy; but in 1653 he was again in England, and was in frequent attendance at the court of the Protector. He went again to France, and busied himself with the preparation of philosophical papers. He returned to England in 1661, and died there in 1665. His works are numerous, and on a great variety of subjects; we only notice, besides the one already mentioned, A Treatise on the Soul, proving its Immortality (Par. 1644); Morea Catholic, or Ages of Faith (anon.), reprinted in 3 vols. 8vo, Lond. 1844-47. The Private Memoirs of Sir K. Digby, etc., written by himself, were published in London in 1827 (8vo). See Kippis, Biogra phica Britanica, v. 184 sqq.; Chambers, Cyclopaedia, ed. v.

Digit (2228, διγη, ‘the finger’), a Jewish measure of length, being the breadth of a finger (q. v.). It was the fourth part of a palm, and the 24th of a cubit. According to Dr. Arbuthnot's tables, the digit is 0.0129 of an English inch. See METROLOGY.

Dignities (2228, δογη, plur. of δογη, glory) stands in 2 Pet. ii, 10; Jude 8, figuratively for persons high in honor, whom each of those apostles blames certain church officers. The term in this connection is usually referred to earthly magistrates or princes, whose claim to deference the Gospel every. II. 11 Phen where enforces upon its followers; but it is probably better to refer it to the angels, even including those who are fallen, since the context in both passages introduces the good angels as reigning from the Saviour or other epithets towards them. The term is used with respect to the celestial by Philo (Joseph. Ant. ii, 218, ed Mang.). Similar is the usage of the terms 'principalities and powers' in numerous passages of the epistles. See ANGEL.

Dillâh (Heb. Dilâh, דילא, fem. Sept. Διλα). Joseph. Διλακ, Αντ. i, 6, 4; Vulg. Decla, the seventh son of Joktan (B.C. post 2144); also the name of a district settled by a tribe descended from him (Gen. x, 27). As the name in Aramaic and Arabic means a palm-tree, it has been judged necessary to seek the seat of the tribe in some territory rich in palm-trees; of such there are several in Arabia (comp. Strabo, xvi, 776; Pliny, vi, 82). One famous place of palm-trees existed at the very entrance of Arabia Felix, hence called by the Greeks Φοινίκες (Ptolomy, vi, 7, 28); but this was remote from the other tribes of the Joktanides. See Æhaloth. Beoch (Philale, ii, 22) finds it in Southern Arabia, in a district of the Mekran, which was also rich in palm-trees (Pliny, vi, 29), now called Yemen (Nielhaur, Descr. p. 218); Michaelis (ςπικλ, ii, 176) in the region of the Tigris (from the analogy of the name Διλα, but where the ground of search is so uncertain, it is impossible to obtain any certain result (see Fustel de Coulanges, in the Journal des Biblioth. x. 90-96, 176-200; Jomard's Essai, in Mengin's Hist. de l'Egypte, iii). As, however, there is still an Arab tribe in the region of Arabia Felix called Dukla, which is probably descended from Dillâh —for the Arabs have always been as reticent of family names as the Jews themselves, see Fustel de Coulanges, opus. cit., i, 115, 147)—we may conclude that the Diklatites settled in Yemen, and occupied a portion of it a little to the east of the Hejaz. See ARABIA.

Dillekn (Heb. Dilenâm, דילן, a gourd-field or cucumber-patch, suggestive of a rich soil; Sept. Δαλλίν, Vulg. Delem), one of the cities of Judah, situated in the "valley" or maritime plain, and mentioned between Migdal-gad and Mizpeh (Josh. xv, 88). Juan de Velde (Narrat. ii, 160) suggests that it may be the modern plain "be T Time," in the Musulman village, according to Smith, in Robinson's Researches, 1st edit. iii, App. p. 119); about three miles north of Tell es-Safieh, in the maritime plain of Philistia, south of Ekrón. Schwartz (Palest. p. 103) combines the name with Mizpeh following, against the text.

Dillhert, Johann Michele, a German theologian, was born in 1634, at Thorn, in Pomerania. His father having lost his property, the young man supported himself by his own efforts, chiefly in proof-reading at Leipzig. After studying at Nuremberg and Altdorf, he became professor at Jena, first of eloquence in 1631, of history in 1634, and of theology in 1640. He became professor of the same faculty at Nuremberg, and in 1666 he was also made preacher at St. Sebaldis's church. He died in that town April 8, 1639. Besides a Latin history of the Augsburg Confession and some philosophical writings, he published Elogia Sacra N. Test., Syr., Gr., Lat. cum observ. philol., cum Redactionis Grammat. Syr. (Halle, 1644); Africam Linguam Sanctam (1667), Africam linguam libri tres, in quibus virorum sacrum et prof. farrogo contextur (1644). — Adelung, Supp. zu Jocher, allgemein. Gelehr. Lexikon; Hoefer, Nouv. Bio. Gén. s. v.

Dillr, the marginal and correct rendering at Matt. xxii, 23, for διδασχων, where in the text our translators have "anise"—mislabeled, perhaps, by the similarity of name. Pliny, however (xix, 62), carefully distinguishes between anethum and anisum (comp. Theophr. Plant. vii, 1; Dioscor. iii, 461). The Anethum
DIMISSORY LETTERS 802 DINAH

gravesolens, or, as it is otherwise called, Amethum segetum, on the assumption that there are two species, is a native of the warmer regions of the south, and is sometimes cultivated in English gardens. Under the name of "dill" it belongs to that very common natural family the Umbellifera, which abounds with genera and species that are warmed by a favor of aromatic pungency. The seeds are the parts that are used, whether for the purpose of soothing the alimentary system with a warm medicine, or of improving the palate with an aromatic condiment. Among the Cossacks, and in other parts of the Russian dominions, the plant is cultivated for the same use as the caraway is among us. Dill, caraway, coriander, and cummin belong to the same natural assemblage of plants, and though the seeds differ in form, and a little in flavor, yet they are employed for the same purposes, and possess virtues very nearly allied to each other. The flowers are yellow, like those of the parsnip; the leaves decomposed into hair-like divisions. The Talmudists describe the plant רצב, שבךath, as "called in the Roman language anethum," and add that it was tithed whether gathered green or ripe. It was tithed also both as to the seed and the herb itself. That the herb was tithed simply was the more evident from the fact that the seeds, and, indeed, this is expressly said; and we are told that it was to be eaten raw, after meat, and not boiled (Ketto, Pict. Bible, note in loc.). See ANISE.

Dimissory Letters (Epistola dimissoria). (1.) In the ancient Church it was customary for any one about to travel, with letters of credence from his own bishop, if he wished to communicate with a Church in another country. These letters were of different sorts, according to the occasions or quality of the persons who carried them. Epistles of commendation were granted to persons of quality, or to persons whose reputation had been called in question, or to clergymen who had occasion to travel in foreign countries. Epistola communicatoria signified that their bearers were in the peace and communion of the Church, and hence were called pacifici, and ecclesiastici, and sometimes commercio. Epistola dimissoria, at a later period, were only given to the clergy when they were to remove from their own diocese and settle in another: they were to testify that they had the bishop's leave to depart. All these went under the name of formae, because they were written in a precise form, and bearing some particular marks, which distinguished them from counterfeits. They were granted by the bishop's sole prerogative. (2.) In the Church of England, dimissory letters are such as are used when a candidate for holy orders has a title in one diocese and is to be ordained in another: in such a case, the proper diocesan sends his letters, directed to the ordaining bishop, giving leave that the bearer may be ordained by him. In the Protestant Episcopal Church, certificates, or testimonials answering to the Epistola dimissoria, are required of clergymen passing from one diocese to another (Canon v of 1844). Similar provisions exist in other Protestant denominations.—Ringham, Orig. Eccl. Book ii, chap. v; Hook, Church Dictionary (Am. ed.), s. v.

Din'mah (Heb. Dinahah, דינאה, a dum-ahill; Sept. Δινώα, Vulg. Dinoa), a Levitical city of the tribe of Zebulon, assigned to the family of the Merarites (Josh. xxii. 35). Gesenius, however, suggests that in this place we ought rather to read דינמא, Rimmonah, the Remmon (q. v.) mentioned in a similar connection in Josh. xix. 18; 1 Chron. vi. 62 (see Bertheau, Chronik, p. 72, 78; Movers, Chronik, p. 72).

D'im'on (דימון), by an interchange of letters for דימן, Dib'on, for the sake of alliteration with דימן, in the same verse; Sept. Διμών v. r. Ρηθών, Vulg. Dibon), a city of the Moabites, with streams ("waters") adjacent (Isa. xv, 9); elsewhere (as in- ver) 2 more properly called Dibon (q. v.).

Din'mah (Heb. Dinahah, דינאה, judged, i. e. vindicated, from the same root as Dan; Sept. Διάνα; Joseph. Διβά, Ant. i, 21, 1), the daughter of Jacob by Leah (Gen. xxx, 21), and therefore full sister of Simeon and Levi. Born B.C. 1813. While Jacob's camp was in the neighborhood of Shechem, Dinah, prompted by curiosity, went out "to see the land," most probably to a festival, when she was seduced by Shechem, the son of Hamor, the Hivite chief or head-man of the town. Her age at this time, judging by the subsequent notice of Joseph's age (Gen. xxxvii, 2), may have been from thirteen to fifteen, the ordinary period of marriage in Eastern countries (Lam's Mod. Egypt, i, 296). Partly from dread of the consequences of his misconduct, and partly, it would seem, out of love for the damsel, he solicited a marriage with her, leaving the "marriage price" [see MARRIAGE] to be fixed by her family. Such a separation would have been deemed sufficient under the Mosaic law (Deut. xxii, 28, 29) among members of the Hebrew nation. But in this case the suitor was an alien, and the crown of the offense consisted in its having been committed by an alien against the favored people of God; he had "wrought folly in Israel" (Gen. xxxiv, 7). The proposals of Hamor, who acted as his deputy, were framed on the recognition of the hitherto complete separation of the two peoples; he proposed the fusion of the two by the establishment of the rights of intermarriage and commerce, just as among the Romans the jus comissarii and the jus commercii constituted the essence of cession. The sons of Jacob, bent upon revenge, availed themselves of the eagerness which Shechem showed to effect their purpose; they demanded, as a condition of the proposed union, the circumscription of the Shechemites: the practice could not have been unknown to the Hivites, for the Phcenicians (Herod, ii, 104), and probably most of the Canaanith tribes, were circumcised. Even this was the more acceptable; and Simeon and Levi took the most barbarous advantage of the compliance by falling upon the town on the third day, when the people were disabled by the effects of the operation, and slew them all (Gen. xxxiv). For this act of truly Oriental vindictiveness no excuse can be offered, and Jacob repeatedly protested against its abhorrence and execration (Gen. xxxiv, 20; xliv, 5-7). To understand the act at all, however, it is necessary to remember that any stain upon the honor of a sister, and especially of an only sister (see Niemer, Charakf. ii, 418 sq.), is even at this day considered as an insupportable disgrace and inexpiable offence among all the nomad tribes of Western Asia. If the woman be sable, her brothers more than her father—if she be married, her brothers more than her husband, are aggrieved, and are considered bound to avenge the wrong. Hence the active vengeance of Dinah's full brothers, and the comparative passiveness of her father in these transactions. Jacob's remark (ver. 30) does not imply merely guilelessness on the part of his sons in this transaction, but he dreaded the revenge of the neighboring peoples, and even of the family of Hamor, some of whom appear to have survived the massacre (Judg. ix. 26). His escape, which was wonderful, considered the extreme rigor with which the laws of blood-revenge (q. v.) have in all ages prevailed in the East, is ascribed to the special Interference of Jehovah (xxxv, 5). Josephus omits all reference to the treachery of the sons of Jacob, and explains the easy capture of the city as occurring during the celebration of
a feast (1 Macc. i, 21, 2). The object for which this narrative is introduced into the book of Genesis probably is partly to explain the allusion in Gen. xlix, 8-7, and partly to exhibit the consequences of any association on the part of the Hebrews with the heathens about them. Ewald (Gesch. ier. i, 40) arbitrarily assumes an actual fusion of the nomad Israelites with the aborigines of Shechem, on the ground that the daughters of the patriarchs are generally noticed in an ethnological view. It appears from Gen. xli, 15 that Dinah continued unmarried in the patriarch's family, and accompanied him into Egypt. See Jacob.

Dînâ'(Chald. Dacnâ', נענ', of unknown, but probably Median origin, used as a pl. : Sept. Διανα, Vulg. Dina), one of the foreign tribes colonized by the Assyrian general Assarper in place of the deported Samaritans, and who afterwards joined in the opposition to the efforts of the returned Jews in rebuilding their city (Ezra iv, 9). Junius (Comm. in loc.), without any authority, identifies them with the people "known to geographers by the name Dema- ni," but there is only a Demani mentioned by ancient writers, and that an obscure town in Africa (Plin., Hist. Nat. vi, 85). Schultze (Paradies, p. 363) vaguely conjectures Dariata, the most southerly province of Media Major (Δημαιτίς χώρα, Ptolemy, vi, 2, 6; Plin., vi, 25; comp. Mannert, V, ii, 159), or Derâ in Susiana (Δηράν, Ptolemy, vi, 3, 6). See Dura. Ewald (Gesch. d. Volkes Israel, iii, 576) suggests the Median city Deinaber.

DIOCESE

"exit" or "devoir;" apóthēkē, Luke xii, 87; John xxi, 12, 15); DINNER (эфф. держ., archukh), Prov. xv, 17; elsewhere "allowance," 2 Kings xxv, 80; "viuetae;" Jer. xi, 5; "dier;" Jer. iii, 34; ἀπαρτώ, Matt. xxii, 4; Luke xiii, 37; Rev. xix, 19). Those Greek terms are not express instruments are used in the passage first cited the Greek meal is referred to. The Greek terms (both kindred to ὀρνήματα relating to the morning meal, taken originally at sunrise (Homer, Il. xx., 124; Od. xvi., 2) in later times, the breakfast fash Lat. prandium, taken about the middle of the forenoon, or even so late as noon; the principal meal being the dinner, rendered "supper" (q. v.), taken later in the afternoon or early in the evening. See Meal.

It appears that it was the custom in Egypt, in great families, to dine at noon, and for this purpose the meal was a sandwich on the premises only just before it was required for cooking (Gen. xxiii, 16), which is still the custom in the East on account of the heat of the climate. It is probable, however, that the Egyptians, like other inhabitants of the East, as also the Greeks and Romans, took only a slight dinner about this time, the principal meal being at six or seven in the evening. Feasts at a later period among the Greeks were always appointed at supper-time, for the burning heat of noon diminished the appetite for food, and suppressed the disposition to cheerfulness (Mark vi, 21; Luke xiv, 24; John xii, 2). A considerable quantity of meat was served up at these repasts, as is evident from the scriptural accounts, which still exist, of the customs of eastern nations, whose aban or feast, is remarkable for the upbearing profusion of viands. A great variety of vegetables was also required on all occasions; and when dining in private, dishes of that kind seem to have been in greater request than joints, even at the tables of the rich. The tables, as at a Roman repast, were occasionally found and removed, and the dishes were sometimes each joint was served up separately, and the fruit, deposited in a plate, or trencher, succeeded the meat at the close of the dinner. The Egyptians, like the Jews, were particularly fond of figs and grapes. Fresh dates, when in season, and in a dried state at other periods of the year, were also brought to table, as well as a preserve of the fruit still common in Egypt and Arabia (Wilkinson, Anc. Egypt. i, 175 sq., abridgm.). See BANQUET.

Dinabab (Heb. דינאבהא, דינאבהא, perhaps robbers' den, otherwise abash; Sept. Σωλαγάζ; Vulg. Demabou), an Edomitic city, the capital (and probably birthplace) of king Bela (Gen. xxxvi, 32; 1 Chron. iv, 43). Eusebius and Jerome (Onomast. s. v. Σωλαγάζ; Damnati) mention a village of Damaōs (Δαμαοῦ, Jerome Demabou) eight miles from Areopolis, or Ar of Moab (Jerome, "on the road to Aron"); and another on Mount Peor, seven miles from Ehasus (Heshbon); but neither of these has claim to be the Dinah of Scripture. R. Joseph, in his Targum (on 1 Chron. i, 43, ed. Wilkins), finds a significance in the name. After identifying Balaam, the son of Beor, with Laban the Syrian, he adds, "And the name of his capital city was Dinahab, for it was given (דינייווהב) him as a present." The name is not uncommon among the Shemitic races. Tielemy (v, 15, 24) mentions a Demoua (Δαμαοῦ) in Palmyren Syria, afterwards a bishop's see, and according to Anomius (iii, 27) there was a Damao in Persia, among the Persians. But Tharros in Sardinia was doubtless one of the petty localities of Mount Seir, possibly at Didibba, a little N. of Petra (Smith's list in Robinson's Rese. retche, iii, App. p. 114, and i, Map.).

Dinner. See Dine.

Dinter, Gustav Friedrich, a German theologian, was born at Borna, in Saxony, Feb. 29, 1760. He studied theology at Leipsic, and on leaving the university was charged with the education of the son of chamberlain Pöllnitz. In 1787 he became pastor of Kotscher, near Borna, and in 1794 director of the teachers' seminary at Friedrichstadt, near Dresden. He was afterwards successively pastor at Gornitz in 1807, school inspector in 1816, and finally professor of theology at Königsberg in 1822. He died at the latter place May 29, 1831. He wrote largely on catechetical, religious education, and other practical subjects, all in the interest of rationalism. In his discourses, which are freely spoken, Dinter opens his eyes as to the imperfect notions of their fathers as to God, miracles, etc. "He gives teachers directions how to conduct themselves cleverly in such matters, and afterwards, in agreement with the principles he recommends, he lays down plans of catechismic. For example, there are two ways of catechizing the children: one before an audience not sufficiently enlightened, and where all remains in its old state; another for places which have more light. In the prophecies concerning the Messiah, a double explanation is given for the same reason. One is the old orthodox way, and the other a more probable neological plan. A clever teacher is to choose for himself; a dull one may ask the parish clergyman how far he may go." His collected works have been published by Wilhelm, under the title Exegetische Werke (1841-48, 12 vols.); Ketzcherische Werke (1840-44, 16 vols.); Prophetsiche Werke (1840-45, 9 vols.); Aesclipische Werke (2 vols.); He published also a biograp (Dinter's Leben von ihm selbst beschrieben, Nee, 1829).—Kahn, German Protestantism, ch. ii, § 6; Prier, Universal-Lexikon, s. v.; Herzog, Real-Encyclop. iii, 397; Hurst, History of Rationalism, ch. viii.

Diocesāre. See SEPHORIS.

Diocesan Episcopacy, that system of Episcopacy in which the bishop has jurisdiction only over a certain number of parishes, or over a certain district of country, called a dioece. See Bishop; Episcopacy; Diocesan.

Diocese (וזי, administration), the territorial circuit of a bishop's administration where the Episcopacy is diocesan (q. v.).

1. ROMAN CIVIL DIOCESES.—The origin of the diocesan division is to be traced to the ancient division of the later Roman empire. The term diece is used by Cicero (Fam. iii, 8, 4) to designate the district of a governor's jurisdiction. Constantine divided the empire into 13 large provinces, called dieceses, which were again divided into 120 provinciae. The dieceses were governed by vicars or prefects. The civil diocesan division in the days of Arcadius and Honorius (beginning of the fifth century) was as follows: 1. Prefectus Provinciae per Orientem; five dieceses were subject to this jurisdiction, namely, 1, the Oriental diece; 2, the Oriental diece, properly so called; 2, the diocese of Egypt; 3, the diocese of Asia; 4, the diocese of Pontus; 5, the diocese of Thrace. II. Prefectus Provinciae per Illyricum; seven dieceses were subject to the jurisdiction of this governor, namely, 1, the diocese of Italy; 2, the diocese of Illyria; 3, the diocese of Africa. IV. Prefectus Provinciae Galliarum; he had the command of three dieceses, namely, 1, the diocese of Spain; 2, the diocese of Gaul; 3, the diocese of Britain. The diocese of Brit- in included more than one diocese, the division in question being doubtless one of the petty localities of Mount Seir, possibly at Dibdi, a little N. of Petra (Smith's list in Robinson's Rese. retche, iii, App. p. 114, and i, Map.).

DIOCESE OF BRITAIN. EXARCH OF YORK, ESQ.

Provinces.

1. Maxima (Scoticana), i. e. all first, all from the Thames to the northern borders .
2. Flavia Caesaris, taken out of the former and containing all from the Thames to the Humber .
The reign of Diocletian was in many respects a noble
and successful one, but its glory was stained by the
terrible persecution of the Christians which he author-
ized. "The earlier part of his reign was favorable to
the Christians, and it was through the weakness
and superstition of the prince, rather than his wickedness,
that his name is now inscribed on the tablets of infa-
mony as the most savage among persecutors. Galerius
represented to him that the permanence of the Roman
institutions was incompatible with the prevalence of
Christianity, which should therefore be extirpated.
Diocletian proved the subject to a sort of council,
composed of some eminent military and judicial offi-
cers. They assented to the opinion of Galerius; but
the emperor still hesitated, until the measure was sanc-
tioned and sanctified by the oracle of the Milvian
Apollo. The emperor gave a tardy consent to the
commencement of a plan into which he appears to
have entered with the most considerate calmness,
though it is also true that during its progress some in-
cidents occurred which enlisted his passions in the
cause, and even so inflamed them that, in the height
of his madness, he certainly proposed nothing less
than the extermination of the Christian name. The influ-
ence of the Caesar Galerius, who was animated, from
whatever motive, by an unmitigated detestation of
the worshippers of Christ, and who thirsted for their
destruction, was probably the most powerful of those
circumstances. But the second must not be forgotten.
In the disputes, now becoming general, between the
Christian ministers and the pagan priests, the teach-
ers of philosophy are almost invariably found on the
side of the latter; and as it is not denied—not even by
Gibbon—that those learned persons directed the course
and suggested the means of persecution, we need not
hesitate to attribute a considerable share in the guilt
of its origin to their pernicious consequence. Diocleti-
ian published his first edict in the February of 303. Three
others of greater severity succeeded it; and, during a
shameful period of ten years, they were very generally
and rigorously enforced by himself, his colleagues,
and successors. It is needless to particularize the de-
grees of barbarity by which those edicts were severally dis-
Diodati, Dominico, an Italian scholar and archbishop, was born in Naples 1736, and devoted himself especially to ecclesiastical studies. He is mentioned here on account of his De Christo Graece loquitur, praecipue fideique scriptio et dogmata, linguis quattuor, tam corporali quam spirituali (Romani, 1787; edited, with a preface, by Doblin, London, 1843, 8vo). The work seeks to prove that Christ and the apostles spoke only in Greek, and made use only of the Greek language in the composition of the Scriptures. See Ann. Biblical Repos., i. 314.

Diodorus, bishop of Tarusus, is supposed to have been born at Antioch. After being ordained priest there, and intrusted with the care of its Church during the banishment of Meletius, its head, though only in priest's orders, he acted so prudently and courageously as to maintain orthodoxy in the see. After the return of Meletius he was ordained bishop of Tarusus, A.D. 578. So great was his fame that he was chosen to take care of the interests of the Eastern churches at the Council of Constantinople, A.D. 681. The date of his death is not accurately known, but it must have been before A.D. 684. Many of his works and sermons are preserved in fragments or extracts, preserved by Photius and others. He was highly esteemed by the great men of his own and after times, and his writings much commended. Theodore of Mopsuestia, who was an advocate of Nestorianism, was his pupil, and the scholar was supposed to have included in his heresy from his master. Chrysostom was also one of his pupils. Even the famous orthodoxy of St. Chrysostom could not avail his former master. The loss of his works is the more to be regretted, as he was the first that began to throw aside allegory in the interpretation of Scripture. From the catalogue of his works mentioned by Suidas (in voc. Diod.), most of them appear to have been explanations of Scripture, or controversial tracts; Photius has preserved (Cod. 223, p. 662) much of his argument taken out of a treatise on Fate; and Ebedjesu (Assen. Bibl. Or. tom. iii, p. 89), in his catalogue of Syrian ecclesiastical writers, mentions 60 books of Diodotus that the Arians burned, and gives the titles of eight of them. His style was clear and perspicacious, according to the testimony of Photius, and his arguments, says St. Basil (Epist. 167), were close and well arranged, expressed in language of the greatest simplicity (Socratea, Hist. Eccl. chap. vi; Theoloevet, Hist. Eccl. iv, 25). Diodorus' place in his writings in Fabricius, Bibliotheca Graeca (ed. Harkness), i. 277-278, and Allardet, Dict. de Theoul, No. 266. Apud Ang. Mai, Biblio. Not. Patri. vi, 157; also given in Migne, Patrologia Graece, xxxiii, 1545-1627, where fragments of the commentaries of Diodorus on the Pentateuch and Psalms are given in Greek and Latin. Semisch (in Herzog's Real-Encyclopädie, iii, 403) gives an account of the doctrinal position of Diodorus, which we condense as follows. Diodorus died not only in the odor of sanctity, but with a high reputation for orthodoxy. The Nestorian controversy, after his death, robbed him of this reputation. Some of his writings against Apollinarianism involved the principles of the Arianism of Arius, e. g. the protos physis anthropos, and the trinity now tov agwn ton pneumatov (Phot. Bibl. Cod. 102), of the former of which there are fragments in Marius Mercator (ed. Baluze, p. 849 sqq.) and Leontius Byzantinus (Canisius, Lect. Antiq. ed. Basane., i, 391 sqq.). Here Diodorus makes the Son of God twofold, viz. the Logos of God the Father, and the Son of the Word. The成品 ter, not the former, was conceived by Mary through the Holy Spirit. The mystery of the incarnation consists in the assumption of a perfect humanity by the Logos. The relation of the two natures is the indwelling of the Logos in the man Jesus, as his temple or vessel, in which he wrought and died. But Diodorus' work, as a son of David is called the Son of God, though not in the proper and exclusive sense. This view, making...
DIOGNGETUS, THE EPISTLE TO

the union of the two natures an external and moral rather than substantial union, naturally led, after Nestorianism arose, to the conclusion that Diolanus and the school of Antioch had been its precursors, to say the least. After the death of the existing laws, and especially of the laws for the lives. They love all, and are persecuted by all. They are unknown, and yet they are condemned. They are killed and made alive. They are pure and make many rich. They lack all things, and in all things abound. They are reproached, and glory in their reproaches. They are calamitated, and are justified. They are cursed; not they are blessed, and they give honor. They do good, and are punished as evil-doers. When punished, they rejoice, as being made alive. By the Jews they are attacked as aliens, and by the Greeks persecuted; and the cause of the eminently their enemies cannot tell. In short, what the soul is in the body, the Christians are in the world. The soul is diffused through all the members of the body, and the Christians are spread through the cities of the world. The soul dwells in the body, but it is not of the body; so the Christians dwell in the world, but are not of the world. The soul, invisible, keeps watch in the visible body; so also the Christians are supreme, but they are invisible, and as invisible are they also invincible. The flesh hates and wars against the soul, suffering no wrong from it, but because it resists fleshly pleasures; and the whole world hates the Christians with no reason but that they resist its pleasures. The soul loves the flesh and members by which it is hated; so the Christians love the world, and though they are hated in the body, but holds the body together; so the Christians are detained in the world as in a prison, but they contain the world. Immortal, the soul dwells in the mortal body; so the Christians dwell in the corruptible, but look for incorruption in heaven. The soul is the better for not being of the body; so also the Christians increase, though daily punished. This not God has assigned to the Christians in the world, and it cannot be taken from them." Another passage on the atonement deserves to be cited. In meeting the question why Jesus Christ, if he was the author of the only true religion, appeared so late, the epistle says (chap. vii): "When our wickedness had reached its height, and it had been clearly shown that its reward, punishment and death, was impending over us; and when the time had come which God had before appointed for manifesting His own kindness and power, how the one love of God, through exceeding regard for men, did not consider the corruption of the Christians, but went away, nor remember our iniquity against us, but showed great long-suffering, and bore with us, He himself took on him the burden of our iniquities. He gave His own Son as a ransom for us, the holy One for transgressors, the blameless One for the wicked, the righteous One for the unrighteous, the Incorruptible One for the corruptible, the Immortal One for the mortal; that is, they are mortal. For what other thing was capable of covering our sins than His righteousness? By what other one was it possible that we, the wicked and ungodly, could be justified, than by the only Son of God?" The writer calls himself (chap. xi): "When our wickedness had reached its height, and it had been clearly shown that its reward, punishment and death, was impending over us; and when the time had come which God had before appointed for manifesting His own kindness and power, how the one love of God, through exceeding regard for men, did not consider the corruption of the Christians, but went away, nor remember our iniquity against us, but showed great long-suffering, and bore with us, He himself took on him the burden of our iniquities. He gave His own Son as a ransom for us, the holy One for transgressors, the blameless One for the wicked, the righteous One for the unrighteous, the Incorruptible One for the corruptible, the Immortal One for the mortal; that is, they are mortal. For what other thing was capable of covering our sins than His righteousness? By what other one was it possible that we, the wicked and ungodly, could be justified, than by the only Son of God?" The writer calls himself (chap. xi): "When our wickedness had reached its height, and it had been clearly shown that its reward, punishment and death, was impending over us; and when the time had come which God had before appointed for manifesting His own kindness and power, how the one love of God, through exceeding regard for men, did not consider the corruption of the Christians, but went away, nor remember our iniquity against us, but showed great long-suffering, and bore with us, He himself took on him the burden of our iniquities. He gave His own Son as a ransom for us, the holy One for transgressors, the blameless One for the wicked, the righteous One for the unrighteous, the Incorruptible One for the corruptible, the Immortal One for the mortal; that is, they are mortal. For what other thing was capable of covering our sins than His righteousness? By what other one was it possible that we, the wicked and ungodly, could be justified, than by the only Son of God?" The writer calls himself (chap. xi): "When our wickedness had reached its height, and it had been clearly shown that its reward, punishment and death, was impending over us; and when the time had come which God had before appointed for manifesting His own kindness and power, how the one love of God, through exceeding regard for men, did not consider the corruption of the Christians, but went away, nor remember our iniquity against us, but showed great long-suffering, and bore with us, He himself took on him the burden of our iniquities. He gave His own Son as a ransom for us, the holy One for transgressors, the blameless One for the wicked, the righteous One for the unrighteous, the Incorruptible One for the corruptible, the Immortal One for the mortal; that is, they are mortal. For what other thing was capable of covering our sins than His righteousness? By what other one was it possible that we, the wicked and ungodly, could be justified, than by the only Son of God?" The writer calls himself (chap. xi): "When our wickedness had reached its height, and it had been clearly shown that its reward, punishment and death, was impending over us; and when the time had come which God had before appointed for manifesting His own kindness and power, how the one love of God, through exceeding regard for men, did not consider the corruption of the Christians, but went away, nor remember our iniquity against us, but showed great long-suffering, and bore with us, He himself took on him the burden of our iniquities. He gave His own Son as a ransom for us, the holy One for transgressors, the blameless One for the wicked, the righteous One for the unrighteous, the Incorruptible One for the corruptible, the Immortal One for the mortal; that is, they are mortal. For what other thing was capable of covering our sins than His righteousness? By what other one was it possible that we, the wicked and ungodly, could be justified, than by the only Son of God?" For what other thing was capable of covering our sins than His righteousness? By what other one was it possible that we, the wicked and ungodly, could be justified, than by the only Son of God?"
DIONYSIA

808

DIONYSIUS

(Proleg. p. xci), Werner (Geschichte der apol. und polém. Literatur der chr. Theol. i, 127), put it in the
third quarter of the 1st century. In the beginning of the second
century, under the reign of Hadrian. Dormer places it a
little later, in the reign of Hadrian, and is disposed to
attribute it to the apologist Quadratus. Bunsen's
conjecture of Marcion as the author has found no fa-
vor, and has been amply refuted by Otto (2d ed. p.
44 sq.). The author's names are Aristides as the probable
author. Cave, Fabricius, Baumgarten-Crusius, and Otto,
with two of the MSS., ascribe it to Justin Mart-
tyr. Otto conjectures, on the ground solely of the
accidental identity of name, that Diognetus, to whom
the epistle is addressed, was the preceptor and friend
of the emperor Marcus Aurelius in the middle of the
second century. The author exercised a hard
influence on a hard
pupil, who, however, was a pure Stoic, and a bloody
persecutor of the Christians in Asia Minor and in
Southern Gaul. But the epistle is superior to the
genuine writings of Justin Martyr, both in clearness
and force of thought, and in purity and terseness of
style. It betrays the freedom of the school of St. Paul.
Its whole character would rather place it somewhat
earlier, between the apostolic fathers and Justin Mart-
tyr; for Christianity is represented as something
new, which had but recently appeared in the world
(ch. i, ii, ix), and yet repeated persecutions are al-
ready presupposed (v. 4). - For a fuller discussion of
the arguments for and against the authorship of Justin
Martyr, see Otto's Prolegomena to his second edition of
the Ep. p. 9 sq., Semisch, Justin der Märtyrer, i, 172 sq.,

IV. Editions and Literature.—So far there are only three manuscript copies of the epistle extant, two of
which ascribe it to Justin Martyr. The first printed
edition was prepared by Henry Stephanus at Paris,
1592, under the title Іωάννητος του φιλοσόφου καί
ποιητοῦ Ἔσσαλον ποὺς Δῶμυντον καὶ Δόμος πρὸς
Βάλλαντα.—Justini philologi et martyria Epistola ad
Diognetum, etc. It then appeared in connection with
the works of Justin Martyr. Hefele incorporated it in
his edition of the Apostolic Fathers (4th ed. Tuge-
binge, 1855, p. 296 sq.). The best edition is that of
J. C. Th. Otto, Epistola ad Diognetum Justinii philologi
et martyria nomens pra se fera (Jena, 1842; 2d ed. Lips.
1858, with Proleg. and Annot.). German translation
by H. Schenkel in Ueber Justins des Märtyrers Brief an Diognet (1851); Snoeck, Introducere in Ep. ad Diogn. (1st. 1861); Se-
misc, Justin Mart. Mart. (Breslaw, 1840, p. 172 sq.),
and his article Diogzet in Herzog's Real-Encyklop. iii,
407-410; Werner, Geschicthe der apol. und polem.
Literatur des chrst. Theologie (Schauffhausen, 1861,
i, 126 sq.).

Dionysius (Διόνυσος, Vulg. Bacchusnalis), "the feast of Bacchus" (2 Mac. vi, 7), which was celebra-
ed, especially in later times, with wild extravagance
and licentious enthusiasm (hence the term Bacchana-
lian). Women, as well as men, joined in the proces-
sions (Bianus), acting the part of Maenads, crowned
with ivy and bearing the thyrsus (comp. Ovid, Fast. iii,
767 sq.; Brodhurst in T. Th. iii, 6, 2, who gives a
coin of Meropea bearing a thyrsus crowned with
ivy); and the phallus was a principal object in the
train (Herod. ii, 48, 49). Shortly before the per-
secution of Antiochus Epiphanes, B.C. 169, in which
the Jews "were compelled to go in procession to Bac-
cus carrying ivy" (2 Mac. vi, 7), the secret celebra-
tions of the Bacchic cultus in Italy had been revealed
by the Roman senate (B.C. 186). The whole state
was alarmed by the description of the excesses with
which the festival was attended (Livy, xxxix, 8 sq.),
and a decree was passed forbidding its observance in Rome
or Italy. See Smith's Dict. of Class. Antiq. s. v. This
fact offers the best commentary on the conduct of An-
tiochus. It may be inferred that rites which were for
be incompatible with the comparative simplicity of early
Roman worship must have been peculiarly re-
volving to Jews of the Assmoman age (comp. Herod.
iv, 79). See Dionysius.

Dionysian Ėra. See Velgar Ėra.

Dionysius the Areopagite (Ἅρωπαγίτης), one of Paul's converts at Athens, of whom no other
account is given in the New Testament than that in
Acts xvi, 25-34, viz., that Paul was brought into the
Areopagus, and there made known to Athens his do-
ctrine. The results of his speech are briefly stated in
verse 34: "Howbeit, certain men clave unto him, and
believed: among the which was Dionysius (Διονυσίως,
q. d. a rotary of Bacchus) the Areopagite, and a wom-
an named Damaris, and others with them."

Eusebius (Hist. Eccles., i, 40, and iv, 23) tells that
Dionysius of Corinth names "Dionysius the Areopag-
ite" (whom Luke has recorded in the Acts) as the
first bishop of the Church in Athens. Suidas gives
a fuller account, according to which Dionysius was
born in Athens, studied there and in Egypt, and be-
came eminent for learning; and while at Heliopolis,
in Egypt, seeing an eclipse of the sun, he exclaimed to
a friend, 'This eclipse seems to be athing with some sufferer, or symp-
pathizing with some sufferer,' and this eclipse took
place at the time of the death of Christ. Returning
to Athens, he became an Areopagite, was converted
under Paul's discourse, and was made bishop of Ath-
ens by Paul. So far Suidas. On the authority of
Aristides the Apologist he is said to have suffered mar-
tyrdom at Athens.

The name of Dionysius has become important in
Church history from certain writings formerly be-
lieved to be his, but now known to be spurious, and
designated as the Peri- or Dionysiou writings. They
are: 1. The Celestial Hierarchy (περί της ουρανίους
ἰεραρχίας); 2. The Ecclesiastical Hierarchy (περί της
ἐκκλησιαστικῆς ἱεραρχίας); 3. Concerning the Names
of God (περὶ τῶν Θεοῦ ὄνοματος); 4. Of Mystical
Theology (περὶ μυστικῆς θεολογίας); 5. Epistles, in
number; 6. A Liturgy having the name of Dionysius,
given by Renaudot, Lit. Orient. Coll., i, 201. The first
appearance of Dionysius is in an apocryphal collection
of accounts concerning the history of Dionysius.
In 533 a conference was held at Constantinople be-
 tween the Severians (Monophysite heretics) and the
orthodox Catholics, when the Severians added these
writings in support of their opinions (see Hefele, Con-
cilien geschichte, ii, § 245). Hyperius, who presided
at the conference, and the Catholic fathers declared
that these writings were either interpolated or spuri-
ous. Nevertheless, from this time on, they gradu-
ally grew into repute in the East, where they soon
found commentators (e. g. St. Maximus, 7th century, Geo-
seite Pachymerese, etc.), who, with the Greek biog-
ographers of Dionysius, find place in the second
volume of the works of Dionysius in Migne, Patrocs, Grèce, iv. In
the Western Church, Gregory the Great († 604) cites
them as nominally the writings of Dionysius (Hist.
34). They attracted more attention in the eighth
century, when Stephen ii sent a copy as a present to
king Pepin (A.D. 768), and the emperor Michael sent one
to Louis the Pious (A.D. 827). Hilduin, abbot of St.
Denis, near Paris, compiled an apocryphal collection
of accounts concerning the history of Dionysius, and
identified the author of these writings with Dionysius
[see DENIS], the patron saint of Paris. From this
time, for centuries, their authenticity was not ques-
tioned; and they were the subjects of translations,
comments, and scholia, and were published in Italy
by Poggio Bracciano; by Eck, by Alciati, by Dworkin,
Dugito, Hugo de St. Victor, Albertus Magnus, and Thomas
Aquinas. The critical spirit of the Reformation, how-
ever, was early directed towards the Dionysian writ-
 ings. Erasmus († 1536) questioned their authenticity
DIONYSIUS (Comm. on Acts xvii); and in 1629, Sirmond (the Jesuit) denied the identity of Dionysius the Areopagite with the convert to God, "indeed, in the authenticity of the writings attributed to him. The question of identity was long controverted among the Gallican theologians, but by the end of the century the Paris Breviary contained two saints Dionysius instead of one. The question of authenticity was discussed and settled: (1) in 1626, in his De Scripta Dionysii Areopagici (Geneva, 1666), which was followed on the same side by the Roman Catholic Nicolas de Nourry (Appar. ad Bib. Max. Patr. 1708, p. 170 sq.; given also in Migne, Patrolog. Graec. iii, 7 sq.). Other Roman writers (e.g. Hallois and Delrio, whose apologies are given in Migne, Patrolog. Graec. vii, 49) attacked the authenticity of the writings; but the greater scholars of that Church (e.g. Tillemont, Pagli, etc.) admit that they are spurious. A few modern writers (e.g. Kestner, die Apotheose, od. d. geheime Weltbund d. Christen. Jen. 1819, 8vo; Darbouy, Introduction to a French translation of Dionysius) have sought again to restore the credit of the books, but the question is settled, with both Roman and Protestant circles, against their authenticity. As to the real date of the books, Dallè (op. cit. p. 184) fixes it as probably toward the end of the fifth and beginning of the sixth century; Pearson, who discusses the subject pretty fully in his First Apologie (either father or son) the date should be before that of Jerome, in the fourth century; but Bausage, and even Tillemont, refute Pearson; Bausage giving the date as the end of the fifth, or beginning of the sixth century (Hist. de l'Eglise, vii, 10, cited in Lardner, Works, v. 73). Cave, Hist. Lit. (Geneva, 1720) i, 442 gives A.D. 302 for the date, and inclines to think Apollinaris (either father or son) the author. Others (e.g. La Croze) make Syncensius, bishop of Polemata (fifth century), the author.

Connected with the question of the origin of the pseudo-Dionysian writings is that of their object and aim. Le Nourry (op. cit.) supposes them to have been directed against the Eutychean and Nestorian heretics; but there is not enough matter of this sort in them to justify this opinion. Baumgarten-Crusius (Opuscula Theol. Jena, 1836, p. 265) maintains that the object of the books was to incorporate the Grecian mysteries with Christianity, and to set up mystical, religious over against Gnosticism; and he assigns an Athenian origin (either father or son) the author, as Gnostic in some of these books is not the early Gnosticism. Engelhardt, in his Die angeb. Schriften d. Dionys. Areop. überwies, etc. (Sulzbach, 1825) assigns their origin to the Neoplatonic school of Porphyry († 485). Neander (History of Christian Dogma, Bohn's ed. i, 292) finds in them a mystical theology "resulting from a mixture of the Platonic and Christian mind, which turned the whole constitution of the Church, its external rites, and its dogmas, into a symbol of its idea." According to Nieder (Kirchen- gerü. cited by Neander, i, c.), there is in the Pseudo-Dionysian writings the exhibition of a pretended Athenian Gnosis, but rather Antichrist, which reconciles the pure Hellenic Neoplatonism and the Church doctrine more faithfully than the older Gnosis. We may learn from these writings, adds Neander (ii, 402), "how strongly the mystic liturgic element of the Greek Church tended to the multiplication of the sacramental formularies, and particularly of the eucharistic consecration of the hierarch, by receive in them a mystic, symbolic meaning. These writings conveyed the existing spiritual tendencies to the following period. The sacraments which they enumerate are the following: baptism (φωναμα), the Lord's Supper (ευαγγελινα συνελευθεροποιησις), penance (πουματια), ordination (πατροσ τεσσερα), the rites used at the burial of believers (τα εις των ειρων εκεινουςων)." The doctrine of God taught is that intuition of him only can be obtained by mystical contemplation. Man can have no absolute knowledge of God in thought; all his knowledge is relative; but man can be united to God, "indeed, in the authenticity of the writings attributed to him. In the Celestial Hierarchy the angels are divided into three classes, and each class into three orders (τριγματα), thus: 1. Θρασυπαθεια: 2. Θρασυφαθεια: 3. Θρασυπαθεια: 4. Θρασυφαθεια: 5. Θρασυπαθεια. In his De Scripta Dionysii Areopagici (Geneva, 1666), which was followed on the same side by the Roman Catholic Nicolás de Nourry (Appar. ad Bib. Max. Patr. 1708, p. 170 sq.; given also in Migne, Patrolog. Graec. iii, 7 sq.) the question of authenticity was discussed and settled: (1) in 1626, in his De Scripta Dionysii Areopagici (Geneva, 1666), which was followed on the same side by the Roman Catholic Nicolás de Nourry (Appar. ad Bib. Max. Patr. 1708, p. 170 sq.; given also in Migne, Patrolog. Graec. iii, 7 sq.). Other Roman writers (e.g. Hallois and Delrio, whose apologies are given in Migne, Patrolog. Graec. vii, 49) attacked the authenticity of the writings; but the greater scholars of that Church (e.g. Tillemont, Pagli, etc.) admit that they are spurious. A few modern writers (e.g. Kestner, die Apotheose, od. d. geheime Weltbund d. Christen. Jen. 1819, 8vo; Darbouy, Introduction to a French translation of Dionysius) have sought again to restore the credit of the books, but the question is settled, in both Roman and Protestant circles, against their authenticity. As to the real date of the books, Dallè (op. cit. p. 184) fixes it as probably toward the end of the fifth and beginning of the sixth century; Pearson, who discusses the subject pretty fully in his First Apologie (either father or son) the date should be before that of Jerome, in the fourth century; but Bausage, and even Tillemont, refute Pearson; Bausage giving the date as the end of the fifth, or beginning of the sixth century (Hist. de l'Eglise, vii, 10, cited in Lardner, Works, v. 73). DIONYSIUS ALEXANDRINUS 810 DIONYSIUS ALEXANDRINUS

sq.: Ritter, Geschichte d. christ. Philosophie, i, 515 sq.;
Montet, Des Livres du Pseudo-Denis (Paris, 1848, 8vo);
Cranborne, The Councils of the Church (Paris, 1865); E. C. Tocque's
(Lyon, 1860), x, 534 sq. 751, where an abstract of Darboy's
plea is given; Milman, Latin Christianity, bk. xiv, ch. ii.
There is a good essay on the Dionysian writings, with a brief analysis of them, by B. F. Westcott, in the
Contemporary Review, May, 1867.

Dionysius Alexanderinus, in the Great, was born a heretic; he was converted early to Chris-
tianity by the teaching of Origen. He became a cate-
chist about A.D. 233, and succeeded Hecataeus in the
bishopric of Alexandria about A.D. 247. His episco-
pate was full of troubles, as it continued during the per-
suasions of Decius and Valerian, and in it a pestilence
seemed to be a mere reflex of the thorough perfections
in the disputes and controversies which at the same time
greatly disturbed the peace of the Church. He was
driven, with many of his flock, by the Decian persecu-
tion, into the deserts of Libya. In about a year's
\time, the persecution being abated, he returned to Al-
exandria, A.D. 251. In 257 the Valerian persecution
began, and Dionysius was banished by 
Emilianus, prefect of Egypt, to Cephiro, in Libya, where he continued at least three
years. Valerian having been taken prisoner by the Persians, the persecution was again
stopped, and Dionysius returned to his flock at Alex-
andria, where he died about A.D. 265. Dionysius
shows a great deal of learning, and a love of truth. He
part in the controversies of the time; and from what
remains of his Epistles, his moderation and spirit of
conciliation are sufficiently apparent. A few
fragments only remain of his works.

Dionysius finally refrained the Chilistic doctrine,
so that Origen had dealt so heavy blows. See Mille.

"An Egyptian bishop, Nepos, in a
work called Ἁγάγος Ἀλληγοριστής, insisted partic-
ularly on the literal interpretation of the Apocalypse, and
the description of the Millennium therein contained.
Owing, no doubt, to the persecution by Decius, this view
was extensively adopted by the oppressed Christians,
to whom it furnished strong motives of endurance.
But this having ceased, Dionysius succeeded, by per-
sonal argument and his treatise τοι ενιαυγολίων,
in expelling Chiliasm from the Eastern Church" (Giese-
ler, Church History, i, 62).

In refutation of the Sabellians, Dionysius wrote a
book on the three persons and Emphanon (see the fragments
in Athanasius, de Scendent. Dionys.) which seems to
fix upon him the Origenistic doctrine of the subordination
of the Son to the Father. "The Sabellians, though
they denied the hypostasis, retained the idea of the

ωτόνως; this led Dionysius to describe the Logos
as foreign to the Father in his essence, as his ωτόνως,
in speaking of his having a beginning, and to make use
of striking comparisons to express his subordination.
As the Western Church had already developed with
great distinctness the idea of unity of essence, Dionys-
ius, bishop of Rome, took offence at these expressions
as derogatory to the divine nature. Dionysius of Al-
exandria defended himself against these onslaughts
in an apologetical letter (ἡγάγος και ἀρκνονιας, of
which fragments are preserved; see Gieseler, Ch. Hist.
vol. i, 762). His moderation stayed the controversy:
he blamed his accusers for having laid too much stress
on comparisons, since in heavenly subjects it was not
possible to make any comparisons in time, but the derivation
of his being from the Father—his eternity as founded in
that of the Father. He marked the unity of essence thus:
ἀρχὴ from which everything else is derived, and
with which the Logos is inseparably combined"

(See, History of Dogmas, Ryland's transl., i, 169).

"The Arius even asserted (see Athanasius, Ὀρος, i,
260) that Dionysius (who was the disciple of Origen) said
ποταὶ, εἰ ἦσαν ἠλιθίαι, ἀλλὰ μὴ ζῶσον ἐν
χωρίς τοῦ λόγου αὐτὸς ἄ μὴ ὁ σῶς ἐν

ἀλλὰ ὁ πατήρ ἐν σώματι· and was accused by
the apostate of offensive illustrations εἰτ' ὀικονομίαν,
and that they might be easily explained from the stand-
he took against Sabellianism (Athanasius, p. 246 sq.; see,
in the other side, Loeffler, Kleine Schriften, i, 114 sq.,
quoted by Heinichen on Euseb, i, 300)" (Hagenbach,
History of Doctrines, § 67). Dorner holds that
Dionysius had really gone too far, and was bound to retract,
but yet excuses him on the ground that "he was
endowed with but a small measure of scientific acuten-
ness, and hence did not fully foresee the consequences
of the principles he laid down. His tendency was
very different from that of Arius" (Dorner, History of
Christian Doctrine, § 79). But it is hard to say
how the Defensio Fid. Nicora, defends Dionysius against
the charge of Arianism in various passages, one of
which we give, as follows: "Of the heads of doctrine
which his adversaries objected against him before
Dionysius Romanus, the following was one: 'God was not
always a Father. For the Son was not, was not,
in some time without a Logos. The Son himself was
not before he was born, or made, but there was a time
when he was not. For he was not eternal, but was
made afterwards.' Athanasius expressly saith that
Dionysius defended himself from these accusations.
Now it appears from this accusation that the propo-
sition, there was a time when the Son was not, was not
by the Catholics held to be heterodox and absurd in the
times of Dionysius. But how does Dionysius defend
himself? By owning the charge? No. He pro-

fesses that he did from his heart acknowledge, and al-
ways had acknowledged, the co-eternity of the Son.
"So I answer in the first book of his refutation of
the theories, 'There was not a time when God was not a
Father.' And some time after he writes thus concerning
the Son of God: 'Since he is the effulgence of the
eternal light, he himself is altogether eternal; for
since the light is always, the effulgence, it is mani-
fest, must also be always.' Again: 'God is the
eternal light, without beginning or end; therefore an
eternal effulgence is projected by him, co-exists with
him without beginning, and always born.' And again:
'The Son alone is always co-existent with the Father,
and is filled with the existent Being, and is himself
existent from the Father. There are places parallel
to these in another title of Dionysius, which is in dif-
fentant, to Paulus Samoœtenus, and in his answer to
Paul's questions set after the epistle. In the epistle
he writes thus of Christ: 'There is one Christ, who is
in the Father, the coeternal Word.' In his answers
he thus introduces Christ speaking from the prophet
Jerome, 'Even though he be a Father, there is no
perjury in the name, because he is personally,
not merely, but truly, equal to the Father, in that I differ
nothing from him in substance, coeternal also with the
Almighty Spirit.' Here he confesses the entire, coet-
ernal trinity of persons. The same Dionysius blames
Paul because he would not call Christ the co-eternal
chrestology in the new Testament person, and in the
same place he thus declares the eternity of the Son:
'As then we perceive, when one takes from one of our
material fires, and neither affects nor divides it in the
kindling one light from another, but the fire remains.
DIONYSIUS

so incomprehensibly is the eternal generation of Christ from the Father.' Lastly, that this was his constant opinion, which he always held, wherever preached and professed, he affirms in these words: 'I have written, do write, continue to write, and teach that Christ is co-eternal with the Father, the only-begotten Son, and Word of the Father.' Let Sandius brazen his forehead, and boast still that the great Dionysius Alexandrinus was of Arius's mind.' It was at the close of Dionysius's life that the second council was convoked at Antioch to condemn the heresy of Paul of Samosata, and to the fathers of the council Dionysius sent an epistle, in which he asserts, according to bishop Bull, the true divinity of the Son of God. See Eusebius, Hist. Eccles. vi, 29, 35, 40, 46; vii, 20, 26, 28; and Lardner, Credibility, iii, 57-102; where most of the remaining fragments are noticed, and many of them translated. His remains were published separately: Opera Dion. Alex. qua superstat, Gr. and Lat. (Rome, 1796, fol.). They are given also in Galland, Bibl. Patr. iii, 483; in Routh, Relig. Sacra, vols. ii and iii; and in Migne, Patrologia Graeca, x, 1257 sq. A special work on the life and writings of Dionysius has been written by Dittrich (Roman Catholic), Dionysius der Große (Leipzig, 1841). See also Clarke, Succ. of Soc. Lit. i, 176; Herzog, Real-Encyklopädie, iii, 410; a full account in Cellier, Histoire Générale des auteurs ecclésiastiques, ii, 386 sq.; Hefele's Conc. Bclengegeschichte, i, 222 sq.; and Murdock's excellent note to Mosheim, Church History, b. i, cent. i, pt. ii, ch. ii, § 7. A translation of the remains of Dionysius is promised in the Ant.-Nicene Christian Library, now publishing (1868) at Edinburgh.

Dionysius, bishop of Corinth, A.D. 170, of whom little now is known, appears to have been in considerable repute in the days of Eusebius, for eight epistles which he had written: i, to the Laodiceans; 2, to the Athenians; 3, to the believers of Nicomedia, the capital of Bithynia; 4, to the Church of Smyrna, and the other churches of Crete; 5, to the Church of Amastris, together with those throughout Pontus; 6, to the Giasontes; 7, to the Romans; and 8, to Chrysaphora, an eminent Christian matron. These are all lost except a few fragments preserved by Eusebius, Hist. Eccles. iv, 23, and ii, 29. See extract from the first fragment in Lardner, Works (ed. Kipple), ii, 144 sq. The Fragments are given in Galland Bibl. Patr. i, 675, and in Routh, Relig. Sacra (Oxon, 1814), i, 163 sq. See also Fabricius, Bibliotheca Graeca, iv, 408; xii, 175 (ed. Harles); Cellier, Hist. Gén. d. auteurs sacrés (Paris, 1862), i, 461.

Dionysius, bishop of Rome, was at first a presbyter of the Church of Rome, and afterwards, on the martyrdom of Sixtus II (Eusebius, Hist. Eccles. vii, 7, 27), was chosen bishop of that see A.D. 259, which he held about ten years. He died A.D. 269. Dionysius Alexandrinus (q. v.) was accused before Dionysius of Rome of error as to the person of Christ in his letter to ammonius and Euphranius, and a synod was called by the bishop of Rome to consider the matter, and explanation was made by the bishop of Alexandria. The only fragment we have of the writings of Dionysius Romanus relates to this matter; it is a letter to the African bishops, of which a part preserves a large part in his De Deo, Synod. Nic. c. 26; compare also his De Seminat之中 Dionysius, c. 10. It is given also in Migne, Patrologia Latina, tom. x. See also Hefele, Conc. Bclengegeschichte, i, 222; Dorner, Doctrine of the Person of Christ, Edinb. transl., ii, 182 sq.

Dionysius Exiguus ("the little"), a Scythian by birth (sixth century), studied at Rome, where he became a monk, and gained high repute by his knowledge of Scripture and of the Greek language. Cassiodorus, who was intimate with him, wrote his panegyric in his Institutiones. Literarum, ch. xxii. He was a vehement and unscrupulous "upholder of the see of Rome; he is suspected to have been guilty even of forgery in its support; he first published, and very probably wrote the Canons of the Council of Sardica, and collected the papal decretales from Silicius and Anoexias XI; 419, cited in Clarke, Succession of Soc. Lit., ii, 907. This work was published with his Collection of Canons, made at the request of Stephen, bishop of Salone, which contains the 50 first Apost. Canons (q. v.), the Canons of Nice, Constantinople, Chalcedon, Sardica, and Africa of Africa (ed. Justel, Paris, 1029, 8vo; also given in Biblioth. Jur. Cusan. i, 97). These canons were taken from Greek writers. But his fame rests (and justly) upon his Cypria Paschalina, in which he introduced the name of Christ as the starting-point of computation, and gave birth to our "Christian era," known also as the "Dionysian era." It was a great thought of the "little monk" (whether so called from his dittyness or from his small stature is unknown) to view Christ as the turning-point of the ages, and to introduce this view into chronology" (Schauf, Hist. of Chr. Church, ii, § 67). Dionysius lived to about A.D. 550. His writings are given in Migne, Patrool. Lat. vol. xxviii. See also Odinius, De Scriptoribus, 1406; and Butschick, Gesch. der Kirche, xxvi. See Clarke, Succ. of Soc. Lit. i, 176; Herzog, Real-Encyklopädie, iii, 410; a full account in Cellier, Histoire Générale des auteurs ecclésiastiques, ii, 386 sq.; Hefele's Conc. Bclengegeschichte, i, 222 sq.; and Murdock's excellent note to Mosheim, Church History, b. i, cent. i, pt. ii, ch. ii, § 7. A translation of the remains of Dionysius is promised in the Ant.-Nicene Christian Library, now publishing (1868) at Edinburgh.

Dionysius the Carthusian (called also Dionysus of Ryckel, from his birthplace, or Dionysus of Leuweis, from his family name), was born at Ryckel, near Liège, Belgium, in 1408; studied at Cologne, and wrote in his 80th year a treatise de best et casulis. At 21 (before which age the Carthusians did not admit him) he entered the monastery of Roemond, in Guelders, where he remained 48 years, till his death in 1471. His life was spent in diligent study, and in self-mortification of the strictest kind. His fame as a scholar gave him great influence both within and without the monastery, and obtained for him the title of Doctor Ecstaticus. He wrote rapidly and voluminously: over 100 works are ascribed to him, among which are commentaries on Dionysius Areop., Thomas Aquinas, Peter Lombard, etc.; but the most important, perhaps, is Enarrationes or Commentarii in Socr. Scripta, a commentary on the 24 books of Socrates, 10 vols. fol. Cologne, said to be carefully compiled from the fathers and ecclesiastical writers. See Fabricius, Bibliotheca Lat. vol. iv; Cave, Hist. Lit. (Genev, 1720), appendix, p. 108; Wetter u. Welte, Kirchen-Lehzen, iii, 168; Schröckh, Kirchengeschichte, xxxiv, 117 sq.

Dionysius (Διόνυσος, 2 Mach. vi, 7; xiv, 88, "Bacchus"); in classical writers sometimes Διώνυσος, of uncertain derivation), also called Bacchus (Βακχος, ίονυς, the noyey god; after the time of Herodotus), was properly the god of wine. He is represented as being the son of Jupiter and Semele. In Homer he appears simply as the "frenzied god" (II. vi, 182), and yet "a joy to mortals" (II. xiv, 825); but in later times the most varied attributes were centred in him as the source of the luxuriant fertility of nature, and the god of civilization, and of happiness. Thus Tacitus (Hist. ii, 11) says: 'The Eastern wanderings of Dionysus are well known (Stauro, xii, 7, p. 687), but they do not seem to have left any special trace in Palestine [yet comp. Lucan, de Syrta, 98, p. 886, ed. Bede.]. His worship, however, was greatly modified by the incorporation of Eastern elements, and assumed the twofold form of wild orgies and domestic rites. See Dionysus, s. v. To the Jews Dionysus would necessarily appear as the embodiment of paganism in its most material shape, sanctoning the most tumultuous passions and the worst excesses. Thus Tacitus (Hist. v, 5) rejects the tradition that the Jews worshipped Bacchus (Liberae patriae; compare Pindar, Nect. Cons. iv, 6), on the ground of the "entire diversity of their principles"
 Dioptès (Διοπτής, Ἰονίανόμ., "that fell down from Jupiter"), an epithet applied to the great image of Diana at Ephesus (Acts xix, 84). It is applied in the same way by heathen writers (e.g. άξιόμα νικε- νίχα, Herodian. i, 11; compare Plutarch, Num. 13; Eusebius, Ἰπ. 66 88; see Wetstein, Kunoil in loc. — See Diana.

 Dioscorin'thus (Διοσκορινθος, Valg. Dioscorinus) occurs in 2 Macc. x, 21, as the name of a Greek-Selucid month. Inasmuch as Dus (Diog) is a well-known Macedonian month (the first of the year), which Josephus (Ant. i, 5, 3) says corresponds with the Jewish month of Marchesvanus, the name has been disregarded (see Weisendorf, De fide Maccab. p. 82) as a corruption (through the form Διοσκόρος) for that month (Scaliger, Emend. Temp. ii, 94), and by others as an intercalary month (but see Ideler, Chronol. i, 390). — See Month.

 Dioscōrūs (Διόσκορος), bishop of Hermopolis, end of the 4th century, one of the four Nitrian solitaries (the other three being Ammonius, Theonas, and Eustathius) known as "the tall brothers" on account of their stature. — See Tall Brothers.

 Dioscorus, bishop of Alexandria (+ 454), who succeeded Cyril in that see, A.D. 444. Inferior to his predecessor in learning, he excelled him in ambition, energy, and bitterness. Eutyches (q. v.) taught that there is one nature only of God, compounded of divine and human natures; so that our Lord was not properly either God or man, but a sort of third being between the two. He was deposed for this heresy by a local synod of bishops at Constantinople, under Flavian, A.D. 448. Dioscorus took his side, and induced Theodosius II to call a council at Ephesus (A.D. 449), which, under the direction of Dioscorus, met with the utmost violence against the defenders of orthodoxy, and restored Eutyches. This council has secured the envious title of the "Robber Council." The fourth ecumenical Council of Chalcedon (A.D. 451) condemned Dioscorus and Eutyches, and established the doctrine that in our Lord Jesus Christ there are two perfect and distinct natures, the Godhead and manhood, united in one person, without mixture, change, or confusion (see Chalcedon; Christology).

 At this Council of Chalcedon Dioscorus was accused of gross vices as well as of heresy, was condemned, deposed, and banished to Gangra, Paphлагonia, where, in three years after he died, he was seen. See Landon, Manual of Councils, 120; Hofele, Concilien geschichte, ii, 296 sqq.; Dupin, Ecles. Writers, 5th century; Schaff, Hist. of the Christian Church, iii, § 140, 141; Neander, Church History (Torrey's transl.), ii, 500, 522; Milman, Latin Christiinity, i, 286-316. See Eusebius, Historia Ecclesiastica, ii, 1, 11 sqq.; Suidas, s.v. Dioscorus, i, 101, 7.

 Dioscorus, anti-pope, had been sent as legate by pope Hormidas to Constantinople. He was chosen pope Oct. 15, 529 (on the death of Felix IV), by a number of bishops; but, about the same time, Boniface II was elected and sustained by Athalaric the Goth Di- escors died within a month of his election, Nov. 12, 529, and Boniface excommunicated him, even after his death — a sentence that was annulled afterwards by pope Agapetus I, Council of Trier, History of the Popes, i, 287.

 Dioscori (Διοσκορι, i. e. Ἰονιανός, "Castor and Pollux," Acts xxviii, 11), the twin sons of Jupiter by Leda (Homer, Hymn, 17; Hygin. Fab. 77; according to Homer, Ódys., xi, 297, the sons of Leda and Tendareus). They were chiefly invoked by the Greek and Roman sailors as tutelary deities of mariners, and also worshipped as propitiatory offerings. Theocritus, id. xxii, 17; Catull. ixxv, 65; Lucian, Deor. dial. xxvi, 2). In the heavens they were twin stars, regarded as auspicious (comp. παίρεις, Homer, Ἰονιανός, xxxii, 6; Δίαλος, Var. Inst. i, 30; "lucidum sidus," Diodor. Sic. iv, 43; Ovid, Fast. v, 720). They were sometimes thought to appear in a delirious flame at the mast-head during storms (Plutarch, Naut. Philos., ii, 18). Their image formed the "figure-head" of the Alexandrian vessel (giving name to it) in which Paul sailed from Melita to Rome (Acts xxviii, 11). Compare Str. See Scheffer, De myst. nautic. ext. p. 372 sqq.; Enchol, De tutelis et insignih. nave. (L. B. 1771); Hassuer, De urbis, Achaeis et Atheniis in Ital. de perforatione (Brem. 1716); Kunz, De veiculo navis Alec. (Jen. 1784). Comp. Castor (and Pollux).

 Coin with the Figure of the Dioscuri.

 Diospilía. See Thebes.

 Diospolis, Synod of (called by Augustine a "Council of Palestine," and which Jerome, in a letter to Augustine, calls miserabilis Synodus Diospolitana), a council of fourteen bishops held at Diospolis, the ancient Lydda, A.D. 413, to treat of charges of heresy brought by Heros, bishop of Arles, and Lazarus, of Aix, against Pelagius. Pelagius himself was present, but not Heros or Lazarus. Their memorial was read, containing many propositions of Pelagius; among them, that children dying without baptism are saved, and enjoy eternal life, although they do not enter the kingdom of heaven; that the grace of God is not necessary for the performance of each particular good work; that man's free will, with the law and Gospel doctrine, is sufficient; that grace is given according to our merits, and depends upon man's will. Pelagius confessed some of the propositions attributed to him to be really his, but he denied the sense which his accusers put upon them, maintaining that they were capable of being understood in a sense agreeable to catholic truth (Landon, Manual of Councils, 295). The synod acquitted Pelagius; but, as Augustine justly remarked of the decision, it was not "heresy that was there acquitted, but the man who denied the heresy." See Schaff, History of the Christian Church, iii, § 148; Hofele, Concilien geschichte, ii, 96 sqq.

 Diotrophēs (Διότροφης, "devourer," a person who seems to have been one of those teachers condemned by the apostle John in his third epistle, A.D. cir. 90. He appears to have been a presbyter or deacon, probably the former. He refused to receive a former letter sent by John, thereby declining to submit to his directions or acknowledge his authority, moreover circulating malicious slanders against the apostle, and exercising an unprincipled, pernicious influence (παθολόγητος) in the church (3 John 9, 10). See Gates. Neander suggests (Planting and Training, ii, 73) that he may have been of an ultra-Pauline party, the forerunner of Marcion (q. v.).

 Diphath. See Riphath.
Under the name of Christianus Decimviri he wrote, *Orthodoxie orthodoxorum* (1871); *Papismus protestantianum spongulam* (1898); *Fatum fatum* (Amst. 1710); *Glaub des Evangelisch Jesus Christi* (Stock. 1683); *Der Regentenpiegel, ein lateinisches Gedicht; - Personalia* (an autobiography, no date). His writings were collected under the title *Erfreutter Weg zum Frieden mit Gott u. allen Creationen* (Amsterdam. 1709; new collection 1748, 8 vols.); - Ackermann, *Uberraschung* (Leips. 1761); Hoffmann, *Die im Schatten* (Leips. 1828); - Kahnis, *German Protestantism*, p. 126; Schröck, *Kirschgescichte*, pt. ii., viii, 808 sq.; Herzog, *Real-Encyd.* iii, 42.

**Diptychs.** Church registers, so called because they were originally tablets folded in two leaves (diptycha), wherein, among the early Christians, were recorded the names of bishops and other brethren, whether deceased or living, who were entitled to have their names mentioned in the celebration of the Liturgy from having rendered any signal service to the Church. When a member of the Church was excommunicated, his name was erased from the diptychs. They are still in use in the Greek Church.

The diptych of antiquity consisted of two tablets of wood, ivory, or precious substance, which folded together, and contained a coating of wax on the interior. On this wax were written at first private letters. In this case the diptych was bound with a cord, and sealed with wax. Later, the emperors, consuls, and other magistrates, to celebrate their elevation to office, sent diptychs to their friends, containing on the exterior of the tablets an engraving of their portrait, or of some circumstance connected with their official promotion. They were also employed as public registers. The sacred diptychs contained on one side names of the living, on the other of the dead, which were rehearsed during sacrifices. When Christianity became triumphant, diptychs were used to contain liturgical subjects and scenes. Even the poorest traveller or pilgrim used them to hold the images of sacred persons, before which he bowed in prayer several times a day. In Christian art, a diptych is an altar-painting in two pieces, which may be folded together, and which contain paintings on both the interior and exterior surfaces.—Siegel, *Cristl.-kirchliche Altarth. i*, iii, 259; Bingham, *Orig. Eccles. x, 2, 6, and xv, 8, 17; Jamieson, *History of our Lord in Art*, i, 21.

**Director of the Conscience (or spiritual director),** a title often given in the Roman Church to the priest acting as confessor, with power of absolution.

**Directory.** I. a set of rules for worship and ordination, drawn up to take the place of the Liturgy, or Book of Common Prayer, by the Westminster Assembly of Divines. The Directory was framed in 1648, ratified by Parliament Jan. 8, 1644, and adopted by the Scottish General Assembly in 1645. In the Act of 1644, it is entitled a *Directory for the Public Worship of God throughout the three Kingdoms of England, Scotland, and Ireland*. The name ordinance repealed the *Collects of Edward VI*, by which acts of Edward VI. the English Church was established, and forbade the use of it within any church, chapel, or place of public worship in England or Wales, appointing the use of the Directory in its stead. This ordinance, indeed, never received the royal assent, and it was a long time before it succeeded in abolishing the established worship. In some parts the Directory was accepted by the people in general; in other places it was rejected; some ministers would not read any form, others read one of their own. The Parliament, therefore, in the ensuing summer, called in all the *Books of Common Prayer*, and imposed a fine upon such ministers as should read any other form than that imposed by the Directory. The penalty for violation of the Directory was £5 for the first offence, £10 for the second, and a year's imprisonment for the third; for non-observations of the Directory, 40¢. Any one who should
preach, write, or print anything in derogation of the
Directory was to forfeit not less than £5, nor more than £50; and all approving books remaining
in parish churches or chapels were ordered to be carried to the committee of the several counties within a
month, there to be disposed of as the Parliament

The Directory prescribes no form of prayer, nor any
response on the part of the people, except Amen. It
enjoins that "the people shall enter the churches reverently, and in a grave and becoming manner, with-
out adoration, or bowing towards one place or another; that the minister is to begin with prayer, to which all present are to give due attention, and to abstain from all
words or other assurances than that the reading of
the Scriptures in the congregation, which is a part of the worship of God, be performed by the pas-
tors and teachers; that all the canonical books of the
Old and New Testament, but none of those called
apocryphal, be publicly read in the vulgar tongue, and
in the best allowed translation; that the portion to be
read at once be left to the minister, so that commonly
one chapter of each Testament be read at every meet-
ing; that all the canonical books be read over in order,
that the people may be the better acquainted with the Scriptures; that when the minister shall judge it ne-
necessary to expound any part of what is read, he is not to
merely comment upon it, but also give the whole or
part thereof to be ended, and that after reading the Scripture and
singing the psalm, the minister who preaches is to be
begin with prayer. It then prescribes heads for the
prayer; enjoins that the subject of the sermon be a
word of Scripture, which teaches some principle or head of
religion, or is otherwise suitable to the occasion; and
recommends that the introduction to the text be
brief and perspicuous, and drawn from the words or context, or from some parallel passage of Scripture.
In dividing the text, the minister is to regard the order
of the matter rather than that of the words; he is
not to burden the memory of his hearers with too many
divisions, nor perplex their understandings with
legal phrases and terms of art; he is chiefly to insist on
those doctrines which are principally intended, and
most likely to edify his hearers; he is not to propose
nor answer any unnecessary objections, but to confute
error, and satisfy the judgments of his audience; and
he is to avoid depending upon quotations from ecclesiast-
ical or other human writers, ancient or modern, etc.
The Directory recommends the use of the Lord's Pray-
er as a perfect model of devotion. It forbids private or
lay persons to administer baptism, and enjoins it to
be performed in the face of the congregation. It or-
ders that the communion-table at the Lord's Supper
be so conveniently placed that the communicants may
sit about it. It enjoins that the Sabbath be observed with
the greatest strictness, both in public and private;
that marriage be solemnized by a lawful minister of the
word, who is to give counsel to, and pray for the parties;
that the minister teach the people not only in public,
but also in private; that the people be visited by the
minister, under whose charge they are, and who shall administer spiritual good to their souls; that the dead
be buried without any prayers or religious ceremonies;
that days of fasting be observed when the judgments of God are abroad in the world, or when some impor-
tant blessings are desired; that the season of Thanksgiving for mercies received be also kept; and, lastly, that as it is the duty of Christians to praise God publicly, the
whole congregation join together in singing psalms. In an Appendix it is enjoined that all festivals, vulgar-
ly called holy days, be abolished, and that no day be observed which is not one of the Lord's days; and
is capable of any holiness under pretence of consecra-
tion, or subject to pollution by any superstition for-
merly employed, the places of worship now used be still continued."

This Directory, which is still partly, but by no
means strictly, adhered to by Presbyterians in the
British Isles, and is given in full in Neil, History of the Puritans, appendix viii.; see also Collin, Church

II. The Presbyterian Church in the United States
has a Directory for Worship, in fifteen chapters, which
was amended and ratified by the General Assembly
in 1821, and may be found appended to The Constitu-
tion of the Presbyterian Church (Philadelphia, Presby-
terian Board).

III. In the Roman Catholic Church an annual Di-
rectory (Directorium) for the clergy is published, which
provides rules of ceremonial according to the calendar for
the year, as settled by the bishop of the diocese. The
Ritualists in England have imitated this in their so-
called Directorium Anglicanum.

Dirge, a funeral hymn, derived from the Lat. Di-
reg, the first word of the first antiphon in the office
called Officium Defunctorum, which is Dirige, Domine Deus meus, in conspectu tuo, vivam meam.—Procter. On
Common Prayer, p. ii, ch. v., § 5; Ritualis Romaeum,
Officium Funerale, ad Mutil. Antiphona.

Discalceati, or Barefooted Monks and
Nuns, is the generic name of several religious orders
whose members wear only sandals of leather, wood, or
knitting-work. The Franciscans have particularly
meant by the word, which have been divided into four orders or provinces, or provinces, or
are, 1. The barefooted monks of St. Augustine, founded
at Talavera by command of Philip II, and which after-
towards spread throughout France and the East and
West Indies. 2. The barefooted nuns of St. Augustine,
established in 1589 by a Spanish maid of honor, Fran-
cescina Grillo, in her native town of Casale at Mad-
rid. 3. The barefooted Ladies of Mercy for the liber-
tion of prisoners, established at Bisco and Amoraya,
Spain, in 1604, by Peter John of Baptista. 4. The
barefooted Carmelites, male and female (barefooted monks of the Cross, at Avila), founded in 1563 by The-
resa, and soon spread over the whole of Spain, Portu-
gal, France, Italy, Germany, and Russia. A part of
these, not belonging to Spain, are called Congregation of the barefooted Carmelites of St. Elias.
5. The bare-
footed Trinitarii, established at Val de Peñas, in 1596,
by John Baptiste de la Conception: their dress is
white, with a red or blue cross, and a brown cloak and
hood; they may be distinguished from ecclesiastical
or other human writers, ancient or modern, etc.
The Directory recommends the use of the Lord's Pray-
er as a perfect model of devotion. It forbids private or
lay persons to administer baptism, and enjoins it to
be performed in the face of the congregation. It or-
ders that the communion-table at the Lord's Supper
be so conveniently placed that the communicants may
sit about it. It enjoins that the Sabbath be observed with
the greatest strictness, both in public and private;
that marriage be solemnized by a lawful minister of the
word, who is to give counsel to, and pray for the parties;
that the minister teach the people not only in public,
but also in private; that the people be visited by the
minister, under whose charge they are, and who shall administer spiritual good to their souls; that the dead
be buried without any prayers or religious ceremonies;
that days of fasting be observed when the judgments of God are abroad in the world, or when some impor-
tant blessings are desired; that the season of Thanksgiving for mercies received be also kept; and, lastly, that as it is the duty of Christians to praise God publicly, the
whole congregation join together in singing psalms. In an Appendix it is enjoined that all festivals, vulgar-
ly called holy days, be abolished, and that no day be observed which is not one of the Lord's days; and
is capable of any holiness under pretence of consecra-
tion, or subject to pollution by any superstition for-
merly employed, the places of worship now used be still continued."
DISCERNING

Minorities, they founded the Congregation of Narbonne, and the Spiritual Congregation, which were suppressed in 1518 by the Inquisition, part of them being put to death, and the others imprisoned for life. The name of the De Asia Maria. 15. Female Cocumachines. 16. Charis-

osis of the Stricter Observance, established at Albano in 1631 by Franciscus of Jesus Maria, and whose rule was adopted in some Italian convents. 17. Female anchorettes of St. Peter of Alcantara, established in 1616 at Ja Fassa by cardinal Francis Barberini, are found only in Italy. 18. Barred from brethren and sisters of the 8th order of St. Francis (gilt Scalzi), in Sicily, Dalmatia, Istria, etc.; established in 1540 by Jacob of Cugublo, in the convent of La Trope. They extended rapidly, but were in 1602 united to the Congregation of the 8th order of Lombards. 19. Nuns of the 8th order of St. Francis of the Stricter Observance in France (les Picpus), established in 1598 by Vincent Mussard at Franconville, and endowed with the convent of Picpus, at Paris, in 1601. They devoted themselves to the erection and management of hospitals; abolished in 1789, they were reorganized by the abbé Condrin in 1814, sanctioned by pope Pius VII, and in 1823 were approved by the papal briefs in the bull of the Pope in 20. Recollect nuns of the 8th order of St. Francis, founded in 1638 at Limburg by Johanna van Nierich, who gave them very rigid rules: they were abolished in 1789. 21. Hospitallers of the 8th order of St. Francis (Minims, etc.), established at Madrid in 1567 by Bernhard of Siena, admitted to the Congregation of the 8th order of Portugal, Spain, and the Netherlands, and have but lately disappeared. 22. Female Choristers of Noli, 8th order of St. Francis, established by count Nicholas of Orsini and Spoleto in 1554 for his own choristers: dress, gray, with a white belt, streamer, and gray veil; they fasted on fast days. 23. Hermits of Monte Lucca, founded in 1519; the only female anchorettes at Spoleto in Umbria. 24. Hermits of St. John the Baptist, established in the bishoprics of Metz, Cambrai, and Bellai in 1630 by Michael of Sabina; they soon numbered 100, but disappeared in 1789. 25. Generally, all the congregations of regular Anchoresses, and of the Minorities of the Observance.—Pierre, s. v. Barfussermönche.

Discerning of Spirits (δίακρισις φνευμάτων, discrimination of spirits, 1 Cor. xii. 10). This expression is now usually understood to mean a high faculty, enjoyed by certain persons in the apostolic age, of intuitively probing the heart and distinguishing the secret dispositions of men (compare 1 Cor. xiv. 29; 1 John v. 1). It appears to have been one of the gifts peculiar to the apostles, and was specially necessary at a time when the standards of doctrine were not well established or generally understood, and when many deceivers were abroad (2 John ii, 7). This faculty of supernatural insight seems to have been exercised chiefly upon those who came forward as teachers of others, and whose real designs it was important that the infant churches should know. Authentic instances, however, do not appear to show the method of its exercise, although the cases of Ananias and Sapphira (Acts v, 3, 9), of Simon Magus (viii, 21), and of Elymas (xiii, 9), are cases in point. See Gifts, Spiritual.

Disciple (Lat. discipulus, s scholar, from discere, to learn: Matt. x, 24), one who professes to have learned from a Teacher, and is maintaining them on that other's authority. In the New Testament it is applied principally to the followers of Christ; sometimes to those of John the Baptist, Matt. i, 14; and of the Pharisees, Matt. xxii, 16. It is used in a special manner to point out the twelve, Matt. x, 1; xi, 1; xx, 17. A disciple of Christ may now be described as one who receives and maintains upon his_AFTER_ sacrifice, imbibes his spirit, and imitates his example (Farrar, Bibl. and Theol. Dict. s. v.). "There are three senses in which men are sometimes called 'disciple of any other person': (1) incorrectly, from their simply maintaining something that he maintains, without any profession or proof of its being derived from him. Thus Augustine was a proselyte, and so was Martin, yet no one supposes that the one derived his belief from the other. It is very common, however, to say of another that he is an Arian, Athanasian, Socinian, etc., which tends to mislead, unless it is admitted, or can be proved, that he learned his opinions from this or that master. (2) Then certain persons grow to have adopted the views of another, not, however, on his authority, but from holding them to be agreeable to reason or to Scripture, as the Platonic, and most other philosophical sects—the Lutherans, Zuinglians, etc. (3) When, like the disciples of Jesus, and, as it is said, of the Prophets, and both the adherents of certain churches, they profess to receive their system on the authority of their master or Church, to acquiesce in an 'ipse-dixit,' or to receive all that the Church receives. These three senses should be carefully kept distinct."

Disciples of Christ, or, as they prefer to call themselves, "The Church of Christ," a body of Baptists sometimes called by their opponents "Campionites," assumed a distinct ecclesiastical organization about the year 1827. In 1808 Thomas Campbell migrated from Ireland, and settled in Western Pennsylvania as a minister of the old school and the known as the Brush Run Church, Sept. 10, 1810. Thomas Campbell was one of the original elders of this congregation, and by it his son Alexander was first ordained to the ministry. It was not long till the question of baptism engaged their attention, and, after a thorough investigation among themselves and others, by himself and son, with five others, reached the conclusion that the Scriptures taught the "immersion of believers." Accordingly, on the 2d of June, 1812, they were immersed by a Baptist minister. In 1815 they had increased to some five or six congregations, when they attached themselves to the Redstone (Baptist) Association, stipulating, however, in writing, that no "terms of union or communion other than the Holy Scriptures should be required." To many of the Baptist preachers this union was distasteful from the first, and it finally resulted in the withdrawal of these congregations, who then joined the Mahoning (Ohio) Association, which was nearly accordingly with the others, which finally became thoroughly identified with the movement.

In 1823 Alexander Campbell established the "Christian Baptist." Through this monthly, and several public oral debates on baptism, and extensive tours of preaching, he spread the new principles and maintained them on that other's authority. The New Testament is applied principally to the followers of Christ; sometimes to those of John the Baptist, Matt. i, 14; and of the Pharisees, Matt. xxii, 16. It is used in a special manner to point out the twelve, Matt. x, 1; xi, 1; xx, 17. A disciple of Christ may now be described as one who receives and maintains upon his_AFTER_ sacrifice, imbibes his spirit, and imitates his example (Farrar, Bibl. and Theol. Dict. s. v.). "There are three
Discipline (Lat. disciplina, instruction, learning), a term used ecclesiastically to denote the application, in the Church, of the principles of Christianity. "Faith in the testimony of God, and obedience to the commandments of Christ, are the only bond of union." The subtle speculations of theology are not to be forced upon the faith or conscience of Christians, and Bible themes are to be presented in Bible terms. For objecting to many of the terms of theology, such as "eternity," "eternally begotten," "co-essential," and "consubstantial," they have been by some charged with being "Unitarians." But on this subject there is now perhaps no respectable doubt of their entire "orthodoxy." They break the loaf, in commemoration of the sacrifice of the Saviour, every first day of the week. This practice, they contend, has the warrant of apostolic example, and is therefore of divine obligation. It is claimed that it was the chief object of the meetings of the first Christians on the Lord's day, and its peculiar sanctification. They hold that faith and repentance are the divinely-appointed antecedents to baptism, and that the private, the public, and the duty of the Christian minister to say to all who believe and repent, "Be immersed, every one of you, in the name of the Lord Jesus Christ, for the remission of sins, and you shall receive the gift of the Holy Spirit." They are congregational in their organization, and recognize three classes of officers: 1, elders, presbyters, or bishops; 2, deacons; 3, evangelists. These last constitute the itinerating ministry or the missionaries of the Church, and are supported by voluntary contributions. The Disciples acknowledge the obligation to provide for the preaching of the Gospel to be of the highest kind, and are very active in evangelical labor. In questions of speculative opinion they allow the widest differences, but contend earnestly for the unity of a practical acknowledged, meaning of one faith, one Lord, one immersion, one hope, one body, one spirit, one God and Father of all. On the subjects of the atonement, the resurrection, and the future judgment, they hold the common faith of all Christians.

III. The Disciples are now estimated as about 500,000 in numbers. They are distinguished for their interest in education, and have a large number of academies and seminaries, and several colleges of high standing. Among these the most prominent are Bethany College, founded by A. Campbell, and presided over by him until his death; Kentucky University, and the North-western Christian University, at Indianapolis; Eureka College, Illinois, and Hiram College, Ohio. They have 25 periodicals, viz. 9 weeklies, 15 monthlies, and 1 quarterly. Of these, two (monthlies) are published, one in Great Britain and one in Canada; all the United States. The most representative of the latter are The Millennial Harbinger (monthly), Bethany; M. E. Lard's Quarterly, Lexington, Ky.; The Review, Cincinnati, Ohio, and The Standard, Cleveland, Ohio (weekly).

DISCIPLINE

dle of the third century, in all disciplinary proceedings of the Church. By the beginning of the fourth century, the Church had become the depository of causes which have been briefly mentioned, and which may be more fully specified hereafter, was greatly abridged, and shortly was wholly lost. This fact illustrates the progress of the ecclesiastical hierarchy. While the right of the laity is yet undisputed, the right of discipline is clearly asserted and occasionally admitted, the people occupying a neutral position between submission and open hostility. But from disuse to denial, and from denial to extinction of neglected privileges and powers, the descent is natural, short, and rapid. From about the middle of the fourth century, according to the usual interpretation, the bishops assumed the control of the whole penal jurisdiction of the laity, opening and shutting at pleasure the doors of the Church, inflicting sentence of excommunication, and prescribing at their discretion the austerities of penance, and again absolving the penitents, and restoring them to the Church by their own arbitrary powers. The people accordingly, no longer having any part in the trial of offenses, ceased to watch for the purity of the Church, convivial at offenses, and conceded the offender, not caring to interfere with the prerogative of the bishop, in which they had no further interest. The speedy and sad corruption of the Church was the natural result of this loss of authority and its arbitrariness. Nor was it to be doubted that this was one efficient cause of that degeneracy which succeeded" (Coleman, Apolostical and Primitive Church, chap. v.). "This transition changed essentially the relations of the officers to the members of the Church, and the condition of Church membership. The officers of the Church, instead of receiving authority and office from that body for their service, claim authority and commission from God for the exercise of their functions. They are now the rulers, not the servants, as at the beginning they were, of the Church. A union with the Church by a public profession is a transaction not so much between the Church and the professing Christian, as between him and the bishop. The contracting, covenanting parties are the bishop and the believer. The sovereign authority of the Church is merged and lost in that of the priesthood. Ecclesiastical discipline naturally resolves itself into the power of the priestly person as a priesthood, in whom alone authority is vested for the punishment of offenses" (Coleman, Ancient Christianity, chap. xxii.).

II. In the Middle Ages, and in the Roman Church, the system of penitential discipline, for the treatment of persons confessing their sin, grew up into full proportions. See Penance; Penitential Discipline. In the Roman Church, and among some Protestant writers, the word discipline, standing alone, implies only penitential, and not punitive discipline.

III. In the Modern Church.—The exercise of punitive discipline in the modern Church is found to be impossible, or nearly so, in state churches. In the Church of England, and the Protestant state churches on the Continent of Europe, it is almost unknown. Where citizens, as such, are ipso facto Church members, to punish the Church member is to affect a man's citizenship.

On the other hand, in Free churches, whether in Europe or America, discipline by reproof, censure, suspension, or excommunication is not only possible, but is actually practiced very generally. The following passage contains principles on which the Free Protestant churches of modern Christendom generally act with regard to discipline.

"God's judgment has been regarded as one of the notes or marks of a true Church. Our Protestant forefathers charged the Church of Rome with being greatly wanting in this, and scarce deserving the name of Church by reason of such want. Discipline relates to the laws of any society, and the penalties of disobeience. All institutions must have laws in order to be good governments; and all individuals, and penalties. Many of them were expressly appointed by Christ himself. Others, in conformity with the same, have from time to time been added by the Church. To obey the powers ordained of God, whether civil or ecclesiastical, when exercised according to his revelations and his ordinances, is the duty of every Christian. In their ordination, promise faithful obedience to those who are placed over them, and who exercise their authority according to prescribed rules. Due respect also is required to their godly admonitions and judgments. This obedience and respect are to be shown not merely to the persons who may agree in sentiment or sympathize in theological views and opinions also from whom we differ; and this may be done without any improper sacrifice of Christian liberty or right of private judgment. As to the rules and regulations of the Church, whether the observance be specially required by rulers or not, the true Christian will hold himself bound to render it. He will not select such of them as he most approves, or as most accord with his doctrines, and scrupulously observe these, making such observance a test, and denouncing those who differ from him; but he will resolve to obey them all, out of respect to the authority enjoining them. And yet, if the prince God himself, preferring mercy to sacrifice, allows even his holy Sabbath to be violated as to its letter, and sacrifices and offerings to be withheld, so a wise discretion has ever been conceded to God's ministers in the observance of inferior rules, or in regard to things become obsolete, having due reference to times, places, and circumstances. Wherever such discretion has not been allowed or exercised, the result has been that men have strained at the gnat and swallowed the camel; have tithed mint, anise, and cummin, and neglected the weightier matters of the law. It should always be remembered that, as the Sabbath was made for man, and not man for the Sabbath, so rubrics and canons were made for the Church, and not the Church for them" (Bishop Meade, True Churchman).

In Presbyterian churches, discipline is exercised by the Session (q. v.), an appeal lying to the Presbytery, and thence to Synod and General Assembly. In the Federal Form of Government adopted by the Protestant Episcopal Church in the United States of America (book ii.), the general principles of discipline are laid down as follows: "I. Discipline is the exercise of that authority and the application of that system of laws which the Lord Jesus Christ has appointed in his Church. II. The exercise of discipline is highly important and necessary. Its ends are, the removal of offenses; the vindication of the honor of Christ; the promotion of the purity and general edification of the Church; and also the benefit of the offender himself. III. An offence is anything in the principles or practice of a Church member which is contrary to the word of God, or which, if it be not in itself a sin, is есть неносиця to sin, or mar their spiritual edification. IV. Nothing, therefore, ought to be considered by any judicatory as an offence, or admitted as matter of accusation, which cannot be proved to be such from Scripture, or from the regulations and practice of the Church, founded on Scripture, and which doth or may doth evil which discipline is intended to prevent. V. The discipline of discipline in such a manner as to edify the Church requires not only much of the spirit of piety, but also much prudence and discretion. It becomes the rulers of the Church, therefore, to take into view all the circumstances which may give a different character to conduct, and consider it more or less as a sin, and which may, of course, require a very different mode of proceeding in similar cases, at different times, for the attainment of the same end. VI. All baptized persons are members of the Church, are under its care,
DISCIPLINE, BOOK OF

and subject to its government and discipline; and
when they have arrived at the years of discretion, they
are bound to perform all the duties of Church mem-
bers; and all Offences and Censures, whether private or public,
to which of which appropriate modes of proceeding be-

In Congregational churches, discipline is adminis-
tered by the Church. For the principles and meth-
ods of Congregational discipline, see Puncheon, View
of Congregationalism (1844), 177 sq.; Dexter, On Con-
gregationalism (1865), 250 sq.

In the Methodist Episcopal Church an accused
member is brought to trial before a committee of not
less than five, who shall not be members of the Quar-
terly Conference. In the selection of the committee,
the parties may challenge for cause. The pastor pres-
ides at the trial. If the majority find him guilty,
the pastor executes the sentence of expulsion. Ap-
peals are allowed to the Quarterly and Annual Con-
ferences (Discipline, part iii, chap. 1).

In the Constitutions of the Reformed churches of
America (German and Dutch), the principles and rules
of discipline laid down are very similar to that of the
Presbyterian Church above cited. See Constitution
of the German Reformed Church (1851), part iii, p. 32;
Constitution of the Reformed Dutch Church of North
America (Phil. 1840), chap. iv, p. 32.

Literature.—On the discipline of the ancient Church,

iii, 292 sq. (N. Y. ed.); and the references under PRE-
ANCE; PENITENTIAL DISCIPLINE.

Discipline, General, see Hooker, Eccles. Polity;
Watson, Theological Institutes, ii, 572 sq. (N. Y.
ed.); Dwight, Theology (New Haven, 1836), iv, 86 sq.;
Walker, Church Discipline (Bost. 1834, 18mo); Hill,
Pastoral Function in the Church (Lond. 1855, chap. i);
James, Church-members' Guide; Porter, Compendium
of Methodism (N. Y. 12mo); and works on pastoral
and practical theology generally. See also DISCI-
PLINE, BOOK OF; EXCOMMUNICATION; ECCLIESIA-
STICAL POLITY.

Discipline, Book of, in the Methodist Episco-
pal Church, is a volume published quadrennially, af-
after the sessions of the General Conference (q. v.),
entitled The Doctrines and Discipline of the Methodist
Episcopal Church. It is divided into six parts: i.
The History of the Church; ii. The Discipline of the Church; iii. Administration of Discip-
line; iv. Ritual; v. Education and Benevolent Insti-
tutions; vi. Temporal Economy. All but the consti-
tutional portions (see Restrictive Rules, in pt. ii, ch. i, § 1) are liable to change under the authority of the General Conference. For the modifications which the book has undergone, see Emory, History of Discipline, (N. Y. 1860, 12mo); see also Baker, Guide to Adminis-
tration of Discipline (N. Y. 16mo).

Discipline, First Book of (in the Scottish
Church, was drawn up by the Scottish Reformers in
1660, and contained the order and government of the
Church of Scotland. It was prepared by Knox, Win-
rant, Snare, and Gouge. Though approved by the
Assembly, it was not ratified by the
Privy Council.—Edie, Eccles. Cyclopedia, s. v.

Discipline, Second Book of, was sanctioned by
the Assembly in 1578. Though not then ratified formally by Parliament, it is regarded as the standard
book of the Scottish Kirk, and is held in high estima-
tion for its views of administration and order by all
Presbyterians. The Second Book of Discipline was in-
scribed in the Assembly of 1642, sworn to by
the national covenant, revised and ratified by the As-
sembly, 1658, and by many other acts of Assembly,
and according to which the Church government is es-
established by law, A.D. 1592 and 1690.—Edie, Eccles.
Cyclopedia, s. v.

Discipline of the Lash, or scourge, the name
given (from the instrument used) to personal morti-
cication or flagellation, inflicted generally voluntarily.
The oldest religious discipline on record occurs
amongst the E. Egyptians, who, when they had sacrificed
an ox to Isis on the day of her grand festival at Bu-
siris, stuffed the carcass with fragrant gums and fruits,
and bound it to a post during the burning of the sun (ii, 40), "they all beat themselves;" and again, "a
prodigious number of both sexes beat themselves, and
wait during the sacrifices; but I am not prepared to
say in whose honor they beat themselves." The ci-
maarlyrivous of the Spartans, in honor of Diana Orthia
the (next earliest discipline with which we are ac-
quainted), was by no means voluntary. The boys who
were compelled to submit to it at first were free-born;
afterwards, in wiser times, they were selected from
among the children of slaves (Plut. de Mor. Laced.).
Cicer, who was a personal witness of this savage cus-
tom, has left a fearful account of the cruelty of the tortures and the fate of the youths, who sometimes
endured even to death (Tusc. Quaest. ii, 14). Philo-
stratus, in his life of Apollonius Tyanaeus, has spoken
of certain philosophers who were accustomed to dis-
cipline themselves; Artemidorus says the same of the
Thracians, and Apuleius of the Syrians. The Roman
Lupercalia, according to Plutarch, were always undertaken by men who had been condemned to the
thong from the hope of fertility, still lingered in the
Eternal City long after the establishment of Christianity, and it was not till the close of the
fifth century that pope Gelasius succeeded in ex-
pelling this last remnant of paganism.

Before the 31st century the discipline of the lash
had been confined to only a few sects or individuals;
but about that time the custom was sanctioned by
authority, and a code was framed estimating the precise
value of each separate infliction as a commutation for
sin. A year of penance amounted to three thousand
lashes; and the celebrated ascetic, Dominicus Loricu-
us, the cave-rider, so named because, except while un-
dergoing discipline, he always wore a shirt of mail
next his skin, frequently performed a penance of 100
years, and would continue flogging himself without
cessation while he repeated the Psalter twenty times
over; 'which,' says his friend and biographer, cardi-
nal Peter Damian, 'filled me with anguish and hor-
ror when I heard it.' The self-tormenting penances of
St. Dominic may be found in Flurey, Hist. Eccl., xliii, 96. His usual accomplishment to each sin-
gle psalm was 100 lashes; so that the whole Psalter,
with 15,000 strips, equalled five years' penance.
St. Dominic's allowance, therefore, amounted to the
100
years. If he was prevented by any accident from
flogging himself as he wished, he used to beat his head
and legs unmercifully."

About 1260 public associations sprang up in Italy
for the purpose of discipline, under the name Flagel-
lantes (q. v.).

Sometimes discipline was carried to an excess
more extravagant than that of St. Dominic himself, if
we may judge from the laws of the Visigoths, one of
which (lib. vi, tit. 5, sec. 8) bears the following for-
midable heading: "Si indicet discipulam perrueram
mori de flagello contumeliat—"if death should happen
from undue severity. Sometimes it might be received
by deputé; thus, also, namely, that Henry IV of France was permitted to be reconciled to
the Church when he adjured the errors of Protestant-
ism.
D'Oeust and Du Perron, both of whom were
wards obtained cardinal's hats, were deputed to sue
the discipline from the Pope himself, who gave them
the power to enter a church on pain of excommunication, they
were allowed to keep their coats on, and they reported
that his holiness struck lightly. The narrative of this
transaction was not inserted in the bull of absolution.
class also belongs the singular disease called the mol d'Aleppo, or "Aleppo button," a species of scion, which is confined to Aleppo, Bagdad, Aintab, and the villages on the Segour and Kowick (Russell's Nat. History of Aleppo, ii. 290). The Egyptian is subject to an eruption of red spots and pimples, which cause a troublesome smarting. The eruption returns every year towards the end of June or beginning of July, and is on that account attributed to the rising of the Nile (Vonney, i. 231). Malignant fevers are very frequent, and of this class is the great scourge of the East, the plague (q. v.), which surpasses all others in its virulence and contagiousness. The Egyptian ophthalmia is prevalent throughout Egypt and Syria, and is the cause of blindness being so frequent in those countries. See BLINDNESS. Of inflammatory diseases in general, Dr. Russell (l. c.) says that at Aleppo he has not found them more frequent, nor more rapid in their course than in Great Britain. Epilepsy and diazzism of the mind are commonly met with. Melancholy monomaniacs are regarded as sacred persons in Egypt, and are held in the highest veneration by all Mohammedans. See LUNATIC.

The spermatic issue mentioned in Prov. xv, 5, cannot refer to the seminal fluid itself, as has been supposed by Michaelis and Hebenstreit, for the person who exposes himself to infection in the various ways mentioned was only unclean until the evening, which is far too short a time to allow of its being ascertained whether he had escaped contagion or not. Either, then, the law of purification had no reference whatever to the contamination of the disease (which is hardly admissible), or the disease alluded to was really not contagious. See ISSER.

The disease of Jehoram (q. v.), spoken of in 2 Chron. xxii, 18 (comp. the similar case of Herod, Acts xix, 29), is probably referable to chronic dysentery, which sometimes occasions an exudation of fibrine from the inner coats of the intestines. The fluid fibrine thus exuded coaugulates into a continuous tubular membrane, of the same shape as the intestine itself, and as such is expelled. The ancient name of the disease has been given by Dr. Good under the name of diarrhoea tubularis (Study of Med. i, 287). A precisely similar formation of false membranes, as they are termed, takes place in the windpipe in severe cases of croup.

The malady of Nebuchadnezzar (q. v.), alluded to in Dan. iv, 38, was a species of melancholy monomania, called by medical authors sope, or more commonly lecanthropia, because the translation into a wolf was the most ordinary illusion. Esquirol considers it to have originated in the ancient custom of sacrificing animals. But, whatever effect this practice might have had at the time, the cases recorded are independent of any such influence; and it really does not seem necessary to trace this peculiar hallucination to a remote historical cause, when we remember that the imaginary transformations into inanimate objects, such as glass, butter, etc., which are of every-day occurrence, are equally irreconcilable with the natural instincts of the mind. The same author relates that a nobleman of the court of Louis XIV was in the habit of frequently putting his head out of a window, in order to satisfy the urgent desire he had to bark (Esquirol, Maladies Mentales, i, 622). Calmet informs us that the nuns of a German convent were transformed into cats, and went mewing over the whole house at a fixed hour of the day.

DISH

CRUSE; PAN; PITCHER; FLAGON, etc. Numerous bronze dishes have lately been discovered by Layard and others in the Assyrian mounds, some entire and others in fragments, which show a high degree of elegance and skill (Layard, Nineveh and Babylon, London, 1854). In ancient Egypt, and also in Judaea, guests at the table handled their food with the fingers, but spoons were used for soup or other liquid food, when required (Wilkinson, Anc. Egypt. i, 181, 24 ed.). The same is the case in modern Egypt. Each person breaks off a small piece of bread, dips it in the dish, and then conveys it to his mouth, together with a small portion of the meat or other contents of the dish. To pick out a delicate morsel and hand it to a friend is esteemed a compliment, and to refuse such an offering is contrary to good manners. Judas dipping his hand in the same dish with our Lord was showing especial friendship and intimacy (Luke, Mod. Egypt. i, 138; Charpin, Figs. iv, 53, 94; Niebuhr, Descr. de l'Arabie. p. 46). See BASIN; CHARGER.

DI'ASHAN (Heb. Dishan). A name, followed by another form for the name DISHON: Sept. P'osub, but in 1 Chron. i, 42 DISHAN (or v. 646v), the name of the brother of Seir. Dishon is the Horite, father of Uz and Aran, and head of one of the original tribes of Edomites (Gen. xxxvi, 21, 28, 80; 1 Chron. i, 38, 42). B.C. cir. 1963. See also DISHON.

DI'ASH (Heb. Dishon). The name of the second (alpapet; Sept. 61090v), in 1 Chron. i, 41 61090v), the name of the second of the Horites. The geographical position of the tribes descended from these patriarchs is uncertain. Knobel (Comm. in loc.) places them to the E. and S.E. of the Gulf of Akaba, on the ground that the names of Dishon's sons, Ebshan and Hemdan, may be identified with Dishon and Esmayid, branches of the tribe of Omran. Such identifications must be received with caution, as similar names are found in other parts of Arabia—Hende, for instance, near Tayf, and again Hamedan, which bears a still closer resemblance to the original name, near Sana (Burchhardt's Arabia, i, 156; ii, 576). See HEBER.

1. Seir's fifth son, and head of one of the aboriginal Edomite tribes (Gen. xxxvi, 21, 28; 1 Chron. i, 38). B.C. cir. 1963. In the original of Gen. xxxvi, 26, where his four sons are mentioned, the name is, by some transposition, DISHON, which our translators (following the Sept. and the parallel passage 1 Chron. i, 41) have correctly changed to "Dishon."

2. His grandson, the only son of Anah, and brother of Abilnimah, Esau's second wife (Gen. xxxvi, 25; 1 Chron. i, 41). B.C. considerably post 1963. DISHON. See PYGARO.

Dismounting. See Rider.

Dispensation (oikosyvia, management, prop. of household affairs, hence Eng. economy; "stewardship.") Luke xvi, 2, 3, 4; "edifying," 1 Tim. i, 4, apparently reading oikosyvia.

(1.) By the divine dispensions are generally meant those methods or schemes which are devised and pursued by the wisdom and goodness of God in order to manifest his perfections and will to mankind, for the purpose of their instruction, discipline, reformation, and advancement in rectitude of temper and conduct, for the promotion of their happi-
ness. These have varied in different ages of the world, and have been adapted by the wisdom and goodness of God to the circumstances of his intelligent and accountable creatures. Divines designate these various dispensations as the Patriarchal, the Mosaic or Jewish, the Christian, the Gregorian, the Episcopalian, the Orthodox, the Roman Catholic, and, reaching to the giving of the law; the second from the giving of the law to the death of Christ; the third from the death of Christ to the end of the world. All these were adapted to the circumstances of the family of man at these different periods: all, in regular succession, were mutually connected, and rendered the progressive salvation of mankind depend on the design of saving the world, and promoting the perfection and happiness of its rational and moral inhabitants (Watson, Theol. Dictionary, s. v.). There is, perhaps, no part of divinity attended with so much intricacy, and wherein orthodox divines so much differ, as in stating the precise agreement and difference between the two dispensations of Moses and Christ! (Jona. Edwards, On Full Communion, Works, N.Y. 1848, i. 160). See Pye Smith, First Lines of Christian Theology, bk. v, ch. iii: Fletcher, Works (N.Y. ed.), vols. ii, iii, and the art. FEDERAL THEOLOGY.

(4.) Dispensation. The word "dispensation" has various particular or unusual modes of visible treatment to which, under the divine government, mankind are subjected. They are either merciful or in judgment, though what appear to belong to the latter class are often blessings in disguise (Buck, Theol. Dict. s. v.). See PROVIDENCE.

(5.) The word dispensation is used in ecclesiastical law to signify a power granted by the Church authorities to do or leave undone something which otherwise is not allowed. The Roman ecclesiastical law grants to the pope the right and power of dispensing with the law in certain (and numerous) cases, and of deputing this power to bishops and other church officers. "The dispensing power have been the subject of much discussion, not only in controversy with Protestants, but among Roman Catholics themselves. It is held by the extreme advocates of papal power that the pope may dispense in any divine law, except the articles of faith; by others, that his dispensing power does not extend to the dispensation of the New Testament; some say that his dispensation is valid only when it proceeds upon just cause; some, that it is not properly a relaxation of the law's obligation, but merely a declaration that in the particular case the law is not applicable. The usage of the Church of Rome, however, agrees with the opinions of her reformers in making the pope supreme in releasing from oaths and vows: and a decree of the Council of Trent anatomatises all who deny the power of the Church to grant dispensations for marriages within the prohibited degrees of the Mosaic law: while the multiplied prohibited degrees of the canon law give much occasion for the more frequent exercises of the same power" (Chambers).

The dispensations in the Church of Rome are divided by Roman Catholic writers into papal and episcopal, pro foro externo et interno (according to the public or secret character of the impediment to be removed), and pro foro externo et interno. Roman Catholics generally admit the fact that in former times it was common for bishops and provincial councils to dispense from general Church laws, and that only since Innocent III the canon law provides in what cases bishops and provincial councils may grant dispensations, while in all cases a special authorization by the pope is required. See CANON LAWS, the apostolic Dataria, and in cases pro foro interno through the Pontificalia. See CERI ROMANA. If the communication with the pope is interrupted, or if there is danger in delay, and the granting of the papal dispensation be highly probable, the bishop may exceptionally grant a dispensation which ordinarily is reserved to the pope; but in such cases the papal sanction must be solicited as soon as possible. The authorization of the bishops to grant dispensations is partly renewed every fifth year (facultates quinquennales), and partly given as a personal distinction (facultates extraordinariae); but they can only exercise it as papal delegates. The only kind of dispensations now in use in England are those made to a clergyman to enable him to hold more benefices than one, or to absent himself from his parish. Formerly the pope's dispensations in England, as elsewhere, prevailed against the law of the land, not in ecclesiastical matters only, but in all that large department of civil affairs which, in the interest of fiction, was brought within the scope of ecclesiastical government. This abuse was swept away at the Reformation by 25 Henry VIII, c. 21. The power of the pope was then conferred on the archbishop of Canterbury, in so far as it was not contrary to the law of God. The granting of special licenses of marriage, and the like, is the only form in which it is ever exercised. In former times, the crown claimed a dispensing power in civil, similar to that of the pope in ecclesiastical matters. The power was grossly abused by James II, and was consequently abolished by the Bill of Rights.

The privilege of granting pardons in capital cases is the only form in which the dispensing power of the crown still exists (Chambers).

In the Protestant churches of the Continent of Europe, the right of dispensing with ecclesiastical laws has devolved on the princes, who generally exercise it through the Consistory. If the prince needs further relaxation, an ecclesiastical council is convened for the opinion of a theological faculty. — Herzog, Real Enzykl. iii, 428; Wetzer u. Welte, Kirch. Lex. iv, 178; Barrow, Works (N.Y. ed.), iii, 204 sq., 278.

Dispensed (διασφαριζω, scatttering, John vii, 37; "scattered," James i, 1; Pet. i, 1; comp. Tob. iii, 4; in Heb. usually some form of יָפָר, הָנָפָתָא, to break up, Isa. xi, 12; or יָפָר, Zeph. iii, 10, to scatter, as often rendered) JESVS, or, as they are most frequently styled technically and simply, THE DISPENSATION (I. Διασφάρις, 2 Macc. i, 27; Judith v, 19; Josephus, Ant. xii, 15, etc.), is the general epithet applied to those Jews who remained seated in foreign countries after the return from the Babylonian exile, and during the period of the second Temple. The Heb. word originally applied to these foreign settlers (יָפָר, יִפָּל, "captivity," comp. Jer. xxiv, 5; xviii, 4, etc., from יָפָר, to strike naked; so "sons of captivity." Ezra vi, 16) conveys the notion of spoliation and bereavement, as of men removed from the Temple and home of their fathers; but in the Sept., the ideas of a "sojourning" (παρασκευασις) and of a "colony" (παρακλησια) were combined with that of a "captivity" (ἀπαγωγη, λωτινία), while the term "dispensation" (διασφάρις, first in Deut. xxviii, 25, for γυναῖκα; comp. Jer. xxxiv, 17), which finally prevailed, seemed to imply that the people thus scattered "to the utmost parts of heaven" (Deut. xxx, 4), "in bondage among the Gentiles" (2 Macc. i, 27), and shut out from the full privileges of the chosen race (John vii, 55), should yet be as the dispersed sons of Israel, and like their fathers (comp. Isa. xi, 16; 6 Heb.) in the strange lands where they found a temporary resting-place (1 Pet. i, 1, πατοτικήν Ιουδαίων διασποράν). The schism which had divided the first kingdom was forgotten in the results of the general calamity. The dispersion was not limited to the exiles of Judah, but included the Jews in all the races and languages in which they were scattered (Acts xxvi, 7, το δεκαδέκατον); — Smith, s. v. See TEREBS.

The distinction of an Oriental and Occidental Dispensation, or Dispersion (Otho, Lex. Obsb. p. 76 sq.), is erroneous; but that the Jews, sometimes by constraint, sometimes voluntarily, had their residence among heathen,
cannot be denied (Dan. ix. 7; Jer. xxxii. 8; Ezek. xxxvi. 24, etc.), as well as that the deported Jewish colonies v. latorily remained in exile during the period in question (see Tithos, which began in 70 B.C., and Herod Antipates, p. 749, 2; Joseph. Ant. xxv. §). In the time of the Saviour there was scarcely any land of the ancient world in which Jewish residents were not to be met with (Joseph. War. vii. 8, 3; Ant. xiv. 7, 2; Philo, Opp. ii, 524, 587). We may appropriately distinguish four groups of the dispersed Jews. See OES.

1. Those in Assyria, Media, Babylonia, and Persia, or the Trans-Euphrates (οι ἐν τῇ Ἑβραϊκῇ ἀπώλεσις, πόλεις τουραούντα, Joseph. Ant. xv. 5, 2), descended from the Jews and Israelites transported to those countries by the exile, between whom and the Palestinian Jews all distinctive prejudice gradually wore away. Many thousand Jews lived in these countries (Joseph. Ant. xv. 2, 2; 3, 1; Philo, Opp. ii, 578), in good circumstances, as it would seem. With their native land (Palestine) they had religious connection through regular transmittance of the annual Temple-tax and firstlings (Joseph. Ant. xiv. 7, 2; xviii. 9, 1; Philo, Opp. ii, 520), and our Jewish high-priest at Jerusalem (Joseph. Ant. xv. 2, 4; 3, 1), and the Talmud speaks in respectful terms (see Lightfoot, Hor. Hebr. p. 1031) of this branch of the Dispersion, which went under the general denomination of the Babylonia (ἡ ἐκ τῆς Ἑβραίου μητροπόλεως). Their freedom from the burdens and foreign homage of the Gentiles (Joseph. Ant. xii. 8, 5; compare Apion, i, 23). Under the Seleucid kings they were, for the most part, favored on account of their zeal, prowess, and military service, of the undertakings of those princes; and Antiochus the Great regarded them as such approved subjects, that he planted an entire colony by means of them in Asia Minor (Joseph. Ant. xii. 8, 4). Nevertheless, they were not wanting collisions with the native Babylonians; bloody scenes ensued; and in the Roman period, under the emperor Caligula, the Babylonian Jews were compelled to emigrate to the then flourishing Seleucia, where, however, they soon drew upon them the ill-will of the inhabitants (Joseph. Ant. xvi. 9). See BABYLONIA.

2. In age and importance the next to the Babylonian was the Egyptian colony of Jews; indeed, influence, this even stands the highest (comp. Strabo in Joseph. Ant. xiv. 7, 2). On the first immigration of the Jews into Egypt, which was with the inaccessibility of their nation, was concealed and, by the expropriation of the priests of other countries (see 2 Kings xvii. 21, 24; Isa. xxxix. 13, 15, xxx. 22; xxxi. 1; xxvii. 6, 9), and confirmed (see Gesenius, deutsch, p. 826, 967, v. 5) as a support against Assyria (compare Herod. ii, 141), and still more (2 Kings xvii.; xxii. 29, 33) against Nebuchadnezzar (2 Kings xviii. 7) by an actual league with Hophra (Ezek. xvii. 15), on whose subjugation of Judea many Jews took refuge in Egypt (see Jer. ii. 8; xli. 17, 42-44), as the only safe retreat (Ewald, Gesch. I., 268 sq.), as von Bissing (Gesch. p. 26, 281). Nebuchadnezzar's new empire, however, chiding him by force to have carried off to Babylon the Jews who had retired thither (Joseph. Ant. x. 9, 7). On the other hand, Alexander the Great placed a considerable number of Jews in the Alexander founded by him, and bestowed upon them equal rights with the Egyptian citizens. Even Egypt, not to mention the peculiar synagogues in itself with the Cyrenians (Acts i. 9, 6), and the Egyptian like the Cyrenian Jews, the temple of the Temple-tax (Phil. ii. 565; Vitringa, De synagog. p. 256). Two of the five quarters of the city were occupied almost exclusively by Jews (Phil. i., 525), and these made up well-nigh half the population (ib. p. 528). The relationship between Palestine, however, was not so strong; but on that the Jews against the Cynics; and so the peculiar synagogue in itself with the Jews (Acts i. 9, 6). The chief officer of the Egyptian Jewish colonies was and probably the highest judge of his people (Strabo in Jo.

With this favor towards the Jews their inhuman treatment by Ptolemy Philopator stands in most lamentable contrast, according to the third book of Maccabees (q. v.). The title of this chapter is doubtful, and Josephus (Ap. ii. 5, only extant in the Latin) ascribes this procedure to Ptolemy Phuscon. Under Ptolemy Philomotor (B.C. 180 sq.), and his regent-mother Cleopatra the Jews were very favorably treated; high offices, namely in the army, were in their hands, and the court granted them the greatest confidence (Joseph. Ap. ii. 6). Even the erection of a modern Jewish temple at Leontopolis was allowed (Joseph. Ant. xiii. 3; War. vii. 10, 2), and on the eastern border of the kingdom a Jewish town (Ὦσυν) was founded (Joseph. War. i. 9, 4; Ant. xiv. 8, 1), which was important in a military point of view. After Egypt fell under the Roman sway, the association of Jews was enjoyed, under the first emperors, continued prosperity (comp. also Philo, Opp. ii, 563) and freedom, although they experienced occasional violations of their rights on the part of the Greek inhabitants, who were, on the other hand, provoked by the encroachments of the Jews (Joseph. Ant. xiv. 7, 5); and even Augustus found it expedient to issue a special edict (Joseph. Ant. xvi. 6, i sq.). But a terrible vengeance of the Greeks against the Jews, who were continually incurring the deepening hate of the community, took place under the emperor Caligula. The Jews in Alexandria and other parts of Egypt were attacked and put under tribute by Claudius (see Joseph. Ant. xvi. 8). The Jews in Egypt were especially Philo adv. Flaccum, in his Opp. ii, 517 sq.; also εἰκόνια κρίνειν or ad Coem., p. 645 sq.). Their rights and freedom were restored by a special ordinance of this emperor (Joseph. Ant. xix. 5, 2). But under Nero (A.D. 54), the old enmity between the Greeks and Jews in Alexandria was renewed and committed by the Roman military that became involved, the Jews were greatly reduced in numbers, and many came to beggary (Joseph. War. ii. 18, 7 sq.). To add to these misfortunes, their temple at Leontopolis was at last shut up against them (Joseph. War. vii. 108). See EGYPT.

The Jews, however, for a long period (at the time of Philo, about a thousand years; see his Opp. i. 529) enjoyed great privileges in Egypt; indeed, not unfrequently they were better off than in Palestine itself. No other colony could exhibit a temple and priesthood of their own. Alexandria contained several synagogues. But a Jewish colony in Egypt was committed by the Roman military that became involved, the Jews were greatly reduced in numbers, and many came to beggary (Joseph. War. ii. 18, 7 sq.). To add to these misfortunes, their temple at Leontopolis was at last shut up against them (Joseph. War. vii. 108). See EGYPT.

2. The Jews, however, for a long period (at the time of Philo, about a thousand years; see his Opp. ii, 529) enjoyed great privileges in Egypt; indeed, not unfrequently they were better off there than in Palestine itself. No other colony could exhibit a temple and priesthood of their own. Alexandria contained several synagogues. But a Jewish colony in Egypt was committed by the Roman military that became involved, the Jews were greatly reduced in numbers, and many came to beggary (Joseph. War. ii. 18, 7 sq.). To add to these misfortunes, their temple at Leontopolis was at last shut up against them (Joseph. War. vii. 108). See EGYPT.
seph. Ant. xiv, 7, 2). He had his seat at Alexandria, and was called an ἀλαβάρχος (Joseph. Ant. xvii, 8, 1; xix, 5, 1; xx, 7, 3; comp. Rhenard, Opera phil. vol. p. 584 sq.), with which the patriarchs of Alexandria were sometimes compared. He was supported by a council of elders (ὑποστολοί), according to the arrangement instituted by Augustus (Philos, Opp. ii, 557). See SANHEDRIM. These Jews had completely adopted Greek under the Ptolemies; it was their ecclesiastical as well as social language. But the Greek learning, and the philosophy, which had also come to them: the Alexandrian Rabbis were among the most learned Jews; they transformed for themselves a peculiar religious philosophy, based upon the Jewish Scriptures, and exercised with the utmost acuteness the allegorical interpretation of the Bible which was essentially connected with it. Philo's writings afford ample evidence of this system (comp. Dähne, Geschichtl. Darstellung d. jud. oriental., 1884, vol. ii; Grossman, De theol. piae Flaviorum familiis et autore, Lips. 1824; and De Pharisaeorum Jud. Alex. Lips. 1846; Collin, Bibl. Theol. i, 353 sq.). The Jewish colony in Cyrene (Cyrenaica) was derived from Egypt, enjoyed like the rest of the other inhabitants, a certain independence, and had a synagogue likewise in Jerusalem (Acts vi, 9). Ptolemaeus Lagi, who subsidized Cyrene (Justin. xii, 7), appears to have become himself the founder of this colony, and to have sought to secure this province to himself by these means (Joseph. Ap. ii, 4). Under the last two emperors of the first century, however, the Jewish population sought to acquire a pre-eminence over the other inhabitants, and thus brought on bloody contests, which ended in the expulsion of the Jews from Cyrene (see Munzer, Letter Juris. Kapl., p. 10 sq.; comp. generally Cass, De coloniis Judaeorum in Aegypto. Jornadelas, Regnum Aegypt. conscriptum post Moen de ductis, Stuttg. 1829). See CYRENE.

8. SYRIA was another place to which the Jews migrated after the time of Seleucus Nicator, and here they were granted by this prince equal rights, at Antioch and other cities, with the Macedonians (Joseph. Ant. 8, 1). The following kings of this dynasty, likewise, with the exception of Antiochus Ephiphanes (q. v.), favored the Jews (Joseph. War, vii, 8, 3); they lived in prosperity, could even make proselytes, had at Antioch their own ruler (δῆμος), and were in Damascus numerous (Joseph. War, ii, 20, 2). Nevertheless here, too, the popular hate was inflamed against them; Jannaeus, who finally broke out into war (30 B.C.) then under Vespasian with great violence, and, under the pressure of the Roman arms, inflicted every imaginable evil upon the Jews (Joseph. Life, 6). Yet Titus, after the destruction of Jerusalem, befriended these persecuted people, and restored to them their rights (Joseph. War, vii, 5, 2). See ANTIOTHER.

From Syria the Jews had found their way into Asia Minor (1 Pet. i, 1; Philo, Opp. ii, 558). As early as Antiochus Theos, the Jews in Ionia were granted the privilege of citizenship (Joseph. Ant. xii, 3, 5); but Antiochus the Great planted in Phrygia and Lydia, which had been overrun by him, colonies of Jews from Macedon and Babylonia, amounting to 30,000 families (δῆμος, 3, 4). By Julius Caesar in the later times of the Roman republic, and by Augustus, there were issued a series of decrees (Joseph. Ant. xiv, 10; xvi, 5) to the most of the chief cities of Asia Minor, e. g., Ephesus, Sardis, Laodicea, Haliacarnassus, etc., in which the unrestricted exercise of their religion, generally also freedom from military service, and the privilege of sending the Temple contribution and firstlings to Jerusalem, which even Roman governors had at times interdicted (δῆμος, 2, 8), were assured to the Jews. See each of these cities in their place. See ASIA MINOR.

4. From Asia Minor, two distinct streams may have been attracted to Greece (Ἰονιοὶ τοῖς Ἐλλήνοις, John vii, 55) and Macedonia, where, in the apostles' time, we find in all the important cities, especially those of a maritime and commercial character, communities with synagogues or prosneuma (Acts xvi, xviii, 20). See GREECE.

Rome and Italy had before Pompey no settled Jews; but from the Jewish prisoners of war, who had either been redeemed or dismissed on account of their impracticable habits (Philo, Opp. ii, 558), there now grew up in Rome, by the influx of freeborn Jews from Palestine, Greece and regions, a numerous community, who had thus formed a separate Jewish quarter across the Tiber. See ROMAN. They enjoyed a full freedom of worship, and were even successful in making proselytes. They must soon have risen to prosperity, for the yearly Temple contributions (Philo, Opp. ii, 568) of the Italian Jews (Ciceron, Phil. 22) was very considerable. They were once expelled from Rome under Tiberius, and again by Claudius (Acts xviii, 12). See CLAUDIUS. On their later fate, see Josch, Gesch. d. Isr. ii, 826 sq., who, however, has here, as in his anecdotal sections on the extra-Palestinian Jews, failed to give exact reference to the authorities. Of intrinsic value are the expositions of the public documents bearing on this subject in the two works, Decreto Rom. et Asiatic. ad cult. div. per Asiam Min. urbes secure obdandum a Josepho locutis, restit. a J. Gronov. (Leid. 1712), and Decreto Romanorum pro Judaeis, etc. a J. T. Krela (Lips. 1758). Comp. also Lerysob, De Judaeis, sub Caesaris conditione (L. 1828); and generally Remond, Vers. einer Gesch. der Ausbrodt. d. Juden (Lips. 1790); and Walch, Hist. patriarcharum Judæorum (Gen. 1757). See JEW.

Dispersion of Mankind. This event is usually held to have been occasioned by the confusion of tongues (q. v.) at the overthrow of Babel (Gen. xi, 9, where the term employed is גַּם פָּתָה, puta, to 'scatter'). As to the manner of the distribution of the posterity of Noah (Gen. x, 32, where the term is גַּם פָּרָד, parad, to disseminate) from the plain of Shinar, it was unh doubtly conducted under the influence of the ordinary laws of colonization. The sacred historian informs us that they were divided in their lands, every one according to his tongue, according to his family, and according to his nation (Gen. x, 5; xx, 31). The ends of this dispersion were to repose the earth, to prevent idolatry, and to display the divine wisdom and power (comp. Gen. i, 28). See Division of the Earth.

That all the families of man descended from the first human pair, and were by degrees—after the confusion of the Babel-builders, and the division of the earth in the days of Peleg—dispersed over the several countries of the earth, is clearly the doctrine of the Bible (Gen. xi, 9; xvi, 26; Gen. Deut. and again, ch. xviii, 22). The object of Moses, in the fifth chapter of Genesis, was to furnish, from the ancient documents which had descended to his time, a brief but authentic genealogical table of the descendants of Adam, in the line of Seth, unto the time of the Flood, in the days of Noah and his sons.

ADAM, created about 4004 B.C.; he lived 930 years.

Cain. Abel. Seth, lived 912 years.

Meathsdah, lived 909 years.

Noah, lived 900 years.
Disenter (Lat. dissentire), a term properly applied to those who, in a country where a certain Church (or certain churches) is established or recognised by the state, disagree with that religion. In England, the term Dissenter appears to have come into use in the 17th century, as synonymous with Nonconformists; and from England its use was transferred to Scotland in the 18th century, after the Seccession (q. v.) Church had been founded in that country. It is usually applied to those who agree with the established Church in the most essential doctrines, but differ from it on some minor point, or on questions of Church government, relation to the state, rites, etc. as in England to Presbyterian, Independents, and Baptists. The title is accepted by several of the Free churches in England (e.g. Congregationalists, Presbyterians); but the English Wesleyans do not call themselves Dissenters, as they do not share in the views above stated as the grounds of dissent. Yet they are separated, in fact, from the Church of England. See Methodists.

"The term Dissenter is not strictly legal or ecclesiastical, those to whom it applies being usually described in legal language by a periphrasis. It may be said to be a convenient term to designate those Protestant denominations which have dissolved from the doctrine and practice of the Church as by law established. Immediately after the Reformation, Dissenters, or Nonconformists, as they were then called, were subjected to severe restrictions and penalties. During the Rebellion the laws against Protestant sectaries were repealed; but they revived at the Restoration, and the Parliament of Charles II proceeded to enforce systematically, by new measures of vigor, the principles of universal conformity to the established Church (Stephen's Com. iii. 53). By 1 Will. and Mary, c. 13, the restrictions on Dissenters were first relaxed, and certain denominations were suffered to exercise their own religious observances. From that period various statutes have been passed, each extending in some degree the free exercise of religious opinion. At the present time, Dissenters of all denominations are allowed to practice without restraint their own system of religious worship and discipline. They are entitled to their own places of worship, and to maintain schools for instruction in their own opinions. They are also permitted, in their character as householders, to sit and vote in the parish vestries. A Dissenter, if a patron of a church, may also exercise his own judgment in appointing a clergyman of the Church of England to a vacant living. See on this subject Stephen's Eccles. Law. A similar amount of religious liberty is enjoyed in Scotland, not so much derived from or guarded by special statute; fully recognised, however, by decisions of courts, as belonging to the law of the country. Since the beginning of the 18th century, the Presbyterian, Independent or Congregationalist, and Baptists, denominations in England have been associated under the name of the Three Denominations. This association was fully organized in 1777, and enjoys—like the established clergy of London and the two great universities—the remarkable privilege of approaching the sovereign on the throne. Notwithstanding much weakness arising from doctrinal and other differences, this association has contributed much to promote toleration and religious liberty in England" (Chambers' Encyclopaedia, s. v.). See Denominations (the Three).

Dissenters object to the Church of England on such grounds as the following: 1. That the Church, as by law established, is the mere creature of the state, as much as the army. 2. That many of her offices and dignities are utterly at variance with the simplicity of apostolic times. 3. That the repetitions in the Liturgy are numberless and vain. 4. That the Apostles' Creed contains unwarrantable metaphysical representations relative to the doctrine of the Trinity. 5. That every baptized person is considered as regenerate. 6. That the baptismal and confirmation services, etc. have a tendency to deceive and ruin the souls of men. 8. That no distinction is made between the holy and profane, the sacraments being administered without discrimination to all who present themselves (Buck, Dict. s. v.). Accounts of the origin and history of the different dissenting bodies will be found under the heads Baptists; Congregationalists; Independents; Quakers; Unitarians, etc. See Bognor and Bennett, History of the Dissenters (Lond. 2 vols. 1vo); Neal, History of the Puritans; Pearson, Defence of the Dissenters of England (1817, 8vo).

Dissidents (Dissidentes), a term specially applied to those non-Romans in Poland who were allowed
the free exercise of their respective modes of worship. The privilege was accorded to Lutherans, Calvinists, Arminians, and Greeks, but not to Anabaptists, Socinians, and Quakers. In the latter part of the sixteenth century, a large part of the people, and perhaps half of the nobility, were Protestants. "The Convention of Sandemir, concluded in 1570, united the Lutherans, Calvinists, and Bohemian Brethren into one Church—a union which had also a political tendency, and whose members obtained the same rights with the Catholics by the religious peace (pax dissectionum) sworn by the king in 1573. But the great mistake in not settling the mutual relations of the two religious parties gave rise to bloody contests. Although the rights of the dissenters were afterwards repeatedly confirmed, they were gradually repeated, particularly in 1717 and 1718, in the reign of Augustus II, when dissenters were deprived of the right of voting in the Diet. They lost still more years afterwards (1783) under Augustus III; and in the Diet of Potsdam, as it was called, in 1786, an old statute, requiring every Polish king to be of the Catholic Church, was revived. After the accession of the last king, Stanislaus Poniatowski, the dissenters brought their grievances before the Diet held in 1766, and were supported in their claims by Russia, Denmark, Prussia, and England. Russia, in particular, profited by the occasion to extend her influence in the affairs of Poland, supported them strongly by her mediation, in bringing about a new Convention in 1767, by which they were again placed on an equal footing with the Catholics. The Diet of 1768 repealed the decrees which had been formerly passed against them. The war against the confederates breaking out, however, and the kingdom being dismembered, nothing was accomplished until the year 1775, when the dissenters regained all their privileges, excepting the right of being elected senators or ministers of state" (Henderson's Dutch Thol. Dictionary, s.v.). See Poland. The name Dissidents (German Disdissenten) is also sometimes used as the collective name for all adherents of religious denominations which have no legal existence in any particular state. See TOLERATION.

**Distaff (distaff)**, a form of a circle, e. g. a district or quarter of a city, "part," Neh. iii. 9-18; hence the whir of a spindle, with which it is put in parallelism, Prov. xxxi. 19; once a "staff," or crutch, 2 Sam. iii. 29, the instrument used for twisting the thread in spinning by its twirl. See SPINDLE.

**District, in the Methodist Episcopal Church, a territorial division of a Conference. Each Conference is divided into districts, including a convenient number of churches and societies (appointments); and each district is placed under the charge of a presiding elder. The bishops are empowered to form the districts according to their judgment. See Discipline of the M. E. Church, pt. ii, § 18; Stevens, Hist. of Methodism, bk. vii, ch. ii; and the art. PRESIDING ELDER.**

Ditch (ditch), a pit, [as rendered in Jer. x. 81] or trench for cistern-water, 2 Kings iii. 16; אָמֵר, midvav, a collection or pool of water, Isa. xxii. 11; אֶמֶר, shuchak', Prov. xxii. 37, or סְמֵר, skoch'ath, Job ix. xxxi, a pit, as elsewhere rendered, or hole in the ground, either for holding surplus water or for catching animals; like the Greek βάζων, Matt. xvi. 14; Luke vi. 39. See Cistern; Pool.

**Dithism, the worship of two gods.**

1. This term was sometimes applied by the orthodox to the Arians, on the ground that they believed in one God, the Father, who is eternal, and one God, the Son, not eternal.

2. The term is also applied to the doctrine of two first principles, or gods, one good, the other evil. "The chiefest and most eminent asserters of this diabolic doctrine of two self-existent principles in the universe were the Marcionites and the Manicheans, both of which sects, though they made some slight pretense to Christianity, yet were not by Christians owned for such. Some of the pagans also entertained the same opinion."—Cudworth, True Intellectual System (Andover, 1857), i. 290. See Dualism.

**Dichtmar, Justus Christoph, a German divine and jurist, was born March 19, 1677, at Rottenburg, in Hesse.** After studying at the University of Marburg, where he applied himself to theology and the Oriental languages, he removed to Leyden, where he was offered a professorship, which he refused in order to accompany a family, in which he was tutor, to Frankfort on the Oder, where he first became professor of history, then of the law of nature, and finally of statistics and finance. He was made a member of the Royal Society of Berlin, and a councillor of the order of St. John. He died at Frankfort in 1758. Among his works are, Gregorii VII Pont. Romani Vita (Frankf. 1710, 8vo);—Historia Belli inter Imperium et Sacerdotium (ibid. 8vo);—Summae Copiæ Antiq. Judaeiscarum et Romancarum in eum Protectionem præteruit (ibid. 4to).—Hoefer, Nouv. Biog. Générale, xiv, 327.

**Ditmär. See THIETMAR.**

**Divan, the cushioned sofa running around three sides of the lewan, or raised portion of the sitting-room of an oriental residence (Lane's Mod. Egypt, i. 17),**

![A Syrian Turk's Divan.](image-url)
and serving the purpose of a seat by day and a couch by night for the male members of the family and guests. See House. It is from six inches to a foot high, a little elevated in front, and about four feet wide, as the anglo-saxon, the thorn. The common people of Palestine and Egypt have no proper bed, and domestics sleep on the floor or in the passages, wherever they can find room (Kelly's Syria, p. 23). See Bed.

Diverse (דְּבָרֵים, kil'a'im, of two sorts, kettoneous, Lev. xix, 19; Deut. xxii, 9) kinds of materials, animal, or products, the Jews were forbidden to bring together (comp. Joseph. Ant. i. 8, 20), as being "confusion," i.e. unnatural hybridization. Among such commingling of incompatible or incongruent things are specified: 1. Not to wear garments which were woven of two kinds of stuff, particularly of wool and linen (linsey-woolsey); 2. Not to sow a field partly with one kind of seed and partly with another (see Agriculture); 3. Not to yoke an ox and an ass together to the plough (q. v.); 4. Nor to pair different species of animals in breeding (e.g. to procure no male of one species not to lie with a female of another species, Acts v, 29), which is true, not only of the second of these ordinances, namely, the producing of the kind unmerchantable (Deut. xix, 9); but a similar result is doubtless to be understood as applying to each prohibition, and to all other amalgamations. There is also some ambiguity in the statute itself, e.g. whether the "field" (דָּבָר) of the passage in Lev. be tantamount to the "vineyard" (דָּבָר) of the parallel in Deut., and also in the sense of the commingling of the "seed" (דָּבָר); but the laxity of Hebrew idiom authorizes a liberal and comprehensive construction of the enactment, as designed to interdict any combination of different species (whether in separate rows or commingled broadcast) upon the same piece of tilled ground, orchard, etc.; and such was the interpretation of the Jews (Mishna, Kilaim, i. 4.; chrocincong, 1834, No. 20, on account of their inequility in strength). Michaelis (Mos. Rech, iv, 347), on the other hand, thinks it refers to some antique notions relating to beasts of burden; but later (Berthold's Journ. in the opinion which refers it to the analogy of the copulation of the horse and ass. According to the Mishna (Kilaim, viii, 3), the offence of yoking together different animals (so it extends the law, De. 2 sq.) was punished with forty blows (c.). As to the interdict of clothing composed partly of wool, Josephus (Ant. iv, 6, 11) gives as its ground that such garments constituted the principal costume, but this is open to doubt, although the Mishna (Kilaim, i. 1) assigns the same reason. The Talmud has many regulations and restrictions concerning this precept.

"Wool," according to this authority, is only sheep's wool; to weave camel's hair and linen together was permitted (ib. ix, 1). Towels, grave-clothes, blankets for asses, and the like—in short, whatever was merely laid on, but not worn—are interpreted as not coming within the province of the law. On the other hand, weavers and fuller's must put their manufacturer's mark in clothes only by means of colors of the same kind (םש אמה); but the Jewish (קילון) probably received a clearer light were the meaning of the word קילון (kalihin, q. v.), rendered "linen and woolen" in Lev. xix, 19; "garment of diverse sorts" in Deut. xxii, 11; Sept. קִילָן, i.e. adulterated, not genuine; well understood; but its etymology is obscure; that proposed by Bochart (Hebr. i, 466), and that of Buxtorf (Lex. Talm. col. 2489), both of whom seek the term in the Semitic language, are both improbable; nor is that entirely satisfactory (see Geummen, Thes. Heb. p. 1456) which is suggested by Jablonsky (Opusc. i, 594, ed. Te Water) and by Forster (De byz. Egypti. c. 95), who refer it back to the Coptic word shenena, i.e. fibrous byzma (seen Rosenmuller, Scholia in loc. Leviticus). See LEXICON. The Jews at Muscat, in Arabia, disregard this law (Nisbihr, Beocrk. p. 157).

Divis. See Lazarus.

Divination (דּוֹנֵים, ke'sen, a lot [see below], or some kindred term; Gr. ματέστιον, but ἱευσισίων, Fyieho, in Acta xx, 15; used in the verb form דִּנֶנ, kosen), only of false prophets, etc., e.g. of the Hebrews, Deut. xviii, 10, 14; Mic. iii, 6, 7, 11; of necromancers, 1 Sam. xxiv, 8; of foreign prophets, as of the Philistines, 1 Sam. xviii, 13; but specifically of the three kinds of divination common aon: the Semitic nations, viz. arrows, entrails, and Teraphim, Ezek. xxii, 21) is a general term descriptive of the various illusive arts anciently practised for the discovery of things secret or future. The curiosity of mankind has devised numbers methods of seeking; to accomplish this result. By a perversion and exaggeration of the sublime faith which sees God everywhere, men have laid everything, with greater or less ingenuity, under contribution, as means of eliciting a divine answer to every question of their insatiable curiosity: e.g. the portsents of the sky and sea (Phutarch, De Superstitione, passim); the mysteries of the grave (μανεστηρίων και μανεστηρίων); the wonders of sleep and dreams (thought to be emanations from the gods, Homer, II, i, 63; Hymn in Mercur. 14; Virgil, Æneid, v, 888); the phren-menas of victims sacrificed (in which the deities were supposed to be specially interested); or the corresponding things that were included in the divination, Israel. Allerth. p. 222), since the Jews were only forbidden the rearing, not the use of them. (b.) Respecting the coupling of the ox and the ass as beasts of draught (Frucht, De vero sensu bysii Deut. xx, 10, Lips. 1744, absurdly inclusively under this the figurino rule), Josephus (of supra) bases the prohibition on the ground of humanity, as also Philo (Opp. iii, 870; so Schwabe, in the K'r.
DIVINATION

magical arts, which may be found in Hoffmann’s Les-
ison, ii, 97; and Potter on the Occult Sciences (in the
Engel. Metropol. pt. v, which contains some thirty
names ending in -mancy, or compounds of *μαντία, all
branches of the magic art). Nor have these expec-
tations of supernatural guidance in a single
nation. The meteoric portents, for instance,
which used to excite the surprise and fear of the old
Greeks and Romans, are still employed among the
barbarians of Africa (e. g. *muamana of the Manika
tribe, Kratf’s Tr. in. E. Africa, p. 115 sq.); and as the
ancients read fearsome signs in the shapes of animals
(Virgil’s Georg. ii, 468), the savages of Balamna indicate
the presence of theatrical alligator with their baleo-
ki bo, "there is sin" (Livingston’s Tr. in. S. Africa,
p. 225). See SUPERSTITION. This art of taking an
aim of divine matters by human, which cannot but
breed mixture of imagination" (Bacon, Ess. xxii),
accordingly has been universal in all ages and all na-
tions, alike civil and savage. It arises from an
impression that, in the absence of direct, visible guid-
ing Providence, the Deity suffers his will to be known
to men, partly by inspiring those who from purity of
character or elevation of spirit were susceptible of the
divine afflatus (σαραίνειν, ἀποδιδόναι), and partly
giving perpetual indications of the future, which
must be learned by experience and observation
(Cicero, Dict. i, 18; Pliny, xxxi, 5).

(a.) The first kind of divination was called natural
(*σαράντος, ἀδιάρατος), in which the medium of inspira-
tion was transported from his own individuality, and
became the passive instrument of supernatural utter-
ances (Virg. En. vi, 47; Ovid, Met. ii, 640, etc.). As
this process involved convulsions, the word μαντία, soothaying, is derived from 
μανεθειν, to rave, and alludes to the foaming mouth and streaming
hair of the possessed seer (Plato, Tim. 72, B, where the μανθήματα are supposed from this source). But even in the most passionate and irresistible prophecies of
Scripture we have none of these unnatural dis-
tortions (Num. xxiii, 5; Ps. xxxix, 18; Jer. xx, 9), although, as we shall see, they were characteristic of pretenders to the gift. See SORCERER.

(b.) The other kind of divination was artificial (χαρι-
nuon), and probably originated in an honest conviction that
external nature sympathized with and frequently
indicated the condition and prospects of mankind—a
conviction not in itself ridiculous, and fostered by the
accidental synchronism of natural phenomena with human catastrophes (Thucyd. ii, 89; Josephus, War, vii, 15; Geyzer, De Divin. i, 11). When once this feeling was established the supposed manifesta-
tions were infinitely multiplied, and hence the num-
berless forms of imposture or ignorance called capno-
mannya, pyromancy, arithmomancy, libanomancy, bot-
anomancy, cephalomancy, etc., of which there are
abundant accounts in Cicero, De Div.; Cardan, De
Superst.; Anton. v. Dale, De Orig. Idol.; Fabricius,
Potter’s Ant. i, ch. viii sq. Indeed, there was scarce-
ly any possible event or appearance which was not
pressed into the service of augury; and it may be said of
the ancient Greeks and Romans, as of the modern
New Zealanders, that, “after uttering their kind (or charm), the whispering of the wind, the moving of
trees, the flash of lightning, the pel of thunder, the
flight of a bird, even the buzz of an insect, would be
regarded as an answer” (Taylor’s New Zealand, p. 74;
Horrow’s Skim, i, 138 sq.); A system commenced in fac-
ulty of the Jews, and most expert in the Jews’ (2 Kii, 22, saying that it was strange how two augurs could meet
without laughing in each other’s face. But the sup-
posed knowledge became in all nations an engine of
political power, and hence interest was enlisted in its
support (Cicero, De Leg. ii, 12; Livy, vii, 27; Sopho-
cles, Antig. 1056; comp. Mic. iii, 11). It fell into the
hands of a priestly casto (Gen. xii, 8; Isa. lxvii, 13;
Jer. v, 81; Dan. ii, 2), who in all nations made it sub-
ervient to their own purposes. Thus in Persia, Char-
din says that the astrologers would make even the
shah rise at midnight and travel in the worst weather
in obedience to their suggestions. See Astrologer.

The invention of the kind now common in all parts of
the East (Eschylus, Fr. Vinct. 492), to the Phrygians and
Etruscans, especially sages (Cicero, De Div. i, 1; Cnem.
Alex. Strom. i, 826, where there is a great deal more
on the subject, or (as by the fathers generally)
the devil (Firmic. Matern. De Errore, Proem.; Lactant.
ii, ca. 95; Suid. s.v. Δαιμονιακος), the savage
way Zoroaster ascribes all magic to Ahriman (Nerk.
Fam. und. Rok. p. 97). Similar opinions have pro-
vailed in modern times (Sir Thomas Browne, Vulgar
Errors, i, 11). See MAGIC.

Egypt, the cradle of arts and sciences, if she did not
give it birth, seems to have encouraged the practice of
divination at an early age; and, whether any of its
forms had become objects of popular superstition, or
were resorted to for the purposes of gain in the days
of Joseph, it is well known that at the time of the
Hebrew Exodus there were magicians in that country
whose knowledge of the arts of nature, and whose
abolition in theExodus are sufficiently beyond a
certain extent, to equal the miracles of Moses. By
what extraordinary powers they achieved these feats,
how they changed their rods into serpents, the river
water into blood, and introduced frogs in unprecedented
numbers, is an inquiry that has occasioned great perplexity to many of learning and piety. See MAGI.

It is reasonable to suppose that as Moses never had
been in any other civilized country, all the allusions
contained in his writings to the various forms of
divination were those which were practised in Egypt; and,
indeed, so strong a taste had his countrymen imbiber
for these arts that, throughout the whole course of their
history it seems to have in-
}
DIVINATION

828

DIVINATION

torily shown, before the advent of Christ, to all the prevailing forms of divination (Comment. on Matt.). See EXORCISM.

Superstition not infrequently goes hand in hand with religion, and hence, amid the general infidelity prevalent through the Roman empire at our Lord's coming, imposture was rampant, as a glance at the pages of Tacitus will suffice to prove. Hence the lucrative trades of such men as Simon Magus (Acts vii., 9), Bar-Jesus (Acts xiii., 6, 8), the slave with the spirit of the demon (Acts xix., 16), the various false exorcists (Luke xi., 19; Acts xix., 13), and other mountebanks (γυμνασταὶ, 2 Tim. iii., 13; Rev. xix., 20, etc.), as well as the notorious dealers in magical writings (Ἑρετικὰ γυμνασταὶ), and the jugglers (στραφήνια) at Ephesus (Acts xix., 19).

Among the Jews these flagrant impostors (ἰμπυαζόντες, Josephus) had become dangerous and new trademarks of an imposture, especially during the Jewish war; and we find them constantly alluded to in Josephus (War, vi., 5, 1, 2; comp. Matt. xxiv., 23-24; Tacit. Hist. v., 12; Joseph. Ant. xx., 5, 1, etc.). As natural, they, like most Orientals, especially connected the name of Solomon with their spells and incantations (Joseph. Ant. xvi. 21). Among the names of the magicians on this wide and interesting subject will be found mentioned in the course of this article, and others are referred to in Fabricius, Bibl. Antiq. cap. xii., and Böttcher, De Inserit., p. 101 sqq. See CURIOUS ARTS.

Against every species and degree of this superstition the stern laws of the Mosaic law were directed (Exod. xxii., 18; Lev. xix., 26; 31; xx., 27; Deut. xviii., 10, 11), as fostering a love for unlawful knowledge (comp. the Korm. ch. v.; Cato, De Re Rust. 5: "vānas superstitiones rudes animos infestant;"
Columell. i., 1); because prying into the future beclouds the mind with superstition, and because it would have been (as indeed it proved to be) a Isa. ii., 6; 2 Kings xxii., 6) an incentive to idolatry; indeed, the frequent denunciations of the sin in the prophets tend to prove that these forbidden arts presented peculiar temptations to apostate Israel (Hottinger. Juris Hebr. leges, p. 293, 294).

But God supplied his people with substitutes for divination, which would have rendered it superfluous, and left them in no doubt as to his will in circumstances of danger, had they continued faithful. It was only when they were unfaithful that the revelation was withdrawn (1 Sam. xxviii., 6; 2 Sam. ii., 1; 1 v., 22, etc.). According to the Rabbis, the Urim and Thummim were the means by which the spirits of prophecy until Malachi; and the Bath-Kol was the sole means of guidance from that time downwards (Maimonides, de Fundam. Leg. cap. 7; Abarranel, Deleg. in Dan.

See below.

How far Moses and the Prophets believed in the reality of necromancy, etc., as distinguished from various forms of imposture, is a question which at present does not concern us. But even if, in those times, they did hold such a belief, no one will now urge that we are bound to do so at the present day. Yet such was the opinion of Bacon, Bishop Hall, Baxter, Sir Thos. Browne, Lavater, Glanvill, Henry More, and numerous others. Such was the case of a certain man in Xon which led Sir M. Hale to burn Amy Duny and Rose Cullenden at Bury in 1664; and caused even Wesley to say, that "to give up a belief in witchcraft was to give up the Bible." (For a curious statute against witchcraft [5 Eliz. cap. 15], see Collier's Excl. Hist. vi., 886.) Much discussion, moreover, has been caused to men of divided sentiment, whether the ancient tribe of diviners merely pretended to the powers they exercised, or were actually assisted by demoniacal agency. The latter opinion is embraced by almost all the fathers of the primitive Church, who, in support of their views, to the plain language of Scripture; to the best men. Such statements as of the days of Moses; to the divine law, which cannot be chargeable with the folly of prohibiting crimes that never existed; and to the strong presumption that pretensions to interpret dreams, to evoke the dead, etc., would never have met with credit during so many ages had there not been some known and authenticated instances of success. On the other hand, it has been maintained with great ability and erudition that the whole arts of divination were a system of imposture, and that Scripture itself frequently ridicules those who practised them as utterly helpless, and incapable of accomplishing anything beyond the ordinary powers of nature (Gen. iv., 15; xiv., 16; Judges x., 8; 1 Kings x., 12; 14; John ii., 8). See WITCHCRAFT.

1. Of the many instances of divination which occur in Holy Scripture, some must be taken in a good sense. These have accordingly been classed by J. C. Wichmannsannus (Dissert. de Devo Divino. Baby. [ed. Hichius et Messerer.], Yrb. 1672 sqq.) as truly "divine." (See Pusey, De praecipuis divinationibus genera., Zerb. 1591; F. A. M. 1607.) See INSPIRATION.

1. Cleromancy (χληρομαντία), divination by lot. This mode of decision was used by the Hebrews in matters of extreme importance, and always with solemn and religious preparation (Josh. vii., 18). The land was divided by lot (פנימה, הברה, Num. xxvi., 55, 56; Josh. xvi., 2); Achan's guilt was detected by lot (Josh. vii., 19); Saul was elected king by lot (Sam. x., 20, 21); and, more remarkable still, Matthias was chosen to the vacant apostleship by solemn lot, and invocation of God to guide the decision (Acts i., 26). This solemnity and reverence it is which gives force to such passages as Prov. vi., 33; xviii., 18. (See Augustine, De Doct. Christ. i., 28; Thom. Aquin. iv., 9, 12, 14 sqq.) Under this point, 30, were appointed the interesting ordinances of the scape-goat and the goat of the sin-offering for the people (Lev. xvi., 8-10). See LOT.

2. Oneirocramy (ὄνειροπροβοσκία), divination by dreams (Deut. xiii., 2, 3; Judg. vii., 13; Jer. xxxii., 32; Joseph. Ant. xvii., 6, 4). The interpretation of Pharaoh's dreams by the divinely gifted Joseph (Gen. xii., 25-29), and the retracing and interpretation of those of Nebuchadnezzar by the inspired prophet (Dan. ii., 27, etc. and again iv., 19, 28) as opposed to the diviners of false dreams (Zech. x., 2), are very prominent cases in point; and, still more, the dreams themselves divinely sent (as those in Gen. xx. 6; Judg. vii., 15; 1 Kings iii., 5; so also Matt. i., 20; ii., 13, etc.) should be regarded as instances of divination in a good sense, a heavenly oneirocramy (comp. Mohammed's dicta: "Good dreams are from God;" "Good dreams are one of the great parts of prophecy," Lane's Arab. Nisba, i., 68). This is clear from Num. xii., 6 (where dreams [to the sleeping] and visions [to the awake] are expressly mentioned as correlative divinations authorized by God), compared with 1 Sam. xxviii., 6. Many warnings occur in Scripture against the impostures attendant on the interpretation of dreams (Zech. x., 2, etc.). We find, however, no direct trace of seeking for dreams such as occurs in Virgil, Æn. vii., 61; Plautus, Curcul., i., 389: See DREAM.

3. The Urim and Thummim (Num. xxvii., 27), which seem to have had the same relation in true divination that the Teraphim (q. v.), or idolomancy, had in the idolatrous system (see Hose. iii., 4). See Urim and Thummim. Similar to this was divination by means of the Epydok (q. v.).

1. Phenomancy, by means of the Bath-Kol (ὃς ἔχων τὴν φύσιν συναίσθημα, daughter of the voice, i.e. direct social communication), which God vouchsafed especially to Moses (see Deut. xxxiv., 10). Various concomitants of revelation were employed by the Deity: as the Rod-Serpent (Exod. iv., 3); the Leprous Hand (Exod. iv., 3); the Burning Bush (Exod. iv., 5; the Plagues (vii., xii.); the Cloud (xvi., 10, 12); but most instanced without doubt with phenomena (Deut. iv., 15; 1 Kings xix., 12, 13, 15, and perhaps Matt. iii., 13). This, the true Bath-Kol, must not be confounded with
DIVINATION

9. It only remains under this head to allude to the fact that great importation was peculiarly attached to the words of dying men. Now although the observed fact that "men sometimes, at the hour of their departure, do speak the truth" above all else is peculiar to the "Church" (Rome, Medici, xi), it does not, of course, take away from the death-bed prophecies of Scripture their supernatural character (Gen. xlix; 2 Kings xiii, etc.), yet it is interesting to find that there are analogies which resemble them (H. xxii, 355; and the story of Calanus; Cicero, De Div. i, 80; Shaksp. Rich. ii. 2, 1; Daniel, Civ. Wars, iii. 11, 5; Ecclus. v. 5, 6). It was "by this" (A. V. "that useth divination").

II. Forms of divination expressly forbidden in Scripture. Allusion has already been made in this article to Deut. xviii, 10-12. As these verses contain the most formal notice of the subject, we will first take the seven or eight kinds of diviners there denounced in the order in which they are mentioned.

1. At the very outset we encounter in the phrase καθεσκευασμενοι, καθεσκευασμενοι, one dividing divinations (Sept. μαναππικονος μαναιτς, Vulg. qui arilos sanctificat; A. V. "that useth divination"), the same word which we have just noticed in a good sense. The verb διανοια, like the Arabic equivalent, primarily signifies to cleave or divide (Meier, Herb. Wurtzelschänder, p. 344; Fürst, Herb. Wörterb. ii, 582; Houttinger, Lex. Herogl. xli, 1); thence it acquired the sense of deciding and determining, and became a generic term for various forms of divination. Rabbi De Pomis says, "It is a word of large signification, embracing many specific senses, such as geomancy, necromancy, oneiromancy, cheiroeuchy, and others." Maimonides (in his treatise De legibus, cap. xi, § 6) includes besides these methods, geomancy, liameter, and catoptromancy; and Rabbi (on Deut. xviii, 10) makes διανοια mainly concerned with the process of rhabdomancy. Amid the uncertainty arising from this generic sense of the word, the Sept. has rendered it by the general phrase μαναππικονος μαναιτς, to divine by a divination; wherein it is followed by the Targum of Jonathan, as well as by the Syriac and Arabic versions (J. Cudias, Dissert. de Magia Sagitae, [Viteb 1675] i, 5; and Wichmannhausen, Dissert. i, 4). The word is used of Balaam (Josh. xxiii, 22), of the Philistines soothsayers (1 Sam. vi, 2), of the Hebrew farmers (Neh. iii, 3, 6, 7, 11), and in other passages), without specifying any mode of divination. We therefore regard this as a general phrase introductory to the seven particular ones which follow.

The absence of the copulative υπερ, which is prefixed to some other word but ἱστερεῖ, confirms this view. As the word, however, involves the notion of "cutting," some connect it with the Chald. הָיֵשׁ (from הָיֵשׁ, to cut), Dan. ii, 27; iv, 4, etc., and be taken to mean astrologers, magi, genethliaci, etc. (Juv. vi, 582 sq.; Dioc. Sic. ii, 50). Others refer to the theologumena (Scho1., ed. Ehr. 1675), since the use of lots was very familiar to the Jews (Gittaker on Lots, ad init.); but it required no art to explain their use, for they were regarded as directly under God's control (Num. xxvi, 55; Esth. iii, 7; Prov. xvi, 38; xviii, 18). Both lots and digitorum misicio (odd and even) were used in distributing the duties of the temple (Otho, Lex. Rab. s. v. Digitis micando). See above.

2. מַעְלָא, מַעְלָה. This word is variously derived and explained. In our A. V. it is, in two out of seven times of its occurrence (besides the prast. and fut.), rendered "observer of times" (as if מַעְלָא, a set time, Fuller, Misc. Sac. i, 16, after Rashi). The idea is, the assigning certain times to things, and distinguishing by an astrology lucky from unlucky days, and even months (as when Ovid [Fast. i] says, "Mense malum maio nochi bere vulgos ait") and years (Maimonides, Aboda Zorah, cap. 9; Spencer, De Leg. Hebr. i, 387). So perhaps
DIVINITION

Job iii, 5, just as the Greeks and Romans regarded some days as canclius, others as atri (Hesiod. Opp. Et. p. 770; Succ. Benis. 230). It is not known whether Gal. iv, 10 to this superstitio; the Mosaic institution of sacred seasons is itself there prohibited, as being abrogated to Christians (Selden, De ann. civil. lat. Jud. c. 21; and Alford, in loc.). The Sept. version, by the verb and part. χαλκονεοται (in four places), and the noun χαλκος (in two others), refers to divination by words and voices (Suidas, σφωνιανεοται, αι τις των λογων παραργασιαν). Festus derives omne itself (qua oramen), because it proceeds from the mouth (qua fil ab ore). Words of ill omen (ξυστηρια, which Horace calls malam ominata verba, and Plautus oculos omens accipit, were excluded for bona omens, as when Cicero reported to the Senate the execution of Lentulus and others by the word "vixerunt," they have ceased to live, instead of "mortu sunt," they are dead. So Leotychides embraced the omen of Hege- sitratus (Herodot. xi, 51). Hebrew instances of this observing of words occurring in Gen. xxiv, 14, and 1 Sam. xiv, 10, where a divine interposition occurred; in 1 Kin. xx, 33, the catching at the word of the king of Israel was rather a human instinct than a παραργασια, or marking, in its proper (superstitious) sense. Akin to and arising from this observation of verbal omens are the forms of bibilomancy called Sortes Horum, Sortes Horum, Sortes Biblicae, etc. The elevation of Severus is said to have been foretold by his opening at Virgil's line, "Tu regere imperio populos, Romane, memento." Most remarkable were the responses which it is said Charles I and Lord Falkland obtained, when they consulted their Virgils before the civil war. The former opened Ανειδ ειν, where dido predicts a violent death to Eneas, while the latter chanced upon Ανειδ ειν, at Eveder's inattention over his son. According to Nicerophorus Gregorios, the Pulitser was the best book for the Sortes Biblicae, but Cedrenus informs us that the N. T. was more commonly used (Nicop. Greg. viii, Aug. Ep. 119; Prideaux, Connect. ii, 567, etc.; Cardan, De Varitate, p. 1040). This superstition became so rife that it was necessary to denounce it from the pulpit as forbidden by the divine precept, "Thou shalt not tempt the Lord thy God." The Morlops consult the Koran in similar manner, but they take their answer from the seventh line of the right-hand column (De cultu scientiarum). A belief in the significance of chance words was very prevalent among the Egyptians (Clem. Alex. Strom. i, 304; Plutarch, De Is. 14), and the accidental sign of the engineer was sufficient to prevent even Amaus from removing the monolithic shrine to Saha (Wilkinson, Anc. Egypt. iv, 144). The universality of the belief among the ancients is known to every scholar (Cicer. De div. i; Herod. ii, 90; Virgil, Æn. vii, 116, etc.). See Bibliomancy.

Another origin for the Βερσιον is found by some (comp. Vitringa, Comment. ad Isai. ii, 6) in the noun "ςηθ, the eye, the root of which occurs once only (1 Sam. xviii, 9) as a verb, "Sculp eyed David." This derivation would point to fascination, the Greek βασανια and the Latin fascinum. Vossius derives these words from φασιν κατανυς, to kill with the eyes. Pliny (Holland's transl. 1, 153) says: "Such these are like among the Triballians and Hyrians, who with their very mistak- cull, are (you know), and those whom they "look wisely upon any long time." (comp. Aul. Gell. ix, 4, 8; Plutarch, Symp. v, 7) Reginald Scott speaks of certain Irish witches as "bewellers" (Discovery of Witchcraft, iii, 15). Whole treatises have been written on this subject, such as the De Fascino, by the Italian Vairus in 1590; the Opusculum de Fascino, by the Italian Giacomo Magri, in 1558; and the Tractatio de Fascinatione in 1575, by a German physician called bressromann. (See also Shaw, Tract, p. 212.) In Mar- canno's Description of W. Isles of Scotland, "Molluka beans" are mentioned as amulets against fascination. Dallaway (A Treatise of Constellations as quoted in Ge- cult Sciences, p. 70) says that the superstition of the Turks respecting the evil eye of an enemy or infidel. Passages from the Koran are painted on the outside of houses, etc., to divert the sinister influence. A belief in the "evil eye," θανατι- μος βάσανος (ςΥς 7), was universal, and is often alluded to in Scripture (Deut. xxii, 8; Matt. xx, 15; Tob. iv, 13; μυ ουσιανιασθηναι σου θανατιμος; Acts xviii, 14; the "evil David"). The passages of the ancients on the subject are collected in Potter's Ant. i, 383 sq. See Eye.

But the derivation of Βερσιον which finds most favor with modern authorities deduces the word from θυς, a cloud, so that the diviner would ply his art by watching clouds, thunders, lightnings (Meier, Hebr. Wör- terbuch, v, 6, p. 92; Fürst, Wörterb. ii, 167, who, however, finds room for all the derivations; and Gesenius, s. v. 1224; Cardan's own sense of the word was a great use of art). Rosenmüller, Scholia in Lucii, xix, 26, follows Aben Eara, who thinks this diviner obtained his omens from observation of the clouds. The notion that the sem is, east, west, north, south, serene north, were derived from the position of the Planetarium as he faced the east, taking his celestial observations (Goodwin's Moons and Aaron, Iv, 10), is rejected by his annotator Carpzov with the greatest disgust. Jeremiah (x, 2) clearly refers to this divination, which had its counterpart in Greek and Latin literature (e. g. in II. ii, 852, Nators speaks of right-hand flashes as being lucky (see also ODYS. X, 304). Diodorus Siculus (iii, 840, ed. Bipont.) mentions the divination by means of thunder (ευποριοσκυασι και ους вας ευποριοσκυασι ουκουμι) of the Etruscans (comp. fulgurator — μη γεραρμουνεκτις). Cato, De Rer. Claud. Marc. Nerov.; Novius, Ixxi, 23; Cicero, De Div. ii, 58. (In Orelli, 2801, fulgurator.) Pliny, in ii, 43, treats of the physical, and in ii, 54, of the oracular qualities of thunder, lightning, etc.; as does L. A. Sene- cia in Natural. Quest. ii, 1. Statius mentions the winds for purposes of divination (Thesell. ii, 59). See Humboldt, Kosmos, ii, 185, for the probable scientific adaptations by the Etruscans of their divining arts. To this class we must refer the "the astrologers" (see here only found); the "star-gazers, or rather star-prophets" (ιντιμενεται μετοχυνεται); and the "monthly prognosticators," or rather they that make known at the new moons what will happen to thee (ιντιμενεται μετοχυνεται); see Rosenmüller, in loc.), which are all mentioned in the sublime challenge of God to the Chaldean sorcerers in Isa. xlvii, 18. Astrology retained a long hold even on the minds of astronomers; e. g. Stollier from his evaluation predicted a deluge for the 12th world death; Wally, the amateur of astrology: Tycho Brahe studied and practised it; so did Morinus; Kepler supposed that the planets by their configurations exercised certain influences over sublunar nature; Lord Bacon, moreover, thought that astrology needed only to be reformed, not rejected (Arago, Pop. Astron. [by Smyth and Grant] ii, 8; Brewster, Martyrs of Science, 150, 211). See Prognosticator.

In Judg. ix, 37, the expression "oak of Moremen (enchantments)" refers not so much to the general sacredness of great trees (Homer. Od. xiv, 328, as to the fact that (probably) here Jacob had his amulets (Gen. xxxii, 14; Stanley, Sin. and Pal. p. 142). See MEONEMMA.

3. The next word in our list (Deut. xviii, 10) is Τιμηστος, an enchantress, (Sept. ωιαογειανεται; Vulg. qui obserbat auguria). In Gen. xlviii, 5, 15, this somewhat general word is used of divining by the cup, or συλλαμμα (συλλαμμα). Primitive this
DIVINATION was the drinking-cup which contained the libation to the gods (Potter). This divination prevailed more in the East than in the West. The earliest cup of Divination to designate Joseph's cup, resembles both the Arabic kadda and the Hindu kaddi, sacred chalice (Schleusner, Lex. V. T. s. v.; Kittel, Bib. Illust., i, 398). One of the Assyrian kings, in the sculptures from Nimroud, holds a divining-cup in his right hand (Bonomi's Nisewec, p. 4). The cup of a Sasanid, which is the constant theme of the poetry and mythology of Persia, was said to have been discovered full of the elixir of immortality, while digging to lay the foundations of Persepolis. It possessed the property of representing the whole world in its concavity, and all things good and bad then gazing on it. Herod. describes Nestor's similar manner; and Alexander the Great had a mystic cup of a like kind. In the storming of Seringapatam the unfortunate Tippoo Saib retired to gaze on his divining-cup; after standing a while absorbed, he returned to the fight and soon fell. The "great magitian" Merlin's cup is described (Spenser's Faerie Queen, iii, 2, 10), "Like to the world it self, it seem'd a world of glass." In Norden's Travela in Egypt, and Capt. Cook's Voyages, the use of divină-cups in modern Nubia and at Tungatobou, one of the Friendly Islands, is mentioned (compare Kittel, Daily Bible Illustrat., i, 424). The Orientals ascribe much of their wisdom to a mysterious cup, a lach, whose inscription is Giamlock ou evrafe or the sum (D'Herbelot, s. v. Giam; Occult Sciences, p. 517). Parkhurst and others, denying that divination is intended, make it a mere cup of office (Bruce's Travela in, ii, 657), "for which he would search carefully." But in all probability the A. V. is right. The Nabal was called the cup of Eshhad (i Sam. x, 11), silver vessel which symbolized the life and prophetic and mysterious properties (Haverneck, Exod. x, 9, Pentat.). The divination was by means of reactions from the water, or from magically-inscribed gems, etc., thrown into it (a kind of ἱδρομανία, κατα- προμανία, or κορασιμανία, Cardan, De rerum Variet. cap. 93), like the famous miroir d'eau (Lane, Mod. Eg. ii, 362), and the crystal divining-globes, the properties of which depend on a natural law brought into notice in the recent revivals of Mesmerism. Jul. Serenus (De Fato, ix, 18) says that after certain incantations a demon was heard in the water. For illustrations of Egyptian cups, see Wilkinson, iii, 268. This kind of cup is also the ab-teti (Sudais, s. v. κορασίματα), which consists in drawing omens from a common drinking-cup; much like the vulgar practice, still prevalent, of reading fortunes in the fantastic forms assumed by the grounds in a tea-cup. See CUP.

But the versions of the Sept. and Vulg. give quite a different turn to our דלתות, and point to that part of the augural art which consisted of omens from birds, i.e. omenology (ονοματολογία, ἀναλογία,"prophecy"), and the, דלתות, דלתות, פאודר הנפיים, דלתות, פאודר הנפיים (De Fato, ii, 19). The Syriac and Arabic versions favor this view (= חסグラב 아만ל 니도). Birds in their flight over the earth were supposed to observe men's secret actions, and to be cognizant of accidents, etc. (comp. Excl. x, 20). Aristophanes (Birds) says, "None but some bird, perhaps, knows of my treasure!" so that the birds assume prerogatives of deity. "We are as good as oracles, and give no credit to the seers," etc. The notion of the flight of the birds was the main phenomenon (Hecat., ed. Leusd., ii, 19). Homer is fuller of this divination (II ii, 310; Od. xv, 160, et passim). So the Latin classics; see Servius, Virg. Æn. iii, 361 ("aves oausicas, propellas"); also Cicero, Fam. vii, 6, 13; De Divin. ii, 72, etc.; and Livy, x, 40 (tripodium solstitialis). For quaint stories of birds, see Petrarca's Divina and Occult Sciences, p. 142, 143. This divination was much in vogue in the East also; so Philostratus (Vit. Apollo, i, 14) and Porphyry (De Abstin. Animal. ii, 33) say. Rabbinical doctors discover augury among king Solomon's attainments, in such passages as Exod. x, 20, and 1 Kings iv, 60. Rashi comments עולם שבושד לבלושע, learned in the tongue of birds; so Kimchi and the Midrash Rabba, xii. See ENCHANTER.

The root דלתה has the primary sense of a low hissing, whistling sound; from this arises the derivative דלת, a serpent, of frequent occurrence in the O. T. Genesis, xxvii, 1; Deut. vii, 7; Exod. iii, 8, etc. Fürst, Hebr. Wörterb., p. 31, prefer to derive from the primary sense (q. d. dècanale vel augurari as general terms); but Bochart, ii, 21, 22, peremptorily derives from the secondary sense of the serpent, and discovers in this דלת the divination called ψαλτιμονία (ψαλτιμονία). Fürst admits this as "tolerable." Classical instances of divining by serpents occur in Iliad, ii, 308; Ἀπελευ, v, 84; Cicero, De Div. i, 18, 36; Veler. Max. i, 6, 5; Terent. Phorm. iv, 4, 26; Clem. Alex. Strom. vii, 7; Horace, Car. iii, 27, 5. (According to Hesychius, s. v. ὀικωδός, and Suidas, s. v. ὀικωδός, omens from serpents as well as from birds formed a usual branch of the augur's art; hence probably the general phrase employed in the Sept. and other versions.) Serpent-charming, referred to in Ps. lxxv, 8, and Jer. vii, 17, is a part of this divination. Frequent mention of this art also occurs in both ancient and modern writings. Piranesi refers to Elian, Hist. Anim. xvii, 5; Sil. Italic. iii, 300; Strabo, xii, 314; Gallius, Noct. Attic. xvi, 11; Shaw, Travels, p. 854; Niebuhr, Travels, i, 189; Bochart, Hist. Sac, iii, 162; Description de l'Egypte, viii, 108; xvii, 1, 308 (in i, 159, there is a description of the feats of some Cairo jugglers with the serpents, Piranesi, Mem. sur l'Egypte, ii, 202; Minutoli, Travels, p. 226; Hengetenberg, Mos. and Egypt, p. 97-108; Lane, Mod. Egypt, ii, 290). The serpent was the symbol of health and healing (Plin. xxiv, 4, 22); Moses' brazen serpent (Num. xx, 9), which was a symbol of deliverance (Wisd. vi, 6; comp. John iii, 14), was at length made an object of idolatrous worship. Hezekiah, to destroy the charm, reduced its name to its mere material (יוו ייוו ייוו י), 2 Kings xvii, 4. See NEMUSHITAN. These menæchæshain, therefore, were probably ψαλτιμονders—people who, like the ancient Pevyli (Pliny, H. N. vii. 2; xxvii. 4) and Marmaride (Sil. Ital. iii, 501), were supposed to render serpents innocuous and of service (Exod. viii. 9; Jer. v. 21; 17. 18); chiefly by the power of music (Nestor, Mem. iii, 162; Lucan, x, 891; Æn. vii, 768); but also, no doubt, from the possession of some genuine and often hereditary secret (Lane, Mod. Egypt, ii, 106 sq.; Arnob. adv. Gent. ii, 92). Their power was often super orcos (Franklin's Tour to Persia). See CHARMER.

4. אֹהֵם, mekhashaphh (Sept. φασαρίας; Vulg. magia- lefens; Auth. Vers. "witch"). This word has always been a bad name in the Old Test. in the twelve instances in which the verb [always Pel] and the noun are used. The Syriac, however (καπάρ), bears the good sense of prayer and public service to God (καπαρα, λαονογια, in Acts iv, 31; xiii, 2). The Arabic (кахаш) suggests the meaning of the missing קתוא (Ezra xiv. 17; Jer. v. 18, 11), chiefly by the power of music (Nestor, Mem. iii, 162; Lucan, x, 891; Æn. vii, 768); but also, no doubt, from the possession of some genuine and often hereditary secret (Lane, Mod. Egypt, ii, 106 sq.; Arnob. adv. Gent. ii, 92). Their power was often super orcos (Franklin's Tour to Persia). See CHARMER.

6. אֹהֵם, mekhashaphh (Sept. φασαρίας; Vulg. magia- lefens; Auth. Vers. "witch"). This word has always been a bad name in the Old Test. in the twelve instances in which the verb [always Pel] and the noun are used. The Syriac, however (καπάρ), bears the good sense of prayer and public service to God (καπαρα, λαονογια, in Acts iv, 31; xiii, 2). The Arabic (kahash) suggests the meaning of the missing קתוא (Ezra xiv. 17; Jer. v. 18, 11), chiefly by the power of music (Nestor, Mem. iii, 162; Lucan, x, 891; Æn. vii, 768); but also, no doubt, from the possession of some genuine and often hereditary secret (Lane, Mod. Egypt, ii, 106 sq.; Arnob. adv. Gent. ii, 92). Their power was often super orcos (Franklin's Tour to Persia). See CHARMER.
DIVINATION 832

DIVINATION

confounded (xii. 12). The conjecture of Aben Ezra, that it was "their skill in the secrets of physical science" (quoted in Carpzov, Apparatus, p. 549), such as is attributed to the Esurian "figuratores" by Humboldt (Cosmoa, l. c.), which enabled them to sustain their investigations, is not universally admitted. The names of two of these "charismatici" (or מָאָרָם) are given by Paul, 2 Tim. iii. 8. (For Talmudic traditions about these, see Buxtorf, Zed. Tab. col. 945; comp. Pliny, Hist. Nat. xxx., 1, who associates James and Jopas with Moses as Jesuir: Apuleius, Apol. 108 [ed. Casaubun], who mentions Moses, James, etc., as inter magos celebratis; Numenius Pythag. in Euselius, Prop. Ennin, and Tertullian, De spect. scilicet et lus. Nitagis et Movatio sa iusuricio. The Moslems call these magicians Sadur and Sadur; D'Herbelot, s. v. Maou; and Sale, Koran, p. 237; Schoettgen, Hor. Hebr. p. 983; Rosenmüller, on Ez. d. l. c.) How they produced the wonders which hardened the heart of Pharaoh, whether by mechanical or chemical means, or by mere illusion, or by demoralizing influence (as supposed by the fathers, and Josephus, Ant. ii. 5), we can only conjecture. The N. T. gives us the names of other diviners also—in this respect differing observably from the reserve of the O. T.—e. g. of Simon Magus (Acts viii, 9, paralyvov); of Barjesus or Elymas (Acts xii, 8, 9, a strophies); the sons of Seceva (Acts xix, 13, 14, Ἱστοκατσαρωται). We have alluded to the supposed scientific basis of the arts of these ἐλευθέρων ὑπηρετῶν, or מָאָרָם (for the identity of these, see, Kalsch, on Exod. p. 114, and Keil and Delitzsch's Bibl. Comment., i. 357). The term under consideration might not doubt involve the use of divining-rods for the purpose of finding water (aquDocium), etc., dependent on physical laws only partly understood (Mayo's Pop. Superstitions). See MAGIC.

By Umbreit, on Job, and Deylin (Observ. Sacr. iii, 129), the words מָאָרָם, "the blackness of the day," in Job iii, 5, are taken to mean certain "incantations" which darken the day," practised by magicians (some think them also indicated in the 8th verse by the words מָאָרָם, "that curse the day") who were able, as the superstitious imagined, to change the brightest day into the darkest midnight. Popular ignorance has always connected magical power with scientific skill. The rise of the foretelling and setting of sun, moon, and stars, and the prediction of eclipses, using in the former process a type of a marvellous reputation (Virgil, Æn. iv. 489; Ovid, Metam. xii. 263; Horace, Epod. v. 45; Tibull, i. 2, 42. So Shakspeare, Temp. v. 1). In Exod. xxii. 18, the feminine מַעְרָה, melkahshephah, occurs (also translated a witch in the A. V.). In the Theocratic system, where women as well as men were endowed with supernatural gifts (such as Deborah, Hannah, Huldah), female pretenders were to be found—indeed, according to Maimonides (Moreh Nib. ii. 93, and Babyl. Gemara (Rabed, in UgoUlini Thea. xx. 770) they were more rife even than males. Their divination is referred to in Ezek. xiii. 23, and described ver. 17-22 (comp. Triumphus Divinarum, and pypis prophetias, in Thea. Nom. ad Crit. Sacr. i. 972, and Ephrem Syrus, in Rosenmüller in loc., who supposes the "pypis" to be amulets for divination fitted to their sleeves). See VirCH.

5. The next phrase in the Mosaic catalogue of forbidden divination is (Deut. xviii. 11) מַעְרָה, "conjuror," "charmer" (Sept. ἱστατόρ; Vulg. incantator). The root chabar denotes binding, or joining together. Genesius (by Robinson, p. 293) refers to a species of magic which was practised by binding magic knots (comp. Gordan knot). Carpzov (Apparatus, p. 584) quotes a passage to the same authority, and Bochart (Hieron. ii. 8, 6), for a kind of divination which drew together noxious creatures (serpents and scorpions) for purposes of sorcery; and in Psa. viii. 6, the very phrase before us is applied to serpent charmers. (See above, under 3.) Gaumlin (in Carpzov) mentions μακρισ ἔχειν, as if the very gods might be bound by magic arts. The Sept. version suggests our "legal bond," which is a kind of incantation per συντομίαν κερα ὄναρ, says Schoner. Hence the frequent allusions to such a charm in poetry. The refrain in the chorus of the Furies (Es- chylus, Eumen. 296. 318. 327), ἴσονι (a spell-blith), is imitated by Byron (Marmad, i. 1). So Milton (Comus, 822; Jonson's witch (in the Sad Shepherd) is said to ring vouchsafed. comp. Beaumarchais, Le Notable du Quai, ii. 2). This last quotation directs us to the best explanation of divination by מַעְרָה. Its idea is binding together; the ring has always been regarded as the symbol of such conjunction (comp. wedding-ring, in the marriage service of the Church of England). In the phenomena of dactylogrammy (ἸΣΤΟΥΡΗΣΤΙΚΑ), or divination by ring (Potter, ii. 18; Smelgy, Occult Sciences, p. 57-80, 543, we have the most exact illustration of the subject before us. Josephus (Ant. iii, 2, 6), among the attributes of king Solomon's wisdom, ascribes to him much magical skill, and, with the rest, necromancy and spells, and goes on to specify an instance of exercism by virtue of Solomon's magic ring. D'Herbelot (s. v. Glam, already quoted) calls Jemshid the "divining ring," and similar, according to Mignot (Reise, p. 83), Solomon is ordinarily regarded in Moslem lore as the great master of divination. See CHARMER.

6. בַּעַל בֶּן אָבִי, abul ob, "a consulter with familiar spirits" (Sept. ἱγγαποπίμητος; Vulg. quæ Pythones consuelt). Most writers treat this class of diviners as necromancers (so Gesenius, Thes. p. 84). But, whatever is the nature of the connection of the two passages from other passages, it is impossible to suppose that in Deut. xviii, 11, בַּעַל בֶּן אָבִי is synonymous with בַּעַל בֶּן אָבִי, which follows almost next. Böttcher, In Inferia, carefully distinguish the two expressions (p. 108), and then identifies the בַּעַל בֶּן אָבִי, which occurs in the plural in Job xxxix, 19 (in its primary sense of a leather bottle, or water-skin), with the noun of the same form which is found in so many other passages with a different meaning. In these the Sept. has invariably used ἱγγαποπίμητος, which connects our phrase with ἱγγαποπίμητος, as a branch of the divining art. (For the supposed connection between the primary and secondary senses of בַּעַל בֶּן אָבִי, see Gesenius, Thes. p. 84, and Lex. by Robinson, p. 20; also Böttcher, p. 107). The analogy is also in close consistency with the words of Job.—Umbrecht, loc. Having settled the sense of the word, Böttcher goes on to draw a noticeable distinction in certain phrases where it occurs. First, בַּעַל בֶּן אָבִי in the singular number designates the familiar spirit (i. e. what he calls "marmell anch, auctor frumenti, frumentum, in a correct sense," or "marmell anch, demum frumentum, in a superstitious sense"). Hence we have such phrases as בַּעַל בֶּן אָבִי, mistress or owner of a familiar spirit (1 Sam. xxviii., 7); בַּעַל בֶּן אָבִי, a consalter or questioner of a familiar spirit (1. e. says Böttcher, "ventriloquous vates ipses") (Deut. xvii, 11). Secondly, בַּעַל בֶּן אָבִי, when governed by the particle יר, refers not to the בטָאָט, or professional consulter, but to the person who requests his aid: thus, while בַּעַל בֶּן אָבִי is said of the diviner (loc. cit.), בַּעַל בֶּן אָבִי (with the particle) is applied to king Saul, who sought the familiar spirit by the aid of the בטָאָט, or pythomæas (1 Chron. x. 18). "The same distinction," says Böttcher, "is also maintained by the Targumists and Talmudists. (Comp. 1 Sam. xxviii., 8, "Divine to me, בַּעַל בֶּן אָבִי, by the familiar spirit.") Thirdly, בַּעַל בֶּן אָבִי, in the plural, is used in a concrete sense to
DIVINATION

DIVINATION

This page contains text discussing the concept of divination, mentioning specific names and works like "De Infernais," "Ps. 101," and specific contexts like "Vulg. goth." It also references texts by Tertullian and early Christian writing. The text appears to be a detailed discussion on the practice and historical significance of divination, particularly in religious and literary contexts. The page is part of a larger work that seems to delve into the nuances of ancient religious practices and their influence on later literary forms.

---

From a linguistic perspective, the text uses terms like "vindulqua," "diviner," and "prophecy," indicating a focus on the practice of predicting the future through various means. The references to "De Infernais," "Ps. 101," and other works suggest a scholarly discourse on the integration of divination into religious and cultural narratives. The page highlights the complexity and multifaceted nature of divination as a concept, touching on its historical roots and its role in shaping narrative traditions.

---

The page is structured in a scholarly manner, with references to specific works and authors, suggesting a deep understanding of the subject matter. The text is dense with academic references, making it suitable for researchers or scholars interested in the history and cultural significance of divination.
DIVINATION

Chau-tse and his wife, in the same vol. p. 67, 88.

In the 15th chap. of Sketches of Important, etc. (in the
Family Library), "on Sepulchral and perpetual lamps," may
be found an interesting account of the reasons
which induced the Egyptians to bestow so great attention
on their dead; one of them, quoted from Kircher's History
of Egyptian Antiquities, rests on the opinion "that
the souls of the deceased tarry with their bodies in the
graves, and are brought to the conception of the more
enlarged knowledge of the dead, lay at the foundation
of necromancy. The earliest historical tale of this sort
of divination which we recollect is related by Herodotus
concerning Periander of Corinth and his wife Melisa,
whose spirit he consulted for information about a
hidden treasure (v. 92).

In one of the most interesting dialogues between Plutarch,
the "Menippeus," or "Necro-
omanteia," a very good description is given of various
necromantic ceremonies. (For an abstract, see
Occult Sciences, by Snedley, etc. p. 183, 186.)

In Tertullian's treatise, De Anim, occurs a remarkable pas-
sage on necromancy, at the conclusion of which he
says, "If certain souls have been recalled into their
bodies by the power of God as manifest proofs of his
prerogative, that is no argument that a similar power
should be conferred on audacious magicians, fallacious
dreamers, and licentious poets" (c. 56, 57). We may
observe, in concluding this subject, that in confining
(with Böttcher) "the necromancer" to the last phrase
on Moses and the law (v. 32, 27), we have the auth-
orty of the A. V., which limits the word necromancer (αναστάτως λάτρευων in our Bible) to this phrase. See
NECROMANCER.

III. Forms of divination merely referred to in the
Bible, without special sanction or reproach.

We here find the same general phrase as in the foregoing
passage of Deut. introductory to another but much
shorter catalogue; for in the remarkable passage of Exod.
xxii. 24, the same formula is repeated the three
famous divinations of the king of Babylon. The
prophet represents the monarch as standing "as the
parting of the way, at the head of the two ways, to use
divination (בStateException).

1. He "made the arrows bright" (rather, he shoot-
them together, Vulg. commissns suspitqs, יבשך תורטיהש, Sept. יבשך תורטיהש יבשך תורטיהש) "each arrow having in-
scribed on it the name of some town to be assaulted.

From the quiver the arrows were drawn one by one,
and the city which was written on the first arrow
determined as the first to be its target (Jerome, in loc.).

In this instance Jerusalem was the ill-fated ob-
ject of this divination, as we learn from the next
verse, where the divination for Jerus. (בStateException)
signifies the arrow bearing the inscription of the doom-
ed capital, as it first emerged from the divining-quiver
(Prideaux, Connect. 1, 85).

Estius says "he threw up a bundle of arrows to see which way they would light,
calling on the right hand, he marched towards Jer-
usalem.

We have here a case of beknomay (בStateChanged).
This superstitition, which is prohibited in the
Koran (chap. iii. 39; v. 4), was much practised by the
idolatrous Arabs (D'Herbolot, Bibl. Or. s. v. Ac-
dah). Their arrows, which were consulted before any
thing of moment was undertaken, as when a man was
about to marry, or undertake a journey, or the like
used to be without heads or feathers, and were kept in
the temple of some idol. Seven such arrows were kept
at the temple of Mecca, but in divination they
generally used but three.

On one of these was writ-
ten, my Lord hath hidden me; on the second was in-
scribed, my Lord hath forbidden me; while the third
was blank. If the first was drawn, it gave the god's
sanction to the enterprise; the second prohibited it;
but the third being drawn required that the arrows
should again be mixed and again drawn until a deci-
sive answer was obtained (Pococke's Spec. Arab. p. 924,
etc.; Gesenius, Thea, p. 1272; Sale's Koran, Predim. Dis-
sert. p. 98; Cudlin, Diss. de Mag. Sogd. iii. 2). Della
Valla, however, says (p. 276), "I saw at Aleppo a Me-
hammadan who caused two persons to sit on the ground
opposite each other, and gave them four arrows into
their hands, which both of them held with their points
downward," etc. The two arrows in the right hand of
the Assyrian king (sculptured on one of the large slabs
brought from Nimroud) are conjectured to be proper-
ly that divination by arrows was practised in ancient
Nineveh. The king is represented as attended by
two divinities with fir-cone and basket, and therefore is in
a religious and not a martial occupation (Bonomi, Nine-

Three authors of an Eastern origin, however, are of the
opinion that among their forefathers each arrow was
inscribed by his own name. The most distant arrow indicated the name of the success-
ful competitor (Roberto's Orient Illustr. p. 491). We
read of a somewhat similar custom in use among the
ancient Teutons (Tacitus, Germ. x), and among the
Alani (Am. Marcell. xxxi); also among the modern
Egyptians (Lane, i. 111). This sort of divination of
the king of Babylon must not be confounded with the
arrow shot (βιβλιοκάλαιδα) of Jonathan, the affectionate
expedient of his secret warning to David, 1 Sam. xx,
20, etc., in which, though there were three arrows, there
was no uncertain divination, but an understood sign
that the prophet had complete knowledge of the posses-
ning of arrows by Joash, king of Israel, at the command
of the dying prophet (2 Kin. xiii. 17, 18), there is in
the three arrows only an accidental, not a real resem-
lance; moreover, we have in this action not an un-
authorized superstitition, but a symbohcal prophecy
(comp. the symbol with Virgil, Æn. ix, 92). See Ax-
row.

2. "He consulted with the images," דמויות רמא (Sept. ιστηρείας εν τοίς ημιστοίς; Vulg. interroga-
tiones idola), literally teraphim. These household gods
of the Semitic nations are often mentioned in the
Old Testament from the time of the Syrian Laban
( Gen. xxxi, 19) to this of the Chaldee Neuchadnezzar
(see Aug. Pfeiffer, De Teraphim, in Ueberlin Thes.
xxiii, 668, who, unnecessarily indeed, suggests,
on grammatical grounds, that the king of Babylon
may have used these three divinations previous to his
leaving home). Dr. Fairbairn (on Ezek. xxii. 21)
says, "This is the only passage where the use of
teraphim is expressly ascribed to a heathen." This
form of divination (בStateChanged) is nowhere named (Zech. x, 2; 1 Sam. xx, 23, בStateChanged an inquirer).
These were wooden images (1 Sam. xix, 13) consulted as "idols," from which the excited wor-
shippers fancied that they received oracular responses.

The notion that they were the embalmed heads of in-
fants on a gold plate inscribed with the name of an
unclean spirit is Rabbi Eliezer's invention. Other
Rabbis think that they meant "astrologers, etc.
See TERAPHIM.

3. "He looked in the liver," רמא רמא (Sept.
κατασκοπασιάς v. r. εισπερασματος; Vulg.
esta omnem). Here we have a case of a well-known
branch of spathumassagy (σπαθομασγερ), or divi-
nation by the inspection of entrails, which was called
teraphism (or art of the teraphim), practised in Egypt
by the Egyptians, and is still much referred to in
both Greek and Latin authors. Cicero (De Divitis,
15) mentions the importance of the liver in division
of this kind; but this branch was called kekatosopos (εισπερασματος, Herodian. viii. 3, 17; see also Pliny,
xxi, 87; Ovid, Metamorph. xvi, 186). Arrian (Aek. vii, 18) mentions a similar practice to the
death of Alexander and Hephastion; and Suetonius
(Aug. xvi, 2) a happy one. Strabo also (iii, 232,
ed. Casan.) mentions this divination as practised by the
Lusitani: not only animals offered in sacrifice, but
caprices in ear furnished these barbarians with victims
DIVINATION

for this bloody divination. A still more hideous mode of divination is mentioned of the ancient Britons, who would cut down at a blow of the sword one of their human sacrifices, in order to observe the posture of his fall, his convulsions, flow of the blood, etc., and so gather their predictions according to the rule of their ancestors. This is the only instance mentioned in Scripture of this superstition. The liver was the most important part of the sacrifice for divining purposes (Artemid. Onomacron. ii. 74; Cicero, De Div. ii. 18). See Liv. 2.

4. One of the remaining isolated terms of divination in the Scriptures is נָבַד, ha-altum, "the charmers," which occurs in Is. xxix. 9, in a passage descriptive of the idolatry and superstition of Egypt. It is derived by Gesenius and Meier from a root נָבָד, atta', akin to Arab. atta, which signifies to utter a dull mumbling sound. Meier defines the noun in question by מָרָמָר or Ṿayy. If so, we have here a class of the ventriloquists already described. But the Sept. gives another turn to the word, rendering by ἐκαθορισμὸν, as if, coming after ἐκαστότητα, gods, it meant their shrines. Herodotus (ii, 88) tells us the Egyptians possessed many oracles besides that of Laton at Buto, which was most esteemed of all. He adds that "the mode of delivering the oracles varied at the different shrines." See above.

5. In Dan. ii, 2, four classes of diviners are mentioned: two of these are described above; of the others, מְנַשִּׁים, mehathaphimim (Chald. מִנָּשַׁים, in Dan. ii. 27), is probably allied by derivation with the word מְנַשִּׁים, meneathaphim, which we have already described (Meier says מְנַשִּׁים יִבָּשַׁת). The noun מֶנֶסֶת, mehathaph, (a quiver), from the same root, suggests the notion of concealment and covering. This, the probable meaning of our term, suits very well with the idea of divination, though it ill accords with the A. V., which, in all the eight passages in Daniel where it is found, renders it astrologers. Divination by the stars is not implied in the original. The Sept. in every place except one (and that is doubtful, see Frommii, De Div. ii. 1) translates מְנַשִּׁים by μαγιστρον, and the Vulg. generally by ma-gos. This suggests the association of the מְנַשִּׁים with the magians of Matt. ii. 1 (Dutriton, Concord. Bibli. Sacr. p. 824). This, added to the fact that מְנַשִּׁים is generally coupled with the chartumum and the Chal-dassians, naturally influenced our translators in their choice of the English word. The original, however, is much less specific. Some philologists have imagined the word מְנַשִּׁים is no other than מְנַשִּׁים with the first letter dropped, and have also connected it with the Persian σαφι. Such a derivation would rather point to occult arts and cabalistic divination. See Astrologers.

6. The expression used by Daniel in i, 20—מְנַשִּׁים, ha-altum, "the magicians (and the astrologers)—is an asyndeton, for other places put the second to a different class from the first (see above). The close conjunction of the מְנַשִּׁים with the chartumum indicates their participation of the qualities of the latter, the iswahap-maric, or sacred scriptures of both Egypt and Babylon, over whom Daniel was appointed rob or master. In the learned Dissertatio D. Millii de Chartumum allium orientalium magis (Ugolini Theos. xxiii. 529, 538) nearly all the accomplishments of the divining arts are attributed to this influential caste, beginning with the genetical mysteries. The horoscope, which was much in use by these γνωσταται, brings us back to astrology, which (though not implied in the designation מְנַשִּׁים) was no doubt a part of their wisdom. Gesenius, in Thes. and Lex., derives the word chartumum from מְנַשִּׁים, che-reh, "a graving tool," and (on the authority of Creuzer, Symbolik u. Mythologie, i. 245; and Jablonski, Proleg. in Vand. Ägypt. p. 91, etc.) connects the arts of the chartumum with the sacred hieroglyphical writings. Not less probably, from such a derivation, these diviners might be connected with the system of talamouna, so rife in the East, and in Egypt in ancient times (Asi. Lect. ii. 19). The talisman (Arabic šilem, Greek ταλαμάς) is defined (in Freytag, Lex. Arab. s. v. iii. 64) to be "a magical image upon which, under a certain horoscope, are engraved mystic characters, as charms against enchantment or fascination." Talismand, among other uses, are buried with treasures to prevent them from being discovered. Thus this divination appears as a counterpart against another species (in rhabdomancy) which was used for the discovery of treasure. Equally varied are the gifts ascribed to the chartumum in the translations of the Sept. and Vulg. In eleven of the fifteen occurrences of the word (all descriptive of the magicians of Egypt and Babylon), ἱερολογικός and ἱερολογία are used in these versions; φαραγος and εὐαγγελία in two; and in the remaining two ἤγγησις and ἴπτερος. According to Jablonski, the name is derived from an Egyptian word Chartem = Ñamatharques, wonder-worker. (For other conjectures, see Käliche, Gev. p. 647; Heilig, Angleur, Hist. iv. 23.) Of course, the same derivation in Dan. i. 20, and therefore cannot be from the Chaldean Dhrardumad = skilled in science (Jahn, Bibl. Arch. § 402). If their divination was connected with drawn figures, it is paralleled by the Persian रंमस (Calmet); the modern Egyptian Zidrhqk, a table of letters ascribed to Idris or Enoch (Lane, i. 854), the renowned Chinese yi-King, lines discovered by Fouli on the back of a tortoise, which explain everything, and on which 1450 learned commentaries have been written (Huc's China, i. 128 sq.); and the Jutaun, or marks on paper, of Japan (Kempfer's Hist. ch. xv.). See MAGI.

7. מְנַשִּׁים, mehathaphimim (Sept. mal'kha; Vulg. Chaldei). Here, says Cicero (De Div. i. 1), we have a class "so named, not from their art, but from their nation." But only a section of the nation, the learned caste: "the dominant race," says Ernest Rénan, "who gave their name, though only a minority, as the Turks elsewhere, to the mass of the population, which differed from them in dress" (Hist. des religions, p. 67, 68). They are mentioned by Herodotus (i, 181) as a sacrodotal caste. Cicero, L. c., notices their devotion to astrology, and "their working out a science by which could be predicted what was to happen to each individual, and to what fate he was born." Didorus Siculus, after Ceasars, assigns the same office at Babylon to the Chaldeans as the priests bore in Egypt (Hist. ii. 29). Juvenal (Sat. vii. 552) and Horace (Carm. i. xi) refer to the Chaldean divination. The prophet Isaiah (xlvi. 12, 13) mentions several details of it in terms which we have already described. How the same appellation, מְנַשִּׁים, came to designate both the military and the learned classes of Babylon (comp. 2 Kings xxiv. 5, 10, etc., with Dan. ii. 2), and how conflicting are the views of the modern learned, as to the origin of the Chaldeans, see Rénan, L. c., and Sir H. Rawlinson, in note of Rawlinson's Herod. i. 319. See also CHALDEAN.

8. One name more (occurring in Dan. ii. 27; iv. 4; and v. 7, 11) remains to be noticed descriptive of the exorcès of Babylon—מְנַשִּׁים, zazarim (Sept. χαραξ αὐτοῦ, Vulg. sorciatus; A. V. soothsayers). Gesenius and Rosenmüller agree in deriving this word from מְנַשִּׁים, zazar, "to divide, cut up, etc.;" but they differ in the application of the idea, the former making it mean the heavens divided into astrological sections (of which he gives a diagram in his Comm. zu Jes. iii. 558); the latter (Schol. in Daniel. ii. 11, c.) supposing it to refer to the
DIVINATION 836  
DIVISION

division and inspection of the entrails of victims by καυσίματα: both these kinds of divination have been described under καυσίματα (War, vii, 3, 8) for astronomical portents such as the gnomon would interpret (see also St. August., De Doct. Chr. iii, 26, etc.). Jerome, in his Commentary in loc., defends his own version, καυσίματα, 'by the authority of Symmachus. The Sept. and Theodotion translate the word ταυρόποτες as if it were a proper noun, like εὐτυφλία, Chrysostom. See SOOTHAYER.

2. In Hosea iv, 12, we read, "My people ask counsel at their stocks (or wood, אֶת הָאֶפֶן); and their staff declareth unto them" (הָאֶפֶן כַּעַר). Those who hold that two separate prognostications are here referred to, generally make the former a consultation of wooden idols, or teraphim, which has already been treated (see Rosenmuller and Pococke, in loc.). Jeremiah reproaches the Jews for "saying to a stock (ForResult,), My Father" (ii, 27); and Habakkuk, "Woe unto him that saith to the wood (ForResult,), Awake!" (i, 19). But Pocock (on Hosea iv, 12) gives reasons for supposing that only one sort of superstition is meant in this verse, namely, rabdothomancy (ῥαβδοθομανσις), divination by staves or rods. Many kinds of this are on record. Malmonides (Proph. neg. 51) mentions the practice of "tapping a staff and striking the ground with it, and making horrid noises, while the diviners would stand in a reverie, intently looking on the ground, till they became like men struck with epileptic fits; when reduced to this frenzy they would utter their prophecies." The learned Rabbi says he saw such a case himself in Babary. Chasukin (quoted by Drusius on Deut. xviii, 10) adds another method by which "the diviner measures his staff with his finger or his hand: one time he says I will go; another time, I will not go; then, if it happens at the end of the staff to be I will not go, he goes not." Rabbi Moses Mikkotsi (in Pococke, l.c.) mentions a divination by a piece of stick, placed on one side, which, thrown afar off the hand, decided a doubt, according as the peeled or unpeeled side fell uppermost. Tacitus (Germ. x) describes a similar prognostication among the Germans. Theophrastus, after Cyrus, on this passage of Hosea, mentions the use of two rods, set upright, with enchantments or prayers, and in some verses, "he says: falling through the influence of demons, suggested answers to inquirers, according as they fell to the right or to the left, forward or backward." Staves were sometimes carried about as the shrines of deities, says Festus. Tituli (I. Eleg. xi, 10) refers to these modern customs. Allusion to the same superstition, Clement of Alexandria ( Strom, l. 103) mentions certain tubes as the shrines of deities (comp. Euseb. Prov. Prap. Evang, i, 9). Another explanation is that the positive or negative answer to the required question was decided by the equal or unequal number of spars in the staff (Godwyn, l.c.). Parallels are found among the Scythians (Herod. iv, 67, and Schol. Nicanor. Excid. mercaves magistratos ex spulote), Persians (Strabo, xvi, p. 847), Assyrians (Athen. Deipn. xii, 7), Chinese (Stavrounissas Jarba; Pinkerton, x, 182), and New Zealanders (called Nia, Taylor's New Zealand, p. 91). These kinds of divination are expressly forbidden in the Koran, and are called al-Musar (ch. v. Sale's Preim. Dissert, p. 89). Herodotus (vii, 11) describes the Alani women as gathering and searching anxiously for very smooth and straight wands to be used in this superstition manner. Sir J. Chardin says it is common in India for diviners to accompany conquerors, to point out the places where treasures may be found; and he adds a case at Surat, when Sirajad Duthat biber, he made his soothsayers use divining rods, struck on the ground, or on walls, etc. Harmer (ii, 282) supposes a reference to such a practice may be implied in Isa. xvi, 3 (see St. Chrysostom, Opera [ed. Bened.], x, 618, 824). Sir J. F. Davis (China, ii, 101) mentions a Chinese "mode of divination by certain pieces of wood, in the form of a small oblong body, the long side forming an oval. These are thrown by pairs, and, as they turn up, a judgment is formed of a future event by consulting the interpretation afforded by a Sibylline volume hung up in the nearest temple." Captain Burton, in his Eastern Africa, mentions some not dissimilar practices of divination; nor are these "fooleries of faith," as he calls them, unknown among ourselves. Even now miners in the south-west of England walk with their "dowsing stick" in hand over suspected spots; a modern of this divining rod is in their view an infallible guide for "lode." Similar superstitions have lately been practised in this country in searching for petroleum. Rudolf Salchibin has published a treatise on this curious subject, "Idolomantica et Rhetomantica anti-christiana, sive Dissertatio historico-theologica ad Bos. iv, 12 (Bern, 1715). A good deal of information may be obtained in Jacobi Lydiis Sacror. de re Militari, c. 3 (Ugolini, Thes. xvii, 142-146), and in Delrio, Disquis. Magia lib. iv, 2, quatt. 8, sect. 1, sub fin.; sect. 3, sub init. STOCK: S. W. Compare Mirrores, or Ancient Divination, July, 1861. On the general subject, see Andr. Riveti, Opp. (Roterd. 1651), i, 1244 sq. On the arts of divination practised by the ancient Greeks and Romans, see Smith's Dict. of Classical Antiq. s. v. Divination. See SOMERLY.

DIVINE, (1) of or belonging to God; (2) superhuman; (3) a minister or theologian, as one who explains the things of God.

DIVINE Right, (1) in politics, the claim of sovereigns to unlimited obedience, on the ground that the sovereign power is derived directly from God. (2) In ecclesiastical polity, the divine right (jur divinum) has been claimed for certain forms of Church government, and for certain classes of persons as administering it; e. g. the Pope by the Roman Church; hence the divine right to exercise authority in their dioceses, while the Pope claims that their right is not directly divine, but mediately through him. This controversy has never been authoritatively settled. It was largely discussed in the Council of Trent (q. v.). (3) In the Protestant churches generally, the claim of divine right on the part of the clergy to ecclesiastical office is generally abandoned, and where it is held the right is maintained as a mediate, one, derived through the Scriptures, so far as they give principles and laws for Church government. See ECCLESIASTICAL POLITY.

Divinity, a term sometimes used to designate the science of theology. See THEOLOGY.

DIVINITY OF CHRIST. See CHRISTOLOGY; INCARNATION: TRINITY.

DIVISIONS, CHURCH. See CHURCH.

DIVISION, the rendering of the following words:  
1. שׁכֶה, chalauzak, 2 Chron. xxxv, 5, or פָּצָמָא, moshakhe'ath, Josh. xi, 28; xii, 7; xviii, 10; 1 Chron. xxvii, 1; 2 Sam. xii, 16; Nevi. xi, 85; a regular distribution (e. g. the sacerdotal "cources" or sections).  
2. פָּצָמָא, pelaggaq, 2 Chron. xxxv, 5, or Chal. פָּצָמָא, pelaggaq, Ezra vi, 18, a partition (likewise applied to the priestly ranks), but פָּצָמָא, pelaggaq, Judg. v, 18, 16, 19, 14, ("river"), Job xx, 17.  
3. פָּצָמָא, pethak, a distinction, Exod. viii, 23 (elsewhere "redemption") 4. פָּצָמָא, diowmon, Luke xii, 21; εὐπροσώπως, variances, Rom. xvi, 17; 1 Cor. iii, 8; Gal. v, 20; εὐπροσώπως, a splendour, John vii, 48; ix, 16; x, 19, ("elevant," Matt. xix, 17; Mark ii, 21).

DIVISIONS IN THE CHURCH: At Corinth (exyeggara, 1 Cor. i, 10; xi, 18, echiasia, as rendered 1 Cor. xii, 25), i. e. parties or factions leading to altercation (gēg, "contention") 1 Cor. i, 11. The existence in many of the early churches of a strong tendency towards the ingrafting of Judaism upon Christianity is a fact well
known to every reader of the N. T.; and though the Church at Corinth was founded by Paul and afterwards instructed by Apollos, yet it is extremely probable that, as in the churches of Galatia, so in those of Achaia, this tendency may have been strongly manifested, and that a party in the city should have contended against the apostle, being more inclined to one which aimed at fettering Christianity with the restrictions and outward ritual of the Mosaic dispensation. The leaders of this party probably came with letters of commendation (2 Cor. i. 1), and they were prominent in the public affairs of the city, as may be inferred from the words ως ρα βασιλεὺς, οὓς τούς τοῦ Λόρδου, not ως ρα Ἱσραήλ, the former being more correctly descriptive of a personal, and the latter of an official, relationship. Besides, as Olshausen remarks, "the party of James could not be precisely distinguished from that of Peter; both must have been dependents and followers of the apostles. In fine, there is a total absence of all positive grounds for this hypothesis. . . . The mere naming of 'the brethren of the Lord' in 1 Cor. ix, 5, and of James in 1 Cor. xvi, 7, can prove nothing, as this is not in connection with any strictures on the Christ-party, or indeed on any party, but entirely incidental; and the expression ψευδοσπερέτων, ψευδών εἰσιν, 'know Christ after the flesh' (2 Cor. v, 16), refers to something quite different from the family-relations of the Saviour: it is designed to contrast the purely human aspect of his existence with his eternal heavenly essence" (Biblische Comment. I. I., 487; comp. Billoth, Commentary on the Epistle to the Hebrews, p. 159). This treatise which appeared in the Tübinger Zeitschrift für Theologie für 1881 (part iv, p. 61), Baur has suggested that, properly speaking, there were only two parties in the Corinthian Church—the Pauline and the Petrine; and that, as that of Apollos was a subdivision of the latter, not of the former, he has named it division of the Petrine, and has separated it from the Pauline. This subdivision, he supposes, arose from the opposition offered by the Petrine party to Paul, which led some of them to call in question the right of the latter to the apostleship, and to claim for themselves, as followers of Peter, a closer spiritual relationship to the Saviour, the honor of being the abode of genuine and apostolical Christianity. But as all the Corinthians and all the Christians were in the Church. This opinion is followed by Billoth, and has much in its favor; but the remark of Neander, that "according to it the Christ-party would be discriminated from the Petrine only in name, which is not in keeping with the relation of this party-appellation to the preceding party-names," has considerable weight as an objection to it. Neander himself, followed by Olshausen, supposes that the Christ-party was composed of persons "who repudiated the authority of all these teachers, and, independently of the apostles, sought to construct for themselves a pure Christianity, out of which they probably cast everything that was negligently or their philosophical idiosyncrasy were foreign addition. From the opposition of Hellenism and Judaism, and from the Helleno-philosophical tendency at Corinth, such a party might easily have arisen. . . . To such the apostles would seem to have mixed too much that was Jewish with their system, and not to have presented the doctrines of Christ sufficiently pure. To Christ alone, therefore, would they professedly appeal, and out of the materials furnished them by tradition, they sought, by means of their philosophic criticism, to extract what should be the pure doctrine of Christ" (Apologiae, p. 206; 1, 575 of Eng. tr.). The reason why the epistle of the Romans is addressed to the Christians in the 1st, 2d, 12th, 13th, 14th, and 15th chapters of the 1st Epistle seems clearly to indicate that some such notions as these had crept into the Church at Corinth; and, upon the whole, this hypothesis of Neander commends itself to our minds as the one which is best maintained and most probable. At the same time, there have existed serious doubts as to the authenticity of the epistle, and the existence of the above views on which all these hypotheses proceed, viz. that there really were in the Corinthian Church sects or parties specifically distinguished from each other by peculiarities of doctrinal sentiment. That erroneous doctrines were entertained by individuals in the Church, and that a schismatical spirit prevailed, it cannot be questioned; but that these two stood formally connected with each other may fairly admit of
doubt. Schisms often arise in churches from causes which have little or nothing to do with diversities of doctrinal sentiment among the members. Such was the schism which disturbed the Church at Corinth appears to us probable, from the circumstance that the existence of these is condemned by the apostle, without reference to any doctrinal errors out of which they might arise, while, on the other hand, the doctrinal errors condemned by him are denounced without reference to their baring led to party strife. For further information, besides that contained in the writings of Neander, Davidson (Intro. to N. T. ii. 222 sq.), Conybeare and Howson, and others, the student may be referred to the special treatises of Schenkel, De Exe. Cor. (Basel, 1838), Kniesow, Einleitung in das Alte Testament, 3d ed. (Leipzig, 1850), P弛her, Ueber die Geistesgegenwart in die Gemeinde u. Kor. (Altona, 1841), Riihlinger, Ent. Untersuch. (Bresl. 1847); Hilgenfeld, in Zeit. fuer Theol. u. Krit. 1855, p. 191 sq.; Beyerlag, in the Theol. Stud. u. Krit. 1865, p. 217 sq.; but he cannot be too emphatically warned against that tendency or construct a definite history out of the fewest possible facts, the later literature of these discussions. See Controversians (EPISTLES TO THE.)

DIVISION OF THE EARTH. That all mankind were originally of one family—spoke but one language, and, in consequence of their being united in a design which accorded not with the views of Providence, the Almighty confounded their speech, and introduced among them a variety of tongues, which produced a general division of the earth. Acts xvii. 26, we are told, "God made of one blood all nations of men, for to dwell on all the face of the earth; and hath determined the times before appointed, and the bounds of their habitation." In Gen. x. 25, it is said, in the days of Peleg the earth was divided into nations. The idea was, that each nation received its allotted portion of territory from God. The same view is probably taken in Deut. xxxii. 8:9;

When the Most High Higned an inheritance to nations—When He divided the sons of Adam;
He fixed the bounds of peoples;
According to the number of the sons of Israel.

The object of the sacred historian, in the tenth chapter of Genesis, is to furnish, in a brief, but authentic record of the origin of the principal nations of the earth. In the form of a genealogical table, or roll, of the descendants of Noah, it contains a view of the pedigree of nations in the then known world. As such, it is a record of inestimable value, being the most ancient ethnographic document which we possess. It does not, indeed, afford us, at this late period of the world, that degree of definite information which it doubtless conveyed in the time of Moses. A proper name is apt to assume a new form every time it is translated into a different language, and often in the same dialect at different periods. It is not, therefore, to be wondered at that many nations and peoples should have lost the names by which they were originally called, or that these names should have become so altered by time, or so distorted in being transferred into other tongues, as to make it difficult to trace their relation to those here given. But, notwithstanding the uncertainty arising from this source, far more successful results have attended the researches of learned men in this department than could have been anticipated, so that nearly all the leading nations of ancient and modern times can be distinctly traced up to their patriarchal progenitors, recited in the present catalogue. Indeed, the subject of this chapter has been so nearly exhaustcd by the labors of Bochart, Le Clerc, Wells, Michelin, Sir William Jones, Hales, Faber, Rosenmuller, and others, that little is left for future gleaners, until a more minute acquaintance shall be formed with the Asiatic regions by some one who shall be master of the various dialects spoken from the Indus to the Nile, and from the Arabian Gulf to the Caspian Sea. In considering the names it must not be forgotten that the names of individuals are for the most part names of the nations descended from them, just as Judah and Israel, though names of single persons, are also names of whole nations. This is evident, not only from the fact that many of them are in the plural number, as all those ending in men, but also from the termination of many of them, especially the ending in nes, being descriptive of tribes, and not of individuals. 2. Although this chapter is placed before the eleventh, yet in the order of time it properly belongs after it; for the confusion of tongues at Babel, which was the principal occasion of the dispersion of mankind, must of course have preceded the division of the earth. Whether this be other evident from the expression, "after their tongues," implying a diversity of languages, which we know did not exist prior to the confusion of tongues mentioned in the eleventh chapter. But such transpositions are common with the sacred writers. 3. Speaking in general terms, it may be said that the three sons of Noah—Shem, Ham, and Japheth—are exhibited in this genealogical chart as the representatives of the three grand divisions of the earth, Asia, Africa, and Europe, although not precisely according to the boundaries of modern times. The descendants of Japheth peopled Europe and the north-west of Asia; those of Ham, the southern parts of Africa and the globe, particularly those parts now occupied by the Semites, the countries of Central Asia, particularly those around the Euphrates. In accordance with this, a tradition has long and extensively prevailed throughout the East, particularly amongst the Arabs and Persians, that Noah divided the earth among his three sons. But as this tradition rests upon no express authority of Scripture, the presumption is that it arose from some confused recollection or interpretation of Noah's prophecy mentioned in Gen. ix. 25-27. "It has often been asserted," says Hengstenberg, "that the genealogical table in Gen. x. cannot be from Moses, since so extended a knowledge of nations lies far beyond the geographical horizon of the Mosaic age. This hypothesis must now be considered as exploded. The new discoveries and investigations in Egypt have shown that they maintained even from the most ancient times a vigorous commerce with other nations, and sometimes with very distant nations. But not merely the supplies furnished to the invading hordes of antiquities favor the belief that Moses was the author of the account in this tenth chapter of Genesis. On the Egyptian monuments, those especially which represent the conquests of the ancient Pharaohs over foreign nations, not a few names have been found which correspond with those contained in the chapter before us. It must be allowed that far more still could be effected if our knowledge of hieroglyphics were not so very imperfect." Admitting Moses to have been the writer of the book of Genesis (as is established by well-known internal and external evidence), still there is no improbability in supposing that, in enlivening up this genealogical table, he may have had access to the archives kept by the priests among the Egyptians, Phoenicians, and other surrounding nations. He was, we are informed, "learned in all the learning of the Egyptians:" and that this included historical and ethnographic knowledge appears from the fragmentary remains of Hanno's narrative, Sanchoniathon, and the testimony of Herodotus. For the sake of conciseness and perspicuity, this ancient ethnographic chart may be thrown into the following tabular form, along with the most probable explanations which the labors of the learned have enabled us to offer.

1. JAPETH. 1. GOME.—the Cimmerians on the north coast of the Black Sea. 2. NEWS.—the Scythians, who menace the world.
1. ASKENAZ—unknown people, perhaps between Armenia and the Black Sea.
DIVISION

2. **Riphah**—the inhabitants of the Riphian Mountains, between the Carpathians and the Caspian.

3. **Magog**—the inhabitants of the Caucasus and adjacent countries—Scythians.

4. **Javan**—the Ionians or Greeks. Their descendants were:
   a. **Babylonia**—the people of Babylonia.
   b. **Egyptians**—the people of Egypt.
   c. **Canaan**—the Canaanites.

5. **Tirzah**—the Thracians, or perhaps the dwellers on the River Tiberias, the Danites.

6. **Hamites**

7. **Canaan**—the Canaanites. The nation numbered in Gen. x. 20, as sprung from Cush, are to be sought in Africa. Their descendants were:
   a. **Nimrod**—the first king of Shinar, i.e. Babylon and Mesopotamia, where he founded Babylonia, Babel, Eber, Calneh, and Hamath.
   b. **Seba**—Meropa.
   c. **Habir**—the Abyssinians, dwelling on the Sinus Abliviae, Amalacia, southward of the straits of Babylonia.
   d. **Saba**—Soba, situated on the coast of the Arabian Gulf, not far from the present Arkite.
   e. **Bashan**—the Bashan, the western coast of Arabia, on the Persian Gulf. Descendants or colonies were:
      a. **Sheba**—probably a tribe in the northern Arabian desert near the Persian Gulf.
      b. **Deden**—Daden, an island in the Persian Gulf.
      c. **Sabaekiah**—the Sabaekiah, in the eastern parts of Edom.

8. **Mamre**—the Egyptians. Their descendants were:
   a. **Yhud**—the Hebrews.
   b. **Ammonites**—probably an African tribe.
   c. **Lobilim**—the Libyans.
   d. **Naphthaim**—the inhabitants of the province of Naphthaim, on the Lake of Sirbo, on the borders of Egypt and Asia.
   e. **Putramum**—the inhabitants of the Egyptian cataract of the Palsires (Palsares) or the Nile.
   f. **Cuthim**—the Cushites. Their descendants or colonies were:
      a. **Phalasim**—the Phalasim.
      b. **Capthorim**—the Cyrenaics.

9. **Pharaoh**—Moabites.

10. **Canaan**—the inhabitants of the country so called, from Sidon to the south end of the Dead Sea. Their descendants were:
    a. **Sidonians**—on the northern borders of Canaan or Phoenicia.
    b. **Hittites or Hittites**—in the country of Hebron, south of Jerusalem.
    c. **Jobabites**—in and around Jerusalem.
    d. **Jebusites**—in and around Jerusalem.
    e. **Gergesites**—south-east of the coast of Galilee.
    f. **Hivites**—at the foot of Hermon and Anti-Lebanon.
    g. **Arabians**—in the city of Arcas, in Phoenicia.
    h. **Sinaites**—in the country of Lebanon.
    i. **Aractites**—on the Phoenician island of Aradus, and the coast of the Levant.
    j. **Zamorites**—the inhabitants of the Phoenician town of Zemaritis.
    k. **Hamathites**—the inhabitants of the Syrian town of Emath, on the Orontes.

11. **Shewmima**

12. **Elam**—the Persians, particularly of the province of Elam.

13. **Jebuh**—the Jebelites, on the Gulf of Salachith, between the Hyrdramatis and the Orian.

14. **Lethe**—probably the Lydians in Asia Minor.

15. **Aram**—the inhabitants of Syria and Mesopotamia. Their descendants were:
   a. **Uz**—the inhabitants of a district in the north of Arabia Deserita.
   b. **Hutt**—the inhabitants of the Land of Uz, west of Mesopotamia.
   c. **Gath**—unknown.
   d. **Mesha**—the inhabitants of a part of the Gordian Mountains (Mount Masius), south of Nisibis.

See Ethnology.

**Divorce, Jewish** (דִּירָוָה, kerašáh, a cutting apart, Jer. iii. 8; דָּרָיוֹנָא, desertion or separation; but usually rendered 'divorcement;" the verb is דִּירָוָה, Dirah), temp. Lev. xxii. 16; xxiii. 20; xxx. 9; דָּרָיוֹנָא, to dissolve or dismiss, Matt. v. 32), or repudiation (comp. repudiatus, Sueton. Calig. 36) of a wife or betrothed woman (see the tract Kiddushin, in the Mishnah, iii. 17, and the Gemara Hizros. Heb. and Lat. in Uginol. xxx). There is great probability that divorces were used among the Hebrews before the law, since Christ says that Moses permitted them by reason only of the hardness of their hearts; that is to say, because they were accustomed to this abuse, and to prevent greater evils. Abraham dismissed Hagar, on account of her insolence, at the request of Sarah. We find no instance of a divorce in the books of the Old Testament written since Moses, though it is certain that the Hebrews separated from their wives on trifling occasions. Samson's mother-in-law understood that, by his absence from her, his daughter was divorced, since she gave her to another (Judg. xv. 2). The Levite's wife, who was disinherited at Gibeah, had forsaken her husband, and would not have returned had he not gone in pursuit of her (xix. 2, 3). Solomon speaks of a libervine woman who had deserted her husband, the director of her youth, and had forgotten the covenant of her God (Prov. ii. 16, 17). The prophet Malachi (i. 15) commends Abraham for not divorcing Sarah, though harren; and inveighs against the Jews, who had abandoned the 'wives of their youth.' Micah also (i. 5) reproaches them with having 'cast out their wives from their pleasant houses, and taken away the glory of God from their children forever.' —Calmet. As the Hebrews paid a stipulated price for the privilege of marrying (in the shape of dower presents), they seemed to consider it the natural consequence of making a payment of that kind that they should be at liberty to exercise a very arbitrary power over their wives, and to pronounce them divorced whenever they chose. This state of things was not equitable as regarded the women, and was very often injurious to both parties. Finding himself unable, however, to overrule feelings and practices of very ancient standing, Moses, in his declaration of the law, merely annexed to the original institution of marriage a very serious admonition to this effect: that it would be less criminal for a man to desert his father and mother than, without adequate cause, to desert his wife (Gen. ii. 24). He also laid a restriction upon the power of the husband so far as this, that he would not permit his wife to repudiate his wife without giving her a bill of divorce, in which were set forth the date, place, and cause of her repudiation, and a permission was given by it to marry whom she pleased. He further enacted that the husband might receive the repudiated wife back in case she had not in the mean while been married to another person; but if she had been thus married, she could not ever afterwards become the wife of her first husband—a law which the faith due to the second husband clearly required (Deut. xxiv. 1-4; Jer. iii. 1; Matt. i. 19; xix. 8). Ezra and Nehemiah obliged a great number of the Jews to dismiss the foreign women, whom they had married contrary to the law (Ezr. x. 18; Neh. xii. 10). As Christ has limited the permission of divorce to the single case of adultery, he denied the equity of the Mosaic statute; and
DIVORCE

in justification of Moses maintained that he permitted divorces for causes below adultery only for prudential reasons for the time being. Nor was this limitation by Christ unnecessary, for at that time it was common for the Jews to dissolve the union upon very slight and trivial pretences (Matt. v, 31, 32; xix, 1—9; Mark x, 2—12; Luke xvi, 18). As wives were considered the property of their husbands, they did not possess by the Mosaic statutes a reciprocal right, and were not at liberty to dissolve the matrimonial alliance by giving a bill of divorce to that effect. Josephus was of opinion (Ant. xv, 11) that the law did not permit women to divorce themselves from their husbands. He believes Salome, sister of Herod the Great, to be the first who put it in practice (Josephus, Antiq. vii, 195); but there was also a sister of the younger Agrippa, and others theirs. The following are largely Rabbinical regulations. See ADULTERY.

The Mosaic law regulating this subject is found in Deut. xxiv, 1—4, and in the cases in which the right of a husband to divorce his wife was harassed, stated xxvii, 19, 29. The ground of divorce was what the text calls מִלְחָכָה (lit. sufficiency of a word or thing, i.e. anything filling, some shameful act or circumstance, as in Deut. xxiii, 14), "some uncleanness" (Deut. xxiv, 1), on the meaning of which the Jewish doctors of the period of the N. T. widely differed, the school of Shammai seeming to limit it to a moral delinquency in the woman, while that of Hillel extended it to trifling causes ("for every cause" Matt. xix, 3; as among the Druses, Burchhardt, Traur. i, 829), e.g. if the wife burnt the food she was cooking for her husband, or merely over-salted it (Mishna, Gittin, ix, 16). Rabbi Akiba allows divorce if the husband merely saw a wife whose appearance pleased him better (see Otho, Lec. iv. 79). The Pharisees, however, wished, perhaps, to embroil our Saviour with these rival schools by their question (Matt. xix, 3), by his answer to which, as well as by his previous maxim (ver. 31), he declares that, but for their hardened state of heart, such questions would have no place. Yet, from the distinction made, "But I say unto you" (ver. 32), it seems to follow that he regarded all the above causes as "fornication" as standing on too weak ground, and declined the question as to the interpretation of the words of Moses (see Tholuck, Sermon on the Mount, p. 220 sqq.).

We may conjecture that the Mosaic statute had reference to doubts of his bride's virginity, or of his wife's modesty and fidelity, on the part of the husband, and though he might not be able to bring a definite charge of unchastity. It would be unreasonable to suppose that by מִלְחָכָה, to which he limited the remedy of divorce, Moses meant "fornication," i.e. adultery, for that would have been to stultify the law "that such should be stoned" (John viii, 5; Lev. xx, 10). The practical difficulty, however, which attends on the doubt which is a more frequent in interpreting Moses' words will be lessened if we consider that the mere giving "a bill" (or, rather, "book," פּוֹקֵן, Poqon, Talm. 22 or הָּפַּקְדָּה of divorcement) (comp. Isa. 1, 1; Jer. iii, 8), would in ancient times require the intervention of a Levite, not only to secure the formal correctness of the instrument, but because the art of writing was then generally unknown. This would bring the matter under the cognizance of legal authority, and tend to check the rash exercise of the right by the husband. Traditional opinion and prescriptive practice would probably fix the standard of the מִלְחָכָה, and doubtless, with the lax general morality which marks the decline of the Jewish polity, that standard would be lowered (Mal. ii, 14—16). Thus the Gemar. Babyl. Gittin, 9 (ap. Selden, De uz. Hb. ii, 17) allows for a wife's spinning in public, or going out with head uncovered, or clothes so torn as not properly to conceal her person from sight. But the absence of any case in point in the period which lay nearest to the lawgiver himself, or in any, save a much more recent one, makes the whole question one of great uncertainty. The case of Phuti and Micha is not in point, being merely an example of one arbitrary act rescinded by another (1 Sam. xxv, 44; comp. 2 Sam. iii, 14—16). Selden, quoting (Lec. iv, 72; 199) "Puf. Pref. p. 8, 3, says that speaks of an alleged case of the husband, who, when going to war, giving the wife the lēthatia divorcium; but the authority is of slight value, and the fact improbable. It is contrary to all known Oriental usage to suppose that the right of quitting their husband and choosing another was allowed to women before the time of Solomon (Josephus, Antiq. ii, 19, 4)." He quotes the first example of it—one, no doubt, derived from the growing prevalence of heathen laxity (see Wachsmuth, Hellen. Alterthum. iii, 208). Hence also, probably, the caution given in I Cor. vii, 10. Those are surely mistaken who suppose that a man might take back a remarried wife whom he had divorced, except in the cases when her second husband had died, or had divorced her. Such resumption is contemplated by the lawgiver as only possible in those two cases, and therefore is in them only expressly forbidden (Jer. iii, 1). The divorces of Gentle wives ordered by Nebuchadnezzar (Ezra x, 11; xii, 10) rested on entirely different grounds. They were to be taken away from the wife when the husband had seen her at all. (On this subject, see Joseph. Ant. iv, 8, 3; xvi, 7, 3; Life, 76, a writer whose practice seems to have been in accord with the views of the Hillel. On the general subject, Buxtorf, de Spousal. et Divort. p. 82—85; Della, Exor. Hebr. iii, 17 sq.; Michaelis, Laws of Moses, ii, 536; and Danz, in Menonches' N. T. Talm. p. 677 sq., may be consulted. For the Greek and Roman usages on the subject, see Smith's Dictionary of Class. Antiq. s. vv. Divortium, Apodeipseus Dike. Monographs have been written on the passage in Deut. by Winkler (Unters. schweber. Schriftst. ii, 25 sq.); also on the passage in Matt. by Venema (in his Loc. tert. scer. ed. 2, append.); Wolff, De divortio Judeorum (Lips. 1789); Schindler, Quæstio de matrimonio (Lugn. 1786); Hommelhousius, Uranum divorciare jur. (Jen. n. d.). See MARRIAGE.

DIVORCE, CHRISTIAN LAW OF. Under the term divorce the church included several cases of married persons which it deems unlike one another. First, they may have been joined in unlawful wedlock, as when near relationship was a bar to their union, and the law, on ascertaining this fact, declares that they never were legally married. Such was the case where Henry VIII of England was separated from his first wife by ecclesiastical consent, and was not permitted to marry again; or, as it would be more proper to say, was declared never to have been married at all. Cases of this kind are properly not divorces, but annulments of marriage, or declarations of the nullity of the marriage. They occur in all societies, and against them the precepts of Christ are not directed. Only it is a sin of legislation, and a snare to men, if the obstacles to marriage are, as they are in Catholic countries, made too numerous. Secondly, there are separations of persons lawfully married which involve the impossibility for either of them to marry again during the life of the other. These are often called separations or separations a mensa et thoro, and sometimes separations merely. Finally, there are divorces proper, or separations a vinculo matrimonii, dissolutions of a marriage originally lawful, with liberty given to one or both parties to contract a new marriage. It is these two last kinds of divorce to which we shall confine ourselves in the present examination. At the time when Christ appeared in the world a very great laxity of divorce prevailed in the nations which had had the greatest influence on the progress of mankind. Among the Jews, as has been seen above, the husband could repudiate his wife for any reason
DIVORCE

except it be for fornication," gives a sample of the causes which may dissolve the marriage union, as one of many which put an end to the state beautifully called one flesh. Plainly but one cause of separation with remarriage is in his theory, and that too is not its outward nature and grossness distinct from all others. Nor again, fourthly, can it be said that these precepts were intended to govern individual action, but that, where the law of the state permitted, the individual, acting under public law, might exercise the right of divorce for any reason, the fact that the same Jewish law says, he lets not man put asunder, i. e. not the individual man, but man as opposed to God, who established the primeval law of marriage. He gives a rule to his followers, who must follow it, whether the State allows larger liberty or not. Christians may live in a State which feels no obligation to conform its law to Christian's views in this respect, but they will, if they have influence, necessarily change legislation regarded by them as injurious society like that which opens a wide path for divorce.

We come now to the supplemental precepts of Paul, who had to guide churches gathered amid the heathen, who were agnostic, apathetic, and whose members, by their conversion, were brought into Christianity. In the former case he repeats the Lord's rule against separation with remarriage. In the additional case, when a woman should be separated from her husband, she must remain unmarried, or be reconciled to him. Here, then, the possibility of separation a mensa et thoro alone, without liberty of remarriage, is contemplated; and this passage has had a vast influence on ecclesiastical legislation. Most interpreters suppose that the apostle here is thinking of withdrawal from the marriage union for comparatively slight grounds, such as do not involve unfaithfulness— and this view alone seems to reconcile what Christ says with the supplementary precepts of Paul—but Augustine strives, with great pains and ingenuity (de conjugibus adulteriosis), to show that divorce for adultery is intended, and applies the interpretation to our Lord's words. Hence adultery can be condoned by the innocent partner, and can only involve separation, without liberty to either party to enter into second nuptials. This view became prevalent, and had a great effect on subsequent opinion. In the other case the apostle makes the believer, the apostle enjoins on the believer to be passive, to take no active steps for the purpose of dissolving the marriage because it is a union with a heathen, for it is a marriage after all. If the unbeliever wishes to retain the tie, the believer must not leave him or her. But if the unbeliever departs, "let him depart." A Christian "is not in bondage" in circumstances like these. Here the question arises, What does "not in bondage" mean? The fathers, at least to some extent, the Catholic and older Protestant interpreters, understood it to mean not in bondage to keep up the marriage connection, and hence at liberty to contract a new one. The more recent commentators record the exception preserved in Matthew, "excepting for the cause of fornication," but the plain reconciliation of the passages must be found in the principle that an exception in a fuller document must explain a briefer one, if this can be done without force. Now, as divorce for that one reason was admitted by all, Mark and Luke might naturally take this for granted without expressing it. Secondly, by fornication is intended a sexual crime since the beginning of the marriage state committed by either of the parties with a third person, i.e. adultery begun or completed. And the exceedingly rare crime of sodomy, or bestiality, as the greater, was never included in this except. Again, thirdly, the exception is the sole exception. It cannot be said with any honesty that Christ, in saying...
Roman law adhered, on the whole, to its fatal facility of granting divorces for very slight reasons so long as the Western empire lasted; and even the Eastern empire, after it became Christian, did not move wholly in a new track. Meanwhile, opinion within the Church, and ecclesiastical law, took an opposite course. Over interpretations of Scripture mentioned above, to new views of the sanctity of marriage, and at length to the developed doctrine of the sacrament of marriage, divorce with remarriage was excluded from Christian practice, with the single very rare exception of the case where an infidel or a Jew had deserted and separation and monogamous state thereto remained as the only kind of divorce permissible. The law of all Christian states in the West until the Reformation, and of Roman Catholic states since, has been shaped by canon law, which knows no divorce with remarriage even for the cause of adultery. After the Reformation, when the Protestants had abandoned the doctrine of the sacramental character of marriage, and the Protestant interpreters generally held that malicious desertion, according to the apostle Paul, released the innocent party from the marriage bond altogether, many ecclesiastical ordinances in Protestant Germany permitted divorce with remarriage on this account, as well as for adultery. This Genevian "de omnis ecclesiasticis" of 1541 declare that "if any one makes a business of abandoning his wife to stroll through the country, and continueth unamended, it is provided that the wife be no longer bound to such a man, who will keep neither faith with her nor company." And in the ordinance of Braunschwieg-Grubenhagen for 1581 it is said that divorce shall be granted only for the two reasons which Christ and Paul in the Gospel declare to be sufficient, of which the second is "malicious desertion, running away, and abandonment, whereof St. Paul speaketh, 1 Cor. vii." Still another ordinance, that of Lower Saxony of 1665, says that the parties have to prove one of these two (adultery and desertion) are alleged by certain emperors, as Theodosius, Valentinian, Leo, Justinian, cannot be sufficient for divorce. Some few, it is true, of the earlier Church regulations limit divorce to cases of adultery, but a few others extend it operation beyond the two grounds already mentioned. The Prussian consistorial ordinance of 1584 permits it in cases of plotting to take the life of a consort. A Zurich ordinance of 1595 goes further still, so much so as to desert the principles of Scripture entirely. Not only does it allow divorce in cases of adultery, desertion, and non-cohabitation, but considers these two (adultery and desertion) as "sufficient" and leaves it to the judge to decide what other grounds he will add to them, among which it mentions as possible cases not only cruelty, but insanity and eruptive disease, as leprosy. For the most part only adultery and desertion were, through the 17th and into the 18th century, held to be valid grounds for divorces. But in more recent times the civil law of some German states goes far beyond these limits. We confine ourselves to the Prussian code, where plotting against the life of a consort, grave transgressions against third persons, cruelty, refusal of carnal duties, insanity, impotence, or other incurable bodily disease commencing after marriage, incompatibility of temper and permanent variance, mutual consent without discord when the marriage is childless, are allowed to put an end to the marriage tie. The laws in Baden, and for non-Romanists in Austria, come near to these. It is impossible not to see in such legislation a disregard of the religious character of marriage, a tendency to look at marriage as a mere contract, and to divorce it as a means to gain certain earthly ends. It has forgotten the religious side of life, and thus falls under the influence of Roman law, and looks at purely secular results.

An important chapter in the modern history of divorces would treat of French legislation on that subject. A law passed Sept. 29, 1792, at the opening of the National Convention, overthrew the ancient law which followed the Roman Catholic doctrine of marriage, and opened the way for divorce on three grounds. These are, 1, mutual consent; 2, incompatibility of temper on complaint of either consort; 3, certain determinate causes or motives derived from the condition or conduct of one of the married parties, consisting of reason, condemnation to an infamous crime, crimes, cruelties, or grave injuries committed by either party against the other, notorious licentiousness of morals, desertion for at least two years, absence for at least five without sending news, and emigration from France in certain cases, which was naturally a temporary provision. Separation of body, or a mensa et thoro, was thereafter to be abolished. The divorced parties could marry one another de novo, and could marry other persons after certain short intervals. To a good degree, these enactments follow the Roman law, but one peculiarity of this statute was that the family relatives were to act in the first instance as a kind of court of conciliation, when the parties, or one of them, desired divorce without allegation of crime. Divorces were now exceedingly frequent in France, but became much more easy after the acts of 1798 and 1794, permitting a small sum to be paid to the spouse whose marriage was dissolved. The law of 1792 gave place in 1803 to the new divorce law of the Code Civil, or Code Napoleon, which continued in force until the restoration of the Bourbons. The divorce law of the Code, although, in the main, agreeing with the law of 1792 on the causes of divorce, does away with its family council, restores for the sake of Catholics the solemnity of separation a mensa et thoro, provides for the punishment of the unfaithful wife, and in its minute, tedious processes in the preparatory steps, seems intended to make the obtaining of divorces by mutual consent, and on the ground of incompatibility of temper, very difficult, as well as to leave room for change of mind. Moreover, the limits within which divorce by mutual consent are confined is an observable step in the right direction. The courts, and several distinguished lawyers who were consulted on the articles of the Code, were against granting divorces for incompatibility of temperament, i.e., on the ground of moral presence in any cases, but they could not carry their point. After the restoration of the Bourbons, this title of the Code was abrogated, and France returned to the old system, to which it has adhered, if we are not mistaken, until the present time. In England, until after the Reformation, divorce on sentence of nullity, and divorce a mensa et thoro on the ground of adultery, were within the cognizance of the ecclesiastical court, and no divorce a vinculo was known to the law. Henry VIII was separated from Catherine by the ecclesiastical court on the plea that a marriage with a brother's wife was void ab initio, and therefore no marriage; Anna Boleyn and Catharine Howard were convicted of adultery, and executed on attainder of treason; and Anne of Cleves was only nominally married. There was a project under Edward VI to allow the innocent party, after sentence of divorce, to marry again, but it was never sanctioned. Still, since that time and as a civil law, as a civil law, we confine ourselves to the religious clergy and laity, held such marriage to be lawful, it was more or less practised. Men divorced on sentence of a court from adulterous wives sometimes married again (although the marriage was null and void), because there was no civil law to forbid it. In the first year of James I a statute made remarriage in the
DIVORCE 843

DIVORCE

lifetime of a former husband or wife a felony, yet with the permission of the court. The act should not extend to persons dissolved by divorce, as the deterrent caused by the possibility of an action for nullity and the looseness in hearing and determining cases of divorce is so great that the worst legislation of the French Revolution could not be much more opposed to the true interests of society. The law knows no separation a mensa et thoro, allows immediate remarriage, does not forbid an adulterer or adulteress to be married after divorce to the partner in guilt, nor divorced persons to be remarried to one another. Divorces have, as might be expected, greatly increased with the new legislation, especially since the ommus clause, as it is called, was annexed to the law. In one year, according to a recent report, they bore to marriages the death rate of one in five. One reason for the lamentable state of the population are Roman Catholics, who rarely apply for divorces, and as in a certain grade of society, embracing perhaps half the people, divorces are almost unknown, it may, we think, be safely said that one quarter or one fifth of the marriages of each year, in the lower stratum of Protestant society, if one may so call it, are dissolved by act of the courts. Without question, the family life and morals of a community once most religious, and even now retaining much of steady habit, must be gradually undermined and poisoned by such a social evil (see H. Loomis, "Divorce Legislation in Connecticut," New Englander, July, 1866).

Our limits preclude us from adding more than a word or two in regard to the right legislation on this subject, and the duty of the Church when cases of divorce come before those to whom its discipline is entrusted. 1. A Christian legislator will strive to realize in law what he cannot be the true conception of marriage, and the law of Christ in the Gospel. Only on this subject does Christ legislate; here he sets aside the law of Moses, and this he does in regard to an institution of life concerning which the law must speak. If the Christian legislator does not carry out Christ's principles in regard to divorce, it will not because they are moral rather than legal, but because "the hardness of men's hearts" prevents the introduction of a perfect rule. He will consent with a good conscience to a less perfect law, for the law of divorce permits, and does not require, so that it need bring no Christian man into disobedience to the Gospel. 2. In regard to divorce, we suggest the following: the recognition of the two kinds of divorce, mere separation and that a vinculo, with the reservation of the latter for graver crimes of one party against the other; punishment of the offending party by imprisonment, or deprivation of alimony, or both; prohibition of speedy marriage when it is allowed, of all marriage between one of the parties and a partner in guilt, of all remarriage after full divorce on the ground of adultery; a careful, deliberate process, perhaps before a special court, leaving room for reconciliation, preventing collusion as far as possible, and making the law heighten, if to dissolve the relation. 3. When the state law is not accordant with the law of Christ as commonly received in the churches, what is their duty? One thing is clear, that a clergyman ought not to be compelled to unite in marriage to a new wife or husband a person whom he considers to be unlawfully divorced. The English law exacting from the minister the mission of an established Church from this necessity; the Prussian, if we are not misinformed, is harsh and intolerant in this respect; the French law requires a civil marriage, and leaves it to the consciences of parties and of clergymen to go through with the religious ceremony or not, as they see in heart and conscience. The Christian may with a good conscience join in marriage those whom Christ's law, according to his interpretation of it, keeps apart, as, for instance, a woman, separated from her husband for incompatibility of temper, and
another man. They are not those whom God has joined together, but the man may be married unlawfully parted from her husband, so that she commits adultery in her new marriage. Again, there are questions of discipline growing out of divorces, as when a member of the Church contracts a marriage not forbidden by state law, but forbidden by Christ. Here the rule is tolerably clear. Christ's law must be maintained, whatever the state approves or allows, and maintained in this case by discipline. Only thus can the Church be a witness on the side of Christian morality. Only thus can it guard the sanctities of family life. There is no more reason for omitting discipline for unlawful divorce permitted by the state than for drunkenness, if necessary, against the law. But since the cases of another sort which present serious difficulty, as when a person, having violated Christ's rule of divorce in contracting marriage, becomes a sincere Christian years afterwards, and desires to unite with the Church. Shall such a person be required to separate from his or her former wife before being received into communion? The act would not have been committed with the present disposition, and state law to its performance. We think that in such a case as this, at least in extreme cases of this kind, the communion may be opened to a penitent without conditions.

DIZAHAB (Heb. Di-Zakah), [Heb. Di-Zakah], [Heb. Di-Zakah] [see below], a place in the desert of Sinai, one of the boundary points of the "Arabah," or region where the Israelites wandered (Deut. i, 1). It is probably the same cape now called Duhah (Bobinson, Res. i, 217; ii, 690), on the western shore of the Elanitic Gulf (Schwarz, Pales. p. 212), opposed opposite Sinai; it abounds in palms, and has traces of ruins (Burchhardt, Syrinx, p. 529). We have no doubt whatever about the identification (Landskron, Bibel, i, 255 n.). See WILDERNESS. The name is indicative of the presence of gold there, as that is the meaning of the latter half of the word (so Sept. Karonxovatia, Vulg. ubi curi est plurimum); but the former part of the name is foreign, either with the Aramean expletive - of (literally "that which is"), or from the Arabic  3491  "lord," i. e., possessor of (Genesis, Thes. p. 334). With this import also agrees the description of Ensebius and Jerome (Onomast. s. v. Karav x 3 490, Cata Ta Chrysea), that the mountains in that region (in Phæn, according to the true reading; see Le Clerc in Bonfère's ed.) are full of gold veins; also the modern name, which is in full Minas r-Dahah, "the porch of gold" (Büsching, Erdbeschr. XI, 4, 621).

Doane, George Washington, D.D., L.L.D., Pastor in Trenton, New Jersey, was born in Trenton, N. J., in 1799. He graduated at Union College, Schenectady, at nineteen years old, and then commenced the study of theology. He was ordained deacon by bishop Hobart in 1821, and priest in 1828. He served in Trinity church, New York, three years, and in 1834 was appointed professor of belles-lettres in the Washington College, Ct. He resigned that office in 1828, and soon after was elected rector of Trinity church, in Boston. He was consecrated bishop of the diocese of New Jersey on Oct. 31, 1832. He founded St. Mary's Hall in 1827, and Burlington College in 1846, both of which institutions he however, at his death, left a great debt. His career is one of indefatigable industry and devotion. "I look back," says the bishop of Missouri, "upon the work he accomplished during his episcopate with amaze- ment. The work of three lives was crowded into a bishopric of twenty years." The clergy of his diocese increased, between the years 1830 to 84; 58 churches were consecrated, and the number of communicants increased from 657 to 6000. His energy, however, was greater than his judgment, and his career was not without acts of impiudence, which caused him great trouble. His literary industry was very great, and he had a genuine vein of poetry. His writings, in prose and verse, may be found in The Life and Writings of G. W. Doane, D.D., edited by his son (New York, 1860, 4 vols., 8vo), of which vol. i contains a memoir and his poetical writings; vol. ii and iii consist of sermons and episcopal charges; vol. iv of educational writings and orations. Bishop Doane died at Riverside, N. J., April 27, 1859. —American Quart. Church Review, New York, 1859, and April, 1861.

Dob. See BRAS.

Dobber, Leonhard Johann, a Moravian missionary, was born in 1706 at Münschroth. He went to Herrnhut in 1725, and in 1728 was sent as first Moravian missionary to the negroes of St. Thomas. He returned in 1728; became general elder of the congregation; labored for some time for the conversion of the Jews in Amsterdam; then in 1741 resigns of his office as general elder, which at the London Conference of Sept. 16, 1741, was transferred to Christ himself. In 1747 he became bishop of the Moravians. He died in 1766. He is the author of many hymns in the Moravian Hymn-book.

Dobmayer, Marian, a German Jesuit and theologian, was born at Schwandorf, Oberpfalz, Oct. 24, 1728, entered the Jesuit order, and in 1753 became general. In 1773 became a Benedictine. In 1778 he was ordained priest, and in 1781 he became professor at the Lyceum of Neuterg; in 1794 professor of theology at Ingolstadt. In 1790 he returned to the Benedictine monastery at Weissenchofe, and thence went to Amberg as professor of theology, in which capacity he died, Dec. 21, 1803. His chief works are his Consecrata Theologiae Dogmaticae (Amberg, 1793); Systema Theologiae Catholicae (posthumous; 1807-1819, 8 vols., 8vo), of which an abridgment was published in 1828, edited by Professor Salomon of Regensburg.—Weitzer u. Welte, Kirchenlex., 7th ed., 186.

Dobritzhofer, Martin, a Jesuit missionary, was born at Grätz, in Styria, in 1717. He was admitted to the Society of Jesus in 1736, and was sent in 1749 as missionary to Paraguay, where he spent eighteen years among the Abipones and Guaranas, when, on the expulsion of the Jesuit missionaries from Spanish South America in 1767, he was compelled to return to Europe. In 1774 he published Historia de Abipones, et equitarii belli-sociaque Paraguayarum Nationum (Vienna, 3 vols., 8vo, 1788 84). It is very ample and minute, but, though it contains many curious and interesting facts, abounds in extravagant statements. Dobritzhofer's book was a favorite with Soutey, and at his suggestion Soutey translated it into French, and it was translated into German. Dobritzhofer died at Vienna in 1791. —English Cyclopedia; Hoefer, Newe. Biogr. Générale, xiv, 408.

Doctis. Doctism, which in the latter half of the second century took form in the sect of the Valenti- nians—so named after Valentinus—i.e., in fact, only a form of Gnosticism—a form, moreover, which played a most important part in the general movement of Gnosticism. Its prominent teacher is, as Valentinus—a man of great depth, ingenuity, and power of imagination—Cassiusius, and Hardanus, are reckoned among the Gnostics. How Dobtis was detached from general Gnosticism is not easy to be stated in a brief article; the Church histories must be consulted on this point. The dualism of the Oriental philosophy, the elements of which were extensively embraced in all forms of Gnosticism, especially the view which held to the inherent evil of matter, rendered it impossible for the Gnostics to come to any right view of the union of the divine and human in Christ's person. In order to remove the author of all good from all contact with matter, which they conceived to be the same as evil, they called in the aid of Oriental philosophy in order
DOCTOR 845

DOCTOR

to people the space between God and matter with a vast succession of superhuman beings as mediators between God and the world. These, emanating from the Deity, were called sons; among these the highest rank was assigned to Christ. Here, however, they seem to have split off from the Gnostic theocentric group. Thus was created a more man, and maintained that the son Christ descended upon the man Jesus at his baptism, and left him immediately before his crucifixion, so that Christ was not, in fact, subjected to pain and death; while others held that the body, with which Christ appeared to be invested, was unlike, but unessential or ethereal, or, at least, immaterial: these last were called Docetae” (Waddington’s Hist. of the Church, p. 74, 75). They denied the whole humanity of Christ, regarding it only as a deceptive show, a mere visio. This the sense of the Church could not bear. "They who would make nothing but a spectre are themselves spectres—spectral men," is an expression ascribed to Ignatius. Tertullian says to the Docetae, “How is it that you make the half of Christ a lie? He was all truth.” And again, “You are offended when the child is nourished and fondled in its swaddling-clothes. This reverence shown to nature was applied to Christ.” The same thing was done with the law. "If Christ, at least, loved man in this condition. For his sake he came down from above; for his sake he submitted to every sort of degradation—to death itself. In loving man he loved even his birth, even his flesh" (Neander, Church Hist. II, 860). Neander says: "One consequence of the disruption of the divine and the human by Gnosticism was Docetism, which altogether denied the real, humanly-sensible side of Christ’s life, and only acknowledged as real the revelation of the divine Being. Preparation for this view had been made among the Jewish theologians by the representation that it was one of the privileges of a superior spirit to appear in any form they pleased. Philo’s explanation of the Angelophanes, and the Christology of the Clementine homilies, furnish evidence of this. According to that Docetic conception, the heavenly Being, whose nature is pure light, suddenly came forth as a sensuous apparition. All sensuousness is only an illusion practised by the divine Genius. Hence the latter by no means attacked himself to the Demiurgos; only an appearance of him descended into this world” (Neander, Hist. of Dogmas, i, 194).

Docetism was a most subtle element, which wrought variously before it had any discernible concentration in any leading men or sects, and it infused its unreal and ethereal nature into many forms of Christianity, including the most famous and by far the most important of the great Gnosticism itself. It was a deep, natural, rationalistic, pseudo-spiritualistic, anti-incarnation element. It was firmly set against the real union of the divine and human in Christ, and against all dogmas which depend upon the reality of the incarnation. Hagenbach says: “The Docetists, whom Ignatius (ad Eph. 7, 8, ad Smyrn. c. 1-8) already opposed, and probably even the apostle John (1 John 1, 8-3; iv, 2 sq.; 2 John, 7) on the question whether he alludes to his prophetic to his gospel, see Luke, in loc.) may be considered as the forerunners of the Docetists (Berton, Explic, p. 56 sq.)” They form the most treasured epistles of the Church of the Ebionites, inasmuch as they not only maintain (in opposition to them) the divinity of Christ, but also merge his human nature, to which the Ebionites exclusively confined themselves, in a mere phantom (by denying that he possessed a real body). Ebionism (Nazarianism, the name by which it is known according to Schleiermacher) (Glaubenslehre, i, 124), natural heroism, and complete each other, as far as this can be the case with one-sided opinions; but they quite as easily pass over from the one to the other (comp, Dorner, Geschicht der Christologie, p. 949 sq.)” (Hagenbach, Hist. of Doctrines, i, 45). The fathers were compelled to war with this subtle Docetism constantly, as it ever broke out in new places, and attacked the true Christian faith at most unexpected points. Even some of them, as Clement and Hilary, were temporarily ensnared by some of its subtleties. Docetism (the speculative view of Christ’s person) reappears in modern times in the mystic and spiritualist sects, as a device to reduce Christianity to an aesthetic religion, in which no realities are necessary but such as the human mind can supply as ideas” (Martensen, Dogmatika, s. 128). See Schaff, Hist. of the Christian Church, i, § 71; Neander, Church History (Torrey’s edit. 1), 386, ii, 713; Hase, Church History, Histories of Doctrines; Dorner, Doctrine of the Person of Christ (Edinb. transl.), div. i, vol. i.

Doch. See DOCTORS.

Dochan. See MIILET.

Doctor (διδασκάλος), a teacher, as the terms both signify (Luke ii, 46; v, 17; Acts v, 34). Anciently learned men among the Jews were denominated μαθητης, chabams, sooth, as among the Greeks they were called φοινος, wise. In the time of our Saviour the common apppellative for men of that description was υμουματετο, χειροκτονας, “teacher of the law,” or υμουματος, “lawyer,” less exactly γοαματετος; in the Hebrew ב תלמיד, meaning “scribe.” They were addressed by the honorary title of רבי, Rab, רבי, Rabbi, great, or master. The Jews, in imitation of the Greeks, had their seven wise men, who were called Rabbons (q.v.), of which number Gamaliel was one. They called themselves the children of wisdom, an expression which corresponds very nearly to the Greek ϕιλοσοφος, “philosopher” (Matt. xi, 19; Luke vii, 36). The heads of sects were called local fathers (Matt. xii, 27; xxiii, 1-9), and the disciples, μαθητης, talmidim; were denomieiated sons or children. The Jewish teachers, at least some of them, had private lecture-rooms, but they also taught and disputed in synagogues, in temples, and, in fact, wherever they could find an audience. The method of these teachers was the same with that which prevailed among the Greeks. Any disciple who chose might propose questions, upon which he was the duty of the teacher to mark and give their opinions (Luke ii, 46). See DISCIPLINE.

There is a difference of opinion as to what part of the Temple it was in which our Saviour was found sitting with the doctors. There was no school in the Temple; but there was a synagogue, and several small courts of country synagogues, including the great Synagogue itself. It is very probable our Lord was offered a seat among them, from their being struck with admiration at the searching power of his questions, and the depth of knowledge which they displayed. But it is also possible that he might have sat on the floor with other young persons, while the doctors sat on raised benches, according to their custom. This was sitting at their feet; and as the benches were often raised in a semicircle, those who sat or stood in the area might well be said to be “among” the doctors. See JESUS; TEMPLE.

Teachers were not tested by a formal act of the Church or of the civil authority; they were self-constituted. They received no other salary than some voluntary present from the disciples, which was called τιμη, rendered “honour” (1 Tim. v, 17), and they acquired a subsistence chiefly by the exercise of some art or handicraft. See TRACHER. According to the Talmudists, the rabbis were bound to hold no conversation with women, and to refuse to sit at table with the lower class of people (Matt. ix, 11; John iv, 27). The subjects on which they taught were numerous and of great interest, of which there are abundant proofs in the Talmud. See SCHOOL.

Doctors of the law, frequently mentioned in the New Testament, were chiefly of the sect of the Pharisees;
DOCTOR 846  DOCTRINE, CHRISTIAN

but they are sometimes distinguished from that sect (Luke v. 17). See LAWREN.

A DOCTOR was established after the de-
struction of Jerusalem at Babylon and Tiberias, a sort of
academical degree was conferred, the circumstances
attending the conferring of which are thus stated by
Maimonides. (1.) The candidate for the degree was
examined both in reference to his moral character and his
knowledge. (2.) After undergoing this examination with approbation, the disciple then
ascended an elevated seat (see Matt. xxiii. 9). (3.) A
writing tablet was presented to him, to signify that he
should write down his acquisitions, since they might escape from his memory, and, without being written
down, be lost. (4.) A key was presented to him, to
signify that to him was now opened the treasure-house of
knowledge (see Luke xi. 52). (5.) Hands were laid upon
him; a custom derived from Numbers xxvii. 18.
(6.) A certain power or authority was conferred upon
him, probably to be exercised over his own disciples.
(7.) Finally, he was saluted in the school of Tiberias
with the title of Rabbi, and in the school of Babylon
with that of Master. See RABBI.

DOCTOR, primarily a teacher. 1. The title Doctor
of Theology (Doctor Theologiae) is the highest academi-
cal degree in theology. In England and America it
is generally given under the title Doctor of Divinity
(Doctor Legis Divinj, abbreviated D.D.), or Doctor of
Sacred Theology (S. T. D.).

2. The word was used at an early period as a general
expression for a teacher of Christian doctrine, and later
it was applied (before it became a special academical
title) to men eminent for their knowledge in theology,
and for their skill in teaching it. Pre-emminently the
title Doctors of the Church (doctores ecclesiae), was
given to four of the Greek fathers, viz. Athanasius,
Basil, Gregory Nazianzen, and Chrysostom; and to
three of the Latin, viz. Jerome, Augustine, and Greg-
ory the Great. To a few great men among the schol-
astics it was given with an additional epithet to
designate some special intellectual quality in gift: thus,
in the 12th and 13th centuries, the following doctors
of the Church were thus honored: Thomas Aquinas,
Angelicus; Johannes Bonaventura, Seraphicus; Jo-
annes Duns Scotus, Subtilis; Raimundus Lullus, Il-
luminatus; Alainus de Insula (de l'Ile), Universalis;
DOMINICUS de Sorano, Regulus; Aquinas, Ordine
de Rimi, Authenticus; Johannes Taulerus, Illumi-
natus; Johannes Gersonus, Christianissimus; Alex-
ander Hales, Irrefragabilis; Roger Bacon, Admirabili-
is; William Occam, Singularis.

3. The academical degree of doctor seems to have
arisen in the 12th century [see DOCTOR]. When
In-
erius of Bologna has the credit of originating the cor-
monial of investiture for the doctorates of law.
The University of Paris almost immediately followed in
the footsteps of Bologna, the first reception of doctors
having taken place in the year 1145, in favor of Peter
Lombard and Gilbert de la Porre, the greatest theo-
logians of the day. Subsequently to this period the
emperors were accustomed to confer upon the uni-
versities the right of appointing doctors of law by
their authority and in their name. The example of
the emperors was speedily followed by the popes, who
conferred corresponding rights with reference to the
canon law. From the 11th to the 19th century there
seems reason to believe that, both in Italy and France,
the terms master and doctor were pretty nearly syn-

nomous. According to Spelman, the degree of doctor
was not given in England until the time of king John,
A.D. 1207.

4. For modern times, the title Doctor of Theology is
conferred by universities and colleges, and also by the
Pope. In France it is bestowed, after suitable ex-
amination, on any ecclesiastic who has taken the degree
of doctor in a faculty of theology and in some univer-
sity. In the faculty of theology in Paris, the time of
necessary studies is seven years: two of philosophy,
after which they commonly receive the cap of master
of arts; three of theology, which lead to the degree of
bachelor in theology; and two of licentiate, during
which the bachelors are continually exercised in the-
sees and arguments upon the sacred Scriptures,
the scholastic theology, and ecclesiastical history. Af-
ter further examinations, the doctorate in full is con-
ferred. In Germany, Great Britain, and the United
States, the degree is now generally conferred as an
honorary one (honoris causa), without examination,
upon men having distinguished themselves as teachers
of Christianity by writing or speech. In the univer-
sities of Oxford and Cambridge (England) the academ-
cal degree of doctor is still, however, given upon ex-
amination, as long as the students have not reached the
eleven years standing; in Cambridge, to masters of
twelve years standing, or to bachelors in divinity of
five.

DOCTORS COMMONS, formerly the college of the
doctors of civil law in London, wherein the Court of
Admiralty and the principal ecclesiastical courts were
held. It was founded by Dr. Henry Harvey, dean of
the Arches, previous to which time the doctors had
lived in Paternoster Row. The original building was
burned in the great fire in 1666, when the doctors re-
moved for a time to Exeter House. After some time
the Commons was rebuilt, and the doctors returned to
their former quarters. The college was long
wanted to hold their sittings at Doctors Commons are the
Court of Archers, the Archdeacon's Court, the Pre-
rogative Court, the Faculty Court, the Court of De-
legates, and the Court of Admiralty. The Prerogative
Court is now amalgamated in the Probate Court (q. v.),
and the Court of Delegates (q. v.) belongs to the judi-
cial council of the privy council. At the time
when these courts were all in full operation, their times
of session were regulated by terms, as in the courts of
equity and common law, a certain day in the week be-
ing assigned to each court for hearing its causes.
The Court of Archers, the Archdeacon's Court, the Faculty
Court, and the Court of Admiralty, are now the only
courts which continue to exercise their functions in this
once famous spot. The Court of Archers (so called from
having sat in Archbus, or under the arches or bows
of Bow Church, Cheapside) is the court of appeal
belonging to the archbishop of Canterbury. The judge
in this court is the Archdeacon and Dean of the
archdeaconry, the presiding judge in the ecclesiastical
jurisdiction, as the archbishop's principal official, in all
ecclesiastical causes within the province of Canter-
bury.

Doctrino Theological. See DOGMATIC THEO-
LOGY; THEOLOGY.

Doctrine. See DOGMA.

Doctrine, Christian, MONASTIC CONGREGA-
TIONS OF (DOCTRINA, DOCTRINARIAS). 1. Priests
of the Christian Doctrine, a congregation of secular
priests, the chief object of which was to instruct the poor
and the ignorant. Their founder, Cesare de Bus, was
born February 8, 1544, at Cavaillon, in France.
He took orders for the purpose of obtaining a rich bene-
fit, and for some time led a dissolute life in Paris; but
on his return to the quiet Cavaillon he changed his
mode of life, and devoted himself with great zeal to
the care of the poor. It is also said that he
extend his philanthropic activity, he united with four
other priests of Cavaillon, and now added to his former
labors that of catechizing poor people and the children.
In 1583 the association obtained a special authoriza-
tion from the Pope. When the number of members
had increased to twelve, they elected Cesare de Bus as
their superior. The new superior wished to consoli-
date the association by introducing the simple vows.
This induced a number of members to quit; but in
1597 pope Clement VIII sanctioned the association as
a society of secular priests. The founder soon after
Priest of the Christian Doctrine

became blind, but continued to preach and work for the extension of his society until his death in 1697. The successor of De Bus, Vigier, caused new trouble with the bishops; in an attempt to con
cord the society with a regular "monastic congregation" (q. v.) by the introduction of solemn vows. This led pope Paul V to subject the society to the general of the Somascanis. This measure, however, increased the disturbance, and pope Innocent X on that account repealed the union, and subjected the priests of the Christian Doctrine to the diocesan bishops. These were henceforth again a society of secular priests, who only took simple vows. On the outbreak of the French Revolution, the society had in France 3 provinces, 15 houses, and 25 colleges. The society was abolished by the French Revolution; their last superior, M. de Bonnefous, died in 1806.

2. A Congregation of Sisters of the Christian Doctrine was likewise founded by Cesar de Bus. They were more commonly called Ursulines of Toulouse.

3. A Congregation of Doctorianis was founded in Italy about the middle of the 16th century by Marco de Sadis Cusani. The object of this society was likewise to give instruction. Benedict XIII and Benedict XIV gave to this society the direction of several elementary schools in the city of Rome. The society did not extend much beyond Rome, where they still gave elementary instruction in a few schools.

**Doctrines, History of (Germ. Dogmengeschichte), a special branch of Historical Theology.**

1. The conception and the definition of History of Christian doctrines depend upon the conception and definition of what constitutes a Christian doctrine (dogma). For evangelical Christians, who believe that nothing should be received as Christian doctrine but what is clearly taught in the Word of God, the history of doctrine is a history of the efforts made by theologians and religious denominations to develop and shape the substance of the Christian faith into doctrinal statements; of deviations from the pure teachings of the Bible to the development of the theology of the Bible. Roman Catholics, who believe in the sole infallibility of their Church, and deny that she has ever added anything to the teachings of Jesus, define history of doctrine as a scientific statement of the manner in which the several doctrines of the Church have been discussed, developed, and, at last, authoritatively defined. To the Rationalist, who does not believe in the immutability of the word of the Bible, the history of doctrines is nothing but a history of the doctrinal controversies in the Christian denominations. From the standpoint of evangelical theologians, the history of doctrine has an apologetic character with regard to Bible theology: the Roman Catholic theologians make it an apology of all the doctrines defined by the Church; while in the treatment by a Rationalistic author it will lose the character of a branch of Christian theology, and appear as simply historical. But, though conception and definition, and, consequently, mode of treatment and division of matter vary, all works on the history of doctrines embrace a history of the controversies which have been carried on in the Christian Church on doctrinal questions.

2. As regards the relation of the History of Doctrines to other branches of theological science, it is evidently a subdivision of Church history, separately treated on account of its special importance for theologians, and on account of its wide ramifications. It presupposes Biblical theology as its basis (or as its first period). As it recounts the formation and contents of public confessions of faith, and the distinguishing principles set forth in them, it forms itself the basis of symbolism, or comparative dogmatic theology, which stands to it in the same relation as Church statistics to the history of the Church. As the opinions of the prominent, especially the earliest, fathers of the Church are of considerable importance in the history of any Christian doctrine, it has frequently occasion to refer to the results of Patriarchal, Cappadocian, Jacobite, Syrian, Arian, Donatist, and Pelagian "heresies," the beginning will always have to be noticed in a comprehensive history of doctrine; its further progress only in so far as the heresies remain of importance for the Christian world at large. To a "general history of religion" it may have occasionally to refer; and with the history of philosophy and the history of Christian ethics it may sometimes have to travel over the same ground, though in the latter case it will treat the same subjects from a different point of view. Archology, and the sciences auxiliary to Church history, such as universal history, ecclesiastical philology, ecclesiastical chronology, diplomatics, etc., also aid in furnishing material.

3. The value of the History of Doctrines, in a scientific point of view, is evident. Though the history of no doctrine can have a decisive influence in determining the faith of an evangelical theologian, who to this end searches the Bible exclusively, it is for him the most important portion of the history of the Christian Church, leads him into a more minute contemplation, and frequently into a deeper insight of Biblical doctrines, and furnishes him with powerful weapons, both apologetic and polemic, against the various forms of error.

4. The periods of the history of doctrines have been differently determined by the writers on the subject. Hagedorn assumes the following five periods: 1. The Age of Apologetics, from the close of the apostolic age to the death of Origen (A.D. 380–254). 2. The Age of Polemics, from the death of Origen to John Damascenus (284–780). 3. The Age of Systems, from John Damascenus to the Reformations (Scholasticism in its widest sense) (780–1517). 4. The Age of Peculiar Systematic Symbolism (the conflict of confessions), from the Reformation to the rise of the Philosophy of Leibnitz and Wolf in Germany (1517–1720). 5. The Age of Criticism, of Speculation, and of the antagonism between Faith and Knowledge, Philosophy and Christian Charity, Reason and Revelation, including the attempts to reconcile them, from the year 1720 to the present day. Neander's division is: 1. To Gregory the Great. 2. To the Reformation. 3. From the Reformation to the present time. Münchener, Engelhardt, and Meier adopt the division into Ancient, Medieval, and Modern times. Klee (1803) with Helmchen coincided with the division of Neander. Bungarten-Cranz (Rationalist) adopts in his Compendium six periods: 1. To the Council of Nice; Formation of the System of Doctrines by reflection and opinion. 2. To the Council of Chalcedon; Formation by the Church. 3. To Gregory VII; Confirmation of the Systems by the Historians of the end of the 15th century; Confirmation by the Philosophy of the Church. 5. To the beginning of the 18th
DOCTRINES, HISTORY OF

century; Purification by Parties. 6. To the present time; Purification by Science. Klerik (High-Church Lutheran) divides as follows:

1. Age of Formation of Doctrines.
2. Age of Symbolical Unity.
3. Age of Completions.
4. ** Dissolution.**

Greek. Analytic. Theology.

** Rosenkranz (in his Encyclop. 2d ed. p. 259)** makes, according to the philosophico-dialectic categories, the following division: 1. Period of Analytic Knowledge, of substantial feeling (Greek Church). 2. Period of Synthetic Knowledge, of pure subjectivity (Rom. Cath. Church). 3. Systematic knowledge (Protestant Church), which combines the analysis and synthesis in their unity, and manifests itself in the stages of symbolical orthodoxy, of subjective belief and unbelief, and in the idea of speculative theology (Protestant Church).

5. The ideal of a history of doctrines is given as follows by Dr. H. B. Smith (Bibliotheca Sacra, iv, 560 sq.): "It should be the object of a history of doctrines to give in the truest possible manner the order in which divine truth has been unfolded in the history of the Church. It must trace down the whole course of doctrinal discussion, give the leading characteristics of each epoch, as distinguished from all others, and at last all its problems. It must be the business of the history of doctrine to distinguish the problems which Christianity has presented to it. It should be a faithful mirror to the whole doctrinal history of the Church. It must interpret each writer according to the sense of the age in which he lived, and not bring in subsequent views and modern notions to explain the meaning which an ancient writer gave to a phrase or doctrine. It must show what are the points of difference in the reiterated controversies about the same doctrine. It must carefully distinguish the theological and systematic spirit of the different ages of the Church, and not force a subsequent development upon an antecedent era. It must bring out into clear relief the individual personalities of each age, and, in exhibiting their systems, distinguish between the peculiar notions of the individual and the general spirit of his times. It must show how controversies about one series of doctrines have modified the course of belief respecting other doctrines; how each doctrine has acquired a position, according to its position in the mind or system of an author, or in its relation to the leading controversies of the age. It must show when a dogma was held strictly and when loosely; when disconnected from a system and when embraced in a system. It must carefully guard against a theory of supposing that a doctrine was not carefully discussed by the inquisitive and discriminating intellect, it was not really cherished as a matter of faith. This is an error into which many have fallen. But we might as well suppose that men did not believe they had understanding until they discussed the operations of this faculty, or did not trust to their senses until they invented a theory of sensation. Such a history must show the influence which councils, confessions, and systems have had upon their respective eras; how preceding times led to such expositions of the faith, and subsequent times were affected by them. It must exhibit clearly the ruling ideas, the shifting notions in the system, and how each predominant idea has modified the component parts of the whole system. It will not neglect to notice the influence which national habits and modes of thought, which great civil and political changes, which the different philosophical schools have had upon the formation of dogmas; nor, on the other hand, will it fail to notice how the Christian faith has itself acted upon and influenced these in its turn, if indeed the latter be not the point of view which should have the precedence. Such a history must finally present before our eyes a picture of a real historical process just as it has been going on, and the more faithful it is to all the leading events of the case, the more philosophical and complete will it be as a history. By such an exhibition, the whole doctrinal progress of the Christian Church being set before our eyes, we shall, in comparing its results with our own systems, be able to see wherein we are defective, one-sided, and partial; wherein our systems need to be revised, filled or chastened; whether they may be animated by a new life, and gather better nurture; and by comparing the results with the Scripture, we shall be able to see what parts of its sacred truths have been least discussed, what problems yet remain to be solved, what is still to be done in order that our divine system of faith be wholly formed, and carried out in the light of the new era. In short, the history of the Church is to order all that its truths and doctrines stand out as distinctly and majestically in the history of the race as they do in that revelation which was given to control and determine this history.'"

6. The history of doctrines has been treated as an independent branch of theological science only in modern times, yet some of the earlier writers of Church history, as well as the theologians, prepared the way for it. Thus the works of Ireneaus, Hippolytus, Origen, and Tertullian against the heretics furnish much valuable material. Much, too, is found scattered in the apological and polemical literature of the earlier fathers. The first and most important step toward a definite preparation for a history of doctrines is found in the works of the Roman Catholic theologians Petavius (Opus de Theologia Dogmatica, 1644-50), Thomassin (Dogmatum Theologicorum, 1684-91), and Dumesnel (D. doctrinae et disciplinae Exegetica, 1720), and of the Protestant theologian Forbesius a Corse (Instructiones Historico-theologicae de Doctrina Christiana, 1708), who undertook to prove, especially in opposition to cardinal Bel- larmin, the agreement between the doctrines of the Reformers and the opinions of the earlier fathers. A direct transition to the treatment of the history of doctrines as a separate science may be found in the preface by Semler to the Evangelische Glaubenslehre of J. S. Baumgarten (Halle, 1758-60). The literature of special compendiums and manuals of the history of doctrines begins at the close of the last century, and has more recently become quite copious. The large majority of these works belong to Germany. Among the earliest is a work written by others of countries. The most important works on the subject are the following: S. G. Lange, Ausführliche Geschichte der Dogmen (Leipzig, 1796, incomplete); J. Ch. Wundemann, Geschichte der christlichen Glaubenslehren, etc. (from Athanasius to Gregory the Great, 300 A.D., to 1600 A.D.); W. Herrmann, Lehrbuch der christl. Dogmengeschichte (4 vols., Marburg, 1797-1809; only to the year 604; the first treatise in the pragmatic method), and Lehrbuch der christl. Dogmengeschichte (Marburg, 1812, 3d ed. revised and continued by D. von Collin, Husfeld, and Neudecker, Cassel, 1821-1838, 3 vols., 1836, Eng. translat. (Compendium) by Mardock, New Haven, 1830, 12mo); F. Münster (Danish bishop), Handb. von Entwickelung der Christl. Dogmengeschichte (edit. by J. G. v. Engelhardt, Erlangen, 1822-23, 2 vols.); F. G. Rupertus, Gesch. d. Dogmen (Berlin, 1831); C. G. H. Lehmann, Lehrbuch der christl. Dogmengeschichte, (Leipsic, 1832, 2 vols. 8vo) and Compendium der Dogmengeschichte, (ed. by Haase, Leipsic, 1840-46, 2 vols.); C. G. H. Lentz, Geschichte der christl. Dogmen (Helmst. 1834-35, 2 vols.); J. G. v. Engelhardt, Dogmengeschichte (Neustadt, 1839, 2 vols.); F. C. Meyer, Lehrbuch der christl. Dogmengeschichte (Berlin, 1840); K. R. Hagenbach, Lehrbuch der Dogmengeschichte (Leipsic, 1840, 5th ed. 1867; Eng. transl. by C. W. Buch, Edinburgh, 1846, 3d ed. 1858; the English transl. revised, with large additions from the 4th German ed. and other sources, by H. B. Smith, 2 vols.)
DOCTRINES, HISTORY OF

No copious or complete history of doctrines has been produced in England; but the great writers of the English Church, treating special topics, have largely illustrated them from his history. Through comprising no continuous and entire history of Christian doctrine, and even when investigating a particular subject, often doing it incidentally, the labors of Hooker and Bull, of Pearson and Waterland, are every way worthy to be placed beside those of Baur and Dorrer. The learning is as ample and accurate, the logical argument as convincing, and the style as much the more the less unequal" (Shedd, Pref. vii). The writer just cited has the honor of having produced one of the first books of the class in English literature (A History of Christian Doctrines, by William G. T. Shedd, D.D., New York, C. Scribner, 8d ed. 1865, 2 vols. 8vo). This work is candid, luminous, and all thorough, though it does not aim at a full treatment of all topics in Christian theology. "It gives the results of extensive reading, and the analogies of a patient and devout thinker. Holding firmly to the great Puritan theology, Dr. Shedd shows a mastery of modern German speculation; and while his pages are not burdened with copious notes, or enriched with the laboriously collated extracts with which Hagenbach or Gieseler favor us, the gist of all the controversies is well indicated" (British Quarterly, April, 1865, p. 926). The only other work of the class in English literature is Historical Theology, a Review of the principal doctrinal Discussions in the last century, by William Cunningham, D.D., principal of New College, Edinburgh (2d ed. 1864, 2 vols. 8vo). This is a posthumous work, edited from Dr. Cunningham's college lectures by his literary executor. Of course it has not the compactness or the finish which it might have had if prepared for the press by the author himself; but it is, nevertheless, a very valuable contribution to historical theology.

The history of creeds and confessions of faith, so far as relates to the doctrinal principles set forth in them, belongs to history of doctrine; but it is now generally treated as a separate branch of historical theology, under the name of Symbolics. See Confessions; Carrels; Symbolics.

Tables exhibiting the history of doctrines have been published by Hagenbach, Tabellarische Überblick der Dogmengeschichte bis auf die Reformation (Basel, 1825); Vorländer, Tabellen-übersicht der Darstellung der Dogmengeschichte (Mannin, 1855-1856, 3 vols. 8vo); Lange, Tab. der Kirch.-u. Dogmengesch. (Jena, 1833).

In addition to the general works on the history of doctrines, there are a number on special periods (as the theology of the apostolic fathers), and also monographs on special doctrines (as the doctrine of the Person of Christ, of the Logos, etc.), all of which, if noticed in the articles devoted to these special subjects. Outlines of the history of the principal doctrines are also more or less given in the general "Church histories," and:

II.—H H H

We refer to the special articles on this Cyclopaedia for scientific information on these branches of scientific theology for the literature.

DODAI (Δοδάς v. r. Δωδαί; Vulg. Dodach; Synt. Dodah), a "little hold" (ῥυπερυμπρής; Vulg. munificans), near Jericho (1 Mac. xvi, 15; compare verse 14), built by Ptolemeus, the son of Abubus, and in which he entertained and murdered his father-in-law, Simon Macabæus, with his two sons. By Josephus (Ant. xiii, 8, 1; War, i, 2, 8) it is called Dagon (Δαγώρι), and is said to have been "one of the fortresses (παράπλωοι) above Jericho." The word is probably the Aramaean Dakeka, a watch-tower (Grimm, Etym. Handb. in loc.). The name still remains in the neighborhood, attached to the ancient and excellent springs of Ain-Duk, which burst forth in the Wady Nâvîm, on the foot of the mountain of Quaranitania (Kuruntil), about four miles N.W. of Jericho (Robinson, Res. ii, 260). Above the springs are traces of ancient foundations, which may be those of Ptolemy's castle, but more probably that of the Temples, one of whose stations this was (see Münster, Statutenb. der Ord. des Tempelr. i, 419). It stood as late as the latter end of the 13th century, when it was visited by Brocardus, who calls it Deker (Decker, Terre Sancte, ch. vii, p. 176, ed. Bonfrie in Onomast.).

DOD, Albert Baldwin, D.D., an eminent Presbyterian minister and mathematician, was born in Mendham, N. J., March 24, 1805, and graduated A. B. at Princeton in 1822. In 1826 he became tutor, was licensed to preach in 1829, and in 1830 was appointed professor of mathematics in Princeton College. He filled the chair of the same signal ability for fifteen years, and died, after a short illness, Nov. 20, 1845. To a remarkable aptitude for mathematics he added an acute metaphysical turn and a taste for general literature, so that his mental culture was broad and catholic. He wrote several articles of great value in the Princeton Review, and among them one on Transcendentalism (vols. xi, xii), which was afterwards reprinted as a separate pamphlet on account of its masterly treatment of the subject.—Sprague, Annals, iv, 737.

DODG, John, an eminent Puritan divine, was born at Shottedge, Cheshire, England, in 1547, and was educated at Jesus College, Cambridge, where he became fellow, and resided for sixteen years. At college he became greatly attached to Mr. Scott, a divinity student and a preacher. His first settlement was at Hanwell, Oxfordshire, in 1581, where he remained twenty years, and was very popular and useful. He was suspended for nonconformity by Dr. Bridges, bishop of Oxford, and went to Cannons' Ashby, in Northamptonsbire, where he was again silenced on a complaint to king James by bishop Neale. After the death of king James he gained liberty to resume his public labors, which he did with unremittted faithfulness and success till his death in August, 1645, at Pawsley, Northamptonshire, a living to which he was presented in 1624. He was held in an excellent esteem especially in Holrew. He published An Exposition of the Proverbs (London, 1608, 4to) : Sermons on Lamentations iii (London, 1608, 4to) : A Remedy against Contentions (London, 1609, 4to) ; and, together with Robert Cleaver, An Exposition of the Ten Commandments, with a Catechism (London, 1632, 4to).

DODAY (Heb. Doday, דודָי, prob. another form for Dodo; Sept. Σωδα v. r. Δωδαί and Δωδαί, Vulg. Duda), an Abolite, the chief officer for the second month under David (1 Chron. xiv, 4); probably the same as Dodo (q. v.), which, except Eleazar was one of David's three chief brave's in the xxiii, 9; 1 Chron. xi, 12). By some the name of a 12, "Eleazar the son of," are supposed "done of the retenpts of dentally escaped in transcription from having to have
DODANIM
Chron. xxvii, & making this person the father of the military character there spoken of.

Do'danim (Heb. Dodanim', דודנים, deriv. unknown; Sept. 'Pōdiw, Vulg. Dodanimum, a family or race descended from the fourth son of Javan, the son of Japheth (Gen. x. 4). The author's authority to the form of the name in the Hebrew text in Dodanim in Genesis, but Rodanim (רוּדַנִים) in the text of the parallel passage (1 Chron. i. 7, margin רוּדַנִים, Sept. again Pōdiw [v. r. דודנים]), and Vulg. Dodanim, A. V. 'Dodanim'—Dodanim) appears in the Syriac, Chaldee, Vulgate, Persian, and Arabic versions, and in the Targum of Onkelos; Rodanim is supported by the Sept., the Samaritan version, and some early writers, as Eusebius and Cosmas. The weight of authority is in favor of Dodanim; the substitution of 'Pōdiw, Rōdānīm, in the Sept. may have arisen from familiarity with that name (compare Ezek. xxvii, 15, where it is a synonym substituted for Dedan). Dodanim is regarded as identical with Dardani (Genesius, Thesaur. p. 1260), the latter, which is the original form, having been modified by the influence of the Greek name, Pātrios, as in Barmilcar and Bionilcar, Hamilcar and Haimilco (Hall. Lit. Zeit. 1841, No. 4). Thus the Targum of Jonathan, that on Chronicles, and the Jerusalem Talmud, give Dardania for Dodanim. The Dardani were found in historical times in Illyricum and Troy: the former dimly represented their ancient seat as the most eastern, the latter probably a semi-Pelasgic race, and grouped with the Chittim in the genealogical table, as more closely related to them than to the other branches of the Pelasgic race (Knobel, Vollkertauf, p. 104 sq.).

The similarity of the name Dodani in Ephraim (Strabo, vii. 227 sq.) has led to the identification of Dodanim with that place (Michaelis, Spicileg. i. 129); but a mere local designation appears too restricted for the general tenor of Gen. x. See ETHNOLOGY. Kalisch (Comm. on Gen.) identifies Dodanim with the Daumians, who occupied the coast of Apulia: he regards the name as referring to Italy generally. The wide and unexplained difference of the names, and the comparative unimportance of the Daumians, form objections to this view. Those who prefer the reading Rodanim refer it to the Greek inhabitants along the river Rhod (Bochart, Pharya, iii. 6), from the original Rhodos (Tuch, Gen. p. 216).

Do'davah (Heb. only in the prolonged form Do'da'vāh, דודאֱּוָה, v. r. דודאָה, beloved of Jehovah; Sept. 'Ophel v. r. אֹפֶל, Vulg. Dodun), an inhabitant of Tamar, who was the father of the prophet Nahum. He predicted the wreck of Jehoshaphat's fleet auxiliary to Abaziah (2 Chron. xx. 37). B.C. ante 895. In the Jewish traditions Dodavah is the putative son of Jehoshaphat, who was (in reality) his uncle (Jerome, Qu. Heb. ad loc.).

Dodd, Charles, an English Romanist divine, whose real name is said to have been Richard Toole. He resided at Harrington, Worcestershire, where he died about 1745.

He published a Church History of England from 1500 to 1638, ch. 57, the first six chapters of which, in 3 vols. fol. It was printed in England, though dated at Brussels. It was sharply criticised by Constable, a Jesuit, in 1746, and Dodd replied as sharply (1747). Belington, in his Memoirs of Gregory Panorma, speaks of Dodd as the author of other works 'against the insidious conduct, as he deemed it, of the Jesuits, in their transactions with the secular clergy.' His Church History was of a long time very scarce and dear, but a new edition was undertaken in 1839 by the Rev. M. A. Tierney, which 5 vols. 8vo have appeared (1839-1848). Dodd, fail'd, William, L.L.D., an unworthy clergyman appointed to the see of Exeter, was long regarded as the author of other works "against the insidious conduct, as he deemed it, of the Jesuits, in their transactions with the secular clergy." His Church History was a long time very scarce and dear, but a new edition was undertaken in 1839 by the Rev. M. A. Tierney, which 5 vols. 8vo have appeared (1839-1848). Dodd, after his death, was admitted a sizar of Clare Hall, in 1745. In 1758 he was ordained, and took his degree; and from this time he continued to obtain a succession of small preferments in the Church, holding, in the latter part of his life, two chapels in London, with a rectory and vicarage in the country, and possessing an ecclesiastical income of £280 a year.

He was one of the most popular preachers of the day; was one of the king's chaplains; and in 1768 was intrusted with the education of Philip Stanhope, afterwards earl of Chesterfield. In 1775 he was deprived of his king's chaplaincy for having offered to the wife of a chancellor a bribe of £3000, if she would secure him the living of St. George's, Hanover Square. He preached his last sermon Feb. 2, 1777; two days after he forged a bond for £4000 on Lord Chesterfield, was arrested, tried, and convicted Feb. 24, and executed June 27. Strumious efforts were made by men of the highest ranks of the Church, to save him. He was a man of superficial learning, but of great literary industry. Besides minor pieces in prose and verse, he published An Essay on the Death of the Prince of Wales (1751, 4to) — Thoughts on the glorious Epitaph of our Lord Jesus Christ, a poetical essay (1758, 4to) — Sermons on the Parables and Miracles (1766, 8vo) — Divinity, An Essay Towards a New Progress, etc of the Magdalene Charity (1759, 8vo) — A familiar Explanation of the poetical Works of Milton (1762, 12mo) — Reflections on Deity (1763, 12mo) — Comfort for the Afflicted (1764, 8vo) — The Visitor (1764, 2 vols. 12mo) — A new edition of Locke's Compendious Book to the Bible (1766, 8vo) — The Translations of the Holy Scriptures, from Massillon (1769, 8vo) — A Commentary on the Bible, 8 vols. 4to. (published in numbers, commenced in 1765, and completed in 1770. "In order to give greater éclat to this undertaking, it was announced that lord Masham had presented him with the MSS. of Mr. Locke, and added to him help also from the MSS. of Mr. Clairmont, Dr. Waterland, and other celebrated men. The ability and sound judgment with which, in the compilation of this work, Dodd availed himself of the labors of preceding commentators, foreign as well as British, have rendered this a very valuable work."

It was made the basis of Dr. Coke's Commentary, without adequate acknowledgment) — Sermons to young Men (1771, 8 vols. 12mo) — The Frequency of capital Punishments inconsistent with Justice, sound Policy, and Religion (1772, 8vo) — Thoughts in Prison, etc., with Memoirs of his Life (posthumous). See some interesting notices of Dodd's attack on Wesley, and of his visits to him, in Wesley's Works, N.Y. ed., iv. 466; v. 537.

Doddridge, PHILIP, D.D., was born in London June 26, 1702. His parents were pious Dissenters, and took pains to educate their children religiously. Philip was introduced by his mother to a knowledge of the characters and scenes of the O. and N. T. history by means of some Dutch tiles that lined a corner of their sitting-room. In his childhood he was taught the rudiments of Greek and Latin, and from his tenth to his thirteenth year he attended the grammar-school at Kingston-on-Thames. In 1715 he entered a private school at St. Albans, kept by Mr. Nathaniel Wood, and here he formed the friendship of the Rev. Mr. Clarke, who aided him in many ways after the death of his father (1715). Doddridge repaid his benefactor by his devotion to study and to personal religion. In 1718 he received an offer from the duchess of Bedford, who lived in the neighborhood, and had heard of his character and circumstances, to send him to either of the two universities, as the condition of his becoming a clergyman in the Church of England. He declined the proposal. Mr. Clarke now undertook to bear the expense of his education, and Doddridge gladly embraced the offer by entering, in 1719, the academy of Kidworth, in Leicestershire, where he remained under Dr. Jennings, 2 years, and was sent to preach, and was settled over the congregation at Kidworth as successor to Dr. Jennings. In 1729 he removed to Harborough, to be assistant to the venerable Mr. Some.
In the same year, Dr. Doddridge, in conjunction with Dr. Watts, Rev. Mr. Saunders, Rev. Mr. Some, and others, established an academy for preparing young men for the work of the ministry among Dissenters; and to that institution he was appointed tutor. No man was better qualified than Dr. Doddridge for that situation, and the institution soon acquired a wide celebrity. A pressing invitation from the Independent congregation in Northampton, enforced by the advice of Dr. Watts and other friends to accept it, led him to a situation which he held till November 24, 1736, when he was discharged in that town the double duty of pastor of a large congregation and tutor to the theological seminary. "Selden has there been a more laborious or conscientious life than that of Doddridge. To serve his divine Master was the ruling principle of his heart; and to the advancement of the sacred cause he brought all the energies of an active mind, and all the stores of an almost boundless knowledge, daily to bear. Many students resorted to him from all parts of the kingdom, and amongst these not a few who afterwards rose to distinction, not among the Dissenters only, but in the established churches of England and Scotland, in the universities of Oxford and Cambridge, and of Aberdeen conferred on him, in 1736, the degree of D.D. He was a voluminous author. His most important works are Sermons on Regeneration; Sermons to Young People; Life of Colonel Gardner; Rise and Progress of Religion in the Soul; Family Expositor, or Paraphrase and Version of the N.T. Dr. Doddridge's frame, never robust at any time, was enfeebled by incessant labours, and severe cold having settled on his lungs, and been followed by symptoms of consumption, he was advised to try the effects of a sea voyage. On the 80th of September, 1751, he sailed from Falmouth in a vessel bound for Lisbon, where he landed on the 18th of October, and, being completely exhausted, he died on the 5th, expressing to Mrs. Doddridge, who accompanied him, his firm faith and joyful hope in Christ." (Rich, Cyclopaedia of Biography, s. v.) The best edition of Doddridge's works is that of Leeds, 1802, 10 vols. 8vo, the first vol. containing his Life by Job Orton. His Lectures on PneumatoLOGY, Ethics, and Divinity are stereotyped in one vol. imp. 8vo (Lond., Bohn). The Family Expositor has passed through many editions; a convenient one is that of Amherst (1844, 4 vol. 8vo), with memoir by Prof. N. W. Fiske.

As commentator and theologian Dr. Doddridge despises the world of industry and pursuit of aim, but in no field, except in that of practical religion, did he rise to the first rank. In the Commentary "Doddridge always writes in a good spirit. The love of Christ reigns in his heart, and pours itself out in all that he says. This is the charm of his Observations. His Notes, though often valuable, could not be expected to possess the highest philological merit. Dr. Doddridge had not the time, the training, nor the means to furnish a thorough critical commentary on the N.T. The paraphrase is diffuse, often needlessly so; circuitous in expression, when the straightforward simplicity and terseness of the original would be far better. Its pretension and ambition is not equal to the real worth of the Observations that they are more and more read, at family devotion and in private reading, to the exclusion of other parts, and in preference to other commentators. Good sense, warm piety, flowing ease of expression, and a happy exhibition and improvement of his text, mark the Observations, and recommend them to the Christian reader." (Critical and Expository Commentary, Phila., Supplement.) As a divine, "with all his manifold excellencies, Doddridge had neither a deep theological interest nor a strenuous theological mind. He did not always conceive of nice distinctions clearly: he did not value them highly when he met them. His opinions, like those of all the most excellent of his contemporaries, as well as of his predecessors, are too numerous, too obscure, too citete catalogues, and balances opinions, and continually alide from the scientific to the historical. From one end of the lectures to the other we look in vain for a thorough, masterly, and exhaustive treatment of any one theological point. The method of the work scarcely allows such a result. Continual perusal, if, indeed, such a thing were to be thought of, would, we think, engender vacillation and scepticism. Such seems to have been the effect upon his students, who heard him announce every variety of opinion, without decided and weighty assertion on his own part. Great liberality and mildness are beautiful in their time; but a time is at hand when the enemy is assaulting the citadel, which was true of Nonconformist theology a hundred years ago. . . . His sermons are remarkable for soundness in doctrine, for rigid method and clear statement, and for earnest application to the heart and conscience of the hearer. . . . His hymns are, in number, three hundred and seventy-four. A few of these are likely to be preserved, such, for example, as 'Let Zion's Watchmen all Awake'; 'God of My Life, through all its Days'; 'Ye Hearts with youthful Vigor warm'; 'See Israel's gentle Shepherd stand'; 'What if Death my Sleep invade?'; and 'Remark, my Soul, the narrow Bound'; but, in general, they are not remarkable. . . ." (Gough and Bennett, History of Dissenters, vol. ii; Orton, Life of Doddridge; Stoughton, Life of Doddridge (Boston, 1858, 12mo); Kippis, Biographia Britannica, vol. v; North British Review, xiv, 190.)

Dodd, Henry, an eminent nonjuror, critic, and theologian, was born at Dublin in 1641, and was educated at the York Free School and at Trinity College, where he obtained a fellowship, which he relinquished in 1666. He retired to the charge of his father's estate in 1688; but, being a nonjuror, he lost his office at the Revolution. Dodd was a learned and a virtuous man, but addicted to paradoxes, and was so much an ascetic that during three weeks in the day he refrained almost wholly from food. He was a man of great obscurity, unwarried Industry, and prodigious learning, but his industry was uncheck'd, his learning was not servile. "Many of his publications were on the popish and nonconformist controversies: they have the reputation of showing, like everything else he wrote, extensive and minute learning, and great skill in the application of his scholarship, but little judgment of a larger kind. Few, if any, of the champions of the Church of England have strung the pretensions of that establishment so far as Doddwell seems to have
DOEDERLEIN 852 DOG

doe; but his whole life attested the perfect conscientiousness and disregard of personal consequences under which he wrote and acted" (English Cyclopaedia, s. v. Dog). He was born in Berkhampstead, in 1722, and spent the rest of his days. He possessed an estate in Ireland, but allowed a relation to enjoy the principal part of the rent, only reserving a moderate maintenance for himself. His relative at length began to grumble at the subtraction even of this pitance, and on one occasion even resorted to law. He took this step in his fifty-second year, and lived to see himself the father of ten children. The works for which he is now chiefly remembered were also all produced in the latter part of his life. Among these are his Dissertationes Graeciae, with a dissertation on the nature of the business by which he was detained before the Lord (422), Sept. αναρίθμητος Χριστός (Vulgate, in tabernaculo Domini). The difficulty which lies in the idea that Dog was a foreigner, and so incapable of a Nazarite vow (Numbers, De Volat. ix, 1, Surenh.), has been explained by the supposition that he was a proselyte, attending under some vow or some act of purification at the Tabernacle (compare 1 Sam. xx, 18). Thenius (Kurzg. 1, 176) has corrected Gesenius' interpretation (Theol. p. 1009) of the phrase as meaning "was assembled before Jehovah." Ephraim Syrus (Op. ii, 876) explains the term as merely indicating that Dog had introduced himself there secretely, whether by right or otherwise. With this agree Füster's rendering (Hebr. Handb. p. 175), that he had harbored behind (zurückbleiben) as a spy.

Dog (דָּבָּק, ָטֶבֶּכֶ, so called from his barking; Arab. ḏdbb; Gr. μικρός, whence Eng. hound; diminutive συκοφάντας occurs in numerous passages both of the Old and the New Testament (see Bochart, Hieroz. i, 769 sqq.). An animal so well known, whose numerous varieties come under daily observation, requires no detailed description (see the Penny Cyclopaedia, s. v.). There is, however, in Asia still extant one, perhaps not one, species, that never have been the companions of man, and there are races of uncertain origin, that may have been formerly domesticated, but which are now feral, and as fierce as wolves; while, in accordance with Oriental modes of speech, there are others, exceedingly numerous, neither wild nor domesticated, but existing in all the cities and towns of the Levant, without owners; feeding on carrion and offal, and still having the true instinct of protecting property, guarding the inhabitants of the district or quarter where they are tolerated; and so far cherished, that water and some food are not unusually placed within their reach (see Jardine's Naturalists' Library, ix, 3). The true wild species of Upper and by supplying him with bread even from the sacred tabernacle (1 Sam. xxi, 7). Of this he failed not to inform the king; who, regardless of the explanation offered by Ahimelech, and finding that the chiefs censured him, and hesitated to lay their hands upon a person so sacred, commanded Dog to slay him and his priests (to the number of 85 persons), and to destroy all their families and property—a task which was executed with equal readiness and cruelty by the Edomite (1 Sam. xxi, 18 sqq.). This treacherous act called forth such valiant resistance on the part of the Psalmist, that the passage (Psalm xvii, 1) of which divine and human justice seem alike to have required the fulfillment. See David; Psalms. A question has arisen on the nature of the business by which he was detained before the Lord (422), Sept. αναρίθμητος Χριστός (Vulgate, in tabernaculo Domini). The difficulty which lies in the idea that Dog was a foreigner, and so incapable of a Nazarite vow (Numbers, De Volat. ix, 1, Surenh.), has been explained by the supposition that he was a proselyte, attending under some vow or some act of purification at the Tabernacle (compare 1 Sam. xx, 18). Thenius (Kurzg. 1, 176) has corrected Gesenius' interpretation (Theol. p. 1009) of the phrase as meaning "was assembled before Jehovah." Ephraim Syrus (Op. ii, 876) explains the term as merely indicating that Dog had introduced himself there secretly, whether by right or otherwise. With this agree Füster's rendering (Hebr. Handb. p. 175), that he had harbored behind (zurückbleiben) as a spy.

Dog (דָּבָּק, ָטֶבֶּכֶ, so called from his barking; Arab. ḏdbb; Gr. μικρός, whence Eng. hound; diminutive συκοφάντας occurs in numerous passages both of the Old and the New Testament (see Bochart, Hieroz. i, 769 sqq.). An animal so well known, whose numerous varieties come under daily observation, requires no detailed description (see the Penny Cyclopaedia, s. v.). There is, however, in Asia still extant one, perhaps not one, species, that never have been the companions of man, and there are races of uncertain origin, that may have been formerly domesticated, but which are now feral, and as fierce as wolves; while, in accordance with Oriental modes of speech, there are others, exceedingly numerous, neither wild nor domesticated, but existing in all the cities and towns of the Levant, without owners; feeding on carrion and offal, and still having the true instinct of protecting property, guarding the inhabitants of the district or quarter where they are tolerated; and so far cherished, that water and some food are not unusually placed within their reach (see Jardine's Naturalists' Library, ix, 3). The true wild species of Upper and

Wild Persian Dog.

Eastern Asia is a low, sharp-nosed, reddish cur-dog, not unlike a fox, but with less tail. In Persia and Turkey there exists a larger dog resembling a wolf, exceedingly savage. Both are gregarious, hunt in packs, but are occasionally seen alone. They are readily distinguished from a wolf by their shorter unshorn fur. In the time of the sojourning of Israel in Egypt, there were already in existence dogs of the hunting race more or less extended—the cur-dog or fox-dog, the hound, the greyhound, and even a kind of low-legged turkspit (Wilkinson, Ancient Egypt.

Doég (Heb. דֹּבָּק, ָטֶבֶּכֶ, so called from his barking, 1 Sam. xxii, 7, Sept. דָּבָּק v. r. דָּבָּק; or דָּבָה, Psa. iii, title, Sept. דָּבָּה; in 1 Sam. xxii, 18, 22, Dogeš, דָּבָּק, after the Syrian pronunciation, Sept. דָּבָּי) an Edomite, and chief overseer of king Saul's flocks (Josephus, οἰκονόμης, "keeper of the king's mules," Ant. vi, 12, 1), which is an important office in Oriental courts. B.C. 1222. At Nacon was witnessed the blessing of the hound, or priest Ahimelech seemed to afford to the fugitive David, by furnishing him with the sword of Goliath, and
with a mangy, unctuous skin, frequently with several teeth wanting, was, as it now is, considered a defiling animal. It is to animals of this class, which no doubt followed the camp of Israel, and hung on its skirts, that allusion is more particularly made in Exod. xxiii, 31, for the same custom exists at this day, and the race of street-dogs still retains their ancient habits (Prosp. Alpin. Rev. Egypt. iv, 8, p. 290 sq.; Russel, Aleppo, ii, 55; Rosenmüller, Morgen. iv, 70). A portion of the Cairo packs annually become hajis, and go and return with the caravan to Mecca, while others come from Damascus, acting in the same manner; and it is known that the pilgrims from the banks of the Indus are similarly attended to Kerbela; indeed, every caravan is so, more or less, by these poor animals. But with regard to the dogs that devoured Jezebel, and licked up Ahab's blood (1 Kings xxii, 25), they may have been of the wild races, a species of which is reported to have particularly infested the banks of the Kishon and the district of Jezeel. In illustration of this shocking end of Jezebel, it may be remarked that the more than half-wild street-dogs of the East, living upon their own resources, and without owners, soon make rapid clearance of the flesh of dead bodies left exposed, whether of human creatures or beasts (Bruce, Tract. iv, 81). Among other instances, it is recorded that a number of Indian pilgrims were drowned by the sinking of a ferry-boat in which they were crossing a river. Two days afterwards a spectator relates: "On my approaching several of these sad vestiges of mortality, I perceived that the flesh had been completely devoured from the bones by the Pariah dogs, vultures, and other obscene animals. The only portion of the several corpses I noticed that remained entire and untouched were the bottoms of the feet and inside of the hands, a circumstance that may afford a corroborative proof of the rooted antipathy the dog has to prey upon the human hands and feet. Why such should be the case remains a mystery" (Kitto's Daily Illustr. in loc.). Stanley (S. and P. p. 350) states that he saw on the very site of Jezeel the descendants of the dogs that devoured Jezebel, prowling on the mounds without the walls for offal and carrion thrown out to them to consume; and Wood, in his Journal to the source of the Oxus, complains that the dog has not yet arrived at its natural position in the social state (compare Strabo, xvii, 821; Burckhardt, Trav. ii, 670). The dog was employed, however, in sacrifice by some ancient nations (Pausan. iii, 14, 9; Arnob. iv, 26; Julian, Orat. v, p. 178; Pliny, xviii, 69; comp. Saubert, De sacrifice. c. 28, p. 518 sq.), and was even sometimes eaten (Plutarch, De solerti. animal. c. 2; Justin. xix, 1). The cities of the East are still greatly disturbed in the night by the howlings of

Abridg'd. i, 280). All the above, both wild and reclaimed, there is every reason to believe, were known to the Hebrews (see Midrash, Raba Korcma, vii, 7), and although the Mosaic prohibition is presumed, yet anterior habits, and, in some measure, the necessity of their condition, must have caused cattle-dogs to be retained as property (Deut. xxiii, 18), for we find one of that race, or a house-dog, actually attending on travellers (Tobit v, 16; xi, 4). It is to be presumed that practically the street-dogs alone were considered as absolutely unclean; though all, as is the case among Mohammedans, were excluded from familiarity. (See Berjue, Dogs on Old Sculptures, etc. Lond. 1883.) In Egypt, anterior to the Christian era, domestic dogs were reared. See Nahrin. They continued to be cherished till the Arabian conquest, when they, like the uncouthened street-dogs, fell under the imprecation of Mohammed; who with reluctance, though with good policy, modified his denunciations and sentence of destruction in favor of hunting-dogs, and even permitted game killed by them to be eaten, provided they had not devoured any portion of it (comp. Exod. xxiii, 81). The words of the Lord Jesus to the Syrophoenician woman, and her answer (Matt. xv, 26, 27), certainly imply a domestication and domiciliation of dogs; but simple toleration of their presence is all that can be gathered. They lived on what they could get. Among the Moors of North Africa a similar position of the dog is occasionally seen. They "grant him, indeed, a corner of their tent, but this is all; they never caress him, never throw him anything to eat" (Poirot's Barbary, i, 238). Besides the cattle-dog, the Egyptian hound, and one or two varieties of greyhound, were most likely used for hunting—a pastime, however, which the Hebrews mostly pursued on foot. On the Assyrian monuments they are depicted in hunting scenes. The street-dog, without master, apparently derived from the rufous-curr, and in Egypt partaking of the mongrel greyhound, often more or less bare,
street-dogs, who, it seems, were similarly noisy in ancient times, the fact being noticed in Psal. lix, 6; 14; and dumb or silent dogs are not unfrequently seen, such as Lassian alludes to (Ivi, 10). The same passage has reference to the peculiarly faithful sleep of the dog, and his sudden start as if during a dream (see J. G. Michaelis, Observ. Sacr. ii, 50 sqq.).

The dog was used by the Hebræans as a watch for their houses (Isa. ivi, 10; comp. Hiad, xxi, 178; Odys. xvi, 392), and for guarding their flocks (Job xxx, 13); comp. Hiad, x, 183; xlii, 36f; Varro, R.R.i, 9; Colum. vii, 12; see Thomson, Land and Book, i, 801). Then also, as now, troops of hungry and semi-wild dogs used to wander about the fields and streets of the cities, devouring dead bodies and other offal (1 Kings xiv, 11; xvi, 4; xx, 28; xxii, 38; 2 Kings ix, 10, 26; Jer. xv, 3; Psal. lix, 14), and thus became such objects of dislike (comp. Harmar, i, 198 sq.; Höst, Nachr. v. Marottom, p. 292; Jollife, p. 827) that fierce and cruel enemies are poetically styled dogs in Psal. xxi, 16, 20 (see Jer. xv, 3; comp. Joseph. Ant. xxv, 8, 4; Homer, II, xvii, 225; xxi, 386). Moreover, the dog, being an uncivilized animal (Isa. ixi, 3; Matt. x, 27; John, xi, 26; 1 Cor. xii, 26), was a favourite animal in Egypt and among the Jews (Prov. xxvi, 11; 2 Pet. ii, 22), and the terms dog, dead dog, dead dog's head were used as terms of reproach, or of humility in speaking of one's self (1 Sam. xxiv, 14; 2 Sam. iii, 31; 2 Kings xiii, 18). Knox relates a story of a nobleman of Ceylon, who, being asked by the king how many children he had, replied, "Your majesty's dog has three puppies." Throughout the whole East "dog" is a term of reproach for impure and profane persons, and in this sense is used by the Jews respecting the Samaritans (Rev. xi, 15; comp. Schöttgen, Hor. Heb. i, 1145), and byMohammedans respecting Christians (Westen, i, 424; ii, 274). The wanton nature of the dog is another of its characteristics, and there can be no doubt that itziz in Deut. xxiii, 18 means a male prostitute (i. q. מנה; comp. Ecclus. xxvi, 25, "A shameless woman shall be counted as dog") (Hebrew.xwos avaroi). We still use the name of one of the noblest creatures in the world as a term of contempt (comp. Aethen. vi, 270). To ask an Uzbek to kill his wife or his father would be considered as no worse than to ask him to sell his dog an unpardonable insult—Suggests roosh, or dog-seller, being the most offensive epithet that one Uzbek can apply to another. The addition of the article (ך רועה וכרז מראוס, Matt. xv, 26; Mark vii, 27) implies that the presence of dogs was an ordinary feature of Egyptian, Oriental, and Saviour-style of life. When Christ says in Matt. xxvi, 26, "It is not meet to take the children's bread and cast it to the dogs," by the children are meant the Jews; by the dogs, the Gentiles. In the Rabbinical writings the question is put, "What does a dog mean?" and the answer is, "One who is uncircumcised." The dog and the sow are mentioned together in Isa. lxvii, 5; Matt. vii, 22; being alike impure and unacceptable. Paul calls the false apostles dogs on account of their impurity and love of gain (Phil. iii, 2; see Simon, Καισάρια, a Paulo mendax, Smalcald, 1747). Those who are shut out of the kingdom of heaven are called dogs, sorcerers, etc. (Rev. xxii, 15), where the word is applied to all kinds of vile persons, as it is to a particular class in Deut. xxiii, 18.

Dogma (Gr. δόγμα), a doctrine received as an article of faith. I. In the Scriptures the Greek word δόγμα has nowhere the meaning of doctrine. In Ephes. ii, 15, and Col. ii, 14, it denotes Jewish ordinances. In other passages (Luke ii, 1; Acts xvi, 1; xvii, 7) it is used of the Gentile emperors. II. This term is used by some of the earliest writers of the Christian Church, both Greek and Latin, to designate a doctrine of the Christian Church, or the whole of the Christian doctrines. Thus, by

IGNATIUS, in the epistle to the Magnesians (chap. xxiii), the Christian doctrines are called δόγματα τοις ενων εν τοις διστόλοις, and by Origen (Comm. in Gen. iii., § 23, δόγματα ημων). In his book against Celsus (contra Celsum, iii, c. 39) he calls the whole of the Christian doctrines το δόγμα, and the apostles διδακτικοί το δόγματος. The ecclesiastical writers of the 2d and 3d centuries also applied it to the tenets of philosophical schools. But the meaning Christian doctrine came to have of the word in the theological and ecclesiastical language of the Greek and Latin writers, and from the Latin it has passed into most of the modern languages, especially those of Roman Catholic countries. In English, the word Dogma, in this theological sense, is only of late coming into such use, but Doctrine has generally been used instead of it.

Dogmatic Theology (Lat. Theologia Dogmatica; Germ. Dogmatische Theologie, Dogmatik) is a special branch of theology, the object of which is to present a scientific and connected view of the accepted doctrines of the Christian faith. In English theology the name has not come into general use, but dogmatics are included in Systematic Theology. In Germany it became common, particularly after Danzeus and Calixt, to separate systematic theology into dogmatics and ethics, and this arrangement is now generally adopted. In the following article we speak of "Dogmatic Theology" in its general sense, including the dogmatics of England and many other countries, and to its place in the theological literature of Germany, reserving the English literature on the subject for the article "Theology."
respect we think Schleiermacher is correct (Darstellung d. theolog. Studiums, § 98) in stating that dogmatic theology must be written from the point of view of some Church Confession, while he is entirely wrong in making it a branch of Historical Theory. Protestant dogmatics treats, not of opinions, but of doctrines accepted as such by the Church.

2. The dogmatic theology of the Roman Catholic Church recognizes, beside the Scriptures, the tradition of the Church as part of the rule of faith. The Scriptures are used, however, to make them unambiguous in the sense in which the Church declares them to be true ones. The dogmatic theology of the Roman Catholic Church consequently contains only those doctrines which the Church has declared to be such. All other doctrines that have not received this formal definition by the Church, however clearly they may appear to be grounded in the Scriptures or demonstrated by theological science, have only the value of "theological opinion" (theologumenon). With regard to the Biblical proof for the doctrines, Roman Catholic writers distinguish between Biblical and ecclesiastical doctrines, the latter of which can only be proved by tradition. The terms in which these arise, both in practice and in theory, are: Dogmat i s implicita and explicita (fully defined); pure (if they can only be known from divine revelation) and mixed (if they can also be demonstrated by reason), necessary (those a belief in which is declared to be necessary for salvation) and useful (which are not necessary for salvation).

3. The first Rationalistic writers on dogmatic theology did not refuse belief in any doctrine they found in the Bible; but, demanding that the conformity of every Biblical doctrine with reason should be demonstrated, they introduced a new interpretation of the Bible, explaining away a number of doctrines which thus far had been generally accepted both by Evangelical and Roman Catholic theologians. Subsequent schools of Rationalism denied the authenticity of most of the books of the Bible, and consequently rejected all doctrines as Biblical which could only be proved by the books rejected by them; and the authority of the Old Testament was denied in toto. In the New Testament a distinction was drawn between the opinions of the apostles and the words of Jesus, and infallibility claimed for the latter exclusively. Finally, schools arose which maintained the fallibility of Jesus himself, and which regarded the doctrines taught in the Bible as entitled to no more authority than any system of human rationalism. At this point, the line of development becomes less clear, and the countless number of schools, sects, and parties which have arisen since is the result of the multiplication of questions.

II. History.—The beginnings of a systematic exhibition of Christian doctrine are seen in the Apostolic and the Nicene Creed. Among the writers of the ancient Church, Origen, in his work περὶ ἀρχῶν, presented the first outline of what may be called a system of (dogmatic) theology. Among the works of Augustine, the following were of a similar character: Enchiridion ad Laurentium (de fide, spe et caritate); de doctrina christiana; de civitate Dei; de fide ac symbolo; de ecclesia dogmatis. They were followed by Fulgentius of Ruspe, Gennadius, and Julianus, in the eighth and ninth centuries, the Catechisms of Eusebius of Cesarea, and of Cyril of Jerusalem (Catechismi ad baptizandos et baptizatos) belong to this class of literature, though they have chiefly a practical object. The first scientific system of dogmatic theology was written by John of Damascus (ποιμένα ἐκκλησίας τῆς ἐκκλησίας πιστῶν), known as Dux (Leader) of the East, and in the 16th century (1519) Erasmus re-asserted it as a compiler (in his Sententiae). Dogmatic theology in the Middle Ages finds its foremost expression in Scholasticism, which is supplemented by Mysticism. In the 16th century Scoto-Franciscan was distinguished as a thinker; but his principal work, De divisione naturae, is the most important in the strict sense of the word. At the close of the 11th and the beginning of the 12th century, Anselm of Canterbury, Roscellin, and Abelard gave a new impulse to the treatment of dogmatic theology, and aimed at a reconciliation between philosophical speculation and faith. But a strictly scientific method was for the first time introduced by the Magister Sempronius, the followers (Robert Pullen, Peter of Poitiers, etc.) were called Sententiarists. The school of St. Victor (Victorines), on the other hand, tried to unite profound mysticism with dialectics. Scholasticism was further developed by the greater acquaintance of the theologians with the works of Aristotle, which dates from the Crusades. Alexander of Hales (Saint Thome- lía, 1222-1245), Albertus Magnus (1222-1280), Thomas Aquinas (1221-1274), the head of a new theological school which embraces nearly all the theologians of the Dominican order), compiled works of immense extent, called Summae, in which every chapter was subdivided into questions, distinctions, etc. But chiefly owing to the ascendancy of Nominalism, scholastic theology soon degenerated into absurd subtilities. In opposition to the Thomistic school, the mystic school of Bonaventura (Doctor Seraphicus, died 1274) and the dialectic school of Duns Scotus (Dr. Subtilis, died 1296) were founded. In the 14th century the great damount of theological schools became a conflict of monastic orders. The Summae were succeeded by Quodlibets; the multiplicity of questions was infinitely increased. The liberal but sceptical Oecum (died 1447) was followed by the "last of scholastic theologians," Gabriel Biel (died 1498), while Mysticism, which had taken a practical turn in the works of Master Eckhart, Tauler, Ruyruysrook, and Suso, was brought into a scientific shape by Gerson (Dr. Crucis, 1498). See SCHOLASTICISM. The progress of humanistic studies secured for dogmatic theology a more complete and thorough treatment, but only externally. Its regeneration began, with the Reformation. Luther was a preacher rather than a dogmatic theologian. The foundation of evangelical dogmatics was laid by Melanthon, the proctor Germanicus, in his loco communes (subsequently loci theologici). He was followed in the Lutheran theology by Chemnitz, Eidolus, and Nicolai Hufnani, and the zealous Hutter (Christian Murerus), whose loci were particularly opposed to the moderate school of Melanthon. One of the greatest works of this period is the Loci theologici of J. Gerhard; and among other great writers were Quentstedt, Calov, Holtz, Bailer, etc. In these works a new school of Scholasticism arose, which again called forth an opposition, the Rationalistic school (Kamping, Weigel, Arndt). In the Reformed churches there was from the beginning a less strict adherence to symbolic books, and a prevalence of the exegetical treatment of theology over the dogmatic. Zwingli wrote several dogmatical works of considerable value; but the standard work of the Reformed Church is Calvin's Instauratio Christianae religionis. Other Reformed writers on dogmatic theology were Bullinger, Musculus, Peter Martyr, Hyperius, and, in the 17th century, Keckermann, Polanus of Polansdorf, Alsted, Alting, Wolleb, Burmann, Heidanus, F. Heidegger. New methods of treating dogmatics were introduced by the "Federal Theology" and Leydecker (the "ec- nomic" method, dividing the subject according to the persons of the Trinity). In the Lutheran Church, Calixtus endeavored to substitute the analytical way ("final method") for the synthetic, which had been followed since Melanthon. At the close of the 17th century (1695), Hyster and in the 18th century (1728) Ekhorn succeeded them as a compiler (in his Sententiae). Dogmatic theology in the Middle Ages finds its foremost expression in Scholasticism, which is supplemented by Mysticism. In the 16th century Scoto-Franciscan was distinguished as a thinker; but his principal work, De divisione naturae, is the most important in the strict sense of the word. At the close of the 11th and the beginning of the 12th century, Anselm of Canterbury, Roscellin,
Bauanugaisten, the last named being wholly under the influence of the Wollan philosophy. The new method of Dogmatic Theology was defended by Zeller, Michelius, Teller, Tönnlein, Böderlein, Morus, and others, who prepared the way for Rationalism, among whose early representatives were Gruener, Eckermann, and Henke. A new epoch began with the philosophy of Kant, by which the works of Tiefenbrick, Stäudlin, and Amsterdam were more or less influenced. The orthodox system was adhered to by Storr and Reinhard, more, however, with regard to its supranaturalistic character than to all its ecclesiastical definitions and developments. Augusti pleaded the authority of the old doctrinal system, and the same was done by De Wette, who distinguished dogmatic theology and practical knowledge, and by Daniel and Marheineke, who tried a mediation between the old theology and Hegelian speculation. In opposition to these attempts, Wessschneider consistently developed the views of the former Rationalists, and gave to the Rationalistic system the last finish. Bretschneider also proceeded from a Rationalistic standpoint, but in many questions tried to mediate between Rationalism and the old Church doctrine. A powerful influence upon German theology was exercised by Schleiermacher, who undertook the bold task of not only mediating between Rationalism and Supranaturalism, but of merging the two into an entire new system, which was to embrace the claims of both. He based his *Christliche Glaube* neither upon historical authorities nor upon philosophical speculation; but, regarding the Christian revelation solely as a divine, world-redeeming principle of life, he represented dogmatic theology as the exhibition of the Christian consciousness manifesting itself in the Church. Several theological schools sprang from Schleiermacher; and even the schools opposed to his system felt and acknowledged its importance and its influence. Some of the adherents of Schleiermacher defended from his standpoint all the essential doctrines of Biblical orthodoxy. Others attempted a middle course between the system of Schleiermacher and the symbolical books of the German Protestant Church, as Twesten (*Vorlesungen über die Dogmatik der ev.-luth. Kirche*, 2 vols. Hamb., 1826-1829; 4th ed. 1837) and Nitzsch (*System der christlichen Lehre*, Bonn, 1829; 5th ed. 1831). 

In the history of the Church, the writers on dogmatics for a long time after the Reformation adhered to the scholastic method. Prominent among them were Bellarmine, Canisius, Maldonat, and Becanus. Noel (Alexander Natalis, died 1724) introduced a new dogmatic method, more simple, and in many respects emancipating itself from the clumsiness of scholasticism. In Germany a number of writers appeared (e.g. Schwartz, Zimmermann, Brunner, Doldmayer), leaning on the reigning philosophical schools. Among these works is a system at a standpoint as remote as possible from the doctrines of the Church, those of Lieberman and Perrone (a Roman Jesuit) have acquired permanent reputation. Klee (*Kathol. Dogmatik*, Mainz, 1838, 3d ed. 1846) paid prominent attention to Biblical and patriarchal arguments, but neglected the philosophical development of doctrines. This feature is more conspicuous in the manuals of dogmatics by Steinmäler (*Christl. Dogmatik*, Freiburg, 1844-54, 4 vols.), Diermger (*Lehrbuch der kath. Dogmatik*, 4th edition, 1858), and Kuhn. The establishment of a new theological school was attempted by Hermes (q. v.), who, conceiving doubt as the necessary condition of truth, sought through a comprehensive system of the Roman Catholic doctrine; but this system was condemned by the Pope. The same fate happened to the system of Günther (q. v.), and to most of the works of Franz Baader (q. v.), who was largely under the influence of Schelling.

DOLCINO (857) DOMINICA PALMARUM

German Theology (In New American Cyclopedia, viii, 192), and our art. Dogmatics, History of.

Dolcino. See Dolcinita.

Doleful creatures ("a[T]k, ochin, prop. shrieks, hence howling animals; Sept. ορος, noise, Vulg. dra- comes, dragonis) is thought by most to be a general name for howlets, or screech-owls, which the prophet predicts will occupy the desolate palaces of Babylon (Isa. xiii. 21). See Owl. As the parallelism requires screech-owls to be mentioned, the first sentence of a diamon- late cry to be understood, the Rabbins (with Abulwad- lid) understand the martes, or kind of weasel (comp. Hitzig, in loc.), which has a clear, short, plaintive voice (Bochstein, Naturgesch. i. 26). But the owl is more probable, as it is well known for this peculiarity (see Catull. IV. 8., et al., Virg. Aen. iv. 482). See Ochinn.

Dolssus (Δολσας), a citizen of Gadara of rank and wealth, whom the inhabitants slew out of spite towards the Romans on surrendering the city to Yes- pianian (Josephus, War, lv, 7, 8).

Dome (Latin domus, a house). In the early Mid- dle Ages the word domus was applied to the house of God, and especially to the cathedral church. In this latter sense the derivatives of the word are still used in both Latin and English. The word is especially used generally in architecture to signify the roof to the whole or a part of a building, which roof has a circular or polygonal base, and whose perpendicular section is a curved line. Such domes, or curved roofs, are found very early in the history of architecture, especially in Etruria and Persia. The dome of modern architecture, has its origin in the Roman adaptation of the Etruscan dome. The roof of the Pantheon at Rome is the finest example existing of the ancient Roman dome. In the Byzantine architecture, a flat dome over the centre of church edifices, resting upon four arches, and supported below by half or quarter domes, is copied in the Turkish religious architecture. A modification of the Byzantine into the bower-shoe dome has been introduced largely into the Russian and some other Oriental branches of architecture. In the transition from the Byzantine to the Romanesque style of architecture, the dome became more of a cupola. In the Gothic ar- chitecture the dome disappeared. The cathedral of Pisa, founded in the 13th century, has a dome for a roof, though all the ornaments are Gothic. It was during the Renaissance, that the modern dome was developed. The first one built was in the church of Santo Spirito, in Florence. It had a semicircle for its section, and was single. The dome of the cathedral of Florence has a diameter of 139 feet, the same as that of St. Peter's in Rome, and only three feet less than that of the Pantheon at Rome. This dome is considered by some to be more elegant in outline than that of St. Peter's, which others consider the most graceful dome ever built. Both rest on a cylinder, or drum, and both are double; that is, they have each an interior dome, surmounted by an exterior one, rising from the same base, and being more pointed. This exterior one is only for its effect on the external architecture. They are both surmounted by a small cupola, called a lantern. All later Renaissance domes are built on this general type. Among the most famous domes are the following: Pantheon, Rome, 143 feet in diameter; Cathedra- ral, Florence, 139; St. Peter's, Rome, 139; St. So- phia, Constantinople, 115; St. Paul's, London, 112; Mosque of Achet, Constantinople, 92; Church of the Invalides, Paris, 80; St. Vitalis, Ravenna, 55; St. Mary of Charity, Auch, 44.—Malin, Dictionnaire des origines domes les arts (Paris, 1864); Lübke, Geschichte der Bon- knau; Viollet le Duc, Dictionnaire de l'Architecture (Paris).

Domico, a saint of the Roman calendar, founder of the order of "Domicinians." His name was "Do-

mino de Guzman, and he was born in 1170 at Cala- borra, Spain. He completed his education at the Uni- versity of Palencia, in 1198 was made canon of the cathedral of Osma, and in 1198 a priest and archdeacon.

He subsequently became known as a mission preacher, and was sent on missions to various parts of Spain, and into France. Having had his zeal inflamed by the progress of the Albigenses, he bent all his energies to their conversion. Finding his own efforts insufficient, he appears to have conceived the idea of founding an order of preaching friars, whose special duty should be the conversion of heretics; and about the commencement of the 18th century he began to carry his purpose into effect. He soon found numer- ous volunteers to his new order, and, to disarm oppo- sition, he and his followers adopted the rule of St. Augustin. As a distinct order, they did not have, receive the formal verbal approval of the pope, Inno- cent III, till 1215. See Domicinians. Domicin did not, however, trust for the uprooting of heresy simply to his own preaching and that of his followers. Find- ing that his eloquence failed to convert the Albigenses, he, with the papal legates, Peter of Castelnau and Rai- nier of Raoul, obtained permission of the popes to hold courts, before which they might summon by au- thority of the pope, and without reference to the local bishops, any individuals suspected of heresy, and in- dict upon them, if obstinate, capital punishment, or otherwise any lesser penalty. Peter of Castelnau, who had made himself especially obnoxious by his se- verity, was killed at Toulouse in 1208; and then was proclaimed by the pope, at the instigation of Domicin, that fearful 'crusade,' as it was designated by Inno- cent, to which all the barons of France were summoned, and which, under the capricacy of De Mont- fort, led to the slaughter of so many thousands of the so-called heretics. See Albigenses. Domicin him- self, it has been said, was not personally cruel; but towards heretics he had no compassion, and it is cer- tain that, so far from attempting to lessen the horrible slaughter, he did what he could to stimulate it. Domicin is very frequently said to have been the founder of the Inquiry, but this is an error, and his com- panions in the commission to examine and punish the Albigenses were commonly called 'Inquiritors,' but their commission was merely local and temporary. The 'Holy Office' was not formally established till 1233, when Gregory IX laid down the rules and de- fined the jurisdiction of the courts, for the trial and punishment for various countries under the name of 'Inquisitorial Missions.' It is, however, worthy of notice that the chief inquisitor was a Dominican monk, Pietro de Ve- rona, and that the governance of the Inquisition was placed much in the hands of the Dominicans. The Dominicans account make Domicin a miracle-worker even to the extent of raising the dead to life, as in the case of a young nobleman named Napoleon, at Rome, on the Ash-Wednesday of 1218, and by other miracles. Domicin died at Bologna in 1221. He was canonized by pope Gregory IX on July 8, 1234: the Church of Rome keeps his festival on Aug. 4. Domicin is said to have written some commentaries upon St. Matthew, St. Paul, and the canonical epistles, but they have not come down to us."—English Cyclopedia; Butler, Lives of Saints, Aug. 4; Acta Sanctorum, Aug. 1, 548 sq.; Lacordaire, Vie de S. Dominique (Bruxelles, 1846), and Oeuvres (Paris, 1864), vol. 1.

Domicina in Alba (the Sunday of white gar- ments), a title anciently given to the Sunday after Easter, because on this day those persons who had been baptized at the Easter festivities, were decorated with the chrysomata, or white robes, which they received at baptism. These were laid up in the church as evidences of their baptismal profession.—Bingham, Orig. Eccles. bk. xx, ch. v, § 12.

Domicina Palm-Rum. See Palm-Sunday.
Dominicál, a white veil anciently worn by women at the time of receiving the Eucharist. It has been disputed whether the dominical was not a linen cloth which women, in the sixth century, were in some churches required to take to the Eucharist, and with which they covered the hand before the bread was laid upon it. Augustine may refer to this in one of the sermons usually ascribed to him, De Tempore, in which he says that it was customary for men to wash their hands when they communicate, and for women to bring their little linen cloths to receive the body of Christ. In the Council of Auxerre, A.D. 560, a rule was enacted that no woman should receive the Eucharist in her bare hand, but nothing further is prescribed. The best authorities, however, are of opinion that the dominical was a veil for the head.—Farrrar, Eccles. Dictionary, s. v.; Bingham, Orig. Eccles. bk. xv, ch. v, § 7.

Dominical Letter, the letter in our almanacs which marks the Lord's Day (Dies Domini), usually printed in a capital form. In the calendar, the first seven letters of the alphabet are applied to the days of the week, the letter A being always given to the 1st of January, whatsoever that day may be, and the others in succession to the following days. If the year consisted of three hundred and sixty-four days, making an exact number of weeks, no change would ever take place in these letters. Thus, supposing the 1st of January in any given year to be Sunday, all the Sundays would be represented by A; not only in that year, but in all succeeding. There being, however, three hundred and sixty-five days in the year, the first letter is again repeated on the 31st of December, and, consequently, the Dominical, or Sunday letter for the following year will be G. The retrogression of the letters will, for the same reason, continue every year, so as to make F the Dominical letter of the third, etc. If every year were common, the process would continue regularly, and a cycle of seven years would be sufficient to restore the same letters to the same days as before. But the intercalation of a day every bisextile or leap year causes a variation. The leap-year, containing three hundred and sixty-six days, will throw the Dominical letter of the following year back two letters; so that, if the Dominical letter at the beginning of the year be C, the Dominical letter of the next year will be A. This alteration is not effected by dropping a letter altogether, but by changing the Dominical letter at the end of February, where the intercalation takes place. In consequence of this change every fourth year, twenty-eight years must elapse before a complete revolution of the Dominical letter can take place; and it is on this fact that the period of the solar cycle is founded. The rules for finding the Dominical letter for any year are given in the Book of Common Prayer. See Cyclic.

Dominicans, an order of mendicants founded by Dominic (q. v.) de Gutzman about the year 1215. In England they were generally called Black Friars from their garments, in France Jacobins, from the fact that the first French house was in the Rue St. Jacques, at Paris. They called themselves commonly Preaching Friars (Fratres Praedicatores), from their office of preaching.

I. History.—Dominic projected the order when he was preaching against the Albigenses (q. v.); but the Council of Lateran, in 1215, declared itself against any increase of the monastic order. Nevertheless Innocent III was prevailed upon to approve of the order on condition that it should assimilate itself as closely as possible to one already in existence. The successor of Innocent, Honorius III, was less reluctant, and confirmed the Dominicans as a new and independent order. It spread rapidly over all Christian countries. In 1221 thirteen of the friars went to England for the purpose of establishing the order, and Stephen Langton, then archbishop of Canterbury, giving his approval, they fixed their first house at Oxford. Their second house was in London. At the time of the dissolution of the monasteries under Henry VIII there were 56 houses in England and Wales. When the second general chapter was held, in 1221, at Bologna, 60 convents, belonging to eight provinces, were represented, and a great many friars were sent out to establish new houses. In 1258 the number of their convents amounted to 417. In 1258 the Inquisition (q. v.) was transferred to them by the Pope. This gave them a powerful and pernicious influence in Spain, Portugal, Italy, and France. They showed so much eagerness in hunting up and prosecuting heretics that a popular jux changed the name Dominicans into Domini canes (the dogs of the Lord). Although endowed in 1272 with all the privileges of the mendicant orders, they soon gave up begging, and, after being allowed in 1245 to accept donations, they accumulated great wealth. Together with the Franciscans, they became the chief representatives of the theological science of the Middle Ages, occupied a large number of the theological chairs at the universities, and became in most controversies not only the rivals, but also the bitter opponents of the Franciscans. The greatest theologian among them in the Middle Ages was Thomas Aquinas (q. v.), whom they have ever since followed as a standard authority. Among their other celebrities are Albertus Magnus, Ecard, Tauler, Suso, Savonarola, Las Casas, Vincent Ferrier, and Vincent de Beauvais. As theologians, they were mostly Nominalists, Augustinians, and opponents of the Immaculate Conception. In literature in general they have had great influence, as the Magister sacri palati at Rome, in whose hands is the censorship of books, has always been taken from their order. They secured great popular favor not only by their preaching, but by the establishment of an order of tertiarins, open to laymen. The people were also gained by them especially by the spreading of the use of the Rosary (q. v.), which was introduced by them, and which became, in consequence of the many indulgences attached to it by the popes, a very popular form of worship. The Dominicans also belonged to the most zealous laborers in the foreign missions of the Roman Church. Many of their members were sent to the East; and in Armenia, in particular, they succeeded in uniting a great many Armenians with the Roman Church. After the discovery and conquest of America by the Spaniards, the Dominicans protected the natives from being enslaved, but gave, on the other hand, the first impulse to the importation of slaves from Africa. In America, and in the West and East Indies, they surpassed all other
orders in power, numbers, and riches. In Europe, on the contrary, the reputation and influence of the order rapidly declined. The conduct of Tetsel (q. v.) in preaching the papal indulgences brought odium upon the whole order, and the development of the Inquisition in Spain and other countries led to a decline in the management of the Dominicans, attached to their name a stain which will never be blotted out. In the countries which embraced Protestantism they lost over 400 convents, while in Roman Catholic countries they were generally superseded, as confessors at the court and as teachers at the universities. Most of the Jesuits' several attempts to reform the order were made in the 15th and 16th centuries, but led only to the establishment of 12 reformed congregations. The whole order was never brought back to its original simplicity and vigor. Yet they still counted in the 18th century more than 1000 convents of monks and nuns in 45 provinces, 21 of which were outside of Europe. In consequence of the French Revolution, they lost all their convents in France and Belgium, nearly all in Germany, and many in Italy; and in the 19th century they were entirely suppressed in Spain, Portugal, and Sardinia. In 1822 the emperor of Russia suppressed the sole province of Moldavia in the Russian convents. In Father Lecordier's order the received a member of great reputation and influence, and through him the order was re-established in France in 1845. In Austria the Dominicans reluctantly submitted, in 1856, to certain reforms which the Pope ordered to be introduced. According to the provisions made, all the novices are to be bound to the ancient rule, which will also be established in every convent as soon as it will have a majority of reformed monks. The order is on the increase in the United States of North America and in France, and established its first convent in Prussia in 1860. The Dominicans entered the United States in 1859, but their missions have been less extensive than those of the Franciscans and Jesuits. The first bishop of New York, Luke Concanen, had been assistant general of the order. A great activity in behalf of its spreading was at a later period displayed by father (later bishop) Fenwick, a native of Maryland, who entered the novitiate at Bornem, Belgium. He established the convent of St. Rose, Springfield, Ky., which is now the novitiate of the order in the United States.

II. Constitution. —The constitution of the order was adopted at a general chapter in 1220, and is in all essential points like that of the other mendicant orders. A chapter is elected by the general chapter for life, and is assisted in the exercise of his office by a number of fratres. The order is divided into provinces, at the head of which is a provincial, who is elected at a provincial chapter by the superiors of the houses, who are called priors. Their habit consists of a white garment and scapular, with a white mantle and hood ending in a point.

III. Statistics. —The Dominicans have still convents in Italy (4 in the city of Rome, with about 100 members), France (10 in 1862), Belgium, Holland, England, Ireland (about 50 members in 1848), Austria (57 convents with 202 members in 1843), Prussia (first convent established in 1660), Holland (in 1841, 16 houses with 160 members), Spain, Russia, Turkey, Mexico, Central and South America, and the United States, where they have houses in New York, Ohio, Kentucky, and Wisconsin. In 1862 the total number of convents was estimated at 500 houses, with 4000 members. The famous Order of the Poveri Grandi (Dominici), founded by St. Dominicus in 1421, is called the Ordinum Regularium; other orders are the Ordinum Franciscanum (Roma, 1746); Castello and Lopez, Historia general de S. Domingo y de su Orden de Predicadores (Madrid, 1612, 6 vols. fol.); Antonius Senesi, Chronicum Fratrum Predicat. (Paris, 1588, 8vo.). A complete list of all the saints, martyrs, writers, etc., of the order is given in Annales Ordinis Dominicus (Paris, 1678, 12 vols. 4to.). The complete statutes of the order may be found in Holsteni Codex Regularum (Augsburg, 1759, 6 vols. fol.).

Dominican Nuns. An order of nuns founded by Dominics (q. v.) de Guzman in 1206, at Prouille, near Toulouse. They were mostly converted Albigenses. At the time of their greatest prosperity they counted about 400 convents in Europe and America. They fell earlier into irregularities and disorders than the monks. They took part in all the reforms which were introduced among the monks, and split into similar congregations. The first convent of the order in the United States was organized by father Thomas Wilson, in Kentucky, in 1823, from which some other houses have sprung in the dioceses of Cincinnati, Nashville, and San Francisco. There are also congregations in the dioceses of Milwaukee and Brooklyn. They have also convents in most Italian states, in France, Belgium, Holland, Switzerland, Germany, England, Russia. Their house in Rome is under the immediate direction of the Dominicans, while in most other countries they are under the jurisdiction of the diocesan bishops.

Dominicum, a term applied by ancient writers to the Lord's day, the Lord's Supper, and the Lord's house. Cyprian uses it in two meanings in the same paragraph: "Locuplex et divitiis est, et Dominicum celebrare le credid, quae carbonem non rupivis? Qua in Dominicum sine sacrificio renta? Quae partum de sacrificio, quod posuit obublutum, sumis?" — "Are you a rich and wealthy matron, and do you think that you rightly celebrate the Dominicum" (Lord's day or Lord's Supper), "who have no regard to the corban? who come into the Dominicum" (the Lord's house) "without any sacrifice, and eat part of the sacrifice which the poor have offered?" The general application of the word was to the Lord's house. Jerome says that the famous church at Antioch, which was commenced by Constantine, and completed and dedicated by Constantius, had the name of Dominicum aureum, in consequence of its richness and beauty. — Ducange, Glossarium Med. et inf. Latinitatis, s. v.; Farrar, Ecclesia, Dict. s. v.; Bingham, Orig. Eccles. bk. viii. ch. 1.

Dominia, de, MARCO ANTONIO, a learned Italian theologian, was born in 1566, of an ancient family, at Arba, on the coast of Dalmatia, and studied at the Jesuits' college at Loreto, and at the University of Padua. The authorities of the university used their influence to induce him to enter the order of Jesuits; and to this he appears to have consented at first; and, while passing his novitiate, he gave instruction in mathematics, physics, and eloquence. At the same time he employed his leisure in the study of theology. The routine of a college life not suitting his taste, he Dominus quitted Padua; and, on the recommendation of the emperor, Honorius VII, he was appointed bishop of Segni, much to the anger of the Jesuits. Two years afterwards he was made archbishop of Spalatro; but, while holding this dignity, he became embroiled with the pope (Paul V) by taking a part in the disputes between that pontiff and the Venetians respecting the endowment of ecclesiastical establishments. On this occasion he threw out a censure on the conduct of the pope; and he further gave offence by entering upon
DOMINUS VOBISCUM 860

DONALDSON

the important but personally dangerous subject of reforming the manners of the clergy. He resigned his archiepiscopate and retired to Venice in 1613, and in 1618 he returned to England, where he was appointed him dean of Windsor. He now prepared his book, De Republício Ecclesiasticâ, the object of which is to show that the pope has no supremacy over other bishops (Lond. part i, 1617; part ii, 1620; part iii, Hanov. 1622, fol.). He edited father Paul's Hist. de l'Assemblée of the Council of Trent in English. De Dominia appears to have been restless and discontented, for after a few years he expressed a wish to return to the Roman Church, and having received from Gregory XV a promise of pardon, he set out for Rome. Soon after his arrival, some intercepted letters gave indications that his repentance was not sincere, and he was in consequence committed to the castle of St. Angelo, where, after an imprisonment of a few months, he died, September, 1624. Being convicted after his death of heresy, his body was disinterred and burnt. A pamphlet, called Reasons for renouncing the Protestant Religion, appeared in London in 1627 (8vo). Dr. Newland, dean of Farnsb., published in 1650, Life and Contemporaneous Church History of De Dominia.—Hook, Eccles. Bisgr. iv, 474; English Cyclopaedia; Collier, Eccles. Hist. vii, 424 sq.

Dominus vobiscum (the Lord be with you), a form of salutation used in the liturgies of several of the Christian churches. It is taken from the book of Ruth, together with the response et cum spiritu tuo—"and with thy spirit." It was introduced into Christian worship before the end of the second century. A canon of the first council of Braga, in 565, directed against a custom which the Priscillianists had adopted, of assigning one form of salutation to the bishops and another to the presbyters, enjoins all to use the same form, Dominus noster vobiscum—"the Lord be with you;" and the people to reply, Et cum spiritu tuo—"and with thy spirit," according to apostolic and Eastern custom.—Augusti, Christl. Archäologie, bk. v, ch. iii, § 6.

Dominian (Titus Flavius Domitianus), Roman emperor, younger son of Vespasian and Domitilla was born Oct. 24, A.D. 52, and succeeded his brother Titus as emperor Sept. 18, A.D. 81. In the beginning of his reign he affected great zeal for the reformation of public morals, but his character degenerated later in the most unexampled cruelties. In A.D. 95 a persecution of the Christians is recorded in the history of the Church, but it appears to have been directed particularly against the Jews, with whom the Christians were then confounded by the Romans. Suetonius (In Dom. 45) writes: "The emperors persecute the Jews or those who lived after the manner of the Jews, and whom he styles as 'impropers,' to the rapacity of Domitian. Eusebius (iii, 17) says that Domitian "was the second that raised a persecution against us, and established himself as successor of Nero in his hatred and hostility to God." The same writer (iii, 12, 29), following Heydenreich, tells how a son of the grandsons of the children of Jude the apostle to appear before Domitian. He questioned them as to their birth, claims, property, etc. and when they answered that the kingdom of Christ, for which they looked, was purely spiritual, he dismissed them. The tyrant was not so lenient with his own relatives, Flavius Clemens and Domitilla, who were charged with "Athelum and Jewish manners," charges often brought against the Christians. Flavius was executed and Domitilla banished, A.D. 95. Domitian himself was assassinated (A.D. 96). A tradition (not now believed) speaks of St. John as having been tried before Domitian, and that, having been condemned to be plunged into a caldron of boiling oil, he came forth unhurt. See Milman, History of Christianity, bk. ii, ch. iv; Gibbon, Decline and Fall, ch. xvi, and the article PERSECUTION.

Domitilla, niece (or wife) of Flavius Clemens, who was put to death under Domitian (q. v.; Euseb. iii, 18). It is not certain that they were Christians, but it is at least probable. Domitilla did not suffer martyrdom, but was beatified, and was beatified, and an unrecorded tradition says that she was afterwards burnt under Trajan. She is commemorated as a saint in the Roman Church, May 12. See Butler, Lives of Saints, May 12; Tillemont, Mémoires, ii, 124; Murdoch's Moisheim, Church History, N. Y. ed., i, 59.

Domus (house), a designation of the church, or of appendages of the church, in ancient times, with distinguishing epitaphs attached; thus: Domus Basiliaca ( BCHF of Basilia) (in the plural), the houses of the clergy adjoining the church.—Euseb. Vit. Const. iv, 59; Bingham, Orig. Eccles. bk. viii, ch. vii, § 13.

Domus Columna, the house of the dove, used by Tertullian for a church. When writing against the Valentinians, who affected secrecy in their doctrines, he compares them to the Eleninian mysteries, whose temple was so guarded with doors and curtains that a man must be five years a candidate before he could be admitted to the adytum of the deity, or secrets of the sanctuary. "Whereas," says he, "the house of our dove is plain and simple, delights in high and open places, in the light, loves the figure of the Holy Ghost, and the morning or morning sun, which is the figure of Christ." "The house of the dove" seems here to be the same as "the house of Christ." Mede explains it, the house of the dove-like religion, or of the dove-like disciples of Christ (Tertullianus contra Valentin. c. 3, cited by Bingham, Orig. Eccles. bk. viii, ch. i, § 2.

Domes Dei, Domus Divina, Domus Ecclesiæ—the House of the Lord, the Divine House, the House of the Church. (1.) The first of these, the Lord's House, was one of the earliest names of the church-building, and it is still in use. It answers to the Greek Ἱερόν, which some suppose to be the origin of our word "Church." See also DOMINICUM. (2.) The second title, Divine House, was applied, among the pagans Romans, to the emperor's palace, and it was retained in this use by some Christian emperors. It was also applied to the Church; and from this double use some confusion has arisen in interpreting ancient writers. (3.) The title Hectorium (1300) — Varroiamus (1444). After his ordination he became head-bishop of Bury St. Edmunds, where he remained several years, and published Maskil le Sopher (a treatise on Hebrew grammar), and finally Jasher, or Fragmenta Archetypa Carminum Hebraicorum, etc. (Berlin, 1854; London, 1860, 8vo), the object of which was to reconstruct the lost book of a volume entitled Christian Oracles, scattered through the O. T. The book is full of wild and extravagant conjectures. See Jasher. Soon after he resigned his place at Bury St. Edmunds, and returned to Cambridge, where he gave a course of lectures on Latin synonyms, and occupied himself with tuition. Here he wrote a volume entitled Christian Oracles, corresponding with the Conclusions of modern critical Learning (Lond. 1867, 8vo), an attempt, according to the author, "to stye the plague of unbelief, which has for some
time followed in the train of a dishonest Bibliolatry." In 1856 he was appointed one of the classical examiners in the University of London. He died in London Feb. 10, 1861. Dr. Donaldson was a man of great industry, leaning, but his critical faculty was not equal to the tasks he ambitiously attempted. That his Jusです abounds in misapplied learning, uncritical criticism, and unsound exegesis, was amply shown on its appearance by Ewald and other German scholars, and by Perowne and others in England. See Journal of Sacred Literature, July, 1865, and April; Oct., 1866, p. 206; Christian Remembrancer, Oct., 1855, art. v.

DONAR. See Thor.

Donaria (Ἰωάννιους, Luke xxii, 5), gifts and offerings to adorn the Church. The term was also applied in later times to gifts to the Church, which were hung on pillars, and set in public view as memorials of some great mercy which men had received from God. —Bingham, Orig. Eccles. bk. viii, ch. viii, § 1.

Donation of Constantine, a forged imperial edict, published between A.D. 750 and 756, professing to contain a gift from Constantine, in the year 324, of Rome and Italy to Sylvester, then Pope. The document exists both in a Greek and Latin text, and was first produced in a letter of Pope Adrian I to Charlemagne. Barisonius defended its genuineness; but its survival is generally admitted, and its substance is as follows: "We give as a free gift to our most blessed father, Sylvester, the Pope, the city of Rome, and the cities of all Italy, as well as the cities of the other Western countries. To make room for him, we abdicate our sovereignty over all these provinces; and we withdraw from Rome, transferring the seat of our empire to Byzantium, since it is not just that a terrestrial emperor should retain any power where God has placed the head of religion." "According to the legend," says Gibbon, "the first of the Christian emperors was healed of the leprosy, and purified in the waters of baptism, by St. Sylvester, the Roman bishop; and never was physician more gloriously recompensed. His royal proselyte withdrew from his seat and patrimony of St. Peter; declared his resolution of founding a new capital in the East; and resigned to the popes the free and perpetual sovereignty of Rome, Italy, and the provinces of the West." The fraud was exposed by Laurentius Valla. For the "Donation," see Fabricius, Biblioth. Graecia, ed. Harle, vol. vi, 697; see also Gibbon, Decline and Fall, ch. xlix; Milman, Latin Christianity, bk. i, ch. ii; Elliott, Definition of Romanism, bk. iii, ch. xiv; Münch, Über die erschütterte Schenkung Constantin des Großen (Freiburg 1854); Biener, De Collectionibus canonum ecclesiae Graeca (Berlin, 1827).

Donatists (Pars Donati) was the name they themselves assumed). During the last half of the third and first half of the fourth centuries there was a combination of elements at work in the bosom of the Church, which, in consequence of and in connection with peculiar forces operative on the outside, produced a severe strain upon its unity and unity. During this period there were repeated and powerful centrifugal tendencies, which gave birth successively to the Novatian, Meletian, and the Donatist schisms. The outward history of these schisms is long, and its remote causes and outward details must be learned from Church history.

Of these movements, that of the Donatists in North Africa was by far the most important and widest in its influence. Substantially it had the same ground and character as the Novatian. On this point Neander very clearly and judiciously says: "This schism (the Donatist) may be compared, in many respects, with the Novatian, in the preceding period. In this, too, we see the conflict, for example, of Separatism with Catholicism; and it is therefore important, in so far as it tended to settle and establish the notion of the visible, outward unity of the Church, and of the objective element in things of religion and of the Church. That which distinguishes the present case is the reaction, proceeding out of the Christian Church, and called forth, in this instance, by a peculiar occasion, against the confounding of the ecclesiastical and political elements; on which occasion, for the first time, the ideas which Christianity, as opposed to the papal religion of the state, had first made men discern, produced a party of contention within the Christian Church itself—the ideas concerning universal, inalienable human rights; concerning liberty of conscience; concerning the rights of free conviction. The more immediate and local occasion of these disputes lay in a certain spirit of fanaticism, which, ever since the spread of Montanism, had prevailed in North Africa, and also in various circumstances superinduced by the Diocletian persecution" (Neander, Church Hist. Bohn's ed. iii, 250). The substance of what was at issue in this movement is given thus by Dr. Schaff: "The Donatist controversy was a conflict between Separatism and Catholicism; between the idea of the Church as an exclusive community of regenerate saints, and the idea of the Church as the general Christendom of state and people. It revolved around the doctrine of the essence of the Christian Church, and in particular of the predicate of holiness as in the Novatian controversy it revolved, ultimately at least, more round the predicate of unity). It resulted in the completion by Augustine of the Catholic dogms of the Church, which had been partly developed by Cyprian in his conflict with a similar schism" [the Novatian] (Schaff's Church Hist. ii, 365).

Donatism, starting thus in a time of persecution, when the question in regard to the restoration of the Lapsed brought up various aspects the question of authority and freedom, and created, too, a severer and a milder theory of discipline, had its roots in the age preceding its actual rise. Embers previously scattered, but still full of latent fire, lay ready all around to create and feed a new fire. Already in the Diocletian persecution the old controversy between the rigoristic and the milder party in regard to discipline was revived. Secundus of Tigis, the primate of Numidia, led on by one Donatus of Case Nigrum, wrought himself into fury on the subject of discipline, advanced the pretext; excommunication, and for ever, of all who had sinned in danger, or delivered up the sacred books to the persecutors. Meniusius, with Cacilian, his archdeacon and successor, headed the milder party, advocating moderation and discretion, and casting suspicion on the motives of the rigorists. This tension threatened schism as early as the year 305 in the matter of an episcopal election for the city of Cirta (Schaff's Hist. of the Christian Church, ii, 361). The actual outbreak was in 311. Meniusius, bishop of Carthage, died in that year, whereupon the clergy and people of that district, in a hasty manner, elected the archdeacon Cacilian in his place, and consecrated him to consecrate without continuing or consulting the bishops of Numidia, a contiguous and subordinate province. Perhaps courtesy or custom, perhaps some real or imaginary right, was here violated; at any rate, on this ground the disaffected party hastened to resent the slight by refusing to acknowledge the new bishop. In the eyes of the rigoristic Donatist bishops, they justified their opposition to him on the ground or pretext that Felix, one of the bishops who was prominent in the consecration, was a Traitor—that is, one who had delivered up the sacred books to the persecutors. In Carthage, also, the elders of the congregation besides many others, and among them a noble lady, Lucilla, a widow and very superior, were opposed to him. Secundus of Tigis,
with seventy Numidian bishops, assembled at Carthage, summoned Cecilian to appear, which he failing to do, they deposed and excommunicated him, and elected in his place Majorinus, the chaplain and favourite of the wealthy and influential widow, Lucilla. After his death in 315, Donatus, a gifted man, of fiery energy and eloquence, revered by his admirers as a wise counsellor, and styled the Cæsar, was made his successor. From him the new developed party took their name.

Each party now labored to secure the conquest of churches, and thus the breach was extended, and the schism in the North African Church fully effected. The emperor Constantine, who had just secured the soverignty of the Donatists, was, it is supposed, to have been prejudiced against the friends of Majorinus, for in his first edict he expressly excluded the party from the privileges which he bestowed on the Catholic Church. Thus condemned without a hearing, the Donatists presented a petition to the emperor, who was at the time in Gaul, asking him to name judges in that country before whom the questions which had arisen in the North African Church might be laid. He "directed that Melchiades (Miltiades), bishop of Rome, with five other Gallic bishops, should inquire into the affair; that Cecilian should appear before those bishops who should charge him, and ten other bishops who should defend him" (Neander, Church Hist. Bohn's ed. iii. 268). The trial took place in 318, Melchiades brought fifteen other Italian bishops, and Donatus also appeared on the opposite side as chief accuser of Cecilian, and the soul of the new party. His charges were found to be unsustained, and "he himself was declared guilty of various acts contrary to the laws of the Church."

The Donatists were of course dissatisfied with this result. A second hearing was ordered in 314, at which the charges against Felix, the ordainer of Cecilian, were to be investigated. Felix was declared innocent. The Donatists now appealed from this ecclesiastical decision to the emperor himself. He accepted their appeal, though he answered it with violent expressions against them, and after listening to the delegates of the two parties at Milan, in 316, he also declared Donatus to be the true Donatist. The emperor now took a severer turn. The emperor issued penal laws against the Donatists, deprived them of their churches, and confiscated their places of assembly. This exasperated them, and fully developed their enthusiasm. The strife went forward not without the use of carnal weapons. The Donatists were in spirit unsubdued and determined. Ursacius, who was empowered to carry the laws into effect against them, used forcible measures to compel them to unite with the Church. This produced a powerful ferment, and pushed them to the point of desperation. They declared that no power on earth could induce them to fellowship with the "rascal," as they called Cecilian. The cause of the Donatists was espoused by a band of idle, roving, fanatical ascetics, who wandered about the country among the huts of the peasants (whence they were called by their adversaries Circumcelliones [q. v.]). These half-crazy beggars and plunderers excited the peasants to all sorts of violence, and went forth with fire and sword as the "Christian champions" (apomatacti). Their fury cost blood, and the military was required to suppress it. Some of the Donatists were executed, others banished, and their churches were closed or confiscated. Death, met in this way, they regarded as martyrdom, and, instead of avoiding, they coursed the ascetics who did not attain it in this world as the hands of their enemies, in their fanatical zeal consorted to suicide, casting themselves from precipices or into the fire, and even hired others to kill them. The emperor saw the mistake of his violent measures, and in 321 granted to the Donatists full liberty to follow their convictions in faith and worship, at the same time exhorting the Catholics to patience and moderation. This somewhat subdued, but did not end the strife.

Under the successor of Constantine, Constans, they fared worse again. We read of a battle of Bagnis, in which the Donatists were defeated, and of thirteen years of persecution. In general they were subjected to severe measures.

When Julian the Apostate came into power as emperor, the Donatists were much pleased that Christianity should, under a pagan ruler, cease to be the dominant religion of the state. Thus, in 361, they obtained once more their full freedom in religious matters, and rose to a new height. But the real time was attained by them. They took possession of their own churches again with joy; repainting the edifices, and generally cleaning the walls and altars. Towards the close of the 4th century Africa was covered with their churches, and had four hundred Donatist bishops.

To be thus placed on a level merely with heathen religions and all sects was, however, after all, only a negative comfort. It by no means adjusted the difficulties of the Donatists with the Church, and under succeeding emperors their case again became worse. Maximus, the emperor, who came into conflict with the Donatists, came into conflict with both the state of Carthage, coming into conflict with each other, created parties, out of which grew sects taking their names—

the Maximinists and the Primienists. Other divisions and difficulties followed, and there grew up among the more thoughtful and reflecting of the African bishops a desire to have the breach healed. Reason and calm disputation also now more and more took the place of violence. A powerful influence toward conciliation began to be exerted about 386 by Augustine, first presbyter, and afterwards bishop of Hippo, in Numidia. He wrote, preached, and labored privately and publickly with varied, but still generally increasing success.

From this time forward the cause of the Donatists began gradually to decline. After a three-days' arbitration at Carthage in 411, attended by 286 Catholic and 279 Donatist bishops, where the old issues were rediscussed, the Donatists again stood defeated. Stringent civil laws were also again passed against them, and in 415 they were forbidden, on pain of death, to hold religious assemblies. Even Augustine, who had depended on calm and earnest discussion before, now advocated force, appealing to Luke xiv, 23—"compel them to come in"—and exhorted the hesitating officer of the law to proceed in the infliction of the appointed penalties, saying that it was "much better that some should perish in this war, than that one body should burn in the everlasting flames of Gehenna, through the desert of their impious dissension" (Waddington, History of the Church, p. 155). A new flame of violent desperation broke out. A bishop, Gaudentinus, even vindicated suicide, referring in justification to 2 Mac. xiv; and threatened "that if an attempt were made to deprive him of his church by force, he would burn himself, with his congregation, in it." In 428, when Africa was conquered by the Arian Vandals, the Donatists suffered no persecution from them except as adherents to the Nicene Creed; and the great and long lasting war was ended by the general destruction of the Church in Africa through that invasion. Yet the Donatists continued to survive as a distinct party down to the sixth century.

As may be seen from our sketch, the Donatists were not heretical in any essential articles of faith, nor were they impious in life. Nevertheless, many who were not Donatists led many into excesses, yet these were always disapproved by the better class. Many of the charges of impropriety made against them are regarded as unfounded, or at least as highly exaggerated. The schism began in differences of view in regard to discipline, and was
continued and widened continually more and more by hasty and severe action on the part of the Church and State, and growing fanaticism, separatist pride, and passion on the part of the Donatists. A rich lesson for the Church through all ages lies in the history of this remarkable schism and the subsequent controversy.

To the above account of the Donatists, written by the late lamented Dr. Hartlaub, we append a few notices of views with regard to laws by writers who justify their position, more or less fully, from the not prelatical point of view.

Schenkel, in Herzog's Real-Encyklopädie (art. Kirche, vol. iv ; Roux, De Augustino adversario Donat. (Lugd. Bat. 1838); Ribbeck, Donatus u. Augustinus, oder der erste entscheidende Kampf zwischen Separatisten u. der Kirche (Elberf. 1859); Tillmann, Memoria by the patron's deed of donation, without presentation, institution, or induction. This is said to have been entirely the only way of conferring ecclesiastical benefices in England; the method of institution by the bishop not having been established before the time of archbishop Becket, in the reign of Henry II. All bishops, being of royal foundation, were originally donatives.

Donato, Luitpold, an Italian cardinal, was a native of Venice, and entered the Franciscan order at an early age. He was one of the founders of the school of theology in the University of Bologna, which, in the palatian schism of the 14th century, declared for Urban VI. In 1379 Urban enrolled Donato and caused him to be chosen general of the Franciscan orders. In 1390 he was created cardinal of St. Mark, and in the next year was sent by Urban on a mission to Charles II, king of Naples, for his want of success in which mission the pope arrested him, Jan. 18, 1365. He was charged with high treason, and, although he was never created cardinal, he was put to the torture in presence of the pope himself. He was afterwards decapitated. — Siamondi, Hist. des Républiques Italiennes, vii, 241; Hoefer, Nouv. Jour. Générale, xiv, 539.

Donatus of Casesa Magno. See DONATIST.

Donatus the Great. See DONATIST.

Donker Curtius, Hendrik Herman, was born at Hertogenbosch in 1778. At the age of sixteen he entered the University of Utrecht. He applied himself faithfully to his studies, and did not allow himself to be drawn aside by the political excitements of the time. In theology he enjoyed the privilege of listening to the instructions of the able and learned Herings, who had but a short time before been inducted into the office of professor. In history he was in that labyrinth of history by prizing and faithfully improving this privilege, he reflected honor upon his able and faithful instructor. At the age of twenty-two he entered the ministry, and after spending a year or more in places of less note, he was called to Arnhem, where he continued to labor faithfully to the time of his death, which occurred July 25, 1839. The influence of Donker on the Reformed Church of Holland was very great. He was a popular and eloquent preacher. His style was perspicuous, flowing, and vigorous. For twenty years or more he conducted the Godegeleerde Bydragen, a theological journal of high character. In 1827 his essay on Jesus leer onder God's wille en het gezag der rede in zaken van Godslaten received the gold medal from the Hague Society. For many years he was either president or vice-president of the General Synod of the Reformed Church. In regulating the government and discipline of the Church, in advancing theological science, and in elevating the standard of biblical scholarship in reference to candidates for the ministry, he labored zealously and successfully.

Donne, John, D.D., dean of St. Paul's, was born in London in 1573. He received the instructions of a private tutor at home until 1584, when he entered Hart College, Oxford, from whence he went to Trinity College, Cambridge, 1591. He took his degree at the university, as his parents had brought him up in the Roman Church, and were unwilling for him to take the necessary oaths. At the age of seventeen he com-
menced the study of law at Lincoln's Inn, advancing, at the same time, in liberal education under the care of a tutor who examined him in all the religious questions of his time, and by his strong and firm assertion of religion thoroughly, he decided in favor of Protestantism. At this time, and for years after, he had no design of entering the ministry; he therefore sought civil employment, and upon several occasions accompanied expeditions and embassies abroad. From his youth he continued to discharge his duties as a barrister. Before he was twenty he wrote his satires, which, Hume admits, "flashed with wit and ingenuity," though he speaks of "coarseness of expression." While yet a young man he wrote the most of his poems, some of which were of a licentious nature, leading us to infer that his life at this time was impure; this conclusion is strengthened by the utterances of deep penitence in many of his sermons. When about thirty years of age he was involved in a difficulty with his father-in-law, Sir George Moore, which resulted in his commitment to prison for a short time. A lawsuit for the possession of his wife followed, and so impoverished him that he was compelled to depend upon his relatives. He now applied himself to the study of the civil and canon law, the fruit of which may be seen in some of his discourses. An invitation to enter the ministry, extended by Dr. Morton, afterwards bishop of Durham, was declined. He then began to attract the attention of the highest bench of the court, and, being frequently in court, that of the king, who regarded him as a man of wit and learning. In 1610 the king was so well pleased with his remarks on supremacy and allegiance, made one day at the bar, that he commanded him to embody the arguments in a formal treatise. He complied, and, in the same year published his Pseudo-martyr, in which he showed that Roman Catholics ought to take the oath of allegiance. On perusing it, the king insisted that he should enter into orders, which, after two or three years spent in the study of theology, he did. He was immediately appointed chaplain to James I, and soon after was admitted D.D. at Cambridge. For a while, in 1617, he suspended his clerical functions, from grief at the loss of his wife. Soon after resuming them he was appointed to the deanship of St. Paul's. Preferments now came, so that he was soon raised from a condition of anxious penury to one of comparative affluence, in which he forgot not his friends. He especially helped his father-in-law. He died March 81, 1631. Donne’s epistolary writings are models in their kind. Some of his poems are very fine. But his sermons constitute his great title to enduring reputation. With a style somewhat like that of Sir Thomas Browne, he combined a power of illustration, an artistic skill, and a "capability of administering to thought" equalled by but one or two of his great contemporaries. His sermons are remarkable for subtle trains of thought and of argument. His published works are, 1. Pseudo-martyr (1610, 4to); —2. Essays in Divinity (1651, 12mo); —3. Ignatius, his Conclave; a Satyr; with an Apology for the Jesuits (1688, 12mo);—4. The Holy Opposites, Characters, to which is added a Book of Epigrams, in Latin, translated by J. Mainie, D.D. (1652, 12mo); —5. The Works of John Donne, D.D. (1839, 6 vols. 8vo). This is the best edition of his sermons. It is compiled from the old folio of 1640, and contains, in addition to the sermons, Devotions, Letters, and Poems. Besides the above is an essay entitled Spicilegmi, a declaration that suicide may not always be sin. This was published fourteen years after his death, and contrary to his wishes, expressed in a letter to the earl of Ankerne, in which he says, "It is a book written by Jack Donne, and not by Dr. Donne." See Walton, Life of Donne; Alford's Life of Donne; Dukinfield, Character of John Donne; Johnson, Life of Pope; for biographical references to same, vol. i (edit. of 1839); Hume, History of England, vol. iv, 524; Coleridge, Words (New York edit.), v, 78 sq.

Donellan Lecture, a course of lectures founded by the provost and senior fellows of Trinity College, Dublin, in fulfillment of a legacy of £1253, left by will, dated February 14, 1725. The institution of the Donellan Lecture is due to Anne Donellan, "for the encouragement of religion, learning, and good manners." The lecturer is elected annually on the 20th of November—the subject to be determined at the time of election by the board—and the course consists of six sermons, delivered in the college church. The first three of the sermons are delivered in English, and the last three in Latin. Among these lectures printed are Graves, Lectures on the Psalms of David (1807, 2 vols. 8vo, London); Sadleir, On the Dismissions (Dublin, 1822, 2 vols. 8vo); Kennedy-Bailie, The Mosaic Record of Creation (London, 1826, 8vo); Todd, The Prophecies relating to Antichrist (Dublin, 1840-46, 2 vols. 8vo); McDonnell, On the Atonement (Dublin, 1852).

Donojo-Cortes, Juan (Francisco-Manuel-Maria-de-la-Salud), marquis de Valdegamas, viscount del Valle, was a politician, statesman, publicist, diplomatist, historian, theologian, philosopher, and much the ablest and most eminent of recent Spanish authors. He was born May 9, 1808, at La Valled de Serena, a village of Est emadura. At sixteen he had completed his preparatory studies, which were largely occupied with history, philosophy, and literature. His education in jurisprudence was prosecuted at the University of Seville. In 1830 he married and settled in Madrid. He received some public appointments, but devoted himself to literature. In 1859 he entered the Cortes as representative of the province of Cadiz. He took the side of Maria Christina against the Carlists, rose to high favor in the court, and was appointed privado; secretary to queen Isabella II. This office he resigned in 1845 on becoming a member of the royal council. He was an earnest advocate of the French marriages. In acknowledgment of his support, he was created by his sovereign Marquis de Valdegamas, Viscount del Valle, and was decorated by Louis Philippe with the Grand Cross of the Legion of Honor. In 1848, the Revolution, long foretold by him, exploded. The reforming Pope was driven from Rome; all the nations of Europe were agitated and convulsed. On the 4th of January, 1849, he pronounced his speech in the Cortes renouncing all liberal doctrines, and demanding a dictatorship. This speech startled Europe, and was perhaps the beginning of the reaction. It was a deafening reassertion of the principles of Gregory VII and later popes.

Shortly after the delivery of this speech, Donojo-Cortes was sent as ambassador extraordinary to Berlin. The earlier part of the next year was occupied with the rapid composition of his only formal work—his Essay on Catholicism, Liberalism, and Socialism. It was published in 1853, in Spanish, at Madrid, and was speedily translated into French, Italian, and German. An English version, by Madeleine Goddard, appeared in 1862 (Phila. 12mo). Just before the appearance of this work he was sent as ambassador to France, a mission which he held till his death. His eminence and high position were, however, embittered by the imputations of his political enemies. He is entitled to his brilliant essay by the abbé Gaduel and other opponents. He submitted his book without reserve to the papal judgment. He died at Paris May 8, 1853.

A collection of his works, in 2 vols., had been published at Madrid in 1849 (Colección escogida de las escrituras del Señor Don Juan Donojo-Cortes). A posthumous edition of his works was published after his death (Madrid, 1854-55, 6 vols.) by Tejada, and was republished at Paris, in French, by M. Louis Veulliot. The Essay on Catholicism forms three volumes of the collection. The other two volumes contain Parliamentary Addresses; Letters on France in 1842, and in 1851-52; Observations on the United States, in 1843; more than 500 political and literary journals; letters to distinguished correspondents; and some unfinished sketches on historical and political topics.

The single work on which his reputation will rest...
DONOSO-CORTES 885  DOOR

lies was to increase the ascetic tendency in Europe by confounding Christianity with despotism. See a

Donum Superadditum, or Supernaturale, a designation of the scholastic doctrine of "superadded grace" given to Adam, in addition to his natural powers, and which grace he lost by the Fall. According to some of the scholastic divines (Scottus Eriçena, Bonaventura, etc.), original righteousness (justitia originale) was a man's natural gift, but not a superadded grace (justitia supernaturale) as a donum superadditum. Aquinas held (pt. i, qu. 55, art. 9) that man was created in possession of original righteousness, still, however, as a grace superadded to his natural powers.

Möhler thus states the doctrine: "No finite body can exist in a living moral communion with the deity save by the communion of the Holy Spirit. This relation of Adam to God, as it exalted him above human nature, and made him participate in that of God, is hence termed a supernatural gift of grace, superadded to the endowments of nature. This is not merely a private opinion of theologians, but a dogma" (Symbolum, bk. i, pt. i, 1, 11, 3; 1544, ed. by Er. J. Chroton, Romans, i, 2, 19; Bellarmi, Gratia primi hominis, 2; citations in Winer, Comparat. Dilucid., 4). Dr. J. H. Newman, while yet in the Church of England, taught this doctrine: "What Adam lost in sinning was a supernatural endowment" (Lectures on Justification, 177); so also archdeacon Wilberforce: "The likeness of God must have been some divine presence superadit d to primitive nature (On Incarnation, p. 71, London ed.). The Roman Church further holds that this supernatural endowment is restored by baptism, so that a baptized person stands in the condition of Adam before the Fall. If he goes astray, he is to be restored by confession, absolution, and the sacrament of penance. See Bird, Sacramental System (London, 1854), § 4; Hagenbach, History of Doctrines (Smith's edit.), § 175, 245; Jackson, Works, i, 8 (Oxford); Neander, History of Dogmas (Böhn's edit.), ii, 604. See Image of God; Sin, Original.

Doolittle (or Doolittle), Thomas, M.A., a Nonconformist, was born at Kidderminster, England, in 1690; was educated at Lincoln College, Hall, Cambridge, and became minister of St. Alphage, London. Ejected in 1662, he taught school in Moorfields, and afterwards at Woodford Bridge. Returning to London after the plague, he had a meeting-house built in Monkwell Street, London, where he continued his ministry (with some interruptions from persecution) until his death, May 24, 1707. His writings became very popular; the principal are, A Treatise concerning the Lord's Supper (London, 9th edit. 1675, 12mo) — Love to Christ necessary to Escape the Curse at his coming (London, 1680, 16mo) — Captivity bound in Chains made Free by Christ (on Is. xxxi, 1) — A Rebuke for Sin (1678) — A complete Body of Divinity (1729, fol.), etc. — Darlington, Cyclopedia Bibliographica, i, 945; Calamy, Nonconformists' Memorial, i, 80 (ed. of 1778).

Door (usually דלת, da'lat, strictly the value or part that swings on the hinges; while דלת, pe'tach, designates the entrance or door-way; טֶהֶר, sha'ar, is rather a gate; Gr. θύρα). From a comparison of various passages of Scripture, we learn that ancient doors were suspended and moved by means of pivots of wood, which projected from the ends of the two folds, both above and below. The upper pivot, which was the longer, was set in sockets sufficiently large to receive them in the lintel; the lower ones were secured in a corresponding manner in the threshold. The pivots or axles are called דלת, po'toth; the sockets in which they are inserted, טֶהֶר, te'irim;
(Prov. xxvi. 14). Doors were locked by a lock (Cant. v. 5), or by a bar (Judg. xvi. 3; Job xxxviii. 10). Those made of iron and brass were not used except as a security to the gates of fortified places or repositories of valuables (Isa. xlv. 2, 3). The lock was nothing more than a wooden slide attached to one of the folds, which entered into a hole in the door-post, and was secured there by teeth cut into it, or catchers. Two strings passed through an orifice leading to the external side of the door. A man going out, by the aid of one of these strings moved the slide into its place in the post, where it was so fastened among the teeth, or catchers, as not to be drawn back. The one coming in, who wished to unlock had a wooden key, sufficiently large, and crooked, like a sickle. It was called מגדל המذلك (Judg. iii. 25). He thrust the key through the orifice of the door, or key-hole, lifted up the slide so as to extricate it from the catchers, and, taking hold of the other string, drew it back, and thus entered. Keys were not made of metal, except for the rich and powerful, and these were sometimes adorned with an ivory handle. A key of this kind, in the days of the Hebrew monarchs, was assigned to the steward of the royal palace as a mark of his office, and he carried it on his shoulder (Isa. xxii. 22). The key-hole was sometimes so large as to admit a person's finger through it, and enable him to lift the slide; in that case he stood in no absolute need of a key to enter (Cant. v. 4). See Key. Among the ancient Egyptians doors were frequently stained so as to imitate foreign wood. They were either of one or two valves, turning on pins of metal, and were secured within by bars and bolts. Some of the bronze pins have been discovered in the tombs of Thebes, and two of them, after Wilkinson, are figured below (2, 8). They were fastened to the wood with nails of the same metal. See Hinge. The stone lintels and floor behind the threshold of the tombs and temples still exhibit the holes in which the pins turned, as well as those of the bolts and bars, and the recess for receiving the opening valves. The folding doors had bolts in the centre, sometimes above as well as below; a bar was placed across from one wall to the other, and in many cases they were secured by wooden locks passing over the centre (above cut, fig. 4) at the junction of the two folds. It is difficult (remarks Sir J. G. Wilkinson) to say if these last were opened by a key, or merely slid backward and forward like a bolt; but if they were really locks, they were probably upon the principle of those now used in Egypt, which are of wood, and opened by a key furnished with several pins answering to a smaller number that fall down into the hollow movable tongue, into which the key is introduced when they open or fasten the lock. See Lock. For greater security, they are also occasionally sealed with a mass of clay. This was also a custom of the ancient Egyptians, as appears from Herodotus (ii. 121), from tombs actually so closed at Thebes, and from the sculptures, as in the first cut above, fig. 3, where the door is thus closed and sealed. To this custom there is an allusion in Job. See Clay. At a later period, when iron came into general use, keys were made of that metal, of the shape shown in the above cut, fig. 4. Of the kind thus indicated were probably the lock and key which fastened the summer-parlor of King Eglon (Judg. iii. 28, 25). In this case Ehud locked the door and took away the key; but when the servants became alarmed they easily opened it with another key, which suggests that the lock, as in ancient Egypt or the modern East, was nothing more than a particularly constructed open bolt of wood, which the wooden or metal key was adapted to raise and thrust back. The forms of the Egyptian doors may be seen from the cuts. (See Wilkinson, Anc. Egypt. abridg'd. i. 7-22.) The chief entrance to houses was through a pyramidal pylon on a projecting porch of columns, whose capitals were often ornamented with ribbons. Over the doorway was sometimes a brief hieroglyphical legend (Watson, p. 101). This last circumstance reminds one of the writing on their doors recommended to the Israelites, as noticed below. A comparison of the...
ancient Egyptian doors with those now used in the East will probably suggest no incorrect notion of the provision among the ancient Hebrews in this respect. A sort of intermediate idea arising from this comparison will be found to furnish very satisfactory illustrations of most of the passages of Scripture which relate to the subject. (See Lane's Mod. Ég. i, 3, 16.) Doors are generally unpainted throughout Western Asia and in Egypt. In the interior of houses it is not unusual to see curtains instead of doors, especially in summer. This helps to keep the apartment cool, and also enables servants to enter without noise. This custom originated in the use of tents. Accordingly we find that all the entrances of the temple had curtains, although the framework was of wood (Exod. xxvi, 81-83, 96, 97);

and even in the Temple a curtain or "vail" formed the separation between the holy and the most holy place. See HOUSE. The word "door," in reference to a tent, expresses the opening made by dispensing with the cloths in front of the tent, which is then supported only by the hinder and middle poles (Gen. xviii, 2; Burcharit, Notes on Red. i, 43).

Among the figurative allusions to doors, it may be mentioned, that in Hosea ii, 15, the valley of Achor is called "a door of hope," because there, immediately after the execution of Achan, the Lord said to Joshua, "Fear not, neither be dismayed:" and from that time Joshua carried on his conquests with uninterrupted success. Paul, in 1 Cor. xvi, 9; 2 Cor. ii, 12; Col. iv, 5, uses the symbol of a door opened, to signify the free exercise and propagation of the Gospel. Our Lord applies the term to himself, "I am the door" (John x, 9). The "door opened in heaven" signifies the beginning of a new kind of government (Rev. iv, 1); and in general the opening of anything is said when it may act suitably to its quality; the shutting of anything is the stopping of its use. See GATE.

DOOR-KEEPER (בָּשָׁר, šorer). 1 Chron. xxv, 23, 24, a gate-tender, or "porter," as elsewhere rendered; but in Ps. lxxxiv, 11, רֶפֶן, saphaph, to sit at the threshold; Sept. αρχιπυρήνας; Vulg. agrestus esse; Gr. άρχιπυρήνας, John xviii, 16, 17; elsewhere likewise "porter," a person appointed to keep the street-door leading by an alley-way to the interior entrance of an Oriental house (q. v.). This was originally doubtless a male, but in later times, in imitation perhaps of Greek and Roman usages (see Kittto, Fict. Bibl. note on John i. 1; no such custom, however, appears in classical writers; see Smith's Dict. of Class. Antiq. p. 541 b, 527 b), a female janitress or portress often held this post (John xviii, 16; Acts xii, 13). See PORTER. In Ps. ixxxiv, 10, the word "door-keeper" does not convey the proper meaning of the original, because the preference of the Psalmist was evidently given to a very humble situation, whereas that of a door-keeper, in Eastern estimation, is truly respectable and confidential. The gods are always represented as having door-keepers, who were of great dignity and power, as they also fought against other deities. In the heathen temples there are images near the entrance called kōnas (q. v.), guards, or door-keepers. See ANUNIAH; ASR. Kings and great men, also, have officers whose business it is to stand at the door or gate as keepers of the entrance. The most dignified native of Ceylon is the maku model merchant of the governor's gate, to whom all others must make obeisance. The word door-keeper, therefore, does not convey the idea of humility, which is the chief element of honor. The marginal reading of our version, however, to "sit at the threshold," at once strikes an Eastern mind as a situation of deep humility. See the poor heathen devotee; he goes and sits near the threshold of his temple. Look at the beggar; he sits or prostrates himself at the threshold of the door or gate, till he shall have gained his suit. "I am in great trouble; I will go and lie down at the door of the temple." "Friend, you appear to be very ill." "Yes." "Then go and prostrate yourself at the threshold of the temple." The Psalmist therefore probably refers to the attitude of a beggar or suppliant at the threshold of the house, as a thing to be as being preferable to the splendid dwellings of the wicked. See BEGGAR.

DOOR-KEEPERS (οστιάριοι), in the ancient Church, a class of church officers forming the lowest clerical order. Their duties were to open and close the doors, not only at the termination of religious worship, but during the services, especially after the misce catachumenorum (q. v.). In later times, in the Roman Church, their duties became nearly those of the modern sexton, viz. to take care of the church ornaments and vessels, to ring the bell, to sweep the church, etc. The customary forms of ordination are prescribed in the fourth council of Carthage; and the keys were delivered to them by the bishop, with the injunction, "Behave thyself as one who must give account to God of the things that are kept under these keys." Their ordinary name was ὁστιάριοι, ostiarii, and sometimes mansionarii and janitores.—Bingham, Orig. Eccles. bk. iii, ch. vi.

DOOR-POST (שָׁפַה, šapha, Ezek. xli, 16, the sill or "threshold," as elsewhere usually rendered; סַפָּה, saphah; mashkiph, Ezek. xii, 7, the lintel, as elsewhere rendered). In Deut. vi, 9, Moses enjoined upon the Israelites to write the divine commands upon the posts (שַׁפָּה, mezuzah), invariably so rendered) of their doors, a practice which is understood literally by the modern Jews (Thomson, Land and Book, i, 141). It is at this day customary in Mohammedan Asia for extract from the Koran, and moral sentences, to be written in strong colors, and pasted on the inner and outer edges of the scrolls to the interior of apartments. The elegant characters of the Arabic and Persian alaphetets, and the good taste with which they are applied in running scrolls, the characters being usually white, raised on a blue ground, and intermixed with gilding, have a very pleasing effect, particularly in interior ornament. This custom must have been very ancient, for Moses
DOORS OF THE CHURCH 868

DOR

here very evidently alludes to it. We understand the injunction not as imperative upon the Hebrews to write on their doors, but as enjoining them, if they did write at all, to write sentences of the law. He suggests this as a means of inculcating the law upon their children, whence it seems that he took it for granted that the children would be taught to read. "Among us," says Michaelis, "where, by the aid of printing, books are so abundantly multiplied, and may be put into the hands of every child, such measures would be quite superfluous; but if we would enter into the ideas of Moses, we must place ourselves in an age when the book of the law could only come into the hands of a few opulent people." The later Jews have exercised their usual ingenuity in misunderstanding this injunction. They conceive the observance to be imperative, and they act on it as follows: Their mezuzah, or door-schedules, are slips of parchment, on which are written the passages Deut. vi, 4-9, and xi, 13-20; these slips are rolled up, and on the outside is written the Hebrew word שדד, shaddai, or "the Almighty," one of the names appropriated to God. This roll they put into a reed or hollow cylinder of lead, in which a hole is cut for the word שדד to appear, and the tube is then fastened to the door-post by a nail at each end. As the injunction is in the plural form, they conceive that a mezuzah should be placed on every door of a house. It is usually fixed to the right-hand door-post, and those Israelites who wish to be considered particularly devout usually touch or even kiss it as they pass. The Talmud ascribes great merit to having the mezuzah fixed on the door-post, and describes it as a preservative from sin. See MEZUZOTH.

Modern Jewish Mezuza.

Eastern Door Inscripted with Passages from the Koran.

DOORS OF THE CHURCH. To insure secrecy in worship, the ancient Christians constructed the doors of their churches with peculiar care. The early fathers, from this usage, derived abundant metaphors, relating to admission to the church, to heaven, etc. There were generally three principal entrances, in im-

itation of the Jewish Temple. Sometimes the terms פיו, porta, and בימה, jumaa, were interchanged; but, for the most part, the principal entrance, at the west, over against the altar, was called, by way of eminence, פיו, and פיו עם, or בימה. Men and women entered by different doors. The doors were constructed of the most durable wood, or of brass richly ornamented. The date of the building or dedication of the church was usually inscribed on the doors. Sometimes the doors bore inscriptions of various kinds, of which the following may be taken as a specimen.

On the outside,

"Pax tibi sit, quaecumque Dei penetralis Christi;
Pector pacificus candidus ingr. deris".

On the inside,

"Quesquis abinde Dei, perfectis ordine votis,
Egeriaria, reusse corpus, orde mane."

It was customary, in early times, to place on the doors the names of all eccommmunicated persons; at a later period, the names of persons intending marriage were posted up in like manner. This was also the place for affixing all proclamations and decisions of the Church, as well as all public notices.—Riddle, Christian Antiquities, b. vi. ch. v. § 6; Coleman, Christian Antiquities, ch. ix. § 10.

Dophkah (Heb. Dopkak') מְפֶּרֶךְ, according to Gesenius, a knocking; accord. to Fürst, cattle-driving; Sept. Παπαζαί, by error of π for τ; Vulg. Dopka). The eighth place of encampment of the Israelites in coming out of Egypt (Num. xxiii, 18). It was situated in the desert of Sinai, on the eastern shore of the western arm of the Red Sea, probably at the mouth of Wady Feiran. See EXOD. Poccecke (Eisai, i, 2:) thinks it lies east of Thor, in Wady Hibran; but this is apparently conjecture. Fürst (Heb. Handw. s. v.), after Boezaen (Zach's Correspond. xxvii, 71), says it is the modern Deir el-Mobacha; which, if the Lydian Dora, Robinson (Res. ii, 388, 468), is far away, and probably the ancient Tagoba (q.v.); but if in the valley Knib (Keil, Excub. p. 70), would be precisely our location (Robinson, i, 121, 122).

Dor (Heb. דָרָא, a dwelling, but "in Josh. xvii, 11; 1 Kings iv, 11; Sept. Δωρο, but joins with preceding word Δωρο or Δωρα, in Josh. xi, 2 Νεπαλον, in Josh. xii, 22 [second clause] Νεπαλον, in 1 Kings iv, 11 Νεπαλον; Vulg. Dor; the Dorra, το δωρα, of the Apocrypha and Josephus, who, as well as Greek writers, call it Doras. Δορα, the ancient city of the Cannanites (Josh. xii, 23), whose ruler was an ally of Jabin, king of Hazor, against Joshua (Josh. xi, 1, 2). It was probably the most southern settlement of the Phoenicians (Selayx, p. 45; ascribes it to the Sidonians) on the coast of Syria (Joseph. Life, p. 8; Ant. xv, 9, 9). Josephus describes it as a maritime city (War, i, 21, 5) on the west border of Manasseh and the north border of Dan (Ant. v, 1, 22); vii, 2, 3, War, i, 7, 7), near Mount Carmel (Ap. ii, 10). One old author tells us that it was founded by Dorus, a son of Neptune, while another affirms that it was built by the Phoenicians, because the neighboring rocky shore is found in the small shell-fish from which they got the purple dye (Reland, Polyst. p. 739). It appears to have been within the territory of the tribe of Asher, though allotted to Manasseh (Josh. xvii, 11; Judg. i, 27). The original inhabitants were never expelled, but during the prosperous reigns of David and Solomon were made tributary (Judg. i, 27, 28), and the latter monarch stationed at Dor one of his twelve purveyors (1 Kings iv, 11). Reland (Polyst. p. 744) thinks it is the Dura (Δωρα) mentioned by Polybius (v, 409) as the scene of the victory of Antiochus Epiphanes over Ptolemy Philometor. Tryphon, the murderer of Jonathan Maccabaeus and usurper of the throne of Syria, having sought an asylum in Dor, the city was besieged and captured by Antiochus St.
DORAS

DORASHE

dates (1 Mac. xv, 11, 13, 25; Joseph. Ant. xiii, 7, 2; War, i, 2, 2). It was granted the privilege of nomi-

nal independence by Pompey (Joseph. Ant. xiv, 4, 4; War, i, 7, 7), and was rebuilt by Gabinius, the Roman

general, along with Saruma, Ashdod, and other cities of Palestine (Joseph. Ant. xvi, 8, 9), and it remained an

important place during the early years of the Ro-

man rule in Syria. Its coins are numerous, bearing the

legend "Sacred Dora" (Valliant, Num. Imp.). It becam

an episcopal city of the province of Palestina Prima,

but was already ruined and deserted in the fourth century (Jerome, as Episcop. Palaestinae). Ac-

cording to Tolaon (v, 15, 5), it was situated in long.

66° 30', lat 32° 40'; according to the Peutinger Table,

20 miles from Ptolemais; and according to Eusebius

and Jerome (Onomast. s. v. Δοράς vpp. Νεφαδικ, Dorna-

phet), it lay on the coast, "in the ninth mile from

Cesarea, on the way to Ptolemais." Just at the point

indicated is the small village of Tantara (or Tortura,

Pococis, ll, 84; Arvieux, ii, 11: Gesenius thinks, The-

saar. p. 331, either form equal to the Arabic for kibb

of Dora), consisting of about thirty houses, wholly

constructed of ancient materials, and inhabited by Mo-

hamsdans (Mangles, Trans. p. 156; Schick, Palestina, p.

72, 9). It was described in the Lazarus Book, ii, 248). Three hundred yards north are low rocky moun-

tains projecting into the sea, covered with heaps of rubbish, massive foundations, and fragments of columns. The most conspicuous ruin is a section of an old tower, 50 feet or more in height, which forms the landmark of the town. On the south side of the promontory, op-

posite the village, is a little harbor, partially sheltered by two or three small islands. A spur of Mount Carmel, steep and partially wooded, runs parallel to the coast-line, at the distance of about a mile and a half. Between its base and the sandy beach is a rich and beautiful plain—this is possibly the "border," "cost," or "region" (Γεωτρία) of Dor (Jos. xi, 2; xii, 23; 1 Kings iv, 11). The dis-

trict is now almost wholly deserted, being exposed to the raids of the wild Bedouins who pasture their flocks

on the rich plain of Sharon. See also Hamath-Dor

Ex-Don.

Dora (1 Mac. xv, 11, 13, 25). See Dor.

Dorcas (Δορκάς, a female antelope; explained in the

writer mentions her as "a certain disciple named Tab-

itha, which by interpretation is called Dorcas," the

reason given being that "she was full of good deeds

and alms distributions among the poor," "in order to afford employment to poor needledwellers,

Societies of this kind are so called from what is

recorded in Acts ix, 39: "And all the widows stood

by him weeping, and showing the coats and garments

which Dorcas made while she was with them.

Dorchester, Daniel, a Methodist Episcopal minis-

ter, was born at Vernon, Conn., Jan. 25, 1790. He

was drafted for service in the war of 1812, and soon

after his term of military duty expired he was licensed
to preach. In 1816 he entered the travelling ministry

in the New England Conference, and served as minis-

ter and presiding elder until his final supernumeration in

1853. In 1854 he was made librarian of the public library and reading-room in Chicago, and died near that city August 6, 1854.

Mr. Dorchester was a man of clear intellect and de-

cided character. He ably defended Methodism in a

time when it was "much spoken against." On many

of his circuits there were extensive revivals.—Min-

ister of Conferences, v, 512.

Doris (Δορίς), a Jewess of low descent, the first

wife of Herod the Great (Josephus, Ant. xiv, 12, 1), by

whom she had Antipater (War, i, 26, 4); she was ex-

peled from court on account of alleged complicity in

the treason of Phraoras (War, i, 80, 4).

Dorda (Δορδά), a town whose ancient name and

site was discovered by Setzen from an inscription

found by him in the modern village ed-Dur, in the re-

gion of the south of the lake in the little

south of Wady Kanamat (Ritter, Erdk. xx, 686).

Dorothēus (Δοροθσ, God-given), the deputy ap-

pointed by Nicanor, the royal steward of Ptolemy Phil-

adelpus, to entertain the seventy learned persons sent

from Jerusalem to translate the Old Testament into

Greek (Joseph. Ant. xii, 2, 19, 18). See Septuagint.

Dorotheus, a presbyter of Antioch, mentioned by

Eusebius as "a man of fine taste in sacred literature,

who was much devoted to the study of the Hebrew

language, so that he read the Hebrew Scriptures with

great facility. He also was of a very liberal mind,

and not unacquainted with the preparatory studies

pursued among the Greeks, but in other respects a

curiously balanced, having been such from his birth; so

that the emperor, on this account, as if it were a great

miracle, received him into his house and family, and

honored him with an appointment over the purple dye

establishment of Tyre. Him we have heard in the

church expounding the Scriptures with great judg-

ment." As Eusebius says that he flourished under

Cyril, who is supposed to have been bishop of Antioch

from A.D. 325, it is obvious that this Dorotheus was

given as about A.D. 290.—Eusebius, Hist. Eccles. bk.

vii, c. 82; Lardner, Works (10 vols. 8vo), vol. iii, 129.

Dorotheus of Tyre, supposed to have been bishop

of Tyre about A.D. 800. He is said (not by con-

temporary writers, but by later martyrologists) to

have flourished greatly in the persecutions under Diocle-

tian, and to have suffered martyrdom under Julian, A.D.

363. He is mentioned under his name in the lists of

victimas et morte Prophetaurum, Apostolorum, et Discipulorum Domini (given in Biblioth. Max. Patrum, iii, 421). It is now generally allowed to be a de-

spurious and of little or no value. —Lardner, Works (10 vols. 8vo), vol. iii, 161; Fabricius, Bibl. Greek (edit. Harleis), vili, 422; Cave, Hist. Lit. (Genova, 1729), i, 193; Oudin, Script. Eccles. i, 1377.

Dorotheus, bishop of Marcianople, in Moesia, in

the fifth century, was a strong advocate of Nestor-ianism. He pronounced anathema against all who as-

serted that Mary was the mother of God. He attend-

ed, as a bishop, the Council of Ephesus (opened June

22, 433), which denounced the Nestorians as schismat-

ics; and he was banished to Cappadocia by order of the

emperor Theodosius. Four letters of his are pres-

erved in the collection of I. Lupus, entitled Ad Ephet-

umarum Concilium variorum Patrum Epistolae (Louv. 1688, 2 vols. 4to).—Cave, Hist. Lit. (Genova, 1729), i, 269.

Dorotheus, archimandrite of Palestine, 7th cen-

tury, a disciple of Joannes the Abbot, wrote Παθον-

ακλίνος Βαθύπολος, Doctrina Dierum, given (Gr. and Lat.)

in Migne, Patrologia Graecia, 88, p. 1511 sq., and in

the other great collections of the fathers. See Fabricius, Bibliotheca Graeca (ed. Harleis), xi, 103 sq.; Cave, Hist.

Lit. (Genova, 1729), i, 873.

Dorsche, Johann Georg, a Lutheran theologian,

was born at Strauburg, Nov. 13, 1597; became profes-

or of theology at Strasbourg in 1627, and was called to

the same chair in 1654. He died Nov. 25, 1659. Dorsche (Latin form Dorsequus) was a vol-

umnious writer in theology and Biblical literature.

**Dort, Synod of (Synodus Dordracensae)**, a national synod of the United Provinces, held at Dort (Dordrecht; Lat. *Dordructum*) in 1618-19.

**I. Origin of the Synod.** — The opposition of James Arminius to the Augustinian and Calvinistic doctrines on predestination gave rise to a bitter controversy, for an answer of which, see ARMENIUS. After the death of Arminius (+1609), the strife increased, and with added bitterness. The clergy and laity of Holland were arrayed in two hostile armies—Gomartism and Arminians, the former being the most numerous, but the latter including the leading scholars and statesmen. In 1610 the Arminians presented a petition to the States of Holland and West Friesland, which was called a "Remonstrance" (*Remonstratian*, *libellus supplices adhibitus Hollandiæ et West Friscis ordinibus*). They were named *Remonstrants* (q. v.) in consequence; and, as the Calvinists presented a "confession," they were called *Confessors*. The "Remonstrance" sets forth the Arminian theory over against the Calvinistic in five articles (for which, see ARMENIANS). Attempts were made by the authorities to reconcile the two contending parties by a conference between them at the Hague in 1611, a discussion at Delft in 1618, and also by an edict in 1614, enjoining peace. The Remonstrants desired a provincial synod for the province of Holland, where the two parties were nearly equal in numbers and influence; or else a general synod of all Protestant Christendom, to which Lutherans as well as Reformed should be summoned. Grotius, especially (1617), argued in favor of a general Protestant council.

Unfortunately, political interests added to increase the difficulty. The great patriots and statesmen, Grotius and Barneveldt, were advocates of toleration for all opinions, and the former was also one of the leaders of the Remonstrants. The stadholder, Maurice of Nassau, was a great soldier, but a narrow and ambitious politician. The pensionary Barneveldt succeeded, against the wishes of Maurice, in obtaining, in 1699, a twelve-years' truce with Spain, and for years held Maurice in check in his attempts to secure for himself and his family a hereditary sovereignty over the States. Maurice, though himself said to have been an Arminian in sentiment, placed himself at the head of the Gomartists, who constituted the majority of the clergy and people; while the leading statesmen and patriots, as has been said, were on the other side. One of his measures was to change the municipalities of the cities wherever the Arminians were in power, and to substitute Calvinistic burgomasters and governors. Another was to imbue the popular mind with the belief that Barneveldt, Grotius, and the Arminians were secretly aiming to deliver the country up to Spain. By means of the changes thus effected, the States-General came finally to be strongly in favor of Maurice, and willing to carry out all his measures, whether political or religious.

James I of England was greatly interested, on political grounds, in the peace and prosperity of the United Provinces. Moreover, his pride and pedantry were stimulated by the subjection of the stadholder, Maurice, who had been elected to fill the chair of Arminius, and who was charged with Socinianism. See VOSSTICS. In 1613 (March 6) he wrote an autograph letter to the States-General, urging that the difficult question of predestination should be kept out of the pulpit, and that there should be "mutual toleration," especially as the "opinions of neither party were inconsistent with Christian truth and with the salvation of souls" (*Epist. Priv. et Erudit. virosum*, Amst. 1660, p. 389). But on the 20th of March, 1616, he wrote again to the States-General, urging that the "false and pestilent opinions" should be put down until a national synod, to be summoned, should settle the question (see the letter in *Epist. Priv. et Viros*, p. 480. See also the reply of the Armistian State of Holland to king James, in the same collection of letters, p. 492).

The States of Zeeland, Friesland, Groningen, and Guelders, the leaders of the revolt, disapproved of the States of Utrecht, Holland, and Overysel, who were opposed to it, although some of their chief cities (e.g. Amsterdam) favored it. The States, under the guidance of Maurice, resolved, Nov. 11, 1617, to convocate a national synod, to be held May 1 the following year. All opposition to the convocation was at last forcibly put down by the arrest and imprisonment of the great leaders of the Armistians—Barneveldt, Grotius, and Hogerbeets (Gisseler, *Eccl. Hist.*, ed. by Smith, vol. iv, § 48)—who maintained, in advance of their times, the doctrine that the State had no right to interfere in questions of religious doctrine, and therefore had no right to compel professors to confess a doctrine that was not to be authoritative. Opposition in various quarters caused a further decree of the States that the national synod should be summoned for Nov. 1, 1618, for the time, and at Dordrecht for the place. Letters of the States-General, dated June 26, 1618, invited the Reformed churches of England, France, the Palatinate, Hesse, Switzerland, Brabant, Bremen, and Brandenburg, and Nassau to send as delegates some of their theologians to aid the deputies of the Belgic churches in "settling the controversies." The Reformed Church of Anhalt was not invited, nor were the Lutheran churches.

The aim of the States-General was to constitute a body holding Calvinistic views on the points in dispute. The British deputies were George Carlton, bishop of Llandaff; John Davenant, professor of theology at Cambridge; Samuel Ward, of Sidney College, Cambridge; and Joseph Hall, afterwards bishop of Norwich. These took their seats at the beginning of August, 1618. The Synod of Dort returned to England on account of sickness, and was replaced by Thomas Good, of St. Paul's, London. Walter Balcanquall, a Scotch presbyter, was also deputed by king James to represent the Scottish Church. He wrote minutes which are published with Hales's Letters, mentioned below. John Hales, of Eton, "the ever-memorable," was then a chaplain to the court. He was at Dort, and was, with the Hague, and in that capacity attended many of the sessions, taking minutes, which he regularly transmitted to the ambassador. These minutes are to be found in Hales's *Golden Remains*.

**II. Organization of the Synod.** — The States-General ordered the delegates to the synod to be chosen as follows. Each province was to call a provincial synod, from which six persons, of whom three or four should be pastors, were to be chosen as delegates to the synod. Holland and Utrecht, in which the Arminians were numerous, were excepted from this provision. It was ordered that the provincial synods of Holland should be made up of four ordinary delegates from each Classis in which no separation on account of the dispute had taken place; while each Classis in which such separation had taken place should send two Calvinists and two Arminians. The provincial synod, thus constituted, was to select its delegates to the national synod. In Utrecht, a synod of thirty of various denominations (among them Uitenbogaert) were deposed from the ministry before the selection of delegates was allowed. Nevertheless, three of the delegates from Utrecht were Arminians, and "they were the only Arminians who had seats in the synod." They were
allowed to sit on condition "that while the affairs of the Remonstrants were under discussion they should not disturb the proceedings of the synod by unseasonable interruptions and quarrels, or speak or do anything done or said in the synod which concerned their cause." These three, moreover, did not remain long in the synod. The synod, when organized, consisted, first, of the deputies from the States, who properly constituted the ministers and professors, and 18 ruling elders; and, secondly, of 24 foreign divines. The States-General were represented by lay commissioners, of whom Daniel Heinisius was secretary. The only Protestant kingdom in Europe that sent deputies to the synod was Great Britain. Besides these, and the divines of the United Provinces, there were delegates from Switzerland, the Palatinate, Hesse, Wetterau, Emden, and Bremen. The Lutheran churches were not represented. No delegates from France were present, as Louis XIII forbade Rivet and Dumoulin, who were chosen as deputies by the French Protestants, to attend.

Nov. 18, 1618, with public worship in the church of Dort. At the second session, John Bögemann, a pastor in Friesland, was chosen president, with Jacobus Rolandas, of Amsterdam, and Hermann Fankelius, of Middleburg, as assistants, or vice-presidents. Sebastian Daumann, of Zutphen, and Festus Hommius, of Leyden, were appointed secretaries. We cannot go into detail as to the course of procedure; the sources of information are announced at the end of this article. A summary account, from the Calvinistic point of view, may be found in Dr. Miller's Introductory Essay to Scott's Synod of Dort (Praybyt. Board of Publ.) as well as in the Theological Dictionary, s. v. Dort (chiefly taken from Nicholls, Protestantism and Arminianism). The following short statement is partly from the sources just named, and partly translated from Hepp, in Herzog's Real-Encylopädie, iii, 486 sq.

At the third session the credentials of the deputies were received. In the fourth it was ordered that Episcopius and twelve other Remonstrants should be cited to appear in a fortnight to state and defend their views.

In the mean time the Remonstrants, without knowing the resolution of the synod, had deposed three of their body from Leyden, to obtain leave for their appellation to be sent to a synod under safe-conduct, to defend their cause. On making their request known to the lay commissioners, they were informed of the resolution which had passed the synod only the preceding day. To which they replied that it was unreasonable to cite those to justify themselves who were both ready and willing to come of their own accord. The deputies persisted in proceeding with their plan of citation, they would by that act furnish just cause, not only to them, but to all good men, to entertain strange notions and suspicions of the synodical proceedings. Not being permitted to choose those men from their own body whom they deemed the best, the Synod, in the end, perceived it an additional hardship that their enemies should assume that unlawful authority to themselves. But neither at that time nor afterward, when they wished to add two of the most accomplished of the brethren to their number, were their representations successful.

During this fortnight the synod considered various matters apart from the Remonstrant question, ordered the preparation of a new version of the Bible, ordained rules for catechization, and prepared instructions for the Dutch missionaries in the East Indies, etc.

At the twenty-second session the Remonstrants appeared, with 25 deputies, and after delay, Episcopius defended the Arminian doctrine in a discourse which produced a profound impression. Disputes arose in subsequent sessions as to the topics to be treated, and the order in which they should be taken up. In the session of December 10 the Remonstrants gave great offence by reading a document from the pen of Episcopius, in which it was declared that "the Remonstrants did not own the members of the synod for lawful judges, because the great majority of them, with the exception of the foreign divines, were their confessed enemies; and that most of the inland divines then assembled, as well as those whose representatives they had chosen, had been guilty of schism which was made in the churches of Holland. The second part contained the twelve qualifications of which the Remonstrants thought a well-constituted synod should consist. The observance of the stipulations proposed in it they gladly have obtained, excepting from the synod, declaring it exceedingly equitable, and that the Protestants had offered similar conditions for the guidance of the Papists, and the Calvinists for the direction of the Lutherans." On January 14 the Remonstrants were dismissed from the synod. Their views, as gathered from their own writings, were subsequently passed upon and condemned.

The doctrinal discussion in the synod showed that its members were not so fully at one in their positive views of doctrine as in their opposition to Arminianism. The question whether, according to Ephes. 1, 4, Christ is the ground of election (fundamentum electionis), gave rise to strong debates, the Anglicans and the Germans taking the affirmative, while other deputies, in view of the divine decree, maintained the negative; the Melancthonian element was obviously not yet rooted. It was found difficult at last to harmonize the various views of election in one formula. The deputies from Hesse, Bremen, Nasseu, and England seemed to favor a doctrine of election similar to Baxter's so-called Universalism. See ATONEMENT. The Canones Synodici (sess. 186, April 23, 1616) set forth clearly the doctrine of predestination, but not in the supralapsarian sense.

After the condemnation of the Arminian tenets, it remained to punish those who upheld them. The Hessians and Anglians opposed the infliction of personal penalties. Nevertheless, the synod "deposed the Arminian ministers, excluded them and their followers from the communion of the Church, suppressed a part of their assemblies, and, by the aid of the civil government, which confirmed all their acts, sent a large number of them to other synods, those who adhered to them, into banishment" (Miller, Introductory Essay to Scott's Synod of Dort, p. 29).

In the later sessions the Heidelberg Catechism and the Belgic Confession were adopted as orthodox statements of doctrine, in full harmony with the Word of God. In the 144th session the empire read before a large concourse in the great church of Dort, the Canons on the five articles, and the Censorate Ecclesiastica passed against the Remonstrants. The 154th and last session was held on May 9. Five days after (May 14) the great Barneveldt was beheaded at the Hague.

Fabricius, Bibliotheca Graeca, xi, 729 (H. Bowb. 1705, 14 vols.), gives an account of the Synod of Dort, from which we extract the following statement (translated by Nicholls) as to the publication of its Acta (Journals).

"For the publication of the Acts, the divines chosen out
of various districts of the United Provinces were John Polyander, Anthony Walaeus, Anthony Thysius, Daniel Heinsius, Festus Hommius, Daniel Colonius, and John Lasta. But Dr. Wm. Bates informs us, in his Life of A. Walaeus, that the "chief merit of the publication is due to Festus Hommius, who was a ready and elegant writer and the 'synod,' connected with a profounder diligence than the others the matters that had been transacted." These Acts were published at Dort in the year 1620, in folio, in the next types of Elzevir's at Leyden, and were soon afterwards executed with greater correctness, in the same year, at Hanover, in quarto, with the addition of explanations. Professor D'Anquetil thinks that the opinions of their high mightinesses the States-General, addressed to the monarchs and kings, to the princes, courts, cities, and magistrates (of the Christian world), and vouching for the fidelity and authority of these Acts; and likewise the ample preface of Daniel Heinsius, addressed to the Reformed churches of Christ, concerning the origin and increase of the Dutch controversies, for the purpose of appeasing which the synod had been convened. The Acts themselves consist of three parts: (1) The rules for holding the synod; the form of the synodical oath; decrees and judgments concerning the translation of the office of bishop into a sacred ministry; and concerning the removal of the abuses of printing; the canons against the five points of the Remonstrants; the Confession of the Dutch churches; the approbation of the Palatine Catechism; the judgment passed on the doctrine of Conrad Vorstius; a writing of the Remonstrants respecting the conditions on which the synod ought to be held; the theses of the Remonstrants on the five points, and the various exceptions and protestations against the synod; a writing by Simon Episcopius, in which he defends himself; the confession of the two others Geistereren; and, lastly, the orations of those very celebrated men, Balthazar Lyons, Martin Gregory, Joseph Hall, John Polyander, John Acronius, and of the memorable Episcopius. (2) The judgments of the foreign divines on the five points of the Remonstrants. (3) The judgments of the Dutch divines on the same points."

The Canons of Doctrine are given under five heads: I. Of predestination, 18 articles. II. Of the death of Christ, and of the redemption of men thereby, 9 articles. III. And IV. Of man's corruption, and of his conversion, 17 articles. V. Of the perseverance of the saints, 15 articles. They may be found, in English, in Scott's Synod of Dort, and in the Constitution of the Reformed Church (Philadelphia, 1840, Appendix, p. 72 sq.). They were officially received by the churches of France, the Palatinate, and Switzerland, but were merely countenanced by England and Brandenburg. The English Church afterwards "rejected the decisions of the synod, and a royal mandate of James I., who favored Arminianism as strongly in his later years as he had favored Calvinism before, in 1622, forbade the preaching of the doctrine of predestination" (Shedd, History of Doctrine, ii, 477; Neal, History of the Puritans, Harpers' ed., i, 272). The Reformed churches of other countries did not consider them as binding. They received legal authority in no other country but France. The divines of Bremen were very moderate at the synod, and afterwards, headed by Martinus, they rejected its decisions. Martinus wrote: "O Dort, Dort, would to God I had never seen thee." Hales, of Eton, was converted from Calvinism to Arminianism at the synod. See Hales.

The council has given rise to more bitter controversy than the Synod of Dort. Arminian writers have denounced it in the strongest language as unworthy the name of a Christian synod, while, on the other hand, Calvinistic writers have extolled its fairness and impartiality. All depends upon the point of view, and upon the notion of the true purpose of the synod which is adopted. If this cultivated as-
Reformattle (Amsterd., and Rotterdam. 1663-1704, 4 vols.; transl. into English by Chamberlayne, Lond. 1720-28, 4 vols. fol.; also abridged, 1725, 2 vols. 8vo); Leyd. (Calvinists), Eere de Leyden: Nationale Synode van noodrede (2 parts, Amst. 1706-1707, 4to), a reply to G. Brandt; to which reply his son, J ohn Brandt, replied in Verantwoording van de historie van G. Brandt (Amst. 1705). Letters of the Helenic Delegates (Litera Deleg. Hæsiacorum), ed. by Happe, in Zeitschrift für historische Theologie, xxiii, 228 sq.; Neal, History of the Puritans, ii, ch. ii; Coller, Ecclesiastical History of Great Britain (Lond. 1841, vii, 404 sq.); Nicholls, Calvinism and Arminianism (Lond. 1824, 2 vols. 8vo), i, xxiii, and ii, 576 sq.; Mosheim, Ecclesiastical History, cent. xvii, sec. ii, pt. ii, ch. ii; Gisler, Ch. Hist. ed. Smith, iv, 48; Schröck, Kirchengeschichte seit d. Reformation, v, 246 sq.; Scott, Articles of the Synod of Dort, transl. with notes (Phiila. Pressed Board: severely reviewed in Nicholls, Calvinism and Arminianism, vol. i; favorably reviewed in Christian Observer, xviii, 794, and in Spirit of the Pilgrims, iv, 256). The Canons of Doctrine, in Latin, are given in the Synodale Concessioniun (Oxon. 1804, p. 864 sq.); in Niemeyer, Colloquia Synodalium (1840, p. 360 sq. in Augustus, Corpus Librorum Symbolicorum (Elberfeld, 1897, p. 386-246); in English, in Scott’s Synod of Dort, cited above; also in the Appendix to the Constitution of the Reformed Dutch Church (Philad. 1840, 18mo); and in Hall, Harmony of the Protestant Confessions (Lond. 1842, p. 659 sq.). See also Gisler, Geschichte der protestantischen Dogmatik, i, bk. ii, and iii; Cunningham, Reformers and Theology of the Reformation, Essay viii; Cunningham, Historical Theology, ch. xxi, § 1, 2; and the articles ARMENIANISM; EPISCOPALISM; GROTIAN; VORSITUS; REMONSTRANTS.

Doratius (Δοράτιος), a leading Jew, charged before Quadratus, president of Syria, with inciting his countrymen to revolt against the Romans (Josephus, Ant. xx, 6, 2).

Dorymēnās (Δωρυμένα), father of Polemy, surnamed Macron (1 Macc. iii, 88; 2 Macc. iv, 45). As this Polemy was in the service of Polemy Philometor, king of Egypt, before he entered to Antiochus Epiphanes, it is possible that his father is the same Dorymenes who fought against Antiochus the Great (Ant. xxv, 61).

Dosthæus. See DOSTHUS.

Dosthîs (Δοσθής), the name of several men in the Apocrypha.

1. "A priest and Levite," who, according to the apocryphal additions to the book of Esther, carried the letter of Mordecai respecting the feast of Purim to Egypt (Esth. xi, 1, 2). It is scarcely likely that he is Dosthis, the Deistos who is mentioned by Josephus (Ant., ii, 5) as one of the "commanders of the forces" of Polemy VI Philometor, though he probably lived in the reign of that monarch. Josephus also speaks of a Dosthis who betrayed to Herod a hostil letter of Hyrcanus (Ant. xv, 6, 2).

2. One of the generals of Judas Maccabæus (2 Macc. xix, 3).

3. A cavalry soldier in the army of Judas Maccabæus, of the company of Bacenor (2 Macc. xii, 85).

4. A renegade Jew in the camp of Polemy Philometor (3 Macc. i, 8).

Dosthæus, a Samaritan, in the first century, who claimed to be Messiah, or the prophet promised in Deut. xxviii, 18 (Eulogius ap. Phot. bibl. cod. p. 280; Gisler, Ch. History, i, § 18). Instead of being included in the class of heretics, he ought to be classed with the lunatics who have fancied themselves divine messengers. His impious claims caused an order from the Samaritan high-priest for his apprehension; and Dosthæus took refuge in a cave, where he is said to have starved to death (Epiphanius, Heres. xii, cited by Mosheim, Hist. Comment. N. Y. 1831, p. 240 note).

Dosthæus, the founder of the Russian sect called after him Dosthæscherze. He taught that it was sufficient to confess one's sins and to receive the Lord's Supper once every ten years, and at the close of one's life.—Allgem. Real-Encyklop. iv, 817.

Dosthæus, Greek patriarch of Jerusalem. He assembled, in 1672, a synod at Jerusalem for the purpose of rooting out Calvinism, which, in his opinion, had been introduced into the Greek Church by the patriarch Cyril Lucaris. He died in 1706.—Allgem. Real-Encyklop. iv, 817.

Do'thaim (Judith iv, 6). See DOTHAN.

Do'than (Heb. Douthan), contracted for דותן, two ceterus, which occurs with ה directive, Dothâpek, גנונא דותן, "to Dathan," Gen. xxxvii, 17 [first clause]; Sept. דתני and דותני, the latter in Judith; Vulg. Dothais); the place where Joseph found his brethren, who had wandered thither with their flocks from Shechem, and where he was treacherously sold by them to the Ishmaelites (Gen. xxxvii, 17). It next appears as the residence of Elisha, and the scene of a remarkable vision of horses and chariots of fire surrounding "the mountain" (תַּלְתָּל) on which the city stood, while the Syrians were smitten with blindness at the word of Elisha (2 Kings vi, 18). It is not again mentioned in the O. T. (Reland, P. t. p. 789); but later still the word is—"it is evidently well known—as a landmark in the account of Holofemes's campaign against Bethulia (Judith iv, 6; vii, 8, 18; viii, 8). In the Vat., and Alex., and Vulg. text—it is also mentioned in Judith iii, 9, where the A. V. has "Judassia" (Ἰουδασσία for Δωτρανία). This passage was a great puzzle to the geographers, not to From the corrupt reading, ἰωάννας, but also from the expression, still found in the text, τον πρίωνον τον μέγαν; A. V. "the great striit;" literally, "the great saw." The knot was cut by Reland, who conjectured most ingeniously that πρίων was the translation of נַעֲשֵׂים, Masor. a saw, which was a corruption of נַעֲשֵׂים, Mishor = "the plain" (Palest. p. 742 sq.). All these passages testify to its situation being in the centre of the country, near the southern edge of the great plain of Edomsean. Dothan is placed by Enzelius and Jereme twelve Roman miles north of Selaste, or Samaaria (Onomast. s. v. Δωτρανί, Dothaim). The well into which Joseph was cast i by his brothers, and consequently the site of Dothan, has, however, been placed by tradition in a very distant quarter, namely, about three miles square, from Salath, where a khan called Kham Jubb Yasun, the Khan of Joseph's Pit, because the well connected with it has long passed among Christians and Moelms for the well in question (Robinson, Res. iii, 817). The true site of Dothan was known to the Jewish traveller Rabbi ha-Parchi, in the time of Jacob ben Tacia, A. D. 1800 (see Landrode, Notice de l'histoire de Tulea, Asher's ed. ii, 484), and to Schwarz, A.D. 1845 (Palest. p. 168); but neither of these travellers gives any account of the site. It was accidentally discovered in 1852 by Van de Velde (Narrativa, i, 361-368). Dr. Robinson, in his last visit to Palestine, likewise identified the place, and the modern name Dokhix, a place which he found in the middle of a beautiful plain extending south-westernly from
DOUBLE SENSE OF SCRIPTURE. In certain prophetic passages the words: a double sense; or, a literal exposition, a metaphor, and a nearer and a more remote. The former relates to the present and immediate, while the latter usually refers to the Messianic period and spiritual deliverance. This distinction, however, has been contested by many. It is undeniable that several of the fathers maintained the so-called double sense of Scripture. It is easy to see, therefore, that the Midianites, to whom Joseph was sold in Dothan, had crossed the Jordan at Belaín, and were proceeding to Egypt along the ordinary road. It is obvious, too, that Joseph's brethren well knew the best places for pasturage. They had exhausted that of the she-asses (Nab reheb), and had afterwards repaired to the still finer pastures here around Dothan." (Bibliotheca Sacra, 1888, p. 122, 123).

Dongel, Elish, was born in 1812, graduated at Rutgers College in 1835, and from the Theological Seminary of the Reformed Dutch Church, New Brunswick, N. J., in 1836, and was licensed and ordained as a missionary to the heathen in the same year. He was a member of the first mission sent by the Reformed Dutch Church and the American Board of Commissioners for Foreign Missions to Java, where he labored from 1836 to 1840, when he was transferred to Borneo, and labored among the Dyaks until 1844. Thence he was removed to China, and was connected with the Amoy Mission until his decease, which occurred at sea on his return to China in his thirty-second year, but four days before the arrival of the ship at New York. Mr. Dongel was an excellent Chinese scholar and preacher; an indefatigable, courageous, self-denying laborer; a man of singular frankness, piety, and zeal; and was closely identified with the celebrated mission at Amoy from the very beginning of its remarkable success. Few men have surpassed him in the toils and faithfulness of an evangelist. For years he was regarded as the father of what has been termed "the model mission" of the American Board and of the Reformed Dutch Church.

Doonai, or Douay, a town in France, of the Department of Nord; it formerly belonged to Flanders. Philip II., in 1561, founded a university here at the model of that of Louvain. In 1568 a Jesuit's college was founded in connection with the university by Jean Lencelleur, head of the neighboring abbey of Auchin, who devoted part of the revenues of the abbey to the support of the college, which soon became very powerful. William Allen (q. v.) established also a college at Doonai for the education of Roman Catholic English youth.—Reke, History of the Papacy, b. vii. For the Douai Bible, see Versions.

Double (represented by several Heb. and Greek words) has many significations in Scripture. "A double garment" (Exod. xxxix, 9) may mean a lined habit, or suit of clothes, a cloak and a tunic, etc. Double heart, double tongue, double mind, are opposed to a simple, honest, sincere heart, tongue, mind, etc. Double, the counterpart to a quantity, to a space, to a measure, etc., which is proposed as the exemplar. "Double money"—the same value as before, with an equal value added to it (Gen. xii, 12, 15). If a stolen ox or sheep be found, the thief shall restore double, that is, two oxen or two sheep. For the right understanding of Isa. xi. 2, "She hath received of the Lord's hand double for all her sins," read the counterpart, which fits, the commensurate quantity, extent, or number of her sins; that which is adequate, all things considered, as a dispensation of punishment. This passage does not mean twice as much as had been deserved, double what was just, but the fair, commensurate, adequate retribution. The same is the meaning of this phrase in other places (Isa. lxi, 7; Jer. xvi, 18; xvii, 18).—Calmet, s. v.
language is often adapted to such a twofold import. Remarkable instances of this may be seen even in the New Test., as, for example, in our Lord's blended prediction of the destruction of Jerusalem and the end of the world (Matt. xxiv.) or of the return of the Lord (Luke xix.,) through all the O.T. utterances respecting the "latter days," the details of which are applicable in various degrees to the Restoration and to the Messianic era. See ESCHATOLOGY. Indeed, more recent expositors are strongly inclining, in the case of the Apocalypse, to the view that the fulfillment is in some sense a literal fulfillment of the language, its visions, and its symbols as designed to refer not so much to any specific event or series of events as to various historical occurrences and periods; that wherever general agencies appear in operation, as distinguished from individual transpositions—wherever general causes and influences exist, there the Apocalyptic prophetic apply; that they comprehend various events and periods, because they speak of general influences or agencies producing similar results. See REVELATION (Book Op.). Hence the scenery is largely borrowed from Daniel and Ezekiel, not in a sense foreign to its original import, but merely as a fresh application of the general spiritual conception in which composes the Apocalypse. According to Alexander (Commentary on Isaiah, Introd., p. 87), "all predictions, or prophecies in the restricted sense, are not specific and exclusive, i.e., limited to one occasion or emergency, but many are descriptive of a sequence of events which has been often realized. Thus, in some parts of Isaiah there are prophetic pictures of the stages of Jerusalem which cannot be exclusively applied to any one event of that kind, but the terms and images of which are borrowed partly from one and partly from another through a course of ages. Thus the threatening against Babylon contained in Isa. xiii, xiv, if explained as a specific and exclusive prophecy of the Media-Persian conquest, seems to represent the downfall of the city as more sudden and complete than it appears in history. . . . It is a panorama of the fall of Babylon, not in its first inception merely, but through all its stages to its consummation. . . . It therefore depicts different and distinct occurrences, separated by intervals of time from one another. Each is a certain grade and stage of fulfillment. If referred to one occurrence, or to a series of occurrences taking place together, the prophecy certainly applies to them—it has its meaning in them; but it has not its full sense or entire fulfillment till applied to other occurrences. The sense of it is springing from its original context, to which it is so closely connected, and is to be understood as consisting of various references— allusions and applications to various events. See PROPHECY.

A still more striking instance of this twofold reference is found in Isa. xli., which nearly throughout alludes most palpably to the Messiah, yet under the more immediate imagery of the return and restoration of the Babylonian exiles. Thus Johovah's "Servant" (see Umbreit, Knecht Gottes, Hamb. 1840), chosen from his birth for the redemptive and evangelizing work (ver. 1, 2), is explicitly styled "Israel" (ver. 8), and a similar blending of the national and the Messianic references is commenced at the beginning, so that the speaker is not Isaiah himself, nor the prophets a class, is evident from the fact that neither of these were ever intrusted with a message to the Gentiles. That the address is put into the mouth of the chosen people is favored by various considerations, but there are at the same time clear indications that the words are those of Isaiah. Maimonides they quote as saying that: But, secondly, it can only be reconciled by assuming that in this passage (as in others that might be cited) the ideal speaker is the Messiah considered as the head of his people, and as forming with them one complex person, according to the canon of Tichonius, quoted by Augustine: "The one body is to be considered as one person; because the body is formed only of body, and this thing is attributed which reside only in the Head, some which belong only to the Body, and some again which pertain to both" (Alexander, Later Prophecies of Isaiah, p. 170). See ISAIAH (Book Op.).

Another example is Psalm xvi, which, although it is ascribed to David, and is in the first instance as explained by the toras (e.g. Calvin, De Wette, Ewald, Hengstenberg, Alexander, Olshausen, Hupfeld), describes a pious sufferer in peril of death, either David himself or some other, yet in a higher sense passes through one stage of fulfillment in every pious sufferer; while its highest fulfillment is in the sufferer spoken of by the quotation of Peter and Paul in the Acts of the Apostles. The same may be said of Psalm xxii: few will deny that it has reference, chiefly or in its highest import, to Christ, the head of the righteous afflicted; but verses 9, 10 demonstrate that it has a literal application to the writer's own sacred sorrows. We may also point to Isaiah li.-lxvi as a more extended example. We cannot doubt that this portion of the book refers primarily to a historical object, the exile, and the deliverance of Israel from Babylon. But along with the description of this restoration there is a deeper and higher reference, namely, to the time of the Messiah, when, in the spiritual sense, what is spoken of in the literal will be spoken of in the literal, and blended in the description given. The prophecy was fulfilled in the last; it had an incipient fulfillment, if we may be allowed the phrase, in the first. It matters not whether the prophet himself distinctly intended to speak of both; it is highly probable that he had no very clear perception of the manner in which his language would be verified by history in its highest sense. The descriptions are of such a kind as to forbid their exclusive application either to the New dispensation or to events in the Old; both must be combined in order to bring out the true interpretation; they relate both to historical events under the Old, and spiritual ones under the New economy. Nor are the references to the historical and the spiritual kept apart; the one merges into the other; in some parts the descriptions point to the two as successive, while in others they embrace both together. See PSALMS.

A common objection to this mode of interpretation is that it is arbitrary to apply one part of a prophecy to a historical person or place, and another part of the same passage spiritually; to interpret one verse literally and another emblematically; for example, to say that David is meant in this clause, and Christ in that. Those who do not explain the same prophecy throughout in one consistent mode would object to this objection: the two methods, the historical and the spiritual, or the nearer and more remote, should be adopted together and applied throughout the same passage, except that in certain parts a preponderance may be allowed to one or the other import; while those who prefer the historical alone, or the spiritual alone, should adhere to each respectively; it is wrong to run from one to another in the same prophecy, unless there be evident marks of a transition. This objection, therefore, does not lie against the legitimate use of the twofold-reference scheme, but against its ill-usage.

As to the other objection urged against this method of interpretation, that it opens the door for many, even an indefinite number of senses, as well as two, it may be sufficient to reply, in the first place, that if there be evidence of several senses inhering in a given prophecy, they ought, of course, all to be admitted, however rare; while, on the other hand, it cannot be shown, rarely, if ever, to be found in more than two such senses, and these not really distinct, but related to each other as special and general, as local and universal, as spiritual and carnal, etc. In short, the one event is to be viewed as one person, and this because involving the same principle in the divine economy; e.g. the "Man of Sin" (q. v.) is Antichrist as a

Doubt (dubitā, to go two ways).—Man knows some things and is ignorant of many things, while he is in doubt as to other things. Don’t is that state of mind in which we hesitate as to two contradictory conclusions, having no preponderance of evidence in favor of either. Philosophical doubt has been distinguished as provisional or definitive. Definitive doubt is scepticism. Provisional or methodical doubt is a voluntary suspending of our judgment for a time, in order to come to a more clear and sure conclusion. This was first given as a rule in philosophical method by Des Cartes, who tells us that he began by doubting everything, discharging his mind of all preconceived ideas, and admitting none as clear and true till he had subjected them to a rigorous examination. Doubt is some degree of belief, along with the consciousness of ignorance, in regard to a proposition. Absolute disbelief implies knowledge: it is the knowledge that such or such a thing is not true. If the mind admits a proposition without any desire for knowledge concerning it, this is credulity; it is open to receive the proposition, but feels ignorance concerning it, this is doubt. As knowledge increases, doubt diminishes, and belief or disbelief strengthens (Taylor, Elements of Thought).”
—Fleming, Vocabulary of Philosophy, Phila. 1860. See Des Cartes; Scepticism.

Doubts, Dissolving of, Chald. מเทศד קִירם, to unbind knots, i.e. solve problems; a form of speech still commonly employed in the East for the determination of difficult questions (see Roberts, Burden, Bush, Illustra. in loc.).

Dough (צער, batsek), so called from swelling in fermentation, Exod. xii, 42, 39; Jer. vii, 18; Hos. vii, 4; "flour," 2 Sam. xiii, 8; אֵשׁ, 8; עֵשׁ, gries, so called as being pounded, Num. xv, 20, 21; Neh. x, 37; Ezek. xliv, 39. See Cook. The dough, we are told, which the Israelites had prepared for baking, and on which it appeared they subsisted after they left Egypt for a month, was carried away by them in their kneading-troughs on their shoulders (Exod. xii, 34). See KNEADING-TROUGH. In Oriental countries, and indeed in all tropical climates, the process of preparing the materials for baking is very expeditious, and generally performed in the house for each meal, including grinding the meal. See Bread. The fermentation is often dispensed with altogether. See LEAVEN. From Hos. vii, 8, it appears that the dough had to be turned in the process of baking, in order to be well done. See Bake.

Dougherty, George, a Methodist Episcopal minister of the South Carolina Conference. The date of his birth is wanting. He entered the itineracy in 1798, was presiding elder 1802-6, became superannuate in 1807, and died March 23, 1807, at Wilmington, N. C. Mr. Dougherty was one of the greatest preachers of his Conference. His mind and memory were capacious; he had a large fund of knowledge, was indefatigable in labor and study, and “totally dead to the world.” He was far in advance of his associates with regard to education, and labored in 1803 to establish a Methodist academy in South Carolina. In 1803 he was attacked by a moh, gathered in the interest of slavery in Charleston. They dragged him to a pump, and pumped water on him till he was nearly exhausted, when a heroic woman interfered and kept the mob at bay till help arrived and saved him from probable death.—Stevens, History of the Methodist Episcopal Church, vol. iii and iv; Minutes of Conference, i. 185; Deems, Annals of Southern Methodism, p. 226; Sprague, Annals, vii, 290.

Doughty, John, was born at Marley, near Worscester, England, about 1598; was educated at Oxford, and became fellow of Merton College. About 1631 he was made rector of Lapworth, Warwickshire; and after the restoration of Charles II he was appointed prebendary of Westminster and rector of Chevithorne, Surrey. He died at Westminster, Dec. 25, 1672. He published, under the Latinized name Doughtæus, ΔοûΑtζα Σαρα, sive excursus philologici brevis super d. S. Scripturae locis (Lond. 1658 20, vol 8vo); 2d ed. with Knatchbull’s Anecdotes, in N. T. (Amst. 1694, 8vo) De Cultu linguae eucharisticae Christianarum (Brem. 1694, 8vo).—Darling, Cyclopaedia Bibliographica, i, 949; Orme, Bibliotheca Biblica.

Doughty, Samuel, a Methodist Episcopal minister of the Philadelphia Conference, was born in Philadelphia in January, 1794, was converted in 1816, entered the itineracy in 1823, was stationed successively at New Brunswick, N. J., and at St. George’s, Philadelphia, and died Dec. 17, 1858. Mr. Doughty was one of the most popular, useful, and eloquent preachers of his time. He was an eloquent advocate for the benevolent institutions of the Church, especially for Sunday-schools, of which he was a distinguished promoter, both before and after his entrance to the regular ministry. His literary and theological requirements and talents were of a high order. He published Sermons in the Methodist Magazine sufficiently attest, especially one upon “Instability in Religion.” He was rapidly rising in influence and usefulness when he was suddenly cut down.—Minutes of Conference, i, 88; Sprague, Annals, vii, 672.

Douglas, Gavrin, or Gavvin, bishop of Dunkeld, Scotland, was the third son of Archibald, earl of Angus, and was born at Brechin in 1474, or the beginning of 1475. He received his education first in his own country, and then on the Continent. On his return to Scotland he was made provost of the collegiate church of St. Giles, at Edinburgh, and afterwards abbot of Aberfoethick. He was also nominated by the queen regent to the archbishopric of St. Andrews, but this dignity he never obtained, owing to the refusal of the pope to confirm the
appointment. He was, however, confirmed as bishop of Dunkeld through the interest of Henry VIII with pope Leo X. His administration fell in a troubled time, and after many vexations he retired to England, where Henry VIII granted him a pension. He died of the plague at London in 1522. Bishop Douglas translated the ENKED of Virgil into Scottish verse, printed at London in 1553, 4to. His other works are a poem called The Palace of Honor, 4to, and King HART, printed in 1576. His Virgil was reprinted at Edinburg in folio, with a glossary, in 1710.—Kipps, Biographies Britannica, v, 388.

Douglas, John, D.D., bishop of Salisbury, was born in 1721 at Pitenweum, Fifeshire, and was educated at Balliol College, Oxford. He was chaplain in the Guards at the battle of Fontenoy, became canon and dean of Westminster in 1742, was made bishop of Carlisle in 1787; and in 1791 was transferred to Salisbury. He died May 18, 1807. Dr. Douglas was intimate with Dr. Johnson, and all the most celebrated of his contemporaries. He was an accurate scholar and critic, and exposed Lander in his Milton No Pilgrym, and ably attacked Hume in his Crisis of Miracles. Both these essays are given in Douglas's Select Works (Salisbury, 1826, 4to). He also wrote largely against Archbishop Bower, aiming to show that he was a literary and religious impostor, in his Six Letters to Skelton (London, 1756, 8vo), and in his Bowrer and Tllmonton compared (London, 1757, 8vo). A new edition of his Criticism appeared from the Clarendon Press (1833).

Douglas, Thomas Logan, an eminent Methodist Episcopal minister of the Virginia Conference, and afterward of the Tennessee Conference, was born in Parson County, N.C., July 8, 1781, entered the Virginia Conference on trial in 1801, traveled on important circuits and districts until 1813, was then transferred to the Tennessee Conference, and died near Franklin, Tenn., April 9, 1848. Mr. Douglas was eminently useful both as a preacher and presiding elder, and his influence was very great in the Conferences with which he was connected during more than thirty years. His sermons were pregnant with thought, and his appeals were full of pathos. Few preachers of his time had such command of their hearers. He was an excellent disciplinarian, and thoroughlyversed in the history and economy of Methodism. "His plien is uniform and deep, his temper sweet," and his old age was bright and blessed. He was several times elected a delegate to the General Conference.—Minutes of Conferences, iii, 457; Sprague, Anale, vii, 392; Summers, Biographical Sketches, p. 108.

Dove (דבש, dunah), prob. referring to the sexual warmth of that bird; πτηροτέρα; both terms occasionally rendered "pigeon"). There are probably several species of doves or pigeons included in the Hebrew name with its Greek equivalent. It may contain all those that inhabit Palestine, exclusive of the turtle-doves properly so called. See Turtl-

DOVE. In modern systems, the doves are included in the natural family of Columbidae, or pigeon tribe, which comprises the pigeons, doves, and turtles; but naturalists are still divided as to the proper place of the family, and the limits of the respective subdivisions (see Brochart, Histoire, ii, 542 sq.; Syria possesses several species of pigeon: the Columba onager, or stock-dove; Columbasaurus, or ring-dove; C. domestica, or turkey; the common pigeon in several varieties, such as the Barbary, Turkish or Persian carrier, crisp, and shaker. These are still watched in their flight in the same manner as anciently their number, gyrations, and other manoeuvres were observed by soothsayers. The wild species, as well as the turtle-doves, migrate from Palestine to the south, but stock and ring-doves are not long absent. In the wild state, doves generally build their nests in the holes or clefts of the rocks, or in excavated trees, but they are easily taught submission and familiarity with mankind, and, when domesticated, build in structures erected for their accommodation, called "dove-cotes" (comp. Cant. ii, 14; Jer. xxviii, 28; Isa. i, 8). Doves are kept in a domesticated state in many parts of the East. The pigeon-cot is a universal feature in the houses of Upper Egypt. In Persia pigeon-houses are erected at a distance from the dwellings, for the purpose of collecting the dung as manure. The allusion in Isa. i, 8, is to the immense compact masses of these birds that Eastern travellers describe, as they are seen flying to their cotes or places of general resort. They sometimes resemble a distant heavy cloud, and are so dense as to obscure the rays of the sun. Stanley (Syria and Pal., p. 257), speaking of Ascalon as the haunt of the Syrian Venus, says: "Her temple is destroyed, but the sacred doves—sacred by immemorial legends on the spot, and celebrated there even as late as Eusebius—still fill with their cooings the luxuriant gardens which grow in the sandy hollow within the ruined walls." See below. The dove has been by some considered (though in an obscure passage) as an early national standard (Psa. lxviii, 18), being likewise held in pagan Syria and Phoenicia to be an ensign and a divinity, resplendent with silver and gold, and so venerated as to be regarded as holy, and forbidden as an article of food. (See Engel, Kypors, ii, 184; Creuzer, Symbol.

Rock-dove.

ii, 70-77.) It is supposed that the dove was placed upon the standards of the Assyrians and Babylonians in honor of Semiramis. This explains the expression in Jer. xxx, 38, "from before the fierceness of the dove," i.e. the Assyrian (comp. Jer. xlv, 16; i, 16). There is, however, no representation of the dove among the sculptures of Nineveh, so that it could hardly have been a common emblem of the nation at the time when they were executed; and the word in the above three passages of Jeremiah admits another interpretation (Geoseuins, Thesaur. p. 601 a). By the Hebrew law, however (see Mishna, Yom Toh, i, 8; Baba Bathra, ii, 5 sq.; Bab-kamma, vii, 7), doves and turtle-doves were the only birds that could be offered in sacrifice, and they were usually selected for that purpose by the less wealthy (Gen. xv, 9; Lev. v, 7;
In Christian art, the dove is employed as the emblem of the Holy Ghost, following the literal interpretation, which is doubtless the true one, of Matt. iii, 16. After images and pictures began to be allowed in churches, the dove was represented by the effigies of a silver dove hovering over the altar, and the baptismal font was used in the font in the same place. The place over the altar where it was suspended was called peristeria, from superpetra, a dove (Bingham, Orig. Eccles. bk. viii. ch. vi. § 19).

"From the dove being a symbol of purity, it is generally represented white, with its beak and claws red, as they occur in nature. In the older pictures, a golden nimbus surrounds its head, the nimbus being frequently divided by a cross, either red or black. In stained-glass windows we see the dove with seven rays proceeding from it, terminating in seven stars, significant of the seven gifts of the Holy Spirit. Holding an olive-branch, the dove is an emblem of peace. When seen issuing from the lips of dying saints and martyrs, it represents the human soul purified by suffering. A dove with six wings is a type of the Church of Christ; and when so employed, it has the breast and belly of silver, and the back of gold, two wings being attached to the head, two to the shoulders, and two to the feet. The pyx or box for containing the Host (q. v.) in Roman Catholic churches is sometimes made in the form of a dove, and suspend-

Pyx in the form of a Dove.

ed over the altar, and the dove is often placed on the covers of fonts. In this position it may still be seen in parish churches in England." (Chambers, Encyclopaedia, s. v.). See also Martigny, Dict. des Antiquités Chrétiennes (Paris, 1865, p. 164; Bidrom, Christiane Iconography (Bohn), p. 461; Jehan, Dict. des Origines du Christianisme (Paris, 1866), art. Colomb.

DOVE-COT. Isaiah (lx, 8) clearly refers to such structures in describing the final restoration of Israel after their long exile: "Who are these that fly as a cloud, and as the dove to their windows? (דועז דועז דועז דועז, like the doves to their lattices). They doubtless derived their Heb. name from their latticed or window-like form. See Window. Morier illustrates this comparison from what he observed in Persia. "In the environs of the city, to the westward, near the Zainderood, are many pigeon-houses, erected at a distance from habitations, for the sole purpose of collecting pigeons' dung for manure. They are long round towers, rather broader at the bottom than the top, and crowned by conical spindles, through which the pigeons descend. Their interior resembles a honeycomb, placed with a thousand holes, each of which forms a snug retreat for a nest. More care appears to have been bestowed upon their outside than upon that of the generality of the dwelling-houses, for they are pointed and ornamented. The extraordinary flights of pigeons which I have seen alight upon one of these buildings afford, perhaps, a good illustration of that passage in Isa. lx, 8. Their great numbers, and the compactness of their mass, literally look like a cloud at a distance, and obscure the sun in their passage" (Second Journey through Persia, p. 140). Not only are
DOVES' DUNG occurs in 2 Kings vi, 25, as a literal translation of דב-לומות (dib-lûmos), which in the margin is written דב-לומס (dib-lûmos), both meaning the same thing. By many the expression is considered to signify literally the dung of pigeons as food in the last degree of human suffering by famine: "And there was a great famine in Samaria, and behold they besieged it, until an ass's head was sold for threepence pieces of silver, and the fourth part of a cab of doves' dung for four pieces of silver." Different opinions, however, have been entertained respecting the meaning of the words which are the subject of this article, namely, whether they should be taken literally, or as a figurative name of some vegetable substance. The strongest point in favor of the former view is that all ancient Jewish writers have understood the word literally, and generally as an article of food. That this interpretation is not forced appears from similar passages in Josephus (War, v, 15, 7): "Some persons were driven to such terrible distress as to search the common sewers and old dunghills of cattle, and to eat the dung which they got there, and what they of old could not endure so much as to look upon they now use for food;" see also Eusebius (Eccles. Hist. iii, 6): "Indeed necessity forced them to apply their teeth to every thing; and, gathering what was no food even for the filthiest of irrational animals, they devoured it." Celsius, who is strongly in favor of the literal meaning, quotes the following passage from Brunson (Memorabilia, ii, c. 41): "The Cretans, during the siege by Metellus, on account of the scarcity of wine and drinking water, their thirst with that of urine of cattle;" and one much to the point from a Spanish writer, who states that in the year 1816 so great a famine distrest the English that "men eat their own children, dogs, mice, and pigeons' dung." As an additional argument in favor of the literal interpretation of the passage in question may be adduced the language of Rabhalaksh to the Jews in the time of Hezekiah (2 Kings xviii, 27; Isa. xxxvi, 12). Other and modern instances have been adduced, and among them the famine in England during the reign of King Edward II, A.D. 1316, when "pigeons' dung" is mentioned as being eaten by the poor (Edinburgh Christian Instructor, No. 122). It may be, however, that the sacred writer means only to say that the famine was so severe, and every thing so exorbitantly dear, that an instance occurred when an ass's head was sold for eighty pieces of silver, and a cab of doves' dung for five; so that the passage may be understood literally, since it is not incredible that persons oppressed by severe famine should devour even the dung of animals. In the account of the famine and pestilence in Egypt, A.D. 1200, 1201, written in Arabic by the physician Abd-al-ALLAT, we have a remarkable illustration of this passage. He says, "The poor, already pressed by the famine which increased continually, were driven to devour dog's, and the carcasses of animals and men, yea, even the excreta of both." Taking the term, however, in a literal sense, various other explanations have been given of the use to which the doves' dung was applied. Some of the Rabbins were of opinion that it was used for fuel, and Josephus (Ant. ix, 4) that it was purchased for its salt. Mr. Harmer (Observ. iii, 180) has suggested that it might have been a valuable article, as being of great use for quickening the growth of esculent plants, particularly melons; and he shows, what is well known, that the Persians live much on melons in the summer months, and use pigeons' dung in raising them. All travellers describe the number and the extent of the fields in Persia. See above. Mr. Edwards, as cited by Dr. Harris, remarks that it is not likely they had much "ground to cultivate in so populous a city for gardens;" and is disposed therefore to understand it as meaning the offals or refuse of all sorts of grain, which was wont to be given to pigeons, etc. Dr. Harris, however, observes that the stress of the famine would have been so great as to have compelled the poor among the besieged in Samaria to devour either the intenites of the doves, after the more wealthy had eaten the bodies, or, as it might perhaps be rendered, the crops, with the undigested contents, as suggested by Fuller (Miscell. Traec. vi, 2, p. 734). Bochart, indeed, has shown (Hieros. ii, 578) that the term "pigeons' dung" was applied by the Arabs to different vegetable substances. He quotes Avicenna as applying the term stercus columbarum to two different plants or substances. One of these is described by Avicenna and other Arab authors under the names stercus columbarum and stercus columbari, as a light substance like moss. Secondly, this name was given to the aspernum or usnam, which appears to be a flaxseed-leaved plant, that, like the seladoc, salicornia, or mesembryanthemum, when burnt, yields alkali in its ashes. From this Bochart has been led to consider it as identical with another plant, which occurs under the name of stercus columbarum in the Hebrew language, and which was used in ancient times, as at the present day, as an article of food. See PARCHED CORN. Celsius, however (Hieros. ii, 32), has shown that Bochart was mistaken in affirming that the article of food known among the Arabs by the epithet doves' or sparrows' dung was pulse or chicory, and therefore the connection between the Hebrew and Arabic terms kali fails to the ground. Still it remains certain that the Arabs call the maritime plant kali, from the ashes of which soda (hence called al-kali) is obtained, by the epithet sparrows' dung. But this, if not accessible at other places, is not a very regular article of food, even in a siege, much less be stored up for the purpose of sale, as the article in question appears to have been. We may also compare the German Teufelsdreck ("devil's dung") as expressive of the odor of caryotis (see Gesenius, Thesaurus, p. 518). Linnæus suggested (Promotiones, ed. F. D. Giseke, p. 159) that the Latin name may signify Umbellatum, "Star of Bethlehem." On this subject the late Dr. Edward Smith remarks (English Botany, iv, 180, ed. 1814): "If Linnaeus is right, we obtain a sort of clue to the derivation of ornithogalum (birds' milk), which has puzzled all the etymologists. May not this obscure name be applicable to the one who always accompanies the dung of birds, and is their urine? One may almost perceive a similar combination of cot-
In her Scripture Herbal (1842, p. 130) infers that the "pigeons' dung" which has been mentioned above as being eaten in England in the famine of 1816 was the roots of this plant. It is a native of that country, and also of Taurus, Caucasus, and Northern Africa. Dioscorides states that its bulbs were sometimes cooked with bread, in the same way as the melanthium, and also that it was eaten both raw and roasted. The roots were also commonly eaten in Italy and other southern countries at an early period. If the besieged had communication with the exterior, or even if any of their body could have dug in the neighborhood of the walls, for the kind of "earth-nut" offered by the bulbs of the ornithogalum, or Star of Bethlehem, which is said to be abundant in the neighborhood of Samaria, there does not appear any good reason why it should not be the substance alluded to. But it does not seem so likely to have been stored up; and no distinct reference has been found in the Arab authors to such a plant under the name of sterniu columbarum.

None of the above explanations of the difficult term in question appear satisfactory. Those that proceed upon the supposition that the substance designated was not intended as an article of food, give us only other purposes which are too petty to deserve such emphatic notice as marks of famine in a siege, and the rest fail to identify any substance with the terms employed. Nevertheless, having seen that the name "pigeons' dung" has been, and probably still is, applied by the Arabs to different vegetable substances, we are not disposed to adopt the literal meaning of the term, since doves' dung, being devoid of nutrient, was not likely to have served as food, even during the famine, especially as we find that an ass's head was sold for sixty pieces of silver. Now, if any ass remained for sale, or ass-loads of corn, as the expression has been interpreted, there is no reason for supposing that other substances may not have remained stored up in secret for those who had money to buy. But it is not easy to say what vegetable substance, serving as an article of diet, is alluded to by the name of "doves' dung." We must therefore rest, for the present, with the conclusion that it was a preparation from some plant, which, as being popularly known by this repulsive name, was not ordinarily resorted to for food, and of which, therefore, there has been no occasion elsewhere to make mention. Future naturalists may hereafter succeed in determining the point more definitely. Or it may be true that several species of plants and vegetable productions were anciently designated by this and similar terms, as the instances adduced above seem to show; and analogous cases in the popular nomenclature of modern nations go far to justify this assumption (see Thomson, Land and Book, ii, 200).

Dove, John, commonly called the Hebrew tailor, on account of his trade, was distinguished as a Hutchinsonian. He possessed a good knowledge of the Hebrew language, and was considered a man of learning, but intemperate in his language. He died in 1772. His principal works are, The Importance of Rabbincical Learning, etc. (Anon.) (London, 1746, 8vo):—A Creed founded on Truth and Common Sense, etc. (London, 1756, 8vo):—An Essay on Inspiration (London, 1756, 8vo):—A Dissertation on the Success of the Quakers; or, Quakerism Considered (London, 1756, 8vo):—A Dissertation upon the supposed Existence of a Moral Love of Nature, and upon the Being of a Triune God (London, 1757, 8vo):—Miscellaneous Disquisitions on Marriage, Celibacy, Coetaneous, Virtue, etc. (London, 1758, 8vo):—Darling, Cyclopa. Bibliographica, s. v.

Dow, Daniel, D.D., a Congregational minister, was born in Ashford, Conn., Feb. 19, 1772. He graduated at Yale in 1790; entered the ministry May, 1793, and was installed as pastor at Thompson, Conn., July 9, 1796, where he labored until his death, July 12, 1849. He was chosen fellow of Yale in 1824, and was made D.D. by Williams' College in 1840. Among his publications were Familiar Letters to Rev. John Sherman (1800):—The Pedi-Boptist Catchem (1807):—A Dissertation on the Sinematic and Abrahamian Covenants (1811):—A Congressional Election Sermon (1825):—Free Inquiry recommended on the Subject of Freemasonry (1820).—Sprague, Annals, ii, 369.

Dow, John G., a Methodist Episcopal minister, was born at Gilmont, N. H., June 15, 1756; entered the New England Conference in 1822; in 1833 was made presiding elder; in 1839 was agent of Newbury Seminary; was superannuated in 1837; and died at Chelsea, Mass., May 18, 1858, having preached thirty-six years. Mr. Dow was "an excellent man and minister, sound in doctrine, deep in experience, and uniform in piety. His preaching was full of thought, and in demonstration of the Spirit."—Minutes of Conference, 1855, p. 141.

Dow, Lorenzo, an eccentric American preacher, was born in Coventry, Conn., Oct. 18, 1777. He began travelling and preaching in the Methodist Episcopal Church in 1798, and in 1799 he was appointed to Essex Circuit, but soon departed for Europe, under the impression that he had a special mission to Ireland. He was "dropped" by the Conference, and ever after continued to travel and preach independently, although still adhering to Methodist doctrines. He rode at the rate of forty to fifty miles a day, and preached often four or five times daily. In his sermons he particularly "argued against Atheism, Deism, Universalism, and Calvinism." His final efforts were directed against the Jesuits, whose influence he thought would be fatal to the country. He died suddenly at Washington, Feb. 54, 1854. Dow figured considerably as a writer. Among his publications are A Short Account of a Long Travel; with Beauties of Wesley (Phila., 1823, 8vo):—History of a Cosmopolite; or the Writings of the Rev. Lorenzo Dow, containing his Experiences and Travels in Europe and America up to near his Fiftieth Year; also his Polemical Writings (often reprinted; latest, Cincinnati, 1824):—The Streight and True Path to the Trial and Confession of Lorenzo Dow (Phila., 1822, 8vo):—Polemical Works (N. Y., 1814, 12mo), etc. See Peck, Early Methodism (New York, 1860, 12mo, p. 198); Dealings of God, Man, and the Devil, containing Dow's Life and Miscellaneous Writings (N. Y., 1844, 2 vols. in 1, 8vo); Eames, History of the Methodist Episcopal Church, iii and iv.
Dowdall, George, archbishop of Armagh, a native of Louth, was appointed to the see of Armagh in 1548 by Henry VIII. The pope refused to confirm the nomination, but Dowdall, nevertheless, retained the see. He was a zealous papist, and introduced the Jesuits into Ireland. He resisted the introduction of the English Book of Common Prayer in 1557, and the vicar-general of Armagh (St. James Crafts) summoned him to a conference with the bishop of Meath. Their curious colloquy on points of faith is given in Hook, Eccles. Biography, iv, 498 sq. Dowdall was deprived of his priory, which was given to Browne, archbishop of Dublin (q. v.). He fled to the Continent, but was restored to his see by queen Mary in 1558, and labored earnestly to re-establish popery. He died in London in 1568. Mant, History of the Church of Ireland; Hook, Eccles. Biography, i. c.; Rose, New Biog. Dict. s. v.

Down, a town in Ireland, forming part of the title of the diocese of Down, Connor, and Dromore, of which Robert Bent Knox (consecrated in 1849) is at present bishop. The town is situated in the west of the county Down, was founded in the 6th century, but is now united with Down and Connor. The Roman Catholic Church has one bishop of Down and Connor, and another of Dromore.

Downe, or Downham, George, D.D., a learned English divine, was born at Chester (of which diocese his father was bishop), studied at Cambridge, and was ordained in 1585. He was afterwards professor of logic, and was finally made bishop of Derry in 1616. He died in 1684. His principal works are: A Treatise of Justification (London, 1698), fol.: An Abstract of the Duties commended in the Law of God (London, 1635, 8vo):—The Christian's Freedom (reprint L. 1696, 19mo):—A godly and learned Treatise of Prayer (London, 1640, 4to):—A Treatise concerning Antichrist (London, 1608, 4to):—Papa Antichristus (1620).

Downe, John, a minister of the Church of England, was born in 1570, in Devonshire, and was educated at the University of Cambridge, where he passed B.D. in 1600. He was first presented to the vicarage of Wimsford, c. 1602. Thence he removed to the living of Instow, worth about a hundred pounds a year, and which he spent his days in diligent and useful pastoral labor. His skill in the languages, particularly Hebrew, Greek, Latin, French, and Spanish, was extraordinary. He was diligent in expounding, catechising, and preaching the Scriptures: in his ministry he went through the whole of the Bible, from the beginning of Genesis to the end of Revelation. He died at Instow in 1681. Middleton, Ecclesiastical Biography (London, 1816), iii, 36.

Downham. See Downham.

Downy (dow'ni), mo'kar, prop. price paid for a wife, Gen. xxxiv, 12; Exod. xxii, 17; 1 Sam. xviii, 25; xxi, 26, se'bed, a gift; Gen. xxx, 20; prob'y, 2 Macc. i, 14). Nothing distinguishes more the nature of marriage among us in Europe from the same connection when formed in the East than the different methods of proceeding between the father-in-law and the intended bridegroom. Among us, the father usually gives a portion to his daughter, which becomes the property of her husband, and which often makes a considerable part of his wealth; but in the East the bridegroom offers to the father of his bride a sum of money, or value to his satisfaction, before he can expect to receive his daughter in marriage. Among the Greeks, in a sum which the bridegroom was required to pay to the father of his bride as a nuptial present or dowry was to be according to the rank she sustained, and such as the fathers of virgins of the same rank were accustomed to receive for their daughters. Of this procedure we have instances from the earliest times. When Jacob had nothing which he could immediately give for a wife, he purchased her by his services to her father Laban (Gen. xxix, 18; xxx, 20; xxxiv, 12; 1 Sam. xviii, 25; Exod. xxii, 16, 17; Josh. xv, 18; Hos. iii, 2). (See Senkenberg, De juribus dotis, Giese眼, 1729; Walch, De privilegio dotis Judaicae, Jena, 1785.) See Marriage.

Doxology (dōkōlōgē, a praising, giving glory), an ascription of glory or praise to God.

1. Doxologies in N.T.—Short ascriptions, which may be called doxologies, abound in the Psalms (e.g. xxvi, 6; cxii, 1; cxiii, 1), and were used in the synagogue. We naturally, therefore, find the apostles using them; e.g. Rom. xii, 8; Ephes. iii, 21; 1 Tim. i, 17. The Apocalypse (xix. 1) gives, as a celestial doxology, “Alleluia! Salvation, and glory, and honor, and power unto the Lord our God;” and another (xv, 6), “Blessing, and honor, and glory, and power be unto him that sitteth upon the throne, and unto the Lamb, forever and ever.” The song of the angels, Luke ii, 14, is a doxology (see below, No. 2). The doxology at the close of the Lord’s Prayer—“ for thine is the kingdom, and the power, and the glory, forever, Amen”—is thought by most critics to be an interpolation. It is not used in the Roman liturgy in repeating the Lord’s Prayer, but is used in the worship of the Greek Church, and in all Protestant churches. See Lord’s Prayer.

2. Liturgical Doxologies.—There are three doxologies of special note, which have been in use in Church worship from a very early period, viz.: (1.) The Lesser Doxology, or Gloria Patri, originally in the form, “Glory be to the Father, and to the Son, and to the Holy Ghost;” to which was added later, “world without end;” and later still the form became what it is now: “Glory be to the Father, and to the Son, and to the Holy Ghost;” and “world without end;” and still later, “Amen.” The use of this noble doxology has been a constant testimony to the Church’s faith in the Holy Trinity. In the Church of England it must be said or sung at the end of the reading of every psalm; in the Protestant Episcopal Church it may be said or sung at the end of every psalm, but either it or the greater doxology must be said or sung at the end of the whole portion of Psalms for the day. For further details, see GLORIA PATRI. (2.) The Greater Doxology, or Gloria in Excelsis, called also the Angelical Hymn (q. v.), a doxology of praise on the day of thanksgiving for the manifestation of the angels, Luke xi, 14 (“Glory be to God on high,” etc.). For its form and history, see GLORIA IN EXCELSIS. It is used in the eucharistic services of the Church of England, the Methodist Episcopal and Protestant Episcopal churches, and, in fact in most Protestant churches. (3.) The Trisagion (Latin Tres sanctus), a doxology as old as the second century, beginning with the words “Therefore, with angels and archangels, and with all the company of heaven, we laud and magnify thy glorious name.” It is used in the communion service of the Church of England, the Methodist Episcopal, Protestant Episcopal, and some other Protestant churches. For its form and history, see TRISAGION.

3. Metrical Doxologies.—It is usual in Protestant churches, at the end of the singing of a hymn, or at least at the end of the last hymn in the service, to sing the doxology in the same metre. The hymn-books of the churches, therefore, contain a collection of versions of the Gloria in Excelsis in various metres, and adapted to the metres of the hymns. See Bichatnag, Biog. Eccles. liv, xiv, ch. ii; Siegel, christl. Alterthüm r, i, 515 sq.; Procter, On Common Prayer, p. 212; Palmer, Orig. Liturgy. iv, § 23.

Doyle, James Warren, a bishop of the Roman Catholic Church in Ireland, was born in 1756 at New Ross, near Wexford, and was appointed bishop of Killare in 1819. He was a copious writer on con-
DOOY, George D.D., an eminent divine of the Church of England, was born in London Oct. 31, 1778, and graduated B.A. at Benedict College, Cambridge, in 1800; as soon as he left college, he was married and settled in the country, and died in 1821.

Dool, George, a musician, was born in 1738, and died in 1818.

DRAGON ORDER OF THE

**Mīmō'retkh, Isa. xix, 8, "net"), a seine or fishing-net. See FISH; NET.

**Dragon** (from the Greek ὅραξ as in the Apocalypse and Rev. frequently), an imaginary serpent of antiquity, especially in mythology, supposed to be supplied with feet and often with wings, stands in our version usually as a translation of two Heb. words of different signification, but common derivation - ṣām, third, and tāmim, third (according to Gesenius, from τὰμις, to extend, with reference to the great length of one or both of them). The similarity of the forms of the words may easily account for this confusion, especially as the masculine plural of the former, tāsmim, actually occurs in Lev. (as in Lam. iv, 8), whereas, on the other hand, tāmmim is evidently written for the singular tāmim in Ezek. xxi, 8; xxii, 2. But the words appear to be quite distinct in meaning; and the distinction is generally, though not universally, preserved by the Sept. Bocchur, however, proposes (Hie-

Rus, ii, 429) to read uniformly tāmim as the plur. of ṣām, and thus merge both terms into one. See WHALE.

1. The former (always "dragon" except Ezek. xxxii, 2, "whale") is used, always in the plural, in Job xxxi, 29; Isa. xxxiv, 18; xiii, 20 (Sept. אָרְשִׁי); in Isa. xiii, 22 (יִבְיֹן); in Jer. x, 22; xiii, 32 (אָרוֹן); in Psa. xxxvi, 19 (תָּנְשׁוֹנָן); and in Jer. xi, xiv, 6; lii, 7; Mic. i, 8 (דההננה). The feminine plural תָּנְשֹׁנָה, tānobh, is found in Mal. i, 8; a passage alluded to by Philo in the Sept. It is always applied to some creatures inhabiting the desert, and connected generally with the words יָטָבְר ("ostrich") and נָח ("jackal"). We should conclude from this that it refers rather to some wild beast than to a serpent, and this conclusion is rendered almost certain by the comparison of the tāmmim in Jer. xiv, 6, to the wild asses anning the wind, and the reference to their "swailing" in Mic. i, 8, and perhaps in Job xxx, 29. The Syriac renders it by a word which, according to Pocock, means a "jackal" (a beast whose peculiarly mournful howl in the desert is well known), and it seems most probable that this or some cognate species is to be understood whenever the word ṣām occurs. This interpretation, however, although favored by the grammatical forms, is supported by lit-

tle more than a conjecture as to the identity of the "jackal, or wild dog of the desert, which the Arabs call awi, plur. awim (corresponding to the Hebrew עַוִּי, "wild beasts of the islands," Isa. xiii, 22; xxxiv, 13; Jer. i, 39, i. e. jackal), so called from their howling; although they call the wolf by the name tāmim, which is somewhat like תָּנְשׁוֹן. See JACKAL.

2. The word tāmim, תָּנְשׁוֹן (plur. תָּנְשׁוֹנָן), is always rendered by ὅραξ in the Sept. except in Gen. i, 21, where we find ὄχιος. It generally occurs in the plu-

ral, and is rendered "whale" in Gen. i, 21; Job vii, 12; "serpent" in Exod. vii, 9-12; "sea-monster" in Lam. iv, 8; "sea-monster, or any great monster, whether of the land or the sea, being indeed more usually applied to some kind of serpent or reptile, but not exclusively restricted to that sense. When referring to the sea it is used as a parallel to תָּנְשׁוֹן ("leviathan"), as in Isa. xxvii, 1; and indeed this latter word is rendered in the Sept. by ὅραξ, in Psa. lxxiv, 14; civ, 56; Job xl, 19; Isa. xlvii, 1; and by μύτη ὄχιος in Job iii, 8. When examining these passages we find the word used in Gen. i, 21, of the great sea-mon-

sters, the representatives of the inhabitants of the deep. The same sense is given to it in Psa. lxxviii, 18 (where it is again connected with "leviathan"), Psa. cxlviii, 7, and probably in Job vii, 12 (Vulg. cœna). On this see also in Exod. vii, 9, and in Excult. xxii, 33; Psa. xci, 13, it refers to land-serpents of a power-

ful and deadly kind. It is also applied metaphorically
to Pharaoh or to Egypt (Isa. ii, 9; Ezek. xxiv, 8; xxvii, 2; perhaps Psa. cxliv, 13), and in that case, especially as feet are attributed to it, it most probably refers to the crocodile as the well-known emblem of Egypt. When, however, it is used of the king of Babylon, as in Jer. ii, 24, the same rule would lead us to suppose that some great serpent, such as might inhabit the sandy plains of Babylonia, is inten-

d. See LEVIATHAN.

3. In the New Test. ὅραξ (ὁραξ) is only found in the Apocalypse (Rev. xii, 5, 7, 10, 16, 17, etc.), as applied metaphorically to "the old serpent called the Devil, and Satan," the description of the "dragon" being dictated by the symbolic meaning of the image rather than by any reference to any actually ex-

isting creature. Of similar personification, either of an evil spirit or of the powers of material Nature as distinct from God, we have traces in the extensive prevalence of dragon-worship, and existence of dragon-
temples of peculiar serpentine form, the use of dragon-

standards both in the East, especially in Egypt, and in the West, more particularly among the Celtic tribes.

The most remarkable of all, perhaps, is found in the Greek legend of Apollo as the slayer of the Python, and the support of the serpent-worship as a mystery of wisdom. The reason, at least of the scriptural sym-

bol, is to be sought not only in the union of gigantic power with craft and malignity, of which the serpent is the natural emblem, but in the record of the ser-

pent's agency in the temptation (Gen. iii). For the ancient allusion to the true dragon (ὄραξ ὅραξ) was worshipped (? by lectoria, i. e. by spreading vi-

ands on a couch as an offering). This serpent-worship, however, is certainly not of Babylonian origin (see Sel-

den, De cles. ἐν, ii, 17, p. 365 sq.), since the two silver serpents mentioned by Diodorus Siculus (ii, 9) as be-

ing in the temple of Belus (q. v.) seem to be the images of divinities, but only emblems of the gods the there represented; yet possibly the conception had reference to the Persian symbol of the serpent, which signified Ahiram (Zandwessta, by Kleuker, i, 6). Accordingly the serpent appears also in later Jewish representations as an evil demon (Rev. xii, xiii; comp. Gen. iii). See SERPENT.

**DRAGON AT BABYLON.** In the Sept. version of Daniel there occurs, as chap. xiv, an account entitled Bel and the Dragon (q. v.), which states that at Babylon, under Cyrus, an enormous dragon (ὄραξ ὅραξ) was worshipped (by lecterina, i. e. by spreading vi-

ands on a couch as an offering). This serpent-worship, however, is certainly not of Babylonian origin (see Sel-

den, De cles. ἐν, ii, 17, p. 365 sq.), since the two silver serpents mentioned by Diodorus Siculus (ii, 9) as be-

ing in the temple of Belus (q. v.) seem to be the images of divinities, but only emblems of the gods the there represented; yet possibly the conception had reference to the Persian symbol of the serpent, which signified Ahiram (Zandwessta, by Kleuker, i, 6). Accordingly the serpent appears also in later Jewish representations as an evil demon (Rev. xii, xiii; comp. Gen. iii). See SERPENT.

**DRAGON- WELL ( образом, a eum hok-taminum, the name of a fountain situated oppo-

site or near the valley gate of Jerusalem (Neh. ii, 13). It is probably identical with the modern "Upper Pool of Gihon," on the north-western side of the city, and also with the "Serpent's Pool" mentioned by Josephus (Ant. i, 15, § 2, a. d. 63) and seen in the open country of the "Pool of the Gospels" (Append. ii, p. 8). See JERUSALEM.

**Dragon (in symbolism).** The dragon, in Christian art, is the emblem of sin in general and of idolatry in particular. Its usual form is that of a gigantic winged crocodile. "It is often represented as crushed under the feet of saints and martyrs, and other holy person-

ages. Sometimes it is portrayed with the inverted cross and the Christian monogram, as in the triumph of Christianity over paganism, as in pictures of St. George and St. Sylvestor; or over heresy and schism, as when it was adopted as the emblem of the Knights of the order of the Dragon in Hungary, which was instituted for the purpose of combating against the adherents of John Huss and Jan Hus (Prague).—Chambers, Encyclopædia, s. v.; Jameson, Sacred and Legendary Art, i, 26.

**Dragon, Order of the,** was founded in 1408 by
the emperor Sigismund, chiefly for fighting against the infidels. The members were on the breast a cross, on which hung a killed dragon.

**Draconades**, or **Dragoonings**, one of the modes of persecution employed against the Protestants of France after the revocation of the Edict of Nantes by Louis XIV; so called because the chief soldiers engaged in the service were **dragoons**. See **France; Persecutions**.

**Dracon** (1 Chron. xxix, 7; Ezra ii, 69; viii, 27; Neh. vii, 70, 71), or **Drachm** (Tobit v, 14; 2 Macc. iv, 19; xix, 48). The term rendered thus in our version (Sept. דְּרוֹכֶן and חָר֥וֹצֶן, Vulg. drachma and solidus; δραχμή, darke-monim, Ezr. ii, 69; Neh. vi, 70-72; or with a letter prefixed דְּרוֹכֶנֶה, adarak-monim, 1 Chron. xxix, 7; Ezra viii, 27) is usually thought to denote the **daric** (דְּרוֹכַע) of the Persians (from the Persic darra, a king, whence perhaps the title Dara, and seems to be etymologically connected with the Greek drachma (δραχμή). The drac is of interest not only as the most ancient gold coin of which any specimens have been preserved to the present day, but as the earliest coined money which we can be sure, was known to and used by the Jews; for, independently of the above passages, it must have been in circulation among the Jews during their subjection to the Persians. It even circulated extensively in Greece. The distinguishing mark of the coin was a crowned archer, kneeling on one knee, stamped on one side, and on the other a deep irregular cleft.

Gold Daric of Persia. Actual size.

Harpocration says that, according to some persons, the drac was worth twenty silver drachmas, which agrees with the statement of Xenophon (Anab. i, 7, 18), who informs us that 3000 drac was equal to ten talents, which would consequently make the drac equal to twenty drachmas. The value of the daric in our money, computed thus from the drachma, is 16a. 3d. sterling, or $3.83; but, if reckoned by comparison with our gold money, it is much more. The darics in the British Museum weigh 128-4 grains and 128-6 grains respectively. Hussey (Anc. Weights, vii, 3) calculates the drac as containing on an average about 123-7 grains of pure gold, and therefore equal to $1.10d. 1.76 gr., or 55.29. There are also silver coins which go by the name of daric, on account of their bearing the figure of an archer; but they were never called by this name in ancient times. See **Daric**.

The **drachma** (δραχµα), "piece of silver," Luke xv, 8, 9, was a coin of silver, the most common among the Greeks, and which, after the Exile, became also current among the Jews (2 Macc. iv, 19; x, 20; xii, 43). The earlier Attic drachma were of the average weight of 66-5 grains, and in a comparison with the shilling would be equal to 9-72d., or about 18 cents. After Alexander's time there was a slight decrease in the weight of the drachma, till, in course of time, it weighed only 63 grains, and specimens of the later times are in some cases even of less weight than this. In this state the drachma was counted equal to the denarius, which was at first worth 8d., and afterwards only 7d., or about 15 cents, which may therefore be considered as the value of the drachma in the New Testament—that is, the nominal value, for the real value of money was far greater in the time of Christ than at present. That the drachma of Alexandria was equal to two of Greece is inferred from the fact that the Sept. makes the Jewish shekel equivalent to two drachma [see **Drachma**]; and, in fact, an Alexandrian drachma weighing 126 grains has been found. There was also the tetradrachma, or four-drachma piece, in later times called the stater (q. v.). (See Smith's Dict. of Class. Antiq. s. v. Drachma.) See **Drachma**.

**Draught** occurs in our version as a translation of ἀνήρ (literally a place of sitting apart), a sink or privy (Matt. xv, 17; Mark vii, 19).

**DRAUGHT-HOUSE** similarly occurs as a translation of הַנִּירֵשׁ (maharash), literally an eaising one's self; 2 Kings x, 27, for which in the margin, by euphemism, מְכֹשֶׁב, makosh, an outgoing, a privy or sewer. Jehu, in order to show his contempt for the worship of Baal, ordered his temple to be destroyed, and the place converted to a vile use, that of receiving offal or ordure. On this mode of degradation, comp. Ezra vi, 11; Dan. ii, 5.

**Drawer of Water** (יוֹּכֶר נְחָלָה, skohb 'maiym; Sept. ἐρυθροφόρος, i.e. water-carrier) occurs in Deut. xxix, 11; Josh. ix, 21, 28; and in both instances it is spoken of as a hard and servile employment: to it the crafty Gibeonites were condemned. In the East water must be fetched from the river or the wells. In towns this is rarely done by the householders themselves, or by their servants. There are persons who make a trade of it to supply every day, to regular customers, the quantity required. They carry about the water in a well-prepared goat-skin, which is slung to the back; the neck is usually brought under the arm and compressed by the hand, serving as the mouth of this curious but very useful vessel. Those who drive a great trade have an ass, which carries two skins at once, borne like panniers. These men, continually passing to and fro with their wet bags through the narrow streets, are great nuisances in the towns iron
making, while in sleep it appears to be caused by an actual succession of events. Such is usually the case; yet there is a class of dreams, seldom noticed, and, indeed, less common, but recognised by the experience of many, in which the reason is not wholly asleep. In these cases it seems to look on it as were from without, and so to have a double consciousness: on the one hand we enter into the events of the dream, as though real; on the other we have a sense that it is but a dream, and we fear lest we should take and its passing should pass away. In either case the ideas suggested are accepted by the mind in dreams at once and inevitably, instead of being weighed and tested, as in our waking hours. But it is evident that the method of such suggestion is still undetermined, and, in fact, is our most capital objection to that other chief and similar cause than the suggestion of waking thoughts. The material of these latter is supplied either by ourselves, through the senses, the memory, and the imagination, or by other men, generally through the medium of words, or, lastly, by the direct action of the Spirit of God, or of created spirits of orders superior to our own, or the spirit within us, or else in dreams. In the first place, although memory and imagination supply most of the material of dreams, yet physical sensations of cold and heat, of pain or of relief, even actual impressions of sound or of light will often mould or suggest dreams, and the physical organs of speech will occasionally mix up themselves with the images of the dreamer. In the second place, instances have been known where a few words whispered into a sleeper's ear have produced a dream corresponding to their subject. On these two points experience gives undoubted testimony; as to the third, it can, from the nature of the case, be held but vaguely and uncertainly. The Scripture declares, not as any strange thing, but as a thing of course, that the influence of the Spirit of God upon the soul extends to its sleeping as well as its waking thoughts. It declares that God communicates with the spirit of man directly in dreams, and also that he permits created spirits to have a like communication with it. Its declaration is to be regarded, not as an isolated thing, but in connection with the general doctrine of spiritual influence, because any theory of dreams must be regarded as a part of the general theory of the origin of all thought. Whatever may be the difficulties attending the subject, still we know that dreams have formed a channel through which Jehovah was pleased in former times to reveal his character and dispensations to his people. This method of divine communication is alluded to in Job xxxiii, 14. The most remarkable instances recorded in the Old Testament are those of Abimelech with regard to Abraham (Gen. xxi, 8), Jacob on his way to Padan-aram (Gen. xxviii, 8), and again on returning thence (Gen. xxxi, 10), Laban in pursuing Jacob (Gen. xxxi, 24), Joseph respecting his future advancement (Gen. xxxvi, 6), Gideon (Judg. viii), and Solomon (1 Kin. iii, 5). In the New Testament instances of Joseph was promised to be a clear case of Joseph respecting the infant Jesus (Matt. i, 20; ii, 12, 13, 19), Paul (Acts xvi, 9; xviii, 9; xxvii, 23), and perhaps Pilate's wife (Matt. xxi, 19).

"It must be observed, that in accordance with the principle enunciated by Paul in 1 Cor. xiv, 15, dreams, in which the understanding is not awakened indeed as a method of divine revelation, but placed before the visions of prophecy, in which the understanding plays its part. It is true that the book of Job, standing as it does on the basis of natural religion, dwells on dreams and visions of deep sleep as the chosen method of God's revelation to himself and men (see Job iv, 19; xxxii, 19 again xxiii, 10; 28; 31); Ps. i, 6; Deut. xiii, 1, 3, 5; Jer. xxvii, 9; Joel ii, 28, etc., dreamers of dreams, whether true or false, are placed below 'prophets,' and even below 'diviners;' and sim-
DREAM 886 DRESS

Dregs (דגרים, דרגים), less of wine [as every-where rendered except in] Ps. lxv, 8; so called from settling or being kept; קָבָּה (kabba'ath, Isa. ii, 17, 22, means a goblet-cup merely). See Drink. The best wines of the East are much mixed with dregs, in the vessees in which they are preserved. They are sometimes drawn out when drawn out the liquor is strained for use. It is to this condition of the wine that the Psalmist appears to refer: "He poureth out of the same; but the dregs thereof, all the wicked of the earth shall wring them out and drink them" (Ps. lxxv, 8). This is probably a figure of speech to denote that the wine should be given as a wine of blessing to the righteous, while the wicked should drink the thick and turbid residue. The punishments which God inflicts upon the wicked are compared to a cupful of fermenting wine mixed with intoxicating herbs, of which all those to whom it is given must drink the dregs or sediment. The same image occurs in several Arabian poets. Thus Taâbâta Sharrân says, "To those of the tribe of Hodaiil we gave the cup of death, whose dregs were confusion, shame, and reproach." See Drink.

Drellincourt, Charles, an eminent minister of the Reformed Church of France, was born at Sedan July 10, 1595. He was educated at Saumur, and in 1626 became pastor near Langres. In 1630 it was called to the presidency of the church of Charenton near Paris, where he served faithfully, and with excellent reputation. He died at Paris Nov. 3, 1669. Drellincourt was a very voluminous writer. For lists of all his writings, see Nicceron, Mémoires, vol. xvi.; Haag, La France Protestante, iv, 533. Among them are, Préparations à la Sainte Cène, 8 vols. 8vo, often reprinted; —Consolations contre les frayeurs de la mort (40 editions); translated, The Christian's Defence against the Fears of Death (38th ed. London, 1752, 8vo, with memoir); —Les Vœux Charitables pour toutes sortes de personnes affligées (Charenton, 1669, 5 vols. 12mo, translated into six languages).—Bayle, Dictionnaire, s. v.; Hoefer, Nouv. Biog. Générale, iv, 746.

Dress (does not occur in Scripture in the sense of clothing, but only in the older acceptance of preparing or fitting). See Costume.

1. Materials.—These were various, and multiplied with the advance of civilization. The earliest and simplest robe was made out of the leaves of a tree (עברית), "A. V. fig-tree"—and comp. the present Arabic name for the fig, الت, portions of which were sewn together so as to form an apron (Gen. iii, 7). Asetic Jews occasionally wear peculiar garments, and the art itself died out; see the antiquity of this custom in the history of Pharaoh's butler and baker (Gen. xii, 25); and Pharaoh himself, and Nebuchadnezzar, are also instances. See Divination. It is quite clear from the inspired history that dreams were looked upon by the earliest nations of antiquity as prophecies from their idol gods of future events. One part of Jehovah's great plan in revealing, through this channel, his designs towards Egypt, Joseph individually, and his brethren generally, was to correct this notion. The same principle is apparent in the divine power bestowed upon Daniel to interpret dreams. Jehovah expressly forbade his people from observing dreams, and from consulting explainers of them. He condemned to death all who pretended to have prophetic dreams, and to foretell events, even though they foretold came to pass, if they had any tendency to promote idolatriy (Deut. xiii, 1-4). But they were not purely in the air; when they had a significant dream, to address the prophets of the Lord, or the high-priest in his ephod, to have it explained (Num. xii, 6; compare the case of Saul, 1 Sam. xxviii, 6, 7). False and true dreams are expressly contrasted in Jer. xxiii, 25, 28. See Night-Vision.
DRESS

(Zech. xiii, 4; comp. Matt. vii, 16). Pelisses of sheep-skin still form an ordinary article of dress in the East (Burckhardt's Notes on Bedouins, i, 60). The sheep-skin itself forms the raw material for the ornamentation of Khorasan: it was made with sleeves, and was worn over the tunic; it fell over the back, and terminated in its natural state. The people wearing it have been identified with the Sagarit (Bonomi's Nineveh, p. 128). The adder's skin worn by the king of Nineveh (Jobs, vii, 1): find the 'gorgeous Babylonian garment' found at Ai (Josh. vii, 21), were of a different character, either robes trimmed with valuable furs, or the skins themselves ornamented with embroidery. The art of weaving hair was known to the Hebrews at an early period (Exod. xxvi, 7; xxxv, 6); the sackcloth used by the Levitical priests was of this material [see SACKCLOTH], and by many writers the adder's skin of the prophets is supposed to have been such. John the Baptist's robe was of camels' hair (Matt. iii, 4), and a similar material was in common use among the poor of that day (Joseph. War, i, 24, 28), probably of goats' hair, which was employed in the Roman census. At what period the use of wool, and of still more artificial textures, such as cotton and linen, became known, is uncertain: the first of these, we may presume, was introduced at a very early period, the flocks of the pastoral families being kept partly for their wool (Gen. xxxviii, 12): it was at times largely employed, particularly by the outer garments (Exod. xiii, 47; Deut. xii, 11; Ezek. xxxiv, 3; Job xxxii, 20; Prov. xxvii, 26; xxxi, 13). See WOOL. The occurrence of the term butimeth in the book of Genesis (III, 21; xxxvii, 3, 23) seems to indicate an acquaintance, even at that early day, with the finer materials; for that term, though significant of a particular robe, originally appears to have been referred to the material employed (the root being preserved in our cotton; comp. Bohlen's Intro. ii, 51; Saalschutz, Arch. i, 8, and was applied by the later Jews to flax or linen, as stated by Josephus (Ant. iii, 7, 2, θείων μίν καλλίται. Λινόν οὖτο σμαίνει, χύτων γάρ τί λοιπόν ἡμῖν καλλίτοις). No conclusion, however, can be drawn from the use of the word: it is evidently applied generally, and without any view to the material, as in Gen. iii, 21. It is probable that the acquaintance of the Hebrews with wool, and perhaps cotton, dates from the period of the captivity in Egypt, when they were instructed in the manufacture of it (I Chron. iv, 22). After their return to Palestine we have frequent notices of linen, the finest kind being named šekem (שכém) and at a later period buta (בּוֹת), the latter a word of Syrian, and the former of Egyptian origin, and each indicating the quarter whence the material was procured: the term chîr (כִּר) was also applied to it from its brilliant appearance (Isa. xix, 9; Esth. i, 6; viii, 15). It is the ḥisasu (Γίνορος) of the Sept. and the N. T. (Luke xvi, 19; Rev. xviii, 12, 16), and the "fine linen" of the A. V. It was used in the vestments of the high-priest (Exod. xxv, 5 sqq.), as well as by the wealthy (Gen. xlii, 42; Prov. xxxii, 25; Luke xiv, 18). See LINEN. Among the materials used in clothing, linen is most commonly spoken of, and is employed in dressing the hair (Lev. xvi, 4, 23, 28), and for the ephod of Samuel (1 Sam. ii, 18) and David (2 Sam. vi, 14): it is worthy of notice, in reference to its quality and appearance, that it is the material in which angels are represented (Exek. ix, 3, 11; x, 6, 7; Dan. x, 6; xii, 6; Rev. xiv, 4). A very fine kind of linen coat was employed in the Israelite exiles (Ezra, xiii, 4), and was used by the very poor. The Hebrew term sâdîn (said意 = סדָּנֶה, and sâdin) expresses a fine kind of linen, especially adapted for summer wear, as distinct from the sariballa, which was thick (Talmud, Menoc. p. 41, 1). What may have been the distinction between šekem and sâdin (Prov. xxxii, 22, 24) we know not: the probable ability is that the latter name passed from the material to a particular kind of robe. Silk was not introduced until a very late period (Rev. xviii, 12; the term meset, מֶסֶת, Sept. πορφυρον, Ezek. xvi, 10) is of doubtful meaning. See Silk. The dress material, skakote (םַקּוֹטֶה), Sept. κυκλοβόλος, i. e. κυκλοβολος; Aquila, ἀντικακλομενος; Ven. Gr. ἄντικακλομενος), such as wool and flax, was forbidden (Lev. xix, 19; Deut. xxi, 11), on the ground, according to Josephus (Ant. iv, 8, 11), that such was reserved for the priests, or as being a practice usual among idolaters (Spencer, Leg. Heb. Riti. ii, 32), but more probably with the view of enforcing the general idea of purity and simplicity. See DRESS.

2. Color and Decoration.—The prevailing color of the Hebrew dress was the natural white of the materials employed, which might be brought to a high state of brilliancy by the art of the fuller (Mark ix, 3). Some of the terms applied to these materials (e. g. וֶּרֶד, יָרְד, יַרְד) are connected with words significant of whiteness, while many of the allusions to garments have special reference to this quality (Job xxxviii, 14; Ps. cxi, 1, 2; Isa. xlix, 8): white was highly regarded, and appropriately used on solemn occasions (Exod. i, 8; comp. Horace, Sat. ii, 2, 60), as well as symbolical of purity (Rev. iii, 4, 5; iv, 4; vii, 9, 13). It is uncertain when the art of dyeing became known to the Hebrews; the בּרֶדֶר בּרֶדֶר, bath 'with passages' worn by Joseph (Gen. xxxvii, 3, 23) is variously taken to be either a "coat of divers colors" (Sept. ποικιλος; Vulgate polychromia; comp. the Greek ποικίλος, II, iii, 125; xxii, 441), or a tunic furnished with sleeves and reaching down to the ankles, as in the versions of Aquila, άντεργολογος, Symmachus, χειρογονος, and in the Vulg. (2 Sam. xiii, 18) talarias, and as described by Josephus (Ant. vii, 8, 1). The latter is probably the correct sense, in which case we have no evidence of the use of variegated robes previously to the sojourn of the Hebrews in Egypt, though the notice of scarlet thread (Gen. xxxviii, 20) implies some acquaintance with dyeing, and the light summer robe בּרֶדֶר בּרֶדֶר, Sept. Πιπαροβος; A. v. "veil") worn by Rebekah and Tamar (Gen. xxvi, 65; xxxvii, 14, 19) was probably of an ornamental character. The Egyptians had carried the art of weaving and embroidery to a high state of perfection, and from them the Hebrews learned various methods of producing decorative stuffs. The elements of ornamentation, as (1) weaving, and (2) variously dyed (Exod. xxxv, 25; compare Wilkinson's Egyptianians, iii, 125); (2) the introduction of gold thread or wire (Exod. xxxiv, 6 sq.); (3) the addition of figures, probably of animals and hunting or battle scenes (comp. Layard, ii, 257), in the case of garments, in the same manner as the cherubim were represented in the curtains of the tabernacle (Exod. xxxvi, 1, 31; xxxvii, 8, 35). These devices may have been either woven into the stuff, or cut out of other stuff and afterwards attached by needlework: in the former case the pattern would appear only on one side, in the latter the pattern might be varied. Such is the distinction, according to Talmudical writers, between כְּנֶנֶךְ-work and needlework, or as marked by the use of the singular and dual number, יָרְדֵּנֶךְ, needlework, and יָרְדֵּנֶכְ, needlework on both sides (Judg. v, 80), though the latter term may after all be accepted in a simpler way as a dual = two embroidered robes (Bertheau, Comm. in l. c.). The account of the corset of Amaziah (Herod. iii, 47) illustrates the processes of decoration, tributes in Exod. Rab. Roberts' robe of gold (סַפָּדִי, Psal. cxix, 18), and at a later period with silver thread (Josephus, Ant. xiv, 8, 2; comp. Acts xii, 21), were worn by royal personages: other kinds of robes were worn by the wealthy both of Tyre (Ezek. xvi, 13) and Palestine (Judg. v, 30; Psa. xlv, 14). The art does not appear
to have been maintained among the Hebrews: the Babylonians and other Eastern nations (Josh. vii, 21; Ezek. xxvi, 21, as well as the Egyptians (Ezek. xxvi, 7), excelled in it. Nor does the art of dyeing appear to have been followed up in Palestine: dyed robes were imported from foreign countries (Zep. i, 8), particularly from Phoenicia, and were not much used except by the rich or the wealthy Tyrians (Ezek. xxvii, 7), the Midianitish kings (Judg. viii, 20), the Assyrian nobles (Ezek. xxii, 6), and Persian officers (Est. viii, 15), and still represented in the Persian glyptic. The general effect of the Persian dress was more brilliant than that of the Jews: hence Ezekiel (xii, 12) describes the Assyrians as יִבְנַת קֵינֵי, lit. clothed in perfection; according to the Sept. שָׂרִיָּה עַל, wearing robes with handsome borders. With regard to the head-dress in particular, described as יִנְבָּא יֵשָׁבָא (Sept. εἰμι κατά τί) A. V. "died attired;" comp. Ovid, Met. xiv, 654, μίαρα πικτα, some doubt exists whether the word rendered dyed does not rather mean flowing (Gesen. Theor. p. 542; Layard, ii, 300).

6. The chief forms of Ancient Oriental dress. — It is a difficult task to give a satisfactory account of the various articles of dress mentioned in the Bible: the notices are for the most part incidental, and refer to a lengthened period of time, during which the fashions must have frequently changed; while the collateral sources of information, such as sculpture, painting, or contemporary records, are but scanty. The general characteristics of Oriental dress have indeed preserved a remarkable uniformity in all ages: the modern Arab dress much as the ancient Hebrews did; there are the same flowing robes, the same distinction between the outer and inner garments — the former heavy and warm, the latter light, adapted to the rapid and excessive changes of temperature in those countries; and there is the same distinction between the costume of the rich and the poor, consisting in the multiplication of robes of a finer texture and more ample dimensions. Hence the numerous illustrations of ancient costume, which may be drawn from the usages of modern Oriental nations, supplying the greatest measure of the want of contemporaneous representations. With regard to the figures which some have identified as Jews in Egyptian paintings and Assyrian sculptures, we cannot but consider the evidence insufficient. The figures in the painting by Beni Hassan, delineated by Wilkinson (Ancient Egyptians, ii, 24), and supposed by them to represent the arrival of Joseph's brethren, are dressed in a manner at variance with our ideas of Hebrew costume: the more important personages wear a double tunic, the upper one constructed so as to pass over the left shoulder and under the right arm, leaving the right shoulder exposed: the servants wear nothing more than a skirt or kilt, reaching from the loins to the knee. Wilkinson suggests some collateral reasons for doubting whether they were really Jews; to which we may add a further observation that the presents which these persons bring with them are not what we should expect from Gen. xliii, 11. Certain figures inscribed on the face of a rock at Ishbiliyin (q. v.), near Kermanshah, were supposed by Sir R. K. Porter to represent Samaritans captured by Shalmaneser: they are given in Vaux's Nineveh, p. 372. These sculptures are now recognised as of a later date, and the figures evidently represent people of different nations, for the tunics are a shade different, and the heads long and agile. Against this the same figures discovered at Nineveh have been pronounced to be Jews: in one instance the presence of hats and boots is the ground of identification (Bonomi, Nineveh, p. 197; compare Dan. iii, 21); but if, as we shall hereafter show, the original words in Daniel have been misunderstood by our translators, no conclusion can be drawn from the presence of these articles. In another instance the figures are simply dressed in a short tunic, with sleeves reaching nearly to the elbow, and confined at the waist by a girdle, a style of dress which was so widely spread throughout the East that it is impossible to pronounce what particular nation they may have belonged to: the style of head-dress seems an object which might have been suggested to the touch of Jewish artists. These figures are given in Bonomi's Inscriptions, p. 381.

The costume of the men and women was very similar; there was sufficient difference, however, to mark the sex, and it was strictly forbidden to a woman to wear the appendages (יוֹשָׁבָא; Sept. αὐτάκις), such as the staff, signet-rings, and other ornaments, or, according to Josephus (Ant. iv, 8, 48), the weapons of a man; as well as to a man to wear the outer robe (יוֹשָׁבָא) of a woman (Deut. xxii, 6); the reason of the prohibition, according to Maimonides (Mor. Nedek, iii, 57), being that such was the practice of idolaters (comp. Carpzov, Appar. p. 514); but more probably it was based upon the general principle of propriety. (See Mill, Dissert. select. p. 196 sqq.; Carpzov, De mundo muliebri viri indericto, Rost. 1712.)

a. Robe and the relations to the sexes. (1.) The κηθονήθ (Ἡθονήθ), whence the Greek χιλόνη was the most essential article of dress. It was a closely-fitting garment, resembling in form and use our skirt, though unfortunately translated "coat" in the A.V. The material of which it was made was either wool, cotton, or linen. From Josephus's observation (Ant. iii, 7, 4) with regard to the miell (that it was σε οὐκ εἶναι πομήνημα), we may probably infer that the ordinary λιθονήθ or tunic was made in two pieces, which were sewn together at the sides. In this case the seamless shirt (χιλόνη διάφησα) worn by our Lord (John xiv, 23) was either a singular one, or, as is more probable, was the upper tunic or miell. The primitive κηθονήθ was without sleeves, and served, as a whole, the part of a Doric χιλόνη; it may also have been, like the latter, partially opened at one side, so that a person in rapid motion was exposed (2 Sam. vi, 20). Another kind, which we may compare with the Ionian χιλόνη, reached to the wrists and ankles: such was probably the κηθονήθ passim worn by Joseph (Gen. xxxviii, 23, 29) and Tamar (2 Sam. xiii, 18), and the which the priests wore (Josephus, Ant. iii, 7, 2). It was in either case kept close to the body by a girdle (q. v.), and the fold formed by the overlapping of the robe served as an inner pocket, in which a letter or any other small article might be carried (Joseph. Ant. xvii, 6, 7). A person wearing the κηθονήθ alone was described as διώκτης, and : we may compare the use of the term πρὸστατ of, as applied to the Spartan virgins (Plut. Lyc. 14), of the Latin nautus (Virgili, Geor. i, 299), and of our expression stripped. Thus it is said of Saul, after having taken off his upper garments (רָצָא, 1 Sam. xix, 24); of Isaiah (Isa. xx, 2) when he had put off his sackcloth, which was usually worn over the tunic (comp. Jon. iii, 6), and only on special occasions next the skin (2 Kings vi, 30); of a warrior who has cast off his military dress (Ps. li, 16; comp. Delitzsch, Comm. on Ps., 29); and of Peter without his fisher's coat (John xxii, 7). The same expression is elsewhere applied to the poorly clad (Job xxii, 6; Is. lviii, 7; James ii, 13).

The annexed wood-cut (fig. 1) represents the simplest style of Oriental dress, a long loose shirt or κηθονήθ without a girdle, reaching nearly to the ankle. The same robe, with the addition of the girdle, is shown in fig. 4. In fig. 4 we have the ordinary dress of the modern Bedouin; the tunic overlaps the girdle at the waist, leaving an ample fold, which serves as a pocket. Over the tunic he wears the abba, or striped plait, which completes his costume.

(2.) The σαλίνα (Σαλίνα) appears to have been a wrap
per of fine linen (Sept. αὐνῶν), which might be used in various ways, but especially as a night-shirt (Mark xiv, 51; comp. Herod. ii, 95; Schleusner’s Lex. in N. T. s. v.). (The Hebrew term is given in the Syriac N.T. as αὐνῶν, Luke xix, 30; and μάνρον, John xiii, 4.) The material or robe is mentioned in Judg. xiv, 12, 13 (“shirt,” “shirt”), Prov. xxxi, 24, and Isa. iii, 23 (“fine linen”); but in none of these passages is there anything to decide its specific meaning. The Talmudical writers occasionally describe the tallith under that name, as being made of fine linen; hence Lightfoot (Exercitations on Mark xiv, 51) identifies the σινδών worn by the young man as a tallith, which he had put on in his haste without his other garments.

(3.) The meil (מלעך) was an upper or second tunic, the difference being that it was longer than the first. It is hence termed in the Sept. ἴντοδόντας ποδόνες, and probably in this sense the term is applied to the ἱκεθοῦντα πανταξιόν (2 Sam. xiii, 18), implying that it reached down to the feet. The acellular meil is elsewhere described. See PRIEST. As an article of ordinary dress it was worn by kings (1 Sam. xxiv, 4), prophets (1 Sam. xxviii, 14), nobles (Job i, 20), and youths (1 Sam. ii, 19). It may, however, be doubted whether the term is used in its specific sense in these passages, and it may well be supposed that it was used in its general sense (from μελέοντας, to cover), for any robe that chanced to be worn over the kethoneth. In the Sept. the renderings vary between ἴντοδοντας (1 Sam. xviii, 4; 2 Sam. xiii, 18; 1 Sam. ii, 19, Theodot.), a term properly applied to an upper garment, and specially used in John xxi, 7, for the linen coat worn by the Phoenician and Syrian fishermen (Theophr. in l. c.), ἵππαι (1 Sam. ii, 19; xx, 22, xxv, 4, 11, 12, 14; Job xxiv, 16), ἰματία (Job i, 20), σέλας (1 Chron. xvii, 27; Job ii, 12), and ἴντοδοντας (Exod. xxxix, 21; Lev. vii, 7), showing that, generally speaking, it was regarded as an upper garment. This further appears from the passages in which notice of it occurs: in 1 Sam. xviii, 4, it is the “robe” which Jonathan first takes off; in 1 Sam. xviii, 14, it is the “mantle” in which Samuel is enveloped; in 1 Sam. xv, 27, it is the “mantle,” the skirt of which is rent (comp. 1 Kings xi, 30, where ἰματία, simlah, is similarly treated); in 1 Sam. xxiv, 4, it is the “robe” under which Saul slept (generally the ἵππα, beged, was so used); and in Job i, 20; ii, 12, it is the “mantle” which he rends (comp. Ezra ix, 8, 9); in these passages it evidently describes an outer robe, whether the simlah, or the meil itself used as a simlah. Where two tunics are mentioned (Luke iii, 11) as being worn at the same time, the second would be a meil; travellers generally wore two (Joseph. Ant.

DRESS

The dress of the middle and upper classes in modern Egypt (Fig. 5) illustrates the customs of the Hebrews. In addition to the shirt, they wear a long vest of striped silk and cotton, called keftan, descending to the ankles, and with ample sleeves, so that the hands may be concealed at pleasure. The girdle surrounds this vest. The outer robe consists of a long cloth coat, called gadāb, with sleeves reaching nearly to the wrist. In cold weather the abba is thrown over the shoulders.

(4.) The ordinary outer garment consisted of a quadrangular piece of woolen cloth, probably resembling a Scotch plaid. The size and texture would vary with the means of the wearer. The Hebrew terms referring to it are γαδαβ (γαδαβ), occasionally γαδάβα (γαδάβα), which appears to have had the broadest use, and sometimes is put for clothes generally (Gen. xxxix, 4; xxvii, 34; Exod. iii, 22; xxii, 9; Deut. x, 18; Isa. iii, 7; iv, 1), though once used specifically of the warrior’s cloak (Isa. ix, 5); beged (בָּגְדֶד), which is more usual in speaking of robes of a handsome and substantial character (Gen. xvii, 15; xlii, 42; Exod. xxvii, 2; 1 Kings xx, 10; 2 Chron. xix, 9; Isa. xxiii, 1); lebuck (לַבּוּך), appropriate to passages where covering or protection is the prominent idea (Exod. xxvi, 26; Job xxvi, 6; xxxiii, 19); and, lastly, lebuck (לַבּוּך), usual in poetry, but specially applied to a warrior’s cloak (2 Sam. xx, 8; priests’ vestments (2 Kings xx, 22), and royal apparel (Esth. vi, 11; viii, 15). A cognate term, melabuk (מֶלֶבּוּךְ), describes specifically a state dress, whether as used in a royal household (1 Kings x, 5; 2 Chron. ix, 4) or for religious festivals (2 Kings x, 22): elsewhere it is used generally for robes of a handsome character (Job xxvii, 16; Isa. ix, 8; Ezek. xvi, 13; Zeph. i, 6). Another term, mād (מַדִּים), with its derivatives mādēn, Psa. cxxxiii, 2, and ṣēḏē, 2 Sam. x, 4; 1 Chron. xiv, 4), expresses the length of the Hebrew garment (Exod. iv, 12; xvii, 4, and is specifically applied to a long cloak (Judg. iii, 16; 2 Sam. xx, 8), and to the priest’s coat (Lev. vi, 10). The Greek terms ἵππαι and εὐδοκεῖν express the corresponding idea, the latter being specially appropriate to robes of more than ordinary grandeur (1 Macc. x, 21; xiv, 9; Mark xii, 8; xvi, 5; Luke xv, 22; xx, 46; Rev. vi, 11; vii, 9, 12); the μακρυκός and μισσακά (A.V. “coat,” “cloak,” Volk. τυχέω, πελλίτων) are brought into juxtaposition in Matt. v, 40, and Acts ix, 39. The beged might be worn in various ways, either wrapped round the body, or worn over the shoulders, like a shawl, with the ends or “skirt” (בֶּגֶדֶשׁ, Sept. πυρίγα; Volk. ἀγνοίδι) hanging down in front; or it might be thrown over the head so as to conceal the face (2 Sam. x, 20; Esth. vi, 13). The ends were skirted with a fringe, and bound with a dark purple ribbon (Num. xxvi, 38): it was confined at the waist by a girdle, and the fold (בֶּגֶדֶשׁ; Sept. κολαρός; Volk. νιφός) formed by the overlapping of the robe served as a pocket in which a considerable quantity of articles might be carried (2 Kings iv, 39; Psa. lxxix, 12; Hag. ii, 12; Neh. vii, 36; Description, p. 56), or as a purse (Prov. xvii, 22; xxvi, 14; Isa. lxv, 5, 7; Jer. xxxii, 18; Luke vi, 38).

The ordinary mode of wearing the outer robe, called
The dress of the women differed from that of the men in regard to the outer garment, the kethoneth being worn equally by both sexes (Cant. v, 8). The names of their distinctive robes were as follows: (3) mitpachath ( gdki; Sept. περάγαμα; Vulg. pallium, filicenum; A. V. "veil," "simple"), a kind of shawl (Ruth iii, 15; Isa. iii, 22); (2) maatophakah ( gdki; Vulg. pallium; A. V. "mantle"), another kind of shawl (Isa. iii, 22), but how differing from the one just mentioned we know not; the etymological meaning of the first name is expansion, of the second enveloping; (3) tas'ah ( gdki; επιτραπεζάνη; "veil"), a robe worn by Rebekah on approaching Isaac (Gen. xxiv, 65), and by Tamar when she assumed the guise of a harlot (Gen. xxxviii, 14, 18)—it was probably, as the Sept. represents it, a light summer dress of handsomely appearing appearance (ἐπιβάλλειν το θείαντα και ικαλωτισάρο, Gen. xxxviii, 14), and of ample dimensions, so that it might be thrown over the head at pleasure; (4) radhid ( gdki; "veil"), a similar robe (Isa. iii, 23; Cant. v, 7), and substituted for the tas'ah in the Chaldee version—we may conceive of these robes or shawls as resembling the peplos of the Greeks, which might be worn over the head (as represented in Smith's Dict. of Ant. p. 763), or again as resembling the habarukh and midlahah of the modern Egyptians (Lane, i. 78, 75); (5) petakat ( gdki; χιτων ματοπόρφορον; "stomacher"), a term of doubtful origin, but probably significant of a gay holiday dress (Isa. iii, 26)—to the various explanations enumerated by Gesenius (Thesaurus, p. 1127), we may add one proposed by Suschutz (Archaeol. i. 31), πετακατ, vicio or foolish, and δια πλούτω, in which case it = unbridled pleasure, and has no reference to dress at all; (6) g'iyimin ( gdki), Isa. iii, 23), also a doubtful word, explained in the Sept. as a transparent dress, i.e. of gaze (ιατορια λασκωνα)—Schoeder (De Vest. mult. Heb. p. 311) supports this view, but perhaps the word means, as in the A. V., "glasses." The garments of females were terminated by an ample border or fringe (גזרת, גזרת; ὀρίσεα; skirts), which concealed the feet (Isa. xlviii, 2; Jer. xiii, 22).

Figs. 4 and 7 illustrate some of the peculiarities of female dress: the former is an Egyptian woman (in her walking dress); the latter represents a dress, probably of great antiquity, still worn by the peasants in the south of Europe: the outer robe, or khalouchyah, is a large piece of woollen stuff wound round the body, the upper parts being attached at the shoulders; another piece of the same stuff is used for the head-veil, or torkah.

c. Having now completed our description of Hebrew dress, we add a few remarks relative to the selection of equivalent terms in our own language. It must at once strike every Biblical student as a great defect in our Author. Ver. that the same English word should represent various Hebrew words; e.g. that "veil" should be promiscuously used for radhid (Isa. iii, 25), tas'ah (Gen. xxiv, 65), mitpachath (Ruth iii, 15), nashokah (Exod. xxxiv, 8): "robe" for meil (1 Sam. xviii, 4), kethoneth (Isa. xxii, 21), addereth (Jon. iii, 6), salmah (Mic. ii, 8): "mantle" for meil (1 Sam. xv, 27), addereth (1 Kings xix, 18), maatophakah (Isa. iii, 22); and "coat" for meil (1 Sam. ii, 19), kethoneth (Gen. iii, 21); and conversely that different English words should be promiscuously used for the same Hebrew one, as meil is translated "coat," "robe," "mantle;" addereth "robe," "mantle." Uniformity would be desirable, in as far as it can be attained, so that the English reader might understand that the same Hebrew term occurred in the original text where the same English term was found in the translation. Beyond uniformity, correctness of translation would also be desirable: the difficulty of attaining this in the subject of dress, with regard to which the customs and associations are so widely at variance in our own country and in the East, is very great. Take, for instance, the kethoneth: at once an under garment, and yet not unfrequently worn without anything over it—a skirt, as being worn next the skin, and a coat, as being the upper garment worn in a house: deprive the Hebrew of his kethoneth, and he was positively naked: deprive the Englishman of his coat, and he has under garments still. So again with the byged: in shape probably like a Scotch plaid, but the use of such a term would be unintelligible to most English readers; in use unlike any garment with which we are familiar, for we only wear a greatcoat or a cloak in bad weather, whereas the Hebrew and his byged were inseparable. With such difficulties attending the subject, any attempt to render the Hebrew terms must be, more or less, a compromise between correctness and modern usage, and the English terms which we are about to propose must be regarded merely in the light of suggestions. Kethoneth answers in many respects to "frock," the sailor's "frock" is constantly worn next the skin, and
either with or without a coat over it; the "smockfrock" is familiar to us as an upper garment, and still as a kind of undress. In shape and material these correspond with kōlēth, and, like it, the term "frock" is applied to both sexes. In the seculular dress a more technical term might be used: "vestment," in its specific sense as the chasuble, or cornua, would represent it very aptly. Meil may perhaps be best rendered "gown," for this too applies to both sexes; and, when to men, always in an official sense, as the acolyte's gown, the albsrider's gown, just as meil appears to have represented an official, or, at all events, a special dress. In the seculular dress "alb" exactly meets it, and retains still, in the Greek Church, the very name, poderix, by which the meil is described in the Sept. The seculular ephod approaches, perhaps, most nearly to the term "pall," the πασχαλίς of the Greek Church, which we may compare with the εἰσμίκατον of the Sept. Adde- retch answers in several respects to "pelisse," although this term is now applied almost exclusively to female dress. Suda ἡ = "linen wrapper." Simulā would render "garment," and in the plural "clothes," the broadest term of the kind; βηγενος "vestment," as being of superior quality; λοβακ "robe," as still superior; μάδ "cloak," as being long; and μαλαχα "dress," in the specific sense in which the term is not unfrequently used as = fine dress. In female costume μαλαχα might be rendered "shawl," μαλαχα "mantle," or the handkerchief or "clack." d. In addition to these terms, which we have thus far extracted from the Bible, we have in the Talmudical writers an entirely new nomenclature. The tal- likh (תְּלֵאֶה) is frequently noticed: it was made of fine linen, and had a fringe attached to it, like the βηγενος; it was of ample dimensions, so that the head might be enveloped in it, as was usual among the Jews in the act of prayer. The κολόνα (κολόνα) was probably another name for the tallikh, derived from the Greek κολονος; Ephesians (i, 15) represents the στολαι of the Phariaces as identical with the Dalmaticum or the colobium; the latter, as known to us, was a close tunic without sleeves. The κολομ (κολομ) was a woolen shirt, worn as an under tunic. The μακτορ (μακτόρ) was a mantle or outer garment (comp. Lightfoot, Exciscation on Matt. v. 40; Mark xiv. 51; Luke xix. 8, etc.). Gloves (τυμπανα) or παπαρία are also noticed (Chezal, xvi. 6; xxv. 16; xxvi. 8), not, however, as worn for luxury, but for the protection of the hands in manual labor. With regard to other articles of dress, see GIRDLE; HANDKERCHIEF; HEAD-DRESS; HEM OF GARMENT; SANDALS; SHOES; VEIL; also the several words above used in the A.V. e. The dresses of foreign nations are occasionally referred to in the Bible; that of the Persians is described in Dan. iii. 21 in terms which have been variously understood, but which may be identified with the statements of Herodotus (i, 159; vii. 61) in the following manner: (1) The sarbakās (סַרְבָּקָא; A.V. "coats") = דִּשְׁפִּיסִים, or drawers, which were the distinctive feature in the Persian as compared with the Hebrew dress; (2) the pāzāk (פָּזַק; A.V. "hoes") = אֲדוֹן paterae, or inner tunic; (3) the korbēs (כְּרַבֶּס; A.V. "hat") = דָּלֹם cippis, or plures; (4) a pie of tunic, corresponding to the meil of the Hebrews; (4) the lothāk (לֹהָק; A.V. "garment") = χιαλοκόλατος λινοῦ, or cloak, which was worn, like the βηγενος, over all. In addition to these terms, we have notice of a robe of state of fine linen, trābāk (תְּרַבָּק; κατεύμα; sericium pallium), so called from its ample dimensions (Esth. viii. 15). The same expression is used in the Chaldean for purple garments in Ezek. xxvii, 15. The references to Greek or Roman dress are few; the χιαλοκόλατος (2 Macc. ii. 55; Matt. xxvii. 28) was either the paludamentum, the military sash of the Roman soldier, or the chlamys itself, which was introduced under the empire (Sueton. Aug. s. v. Chlamys); it was especially worn by officers. The travelling cloak (φιάλομος) referred to by Paul (2 Tim. iv. 13) is generally identified with the Roman ponsula, of which it may be a corruption; the Talmudical writers have a similar name (יֵהלָם or נָחָד). It is, however, otherwise explained as a travelling case for carrying clothes or books (Conybears, St. Paul, ii. 499). 4. The customs and associations connected with dress are numerous, and important, many arising from the peculiar form and mode of wearing the outer garments. The βηγενος, for instance, could be applied to many purposes besides its proper use as a vestment; it was sometimes used to carry a burden (Exod. xii. 34; Judg. viii. 25; Prov. xxx. 4), as Ruth used her shawl (Ruth iii. 15); or to wrap up an article (1 Sam. xxi. 6); or again as an Improptu saddle (Matt. xxii, 7). Its most important use, however, was a coverlet at night (Exod. xxii, 27; Ruth iii. 15; Ezek. xvi, 8), whence the word is sometimes taken for bed-clothes (1 Sam. xix. 13; 1 Kings i, 1); the Bedouin applies his abba to a similar purpose (Niebuhr, Description, p. 55). On this account the word might not improperly be set (Ezek. xxii. 26; Matt. xxiv, 12, 18; compare Job xxii. 6; xxxiv. 7; Amos ii, 8). The custom of placing garments in pawn appears to have been very common, so much so that υπὲρθηκή, pledge = a garment (Deut. xxi, 12, 13); the accumulation of such pledges is referred to in Hab. ii, 6 (that loatheth himself with υπὲρθηκήν, i.e., pledges; where the A.V. following the Sept. and Vulg. renders υπὲρθηκήν, "thick clot"); this custom prevailed in the time of our Lord, who bids his disciples give up the ἰματιανος = βηγενος, in which they slept, as well as the κρίνων (Matt. x, 40). At the present day it is not unusual to seize the abba as a compensation for an injury: an instance is given in Waterlow's Syriac, i. 295. The loose, flowing character of the Hebrew robes admitted of a variety of symbolical actions: rendering them expressive of various emotions, as grief (Gen. xxxvii. 29, 34; Job i, 20; 2 Sam. i, 2) [see Mourning], fear (1 Kings xxii, 27; 2 Kings xxii, 11, 15), indignation (2 Kings v, 7; xi, 14; Matt. xxvi, 55), or despair (Matt. xxvii, 55; Esth. vi, 8); but the outer garment alone was thus used (Gen. xxxvii, 34; Job i, 20; ii, 12), occasionally the inner (2 Sam. xv, 32), and occasionally both (Ezra ix, 3; Matt. xxvi, 65, compared with Mark xiv, 63). Shaking the garments, or shaking the dust off them, was a sign of re- nunciation (Acts xvii, 8); spreading them before a person, of loyalty and joyous reception (2 Kings ix, 18; Matt. xxvii, 8); wrapping them round the head, of awe (1 Kings xix, 13) or of grief (2 Sam. xv, 30; Esth. vi, 12; Jer. xiv, 3, 4); casting them off, of excitement (Acts xxii, 29); laying hold of them, of supplication (1 Sam. xv, 27; Josh. iii, 6, iv, 1; Zech. viii, 29). The length of the dress rendered it serviceable for active exercise; hence the outer garments were either left in the house by a person working close by (Matt. xxiv, 18), or were thrown off when the occasion arose (Mark x, 50; John xiii, 4; Acts vii, 55), or, if this was not possible, as in the case of a person travelling, they were girded up (Prov. xxiii. 27; 1 K. vii, 15); or (4) on entering a house the upper garment was probably laid aside, and resumed on going out (Acts xii, 8). In a sitting posture, the garments concealed the feet; this was held to be an act of reverence (Isa. vi. 2; see Lowth's note). The proverbial expression in Matt. xxii, 21; 1 K. vii, 21; 2 Kings ix, 8, probably owes its origin to the length of the garments, which made another habit more natural (comp. Herod. ii, 35; Xenoph. Cyrop. 1. 1. 20).
DRESS

2, 16; Ammian. Marcell. xxiii, 6); the expression is variously understood to mean the lowest or the youngest of the people (Gezer. Theasur. p. 1397; John, Arch. i, 8, 620). To cut the garments short was the grossest insult that a Jew could receive (2 Sam. x, 4; the word there used יפנ is particularly expressive of the length of the garments). To raise the border or skirt of a woman's dress was a similar insult, implying her unchastity (Isa. lxi. 2; Jer. xxii, 22, 26; Nah. iii, 5).

The putting on and off of garments, and the ease with which it was accomplished, are frequently referred to; the Hebrew expressions for the first of these operations, as regards the outer robe, are, לָעָבָּשׁ, labaš, *to put on, לָעָבָּשׁ, labaš, atah, לָעָבָּשׁ, labaš, kasah, and לָעָבָּשׁ, lanaš, *to cover, the latter three having special reference to the amplitude of the robes; and for the second בַּשָּׂךְ, baskal, lit. to expand, which was the natural result of taking off a wide, loose garment. The ease of these operations forms the point of comparison, while Ps. civ. 20; Jer. xxii, 22, 26, etc., instance the case of closely-fitting robes; the expression is כֵּן chagar, lit. to gird, which is applied to the ephod (1 Sam. ii, 11; 2 Sam. vi, 14), to sackcloth (2 Sam. iii, 81; Isa. xxxix, 11; Jer. iv, 8); the use of the term may illustrate Gen. iii, 7, where the garments used by our first parents are called בַּשָּׂךְ, chagaroth (A. V. "aprons"), probably meaning such as could be wound round the body. The converse term is בְּשָׂךְ patshak, *to loosen or unbind (Ps. xxx, 11; Isa. xx, 2).

The number of suits possessed by the Hebrews was considerable; a single suit consisted of an under and upper garment, and was termed בּוּדָמָה בְּשָׂךְ (Sept. στολή ἱματια, i.e. apparetus vestium; Judg. xvii, 10). Where more than one is spoken of, the suits are termed בגּוּדָמָה בְּשָׂךְ (αδελλασσόμενα στολαί; A. V. "changes of raiment"); compare Homer, Od. viii, 249, ἵματα ἐπιχρωματισμένα. These formed in ancient times one of the most usual presents among Orientals (Harmer, Observations, ii, 379 sq.); five (Gen. xiv, 22) and even ten changes (2 Kings v, 5) were thus presented, while as many as twenty suits were given as a present (Judg. xiv, 12, 19). The highest token of affection was to present the robe actually worn by the giver (1 Sam. xvi, 4; comp. Homer, Il. vi, 230; Harmer, ii, 388). The presentation of a robe in many instances amounted to investment or investiture (Gen. xii, 12; Esth. viii, 15; Is. lxiii, 14; Morer, Sec. Journey, p. 280); on the other hand, taking it away amounted to dismissal from office (2 Mac. iv, 48). The production of the best robe was a mark of special honor in a household (Luke xv, 22). The number of robes thus received or kept in store for presents was very large, and formed one of the main elements of wealth in the East (Job xxvi, 16; Matt. vi, 19; James v, 2), so that to have clothing = to be wealthy and powerful (Isa. iii, 6, 7).

On grand occasions the entertainer offered becoming robes to his guests (Trench on Parables, p. 231). Hence in large households a wardrobe (ירפּוּנָם) was required for their preservation (2 Kings x, 22; compare Harmer, ii, 382), superintended by a special officer, named בּוּדָמָה בְּשָׂךְ, keeper of the wardrobe (2 Chron. xxxiv, 22). Robes reserved for special occasions are termed יפנּוּנָם (A. V. "changeable suits"); Isa. iii, 22; Zech. iii, 4), because laid aside when the occasion was past. The color of the garment was, as we have already observed, generally white; hence a spot or stain readily showed itself (Isa. lixiii, 8; Jude 23; Rev. iii, 4); reference is made in Lev. xiii, 47 sq. to a greenish or reddish spot of a leprous character. John (Arch. i, 8, § 135) conceives this to be not the result of leprosy, but the depredations of a small insect: but Schilling (De Lepra, p. 199) states that leprosy taints clothes, and adds "the spots are altogether indecipherable, and seem rather to spread by means of washing" (Knoblo, Comm. in 1 c.). Frequent washings and the application of the fuller's art were necessary to preserve the purity of the Hebrew dress. See SOAP; FULLER.

The business of making clothes devolved upon women in many cases (Prov. xxi, 2; Acts ix, 29); little art was required in what we may term the tailoring department; the garments came forth for the most part ready made from the loom, so that the weaver superintended the tailor. The references to sewing are therefore few: the term כּוּנָם taqem (Gen. iii, 7; Job xvi, 15; Eccles. iii, 7; Ezek. xiii, 18) was applied by the later Jews to mending rather than making clothes.

The garments were liable to the effects of wear and usage in dress; Isaiah in particular (iii, 16 sq.) dilates on the numerous robes and ornaments worn by the women of his day. The same subject is referred to in Jer. iv, 30; Ezek. xvi, 10; Zeph. i, 8, and Ecclus. xi, 4, and in a later age 1 Tim. ii, 9; 1 Pet. iii, 3. Cost APPAREL; ATTELL; CLOTHING; GARMENT; RAIMENT, etc.

DRESS OF CLERGY. See VESTMENTS.

DREW, SAMUEL, A.M., an English Methodist local preacher and metaphysical writer, was born March 3, 1765, in the suburb of St. Austell, in a poor family, and learned the shoemakers' trade. In 1785, under the preaching of Adam Clarke, he became a Methodist, and in 1788 he became a local preacher. Drew had received no early instruction, but the passion for reading was natural to him, and he early became himself an author. But his gains from literature did not suffice for his maintenance till 1809, when he finally quit the shoe-trade. In 1819 he was invited to Liverpool to take the management of the Imperial Magazine, published by the Cartoons. He accepted it, and in his hands the enterprise was very successful. Mr. Drew continued to edit the magazine, after his removal to London, up to the year of his death. In 1824 he received the degree of A.M. from Marischal College, Aberdeen. His literary labors were very abundant apart from the journal; he took no rest till the "wheels of life stood still," at Helston, March 29, 1833. His principal work is entitled Treatise on the Existence and Attributes of God (Lond. 1820, 2 vols. 8vo.). Among his other works are Remarks upon the first part of the "Age of Reason," by Thomas Paine (1799, 3d ed.; 1820, 12mo; and N. Y. 1831, 12mo)—Observations upon the Avercides of Methodism in Pol. & le (1800)—Essay upon the Immutability and Immortality of the Soul (1802; 2d ed. 1803);—Essay on the Translation of the Body (1809, 8vo; 2d ed. 1822)—Life of Dr. Coke (1816, 8vo), and History of Count Coronella (1820-24, 2 vols. 4to). See Life of Drew by his eldest son (N. Y. 1835, 12mo); Stevens, History of Methodists, ii, 290; iii, 491; S. Dunn, in The Methodist, N. Y., Nov. 24, 1866.

Drexelium, Jeremiah, a Jesuit, was born at Augsburg in 1651, entered the order of the Society at 17, was for 23 years preacher at the court of the elector Maximilian I, and died at Munich in 1688. The people worshipped him as a saint. He wrote a number of works on practical religion, which have been used even by Protestants. Collections of his works have been several times published, and some of his productions (especially are they) have been translated into different languages. His works, in complete editions, appeared at Cologne, 1715; Mainz, 1614; Munich, 1628; Antwerp, 1657-60. There is a new edition of his Reflections on Eternity (Lond. 1844, 12mo).

Drey Johann Sebastian von, a Roman Catholic theologian of Germany, was born Oct. 16, 1777, at Kiblinger. He was ordained priest May 30, 1801; was appointed in 1806 professor at the Roman Catholic school of Rottweil, and in 1812 professor of dogmatic theology.
at the newly-established university of Ellwangen. In 1817 he was transferred, with the whole theological faculty, to the University of Tübingen, at which he lectured on dogmatic theology, history of doctrines, apologetics, and theological encyclopedia (from 1828 only). He was also the last-named branch of this institution. Drey was assigned in 1846, and died at Tübingen on February 19, 1853. Drey was one of the ablest scholars of Roman Catholic Germany. He is especially known for his great work on Apologetics (Christliche Apologetik, Mainz, 1838–47, 8 vols.). He also wrote an Introduction to the Study of Theology (Einführung in die Theologie, Tübingen, 1819). Researches on the Apostolic Constitutions and Canons (Untersuchungen über die Constitutionen und Canones der Apostel, Tübingen, 1832), and several other works. He established, with Gratz (q.v.) and Hirschler (q.v.), in 1819, the Theologische Quartalschrift, which is still (1868) one of the ablest journals of scientific theology published in the Roman Catholic Church. He also contributed a large number of articles to the Kirchen-Lexikon of Wetzer and Welte. See Hefele, in Wetzer u. Welte, Kirch.-Lex. xii. 807.

Driedo, or Dridus, Jan, a Roman Catholic divine, was born at Turnhout, in Brabant. He studied at the University of Louvain, where he was a pupil of Adrian Florent, afterwards Adrian VI, and became professor of theology there. The controversy between the Lutherans and Roman Catholics he took an active part; and, according to the testimony of Erasmus, in one of his letters, disputed both coolly and learnedly. He died at Louvain in 1585. He wrote Lib. IV de Scripturis et Dogmatibus Ecclesiasticis:—De Concordia Enarratorum et Libro Arbitrorum:—De Concordia Libri Arbitriorum et Predecessionum:—De Captivitate et Redemptione Generis Humani: and De Libertate Christiana. More thi, cited by Hook, Excl. Biol. iv. 501.

Driessen, Antonius, was born in the year 1684 at Sittard, was successively settled as pastor at Maastricht and Utrecht, and was in 1717 inaugurated as professor of theology in the University of Groningen. This position he held until his death, Nov. 11, 1748. He was a man of sincere piety and eminent learning, and was ardently attached to the doctrines of the Reformed Church. He was, withal, a man of melancholic temperament, and of an intolerant spirit. His zeal for truth, or what he regarded as such, involved him in many unpleasant controversies, and the trial by the consistory of the most eminent members of his day—with Wittichius, his colleague, and, as a consequence of that, with Taco van den Honert, professor at Leyden, both of whom he accused of Spinozism—with Lampe, and professor Ode, of Utrecht, whom he accused of Rocialism, or heretodox views respecting the eternal generation of the Son, and the procession of the Holy Spirit from the Father and the Son, the charge being founded upon Lampe’s interpretation of John v. 26, and xvi. 26; with the celebrated Venema, whom he charged with Arminianism; and with the learned Schultens, because he endeavored to elucidate the Hebrew text in the aid of the words of the Vulgate, especially by that of the Arabic. These controversies were all carried on in Latin, and were on both sides characterized by the acrimony common to theological disputes in those days. His writings are very voluminous, chiefly of a polemic character, and mostly in Latin. His treatise on Eclectic Morality, or the Christian Virtues, is written in Dutch.

Drink (the verb is expressed in Heb. by the cognate terms ἐναποστάζεται, skalab, and ἐναποστάζεται, skaloheth; Greek εἰσπίπτει). The drinks of the Hebrews were: 1. Water (q.v.); 2. Wine (q.v.); 3. Artificial liquor (ἴππος, i-σεσπ) “strong drink” [see SHEKAR]; 4. Vinegar (q.v.). As drinking utensils, they made use of various forms of vessels: 1. the cup (q.v.), the most general term (ἡμνόντα); 2. the goblet (ἡμνλαρτ, covered tankard) or

“basin” (q.v.), from which the fluid was poured into the chalice (ἡμνιψίμ, bumper, comp. Jer. xxxv, 6) and bowl (ἡμνπορεο, mixing-cup, cratera); 3. the mug (ἡμνκύμ), “cruse”) or pitcher; and, 4. the saucer (ἡμνσπορ, ἵππορ, patera) or shallow libation dish (q.v.) Horns were probably used in the earliest times. See BEVERAGE.

The term “drink” is freely used figuratively in the Scriptures (see Thomson, Land and Book, i. 496). The wise man exhorts his disciple (Prov. v. 15) to “drink water out of his own cistern,” to content himself with the resources at his hand, and not to wander after satisfactions out in his affections. To eat and drink is used in Eccles. v. 18, to signify people’s enjoying themselves; and in the Gospel for living in a common and ordinary manner (Matt. xi. 18). The apostles say they ate and drank with Christ after his resurrection; that is, they conversed, and lived in their usual manner, freely, with him (Acts x. 14). Jeremiah (ii, 18) reproaches the Jews with having had recourse to Egypt for muddy water to drink, and to Assyria, to drink the water of their river; that is, the water of the Nile and of the Euphrates; meaning, soliciting the assistance of those people, who have drunk with blood signifies to be stained with blood, and with slaughter (Ezek. xxxix, 18). Our Lord commands us to drink his blood and to eat his flesh (John vi): we eat and drink both figuratively in the Eucharist. To drink water by measure (Ezek. iv. 11), and to buy water to drink (Lam. v. 4), denote extreme scarcity and desolation. On fast-days the Jews abstained from drinking during the whole day, believing it to be equally of the essence of a fast to suffer thirst as to suffer hunger. See FAST.

DRINK, Strawg, stands in the A.V. as the rendering of the Heb. word ἔσπις, σκακα, (Gracized asipa, Luke i. 15), which, in its etymological sense, applies to any beverage that had intoxicating qualities: it is generally found connected with wine, either as an exhausive expression for all other liquors (e. g. Judg. xiii, 4; Luke i. 15), or as a parallel to it, particularly in poetical passages (e. g. Isa. v., 11; Mic. ii, 11); in Num. xxvii., 7, and Ps. lxxxix., 12, however, it stands by itself, and must be regarded as including wine. The Bible itself throws little light upon the nature of the mixtures described under this term. We may infer from Cant. viii, 2 that the Hebrews were in the habit of expressing the juice of other fruits besides the grape for the purpose of making wine: the pomegranate, which is the same fruit as the wine, was pressed, and many fruits so used. In Isa. xxiv, 9 there may be a reference to the sweetness of some kind of strong drink. In Num. xxviii, 7, strong drink is clearly used as equivalent to wine, which was ordered in Exod. xxix, 40. With regard to the application of the term in later times we have the explicit statement of Jerome (Ep. ad Npct.), as well as other sources of information, from which we may state that the following beverages were known to the Jews: 1. Beer, which was largely consumed in Egypt under the name of sythys (Herod. ii, 77; Diod. Sic. i, 34), and was thence introduced into Palestine (Mishna, Pesach, iii, 1). It was made of malted barley: certain herbs, such as lupin and skirret, were used as substitutes for hops (Colum. x. 114). The būzāk of modern Egypt is made of barley-bread, crumbled in water and left until it has fermented (Lane, i, 131): the Arabsians mix it with spices (Burckhardt’s Arabien, i. 219), as described in Isa. v, 22. The Mishna (i.e.) seems to mean something akin to the word sheker, and is equivalent to a Medran drink, probably a kind of beer made in the same manner as the modern būzāk; the Edomite chome, noticed in the same place, was probably another kind of beer, and may have held the same position among the Jews that bitter beer does among ourselves. Cider, which is mentioned in the Mishna, 27, 1, is said to be apple-cise. 3. Honey-cide, of which there were two sorts, one like the oivipsan of the Greeks, which is no-
DRINK-OFFERING

994

DROMEDARY

ticed in the Mishna (Shabb. xx, 2; Tosef. xi, 1) under a Hebraized form of that name, consisting of a mixture of wine, honey, and pepper; the other a decoction of the juice of the grape, termed debash (honey) by the Hebrews, and ḏōs by the modern Syrians, resembling the ἰδρύα of the Greeks and the debrunum of the Romans, and similarly used, being mixed either with wine, milk, or water. 4. Date-wine, which was also manufactured in Egypt (ἰδρύα τούτους Ἰορδάνου, Herod. ii, 86; iii, 20). It was made by mashing the fruit in water in certain proportions (Piln. xiv, 15, 3). A similar method is still used in Arabia, except that the fruit is not mashed (Burckhardt's Arabia, ii, 264); the palm wine of modern Egypt is the sap of the tree itself, obtained by making an incision into its heart (Wilkinson, ii, 174). 5. Various other fruits and vegetables are enumerated by Pilny (xiv, 19) as supplying materials for faskan or home-made wine, such as figs, millet, the carob fruit, etc. It is not improbable that the Hebrews applied raisins to this purpose in the simple manner followed by the Arabsians (Burckhardt, ii, 877), viz., by putting them in jars of water and burying them in the ground until fermentation takes place. See Wine.

DRINK-OFFERING (γεφύρ, אֲשֹׁר, אֲשֹׁר, אֲשֹׁר), the form of this consisted, according to the ritual law, of wine (Num. xv, 6; Hos. ix, 4; Sirach i, 15 [17]); compare Exod. xvi, 18; Deut. iv, 22; Josh. v, 11; Josh. xi, 15; 1 Kings iv, 25; 1 Chron. xiv, 12; Ps. cix, 7). In the best sort of wine for this purpose, see the Mishna, Menach. viii, 6 sq.), which, according to Josephus (Ant. iii, 9, 4), was poured around the altar (ῥυὴ βυθοῦ, i. e. the burnt altar, Exod. xxx, 9), and not, as the Jews understand it (Mishna, Sukkaj, iv, 9), in a channel or tube of it. Drink-offerings were commonly joined with meat-offerings (Num. vi, 15, 17; 2 Kings xvi, 13; Joel i, 9, 13; ii, 14), an addition to the burnt and thank offerings (not the sin and trespass offering), which consisted of quadrupeds (Num. vi, 17; xv, 5, 10; 1 Chron. xxix, 21; 2 Chron. xxxii, 36), and were, like these, presented sometimes by private persons and sometimes in the name of the people, daily (Exod. xxix, 40; Num. xxviii, 7), on the Sabbath (Num. xxviii, 9, and on feast-days (Num. xxvii, 14; xxix, 6, 16, 24), in such proportion that one lamb was reckoned to require one fourth of a hin of wine, one ram a third of a hin, and one bullock a half hin (Num. vi, 5 sq.; xxviii, 7, 14). In the second Temple liquors were kept ready for drink-offerings (Joseph. War, x, 13, 6), and were dispensed (Mishna, Shab. 1, 4 and 5) by the prefect of libations (בְּנֵבֶן). The Israelites frequently devoted drink-offerings also to foreign deities (Isa. vii, 6; lxv, 11; Jer. vii, 18; xxix, 13; xlv, 17; Ezek. xx, 28), as throughout antiquity libations of wine were made to heathen gods (see Smith's Dict. of Classical Antiquity, s. v. Sacrificium, p. 860). On the water- libation at the festival of booths, see Tabernacles, Feast of. Libations of water occur in individual cases even prior to the exile (2 Sam. xxiii, 16; 1 Sam. vii, 6). On the other hand, Elijah poured water on the altar (I Kings xviii, 34 sq.) merely to heighten the effect of his miracle in contrast with his idolatrous competitors (Josephus, Ant. viii, 13, 6). On the oil-libation of Gen. xxxiv, 14, see Stone. Psalms xvi, 6 (but probably not Zech. ix, 7) appears to contain an allusion to heathenish drink offerings consisting of wine mingled with blood (バルムス 아פרים), which, especially when persons bound themselves to a faithful undertaking, it was customary to drink (Sallust, Catil. xxii, 1; Sil. Itali. ii, 426 sq.). See Offering.

Dromedary stands in the A. V. for the following Heb. words: שִׂנֵּה, בֶּרֶך', Isa. lx, 6 (Sept. syriacus, Vulg. dromedarius), sem. שִׂנֵּה, באֶרֶך', Jer. ii, 23 (Sept. mistranslates דּוּף, as if reading דּוּף; Vulg. curvus levis), a young camel (see Bochart, Hieros. ii, 1 sq.; Gesenius, Theol. p. 290; יָרֹעֲשׁ, רוֹעֲשׁ, 1 Kings iv, 28 (Sept.rippa; Vulg. latum; A. V. "male" in Esth. vii, 10; 14; "swift beast" in Mic. i, 12), a fleet or fleet courser (see Bochart, Hieros. ii, 95; יָרֹעֲשׁ, רַעֲשׁ, Esth. viii, 10 (Sept. and Vulg. altogether paraphrase), a mare (fully לֹאֵשׁ הָאָלֶף), 10 (Esth. vii, 10), has two sons of mares, A. V. "young dromedaries"). See Horse. Mule. The dromedary is properly the African or Arabian species of camel (Camelus dromedarius), having only one hump (Wallsted, i, 304), in distinction from the Bactrian (Aristotle, Anim. ii, 2; Pliny, viii, 26; Apulej, Aesin. vii, p. 102, Bip., which has two (בֵּינֶה, בֵּן, Isa. xxx, 6). It is thus the kind usually spoken of in Scripture (Heb. לֹאֵשׁ, גֵּשֶׁם) and in the East (Arabic yamd), where it is a widely-found and exceedingly useful animal. It has a slender bodily frame, long neck, small head and ears, and is of a gray or brown (very seldom black) color of skin, and usually 6-8 ft. high. (The Talmud, Shabb. v, 1, speaks of a peculiar variety, לָטֶן, which the Gemara interprets to mean the white camel.) The double- humped (called also Turbat) camel is the largest and strongest (being capable of carrying from 800 to 1500 pounds), but is so much affected by the heat of the sun as to be unserviceable during the summer months. The one-humped camel, or proper dromedary, which is everywhere met with in Syria and Palestine (Sectem. xviii, 448), is the one referred to in Is. xvi, 20 (see Gesenius, Comment. in loc.) by the term לֹאֵשׁ, לֹאֵשׁ, לֹאֵשׁ; the versions all vague or wrong: Sept. emi- cia, Vulg. orcutus, A. V. "swift beast"), so called from their bounding motion (Bochart, Hieros. i, 90), which is very rapid (Burckhardt, Deserina, ii, 76), and is sometimes accelerated by musical instruments (Sche Guist, p. 180). Its greater speed is in consequence of a finer and more elegant structure (Rassell, Albus, ii, 44; Prooip, Alp. Rec. Xsp. iv, 7, p. 292 sq.; Sommese, Trac. i, 860), so that it can not only make more miles per hour (Shaw, Trac. p. 149), but maintain this pace for a great number of days together (Pococke, Est, i, 309; Volney, ii, 260; Hest. Narr. v, Maroko, p. 292). They carry only 500 to 700 pounds. A dromedary is properly a camel, distinguished from the common one only by its breed and training, as a saddle- horse is distinguished from a cart-horse. This breed is called swift with respect to other camels, not with respect to other animals; for the camel is not essentially a swift animal, and those most renowned for their fleetness are not in any way comparable to the horse. The best-trained camels cannot sustain a gallop above half an hour, in which, at forced speed, they may make about eight or nine miles. This is their

Camel of the Hebrans.

Digitized by Google
biggest exertion. A forced trot is not so contrary to the camel's nature, and it will support it for several hours without evincing any symptoms of fatigue; but even here the utmost degree of celerity of the very best-bred dromedary does not exceed about twelve miles an hour; and it is therefore in this pace also less expeditious than a moderately good horse (Kitto, Fict. Bible, note on Jer. ii, 25). "It is not therefore," says Burckhardt, to whom we owe this statement, "by extreme celerity that the hejima and deluoi are distinguished, however surprising may be the stories related on this subject both in Europe and the East; but they are perhaps unequaled by any quadrupeds for the ease with which they carry their rider through an uninterrupted journey of several days and nights, when they are allowed to persevere in their own favorite pace, which is a kind of easy amble, at the rate of about five miles or five miles and a half in the hour" (Notes on the Bedouins, p. 262). In proportion to its weight, the camel takes but little nourishment (Philostr. Apol. i, 41): it eats in twenty-four hours a single meal of barley or beans (husks, Mishna, Shabb. vii, 4; comp. Minutoli, Nachtr. p. 229; see Wellsted, i, 206); also dough or cakes; and in the want of all these, grass and thistles, about a pound's weight: it drinks slowly (Cotovic, Hiner. iii, 21), after it has made the water muddy with its feet, and can go even 16 (some say 20) days without drinking (Aristotle, Anim. viii, 10, and Pliny, vii, 26, give only four days; but this probably means its ordinary intervals between drinking times; see Rusell, Aeppl. ii, 94); although the herbs wet with dew in the desert constantly supply moisture; besides, the camel's double cell-formed stomach apparently serves as a receptacle of water, from which it moistens its usually dry fodder, and by means of rumination can even assuage its thirst. Travellers suffering from want of water in the desert not frequently slaughter a camel, and allay their thirst with the water from its stomach, which is clear and pure. (On the diseases of the camel, see Browne, Trav. p. 563.) Camels were in use as early as the patriarchal ages (Gen. xii, 16; xxiv, 13 sq.; xxx, 48; xxvi, 17, xxvii, 7; compare Job i, 8; xlii, 12; see Aristotle, Anim. ix, 10), and in later times these animals were a very valuable possession to the Israelites (1 Chron. xxviii, 10; Tob. x, 11; Ezra ii, 67; comp. Harmer, iii, 355); although they appear to have been less precious than with the neighboring Arabic tribes (Judg. vi, 5; vii, 12; 1 Sam. xv, 8; xxvii, 9; Gen. xxxvii, 25; Jer. xlix, 32; comp. Mishna, Shabb. xxiv, 3; see of wares and baggage (Gen. xxxvii, 25; Judg. vi, 5; 1 Chron. xii, 40; 1 Kings x, 2; 2 Chron. xiv, 14; 2 Kings viii, 9; Isa. xxx, 7; ix, 6; comp. Josephus, Life, vii, 1; Curt. v, 6, 9), since they carry a large load (Volney, ii, 311; Lorant, Wund. p. 120; Rusell, ii, 54; see Diod. Sic. ii, 64), and are more sure-footed in hilly regions than the ass (Wellsted, i, 205; ii, 68). They were also used for riding (Gen. xxxiv, 64; 1 Sam. xxx, 17; comp. Trollo, Trav. p. 455; Niebuhr, Trav. i, 215), and women, seldom males, generally sat in a kind of basket or sedan-chair (22, see Gegenius, Thea. p. 715), which was fastened on the back of the camel (Gen. xxxi, 84), being spacious, and covered on all sides (see Kampfer, Amoen. p. 147; Procke, Fast. i, pl. 58). On account of its long but slow stride, and its light gait (Tischendorf, Reis. i, 258), the beast has a regular rocking motion, not disagreeable in itself to the rider, but so uniform as at length to become wearisome (Lorant, Wund. p. 119). Cyrus trained camels to fight (in order to make the horses of the enemy turn, Herod. i, 80; Aelian, Anim. iii, 7; comp. Pliny, viii, 26; Polyben. vii, 6, 6), and had even a camel troop (camels ridden by horsemen, Isa. xxi, 7; comp. Xenoph. Cyrop. vi, 2, 8; vii, 1, 27, 48 sq.; Herod. vii, 86; on the military use of camels among other people, see Diod. Sic. ii, 54; iii, 45; Livy, xxxvii, 40; Appian, Syr. 32; Pollux, Onom. x, 8; Herodian, iv, 15, 4; Veget. iii, 23; comp. Gessen. Comment. s. Jes. i, 661; and Judg. vii, 12). Bonaparte, when commanding the French army in Egypt, formed a military corps mounted on dromedaries. In loading or mounting the camel, it is made, on a given signal, to fall on the knees and breast (3; comp. Arnob. Adv. gentl. ii, 26), and receive the burden, which hangs over the back on both sides; and when it is too heavy the animal utters a mournful cry (Pliny, viii, 26; compare Schweigger, Reise, p. 284; Hést, Marokko, p. 286; Cotovic. Hiner. p. 494). On the Assyrian monuments a kneeling.

Loading a Camel. From the Sculptures at Kouyunjik.

Leo Afr. Descr. Afr. ix, p. 145; Descr. de l'Egypte, xvi, 186). They were generally used, however (especially in the caravans of the desert), for transportation of camels receiving its load is found, designed with considerable truth and spirit: the legs bent under, the tail raised, the foot of the man on the neck of the animal to keep it from rising, while a second adjusts the burden from behind, form a group seen every day in the Desert and in an Eastern town (Layard, Nin. and Rob. p. 485). They are often stubborn and vicious, although generally tractable, except in the time of

Saddling a Delouai, or Dromedary.
DROUGHT

beast (Leo Afric. ix, 30; Chardin, Voyages, iii, 578; comp. Jer. ii, 28); among the Arabs they are regarded as very revengeful (compare Olear. Trum. p. 280); hence also their name from ג갈ים, to treat evil; see Gen. 1, 29). They are taught to go by a touch (Kämpfer, Ameen, p. 724), and are guided by certain (guttural) sounds; and their necks are hung with ornaments (Judg. viii, 21, 26; see Wellsted, i, 209). Camel-drivers are called in the Talmud מצל, gamalain (Mishna, ii, 101; iii, 74). Camels' milk has always been highly esteemed in the East as a cooling drink (Pliny, xvi, 34; xxvii, 38; Aristotle, Anim. vi, 26; Diod. Sic. ii, 45; Niebuhr, iii, 314; Russel, Aleppo, ii, 46; Buckingham, Monop. p. 142; Höst, Marokko, p. 288; Tischendorf, Reise, i, 258), when it is fermented it has an intoxicating quality (Pallas, Russ. i, 240). The flesh, especially of the hump (Freytag, Dorst. d. Arab. Verkust, p. 55), is eaten by the Arabs with great relish (Aristotle, Anim. vi, 26; Diod. Sic. ii, 54; Herod. i, 123; Jerome, in Omne, ii, 6; Höst, Marokko, p. 288; Russel, ii, 32 sq.; Rosenmüller, Morg. i, 183 sq.;) to the Hebrews it was forbidden (Lev. xi, 4); see Rosenmüller in Bochart, i, 12; Michaelis, Mos. Recht, iv, 202). Of the hair (Talmud, wool, מצל, Mishna, Chil. vii, 1), which in the spring falls off of itself, are made coarse cloths and garments (Matt. iii, 4), and tent-coverings (Buckingham, Trum. ii, 86; Monop. p. 288; Niels, Aleppo, ii, 46; Herder, iii, 306; Othon, Lee, Robb., p. 114; yet see textures of camel's-hair are also mentioned, Elian, Anim. xvii, 34). Of the hide, sandals and water-skins are made, and the dung serves as fuel (Volney, i, 286). The proverb of Matt. xix, 24 also occurs in the Koran (Sur. vii, 36), and the Talmudists employ in the same sense מצל מצל, an elephant entering a needle's eye (Buxtorf, Leg. Tab. col. 1725). On Matt. xxi, 24, and other similar passages, see Alber, p. 47; compare the spoken of the camel, see Bochart, Hieros, i, 25. See generally Bochart, i, 8 sq.; Fabri Evagt, ii, 381 sq.; Burchhardt, Redowne, p. 367 sq.; Oken, Naturgesch. iii, ii, 704 sq.; Titiessa in the Hall. Encycl. xxi, 28 sq. Compare Camel.

Dronthem (Norw. Trondheim), a city in Norway, with a population in 1865 of 12,387 inhabitants. About 1608 the first episcopal see of Norway was established at Dronthem, which with Gothenburg, was at first the centre of the missionary efforts for the Christianization of the country. At first the bishopric belonged to the episcopal province of Hamburg-Bremen; on the elevation of Lund to be an archbishopric, see Dronthem, with all the Scandinavian dioceses, became subordinate to the archbishop of Lund. In 1122 Dronthem was made the metropolitan see for all Norway, and as such it embraced seven suffragan bishoprics, namely, Bergen, Stavanger, Hammer, and Anso (Opolo) in Norway, Sodren in the Orkney Islands, Holum in Iceland, and Garde in Greenland. The cathedral of Dronthem contained the relics of King Olaf the Saint, who was venerated by the whole kins-dom as its patron, and whose grave was consequently visited by numerous pilgrims. It was also the capital of Norway, and had before the Reformation ten churches and five convents. Since the Reformation it has remained the seat of a Lutheran bishop. See Norw. A list of the bishop of Dronthem is given in King Olav the Saint, Historia Norve- giae. — Wetter u. Welte, Kirchen-Lexikon, iii, 305.

Dropsy, a well-known disease (mentioned only in Luke xiv. 2, in the case of the dropical man, ἐν πομπο- κος, cured by our Saviour on the Sabbath), manifested by a morbid collection of watery secretion in any of the cavities of the body. See Disease.

Dross (יֵֽדֶע, יֵֽגֶע, once [Ezek. xxvii, 18, text] יֵֽגֶע, sug, what goes off in refining), the scoria or impurities of silver separated from the ore, or rusted or adulterated forms, by the process of melting (Prov. xvii, 4; xxvi, 28; Ps. cxxix, 119); also the base metal, or mixture itself of melting (Isa. i, 22, 23; Ezek. xxiv, 18, 19). See Metal.

Droste zu Vischering, Clemens August, Baron von, was born at Münster, Westphalia, January 22, 1778. He studied theology and philosophy at Münster, and was early introduced into the literary circle of the princess Amalia of Galitzin (q. v.). After travelling for some time in Italy, where he devoted himself to the study of art, he was consecrated a priest at Münster on May 14, 1798, by his brother Kaspar Maximilian, who had been, since 1793, assistant bishop (weihbischof) of Münster. In 1807 he was elected by the chapter vicar general, and, as such, administered the diocese until 1818, when Napoleon appointed the baron von Spiegel bishop of Münster. In order to avoid a schism, Droste conferred the administration of the diocese upon the new bishop. During the Congress of Vienna he went to Rome, to make a report on the situation of the Church in Germany. On his return, March, 1815, he published a papal brief, which dissolved the chapter established by Napoleon, and relieved the baron von Spiegel from the administration of the diocese. The papal decree was recognised by the king of Prussia, who had become the sovereign of Münster; but soon conflicts arose between the Prussian government and Droste, who had again taken charge of the administration of the diocese. He forbade Roman Catholic theological students to study at the new Prussian University of Bonn. After the conclusion of the concordat between Prussia and the pope, Droste again retired into private life, and devoted himself wholly to the extension of a new association of Sisters of Charity which he had founded. In 1827 he was consecrated assistant bishop of Münster. In 1833 he was made archbishop of Cologne, having previously promised to adhere to the concordat. He was the first archbishop of Cologne concerning marriages between Roman Catholics and Protestants. But soon after his intransigent, the new archbishop was involved in serious conflicts with the government. He maintained that he had been deprived by the Prussian government as to the true meaning of the agreement between the government and archbishop Spiegel (to which all the other bishops of Prussia had also given their assent), and declared that he would strictly carry out the views of the pope. He also proceeded with great resolution to eject the Hermenostes (q. v.). These persons had been repeatedly condemned in Rome, but were patronised by the Prussian government. Repeated efforts of the government to prevail upon Droste to abdicate having failed, he was, on Nov. 20, 1837, arrested and sent to the fortress of Minden. Soon after the accession of Friedrich Wilhelm IV to the throne of Prussia, the difficulties between the State and Church of Rome were settled by a compromise, and Droste restored to liberty. He had, however, to accept a con- ditor (bishop Gesell, of Spires), to whom he wholly left the administration of the diocese. He also refused a cardinal's hat which was offered to him by the pope. He died at Minden on Oct. 19, 1841. He had published several pamphlets on the relation between Church and State, one ascetical book, and a volume of sermons, none of which are of permanent value. — Wetter u. Welte, Kirchen-Lexikon, iii, 306; Herzog, Real-Encyklop. iii, 506. See Dunin; Cologne; Prussia.

Drought (דָּשַׁה, דָּשׁ, דָּשָׁר, restraint of rain, Jer. xvii, 8; "drought", xiv, 1; דָּשָׁר, דָּשָׁר, dysenes, Gen. xxxi, 40; Jer. i, 88; Hag. i, 11; elsewhere "heat," etc.; or דָּשֶׁר, דָּשֶׁנֶּשׁ, the cloud, the rain), see Dry places, Isa. viii, 11; יֵֽגֶעָפָּה, יֵֽגֶעָפָּה, Job xxiv, 19; Jer. ii, 6, a dry land, as elsewhere usually rendered; יֵֽגֶעִּים, יֵֽגֶעִּים, a parched
Drum. See Musical Instruments.

Drum (this and its related words, "drunken," "drunkard," etc., are represented in Hebrew by some form of the verbs ֶדֶר, šakar, to become intoxicated; ֶדֶרֶה, šakah, to drink simply; ֶדֶרֶה, ṭasch, to drink to satisfaction; ֶדֶרֶה, ṭaṣaḥ, to drink to excess; Gr. μεσθενή). The first instance of intoxication on record is that of Noah (Gen. ix. 21), who was probably ignorant of the effects of the expressed juice of the grape. The sin of drunkenness is most expressly condemned in the Scriptures (Rom. xii. 15; 1 Cor. vi. 11; Tit. i. 5, 13; 1 Thess. v. 7, 8). See Temperance. The use of strong drink, even to excess, was not uncommon among the Jews. This is inferred from the striking figures with which the use and effects of it have furnished the sacred writers, and also from the various express prohibitions and penalties (Psa. cvii. 27; Is. vi. 11; xxv. 29; xl. 26; li. 17-22; Prov. xx. 1, 2; Hab. ii. 15, 16). See Drink. Strong. Men are sometimes represented as drunk with sorrow, with afflictions, and with the wine of God's wrath (Isa. ix. 3; Jer. ii. 57; Ezek. xxvii. 33). (See Wennyas, Symbol. Dict. s. v.) Persons under the influence of superstition, idolatry, and delusion are often represented as drunk, in the sacred writers, with no use of their natural reason (Isa. xxxv. 7; Rev. xvii. 2). Drunkenness sometimes denotes abundance, satiety (Deut. xxxi. 42; Is. xlxi. 26). To "add drunkenness to thirst" (Deut. xxix. 19) is to add one sin to another; i.e. not only to pine in secret after idol-worship, but openly practise it (see Stuart's Heb. Chrest., on this passage).

Druids (Lat. Druidae or Druidae; Gr. Ὁδράποι, Ὁδράποδα). Various etymologies have been given of this word, all indicative of some characteristic of Druidism, viz. (1) the Greek word ὕδρ, an oak; (2) the Celtic words dera or derma, an oak, and add, lord or master, or heap together; (3) the Celtic compound derus or derys, from de, God, and rumpyd or rumpyd, speaker, i.e. God's speaker or theologian; (4) the old British word druidhon, very wise men; and (5) the Hebrew drusim, contemplators. Compare also the Anglo-Saxon dryn, the Irish drui, the Romance drudo, and the German drude.

The Druids were an order of ecclesiastical nobility among the ancient Celts in Gaul and Britain, enjoying high prerogatives, and living in a sort of monastic way in communities, under the presidency of an archdruid appointed for life, who exercised the chief authority among them, and whose successor was designated by virtue of some special dignity, or chosen by suffrage when there were several of equal rank. Sometimes, however, this choice was decided by an appeal to arms. Like other ancient hierarchies, they were divided into several classes; but there is some difference of opinion as to the exact number of such, as well as the character and offices of each. Strabo and Ammianus Marcellinus mention three, viz. Baris, Vates, and Druids; Diodorus Siculus only two—Baris and Druids, which latter class embraced apparently the Vates. To the Druids proper was assigned the highest rank, and they exercised in some sense government. They went to Paris, where he devoted himself to literary studies. He became first important work by his work Essai sur l'art d'être heureux (Par. 1806). In 1823 he wrote the work De la Philosophie morale, ou des différentes Systemes sur la science de la vie (5th ed. Par. 1843), which obtained the Montyon prize, and opened the way for the French Academy, of which he became a member in 1824. His most important work is a Histoire du règne de Louis XVI (Par. 1838-42, 3 vols.), on which he worked thirty years. Being in his earlier years a sensualist and Epicurean, Droz in the latter part of his life became an outspoken Roman Catholic. He wrote Essai sur le christianisme (Paris, 1842; 6th ed. 1844). He died Nov. 8, 1850.—Brockhaus, Convers.-Lex. s. v. II.—L. L.
Druids kept any written or other records of their order, none survived the overthrow of their power and influence by the Romans, while the few extant notices of them by Greek and Roman authors are very brief and unsatisfactory, especially in this respect. The word Druids has been used in the history, doctrine, and customs of the Druids; and, according to these triads, they came into Gaul from the East, during the first invasion or migration of the Kymry under Hu-Cadarn, or Hu the Mighty. The opinion that they were of Eastern origin, and made their appearance in Britain and Gaul at a very early period, is supported by the similarity of their doctrines, rites, and architectural monuments to those of certain early Oriental nations. The Druidical order has been by various authors connected with the Persian, the Hindu, the Egyptian, and the Phoenician priestly caste, and the Pythagorean fraternity; while their choice of groves, especially of oak, cypress, and cedrus, and their imageless altars and altars of rough stone, are deemed, by some, striking coincidences with the usages of patriarchal times as described in the Pentateuch. Caesar speaks of Britain as the parent seat of Druidism, affirming that those in Gaul who sought a fuller knowledge of it went thither to learn. This statement accords well with the theory of their Phoenician origin, since opportunity and motive for their early appearance in Britain may be found in that early and extensive commercial intercourse between the British Isles and Phoenician merchants in search of tin, to which we probably owe the name of Britain, i.e. the land of tin—according to some, from the Celtic brueti, tin, and tin, land; according to others, from a Phoenician word, whose modern representative is found in the Arabic beruti-anic, or borut-anic. It is stated that the Druids held to the belief in one supreme God, the Creator and Ruler of all things, in the fall of man, and a future state of rewards and punishments. To these esoteric doctrines was added the public worship of the sun and moon, and of fire, as well as of divinities corresponding in functions with those of Greece and Rome, e.g. Mercury as Teutates, Mars as Hussas, Jupiter as Tarpanis, Apollo as Belin, probably the Beal of the East, Minerva as Magna, and Hercules as Heracles. It is also told that "another remarkable principle of primitive Druidism appears to have been the worship of the serpent, a superstition so widely extended as to enervate its derivation from the most ancient traditions of the human race;" and Pliny has left us a curious account of the ammonium, or serpent's egg, worn by the Druids as a distinguishing badge, its marvellous origin fully agreeing with the wondrous virtues ascribed to it. The same author testifies to their veneration for the mistletoe and its parent oak, and thus describes the ceremony of gathering (on the sixth day of the moon) of the sacred parasite, which was called by them the allatia, or the "serpent from which sacrifices and feasts under the tree have been duly made," they bring up to it two white bulls, whose horns are then for the first time bound. The priest, clothed in white, ascends the tree, and with a golden sickle cuts off the mistletoe, which, as it falls, is caught in a robe, also white. He then makes a prayer, with the prayer that God would make his gift propitious to its recipients." In another place Pliny also makes mention that a sacrament of bread and wine formed part of the ceremonies observed in gathering the plant sago. We have also the rite of baptism reckoned among the ceremonies.

From other classical authors we learn that they held the doctrine of the immortality of the soul, which, as they taught, does not perish, but passes after death into other bodies, either directly or after a certain time. They used this belief as an incentive to valor among their countrymen, since death was only the entrance-way to a higher and better life; "the man and warrior in this life they pay off the settlement of accounts and the exactation of debts to the future meeting in another life, and also buried with the dead articles useful to the living, of which practice we find proof in the contests of their barrows or tombs, exhumed in recent times. Caesar's account further implies a recognition of the system of sacrifices. Strabo says that they taught that this material world would never be annihilated, but undergo a succession of revolutions through the agency of fire and water: this latter element, it would appear from other accounts, they also held sacred, and in some sort worshipped. Dionnes Laerius sums up their ethical system with that of the Hindoo gymnosophists, in their favorite triad form, "to honor the gods, to do no evil, and to practice manliness." According to Higginus, the characteristics of Druidism in all ages and nations were "the worship of one supreme Being, the doctrine of metempsychosis and future rewards and punishments, the worship of fire and water, the worship of the sun and moon as the symbols of the worship of fire as the emblem of the sun, the celebration of the most ancient Tauric festival, and the possession of a seventeen-letter alphabet, although their instructions were always orally given."

In their character of priests they had control of all matters pertaining to divine worship, officiated at the public and private sacrifices and other ceremonial rites. In the gloomy recesses of their deeply-shaded oak-grove temples, human victims were burned under the barbaric cruelty of their forms of sacrifice. Sometimes the victim was stabbed above the diaphragm, so that it remained during a longer period might be done from the contortions of the sufferer, and the current and flow of his blood. Some were crucified; some shot to death with arrows. Sometimes huge images of wicker-work were filled with living men, or men and animals, and then set on fire, so that all perished together. Dio Cassius states that temples were kept under guard for five years, and then sacrificed to the gods by being impaled and burned in great fires, together with vast quantities of other offerings; and that prisoners taken in war were immolated, and with them the captured cattle destroyed. Caesar says that they held criminals to be the more acceptable offering to the gods on account of the cries and sufferings of the innocent. We may suppose that in some of these cases civil and not religious ends were sought—punishment and not sacrifice.

In the capacity of judges they took cognizance of all questions, civil and criminal, public and private, enforcing their decrees by the terrible power of an interdict applied to communities as well as individuals, which excluded the recusants from the sacrifices, and consequently from the association or sympathy of others, who shunned the excommunicated as being without the pale of human or divine protection, and infecting with the same penalty and pollution the intercourse with them. According to Caesar, each year at a stated period, the Gallic Druids were wont to meet in a consecrated place within the territories of the Carnutes, whither all litigants repaired to have their controversies decided. This would seem to have been a high court of appeals, and perhaps a like one for British men, especially the women, or in the island of Anglesea, the ancient Mona.

They were also the teachers of youth, and possessed some knowledge of Astronomy, Geography, Geometry, Botany, Medicine, Physics, Mathematics, Rhetoric, and other polite arts. This, in addition to their religious doctrines, was imparted to the pupils who thronged their schools. Attracted by the honors and privileges belonging to their order, many even of noble rank
eagerly sought admission into it, though a rigid novitiate, sometimes lasting twenty years, was required. A vast number of verses, in which doubtless the history, doctrines, and precepts of the order were contained, had to be committed to memory, for the Druids forbade the writing out of these instructions, although, according to Caesar, they were acquainted with written characters, and used them for other purposes. While their sanction was requisite in all undertakings, they paid no taxes, and were exempt from the dangers of war, and we are told that their highest order enjoyed vast revenues, and lived in more than regal splendor, reigning the homage of the people seated on golden thrones.

The Druidesses are divided by Borlase into three classes: 1. Those who vowed perpetual virginity, and were constant attendants on the sacred rites. 2. Those who were married, but only saw their husbands once a year, that they might have children. 3. Those who were married, and performed all conjugal offices" (Foebroke). The priestesses of Dionysus, located by Strabo on an island near the mouth of the river Loire, and by Pomponius Mela on the isle of Sens, in the British Sea, were doubtless Druidesses of the first and second grades. It is said that several of the emperors Augustus, Tiberius, and Claudius against the Druids, the order seems not to have been entirely suppressed until a much later period. The vast structures, of which remains still exist at Stonehenge and Avebury, in Wiltshire, England, and Carnac in Brittany, together with numerous smaller ones in Great Britain and France, are supposed to be of Druidical origin. (See illustrations, under ALTAR, in this Cyclopedia, i, 178, and A.N., p. 401.) Similar ones are also found in various parts of Europe and Asia.

Drummond, Robert Hay, D.D., archbishop of York, son of the earl of Kinnoull, was born in London in 1711. He studied at Westminster School and Christ Church, Oxford, and became Dean of St. Bar's, davenport Abbey, and thomberland, in 1785. He was made bishop of St. Asaph in 1748, and was translated to Salisbury in 1761. In the same year he was appointed archbishop of York. He died in 1776. His sermons, published separately during his lifetime, obtained great celebrity, and have been collected and published under the title Sermons on Public Occasions, with a Letter on Theological Study; and Memoirs of his Life, by George Hay Drummond, A. M. etc. (Edinburgh, 1808, 8vo).—Darling, Cyclopædia Bibliographica, s. v.

Druses, the name of certain tribes of Syria (Asiatic Turkey), inhabiting a tract of land on the south side of Mount Lebanon and the Anti-Lebanon, between Beirut and Sur, and extending from the shores of the Mediterranean to Damascus. They exclusively inhabit 87 villages in the Lebanon and 69 in the Anti-Lebanon. The Maronites are mingled with them in about 210 villages. They are said to be about 100,000 in number, and is derived from that of Mohammed Ben Israel Darazi (see below), although the Druses do not acknowledge him as the founder of their religion, and many of their writers even call him by opprobrious names, e. g. Satan, the Impostor, etc.

1. History.—Their origin dates back to the tenth century, where they are found under the government of their founder, Hakim (996-1021). "After the second captivity of Israel, Esarhaddon (7th century B.C.) re-peopled the wasted strongholds of Samaria with certain fierce tribes, some of whom, called in the Scriptures Cuthites, and known in subsequent times to the Greeks as Carthaginians, and familiar to us as Kurds, settled in Lebanon. From them the present Druses are supposed to have originally sprung. More than a thousand years later a fresh colonization took place. The Mardi, a warlike tribe who dwelt to the north of the Caspian, originally of Persian extraction, were transplanted thither by the Moslems of the 13th century (A.D. 926), to the number of 15,000, to act as a bulwark against the Mohammedan invasion. The Arabs also, in sweeping through the mountain fastnesses, left a permanent impression there. Thus Cuthites, Mardi, Arabs, or rather Mohammedans of various races, have combined to form that strange tribe; the modern Druse. It has also been associated by some that the name Druse probably means not a little of the blood of the Crusaders, but this is doubtful. No immigrations, however, of any importance into the country of the Druses took place after the close of the 10th century; and this period seems naturally to conclude the first great section of Druse history. The nationality of these mountaineers having now been consolidated, their peculiar and mysterious religion began gradually to be developed" (Chamber's Cyclopaedia, s. v.). Hakim Bismarrilah succeeded as caliph of Egypt in 996, and distinguished his reign by cruel persecutions of the Christians; it is said that 50,000 churches and monasteries were plundered and destroyed by his order. Hakim died in January (about A.D. 1026), "Mohammed Ben Israel Darazi, a teacher belonging to the Batinites who had come from Persia, entered his service, and became an especial favorite at the palace. In return for the favors received from the caliph, he publicly ascribed to his master divine honor and majesty; but when he attempted to teach this doctrine in the mosque, from a book he had written, he was violently assaulted, and escaped with difficulty from the hands of the enraged worshippers. By the advice of Hakim he fled to Syria, and began to propagate his doctrines among the races dwelling on Lebanon, near the borders of the Jordan; in less than ten years, nearly all the Arab tribes that had become located here professed the religion of the Druse. Living at a distance from the place of Mohammed's power, and their fathers never having joined in the wars of the Persians, or reaped the pillage of his battles, they were less attached to his faith than any other sect, and it is said that Darazi perished in a battle with the orthodox Moslem from the plain, as they resolutely opposed him, and he had to defend himself constantly from their attacks. There was a turban-maker, called Hama, and surnamed Hadl, the leader, from whom Darazi received the instructions that induced him to defy the caliph. It is not improbable, however, that..."
Hakim himself was the real author of this impious assumption, and that the others became his agents of proselytism by the promise of a royal reward. The sect grew in influence; and the caliph, within the mosque, was summoned to embrace the new faith; but the attempt was fatal to the neophyte who made it, as he and his attendants were slain. The presumption of the caliph was equal to the credulity of his disciples. When the divine name was ascribed to him, he willingly received it, and openly proclaimed himself and his son and successors as the new ruler and ruler of the Nile, from which the land received all its luxuriance, and the people all their prosperity" (London Review, Jan. 1860, p. 159). He was slain at last; but Hamza, the apostle, survived, and wrote books which are still regarded as the oracles of the Druses.

From the tenth century onward the Druses maintained their separate religion and a quasi nationality. They lived under the orders of separate chieftains, or sheiks, without any supreme authority, and committed depredations on the neighboring Turkish countries. Frequent complaints were presented against them to the Porte, particularly the emir Fakir Eddin, in 1540, in the 17th century, because the Porte determined on taking the most active measures against him. Fakir Eddin fled to Italy, leaving his son Ali as regent in his place. The latter drove the Turks away, and restored peace; but Fakir Eddin having returned, after imbibing the love of splendor which distinguished the court of the Medjid, paid such heavy taxes on the people that a revolution broke out. The Porte sent another expedition against him in 1682. His son Ali fell in battle, a second son was made prisoner, and Fakir Eddin himself was obliged to flee to the mountains. He was betrayed by his own followers in October, 1683, and was strangled at Constantinople in 1685. His descendants held their position as emirs in subjection to the Porte. After the extinction of this family, that of the Schechah, originally from Mecca, became emirs. The powerful Melhem (1740-1759) restored to the Druses some of the power they had lost under the downfall of Fakir Eddin.

Bescir, born in 1763, is one of the last noted of the recent emirs. In 1819 he took part in the insurrection of Abbashah, and was deposed in consequence, but was pardoned by the Porte in 1823, through the influence of Mehemet Ali. An insurrection of the Druses against the viceroy took place in 1864, but was subdued by Ibrahim Pacha in 1853, and the Druses of Lebanon were disarmed. Emir Bescir then sided with the Egyptians until 1840, when he was deposed. After Ibrahim Pacha had retired from Syria, the land of the Druses passed again under the direct dominion of the Turks. At the same time bloody conflicts broke out between the Druses and the Maronites. To put an end to these troubles, the emirs of both parties were called to Constantinople in 1842, deposed, and Omar Pasha was appointed Turkish administrator in their place. He was sent to Lebanon to consult with the principal chiefs of the Druses and the Maronites, who were to form a permanent council of seven. But the two soon united against Omar Pasha, and open conflict speedily followed. The battle of Ehden, Oct. 13, 1842, proved a success for the malcontents. An edict of Dec. 7, 1842, granted to the Druses and Maronites the right of self-government, and the Mohammedan Kaimakam to restore justice to Christians. But the population are not thus geographically divided, but, on the contrary, rather mixed up, the edict did not satisfy either party. New troubles breaking out, the Porte sent Halli Pacha and 10,000 soldiers into the land. An assembly of the mountain chieftains having been called by Halli Pacha, an arrangement was made; but hardly had the opposition left the scene when troubles broke out among the Maronites themselves, arising from religious differences. A mob of peasants drove the patriarch from his residence. At the same time, the old hatred of the Druses against the Maronites was revived. The Porte at last sent 12,000 men, where some forty chiefs of the Druses and Maronites and several hundred vassals of the principal Maronites, Zahle, was suddenly disarmed Oct. 16, 1845, and the others followed without any successful resistance being made. In the spring of 1846 the Porte granted the country a new constitution, whereby a permanent council was added to each of the two Kaimakams. These councils are to be composed of members of the different sects inhabiting Lebanon (2 Maronites, 2 Druses, 2 United Greeks, 2 Non-united Greeks, 2 Turks, and 1 Muutul). The strife between the Druses and the Maronites continued, however, and another appeal was made to the Pope, with no effect. A commission was appointed to take account of the contending claims of the Roman Catholic clergy as possessors of many conventual domains, of the other religious parties, of the rich landowners, and of the Turkish officials. A terrible outbreak again occurred in May, 1860. Throughout the Lebanon the Druses attacked the Maronites, plundered and burned their villages, and in the strong that they left in the persons without distinction of age or sex. The Turkish authorities made no efforts to stop these outrages, and in some instances Turkish troops even took part in the massacres and pillages. The war continued throughout the month of June; the Maronites suffered terribly, and in Damascus some 6000 Christians were reported to have perished. Upon the news of this massacre France sent a corps of 12,000 men to Syria, while England increased its fleet on the coast, in order to assist, if necessary, the French in re-establishing order. The commander of the French troops prevailed upon Faud Pasha, who had been sent by the Turkish government to Syria as extraordinary commissioner, to order the execution of 100 of the chief accomplices of the massacre. Soon after even Achmet Pasha, the governor of Damascus, and a number of prominent Turkish officers, were executed. Several chiefs of the Druses were also sentenced to death, but this sentence was commuted into fine and long imprisonment. On the 5th of October an international commission of plenipotentiaries of European powers met at Beirut to investigate the causes of the late disturbances, and to secure the punishment of the guilty and indemnification of the sufferers. In the way of punishment and indemnification little was obtained; but the representatives of the great powers prevailed upon the Turkish government to agree, on June 9, 1861, to a special treaty concerning the administration of the Lebanon. According to this agreement, the administration of the whole mountain was placed under the supreme authority of a Christian Maronite, who was to reside at Deir el-Kamar, and to be directly dependent upon the Turkish government. The government appointed for this post Daud El-Fendi, a Roman Catholic Armenian, who, after the expiration of his first term of office, was reappointed for five years. No disturbance took place under his administration, as far as the Druses were concerned.

II. Usages, Religion, etc.—The Druses are of Caucidian extraction. They are violent, cunning, treacherous, covetous, warlike, love independence, and have successfully defended their liberty. If they have the faculties of Eastern nations, they also possess their highest virtues; they have their intelle:gt, clear, and industrious, but with hardly any intellectual culture. Reading and writing are almost unknown among them; they look upon re-
venges for bloodshed as a sacred duty. They raise grain, wine, tobacco, and silk. Their language is a dialect of the Arabic; their religion, a mixture of idolatry, Judaism, Mohammedanism, and Christianity. They make no secret of their doctrines, and yet they are but little known. They look upon the caliph Hakim of Egypt as the second advent of the prophet (incarnation of God); they permit polygamy, but it is only practised by the richer classes. There is no regular order of priesthood, the office being filled by consecrated or learned persons called akkals, comprising especially the emirs and sheiks, who form a secret organization divided into several grades, all of which are divided into smaller secret religious assemblies. The great mass of the people are almost ignorant of any principles of religion. They recognize neither ceremonies, festivals, nor fasts.

The following summary of their doctrines is given in the *London Times*, Oct. 1869, p. 161: "We are told that there is one God, unknown and unknowable; the Creator, Preserver, and Judge of the universe. We cannot speak of him by comparison or by negation. He is, is all we can say of him; and if we go further than this, we bring in the human element, and therefore of necessity make him to be a representation of God beside the form of man, who reflects the image of God, as the mirror reflects the object before which it is placed; and man is chosen to be the veil of God, as being the noblest work of his creatures. There have been nine avatars of the one God, who has appeared in the form of men, without man's impurity or corruption. They were not properly incarnations. God did not become flesh, but assumed the veil of flesh, as the man who puts on a robe is still distinct from the robe. The Druses admit this doctrine of free will in opposition to Islam, and think that predestination is irreconcilable with eternal justice. There are five invisible intelligences of a superior order, all of whom have been impersonated in as many Druze teachers, of whom Hamza was the chief. These intelligences are regarded as mediators in behalf of those who in earnest seek wisdom. The souls of men migrate into other human bodies, and rise to the level of intelligent beings. This is in a certain sense the world of nature; in another it is that of God.

In the religions that appeared in the ages preceding Hakim there was a mixture of truth; but these were only as starlight revelations, all of which were to be overpowered by the radiance of the full-orbed sun, which rests in its perfect majesty when the system of the Druses is introduced. The world of nature is but a stage in the walk of man to the kingdom of God.

The Druses extremely sensitive when inquiries are made of them respecting their religious practices, and usually parry the question by some evasive reply. A Druse, met with by Dr. Wilson at Haseliey, told him that there is little difference between their creed and observances and those of the orthodox Musulmans, while others said that they were so entirely distinct from Mohammed. No one has been more favorably situated than colonel Churchill for learning their real sentiments and customs, but even he was not permitted to penetrate into the mysteries of their faith. 'Two objects,' he says, 'engrossed my attention—the religion of the Druses, and the past history of the races which now occupy the mountain range of the Lebanon. In vain I tried to make the terms of extreme friendship and intimacy which existed between myself and the Druses available for the purpose of informing myself on the first of these points. Sheiks, akkals, and peasants alike baffled my inquiries, either by false evasions or by blunders.

At a meeting of the Royal Asiatic Society, London, March 20, 1865, the Rev. A. Tien read a paper entitled "Druse Religion Unveiled," which throws light upon the present doctrines and usages of the Druses. "Outwardly the Druses conform to the observances of Mohammedanism; but there is an element in their faith which marks them as a people of the utmost aversion to that religion. They believe they are the descendants of Jacob, and in many respects they adhere to Jewish rites. Their Sabbath commences after sunset on Friday, when they assemble in places of worship that are guarded from intrusion. They chant an invocation to the deity, a translation of which was
read by Mr. Tien, resembling a lamentation of the Israelites in captivity, imploring for the restoration of power in Jerusalem, to which they add a prayer for the destruction of Maccas. These sacred books are contained in a silver casket carefully preserved, which is considered like the ark. They are inveterate to the Mohammedans and to Christians, though professing the religion of the former and attending the mosques.

The doctrine of metempsychosis is strongly believed in, with some curious modifications. The deity whom they worship, under the title of Melchizedek, is supposed to have appeared on the earth at two different periods, with different names and attributes, and his principal agent, also, is believed to have assumed different forms. At the creation of the world, it is assumed that a certain number of souls was created which has not since been added to nor diminished; every soul, whether in human or in animal form, having been on death transferred to some other body, either more elevated or more debased, according to the conduct of the individual or animal during life. In one of the seven books there is a catechism, from which Mr. Tien read several questions and answers, containing the whole disposition of the souls of the faithful of the Druzes. The books are written in Arabic of very ancient character. The Druzes are divided into three classes or castes, according to religious distinctions. To enable one Druze to recognise another, a system of passports is adopted as by Freemasons, without an interchange of which no communication is made that may give an idea of their religious tenets."

Druzila (Ἀποκαλέσσα), youngest daughter of Herod Agrippa I by his wife Cypros, and sister of Herod Agrippa II, was only six years old when her father died in A.D. 44 (Josephus, *Ant. xix. 9, 1; xx. 7, 1 and 2*). Being celebrated for her beauty, she had already been promised in marriage to Epaphroditus, son of Antiochus, king of Camagene, but the match was broken off in consequence of Epaphroditus refusing to perform his promise of conforming to the Jewish religion. Hereupon Azius, king of Edessa, obtained Druzila as his wife, and performed the condition of becoming a Jew (John xv. 17; *Ant. x. 7, 7*). Afterwards Felix, the procurator of Judea, fell in love with her, and induced her to leave Azius, a course to which she was permitted not only by the fair promises of Felix, but by a desire to escape the annoyance to which she was subjected by the envy of her sister Berenice, who, though but seventeen years old, was beauty (φυλλασσων ἠτροφεότητος) when she was in her prime. She thought, perhaps, that Felix, whom she accepted as a second husband, would be better able to protect her than Azius, whom she divorced. In the Acts (xxiv. 24) she is mentioned in such a manner that she may naturally be supposed to have been present when Paul preached before Felix in A.D. 65. Felix and Druzila had a son, Agrippa, who perished in an eruption of Vesuvius (Josephus, *Ant. xix. 4, 1*; xx. 7, 1). According to Eusebius (Hist. v. 9) says that Felix married Druzila, a granddaughter of Cleopatra and Anthony. The Druzila he refers to, if any such person ever existed, must have been a daughter of Juba and Cleopatra Selene, for the names and fate of all the other descendents of Cleopatra and Antony are derived from other sources. But the account given by Josephus of the parentage of Druzila is more consistent than that of Tacitus with the notice in the Acts, by which it appears that she was a Jewess. Some have supposed that Felix married in succession two Druzillas; and countenance is lent to this idea by the professor of divinity and the oppression of Suetonius (Cloud. xxviii), who calls Felix "the husband of three queens." (See Noldi Hist. Iuda. p. 464 sq.; Walch, *De Felix*, Jan. 1747, p. 68 sq.) See Felix.

Druzias, Johannes (Jan van den Driecher), an eminent critic and Orientalist, was born at Oudenarde, in Flanders, June 28, 1550, and was educated at Ghent and Louvain. "His father, having been outlawed in 1567, and deprived of his estate, retired for his safety to Druzias, who was soon followed him. His mother, who continued a Roman Catholic, did all she could to prevent his studies. They were taken care of, and masters provided for him; and he had soon an opportunity of learning Hebrew under Anthony Cevelleri, who was come to England, and taught that language publicly in the University of Cambridge. Druzias lodged at his house, and had a great share in his friendship. He did not return to London till 1571, and, while he was preparing to go to France, the news of the massacre on St. Bartholomew made him change his resolution. Soon after this he was invited to Cambridge by Cartwright, the professor of divinity and the oriental languages there, at the age of twenty-two. He taught at Oxford four years with great success; after which, being desirous of returning to his own country, he went to Louvain, where he studied the civil law. The troubles on the account of religion obliged him to come back to his native Sacra, but upon the specification of Ghent, 1576, they both returned to Louvain" (*New Gen. Dictionary*, iv, 506). He was made professor of oriental languages at Leyden in 1577, and of Hebrew at Franeker 1588, where he died Feb. 12, 1616. His works, which are held in great esteem, have been translated into the Latin part incorporated in the *Scrib. Sacra*. Among the most important are *Veterum interpretationem Graecorum in totum et eius Testamentum fragmenta* (Arnhem, 1629, 240); *Annotationum in totum Iunvi Christi Testamentum Libri decem* (Franck. 1612, 4to); *Ecclesiastica, Graece et Latina* (Franck. 1600, 4to); *Provenierorum Sacrorum classes due* (Franck. 1609, 4to); *Porcella Sacra, seu comparatio locorum Vet. Test. cum iis, qua in Nove cunctatur* (Franck. 1588, 4to); *Libri decem Annotationum in totum Iunvi Christi Testamentum* (Amst. 1682, 4to). For a list of his writings, see Nicene, *Memoire*, xxv, 65; see also Richard Simon, *Historie Crit. du N. T.* (Paris, 1680); Curtius, *Vita Druzii* (Franck. 1616), *Bylde, Dictionary*, s. v.; *Hersog, Real-Encyclopädie*, iii, 592.

Drutmar, Christian, a monk in the abbey of Corbev in the ninth century, was born in Aquitaine, and afterwards taught in the monasteries of Stavelo and Malmedy, in the diocese of Liége. He left a commentary on St. Matthew (Strasbourg, 1514; Hagnenburg, 1580, fol.). "It contains some opinions respecting transubstantiation decidedly opposed to those of modern Roman Catholics, a matter (quae supra) which he held in his doctrine. He states that it does not live to finish. For St. Mark he refers his pupils
to a commentary of Bede." His commentary on St. Luke and St. John was printed at Haguenau in 1530, in the *Bibliotheca Patrum* (t. xx, p. 66). The edition of the *Lutheranae Opera* of a Lutheran, and Wetzer und Welte (*Kirchen-Lezion*, iii, 221) say that he perverted and garbled the text so as to make it oppose transubstantiation. His text runs: "Hoc est corpus meum, i. e. in sacramento... transferens spiritualiter corpus in paneam, in vinum sanguinem." On the other hand, Sixtus of Siena asserts that he found a MSS. in the Franciscan monastery at Lyons, in which the words run: Hoc est corpus meum, hoc est, vera in sacramento subsistit... transferens panem in corpus et vinum in sanguinem. See Wetzer u. Welte, *Kirchen-Lezion*, l. c.; Dupin, *Ecclesiastical Writers*, cent. ix; Mosheim, Ch. *History*, cent. ix, chap. ii, 89; Duval, *Antiquities of the Church*, Paris, 1862, xii, 419 sq.; Herzog, *Real-Encyclop.*, iii, 521.

Dryander. See EXINAS, FRANCISCO DE.

Drysdale, John, D.D., an eminent divine of the Church of Scotland, was born in 1718; entered the University of Edinburgh in 1732; became minister of Ruskilton in 1748; appointed minister of the Tron church, and also king's chaplain, in 1755; and died in 1788. He was one of the leaders of the moderate party in the Church of Scotland, and was supposed to be inclined to deism. See his *Sermoms, with Life by Dalziel* (Edinb. 1792, 2 vols. 8vo).

Dualism, in philosophy, is that system which explains the phenomena of the universe by assuming two *primal principles* instead of one (Monism). In theology, Dualism explains evil by assuming two original principles or beings, one good, the other evil. The doctrine of two primal causes, one good and the other evil, constantly working with each other, lay at the foundation of the system of Zoroaster (q. v.). It was also developed later in Manicheism (q. v.), and among the Slavonians, who, during the interval between their undisturbed faith in their national mythology and their conversion to Christianity, added to the worship of the god being that of a supremely evil one, viz. Zemserog (the Black God) (*London Review*, April, 1855, p. 11). It was in this Slavonic soil that the Oriental dualism found a congenial home, and from it seems to have originated the dualism of the Cathari and other sects during the Middle Ages. See CATHARI.

It is always found in imperfect speculation on the relation of God to the world, and on the origin of evil. It is apt to spring up, also, in the practical sphere, from the sense of personal sin, which seeks relief in a transfer of guilt from the real self—the man—to something outside of him, e. g. to the physical side of his own nature, or to the general laws of nature.

1. Oriental Dualism.—The Chinese, at a very early period, adopted a dualistic philosophy and theology. The ordinary speech of their philosophers was dualistic, implying two primal essences, "one a power or cause, the other a more passive something on which that power or cause could operate. The former may be called the "nirvana" or "light" of the universe (*Le*); the second, consisting of etherial matter, is the ultimate *material principle* (*Ke*). The latter, again, is dual (yang and yin), viz. the paternal and maternal principles in nature. Man is the product of the marriage of the male and female principles in nature, Eros and Hera, or the Siva and Parvati, in which the ultimate principle (*Ke*) takes effect, enter into the composition of rational as well as irrational beings.

In moral speculation, however, this dualism passed into a sort of pantheism" (Hardwick, *Christ and other Masters*, pt. iii, chap. 1). The Persians, the Parsees, the Persian system, whether originated by Zoroaster, or, what is more likely, modified by him from older doctrines, taught that there is "a supreme Being, all powerful and eternal, from whom have eternally proceeded, by his creative word (*Homoer*), two principles, Ormuzd and Ahriman; Ormuzd (*Oromzda*) being pure and infinite Light, Wisdom, and Perfection, the author of everlasting Good; Ahriman the prince of darkness and evil, opposed to Ormuzd, either originally or in consequence of his fall. To this belief are attached fables respecting the conflicting efforts and creations of these two powers; on the universal dominion universally reserved for the good principle, and the return of Ahriman during four periods, each of which is to last three thousand years; on the good and the evil spirits (Amanaspanda, Iseda, Persera, and Dicera), and their differences of sex and rank; on the souls of men (Persera), which, created by Ormuzd before their union with the body, have their habitation in the heavens; and which, according as in this world they have served Ormuzd or Ahriman, pass after death into the dwellings of the blessed, or are precipitated into obscurity; finally, respecting the future resurrection of the bodies of the wretched after the victory of Ormuzd and the restoration of all things" (Tennemann, *Manual Hist. of Philosophy*, § 71; see also Hardwick, *other Masters*, pt. iii, chap. iii). The Oriental Dualism first sets the Hyle (Gan, matter) as an original principle over against the divinity. The Eastern philosophers soon it found it necessary to run into Pantheism; for, the necessity of unity pressing on them, they found no other way of escape except to make God the soul of the world. But, the gods, this matter and divinity mingling, they had to fall upon two principles, the material and spiritual; and, not willing to identify the original spiritual principle with matter, darkness, and evil, they fall upon the idea of two antagonistic beings or gods, a good and an evil one, the god of light and the god of darkness, the god of matter and the god of spirit—Ahriman the evil principle, and Ormuzd the good.

2. Dualism in the Christian Age.—This Oriental Dualism, carried out into the various departments of nature and mind, and embellished by innumerable beautiful fancies, had a great charm for the imagination of even the primitive Christian mind; and it seemed also to form a certain kind of natural and easy alliance with the doctrines of good and evil, God and Satan, spirit and matter, in the human constitution, as these are unfolded in the Christian revelation, so that this dualistic mode of thinking failed not to insinuate itself largely into the thinking of many in the primitive Church. It was thus revealed itself, or at least presented in various sects and systems in every period of Christian history, and its false theories have often troubled the mind of the Church in the development and statement of its dogmas. Thus in Gnosticism, and especially in the Dosithean phase of it, Dualism enters as a ruling element. The Gnostics found it difficult to explain the existence of the sensible world, and especially the existence of evil, on the direct assumption of one absolutely good Being. Hence they mixed into their theory some elements of the Oriental philosophy. "They thought themselves compelled to combine with the doctrine of emanation that of Dualism, in order, by the combination of the two principles, to explain the origin of a world not answering to the divine idea, with all the defects cleaving to it, all the evils it contains" (Neander, *Hist. of the Chr. Church*, Bohn's ed. ii, 14). For the Manichean Dualism, see MANICHAEISM.

That the ascetic tendencies of the early Christian age were strongly stimulated, if not unconsciously caused by a leaven of Dualism, can hardly be doubted. "A dark instinct of a state of abnormal and dangerous antipathy to God leads the devotees to take vengeance in time upon that part of himself which concerns the world, which may be partly assimilated, and even tortured, at far less the cost than the renewal of the spirit of his mind, and the bringing of his whole inner man back to grav-
DU BARTAS 904 DUBLIN MANUSCRIPT

Itate towards God instead of turning upon itself. Manes endeavored to unite Christianity and the nobility by longing hence his bright and elaborate construct a speculative system. The Church repulsed the heresies because of his personal pretensions, his rival hierarchy, and his too open importations from the religion of Persia; but it was not the less profoundly modified by the tendencies which it nominally rejected. Monasticism in Syria and Egypt was the direct result of the contact of the generating Christianity with pagan habits of thought. The idea that abstinence from food was meritorious in itself, the notion of impurity attached to the sexual relation, the growing tendency to look upon marriage as a state less holy than celibacy—these were so many traits of the preceding pagan conception. The errors and extravagances of the ascetic life were especially prevalent in the Eastern Church. Schmid quotes authorities to show that remembrances of Manicheism were long kept up in Oriental convents, and also that sundry Greek monks, in their solitude, imagined they had constantly to struggle with the devil, whose power they magnified until they put him almost on a rank with God" (London Review, April, 1855, p. 10; see also Lea, Sacerdotal Celibury, Phila. 1887, p. 42 sq.).

The progress of philosophy and theology in all Christian ages has been a continuous struggle to overcome the ideas of God and man, the infinitesimal and the finite, heaven and earth, spirit and matter, together, and to do this without violence to the essential nature of either, by, on the one hand, confusing them, or, on the other, annihilating one or the other by identification of them. Pantheism, as it has sprung up on the arena of modern theological investigations, has been an earnest, though mistaken effort to overcomeDualism. Much as Pantheism is to be abhorred and dreaded, yet ought its service to be acknowledged in helping philosophy and theology to master Dualism. It has both suggested and stimulated the movement that aims at the creation of a christological theology, and we may also say philosophy, which professes, not without hope of success, to overcome that mischievous Dualism which knows only to negate, and which, in a cowardly manner, has only given up the great fundamental problems. It holds that the great gulf can be, and can only be, bridged by the God-man in whose mysterious person all dualism is overcome—the centre and perennial source of all life and thought, the principle of all unities and the unity of all principles, the whole of all that is divided, the harmony of all manifoldness and diversity, the centre of all science, and the imperial, incarnate Word of all authority and truth, the final rest of all minds, as he is also of all hearts.—Hardwick, Christ and other Masters (Lond. 1863, 2 vols. 12mo); Dörner, Doctrine of the Person of Christ (see Index); Hagenbach, Hist. of Doctrines, Smith's ed., § 1, 137; Theol. Stud. u. Kirchen (1857), p. 357; Lange, Life of Christ (1864), Nov., p. 185 sq.; H. Schmid, in Herzog, Real-Encycl. xix, 482.

Du Bartas, Guillaume de Saluces, a French Protestant of the sixteenth century, born about 1544, near Auch, in France; died 1590. His poem on the Creation obtained so great celebrity that in the course of six years more than thirty editions of the first "Semaine" were published. It was translated into Latin, Italian, Spanish, German, and English. The English version is entitled Du Bartas, hs Divine Works and Works, translated by J. Sylvestor (Lond. 1641, fol.).

Dublin, the capital of Ireland, on the river Liffey. 1. Synode of Dublin. Several important synods have been held at Dublin. 1. In A.D. 1186, chiefly to re-

lin, at which ten canons were publised for reforma-

tion of manners and discipline, one of them "forbid-
ling the clergy to pay, in any case contrary to the
to of twenty-four pence for each offence—half to be paid
to the bishop, and the other half to the church of the place where they play" (Wilkins, Concilia, iii, 660). 3. In 1615, by the archbishops, bishops, and clergy of Ireland in convocation, Thomas Jones, archbishop of Dublin, being speaker of the House of Bishops. In this synod certain canons, ordered by Eth-

er, in one hundred and four sections, under nineteen heads, conveying the Calvinistic doctrine, were drawn up and approved. These articles included the cele-

brated "Lambeth Articles" (q. v.). By the decree of the synod, any minister, of whatsoever degree or quality, who rejected any doctrine contrary to the Articles, was ordered, after due admonition, to be silenced (Wilkins, Concilia, iii, 447). 4. In 1634, composed of the archbishops, bishops, and clergy of Ire-

land, to adopt the 39 Articles of the Church of Eng-

land. 5. No formal alteration, however, of the Cal-

vinistic articles of 1615 was made, which led to very inconvenient results; some, among whom was Bram-

hall, justly considering that the adoption of the Eng-
lisb articles ipso facto annulled those of 1615, while Usher and many others, who favored the doctrines contained in the Irish Articles, maintained that both sets of articles were to be observed, and, in conse-
quence, a schism was produced, with a subscription to both the English and Irish, discordant as they were. This unhappy state of things appears to have continued until 1641, when the Irish rebellion broke out. On the restoration of the Church, no at-

tempt was made to revive the Irish articles, which fell into entire disuse." At this synod Several proposals were adopted, which received the royal assent (Mant, Irish Church, p. 483 sq.; Wilkins, Concilia, iii, 496).—Lan-

don, Manual of Councils, p. 211 sq.

2. University.—The University of Dublin (Trinity College) was founded in 1592. It is, in fact, a college, with the powers of a university. "Trinity College, indeed, was intended merely as the nucleus of a uni-

versity, but, as no colleges have since been added, it remains in undisputed possession of all university privileges. Queen Elizabeth provided the charter, the corporation of Dublin bestowed the ground and ruins of the suppressed monastery of All-Hallows, and the college was very speedily endowed with the funds necessary for the erection of the buildings. The income of the college was very limited and very pre-

carious till James I endowed it with certain estates in the province of Ulster, and a yearly pension of £388 15s. English money, from the public purse" (Cham-

bers, Encyclopedia, s. v.). The college has in its gift twenty-one Church livings.

3. Hierarchy.—An episcopal see was established at Dublin in 1038 by king Sitrik, and in 1152 it was made the see of an archbishop. In the Established Church Dublin is now (1868) the head of a province, including six bishoprics, viz. Dublin, Cashel, etc., Cashel, Limerick, etc., Killaloe, etc., and Cork, etc. The pres-

ent archbishop is Richard (Chenerix) Trench, D.D., primate of Ireland and metropolitan, consecrated 1868. The Roman Catholic Church has also an archbishop at Dublin, at present (1868) Paul Cullen, consecrated 1866, and a cardinal since 1866. The suffragans of the Roman Catholic archbishop are the bishops of Derry, Connor, Kildare-Leighlin, and Ferns. See Neher, Kirch. Statistik, i, 27.

Dublin Manuscript (Codex Dublinensis Scriptus), so called from Trinity College, Dublin, in the library of which it was discovered by Dr. John Barrett in 1856, written under some curious circumstances and contracts made in the tenth century from Chrysosotom, Epiphanius, etc. It is itself much older, probably of the sixth century, and of Alexandrian origin, and is one of the most important uncial palimpsests of the
Gospels of the leaves contain a large part of the Gospel of Matthew in twenty-two fragments (i. 17–ii. 6; ii. 13–20; iv. 4–18; v. 45–vi. 15; vii. 16–viii. 6; x. 40–xii. 18; xii. 43–xiii. 11; xiii. 57–xiv. 18; xv. 13–23; xvii. 9–17; xvii. 26–xviii. 6; xix. 4–12; 21–28; xx. 7–xxx. 8; xxx. 23–40; xl. 16–25; xli. 37–xlii. 8; xliii. 13–23; xlv. 15–25; xxv. 1–11; xxvi. 21–29; 62–71). These were published in fac-simile, with a text (not very accurate) decipherment in ordinary type by Dr. Barretts (Dublin, 1801), and they have since been carefully restored by a chemical process by Dr. Tregelles. Each page contains but one column, generally of 22 lines, in quarto. The Ammonian sections are given, but not the Eusebian canons; the verses are written at the top of the pages, the numbers being set in the margin. The writing is continuous, the single point either rarely found or quite washed out; the abbreviations are very few, and there are no breathings or accents. A space proportionate to the occasion is usually left where there is a break in the sense, and the capitals extend into the margin when a new section begins. The letters are in a plain, steady, beautiful hand, some 18 or 20 in a line.—Tregelles, in Horne's *Intro. iv*. 180 sq.; Sceivener, *Intro. p. 119 sq.* See *Manuscripts, Bibliical*.

Specimen of the Codex Dublinensis (Matt. xx. 53, 84): ἀναγενεσθαι ὑπὸ ὀρθοδόξων ἡμῶν | Καθηγητεῖς δὲ τῶν ὑπομάντων [ἀποτελεῖν καὶ εὐθυμεῖν].

**Dubno, Salomo Ben-Yosef.** Born Oct. 12, 1788, at Dubno, Russia, is best known by his Masoretic labors on the Pentateuch, and by his efforts to advance poetic culture among his countrymen. The great reformation in Judaism and Hebrew literature, which had commenced under the leadership of Mendelssohn, attracted Dubno to Berlin, where he at one time lived and labored with the great Jewish reformer. At the age of 26 he edited Salomo ben-Moses (also called Lemberger) work on the accents of Job, Proverbs, and the Psalms, which he published in 1785, under the title of **Portæ Jacobitæ** (2d ed. 1777). In 1768 he commenced, in Hebrew, a commentary on the Pentateuch, which Mendelssohn translated into German. Some misunderstanding having sprung up between himself and Mendelssohn, he discontinued this work, after having completed only the first three books of Genesis. **Commentary on Genesis** (Berl. 1781–83; Vienna, 1791, 1806, etc.). The remaining books were finished by Mendelssohn, with the aid of other learned men. See Mendelssohn. He wrote also יִצְרוּפָּר, a Masoretic Commentary on Genesis and Exodus, printed with Mendelssohn's translation in 1831–33. He died in Amsterdam June 26, 1831.—Etheridge, *Introduction to Hebrew Literature*, p. 393, 421; Kittro, *Cyclopedia*, i. 707.

**Dubois, Guillaume,** a French prelate and statesman, was born at Brives-la-Gaillarde Sept. 6, 1656. He studied at the college of St. Michael, at Paris, and afterwards became tutor in the family of the marquis de Pluvier, and later of the duke of Orleans. He spared no pains to obtain the full confidence of his pupil, and for that end connoised at all his excesses. Finally he succeeded, in 1692, in inducing the duke to marry Mademoiselle de Illinois, a legitimated daughter of Louis XIV, who rewarded him for this service by giving him the abbey of St. Just. We now find him mixed in all the political events of the time. Two years after the death of Louis XIV he was made counsellor of state by the regent, and soon found himself at the head of the government. Intent only on furthering his own interests, Dubois's policy was the precise opposite of Louis XIV's, and he became the obedient agent of England, with which power and Holland he concluded the treaty called the Threefold Alliance, at Hague, Jan. 14, 1717. Appointed minister of foreign affairs, Dubois wished to be also archbishop, and especially cardinal, as Richelieu and Mazarin had been. He had caused, for that end, the bull *Unigenitus* to be registered in France, but had obtained nothing but promises from Clement XI. The archbishopric of Cambray becoming vacant, Dubois applied for it, although he had only received the tonsure, without losing in holy orders. The regent acceded to his demand, and after receiving all the necessary ordinances in one day, Dubois was consecrated June 9, 1720, all the most eminent members of the French clergy, with the exception of the cardinal de Noailles, taking part in the ceremony. He was made a cardinal in 1721 by Innocent XI (q. v.), whom it is said, he helped with large sums of money at the time of his election. Dubois finally became prime minister in 1722, and president of the assembly of the French clergy. In this position he proved a capable and intelligent administrator, but ambitious and thoroughly unprincipled. He died at Versailles August 10, 1728. The duchess of Orleans, mother of the regent, wrote of him: "If abbot Dubois had as much honesty and religion as he has wit, he should be an excellent man; but he believes in nothing, and regards neither manners nor truth. He is very learned; he has taught my son, but yet I could wish that he had never seen him." Dubois, besides the archbishopric of Cambray, had seven abbeyes, and his revenues amounted to two millions, not counting a million he was said to have received from England for his secret services. See Duclos, *Mémoires sur les royaumes de Louis duc de Savoie; Saint Simon, Mémoires, xxvii–xxviii; Brunet, *Histoire de la France depuis les Temps les plus reculez*; Sismondi, *Histoire des Français*, xxvi to xxviii; Sévilanges, *Mém. corr. inédit du Cardinal G. Dubois*, etc. Paris, 1814; Hoefer, *Nouvelles Biographies* (xiii, 839 sq.)

**Dubosc, Pierre Thomas,** a French Reformed minister, was born in 1623 at Bayeux, in Normandy, and became minister of the Protestant church at Caen, and afterwards at Rotterdam, where he died in 1692. Having, in 1688, addressed Louis XIV on the subject of an edict directed against the Protestants, the king said that "Dubosc was the finest orator of the whole kingdom." He had a grand and elevated genius, a happy imagination, a discriminating and solid judg-
ment. His constant aim in his sermons was to enforce the inseparable connection between faith, holiness, and final salvation. He published *Sermon sur l'épître aux Ephésiens* (Rott. 1695, 3 vols. fol.);—
*Sermon sur divers textes* (Rott. 1692-1701, 4 vols. 8vo). See also *Duc. 1794, 29*; *Darling, Cyclop. Bibliographica*; Haag, *La France Protestant*, t. iii; 

**Ducange, Charles de Fresne**, an eminent French scholar, was born at Amiens December 18, 1610. His name was really Du Fresne; but as he was sieur Du Cange, he is generally named by the latter title. He studied at the Jesuits’ College in Amiens, and afterwards pursued his studies at Orleans. He was received as *advocat au parlement* at Paris in 1631. In a few years he abandoned the bar, returned to Amiens, and devoted himself to the study of history and philosophy. In 1668 he was driven back to Paris by the plague, and died there October 22, 1668. His works, which in number and extent are almost incommensurably great, abundantly prove his right to be considered a consummate historian, an exact geographer, and a good lawyer, genealogist, and antiquary. He knew nearly every language, and derived, from his researches into an infinite number of ancient monuments, a singularly extensive acquaintance with the manners and usages of the Middle Ages. Among his publications are *Histoire de l’Empire de Constantinople sous les Empereurs Francais* (Paris, 1637, fol.); — *Traité historique du chev de Jésus Baptiste* (Paris, 1656, 4to); — *Glossarium ad scriptores mediae et infimae Latinitatis* (Paris, 1678, 3 vols. fol.); — *Frankfort, 1681, and again in 1706; Bene-
dictine edition, 6 vol., fol., 1758-36, to which Peter Carpentier published a Supplement, Par. 1766, 4 vol. 
*new edition*, by Henschel, Paris, 1840-48, 7 vols. 4to; — also supplementary vol. by Diefenbach, Frankf. 1857; abridgment by Adelung, Halle, 1772, 6 vols. 8vo): —
*Glossarium ad scriptores mediae et infimae Graecitatis* (Par. 1698, 2 vol., fol., 1715), a work that was most useful for the understanding of the numerous writers of the Dark or Middle Ages, when, for many centuries, a corrupt and barbarous Latin was the only literary language of Europe. All the words used by these writers, which are not found in classical Latin, are ranged in alphabetical order, with their various meanings, and with regard to the authorities. This work is also useful for understanding old charters, and other legal documents of an early date. The labor and research required for the compilation of such a work can be best appreciated by those who have frequent occasion to consult it* (Engl. Cyclop., s. v. *Du Cange*). His works of Du Cange are preserved in the royal library at Paris. See Fangere.
Essex on the vie et les ouvrages de Ducange (Par. 1852); Hoefer, Nouv. Biog. Générale, xiv, 911.

Duchal, James, D.D., an independent divine, was born in Ireland in 1587, and was educated at the University of Glasgow. He served an independent congregation at Cambridge for ten years, afterwards another at Dublin, where he died in 1761. He published Ten Sermons; Preparatory Arguments for the Truth of the Christian Religion (Lond. 1758, 8vo); also (posthumous) Sermons (London, 1765, 3 vols. 8vo).

Darling, Cyclopaedia Bibliographica, i, 988.

Duchatel, Pierre (Castellanus), a French prelate, was born at Arc, in Burgundy (date unknown), and was educated at Dijon, where he distinguished himself by his successful study of Greek. He assisted Erasmus in his translations from the Greek, and became corrector of the press in Frobenius's office at Basle. He next studied the law at Bourges, after which he went to Rome, where he found little enjoyment except in contemplating the remains of antiquity. The corruption of morals in the Church of Rome filled him with indignation, and he appears to have conceived as bad an opinion of it as any of the Reformers, and expressed himself respecting it with as much severity as they did. From thence he travelled to Venice, and next visited Cyprus, where he resided a few years with great success. He afterwards went to Egypt, Jerusalem, and Constantinople, and on his return home was appointed reader to Francis I, who made him bishop of Tulle, and afterwards of Macon. Henry II translated him to Orleans, where he died in 1552. He was a strenuous defender of the liberties of the Gallican Church, and exceedingly liberal to the Protestants. He wrote an oration on Francis, and a Latin letter for that king to Charles V. In his funeral oration on Francis, he hinted that the soul of the king had gone to heaven, which excited the ire of the doctors of the Sorbonne, who thought that by so doing he opposed the doctrine of purgatory (Hook, Eccl. Biography, s. v.); see also Jortin, Life of Erasmus; Bayle, Dictionary, s. v. Castellanus.

Duché, Jacob, D.D., a minister of the English Church in America, was born in Philadelphia in 1737, and graduated at the University of Pennsylvania. He went soon after to England, and spent some time at Cambridge. In 1759 he became an assistant minister in Philadelphia, having been licensed by the archdeacon, then bishop of London. He was appointed shortly after professor of oratory in the College, and in 1762, after his return from a second visit to England, he was received as "one of the ministers of the United Churches." He was appointed chaplain to Congress, and continued in this office a short time. His political views, however, underwent a change, to which he innocently gave expression, so that in 1777 he found himself under the necessity of retiring to England, where he was appointed to preach in the Lambeth Asylum, London. In 1790 he returned to Philadelphia, where he died Jan. 8, 1798. His publications comprise Sermons (1780, 2 vols. 8vo); Observations on Moral, etc., by Casparina (1779); and four detached sermons.—Sprague, Annals, v, 180.

Duchobortzi, the name of a Russian sect, not certainly known to have existed before the 18th century. The word is the plural of Ducholozetz, meaning Spirit Wrestler. It is the name of one of the many sects which are subject to change. It was adopted by themselves upon their separation from the sect called Molokans, or Duchowny Christiany, "Spiritual Christians."

No records being kept by these people, it is impossible to ascertain the true time when the separation took place. It is, however, known that in 1706 Peter Pobirochin originated it by teaching—1. That God was not an essential being, but existed only in the generation of the righteous. 2. That the soul of the righteous at death passes over into another human being, and that of the wicked into an animal. 3. That there are no higher beings of any kind. 4. That to read the Bible is needless trouble, for the spirit of God will teach every one his duty. He translated his work named at the end of this article, gives the following summary of a creed delivered by the Duchobortzi to a provincial governor at the time of Catherine's persecution: "God is one, but one in the Trinity. This holy Trinity is an inscrutable being. The Father is light, the Son is life, the Holy Ghost is power. They are manifested in man—the Father by memory, the Son by reason, the Holy Ghost by will. The human soul is the image of God; but this image is nothing but memory, reason, and will. The soul existed and had fallen before the creation of the visible world; it is this fall that is recounted in the story of Adam and Eve, which, like most other portions of the Bible, should be taken allegorically. . . . In the beginning the soul's fall was occasioned by the circumstance that it contemplated itself, and commenced to love itself alone, thereby abandoning the contemplation and the love of God through sinful pride. . . . The soul is placed in the paradise of life in a place of corruption, in order that, clothed in the flesh and abandoned to its will and reason, it may choose between good and evil, and thus obtain pardon of its primary sin, or incur eternal torment. When a body is prepared for us in this world, our soul descends from above, comes to take possession of the man then in physical distance. Our body is the house in which the soul is received, and in which we lose all memory and feeling of what we had been before incarnation," etc. (p. 271, note).

Pobirochin considered and called himself one of the righted, and a son of God. Of his followers he selected twenty-four of the most trustworthy and able-bodied; twelve of them he called archangels, and the other twelve mortal angels. The duty of the latter was to dispose of such as would backslide. They refused to serve in the army, on which account they were much persecuted under the czarina Catharine II, and exiled in the days of the emperor Paul. Alexander granted them a settlement on the banks of the Molokha, near the Sea of Azof, where they numbered about two thousand. In 1839, the real or alleged discovery that a secret tribunal had existed among them caused their banishment to the other side of the Caucasus. At present there exists a settlement in the districts along the Caucasus, but in smaller numbers, and less attached to the peculiarity of the sect. They are to be found wherever there is a community of the Duchowny Christiany, or Molokans. An effort was made in 1861 by a certain Ivan Gregorieff to found the sect among the Molokans residing at Tula, in Bulgaria, but failed, whereupon he returned to Russia. For the usages of the sect, see Molokans. See Lenz, de Duchobortzis (Dorpat, 1829, 8vo); Seebohm, Life of Stephen Gridel, i, 456; Krasinski, Histoire Religieuse des Peuples Slaves (Paris, 1863, 8vo).

Duchowny (Spiritual), the name of a Russian sect which arose from the Duchowny Christiany, or Molokans, on the Caucasus, in the following manner. In the year 1833 a certain aged man came from Jerusalem to the Caucasus, and taught that he possessed the power of bringing down the Holy Spirit, and of bestowing new tongues. He proved his commission by teaching his nearest friends a song which he said was in the language of Jerusalem, and the sense of which could be comprehended only by those who had received the Holy Spirit. The principal founder of this sect was, however, Maksim Rudometkin Komar, who also organized congregations in the surrounding places among the Molokans, and enjoyed the highest estimation from them. He afterwards adopted the creed of the Molokans, with the following addition: 1. The Holy Spirit descends upon the elect either directly or indi-
rectly by being breathed upon. 2. Jumping, shak-
ing, contortions, etc., are infallible signs of the presence of the Spirit. 3. The swooning from exertion, and consequent unintelligible speaking, is considered as evidence of the Spirit. There is nothing more gratuitous except the select, whose duty it is to explain the muttering of the enthusiasts. 4. The expectation of the near end of all things, and consequent inutility of labor beyond extreme necessity, is matter of faith. 5. The literalism of the holy Scriptures is assumed, even so far as the language for once, for the sake of punishing his followers for their slothfulness, went to the nearest mountain, pretending to ascend and to leave them alone; the mass of the people fell on their knees, and prayed him not to leave them, and promised to be obedient. 6. Repentance consists in the payment of such amounts of money as the Lord estimates their sins to be worth, for which he grants indulgence in the shape of pieces of muslin on which are embroidered signs of mysterious signification. The Duchowny are found principally in the Caucasus, but almost every community of Molokans has a few of them among its members. See Molokans.

Duchowny Christiany. See Molokans.

Dudaim. See Mandrake.

Dudgeon, David, a Scotch seer, was born in 1706. Little is known of his early history. In 1729 he made his first creation entitled The Olive, which teaches that "there is no evil in the moral world but what naturally arises from the nature of imperfect creatures, who always pursue their good, but cannot but be liable to error or mistake, and that evil or sin is inseparable in some degree from all created beings, and most constant with the designs of a perfect Creator." He was called to answer for it before the Presbytery, Synod, and General Assembly, but no decision appears to have been reached. His most important work is Philosophical Letters concerning the Being and Attributes of God (1737). "These letters were written in the midst of pressing agricultural cares, to the Rev. Mr. Jackson, author of a work written in the spirit of Clarke, The Existence and Unity of God. In these letters Dudgeon reaches a species of refined Spinozism, mingled with Berkeleyanism. He denies the distinction of substances between spiritual and material, maintains that there is no substance distinct from God, and that all knowledge but of God is about ideas they exist only in the mind, and their essence and mode consist only in their being perceived." In 1789 he published A Catechism founded upon Experience and Reason, collected by a Father for the Use of his Children; and in an "Introductory Letter" he wishes that natural religion alone was embraced by all men, and states that though he believes there was an extraordinary man sent into our world seventeen hundred years ago to instruct mankind, yet he doubts whether he ever commanded any of those things to be written concerning him which we have." The same year he published A View of the Neocritics of Beza, D'Aubigny, and Cranmer, the Objections of Mr. M. Croust, in his Examination of Pope's Essay on Man. Dudgeon died at Upsettllinton, on the borders, Jan. 1748. His works were published in a combined form in 1756, in a volume without a printer's name attached, showing that there was not as yet thorough freedom of thought in Scotland. His writings had for a time a name in the district (the Catechism reached a third edition), but afterwards passed away completely from public notice."—McCosh, in Brit. and For. Rev. Review, July, 1865, p. 552.

Dudith, Andreas Sbardellati, was born at Bu-
da, in Hungary, in 1538, and became bishop of Tina, in Dalmatia, in 1558. He was afterwards appointed tutor of a few children of the Duke of Ferrara, secretary of the Hungarian chapter, and in 1592 was sent to the Council of Trent as the representative of the Hungarian clergy. Here he advocated the giving of the cup to the laity very strenuously, and also opposed the celibacy of the clergy. A secret marriage he had contracted led him to resign his office in 1567. In 1576 he undertook an important mission, where he openly professed the Protestant religion; afterwards he lived on his estates in Moravia, and died at Breslau in 1589. In one part of his career he inclined to Socinianism, but in the latter years of his life he professed the evangelical doctrines. Some of his writings were published at Offenbach in 1616. In respect to toleration, Dudith was in advance of his age. He writes to Beza, "You try to justify the banishment of Ochino, and the execution of others, and you seem to wish Poland would follow your example. God forbid! When you talk of your Augsburg Confession, and your Helvetic Creed, and your unaniuity, and your fundamental truths, I keep thinking of the sixth commandment, Thou shalt not kill" (Benedict, History of the Baptists). The speeches made by him at Trent were published by Schwarz under the name of Loran-
dus Samueli (Halle, 1743). See Moesheim, Church Hist. (N. Y. 1864), iii. 251, note; Stief, Geschichte des Lebens Dudith's (Breslau, 1756).

Duel. See Combat.

Duffield, George, D.D., an eminent Presbyterian minister, was born in Lancaster Co., Pa., Oct. 7, 1753, and graduated at Mount Horeb in 1779, where, after completing his theological studies, he became tutor for two years. He was licensed in 1756, and having accepted a call from the united churches of Carlisle, Big Spring, and Monahan, Pennsylvania, was ordained in 1761. He was a very popular preacher, and a zealous promoter of revivals. In 1759 he undertook an important mission along the frontiers of Pennsylvania to the Potomac, with a view to the organization of churches. Some time after he was called to the Second Presbyterian Church, Philadelphia, and became chaplain to the Colonial Congress for part of a session. He was a member of the American army through New Jersey in the darkest hours of the Revolution, and manifested himself on all occasions the uncompromising advocate of civil and religious freedom. He died Feb. 2, 1790. He published An Account of his Tour along the Frontiers of Pennsylvania:—A Thanksgiving Sermon, 1783.—Sprague, Am. Annals, iii. 186.

Du Fresne. See Ducange.

Dugdale, Sir William, an English antiquary, was born in Warwickshire, September 12, 1605, and devoted his life chiefly to the study of English antiques. He died February 10, 1666. Among his important works, the most notable is the Monasticon Anglicanum (1655–73, 8 vols. fol. London; new ed. of vol. i, 1682; 3d edit. 1817–29, 8 vols. fol.), containing an account of the religious houses of England, with abundant illustrative plates; an English version (probably by James Wright), abridged, appeared in 1692, and another in 1718 (fol.), probably by John Stevens, who also published The History of the Ancient Alleys, Monasteries, etc., being two additional volumes to Dugdale's Monasticon (2 vols. fol. 1722–28). Dugdale also wrote a History of St. Paul's Cathedral (1716, fol.; 2d edit. by Ellis, London, 1818).—Kiplis, Biography of Bri-
tsammon, v. 479.

Duguet, Jacques Joseph, an eminent Jesuit divine, was born at Montlaurin, Dec. 9, 1649. He was ordained priest in 1677. He belonged to the Congregation of the Oratory till 1686, when the Congregation declared against Cartesianism and Jansenism. He then went to Brussels to enjoy the society of his friend Antoine Arnauld, with whose doctrinal views he thoroughly sympathized. Duguet returned to France very shortly afterward, and spent the remainder of his life in retirement. He died at Paris Oct. 25, 1728. His life was emblazoned by the theological disputes of the
DU HALDE

909

DULCINIST

age; and his opposition to the bull Unigenitus, his at-
tachment to Quesnel, whose piety and talents were
akin to his own, with his general adherence to the
principles of Jansenism, caused him great annoyance from
the ruling Church party. Among his works are Ex-
pliation du livre de la Gerace selon la methode des
Saints Peres (Paris, 1782, 6 vols. 12mo.); — Explanation
des livre de Job (Paris, 1792, 4 vols. 12mo.); — Traite
de la croix de nostre Seigneur Jesus-Christ (Paris, 1718, 9
vols.); — Traite dogmatique sur l'Exequerie (1727, 12mo.);
— Confrences Eclesiastiques (Paris, 2 vols. 12mo.); — Explanations des xve premiers chapitres d'Isai (Paris,
1794, 6 vols. 12mo.); — Herzog, Real-Encycol. III, 635.

Du Halde, Jean Baptiste, a learned Jesuit, was
born at Paris, 1674, and entered the Jesuit order in
1708. His superiors gave him the task of editing the
diaries of missionary Jesuits, especially of those in
China. The fruit of his labors appeared in his De-
scription geographique et historique de l'empire de la
Chine (Paris, 1785, 4 vols. fol.); translated, The gen-
eral History of China (London, 1736, 4 vols. 8vo.).

After the death of Logobien (q. v.), Du Halde continued the
publication of the celebrated Letters Edificantes et Curi-
ouses ecrites des missions d'asie, depuis le 9e secul
jusqu'a ce 26e. He died at Paris August 18, 1743.

Duke (from the Latin duca, a leader) stands in our
version for two Heb. terms: רם and הר (see a dissertation
on this word by Sprenger, in the Zeitschr. f. deutsch.
morgend. Geschichtf. XI, ii, 180), alleph, a leader,
which, when used technically of the phylarch, or head of a
tribe or nation, especially of the Elomith chieftain (Gen.
xxxvi, 15-48; Exod. xv, 15; 1 Chron. i, 51-54), rarely
of the Jews ("governor," Zech. ix, 7; xii, 5, 6), and
once of chiefs in general ("captain," Jer. xiii, 21); also רם, רם, one anointed (usually in poetry), spoken
of the sons of Sion, perhaps by a periphrase for that king himself (Josch. xiii, 21), elsewhere of other "princes"
(Psa. lxxiii, 11; Ezek. xxiii, 30; Dan. xii, 8; "principal men," Mic. v, 9).

Dukhath. See Lawphing.

Dulcimer. (Chald. דותים, דותים, Sept. εὐρυφωνία, Vulg. symphonia), a musical instrument, not
in use among the Jews of Palestine, but mentioned in
Dan. iii, 5, 10, and at ver. 10 under the shorter form
of דותים (symphonie), where the text correctly
prints דותים, along with several other instruments, which Nebuchadnezzar ordered to be sounded before a
golden image set up for national worship during the
period of the captivity of Judah. Luther translates it
lute. Grotius adopts the view of Servius, who consid-
ers symphonium to be the same with the crooked trumpet
(tuba obliqua, σχινανθοῦς); he also quotes Isidore
(ii, 22), who speaks of it as a long drum. Rabbi Saad
Sadia Gaon (Comm. on Dan.) describes the symphonium
as the big-pipe, an opinion adopted by the author of
Schlitz kog-grumin (in UgoUini Theaurum, xxxii, 39-42;
see Joel, Brill's Preface to Mendelssohn's version of
the Psalms). Yet Barthelelmy, Bartholdy, and most of the
majority of Biblical critics. The same instrument is still in
use among peasants in the N.W. of Asia and in
Southern Europe, where it is known by the similar name
samborga or samborgna. With respect to the
tymology of the word a great difference of opinion prevails. Some English authors (where Eng. symphonie), and Calmet, who inclines to this view, expresses astonishment that a pure Greek word should have made its way into the Chaldee tongue: it is prob-
able, he thinks, that the instrument dulcimer (A. V.)
was introduced into Babylonia by some Greek or West-
er, who, for the sake of poverty, and for the sake of
advantage under Nebuchadnezzar during one of his campaigns on the coast of the Mediterranean. Gesenius adopts this derivati-
tion (Theo. Heb. p. 941), and cites Polybius (ap. Athen.
x, 52, p. 439, ed. Casaub.) and Isidore (Orig. vii, 21) in
confirmation. Others regard it as a Semitic word,
and connect it with ספיון, a tube (Fr. l'estre). The
word ספיון occurs in the Talmud (Shakkah, 36a), where
it evidently has the meaning of an air-pipe, with a case
(Chelum, xxvi, 8); but the explanation (Chelum, ii, 6) by ספיון is not clear (Rosenmuller on Dan. i. c.). Landau (Aruch. Art. ספיון) considers it synonymous with
siphon. Ibn Yahia, in his commentary on Dan. iii, 5,
renders it by יבּּספין (sippin), organ, the well-
known powerful musical instrument composed of a
series of pipes, of which Spinoza (Lex. Talm. col. 1504), translates it by the German term Leier (lyre). The old-fashioned adjut, the precursor of the harschroid, is said to have resembled in tone the ancient dulcimer. The modern dulcimer is described by Dr. Bushy (Dist. of Music) as a triangular instrument, consisting of a little chest, strung with about fifteen wires fixed at each end; the shortest wire is 18 inches in length, the longest 36; it is played with two small hammers held in the hands of the performer. See MUSICAL INSTRUMENTS.

Dulcinists, followers of Dulcino, or Dulcina, a
priest and native of Novara, Italy, who followed Se-
garelli (q. v.) as leader of the Apostolics (q. v.), about
A.D. 1300. He and his followers, being put under
the ban, fortified themselves in a mountain residence,
and were taken prisoners. "He was charged with con-
tempt of the Catholic hierarchy; also with asserting a
succession of three theocracies—that those under the
Father and the Son were already passed; that the third,
under the Holy Spirit, was then in operation. His followers
and themselves received the name of Congrega-
tion and the Order of the Apostles." We alone
(taken) are in the perfection in which the apostles
were, and in the liberty which proceeds immediately
from Jesus Christ. Wherefore we acknowledge obedi-
ence neither to the pope nor to any other human be-
ing; nor has he any power to excommunicate us. . . .
The pope and his priests are men of this world, and
are to be held as gods, according to St. Peter, living in
poverty and humility . . . so that all the popes and prelates since
St. Sylvester, having deviated from that original hol-
ness, are prevaricators and seducers, with the single
exception of pope Celestine, Pietro di Morrone, etc. "
(See Fleury, livre vi, chap. xxviii.) Lastly, to consum-
mute his odium, his followers, who were not very nu-
merous, were assailed with the primitive and accus-
tomed calumny of promiscuous prostitution" (Wad-
dington, Church History, chap. xxii). Extracts from
two of the writings of Dolcino are given in the Histo-
ria Duculini, and in the Archidominum ad Historiam
Dulcini in Muratori, Script.Ret. Ita1. ix, 425 sq., cited in
Herzog, Real-Encyklop. iii, 468 sq., from which we
condense the following statements.

After strongly asserting his orthodoxy, Dolcino
predicted that in the year 1308 his opponents should be
destroyed; that he and his followers should then,
without molestation, preach publicly, and in these last
days all Christians should embrace his doctrines.
As this prophecy was not fulfilled in 1308, he postponed
its fulfilment to 1304, under the pretense that God
had especially called him, and made known to him the
import of the Bible prophecies. He distinguished four
courses of people in the Roman Church (where Eng.
symphonie), and Calmet, who inclines to this view,
expresses astonishment that a pure Greek word should
have made its way into the Chaldee tongue: it is prob-
able, he thinks, that the instrument dulcimer (A. V.)
was introduced into Babylonia by some Greek or West-
er, who, for the sake of poverty, and for the sake of
advantage under Nebuchadnezzar during one of his campaigns on the coast of the Mediterranean. Gesenius adopts this derivat-

DULIA 910 DUMB

cate the newly-converted masses of heathen in Christian life and duty, were obliged to accept riches, and show the heathen how to apply the goods of this world to the honor of God. But zeal waxed cold, and the love of the world increased, until a reaction appeared in the Order of St. Benedict. As this effort to induce self-denial in the clergy and the monks failed, the vow of the Dominicans and Franciscans followed. But these also were of no effect.

The fourth epoch, according to Dolcino, was the renewal of apostolic life by Sogarelli and himself, to continue to the end of the world. This apostolical life demands self-denial and renunciation of earthly possessions, consists in the unity of the brethren in the love of the Holy Ghost, without external forms, usages, or regulations. From these doctrines it would appear that the teachings of the abbot Joachim (q. v.) had had a certain effect upon Dolcino, and that the views which Joachim cherished in regard to the era of the Holy Ghost were embraced by Dolcino, although this is generally denied. Aside from the apocalyptic prophecies, the doctrines of Dolcino seem to be penetrated by a mysticism which repudiated external things, considering them as the cause of evil. Love, in its perfection, was to be realized as the inner bond of souls, supreme over all law. All human relations, according to this view, were to be founded on love, to be footed upon a merely spiritual union; all law, as well as all right of property, were to be removed, so that nothing should prevent man from enjoying the highest state of perfection. Dolcino lived himself with a former nun, Margaretha, whom he called his delectissima soror, in voluntary poverty. The dangerous tendency of such doctrines is obvious. That Dolcino perceived the true nature and causes of certain abuses in the Church, and that he honestly desired to correct them, can hardly be questioned. His memory was long cherished by the common people; to them he seemed a hero and martyr, while to the armies which persecuted him he seemed a false prophet, punished by the powerful arm of God. Dante compares Dolcino to Mohammed (Inferno, xxvii, 55, etc.). Dolcino was tortured to death at Vercelli by order of Clement V. See Mosheim (Murdoch's ed.), Church History, bk. iii, c. xiii, pt. ii, ch. v, § 14; Krone, Fra Dolcino und die Pisaer (Leipzig, 1844); Marzi, Times (London, 1865); Gieseler, Church History, ii, § 87, and Apostolici; Segarelli.

In the Roman Church a distinction is made between latrtia (Aeropita), worship due to God; dulia (Dolokia), adoration or invocation of saints and angels; and hyperdulia (Hipopolxia), due to the Virgin Mary alone (Council of Trent, sess. xxv). Protestants, of course, reject all these distinctions. See Hagenbach, History of Doctrines, § 188; Haag, Histoire des Dogmes Chrétiens, ii, 77; Burnet, On the Articles, art. xxii; and the articles Imagery, Image Worship, Invocation of Saints.

Du'mah (Hab. Dumah, דָּמָא, דָּמָא, Adonai), the name of a person and district also of a town.

1. (Sept. דָּמָא, דָּמָא, דָּמָא; Vulg. Duma.) The fourth son of Ishmael (B.C. post 2064), and the tribe descended from him, as hence of the region inhabited by them in Arabia (Gen. xxx. 14; 1 Chron. i. 30).

In Isaiah (xxii, 11), the "burden of Dumah" is coupled with Seir, the forest of Arabia, and Kedar. It is doubtless the same called at this day Stony or Syrian Duma, situated on the confines of the Syrian desert and Arabia, with a fortified castle (Niebuhr, Arabia, p. 344), marked on D'Anville's map under lat. 29° 50' long. 58°; the Dumah lying 5 or 7 days journey from Damascus, and 13 from Medina, in the district of Jof or Sirhan (Abulfeda, Tab. Arab. ed. Gagner, p. 56); and probably probably to be footed upon a merely spiritual union; all law, as well as all right of property, were to be removed, so that nothing should prevent man from enjoying the highest state of perfection. Dolcino lived himself with a former nun, Margaretha, whom he called his delectissima soror, in voluntary poverty. The dangerous tendency of such doctrines is obvious. That Dolcino perceived the true nature and causes of certain abuses in the Church, and that he honestly desired to correct them, can hardly be questioned. His memory was long cherished by the common people; to them he seemed a hero and martyr, while to the armies which persecuted him he seemed a false prophet, punished by the powerful arm of God. Dante compares Dolcino to Mohammed (Inferno, xxvii, 55, etc.). Dolcino was tortured to death at Vercelli by order of Clement V. See Mosheim (Murdoch's ed.), Church History, bk. iii, c. xiii, pt. ii, ch. v, § 14; Krone, Fra Dolcino and the Pisaer (Leipzig, 1844); Marzi, Times (London, 1865); Gieseler, Church History, ii, § 87, and Apostolici; Segarelli.

The exorcographers and geographers of their nation expressly state it is correctly "Dumac et Jenelde" or "Duma et Jenelde," signifying "Duma of the stones or blocks of stone," of which it is said to have been built (MS. Shab, Maraisid, and Mushkarik, v. e.). Jenelde is said by some to mean "stones such as a man can lift" (see the Kamis), and seems to indicate that the place was built of unhewn or Cyclopean masonry, similar to that of very ancient structures. The town itself, which is one of the "Kureyšat" of Wady el-Kura (see the Maraisid, v. e. Dumah), appears to be called Duma, and the fortress which it contains to have the special appellation of "Marid." See Arabia.

2. (Sept. דָּמָא, דָּמָא, דָּמָא; Vulg. Duma.) A town in the mountain district of Judah (Josh. xv. 53), in the general region (i.e., "by south of Hebron") (Josh. xiv. 1, in loc.). Eusebius and Jerome (Onomast, v. e. Duma) say it was then a large village (ἔχωμεν ἡμεῖς), 16 miles from El Therube (Beit-Jibrin), in the district of Daroma (i.e. "the south," from the Hebrew דם). Dr. Robinson passed the ruins of a village called ed-Duma, 6 miles west-south of Hebron (Res. i. 314), and this is probably the same place. (See also Kiepert's Map, 166; and Van de Velde's Memoir, p. 308). See Rumah.

Dumb (דָּמַע, ὑπέλεγμα; but in Hab. ii, 9, הַדָּמַע, הַדָּמַע; Gr. ὑπέλεγμα, which also signifies defec, since the two defects generally accompany each other; also Diāλoς, speechless, Mark vi. 37; ix. 17, 25; ἀγνοεῖν, voiceless, Acts viii. 32; 1 Cor. xii. 2; 2 Pet. ii. 16; and ὑπερβολαίον, Luke i. 20), has the following significations: (1.) One unable to speak by reason of natural infirmity (Exod. ix. 11). (2.) One unable to speak by reason of knowing what to say, or how to say it; what passer of mode of address to use, or what reasons to allege in his own behalf (Prov. xxxi. 8). (3.) One unwilling to speak (Psa. xxxix. 9). We have a remarkable instance of this venerable dumbness, or silence, in the case of Aaron (Lev. x. 8), after Nadab and Abihu, his sons, were consumed by fire of God's "peace;" did not exclaim against the justice of God, but saw the propriety of the divine procedure, and humbly acquiesced in it: Christ restored a man who was dumb from demoniacal influence (Matt. ix. 32, 33; Luke xi. 14), and another who was both blind and
dumb from the same cause (Matt. xii, 29). The man who was deaf and had an impediment in his speech (Mark vii, 32–35), whom Christ restored, was not dumb, nor probably deaf by nature, but was one who had a natural impediment to enunciation, or who, having been an ulcer, or by which any one is, as we say, tongue-tied, or brought on when, from an early loss of hearing, the membrane of the tongue becomes rigid and unable to perform its office, as this work says of this man.

Dumont, Gabriel, was born at Crest, in Dauphiny, Aug. 10, 1660. His first settlement was over the Walloon church in Leipzig. In 1720 he was called to Rotterdam. Here he was held in very high estimation. He was also for a time chaplain to the Dutch embassy at Paris. His essays, included in Saurin's Discours sur la Bible, and also in Masson's Histoire de la religion de la republique des lettres, bear witness to his extensive knowledge, and especially to his acquaintance with the Oriental languages. A volume of valuable sermons from his pen was published after his death by his colleague, De Superville (Rotterdam, 1749, 8vo).

He died Jan. 1, 1748.

Du Moulin, Charles. See Moulin, Du.

Du Moulin, Pierre. See Moulin, Du.

Duquiere, a name of rophage given to the Dunkers, or German Baptists. See Baptists, German.

Danash ben-Labrat ha-Levi, an eminent Jewish scholar, was born in Bagdad about A.D. 920, spent most of his life at Fes, after dying at Cordova about A.D. 980. His writings contributed largely to the development of Hebrew lexicography and Biblical exegesis. These writings are chiefly in the form of controversies with Saadia (q. v.) and Menachem ben-Saruk (q. v.). His criticisms of the grammatical and exegetical works of his predecessors is entitled היסכית לוכנ (the Book of Animadversions), only fragments of which remain. They show that he was a better grammatical speaker, especially as to knowledge of the verb, than Saadia. These fragments are preserved in the היסכית לוכנ, a work of Aben Ezra (q. v.) written in defence of Saadia, published with a critical commentary by Lippman, and with a preface by Jost (Frankf. a. M. 1843). His criticism of Menachem's Hebrew Lexicon contains, according to Fürst, 200 articles, each concluding with his signature. It was published with notes by H. Filipowski, and with remarks by Leopold, Dukes, and Kirchheimer, by the London Antiquarian Society (Lond. and Edinb. 1850).

The principal points may be summed up in the following:
1. Danash classifies verbs and adverbs separately, and objects to the derivation of the former from the latter.
2. Distinctive are the separate letters of verbs from nouns similar in form by grammatical rules.
3. Shows the advantage of the application of the Chaldean and Arabic in the explanation of Hebrew words.
4. Departs in more than twenty-four different verses from the Masoretic text, which many are thought to yield a better sense. Fürst says of this work that it is "of great interest in relation to a knowledge of Hebrew philology, of the new Hebrew poetry, and of the state of Jewish culture in Spain in the tenth century."

The influence which Danash exercised over Jewish grammarians and expositors of the Bible is seen in the frequent quotation of this work by the principal lexicographers and commentators, such as Rashi, Joseph Caro, Aben-Ezra, and Kimchi — Dukes, Text. Mithth, über die alttest. hebr. Ergänzungen, Grammatik u. Lexikonographie (Stuttgart, 1844), p. 149; etc.; Steinschneider, Cat. Isr. Hebr.; Etheridge, Transactions of the Literary, p. 388 and 878; First, Hebrew and Chaldean Lexicon (Leips. and Lond. 1867), Preface, xxv sq.; Kittel, Cyclop. i, 709.

Danash (Danonym) ben-Tanhum, the Babyloniensis, born at Irak about A.D. 900, was educated at Keirwan by the celebrated Isaac Issarli (q. v.), and died about 960. At the age of twenty he had become so proficient in Hebrew learning that he was able to write an elaborate critical history of the books of the Bible. Besides writing also a special Hebrew grammar containing a comparison of the linguistic characteristics of the Hebrew and Arabic languages, and a commentary on the Book of Creation. His writings (mostly yet in manuscript) are often referred to by Aben-Ezra and other expositors of the Bible. The Hebrew language, and shows that the Hebrew language has diminutives, which are effected by the endings ג and י, e. g. יִנְרַה, 2 Sam. xiii, 20. Aben-Ezra opposes this opinion, and asserts that the Hebrew language has no diminutives; but Ewald, in his Grammar (c. 167), has espoused Danash's opinion. Kitto, Cyclop. i, 710; First, Hebrew and Chaldean Lexicon, Preface, p. xxv.

Dung (prop. פָּרָק, teapha'a, Ezek. iv, 15, spoken exclusively of animals, such as the cow or camel; also גָזָל, do'men, ordure, as spread on land, 2 Kings ix, 37; Psa. lxxxiii, 10; Jer. vii, 2, ix, 20; xiv, 4, xxv, 38; while יִנְרַה, pe' reah, signifies feces as contained in the entrails of victims, Exod. xxix, 14; Lev. iv, 11, 13, xi, 27; Num. ix, 5; Mal. ii, 7). On the other hand, he says: "Hebrew is spoken... שָׁנַיְהוּ, te'shaw, Deut. xxiii, 13; Ezek. iv, 12; a sense also applied to פָּרָק, ge'ol, Job xx, 7, Ezek. iv, 12, 15; Zep. i, 17; but not necessarily to פָּאָל, gal'ad, 1 Kings xiv, 10. The Greek word is εἶπος, whether of men or brutes; used in the Sept. for all the above, but found nowhere in the N. T. only in the form κοπρία, manure, Luke xiii, 8; while σκίναλος, Phil. iii, 8, properly signifies refuse. The use of such substances among the Jews was twofold."

1. As manure. This consisted either of straw steeped in liquid manure (תִּנְשַׁה, lit. in dung-water, Isa. xxv, 10), or the excreta (תִּנְשַׁה, Isa. v, 25) of the streets and roads, which were carefully removed from about the houses and collected in heaps (תִּנְשַׁה) outside the walls of the towns at fixed spots (hence the dung-gate at Jerusalem, Neh. xi, 13), and thence removed due course to the fields (Mishna, Shabb. 3, § 1–8). See below. The mode of applying manure to trees was removed by digging holes into their roots and inserting it (Laws xiii, 8), a practice prevalent in Southern Italy (Fren. Paris. p. 856). In the case of sacrifi ces the dung was burned outside the camp (Exod. xxii, 14; Lev. iv, 11; viii, 17; Num. xix, 5); hence the extreme opprobrium of the threat in Mal. ii, 3. Particular directions were laid down in the law to enforce cleanliness with regard to human ordure (Deut. xxiii, 12 sq.); it was the grossest insult to turn a man's house into a receptacle for it (תִּנְשַׁה, 2 Kings x, 27; תִּנְשַׁה, Ezra vii, 11; Dan. ii, 5; iii, 29, A. V., "dunghill"; public establishments of that nature are still found in the large towns of the East (Russell's Aleppo, i, 84). The expression to "cast out as dung" implied not only the offensiveness of the object, but also the idea of removal (1 Kings xiv, 10), and still more exposure (2 Kings ix, 37; Jer. viii, 2). The reverence of the later Hebrews would not permit the pronunciation of some of the terms used in Scripture, and accordingly more delicate words were substituted in the margin (תִּנְשַׁה, te'shaw, for יִנְרַה, charim, or יִנְרַה, charim). 2 Kings vi, 25; x, 27; xviii, 27; Isa. xxxvi, 12). The occurrence of such names as Gilgal, Dinnah, Madmenah, and Madmannah, shows that these ideas of delicacy did not extend to ordinary matters. The term אֹתָלָק (A. V., "dung") Phil. iii, 8 is applied by Josephus (War, v, 18, 7) to ordure (comp. Echus. xxvii, 4). See MANURE.
As fuel. In a district where wood is scarce, dung is so valuable for this purpose that little of it is spared for the former. The difficulty of procuring fire-wood in Syria, which the Bedouins have therefore turned to dung. Yet even in ancient times it was used for lighting lime-kilns (Theophr. Lop. 69), ovens, and for baking cakes (Ezek. iv, 12, 15), the even heat which it produced adapting it peculiarly for the latter operation. Cows' and camels' dung is still used for the same purpose, but the Bedouins (Burckhardt's Notes, i, 67) say that they even form a species of pan for frying eggs out of it (Russell, Allepo, i, 89) in Syria. The dung is mixed with straw and formed into flat, round cakes, which are dried in the sun (Lane, Med. Ed., i, 232; ii, 141). This use of dung for fuel by the ancient Israelites, however, is collected incidentally from the passage in which the prophet Ezekiel, being commanded, as a symbolical action, to bake his bread with human dung, excused himself from the use of an unclean thing, and is permitted to employ cows' dung instead (Ezek. iv, 12–15). This shows that the dung of animals, at least of clean animals, was usual, and that no idea of ceremonially unclean usage was attached to its employment for this purpose. The use of cow-dung for fuel is known to European villagers, who, at least in the west of England, prefer it in baking their bread "under the crook," on account of the long-continued and equable heat which it maintains. It is even said that in a summer evening in a small town in England there are not a few aged people travelling the green lanes with baskets to collect the cakes of cow-dung which have dried upon the road. This helps out the ordinary firewood of wood, and makes it burn longer. In many thinly-wooded parts of south-western Asia, the dung of cows, camels, horses, asses, whichever may happen to be the most common, is collected with great zeal and diligence from the streets and highways, chiefly by young girls. They also hover on the skirts of travellers, and there are often amusing scrambles among them for the droppings of the cattle. The dung is mixed up with chopped straw and made into cakes, which are stacked up by their own adhesive quality against the walls of the cottages, or are laid upon the declivity of a hill, until sufficiently dried. It is not unusual to see a whole village with its walls thus garnished, which has a singular and not very agreeable appearance to a European traveller. Towards the end of autumn, the result of the summer collection of fuel for winter is shown in large conical heaps or stacks of dried dung upon the top of every cottage. The usages of the Jews in this matter were probably similar in kind, although the extent to which they prevailed cannot now be estimated. (See Kitto, Pictorial Hist. of the Jews, ii, p. cccxlv.) See Fuel.

Dunq-Gate (דנגו, דנגו, shā'ar ha-asḥophōth), Neh. iii, 14, or פָּרָק דָּג כַּיֶּרֶס, ii, 13, xii, 31; contracted from Gate of the dunes, Sept. πύλη νότιας [v. r. in xii, 31, ἀνα- ξινήσιον τῆς Κώνιας]; Vulg. portus desertalis; or [II, 13] stercorea; A. V. "dung-port" (in ii, 13), a gate of ancient Jerusalem on the south-west quarter, 1000 cubits from the Valley Gate (Neh. iii, 13) toward the south (Neh. xii, 31); a position that fixes it at the S.W. angle of Mt. Zion (see Strong's Harm. and Expos. of the Gom. App. ii, p. 11). It was doubtless so called from the piles of garbage collected in the valley of Tophet (q. v.) below. See BET. (Compare the Esquiline Hill at Rome.) Josephus (War, v, 4, 2) calls it the Gate of the Essence (q. E οὐσίαν πύλα). See Jerusalem.

DUNGHILL (בְּשֵׁאָל, ashpūw, I Sam. ii, 8; Ps. cxiii, 7; Lam. iv, 5; מַעִדְעָן, mastrebak, a heap of compost, Isa. xxv, 10; Chald. ἠθύ, nereula, Exxra vii, 11, or מַעִדְעָן, nereul, Dan. ii, 5; ii, 29, a sink; Greek κοιπία, Ecclus. xxii, 2; Luke xiv, 35). From Isa. xxy, 10, we learn that the bulk of manure was increased by the addition of straw, which was, of course, as with us, left to rot in the dunghill. Some of the regulations connected with this use of dung we learn from the Talmud. The heaping up of a dunghill in a public place exposed the owner to the repair of any damage it might occasion, and any one was at liberty to take away (Baba Kama, i, 3, 3). Another regulation forbade the accumulation of the dunghill to be removed in the seventh or sabbatic year to the vicinity of any ground under culture (Shabb. iii, 1), which was equivalent to an interdiction of the use of manure in that year; and this must have occasioned some increase of labor in the year ensuing. See Agriculture. To sit on a dung-heap was a sign of the deepest dejection (1 Sam. ii, 8; Ps. cxiii, 7; Lam. iv, 5; comp. Job ii, 8, Sept. and Vulg.). We are informed by Plutarch (De Supretetimine) that the Syrians were affected with a particular disease characterized by violent pains of the loins, ulcerations over the whole body, swelling of the feet and abdomen, and wasting of the liver. This malady was in general referred to the anger of the gods, but was supposed to be more especially inflicted by the Syrian goddess on those who had eaten some kinds of fish deified sacred to her (Menander apud Porphyry). In order to appease the offended divinity, the persons affected by this disorder were taught by the priestesses to put on sackcloth, and, by the light of a new moon, or on an old Thursday, to roll themselves naked in the dirt as a sign of humiliation and contrition for their offence (Persius, Sat. v; Martial, Epigr. iv, 4). This will remind the reader of Job's conduct under his affliction, and that of other persons mentioned in Scripture as rolling themselves in the dust, etc. See Duet.

Dunghil, a writer of the 9th century, of whom origin and history little is known, but who is supposed to have been of Scotch or Irish birth. According to Irish accounts, he was abbot of Glendalough, and after the destruction of his monastery by the Danes he fled to France. He calls himself "a recluse," and the Hist. Lit. de la France (iv, 498) notes him as a monk of the abbey of St. Denis, in France. Muratori, however (Rev. Ital. iv, 421), describes him as a monk of Pavia. He wrote against heresies, and his works ran into several editions and translations. "Inscriptions" of Claudius of Turin (q. v.), in 827, Respontsa contra perverras Claudii Turicensis Episcopi sententias, in which he defends the invocation of saints, the adoration of relics, etc., but seeks to guard these usages from superstitious abuse. The book was first published by Sousset (1694). Printed at Paris (Paris, 1719), and in 1723; also, in Migne, Patrologia Latina, tom. 108. He was also celebrated as an astronomer.—Moore, History of Ireland; Wetzer u. Welte, Kirchens-Lexikon, iii, 333; Schröck, Kirchengeschichte, xxii, 414.

Dungeon (דַּגְו, por, Gen. xii, 15; xli, 14, etc., a pit, as often rendered; fully פֶּדֶת דַּגְו, house of the pit, Exod. xii, 29; Jer. xxxvii, 16), is properly distinguished from the ordinary prison (נִשְׁבַּת נָחַל, also פֶּדֶת נָחַל as being more severe, and usually consisting of a deep cell or cistern (Jer. xxxvii, 6; hence the propriety of the Heb. word which indicates a hole), like the Roman inner prison (q. ejuris pellis), Acts xvi, 23. Incarceration as common in Egypt (Gen. xxxix, 20 sq.; xl, 3 sq.; xli, 10; xlii, 19), was also in use among the later Israelites (comp. Ezra vii, 25). But it is nowhere mentioned in the law, perhaps because among a people, every man of whom was a landed proprietor, it was easily dispensed with, a fine being payable to make it inflect; perhaps, also, because it seemed improper to take cultivators of the earth from their land for any length of time. (Other reasons are suggested by Michaelis, Most. Rech., v, 45 sq.) Arrest is mentioned, indeed (Lev.
DUNG-GATE. 913

DUNS SCOTUS.

xxiv, 12), but not as a punishment. The guilty was simply kept in ward to await sentence (comp. 2 Chron. xviii, 26; Wachsmuth, Hellen. Alterth. 11, i, 186). So it was a legal principle in Rome that a prison was to be used only to keep men, not to punish them. Under the later kings imprisonment was used as a penal- ty, just as it was to punish by judicial sentence, but at the will of the sovereign, especially in the case of too plain-spoken prophets (2 Chron. xvi, 10; Jer. xx, 2; xxxii, 2 sq.; xxxiii, 1 sq.; xxxvii, 15). After the exile it became very customary (Matt. xi, 2; Luke ii, 20; John iii, 24), and was sometimes used to punish religious offenses (Esth. xii, 3 sq.; xiii, 4; xiv, 22; xxv, 10), and in cases of delt. (Matt. xviii, 30; comp. Aivroux, 4, 411). The most ancient prisons were simply water-cisterns, out of which, since the sides came together above, one could not easily escape without aid (Gen. xxxix, 20, 22). Imprisonment in these was often made the more unpleasant by deep mud (Jer. xxxviii, 6). There were at the gates, or in the watch-houses at the palaces of kings, or the houses of the commanders of the body-guard, who were the executors of criminal sentences, especially state-prisons (Jer. xx, 2; xxxii, 2; Gen. xxxix, 20 sq. xi, 4; comp. Jer. xxxvii, 16, 29; Harnhar. Org. iii, 250 sq.). A prison was named in the lists of foreign-kings (Drunct, 2 Chron. xvi, 10). The prisoners were kept in chains (Judg. xvi, 21; 2 Sam. iii, 34; Jer. xi, 1). Under the Roman empire they were chained, or by one or both, to the soldiers who watched them (Acts xii, 4; xxi, 33; Pliny, Ep. x, 65; Seneca, Ep. v, and De Tranquilit. An. n.; Athen. v, 213; Joseph. Anti. xviii, 6, 7, 7), as is still the custom in Abyssinia (Rippell, Abyss. i, 218). Sometimes the Israelites chained them by the feet to a wooden block (Job xii, 27; xxxiii, 11; Acts xvi, 24; comp. Wetsstein in loc.; Jacob, ad Lucian. Toxarth. p. 104), or by the neck (comp. Aristophanes, Clouds, 992), or by the hands and feet at once. Such severe imprisonment is to be understood in Jer. xx, 2; xxi, 26, where our version has "in the stocks" (comp. Symmach, βασιλευτὴς, στρατηγικός; and the Greek κεφαλή, Schol. in Aristoph. Plat. p. 476). Poor and meagre fare seems to have added to the severity of the penalty (2 Chron. xviii, 25). An example of lax state imprisonment appears in 1 Kings iii, 2. The prisoners are lieu-tainers or comparative freedom in the East (Matt. xxxv, 36; Jer. xxxvii, 8; see Rosenmüller, Morgenland, v, 101). Roman prison discipline appears especially in the Acts of the Apostles. The keeper of the prison is called in Greek δεύτερος (Acts xvii, 23; xxvii, 66), but once πρύταρ (Luke xii, 59), and was armed (Acts xvii, 27). Comp. Palethron. See in general A. Bombardini, De carcere et antiquo ius usu (Padua, 1718). See Prison.

Dung-gate; Dunghill; Dung-port. See under Dung.

Dunham, Darius, one of the pioneers of Episcopal Methodism in Canada. He entered the itinerant ministry in 1788, and located in 1800. Mr. Dunham was a man of strong character, great practical ability, and abundant wit and satire. See Wakeley, Heroes of Methodism (1820); Coles, London's Literary Men and Commerce (N. Y. 1890): Stevens, Hist. of the Methodist Episcopal Church, vol. iii, ch. vi.

Dunin, Martin von, archbishop of Posen, was born Nov. 11, 1774, at Wat, near Rawa. He studied theology at Brunberg and at Rome, in the Collegium Germanicum, and was ordained priest in 1797. In 1829 he was made administrator of the archidioce of Posen; as such he warned, in a pastoral of Dec. 8, 1829, the Polish members of the diocese against taking part in the Polish Revolution. On July 10, 1831, he was consecrated archbishop of Gnesen and Posen. In 1834 he reorganized the episcopal seminaries of those two cities. At the beginning of the year 1837 archbishop Dunin found his mind troubled by the deviations from the strict rules of the Church of Rome which had gradually come to be established in his dioce with regard to "mixed" marriages (between Roman Catholics and Protestants). He therefore asked the Prussian government to allow him either to publish in his diocese the brief on the subject by pope Pius VIII, or to ask in Rome for new instructions, or to proceed according to the bull of pope Benedict XIV of the year 1748. All these requests were refused by the Prussian government, and Dunin therefore, on February 18, 1837, in Acts vi, 15, 16, 22; xiii, 4; xvi, 10, and in cases of delt. (Matt. xviii, 30; comp. Aivroux, 4, 411). The most ancient prisons were simply water-cisterns, out of which, since the sides came together above, one could not easily escape without aid (Gen. xxxix, 20, 22). Imprisonment in these was often made the more unpleasant by deep mud (Jer. xxxviii, 6). There were at the gates, or in the watch-houses at the palaces of kings, or the houses of the commanders of the body-guard, who were the executors of criminal sentences, especially state-prisons (Jer. xx, 2; xxxii, 2; Gen. xxxix, 20 sq. xi, 4; comp. Jer. xxxvii, 15, 29; Harnhar. Org. iii, 250 sq.). A prison was named in the lists of foreign-kings (Drunct, 2 Chron. xvi, 10). The prisoners were kept in chains (Judg. xvi, 21; 2 Sam. iii, 34; Jer. xi, 1). Under the Roman empire they were chained, or by one or both, to the soldiers who watched them (Acts xii, 4; xxi, 33; Pliny, Ep. x, 65; Seneca, Ep. v, and De Tranquilit. An. n.; Athen. v, 213; Joseph. Anti. xviii, 6, 7, 7), as is still the custom in Abyssinia (Rippell, Abyss. i, 218). Sometimes the Israelites chained them by the feet to a wooden block (Job xii, 27; xxxiii, 11; Acts xvi, 24; comp. Wetsstein in loc.; Jacob, ad Lucian. Toxarth. p. 104), or by the neck (comp. Aristophanes, Clouds, 992), or by the hands and feet at once. Such severe imprisonment is to be understood in Jer. xx, 2; xxi, 26, where our version has "in the stocks" (comp. Symmach, βασιλευτὴς, στρατηγικός; and the Greek κεφαλή, Schol. in Aristoph. Plat. p. 476). Poor and meagre fare seems to have added to the severity of the penalty (2 Chron. xviii, 25). An example of lax state imprisonment appears in 1 Kings iii, 2. The prisoners are lieu-tainers or comparative freedom in the East (Matt. xxxv, 36; Jer. xxxvii, 8; see Rosenmüller, Morgenland, v, 101). Roman prison discipline appears especially in the Acts of the Apostles. The keeper of the prison is called in Greek δεύτερος (Acts xvii, 23; xxvii, 66), but once πρύταρ (Luke xii, 59), and was armed (Acts xvii, 27). Comp. Palethron. See in general A. Bombardini, De carcere et antiquo ius usu (Padua, 1718). See Prison.

Dunfield. See Baptists (German).

Dunn, Thomas, a Methodist Episcopal minister, was born in Virginia in 1774; while young emigrated to Ohio; entered the Ohio Conference in 1835, and died at Cincinnati in April, 1850. "In 1837 Mr. Dunn addressed a note to the Western Christian Advocate, in which he called attention to the condition of the Germans in this country, suggested the importance of a German press, and forwarded a subscription for its purpose." This was the first public movement towards the important work of German Methodism. He was a "good man, a fervid and persuasive preacher, a devoted pastor, a courteous gentleman, and a great peace-maker. His understanding was solid, his impulses generous, and his influence strong and sweet." He died April, 1850. Minutes of Conference, iv, 498; Thomson, Biographical Sketches, p. 176.

Duns Scotus, Johannes (Doctor Subtilis), one of the most eminent of the Scholastic theologians, was born, according to one account, about 1265, at Dunstable, near Alnwick, Northumberland; according to another, at Dun, or Dunse, in Berwickshire, Scotland. In fact, both the place and the date of his birth are unknown. As an early age he joined the Minorite Friars, and was sent by them to Oxford, where he be-
DUNS SCOTUS 914 DUNS SCOTUS

came follow of Merton College. In 1301 he was ap-
pointed to the theological chair in Oxford, which he
filled with so great reputation that it is said more than
30,000 scholars came to Oxford to hear him. In 1304
he removed to Paris, where he was made doctor of
theology, and soon rose to the head of the theological
schools. He here distinguished himself especially by
his attacks on the doctrine of the Virgin Mary against
Thomas Aquinas and the Dominicans. He influenced the
University of Paris to adopt this heresy. In 1308 Duns Scotus was order-
ed by Gonsalvo, the general of the Minorites, to Co-
logne, to oppose the Beguines. On the road he was
murdered at Mompurg, and conducted to the town by
the whole body of citizens. He died of an apoplexy
at Cologne Nov. 8, 1308. Paul Jovius relates that,
when he fell from apoplexy, he was immediately in-
terred as dead; but that afterwards coming to his
senses, he languished in a most miserable manner in
his coffin, beating his head and hands against its sides
till he died.

His philosophical views are thus stated by Tennes-
man: "His celebrated attack on the system of
Thomas Aquinas drew this skilful reasoner very fre-
quently into vain and idle distinctions, but in all his
dialectic disputes he maintained a steady zeal for
the present and a proper degree of knowledge. He endeavored to as-
certain some certain principle of knowledge, whether
rational or empirical, and applied himself to dem-
strate the truth and necessity of revelation. As
a Realist, he differed from Thomas Aquinas by asserting
that the universal is contained in the particular, not
merely in word, but in act; that it is not created by
the understanding, but communicated to it; and
that the nature of things is determined in particular or uni-
versal by a hierarch or absolute principle. In
Psychol
ogy he opposed the belief that the
souls are distinct. The object of Philosophy was, in
his opinion, to become cognizant of the nature of things,
or what is. Although human philosophy teaches the
sufficiency of reason, and that supernatural disclosures
are superfluous, the theologian regards a certain su-
pernatural revelation as necessary, because man can
never attain to certain truth by inspecting effects or
secondary causes, whether ideas or sensations. The
object of theology is God, an infinite Being, and does
not the first principle of all things. Yet he is not to be
regarded in the light of his infinity, but of his divinity,
the latter idea being more perfect than the former,
because God cannot be conceived apart from infinity,
though infinity can be conceived without God. He
attaches the innate freedom to God, and holds that
regarded the subjective will of God as the principle of
morality. Sometimes he expressed doubts as to
the possibility of a rational theology. Duns Scotus
was the founder of a school, the Scotists, who distinc-
ted themselves for subtlety of disputations, and
for incessant disputes with the Thomists. These dis-
putes were so frequently mixed up with human pas-
sions that science derived from them little benefit;
and it very frequently happened that the points in
question, instead of being elucidated, were obscured
through their controversies" (Tennemann, Manual His-
tory of Philosophy, § 269). See SCHOLASTICISM.

As to the will, Duns Scotus maintained its freed-
dom, without any determinism. In fact, "the leading
discrimination between the Thomist and the Scotist psy-
chology respects the relation of thinking and willing,
which, although they are found united, simul, in the
soul, are really (formaliter) distinct, as well from
such other acts of the soul (Op. Oxon., ii, d. 16). The de-
determinism of Thomas, according to which the will nec-
essarily chooses what the thought presents to it as
the best, Duns castats most emphatically. Not only
that the will has the power to determine itself entire-
lly alone (ibid. d. 25), and, under certain circumstances,
to act against the reason (Disput. subtil. 9 and 15), but,

in decided opposition to Thomas, it may be said that
in very many cases the reason is determined by the
will, e.g. when I will to think. It is most judicious to
distinguish two different modes of thinking—the
first, which precedes the will; the second, which fol-

lows it; but even the former does not determine the
will, for voluntas est superior intellectus (Op. Oxon., ii, d.
12, qu. 3). This is in opposition to Thomas (q. v.), who
with liberum arbitrium: what it does is contingens et
viteles, while the intellect obeys necessity (Op. Oxon.,
ii, d. 25). The function of the latter is to furnish
the will the material which it combines, the possi-

bility being given to it of willing entire opposites
(Op. Oxon., i, d. 30, qu. 2). See STARRCROCK, Amer.
Presb. Review, April 1855, p. 299).

On the Theology of Scotus, we take the following
from Erdmann's article just cited: "The peculiarities of
Duns's psychology, as well as his deviations there-
from in Thomas, reflect themselves in the manner in
which he views the essence of God and the destiny of
man, and, therefore, in his theology and ethics. As to
his theology: since the existence of God might be
known without supernatural illumination, there is,
therefore, ex parvis naturalibus, a knowledge of the di-
vine essence. But just as the former could not be
proved a priori, the latter also cannot be derived from
the highest principles. Duns endeavored to establish
these two determinations (Bestimmungen) give
the foundation of Duns's doctrine of the Trinity, since
the Son, as Verbum, has his ground in the membra
perfecta, the Holy Ghost, on the other hand, in the
spirito operated through the will (Rep. Paris. ii, d. 12;
Op. Oxon. i, d. 30, qu. 1). In fact, he assumes the
right to the natural man such capacity as that he may
know the Trinity (Quodl. qu. 14). These intra-divine
relations (not natural) through which the three persons
are, are the first deductions resulting from the essence
of God, and are therefore to be derived from the
attitude of the divine essence towards a natural man,
based on the subjective will of God as the principle of
morality. Duns himself decided the question of God's
existence with every relation of God ad extra.
For, since all out of God proceeds from the divine will,
and this cause acts contingenter (Op. Oxon. i, d. 39), it can by
no means be proved that anything out of God must
exist, and that it must exist as it is. Truly his own
being does God know and will of necessity; in
particular, however, only secundum voluntatem (Rep.
Paris. i, d. 17). That

God might have created all things: other than he has,
or that he might do all things otherwise than he does,
cannot be proved a logical impossibility, an incompas-
scillatitas contrariarum; we can therefore only say, "in
the course of the established order chosen by God, this
or that will or will not happen (Op. Oxon. i, d. 30, qu.
11). Such an established order, limits which God
has voluntarily fixed for himself, is postulated by
Duns, because he distinguishes creation and preserva-
tion, i.e. bringing out of nothing into being, and out
of being into being, as two essentially distinct rela-
tions of God (Op. Oxon. i, d. 30, qu. 2). The decision
of God (qu. 2) to God. (Op. Oxon. i, d. 30 qu. 2.) But it must
never be forgotten that the ground why this particu-
lar order was established is to be found purely in
the pleasure of God. Therefore, although it is true
that God has created all things according to ideas which
preceded the things in his intelligence, yet these archa-
typical forms have by no means determined his creating; least of all has he chosen any one form because it was the better. Rather it is only the better for the very reason that God has chosen it (Op. Oxon. ii. d. 19).

There is, therefore, a scientific knowledge of the Trinity in the Scotists and Thomists. If the idea of the Trinity is the result of the carnation precisely as it is with the creation. Had God willed, we might have become stone; there is no more impossibility in that than there was in his becoming man.

Precisely the same is true of redemption through the death of Christ. A proof of the necessity of his suffering the penalty. It is the pleasure of God that the death of the guiltless one should become the ransom for the guilty (Op. Oxon. iii. d. 7, qu. 1: d. 29; iv. d. 15). (Around this point revolve the controversies of the Scotists and Thomists respecting the merits of Christ.) Precisely as it must be said of these dogmas that they are certain, not through scientific proofs, but through the fides infirma (Stud. d. 24), even so must we say of the moral commandments which are given us. It is not because it is evil that God has forbidden us this or that, but it is evil because he has forbidden it. Had he commanded murder or other transgressions, they would have been no transgressions.

With Duns, who allows to the will precedence over the thinking power, the matter must naturally take another form. The authority of Aristotle alarms him not at all, in his view, only the philosopher, with his temporal life, life of thought, has to do. With Aristotle existence is conceived as the knowing and beholding of God, as electatio in God, and therefore, as a theoretic enjoyment. With Duns, who allows to the will precedence over the thinking power, the matter must naturally take another form. The authority of Aristotle alarms him not at all, in his view, only the philosopher, with his temporal life, life of thought, has to do.

How he disposes of the Biblical authority, according to which eternal life consists in knowing God, has been mentioned above. As, through his stronger emphasizing of the will, he separates himself from Aristotle’s dedication of theory, naturally with him the Augustinian willlessness must disappear. Duns is a decided synergist. To be sure, the will is not sufficient for salvation, but through the infusion of the theological virtue of charitas (Stud. qu. 10) but it must be remembered also that Christ only names himself the Door, but the door does not render entrance superfluous. Entrance requires the co-operation of man (Op. Oxon. iii. d. 19). He does not scruple, therefore, to name the appropriation of salvation through faith a merit which will be rewarded. It is no contradiction to say that when God shows himself compassionate only, he, when just, also decides the act of man (Rep. Paris. iv. d. 46).

The admirers of Scotus extol his acuteness and subtlety as unrivalled, and he has always been ac-
corded the chief glory of the Franciscans, as Thomas Aquinas has been of their rivals, the Dominicans. If in his short life he actually wrote all the works that are commonly ascribed to him, his industry at least must have been prodigious. His fame during his lifetime, and long after his death, was not exceeded by that of any of his successors from himself and Aquinas two opposing sects in theology took the names of Scotists and Thomists, and divided the echo old down almost to the last age. The leading tenet of the Scotists was the immaculate conception of the Virgin, and they also differed from the Thomists on the subject of free will.

The philosophy the Scotists are opposed to the Occamists or followers of William Occam, who was himself a pu-
DUNSTER

he was successful there can be no manner of doubt. Though personally out of favor at court in the latter years of his life, his efforts to spread his official influence to the courts in his native land and in foreign lands was not without success. He may have been a successful diplomat in his own right, as well as a successful minister of the Church. He was a man of great influence, and his name is one that will be remembered for centuries to come.

DUPIN

In 1604 he was made cardinal, two years after grand almoner of France, and finally archbishop of Sens. He was also a member of the Congregatio de casuis (q.v.), and suggested the decision of Clement VII on the subject. He died at Paris Sept. 5, 1618. His works were published a few years afterwards (Paris 1620-22, 8 vols. fol.). The first volume contains his Traité sur l'Eucharistie against Du Plessis; and the collection contains a number of poems. See Dupin, Ecclesiastical Writers, cent. xvii; Hoefler, Novae. Biog. Generalis, xx, 288; Wetzer u. Weitz, Kirch.-Lex. iii, 828.

Dupin, Louis, a leading doctor of the Sorbonne, eminent as an ecclesiastical historian, was born at Paris June 17, 1657. In 1684 he became doctor of the Sorbonne, and was afterwards lecturer on moral philosophy, and devoted his life chiefly to the study of ecclesiastical history and literature. He died at Paris June 6, 1719.

Dupin rendered himself conspicuous as an opponent of the bull Unigenitus, and by his moderation gained the friendship of several Protestant divines, such as archbishop Wake. It is especially as the historian of ecclesiastical literature that Dupin has rendered valuable service to theology. He had an uncommon talent for writing, and among the works of literature which he gives not only a history of the writers, but also the substance of what they wrote, in his Bibliothèque, of which the best edition is Nouvelle Bibliothèque des auteurs ecclésiastiques contenant l'histoire de la lit., le catalogue, la critique et la chronologie de leurs ouvrages, etc., Paris, 1749, 8vo; repr. in Paris, 19 vols., 4to; translated into English under the title A New History of Ecclesiastical Writers, etc., including the 17th century (Lond. 1689-1707, 17 vols. fol.), bound in 7). There is a Dublin edition without the 17th century (1729-24, 5 vols. fol.). No theological library is complete without Dupin, although many of his statements must be subjected to the judgments of modern research that has thrown up upon Church history. The freedom and general impartiality of Dupin's views brought upon him attacks from the Benedictine monks and from Bossuet, with whom he maintained a very successful controversy. Dupin was also brought into trouble by the celebrated Case of Conscience. This Case of Conscience was a paper signed by forty doctors of the Sorbonne in 1702, which allows latitude of opinion with respect to the sentiments of the Jansenists. It occasioned a bitter controversy, and most of those who signed it were censured and punished. Dupin, who had prudently preserved his professorship, but banished to Chastelleraut. At length, by the interest of friends, he was permitted to return: but his professorship was not restored. Clement XI sent formal thanks to Louis XIV for bestowing this chastisement upon Dupin; and in the brief which he addressed to the king on that occasion, characterized him as ‘a man who held very pernicious opinions, and who had been guilty of a criminal opposition to the proper authority of the apostolical see.’ Dupin afterwards met with trouble under the regency on account of the correspondence which he held with Dupin, archbishop of Canterbury, which had for its object the formation of a union between the Church of England and the Church of France. Dupin drew up a Commonitorium, and discussed it in the Thirty-nine Articles. He insisted on the necessity of tradition, on the infallibility of the Church in faith and morals, and contended that the sacrifice of the mass was the divinest and most glorious form in which the sacrifice of the cross. The word transubstantiation he seemed willing to give up if the Roman Catholic doctrine, intended to be expressed by it, were retained. He proposed that communion under both kinds, or under bread alone, should be left to the discretion of the Catholics, and contended that persons in holy orders should retain their state, with such provisions as would place the validity of
The marriage of priests in the countries in which such marriages were allowed, and the recitation of the divine service in the vulgar tongue, were to France in the following year but no difficulty would be found in the ultimate settlement of the doctrine respecting purgatory, indulgences, the veneration of saints, relics, or images. He seems to have thought that the pope can exercise no immediate jurisdiction within the dioceses of bishops, and that the primary invested him with no more than a general conservation of the deposit of the faith, a right to enforce the observance of the sacred canons, and the general maintenance of discipline. He allowed, in general terms, that there was little substantially wrong in the discipline of the Church of England; he deprecated all discussion on the original modes of reformation, and the part he took in the pope's intervention till the basis of the negotiation should be settled" (Hook, Ecclus. Biography, iv, 512 sqq.). 

The correspondence is given in Maclaine's 3d Appendix to his translation of Mosheim, Ecclesiastical History.

Besides his great work on Ecclesiastical Writers, Dupin published two works by Henry, It was Mornay who drew up the majority of the moves when he was not sent himself. When churches had to complain of the non-execution of edicts, it was Mornay who had to draw up the account of their grievances. In short, nothing was done without him." One of his most important acts was his bringing about, in 1592, the reconciliation of Henry III and the king of Navarre. He was rewarded for this service by being appointed governor of Saumur. A short time after, Henry III was assassinated. Mornay then joined the king at Tours, and fought valiantly at Ivry. Henry appointed him one of his councillors, but, as he foresaw that his obligation to become a Romanist, the zeal of Mornay for Protestantism was now troublesome to him. He still used him, however, as his chief agent with the Protestants and with the foreign powers. Mornay thought this a favorable time to renew his attempts at conciliating the different Protestant churches among themselves, and even with the Roman Catholics, by means of reciprocal concessions discussed and accepted in a sort of grand council. Henry IV seemed to approve of this plan, and even advised Mornay to consult with the most learned Protestant ministers. But, while the zealous Protestant was calling even the English theologians to his aid in the common cause, the Jesuit and friend of Henry IV, wrote to the bishop of Chartres "to come on, only without worrying about theology." Mornay saw now, but too late, that he had been duped, and that the ardent resolution would take place regardless of any discussion, yet he did not refuse being the mediator between the king and the envoys of the churches. But he insisted on the edict of Mantes (1598), which gave securities to the Protestants, and prepared the way for the edict of Nantes. Mornay had no part in framing the latter, but he carefully watched over its execution. Notwithstanding the coolness with which Henry IV treated him during the last years of his reign, he seems to have remained the same to the last. He foresaw that persecution would soon rise up against him. Under Louis XII he attempted to soften the strict measures proposed against the Protestants, and was on that account deprived of his governorship in 1622. He died in 1629, at Laforêt-sur-Seine, in Ponth. He wrote: Discours de la Vie et de la Mort (Lausanne, 1586, 8vo); Remonstrance aux Estats de Blois pour la paix (Lyon, 1576, 12mo); Traité de l'Église, ou l'on traite des principales questions qui ont été mises au courant en notre temps (Lond., 1576, 8vo); Tracté de la vié de la religion chrétienne, contre les athes, epicuristes, païens, etc. (Amiens, 1581, 4to; several times reprinted, last edition 1617); Advertissement sur la réception et publication du concile de Trente (Paris, 1583); Déclaration du roi de Navarre sur les calomnies publics contre lui (Orthez, 1583).
DUPPA 918

DURAND

Du'ra (Chal. Dura', ندر, the circle, i.e. q. Hebrew דֹּר, so the Sept. renders, ῥό πάρμος, but v. r. Δήτος; Vulg. Dura), the plain where Nebuchadnezzar set up his golden colossus to be adored (Dan. iii, 1). Interpreters usually compare Dura to a city mentioned by Ammian Marcellinus (xvii, 6), situated near the Tigris (Mannert, v, 462) or another of the same name (Amphi) in Polybius (v, 48, 16) and Ammian Marcellinus (xvii, 3), on the Euphrates, near the mouth of the Chaboras, 7 miles from Carcemiesh; or, finally, one of a similar name (Amphi) in Susiana (Pol. vi, 5, 3). But these quarters were so far too distant from Babylon to have been historically possible, as it is clear from the context that the plain of Dura could be no other than that plain (or some part of it) in which Babylon itself was situated (Herod, i, 175), L. i. Shinar (Gen. xii, 1). Even against the first of these locations, the tract a little below Tekfah, on the left bank of the Tigris (Nim. and Saba, p. 469), where the name Dura is still found, are the following objections: (1) this tract probably never belonged to Babylon; (2) at any rate, it is too far from the capital to be the place where the image was set up, for the plain of Dura was in the province or district of Babylon (22, 23, 24, 25), and therefore in the vicinity of the city; (3) the name Dur, in its modern use, is applicable to Bukkur, 5 miles south of Kirkuk; and (4) the local Arabic name (Dur) means simply the town (cf. the Talmudic expression, Dur, the south-east of Babylon, in the vicinity of the mound of Douvr oder Dur; Dura). He has discovered on this site the pedestal of a colossal statue, and regards the modern name as a corruption of the ancient appellation. The Talmudic notice (Sanh. fol. 92, 2: ד"ר עברא ביבשת) is obscure (Buxtorf, Testament, col. 589). See Laksenach, Oberon, qudrid, v, 28 sq. See BABYLON.

Deresa. See Dura.

Duran, the name of a family originally of Provence, afterwards settlers in Spain, and ultimately in Algiers, which produced several men who are regarded as ornaments to the church of France. Duran, 1291, wrote a Commentary on Job, with an introduction on the principles upon which it should be expounded (Ven. 1590), and Salomon, who died 1467, distinguished himself as a zealous apologist for Judaism. His brother Zemach is the author of a body of epitaphs, Shealoth vateshovoth, on various persons of the Jafo. The Talmudic phrase indicates a metaphysical phrase (Livreau, 1789), and of several other Rabbinical works.—Eshel, Intro. to Hebrew Literature (London, 1856), p. 289.

Durand, David. A French Protestant divine, was born in 1681 at St. Pargoire, in Languedoc. He entered the ministry at Besle in 1708; afterwards went to Holland, and became chaplain of a regiment of refugees. Being taken prisoner, he narrowly escaped death, and was subsequently in equal danger from the Inquisition in Spain. He escaped, however, through the influence of the duke of Berwick, and in 1714 became preacher to the Savoy, in London. In this office he died in London, Jan. 16, 1748. He wrote many works, of which are Sermons, Essais tests (Lond., 1728, 8vo); La Religion des Mahometans, from Reland (La Haye, 1721, 12mo); La Vie de Lucien Vani (Istot, 1717, 12mo).—Haag, La France Prot. vol. iv.

Durand, Francois Jacques, a French Protestant minister, was born at Semalé, near Alençon, in 1727, of a Roman Catholic family. As soon as he had completed his preparatory studies at Paris, Durand applied himself to the study of theology, and returned in 1775 to Lausanne to embrace the Reformed religion. He was confirmed, and soon acquired an enviable reputation as preacher. In 1768 Durand was appointed director of the new seminary at Berne and pastor of the French church at that place. At the same time he continued to instruct in ecclesiastical history, statistics, civil history, and
in Christian morals at Lausanne, where he died, April 1816. Besides a number of miscellaneous works, Durand published _L'Esprit de Savoir, courtois et senti de
tous les esprits (Lausanne, 1767, 2 vols. 12mo)_; _Sermains sur les solemnités chrétiennes_ (Lausanne, 1767, 8 vols. 8vo; Avignon and Paris, 1776)_; _L'Année évangélique, ou sermon pour tous les dimanches ou fêtes de l'année (Lausanne, 1780, 7 vols. 8vo); and with Supplement, Lausanne, 1782, 2 vols. 8vo._ A sketch of his life, with his sermons, is given by Armand Delille, appeared at Valence (1805, 2 vols. 12mo)._—Hoefer, _Novo. Biog. Générale_, xxxi, 428.

**Durand or Duranti (Durandus or Durantus).**

Guillaume, surnamed _Speculator_, was born about A.D. 1230 at Poomisson, in France. Studying at Bo
gonna and Modena, he became a learned ritualist, and a great favorite of popes Clement IV and Gregory X. He was appointed by the latter pope legate to the Council of Lyons in 1274, and bishop of Mende in 1287. He died in Rome Nov. 1, 1296. His principal works are _Speculum iuris_ (Strasbourg, 1475, 4 parts, and many editions later)_; _Rationale dinominum officiorum_ (Mayence, 1450, fol.; Augsburger, 1470, fol.; Rome, 1473, 1477, fol.; Ulm, 1475, 1757, fol.). The first book of the _Rationale_ has been translated, under the title _The Sources of the Church and the Churches and Constitutions_, by J. M. Neale and B. Webb (London, 1845, 12mo).

**Durand, De Saint-Pourçain (Durandus Sancto Portiano),** one of the most eminent of the later scholastic divines, was born at Saint-Pourçain, Auvergne, about 1280. From early years a member of the Dominican order, he was made doctor in 1318. His great abilities were soon manifest. John XXII called him to Rome, and appointed him master of the palace. In 1318 Durand reconsidered the moun
tains, and accepted the bishopric of Puyen-Velay. He became bishop of Meaux in 1296, and died in 1382. He is known among the great scholastics by the distinctive title _Doctor Resolutissimus_. His principal writings are, _In Sententias Lombardi_ _commentarii libri_ (Lugdunum, 1469; Venice, 1586, fol.)_; _De Origine Jurisdictiorum, sive de jurisdictione ecclesiae atque de legibus_ (Paris, 1564, 4to)_; _Statuta synodi diecezis Aquinensis_, in a work of P. Gissey entitled _Discours historiques de la dévotion à N. D. du Puy_ (Lyon, 1620, 8vo).

In philosophy and theology Durand was naturally a Nominalist, and it is believed his influence and his fame are far away from the ground of Aquinas. He was a thorou
gh Nominalist in philosophy. See _Nominalism_. He held theology to be a scientific practice, the object of which is, not the knowledge of God, but the life of faith. He pronounced the scientific knowledge of God to be beyond the reach of the human mind. Our knowledge of God rests on faith, and faith on the au
thority of the Church. Nevertheless, in his _Comment. in Sentent. Lombardi_ (i. dist. 3, qu. 1, cited by Hagen
bach, _History of Doctrines_, § 164), he speaks of a three
dfold way which leads to the knowledge of God: 1. _Via eminence_, which ascends from the excellencies of crea
ture, and reaches the first of the three, i.e. to the highest or perfect God. 2. _Via conciliativa_, which ascends from the phenomena of creation to the first cause. 3. _Via remotionis_, which begins with changeable and depend
et existence, and ends with necessary and absolute existence (esse de se). This is apparently in contra
diction to his fundamental principle; but he clears it up by declaring that it is not the nature of God which is thus demonstrable, but his relation to the external world which can be thus demonstrated. It will be seen that the question of the relativity of knowledge is here involved; and that Sir W. Hamilton and Man
sell, in our days, almost reproduce the theory of Du
rand, though of art exhibited 1590, he became the owner of the piece, and they are "not necessary or sufficient in themselves for the salvation of men, since God has not so neces
sarily connected with these elements the power by which he upholds and redeems men in nature and in grace that he cannot work without them. They are instriments and means of grace, however, since, ac
cording to an appointment of God, every one who re
ceives the sacrament receives also grace (provided he offers no impediment), but not from the sacrament, but from God. He makes use of the illustration that occurs elsewhere of a king who promises to bestow an alms on condition of the receiver bringing a lead
en penny to the ceremony by which the "spiritualia, for it is absurd to suppose that material things can effect such a communication to the spir
ture" (Neander, _History of Dogmas_, Bohn's ed., ii, 618). On _transubstantiation_ he helped to prepare the way for the Lutheran view. Durand remarks: "It ap
pears to be a reflection on the divine power to main
tain that the body of Christ cannot be present at the Supper otherwise than by transubstantiation. The words of the institution also admit the view that the body of Christ was really contained in the sacrament (Corpus Christi realiter continetur esse in elemento). Yet the decision of the Church is contrary, in which we are not allowed to suppose an error." (Neander, i. c.; _see also_ Hagenbach, _Hist. of Doctrines_, § 196)._—Hoeber, _Novo. Biog. Générale_, xxi, 431; _Hersorg, Real-Encyk
klopadé, iii, 895; Tennenmann, _Geschichte der Philoso
toribus. Eccles. iii, 732 sq.; Haureau, _Philosophie Soc
iologique_ (Paris, 1850, 411 sq.); _Schroeder, Kirchen
gegeschichte, xxx, 888; xxxiv, 191 sq._

Durell, David, D.D., was born in the Isle of Jer
sey, and was educated at Oxford, where he was after
wards fellow of Hertford College, and then prin
cipal. In 1738 he took his degree of D.D., and in 1767 was made prebendary of Canterbury. He died in 1775. He published _The Hebrew Text of the parallel</p>
among the greatest works which Christian art has ever produced. Dürer was an enthusiastic adherent of the Reformation, though it is doubtful if he ever fully separated from the Church of Rome. He died April 6, 1528.

Both as an engraver and as a painter Dürer belongs among the greatest artists of all ages. His works reflect the nobility of his character, to which many of his eminent contemporaries, as Melanchton, Camerarius, and Firkheimer, bear testimony. Though a tendency to the fantastic, a peculiarity of old German art, somewhat obstructed the full development of his artistic power, especially in his youth, he surpassed all artists of his age in grandeur of conception. Among the best paintings of Dürer belong the Assumption of the Virgin Mary (1509), which in 1647 was destroyed at the burning of the palace at Munich; the exhibition of the Holy Trinity, together with many saints and angels, 1511, now at Vienna; Adam and Eve, in figures of full size of life (1507), now at Madrid. Engraving he found in its infancy, and carried it to a perfection never since surpassed. Among his best copper-plate engravings belong "St. Jerome in his Cell," "Melencolia," and "The Small Death, and the Devil." The most noted of his wood-cuts are the "Greater" and "Lesser Passion," and the "Life of the Virgin." Dürer also wrote several works in the German language, which had a great influence, and were translated into Latin and several modern languages. One of the first of his birth to receive a monument, Dürer was laid in his native city, Nuremberg, where his memory has always been held in great veneration. The work was completed by the addition of a bronze statue of the artist by Rauch. See Heller, Leben u. Werke A. Dürera (Leips. 2 vols.); Von Eye, Leben u. Werke Albrecht Dürera (Nördlingen, 1608); H. Grimm, Albrecht Dürer (Berlin, 1866); Dürer-Album (Nuremb. 1857); Dürers Kupferstiche, Radungen, Holzschnitte, mit 1 Zeichnungen (Hanover, 1861); Dürers Handschr. u. Zeichnungen, etc., in 16 photograph. u. photolithograph. Nachbildung (Vienna, 1864).

DURHAM. James, a Scotch divine, was born in West Lothian about 1622, and was educated at St. Andrews. He was ordained at thirty, and was a popular preacher, and from 1650 professor of divinity in Glasgow. He died June 25, 1658. He published An Exposition of the Book of Job (Glasgow, 1649, 12mo):—An Exposition of the Song of Solomon (London, 1669, 4to):—A Commentary on the Book of Revelation (Amsterdam, 1669, 4to):—A Commentary on the 53rd Chapter of Isaiah (2 vols. 8vo):—Exposition of the Commandments (London, 1675, 4to):—Christ Crucified (7th ed., Glasgow, 1769, 8vo):—Sermons on the Riches of Christ (Berwick, 1794, 12mo):—Howie, Scotia Worths, p. 383.

Durnians. See DuRN.

Dury (Dureus), John, an eminent Protestant divine, was born in 1565 or 1566 at Edinburg. His father had been a monk, but, becoming a Protestant, he held a high place in the city, and became minister to the English and Scotch at Leyden. He and his daughter Dury were educated for the ministry. He visited Oxford in 1624 for the sake of the libraries. In 1628 he became pastor to the English factory at Elbing, Prussia, where he became acquainted with Dr. Godemann, one of the councilors of Gustavus Adolphus. Godemann suggested to Dury, that he might consider looking about for a reconciliation between the great parties into which Christendom was divided would be the greatest of peace-makers. From that time forward the greater part of his life was devoted to this object. He was invited to England in 1640 through the influence of Sir Thomas Tresham, and was on the court of Gustavus Adolphus. He was well received, and his first plans were approved by archbishop Abbot, by Laud (then bishop of London), bishop Bedell, and bishop Hall. In 1651 he laid his plans before Gustavus Adolphus, who was greatly interested in them, and gave him letters patent recommending him to all Protestant princes. From the Lutherans he turned to the Calvinists, and visited Hannan, the Palatinate, and other places. When Gustavus fell in 1632, the Protestant (and especially the Lutheran) ascendency fell with him. But Dury's cause and plans gained friends throughout Europe. In 1633 he returned to England, and at the suggestion of Laud was ordained priest by bishop Inglefield. On a visitation of residence in 1634, armed with letters from Laud and other English prelates, he attended the meeting of Protestant States in Frankfurt (1638). His life was then cerebro an in- cessant round of journeyings, colloquies, letters, and publications; all futile, so far as his great aim was concerned. He died at Cassell Sept. 26, 1660.

A summary account of them is given in the Christian Remembrancer, January, 1855, art. i, from which we take the following account of the chief sources of information as to Dury:—"A brief Relation of that which hath lately been attempted to procure ecclesiastical Peace among Protestantism, published by Samuel Hartlib (Lond. 1651) in Dury's former and latter Negotiations for the procuring of true Gospel Peace, with Christian Moderation and charitable Unity among the Protestant Churches and Academies (London, printed for the author in 1657). These two are identical down to page 32 of the former, which is Dury's copy of the latter. The relation is three pages, containing a sort of appendix, which concludes that portion of Dury's labors. 3. The unchangea and single-hearted Peace-maker (Lond. 1650). 4. Consolationum Inrepressae epistolae (Amst. 1661).—Of biographies, the best are:—I. G. Ar- noldus, Historia Johni Dureus, a university thesis, delivered under the presidency of J. C. Kohler, and usually quoted as that of Cologer (Wittenberg, 1716). 2. C. J. Benzelius, Comm. Hist. Thol. de Jo. Durero, maxime de actis ejus Suecia, cum prof. L. M. Moskreni (Helmst. 1744). The proceedings of Durnaus at Mar- burg are said to be related by Schenk in his Vite Philosophorum Theologorum Marburgensium, p. 207, but this book the writer has not been able to see. Jablonski has recorded his attempts in Prussia and Poland in his Historia Consensum Sendomirensium. His journeys in the Palatinate, Switzerland, and Denmark are related in Seelens Deliciae Epistolarum; in the Museum Helveticum, vo. 1; and in a work by the scissors of Dr. Ewings. His Latin writings include Hu- ponomasticum de Studio Piscis Ecclesiae (Amst. 1638, 4to):—Consolatorio super Negocio Piscis Ecclesiae. Promovendo (Lond. 1636, 4to):—Caput de Peace Ec- kologico (Lond. 1637, 4to):—Inrepressae Tractationes Pro- dromas (Amst. 1692, 8vo).—Dury unites his scheme at length in the Dedication of his Inrepressae Tractationes. In every national church there was to be a Collegium Pacisatori- torum, constituted of some theologians and persons of high position; these colleges were to confer together upon the condition and means of union, and come into open conferences under proper directions. The conclusions were these:—1. Negotium per dissertationem scholasticam nunquam esse agitandum. 2. Ad prsimum pietas omnia concordia coniurata et mediata esse referenda. 3. Per concessa in libros symbolicos semper esse processum. 4. Omnia esse subordinans fundamentalibus et irrefragabilibus Christianiorum dogmatibus, et ipsi Pontificis negare non possint. 5. De Syncretis- mo; i.e. de nova quadam religionem mixtum, non esse deliberandum, sed de fundamentalis concordia. 6. Nun- quam agendum de factione aliqua politica contra Ponto- ficis formanda, sed de Pontificis innocentia manifestatione, ut patet, nec esse criminis. 6. Nullo ergo, a Pontificiis esse obligandum. 7. Postquam fundamentali- bus inter partes consensus esse appareret, in reliquis tolerantiae innoxiae locum esse dandum. 8. Prophe-
DUST

and libertatem secundum a. Scripturis regulatam et que personalia non tractet concedendam esse. 9. Injurias, Kretzer, 2 Chron. xxvi, 11; De Regimine Hereditatis, 1777, 8vo; De Excommunicatione, non impune admitteendam, ut ullo so novis injuriis lassacent. 10. Regimen Ecclesiarem utrique parti liberum esse relinquendum, ut illud, prout ex usu suo utilissimum judicat Ecclesia quielisit, constitutum. The means recommended were, the setting aside of the prejudices of the parties against one another, the publication of books and pamphlets, and the union of correspondence, not between the parties." Gieseler, Church History (ed. by Smith, iv § 5). See also (besides the works cited in the course of this article) Moseheim, Church History (New York, 1864, 8 vols. 8vo, ii, 860; Bayle, Dictionary, s. v.; Reid, Westminster Divine: Arnold, Kirchen- und Ketzeralter, xvi, 5, § 20; Dowling, Life of Cudworth (London, 1864, 1820).

Dust (usually "Dust," spelled; but "Dust," "Dust," "Dust," "Dust;

verence, in Exod. x, 9; Isa. v, 24; Jer. viii, 5; Ezek. xxvi, 10; Nah. i, 8: "powder," Deut. xxviii, 24; and "Dust," "Dust," "Dust," or impassable dust, Isa. xi, 15: "Dust," "Dust," to triturate, 2 Chron. xxvii, 4; Gr. sivopó; but "Dust," dirt, in Mark vi, 11; Rev. xviii, 19). In the immediate vicinity of Judea there are vast plains or deserts of fine sand, which, when agitated by a violent wind, makes most terrific and desolating storms. Eastern travellers describe them particularly, sometimes more than stones and rocks at sea. This affords us a striking illustration of the nature and horrors of the plague, mentioned in Exod. xvi, 16, 17, when the extremely fine and penetrating dust of the land of Egypt was converted into gnats. Among the various fearful punishments denounced in the event of their forsaking Jehovah, the Hebrews are threatened that the rain of their land shall become "powder and dust" (Deut. xxviii, 24).

See Storm. The Hebrews, to cast dust or ashes upon the head was a sign of mourning (Josh. vii, 6), and sitting in the dust was a sign of extreme affliction (Isa. xlvii, 1; Lam. iii, 29). See Grief. The term "dust" is often used figuratively, sometimes to denote the grave (Job vii, 21) or death itself (Gen. iii, 19; Psa. xxii, 15), sometimes to express a numerous people (Num. xxiii, 10), and sometimes a low or mean condition (1 Sam. ii, 8; Nah. iii, 18).

See Wemys, Symbol. Dict. s. v. To shake or wipe off the dust of a place from one's foot, marks the beginning of all intercourse with it for the future (Matt. x, 14; Acts xiii, 51). To "lick the dust" signifies the most absolute submission (Psa. lxix, 9). In almost every part of Asia those who demand justice against a criminal throw dust upon him. Thus Shimei cast dust at David (2 Sam. xvi, 10), signifying by that action that David ought to be put to death. This view is confirmed by the conduct of the Jews to Paul; when they seized him in the Temple they cried out, "Away with such a fellow from the earth, for it is not fit that he should live; and as they cried out, and cast off their clothes, and threw dust into the air, the chief captain commanded him to be brought into the castle." (Acts xxii, 22).

Dutch Reformed Church. See Reformed Church.

Dutens, Louis, was born at Tours, France, January 16, 1750. When he was about eighteen his sister was put into a convent by order of the archbishop of Tours. This violence so irritated the young man that he left his country and settled in England, where he entered the ministry of the Established Church, and became rector of Eldon, in Northumberland. He died in London, March 28, 1812. Dutens was a man of very stationary, and think them members of the "Royal Socit", and had the title of historiographer to the king. Besides writing numerous works in science and literature, he edited the works of Leibnitz, Opera Omnia nunc primum collecta, etc. (Genova, 1789, 6 vols. 4to); La Toc-

sia, 1759 (against the infidels of the 18th century; reprinted under the title, Appeal to Good Sense (Lond. 1785, 8vo); De l'origine des découvertes attribuées aux modernes (Paris, 1768, 8vo; 4th edition, 1812, 8vo); Recherches sur l'origine des découvertes attribuées aux modernes (London, 1768, 8vo).—Hofer, Nouv. Biog. Générale, iv, 496.

Dutoit, Jean Philippe, also called Dutoit-Membrius, was born at Moudon (Switzerland) in 1721. He devoted himself to the study of ancient and early age to teaching. He entered the academy in Lausanne, and in 1747 became a candidate for the ministry, but he never took a pastoral charge. In 1765 he had a severe illness, during which he underwent a thorough religious change. He was accustomed to preach extempore, and although his sermons were generally long, he always attracted large audiences. It was not unusual to see, at the close of his discourses, men who had lived in unity with each other be reconciled. In 1764, having accepted the appointment of missionary preacher and catechist, he resigned it after fourteen days. In 1769 impaired health obliged him to desist from preaching, and he continued to be active and to speak affectionately to clergymen. He now devoted himself with all his energy to the study of the Church fathers, especially the Mystics. He himself became a strong representative of Mysticism in the French Reformed Church. His opposition to Voltaire, as well as his seclusion, made him many enemies. He died on the 6th of January, 1792, while on a bed of sickness, he was suddenly visited by the police, and, by order of the authorities, his papers and manuscripts were seized and forwarded to Bern; but, as his books were found to be of a very innocent character, nothing came of the affair. Upon Dutoit these proceedings made a lasting impression, much greater than could have been supposed of so plious a man. He never recovered from the shock, and died surrounded by a circle of friends and admirers, January 21, 1793.

Dutoit is highly spoken of by the historians Monnali and Oliver, and of late attention has been called to his writings by a memoir of his life and works by Jules Chavannes, O.C.S., Revue encyclopédique, 1861, p. 289, 689, 694. The most important works of Dutoit are Philosophie divine, etc., par Kelepben Nathan, 8 vols. 1783; Philosophie chrétienne, 4 vols. 1800; and an edition of the Letters of Madame Guyon, with additional reflections. —Hertzog, Real-Encyclopädie, 1421 sq.

Dutton, Aaron, a Congregational minister, was born at Watertown, Conn., May 21, 1780. He graduated at Yale College in 1808, entered the ministry 1809, and was ordained pastor of the First Church, Guilford, Dec. 10, 1806. He resigned June 8, 1842, and a year after was sent as missionary to Iowa by the Amer. Home Miss. Society. He accepted a call in 1839 from the church in Burlington, and returned to prepare for his removal, but was taken ill, and remained in New Haven until his death, June, 1849. He was not only a successful minister, but an efficient educator. Many of his pupils were distinguished in college, and afterwards became eminent in the learned professions. His publications consist of some occasional discourses. —Sprague, Amasa, ii, 489.

Dutton, Matthew Rice, a Congregational minister, was born at Watertown, Conn., June 30, 1783. He graduated at Yale in 1808. In 1810 he was made tutor at Yale; and in 1814 became pastor in Stratford, Conn., where he remained until 1821, when he was again called to Yale to be professor of Metaphysics and Natural Philosophy. He entered on his duties with great vigor; but his health soon failed, and he died in July, 1825. —Sprague, Amasa, ii, 592.

Dutton, Samuel W. B., a Congregational minister, son of the Rev. Aaron Dutton (q. v.), was born at Guilford, Conn., March 14, 1814, and graduated at
DUTY

Yale College in 1833 with distinguished honor. After three years of teaching, first at Baltimore, and then as rector of the Hopkins Grammar School at New Haven, he became one of the tutors at Yale College, prosecuting at the same time his studies in the theological department of the University. He was ordained pastor of the North Church in New Haven, in 1836. He had been widely known by his valuable contributions to the *New Englander*, and by other occasional publications. His *Concio ad clericum*, preached and published in 1855, on 'The relation of the atonement to holiness' (the subject being assigned to him by the General Association of Connecticut), was a very able and theologically sound, in highly commended by critics of various schools and denominations. The degree of D.D. was conferred upon him by Brown University in 1856. Dr. Dutton was a faithful and successful pastor, and a distinguished preacher. For the *New Englander* he wrote about two articles a year from its commencement to the year of his death. He died pastor of the North Church, Jan. 27, 1886.—The Independent, Jan. 1886; Congregational Quarterly, April, 1886.

Duty (Duty, dəˈtər, lit. a word or matter; Gr. δόσις, to owe). For "duty of marriage" (τύγχανον, omast, dwelling together, Exod. xxi. 10; used in the Talmud for consensual right; L. q. η δόσιμος ειναι, "due benevolence," 1 Cor. vii, 3), see COMMUNION.

For "the duty of a husband's brother" (οδος, γυναικα, Dent. 25, 6, 7, to marry a deceased brother's childless wife, Gen. xxviii, 9), see LEVITICUS LAW. See Enchir.

Duveall, Charles Maria, D.D., a converted Jew of the 17th century, of the facts of whose life little is known. He was born at Metz, Lorraine. Carefully educated, his studies led him to abandon Judaism; and, as the Roman Church was the first Christian society, with which he was brought into contact, he entered its communion and ministry, and received the title of D.D. While a Romanist he published a *Commentary on Matthew and Luke*. But his further studies led him to Protestant views, and he passed from France into England, where he was well received by Stillingfleet, Tillotson, and other eminent men of the Church of England, and was admitted to orders. He died about 1700. Among his writings are *Explication Literaria Casuicorum* (London, 1678, 8vo);—*Litteral Exposition of the Minor Prophets* (London, 1680). Soon after this publication he became a Baptist, and wrote in *A New Light on the Holy Apostles* which was translated and published in the title *A literal Exposition of the Acts of the Holy Apostles* (London, 1685, 8vo; new ed., edited by F. A. Cox for the Hansard Knolleys Society [London, 1851, 8vo]). In this commentary Duveall vindicates the principles and usages of the Baptists.—Duveall, *Commentary on Acts, Historical Exposition*.

Duverger or Duverger, Jean de Hauranne, abbot of St. Cyran, was born at Bayonne, France, in 1581. He studied theology at Louvain. Here he made the acquaintance of Jansenius, with whom he went to Bayonne to continue their studies together from 1611 to 1616. In 1616 he began his labors in his native country. In 1617 he wrote in defense of his friend the bishop of Poitiers, who had been blamed for having the troops sent against the Protestants. After going to Paris, where he carried on an extensive correspondence with Jansenius, who had returned to Louvain, and eventually his book was republished, the study of the fathers, especially of St. Augustine, he was called to England by Henrietta of France, wife of Charles I. He then conceived the idea of organizing the Roman Catholic Church of England on the plan of the Gallican Church. This brought him into conflict with the Jesuits, against whom he wrote (1617), under the assumed name of Petrus Aurelius, a book which the Assembly Generale of the French clergy approved and ordered to be printed (*Petrus Aurelius theolog. operi, iussu et imperio cleric gallicanae denuo in locam editi, Parisiis, 1641; new edit. 1646*). Duverger and Jansenius soon after decided to form a congregation of their own. They attempted to win over the fathers of the Oratory. In June, 1636, they agreed in that direction, when, in 1638, Duverger was appointed spiritual director of the abbey of Port Royal (q. v.). Here the effect of his principles was apparent in the pure morals of his charge, which contrasted strongly with the general laxity of the time. He soon, however, incurred the disfavor of Richelieu, and he had him arrested and transferred to Vincennes, May 14, 1638. He was released in February, 1643, after Richelieu's death. He continued to labor as a confessor and writer until his death, Oct. 11, 1648. Parts of his body were preserved in the abbey of Port Royal as sacred relics. Besides the above-meant works, he wrote also *Somme des Isidors* (1626, against the Jansen Garaisse, who had accused the Jansenists of atheism, and other occasional pamphlets. See Sainte Beuve, *Histoire de Port Royal; Herzog, Recueil Encyclop., iii, 577; Hoefer, Nouv. Biog. Generale, xv, 642*).

Dwarf (dər, duk, beston small, as in Lev. xvi, 29), an incorrect rendering (Lev. xxi, 20; Sept. θηρός, Vulg. *opus* for a beast or ensnared person, i.e. by disease (as in Gen. iii, 24);—Lev. xvi, 20). See BIKESMISH.

Dweller (expressed by various Heb. and Gr. words often differently rendered, e.g. *בְּנֵי, בְּנֵי, בְּנֵי, בְּנֵי, בְּנֵי, בְּנֵי, בְּנֵי; קָנָם, עֵיֶב, הָיוֹ, עֶפֶרְו*). It has been thought, both from Scripture and from profane authors, that the first abodes of men were caves and clefts in the rocks; these abode to a remarkable degree in those countries which we know to have been the earliest pastoral, and still serve the purposes of their inhabitants. See CAVES. In uncultivated ages they abide generally in tents, as the Arabs of the desert do to this day. The invention of this is ascribed to Jabal, the son of Lamesch, who is termed "the father of such as dwell in tents" (Gen. iv, 20); though, from comparing this verse with the 17th, we may be led to suppose that men lived in houses of some kind before they lived in tents. See Tent. The art of multiplying stories in a building is very ancient, as we may gather from the construction of Noah's ark and the tower of Babel. The houses in Babylon, according to Herodotus, were three or four stories high, and those in the Lebanon, which were built of unhewn stones. They appear to have been low in Palestine in the time of Joshua; an upper story, although it may have existed, is not mentioned till a more recent age. Buckingham states that the houses at Mousul are mostly constructed of small unhewn stones, cemented by mortar, and plastered over with mud, though some are built of burnt and unburnt bricks." Our Lord alludes to houses built of mud at the close of his sermon on the mount (Matt. vii, 26, 27); which were ill calculated to resist the effects of the impetuous torrents that descended from the mountains of Palestine. In India, nothing is more common than for thieves to dig or break through these mud walls with a large spade, unsuspecting inhabitants are asleep, so as to plunder them. To similar depredations our Saviour appears to allude when he exhorts his disciples not to lay up their treasure where thieves break through and steal (Matt. vi. 19, 20). Job also seems to refer to the same practice (Job xiv, 15). The most of these walls are sometimes concealed themselves, which is alluded to by the prophet Amos (v. 19). It appears from Exod. v, 7, that in Egypt straw anciently entered into the composition of bricks; they were a mixture of clay, mud, and straw, slightly blended and kneaded together, and afterwards baked in the sun. Philo, in his *Life of Moses*, says that they used straw to bind their
bricks. In the remains of Egyptian edifices, the straw still preserves its original color, and is a clear proof that they were never burnt in stacks or kilns. Dr. F. Richardson found near the ruins of Tentyra huts built of sun-dried brick made of straw and clay. See DWELLING.

God, it is said, "dwell in light," in respect to his independent possession of his own glorious attributes (1 Tim. vi. 16; 1 John i. 7). He dwells in heaven in respect to his more immediate presence there (1sa. xxxii, 1). He dwells in his Church in the continued bestowal of his ordinances, and of his gracious supporting and comforting influences (Psa. ix. 11; 1 John iv. 12). Christ dwelt among men in his state of humiliation on earth (John i. 14). He dwells in our hearts by faith, he is united to us as our head; his righteousness is imputed to us, and applied to us as our conscience; his spirit and grace are fixed in our hearts; he loves and delights in us (Ephes. iii. 17-19). The Holy Spirit dwells in us, and sheds abroad his gracious influence (Rom. viii. 8; and I Cor. iii. 16; 2 Tim. i. 14). The Word of God dwells in us richly, when it is carefully studied, firmly believed, and diligently practised (Psa. cxxix, 11; Col. iii. 16). Wickedness, vengeance, or judgment is said to dwell in or upon a person or land when it long continues there (Job xi. 14; xviii. 15; Isa. xxxii, 16).

Dwelling deep (גָּשֶׁשׁ, ἀγκαθλίβικ, ἀγκαθλίβικ, ἀγκαθλίβικ, etc. ἀκακάκκακα, etc.), εὐφυοφιστήρ, etc.). The dwelling-houses of Palestine (see generally Harmer, i. 152 sq.; Faber, Arch. i. 186 sq.; on Egyptian architecture, Kellineni, Monum. cim. ii. 378 sq.) were usually (Harmer, i. 165) built of burnt or merely dried bricks, ὅσιοντακασάτσαν (Niebuhr, Trav. ii. 287; Focke, Est. ii. 178; Tavernier, Trav. i. 167, 267; Robertson, Res. ii. 651-657; iii. 514, 568), and therefore very perishable (Matt. vii. 20; comp. Ezek. xiii. 5, 7; xiii. 11 sq.; Tavernier, i. 287; Welsted, i. 280); but frequently of stone (Lev. xiv. 40, 42; comp. Robertson's Res. iii. 816, 420, 496, 720), and palaces of squared stone (1 Kings vii. 9; Isa. ix. 9; Josephus, Ant. viii. 5, 2; compare Robinson, i. 854), or even of marble (ἀκακάκκακα, ἀκακάκκακα, comp. Chron. xxix. 2; Josephus, Ant. xv. 11, 3; θρακικόν, v. 4, 4), of different building-stone, see the Misiria, Buba beths, i, 1; the laying the stones of part of a temple was an occasion of ceremony and festival, Zecc. iv. 7; compare Ezra iii. 10; Job xxxviii. 8; these were held together by a cement (μαλακή, θερμοκρασί, v. 10; compare Rosenmueller in loc.) of lime (ἡ, Isa. xxviii. 9) or plaster of Paris (γυαπαζίς, ἀκακάκκακα, see Rosenmueller in loc.) 12; compare Deut. xxvii. 4; Theop. Lapid. 68 sq.), perhaps also bitumen (ἀκακάκκακα, compare Gen. ix. 3; Faber, i. 888 sq.).

The exterior (and probably also the interior over the plaster) was usually whitewashed (ἐγκεκαταιοφιστήρ, ἀγκαθλίβικ, see Lev. xiv. 41 sq.; Ezek. xiii. 10 sq.; Dan. v. 5; Matt. xxvii. 27; Sirach, xxii. 17), bright wall-colors being used for royal residences (Jer. xxi. 14). The beams (2 Chron. xxviii. 11; on ἀγκαθλίβικ, see Gen. 3. 7. 11; compare Theon. p. 706, and Delitzsch in loc.) were of wyrmwood (1 Kings ix. 9, sometimes of olive-wood, 1 Kings viii. 2 sq.; 1 Kings ix. 9; Jer. xxii. 14). Elegant mansions were adorned externally with columns (of marble, Cant. v. 10; 1 Kings vii. 15 sq.; 2 Kings xx. 13; Faber, Arch. i. 414 sq.), and often whole porticoes (ἐγκεκαταιοφιστήρ, ἀγκαθλίβικ, 1 Kings vii. 6; comp. Josephus, War, iv. 4). See Temple. The houses of the gentry (Niebuhr, Trav. ii. 153; Shaw, Trav. p. 185 sq.) were of several stories (1 Kings xx. 2 sq.; compare Acts xix. 9; see Korte, Suppl. p. 177), generally built in a quadrangle (comp. Kämpfer, Aem. p. 194; Buckland, Trav. iii. 120), and enclosing (Luke v. 19) a spacious court-yard ( Ipsum, 2 Sam. xvii. 18; Neh. vii. 18; comp. Esth. i. 5, τρίτον, τρίτον; 1 Kings vii. 56 sq.; see Harmer, i. 177), which, surrounded by colonnades and galleries (Shaw, p. 850), paved (Harmer, i. 175), and containing fountains (2 Sam. vii. 18; comp. Acts xii. 4, 11; Harmer, i. 175), baths (2 Sam. xii. 2), and trees (Harmer, i. 175), formed the guest-chamber or drawing-room for the reception of visitors (Shaw, Trav. p. 183; Faber, i. 401; Harmer, i. 174; comp. Esth. i. 5 sq.), being often screened from the sun's rays by an awning (Rosenmueller, Marg. iii. 297). The bath, covered on the top with tiles, earth, or stone, and surrounded by a low parapet, was used sometimes for household or religious purposes, at others as a place of meeting or recreation. See Roof. In connection with it (2 Kings xxii. 22) was an upper room (ἴθυμφωρ, ἡμέρα), which was used (comp. Niebuhr, Trav. i. 389, 400; Shaw, p. 188 sq.) as a private chamber (2 Sam. xvii. 30; Dan. vi. 11; Job iii. 27; also as a spare bedroom (2 Kings xxii. 12; Tost i. 12; Acts i. 13; xxviii. 8), a sleeping apartment especially for guests (2 Kings iv. 10), and as a sick-chamber (1 Kings xvii. 19; Joseph. Ant. xviii. 8, 2), or room for laying out a corpse (Acts ix. 37, 39), but in summer resorted for fresh air (Judg. iii. 20); and was often furnished with two modes of exit, one leading within the house, the other by a staircase directly to the street. Larger residences had an additional front court (ἵθυμφωρ, πρωσαλογία, πρωσαλογία, πρωσαλογία, etc.); (see Judg. xxxii. 2; Mark xiv. 88; Luke xvi. 20; John xviii. 16; Acts x. 17, etc.), which served as an anteroom (so the Rabbins understand ἀκακάκκακα, Judg. iii. 29);
A modern Persian Mansion.

see Faber, p. 440), and from which, by means of stairs (יהבנ, 2 Chron. ix, 11; a winding staircase, בְּבֵל, 1 Kings vi, 8), often finished with costly wood (2 Chron. ix, 11), persons passed to the roof or upper story. A door led from the fore-cour to the inner court, and from the latter was the entrance to the rooms on the ground floor of the house proper. These last were variously decorated with wainscotting (1 Kings vii, 7; Jer. xxii, 14; Hag. i, 4), ivory (1 Kings xxii, 39; Am. iii, 15; compare Psal. xlv, 9; Homer, Odys. iv, 72 sq.; Horace, Od. ii, 18, 1 sq.; Pliny, xxxvi, 5; Harmer, i, 168 sq.; ii, 171 sq.; Faber, p. 399 sq; also with precious metals inlaid or plated, Tibull. iii, 8, 16; Horace, Od. ii, 18, 1 sq.; Cicero, Parod. vi, 3; comp. 1 Cor. iii, 12), and carving (Josephus, Antiq. viii, 5, 2; and compare the splendor of Oriental houses was washed rather upon the interior than the exterior (Pococke, East, i, 49); the floor was laid sometimes with a coating of gyphrum, at others with tessellated blocks of variegated marble (Tibull. iii, 3, 16; Cicero, Parod. vi, 3) or other kinds of stone (Harmer, i, 172 sq.; compare Esther i, 6). The doors (Deut. vi, 9), seldom high in private houses (Prov. xviii, 19), sometimes of stone (Burckhardt, i, 122), swung (comp. Shaw, Trav. p. 185) on morticed pivots (תַּוָּד, Prov. xxvi, 14; in sockets, יַּמַּש, 1 Kings xii, 50; comp. curdo funaria. Vitruv. ix, 6), and were commonly fastened with wooden bolts (שַׁלֹּשׁ, יַּמַּש), which were opened (Judg. iii, 29; Isa. xxiii, 22; comp. Harmer, i, 188) by means of a key (ותְּשָׁנ), but only from the inside (Cant. v, 5; Luke xii, 7; comp. Faber, p. 427). In the latter class of houses there was a door-keeper (Joseph. Antiq. xvii, 5, 2) or female porter (John xviii, 16 sq.; Acts xii, 13; comp. Plutarch, C. R. i, 1, 76; Sept. 2 Sam. iv, 6), who, in case any one knocked outside (Luke xii, 36; xiii, 22; Acts xii, 13; compare Matt. vii, 1; Rev. iii, 20; Thilo, Apocryph. p. 218; see Becker, Charidias, i, 280), and gave their name (Acts xii, 14; Rev. iii, 20; comp. Plutarch, Gen. Soc. p. 81; Lucian, De Acta, p. 29; Apul. Apis, i, p. 19 Blp., opened the door to them (Acts, xii, 13; comp. Athen. xiv, 614). (See Sturk, Asia, comm. p. 249; Sagittar. De jenais vett. Jen. 1094, ch. 16; also Elsner, Observ. i, 411 sq., in Graevii Theaur. vi.) Princes, however, had guards at the palace gates (1 Kings xiv, 27). The windows (תַּוָּד), on account of the street dust, generally face the court-yard (Schubert, iii, 291), although anciently this rule does not appear to have so extensively prevailed (Judg. v, 28; Prov. vii, 6); they were closed by a lattice (Judg. v, 28). The most interior, or lack rooms of all, were devoted to the special occupancy of the female members of the household, as is still universally the case in the East, under the name "harem," and no male dares intrude within their precincts (Chardin, vi, 6 sq.; Hartmann, Hebr. ii, 809 sq.; Hoffmann in the Hist. Encyclop. ii, 1, p. 386 sq.). The more distinguished Hebrews early had separate summer and winter residences (יִתְנָה יִתְנָה וּיִתְנָה, Amos iii, 15; Jer. xxxvi, 22; comp. Judg. iii, 20; see Harmer, i, 290; Prosp. Alp. Med. Egypt. i, 6; Niebuhr, Trav. ii, 304). The latter were warmed (of which they had the more need, as glass windows are unknown in the East) by means of a fire-pot (תָּבֹז, Jer. xxxvi, 82), which is merely a vessel of burnt clay (Niebuhr, Beitr. p. 56) placed in a round hole in the middle of the room, over which, when the fire is burnt down, the inmates place a four-cornered frame, and next a carpet over this, and then gather around to enjoy the warmth (Tavernier, i, 276; Niebuhr, Trav. i, 154; ii, 394). The furniture of the rooms (2 Kings iv, 10) consisted of a sofa or couch (תָּבֹז, compare Ezek. xxviii, 41; עַלְבִּים, Amos vi, 4; compare Josephus, Antiq. xv, 9, 8), which luxury was often adorned gorgeously (Amos vi, 4; Cant. vii, 61), and furnished with pillows (Ezek. xiii, 10); and besides this, only chairs (ץַּפֹּל) a table (תָּבֹז), and lanterns or lamp-stands (2 Kings iv, 10). See all the above parts and articles in their alphabetical order. Compare Horæx.

The house-imagery described in Lev. xiv, 33-35 was
Dwight, a minister of the Methodist Episcopal Church, was born in Thompson, Conn., Aug. 28, 1810, was converted in 1828, studied in Dudley Academy, Mass., in the Wesleyan Academy at Willbram, and graduated in the Wesleyan University at Middletown, in 1833. He was then taught in the academies of the South and in Louisiana College, and was some time agent for Macon Female College, Ga., until 1841, when he removed to Norfolk, O., and was principal of the seminary there, and of the Baldwin Institute at Berea till his death in 1847. Mr. Dwight was a man of strong mind and generous feeling, a thorough classical and general scholar, and an eminently successful teacher. As a preacher he was dignified, forcible, and convincing.—Minutes of Conferences, iv. 150.

Dwight, Louis, a Congregational minister, was born at Stockbridge, Mass., March 25, 1738, and graduated at Yale College in 1813. He studied theology at Andover, but, fearing that his feeble health would unfit him for the pastorate, he accepted in 1819 an agent's office in the American Society for the Propagation of the Gospel and became agent of the American Education Society. In 1824, his health failing seriously, he undertook a long journey on horseback, and combined with this pursuit of health a mission of mercy in supplying Bibles to prisoners in the various jails. He visited for this purpose the prisons of New York, Philadelphia, Baltimore, Washington, and as far south as South Carolina. On his return to Boston in 1825, his reports of his mission gave rise to the American Prison Discipline Society, of which he was the first secretary, in which service he remained for thirty years. For years he preached the Gospel to the insane poor at South Boston. He died July 12, 1854; and the epitaph on his tomb sums up his labors in the phrases "a benefactor of man; a friend to the prisoner; a reformer of prisoners; a preacher of the Gospel."—Sprague, Am. ii. 669.

Dwight, Sereno Edwards, D.D., an eminent Congregational minister, was born at Greenfield, Conn., May 18, 1736. He graduated at Yale College in 1808, and in 1806 was chosen tutor, in which post he continued until 1829, when, having completed his law studies, he entered upon practice at the bar. He entered the ministry in October, 1816, and was elected chaplain of the United States Senate. On Sept. 3, 1817, he was installed pastor of Park-street Church, Boston, where he remained until his resignation, April 10, 1825. In 1830 he was elected to the presidency of Hamilton College, and entered upon the office in August, and resigned in 1835. In 1838 he moved to New York. He died in Philadelphia, Nov. 30, 1850. Dr. Dwight published Memoirs of David Brainerd (1822):—An Address on the Greek Revolution (1824):—The Death of Christ; the Substance of several Sermons Delivered at Park-street Church (1824):—The Life of President Edwards, accompanying a new edition of Edwards's works (1830):—The Hebrew Wife (1836); and a few occasional sermons. His discourses were published in a volume with memoir in 1851 by W. T. Dwight.—Sprague, Annuals, ii. 669.

Dwight, Timothy, D.D., LL.D., grandson of Jonathan Edwards the elder, was born at Northampton, Mass., May 14, 1757, and was graduated at Yale College at the very early age of 17. The two years after his graduation he was elected a tutor in his college, and held the office during six years. Near the end of his tutelage he was licensed to preach, and soon joined the army of the Revolution as a chaplain to General Parson's brigade. After a year spent in this service, he was called home by the news of his father's death in 1778, to take care of his mother and the family, being the eldest child of thirteen. Relinquishing his part of the family property, he taught school and preached for his own family's support. So highly was he thought of by his fellow-citizens that they called him into public life, solicited him to give himself permanently to politics, and promised to secure for him a place in the United States Congress. But he preferred to preach the Gospel, and, after several flattering calls which he declined, accepted one from the parish of Greenfield, in Connecticut, to become their pastor. Here he spent twelve years, from November, 1783, onward. As his salary was inadequate to the expenses which his family would have required of him if he had continued in the ministry, he returned to Boston, where, in 1786, he established an academy, the oversight of which he took upon himself, which was distinguished for the advanced and thorough training of its scholars, and in which upwards of a thousand young persons of both sexes came under his instruction. His reputation as an instructor and as a preacher led the corporation of Yale College in 1795 to elect him to the presidency of that institution, which had lately become vacant by the death of President Stiles.

It was during his residence at Greenfield that his two poems, one on the "Conquest of Canada" by Joshua, an epic in rhyme, the other entitled "Greenfield Hill," and descriptive of the scenery of the neighboring country, were given to the world. These poetical works, which are not without glow and fire, are now forgotten; but some of the versions of the Psalms which he inserted in a revision of Dr. Watts's Psalms, with hymns annexed, published by direction of the General Association of the state in 1800, have stood their ground, and probably will never go out of use; we refer especially to those whose first lines are, "I love thy kingdom, Lord" (Psa. cxxxvii), and "Shall man, O God of life and light" (Psa. lxviii).

The state of Yale College at his accession to the presidency was far from being satisfactory, but his vigor, ability, and wisdom were long infused into it a new life. With great wisdom, he selected young men for the several professional chairs. He himself preached, and with very great acceptance, in the college chapel; he instructed in morals, mental philosophy, natural theology, and the evidences of revelation; and the religious dispensation of the students of college and director and guide. Soon after he came to Yale College he found that many students were tainted with infidelity. He was among the first, and one of the very ablest defenders of the Christian faith in this country, and by his preaching, as by his sermons on "The nature and power of infidelity," published at the time, he may be fairly said to have driven infidelity from the college. On the whole, his administration of the college was a very successful one. To him more than to any other man Yale College is indebted for its highly respectable position among the seats of learning in this country.

President Dwight died Jan. 11, 1817, when not quite sixty-five, of a cancer in the neck of the bladder. He had a commanding person, a noble voice, great pathos, an ardent temper, an excellent judgment, and sincere piety. His conversational powers were of the highest order. His style in his extempore addresses was the very model of a written discourse. He was brid and eloquent, but somewhat too rhetorical. He entered with great interest into the politics of the day, as an adherent of the principles of Washington and of the Federal party. His theology was Calvinism as modified by the two Edwardses, his grandfather and his uncle. In his youth he was a Unitarian; but, as he advanced in years he laid little stress on any doctrines except those in which all evangelical Christians were agreed. His life was full of acts of hospitality and benevolence, and his sympathies were of the tenderest sort. During a great part of his life his
eyes were too weak to be used, and his works were principally written by an amanuensis. His principal works published under his name, besides those which have already been mentioned, were "Theory explained and defended" (Middletown, Conn., 1818, 5 vols.; and in a multitude of editions afterwards in 4 vols., both in the United States and in England)—"Travel in New England and New York" (New Haven, 1821, 4 vols., which contained the record of journeys on horseback underground and over the snow during winter seasons); and "Sermons of an occasional character" (New Haven, 1829).

See Life prefixed to his Theology, and Dr. Sprague’s life of him in Spark’s "American Biography," vol. xiv, or new series, vol. iv.

Dwight, William T., D.D., a Congregationalist minister, was a son of President Dwight, and was born at Greenfield Hill, Conn., in 1795. He graduated at Yale College in 1814, and was distinguished for his scholarship in a class of many able scholars. From 1817 to 1819 he was a tutor in the college, and then removed to Philadelphia, where he practiced law until 1811. In that year he was awakened under a lecture of Dr. Skinner, and, abandoning the law, he was licensed by the Third Presbyterian Church of New York, and accepted by the Third Church of Portland, Maine. His ministry of about thirty years was eminently successful. He was an overseer of Bowdoin College and president of the Maine Missionary Society. In 1839 he was president of the Albany Convention of Congregational Churches.

"As a preacher he is entitled to a place among American divines for soundness of thought and varied learning, clear and polished diction, graceful and effective delivery, and eminent success." He died at Andover Oct. 22, 1865. He published a "Life of Sereno E. Dwight, with a Selection from his Discourses" (1851).

Dye (דְּנָע, adams, in the phrase "rams skins dyed red," Exod. xxiv, xxxvi, xxxv, etc., to be "ruddy") Lami. iv, 7; or "red" Nah. ii, 3; Isa. i, 9; Prov. xxiv, 31; "red" Gen., Gen., in which it was distinguished as wine-stained garments, Isa. xiii, 1. The art of dying is undoubtedly of great antiquity, and is, perhaps, nearly coeval with that of weaving. The Egyptians particularly excelled in the brilliancy of their dyed stuffs; and from them the Hebrews, while dwelling among them, learned the art of dyeing. This is evident from the curtains of the tabernacle and the sacred vessels, which were manufactured in the desert (Exod. xxvi, 1; xxxviii, 58). The skill of the Egyptian linen-manufacturers in employing the metallic oxides and acids, or mordants, is placed beyond dispute by ocular proof. The various processes of dyeing and printing, or imparting the pattern, by blocks (the origin of calico printing), are exhibited in Rosellini’s plates in all their minute details; and even the printing-blocks engraved with phonetic letters, and with the dye upon them, may be seen in the British Museum. Pliny’s testimony is interesting as illustrating, though not wanted to corroborate the fact. "They dye cloth," he says, "in an everlasting manner, and whatever is quite white before it is dipped; they then imbue it with drugs (mordants), which do not alter its appearance, but which absorb and retain a new and permanent color, varied according to the application of the drug." This is the modern process. Experimental investigation and chemical analysis have shown demonstratively that in the dyes which the linen and cotton manufacturers employed to produce certain results of which the relics are extant, they must have employed acetates of alum and of iron, and vegetable and mineral dyes, both substantive and adhesive, as they are termed by the modern dyers. It is as easy as invidious to ascribe these applications to accident rather than to chemistry. Evidences drawn from all the other arts and trades prove that the Egyptians were good chemists. The long stripes of linen which the Hebrews worked in the desert for the tabernacle were separately blue, scarlet, and white (Exod. xxxix, 1). The last was probably the effect of bleeding; but the two others were probably the result of slight, or as it was called in Egypt, "sod," or "zinc," as they are called in English, and as well as the yellow, to evince chemical knowledge. It appears that the linen-printers and dyers used the carthamus tinctorius, which grows in Egypt, for red, wood for blue, and the redea luteola, also a native of Egypt, for yellow. Now none of these operations could have been effected without a practical chemical knowledge. The system, though now practised in this country, but recently introduced, has been used from time immemorial in the East, and doubtless, therefore, in ancient Egypt, viz. by immersion in oxygenated murrate of lime, after subjection to the action of steam or boiling water. The three other colors, blue, red, and yellow, are adhesive, native without the use of mordants. They could not be fixed, as we find them fixed, without their proper mordants, namely, oxides of tin, arsenic, and iron. Occasionally the muslin, beautifully dyed and patterned, was interwoven with silver and gold thread, some specimens of which can be traced up to the early period of Thothmes I, and even of Osirens. Indeed, the richly-painted walls and palaces, as well as the unmatched gilding, as fresh as when first laid on, show a perfect familiarity among the ancient Egyptians, not with mineral and vegetable colors only, but the perfect results of metallic oxides in their composition.

The colors of the Egyptians were principally blue, red, green, black, yellow, and white. The red was an earthy bore; the yellow an iron ochre; the green was a mixture of a little ochre with a pulverulent glass, made by vitrifying the oxides of copper and iron with sand and soda; the blue was a glass of like composition with the ochreous addition; the black was lime or ivory black, and the white was a very pure chalk. They were mixed with water, and apparently a little gum, to render them tenacious and adhesive. With the Egyptians, the favorite combination of color was red, blue, and green; when black was introduced, yellow was added to harmonize with it; and in like manner they sought for every hue its congenial companion. They also guarded against the false effect of two colors in juxtaposition, as of red and blue, by placing between them a narrow line of white or yellow. They had few mixed colors, though purple, pink, orange, and brown were frequently used on papyri. The blue, which is very brilliant, is formed of metallic particles of blue glass, and may be considered equivalent to our smalt; it seems to be the same that Vitruvius describes, which he supposes to have been first made at Alexandria; and it also agrees with the artificial kyanus of Theophrastus, invented in Egypt, which he says was laid on thicker than the native (or lapis lazuli). The thickness of the blue on the ceilings in Belzoni’s tomb confirms his remark. The green is also a glass in powder, mixed with particles of colorless glass, to which it owes its brightness (Wilkinson, Anc. Egy., abridgm., ii, 292).

The next color is yellow. It appears more in detail. There are many kinds of hues, both natural and artificial, mentioned in the Bible as fashionable or known among the Hebrews; besides white (ךְּנֶה or נְכָר), there were: 1. principally red (ךְּנֶה, brownish-red), crimson (ךְּנֶה,ךְּנֶה), purple or violet-red (ךְּנֶה,ךְּנֶה), orange or vermillion (ךְּנֶה), 2. next green (ךְּנֶה), 3. pale yellow (ךְּנֶה), 4. azure or hyacinthine (purplish) blue (ךְּנֶה), 5. brown or fox-colored (ךְּנֶה). Many of these are doubt properly, or at least arbitrarily, the designation of the coloring materials. See Crimson; Vermilion, Purple. It is evident that each of these principal colors had a special significance among the Israelites, according to which it would be selected whenever there was an op-
tion; and it could not but be that some colors would be preferred to others, e. g., white garments as the clothing of the clergy, but dignitaries were arrayed in purple (Judg. viii., 26; Esth. viii., 15; Dan. v., 7, 16, 29; comp. Cant. vii., 6), which hue was probably so appropriated on account of its costliness (comp. the purple sails of the Syrian ships, Ezek. xxvii., 7). See APPAREL. Bright, dazzling colors (γαλάζιον) further indicated, as might naturally be supposed, hilarity and joy (2 Sam. i., 24; comp. Jer. iv., 30), while dark (black) and dull hues were expressive of grief and dejection (Mal. iii., 14; Zech. vi., 2, 6; comp. Plutarch, Peric. 118; Mishna, Midr. v., 8; Apulei Metam. ii. p. 40 Bp.; see generally Götzte, De vestimentis nigrorum, Helmst. 1726). Youth and age also constituted a distinction in this respect. White, moreover, was assumed as the color of whatever form came from heaven (as being that of the purest light); hence angels were clad in glittering white robes (Mark xvi., 5; John xx., 12, etc.). The symbolical use of colors is clearly exhibited in the prophetic visions. In Rev. vi., 2 sq., the rider upon the white horse is emblematical of one bringing prosperity like victorious champions, the red horse signifies bloodshed, the black denotes the distress of death, and scarcity, the pale one (χαλκος) death. So when (Rev. xii., 3) the great dragon (Satan) is depicted red, it appears altogether congruous with the character of the originator of death and of every ruin (Isa. i., 18; comp. ver. 18; see Bähr, Symbolol. i., 885 sq.; also Rev. xvii., 3). More difficult of interpretation are the colored steeds of Zech. i., 8; vi., 2 sq., which passages certainly served as a model to the revelator. In matters of worship (Krause, De coloris sacris, Vieterb. 1707), colorsymbol:s take a wider range (Creuzer, Symbolol. i., 125 sq.). The priests in general wore white vestments, to indicate the purity of the divine Being whom they served. When idols were painted with vermillion (Wis. xiii., 14; Ezek. xxiii., 14; see Plutarch, Quest., Rom. 98), this color was not only selected for its brilliancy, but also that with which even the Romans, in early times, decorated their triumphant warriors (Plin. xxxiii., 36). Hence purple robes were used for robing the statues of the gods (Jer. x., 7; Creuzer, Symbolol. i., 120; ii., 368). In the Israelitish cultus the four principal colors occur: dark (or purplish) blue, purple-red, crimson, and white (the three essential colors, white, blue, and red, also occur in Rev. xviii., 16); they appear connectedly in the decorations (tapestry and veils) of the tabernacle (Exod. xxv., 4; xxvi., 1, 31, 36; xxxix., 6 sq.; xxxvi., 8 sq.), and in the sacerdotal garments (Exod. xxvii., 8 sq.; 15; xxix., 1). Moreover, scarlet and deep blue cloths are prescribed for the transportation of the sacred furniture (Num. iv.), and scarlet wool for certain purificatory purposes (Lev. xiv., 4, 6, 51 sq.; Num. xix., 6); and the tassels to the four corners of the covering, which had a religious significance, were to be made of dark blue materials (Num. xvi., 38). Perhaps these four colors were selected not merely on account of their beauty and costliness (God demands the best that man has), but with reference to their special mystical import, which in the last instance (the ritual of purification) is more evident. Philo (Opp. i., 536; ii., 148) and Josephus (Ant. iii., 7, 7) too have already an explanation of the four sacred colors (comp. Stud. u. Krit. 1844, ii., 315 sq.). See Friederich, Symbolol. d. mos. Stiftshütte (Leipz. 1841). Comp. COLOR.

DYED ATTIRE stands in our version of Ezek. xxiii., 16, as a translation of בְּקָלְלֵי (tehlilim), usually regarded as from בְּקָלָל, to dip, and so to dye with colors; but Gesenius prefers the derivation from an Ethiopic verb signifying to wind or wrap around, and so giving the sense of, head-bands or σάταν. The Sept. and Vulg. combine both significations (τιάφαυ πάντων, τῶν ἐν ἑνεκα). See PAINT.
