C.

CAB (כָּב, a hollow vessel; Sept. καβσός), a measure for things dry, mentioned in 2 Kings vi, 25. The rabbins make it the sixth part of a seah (q. v.) or sarah, and the eighteenth part of an ephah. This would be nearly two quarts English measure. See MEASURE.

Cábalá, the title of the celebrated system of religious philosophy, or more properly theosophy, which has played so important a part in the theological and ethical life of both Jews and Arabs since the Middle Ages. See PHILOSOPHY. The following account of it is partly compiled from Herzog's Real-Encyclopädie.

I. The Name.—KABBALA (from the Heb. כַּבָּלָה, Kabbalah, the received), properly denotes reception, then a doctrine received by oral tradition. The term is thus in itself nearly equivalent to transmission, 'like the Latin traditio = Măssora, for which last, indeed, the Talmud makes it interchangeable in the statement, 'Moses received (קָבָלָה) the Law on Mount Sinai, and transmitted (קָבָלָה) it to Joshua.' The difference between it, however, and the word מָשָׂא (from משא, to deliver) is, that the former expresses the act of receiving, while the latter denotes the act of giving over, surrendering, transmitting. The Cabala is also called by some הַקָּבָלָה, secret wisdom, because it pretends to be a very ancient and secret tradition, and מִשָּׁא, grace, from the initials of these two words.

The term Kabbalah is employed in the Jewish writings to denote several traditional doctrines; as, for example, that which constituted the creed of the patriarchal age before the giving of the law; that unwritten ritual interpretation which the Jews believe was revealed by God to Moses on the mount, and which was at length committed to writing and formed the Mishna. Besides being applied to these and other similar traditions, it has also been used in, comparatively speaking, modern times, to denote a singular mystic mode of interpreting the Old Testament.

We are reminded by this indefinite title that among the Jews, as throughout the greater part of the East, human knowledge, whether historical or scientific, rested principally on a sort of succession, and the best claim for its reception was an unbroken chain of tradition. Whereas, hence the correctness with which Judaism established the regular consecution of the sacred custodians of truth, from Moses through Joshua and the so-called greater prophets, thence through Ezra and "the Great Synagogue" to the teachers of later times, subdividing at length into the various schools or periods of particular rabbis and their hereditary adherents. While, therefore, the truth was gradually exhibited in the writings of the Law, the Prophets, and the Talmud, the Cabala indicates the verbal exposition of these, orally transmitted along with them, and not generally known to the people, but containing a deeper or more thoroughly initiated style of instruction. It thus came ultimately to designate a particular theologico-philosophical system, that arose and established itself in the bosom of Judaism, yet in a measure independent of, or rather supplementary to it.

II. Original Documents.—Instruction in Judaism being principally verbal and founded on memory, its phases of development could necessarily leave but little mark on history; and as such a philosophy would thus naturally, in process of time, become a mystery, at least in the view of posterity, the origin and progress of the Cabala are yet largely matters of conjecture, and it is even a subject of scientific controversy whether in its speculative form it can be distinctly traced earlier than the Middle Ages, although its leading principles appear to have been derived from ancient documents, the nature of which is still very imperfectly understood, such as the so-called revelations of Adam, Abraham, Moses, Ezra, etc. See APOCRYPHA.

The Talmud, indeed (both in the Mishna and Gemara of the tract Chagiga, passim), makes mention of a doctrine imparted only to a few carefully selected persons, and even applies to it certain fanciful names (drawn from the phraseology of Gen. i, 1, and Ezek. i, 1), significant respectively of a speculative cosmology and a speculative theology; but it is uncertain whether these designate definite treatises, or, if so, whether these have in any identifiable form descended to modern times. The only works which can with any propriety claim to embody these earliest views are the following two, that became the acknowledged texts of the Cabala in the latter part of the Middle Ages; a third cabalistic treatise (called the תַּנִינָא, Sepher Bachir, or Chike Book), which is found in an edition of Amst. 1651, and attributed to a rabbi, Nechoniah Ben-Hiskana, of the first century, has long ago been generally acknowledged to be fictitious, although a cabalistic work of the same title is mentioned as early as the fourteenth century.

The first of these is the Book of Creation (תַּנִינָא), Sepher Yetzirah, often reprinted, as ed. Steph. Rittangel, Amst. 1642, with a Latin translation and commentary; and the ed. of J. F. van Meyer, with a German translation and commentary, Leipz. 1830, 4to, ascribed to the renowned rabbi Akiba (A.D. 120). It is of rather shorter duration, and, in particular phrases, the language of which, more obscure in import than in form, does not resemble the Hebrew of the Mishna. As a book of the same title appears to be already mentioned in the Gemara, where wonderful power is ascribed to it, and as R. Saadiah is said to have commented upon it as early as the tenth century, it is certain that we can ascend to a considerable antiquity in tracing its authority. See JEZIRAH.
The other and more important cabalistic text is the celebrated Book of Light (ז"כ, Sefer ha-Zohar), from Dan. xii, 3, first printed at Cremona and Mantua in 1560, and since often reprinted, as at Sulzbach in 1684, fol., with various additions. Tradition ascribes it to R. Abba Akiva, or to R. Simeon Ben Jochai, a teacher much praised in the Talmud for his great wisdom and legal knowledge, although nothing is there said directly of his writings. Incredulous criticism considers it as a production of the thirteenth century, the time of its first appearance in the history of literature, and assigns it to a Spanish Jew, Moses of Leon. It appears, however, to be older than this, having probably originally appeared piece-meal in the East at intervals, the whole being completed in its present form about the eighth century. It includes certain special tracts or treatises, in which the author seems especially to develop his own sentiments, and which form, so to speak, the kernel of the science sought to be imparted. Three of these are designated by particular names (The Book of Confidence, and the Greater and Less Collections); the popular distinction made by the Jews, however, between a great and a small Zohar sometimes refers to the varying fullness of the editions merely. See Zohar.

III. Fundamental Doctrines.—These are somewhat differently expounded in the above-named books (to the separate articles on which the reader is therefore referred for full particulars), and most at large in the latter. The following, however, is a summary of the cabalistic views as expressed in the general writings of later authors of that school.

1. Nature of the Deity.—God is above everything, even above being and thinking. It cannot, therefore, be said of him that he has either a will, intention, desire, thought, language, or action, since these properties, which adorn man, have limits, whereas God is in essence and in power without limit, because he is perfect. Owing to this boundlessness of his nature, which necessarily implies absolute unity and immutability, and that there is nothing without him, i. e., that the 70 מ"א is in him, he is called En-Soph =without end, boundless, and can neither be comprehended by the intellect nor described with words, for there is nothing which can grasp and depict him to us. In this incomprehensibility or boundlessness, God, or the En-Soph (יה י' ר), is in a certain sense not existing (יה נא); since, as far as our mind is concerned, which that is incomprehensible does not exist. Hence, without making himself comprehensible, his existence could never have been known. He had, therefore, to become active and creative in order that his existence might become perceptible.

2. Development of the Deity.—But since, on the one hand, the will to create, which implies limit, and the circumscribed and imperfect nature of this world, preclude the idea of taking it as the direct creation of him who can have no will, nor produce anything without what is like himself, boundless and perfect; and since, on the other hand, the beautiful design and order displayed in the world, which plainly indicate an intelligent and active will, forbid us to regard it as the off-spring of chance, the En-Soph must be viewed as the Creator of the world in an indirect manner, through the medium of ten "Sephiroth" or intelligences, which emanate this world in a contemporarv of R. Akiva, name, and the meaning of the word is obscure. It is the plur. יס"ת, sephiroth, of יס"כ, which R. Asaril, the first Cabalist, derives from יס"כ, saphir, the sapphire, from the word יס"כ, "declare," in Psa. xix, 1, or even from the Greek σφαίρα, spheres.

From his infinite fulness of light the En-Soph sent forth at first one spiritual substance or intelligence; this intelligence, which existed in the En-Soph from all eternity, and which became a reality by a mere act, contained the nine other intelligences or Sephiroth. Great stress is laid upon the fact that the first Sephiroth was absolutely perfect, but was simply an emanation (ינא פ"כ), and the difference between creation and emanation is thus defined, that in the former diminution of strength takes place, while in the latter this is not the case. From the first Sephiroth emanated the second, from the second the third, from the third the fourth, and so on, one proceeding from the other, till the number ten. These ten Sephiroth form among themselves, and with God, a strict unity, and simply represent different aspects of one and the same Being, just as the flame and sparks which proceed from the fire, and which appear different things to the eye, form only different manifestations of the same fire. Differing thus from each other simply as different colors of the same light, all the ten emanations alike partake of the En-Soph. They are boundless, and yet constitute the first finite things; so that they are both infinite and finite. They are infinite and perfect, like the En-Soph, when he imparts his fulness to them, and finite and imperfect when that fulness is withdrawn from them. The finite side of the emanation of the Sefirot is absolutely boundless; but that which by the incomprehensible En-Soph makes his existence known to the human intellect, which can only grasp that which has measure, limit, and relation. From their finite side the Sephiroth may even be called bodily, and this renders it possible for the En-Soph, who is imminent in them, to assume a bodily form.

3. Forms of this Development.—The ten Sephiroth, every one of which has its own nature, were divided into three groups of three Sephiroth each, respectively operating upon the three worlds, viz., the world of intellect (ב"א, the soul of the intellect, and the world of matter (ב"א ב"א ב"א). I. The first group operates upon the intellectual world, and consists of Sephiroth 1, denominated "ו"כ, or ל"ו כס"כ, the crown, or the inconceivable height; 2, called מ"כ, the creative wisdom; and 3, called מ"כ, the conceiving intellect. The result of the combination of the latter two (as "father" and "mother") is likewise represented as מ"כ, or מ"כ. 2, i. e., concrete thought, the universe of mind, the effect of l'chayyot. II. The second group exercises its power upon the moral world, and consists of Sephiroth 4, called מ"כ, infinite grace (also מ"כ, greatness); 5, called מ"כ, or מ"כ, divine justice, or judicial power; and 6, which is called מ"כ, beauty, and is the connecting link between the opposite Sephiroth 4 and 5. III. The third group exercises its power upon the material world, and consists of Sephiroth 7, called מ"כ, firmament; 8, called מ"כ, splendour; and 9, which is called מ"כ, the primary foundation, and is the connecting link between the two opposite Sephiroth 7 and 8. Sephiroth 10 is called מ"כ, kingdom, and denotes Providence or the revealed Deity (מ"כ, Shekinah) which dwells within the midst of the Jewish people, goes with them and protects them in all their wanderings andcaptivities. The first triad is placed above, and the second and third triads, with the unit, are put below, in such a manner that the four Sephiroth called crown, beauty, foundation, and kingdom, form a central perpendicular line denominated the middle pillar (מ"כ). This division yields three different forms in which the ten Sephiroth are represented by the Cabalists, and which we subjoin in order to make the description more intelligible. The first represents an inverted tree, called מ"כ, the tree of life, while the second and third are human figures, called מ"כ, the primordial man. Yet, notwithstanding the different ap-
the pious have sometimes to endure here below are simply designed to purify their souls. Hence God's justice is not to be impugned when the righteous are afflicted and the wicked prosper. This doctrine of the transmigration of souls is supported by an appeal to the injunction in the Bible, that a man must marry the widow of his brother if he died without issue, as much as by this is designed, say the cabalists, that the soul of the departed one might be born again, and finish its earthly course. Very few new souls enter into the world, because many of the old souls which have already inhabited bodies have to re-enter those who are born, in consequence of their having killed themselves in their previous bodily existence. This retards the great redemption of Israel, which cannot take place till all the pre-existent souls have been born upon earth, because the soul of the Messiah, which, like all other souls, has its pre-existence in the world of the spirits of the Sephiroth, is to be the last born one at the end of days, which is supported by an appeal to the Talmud (Yebamoth, 63, a). Then the great jubilee year will commence, when the whole pleroma of souls (ניינין), cleansed and purified, and released from earth, shall ascend, in glorious company, into heaven. See Metempsychosis.

IV. Orig. Date, Design, and Relations of the Cabala. — The rise of Cabalism is involved in great obscurity. The Jews ascribe it to Adam, or to Abraham, or to Moses, or to Ezra, the last being apparently countenanced by 2 Esdr. xiv, 20-48. The opinions of Christian writers are as variously divided; and the Cabala is such a complex whole, and has been aggregated together at such distant periods, that no general judgment may apply to it. In its crude form it is undoubtedly to be attributed to the authors of the books Jesirah and Zohar above named, and therefore cannot be assigned an earlier date, or than the writings of other and more mature doctrines, however, as above delineated, are due to the speculations of later masters of this school. The account of this theosophy has been greatly obscured by modern writers, who, in their description of the Cabala, confound its doctrines with the Jewish mystics, pronounced in the works called the Alphabet of R. Ashin (אחיות אדנים), or, אатегорה נברשת, the Description of the Body of God (גאונים), and the Delineation of the hermetical Temples (הatron הלומד). Even the book Jesirah does not contain the doctrines of the Cabala as above expounded. All these productions, and others of a similar nature so long preserved by the cabalistic writers, are an analysis of the Cabala, know little or nothing of the Sephiroth, and of the speculations about the En-Soph, or the being of God, which constitute the essence of the Cabala. Nevertheless, these works are unquestionably to be regarded as having induced the more refined speculations of the Cabala, by the difficulty in which they placed the Jews in the south of France, and in Catalonia, who believed in them almost as much as in the Bible, and who were driven to contrive this system whereby they could explain to themselves, as well as to their assailants, the gross descriptions of the Deity, and of the plains of heaven, given in these cabalistic productions. Being unable to go to the extreme of the rigid literalists of the north of France and Germany, who, without looking for any higher import, implicitly accepted the difficulties and anthropomorphisms of the Bible and Hagadah in their most literal sense, or to adopt the other extreme of the followers of Maimonides, who rejected altogether the Hagadah and mystical writings, and rationalized the Scriptures, it may be conjectured that Isaac the blind contrived, and his two disciples, Ezra and Azriel of Zerona, developed the modern system of Cabalism (about 1208-1258), which steer between these two extremes. By means of the Sephiroth all the anthropomorphisms in
account of these things in Eisenmenger's Entdecktes Judaismum, in Schudt's Israeli Curiosities, and other works of the same character. See Amulet.

The exegetical ingenuity of the Cabala is interesting to the theologian. The principle of the mystic interpretation of Scripture is universal, not particular to any one or such schools, as every one will perceive in Church history, and even in the history of Greek literature. We find it in Philo, in the New Test., in the writings of the s.thers, in the Talmud, and in the Zohar; and the more it departs from the spirit of the sacred text, the more had the latter to be brought to its support by distortions of its meaning. For such operations, which are in the nature of the case and the subjective part of the sense, see Mysticism.

In the mean time, the Jews had already, by the arbitrary character of their alphabet, arrived at all manner of subliterations, of which we have already isolated examples in earlier writings, but which were especially established as a virtuoso ush in post-Zoharic times. From this arose the following - species of cabalistic transformation: 1st. גכמה, Gematria (γεματρία), i.e. the art of discovering the hidden sense of the text by means of the numerical equivalents of the letters. For example, in the first and last verses of the Hebrew Bible are found six נ, which, according to this method, means that the world is to last 6000 years. The numerical equivalent of the first word of Genesis is 513, which is also the number given by the words יזע וינא (by the law he formed it, i.e. the world), from whence it follows that the law existed before the creation, and that the latter was accomplished through the former. If the second word of Genesis (וה) is added to the first, the result is 1116, which is also the equivalent of יבוא ותניא (in the beginning of the year it was created), by which is known that God created the world in the beginning of the year - that is, in the season of Autumn. The antiquity of this method is already shown in Rev. xiii, 18, where the solution must be deciphered out with the aid of the Hebrew (or Greek) alphabet. It is also considered as Gematric, when two letters are interposed for two, three or four letters. These may perhaps have originally been but peculiar marks to aid memory. 2d. The particularly so-called 'figurative' (וב(InputStream)) Cabala, בּוּשׁוּסָו, Notarikon (from Lat. notare, to extract), consists in forming with each letter of a word several new ones, e.g. from the first word of Genesis six can thus be framed: יִשֵּׁב, he made: יִשְׁמַע, the firmament; יִשָּׁב, the earth; יִשָּׁכְר, the heavens; יִשָׁמ, the sea; יִשָּׁב, the αγαθος. We thus learn the correct scientific nature of the universe, besides the proper meaning of the text. Again, it consists in taking the first letters of several words to form a new one: e. g. Daut..xxxi, 12, יִשָּׁבֵית, יִשָּׁבֵית, יִשָּׁבֵית, who shall bring us to heaven? Answer: יִשָּׁבֵית, circumcission. 3d. יִשָּׁבֵית, Temurah (permutation), the anagram, of two kinds. The simple is a mere transposition of the letters of a word: e.g. we thus learn that the angel in Exod.xxxii, 23 (ינטיפּ, my angel) was the angel Michael (אִישָּׁבֵית). The more ingenious kind is that by which, according to certain established rules, each letter of the alphabet acquires the significance of another letter, e.g. the letter that of ת, ת, תו, etc., is thus interpreted. Then, again, the letters may be read forward and backward (which constitute the alphabet of Athbash, אבתש), or the first letter that of the twelfth, the sec-
and of the thirteenth, and the reverse (making the alphabet called Alphab., .).

See ATRACH. The more multifarious these trifles, the easier it is to arrive in every given case at a result, and the less wit or thought is required. Thus the Christian theology of the 17th century, which itself inclined to literal belief, and which, by its strong polemical aspect against the Jews, was led into a diligent study of the cabalistic arts, through them found everywhere in the Old Test. evidence of the Christian dogmas (e.g. Gen. i, i.

In the 13th century we find evidence of a knowledge of the cabalistic ideas and methods in the works of the Spaniard Raymond Lullus; but with him, as well as among his direct and indirect followers, these elements of Judaic philosophy take the character of eccentricities and superstitions more than of general speculative theory. Two centuries elapsed after this before the Cabala really entered the circle of Christian mental development. Its admission was prepared, on the one hand, by the overthrow of the worn-out scholasticism of Aristotle, and the consequent tendency towards poetic expression; on the other, of course, these latter were yet in their mere element, and before they had been transmitted to Alexandria by Eastern influences; on the other hand, the same result was conducted by an awakening interest in the study of nature, which, it is true, was still in a poetic, dream-like infancy, but was the more inclined to entertain itself with mysteries, as it had discovered as yet few natural laws.

To these was, however, joined a third and more powerful influence, namely, the belief handed down by the fathers of the first centuries that all the wisdom of nations, and chiefly Platonic philosophy, actually took its origin in the Hebraic revelation; that, in a more extended circle, the whole present world was Jewish, and that the Jewish people were the possessors and keepers of a treasury of wisdom and knowledge which time or zealous research could alone reveal. What wonder is it, then, if the assertion of the Cabalists that they possessed such a treasure found credence and gained them followers? The progress of Christians toward the Cabala was greatly helped by the conversion of a large number of Jews to Christianity, in which they recognised a closer relation to their Gnostic views, and also by the Christians perceiving that Gnosticism could become a powerful instrument for the conversion of the Jews. Among the converted Jews we notice Paul Ricci, physician to the pope, extraordinary to the Protestant exilimian, and author of Celestiae Agricultura; Judas ben Isaac Abrabanel (Leon Hebraeus), son of the renowned Portuguese exilias, and author of the Dialogo de amore. Among Christians we will only mention the two most important: John Pico della Mirandola and John Reuchlin; the former as a highly gifted and enthusiastic syncretist, author of Commentaries cabalisticus secundum disciplinam susperatione Hebr. (1486); the other a faithful disciple of the classics, in connection with mysticism, but opposed to scholasticism and monachal torpitude, author of De verbo mirifico (1494); De arte cabalistica (1513). His, and some other writings of his kind, are collected in the works of Cabalistica in e. recensita theologica et philosophica Scripturum, tom. i (unius), ex. bbl. J. Pistorii (Basel, 1867, fol.). The powerful preponderance of the religious and Church interests, as well as that of practical politics, which became perceptible in the first quarter of the 15th century, and more especially to the mind of the moderns, and to studies a substantial foundation, arrested the further development of the Cabala; and when, in latter times, it was occasionally taken up again, it was rather with the view of giving a high-sounding, mystical name to theories which had not strength enough to stand by themselves, than as a genuine resurrection of the old systems.

VI. Literature.—As a sort of accessory subject of the so-called Orientalism, and even of Biblical erudition, the Cabala is mentioned by the ancient archaeologists and isagogies (as Cuneus, Respons. Hebr.; Walton, Proleg.; Hottinger, Theoriae Philol.; Luzzat, Philologiae Hebr.; Pfeister, Critica Sacra, and many others); but there is nothing of importance respecting it. Much more copious, though not yet complete, is the information contained in the works of Buddeus, Philosophiae Ehrmonum (1709); Hackspan, Miscellanea; Braem, Selecta Sacra, v; Reimann, Judische Theologie. The work of Sommer, Specimen theologii judaicae (1717) is like many others of importance Fabricius quotes in the Bibliographia Antiqu. p. 216) only a polemical-apologetic attempt at tracing the Christian doctrine of the Trinity in the Cabala. Of a higher philosophic character are the works of Wachter, Spinozismus im Judœothum, and Elucidarium cabalisticum s. recensita Ehrmonum philosophiae hebraicae recentissim (Amst. 1699), in which the polemic tone prevails. Next are Busnag, Hist. des Jüdis (tom. iii), and Brucker, Hist. Philosophiae (vol. ii), who, however, from insufficient study of the original sources, acknowledges himself unable to master its intricate history. Among later writers we find well-written books by Bornemann, Tiedemann, and Bahle. The line of more recent monographic research begins with Kleuker (Rin., 1786). But Christian writers, whose early knowledge of rabbinic literature has been fast waning, generally forsake it. Tholuck's treatise, De arte Cabalale (1837), treats only of a preliminary question. Lutterbeck, in the first volume of his Neutest. Lehrbegriff, has a very interesting chapter on the Jezirah and Zobah. Mollitor's extensive work, Philos. d. Geschich et. Traditum (1827, pt. i-iii), is chiefly theoretical. Reuchlin (De arte Cabalistica, 1517) is still a valuable authority. One of the latest is Etheridge (Jerusalem and Tiberis e. Mos. 1866, 12mo.). Next to the extensive work of Ad. Franck, La Kabale ou la Philosophie religieuse des Hebreus (Paris, 1842; tr. by Jellinek, Lpz. 1844), we name the Philosophia Cabalistica et pustelium (1832) of M. Freystadt. See the Eclectic Review, Feb. 1856; Christian Remembrancer, April, 1862.

The earliest cabalist was Asriel, whose Commentary on the Doctrine of the Sephiroth (ס"כinden ס"כ), in questions and answers, has been published (Wansaw, 1798; Berl. 1850); also his Commentary on the Song of Songs (Altona, 1764), usually ascribed to his pupil Nachmanides and Ramban (q. v.). Among the most important cabalists we find Rabbi Moses ben Nachman, author of the Books of Faith and Hope (ית"ש ית"ש; R. Jose, of Castile, author of Dores de Light, Hope for the World; R. Moses, of Cordova, גני הפנומני (Garden of Pomegranates); R. Isaac Lorin, ת"ש ת"ש (Book of the Wanderings of Souls); R. Chayim Vital, ספר חיים (Tree of Life); R. Nastali Ben Jacob Elchanan, בע"ש בע"ש (Valley of the King); R. Abraham Cohen, of Herrera (vulc. Iriva, י"ה י"ה (Door of Heaven). Some of these works (translated into Latin) are to be found whole, or in their principal parts in the Kabbala Nova of Kaer von Rosenroth (Salis., 1577, 5 vols. 4to), with all kinds of exegetical appendices and other texts from the Zabur. The cabalistical literature is fully noticed in Bartolocci's Bibliotheca Magna Rabbinica and in Wolf's Bibliotheca Hebraica, tom. i, and iv, though not in the correct order and construction; see also P. Beit, Genesis of the Kabbala der Seien der Juden, und der Cabala (Bruen, 1892, 2 vols. 8vo); See also De Cabala Judaica (Rost. 1702); Sennert, De Cabala Judaicarum (Wittenberg, 1855); and especially the copious list of expositions upon the works of Simon ben-Jochai, the reputed founder of Cabalism, given by Fürst, Bibliotheca Judica, iii, 829 sq. We may specify the following: Zunz, Costes. Vorträge der Juden (Berlin,
It has been conjectured (Kitto, *Pictorial Bible*, note on 1 Kings ix. 18) that "probably, as the Phoenicians were a maritime and commercial people, Hiram wished rather for a part of the coast, which was now in the hands of Solomon, and was therefore not prepared to approve of a district which might have been of considerable value in the eyes of an agricultural people like the Hebrews. Perhaps the towns were in part payment of what Solomon owed Hiram for his various services and contributions." See HIRAM.

CADDIS (Kadis or rather Kadis), as most texts read; so also Josephus, *Iadis* or *Iadis*, Ant. xiii, 1, 2; derivation uncertain, see Grimm, *Handb.* in loc.; the surname (Παναρχαίος) of Ioannes (q. v.), the eldest brother of Judas Maccabaeus (1 Macc. ii. 5).

Cademan, Johann Georg, a German theologian of the 17th century, was born at Oschatz, in Saxony, and studied at Jena and Wittemberg, where he took his degree in 1656. In 1656 he became pastor at Dahlen, and in 1676 archdeacon at Wurzen, where he died, Dec. 28, 1687. Among his writings are De Princ. de Caesaris Augusti (Jena, 1656; 4to); De Legibus Principis Immortales (Wittenberg, 1656, 4to); De Justitia Distributiva (1654, 4to); Hoef. Novum. Bibl. Gen. (viii. 83).

Ca'dem (Kadis v. r. Kadis and Ka'dik), a Graceformed form (1 Macc. iv. 63, 78) of the name of Kedes (q. v.) in Naphthal (Josh. xx. 7).

Ca'dem-Bar'nè (Kadis Bauvin), a Graceformed form (Judith vi. 14) of Kades-Barnana (q. v.).

Cadmioel (Kadiphotis v. r. Kadiphotos), one of the Levites whose "sons" returned from the captivity, and who assisted at the musical performances at the restoration of the temple worship (1 Esdr. v. 28, 68); evidently a corruption of Kadosh (q. v.) of the Heb. texta (Ezra ii. 40; Neh. vii. 48; xii. 24).

Cadonicci, Giovanni, an Italian theologian, was born in Venice in 1705, and became a canon of the church of Cremona. He was a man of learning, and opposed the pretensions of the court of Rome and the doctrines of the Molinists. In a curious work, entitled "An Exposition of this passage of St. Augustine, The Church is a nest of vipers, to be destroyed," he shewed that the Church in things spiritual, so the Church is bound to obey them in things temporal; and that in ancient liturgies, as the Ambrosian, Mozarabic, etc., prayer was made, specially and by name, even for persecuting princes. He wrote also *Sententias de St. Augusti* (1758); De Animabus Animorum (Rome, 1756, 2 vols. 4to). He died Feb. 27, 1786. —London, *Ecl. Dict. s. v.*; Hoef. *Nov. Bibl. Generale*, viii, 74.

Cecilian. See Donatists.

Cedmon or Caddemon, an Anglo-Saxon Benedictine monk, born in Northumberland, died at Whitby in 676 or 680. He is the first person of whom we possess any metrical composition in our vernacular. It is a kind of ode, of eighteen lines, celebrating the praises of the Creator, preserved in Alfred's translation of Bede. "Bede gives the following account. Caddamon seems to have had the care of the cattle of the monks of Whitby. It appears to have been the custom of our Saxon forefathers to amuse themselves at supper with improvisators descants accompanied by the harp, as is still practised at meetings of the Welsh bards. Caddemon, when the harp passed round among the guests, was, as it approached him, to shrink away from the instrument, and retire to his own house. Once, after it had thus happened, as he was sleeping at night, some one seemed to say to him, 'Caddemon, sing me something.' He replied, 'I cannot sing;' and he told how his inability to sing had been the cause of his quitting the hall. 'Yet thou must sing to me,' said the voice. 'What must I sing?' said he. 'Sing me the origin of things.' The subject thus given him, he composed the short ode in question. When he awoke, the words were fast in his mind. Caddemon in the morning told his vision and repeated his song. The effect was, that the abbess Hilda, and the learned men whom she had collected round her in her monastery at Whitby, believed that he had received from heaven the gift of song, and when on the morrow he returned with a poetic paraphrase of a passage of Scripture he had been directed to revise, his labour was praised. The song, which he had given to them as a test of his inspiration, they at once acknowledged the verity, and earnestly besought him to become a member of their company. He composed numerous poems on sacred subjects, which were sung in the abbey. Sacred subjects were his delight, and to them he confined himself. He continued in the monastery for the remainder of his life, and there he died, as is conjectured, about 680. The authenticity of the little poem above mentioned is perhaps unquestionable. But, besides this, a very long Saxon poem, which is a metrical paraphrase on parts of the Scriptures, is attributed to Caddemon. This tradition of it was printed at Amsterdam in 1656, under the care of Hickes. Hickes expresses doubts whether this poem can be attributed to so early a period as the time of Caddemon. He thinks he perceives certain Dano-Saxonisms in it which would lead him to refer it to a much later period. It has been again printed, with a much more accurate text, by Mr. Thorpe, as a publication by the Society of Antiquaries (Lond., 1800, 1802). Mr. Thorpe is of opinion that it is substantially the work of Caddemon, but with some sophistications of a later period, and in this opinion our best Anglo-Saxon scholars appear inclined to coincide." —*Primi Cyclopæd. s. v.*; Hoef. *Novum Bibl. Generale*, viii, 84.

Cerestatius, See Celestius.

Cerularius, Michael, patriarch of Constantinople (A.D. 1043-1059). He was one of the chief promoters of the great schism between the Eastern and Western churches. In 1054 Pope Leo IX sent legates to Constantinople to accommodate matters; but they, being displeased at the treatment they received, left a written letter of accusation, demanding that the patriarch, on the altar of the church of St. Sophia, and departed, having shaken off the dust from their feet. The ostensible causes of difference between the churches, as detailed in a letter written by Cerularius and Leo, archbishop of Acryda, to John, bishop of Tranì, were the following: that the Latins consecrated with unleavened bread; that they added the words *Atque* to the creed of the Church; that they taught that the souls of the faithful make expiation in the fires of Purgatory; and that in some other respects they differed in their customs from those of the East. After this outrage on the part of the Roman legates, Cerularius called together a synod at Constantinople 1054, and excommunicated them and their adherents. Cerularius himself was a man of ambitious views and arrogant disposition, and little likely to ward off the final rupture with Rome, which in fact took place. However, the Emperor Isaac Comnenus took umbrage at his behavior, and, A.D. 1055, having obtained the short leave to be seized, sent him to Fromoonus. Cerularius refused to resign the patriarchal throne as the emperor desired, to compel him to do, but died shortly afterward in exile. —Baron. *Amato*, xi, A.D. 1051; *Mosheim, Ch. Hist. cent. xi, pt. ii, ch. iii; Neander, Ch. *History*, iii, 560.

Cessar (Graceformed Kliaírap; hence the Germ. little Kaiser, Russian Cesar, etc.). A name assumed by a restored upon all the Roman emperors after Julius Caesar who (as is said to have been so named by his having been born by a surgical operation, *cesareus*).
CÆSAREA

it became a sort of title, like Pharaoh, and, as such, is usually applied to the emperors in the New Testament, as the sovereign of Judea (John xix, 15; Acts xvii, 7), without their distinctive proper names. See also AUGUSTUS. It was to him that the Jews paid tribute (Matt. xxii, 17; Luke xx, 22; xxii, 2), and to him the surety of peace were made by the right of appeal (Acts xxv, 11; xxvi, 82; xxvii, 19); in which case, if their cause was a criminal one, they were sent to Rome (Acts xxx, 12, 21; comp. Pliny, Ep. x, 97), where was the court of the emperor (Phil. iv, 22).

The Cæsarians mentioned in the New Testament are Augustus (Acts xiv, 13, 25), Claudius (Acts xi, 22, 28), Nero (Acts xxv, 8); Caligula, who succeeded Tiberius, is not mentioned. See each name. On Phil. iv, 22, see HOUSEHOLD.

CÆSAREA (Κασαρία, in the Targum קסטְירא), the name of several cities under the Roman rule, given to them in compliment of some of the emperors; especially of two important towns in Palestine.

1. CÆSAREA PALESTINE (Κασαρία ή Παλαιστίνη), or "Cæsarea of Palestine" (so called to distinguish it from the other Cæsarea), or simply Cæsarea (without addition, from its eminence as the Roman magistrate of the Palestrina, and the residence of the procurator). The numerous passages in which it occurs (Acts viii, 40; ix, 30; x, 1, 24; xi, 11; xii, 19; xviii, 22; xxii, 8, 16; xxiii, 28, 33; xxv, 1, 4, 6, 13) show how important a place this city occupies in the Acts of the Apostles. It was situated on the coast of Palestine, on the line of the great road from Tyre to Egypt, and about half way between Joppa and Dor (Josephus, War, i, 21, 5). The journey of the apostle Peter from Joppa (Acts x, 24) occupied rather more than a day. On the other hand, Paul's journey from Ptolemais (Acts xx, 6) was accomplished within the day. The distance from Jerusalem is stated by Josephus in round numbers as 600 stadia (Ant. xiii, 11, 2; War, i, 5). The Jerusalem Itinerary gives sixty-four and a half miles (Weisig, p. 600; see Robinson, Bib. Res. iii, 45). It has been ascertained, however, that there was a shorter road by Asulpatris than that which is given in the Itinerary—a point of some importance in reference to the night's journey of Acts xxii, 8. See ASULPATRA. The actual distance in a direct line is forty-seven English miles.

In Strabo's time there was on this part of the coast merely a town called "Strabo's Tower," with a landing-place (πρόορομον τοιαΐς), whereas, in the time of Tactius, Cæsarea was spoken of as being the head of Judea ("Judaea caput," Tac. Hist. ii, 79). It was in this interval that the city was built by Herod the Great (Josephus, Ant. xv, 9, 6; Strabo, xvi, 2, 27; Pliny, H. N. vi, 15). The work was, in fact, accomplished in ten years. The utmost care and expense were lavished on the building of Cæsarea. It was a proud monument of the reign of Herod, who named it in honor of the Emperor Augustus. The full name was Cæsarea Sebaste (Κασαρεια Σεβαστή, Joseph. Ant. xvi, 5, 1). It was sometimes called Cæsarea Stratonia, and sometimes also (from its position) Maritime Cæsarea (παραλίας, Joseph. War, iii, 3, 1, or ἣ ἐν θαλάσσῃ, id. vii, 1, 8). The magnificence of Cæsarea is described in detail by Josephus in two places (Ant. xv, 9; War, i, 21). The chief features were connected with the harbor itself (called Σαλαμίας λιμιν, on coins and by Josephus, Ant. xvii, 5, 1), which was equal in size to the Piraeus of Athens. The whole coast of Palestine may be said to be extremely inhabitable, exposed as it is to the fury of the western winds; no natural port affording adequate shelter to the vessels resorting to it. To remedy this defect, Herod, who, though an arbitrary tyrant, did much for the improvement of Judea, set about erecting, at immense cost and labor, one of the most stupendous works of antiquity. He threw out a semicircular mole, which protected the port of Cæsarea on the south and west, leaving only a sufficient opening for vessels to enter from the north; so that, within the enclosed space, a fleet might ride at all weathers in perfect security. This breakwater was constructed of immense blocks of stone brought from a great distance, and sunk to the depth of 50 fathoms in the sea. Broad landing-places surrounded the harbor, and conspicuous from the sea was a temple dedicated to Cæsar and to Rome, and containing colossal statues of the emperor and the imperial city. Besides this, Herod added a theatre and an amphitheatre; and, when the whole was finished, he fixed his residence there, and thus elevated the city to the rank of the civil and military capital of Judea, which rank it continued to enjoy as long as the country remained a province of the Roman empire (see Dr. Mansford, Script. Cantuari.). Vespasian was first declared emperor at Cæsarea, and he raised it to the rank of a Roman "colony" (q. v.), granting it, first, exemption from the capitation tax, and afterward from the ground taxes (the real jus Italicum). The place was, however, inhabited chiefly by Gentiles, though some thousands of Jews lived in it (Joseph. War, iii, 9, 1; iii, 14; Ant. xx, 8, 7; Life, 11). It seems there was a standing dispute between the Jewish and Gentile inhabitants of Cæsarea as to the site of the temple, the former being on the left and the latter on the right. The former claimed it as having been built by a Jew, meaning King Herod; the latter admitted this, but contended that he built it for them, and not for Jews, seeing that he had filled it with statues and temples of their gods, which the latter abominated (Joseph. War, iii, 18, 7). This quarrel sometimes came to blows, and eventually the matter was referred to the Emperor Nero, whose decision in favor of the Gentiles, and the behavior of the latter thereupon, gave deep offense to the Jews generally, and afforded occasion for the first outburst, which led to the war with the Romans (Joseph. War, ii, 14). One of the first acts of that war was the massacre of all the Jewish inhabitants by the Romans, and the city was given to the number of 20,000 (Jos. ii, 18, 1). This city was the head-quarters of one of the Roman cohorts (q. v.) in Palestine.

Cesarea is the scene of several interesting circumstances described in the New Testament, such as the conversion of Cornelius, the first-fruits of the Gentiles (Acts x); the residence of Philip the Evangelist (Acts xxii, 8). It was here also, in the amphitheatre built by his grandfather, that Herod Agrippa was emnite of God and died (Acts xii, 21–23). From hence the apostle Paul sailed to Tarasus when forced to leave Jerusalem on his return from Damascus (ix, 80), and at this port he landed after his second missionary journey (xvii, 22). He also spent some time at Cæsarea on his return from the third missionary journey (xxi, 8, 16), and before long was brought back a prisoner to the same place (xxii, 23, 28), where he remained some time in bonds before his voyage to Italy (xxv, 1, 4, 6, 18). After the destruction of Jerusalem, Cæsarea became the spiritual metropolis of all Palestine; but, since the beginning of the 5th century, when the land was divided into three provinces, Palestine Prima, Secunda, and Tertia, it became the capital of the first province, and subordinate to the bishopric of Jerusalem, which was elevated into a patriarchate with the rights of primacy over the "three Palestines." Cæsarea is chiefly noted as the birthplace and episcopal See of Eusebius, the celebrated Church historian, in
the beginning of the 4th century, and was conspicuous for the constancy of its martyrs and confessors in the various persecutions of the Church, especially the last (Euseb. Hist. Eccl. viii, s. 1). It was also the scene of some of Origen's labors and the birthplace of Pro- cope, who continued to be a city of some importance even in the time of the Crusades. It still retains the ancient name in the form of Kaiseriyeh, but has long been desolate. The most conspicuous ruin is that of an old castle at the extremity of the ancient mole. A great extent of ground is covered by the remains of the city. A low wall of gray stone encompasses these ruins, and within the latter, a dry ditch. Between the accumulation of rubbish and the growth of long grass, it is difficult to define the form and nature of the various ruins thus enclosed. Nevertheless, the remains of two aqueducts, running north and south, are still visible. The one next the sea is carried upon high arches; the lower one, to the eastward, carries its waters along a low wall in an arched channel five or six feet wide. The water is abundant and of excellent quality, and the small vessels of the country often put in here to take in their supplies. Cesarea is, apparently, never frequented for any other purpose; even the high-road rarely uses it wide; and there have been seen vain envoys of the numerous pilgrims in Palestine. The present tenants of the ruins are snakes, scorpions, lizards, wild boars, and jackals.—Kitto; Smith.

The building described by St. Paul to the Romans is 100 feet in length, and 40 feet in breadth. It is of the most elegant and magnificient description. The columns, the capitals, the shafts, the entablatures, and the cornices, are of marble, and the whole, together with the floor, is of mosaic work.

The city was destroyed by the Saracens, and rebuilt by the Crusaders. It was the scene of the council of the bishops held in the year 1076, when the sovereigns of Sicily and the emperor of the Romans presided.

The site is the same as that of the ancient city, except that it has been much enlarged and improved. The present name is 100 feet in length, and 40 feet in breadth. It is of the most elegant and magnificient description. The columns, the capitals, the shafts, the entablatures, and the cornices, are of marble, and the whole, together with the floor, is of mosaic work.

The city was destroyed by the Saracens, and rebuilt by the Crusaders. It was the scene of the council of the bishops held in the year 1076, when the sovereigns of Sicily and the emperor of the Romans presided.
the plain and city. It is enclosed by walls of immense strength and thickness, and must have been an almost impregnable fortress. It is of Sarcenic architecture; but many of the fine bevelled stones with which the noble round towers are constructed must have belonged to a far more ancient edifice. This castle received the name of St.-Andelshch about the time of the Crusades, perhaps from the half-gipsy Arab tribe of the same name that still inhabit the vicinity. A short distance east of this castle there is a very ancient ruin, surrounded by a thick grove of venerable oaks.

There are also ruins west of Banias, consisting of columns, capitals, and foundations of buildings, together with canals that formerly conveyed the water of the brook, now crossed by a stone bridge. Above the fountain are Greek inscriptions in the rock, confirming the testimony of Josephus that Agrippa adorned Banias with royal liberality, and also sustaining the ancient statements that the fountain was held sacred to Pan (Biblioth. Sacra, 1846, p. 194). See Roland, Palast. p. 918 sq.; Eckhel, Doctr. Num. iii, 389 sq.; Burchhardt, Syraks, p. 37 sq.; Buckingham, ii, 314 sq.; Thomson, Land and Book, i, 344 sq.; Schwarz, Palast. p. 144; Mod. Traveller, p. 327 sq., Am. ed.: Pauser, Palast. p. 215; Wilson, Lands of Bible, ii, 173 sq.; Porter, Damaecus, i, 307 sq.

Cæsarius, St. of Arles, was born in 405 at Chalons-sur-Saône. He early developed monkish tendencies, and privately withdrew from his parents to the monastery of Lorins, where he was appointed to the office of cellarer. Afterward, falling ill from extreme asceticism, he was obliged to remove to Arles, and was beloved by Eunius the bishop, whom, in 502, he succeeded in the see of Arles. He died in 542, leaving many homilies, containing evidence of much piety combined with great sanctification. A volume of them was edited by Stephen Baluze (Paris, 1669, 8vo). The others are given in the Biblioth. Patrum, viii, 819, 860, and xxvii, 321. His Regula Monachorum (contained in Holstenii Codex Reg. Monast. Rome, 1661) was adopted by many convents, and often used by the founders of orders. Many of his rules of Cæsarius existed until the rule of Benedict was generally adopted.

Cage at Banias.

A graphic sketch of his life and labors is given by Neander, Light in Dark Places, p. 50.—Mosheim, Ch. Hist. i, 164, 166; Neander, Ch. Hist. ii, 261, 304, 660; Cave, Hist. Lit. anno 802.

Cæsarius of Heisterbach, a preacher and historian of note, in 1199 became a Cistercian monk in the monastery of Heisterbach, in the diocese of Cologne. He became eventually prior of the convent of the Valley of St. Peter, near Bonn. He lived until the year 1227, but when he died is unknown. His writings are, i. De mirorullis et viris notabilibus qui temporis (chiefly in Germany, Cologne, 1591, 8vo); the first edition is without name of place or date:—2. Vita S. Engelberti archip. Colon. (Cologne, 1633, and in Surin, November 7th);—3. Homilia, edited under the title of Fasciculi Mortalitatis, by Coppenstock (Cologne, 1615);—4. Catalogus Epiphorum Coloniensium, published, with a continuation by another author, in vol. ii of the Fontes Rerum German. (1845):—5. An inedited Vita S. Elisabetha is preserved among the manuscripts of the library of Brussels. Many of his sermons are highly praised for their evangelical tone, as well as for their eloquence. His De Mirorullis affords a graphic picture of the state of his times. See Kaufmann, Cæsarius v. Heisterburch (Köln, 1850); Cave, Hist. Lit. anno 1225; Herzog, Real-Encyclop. ii, 490.

Cæsarius of Nazianzus, a younger brother of Gregory Nazianzen, was educated first at Alexandria, whence he proceeded to Constantinople, where he obtained high honors, resisted the attempts of the Emperor Julian to win him from the faith, and died under Valens in 369. He was distinguished for his proficiency in physics and mathematics. Gregory delivered his funeral sermon (Oratio funebris in laudem Cæsarii strator, Or. viii), in which his piety and devotion are lauded. According to Suidas, he wrote contra Graecos, and four Dialogues are given as his in the Latin editions of St. Gregory and in the Sibyllae Patrum. —Ullmann, Life of Gregory, p. 132; Cave, n. a. 862.

Cæsennius. See Pætus.

Caffarria. See Kaffares.

Cage (צバル, καλυκ, φιλαρχ), Bird-cages are named in Jer. v. 27; Rev. xviii. 3; and are perhaps implied in Job xli. 5, where "playing with a bird" is
CAIANS

mentioned. See Bird. In the first of these passages the Sept. renders it by παπιον, a sware, implying that it was used for holding decoys with which to entrap other birds until the cage was full—an idea which the derivation of the Heb. word confirms (from צַפָּה, to cleap together by the shutting of the valves or trap). This interpretation is therefore that of the Talmud, "a place of fattening," implying that it was used for holding wild or tame fowls until they became fit for the table. The same article is referred to in Ecclus. xi, 30, under the term כָּרָן, which is elsewhere used of a taping basket. See Fowling. In Rev. xviii, 2, the Greek term ἑύρημα, literally translated, means imprisonment or restricted habitation rather than a cage. This just suffices to show that the ancient Israelitess kept birds in cages; but we have no further information on the subject, nor any allusions to the singing of birds so kept. The cages were probably of the same forms which we still observe in the East, and which are shown in the annexed engraving. It is remarkable that there is no appearance of bird-cages in any of the domestic scenes which are portrayed on the mural tablets of the Egyptians. In Amos viii, 12, the same word קנים denotes a fruit-basket, so-called, doubtless, from its resemblance to a cage. See Basket.

Caïans (I.), a name given by Irenæus, Epiphanius, and Theodoret to a sect of Ophites, whom modern writers call more correctly Cainites (q. v.). (II.) A sect mentioned by Tertullian, which rejected the doctrine of baptism. It is doubtful whether this sect is identical with the preceding. Tertullian mentions a certain Quintillus as the founder, and some have concluded from this that the sect is identical with the Quintillians (q. v.).

Caïaphas (Καὶαφάς, perhaps from the Chald. קַיפָּה, depression), called by Josephus (Ant. xviii, 2), was high-priest of the Jews in the reign of Tiberius Caesar, at the beginning of our Lord's public ministry (Luke viii, 2), A.D. 25, and also at the time of his condemnation and crucifixion (Matt. xxvi, 57; John xi, 49; xviii, 13, 14, 24, 38; Acts iv, 6). A.D. 25. The Procurator Valerius Gratus, shortly before his leaving the province (A.D. 25), appointed him to the dignity, which was before held by Simon ben-Camith. He held it during the whole procuratorship of Pontius Pilate, but soon after his removal from that office was deposed by the Proconsul Vitellius (A.D. 39), and succeeded by Jonathan, son of Ananus (Joseph. Ant. xviii, 4, 8).

Some in the ancient Church confounded him with the historian Josephus, and believed him to have become a convert to Christianity (Ammianus, Bibloth. Orient. ii, 185). His wife was the daughter of Ananus, or Ananus, who had formerly been high-priest, and who still possessed great influence among them. In sacred lot matters, several of his family successively holding the high-priesthood. The names of Anna and Caïaphas are coupled by Luke, "Anna and Caïaphas being the high-priests:" and this has given occasion to no small amount of discussion. Some maintain that Anna and Caïaphas thus designated the heads of the high-priesthood by turns; but this is not reconcilable with the statement of Josephus. Others think that Caïaphas is called high-priest, because he then actually exercised the functions of the office, and that Anna is so called because he had formerly filled the situation. But it does not thus appear why, of those who held the high-priesthood before Caïaphas, Anna in particular should be named, and not Ishmael, Eliazer, or Simon, who had all served the office more recently than Anna. Hence Kuinol and others consider it as the more probable opinion that Caïaphas was the high-priest, and that Anna was his deputy, called in the Hebraic, נְוָנָא, sagan. Nor can that Caïaphas be thought unworthy of a man who had filled the pontifical office, since the dignity of sagan was also great. Thus, for instance, on urgent occasions he might even enter the Holy of Holies (Lightfoot, Hor. Heb. ad Luc. iii, 2). Nor ought it to seem strange or unusual that the vicar of a high-priest should be called by that name. For the name of the priest who had officiated in the office were after by courtesy called high-priests, with greater justice might Anna, who was both a pontifical person and high-priest's vicar, be so called. In fact, the very appellation of high-priest is given to a sagan by Josephus (Ant. xvii, 6, 4). (See the commentators on Luke iii, 2, particularly Hammond, Lightfoot, Kuinol, and Bloomfield.) See Ananias. Caïaphas belonged to the sect of the Sadducees (Acts v, 17). (See Hechis, De Sadduceismo Caïaphas, Bud. 1718.) See High-priest.

The wonderful miracle of raising Lazarus from the dead convinced many of the Jews that Christ was sent from God; but the high priests and the Pharisees, alarmed at the increase of his followers, summoned a council, and pretended that their liberties were in danger; that the Romans would become Jealous of them, and that their destruction was inevitable if something; were not done at once to check his progress. Caïaphas was a member of the council, and expressed his decided opinion in favor of putting Jesus to death, as the only way of saving the nation from the evils which his success would bring upon them. His language was, "Ye know nothing at all; nor consider that it is expedient for us that one man should die for the people, and that the whole nation perish not" (John xiv, 49). This counsel was wicked and unjust in the highest degree; but as there was no offence charged, it seemed the only plausible excuse for putting Christ to death. The high-priest's language on this occasion was prophetic, though he did not intend it so. The evangelist, in giving an account of this extraordinary occurrence, makes a reference on the prophetic language of the high-priest, and shows the extent and blessedness of the dispensation of mercy through Jesus Christ. Nothing of this, however, was in the mind of the cruel and bigoted high-priest. After Christ was arrested, he was first taken before Ananus, who sent him to his father-in-law Caïaphas, who probably lived in the same house; he was then arraigned before Caïaphas, and an effort was made to produce false testimony sufficient for his condemnation. This expedient failed; for though two persons appeared to testify, they did not agree, and at last Caïaphas put our Saviour himself upon oath that he had not seen him. Whether he was indeed the Christ, the Son of God, or not: The answer was, of course, in the affirmative (q. v.), and was accompanied with a declaration of his Divine power and majesty. The high-priest pretended to be greatly grieved at what he considered the blasphemy (q. v.) of our Saviour's pretensions, and forthwith appealed to his enraged enemies to say if in the name of God, what they had done. They answered at once that he deserved to die, and then, in the very presence of Caïaphas, and without any restraint from him, they fell upon their guiltless victim with insults and injuries. As Caïaphas had no power to inflict the punishment of death, Christ was taken from him to Pilate. The Roman governor that his execution might be duly ordered (Matt. xxvi, 3, 57; John xviii, 13, 28). Theibeged fury of Caïaphas exhibited itself also against the first efforts of the apostles (Acts iv, 6).

Treatises more or less general on the character and conduct of Caïaphas in the above transaction have
been written in Latin by Baumgarten-Crusius (Oppac. p. 19 sq.), Hase (Brem. 1703, also in Iken's Theeaur. ii. 549 sq.), Hecht (Budin. 1719), Haufen (Viteb. 1713), Hoder (Upsal, 1771), Hofmann (in Menthenhi Thea. ii. 216-222), Langnershausen (Jan. 1893), Salzs- mann (Argent. 1797, also in Lange's Lect. (1821), Schick- endanz's Tfr. (Frankfurt V. 1755), Weber (Viteb. 1807), Selit- ner (Aldorf, 1721); in French by Dupin (Paris, 1829). See also Evans, Script. Bibl. ii. 257.

Caiet (or Cayet), Pierre Victor Palma, was born at Montrichard, in Touraine, in 1255. He became a Priest under the instructions of Peter Ramus, at Paris; afterward studied theology at Geneva, and, afterward, at Angers. As a minister, he was called Catharrism which he abhorred. The insubordination of Bourbon made him her chaplain, and brought him to Paris. Here, under the influence of cardinal Du- perron, he abjured Protestantism, Nov. 9, 1556, became professor of Hebrew and Oriental languages in the college of Navarre, and died March 16, 1610. He left many controversial works, on the motives which led to his conversion; on the Ecstatics; on the Mass; on the Church and the Apostolic Succession, etc. His best known works are his Chronologie Sepulchrale and Noumenale, 1598-1604 (Paris, 1605, 8vo.)—Hoeffer, Nowk. Bibl. Gen. ix. 509.

Cain (Heb. קין, qayin, a Lane [but see below]), the name of a man and of a city. See Kente; Tubal-Cain.

T. Sept. and N. T. Kid. The root seems to be קין, to beget, perhaps with allusion to the murder; the context, however, ver. 1, makes this קין, to create, to make; others, as Eusebius and Chrysostom, derive it from some root signifying envy: Von Bohlen, Intro- duc. to Gen. ii. 85-87, seeks it in the Arabic مع الموت, a smith, from the art introduced by the Cainites; Josephus Graecizes it, קיתמ, -loq. Ant. i. 2, 2.) The first-born (B.C. apparently cir. 2018) was the first murderer and fratricide, B.C. cir. 4048. His his- tory is detailed in Gen. chap. iv.; the facts there given are in brief: he was the eldest son of Adam and Eve; he followed the business of agriculture; in a fit of jealousy, roused by the rejection of his own sacrifice and the acceptance of Abel's, he committed the crime of murder, for which he was expelled from the vicini- ty of Eden, and led the life of an exile; he settled in the land of Nod, and built a city, which he named after his son Enoch; his descendants are enumerated, together with the inventions for which they were re- markable. Occasional references to these are made in the T. (Heb. xxviii. 14; 1 John iii. 12; Jude 9)

Among all the instances of crime, none impress the mind with a stronger feeling of horror than that of Cain. It is not, however, clear that he had fully pre- meditated taking the life of his brother, if, indeed, he was aware by what a slight accident death would ensue; for this was the first instance of human mortality. But it is certain that he had resolved upon some desperate outrage upon his brother's person, and he deliberately took occasion to perpetrate it. Abel, as most think, brought two offerings, the one an olation, the other a sacrifice. Cain brought but the former— a mere acknowledgment, it is supposed, of the sovereignty of God— neglecting to offer the sacrifice, which would have been a confession of fallen nature, and, typically, an atonement for sin. It was not, therefore, the mere difference of feeling with which the two offerings were brought which constituted the virtue of the one or the guilt of the other brother. "The majus- cility of his temper showed itself in his unwillingness to ask his brother for a vicim from among his herd. He offered before God an unlawful sacrifice," because a bloodless one, Heb. ix. 22 (Jarvis, Church of the Redeemed, p. 14). The circumstances connected with this offence are related in a brief but graphic manner in the Heb. text, the force of which is not well brought out in the Auth. Vers. (Gen. iv. 2-16). Abel, being a

herdsman, naturally brought at the end of the week (for the Sabbath was already a well-known institution) an offering of the first-born and fattest of his flocks, while Cain, as a husbandman (hence the greater se- crecy of the murder which blotted his name), presented an obligation of vegetable productions. The undevout temper and wicked nature of Cain are suffi- ciently evinced by his resentment against the Al- mighty, as if partial to his brother (see below). The Divine Being condescends to expostulate with him on his unreasonable behavior, and to warn him of the danger of continuing the jealousy which characterized his heart. Contumacious as he was, he had to have already entertained against Abel: "If thou re- fornest, there is forgiveness [with me for thy past of- fences]; but if not, [then beware, for] sin cruise on thy door [like a wild beast ready to seize thee on the first opportunity], and against thee is its design; but do thou subdue it [i.e., thy evil disposition]." Instead of heeding this advice, however, the ill-natured man, taking the first occasion to narrate the circumstances to his brother (probably in an upbraiding manner), fell into the very snare of Satan against which he had been warned; his feelings became again excited, as they were at the moment of conversion, and, thus being no one to resist its insinuations or to avoid the consequences, he suddenly turned against his brother, and by an angry blow (probably with some agricultural implement, in the formation of which he had doubtless already be- gun to exercise the mechanical ingenuity for which his descendants became famous) he laid him dead upon the ground. Instead of the penitence which the sight of his brother's blood ought to have inspired in him his horror-stricken soul, the craven murderer insolently de- mands of the all-seeing God, when questioned as to his crime, "I know nothing about the matter; am I my brother's keeper?" But when conviction is fastened upon him, he immediately and with the despairing but still impetuous remorse of Judas, the guilty wretch exclaims, "My iniquity is too great for forgiveness! (אכילה דלף לאלים חמיו" בך התلوحו) μὴ ᾠδείναι μου γὰρ ὁ ἄνθρωπος μουτ for thou hast utterly driven me out this day from the face of the ground [of this pleasant region]." and I shall be in danger of starvation, and even of perishing by the hand of every stranger whom I meet. (Gen. iv. 13-15.) See Niebuhr, loc. cit. back to the text. The punishment which attended the crime admitted of no escape, scarcely of any conceivable alleviation. "He lost the privileges of primogeniture, was deprived of the priestly banishment from 'the presence of the divine glory' and the cherubim. The divine glory was no longer the hopes of mercy, and, with his descendants, delivered over unprotected to the assaults of the great adversa- ry" (Jarvis, Church of the Redeemed, p. 14). Cursed from the earth itself, the earth was doomed to a double barrenness wherever the offender should set his foot. Physical want and hardship, therefore, were among the first of the miseries heaped upon his head. Next came those of mind and conscience: "The voice of thy brother's blood crieth unto me from the ground." Nor did any retreat remain to him from the terrors of his own soul or those of Divine vengeance: "From thy face shall I be hid," was his accouniting and hope- less cry. The statement that "Cain went away from the presence of the Lord' represents him as abiding, till thus exiled, in some favored spot where the Al- mighty still, by visible signs, manifested himself to his fallen creatures. The expression of dread lost, as he wandered over the face of the earth, he might be unable to find a place of habitation where he could escape from the mouth of a murderer. But he was to be pro- tected against the wrath of his fellow-men; and of this God gave him assurance, not, says Shuckford, by set- ting a mark upon him, which is a false translation, but by appointing a sign or token which he himself might understand as a proof that he should not perish by the hand of another, as Abel had perished by his. This
Sign was probably no other than the Divine denounced at the time against any one who should venture to do him injury, and which, being well known, would prove a sufficient control. As such it is referred to by his descendant Lamech (Gen. iv. 20). This may account for the strange bequest of his son, which Jehovah appointed a token for Cain, so that no one who met him should slay him. What was the Divine purpose in affording him this protection it is difficult to determine. That it was not with the intention of prolonging his misery may be conjectured from the fact that it was granted in answer to his own appeal for sanctuary. Thus Jehovah had prevented the possibility of his becoming a true penitent, and of his having at length obtained the Divine forgiveness (Ortolub, 
Cainas non desperans, Lips. 1706).

It may be worthy of observation that especial mention is made of the fact that Cain, having traveled into the land of Nod, there built a city; and further, that his descendants were chiefly celebrated for their skill in the arts of social life. In both accounts may probably be discovered the powerful struggles with which Cain strove to overcome the difficulties that attended his position as one to whom the tillage of the ground was virtually denied. The following points also are deserving of notice.

(1.) The position of the "land of Nod." The name itself tells us little; it means right or exile, in reference to ver. 12, where a cognate word is used: Ver. 10 of the Hebrew name Hind (יָדוֹן) had been erroneously read an-No, is too far fetched; the only indication of its position is the indefinite notice that it was "east of Eden" (ver. 16), which, of course, throws us back to the previous settlement of the position of Eden itself. Knoebel (Comm. in loc.), who adopts an ethnological interpretation of the history of Cain's descendants, would identify Nod with the whole of Eastern Asia, and even hint at a possible connection between the names Cain and China. It seems vain to attempt the identification of Nod with any special locality; the direction "east of Eden" may have reference to the previous notice in iii. 24, and may indicate that the land was opposite to (Sept. κατατάσσεται) the entrance, which was Horton. It is not improbable that the east was further used to mark the direction which the Cainites took, as distinct from the Sethites, who would, according to Hebrew notions, be settled toward the west. Similar observations must be made in regard to the city Enoch, which has been identified with the names of the Hienchi, a tribe in Cappadocia (so Hessec), Annoos, a place in Upper Egypt (Iunius, Chalms), an ancient town in India (Bohlen), and Iconium, as the place where the defiled King Annacas was honored (Ewald): all such attempts at identification must be subordinated to the previous settlement of the position of Eden and Nod. See Non.

(2.) The "mark set upon Cain" has given rise to various speculations, many of which would have been broached if the Hebrew text had been consulted: the words probably mean that Jehovah gave a sign to Cain, very much as signs were afterward given to Noah (Gen. ix. xix. 13), Moses (Exod. iii, 2, 12), Elijah (1 Kings xix. 11), and Hezekiah (Isa. xxxvii. 7, 8). Whether the sign was perceptible to Cain alone, and given to him once for all, in token that no man should slay him, or whether it was one that was perceptible to others, and designed as a precaution to them, as is implied in the A. V. is uncertain; the nature of the sign is uncertain; it is still more uncertain (but see above). (See Kraft, De Exciur. Scand. 1. 28.)

(3.) The narrative implies the existence of a considerable population in Cain's time; for he fears lest he should be murdered in return for the murder he had committed (ver. 14). Josephus (Ant. i. 2, 2) explains his fears as arising, not from men, but from wild beasts; but such an explanation is wholly unnecessary. The family of Adam may have largely increased before the birth of Seth, as is indeed implied in the notice of Cain's wife (ver. 17), and the mere circumstance that none of the other children are noticed by name may be explained on the ground that their lives furnished nothing worthy of record. Thus Jehovah might have preserved the names of the relatives of Cain, who had now branch ed out into a considerable community, and as his banishment would necessarily estrange him from them, he entertained the natural apprehension lest in the course of his remaining lifetime they might even become his enemies. He would regard them as a murderer. See Blood- revenge. His case must evidently have been one of his sisters (comp. "sons and daughters," Gen. v. 4). Tradition calls her Sam. (Epiph. Hier. xxix, 6) or Asura (Malalas, p. 2); the Arabs call Cain himself Kabyl by abbreviation with the name of his brother (D'Herbelot, Bibl. Or. s. v. Cahil). See Adam.

(4.) The character of Cain deserves a fuller notice. He is described as a man of a morose, malicious, and revengeful temper; and that he presented his offering in the state of mind is implied in the rebuke contained in Gen. iv. 7, which may be rendered thus: "If thou dost not do well [there is an elevation (πολύν) of the countenance], is there not an elevation (πολύν) of the countenance," sin lurketh (as a wild beast) at the door, and to thee is its desire; but thou shalt rule over it." (So Gesenius and others; but see above.) The narrative implies therefore that his offering was rejected on account of the temper in which it was brought (Stich. De colloquio Dei cum Caio. Alit. 1766). See Abel.

(5.) The descendants of Cain are enumerated to the six generation. Some commentators (Knoebel, Ver. Bohlen) have traced an artificial structure in this genealogy, by which it is rendered parallel to that of the Sethites; e.g. there is a decade of names in each commencing with Adam and ending with Jabal and Noah, the deficiency of generations in the Cainites being supplied by the addition of the two younger sons of Lamech to the list; and there is a considerable similarity in the names, each list containing a Lamech and an Enac, while Cain in the one Cain-an in the other, Methusael—Methuselah, and Mahel—Melchiel, the inference from this comparison being that the one was framed out of the other. It must be observed, however, that the differences far exceed the points of similarity; that the order of the names, the number of generations, and even the meanings of those which are noticed are different, and that they are in no way instituted to remove the impression of artificial construction. (See Bochart, Hieros. iii. 537.) See Patriarch.

(6.) The social condition of the Cainites is prominently brought forward in thehistory. Cain himself was an a. riculturist, Abel a shepherd: the successors of the latter are represented by the Sethites and the progenitors of the Hebrew race in later times, among whom a pastoral life was always held in high honor from the simplicity and devotional habits which it engendered: the successors of the former are depicted as the reverse in all these respects. Cain founded the first city; Lamech instituted polygamy; Jacob overthrew the nodic life; Tubal-cain invented musical instruments; Tubal-cain was the first smith; Lamech's language takes the stately tone of poetry; and even the names of the women, Naamah (pleasing), Zillah (usile), Adah (ornamental), seem to bespeak an advanced state of civilization. But, along with this, there was vice, necromancy, and inhumanity. See Antediluvians.

(7.) The contrast established between the Cainites and the Sethites appears to have reference solely to the social and religious condition of the two races. On the one side there is pictured a high state of civiliza-
tion, unsanctified by religion, and productive of luxury and violence; on the other side, a state of simplicity which afforded no material for history beyond the declaration, "Then began men to call upon the name of the Lord." The historian thus accounts for the progressive degeneration of the religious condition of man, the evil gaining a predominance over the good by its alliance with worldly power and knowledge, and producing the state of things which necessitated the flood. See Deluge.

(8) Another motive may be assigned for the introduction of this portion of sacred history. All ancient nations have loved to trace up the invention of the arts to some certain author, and, generally speaking, these authors have been regarded as objects of divine worship. Among the Greeks Apollo was held to be the inventor of music, Vulcan of the working of metals, Triptolemus (see I. yig. 277) of the plough. A similar feeling of curiosity prevailed among the Hebrews; and hence the historian has recorded the names of those to whom the invention of the arts was traditionally assigned, olivating at the same time the dangerous error into which other nations had fallen, and reproaching the state of their religion, the position which the inventors held. See Art.; Astronomers.

2. (Heb. with the article, a bos-Ca'gin', פִּכְאֶנָּה, = "the lance," but may be derived from יִכְאֶנָּב, "a nest," possibly in allusion to its position; Sept. Κανα'α, v. r. Zawaa'iti, by including the name preceding; Vulg. Caoncin.) One of the cities in the low country (Shefela') of Judah, named with Zanoah and Gibeah (Josh. xv, 56); apparently the modern village F'akem, a short distance south-east of Hebron (Van de Velde, Memoir, p. 300). It is mentioned in a statute, said to be the place where Lot stopped after his flight from Sodom (Robinson, Researches, ii. 130).

Cainan (Heb. K'eoyam', כְּעֶנָּךְ, derivation ambiguous, as in the case of "Cain" [q. v.], and signifying either possessor [so Fürst] or forgeman [so Gesenius]; Sept. Koivvā, but Kāivvā in Chron. and N. T.; Josephus Kōivvā; And. i. 3, 4), the name of one or two men. The term is evidently applied to the eldest (oldest) son of Enos (who was 90 years of age at his birth), B.C. 3846. He was himself 70 years old at the birth of his (first) son Mahalalel, B.C. 3876, after which he lived 840 years, and died B.C. 3831, aged 910 (Gen. v. 9-14). See Longevity. The rabbinical tradition was that Cainan placed idol-worship and astrology—a tradition which the Hellenists transferred to the post-diluvian Cuban. Thus Ebræam-Syrus asserts that the Chaldees in the time of Terah and Abram worshiped a graven god called Cainan; and Gregory Bar-Hebraeus, another Syrian author, also applies it to the son of Arphaxad (Mill, Vind. of. of Genealogies, p. 130). The origin of the tradition is not known; but it may probably have been suggested by the meaning of the supposed root in Arabic and the Aramean dialects, just as another signification of the same root seems to have suggested the tradition that the daughters of Cain were the first who made and sang to musical instruments (Genesis, Theaur. s. v. כְּעֶנָּךְ). His name is Anglicized "Kenan" in the Auth. Vers. at 1 Chron. i. 2.

2. The son of Arphaxad, and father of Sala, according to Luke iii, 35, 36, and usually called the second Cain. He is also found in the present copies of the Sept. in the genealogy of Shen, Gen. x. 24; xi. 12 and 13 (where his history is given in full like the rest: "And Arphaxad fathered Heber. And Arphaxad lived after he begat Cainan 400 years, and begat sons and daughters. And he died. And Cainan lived 180 years, and begat Salah. And Cainan lived after he begat Salah 300 years, and begat sons and daughters. And he died,"); and 1 Chron. i. 18 (though he is omitted in 1 Chron. i. 24), but is nowhere named in the modern text, nor in any of the versions made from it, as the Samaritan, Chaldee, Syriac, Vulgate, etc. As the addition of his generation of 100 years in the series of names is of great chronological importance, and is one of the circumstances which render the Septuagint computation of time longer than the Hebrew, this matter has engaged much attention, and has led to great discussion among chronologers. See Chronology. Some have suggested that the Jews purposely excluded the second Cain from their copies, with the design of rendering the Septuagint and Luke suspect; others that Moses omitted Cainan, being one of reckoning ten generations only from Adam to Noah from Numbers. Some suppose that Arphaxad was father of Cainan and Salah—of Salah naturally, and of Cainan legally; while others allegation that Cainan and Salah were the same person under two names. It is believed by many, however, that the name of this second Cainan was not originally in the text even of Luke, but is an addition of inadvertent transcribers, who, remarking, it in some copies of the Septuagint, added it (Ruimol, ad Luc. iii. 30) Hales, though, as an advocate of the later chronology, predisposed to its retention, decides that we are fully warranted to conclude that the second Cainan was not originally in the Hebrew text, at least, nor in the Septuagint and other versions derived from it (Chronology, i. 231). Some of the grounds for this conclusion are, 1. That the Hebrew and Samaritan, with all the ancient versions and targums, concur in the omission; 2. That the Septuagint is not consistent with itself; for in the repetition of genealogies in 1 Chron. i. 24, it omits Cainan and agrees with the Hebrew text; 3. That the second Cainan is silently rejected by Josephus, by Philo, by John of Antioc, and by Eusebius; and that, while Oriene retained the name itself, he, in his copy of the Septuagint, marked it with an obelisk as an unauthorized reading, it certainly was not retained in any copy of the Septuagint from which Berosus, Eupolemus, Polyhistor, Theophilus of Antioc, Julianus Africanus, or even Jerome, had access to. Moreover, it seems that the intrusion of the name even into the Sept. is comparatively modern, since Augustine is the first writer who mentions it as found in the O. T. at all. Demetrius (B.C. 170), quoted by Eusebius (Prop. Emom., i. 21), reckons 1860 years from the birth of Shen to Jacob's going down to Egypt, which seems to include the 130 years of Cainan. But in the great fluctuation of the numbers in the ages of the patriarchs, no reliance can be placed on this argument. Now the changes of the figures have not been altered in the modern copies of Eusebius, to make them agree with the computation of the altered copies of the Sept. 4. That the numbers indicating the longevity and paternity of this patriarch are evidently borrowed from those immediately adjoining, as is the name itself from that of the antediluvian patriarch before him. See Genealogies, According to Bohart, Phyleg., lib. ii. cap. 13; Mill's 'Index' of our Lord's Geneal. p. 148 sq.; Rus, Harmonie. Emom., i. 364 sq.; Michaelis, De Chronolog. Monarch. post d'Ane. (in the Commentar. Soc. Gott. 1763 sq.; translated in the Am. Bib. Repose, July, 1841. p. 114 sq.); Vater, Comment. zum Pent. ii. 18; See Geneal. of Antioc (Curtius).

Cainites, a sect of Gnostics that sprung up about the year 130, and is classed with the Ophitus. (q. v.)
CAIUS

or Serpentarians. They held that Sophocles (Wisdom) found means to preserve in every age in this world, which the Demiurge had created, a race bearing within them a spiritual image of the Deity, and this image was to continue upon opposing the tyranny of the Demiurge. The Cainites regarded Cain as the chief of this race. They honored Cain, and the evil characters of Scripture generally, on the ground that, in proportion to the hatred such characters evinced of the laws of the God of this world (the Demiurge), the more worthy did they act and live, for they were determined to destroy that kingdom of the Demiurge. For the same reason, they honored Korah, Dathan, and Abiram, as well as the inhabitants of Sodom, and Judas Iscariot, whom they regarded as procurers of the death of Christ from the purest motives; for he knew that this was the only possible way of extinguishing the destruction of the Demiurge's kingdom. Hippolytus mentions the Cainites in his Philoegnomeni, viii, 12.—Neander, Ch. Hist. ii, 448; August. De Hares, cap. xviii; Tertull. De Pseph. cap. xiviii; Lardner, Works, viii, 560.

Caius (of the New Test.). See GAIUS.

Caius (emperor of Rome). See CALIGULA.

Caius or Galus, a presbyter of the Church of Rome, who flourished about 210, in the time of Zephyrus, Gallus, and Gaius, who called him Ἱωάννης ἤρως ἠδάμπτος, a designation the meaning of which is not clear. When at Rome, he held a celebrated disputaion with Proclus, the head of a sect of Montanists, which he afterwards reduced to writing in the form of dialogues. Eusebius quotes fragments of this work in lib. ii, cap. 23, and also in lib. iii, cap. 26, and lib. vi, cap. 20. Caius also wrote a book called The Labymlisti, and another against Artemon, unless the former be the same with the work attributed to Origen, as Cave supposes. Eusebius gives an extract from the Parasus Labyrinthius against Artemon and Theodotus, lib. v, cap. 26. Photius also attributes to this Caius a Treatise on the Universe, but both are no longer extant. The "Landynth" are now attributed to Hippolytus. See Bunsen, Hippolytus and H's Times; also Origen or His Polyt. in the Meth. Quarterly Review, 1851, p. 466; London, s. v. See HIPPOLYTUS.

Caius or Galus, a Dalmatian, elected bishop of Rome in 938, and is said to have suffered martyrdom under Diocletian. He was elected, with notes, etc., by Cass. Bellius, a priest of the oratory of Urbino, and subsequent to the Acts of his Martyrdom, published at Rome in 1628.

Caius, John (Keke or Key, Latinized into Caius), M.D., was born at Norwich Oct. 6, 1310, and became successively first physician to Edward VI, Mary, and Elizabeth. He died July 29, 1578. He founded the college which bears his name at Cambridge for twenty-three students. He was a good classical scholar, and wrote many treatises on subjects connected with medicine and natural history. He published also a treatise on the antiquity of the University of Cambridge (which he states was founded by the Canute, 824 years before Christ), and another on the pronunciation of Greek and Latin. His tomb still remains in Caius College, with only this inscription, "Eui Caius,"

Cajetan (GAETANO TOMMASO DI VIO), cardinal, surnamed from Gaeta, where he was born, Feb. 29, 1469 (others say July 25, 1470). His proper name was Jacob, but he assumed that of Thomas in honor of Thomas Aquinas. At fifteen he became a Dominican, and in 1516 he was appointed general of his order. In 1517 Leo X made him cardinal, and also his legate in Germany, the principal object of his mission being to bring back Luther to the obedience of the Holy See before his separation was finally completed. Cajetan fulfilled his mission in a hasty and imperious manner, and nothing came of it. In 1521 he was appointed to the see of Gaeta, after which he was employed in other missions, and died at Rome in 1534. He published a Version of the O. T. (Libr. Vet. Test.) (Lyons, 1639, 5 vols. fol.) — In Summam Thomae Aquinatis Comment. — Opuscula (among which is his treatise on the authority of the pope, in which he gives vent to the extreme views of ulteriorism, and still in use), and (Eliazi, in order of the faculty of Paris) — Tractatus de compositione papae et concilii (Venice, 1531). His works are collected, and somewhat modified (Lyons, 1639, fol.). — Mosheim, Ch. Hist. iii, 28 note; Hoefer, Nouv. Biogr. Generale, viii, 143; Horne, Bibliog. Appendix, pt. 1, ch. sect. 4.

Cake (represented by several Heb. words; see below). The Hebrew word occurs various times, and a very general form was the form usually given to Oriental bread (2 Sam. vii, 19; 1 Kings xvii, 12). See OAF. They were leavened or unleavened. They also offered cakes in the Temple made of wheats or barley, kneaded sometimes with oil and sometimes with honey. For the purposes of offering, these cakes were salted, but unleavened (Exod. xxix, 2; Lev. ii, 4). In Jer. VII, 16; xlv, 19, we read of the Hebrews kneading their dough "to make cakes to the queen of heaven" [see ASHTORETH], which appears to have been, from early times, an idolatrous practice, and was also the custom of the Greeks and Romans. The ancient Egyptians also made offerings of cakes to their deities. In Hosea vii, 8, Ephraim is called "a cake not turned." This figurative expression illustrates the mixture of truth and idolatry (Jews and Gentiles among the Ephraimites) by dough baked on one side only, and, therefore, neither dough nor bread. See BREAD.

1. For secular Use.—The ordinary (wheat) bread of the Hebrews certainly had the shape of flat biscuits, and as this has been already sufficiently discussed under the article BAKE, we will here consider only those finer sorts, which appear to have been of more artificial manufacture. The terms for these are as follows:

(a.)* Ash-cakes, גֶּלֵּי, suggoth. See ASH-CAKE.

(b.)* Pancakes, baked in oil in the גֶּלֵּי הַמַּשָּׁבָה, marché, skil, or pot (Lev. ii, 7; see Jarchi in Rosenmuller, ad loc.), perhaps like modern doughnuts. See Fatting-

PAN. Different are the גָּלֵל, lebooth (2 Sam. xxiii, 6–18; Sept. κολλύστατα), cakes kneaded of dough (ver. 8), which, boiled in a deep pan, were emptied out from its tender, but not liquid (ver. 8, 9). The import of this last, from the etymology, is very uncertain (see Rüdiger, De interpret. Arab. libri hist. p. 94; Thenius on Sam. xxiii, 8; Gesenius, Thes. p. 141). It was probably a kind of fancy cake, the making of which appears to have been an accomplished work, since Tamar was required to prepare it for Ammon in his pretended illness (2 Sam. xxiii, 6).

(c.)* Hole-cakes, גָּלֶל, challoth (2 Sam. vi, 19), which were mingled with oil (גָּלֶל מַרְמָשׂ, behr), and baked in the oven (Lev. ii, 4).

(d.)* Wafers, וַפי, nêlkhudim* (Exod. xxix, 2; Lev.

viii, 26; 1 Chron. xxiii, 29), made very thin (Gr. λάβανος), and spread with oil (גָּלֶל מַרְמָשׂ, behr), and spread with oil (גָּלֶל מַרְמָשׂ, Sept. dia-

καταχροσύνα τιν νομάκος). See WAFER.

(e.)* Crackers, the גָּלֶל, nikudrim, of 1 Kings xiv, 8, translated "cracknels" in the Authorized Version, an almost obsolete word, denoting a kind of crisp cake, q. d. "crumb-cake." The original would seem, by its etymology (if from אֶפְקֶל, speckled, spotted, Gen. xxx, 32 sq.), to denote something spotted or sprinkled over, etc. Buxtorf (Lex. Talm. col. 136) explains thus: "Little circles of bread like the half of an egg, Terumoth, c. 5;"); and in another place (Ept. rodit. Hebr. p. 544), "Also the crackers, 1 Kings xiv, 3, commonly called דָּקָלָל, received their name because they were frequently molded in little round slices as if stamped out, or because they were punctured in some peculiar manner."

It is, indeed, not improbable that they may have been
CAKE

A sort of biscuit, or small and hard-baked cakes, calculated to keep (for a journey or some other purpose) by reason of their excessive hardness (or perhaps being saved baked, as the word implies). Not only are such hard cakes, or biscuits still used in the East, but they are, like all biscuits, punctured to render them more hard, and sometimes, also, they are sprinkled with seeds, either of which circumstances sufficiently meets the conditions suggested by the etymology of the Hebrew word. The existence of such biscuits is further implied in Josh. ix. 5, 12, where the Gibeonites describe their bread as having become hard as biscuit (not "mouldy," as in the Authorized Version) by reason of the length of their journey. See CRACKNEL.

(6.) Honey-cakes, שֶּרֶץ תְּפוּפִּית" bīd-b ash (Exod. xvi. 31; Talm. עַלְמָא, Mishna, Challa, i, 4), such as are still much relished by the Arabs. See HONEY. Different from these were the raisin-cakes, קָשֵּׁי הַנַּעַרִים (Hos. iii. 1; Sept. περπατομεῖν σταφιδάς, Authorized Version "flagons of wine"), probably a mass of dried grapes pressed into form; comp. the lamps ("cakes") of Job, "מִצְלָאָה"; delærim, in 1 Sam. xxv. 18. See also Josh. v. 10; the Mass of the Merarites was composed of this cake, as stated in Josh. ii. 21; Exod. xvi. 31, also the Mishna, Nedar. vi. 19; see Gesen. Thes. i, 166 sq.; seems to denote the same kind of cakes as used for refreshment (Cant. ii. 5; 2 Sam. vi. 19; 1 Chron. xvi. 8). See FLAGON. A species of cake prepared with honey is thought (so Jerome) to be referred to in Ezek. xvi. 13 (see Rosenmüller, in loc.).

(7.) The baked fragments of the offering, תֵּבֵּנֵי וַתְּפִפָּה, נַחַת פַּרְסָה (lit. "cooking of the offering," [i.e. in pieces], Auth. Ver. "baked pieces of the meat-offering," Lev. vi. 21, i.e. cooked and prepared like the meat-offering, and then broken up into pieces; comp. Lev. iv. 4 sq.; vii. 9), are probably cooked pieces that were again kneaded up with oil and baked (comp. W. Nisoh in Paulus, Samml. iii, 389; Bähr, Symbol. ii, 303). For this purpose was made a frying-pan, עַלְמָא, מַחּ בָּůָ (Lev. ii. 5, etc.), probably a flat iron plate (stew-pan or griddle), beneath which the fire was kindled (comp. Niebuhr, i, 234). See PAN.

(8.) The thin cakes, תֶּרֶה, זְקֵרָה ("cakes," Jer. vii. 18; xlv. 19), a sort of wafer used in heathen offerings, are rendered in the Sept. by the Graecized term χαράκτων, which is explained by Suidas and other ancient glossarii as signifying barley-cakes steeped in oil; compare the cakes and barley-meal used with sacrifices among the Greeks and Romans (see Smith's Dict. of Class. Antiq. s. v. Sacrificium). See QUEEN OF HEAVEN.

The only remaining Heb. words relating to the subject, or rendered "cake" in the Auth. Vers., are, נֶאֶבֶּג, מַעָּל, a cake, i.e. whole piece (q. d. "slice") of bread (1 Kings xvii. 12; in Psa. xxxv. 16, in the phrase נֶאֶבֶּג, תָּפֹא, תִּבְנֵי, "cake-buffoon, scourge placerum," "mockers in feasts," i.e. table-jesters); מַעָּל, מַעְּלָה (Josh. vi. 11; Judg. vi. 19, 20, 21; 1 Chron. xxvii. 29, etc.), sweet or unleavened bread, as usually rendered (see LEAVEN); and כַּבָּד, כַּבָּד, מַעְּלִים (Judg. ii. 18), a round cake of barley-bread. The מֵרָה, מֵרָה, of Gen. xl. 16 (where it only occurs in the expression מַעְּלָו, מַעְּלָו,Megill. הָעָרָא, Vulg. nemetra foris, Auth. Vers. "white baskets," marg. "baskets full of holes"), may signify either white bread, as made of fine flour (in the Mishna, Edisith, iii. 10, מַעְּלָו is a species of bread or cake like the Arab, chamamouw, white bread or flour), or it may refer to some peculiarity of the baskets merely. See BASKET. In the Mishna, Challa, xi. 4 sq., many other kinds of cake are referred to, but the import of the words there employed is very uncertain. On the Greek cakes, see especially Athen. xiv, 644 sq. See generally Hau, Dіs. de re chбri He- briu. (Tr. Whiston). (2.) Bread baked in oven (Lev. ii. 4, 6), but this is limited to two sorts only, which appear to be, first, the bread baked inside the vessels of stone, metal, or earthenware, as was customary. In this case the oven is half filled with small smooth pebbles, upon which, when heated and the fuel withdrawn, the dough is laid. Bread prepared in this mode is necessarily full of indentations or holes, from the pebbles on which it is baked. Second, the bread prepared by dropping with the hollow of the hand a thin layer of the almost liquid dough upon the outside of the same oven, and which, being baked dry the moment it touches the heated surface, forms a thin, wafer-like bread or biscuit. The first of these, however, appears to distinguish by the characteristic stamp or impress of the vessels in which it is prepared. The second, stamped or full of holes (Exod. xxix. 2, Lev. ii. 4, vii. 12; Num. vi. 15, etc.), and the other by the name נַחָל, נַחָל, thin cakes, being, if correctly identified, by much the thinnest of any bread used in the East. A cake of the former was offered as the first of the dough (Lev. viii. 26), and is mentioned in 2 Sam. vi. 19, with the addition of "bread"—perforated bread. Both sorts, when used for offerings, were to be unleavened (perhaps to secure their being prepared for the special purpose); and the first sort, namely, that which appears to have been baked inside the oven, was to be mixed up with oil, while the other (that baked outside the oven), which, from its thinness, could not possibly be thus treated, was to be only smeared with oil. The fresh olive oil, which was to be used for this purpose, imparts to the bread something of the flavor of butter, which last is usually of very indifferent quality in Eastern countries.

(2.) Bread baked in a pan—1st, that which, as is still usual, is baked in, or rather on, the tofim. This also, as an offering, was to be unleavened and mixed with oil. 2d. This, according to Lev. ii. 6, could be leavened into pieces, and poured over it, as a kind of cake, or offering of bread and oil. 3d. This kind of bread and offering. And, in fact, the thin biscuits baked on the tofim, as well as the other kinds of bread, thus broken up and remade into a kind of dough, form a kind of food or pastry in which the Orientals take much delight, and which makes a standing dish among the pastem tribes. The task of making the tofim answer to the Hebrew מַעְּלָו, מַעְּלָו, is the most frequently employed for this purpose. When it is baked, it is broken up into crumbs and kneaded with water, to which is added, in the course of the operation, butter, oil, vinegar, or honey. Having thus again reduced it to a tough dough, the mass is broken into pieces, which are baked in smaller cakes and eaten as a dainty. The older version for the Messianic offering was more simple, but it serves to indicate the existence of such preparations among the ancient Israelites.

(3.) Bread baked upon the hearth—that is to say, baked upon the hearth-stone, or plate covering the fire-pit, which frequently answers the purpose of an oven. This also was to be mixed with oil (Lev. ii. 7). As these various kinds of baked bread were allowed as offerings, there is no question that all were the best modes of preparing bread known to the Hebrews in the time of Moses; and as all the ingredients were such as Palestine abundantly produced, they were such offerings as even the poorest might without much difficulty procure. See SHEW-BREAD.
Calah (Heb. קְלַע, qalà', nigrum old age, as in Job v, 26; in pause K'là'ù, qalà'; Sept. Xalà', Vulg. Chàle, one of the most ancient cities of Assyria, whose foundation is ascribed either to Assur or Nimrud (Gen. x, 11). The place has been thought identical with the Chalùch (ךלעך, Sept. Αλαί) named elsewhere (see HALAH) (2 Kings xvi, 6; xviii, 11; I Chron. vi, 25; but, on monumental evidence, the Rawlinson dates (1856) regard the site of Calah as marked by the Niniví ruins, which have furnished so large a proportion of the Assyrian antiquities. The Talmud (Yoma, x) locates it on the Ephrathas, near Borospí (בְּרוֹסִּים). If at Nimrud, Calah must be considered to have been at one time (about B.C. 980-720) the capital of the empire. It was the residence of the warlike Sardanapalus and his successors down to the time of Sargon, who built a new capital, which he called by his own name, on the site occupied by the modern Khorsabad. This place still continued under the later kings to be a town of importance, and was especially favored by Esarhaddon, who built there one of the grandest of the Assyrian palaces. In later times Calah (sometimes Calah, or Calahis) of the country of the Cherethites, which appears as Calacà (Κάλακα, Proem. vi, 1, 2), or Chalacè (Kalací, Strabo, xvi, p. 580, 736), in the geographers. Layard (Nineveh and its Remains, ii, 56) suggests that it may possibly be extant in the very extensive ruins called Kedek Sherpat, on the west side of the Tigris, above its junction with the Lesser Zab. But see Reznik. Less probable is the identification with Chamān, the former summer residence of the caliphs in Arabia or Babylonian Irak, according to Abufeda, five days' journey north of Bagdad (in Anville, 631° long., 34° lat.), which, according to Assemani (Bibli. Or. xii, ii, 415 sq., 738), is also called Chaloleh (cons. Michaelis, Geography, p. 52; Rosenmüller, Alterth. i, ii, 98). Ephremus Syrus (in loc. Gen.) understands the old Mosopotamian Chetro on the Tigris (Rosenmüller, p. 120; but see Michaelis, Spicileg. i, 246 sq.). As it seems to have been at some distance from Nineveh, the city of Rezen lying between them, most earlier writers concur in placing it on the Great Zab (the ancient Lyucus), not far from its junction with the Tigris, and Rezen is placed higher up on the same river, so as to be between it and Nineveh (Bochart, Phleg. iv, 22). See Asyria.

Calamol'ailus (Kalamosolados, Vulg. Clamosus), given (1 Esdr. v, 22) as the name of a place whose "sons" were restored after the exile; apparently a corrupt version of the names Elam, Harim, Loth, and Hadi in the genuine text (Ezra ii, 21, 29).

Calmon. See SYCAMINA.

Cal'amus occurs in three passages of the Auth. Vers. for the Heb. קְלַע, koné (Sept. κάλαμος, elsewhere "reed"); Exod. xxx, 23, among the ingredients of the holy anointing oil; Cant. iv, 11, in an enumeration of sweet scents; and Ezek. xxviii, 19, among the articles brought to the markets of Tyre. The term designates the marsh and river reed generally (see REX); but in the places just referred to it appears to signify the sweet flax (εὐαρμοστὴ αρωματική; Dioecor. i, 17), an Oriental plant (calamus odoratus, Plin. xii, 42, 48), of which the Latin name is acorus calamus. No doubt the same plant is intended in Isa. xliii, 24; Jer. vi, 20, where the Auth. Vers. has sweet cane. In the latter text the Heb. is קְלַע יְרֵשׁ, kérresh khot-tôb (i.e. good cane), and in Exod. xxx, 23, קְלַע יְרֵשָׁה, yôrishe sem (i.e. odoriferous cane). A scented cane is said to have been found in a valley of Mount Lebanon (Polyby. v, 46; Strab. xvi, 4). This plant has a reed-like stem, which is exceedingly fragrant, like the leaves, especially when bruised. It is of a tawny color, much jointed, breaking into splinters, and having the hollow stem filled with pitch like II.—B

a spider's web" (Kalah on Exod. xxx, 23). The calamus of Scripture is probably the reed by that name sometimes found in Europe, but usually in Asia (Phrat. Plant. ix, 7; Pliny, xii, 12), and especially in India and Arabia (Diod. Sic. ii, 49; Pliny, xii, 49). It grows in moist places in Egypt and Judæa, and in several parts of Syria, bearing from the root a knotted stalk, containing in its cavity a soft white pith. It has an agreeable aromatic smell, and when cut, dried, and powdered, it forms an ingredient in the richest perfumes (Pliny, xv, 7; see Calami Hier. ii, 326 sq.). The plant from which the "calamus aromatics" of modern shops is obtained appears to be a different species (Fernex Cyclopedia, s. v. Acorus). See Cane.

Cal'amus sac'er (also called pagullarius or saetula), a tube made of gold or silver, with a larger orifice at one end than at the other, through which the consecrated wine was drawn into the mouth, the largest end of the tube being inserted into the chalice. See CHALIC.

Calamy, Edmund, an eminent English divine, was born in London A.D. 1600, and took his B.A. degree at Pembroke Hall, Cambridge, in 1619. After spending some years as chaplain to the bishop of Ely, in 1636 he was made a lecturer at Bury St. Edmund's, where he continued until the publication of bishop Wren's "Articles," and the enforcement of the order for the reading of the "Book of Sports," compelled him to protest, and to leave the diocese. He then received the living of Rochford, but in 1652, having avowed himself a Presbyterian, he was made lecturer of St. Mary's, Aldershambury, in London, which office he filled for twenty years. In the ecclesiastical controversies of the times he bore a prominent part. He joined with Marshall, Young, Newcomen, and Spurstow in writing a declaration of the title of St. Mary's, and sent it to bishop Hall's "Divine Right of Episcopacy." As a preacher Mr. Calamy was greatly admired, and listened to by persons of the first distinction during the twenty years that he officiated in St. Mary's. His celebrity was so well established by his writings, as well by the distinguished station which he occupied among the ministers in the metropolis, that he was one of the divines appointed by the House of Lords in 1641 to devise a plan for reconciling the differences which then divided the Church in regard to ecclesiastical discipline. This led to the Savoy Conference (q. v.), at which he appeared in support of some alterations in the Liturgy, and replied to the reasons urged against them by the Episcopal divines. As a member of the Westminster Assembly (q. v.), he earnestly opposed the execution of king Charles, and promoted the restoration of his son, who made him one of his chaplains, and offered him the see of Lichfield and Coventry, which he refused. When the Act of Uniformity was passed he resigned his preferment, but refused, like many others, to gather a congregation, preferring regularly to attend the church in which he had so long officiated. He died Oct. 29, 1666, of a nervous disorder occasioned by the sight of the misery caused by the fire of London. He published The Good Man's Eye to Eye on Ps. cxxx, 72 (Lond. 1668, 17th ed. 12mo); The Noble-man's Pattern (Lond. 1643, 4to), and many single sermons, etc.

Calamy, Edmund, D.D., grandson of the preceding, was born in London April 5, 1671. At the
CALAS

age of seventeen he went to the University of Utrecht, where he was placed under the tuition of the distin-
guished professors De Vries and Graevius. In 1691, when Principal Cartestra was sent to Holland in quest of a gentleman to fill a professor's chair in the University of Edinburgh, he applied to Calamy, and pres-
ed him to accept the situation; but he declined the honor, and returned to England for the purpose of pursuing his studies in the Bodleian Library. In 1700 he began to preach among the Non-
conformists, and in 1708 he took charge of a congregation in Westminster, which he held for many years. In 1708 he arranged for the press Baxter's Life and Times, an opera
publication, gave rise to a dispute between Calamy and Holderly. In 1709 he was made D.D. by the universities of Edinburgh, Glasgow, and Aberdeen. His later works are Discourses on Inspiration (Lond. 1710), Sermons on the Trinity (Lond. 1722, 8vo); Defense of moderate Non-conformity (Lond. 1708-9, 5 vols. 8vo); The Non-conformist's Memorial (Lond. 1721, 2 vols. 8vo); History of his Life and Times, edited by Rutt (Lond. 1829, 2 vols. 8vo).

Calas, Jean, an unfortunate merchant of Toulouse, of the Protestant religion. His son, Marc Antoine, burned himself in a fit of melancholy in 1716. The father was seized as guilty of the murder, on the ground that his son intended to embrace Romanism the next day. No proof could be offered against him, but the fanatical passion of the mob was roused. The corpse was honored as that of a martyr. The clergy exerted all their influence to confirm the populace in their delusion. At Toulouse the White Penitents cel-
brated with great solemnity the funeral of the young man, and the Dominican monks erected a scaffold and placed upon it a skeleton, holding in one hand a wreath of palms, and in the other an altercation of Protestantism. The family of Calas was, in consequence of the popular excitement, brought to trial for the murder, and several deluded and (most probably) some bribed witnesses appeared against them. A Catholic servant-
maid, and the young man Lavasse, were also implicated in the accusation. Calas, in his defence, insisted on his uniform kindness to all his children; reminded the court that he had not only allowed another of his sons to become a Catholic, but had also paid an annual sum for his maintenance since his conversion. He also argued from his own infirmity that he could not have prevailed over a strong young man, and referred to the well-known melancholy mood of the deceased as having lead to suicide; and, lastly, he pointed out the improbability that the Catholic servant-maid would assist in such a murder. But all his arguments proved unavailing, and the Parliament of Toulouse sentenced the wretched man—by a majority of one—against five— to torture and death on the wheel! With great firmness, and protestations of his innocence to the last, the old man died on the wheel, March 9, 1762. His property was confiscated. His youngest son was banished for life from France, but was captured by the monks, and compelled to abjure Protestantism. The daughters were sent to a convent (Chamber, s. v.). The family of the unhappy man retired to Geneva, and Voltaire subsequently undertook to defend his memory. He succeeded in drawing public attention toward the circumstances of the case, and a revision of the trial was granted. Fifty judges once more examined the facts, and on March 9, 1765, the Parliament of Paris declared Calas altogether innocent. Louis XV ordered the property of Calas to be restored to his family, and made to the latter a present of 50,000 livres. The investigation at last led to the toleration edict of Louis XVI in 1787. Bungenh. Priest and Hypomenot, vol. ii; Coquerel, Histoire des Eglises du desert (2 vols. Paris, 1841); Haag, La France Protestante, iii, 36; Coquerel, Jean Calas et sa famille (Paris, 1856, 12mo).

Calasans, Giuseppe (Josiahum a matre De), founder of the order of the Piarists (q. v.), was born in Arogon in 1556. He entered holy orders in 1585, and went to Rome, where he obtained the protection of Clement VIII, Paul V, and Gregory XV, the latter of whom, after the new order had been founded by Cala-
sans, named him general of it in 1622. He died in 1648, and was canonized in 1787. He is commemorated on August 27.—Fehr, Geschicht der Minnocherd, ii, 61.

Calasio, Mario di, named from a village of that name in the Abruzzi, where he was born in 1550. He became a Franciscan, and devoted himself to Hebrew, in which he soon became so great a professed that Pope Paul V made him D.D. and professor of Hebrew at Rome. He is best known by his Hebrew Concord-
ance, which occupied him during forty years, even with the aid of other learned men. He was about to commit this work to the press, when he died, in 1626. It appeared under the title Concordancia Sacrorum Bibliorum Hebrew con commensalibus ling. Arab. et Sgrs. (Rome, 1621, 4 vols. fol.). Another edition was published by Romaine at London in 1747, but it is not considered so accurate as that of 1621. He is said to have died chanting the Psalms in Hebrew. —Bibl. Univ. vi, 54.

Calatrava, a military order of Spain, named from the town of Calatra, in New Castile. It had its origin in the following circumstances: When Alphon-
soro, the father of Sanchez I, had taken the town of Calatra, in 1147, from the Moors, he gave it to the Templars to defend; but when it was spread abroad in 1158 that the Arabs were about to attempt the recapture of the place, the Templars resigned it again to Sanchez, who thereupon presented it to Raymond, ab-
bot of the Cistercian monastery of St. Mary. The Arabs, after all, did not attempt the place; but many of the warriors who had been drawn together for its defence (as well as many of the lay brethren of the convent) entered the Cistercian order, but under a habit more fit for military exercises than for those of monks, and designated as the order of Calatrava. It was approved by Pope Alexander III in 1164, and con-
frmed by Gregory VIII in 1187. The knights at first wore a white scapulary and hood, but in 1197 the Anti-pope Benedict XIII permitted them a secular dress, disting-
"uished by a red cross over the breast. In 1496, Ferdinand and Isabella obtained a bull from Pope In-
ocentius VIII, which reserved the nomination of the grand master to the pope. Adrian VI, however, annexed the grand mastership of this order to the crown of Spain. The knights made a vow of obedi-
ence, poverty, and conjugal chastity (for they were per-
mittled to marry once), and were bound to maintain the immaculate conception of the Blessed Virgin. As a monastic order the institution has ceased to exist, but there are now said to be nearly eighty commanderies and priories in Spain, generally given as rewards of merit.
to political favorites. Since 1219 the order had also
sane, who had to prove, before being admitted, their
descent from noble houses. They wore the dress of the
Cistercian nuns, and their principal monastery was at
Almagro. They are now likewise secularized.—Hel-

Calcutta (1 Chron. ii, 6). See Chalcol.

Calcutta, the capital of Bengal, and an episcopal
see of the Church of England, on the Hoogly.
The bishopric was erected in 1814, and the bishop is metropol-
itan of India. The incumbents have been, 1. Thom-
as Fanahue Middleton, May 8, 1814; 2. Reginald Ho-
ber, June 1, 1823; 3. John T. James, June 4, 1827;
4. J. Matthias Turner, May 17, 1829; 5. Daniel Wil-
son, Nov. 20, 1835, died 1836, who commenced the building
of a cathedral church, and the foundation of a chapter;
1858: 7. Rovert Millman, February 2, 1867. Calcutta
has been the centre of an important system of Protes-
tant missions, both English and American. See India.

Calderon. See Kaldron.

Calderwood, David, a Scotch divine, was born in
1575, and in 1597 became minister of the parish of
Craigeal. When James I in 1617 sought to bring the
Scottish Church into conformity with the Church of
England, Calderwood was strenuous in opposition.
Persuasion and threats having failed to shake Calder-
wood, he was imprisoned, and afterward banished.
He retired to Holland, where he published Allare Do-
menocion, seu ecclesiae Anglicae politi, etc. (L. Bat.
1623, best ed. 1708, 4to), in which he enters into a full
examination of the principles of the Church of Eng-
land, its government, ceremonies, and connection with the
state. The work made a great impression at the
time, and was translated into English under the title of
The Ahur of Doanacen, or the Pattern of the English
Hierarchy and Church obstructed upon the Church of Scot-
land (1621, 12mo). A report having been spread that
Calderwood was dead, a man named Patrick Scott pub-
lished a pretended Recantation, with the title "Calder-
wood's Recantation, directed to such in Scotland as
refuse Conformity to the Ordinances of the Church" (Lon-
don, 1622). Calderwood, in the mean time, had
returned secretly to Scotland, where he lived some years
in concealment. He collected the materials for a
History of the Kirk of Scotland, which he left in MS.,
and which has been published by the Woodrow Soci-
ety (Edinb. 1842-9, 8 vol. 8vo). From the materials of
this work Calderwood wrote his True History of the
Church of Scotland and from the Beginning of the Reforma-
tion unto the End of the Reign of James VI (1675, fol.).
He died about 1650.

Calderon, prop. a large cooking vessel, is the ren-
dering in certain passages of the Auth. Vers. for the
following words: 1. τήνα, agnum (Job xii, 20 [12]), a
heated keelte, others a burning reed ("rush" else-
where); 2. νήσι, dad (2 Chron. xxxvi, 15; "pot," Job
xii, 20 [12]; Psa. lxxxvi, 6; "keelte," 1 Sam. ii, 16),
a large bodier (also a "basket"); 3. κεράν, air (Jer. iii.
18, 19; Psa. xxvii, 7), elsewhere "pot," the most
general term for a keelte or basin (also a "thorn"); 4.
κάλλαφ, kalloch'at (1 Sam. ii, 16; Mic. iii, 9), a pan
or pot (so called from pouriing); 5. λίβρα, (2 Macc. vii,
8), a keelte, in this case a large caldron for torture.
Metallic vessels of this description have been obtained
from the ruins of Egypt, and still more lately two copper
caldrons were discovered by Mr. Layard among the
cavities of Nimroud, N. C. (No. 29 in sq.), about 24 feet in diameter, and 8 feet deep, resting on a
stand of brick work, with their mouths closed by
large tles, and containing a variety of smaller bronze
objects. See Pot.

Caldwell, David, D.D., a Presbyterian minister,
was born in Lancaster county, Pa., March 22, 1725,
graduated at Princeton in 1755, and was licensed to
preach by the Mr. Brunswick Presbytery in 1760.
Being ordained in 1756, he became pastor of the con-
cgregations of Buffalo and Alamanack, N. C., in 1768.
In 1776 he was a member of the Convention which
formed the State Constitution, and some years later
he declined the offer of the presidency of the Uni-
versity of North Carolina, by which institution he was
made D.D. in 1810. He died Aug. 25, 1824, in his
100th year.—Sprague, Ammals, iii, 263.

Caldwell, James, a Presbyterian minister, was
born in Charlotte county, Va., 1784, graduated at
Princeton in 1759, and in 1761 was ordained pastor of
the Presbyterian church of Elizabethtown, N. J. At
the Revolution he entered with spirit into the con-
 troversy, and was soon branded as an enemy of the
formation of the Jersey brigade, he was at once select-
ed as its chaplain. Throughout the war he suffered
severely; toward the close of it, his church was burnt
and his wife murdered by the enemy. The people re-
posed great confidence in him, and his labors, counsels,
and exhortations were of great assistance in a cause
that he had espoused. This honored patriot was killed
in 1781, at Elizabethport, by a drunken soldier named
Morgan, who was tried, convicted, and hung upon the
charge of murder. Caldwell was a man of unwearied
activity and of wonderful powers of endurance. As a
preacher he was uncommonly eloquent and pathetic.
—Sprague, Ammals, i, 222.

Caldwell, Joseph, D.D., a Presbyterian minis-
ter, the author of a System of Geometry and a Treatise
of Plane Trigonometry, was born in Lamington, N. J.,
April 21, 1778, graduated at Princeton 1791, and be-
came Professor of Mathematics at the University of
North Carolina in 1796, in which same year he was
licensed as a Presbyterian minister. He died of
death, Jan. 24, 1855, with an intermission of five years,
he was President of the University, and to his exer-
tion it owes the respectable position which it now oc-
cupies.—Sprague, Ammals, iv, 173.

Caldwell, Merritt, A.M., Professor of Metaphys-
ics, was born in Hebron, Me., Nov. 29, 1806. His
early education, both religious and academic, was
very carefully conducted, and he graduated with hon-
or at Bowdoin College in 1828. In the same year
he became principal of the Maine Wesleyan Seminary,
Readfield. In 1834 he was elected Professor of Math-
ematics and Vice-president of Dickinson College, Pa.
In 1837 he was returned to the chair of Metaphysics
and English Literature, which he occupied during the
rest of his life. He soon became known as a strong
thinker and excellent writer by his elaborate contribu-
tions to the Methodist Quarterly Review. Nor did his
devotion to literature prevent him from taking an
interest in the moral questions of the times; and in the
course of ten years especially his labors were abund-
antly and even excessive. In 1846 he visited England
as a delegate to the "World's Convention," which
formed the "Evangelical Alliance," and took an active
part in its proceedings. His health, which had pre-
viously been impaired, was apparently improved by
his European tour, but in 1847 it failed again, and he
died June 6, 1848. Professor Caldwell was a man of
uncommonly firm and masculine character. As a pro-

Bronze Caldron. From the Egyptian Remains in the British Museum.
fessor and college officer he had few superiors; as a writer, he was always clear, logical, and forcible. Many of his contributions to the periodical press were of rare excellence. He also published *Manual of Eluciation, including Voice and Gesture* (Phila. 1846, 12mo, often reprinted), perhaps the best hand-book of the subject ever published. The *Book of Christian Perfection* (Phila. 1847, 18mo), "a model of clear thinking and forcible expression"—Christianity tested by eminent Men (N. Y. 1852, 18mo)—*The Doctrine of the English Verb* (1887, 12mo).—Methodist Quarterly Review, 1892, p. 574.

**Caldwell, Zenas**, brother of Merritt, was born in Hebron, Oxford county, Maine, in 1801, and was graduated at Bowdoin College in 1824, and soon after leaving college took charge of the Academy of Hallowell. In 1825 he was licensed as a local preacher, and for most of the time of his connection with the Hallowell Academy he supplied the Methodist congregation in Winthrop. In the same year he was unanimously elected principal of the new Methodist Seminary at Kent's Hill, Roadfield, Me., and proved himself abundantly adequate to any service that devolved upon him. But his whole work was to be performed within six months; his lungs became seriously affected, and he died triumphantly on Dec. 26, 1826. In 1832 an address of sympathy was sent to the Rev. S. M. Vail, D.D., was published, containing a memoir and several of his productions, in prose and poetry. — Sprague, *Amals*, vii, 699 sq.

**Cal'eb (Heb. קָלֵּב, Caleb, appr. for כָּלֶב, a dog),** the name of two or three men. See also Caleb-eph'nahar; Nehz'ah-Caleb.

1. (Sept. קָלֵּב). The last-named of the three sons of Hezron, and grandson of Judah (1 Chron. ii. 9, where he is called CHULLAH). His three sons by his first wife, Azubah or Jerioth (q. v.), are enumerated (ver. 18); he had also another son, Hur, by a later wife, Ephrath (ver. 19; perhaps only the oldest of several, ver. 50); besides whom another (his "first-born") is named (ver. 42, by what wife is uncertain). In addition to several by his concubines Ephah and Maschabah (ver. 46, 48), B.C. post 1856. The text is possibly corrupt, however, in some of these distinctions.

2. (Sept. קָלֵּב). A "son of Hur, the first-born of Ephrathah" above named (and therefore the grandson of the preceding), according to 1 Chron. ii. 50, where his name is also enumerated. B.C. 1858. Some, however, have identified him with the foregoing, supposing a corruption in the text.

3. (Sept. קָלֵּב, but קָלָּב in 1 Chron. ii. 49; Eccles. xvi. 51; 1 Mac. ii. 56; v. r. Kalaöth in 1 Sam. xxx, 14; Josephus קאֲלוֹת, Ant. iii. 14, 4, etc.) Usually called (Ephrathah, Judg. xvi. 6, and elsewhere [see JEPHEUNAH], sometimes with the addition "the Kenite" (Num. xxxii, 12; Josh. xiv. 6, 14), from which some have hastily inferred that he may have been a foreigner, and only proselyted to Judaism. See KENAZ. Caleb is first mentioned in the list of the rulers or princes (N*ם), called in the next verse (Kalaöth) "heads," one from each tribe, who were sent to search the land of Canaan in the second year of the Exodus (B.C. 1357), where it is stated that these officers are all different from those named in Num. i., ii, vii, x., as at that time phylarchs of the tribes. Caleb was one of these family cheftains in the tribe of Judah, perhaps as chief of the family of the Héronites, at the same time that Nahson, the son of Amminadab, was prince of the whole tribe (Num. i. 52), and Oshea of the tribe of Nunn, were the only two of the whole number who, on their return from Canaan to Kadesh-Barnea, encouraged the people to enter boldly to the land, and take possession of it, for which act of faithfulness they narrowly escaped stoning at the hands of the infuriated people. In the plague that ensued, while the other ten tribes perished, Caleb and Joshua alone were spared. Moreover, while it was announced to the congregation by Moses that, for this rebellious murmuring, all that had been numbered from twenty years old and upward, except Joshua and Caleb, should perish in the wilderness, a special promise was made to the latter that he should survive to enter into the land which he had trodden upon (Num. 14:29), but that his seed should possess it. Accordingly, forty-five years afterward (B.C. 1612), when some progress had been made in the conquest of the land, Caleb came to Joshua and reminded him of what had happened at Kadesh, and of the promise which Moses made to him with an oath. He added that though he was now eighty-five years of age (B.C. 1098), he was as strong as in the day when Moses sent him to spy out the land, and he claimed possession of the land of the Anakim, Kirjath-Arba, or Hebron, and the neighboring hill-country (Josh. xiv). This was immediately granted to him, and the following chapter relates that he took possession of Hebron, driving out the three sons of Anak; that he offered Achan, his daughter, in marriage (comp. 1 Sam. xvii. 25; Hygyn. Fab. 67) to whoever would take Kirjath-Sepher, i.e. Debir; and that when Othniel, his younger brother, had performed the feat, not only gave his daughter to wife, but with neither the springs of Diона or the rich soil offered as a dowry, which asked for. After this we hear no more of Caleb, nor is the time of his death recorded. But we learn from Josh. xxii, 18, that, in the distribution of cities out of the different tribes for the priests and Levites to dwell in, Hebron fell to the priests, the children of Aaron, of the family of the Kohathites, and was also a city of refuge for the inhabitants of the surrounding territory continued to be the possession of Caleb, at least as late as the time of David (1 Sam. xxx, 3), being still called by his name (1 Sam. xxx, 14). His descendants are called Calebites (רְכָבָּה for רְכָב, Calebõth, 1 Sam. xxx, 3); Sept. translates as if a patronymic were intended, שֵׁם אָבָיו. Ver. "house of Caleb"). His name seems to be inserted in 1 Chron. ii. 49, by way of distinction from the others in the same list. See Ewald, *Jrb. Gesch.* ii, 298 sq.

**Caleb-eph'nahar, a name occurring only in the present text of 1 Chron. ii. 24, as that of a place where Hezron died (רְכָבָּה be-Kaleb Ephra'kah, in Caleb to Ephr'ah). But no such place is elsewhere referred to, and the composition of the name is a most ungrammatical one. Again, neither Hezron or his son could well have given any name to a place in Egypt, the land of their bondage, nor Hezron probably die, or his son live, elsewhere than in Egypt. The present text reveals that it seems to be corrupt (the R. S. V. renders which the Sept. and Vulg. suggest [רְכָבָּה יִשְׂרָאֵל the科技创新 and improve an Caleb ad Ephra'm] is probably the true one, viz., כָּלֵּב אֶפְרָאִים, meaning either "Caleb came to Ephra'" i.e. Bethlehem-Ephrathah, or, still better, "Caleb came into unto Ephr'ah." The whole information given seems to be that Hezron had two wives, the first, whose name is not given, the second named Jerahmeeh, Rachel or Caleb, or Cheluba; the second, Abiah, the daughter of Machir, whom he married when sixty years old, and who bore him Segub and Ashur. Also that Caleb had two wives, Azubah, the first, apparently the same as Jerioth, and Ephrath, the second, the mother of Hur; and that this second marriage of Caleb did not make place till after Hezron's death. See NEHEZ'AH-CALEB.

**Calendar, Jewish.** I. Hebrew Lunar Calendar of Festas and Fastas.—The year of the Hebrews is composed of twelve (and occasionally of thirteen) lunar months, of thirty and twenty-nine days alternately. The year begins in autumn as to the civil year, and in the spring as to the sacred year. The Jews had calendars anciently whereby were noted all the feasts, all the fasts, and all the days on which they celebrated the memory of any great event that had happened to...
the nation (Zech. viii. 19; Esth. viii. 6, in Græc.). These ancient calendars are sometimes quoted in the Talmud (Mishna, Tuma'ah, 8), but the rabbins acknowledge that they are not now in being (see Malmonides and Barzilai, loc.). Those that we have now, whether printed or in manuscript, are not very ancient (see Generara. Bibl. Rabbinic. p. 319; Buxtorf, Lexic. Talmud. p. 1046; Bartolocci, Bibl. Rabbinic. ii, 550; Lamy's Introduction to the Scripture; and Plantin, J. ac. Rabbin. ad fin.). That which passes for the oldest is, according to the Divan Jak Aban, 'Vey Mora,' which contains the days of fasting and fasting here-tofore in use among the Jews, which are not now observed, nor are they in the common calendars. We here insert the chief historical events, taken as well from this volume, Tuma'ah, as from other calendars, with the modern or Julian months, in accordance with the conclusions of J. D. Michaelis, in his treatise published by the Royal Soc. of Göttingen. See Montf. For the details, compare each month in its alphabetical place. See also Crétique Biblique, vol. iv, and the following: Samuel Je. J. J., Dictionnaire juif-sardophone (Viteb, 1716); Dresde, Annae issued; Lips. (1765); Fischer, De anno Hebræorum. (Viteb, 1710); Faleseis, De circuit Judæorum die (Lips. 1702); Klau-sing, De forma anni patriarcharum (Viteb, 1716); Kö- schel, id. (Viteb, 1852); Lanshansen, De mense viti. Heb. Januari (Jen. 1739); Land, De mensibus Hebraor. (Abid, 1894); Nager, De Calendario viti. Hebraor. (Altorf, 1746); Selden, De anno Hebraor. (Lond. 1744); Sommel, De anno Hebraor. eccles. et cl. (Lond. 1746); Strach, De anvs viti. Hebræorem. (Viteb, 1565); Von Gumpach, Ueber den alt. Jüd. Kal. (Brüssel, 1846). See Time.

AABB or NISAN.

The first month of the sacred year, the seventh month of the civil, & has thirty days, and answers generally to the months of March or April.

Day 1.—New moon; a fast for the death of the sons of Aaron (Lev. x, 1, 2).

10.—A fast for the death of Miriam, sister of Moses (Num. xx. 1); also in memory of the scarcity of water that happened, after her death, to the children of Israel in the desert of Kadesh (Num. xx. 1).

15.—On this day every one provided himself a lamb or a kid, and kept it as a burnt-offering to the following Passover.

14.—On the evening of this day they killed the paschal lamb; they began to use unleavened bread, and ceased from all other labor.

18.—The solemnity of the Passover; with its octave; the first day of unleavened bread, a day of rest; they ate no leavened bread during eight days.

19.—After sustenance they gathered a sheaf of barley, which they brought into the Temple (Men. n. 15).

20.—On the second day of the feast they offered the barley which they had provided the evening before, as the first-fruits of the harvest; after that time it was allowed to put the sickle to the corn.

21.—The beginning of harvest.

22.—From this day they began to count fifty days to Pentecost. See Pentecost.

23.—The octave of the feast of the Passover; the end of unleavened bread. This day is held more solemnly than the other days of the octave, yet they did not refrain from the usual labor on this day.

24.—A fast for the death of Joshua (Josh. xxv. 24).

30.—Alternate of the first new moon of the succeeding Hebrew year.

The book called Meïrâth Th'amith does not notice any particular festival for the month Nisan.

ZIP or LIAR.

The second ecclesiastical, or eighth civil month; contains twenty-nine days, corresponding to the month of April or May.

Day 1.—New moon.

6.—A fast of three days for expiations committed during the feast of the Passover; that is, on the Monday, Thursday, and the Mikron following (Calendar Bartolocci).

7.—The dedication of the Temple, when the Armonceans consecrated it anew, after the persecutions of the Greeks (Meïrâth Th'amith. c. 9).

14.—The second Passover, in favor of those who could not celebrate it first, on the 15th of the foregoing month.

21.—A fast for the taking of the city of Græa by Simon Macceabæus (Calend. Scalig.; 1 Mac. xxxii. 43, 44); or for the final and perpetual extinction of the kingdom of Jeru- salem by the Macceabaei (Catal. of Siphnus; 1 Mac. xxi. 35, 40, 58; xvi. 7, 8); a fast for the expulsion of the Canaanite or the Israelites by the Armonceans or Macce- abæi (Neg. Th'amith; comp. Th'amith 55).

27.—A fast for the expulsion of the Galileans, or those who attempted to set up crowns over the gates of their temples and of their houses, and even on the heads of their oxen and asses, and to sing hymns in honor of false gods. On the 15th of the following month, the Jews of Jerusalem, and Jerusalem, and appointed this fast to perpetuate the memory of their expulsion (Men. Th'amith).

28.—A fast for the death of the prophet Samuel (1 Sam. xxi. 1). SIVAN.

The third sacred, or ninth civil month; thirty days; the moon of March or April.

Day 1.—New moon.

6.—Pentecost, the fifth day after the Passover—called also the Feast of Weeks, because it happened seven weeks after the Passover. We do not find that it had any octave. But see Sabbaṭaṭ.

15.—A fast for the celebration of the victory of the Macceabæi over the people of Bethsam (1 Mac. v, 5.; xli. 40, 41; Meïrâth Th'amith).

21.—A fast for the taking of Cassarea by the Armonceans, who drove the pagans from thence, and settled the Jews there (Meïrâth Th'amith).

22.—A fast of the day of the prohibition by Jeroboam, son of Nebat, to his subjects, forbidding them to carry their first-fruits to Jerusalem (1 Kings xi. 27).

25.—A fast for the solemn judgment pronounced in favor of the Jews by Alexander the Great against the Jeïmistles, who, by virtue of their birthright, maintained possession of the land of Canaan; against the Canaanites, who claimed the same as being the original Jeïmistes; and against the Egyptians, who demanded restitution of the vessels and other things borrowed by the Hebrews when they left Egypt (see Meïrâth Th'amith); but the Greeks of Babylon (Neïfûdâm, s. 11) puts the day of this sentence on Nisan 14 (comp. Cata- log 21).

27.—A fast, because Rabbi Chalina, the son of Thaddeus, was burnt with the book of the law.

30.—Alternate of the first new moon of the following month.

TAMMUZ.

The fourth sacred, tenth civil month; twenty-nine days; moon of June or July.

Day 1.—New moon.

14.—A fast for the abomination of a pernicious book of the Sadderces and Euthians, by which they endeavored to subvert the oral law and all the traditions (Meïrâth Th'amith).

17.—A fast in memory of the tables of the law broken by Moses (Exod. xx. 19).

On this day the city of Jerusalem was taken; the perpetual evening and morning sacrifice was suspended during the conquest of Jerusalem by Titus, and afterwards the book of the law, and set up an idol in the Temple; it is not said whether this happened under Nebu- cachadnezzar, Antiochus Epiphanes, or the Romans.

AB.

The fifth sacred, eleventh civil month; thirty days; moon of July or August.

Day 1.—New moon; a fast for the death of Aaron, the high-priest.

5.—A commemoration of the children of Jehued, of the race of Judah, who, after the return from the captivity, furnished wood to the temple (Meïrâth Th'amith).

9.—A fast of the fifth month in memory of God’s declaration to Moses, on this day, that none of the murmuring Israelites should enter the land of promise (Num. xiv. 29, 31).

On the same day the Temple was taken and burnt: Solomon’s Temple first by the Chaldeans; Herod’s Temple afterward by the Romans.

10.—A fast, because in the time of Ahaz the evening lamp went out.

21.—Xylophoria; a feast on which they stored up the necessary wood in the Temple (Selden; see Josephus, Wars, ii, 37). Scaliger places this festival on the 25th of the next month (Men. Th'amith).

24.—A fast in memory of the abolition of a law by the Armonceans or Macceabæus, which had been introduced by the Sadducees, enacting that both sons and daughters should alike inherit the estates of their parents (Men. Th'amith).

30.—Alternate of the first new moon of the following month.
Day 1.—New moon. Beginning of the civil year.

The Feast of Trumpets (Exod. xxix. 1; Num. xxix. 1, 2).

The day of the death of Gedaliah (2 Kings xxv. 26; Jer. xlii. 11).

The same day, the abolition of written contracts. The Judges decreed all forfeited and the forsworn. They pronounced the name of God, when they were restored to liberty the Ammonites or Maccabees ordained that it should be written in contracts after this manner: "In such a year of the high priest, who is minister of the most high God, etc." The Judges to whom these writings were presented decreed they should be satisfied, saying, for example, "On such a day, a debtor shall pay such a sum, according to his promise, and, besides, I in all that is owing."

The Feast of Tabernacles, with its octave (Lev. xxiii. 34).

The Feast of Tabernacles, or the Feast of Branches.

The last festival of the week, the solemnity in memory of the covenant that the Lord made with the Hebrews in giving them the law by the mediation of Moses. On this same day, the dedication of Solomon's Temple (1 Kings viii. 55, 66).

MACHESVAN OR BUL. The eighth sacred, second civil month; twenty-nine days; moon of October or November.

Day 1.—New moon; first day of the month.

The Feast of Tabernacles, or the Feast of Branches.

The dedication of Solomon's Temple (1 Kings viii. 55, 66).

SHEBAT. The eleventh sacred, fifth civil month; thirty days; moon of January or February.

Day 1.—New moon, or the first day of the month.
CALENDAR

15. — The beginning of the year of trees; that is, from March 21st when the bees begin to count the four weeks during which trees were judged unclean. From the time of their being planted (Lev. xix. 25).

22. — Feast in memory of the death of Nicolemaus, a friend of Joseph of Arimathea, who was stationed in the Temple, which was forbidden by the law; but he died, and his orders were not executed. The Jews pass the night in his honor, and it does not rain in the place. It is not known who this Nicolema was (Meyr. Tanimh. c. 11).

29. — A fast for the war of the ten tribes against that of Assyria, a general fast. They also call it remembrance of the idol of Micaiah (Judg. xvii).

30. — Feast in memory of Anthochus Euphranor, an enemy of the Jews (1 Mac. vi. 1; Moliol. Tanmih).

ADAR.

The twelfth sacred, sixth civil month; twenty-nine days;
month of Persian name.

Day 1. — New moon.

9. — A fast, because of the death of Moses (Deut. xxxiv. 6).

15. — The trumpet sounded by way of thanksgiving for the rain that fell in this month, and to pray for it in future.

19. — A fast in memory of the schism between the schools of Shammai and Hillel (Tanmih).

25. — The memory of the death of two prophets, Holiarnus and Pipus his brother, whose one Tyrinus or Tarru and the other have compelled the people to go in the city of Lod strengthens; but they choose rather to die than to act contrary to the law (Selden, De Synedr. lib. iii. cap. 13, ex Hagg. Seder).

27. — Esther's fast; probably in memory of that of Esther, iv. 16 (Geneb. and Bardecho).

THE GREAT FAST OF ADAR, 28th day. — The memory of the death of Nicorant, an enemy of the Jews (1 Mac. vii. 44; 2 Mac. 15, 20, etc.). Some of the Hebrews insist that Nicorant was killed by Alexander Jannaeus, 152 B.C.

14. — The first Purim, or lesser Feast of Lots (Esth. ix. 21).

15. — The Jews in the province caused from the slaughter of their enemies on Nisan 14, and on that day a great rejoicing; but the Jews of Shushan continued the slaughter till the 15th; therefore Mordecai settled the Feast of Lots on the 14th and 15th of this month.

15. — The Feast of Purim or Lots; the second Purim. These three days, the 14th, 15th, and 16th, are commonly called the days of Mordecai, though the feast for the death of Nicorant has no relation either to Esther or to Mordecai.

The collectors of the half shekel, paid by every Israelite (Exod. xxx. 13), received it on Adar 15 in the cities, and took it in the Temple (Tanmih).

11. — The deliverance of the rage of Israel, who, flying from the persecution of Alexander Jannaeus, king of the Jews, fled into the city of Kow, or Kew (Exod. xii. 32); but, finding themselves in danger of being sacrificed by the Gentiles, the inhabitants of the place, they escaped by night (Meyr. Tanmih).

30. — A fast in memory of the rain obtained from God by one called Onias Ham-maged, during a great drought in the time of Alexander Jannaeus (Meyr. Tanmih).

30. — The dedication of the temple of Zerubbabel ( Ezra vi. 16). The day is not known, so some put it on the 16th; the Calendar of Segina puts it on the 23d.

30. — A fast in commemoration of the repeal of the decrees by which the Kings of Greece had forbidden the Jews to circumcise their children, to observe the Sabbath, and to decline foreign worship (Meyr. Tanmih, et Gemar. Tanmih, c. 9). — Calmet, Appendix.

VE-ADAR.

INTERMEDIARY MONTH.

When the year consists of thirteen lunar months, they place here, by way of intercalation, the second month of Adar, or Ve-Adar. See YAR.

II. Modern Julian Calendar of the Temperature and Agricultural Phenomena of Each Month of the Year. — These were first carefully collected by J. G. Buhle, in a prize essay presented to the Royal Society of Göttingen, printed in Latin among their transactions under the title Calendarium Palatinum Economum (1785), and translated at large by Mr. Taylor in the Pamphlets added to his edition of Calmet's Dictionary of the Bible, and is an abridgment. Much valuable information, similarly obtained from Oriental itineraries, combined with personal observation, may be found in Kitto's Phys. Hist. of Palestine. vol. ii, ch. vii. See also the art. Palesine.

JANUARY.

Weather. — According to the seasons (c. v.) as divided among the Hebrews, this month is the second in winter, and the cold is more or less severe in different situations. There is frequently a considerable fall of snow, which, however, generally dissolves in most places. In the plain of Jericho the cold is little felt (Josephus Ant. iv. 5). Heavy rains now fall, especially in the night, when the river and the streamlets swell. In the day the thermometer is generally between 40° and 46°. The sky is partly covered with clouds, and it does not rain, unless on the 11th and the latter end of this month, when the sky is clear, it becomes so hot that travellers cannot, without some difficulty, prosecute their journey. Their horses' baggage becomes generally dirty and wet.

Productions. — All kinds of grain or corn are now sown. The beans are in blossom, and trees in leaf. Earliest appears the blossom of the almond here, even before it has leaves. When the winter is mild, the violet fig (of a longer shape than the summer fig, and gathered earlier in the spring) is still found on the trees, though the fig, plum, and quince are already ripe. Their leaves, together with the juicy small toe and the cotton-tree now flourish. Among the flowers and garden herbs of this month, the cactusflower, the blue and the white hyacinth, the gold-struck daffodil, dill, violets, tulips in great variety, wormwood, the lenticel tree, anemonoe, ranunculuses, and colchices, a kind of lily resembling the Persian when blown.

FEBRUARY.

Weather. — This month is so much alike as during the last month, except that toward the close, in southerly parts, the snow and rain begin to cease. Like the other features of the rainy seas- son this month is remarkable for clear weather, sometimes in the air and sometimes falls of snow. The sky is frequently covered with clear light clouds; the atmosphere becomes warm; the wind continues on the north, but later it turns towards the east. During the first 14 days the mercury usually stands between 45° and 48°.

Prodictions. — The latter crops are now appearing above ground, and a delightful verdure begins to be seen on every side. Barley continues to be sown till the middle of the month; beans are sown in the north, and are soon filled with flower; apricots and pears are gathered; the peach and early apple tree are blossoming, and a great variety of herbs are in flower, which, says Calmet, render these parts delightful, for while the heat of the sun is favorable that the beholder is often charmed and transported at the sight (see Thomson's Travels, i. 157).

MARCL.

Weather. — In Palestine this month is the forerunner of spring, but rains, with thunder and hail, are not yet over (Pococke's Travels, ii. 11). The weather is generally warm and temperate, except on the mountains, and sometimes extremely hot, especially in the plain of Jericho (Thomson's Travels, ii. 27). In the middle of the month, the mercury stands at 5°, and nearer the close, 10°, and reaches 15° and 20° (Russel, De Temp. ii. 33, 140, 159). Toward the end, the rivers are much swollen by rain and the thawing of snow upon the tops of mountains (Bougainville and Heyman, Travels, i. 325). Barley and wheat are sometimes taken place, and they are accounted for by Shaw in his Travels, p. 185.

Productions. — While the wheat is scarcely in ear, the barley now ripens in Jericho (Shaw's Travels, p. 290, 291). Indian wheat, rice, and corn of Damascus are now sown in Lower Egypt (Thomson's Travels, ii. 169). Several herbs, such as beans, lentils, and chick-pea, become ripe (Homer. B. Tu. i. p. 186). Every tree is at this time in full leaf (Russel's Arabia, p. 10). The 14th and 15th are called "green days," shrubs and herbs, are now in blossom. The jericho plum begins to ripen. The vines, having yielded its first clusters, are pruned. Various aromatic garden herbs are becoming fit for use.

APRIL.

Weather. — The "latter rains" (םבוצי, שמשוי) now fall, as Koris asserts (Barclay, de Agricult., p. 189); and Shaw affirms that none are observed after them until summer (Travels, p. 250). The rain ceases about the close of the month, but the sky generally becomes clear. The earth has some respite from the rains of Jericho, but in other parts of Judea the spring is now most delightful (Maunder's Jour. p. 90). Concerning the meteorology of Palestine, several observations are made by Maunder (Voyage, iii. 230) and Dr. Shaw (Travels, p. 252). The mercury advances from 60° to 70°.

Productions. — The spring begins to be fully in action. A duration of the rainy season. After the rains cease, the corn soon arrives at maturity, according to the situation. Wheat, sea wheat, and barley now ripen (Koris's Hort. ii. 49, Hiero. viii. 52). The spring fig is still hard (Shaw, p. 236). The almond and orange trees now produce fruit (Maunder, p. 60), and the terebinth tree (cork) (Celsis, Hort. ii. 5) begins to blossom (Sendyas, p. 176). A new shoot, bearing fruit, springs from that branch of the vine that was left in the former month, which must now be blown (Bro. 633, 634). The date of Syria and Palestine produce canes from which they obtain sugar (Lanuasus van Rheinfelden, Hiero. viii. 52, 46, 47). Tulips, ranunculuses, anemonoe, etc. etc. are now in
CALENDAR.

FLOWER at Aleppo and Tripoli (Therien, III, 92; Rawolf, i, 55). The grass is now very high, and the Arabs lead out their horses and sheep to be fed upon it (p. 126). On the 16th the same is likewise done in Persia (Chardin, iii, 12). MAY.

Weather.—In this month the summer season commences, when the excessive heat of the sun renders the earth barren (Shaw, p. 598). On the 1st is shown about Aleppo, sometimes accompanied with hail and thunder (Russel, p. 101). At the beginning of the month the mercury reaches 10°; then it drops to 6° to 8°, and is greatly affected by the direction of the variable winds. The snowy on Lebanon thaw rapidly now, but the cold is still very sharp on the summit of the mountains (p. 166). Productions.—The harvest is completed during this month. Wheat is now cut in Galilee (Hassequeliet, p. 44). About the beginning of this month barley is generally ripe (Emont and Heyman's Travels, ii, 27). Rice, however, is not quite ripe (Schweigert, p. 317). The early apples in Palestine now come to maturity, at least toward the end of this month (Pococke, ii, 156). The common early apples may now be gathered in the warmer situations, but the better varieties ripen later (Therien, p. 129). Cotton is said to be sown in the Holy Land at this period (Hassequellet, p. 176). The early shoots of the vine, which had been hopped, now produce the latter grapes (Brocard, Des Terr. des Musul., p. 322, 333). They still continue, after the harvest, to sow various garden herbs, particularly those unknown to us, as cress, umbelliferous, and flowers, and come to maturity twice in the same year, in spring and autumn (Korte, p. 157). In other parts the sultana herbs have already produced a height in this month, that when Therien was riding from Nazareth to Acre, on the 5th of May, they reached the girth of his saddle (Voyage au Levant, ii, 611).

JUNE.

Weather.—During this month the sky is generally clear, and the weather becomes extremely hot (Rusell's Specimens, p. 27). As the month advances, the mercury gradually rises in the middle of June to 90°; in the afternoon it stands between 84° and 86° (Therien, iii, 1, 2). The inhabitants pass their nights in summer upon the roofs of their houses, which are not rendered damp by the dew (Russel, p. 193). The summits of the mountains of Palestine are not, however, yet free from snow (Pococke, ii, 155). Cotton in the environs of Aleppo is not all cut before the beginning of June; although Russel's testimony differs from this assertion of Therien's, yet Shaw says that in an open field, cotton is sometimes last cut off (Therien, p. 123). The early figs, black and white, now ripen and often fall off. When the high and middle classes do not come to their proper dates and maturity, they are called &quot;Kabuk&quot; (Akkad), names which are used for marmel fruit in general. The process of carpfaction is now performed (Shaw, p. 598). Apples (a few of the earliest of the better sort), pears, plums, mulberries, cherries, etc., ripen in this month, but of late there are very few trees in Palestine. The cedar gum, or &quot;udrin,&quot; a clear white wax-like substance, is in great demand in medicinal virtues, when harden, distils spontaneously in the summer time, and without any incision being made, from the bark of the coniferous cedar. In extreme situations, quantity, they are cut across the bark (Arvatius, Mem., ii, 413, 414). Of the shrubs and herbs, the balsam-tree is worthy of notice, which grows chiefly along the sides of this area, and furnishing an incision, one gets the &quot;Balm of Gilead&quot; during this and two following months (Sandy, Trav. p. 197). The Arabs, as the summer advances, go to the hills northward (De la Roque, Voyages, p. 174; Radzivil, p. 49).

JULY.

Weather.—All travellers who have been exposed to the open air this month affirm that the heat is now extremely intense. Rains found the streams of the Vera Cruz to be entirely dried up on the 9th. At Jerusalem the heat is much less than at other places (Russel, p. 598). &quot;Hi rou&quot; Persons now (Therien, p. 150). The snow on the tops of the mountains, thawing gradually during the summer season, yields a large supply of water to the brooks below. It cannot, however, be said that the country nor the summits of the mountains are entirely dissolved every year (Korte, p. 419). The winds generally blow from the west, but, when they fall, the liberated grasses and herbs in a greater quantity, they drop to the earth (Therien, p. 150). On the 26th the winds, as in the last month, usually blow from the east or north. They are seldom violent. The mercury stands at 86°, and is sometimes higher (Russel, p. 193). The winds advance, gradually falls from 60° to 50° (Russel, p. 193). Productions.—Corn and pulse are sown during this month, as at the end of October. Sugar-cane now ripen, and are cut down (Cottovioli, Historia, p. 193). The grass and herbs are again springing out of the ground after the rains, and the Arab now drive their flocks down from the mountains into the plains (Radzivil, i, 118). See August.

CALENDAR. ROMAN. For this in its most complete and final form is the index to the following. Cesar, who, during his office as Pontifex Maximus, undertook the memorable task known as the reform of the calendar. The Roman year had hitherto consisted of 355 days, with a month of thirty days intercalated every third year, so that the average length of the year was 365. This arrangement was attributed to Numa Pompilius, who added two months to the short year of Romulus; its regulation was left
to the pontiffs. If the intercalation had been regularly made, the Romans would have lost nearly one day in every four years, since the real length of the solar year is about 365.25 days; but the business was so carelessly executed that the difference between the civil and the solar year sometimes amounted to several months. Caesar called on the astronomers, especially on Sosigenes of Alexandria, to rectify the discrepancy and prevent future error. It was determined to make the first of January of the Roman year B.C. 709 coincide with the first of January of the solar year which we call B.C. 45. This required that the difference, 1 day 1 of the year B.C. 709 would be 67 days in advance of the true time; in other words, it would not concur with Jan. 1 of B.C. 45, but with Oct. 22 of B.C. 46. Two intercalary months, making together 67 days, were therefore inserted between the last day of November and the first of December of the year B.C. 708. An intercalary month of 29 days had already been added to February of that year, according to the old method. The Roman year 708 was thus made to consist in all of the prodigious number of 445 days (i.e. 355 + 29 + 67). It was hence scoffingly called "the year of confusion;" more justly it should be named, as Marshall says, the "Year of Error." The apparent need to prevent future errors, the year was lengthened from 355 to 365 days, each month except February being lengthened (by one or two days, nearly alternately), according to the rule which we still observe. But as the solar year consists of very nearly 365 1/4 days, it was manifestly necessary to add one day in every four years, and this was done at the end of February, as at present in our "leap year." Such was the famous Julian Calendar, which, with a slight alteration, continues in use in all Christian countries to the present day.

Gregorian Calendar.—The addition of one day for every four years would be correct if the solar year consisted exactly of 365 1/4 days, or 365 days and 6 hours; but, in fact, it consists of only 365 days, 5 hours, 47 minutes, 45 1/4 seconds; so that the Julian year is longer than the true solar year by about 12 minutes. Caesar's astronomers are supposed to have been aware of this, but to have neglected it. Accordingly, in the year A.D. 1582, the beginning of the Julian year was found to be about 10 days behind the true time, the vernal equinox falling on the 11th instead of the 21st of March, its date at the Council of Nice, A.D. 325. The time of Easter, therefore, and of the other movable festivals, has been unsettled from one progressive recession of days, and it was matter of importance for ecclesiastical as well as civil purposes that the calendar should be rectified. Pope Gregory XIII (q.v.) therefore "ordered that ten days should be deducted from the year 1582, by calling what, according to the old calendar, would have been reckoned the 5th of October, the 15th of October, 1582; and in order that this displacement might not recur, it was further ordered that every hundredth year (1800, 1900, 2100, etc.) should not be counted a leap-year, except every fourth hundredth, beginning with 1600. In this way the difference between the civil and the natural year will not amount to a day in 5000 years. In Spain, Portugal, and part of Italy the pope was exactly obeyed. In France the change took place in the same year, by calling the 10th the 20th of December. In the Low Countries, the change was from the 15th of December to the 25th; but it was resisted by the Protestant part of the people. Still the year 1752, in which the Roman nations in general adopted the style ordained by their sovereign pontiff; but the Protestants were then too much inflamed against Romanism in all its relations to receive even a purely scientific improvement from such hands. The Lutherans of Germany, Switzerland, and France, etc., etc., continued to date, as at length gave way in 1700, when it had become necessary to omit eleven instead of ten days. A bill to this
effect had been brought before the Parliament of England in 1685, but does not appear to have gone beyond a second reading in the House of Lords. It was not till 1751, and after great inconvenience had been experienced for nearly 100 years, that the difference of the reckoning, that an act was passed (24 Geo. 11, 1751) for equalizing the style in Great Britain and Ireland with that used in other countries of Europe. It was then enacted that eleven days should be omitted after the 2d of September, 1752, so that the ensuing day should be the 14th. Russia still adheres to the Old Style, so that from the year 1700 onwards is now 12 days behind that of the rest of Europe.

Calendar of the French Republic.—By a decree of the National Convention, on Nov. 24, 1793, it was ordained that a new era should date from the beginning of the Republic, Sept. 22, 1792; the midnight preceding which, being the autumnal equinox, was fixed upon as the epoch, from which the years were to be reckoned as Year One, Year Two, etc. The year was divided into 12 months, each of 30 days, to which new names were given, as Vendémiaire (vintage month), Brumaire (foggy month), Frimaire (frost month), etc. The months were divided into periods of 10 days, called Decads, Decades, etc., to be used alternately. Thus the year was divided into two eras, 1793, under the day of rest, the Christian Sabbath being done away. Five intercalary days were added for each year, viz. the festivals of Genius, Labor, Action, Reward, Opinion. In every fifth year there was to be an intercalary festival of The Revolution. This calendar went into use Nov. 26, 1793, and was abolished in 1806 by Napoleon I., who ordered the Gregorian Calendar to be resumed on Jan. 1, 1806.—Carlyle, French Revolution, ii, 386; Penny Cyclopedia, s. v.; Chambers's Encyclopedia, s. v. See CHRONOLOGY.

CALENDAR, ECCLESIASTICAL.—I. A table of the order and series of days, weeks, months, and holy days in the year (so called from the calendar, or first day of the Roman month). The oldest extant calendar containing the Christian festivals is that of Silvius (A.D. 448), published in the Acta Sancta, June (vii, 176). There is a fragment of a Gothic calendar, supposed to be of the 4th century, covering the latter part of October and the whole of November, which gives seven days with saints' names. It may be found in Mai, Scriptor. Vetus, nova collectio, v. See FASTS and FEASTS.

II. The Fasti, or catalogues in which different churches preserved the names of those saints whom they especially honored, as their bishops, martyrs, etc., to which they added the names of some other saints, but generally those of the neighboring churches. The calendars differed from the martyrologies in this, that the former contained but few names of saints unconnected with the particular church; the latter contained all the saints honored by the whole Church. The most ancient known calendar is that of the Roman Church, which, according to Balde, was formed about the middle of the fourth century, under Pope Liberius, Bishop of Thessalonica, to Chrysostom, under Pope Julius (Antwerp, 1634, ed. Boucher). See Landon, Eccl. Dict. ii, 488. The most copious work on the subject is Assemani, Kalendarii Ecclesiae Universalis (Rom. 1755, 6 vols. 4to.). The present Saints' Calendar of the Roman Church is very copious: it may be found, more or less complete, in the Roman almanacs from year to year.

The German Lutheran Church retained the Romanist Calendar (with the saints' days of that age) at the Reformation. Professor Piper constructed in 1850 an Evangelical Calendar for the use of the Evangelical Church of Germany, which is issued annually, full of biographical and other matter of interest, along with the calendar of saints, fasts, etc. See Piper, Die Feierstimmung d. Evan. Kalender (Berlin, 1850).

The calendar of the Church of England, as it stands
In the large editions of the Prayer-book, consists of nine columns: the first contains the golden number or cycle of the moon; the second shows the days of the month in their numerical order; the third contains the Dominical letter; the fourth the calendar, month and day; the fifth the days of the week as used by the early Christians; the sixth contains the holy days of the Church, as also some festivals of the Roman Church, set down for public convenience rather than for reverence; and the remaining four contain the portions of Scripture and of the Apocrypha appointed for the daily lessons.

The lists of saints’ days and festivals includes a number of the Roman holidays, properly so classed, viz.: Lucian, priest and martyr, Jan. 8; Hilary, bishop and confessor, Jan. 13; Priscus, virgin and martyr, Jan. 18; Fabian, bishop and martyr, Jan. 20; Agnes, virgin and martyr, Jan. 21; Vincent, deacon and martyr, Jan. 22; Blasius, bishop and martyr, Feb. 3; Agatha, virgin and martyr, Feb. 5; Valentine, bishop and martyr, Feb. 14; David, tutelar saint of Wales, March 1; Cedd or Chad, bishop, March 2; Perpetua, martyr, March 7; Gregory, bishop and confessor, March 12; Patrick, tutelar saint of Ireland, March 17; Edward, king and martyr, April 21; Saxon, bishop and martyr, April 21; Richard, bishop, April 3; Ambrose, bishop, April 4; Alphego, archbishop, April 19; George, saint and martyr, April 23; Cross, invention of, May 3; John, saint, evangelist, May 6; Dunstan, archbishop, May 19; Augustine, archbishop, May 28; Bede, venerable, May 27; Nicodemos, martyr, June 11; Boniface, bishop and martyr, June 5; Alban, saint and martyr, June 17; Edward, translation of, June 29; Mary, Virgin, visitation of, July 2; Martin, bishop and confessor, July 4; Swithin, bishop, July 15; Margaret, virgin and martyr, July 20; Magdalen, saint Magdalene, Aug. 22; Anne, saint Ann, Aug. 26; Lammas Day, Aug. 1; Transfiguration of our Lord, Aug. 6; Jesus, name of, Aug. 7; Laurence, archdeacon and martyr, Aug. 10; Augustine, bishop of Hippo, Aug. 28; John Baptist, beheading of, Aug. 29; Giles, abbot and confessor, Sept. 1; Ernurchus, bishop, Sept. 7; Mary, Virgin, nativity of, Sept. 8; Holy Cross, recovery of, Sept. 14; Lambert, bishop and martyr, Sept. 17; Cyprian, archbishop and martyr, Sept. 26; Jerome, priest and confessor, Sept. 30; Remigius, bishop, Oct. 1; Faith, virgin and martyr, Oct. 5; Denys, bishop and martyr, Oct. 9; Edward, translation of, Oct. 13; Etheldreda, virgin, Oct. 17; Cripin, saint and martyr, Nov. 22; Leonard, saint Leonard, Nov. 6; Martin, bishop and confessor, Nov. 11; Brittis, bishop, Nov. 13; Machutus, bishop, Nov. 15; Hugh, bishop, Nov. 17; Edmund, king and martyr, Nov. 20; Cecilia, virgin and martyr, Nov. 22; Clement I, bishop and martyr, Nov. 23; Catharine, virgin and martyr, Nov. 25; Nicholas, bishop, Dec. 6; Lucy, virgin and martyr, Dec. 13; O Sopianeta, Dec. 16; Silverstede, bishop, Dec. 31.

These are omitted in the calendar of the Protestant Episcopal Church, which retains only the scriptural festivals. Wheats assigns the following reasons for their retention by the English Church: the being retained are the result of our courts of justice, which usually make their returns on these days, or else upon the days before or after them, which are called in the written Virgil, Fest. or Crest, as in Virgil, Martin, Fest. Martin, Crest Martin, Crest. and the like. Others are probably kept in the calendar for the sake of the hand-sellers, hangmen, hangmen, and others, as are wont to celebrate the memory of their tutelar saints, as the Welshmen do of St. David, the shoemakers of St. Crispin, etc. And again, churches being in several places dedicated to some or other of these saints, it has been the usual custom in such places to have a church allain upon their day, so that in this way people would probably be displeased if, either in this or the former case, their favorite saint’s name should be left out of the calendar. Besides, the histories which were writ before the Reformation do frequently speak of transactions happening upon such a holy day, or about such a time, without mentioning the month; relating one thing to be done at Lammas-tide, and another to another about that, and the names quite left out of the calendar, we might be at a loss to know when several of these transactions happened. But for this and the foregoing reasons our second reformers under queen Elizabeth (though all those days had been omitted in both books of King Edward VI, excepting St. George’s Day, Lammas Day, St. Lawrence, and St. Clement, which were thought convenient to restore the names of them to the calendar, though not with any regard of their being kept holy by the Church."

Calendarium Festum, Fjest of the Calends. This heathen festival was retained by many Christians, and is called bota and nota. It was in some periods celebrated, with great indecencies, under the name festum kalendam, festum supplicacionum, festum statiorum. In later times, however, people met masked in the streets, and, in a ludicrous way, proceeded to the election of a mock bishop, who exercised a jurisdiction over them suited to the festivity of the occasion. Fathers and councils long laboured to restrain this license, but to little purpose. Tertullian, Chrysostom, and Augustine declare, in the strongest terms, against this festival; and the Council in Trullo, A.D. 692, forbids the dancings which were used both by men and women, under the penalty of excommunication. In some instances the practice of sacrificing a calf was adopted, especially at the bota, a feast of the god Pan. The Council of Auxerre makes notice of this monstrous practice and the heathen superstition in France, in offering a hind or calf, which it designates a diabolical observation.

Bingham, Orig. Eccl. bk. xx; Farrar, Eccl. Dict. s. v.

Calendarium Fratres, or Calendar Brethren, a society formerly spread over France, Germany, and Hungary, and which is said to have originated in Saxony in the thirteenth century. It assembled in various places on the first day of each month to regulate the observance of the ensuing festival; presided over by a praeses, consisting of alms, days of fasting, the burial of the dead, etc. It was, in fact, a sort of beneficial society, under the patronage of the bishop of the diocese. It afterward led to abuses, carousals, etc., and most of the societies were abolished at the Reformation. Some, however, were still in existence at the beginning of the sixteenth century. Even in the Protestant city of Brunswick a "calend" has nominally maintained itself. One calend ("the calend of princes at Kahla") consisted merely of members of princely houses; several (as, e.g., the calend at Bergen) of knights and members of the higher clergy; others of knights only. See Feller, Diss. de Calendaris sacris (Frankf. 1692, 4to); Blumberg, Uber d. Calendaridron (Chemn. 1721); Ledebur, in vol. iv of the Mährische Forschungen (Bri. 1850).

Calf (prop. ?l, e'gl, μέλας; fem. μμα?l, ?glēk), ?lμα?l, έμαμ; sometimes ιης or ιης, a steer or young bullock; also periphrastically ἐν ουκέτοις, son of the herd), the young of the ox species. See ΒΕΡΟ, ΒΟΛ, etc. There is frequent mention in Scripture of calves, because they were made use of commonly in sacrificial ceremonies. The "fatted calf" was regarded by the Hebrews as the choicest animal food. It was stall-fed, frequently with special reference to a particular festival or extraordinary sacrifice (1 Sam. xxvii, 24; Luke xv, 25). The allusions in Jer. xxxiv, 18, 19, is to an ancient custom of ratifying a contract or covenant, in the observance of which an animal was slain.
and divided, and the parties passed between the parts (comp. Homer. II. iii. 208), signifying their willingness to be so divided themselves if they failed to perform their covenant (Gen. xv. 9, 10, 17, 18). The expression "calves of our lips," in Hos. xiv. 2, is figurative, signifying the fruits of our lips (Wolf, Jueceni laborium, Viteb. 1711). As calves were used in sacrifices, the injunction requires us to render the sacrifice of prayer and praise to God, instead of the animal sacrifice (Heb. xiii. 15). Compare Hiefer.

Calf-Worship.—This appears to have originated in Egypt, where we know that brutes of nearly all sorts were held in reverence by some one or another of the various nomes into which that country was divided. See Animal Worship. Of all these creatures, however, the calf, or rather bullock, seems to have been most generally adored, especially a peculiar description, or rather peculiarly-colored bull, to which, under the name of Apis or Mnevis, divine honors of the most extraordinary kind were paid throughout Egypt. It is from this form of idolatry that the scriptural examples of calf-worship are clearly derived. Yet it is possible that the commentators are not quite correct in supposing Apis to be the deity whose worship was imitated by the Jews, at least in the first instance. The Egyptians gave that name to a living bull which they worshipped at Memphis; but they also worshipped another living bull in the city of On, or Heliopolis, which they called Mne, or, according to the Greek form, Mne's, and which they adored as the living emblem of the sun. Now the Israelites, from the circumstance of their living in the land of Goshen, in or near which Heliopolis was situated, and also from the connection of Joseph, the head of their nation, with one of the priestly families of that city, must have been well acquainted with its peculiar forms of idolatry. It is also very probable that many of them had joined in those rites during their sojourn. We might therefore naturally suppose that they would adopt them on this occasion; and the supposition that they did so is confirmed by a very curious fact, which has not yet been noticed, as bearing upon this question. Champollion has observed, in his Pantheon Egyptien, that Mnevis is said by Porphyry and Plutarch to have been a black bull, as Apis unquestionably was; but he assures us that this is not the case with regard to the existing remains of ancient Egypt; for, although in the Egyptian paintings Apis is either colored black or black and white, Mnevis, on the contrary, in the only figure of him kitherto discovered, is colored bright yellow, evidently with the intention of representing a golden image. This fact, though not a conclusive proof, affords a strong presumption that the golden calf was made according to the usual form and color of the images of Mnevis. The annexed engraving represents this symbolic deity of Heliopolis as he is painted on the coffin of a mummy at Turin, the name being distinctly written in hieroglyphical characters, Mne, without the Greek termination. It differs in color only, and not in form, from another painting on the same coffin, which bears the name of Apis. Both have the same trappings—the sun's disk between the horns, surrounded by the plumes of ostrich feathers, signifying justice, and the whip, the emblem of power; and both are accompanied by the serpent, representing the spirit of the gods. The bull Mnevis or Mne—for ρς is merely a Greek termination—was usually lodged in the city of On or Heliopolis, and this is all that we find recorded of him in ancient writers. Far more ancient than Apis, the era of his consecration is lost, and perhaps forever. The only circumstance which is of importance, save that the Israelites fell into his worship, is that he appears to have represented the zodiacal sign which was depicted yellow, while, by a curious anomaly, Apis, whose attributes all coincide with those of the sun, was black. The worship paid to him, though lasting till the downfall of the Egyptian hierarchy, gradually diminished before the more important and popular rites of Apis, and little is said of Mnevis. See Idolatry.

1. The most ancient and remarkable notice in the Scriptures on this head is that of the golden calf which was cast by Aaron while the Israelites were encamped at the foot of Sinai. In Exod. xxxii. 4, we are told that Aaron, constrained by the people, in the absence of Moses, made a molten calf of the golden ear-rings of the people, to represent the Elohim which brought Israel out of Egypt. He is also said to have "finished it with a graving-tool;" but the word צָבַֽע, chevret, may mean a moulid (comp. 2 Kings v. 23, Auth. Vera. "bags;" Sept. χελαχος). Bochart (Hieroz. lib. ii, cap. xxxiv) explains it to mean, "he placed the ear-rings in a bag," as Gideon did (Judg. viii. 24). Probably, however, it means that, after the calf had been cast, Aaron ornamented it with the sculptured wings, feathers, and other marks which were similarly represented on the statues of Apis, etc. (Wilkinson, iv. 348). It does not seem likely that the ear-rings would have provided the enormous quantity of gold required for a solid figure. More probably it was a wooden figure laminated with gold, a process which is known to have existed in Egypt. "A gilded ox covered with a pall" was an emblem of Osiris (Wilkinson, iv. 385). See Gold.

To punish the apostasy, Moses burnt the calf, and then, grinding it to powder, scattered it over the water, where, according to some, it produced in the drinkers effects similar to the water of jealousy (Num. v). He probably adopted this course as the deadliest and most irreplaceable blow to their superstition (Jerome, Ep. 128; Plut. De Is. p. 362), or as an allegorical act (Job xv. 16),
CALF

or with reference to an Egyptian custom (Herod. ii, 41; Poll. Synecdde, in loc.). It has always been a difficulty to explain the process which he used; some account for it by his supposed knowledge of a forgotten art (such as was one of the boaste of alchemy) by which he could reduce gold to dust. Gouguet (Origine des Lois) invokes the assistance of nature, which would have had the additional advantage of making the draught nauseous. Baumgarten easily endows the fire employed with miraculous properties. Bezaeus, however, merely takes the thought that he cut the ground, and filed the gold to powder, such as was used to sprinkle over the hair (Josephus, Ant. viii, 7, 8). There seems little doubt that the Heb. term here rendered "burnt" (ךנפנ) Sept. karaxias) properly has this signification (Hävernick's Introd. to the Pentateuch, p. 293). Those commentators who have been so great pains to explain in what manner Moses reduced the golden calf to such a state as to make it potable in water seem to have overlooked the consideration that, as the science of making gold leaf for gilding was already practised in Egypt, there could be no great difficulty, even if chemical processes had not then been discovered, in effecting the object. See Metal.

The legends about the calf are numerous. The calves of brass were the origin of the certain Egyptian profanists (Godwyn's Mos. and Aar. iv, 5); Hur, "the desert's martyr," was killed for opposing it; Abubeda says that all except 12,000 worshipped it; when made, it was magically animated (Exod. xxxii, 24). "The devil," says Jonathan, "got into the metal and fashioned it into a calf" (Lightfoot, Works, v, 398). Hence the Koran (vii, 146) calls it a "corporeal calf, made of their ornaments, which loved." This was effected, not by Aaron (according to the Mohammedans), but by al-Sâmerti, a chief Jewess, whose descendants still inhabit an island of the Arabian Gulf. He took a handful of dust from the footsteps of the calf, Gabriel, who was the head of the host, and threw it into the mouth of the calf, which immediately began to low. No one is to be punished in hell more than forty days, being the number of days of the calf-worship (Sale's Koran, ed. Davenport, p. 7; note; and see Well's Legends, p. 125). It was a Jewish prophet that "no punishment befalleth the Israelites in which there is not an ounce of this calf" (Godwyn, ut sup.). See Aaron.

2. The next notice refers to an event which occurred ages after, when Jeroboam, king of Israel, retreating from his long exile in Egypt, set up two idols in the form of a calf, the one in Dan (comp. Josephus, Wars, iv, 1, 1) and the other in Bethel, the two extremes of his kingdom, to prevent the ten tribes from resorting to Jerusalem to worship, and so more effectually to separate them from the house of David. Temples were built and altars erected for these images; priests were appointed from all the tribes without distinction, and the priestly functions performed even by the monarch himself. The calves continued to be a snare to the people of Israel until the captivity. The calf at Dan was carried away by Tiglath-Pileser, and that of Bethel ten years after by his son Shalmaneser (1 Kings xv, 29; xvii, 13; Prideaux, Connection, i, 15). Jeroboam's sin is always mentioned whenever his name is used (1 Kings xi, 40; xii, 28-33; 2 Chron. xi, 15; Hos. viii, 5, 6; x, 5; xiii, 2). See Jeroboam.

Bochart thinks that the ridiculous story of Celcus about the Christian worship of an ass-headed deity (called Θησαυρός ή Ομιλή—a story at the source of which Tertullian, Onvocensis, Apol. 16; Ad Nat. i, 14, could only guess) sprang from some misunderstanding of such terms as the golden calf (Minut. Fel. v, 12). But it is much more probable, as Origen conjectured, that the Christians were confounded with the absurd mystic Opikomi, or Ophite Gnostics (Tacitus, Hist. v, 4; Merivale, Hist. of Emp. vi, 564). See Aser's Head.

Theory of this Idolatry.—This almost incomprehensible degradation of human reason was, no particularly in the first instance, no doubt the result of the debasing influences which operated on the minds of the Israelites during their sojourn in Egypt, where, amid the daily practice of the most degrading and revolting religious ceremonies, they were accustomed to see the image of a sacred calf, surrounded by other symbols, carried in solemn pomp at the head of marching armies, such as may still be seen depicted in the processions of Rameses the Great or Sesostris. The accompanying figure is a representation of a calf-idol, copied from the original collection made by the artists of the French Institute of Cairo. It is recumbent, with human eyes, the skin flesh-colored, and the whole afterparts covered with a white and sky-blue draped drapery; the horns are not on the head, but above it, and contain within them the symbolical globe surmounted by two feathers. Upon the neck is a blue and yellow yoke, and the flagellum, of various colors, is suspended over the back; the whole is fixed upon a broad stand for carrying, as here shown. The rendering of the Author, Vers., which alludes to the image being finished with a graving-tool, is obviously correct, for all the lines and toolings of the covering cloth, of the eyes, and of the feathers must have required that manual operation (Exod. xxiii, 4). It is doubtful whether this idolatrous form is either Apsis or Mnevis; it may perhaps represent the sun's first entrance into Taurus, or, more probably, be a symbol known to the Egyptians by an undeciphered designation, and certainly understood by the Eolomites of later ages, who called it bhunah and kharuf, or the calf, the mysterious amia mundi; according to Von Hammer (Pref. to Ancient Alphabet), the Nabataean secret of secrets, or the beginning and return of every thing. With the emblem on the back, it may have symbolized the planet Elnom long before the cabalistical additions of this mysterious type had changed the figure. At the time of the departure of the Israelites from Egypt this may have been the Moloch of their neighbors, for that idol was figured with the head of a calf or steer. A similar divinity belonged to the earliest Indian, Greek, and even Scandinavian mythologies, and therefore it may be conceived that the symbol, enduring even to this day, was at that period generally understood by the multitude, and consequently that it was afterward revived by Jeroboam without popular opposition. Egyptian paintings illustrate the contempt which the prophet Hosea (x, 2) casts upon the practice of those whom he designates as "coming to sacrifice and kiss the calves." See Baal.

1. Some regard the golden calf both of Aaron and Jeroboam as intended by the Jews for an Egyptian god. The arguments for this view are, 1. The ready apostasy of the Jews of Egyptian superstition (Acts vii, 50, and chap. v, passim; Lactant. Inst. iv, 10). 2. The fact that they had been worshippers of Apsis (Josh. xxiv, 14), and their extreme familiarity with
CALHOUN 29

CALIXTUS

his cultus (1 Kings xi, 40). 8. The resemblance of the feast described in Exod. xxi, 6, to the festival in honor of Apis (Suidas, s. v. Αἰμετόχ). Of the various sacred cows of Egypt, that of Isis, of Athor, and of the three kinds of sacred bulls, Apis, Basa, and Mnevis, Sir G. Wilkinson fixes on the latter as the prototype of the golden calf. The offerings, dancing, and rejoicings practised on that occasion were doubtless in imitation of a ceremony they had witnessed in honor of Mnevis" (Anc. Egyp. v, 197, see pl. 85, 86). The ox was worshipped from its utility in agriculture (Plut. De Iu. 74), and was a symbol of the sun, and consecrated to him (Hom. Od. i, xii, etc.) Warburton, Dr. Smith (Dict. Sacr., s. v.), and other learned men, have found in Oriental and other mythologies. 4. The expression, "an ox that eateth hay," etc. (Psa. civ, 20, etc.), where some see an allusion to the Egyptian custom of bringing a bottle of hay when they consulted Apis (Godwyn’s Mos. and Aar. iv, 5). Yet these terms of scorn are rather due to the intense hatred of the Jews both to this idolatry and to that of Jeroboam. Thus, in Tob. i, 6, we have one of Jeroboam’s calves called "the heifer Baal" (אֶשֶּר בָּאֶל, which is an unquestionable calumny; just as in the Sept. version of Jer. xlv, 15, "Apis, the chosen calf!" (Αἴμετοχ ὃς ἀληθινῆς ἡ ἡμῶν, is either a mistake or a corruption of the text (Bochart, Hieroz. ii, 25, 6, and Schleusener, s. v. Αἴμετοχ). See Apis.

5. According to others, the Jews in these cases simply adopted a well-known cherubic emblem, merely applying it as a symbol of Jehovah. See Cherub. In support of this position it may be urged, 1. That it is obvious they were aware of this symbol, since Moses finds it unnecessary to describe it (Exod. xxv, 18-22). 2. Josephus seems to imply that the calf symbolized God (Ant. viii, 8, 4). 3. Aaron, in proclaiming the feast (Exod. xxxii, 5), distinctly calls it a feast to Jehovah, and speaks of the god as the visible representation of Him who had led them out of Egypt. 4. It was extremely unlikely that they would so soon adopt a deity whom they had so recently seen humiliating the judgments of Moses (Num. xxxii, 4). 5. There was only one Apis, whereas Jeroboam erected two calves (but see Jahn, Bibl. Arch. § 464). 6. Jero- boam’s well-understood political purpose was, not to introduce a new religion, but to provide a different form of the old one, and this alone explains the fact that this was the only form of idolatry into which Judah never fell, since she already possessed the archetypal emblems in the Temple. 7. It appears from 1 Kings xxi, 6, etc., that the prophets of Israel, though sanctioning the calf-worship, still regarded themselves, and were regarded as, "prophets of Jehovah." See Gold- en Calf.

Calhoun, Thomas P., a Cumberland Presbyterian minister, was born in Wilson county, Tenn., in 1828, studied theology in the seminary at Princeton, N. J., and was ordained in 1852. He was secretary for several years of the Board of Foreign and Domestic Missions of the Cumberland Presbyterian Church, and editor of the Missourian, a periodical of the Church. In the winter of 1860-61, while riding out, his horse became unmanageable, and running off a bridge, Mr. Calhoun was killed instantly.—Wilson’s Presbyt. Alm. for 1860.

Caligula (so called from caligae, the foot-dress of a common soldier, which he wore while his father was in the camp in Germany), properly Caesar Cæsar, the third of the series of Roman emperors, was the youngest son of Germanicus, the nephew of Tiberius, by Agrippina. He was born Aug. 31, A.D. 12 (Suetonius, Clem. 8), and, after spending his youth among the soldiers in Germany (Tacitus, Ann. i, 41, 69; Dio Cass. iv, 5), he was received into favor by Tiberius after the fall of Sejanus (A.D. 32), although his mother and brothers had been disgraced by that tyrant, whom he succeeded as emperor in March, A.D. 37. See Trin.
of the latter science, seems to have produced at the same time no effect but that of extinguishing even the sense of the necessity of presenting it in a form influential upon the Christian life." The very titles of his writings and those of his opponents would fill pages. His liberal views were styled Crypto-Fapsism, Philippism, Crypto-Calvinism, Batelism, or the synonyms of the Colloqy of Thorn, where he showed a strong disposition to compromise all minor differences in order to bring about a reunion of Lutherans, Reformed, and Romanists, the opposition of the high orthodox party to him and to the Colloquy theologians, who were more or less imbued with the Symmetrical, were broken. See THORN, COLLOQUIO OP. His followers were known both as Symmetricals and Calixtines. The chief objection brought against him by the more candid of his opponents was that he maintained, 1. That the fundamental doctrines of Christianity, by which he meant those elementary principles whence all its truths flow, were preserved pure in all three communions (Romish, Lutheran, and Calvinistic), and were contained in that ancient form of doctrine known by the name of the Apostles' Creed. 2. That the tenets and opinions which had been constantly received by the ancient doctors during the first centuries, and to be considered of equal truth and authority with the express declarations and doctrines of Scripture. 3. That the churches which received these points, and held the additional tenets of the particular churches as non-essential, should at once come into peaceful relations, and thus pave the way for a future union of the churches. His opponents were legion, but the most bitter and persevering was Calvius (q. v.). Calixtus died March 19, 1566. A full list of his writings is given in his Consultatio de tolerantia Reformatorum (Helmst. 1637, 4to). An account of Calixtus, from the Puseyite standpoint, is given in the Christian Remembrancer, 1856. Several biographies of Papal at the Jesuits. For nearly half a century he led a life of unwearied literary activity at Helmstät. Peaceful himself, the aim of his studies and efforts was to settle the disputes of the Church parties, and it led him into endless controversies. Though a Lutheran all his life, his tendencies were Melanchthonian, both by nature and education. He had adopted the opinion of the peacemakers and Remonstrants that the essential doctrines of Christianity were held by all the churches, and desired to propagate this opinion, and to bring the adherents of all the churches to some nearer understanding in all essential claims in any of the churches. Against Rome he wrote De Pontifici. Missus Sacrificio (Franc. 1614); and numerous other publications to the same end followed it. In the Calvinistic doctrine he objected to predestination and the Calvinistic view of the Eucharist; but he did not hold the freedom to be fundamental (De Praeceptis Christ. Relig. Capitulâs [Helmstät, 1618]); nor did rigid Lutheranism find any more favor with him, and he especially rejected the doctrine of the ubiquity of the body of Christ. His first publications gave umbrage to the strict Lutherans, who regarded him as lax in theology. In 1602 he published his Epist. de Hom. Theologiae inc. which was warmly welcomed by his friends, but awakened new opponents among the rigidly orthodox. He applied Aristotle's philosophy to theology, dividing the science into three heads: (1) the object, man's best good, including holiness, immortality, etc.; (2) the subject, God, creation, apostacy, etc.; (3) the means, giving the latter the name of an independent science. On this Dr. Pusey remarks, in his Theology of Germany, p. 84, that the separation by Calixtus of the system of Christian moral from Christian doctrine, 'with which he had been hitherto interwoven, though in itself greatly to the advantage of the unity of
II. DIVINE CALL. (1.) The word "call" is used in Scripture with various significations, as applied to the Almighty with respect to men. 1. In its ordinary sense of "to name," to "designate" (of which examples are not necessary), and also in the sense of "to be," e. g. "He shall be called the Son of God" (Luke 3, 21); "there shall be new heavens and a new earth: and the former things shall not be remembered, nor come into mind" (Isa. 65, 17). 2. To denote the divine call to sinners to accept the grace of God in the gift of His Son (Matt. ix, 13; xxv, 29; xxii, 4; Luke xiv, 13, 17). 6. To denote the condition in life (1 Cor. viii, 20, etc.).

(II.) Two questions arise as to the divine call to men. (1.) Why do not all who receive it embrace it? and (2.) what is the internal glory or benefit in the enjoyment of the invitation? In view of these questions, the old Lutheran divines speak of the vocatio ordinaria directa (the ordinary direct call) as being, 1. Seria, i.e. really meant as a call on God's part, as he desires and intends the salvation of all. This is opposed to the Calvinistic view, which maintains that only such as are predestined to salvation are really called. 2. Efficac, or better Suffectum, i.e. always adequate to the conversion, not only of those who heed the call, but of those who disregard it; and therefore, 3. Resistibilis, resistible, and not compulsory (Quenstedt, Theol. Did. iii); and also, 4. Universae, universal. God called all the human race (1) in the promise of Christ to bruise the serpent's head (Gen. iii, 15), given to the race through our first parents; (2) in Noah, the preacher of righteousness, a call to all his descendants (Gen. ix, 2; Pet. ii, 5); (3) in the Gospel commission (Matt. xxviii, 19; Mark vi, 15; comp. Rom. x, 18; Col. i, 6; Acts xxxvii, 29). The distinction is extended to "all the world," and its execution is declared to have been accomplished in Acts xxvii, 30; Rom. x, 18; Col. i, 6, 23.

The question whether even America was reached by the first preaching of Christianity is treated by Moebuis in his essay entitled An ab Apostolis Evangelium elegerunt Graeci, in which he shows that the Dioscorid did not go, the θεατής did. As to the failure of men to receive and obey the divine call, it is not God's fault, but their own. He "calls," but they "will" not. In general, it may be assumed that wherever the Church of God is set up, men receive the divine call, and their responsibility is proportional to the degree of light which shines upon them (Matt. xvi, 24; xxvii, 37; Luke xii, 47, 48). The same principle applies to the case of heathen. Here also lies the duty of the Church to send missions to the heathen.

(III.) The Calvinistic doctrine of effectual calling is thus set forth in the Westminster Confession:

"1. All those whom God hath predestinated unto life, and those only, he is pleased, in his appointed and accepted time, effectually to call, by his Word and Spirit, out of that state of sin and death in which they are by nature, to grace and salvation by Jesus Christ; enlightening their minds spiritually and savingly to understand, believe, and accept the things of God; taking away their heart of stone, and giving unto them a heart of flesh; renewing their wills, and by his Almighty power determining them to that which is good; and effectually drawing them to Jesus Christ, yet so as they come most freely, being made willing by his grace."

2. This effectual call is of God's free and special grace alone, not from any thing at all foreseen in man, who is altogether passive therein, until being quickened and renewed by the Holy Spirit, he is thereby enabled to answer this call, and to embrace the grace offered and conveyed in it.

3. Elect infants, dying in infancy, are regenerated and saved by Christ through the Spirit, who worketh all things in the children of God and in all other elect persons, who are incapable of being outwardly called by the ministry of the Word.

4. Others not elected, although they may be called by the ministry of the Word, and may have some common operations of the Spirit, yet they never truly come unto Christ, and the benefits of salvation; such men cannot profess the Christian religion be saved in any other manner whatsoever, be they ever so diligent to frame their lives according to the light of nature, and the law of that religion they do profess; and to assert and maintain that they may be very pernicious, and to be detested."

The scriptural arguments for and against the doctrine are thus stated by Watson:

1. According to the Calvinistic view, "in the golden chain of spiritual blessings which the apostle enumerates in Rom. viii, 30, originating in the divine predestination, and terminating in the bestowment of eternal glory, the voice of God's call occupies an important link. Moreover, whom he did predestinate, them he also called; and whom he called, them he also glorified. Hence we read of 'the called according to his purpose,' Rom. viii, 28. There is indeed a universal call of the Gospel to all men; for wherever it comes it is the voice of God to those who hear it, calling them to repent and believe the divine testimony unto the salvation of their souls; and it leaves them inexcusable in rejecting it (John iii, 14, 19); but this universal call is not inseparably connected with salvation; for it is in reference to it that Christ says, 'Many are called, but few are chosen' (Matt. xii, 14). But the Scripture also speaks of a calling which is effectual, and which consequently is more than the outward ministry of the Word; yes, more than some of its partial and temporary effects upon many who hear it, for it is always ascribed to God's making his word effectual through the enlightening and sanctifying influence of the Holy Spirit, as it is said, 'Paul may plant, and Apollos water, but God giveth the increase' (1 Cor. iii, 6, 7). Again, He is said to have 'opened the heart of Lydia, that she attended to the doctrine of Paul' (Acts xvi, 14). 'No man can come unto Christ, except the Father draw him' (John vi, 44). Hence faith is said to be a gift of God (Eph. ii, 8; Phil. i, 29). The Spirit calls the things of Christ and shows them to men (John xvi, 14), and thus opens their eyes, turning them from darkness to light, and from the power of Satan unto God (Acts xxvi, 18). And so God saves his people, not by works of righteousness which they have done, but according to his mercy, by the washing of regeneration and renewal of the Holy Spirit (Titus iii, 5). Thus they are saved, and called with a holy calling, not according to their works, but according to the divine purpose and grace which was given them in Christ Jesus before the world began (2 Tim. i, 9).

2. To this it is replied that this whole statement respecting a believer's calling is without any support from the Scriptures. 'To call' signifies to invite to the blessings of the Gospel, to offer salvation through Christ, either by God himself, or, under his appointment, by his servants; and in the parable of the marriage of the king's son (Matt. xxii, 1-14), which appears to have given rise, in many instances, to the use of this term in the epistles, we have three descriptions of 'called' or invited persons. (1.) The disobedient, who would not come in at the call, but made light of it. (2.) The class of persons represented by the man who, when the king came in to see his guests, had not on the wedding garment, and with respect to whom..."
our Lord makes the general remark, 'For many are called, but few are chosen;' so that the persons thus represented by this individual culprits were not only 'called,' but actually came into the company. (5.) The approved guests—those who were both 'called and chosen,' as far as the simple calling or invitation is concerned, all stood upon equal ground—all were invited; and it depended upon their choice and conduct whether they embraced the invitation and were admitted as guests. We have nothing here to countenance the notion of what is termed 'efficacious calling.' This implies an irresistible influence, for they for who refused and they who complied but partially with the calling are represented, not merely as being left without the benefit of the feast, but as incurring additional guilt and condemnation for refusing the 'call.' It is this offer of salvation by the Gospel, this invitation to spiritual and eternal benefits, that St. Peter appears to refer when he says, 'For the promise is unto you and to your children, and to all that are afar off, even as many as the Lord our God shall call' (Acts ii, 39); a passage which declares 'the promise' to be as extensive as the 'calling.' In other words, as the offer or invitation. To this also St. Paul refers (Rom. i, 5, 6). 'By whom we have received grace and apostleship, for obedience to the faith among all nations, for his name;' that is, to publish his Gospel, in order to bring all nations to the obedience of Christ; among whom ye are also the called of Jesus Christ; you at Rome have heard the Gospel, and have been invited to salvation in consequence of this design. This promulgation of the Gospel, by the personal ministry of the apostle, under the name of 'calling,' is also referred to in Gal. i, 6, 'I marvel that ye are so soon removed from him that called you into the grace of Christ,' obviously meaning that it was he himself who had called them, by his preaching, to embrace the grace of Christ. So also in chap. v, 13, 'For, brethren, ye have been called unto liberty. Again (1 Thess. ii, 12), 'That ye would walk worthy of God, whom hath called you, invited you, to his kingdom and glory.'

3. In our Lord's parable it will also be observed that the persons called are not invited as separate individuals to partake of solitary blessings; but they are called to 'a feast,' into a company or society, before whom the banquet is spread. The full revelation of the transfer of the visible Church of Christ from Jews by birth to believers of all nations, was not, how ever, then made. When this branch of the evangelic system was fully revealed to the apostles, and taught by them to others, that part of the meaning of our Lord's parable which was not at first developed was more particularly discovered to his inspired followers. The parable appears to us as the simple calling of a set, we then more fully learned, was not the mere calling of men to partake of spiritual benefits, but calling them also to form a spiritual society composed of Jews and Gentiles, the believing men of all nations, to have a common fellowship in these blessings, and to be formed into the body of the Son of God, possessing their spiritual nature, and diffusing the benefits of salvation among the people or nation to which they respectively belonged. The invitation, 'the calling,' of the first preachers was to all who heard them in Rome, in Ephesus, in Corinth, and other places; and those who embraced it, and joined themselves to the Church by faith, baptism, and continued public profession, were named, especially and eminently, 'the called,' because of their obedience to the invitation. They not only put in their claim to the blessings of Christianity individually, but became members of the new Church, that spiritual society of the redeemed, which called and chose him, and was called the Church of God, to which his soul was united while he lived in this world. The expression of the 'calling,' 'the elect,' the 'Sanctified' (Rom. ix, 23; 1 Cor. i, 24). 4. These views would abundantly explain the various passages in which the term 'calling' occurs in the epistles: 'Even us whom he hath called, not of the Jews only, but also of the Gentiles' (Rom. i, 24); that is, whom he hath made members of his Church through faith. But unto them which are called, both Jews and Greeks, Christ the power of God and the wisdom of God;' the wisdom and efficacy of the Gospel being, of course, acknowledged in their very profession of Christ, in opposition to those whom the preaching of 'Christ crucified' was 'a stumbling-block' and 'a foolishness;' yet 'called' (Rom. iv, 25) (brought to acknowledge Christ, and to become a member of his Church, 'being circumcised? let him not become uncircumcised. Is any called in uncircumcision? let him not be circumcised' (1 Cor. vii, 19). 'That ye walk worthy of the vocation wherewith ye are called. There is one body and one Spirit, even as ye are called in one hope of your calling' (Eph. iv, 1, 4). 'That ye would walk worthy of God, who hath called you to his kingdom and glory.'

5. In none of these passages is the doctrine of the exclusive calling of a set of persons contained; and the Synod of Dort, as though they felt this, only attempt to infer the doctrine from a text already quoted, but which we will now more fully notice: 'Whom he did predestinate, them he also called;' and whom he called, them he also justified; and whom he justified, them he also glorified;' or, as the text stands, 'Who hath saved us and called us with a holy calling; not according to our works, but according to his own purpose and grace, which was given us in Christ Jesus before the world began, but is now made manifest by the appearing of our Saviour Jesus Christ' (2 Tim. i, 9, 10). On this passage we may remark that the 'calling' and the 'purpose' mentioned in it must of necessity be interpreted to refer to the establishment of the Church on the principle of faith, so that it might include men of all nations; and not, as formerly, be restricted to natural descent. For personal election and a purpose of effectual personal calling could not have been hidden till the 'appearing of Christ,' since every instance of true conversion to God in any age prior to the appearing of Christ would be as much a manifestation of eternal election, and an instance of personal effectual calling, according to the Calvinistic scheme, as it was after the appearance of Christ. The apostle is speaking of a purpose of God, which was kept secret till revealed by the Christian system; and from various other parallel passages we learn that this secret, this 'mystery,' as he often calls it, was the union of the Jews and Gentiles in 'one body,' or Church, by faith.
unless it had spoken of a set and determinate number of men as predestinated and called, independent of any consideration of their faith and obedience, which number, as being determinate, would, by consequence, exclude the rest. The consciousness of the divine purpose to glorify believers is carried into effect through all its stages. The great instrument of bringing men to 'love God' is the Gospel; they are, therefore, called, invited by it, to this state and benefit; the calling being obeyed, they are justified; and being justified, and continuing in that state of grace, they are glorified. Nothing, however, is here said to favor the conclusion that many others who were called by the Gospel, but refused, might not have been justified and glorified as well as they; nothing to distinguish this calling into common and effectual; and the very guilt those which are every where represented as contracting who despise the Gospel calling shows that the grace which is sufficient, and sincerely intended, to save them. —Watson, Institutes, ii, 352 sq.; Herzog, Real-Encyklopädie, ii, 104; Nitzsch, Christliche Lehre, § 141; Warren, Systemat. Theol., p. 147.

III. A call to the ministry of the Gospel is regarded by Christians generally as proceeding from God; and the Church of England, the Protestant Episcopal Church, and the Methodist Episcopal Church, require of candidates for ordination an express profession that they trust they are so moved of the Holy Ghost. See MINISTRY.

IV. MINISTERIAL CALL is an invitation on the part of a congregation to a preacher to become their settled pastor. See INSTALLATION.

Callenberg, Johann Heinrich, was born January 12, 1694, in Saxe-Gotha. He studied at Halle, giving special attention to the Oriental languages, to which he was originally led by becoming a member of the Collegium Orientale Thesauricum, which was established at Halle in 1702. He had for special tutor Solomon Negri, a learned Orientalist from Damascus. He was appointed professor ( extraordin. ) of philosophy in 1727, and professor ( ordin. ) of theology in 1739. He became deeply interested in Protestant missions to the East, especially among the Jews and the Mussulmans. In 1728 he organized a school for the education of missionaries; and he afterward established, at his own expense, a printing-office for the publication of works in German, Arabic, and Hebrew for the furtherance of the missionary cause. His students went out over Europe as missionaries to the Jews, and some of them even to Asia and Africa. He printed in Arabic portions of the O. T., the whole of the N. T., Luther's Shorter Catechism, the imitation of Jesus Christ (somewhat curtailed), portions of Grotius on the Truth of the Christian Religion, the Rudiments of the Arabic Language, and other works for the use of missionaries in the East. With a view to furnish the Jews, he wrote a Kurze Anleitung zur Judisch-Tschen Sprache (Short Int. edition to the Speech of the German Jews, 8vo, 1738), to which he added in 1736 a short dictionary of the corrupt Hebrew spoken among themselves by the Jews of Germany. In 1728-38 he published Berichte über fremde und neuere Erwürkungen des christlichen Zeitalters (3 vols. 8vo); in 1733, De Conversione Musulmonorum ad Christianam (12mo). He continued writing, translating, and printing a variety of works useful for the missionaries till his death, which occurred at Halle, July 15, 1750. His publications would fill a column, but they are not of sufficient scientific value to require enumeration here. But the name of

Callenberg preserves always to be cherished in the Christian Church as that of one of the founders of Protestant missions, and of a devoted and self-sacrificing laborer in that cause.—Doering, Die Gelehrten der Theologen Deutschlands, i, 221 sq.; Hoefn, Novae Rerum Geographiae Generales, vii, 202; Eich and Grubler, Allgemeine Encyklopädie, s. v.

Callender, Elias, minister of the first Baptist church in Boston, was the son of Ellis Callender, who officiated as pastor of the First Baptist church in Boston for many years, dying about 1726, at about eighty years of age. The son Elias, was born in Boston, and graduated at the College of Arts at Harvard College in 1710. He was baptized and admitted to church membership August 10, 1713, and was ordained as a Baptist minister May 21, 1718, and Drs. Increase and Cotton Mather and Mr. Webbs, though of a different denomination, gave their assistance. It is said that Thomas Hollis (a Baptist) was so impressed by this Catholic procedure when he heard of it in England, that he made his well-known benefactions to Harvard College in consequence. Mr. Callender abounded in labors not only in Boston, but throughout the commonwealth, till his death, March 31, 1736. He was the first American Baptist minister who had received college education.—Sprague, Annals, vi, 84; Allen, Biographical Dict. s. v.

Callender, John, an eminent Baptist minister, nephew of Elias Callender, was born about 1706, and graduated at Harvard College in 1723. He was ordained colleague with Mr. Peckham as pastor of the church at Newport, Oct. 18, 1731. Here he labored usefully for several years, and died July 26, 1746. He collected many papers relating to the history of the Baptists in this country, which were used by Backus. He published a Historical Discourse on Rhode Island and Providence Plantations (1739); also a Sermon on the Ordination of Jeremiah Comly (1780); and a Sermon on the Death of Mr. Clay of Newport (1745).—Sprague, Annals, vi, 87; Allen, Biographical Dictionary, s. v.

Calling (καλληγοριον, vocatio), a term used in theology to designate the divine invitation to man to share in the gift of salvation. See CALL.

Callirrhoë (Καλληρροη, beautiful stream), the name given to certain warm springs on the eastern side of the Jordan, not far from the river and flowing into the Sea, to which Herod the Great resorted during his last illness, by the advice of his physicians (Josephus, Ant. xvii, 6, 5). The same are probably meant by the ge-mim (גֶּמִימ, Auch. Vers. "mules") of Gen. xxxvi, 24. See ANAH. Pliny (v, 16) also describes them ("callidus fons medicinae salutaritatis") as possessing medicinal properties (Reland, Palest. p. 302, 578). In May, 1818, these springs were visited by Trelawny, who passed through the valley of Callirrhoë they say (Trelawny, p. 467-469): "The whole bottom is filled, and in a manner choked up, with a crowded thicket of canes and aspens of different species, intermixed with the palm, which is also seen rising in tufts in the recesses of the mountain's side in every place whenever the springs issue. In one place a considerable stream of hot water is seen precipitating itself from a high and perpendicular shelf of rock, which is strongly tinted with the brilliant yellow of sulphur deposited upon it. On reaching the bottom, we found ourselves at what may be termed a hot river, so copious and rapid it is, and its heat so little abated. For some way the temperature of the water increased to 112°, and the constant supplies of water that flow into the river. In order to visit these sources in succession, we crossed over to the right bank, and, ascending by the mountain side, we passed four abundant springs, all within the distance of half a mile, discharging themselves into the river at a point with its course. We judged the distance from the Dead Sea, by the raven, to be about one hour and a half. Maclean says there was a city
of the same name in the valley of Callirrhoë, in which we think he must be wrong, since there is not space for a town in the valley as far as we saw it. That Herod must have had some lodging when he visited these springs in war, and there are sufficient remains to prove that some sort of buildings have been erected.” According to Josephus, the fortress of Macheras, which was rebuilt by Herod, was upon this hot-water stream, and not far from the fountains. It is supposed that John the Baptist was imprisoned and beheaded in this fortress. The spring rises above Macheras, which, besides being a strong-hold, was also a palace, built by Herod the Great, and that Herod himself was now on his route toward the territory of Aretas, with whom he was at war. The ruins of this fortress still exist (Josephus, Ant. xvii, 6; xviii, 5, 2; War, i, 33, 3). The Zabda Man, which empties itself into the Dead Sea, visited and described by Seetzen (Roor, ii, 336 sq.), is described as a sweet and thermal stream, and is doubtless the outlet of the hot streams of Callirrhoë (Ritter, Erdk. xv, 572, 578). Lieut. Lynch, who explored it in 1848, says: “The stream, twelve feet wide and ten inches deep, rushes in a southerly direction with great velocity; into the middle of the air, 702; of the sea, 782; of the stream, 942; one mile of the channel, 950. It was a little sulphurous to the taste. The stream has worn its bed through the rock, and flows between the perpendicular sides of the chasm, and through the delta, bending to the south, and flowing to the sea.” The banks of the stream along the delta are fringed with canes, thamarsiks, and the castor-bean. The channel is 122 feet wide at the mouth, and for one mile up, as far as we traced it, does not lessen in width. The sides of the channel are about eighty feet high where it opens upon the delta, but within they rise in altitude to upward of 150 feet on each side, where the trap formation is exhibited. In the bed of the chasm there was one stream, on the south side, eight feet wide and two deep, and two small streams in the centre, all rushing down at the rate of six knots per hour. There were no boulders in the bed of the ravine, which in the winter must, throughout its width and high up the sides, pour down an impetuous flood. The walls of the chasm are lofty and perpendicular, of red and yellow sandstone, equally majestic and imposing, but not worn in such fantastic shapes nor so rich a hue as those of the Arnon. Waded up about a mile, and saw a few date-palm trees growing at the mouth. The echo of the sea appeared, at first gently rounded, but subsequently sharp and anular. There was a succession of rapids, and a cascade of four, and a perpendicular fall of five or six feet. A little above the rapid trap shows over sandstone. The current was so strong that, while bathing, I could not, with my feet against the rock, keep from being carried down the stream; and, walking where it was but two feet deep, could with difficulty retain a foothold with my shoes off. At 7 P.M., bathed first in the sea and afterward in the stream—a most delicious transition from the dense, acid water of the sea, which made our innumerable sores smart severely, to the soft, tendering water of the Callirrhoë!” (Kepidion, p. 871). See also LAMBA.

Callisthenes (Καλλισθένης), a frequent Greek name, a partisan of Nicanor, who was burnt by the Jews on the defeat of that general in revenge for his guilt in setting fire to “the sacred portals” (2 Macc. xvii, 33).—Smith, s. v. See Nicanor.

Callistus. See calixtus I.

Calmet, Augustine, a learned Benedictine, of the congregation of St. Vannes, born at Meuni-la-Horgne Feb. 26, 1672. He studied at Breuil, and after having pronounced the vows in Oct., 169, he proceeded to make the pilgrimage to Jerusalem, and, as he was on the way of St. Ervthe and afterward devoted himself to Hebrew, which he studied under Faire, a Reformed divine. In 1704 he passed to the abbey of Munster, where he taught the young monks; and lectures which he there read to them formed the basis of his “Commentaries on the Old and New Testaments,” which he wrote in Latin, but translated into French, and published in 1716, in 23 volumes 4to. This work was followed by his Histoire Sainte de l’Ancien et Nouveau Testament—History of the Old and New Testaments (Paris, 1718, 2 vols. 4to), and his celebrated Dictionary of the Bible. In 1718 he was made abbot of St. Leopold’s at Nancy, and ten years later translated into Latin, with the assistance of Sémones, where he died (having refused a bishopric in 1718). His life was written by Fangié, his nephew (1763, 8vo), who, as a complete list of his numerous works will be found. The best edition (French) of the Dict. monaire historique et critique de l’Eglise is that of Paris, 1780 (4 vols. fol.). The best English editions are those of 1786 (4to, with additions), and of 1847 (edited by Taylor, 5 vols. 4to). His Commentaire littéral sur tous les livres de l’Ancien et du Nouveau Testament (reprinted at Paris, 1718, 28 vols. 4to, also 9 vols. fol.) was abridged, and published in 17 vols. 4to, at Avignon, 1747-1749; also translated into Latin, with the assistance of Fangié, by Galle, in 19 vols. 4to). Calmet’s Dictionary of the Bible has, until lately, formed the basis of all subsequent works of the same kind. The best abridgment is that of Robinson, which, while more useful than the original work. —Bisig. Univ. XIII, 379. Eccles. Dict. ii, 497. See Dictionaries (Bible).

Callæh (Heb. קלות, Kaloth; Sept. Κάλλνη), the fourth of Nimrod’s cities (Gen. x, 10), and probably not different from the CALNO (Heb. קלנה, Kalnah; Sept. Καλλνη), of Isa. x, 9, or the CANNNEH (Heb. קנה, Kannah; Sept. Xanay) of Ezek. xxvii, 23. The word is thought to mean “the fort of the god Ana or Ana,” who was one of the chief objects of Babylonian worship. According to the Chaldee translation, with which Eusebius and Jerome agree, this is the same place that was subsequently called Cestiphon. It lay on the Tigris, opposite Seleucia, and was for a time the capital of the Parthians, and the winter residence of the Parthian kings (Strabo, xvi, p. 312; Cellarius Notit. ii, 774; see Bochart, Phalag, iv, 18; Michaelis, Spicil. i, 228). This opinion respecting Calneh derives some support from the circumstance that the district named is called the “land of Cestiphon” (Esth. iii, 8; Hist. Nat. vi, 26, 27; Polyb. v, 44); but, on the other hand, this province does not appear to have extended so far west as Calneh must have lain. Ammianus Marcellinus (xxii, 6, 20) states that it was the Persian king Pusoras (who reigned from A.D. 71 to 107) who changed the name of the city to Cestiphon; but that name must have been more ancient, as it is mentioned by Polybius. In the time of the prophet Amos Calneh appears to have constituted an independent principality (Amos vi, 2; Sept. omits, v. r. Κάλπνη or Καλύνη); but not long after it became, with the rest of Western Asia, a prey to the Assyrians (Isa. x, 9). About 150 years after the Assyrian invasion was still a small seat, and may be inferred from its being mentioned by Eschyl. (xxvii, 23) among the places which traded with Tyre. We may gather from Scripture that in the eighth century B.C. Calneh was taken by one of the Assyrian kings, and never recovered its prosperity. Hence it is compared with Carmel with Hamath and Gath (Isa. x, 9; Amos vi, 9), and regarded as a proof of the restless might of Assyria. The site of Cestiphon was afterward occupied by El-Medain, i. e. the (two) cities, of which the only remains are the ruins of a remarkable palace called Tant-kerrn, or “Arch of Kheores,” some mounds of rubble, and a considerable expanse of massive towers and remains of the city. (See Smith’s Dict. of Class. Geo., s. v. Cestophon.) More recent explorers have rendered it probable that
and holidays, to perform their devotions at the next monastery. The Recluses shut themselves up in grotoes and caverns on the tops of mountains, which they never leave, abandoning themselves entirely to Providence. They live on the alms sent them by the neighboring monasteries. The Caloves have four Lents. The first Lent is that of Nifer, which lasts eight weeks, and is called the Grand Quarantain. During this Lent the monks drink no wine; and such is their abstinence that, if they are obliged in speaking, to name milk, butter, or cheese, they always add this parenthesis, "Saving the respect due to the holy apostles, which as a sign of the holy apostles, which begins eight days after Whitsunday: it generally continues three weeks, sometimes longer. During this Lent the monks are allowed to drink wine. The third Lent is that of the assumption of the Virgin: it lasts fourteen days, during which they abstain from fish, except on Sundays and on the figuration of our Lord. The fourth Lent is that of the Advent. The Caloves, in addition to the usual monastic habit, wear over their shoulders a square piece of stuff, on which are represented the cross and the other marks of Christ's passion, with these letters: IC. XC. NC. Ιεροθεοτοκος Χριστος Μυς. "Jesus Christ conqueror. The name of the inscription was written in the tower, where it is still, when it was just alluded to. At the distance of a few hundred yards on the east of the ruins may be distinctly traced a low continuous mound, the remains probably of the external wall of the ancient city. As to the obelisk, the particular object of my visit, the Arabs positively declared that there was one, but none of them had seen it or could indicate its position on the mounds."

See also Calshe.

Cağlan (Isa. x. 9). See Calnes.

Caius (or Calvus). See Caius.  

Caius, a CELEBRATED LUCANIAN writer and controversialist, was born in 109 at Mohrungen in Prussia. He studied at Königsberg and Rostock, and became Professor of Theology at Wittenberg, where he obtained great distinction as a lecturer and controversial theologian. He died Feb. 22, 1586. He was a violent opponent of George Calixtus, whose gentleness he by no means shared. Indeed, so bitter was Caius's zeal, that it has been said of him that "he was born for an inquisitor." He wrote with great ability a ain the Socinians. His most important work was his Biblia Illustrata (Dres- den, 1729. 4 vols. fol.), which contains the whole of Grotius's Annotations, with severe criticisms on them. In dogmatic theology he prepared a vast Systema Locorum Theologicorum (1655-1677, 12 tom.). In the Syncretistic controversy (q. v.) he took the most conspicuous part. His writings are very voluminous, nearly all bitterly controversial, and now little read.—Moehrisch, Ch. Hist. ii. 241; Herzog, Real-Erlebnisk. s. v.

Calvary or Calvary. The word Calvary is from the Greek (kálavéria), and means good old men. The name Calyers is of similar signification, and is generally given to the monks of the Greek Church. They are of the order of St. Basil, and consider it to be a sin to follow any other order than his. They are divided into three classes: the novices, who are called Arkoni; the ordinary professed, called Mirruben; and the more perfect, called Megalubem. They are likewise divided into Canoblin, Anchories, and Recluses. The Canoblins are employed in reciting their offices from midnight to Sunset; and as it is impossible, in so long an exercise, that they should not be over-taken by sleep, they are wakened, and are then required to awake them; and they are obliged to make three genuflexions at the door of the choir, and, returning, to bow to the right and left to their brethren. The Anchories retire from the world, and live in hermitages in the neighborhood of the monasteries; they cultivate a little spot of ground, and never go out but on Sundays  

1. Of the Name.—Many have held that Golgotha was the place of public execution, the Tyburn of Jerusalem, and that hence it was termed the "place of a skull." Another opinion is that the place took its name from its shape, being a hillock of a form like a human skull. In Greek there is no distinction of a mount in either of the narratives. See Crucifixion. That the place, however, was of such such shape seems to be generally agreed, and the traditional term mount, applied to Calvary, appears to confirm this idea. Such a shape, too, it must be allowed, is in entire agreement with the name, that is,
CALVARY

"skull." To these considerations there are added certain difficulties which arise from the other explanation. So far as we know, there is no historical evidence to show that there was a place of public execution where Golgotha is commonly fixed, nor that Golgotha itself, in any case, bore the name Golgotha. Nor is the term Golgotha descriptive of such a place; to make it so, to any extent, the name should have been "skulls," or "the place of skulls." Equally unapt is the manner in which the writers of the Gospel speak of the place: Matthew calls it "a place called Golgotha, a place of a skull," Mark, a place Golgotha, which is, being interpreted, the place of a skull; Luke, "the place which is called Calvaria;" John, "a place called a skull, which is called in the Hebrew Golgotha." In truth, the context seems to show that the Roman guard huried Jesus away and put him to death at the first convenient spot; and that the rather because there was no small fear of a popular insurrection, especially as he was attended by a crowd of people. This place, we may suppose, was not far from the judgment-hall, which was doubtless either near Fort Antonia or in the former palace of Herod. See Pictorium. In either case, the crucifixion would most probably have occurred at some place north-east of the city. Somewhere in the north, it is clear, they would execute him, as thus they would most easily effect their object. But if they chose the north, then the road to Joppa or Damascus would be most convenient, and no spot in the vicinity would probably be so suitable as the road from the north-east by which those who bore the body of Calvary. That some hilllock would be preferred is easy to see, as thus the exposure of the criminal and the alleged cause of his crucifixion would be most effectually secured. Dr. Barclay is at great pains to show (City of the Great King, p. 78 sq.) that the vicinity of the garden of Gethsemane is the more probable point of Calvary, and that the place of Calvary, a place of a skull, must have been made up of a series of the most unfitted conjectures. Indeed, the very fact that of the arbitrary positions assigned by all those who (chiefly from an ultra Protestant prejudice apparently) reject the traditionary site, no two agree, while all are alike destitute of any historical basis, is an important evidence in favor of the correct identification. See Jerusalem.

2. Scriptural Notice of the Locality.—The account in the evangelists touching the place of the crucifixion and burial of our Lord is as follows: Having been delivered by Pilate to be crucified, Jesus was led away, followed by a great company of people and women, who also lamented. On the way, one Simeon, a Cyrenian, coming out of the country, who was compelled to bear Jesus' cross. When they were come to the place which is called Calvary, there they crucified him. This place was nigh to the city; and, sitting down, they watched him there. They that passed by reviled him, wagging their heads and scoffing. Likewise also the chief priests mocked him, with the scribes and elders, and the people stood beholding. The soldiers, too, mocked him. There stood by the cross of Jesus his mother, and his mother's sister, and Mary Magdalene; and all his acquaintance, and the women that had followed him from Galilee, stood afar off, beholding these things. In the place where he was crucified there was a garden, and in the garden a new sepulchre hewn out in the rock; there laid they Jesus, and rolled a great stone to the door of the sepulchre. The writer of the Epistle to the Hebrews adds that Jesus was buried in a new tomb; "Let us therefore go forth to him without the camp," bearing his reproach (Heb. xiii, 11). We thus learn that the crucifixion and burial took place out of the city, and yet near to the city, apparently at the north-west, and probably just on the outer side of the second wall. It is also clear that the place was one around which many persons could assemble, near which wayfarers were passing, and the sufferers in which could be seen or addressed by persons who were both near and remote; all which concurs in showing that the spot was one of some elevation, and equally proves that "this thing was not done in a corner," but at a place and under circumstances likely to make Calvary well known and well remembered alike by the foes and the friends of our Lord.

3. Line of Tradition respecting the Spot.—Was it likely that this recollection would perish? Surely, of all spots, Calvary would become the most sacred, the most endearing in the primitive Church. Nor did the Jew, with a meekness vastly more respectful than point less vividly than his fellow-men. "The tombs of the prophets," "the sepulchre of David," were, we read (Matt. xxiii, 29; Acts ii, 29), reverentially regarded and religiously preserved from age to age. That of "David's Lord" would assuredly not be neglected. It was a scene of public religious festivity when our Lord suffered. Jerusalem was then crowded with visitors from foreign parts. Such, too, was the fact at the time of the effusion of the Holy Spirit. These pilgrims, however, soon returned home, and wherever they went many carried with them the news of the crucifixion of Jesus, and told of the place where he had suffered. It must have been expected at Jerusalem, ever so many to remember it and know its precise locality as the place where Jesus died and rose again. First in Jerusalem, and soon in all parts of the earth, were there hearts that held the recollection among their most valued treasures. Accordingly, we learn from the facts which furnish the name of Calvary. In the century, the tradition was preserved in so living a form as to be made the subject of a figurative illustration of Christian doctrine. The memory of distinguished places is among the least perishable of earthly things. Fathers would convey their knowledge and their impressions to sons; one generation and one Church to another. And the things sacredly committed to the care of the Church were preserved unimpaired as a means to keep alive the recollection. Moreover, it was the fate of Jerusalem, after its capture by the Romans, to become a heathen city; even its name was changed into Colonia Ælia Capitolina. In the excess of their triumphant joy, the conquerors made Jupiter its patron god, and erected statues of Jupiter and Venus on the place where Jesus had been crucified (Sosonii, xi, 1). This was done perhaps not so much to insult as to conciliate. New-comers in religion have always availed themselves of established feelings, and therefore erected their sacred edifices on places already consecrated in the minds of the people. The Greeks, for example, celebrated the sun-god to Venus standing on Calvary sufficient to show that Calvary was the place where Jesus suffered. The temple thus takes up the tradition, and transmits it in stone and marble to coming ages. This continuation of the tradition is the more important, because it begins to operate at a time when the Christians were driven from Jerusalem. But the absence of the Christians from the Holy City was not of long duration, and even early in the third century we find pilgrimages from distant places to the Holy Land had already begun for the express purpose of viewing the spots which the presence and sufferings of the Saviour had rendered sacred and memorable (Hist. Hierod., p. 391; Eusebius, Hist. Eccles., vi, 11). A century later, Eusebius (A.D. 315) informs us that Christians visited Jerusalem from all regions of the earth for the same object. Early in the fourth century, Eusebius and Jerome write down the tradition and fix the locality of Calvary in their writings. It was from Jerome that we hear about A.D. 270. In 315 he became a bishop in his native country, and died in 395. He was a learned man, and wrote a history of the Christian Church. About 380 he composed his Onomasticon, which was expressly devoted to the business of determining and recording the sites of holy and other places in Palestine. This work of Eusebius, written in Greek, Jerome afterward translated into Latin, and thus added his authority to
that of Eusebius. Jerome took up his residence in the Holy Land in the latter part of the fourth century, and remained there till his death. (For an estimate of the value of these geographical authorities, see Rodland, Palest. p. 467 sq.) Pilgrims now streamed to Jerusalem from all parts of the world, and that site was fixed for Golgotha which has remained to the present hour.

4. Erection of the "Church of the Holy Sepulchre" over the Site.—The acts of the Emperor Constantine and his mother Helena gave a permanent and public expression to this tradition. This empress, when very far advanced in life, visited Jerusalem for the express purpose of erecting a church on the spot where the Lord Jesus had been crucified. The proceeding details show that the preservation of the memory of the locality was anything but impossible. Helena would naturally be solicitous to discover the true spot, whence ensues the likelihood that she was not mistaken. She had previously heard that the holy places had been heaped up and concealed by the heathen, and resolved to attempt to bring them to light, ἵνα τὸ ὕμνον ἀναθέσῃ (Theoph. in Chron. p. 18). "On her arrival at Jerusalem, she inquired diligently of the inhabitants. Yet the search was uncertain and difficult, in consequence of the obstructions by which the heathen had sought to render the spot unknown. These being all removed, the sacred sepulchre was discovered, and by its side three crosses, with the tablet bearing the inscription written by Pilate" (Robinson, Bibl. Hist. II, 14; Theodoret, I, 17). This account of her proceedings, taken from one who labors to bring into discredit the whole of Helena’s proceedings, and who is far too indiscriminate and sweeping in his hostility to the primitive traditions of the Church, shows sufficiently that Helena was cautious in her proceedings; that there did exist a tradition on the subject; that by that tradition the empress was guided; and that she found reason to fix the site of Calvary on the spot where the heathen had erected their temple and set up their profane rites. That no small portion of the marvellous, not to say legendary and incredible, is mixed up in the accounts which the ecclesiastical historians have given, we by no means deny; but we see no reason whatever, and we think such a course very unphilosophical, to throw doubt unsparringly over the whole, as (by no means in the best taste) does Dr. Robinson. However, on the spot thus ascertained, was erected, whether by Constantine or Helena, certainly by Roman influence and treasure, a splendid and extensive Christian temple. Socrates (Eccles. Hist. i, 17) says, "The emperor’s mother erected over the place where the sepulchre was a most magnificent church, and called it New Jerusalem, building it opposite to that old deserted Jerusalem" (comp. Euseb. Vit. Const. iii, 33). This church was completed and dedicated A.D. 335. It was a great occasion for the Christian world. In order to give it importance and add to its splendor, a council of bishops was convened, by order of the emperor, from all the provinces of the empire, which assembled first at Tyre and then at Jerusalem. Among them was Eusebius, who took part in the solemnities, and held several public discourses in the Holy City (Euseb. Vit. Const.: Robinson, ii, 16). The Church of the Holy Sepulchre was burnt by the Persians in A.D. 614. It was shortly after rebuilt by Modestus with resources supplied by John Elemon, patriarch of Alexandria. The basilica or martyrion erected under Constantine remained as before. The Mohammedans next became masters of Jerusalem. At length Harun-ar-Rashid made over to Charlemagne the jurisdiction of the holy sepulchre. Palestine again became the scene of battles and bloodshed. Muzor, of the race of the Fatimites, transferred the seat of his empire to Cairo when Jerusalem fell into the hands of new masters, and the holy sepulchre is said to have been again set on fire. It was fully destroyed at the command of the third of the Fatimite caliphs in Egypt, the building being razed to the foundations. In the reign of his successor it was rebuilt, being completed A.D. 1048; but instead of the former magnificent basilica over the place of Golgotha, a small chapel only now graced the spot. The Crusades soon began. The Crusaders regarded the edifices connected with the sepulchre as too contracted, and erected a stately temple, the walls and general form of which are admitted to remain to the present day (Robinson, ii, 61). So recently, however, as A.D. 1806, the church of the holy sepulchre was partly consumed by fire; but, being re-
built by the Greeks, it now offers no traces of its recent devotion.

5. *Objecions to the Identification.*—The sole evidence of any weir in the opposite balance is that urged by Robinson, that the place of the crucifixion and the sepulchre are now found in the midst of the modern city. But, to render the argument decisive, it should be proved that the city occupies the same ground that it occupied in the days of Christ. It is, at least, as likely that the city should have undergone changes as that the site of the crucifixion should have been mistaken. The identity of such a spot is more likely to be preserved than the size and relative proportions of the city itself. The present site under the most compliant change is probably the place of Christ than any other place on earth. The present walls of Jerusalem were erected so late as A.D. 1532; and Robinson himself remarks that a part of Zion is now left out (p. 87). If, then, the city has been contracted on the south, and if, also, it was after the death of Christ expanded on the north, what should we expect but to find Golgotha in the midst of the modern city?

Jerusalem, in the days of Christ, had two walls, termed the "first" and the "second." It is with the second wall that we are here chiefly concerned. It began at a tower, named Gennath, of the first wall, called Antonia, and at the east end of Antonia. The third wall embraced a suburbs on the north and north-west. This comprehended a sort of new city, and was built in consequence of the large population which by degrees fixed their abode in the space which falls between the second and third walls. This wall was built under Claudius, at least forty-one years after Christ (Josephus, War, v, 4, 2; comp. Tacit. Hist. v, 12). This third wall, then, did not exist in the time of our Lord, and Robinson allows that if the present site of the sepulchre fell without the second wall, all the conditions of the general question would be satisfied. Many travellers and antiquaries have decided that this was the case, while others, more numerous perhaps, but not better qualified to judge, have come to the opposite conclusion. See JERUSALEM (Topography). (It is worthy of remark that Dr. Kiepert, of Berlin, the most experienced cartographer probably, especially on this and kindred subjects, has vastly improved in the map in his own construction, some of them including and others excluding the contested site along the course of the wall in question.) The whole question turns upon the position of the gate Gennath: if this was at the extreme north-west angle of Zion, then the second wall, in order to be at all consistent, could not well have excluded the site in question; but if, as is more probable, it was some distance east of the tower Hippicus (for while Josephus, ut supra, expressly begins the first and third walls from this tower, he begins the second from this gate, situated along the northern part of the first wall), then the second wall could hardly have bent sufficiently to the west to include it. See GENNATH.

The city bulged out on the north, as it contracted on the south, thus bringing Golgotha into its central parts. Robinson, however, asserts that the second wall must have excluded the Pool of Hezekiah, which (as he thinks) was in the city, or included the site of the sulpulchre, which was out of the city. This alternative, however, although by no means a fatal objection, is not absolutely necessary, as may be seen on reference to various plans of the city that have been constructed, in which the second wall leaves both where the Scriptures place them. See HEBREWS' Pool.

But we need say little upon the history of the Temple, or the present site of the sepulchre Robinson considers insufficient, it being only about a quarter of a mile. We know not that there is anything in scriptural account which gives support to this notion. A distance of a quarter of a mile appears quite enough for the recorded events, to say nothing of the essential weakness of such a position; for how can Robinson know that his measures extended along the same ground as our Lord was buried over? But reason has already been given why the Jews should have taken no very protracted course.

Two or three additional facts in confirmation of the identity of the present place may finally be adduced. Buckingham's *Papacy* (ch. vi) says: "The name called Calvary, and inclosed within the Church of the Holy Sepulchre, bears marks in every part that is needed of its having been a round nodule of rock standing above the common level of the surface." Scholz (De Golgota sita, p. 30) states that he traced the remains of a wall, which, on the plan, runs, excluding Golgota, and taking in the Pool of Hezekiah (Baumer, p. 352). It may also be remarked that, since the publication of Robinson's work, Rayner has put forth a piece (Besuche sur Bib. Geog. 1843), in which he revives his *Palastina* so far as Robinson's ascertained results render necessary; but he remains of the same opinion in regard to the possibility of the present Church of the Sepulchre being out of the city. At most, a very few hundred yards only can the original Golgota have lain from the present site, and the evidence in favor of its identity, if not decisive, is far stronger than any that has been adduced against it. At the bottom, then, very small is the reason for disturbing the convictions and distressing the hearts of the sincere believers who visit the Holy Sepulchre in order to give vent to their tearful gratitude and cherish their pious faith. A similar conclusion is warmly contended for by Dr. Olin (Promila in the East, ii, 278 sq.), and still more at length by Mr. Williams (Holy City, vol. ii, ch. i and ii). It is also ably examined and maintained by Trupper (Ancient Jerusalem, Lond. 1856). It has, however, been often either stoutly denied or lightly sneered at by many other writers, who may be styled as belonging to the modern anti-traditional school. At the head of this list, Dr. Robinson, of whom we have occasion to impugn the authenticity of scriptural localities in general, as now pointed out. See GOLGOTHA; SEPULCHRE OF CHRIST.

**CALVARY, THE**, a name given in Roman Catholic countries to "a representation of the various scenes of the passion and crucifixion of our Lord, either in a chapel, or external to the church, as at St. Jacques, at Amsterdam; at Aix-la-Chapelle, the Calvary is a church on the top of a hill, surrounded by twelve sculptured stones, each marking an event which took place on the journey of the Saviour to Mount Calvary. The approach to the Calvary is called the Via Dolorosa, each of the stones marking what is called a station, at which the pious say a prayer in passing." 

**Calvary, Congregation of Our Lady of** an order of Benedictine nuns, originally founded at Poitiers by Augustin of Orleans, at the time of the latter's death. Pope Paul V confirmed this order in 1617; and in the same year the foundress took possession of a convent newly built at Poitiers, with twenty-four nuns of the order of Fontevrault. In 1620 Mary de Medicis removed these nuns to Paris, and established them near the Porte Saint-Denis, in the Protestant Palace. The foundation. In the latter period of the Revolution, this establishment was restored to the church of the Virgin for the sufferings of Christ, and some or other of the nuns were compelled to be day and night before the cross. Toward the close of the last century the order counted about twenty convents, all of which were destroyed by the French Revolution. Since that time, a convent in Paris, and several more in other parts of France, have been restored.

**Calvert, John P.**, a Methodist Episcopal minister,
CALVES was born in Belmont county, Ohio, October 23, 1833; studied at the Ohio University, and was admitted on trial as a preacher in the Ohio Conference in 1858. When the American civil war broke out in 1861, no less than six of his brothers enlisted in the army and he soon after felt his duty to follow them. At the battle of Shiloh, Aug. 7, 1862, he was wounded, and on the following Sunday he died. He had been very useful in the army, preaching and holding prayer-meetings whenever opportunity afforded.—Minutes of Conference, 1862, p. 198.

Calves. See CALP.

Calvin, John, one of the most eminent of the Reformers.

1. Sketch of his Life.—He was born at Noyon, July 10th, 1509, his father, Gerard Chauvin, being a nota... He was from the first educated for the Church, and before he was twelve years old was presented to a benefice in the Cathedral of Noyon. Six years after this he was appointed to a cure of souls at Montville, and thus, although not yet twenty, and not even in the minor orders, he was engaging the title and reverence of his father, who would have devoted his whole min... to the direction of a faction, met in a public assembly and expelled Farel and Calvin from the place. Calvin repaired to Bern, and then to Strassburg, where he was appointed professor of divinity and minister of a French church, into which he introduced his own form of church government and discipline. The great efforts were made to get the Genevese to return to the communion of the Church of Rome, particularly by Cardinal Sadolet, who wrote to them earnestly to that effect; but Calvin, ever alive to the maintenance of the principles of the Reformation, disappointed all the expectations and of his efforts the Genevese in the new faith, addressing them to powerful and affectionate letters, and replying to that written by Sadolet. While at Strassburg Calvin also published a treatise on the Lord’s Supper (Traité de la Sainte Cène), in which he combated the opinions both of the Roman Catholics and Lutherans, and at the same time explained his own views of that ordinance. Here, too, he published his Commentary on the Epistle to the Romans. Calvin became acquainted with Casta... during his residence at Strassburg, and procured for him the situation of a regent at Geneva; and it was during his stay in this city that, by the advice of his friend Bucer, he married Idelette, the widow of a converted Anabaptist.

In November of the same year he and Farel were solicited by the Council of Geneva to return to their former charge in that city; in May, 1541, their banishment was revoked, and in September following Calvin was received into the city-spread the congratulations of his flock, Farel remaining at Neuchâtel. He immediately laid before the council his scheme of church government, and after it was adopted and published by authority (26th of November, 1541), he was unhesitating in its enforcement. His promptitude and firmness were now conspicuous; he was the master of the ruling spirit in the city, which he had established there he wished to make the mother and seminary of all the Reformed churches. His personal labors were unceasing. Geneva, however, was the common centre of all his exertions, and its prosperity peculiarly interested him, though less for its own sake than for the comfort and supply of the world. He established an academy there, the high character of which was long maintained; he made the city a literary mart, and encouraged the French refugees and others who sought his advice to apply themselves to the occupation of a printer or librarian; and when he finished the ecclesiastical regim... he directed his attention to the improvement of the municipal government of the place. That Calvin
should, in the circumstances in which he was now placed, show marks of intolerance toward others, is not surprising; and to seek a palliation of his guilt, we need not go back to the time when he belonged to the Church of Rome, nor yet to the notions of civil and religious liberty which we have in his theology. We have only to reflect on the constitution of the human mind, and the constant care necessary to prevent power in any hands from degenerating into tyranny. His conduct toward Servetus [see Servetus] has been justly condemned, yet the punishment of Servetus was approved of by the whole church and was published by the most orthodox Melandchton. Nor was his treatment of Bolese (q. v.) without reproach. In 1554 Calvin published a work in defense of the doctrine of the Trinity against Servetus (Fideis Expositio Errorum M. Serveti), and to prove the right of the civil magistrate to punish heresy; Beza the same year published a work on the like subject, in reply to the treatise of Castalio. The state of Calvin's health prevented him going in 1561 to the Conference of Poissy (q. v.), an assembly which in his view promised to be of great consequence, and which was indeed remarkable in this respect, that from that time the followers of Calvin became known as a distinct and named as the name of the pastor. To the last he maintained the same firmness of character which had distinguished him through life. On his death-bed he took God to witness that he had preached the Gospel purely, and exhorted all about him to walk worthy of the divine goodness: his slender frame took on the last crisis, on the 27th of May, 1564, he died without a struggle, in the fifty-fifth year of his age. The person of Calvin was middle-sized and naturally delicate; his habits were frugal and unostentatious; and he was so sparing in his food, that for many years he took only one meal in the day. He had a close understanding, an extraordinary memory, firmness and inflexibility of purpose which no opposition could overcome, no variety of objects defeat, no vicissitudes shake. In his principles he was devout and sincere, and the purity of his character in private life was without a stain."—English Cyclopedia.

It is impossible to contemplate without astonishment the labors of Calvin during the last twenty years of his life. He presided over the ecclesiastical and political affairs of Geneva; he preached every day, lectured thrice a week, was present at every meeting of the Consistory, and yet found time for a vast correspondence, and to continue his voluminous literary labors. His principal works are still in the library of Geneva 2025 sermons in MS. His health during all this period was feeble, yet he continued his various toils almost up to the very day of his death. He chose to be poor, refusing on several occasions proposed additions to his very moderate salary, and is said uniformly to have declined receiving presents, unless for the sake of giving them to the poor. From his numerous publications it is believed that he derived no pecuniary profit; and yet, as was the case with Wesley, he was assailed on all sides as having amassed great wealth. "I see," said he, "what incites my enemies to urge these falsehoods. They measure me according to their own dispositions; believing that I must be heaping up money on all sides because I enjoy such favorable opportunities for doing so. But assuredly, if I have not been able to avoid the reputation of being rich during my life, death will at last free me from this stain." And so it was with the will of Calvin to dispose of his property, amounting to about two hundred and twenty-five dollars, and on the 27th of May, 1564, being within a few weeks of fifty-five years of age, he calmly breathed his last in the arms of his friend Beza. He was buried, according to his own request, without pomp, and no monument marks his last resting-place. Calvin's intellect was of the very first class, at once acute, penetrating, profound, and comprehensive. His cultivation was in harmony with it. Seclin declares that at twenty-two Calvin was the most learned man in Europe.

"The first edition of his great work, The Institutes of the Christian Religion, was published when he was twenty-two years of age. It contains the elementary proof of the maturity and vigor of his mind, of the care with which he had studied the Word of God, and of the depth and comprehensiveness of his meditations upon divine things, that, though the work was afterward greatly enlarged, and though some alterations were even made even by the man himself, the original intent of the topics discussed, yet no change of any importance was made in the actual doctrines which it set forth. The first edition, produced at that early age, contained the substance of the whole system of doctrine which has since been commonly associated with his name, the development and exposition of which has been regarded by many as constituting a strong claim upon the esteem and gratitude of the Church of Christ, and by many others as rendering him worthy of execration and every opprobrium. He lived twenty-seven years more after the publication of the first edition of the Institutes, and a large portion of his time during the remainder of his life was devoted to the examination of the Word of God and the investigation of divine truth. But he saw no reason to make any material change in the views which he had put forth; and a large proportion of the most pious, able, and learned men and most careful students of the sacred Scriptures, who have since assembled around the study of his writings, and his leading doctrines as accordant with the teaching of God's Word."—Brit. and For. Eng. Rev. Review, No. xxxiii.

As an expositor of the Scriptures and as a writer of systematic theology Calvin has had few rivals in the Christian Church. His Latin style is better than that of most of his contemporaries. The Roman Catholic Audin says, "Never does the proper word fall him; he calls it, and it comes." In brevity, clearness, and good sense, his commentaries are unsurpassed. As a civilian, "he had few equals among his contemporaries. In short, he exhibited, in strong and decided development, moral and intellectual qualities which marked him out for one who was competent to guide the opinions and control the comhoutions of inquiring and agitated nations. Through the most trying and hazardous period of the Reformation he exhibited invariably a wisdom in counsel, a power of action, and a knowledge of loose and intrepidity of character which were truly astonishing. In the full import of the phrase, he may be styled a benefactor of the world. Most intensely and effectually, too, did he labor for the highest temporal, and especially for the eternal interests of his fellow-men. He evidently brought to the great enterprise of the age a larger amount of moral and intellectual power than did any other of the Reformers." In the just language of the archbishop of Cashel (Dr. Lawrence), "Calvin himself was both a wise and a good man; inferior to none of his contemporaries in general ability, and superior to almost all in the art, as well as in elegance of composition, in the perspicuity and arrangement of his ideas, the structure of his periods, and the Latinity of his diction. Although attached to a theory which he found it difficult in the extreme to free from the suspicion of blasphemy against God the author of sin, he certainly was no blasphemer, but, on the contrary, "an anxiety not to commit, but, as he conceived, to avoid blasphemy—that of ascribing to human what he deemed alone imputable to Divine agency.""
the organ by which communion is attained is faith, he is presented to all, but received only by believers. The mere symbolic view depreciates the sign too much, and separates it from the sacrament; but by the other view the sign is exalted too much, and thereby the nature of the mystery itself is obscured." (9) Calvin's views on *Grace and Predestination* were so strongly pronounced that his name was desig- nated an entire system. He maintained the "do- ctrine of absolute predestination, in which he was connected with a one-sided tendency of Christian feel- ing and a rigid logical consequence." Like Zwingli, he regarded predestination in a limited sense, and excluded any idea of a divinely appointed process by God in no other way foresees the future but as he has decreed. Hence Calvin allowed no contingency even in the fall; he says, How could God, who effects all things, have formed the noblest of his creatures for an uncertain end? What then would become of his omnipotence? The Infra-Episcopalians must still allow such a predestination in the case of Adam's descen- dants. It cannot have been in a natural way that all lost salvation through the guilt of one. Yet he him- self feels shocked at the thought; *decretum quidem horrible fatore,* he says. Consequently, God created the greatest part of mankind in order to glorify him- self in them, and in blessed dust he revealed his love, by the revelation of his love." His opponents might give a reason why God, who could have made them dogs, created them in his own image. Ought irra- tional brutes also to argue with God? All doubts may be silenced by the thought that God's will is the highest law in nature; yet he did not rest here. The idea of an absolute omnipotence of God, not conditioned by holiness, he looked upon as profane, and appealed to the incomprehensibility of this mystery. It is to be acknowledged that Calvin sought to evade the practically injurious consequences of the doctrine of absolute predestination, and especially to the revealed grace of God in the work of redemption. Men ought to keep to the Word of God alone; and, instead of inquiring respecting their own election, look to Christ, and seek in him God's fatherly grace. Calvin labored very much to procure the universal ac- knowledgment of this doctrine in Switzerland, but met with serious opposition. From his friend, the learned Sebastian Castalio (q.v.). In Geneva Cal- vin at last obtained the victory, and then soon came to an understanding respecting it with other Swiss theologians. He attempted, but in vain, to get Me-
Calvin professes to be only a borrower from St. Augustine (Inst. bk. iii, ch. xxiii, § 10); and he repudiates the consequences that have been charged upon his doctrine. For instance, he strenuously mainains that God is not the author of sin, that man acts freely and accountable, and that election is a stimulus to good works rather than an opiate to inaction (Inst. bk. iii, ch. xxiii, §§ 3, 5, 12). See Calvinism; Predestination.

II. Literature.—The best edition of the Latin works of Calvin is that of Amsterdam (1671, 9 vols. fol.). A new edition is now going on in the Corpus Reformatorum, under the title Calvinis Opera quae supersunt omnis (vols. i-v, Brunswick, 1864, 1867). An excellent and very cheap edition of the Commentarii in N. T., edited by Tholuck, was published at Halle, 1853-55, 7 vols. 8vo; one of the Comm. in Psalmus (1856, 2 vols.) and of the Institutiones Religionis Christianae was likewise edited by Tholuck (Halle, 1834, 1835, 2 vols. 8vo); one of the Comm. in lib. Genesee (1858, 8vo) by Hengstenberg.

Most of Calvin's writings have been translated into English; and a new and revised edition has been issued of his Institutes. The first is the English Translation Society, "in very handsome style, yet cheap (Edinb. 51 vols. 8vo). Its contents are as follows: Institutes of the Christian Religion, 3 vols.; Tracts on the Reformation, 3 vols.; Commentary on Genesis, 2 vols.; Harmony of the last Four Books of the Pentateuch, 4 vols.; Commentary on Isaiah, 4 vols.; Commentary on Jeremiah and Lamentations, 5 vols.; Commentary on Ezekiel, 2 vols.; Commentary on Hosea, 1 vol.; Commentary on Daniel, 2 vols.; Commentary on Joel, Amos, and Obadiah, 1 vol.; Commentary on Jonah, Micah, and Nahum, 1 vol.; Commentary on Habakkuk, Zephaniah, and Haggai, 1 vol.; Commentary on Zechariah and Malachi, 1 vol.; Harmony of the Synoptical Evangelists, 3 vols.; Commentary on John's Gospel, 2 vols.; Commentary on Acts of the Apostles, 2 vols.; Commentary on Romans, 1 vol.; Commentary on Corinthians, 2 vols.; Commentary on Galatians and Ephesians, 1 vol.; Commentary on Philippians, Colossians, and Thessalonians, 1 vol.; Commentary on Timothy, Titus, and Philemon, 1 vol.; Commentary on Hebrews, 1 vol.; Commentary on Peter, John, James, and Jude, 1 vol. There are English translations of his Institutiones by John Allen (Lond. 1813, reprinted in several editions by the Philadelphia Presbyterian Board of Publication), and by Beveridge (Edinb. 1863, 8vo). Calvin's life was written in brief by Beza (Eng. ed. 1844, Edinb. Trans. Soc.; also Phila. 1836, 12mo) and Farel; but within the last few years several biographies have appeared. The most copious and elaborate is Leben J. Calvin's von Paul Henry, D.D. (Hamb. 1864-67, 4 vols. 8vo). The first three volumes work the unedited letters of Calvin, which are preserved in Geneva, and gives the most important of them in the appendices. A poor translation has been published, entitled The Life of Calvin, translated from the German of Dr. Henry, by H. Stabbing, D.D. (Lond. 1849, 2 vols. 8vo); it omits most of the main points and appendices which make up great part of Henry's work. A Roman Catholic biography by Audin (Histoire, etc., de J. Calvin, par J. M. V. Audin, Paris, 2 vols. 1841) has the sole merit of a lively and piquant style. An English translation has been published in Baltimore (History, etc., of John Calvin, translated from Audin, by John M'Cull, 8vo); and it has also been translated into German (Augsb. 1844, 2 vols.), into Italian (in Pirotta's Bibliotheca Eccles. vols. ix and x, Milan, 1848), and into other languages. A graphic but superficial biography has been published by Thomas H. Dyer (Lond. 1850; N.Y., Harpers, 1851). A biography, together with select writings of Calvin, was published by J. de Loye Staebelin (8vo, a selection of a dispensable brevity, Elberfeld, 2 vol. 1860, 8vo). There is a good sketch of Calvin's life, by Robbins, in the Bibliotheca Sacra, vol. ii, for 1845. On the theology of Calvin, see Gass, Prof. De gnmatik, vol. i, bk. i; art. Calvinism; and Reeve, Bibliotheca, 1863, p. 720; Cunningham, The Reformers and Theology of the Reformation, Essays, vi-x. See also Talloch, Leaders of the Reformation (new ed. Lond. 1861); Bungener, Calvin, his Life and Works (Edinb. 1862, 8vo). The Letters of Calvin, from original MSS., were first edited by Bonnet and translated by Constable (Edinb. 1855, 4 vols. 8vo, repub. by Presbyterian Board [Philadelphia]). A new edition of the Institutes in French, entitled Les Lettres de la Religion à l'Église, appeared in Paris, 1859 (2 vols. 8vo). It contains an introduction by the editors, with a history of previous editions. See Meth. Quart. Review, Oct. 1850, art. iii; Amer. Theol. Review, Feb. 1860, p. 129; North Brit. Review, vol. xiii; Brit. and Foreign Evang. Review, No. xxiii; Bibl. Rhetorica, xiv, p. 126; Kösten, in Studien u. Kriften, 1868, i, ii.

Calvinism, properly, the whole system of theology taught by John Calvin, including his doctrine of the sacraments, etc. It is now, however, generally used to denote the theory of grace and predestination set forth in Calvin's Institutes, and adopted, with more or less modifications, by several of the Protestant churches. See Calvinism.

I. Calvin's own Views (Supralapsarian).—These are set forth (from Neander) under the article Calvin (q. v.). We give here simply such farther extracts from Calvin's own writings as are necessary to show his system.

(1.) "Predestination, by which God adopts some to the hope of life, and adjudges others to eternal death, no one desirous of the credit of piety dares absolutely to deny. But it is involved in many cavils, especially by those who make foreknowledge the cause of it. We maintain, on the contrary, that the probability of a man's being the posterity to represent one as dependent on the other. Predestination we call the eternal decree of God, by which he hath determined in himself what he would have to become of every individual of mankind. For they are not all created with a similar destiny; but eternal life is foreordained for some, and eternal damnation for others. Every man, therefore, being created for one or the other of these ends, we say he is predestinated either to life or to death." After having spoken of the election of the race of Abraham, and then of particular branches of that race, he proceeds: "Though it is sufficiently clear that God, in his secret counsel, freely chooses whom he will, and rejects others, his gratuitous election is but half displayed till we come to particular individuals, to whom God not only offers salvation, but assigns it in such a manner that the certainty of the effect is liable to no suspense or doubt." He sums up the chapter in which he thus generally discusses the point, "In conformity, therefore, to the clear doctrine of the Scripture, we assert that, by an eternal and immutable counsel, God hath once for all determined both whom he would admit to salvation, and whom he would condemn to destruction. We affirm that this counsel, as far as concerns the effect, is founded on his gratuitous mercy, totally irrespective of human merit; but that to those whom he doth to condemnation, the gate
CALVINISM

of life is closed by a just and irreprehensible, but incomprehensible judgment. In the elect, we consider a calling as an evidence of election; and justification as another token of its manifestation, till they arrive in glory, which constitutes its completion. As God seals his elect by vocation and justification, so, by excluding the reprobate from the knowledge of his name and satisfaction of his Spirit, he affords another indication of the judgment that awaits them."—Institutes, bk. iii., ch. xxii.

(2.) As to the theory that predestination depends on foreknowledge of holiness, Calvin says: "It is a notion commonly entertained that God, foreseeing what was in any individual will, refraint from the same, or makes a correspondent distinction between different persons: that he adopts as his children such as he foresees will be deserving of his grace, and devotes to the damnation of death others whose dispositions he sees will be inclined to wickedness and impiety. Thus they not only obscure election by covering it with the veil of foreknowledge, but pretend that it originates in another cause." (Bk. iii., ch. xxii.) Consistently with this, he a little further on asserts that election does not flow from holiness, but holiness from election: "For when it is said that the faithful are elected that they should be holy, it is fully implied that the holiness, not the election, is the original in election." He proceeds to quote the example of Jacob and Esau, as loved and hated before they had done good or evil, to show that the only reason of election and reprobation is to be placed in God's "secret counsel." (Bk. iii., ch. xxiii.)

(3.) so, as to the ground of reprobation: "God hath mercy on whom he will have mercy, and whom he will he hardeneth." You see how he (the apostle) attributes both to the mere will of God. If, therefore, we can assign no reason why he grants mercy to his people but because such is his pleasure, neither shall we find any other cause but his will for the reprobation of others. For when God is said to harden, or show mercy to whom he pleases, men are taught by this declaration to seek no cause beside his will." (Ibid.)

"Many, indeed, as if they wished to avert odium from God, admit election in such a way as to deny that any one is reprobated. But this is puerile and absurd, because election itself could not exist without being opposed to reprobation: whom God passes by he therefore reprobates; and from no other cause than his determination to exclude them from the inheritance which he predestines for his children." (Bk. iii., ch. xxiii.)

(4.) Calvin denies that his doctrine makes God the author of sin, and that the ruin of men is their own work: "Their perdition depends on the divine predestination in such a manner that the cause and matter of it are found in themselves. For the first man fell because the Lord had determined it should so happen. The reason of this determination is unknown to us. Man, therefore, falls according to the appointment of Divine Providence, but he falls by his own fault. The Lord had a little before pronounced every thing that he had made to be very good. Whence, then, comes the depravity of man to revolt from his God? Least it should be thought to come from creation, God approved and commended what had proceeded from himself. The first evil which he committed was the violation of the nature he had received pure from the Lord, and by his fall he drew all his posterity with him to destruction."

(5.) In much the same manner he contends that the necessity of sinning is laid upon the reprobate by the execution of God, and yet denies God to be the author of their sinful acts, since the corruption of men was derived from Adam, by his own fault, and not from God. He exhorts us "rather to contemplate the evident cause of condemnation, which is nearer to us, in the corrupt nature of mankind, than search after a hidden and altogether incomprehensible one, in the predestination of God." "For though, by the eternal providence of God, man was created to that misery to which he is subject, yet the ground of it he has derived from himself, not God, since he is thus ruined solely in consequence of his having degenerated from the pure creation of God to vicious and impure depravity."

See especially Institutes, bk. iii., ch. xxiii., § 27, and ch. xxiv., § 8.

From the above passages it will be seen that Calvin went beyond the Augustinian theory of predestination, and held to the supralapserian view. Supralapserianism regards man, before the fall, as the object of the unconditional decree of salvation or damnation; Sub-lapserianism, or those who held the preterist or temporary, subordinate to the creation and fall of man. According to Dr. Shedd's definition, "supralapserianism holds that the decree to eternal bliss or woe precedes, in the order of nature, the decree to apostasy; infralapserianism holds that it succeeds it" (History of Doctrines, ii., 192). The Supralapserians hold that God decreed the fall of Adam; the Sublapserians, that he permitted it. Some writers have maintained that Calvin was not a supralapserian, but that view of his teaching is hardly tenable. Calvin terms "the exclusion of the fall of the first man from the divine predestination a frigidum commentum" (iii., ch. xxiii., § 7).

So also, § 4, he says: "Gessus homines perfertur (homines), nihil aliud quam praeas laudent eadem calamitas, in quam ipsum predestinationem lapseratio est Adam, ac posteros suos precipitae secum traxit." It is on this particular point that Calvin goes farther than Augustine, who did not include the fall of Adam in the divine decree." (Smith's Hagenbach's History of Doctrines, § 249.) Amynraudus (g.v.) sought to reduce Calvin's system to sublapserianism, but was effectually answered by Curselius in his tractatus de jue Dei in Creaturas. But Fisher (New Englander, April, 1868, p. 308) holds that Calvin was not a supralapserian. (See Christ. Remembrancer, Jan. 1866, art. vi.; Warren, in Methodist Quarterly Review, July, 1867, art. i.; Möhler, Symbolism, § 4.)

II. Doctrines of Dort (Infralapserian).—The controversy with the Remonstrants on the five points (see ARMINIANISM; REMONSTRANTS) led to the clearer definition of the doctrines in question by the Synod of Dort, which, instead of opposing the points in disputation, view at least in terms. See the Confessions and Canons of the Synod of Dort for the full statement. The following summing up is given by Watson, from Scott's Synod of Dort, of the five articles which constitute the standard of what is now generally called strict Calvinism. (1.) Of Predestination.—As all men have sinned in Adam, and have become exposed to the curse and eternal death, God would have done no injustice to any one if he had determined to leave the whole human race under sin and the curse, and to condemn them on account of sin; according to those words of the apostle, 'All the world is become guilty before God' (Rom. iii. 19, 28; vii. 23). That some, in time, have faith given them by God, and others have it not given, proceeds from his eternal decree; for 'known unto God are all his works from the beginning,' etc. (Acts xxv. 18; Eph. i. 11). According to which decree he graciously softens the wrath of his anger, that he may have mercy, and he bends them to believe; but the non-elect he leaves, in his judgment, to their own perversity and hardness. And here, especially, a deep discrimination, at the same time both merciful and just; a discrimination of men equally lost, open itself to us; or that decree of election and reprobation, which is veiled in the word of God, which, as perverse, impure, and unstable persons do wrest to their own destruction, so it affords inexcusable consolation to holy and pious souls. But election is the immutable purpose of God, by which, before the foundations of the world were laid, he chose, out of the whole human race, fall-
en by their own fault from their primeval integrity into sin and destruction, according to the most free good pleasure of his own will, and of mere grace, a certain number of men, neither better nor worthier than others, but lying in the same misery with the rest, to save them from their sins, he did freely and of his own will, constituted Mediator and head of all the elect, and the foundation of salvation; and therefore he decreed to give them unto him to be saved, and effectually to call and draw them into communion with him by his word and Spirit; or he decreed himself to give unto them true faith, to justify, to sanctify, and at length powerfully to glorify them, etc. (Eph. i. 4; Rom. ix. 11–18; Acts xiii. 48). Moreover, holy Scripture doth illustrate and commend to us this eternal and free grace of our election, in this more especially, that it doth testify all men not to be elected; but that some are not-elect, or passed by, in the eternal election of God, whom truly God, from most free, just, irreprehensible, and immutable good pleasure, did not choose, in whom he could not save, into which they had, by their own fault, cast themselves; and not to bestow on them living faith, and the grace of conversion; but having been left in their own ways, and under just judgment, at length, not only on account of their unbelief, but also of all their other sins, to condemn and eternally punish them, to the manifestation of his own justice. And this is the decree of reprobation, which determines that God is in no wise the author of sin (which, to be thought of, is blasphemy), but a tremendous, incomprehensible, just judge and avenger.

(4) "Of the Death of Christ."—Passing over, for brevity's sake, what is said of the necessity of atonement in order to pardon, and of Christ having offered that atonement and satisfaction, it is added, This death of the Son of God is a single and most perfect sacrifice and satisfaction for sins, of infinite value and price, abundantly sufficient to expiate the sins of the whole world; but because many who are called by the Gospel do not repent, nor believe in Christ, but perish in unbelief; this doth not arise from defect or insufficiency of the sacrifice offered by Christ upon the cross, but from their own fault. God willed that Christ, through the blood of the cross, should out of every people, nation, and tongue, reconcile all those, and those only, who were from eternity chosen to salvation, and given to him by the Father; that he should confer on them the gift of faith, etc.

(5) "Of Man's Corruption, etc.—All men are conceived in sin, and born the children of wrath, disposed (inquiet) to all saving good, opposed to evil, dead in sin, and the slaves of sin; and without the regenerating grace of the Holy Spirit, they neither are willing nor able to return to God, to correct their depraved nature, or to dispose themselves to the correction of it."

(6) "Of Grace and Free-will. —But in like manner as, by the fall, man does not cease to be man, endowed with certain natural powers, will, and understanding; so, upon the depravation of the whole human race, taken away the nature of the human species, but it hath deprived and spiritually stained it; so that even this divine grace of regeneration does not act upon men like stocks and trees, nor take away the properties of his will, or violence is willingly imposed upon it; it spiritually quickens, heals, corrects, and sweetly, and at the same time powerfully, inclines it; so that whereas before it was wholly governed by the rebellion and resistance of the flesh, now prompt and sincere obedience of the Spirit may begin to reign; in which the renewal of our spiritual will, and our liberty, truly consist; in which manner (or for which reason), unless the admissible Author of all good should work in us, there could be no hope of man rising from the fall by that free will by which, when standing, he fell into ruin."

(6.5) "On Perseverance. —God, who is rich in mercy, from his immutably purpose of election, does not wholly forsake his chosen; for the Holy Spirit, by his own, even in lamentable falls; nor does he so permit them to glide down (probati) that they should fall from the grace of adoption and the state of justification; or commit the 'sin unto death,' or against the Holy Spirit; that, being deserted by him, they should cast themselves headlong into eternal destruction. So that not by their own power, but by the gracious mercy of God, they obtain it, that they neither totally fall from faith and grace, nor finally continue in their falls and perish."

The Confessions of the Reformed Church agree more or less closely with the statements of Dort, whether they preceded or followed it in date. See the Compendio Gallico, art. 12; Confessio Belgica, art. 16; Forma Comunis Helvet. arts. 4 and 19; Conf. Helveti. ii, 10. (See Winer, Comp. Dordtian, ix, 1; Hagenbach, Hist. of Doctrines, § 249.) The Westminster Confession is the standard of the Church of Scotland, and of the various Presbyterian Churches in Europe and America. Its 33rd article states God's Eternal Decree as follows:

"Of God's Eternal Decree. —God from all eternity did, by the most wise and holy counsel of his own will, freely and unchangeably ordain whatsoever comes to pass; yet so as thereby neither is God the author of sin, nor is violence offered to the will of the creatures, nor is the liberty or contingency of second causes taken away, but rather established. Although God knows whatsoever may or can come to pass upon all supposed conditions, yet hath he not decreed anything because he foresaw its future, or as that which would come to pass in such conditions. By the decree of God, for the manifestation of his glory, some men and angels are predestinated unto everlasting life, and others foreordained to everlasting death. These angels and men, thus predestinated and foreordained, are particularly and unchangeably designed, and their number is so certain and definite that it cannot be either increased or diminished. Those of such kind that are predestinated unto life, God before the foundation of the world was laid, according to his eternal and immutable purpose, and the secret counsel and good pleasure of his will, hath chosen, in Christ, unto everlasting glory, out of his mere free grace and love, without any foreknowledge whatsoever, and not for any foreseen praise thereof, or for any thing else in the creature, as conditions, or causes moving him thereunto; and all to the praise of his glorious grace. As God hath appointed the elect unto glory, so hath he, by the eternal and most free purpose of his will, foreordained all the means thereunto. Wherefore they who are elected, being fallen in Adam, are redeemed by Christ, are effectually called unto faith in Christ, by his Spirit working in due season; are justified, adopted, sanctified, and kept by his power through faith unto salvation. Neither are any other redeemed by Christ, effectually called, justified, adopted, sanctified, and kept by his power, or saved, but they by their own volition have been pleased, according to the unsearchable counsel of his own will, whereby he extendeth or withholdeth mercy, as he pleaseth, for the glory of his sovereign power over his creatures, to pass by, and to ordain them to dishonor and wrath for their sin, to the praise of his glorious justice."

The 17th article of the Church of England is as follows:

"Of Predestination and Election. —Predestination to life is the everlasting purpose of God, whereby (before the foundations of the world were laid) he hath constantly decreed, by his counsel, secret to us, to deliver from curse and damnation those whom he hath chosen
is Christ out of mankind, and to bring them by Christ to everlasting salvation, as vessels made to honor. Wherefore they which they be ended with so excellent a benefit of God be called according to God's purpose, by his Spirit working in due measure, they are brought into grace, obey the calling; they be justified freely: they be made sons of God by adoption; they be made like the image of his only-begotten Son Jesus Christ: they walk religiously in good works; and at length, by God's grace, they attain to everlasting felicity. As the soul conversion of justification, and their elevation in Christ is full of sweet, pleasant, and unspeakable comfort to godly persons, and such as see in themselves the working of the Spirit of Christ, mortifying the works of the flesh and their earthly members, and drawing up their mind to high and heavenly things, as well because it doth greatly establish and confirm their faith of eternal salvation to be enjoyed through Christ, as because it doth fervently kindle their love toward God; so, for curious and carnal persons, lacking the Spirit of Christ, to have continually before their eyes the sentence of God's predestination is a most dangerous downfall, whereby the devil doth threaten that poor andretchedness of most uncleane living, no less perils than desparation. Furthermore, we must receive God's promises in such wise as they be generally set forth to us in holy Scripture. And in our doings, that will of God is to be followed which we have expressly declared to be the will of God, the promise, the lutherian and reformator Lehrbegriffe, 1855; G. Frank, Geschichte der Protest. Theol. 2 Bde. 1865; also Hepp, D. gymnast d. deutschen Protestantismus, 1, 204; Dogmatik der evang.-ref. Kirche, 1, 278; and the ticle Federal Theology.

IV. Moderate Calvinism. — This phrase designates those, especially in England and America, who, while adhering to the Calvinistic as contrasted with the Arminian system, have yet receded from some of the extreme statements of the former, especially upon the two articles of Reprobation and the Extent of the Attonement. See Dr. E. Williams, D. defense of Modern Calvinism, 1819; Sermon and Church History, p. 126, and Appendix, p. 399. Dr. Williams says: "Reprobation, or 'prodestination to death or misery as the end, and to sin as the means,' I call an 'impure mixture' with Calvinism, as having no foundation either in the real meaning of Holy Writ, or in the nature of things; except, indeed, 'the root line' which on the other hand, gives a determination to punish the guilty." He calls this a 'impure mixture, ' because its connection with predestination to life is arbitrary and forced; 'impure, ' because the supposition itself is a foul aspersion upon the divine character. The other point on which the moderate Calvinists modified the system is the nature and extent of the atoning work of Christ. Strict Calvinism asserts that the Lord Jesus Christ made atonement to God by his death only for the sins of those to whom, in the sovereign good pleasure of the Almighty, the benefit of his death shall be finally applied. By this definition, the extent of Christ's atonement, as a provision, is limited to those who ultimately enjoy its fruits; it is restricted to the elect of God. Both Strict and Moderate Calvinists agree as to the intrinsic worth of the atonement, and as to its final application. It has been asserted (e. g. by Amyraut, q. v.) that Calvin himself held to a general atonement; and certainly his language in his Comm. in Job, iii, 15, 16, and in 1 Tim. ii, 5, seems fairly to assert the doctrine. Comp. Fletcher, Works (N. Y. ed. ii, 71); but see also Cunningham, The Reformers (Essay vii). As to the variations of the Calvinistic confessions, see Smith's Hagenbach, History of Doctrines, § 249. In the Church of England, the diocese of Sarum, Camero, Arundel, and Placeeus maintained universal grace (see articles on these names). The English divines who attended the Fall, the covenant of grace. The latter covenant embraces a threefold economy: (1) The economy before the law; (2) The economy under the law; (3) The economy of the Gospel. See his Summa Doctrina de Fide et Testamento, 1624; The fruit of his influence was to lead the Reformed theologians back to the freedom of the Word of God, delivering it from the bondage of a traditional scholasticism. This type of Calvinism was still farther developed in the writings of Braun, Doctrina Fidei, 1656; of Burnham de Orval, Logica et Economia Fideos, 1671; Heidius of Leyden († 1673), Corpus Theol. Christ. 1687; and especially of Witaus of Leyden († 1708), whose Economy of the Covenants (1694) was translated into English (Lond. 1768; revised ed. Edinb. 1771, 1803; New York, 2 vols. 1798). This theology of the covenants also shaped, to a considerable extent, the Reformed system as it was adopted in England, Scotland, and America. It is clearly recognised in the Westminster Confession of Faith and Catechisms. Later writers divide the covenant of grace into two parts, viz. the covenant of redemption between the Father and the Son, and the covenant of grace between God and man, and between Christ. On this important phase of the Calvinistic theology, see Ebrard, Dogmatik, i, 60 sq.; Gasa, Geschichte der Protest. Dogmatik, Bd. 2, 1857; Schweizer, Glaubenslehre der evang.-reformirten Kirchen, 2 Bde. 1844, and his Protestantische Christologiegen, 2 Bde. 1864; Schneckenburger, Vergleichung der lutherischen und reformirten Lehrbegriffe, 1855; G. Frank, Geschichte der Protest. Theol. 2 Bde. 1865; also Hepp, D. gymnast d. deutschen Protestantismus, 1, 204; Dogmatik der evang.-ref. Kirche, 1, 278; and the article Federal Theology.

It has always been a question in the Church of England whether the Articles are or are not Calvinistic. On this question, see Toplady, Doctrinal Calvinism of the Church of England (Works, vol. i and ii); Overtoun, True Churchman (2d ed. York, 1801); Laurence, Bampton Lecture for 1804 (Oxford, 1805); Cunningham, The Reformers, Essay iv (Edinb. 1802, 8vo); printed also in the Brit. and For. Evang. Rec. (No. 85); reprinted in the Am. Theol. Review (October, 1861, art. v); Hardwick, History of Reformation, ch. iv, p. 260. The Lutheran Church never adopted the Calvinistic system. In the beginning, both Luther and Melanchthon received the Augustinian theology; but as early as 1529 Melanchthon expounded the passages supporting it from his Locii Theologici. Luther bestowed the highest praise on the last editions of the Locii (Luther's Works, 1546, vol. i. preface; see Laurence, Bampton Lect. Sermon ii, note 21). The Augsburg Confession firmly erected the doctrine of predestination and similitud. Nam promissio est universalis et nihil detrat operum sed exsufficit ad idem et verba opera ("see Gieseler, Church History, iv, §§ 36, 37). In the German Reformed Church the strictly Calvinistic doctrine "never, as such, received the highest degree of authority, as it was still far from being the object of the Federal Theology, or the Theology of the Covenants. Under the too exclusive influence of the doctrine of Predestination, it had assumed a scholastic character, from which it was in part relieved by the introduction of the idea of the Covenants, as a constitutive principle, and in part accommodated, and trained in the German Reformed theology (born at Bremen 1603, died 1699), first developed the system under this point of view, the effect of which was to introduce historical facts and elements, and a distinctive ethical idea (a covenant implying mutual rights), into the sphere of the system, and to maintain the idea of the divine righteousness, with all its consequences. The Covenants distinguished between, 1. The covenant before the Fall, the covenant of works; and, 2. The covenant after the
the Synod of Dort (Hall, Hale, Davenant) all advocated general atonement, in which they were followed by H. More (Caeli Rebecca, or Orms. Life of Baker, ii, 64). The "moderate" doctrine as to the nature of the atonement is, in brief, that it consists in "that satisfaction for sin which was rendered to God as moral governor of the world by the obedience unto death of his son Jesus Christ. This satisfaction preserves the authority of the moral government of God, and yet enables him to forgive sinners. That this forgiveness could not be given by God without atonement constitutes its necessity." See Atonement.

That Christ's atonement was sufficient for all, that it is actually applied only to the elect, and that it enhances the guilt of those who reject it, is now almost generally conceded by the different schools. But its universality, as a proviso, is also asserted by the moderate Calvinists, with some modifications in the statement of its nature. The English views as to the nature of the atonement are presented in the following extract: Dr. Magee (In the Atonement) says, "The sacrifice of Christ was never deemed by any, who did not wish to calumniate the doctrine of atonement, as the divinely appointed. We have made God placable, but merely viewed as the means appointed by divine wisdom by which to bestow forgiveness. But still it is demanded, in what way can the death of Christ be considered as a sacrifice of expiation, to be conceived to operate to the remission of sins? He was supposed to be suffering who could otherwise have forgiven us? To this the answer of the Christian is, I know not, nor does it concern me to know, in what manner the sacrifice of Christ is connected with the forgiveness of sins; it is enough that this is declared by God to be the medium through which our salvation is effected; I pretend not to divest the councils of the Almighty. I submit to his wisdom, and I will not reject his grace because his mode of vouchsafing it is not within my comprehension."

Andrew Fuller, in his Calvinistic and Socinian Systems compared (Letter vii), strongly reprobrates the idea of placating the Divine Being by an atonement, "contending that the atonement is the effect, and not the cause of divine love to men; and insists "that the contrary is a gross misrepresentation of the Calvinists in general," though it must be confessed some Calvinists have given too much countenance to such an idea. Mr. Fuller adds, "If we say a way was opened for the reception of Christ for our redemption, we are in reality and consistent exercise of mercy in all the methods which sovereign wisdom saw fit to adopt, perhaps we shall include every material idea which the Scriptures give us of that important event."

V. Further modifications in the Calvinistic system have been made in this country through the influence of the so-called New-England THEOLOGY, especially as set forth in the writings of Jonathan Edwards and his successors. In respect to original sin, the elder Edwards, in his work on that subject, advocated the mediate rather than the immediate imputation of Adam's first sin to his posterity. On the nature of the atonement, while he considered it an important modification, in making love to being (in the two forms of love of benevolence and love of complacency) to constitute the essence of virtue. On the nature of the atonement he made no modification. He also distinguished more carefully than had previously been done between natural and moral inability. Of the atonement he says: These discussions extended from New England into the Presbyterian Church. The parties there known as Old and New School differ chiefly on the following articles: 1. Imputation of sin, whether it be immediate or mediate; 2. The nature and extent of the atonement; 3. Ability and inability.

For the history of the development of Calvinism, see Bremote, Pref. to the Westminster Confessions. For the Armenian and extreme supralapsarian developments of Calvinism, see Antinomianism; Chisp, Hopkians. For certain mitigated schemes of Calvinism, see Amethystalism; Baxter; Cameron. On two of the principles which distinguish the so-called Moderate Calvinism, viz. (1.) the universal atonement, see Atonement; (2.) the natural ability of all men to repent, see Inability; Theology.

VI. Literature. — The literature of the Calvinistic controversy is enormous. The principal books only can be named here: Calvin, Institutions; Zwinglius, Institutiones; Beza, Institutiones; Westminster Confessions of the Refurmed Churches, given in August, Corpus Librarum Symbolicorum (1824), or in Nie- meyer, Collectio Conuersationum (1840); the Westminster Confession (1846); the Decrees of the Synod of Dort (1610). The chief Calvinistic writers of the 16th and 17th centuries were Zuniga, Bullinger, Alsted, Whitegift, Cartwright, Crisp, Perkins, Beza, Calvin, Bucer (moderate), Owen, Howe, Ridgely, Gomar, Alting, Rivetus, Heidegger, Turretin, Pictet. Of the 18th and 19th centuries the following are selected: Stapfer, Wytenbach, Gili, Toplady, Erskine, Dick, Hill, Brem- bridige, Krummacher. Of the new American school: Edwards, Beecher, Chalmers, etc., whose influence was seen in England in the writings of Fuller, Ryland, Hall, Jay, Pye Smith, and Chalmers. The so-called Old Calvinism has produced few writers of late in England. It is also defended in America by the Princeton theologians. For the historical treatment of the subject, see Gill, Cause of God and Truth, pt. iv; Neander, History of the Reformat (l. c.); Hagenbach, Hist. of Dogmas (ed. by Smith, § 219—222); Ebrard, Christl. Dogmatik, § 17-51, and § 556-568; Wommack, Calvinistic Cabinet Unlocked; Watson, Theol. g. Inst., pt. ii, ch. xxviii; Herrmann, Gesch. der Prot. Doctrin (Leipzig, 1842); Gass, Gesch. der Prot. Dogmatik (Berlin, 1864); Huyss, Dogmatik der evangel.-reform. Kirche (Elberfeld, 1861); Mosley, Augustianism and Dogma of Predestination (London, 1865); Christianus Reembrandt, Jan, 1866, 170 q.; Nicholls, Calvinism and Arminism in America (London, 1862); Dorst, Dogmatik der Reformirte (1863); Ditto, Theology of the Reformation (1862); Hill, Lectures on Divinity, chap. xi. For the later forms of Calvinism, especially in America, see Tyler, History of the New H. v. Religion (1867); Beecher, Views in Theology: Bible and New Science (1853); bangs, Errors of Hopkinsianism (1815); Hodgson, New Divinity (1838); Fik, The Calvinistic Controversy; and especially on the whole subject, Warren, Systematische Theologie, § 24 (Bremen, 1865, 8vo). Political works against Calvinism: (a) Luther, Chemnitz, in Votum, etc.; Danckwerts, Calvinus (1654); Feuerborn, Epistola Erroris, Calv. (1651); (b) Arminian and Methodist (besides those above named): Arminius, Episcopius, Limborch, Curcellus (writings generally); Wesley (Works, see Index); Fletcher, Cheeks to Antinomism, etc.; Watson, Thol. Instit., vol. ii; Goodwin, Belief in Ar- minianism; and this distinction was further elaborated by the younger Edwards, who also represented the atonement as consisting in a satisfaction to the general rather than the distributive justice of God. Hopkins and Emmons carried out these views still further, but under the influence (especially in the American schemes) of the Arminianism. These discussions extended from New England into the Presbyterian Church. The parties there known as Old and New School differ chiefly on the following articles: 1. Imputation of sin, whether it be immediate or mediate; 2. The nature and extent of the atonement; 3. Ability and inability. For the history of the development of Calvinism, see Bremote, Pref. to the Westminster Confessions. For the Armenian and extreme supralapsarian developments of Calvinism, see Antinomianism; Chisp, Hopkians. For certain mitigated schemes of Calvinism, see Amethystalism; Baxter; Cameron. On two of the principles which distinguish the so-called Moderate Calvinism, viz. (1.) the universal atonement, see Atonement; (2.) the natural ability of all men to repent, see Inability; Theology.
called Reformed churches, as distinguished from the Luth eran Church. It is still so used to a certain extent, especially in France and America. The word "Calvinistic" is now generally in use to designate those who receive the theological tenets of Calvin, without regard to Church or sect. See Calvin; Calvinism.

In the early part of the 16th century the Reformed churches of Switzerland, Hungary, France, Germany, and Holland were divided into several branches, each with its own theology and ecclesiastical government. Among the branches most prominent was the Dutch Reformed Church, which was founded by the same Geerhardus Vossius and was closely connected with the work of John Calvin. The Dutch Reformed Church was the largest of the Reformed churches in the Netherlands, and its influence extended throughout Europe.

The Reformed church in America was founded in 1628 by a group of Dutch Protestants, who had been driven from their homeland by political and religious persecution. The first Reformed church in America was established in New Amsterdam (now New York City) in 1628. It was modeled after the Dutch Reformed Church and was governed by a synod of elders, who were elected by the congregation.

The Reformed church in America was known for its emphasis on preaching and education. The church's educational institutions, such as Princeton Theological Seminary and Yale University, played a significant role in shaping American culture and society. The Reformed church in America also played a significant role in the American Revolution and the founding of the United States.

In summary, the Reformed church, both in Europe and America, was founded on the principles of John Calvin and his followers. It emphasized the importance of preaching and education, and its influence extended throughout Europe and America.
the Latin translation shows that it is a West- 

ern form in order, was before the 

law economical, or in families; under the law, 
national; since Christ, only congregational. "The 
matter of the visible Church in quality consists of saints 
by calling;" and in quantity "a church ought not to 
be of greater number than may ordinarily meet to- 
gether conveniently in one place, nor fewer than can 
conveniently carry on church work." The saints must 
have a visible political union among themselves, and 
this form is the visible covenant whereby they give 
themselves up to the Lord, to the observing of the 
ordinances of Church together in the same society. The 
Church is a government in the Church, the universal 
subordinate power, as extraordinary, to apostles, etc.; 
as ordinary, to every particular church. The officers 
in a church are necessary to its well-being, but not to its 
existence. The extraordinary, as apostles, are tem- 
porary; the ordinary, which are elders (or bishops) 
and deacons, are perpetual. There is a difference be- 
tween teaching and ruling elders. The ruling elder is to 
assist the teaching elder in ruling. The deacon's 
office is confined to temporalities. Church officers are 
elected by the church in which they are to minister, 
and the church may depose, as well as elect them, 
though the advice of neighboring churches in such case 
should be sought. Church is to be composed wholly 
after their election by the church; ordination is the 
solemn putting a man into his place, but does not con- 
stitute an officer. As the people may elect, they may 
also ordain; though, where there are elders, these, as 
representing the church, are to perform the service 

of imposition of hands. In respect to Christ, the head, 
the Church is a monarchy; in respect to the brother- 

hood, the body, it resembles a democracy; in respect 
to the Presbyterian, it is an aristocracy. Church govern- 
ment or rule is placed by Christ in the officers of the 
church, who are subject to the power of the church, 
and who pronounce sentence with consent of the church. 
In a right administration, all church acts proceed 
after the manner of a mixed administration. There 
are rules also for the support of church officers, ad- 
mission and dismission of members, excommunication, 
etc., all based on the preceding principles; and it is 
declared that churches, though distinct and equal, 
ought to cooperate with other churches in 
1st, by way of mutual care; 2d, by way of consulta- 
tion; 3d, by way of admonition; 4th, by way of par- 
ticipation in acts of worship, etc.; 5th, by way of rec- 
ommendation; 6th, by way of relief and succor. In 
gathering a church, this communion should always be 
attended to. 

Synods according to the pattern of Acts xxy, though 
not necessary to the being, are useful for the well-be- 
ing of the churches. They are constituted by the 
churches sending forth elders and other messengers to 
meet together in the name of Christ. A magistrate 
has power to call a synod, but the constituting of a 
synod is a church act. The council in which the 
church censures by way of discipline, but to debate and 
determine the principles on which such acts are based, 
and, so far as consonant with God's Word, they are to be 
received with reverence and submission. Synods are 
not permanent ecclesiastical bodies. An article on the 
power of civil magistrates in matters ecclesiastical com- 
pletes the platform. —Savage's Winthrop, vol. ii.; Bos- 
ton ed. Cambridge and Stoughton Platforms; Shedh, 
Hist. of Doctines, ii, 482. See Congregationalists.

Cambyses (Kambysea), a Græceized form of the 
old Persian Katebyu., a "hard," Rawlinson, Herodotus, 
iii, 455; the second Persian monarch of the name, was 
the son of Darius Hystaspes (kai, khe, khe, khe, khe, khe, 
theos, Sapor). Sapor's son, he accomplished, B.C. 550. In the fifth 
year of his reign he invaded Egypt, taking occasion, ac- 
According to Herodotus (iii, 1), at the refusal of Amasis, 
the father of Psammetichus, the then reigning Egyptian
kings, to give him his daughter in marriage; but the real cause of the campaign (comp. Herodotus, i. 77) was the ambition of Cambyses (see Dähnhardt, Herod. p. 146) to accomplish the design of his father in reconquering the country of Nabuchodonosor the Chaldean (see Jer. xxiii; xlvii; Ezek. xxix—xxxii; comp. Newton, On the Prophecies, i. 857). See CYRUS. Egypt was subdued, according to Ctesias, through treachery; according to Panticusus (vii, 9), by intrigue; but according to Herodotus, in a pitched battle, after which the whole country was also, the Cymatians and Boecians, submitted to him. He proceeded to execute his design of reducing Ethiopia also, but was compelled to retreat for want of provisions, his attack on Carthage having likewise failed through the refusal of his Phoenician allies to co-operate with him against their own colony. He was thus defeated in his plans, which doubtless contemplated the securing to Persis the casian trade of the Desert (Herod. ii, 1; iii, 28; Ctes. Pers. 9; Justin, i, 9; comp. Herenn. African Names, i, 6). Diodorus says, indeed, that he penetrated as far as Meroë, and even founded that city, naming it after his mother; but this statement is equally incredible with those of Plutarch, who says he changed its name to Meropolis in honor of his sister (Ant. ii, 10, 5). The conquest of Cambyses after this exhibited the darkest character of tyranny to such an extent that the Egyptians, whom he ruled with an iron sway (comp. Isa. xix, 4), attributed to him madness as the punishment of his impiety, and even the Persians ever after styled him the "despot" (πρότορος, Herod. iii, 89). Indeed, he appears to have been subject to epileptic fits from his birth (Herod. iii, 8), and his behavior evinced a violence of temper bordering upon frenzy. He is said to have married his own sisters, and to have brutally killed one of them for calling this strange custom of his by his order. His atrocities provoked an insurrection, headed by one of the Magian priests, who assumed the name of the murdered prince "Smerdis" (q. v.); and, as Cambyses was marching to put down the pretender, he died at Ecbatana of an accidental wound in the thigh, B.C. 521, leaving no heir (Herod. iii, 61 sq. Ctesias. Iros. 8., gives somewhat different account of his end, and also makes his reign eighteen years; but Clemens Alexander, Strom. i, 385, says he reigned ten years). See PERSEPOLIS. He is named Kambuqiu on the Persian tablet of the Behistun inscription (Rashinlows, Herod. ii, 422, 423). See CYRTIPHRAH these authors. His name also appears on the Egyptian monuments in a royal cartouch. See Hieroglyphics.

Cambyses is probably the "Ahaherus" mentioned in Ezra iv, 6, as the Persian king addressed by the enemies of the Jews for the purpose of frustrating the rebuilding of the Temple, B.C. 529. Josephus also calls this monarch Cambyses, the son of Cyrus, and he gives the correspondence between the king and his Syrian viceroy in detail (Ant. xi, ii, i and 2), which he has evidently blended with that which took place with his successor, the pseudo-Smerdis ("Artaxerxes," Ezra iv, 7 sq.), since he does not name the latter, but only alludes to the usurpation of the Magian in the inscription before the accession of Darius Hystaspes (ib. iii, 1). See AHURA-MAHERMASDAN.

CAMEL (a word found in essentially the same form in all the Semitic languages [Heb. בְּשַׁלֹּם, gomel; Syr. be, same; Chald. gomul; ancient Arabic, jaamel, modern, jamel; and in the Greek [σκυρός] and Latin [cleft, horse], whence it has passed into the languages of Western Europe; also in the Coptic kamael. In Sanscrit it occurs as kramila and kramikula; and hence Schlegel traces the word to the root kram—to step. Bochart derives it from the root קָמָל, 2 שָׁלֹם, to revenge, because the camel is vindictive and retains the memory of injuries [animal murpaxos]; but Gesenius considers it more likely that קָמָל should have assumed the force of the cognate Arabic root jamal, to carry), an animal of the order Ruminantia, and genus Camelus. As constituted by naturalists it comprises two species positively distinct, but still possessing the common characters of being ruminants without horns, with muzzle, with nostrils forming oblique slits, the upper lip divided, and separately movable and extensile, the soles of the feet horny, with two toes covered by unguiculized claws, the limbs long, the abdomen drawn up, while the neck, long and slender, is bent down and up, the reverse of that of a horse, which is arched. According to other naturalists, however, the two-humped camel, sometimes called the Bactrian camel, is a variety only, not a distinct species (Patterson, Introdr. to Zoology, p. 417). Camels have thirty-six ribs in all, six large ones on each side above, six incisors, and two curipidae on each side below, though differently named, still have all more or less the character of tusks. They have callosities on the breast-bone and on the flexures of the joints. Of the four stomachs, which they have in common with other animals chewing the cud, the ventriculus, or paunch, is provided with membranous cells to contain an extra provision of water, enabling the species to subsist for four or more days without drinking. But when in the desert, the camel has the faculty of smelling it afar off, and then, breaking through all control, he rushes onward to drink, after which he rhythm the element previously with marvel-free food and quite muddy. Camels are temperate animals, being fed on a march only once in twenty-four hours, with about a pound weight of dates, beans, or barley, and are enabled in the wilderness, by means of their long flexible necks and strong curipidae teeth, to snap as they pass at thistles and thorny plants, mimose, and acacia trees. They are emphatically called "the ships of the desert," having to cross regions where no vegetation whatever is met with, and where they could not be enabled to continue their march but for the aid of the double or single hunch on the back, which, being composed of muscular fibre, and cellular substance highly adapted for the accumulation of fat, in the proportion as the animal is healthy and well fed, or sinks by absorption as it supplies the want of sustenance under fatigue and scarcity; thus giving an extra stock of food without eating, till by exhaustion the skin of the prominecences, instead of standing up, falls over, and hangs like empty bags on the side of the dorsal ridge. Now when these endowments are added a lofty stature and great agility; eyes that discover minute objects at a distance; a sense of smelling of prodigious acuteness, ever kept in a state of sensibility by the animal's power of closing the nostrils to exclude the scrid particles of the sandy deserts; a spirit, moreover of patience, not the least, of forbearance, carried to the length of self-sacrifice in the practice of obedience, so often exemplified by the camel's bones in great numbers strewing the surface of the desert; when we perceive it furnished with a dense wool to avert the solar heat and nightly cold while on the sands, and to clothe it in winter, as if it were manufactured when manufactured, and that the female carries milk to feed him, we have one of the most incontrovertible examples of Almighty power and beneficence in the adaptation of means to a direct purpose that can well be submitted to the apprehension of man; for, when we consider the immense portions of the surface of the earth would be uninhabitable, and even impassable. Surely the Arabs...
are right: "Job's beast is a monument of God's mercy!"

1. The Bactrian camel (Camelus Bactrianus of authors) is large and robust; naturally with two bunches, and originally a native of the highest table-lands of Central Asia, where even now wild individuals may be found. The species extends through China, Tartary, and Russia, and is principally imported across the mountains into Asia Minor, Syria, and Persia. It is seldom seen at Aleppo (Russel, N. H. Aleppo, ii. 170). One appears figured in the proceedings of the ancient Persian satrapies among; the bas-reliefs of Chehel Minar, where the Arabian species is not seen. It is also this species which, according to the researches of Burchhardt, constitutes the brown Taos variety of single-bunched Turkish or Turkic camels commonly seen at Constantimople, being there a very ancient practice among breeders, not, it appears, attended with danger, of extirpating with a knife the foremost bunch of the animal soon after birth, thereby procuring more space for the pack-saddles and load. It seems that this mode of rendering the Bactrian cross-breed similar to the Arabian camel or dromedary (of Burchhardt misapplies the last name) is one of the principal causes of the confusion and contradictions which occur in the descriptions of the two species, and that the various other intermixtures of races in Asia Minor and Syria, having for their object either to create greater powers of endurance of cold or of heat, of body to carry weight, or to move with speed, have still more perplexed the question. From these causes a variety of names has arisen, which, when added to the Arabian distinctions for each sex, and for the young during every year of its growth, and even for the camels nursing horses, has made the appellatives exceedingly numerous. We notice only—

2. The Arabian camel or dromedary (Camelus dromedarius or Arabicus of naturalists, *κ*ρε, *κ*ρε; and female and young *κ*ρε *κ*ρε, *κ*ρε, both "dromedary," L. i. 16; Jer. ii. 23) is properly the species having naturally but one hump, and considered as of Western Asiatic or of African origin, although no kind of camel is figured on any monument of Egypt (Wilkinson, Anc. Egy. i. 234), not even there are representations of live-stock such as that found in a most ancient tomb beneath the pyramid of Giseh, which shows herdsmen bringing their cattle and domesticated animals to be numbered before a steward and his scribe, and in which we see oxen, goats, sheep, asses, geese, and ducks, but neither horses nor camels. That they were not indigenous in the early history of Egypt is countenanced by the mythical tale of the priests describing "the flight of Typhon, seven days' journey upon an ass." We find, however, camels mentioned in Genesis xii; but being placed last among the cattle given by Pharaoh to Abraham, the fact seems to show that they were not considered as the most important part of his donation. This can be true only upon the supposition that but a few of these animals were delivered to him, and therefore that they were still rare in the valley of the Nile, though soon after there is abundant evidence of the nations of Syria and Palestine having whole herds of them fully domesticated. These seem to imply that the genus Camelus was originally an inhabitant of the elevated deserts of Central Asia, its dense fur showing that a cold but dry atmosphere was to be encountered, and that it came already domesticated, toward the south and west, with the oldest colonies of mountaineers, who are to be distinguished from earlier tribes that subdued the ass, and perhaps from others still more ancient, who, taking to the rivers, descended by water, and afterward coasted and crossed narrow seas. Of the Arabian species two very distinct races are noticed; those of stronger frame but slower pace used to carry burdens varying from 600 to 700 weight, and travelling little more than twenty-four miles per day; and those of lighter form, bred for the saddle with single riders, the fleetest serving to convey intelligence, etc., and travelling at the rate of 100 miles in twenty-four hours. They are designated by several appellations, such as Deloud, the best coming from Oman, or from the Bishareens in Upper Egypt; also Hejran by the Turks, and still other names (e.g. Akhbar, Mahrry, Reches, Boules at Hierat, Rawahel, and Racamel) in India, all names more or less implying swiftness, the same as *επιμαχος, swift;* the difference between them and a common camel being as great as that between a high-bred Arab mare and an English cart-horse (Layard, Nusseh and Bab. p. 292). Caravans of loaded camels have always scouts and flankers mounted on these light animals, and in earlier ages Cyrus and others employed them in the line of battle, each carrying two archers. The Romans of the third and fourth centuries of our era, as appears from the "Notitia," maintained in Egypt and Palestine several *ata* or squadrons mounted on dromedaries; probably the wars of Belisarius with the northern Africans had shown their importance in protecting the provinces bordering on the desert; such was the ala dromedariorum Antiasi at Ammata in the tribe of Judah, and three others in the Thebais (comp. 1 Sam. xxx. 17). Bonaparte formed a similar corps, and in China and India the native princes and the East India Company have them also.

It is likely the word *κρε, ακκαθαρκρομιος* (Esth. viii. 10, 14), rendered "camels," more properly signifies mules (being explained by the addition "sons of mares," mistranslated "young dromedaries"), and implies the swift postage or conveyance of orders, the whole verse showing that all the means of dispatch were set in motion at the disposal of government (see the Notice on this word by Soemner, in the Misc. Lips. x. 231-44). On the other hand, *κρε, re'cred* (translated "mules" in the above pas-
The camel, being a native of Asia, from the earliest ages to the present day has been the chief means of communication between the different regions of the East, and from its wonderful powers of endurance in the desert has enabled routes to be opened which would otherwise have been impracticable. "Their home is the desert; and they were made, in the wisdom of the Creator, to be the carriers of the desert. The coarse and prickly shrubs of the wastes are to them the most delicious food, and even of these they eat but little. So few are the wants of their nature, that their power of going without food, as well as without water, is wonderful. Their well-known habit of lying down upon the breast to receive their burdens is not, as is often supposed, merely the result of training; it is an admirable adaptation of their nature to their destiny as carriers. This is their natural position of repose, as is shown, too, by the callouses upon the joints of the hoofs, and especially by that upon the breast. Hardly less wonderful is the adaptation of their broad cushioned foot to the arid sands and gravelly soil which it is their lot chiefly to traverse. . . . As the carriers of the East, the 'ships of the desert,' another important quality of the camel is their sure-footedness" (Robinson, Researches, ii, 682-689). The present geograph-
distribution of the camel extends over Arabia, Syria, Asia Minor to the foot of the Caucasus, the south of Tartary, and part of India. In Africa it is found in the countries extending from the Mediterranean to the Senegal, and from Egypt and Abyssinia to Algiers and the Pegase Cymbopaedia, etc. See DROMEDARIES.

The camel is frequently mentioned in Holy Scripture. It was used not only in Palestine, but also in Arabia (Jud. vii, 12), in Egypt (Exod. ix, 8), in Syria (2 Kings viii, 9), and in Assyria, as appears from the sculptures of Nineveh (see Layard, Niniveh and Bab. p. 562). It was used at an early date both as a riding animal and as a beast of burden (Gen. xxiv, 64; xxxvii, 25). It was likewise used in war (I Sam. xxx, 17; Isa. xxix, 7; comp. Pliny, N. H. viii, 13; Xenoph. Cyrop. i, 1, 37; Herod. i, 80; vii, 86; Livy, xxxviii, 40). Of its hair coarse garments were manufactured (Matt. iii, 4; Mark i, 6). The Jews were not allowed to eat its flesh (Lev. xi, 4; Deut. xiv, 7).

The prophet Isaiah foretells the great increase and flourishing state of the Messiah's kingdom, by the conversion and accession of the Gentile nations, by comparing the happy and glorious concourse to a vast assemblage of camels (ix, 6). He also predicts the march of the army of Cyrus to the conquest and destruction of Babylon by an allusion to a chariot of camels (ix, 7); and the folly and presumption of those is remarked upon (xxx, 5) who, in the time of their trouble, carried treasures on camels into Egypt to purchase the assistance of that people, and acknowledged not the Lord their God, who alone could save and deliver them.

In the history of the Hebrews, however, the camel was used only by nomad tribes. This is because the desert is the home of the Arabian species, and it cannot thrive in even so fine a climate as that of the valley of the Nile in Egypt. The Hebrews in the patriarchal age had camels as late as Jacob's journey from Padan-aram, until which time they mainly led a very wandering life. With Jacob's sojourn in Palestine, and, still more, his settlement in Egypt, they became a fixed population, and thenceforward their beast of burden was the ass rather than the camel. The camel is first mentioned in a passage which seems rather to tell of Abraham's wealth (Gen. xii, 16, as xxiv, 35), to which Pharaoh doubtless added, than to recount the king's gifts. If the meaning, however, is that Pharaoh gave camels, it must be remembered that this king was probably one of the shepherds who partly lived at Avaris, the Zoon of Scripture; so that the passage would not prove that the Egyptians then kept camels, nor that they were kept beyond the tract, at this time, and long after, inhabited by strangers. The narrative of the journey of Abraham's servant to fetch a wife for Isaac portrays the habits of a nomad people, perhaps most of all when Rebekah, like an Arab damsel, lights off her camel to meet Isaac (xxiv). Jacob, like Abraham, had camels (xxx, 43): when he left Padan-aram he "set his sons and his wives upon camels" (xxxvii, 17); in the present he had "thirty milch camels with their colts" (xxxvii, 15). In Palestine, after his return, he seems no longer to have kept them. When his sons went down to Egypt to buy corn, they took asses. Joseph sent wagons for his father and the women and children of his house (xv, 23), and the return of his brethren. At Canaan, this beast seems to have been but little used by the Israelites, and it was probably kept only by the tribes bordering on the desert. It is noticeable that an Ishmaelite was overseer of David's camels (1 Chron. xxvii, 20). On the return from Babylon the people had camels, perhaps purchased for the journey to Palestine, but a far greater number of asses (Exra ii, 67; Neh. vii, 69). There is one distinct notice of the camel being kept in Egypt. It should be observed, that when we read of Joseph's buying the cattle of Egypt, though horses, oxen, sheep, and asses are spoken of (Gen. xlv, 17), camels do not occur: they are mentioned as held by the Pharaoh of the exodus (Exod. ix, 8), but this may only have been in the most eastern part of Lower Egypt, for the wonders were wrought in the field of Zoan, at which city this king then dwelt, and which was a land of the marauding nomad tribes that wandered to the east and south of Palestine that we chiefly read of the camel in Scripture. In the time of Jacob there seems to have been a regular traffic between Palestine, and perhaps Arabia, and Egypt, by camel caravans, like that of the Ishmaelites or Midianites who bought Joseph (Gen.xxxvii, 25, 28). In the terrible inroad of the Midianites, the Amalekites, and the Bene-Kedem, or children of the East, "both they and their camels were without number; and they entered into the land to destroy it" (Judg. vi, 5; comp. xvii, 12). When Gideon slew Zebah and Zalmunna, he took away the ornaments, or "little moons," that were on their camels' necks" (xvii, 21), afterward mentioned, with neck-chains (see Kitto, Phys. Hist. of Pal, p. 801; comp. Stat. Thebaid, ix, 887), both probably of gold (ver. 26). We also find other notices of the camels of the Amalekites (1 Sam. xv, 8; xxx, 17), and of them and other and probably kindred peoples of the same region (xxvii, 8, 9). In the account of the conquest by the Reubenites, the Gadites, and the half tribe of Manasseh, of the Hagarites beyond Jordan, we read that fifty thousand camels were taken (1 Chron. v, 18-29). It is not surprising that Job, whose life resembles that of an Arab of the desert, though the modern Arab is not to be taken as the inheritor of his character, should have had a great number of camels (Job i, 8; xiii, 12; comp. Aristot. Hist. Anim, ix, 57, 5). The Arabian Queen of Sheba came with a caravan of camels bearing the precious things of her native land (1 Kings x, 2; 2 Chron. x, 12); read also of Benhadad's sending a gift to Elisha "of every good thing of Damascus, forty camels burden" (2 Kings viii, 9). Damascus, be it remembered, is close to the desert. In the prophets, likewise, the few mentions of the camel seem to refer wholly to foreign nations, excepting where Isaiah speaks of their use, with asses, in a caravan bearing presents from the Israelites to the Egyptians (xxx, 6). He alludes.
to the camels of Midian, Ephah, and Sheba, as in the future to bring wealth to Zion (ix. 6). The "charriot of camels" may be symbolical (xxi. 7), or it may refer to the mixed nature of the Persian army. Jeremiah makes mention of the camels of Kedar, Hazor, and the Bene-Kedem (xl. 28-33). Ezekiel prophecies that the king of Asshur will receive "his chief men in the midst of the utmost, and Rabash itself should be a resting-place for camels" (xxv. 1-5; see Buckingham, Trans. p. 829).

**See Caravan.**

The camel is classed by Moses among unclean animals (Lev. xvi, 4), "because he cheweth the cud, but divideth not the hoof. Michaelis justly remarks, that in the case of certain quadrupeds a doubt may arise whether they do fully divide the hoof or ruminate. "In such cases," he says, "to prevent difficulties, a legislator must authoritatively decide; by which I do not mean that he should prescribe to naturalists what their belief should be, but only to determine, for the sake of expounders or judges of the law, what animals are to be regarded as ruminating or parting the hoof." This doubt arises in the case of the camel, which does ruminate, and does in some sort divide the hoof; that is, the foot is divided into two toes, which are very

**to which camels are subject; but they believe that the Jews in their sacred books have remedies mentioned, which they withhold through hatred and malice. The flesh of the camel is coarse grained, but is rather juicy and palatable when the animal is young and not poorly fed. It is inferior to good beef, although at first it might easily be mistaken for beef; but it is at least equal, if not superior, to horse-dash (Kitto, Pict. Bible, note in loc.).

To pass a camel through the eye of a needle was a proverbial expression which our Lord employed in his discourse to the disciples to show how extremely difficult it is for a rich man to forsake all for his cause and to enter the kingdom of God. (Matt. x. 24; Mark x. 25; Luke xviii. 24; see the treatises on this passage, in Latin, of Codius [Vitae. 1685], Pfeffer [Regiom. 1679], Fetsalz [Vitae. 1678]). Many expositors are of opinion that the allusion is not to the camel, but to the cist by which an anchor is made fast to the ship, changing οἰκονομάς, a camel, to οἰκονομᾶς, a cable; but for this there is no critical foundation; and L., ibid., ibid., and others have shown that to speak of a camel, or any other large animal, as going through the eye of a needle was a proverbial expression, much used in the Jewish schools, to denote a thing very unusual or very difficult. There is a similar expression in the Koran: "The impious, who, in his arrogancy, shall accuse our doctrine of falsity, shall find the gates of heaven shut; nor shall he enter there till a camel shall pass through the eye of a needle. It is thus that we shall recompense the wicked." Roberts mentions a parallel proverb used in India to show the difficulty of accomplishing anything: "Just as soon will the elephant pass through the spout of a kettle."

Another proverbial expression occurs in Matt. xxiii, 24: "Strain at (ὑμάλω) a grist and swallow a camel." Dr. Adam Clarke proves that "at" has been substituted for "out," by a typographical error in the edition of 1611, in our puritans' "out" comes from Archbishop Parker's of 1568. The reference is to a custom the Jews had of filtering their wine, for fear of swallowing any insect forbidden by the law as unclean. The expression is, therefore, to be taken hyperbolically, and, to make the antithesis as strong as possible, two things are selected, the smallest insect and the largest animal. The proverb is applied to those who are superstitiously anxious to avoid small faults, and yet do not scruple to commit the greatest sins.

**Camel's Hair (γόνις καμηλοῦ), a material of clothing.** John the Baptist was habited in raiment of camel's hair (Matt. iii. 4; Mark i. 6), and Chardin states that such garments are worn by the modern derivishes. There is a coarse cloth made of camel's hair in the East, which is used for manufacturing the coats of shepherds and camel-drivers, and also for the covering of tents (Harmar, Obs. ii. 487; comp. Elian, Nat. Hist. xvii, 94). It was doubtless this coarse kind which was adopted by John. By this he was distinguished from the rest of the people who wore soft raiment. Elijah is said in the English Bible to have been "a hairy man" (2 Kings i, 8); but it may mean "a man dressed in hair"—that is, camel's hair. In Zech. xiii. 4, "a rough garment"—that is, a garment of a hairy manufacture—is characteristic of a prophet. (See Manufactures of the Antients, N. Y. 1844, p. 312 sq.; Hackett's Illustra. of Script. p. 96.)

Cameleon. See Chameleon.

Camerasius, Joachim, one of the most scholarly men of the sixteenth century, was born at Bamberg, April 12, 1500. The original name of his family was Liebhard, which was changed into the Latin Camerarius (Chamberlain) because his ancestors had been chamberlains at the court of the bishops of Bamberg. He was sent to the University of Leipzig, where he studied Greek under Richard Coxe,
and Peter Mosellanus. He evinced an extraordinary passion for that language, and in 1524 put forth his first work, a Latin translation of one of the Orations of Demosthenes. He was at that period at Wittenberg, whither he had been driven by the fame of Melanchthon. In 1526 he went into Prussia, and in the year following was nominated by Melanchthon to fill the office of Greek and Latin professor in the new college at Nuremberg. The senate of Nuremberg deputed him, in 1530, to attend the diet of Augsburg, where he sided Melanchthon in the dispute respecting the marriage of the emperors, in the Apologia Confessors, See Confessions. In 1535 the Duke of Wurttemberg gave him the direction of the new University of Tübingen. In 1541 he was charged by Henry of Saxony with reforming the University of Leipzig, of which he was afterward appointed rector. He there laboured zealously for the Reformation, and at the same time was one of the most laborious classical and theological teachers of the age. With his friend Melanchthon he took an active part in the negotiations concerning the Interim, and for his willingness to make concessions was severely censured by the opponents of the Interim. In 1554 he was a delegate of the Lutherans to the Diet of Augsburg, from where he went to Nuremberg to aid in adjusting the Osiandrian controversy. In 1568 the Emperor Maximilian, who had called him to Vienna to consult him about some important state affairs, wished to retain him as his councillor, but he refused the offer on account of his infirmities. He died at Leipzig in April, 1574. Camerarius was grave and reserved, even toward his own children. He hated nothing so much as untruthfulness, and did not even tolerate it in jests. The extent of his knowledge, the purity of his morals, the energy of his character, his sweet and persuasive eloquence, one might see in the esteem in which the sawdust of his door was valued by the students. He left five sons, all of whom distinguished themselves as scholars or in other places of position. A list of his numerous writings will be found in Niceront, Mémoires, t. xix. Among his works in theology and exegesis are, 1. Synopsis, i. e. de Nicola Symo of Leipsig (Leipzig, 1548, 4to);—2. Disputationis de psi et coeliscula atq. orthodoxa praebus et inconvenientia Numismatis Dimini (Argentorat, 1569, 8vo);—3. Chronologia secundum Gregorium sacratissimum temporibus exposita, autore Nicolaio Archippe. Constantin, conversatio in lingua Lat. (Basile, 1561, fol.;—Leipsig: 1574 and 1583, 4to);—4. Historia de Melanchthoni professoris, generi, etc. (Leipsig: 1575);—5. Narratio de P. Melanconis vita, vita, etc., which contains an entire history of the Reformation (1565; best ed. by Ströbel, Hille, 1777, 8vo);—6. Natura figurarum sermonum in libros Evangeliarum, etc. Novi in Apocalypsii scripta et in Salmorum Actuum et Apocryphos (these two works were published together at Cambridge in 1642, under the title Commentariorum in Novum Testamentum; and at Frankfort in 1712, with the title Elegiæ Nova Test.).—7. Hamilitz (Leipsig, 1573);—8. Historia narratio de Fratrum ordinis oratorum societate in Armenia, Moravia and Polonia (Heidelberg, 1593, 8vo). He also published a collection of the letters of Melanchthon (Leipsig, 1632), which contains much valuable information of the times of the Reformation.—Hoefer, Novi. Biog. Générale, viii, 319; Landon, Eccl. Dictionary, ii, 506.

Cameron, or Cameron, John, one of the greatest Protestant divines of France in the seventeenth century, a founder of the modern school of Calvinists, was born in Glasgow 1579, and died 1586. Before he was twenty he began to lecture in Greek at the University of Glasgow; in 1600 he went to France; and in 1602 he was made professor of philosophy at Sedan. The Church of Bordeaux destracted his expenses for four years in studying theology at Paris, Geneva, and Heidelberg. In 1608 he became pastor at Bordeaux, where he preached with great success until 1618, when he became professor of theology at Saumur; but on the dispersion of the University in 1621 by the civil wars he returned to Glasgow, where he taught a short time, and in 1624 was chosen professor of theology at Montachens College, where he was killed, in a political tumult, in 1625.

Camero's theology was modified Calvinism. He opposed "the imputation of the active righteousness of Christ," and "the non-concurrence of the human will with the grace of God in man's conversion." He "adopted from Arminius the doctrine of universal redemption, and exhorted the Christian to embrace his salvation, without restriction, to all men." His views were adopted and developed by Amrayment, Placaeus, and Cappelius (q. v.), especially the view that God does not "move the will physically, but only morally, in virtue of its relations to the judgment and intellect." His doctrine, however, is far removed from Arminianism, as is shown by his colloquy with Tilenus—Alma Collatio de Gratia et Volunt. Humanae concursus (Leyden, 1621) [see Tilenus]—and also by his Defensio de Gratia et Libero Arbitrio (Saumur, 1624, 8vo). His doctrine of universal grace may be thus summed up: (1) "that God desires the happiness of all men," and that he "exclusively grants all grace "dieu d'etre" from the benefits that are procured by the death, sufferings, and gospel of Christ; (2) that, however, none can be made a partaker of the blessings of the Gospel, and of eternal salvation, unless he believe in Jesus Christ; (3) that such, indeed, is the immense and universal goodness of the Supreme Being, that he refuses to lose the power of believing, though he does not grant unto all his assistance and succor, that they may wisely improve this power to the attainment of everlasting salvation; and that, in consequence of this, multitudes perish through their own fault, and not from any want of goodness on God's part. Those who are thus driven from the Church of the Universalists, because they represented God as willing to show mercy to all mankind, and Hypothetical Universalists, because the condition of faith in Christ was necessary to render them the objects of this mercy. See AMMANN. His writings are collected under the title Opera, partim ad urbem edita, partim post eti. obit. subj. lapsa (Genev, 1658, fol.).—Calderon. Life of Episcopos, 456; Hook, Eccl. Biog. ii, 407; Nicholls, Calvinium et Arminianismi, i, 202 sq.; Watson, Theol. Inst. ii, 215, 411; Smith's Hagenbach. Hist. of Doctrines, § 225, a.

Cameron, Archibald, a Presbyterian minister, was born in Scotland in 1711. In 1727 he entered the Church of Scotland, and migrated to America. Little is known of his early years but that he spent some time at the Transylvania University (Kentucky), and completed his studies at Bardstown, when he connected himself with the Presbyterian Church. In 1759 he was licensed, and, as a missionary, distributed his labors in the counties of Nelson, Shelby, and Jefferson. He was installed in 1796 over the churches of Akron and Fox Run, Shelby, and Big Spring in Nelson, and for several years the field of his labors embraced a circuit of from thirty to forty miles. Seven churches were organized by his instrumentality, and he was often obliged to swim the frozen streams. Cameron arrived in 1824 large additions were made to his churches, and from this time he supplied the congregations of Shelbyville and Mulberry. He died December 4, 1866. He published The Faithful Steward (1800)—The Monitor, on Religions Liberty, etc. (1806)—An Appeal to the Scriptures, etc. (1811)—A Discourse on the Use of the Season of Penitence (1812)—Before the Presbyterian Church and a Preacher who holds the Doctrine of an Indefinite and Universal Attonement (1814)—A Defense of the Doctrines of Grace (a series of Letters, 1815)—A Reply to Questions on Predestination, etc. (1822).—Sprague, Annals, iv, 168.

Cameron, Richard, founder of the "Cameronian" or "Covenanter," was born at Falkland, in the
Cameronians. See CAMERONIANS.

Camisarsd (from the French camisard, a peasant's jacket), a sect of fanatics (made such by oppression in France toward the end of the seventeenth century. The predictions of Brousson (q. v.) and Jurian, as to the coming downfall of the papacy, and the overthrow of the world's most mighty, have given rise to the minds of the Protestants of Dauphiné and Vivarais. "In 1688 five or six hundred Protestants of both sexes gave themselves out to be prophets, and inspired of the Holy Ghost. They have strange fits, which came upon them with faintings, as in a swoon, which made them stretch out their arms and legs, and stagger. They struck themselves with their hands: they fell on their backs, shut their eyes, and heaved their breasts. The symptoms answer to those produced by inspiring nitrous oxide, and were, in fact then discovered, we should have been tempted to suspect imposture. They remained unconscious, and when recovered, declared that they saw the heavens open, the angels, paradies, and hell. Those who were just on the point of receiving the spirit of prophecy dropped down, not only in the assemblies, but also in the fields, and in their own houses, crying out Mercy. The least of their assembly made up four or five hundred, and some of them amounted to even three or four thousand. The hills resounded with their loud cries for mercy, and with imprecations against the priests, the pope, and his anti-Christian dominion, with predictions of the approaching fall of popery. All they said at these times was heard and received with reverent awe. They were also with a violence which naturally increased the disorder. In 1702 a number of the Camisards was put to death with torture. A war arose, in which Cavalier, a young baker, became prominent as an able leader. The Marshal de Montrevell was sent by the court to quell these disturbances, and, after him, Marshal Villars; and, after a long series of futilities, these wretched people were finally, in 1705, put down. Cavalier submitted, and afterward went to England. Ravance, Catatin, and Frangézé, three of their leaders, were burned alive, and Villas and Jonquet, also commanders of their forces, together with twenty of their followers, were taken on the wheel. Many of these Camisards fled to England. See Smedley, "Reformed Religion in France," vol. iii, ch. xxv; "Théâtre Sacré des Cévennes," (London, 1707, by Max Misson, the chief source of information); "Les Wars des Cévennes under Cavalier" (Dublin, 1726); Schulz, "Geschichte der Camisarder" (Weimar, 1789); Court, "Histoire des Cévennes" (Villefranche, 1786); "Histoire des Camisards" (London, 1744); Peyrat, "Histoire des Pauvres du Desert" (Paris, 1841); Hoffmann, "Gesch. des Aufstandes in den Cévennes" (Nördlingen, 1887). See FRENCH PROPHETS.

Cammor, John Frederick, one of the first bishops of the Moravian Church in America, was born near Magdelburg, Germany, July 28, 1721. Entering the Moravian ministry, he was sent to America as assistant to the presiding bishop, and was in charge of the mission station in Pennsylvania. In 1748 he was consecrated bishop of the Missionary District of the Six Nations, and in 1748 he was formally adopted by the Six Nations. He attended an Iroquois council at Onondago, N. Y., traveling by canoe up the Susquehanna for 13 days, and thence on foot through the wild mountain regions of Southern New York a fortnight more. The journey broke down his constitution, and he died at Bethlehem, April 28, 1771. "The Moravian, Sept. 26, 1861.

C'amon (Heb. Kamon, perhaps full of stalks or grain; Sept. Kepoun) v. r. Perpoun, the place in which Jair (q. v.) Judges was buried (Judg. v. 5). As the remnant number of his people flee to the country east of Jordan, there is no reason against accepting the statement of Josephus (Ant. v. 7, 6) that Camon (Kepoun) was a city of Gilead. In support of this is the mention by Polybius (v. 70, 12) of a Cepous (Kepoun, for Kepoun) in company with Tella and other trans-Jordanic places taken by Antiochus (Ireland, Pol. i. p. 679; Ritter, Erdk., xiv, 1065). Eusebius and Jerome (Onomast. s. v. Kapou, Camon) evidently confounded it with the Cepos (Judith viii, 3) in the plain of Edomonee; and this has misled Schwarz (Pol. iv. 283). It is possibly the modern Raimun (comp. the Sept. rendering Asmon, four or at least miles north-west of Jerash or Gerasa (Van der Volde's Map).

Camp, a) marchon', an encampment, whether of troops or nomads, especially of the Israelites in the desert; hence also put for troops or a company itself; once marchon, marchon', camps, i. e. place of encampment, 2 Kings vi, 8; παραβαλακά, Heb. xiii, 11, 18; Rev. xx, 9; elsewhere "castle"). Of the Jewish system of encampment the Mosaic books have left a detailed description. From the period of the re-emergence in the wilderness to the crossing of the Jordan the twelve tribes were formed into four great armies, encamping in as many fronts, or forming a quare, with a great space in the rear, where the tabernacle of the Lord was placed, surrounded by the tribe of....
Levi and the bodies of carriers, etc., by the stalls of the cattle and the baggage: the four fronts faced the cardinal points while the man was southward, but, as Judith continued to lead the van, it follows that, when the Jordan was to be crossed, the direction became westward, and therefore the general arrangement, so far as the cardinal points were concerned, was reversed. It does not appear that, during this time, Israel ever had lines of defence thrown up; but in after ages, when only single armies came into the field, it is probable that the castral disposition was not invariably quadrangular; and, from the many positions indicated on the crests of steep mountains, the fronts were clearly adapted to the ground and to the space which it was necessary to occupy. The rear of such positions, or the square camps in the plain, appear from the marginal reading of 1 Sam. xvii, 20, and xxvi, 5, to have been enclosed with a line of carts or chariots, which, from the remotest period, was a practice among all the nomad nations of the north. (D'Aquino, Le Camp des Israélites, Paris, 1843, 1844.) For a more general treatment of the subject, from a military point of view, see EX. CAMP.

Campanarium or Campanile (Lat. campana, bell), a bell-tower. The most striking campaniles are found in Italy, and they are those generally detached from the church, e.g. those of Florence, Cremona, Bologna, and Pisa. That of Florence, built by Giotto (1334), is a square 45 feet on each side and 267 feet high, in Italian Gothic, simple in design, but richly ornamented. In some instances these towers, on account of their great elevation and the narrowness of their base, have considerably deviated from the original perpendicular. The Campanile of Pisa, called Torre Pendente ("the leaning tower"), is the most remarkable of these, having a deviation of nearly 13 feet in a height of 150 feet. See BELL.

Campanella, Thomas, was born in Calabria 1568, and entered the Dominican order 1594. He applied himself chiefly to metaphysics, and followed his countryman Telesio, who died in 1588 at Cesena, on his opposition to what was then taught in the schools under the name of Aristotelian philosophy. Campanella published his first work in Naples in 1591, entitledPhilosophaeae, to which is appended a treatise on the art of living and a list of books. He was imprisoned in Bologna, and the monks especially, raised such a storm against Campanella that he left his native country. He was accused of sorcery, of being an adept of Raymond Lullus and of some cabalistic rabbins. His works were seized and submitted to the Inquisition at Rome, which, however, gave him little trouble; but some time after 1600, being at Marseilles, he innocuously spoke against the government of the Spaniards, and, being thrown into prison, was put to the rack, and condemned to perpetual confinement. In 1626 Pope Urban VIII obtained for him his liberty, whereupon he repaired to Rome, and continued there some years, but finding that the Spaniards were preparing fresh troubles for him, he fled into France, and landed at Marseilles in 1634. He passed the latter part of his life in the Dominican monastery at Paris, and died March 21, 1639. The number of his works is immense. Echarb has given several catalogues, one of which contains eighty-two distinct works. Campanella was a man in whom every thing seems to have been extraordinary: his conduct, adventures, genius, habits of thought, style of writing, every thing was out of the usual track; hence he has been extravagantly praised, and as extravagantly abused and found fault with. In his moral character he was altogether beyond reproach; in his literary pursuits he was unwarried, excessively curious, and greedy of knowledge. He left many MSS. Among those that have been published, the following are deserving of notice: Prodromus Philosophiae naturalis, seu de Naturalis Rerum (Franck. 1617);—De Sensu Rerum et Magia (Frankf. 1620). This was corrected, as well as several others, by Campanella during his Neapolitan captivity, and was published in Germany by Adami, but the author published a second edition of it at Paris in 1636, which he dedicated to Richelieu. Father Mersenne wrote to refute the book as heretical, and Athanasius of Constantinople wrote against it in his Anti-Campanella (Paris, 1656)—Resul- tis Philosophiae Epiphanias Partes IV (Frankf. 1628).—The Civilis Solus, often reprinted separately, and translated into various languages:—Apologia pro Galileo (Frankf. 1662).—De Predestinationes, Electio- nes, Reprobationes, et cæsiis Divinis Graciae, Cento Thomæis- cus (Paris, 1636). The author discusses some of the opinions of Thomas Aquinas, and supports those of Origen:—Invaroria Philosophei, Libri XVIII (Paris, 1638). The following works of Campanella were published after his death, namely:—De Libri propriis et recta Ratione Studendi (Paris, 1642), in which the author speaks of himself, his studies, and his works. It was also published in Italian, who knew Campanella, and who speaks of him and his impiroment in his Considera- tions Politiques sur les Coups d'États.—De Monarchia Hispanica Discursus (Amsterdam, 1644). This, perhaps the most remarkable work of Campanella, was written by him during his confinement, and is an able sketch of the political world of that time (translated, A Discourse touching the Spanish Monar- chy, Lond. 1654).—Tennemann, Hist. Phil. § 817-819.

Campanile, a name adopted from the Italian for a bell-tower. See CAMPA NARIUM.

Campanitas, a Socinian sect in Hungary, so named from Johannes Campanus (q. v.).

Campanus, Johannes, an anti-Trinitarian theologian of the 16th century. He was a native of the duchy of Julich, and in 1528 was appointed lecturer on theology at the University of Wittenberg. Here Witsch and other theses, which he afterward developed openly. He favored his opposition to Luther, and left Saxony for Julich. The Roman Catholic autho- rities imprisoned him at Cleves on a charge of having excited the peasants by his preaching that the world was soon coming to an end, about 1550, and he was to have been recollared in prison until the 25 years, and is to have died between 1575 and 1580, out of his mind. He wrote a number of books, among which are Wider M.1. V.1. Welch in der Welt, and in which his peculiar views are set forth; reproduced in his Canticum and Haft. Schrif.
He rejected the divinity of the Holy Spirit, and taught that the Son of God is of the same substance with the Father, but not coeternal. See Schelhorn, *Diss. de J. Compano*, in his *Annals of Litterature*. The excommunication of the Jesuits, by *Ca' Raffaello*, by the University of Geneva, Scotland—both of them as Presbyterian clergymen. Thomas Campbell, the poet, was a relative and classmate of his father. On the one side his ancestry was of Scotch origin, and on the other Huguenot French. He emigrated to America in 1809, two years after his father, and settled at first in Washington county, Penn., near the spot in West Virginia to which he soon afterward removed, and on which he lived during the remainder of his life. That spot, now the village of Bethany, was then a wild and secluded locality amid the hills. He was at first a minister of the "Secession" branch of Presbyterians, but was early converted to Presbyterians. He believed that "Christian Baptism" was not the result from nothing short of the destruction of creeds and confessions of faith, insomuch as human creeds and confessions have destroyed Christian union; and that "nothing ought to be received into the faith or worship of the Church, or be made a term of communion with another, which is not old as the New Testament. Nor ought anything to be admitted as of divine obligation in the Church constitution or management save what is enjoined by the authority of our Lord Jesus Christ and his apostles upon the New Testament Church, either in express terms or by approved precedent." The prominence of these opinions causing distance in the Presbyterian Church, he and his father abandoned it in 1810, and formed a new society at Brush Run, Penn. In 1812 he became convinced that immersion is the proper form of baptism, and he and his congregation were immersed. In connection with his father, the Rev. Thomas Campbell, he formed several congregations, which united with the Redstone Baptist Association, but protested against all human creeds as a bond of union, accepting the Bible alone as the rule of faith and practice. Being excluded from the fellowship of the Baptist churches in 1827, his followers began to organize into a separate body, which has since spread in all parts of the United States, especially in Virginia, Tennessee, and Kentucky. The number of disciples was estimated in 1864, altogether, at about 350,000 members, of whom only a small number belonged to Great Britain. See *Disciples of Christ*. In 1823 Mr. Campbell began the publication of *The Christian Baptist*, afterward merged in the *Millennial Harbinger*, of which he re- mained editor during his life. In 1840 he founded Bethany College, and he was its president to the day of his death. He was a member of the Virginia Constitutional Convention of 1829-30. It was in that body that he gave prophetic notice of what would ultimately be the result of West Virginia, and of what he lived to see accomplished. In 1847 he visited Europe, receiving marked attentions from many of the political and religious leaders. On slavery conflict he was "conservative." "Mr. Campbell never was the champion of American slavery. He believed, however, that the relation of master and slave had existed in all ancient and primitive societies, at all events, toleration; and while he did not desire to be regarded as the apostle of American slavery, he contended that it should not be a test question of communion in the churches. His own slaves he had emancipated many years before." His life was full of labors, well supported by a physical frame of athletic vigor. But in 1866 he began to fail, and he died at Bethany, March 4, 1866. He had many of the great qualities of a reformer, and among them was personal energy and pugnacity. His career led him frequently into public "debates," the most important of which were as follows: With the Rev. John Walker, minister of the Presbyterian parochial church in the State of Ohio, held at Mt. Pleasant in the year 1820. This debate created a great local interest throughout all that section of country, and was attended by a vast concourse of people. Next followed his debate with the Rev. William McCalla, on "Christian Baptism," held at Ky., in the year 1822; next his debate with Robert Owen, at Cincinnati, in the year 1828, on the Truth of Christianity; next his debate, in the same city, in the year 1836, with Archbishop Purell, on the infallibility of the Church of Rome; and finally, in the year 1843, his debate with the Rev. Dr. N. L. Rice, held in the city of Lexington, Ky., the specific points of which were "the action, subject, design, and administration of Christian baptism;" also, the "character of spiritual influence in conversion and sanctification." And the "experience and tendency of ecclesiastical creeds as terms of union and communion." Dr. Campbell was highly endowed as a preacher, a writer, a teacher, a speaker, a powerful voice, gave effect to his vigorous thought, and fluent, energetic speech. Large audiences gathered to hear him in his journeys through the West. He wrote largely, chiefly in *Harbinger*; but he published also a summary of theology called "Christian System," and a *Memoir of Sin* (3d ed. 1846); *Memoirs of Thomas Campbell* (Cincinnati, 1861, 8vo). See also the article *Disciples of Christ*. —Methodist (N. Y.), No. 828; *Amer. Christ.* Rec. 42 sq.; *Cincinnati Gaz.* March, 1866; *Lan- dis, Robb's Taken* (N. Y. 1844, 8vo); Richardson, *Mem. of A. Campbell* (Phil. 1880). See CAMPBELL, THOMAS. 

**Campbell, Alexander Augustus, a Presbyterian minister, born in Amherst county, Va., Feb. 29, 1800, 1879. He first studied medicine, and in 1811 graduated M.D. at Philadelphia. A violent attack of yellow fever was the means of his conversion, and he gave up the practice of medicine and applied himself to theology. He was licensed to preach by the Presbytery of North Alabama, April 2, 1822, and ordained as an evangelist Oct. 15, 1822. He was at first an itinerant, then for four years, from 1824, pastor at Tuscaloosa and Russellville, Ala.; declining a call from the Church of Florence, Ala., however, remained there two years with great success, repeating in 1829-30, when he preached as a missionary in Western New York, 1830-31, and from the Church in Jackson, Tenn., he was installed pastor Oct. 8, 1833; there he preached, lectured, edited a newspaper, and practiced medicine, principally among the Cherokee and Creek missions, at the same time, laboring faithfully until his death, May 27th, 1846. Mr. Campbell published a treatise on *Scripture Baptism* (1844). —Sprague, *Annals*, iv, 651.**
In 1818-21 he revisited Africa, and found some interesting changes produced by the civilization introduced by the missionaries. The journal of his second visit appeared in 1822 (2 vols. 8vo). Mr. Campbell published numerous works for the instruction of the young, and he was the founder, and for eighteen years the editor of the *Youth's Magazine*, a religious periodical of great utility.—Jamieson, *Religious Biog.* p. 100.

Campbell, Thomas, one of the founders of the religious denomination generally called "Disciples," was born Feb. 1, 1763, in Ireland, and descended from a family—the Campbells of Argyle—which makes a prominent figure in Scottish history. In 1780 he entered the ministry in connection with the Presbyterian Church which is known as Seceders, or Seeding Presbyteries. See PRESEYTERIANISM. In 1807 he emigrated to the United States, and was received at Philadelphia into the communion of the Associate Synod of North America. For about two years he supplied with ministerial labor the destitute churches of this connection in Western Pennsylvania. Shortly after, in 1809, he was joined by his son, Alexander Campbell (q. v.). Both father and son soon declared against the use of any human creed, confession of faith, or formularies of doctrine and church government. When their views were accepted by the Seceders as a body, they drew up a "declaration and address," in which the pious of all the denominations in the vicinity were invited to form a union, with the word of the Bible as their only creed. A congregation on the basis of these principles was organized at Brush Run. See Campbell, Alexander. Thomas as Campbell retained at first infant baptism, although his son Alexander pressed upon his attention "the incongruity of demanding an exact precept or precedent for any positive church ordinance, and yet practicing infant baptism, for which neither the one nor the other could be produced." Gradually Thomas Campbell took up the views of his son Alexander on infant baptism; and on June 12, 1812, both he and his son Alexander, together with the members of their congregation, were immersed by Elder Luse, of the Baptist community. In 1813 they were received into Redstone Baptist Association, stipulating in writing that "no terms of union of communion other than the Holy Scriptures shall be required." Henceforth Alexander Campbell took, instead of his father Thomas, the lead in the religious movement which at length eventuated in the formation of those who sympathized with them into a separate denominational connection. Thomas Campbell labored with great zeal, as an itinerant minister, in the dissemination of the Gospel. He died in 1846, when old age compelled him to rest. He spent the remainder of his life at Bethany with his son Alexander. In 1850 he was deprived of his sight, but his intellect remained unclouded. He died January 4, 1854. See Alexander Campbell, *Memoirs of Elder Thomas Campbell* (Cincinnati, 1861, 8vo); and the articles Campbell, Alexander; Disciples of Christ.

Campbellian. See Disciples of Christ.

Camp, Joshua Heinrich, a German clergyman and author, was born in 1746 at Dussau, in Brunswick: became, in 1778, military chaplain at Potsdam; in 1776, director of an educational institution in Dessau. In 1777 he established his own educational school at Tittrow, near Hamburg, which he conducted until 1783. In 1787 he was appointed school-counselor in Brunswick, and in 1806, governor of a school at Brunswick. In 1813 he was one of the most famous German authors of juvenile works, especially works of travel. His work *Robinson der Jüngere* (Ilristolin the Younger) has been translated into all European languages, and its immense popularity in Germany may be inferred from the fact that a 4th edition of it was published in 1861. His writings, prepared in a rationalistic spirit, contributed largely to lead away

Campbell, George, D.D., was born at Aberdeen, Dec. 25, 1719, and was educated at the Marischal College at Aberdeen. After leaving college he studied law, and was apprenticed to a writer to the Signet at Edinburgh; but, having a strong bent to theology, he obtained a release from his master, and studied theology at Edinburgh. In 1748 he was appointed to the pastoral charge of the parish of Banchory Terrnan, near Aberdeen, and in 1755 he obtained a parish in Aberdeen. In 1759 he was made principal of the Marischal College. In 1768 he published his *Dissertation on Miracles*, in opposition to Hume, which was translated into three Continental languages (new ed. Edinburgh, 1823, 8vo). The book had immense success, and procured for its author the degree of D.D. After his death appeared his *Lectures on Ecclesiastical History* (new ed. London, 1804, 8vo), which was answered by Skinner, bishop of Aberdeen. His most important work was his *Translation of the Four Gospels*, with a Commentary, which appeared not long before his death, and has been repeatedly republished. The best edition is that of Aberdeen (1814, 4 vols. 8vo); but there is a very good and cheap American edition (1837, 2 vols.). He wrote also *Lectures on the Pastoral Character* (London, 1811, 8vo); *Philosophy of Rhetoric* (1776, 8vo, new ed. 1823, 8vo); *Introduction to the Study of Theology*, and *Pulpit Eloquence* (London, 1807, 8vo, numerous editions). He retired from his college duties some years before his death, and received a pension of £300 a year from George III. He died April 6, 1796. The life of Dr. Campbell has been written by the Rev. G. S. Keith.—Darling, *Cyclopaedia Bibliographica*, 1, 567; Jamieson, *Cyclopedia of Mod. on Religious Biography*, 1, 99; Jones, *Christian Biography*, s. v.

Campbell, John, L.L.D., was born in Edinburgh, March 8, 1708. His life was devoted to literature, and his publications were very numerous. He edited the "Biographia Britannica," and was one of the writers of the "Universal History." His title to mention in this work rests on the publication of *A Discourse on Providence* (1748, 3d ed. 8vo); *Thoughts on Moral and Religious Subjects* (1749, 8vo); A new and complete History of the Holy Bible (1733, 2 vols. folio).—General Biog. Dictionary, i, 119; Darling, *Cyclopædia Bibliographica*, 1, 563.

Campbell, John, an Independent minister, was born at Edinburgh in March, 1760, and apprenticed to a goldsmith. About 1789, at which time he was actively engaged in measures for the extension of Sunday-schools, he began to prepare himself for the Christian ministry. He subsequently visited London to take charge of twenty-four young natives of Africa, who were brought from Sierra Leone to be instructed in Christianity, with a view to its introduction into that country, and in 1804 he became the pastor of the Independent Church in Kingsland, a charge which he retained until his death, April 4th, 1840. Mr. Campbell took an active part in the formation of the British and Foreign Bible Society, and several other important religious associations. In 1812 he made a journey to the missions of the London Missionary Society in South Africa, from which he returned in 1814. Of this journey he published an account (1815, 8vo).
the youth of Germany from simple faith in Christianity. The complete edition of his juvenile works fills 37 volumes (Bnawische Kinderund Jugendschriften, 4th ed. Brunswick, 1829-32).—Peyer, Universal-Lexicon, s. v.; Hurst, History of Rationalism, p. 188.

Campego (otherwise Campego, Campio, Lorenzo, Cardinal, was born in 1474, became professor of law at Padua, and, on the death of his wife, took orders as a priest. He became auditor of the Rota, bishop of Felti, and nuncio in Germany. Leo X elevated him to the purple. In 1524 he was legate at the Nuremberg Diet, and there and elsewhere he exerted all his skill of intrigue against the Reformation with great success. In 1526 he was sent legate to Henry VIII (who, in a former mission, had made him bishop of Salisbury) to effect some settlement of the question of the divorce. Upon this occasion he was the bearer of a bull bestowing upon Wolsey the most ample powers to effect the divorce. These powers, however, were shortly withdrawn, and Campigio returned to Rome shorn of his bishopric of Salisbury. He was a man of great talents, and intimate knowledge of the ecclesiastical law. His letters are preserved in the collection entitled Epistolae omnium pontificum et cardinalerum, Antonii Hohenlohe (Boden, 1555, 1 vol.). There were seen prelates of this family.—Biog. Univ. vi, 638. See Burnet, Hist. of Engl. Reformation, vol. iii, passim.

Campen, James van, one of the chiefs of the Anabaptists. After the expulsion of the sect from Germany he went to the Netherlands, and John Bocold (q. v.) appointed him, in 1594, bishop of Amsterdam. He was executed in 1594.

Campen, John de, was born at Campen, in Overyssel, about 1490. He studied Hebrew under Beochim, and filled the Hebrew professorship at Louvain from 1519 to 1581, after which he travelled into Italy, Germany, and Poland. At Rome he was enrolled among the Hebraists of the pope. On his way back to Louvain he died of the plague, Sept. 7, 1558. He published De natura litterarum et punctorum Hebraorum ex versis Elia Levi, seu Deut. xxi (1529, 12mo); also Psalmorum omnium juxta Hebraicam versatam paraphrastica interpretatio (1532, 16mo); trans. into English, Lond. 1585, 24mo):—Paraphrasis in Salmosnic Ecclesiasticam, and Commentarios in Epist. Pauli ad Rom. et Gal. (Venice, 1584).—Biog. Univ. vi, 687; Landon, Eccl. Dictionary, i, 526.

Campen, Thomas van. See Kempis, Thomas A. L.

Camphire (Pap. Κόψηρ; Sept. κύπρος; Lat. cypris, the cyprus-flower), rendered in our margin γύπρος (Cant. i, 14; iv, 13). It is entirely different from the modern γυμ com- por, although the names appear to be etymologically connected. The latter is a product of a tree largely cultivated in the island of Formosa, the Camphora officinarum, of the Nat. ord. Lauraceae. There is another tree, the Cinnamomum camphora, of which also yields camphor; but it is improbable that the substance secreted by either of these trees was known to the ancients. The plant in question is conceded to be the Αίδην of the Arabs (Loxoeia inermis and ginoso of Linnaeus), which Lamarrck and some other naturalists regard as the same species, and name it Loxoeia alba, alleging that the thorny points of the branches characteristic of the latter are due only to old age; but each seems to retain its pecu- liar traits under cultivation), described by Diocorides (i, 175) and Pliny (xii, 24) as growing in Egypt, and producing coloriferous flowers, from which was made the dèume Cyprium. Martini remarks that "the shrub known in the Hebrew language by the name of kipher is common in the island of Cyprus, and thence had its Latin name;" also that "the Botrus Cypris has been sup- posed to be a kind of rare and exquisite grapes, transplanted from Cyprus to Engaddi; but the Botrus is known to the natives of Cyprus as an odoriferous shrub called henna, or alcamna. So R. Ben Melekh (od Cant. i, 14), as quoted and translated by Celsius (Hierol. i, 225). If we refer to the works of the Arabs, we find both in Serapion and Avicenna reference from their Henna to the description by Dioscorides and Galen of Kypros or Cypris. Sprungel states (Comment. on Dion. Cor. 1, 124, note) that the inhabitants of Luba n. Hill the henna-plant Ksfr: he refers to Delisle (Flor. Egypt. p. 12). If we examine the works of Oriental travellers and naturalists, we shall find that this plant is universally esteemed in Eastern countries, and appears to have been so from the earliest times, both on account of the fragrance of its flowers and the coloring properties of its leaves (see Prosp. Alpin. c. 18). It was especially abundant near Askhelon (Pliny, xii, 51; Josephus, War, iv, 8, 8). Thus Rauwolf, when at Tripoli (Truebl, iv), "found there another tree, not unlike unto our privet, by the Arabs called Alcamia or Henna, and by the Grecians, in their vulgar tongue, Schenna, which they have from Egypt, where, but above all in Cyre, they grow in abundance. The Turks and Moors nurse these up with great care and diligence because of their sweet-smelling flowers. They also, as I am informed, keep their leaves all winter, which leaves they powder and mix with the juice of citrons, and stain therewith against great holidays the hair and nails of their children of a red color, which color may perhaps be seen with us on the manes and tails of Turkish horses" (see also Belon, ii, 74). The variety called Loxoeia ginoso is larger than the other, growing to a height of from four to six feet; its flowers are less abundant and less fragrant, but have a more powerfully coloring property. In appearance both plants resemble myrtle; the flowers (which grow in clusters) are small and beautifully white, and exude an agreeable odor. The women take great pleasure in them. They hold them in their hand, carry them in their bosom, and keep them in their apartments to perfume the air (comp. Cant. i, 18). To prepare the leaves for the use to which the plant is so generally applied by the women of Egypt, they are gathered about the commencement of spring, and, having been exposed to the air till thoroughly dry, are reduced to
powder, which being afterward made into a paste, is then fit for use. This paste requires about five hours to dry upon whatever part it may be laid, and the red tinge it imparts is durable. It was anciently applied to the nails of the hands and feet, to the soles of the feet and the palms of the hands, and sometimes to the hair. Brides in Persia are still thus ornamented on the night before marriage (Sir Wm. Ouseley's *Travels in Persia*, iii, 565). From the appearance of the nails of mummies, there can be no doubt that it was used in the same manner by the Egyptians as it is by their descendants in the present day. The expression rendered in Deut. xxii, 12, in directing the treatment of a female captive, "pare her nails," is supposed to mean "adorn her nails," and would imply the antiquity of this practice, although others are of opinion that the marginal reading, "suffer to grow," is the more correct sense in the act of mourning. See Paint.

*Camphuysen*, Theodore Raphael, a Dutch theologian, was born in 1586 at Gorkum. He was first a landscape painter, and rose to eminence in his art. Afterward, having devoted himself to theological studies, he became one of the leaders of the Socinians. He was expelled from his parish, Vleuten, and died at Doccum in 1627. He published *Theologische Werke* (Amst. 1657, 8vo; 1672, 4to), and a rhymed translation of the Psalms in Dutch, 1680. A biography of Camphuysen was published by Kropman (Amsterdam, 1804).—Hoefer, *Biog. Générale*, viii, 389.

*Campian*, Edmund, an English apostate and Jesuit, was born in London in 1540, and was educated at Christ's Hospital. He took his degrees at Oxford, where he made an oration before Queen Elizabeth on her visit to that University. Afterward he passed over into Ireland, and about 1571 proceeded to Douai, where he openly renounced the Reformed faith. He went to Rome, and was admitted a Jesuit in 1578. He was sent by Gregory XIII., along with the Jesuit Parsons, into England, in June, 1586. Here he performed all the duties of a zealous provincial, and diligently propagated his opinions. In 1588 he printed *Rationes 10 oblati certaminis in causæ fidei redirese Academiae Anglicae*. It was afterward printed in English, and ably refuted by Whitaker. His activity at length drew upon him the attention of Walsingham, the Sec.-

retary of State, and he was arrested, carried to the Tower, and put cruelly to the torture, which he bore courageously. On the 1st of December, 1581, he, together with several other Romish priests, was hanged at Tyburn on the charge of high treason. Other works of Campan's are *Narratio de Dei Præceptis Divinius*, the general (the Jesuits; Antwerp, 1631); a *History of Ireland* (Dublin, 1638, fol.). A volume of *Orationes, Epistole*, and his treatise *De imitatione Rhetoricae*, were published in one volume at Ingolstadt (1602). His life was written by Paul Bonizzi, a Jesuit (2nd edition, Muen- tis, 1620, 8vo).—Hume, *History of England*, ch. xii; Hook, *Ecc. Biog.*, iii, 428.

Campian Manuscript (Codex Camplausen, so called from the Abbé des Camps, who presented it to Louis XIV in 1707), a beautiful little Greek MS. of the four Gospels in very neat uncial letters, supposed to belong to the ninth or tenth century. It was used by Wetstein, re-examined by Scholz, copied by Tischendorf, and collated by Tragelius. It contains many good readings. Besides the indications of sections in the margin, there are also scholia, some of them in the most minute writing. Besides accents and breathings, the words are marked with a musical notation. The MS. is now in the Imperial Library at Paris (where it is MS. No. 49), and is a place called the Gospels.—Scrivener, *Introduct. to N. T.* p. 110. See Manuscripts, Biblical.
remained several days, dwelling in tents. It was a wonderful occasion. Sectarian divisions seemed to have been forgotten in the general concern for the prevalence of spiritual religion. The services were conducted by Rev. Lorenzo Dow and Rev. Henry Beecher. The result was unparalleled, and suggested another meeting of the kind, which was held on the Muddy River; and still another, on what was called the Ridge, both of which were attended by immense throngs. By a prudent estimate, it was reckoned that one hundred settlers were present at the last mentioned meeting.

From this unprecedented beginning these meetings were extended, increasing in power and usefulness, under the special direction of Presbyterians and Methodists. Because of this union of sects in their support, they were called 'general camp-meetings.' It is said that the roads leading to the grove where they were held were literally crowded, and that entire neighborhoods were forsaken of their inhabitants. A Presbyterian minister calculated that there were at least twenty thousand persons present at one meeting held in Kentucky. At length, however, the Presbyterians gradually retired from the field; but the Methodists, with a large part of the country, till they became general in the connection. With more or less efficacy, they have been continued to the present time, not, however, without opposition on the part of some, and misgivings with many others in regard to their expediency' (Essay on Camp-meetings, p. 7-11).

The camp-meetings were introduced into England by Rev. Lorenzo Dow (q. v.), an earnest Methodist preacher, who, after laboring for some time in England as an independent itinerant, and finding, in 1807, a general religious interest in Staffordshire, suggested to the people the plan of camp-meetings. The people immediately adopted it. A flag was hoisted on Mow Hill; the population gathered to it from all the surrounding regions, and the first English camp-meeting was held. William Clowes and Hugh Bourne, who were among the most zealous and useful laymen in the revivals of that period, took an active part in the first meetings. Bourne vindicated them in a pamphlet, which called forth counter publications from the preachers of Burleson and Macclesfield circuits. As it was alleged that many excesses attended such outdoor services, the Wesleyan Conference, in 1807, declared, "It is our judgment that, even supposing such meetings to be allowable in America, they are highly improper and dangerous in this country, where the inhabitants are so much older—the fountains which the water for the miracle was brought (Malin, iii, 443-446). The Christians of the village are entirely of the Greek Church. The "water-pots of stone" were shown to M. Lamartine, though at Willibald's visit, centuries before, there had been but one remaining (Early Trav. p. 16). In the time of the Crusades the six jars were brought to France, where one of them is said still to exist in the Musée d'Angers (see M. Dideron's Essay in the Annales Archéologiques, xi, 5; xiii, 9). There is also shown a house said to be that of Nathaniel. Kebr Kenna has been visited and described by many travellers in Palestine. The tradition identifying this village with the city of Samaria, or the city of the Considerable mischief, and we disclaim connection with them." Their advocates, however, continued to hold them. Hugh Bourne, who aroused the people of Lancashire, Cheshire, and Staffordshire with his exhortations and prayers, was expelled in 1808 from the connection by the Burlem Quarterly Meeting; and, two years later, Clowes, who continued to attend the camp-meetings, was also expelled. Clowes commenced a course of home-missionary labors, giving up his business for the purpose. In 1810 the 'Primitive Methodist' denomination was organized, which sanctioned the habit of preaching in camp-meetings, as well as in other places. In 1849 the Rev. C. R. Merri- 

**CANA**

**Cana (Kāvā)**, a town in Galilee, not far from Ca- pernaun, and on higher ground; it is memorable as the scene of Christ's first miracle (John ii, 1-11; iv, 46), as well as of a subsequent one (iv, 54-56), and also as the native place of the apostle Nathanael (xxi, 2).

This Cana is not named in the Old Testament, but is mentioned by Josephus as a village of Galilee (Lif. § 16, 64; War, i, 17, 5). The site has usually been identified with the present Kebr Kenna, a small place about four miles north-east from Nazareth, on one of the roads to Tiberias. It is a low village, well situated on the descent of a hill looking to the south-west, and surrounded by plantations of olive and other fruit-trees. There is a large spring in the neighborhood, enclosed by a wall, which, if this be the Cana of the New Testament, is doubtless that from which water was drawn at the time of our Lord's visit. It is also observable that water-pots of compact lime pith are still used in this neighborhood, and some old ones are, as might be expected, shown as those which once contained the miraculous wine. Here are also the remains of a Greek church, said to stand over the house in which the miracle was performed, and—doubtless much older—the fountain which the water for the miracle was brought (Malin, iii, 443-446). The Christians of the village are entirely of the Greek Church. The "water-pots of stone" were shown to M. Lamartine, though at Willibald's visit, centuries before, there had been but one remaining (Early Trav. p. 16). In the time of the Crusades the six jars were brought to France, where one of them is said still to exist in the Musée d'Angers (see M. Dideron's Essay in the Annales Archéologiques, xi, 5; xiii, 9). It was once a considerable village of well-built houses, now deserted. Many of the dwellings are in ruins. There are also several arches belonging to modern houses, but we could discover no traces of antiquity" (Later Bib. Researches, p. 108).

The Old Testament mentions two other places by the same name: (1) in the boundary between Manasseh and Ephraim (Josh. xvi. 8; xvii. 9, 10), the other in the tribe of Asher (Josh. xix. 28). The Syriac has Katna for the Cana of the Gospels; and this comes somewhat with the Irath-kastin (q. v.) on the border of Zebulon (Josh. xix. 18), which appears to have occupied the site of the present Keif Kenna. Whether the Galilean village Kesos (Strabo, vi. 7. 3; Pliny, H. N. vii. 7. 18) is the same with Cana of Galilee is uncertain (comp. Otho, Lect. Rabb. p. 115).

There are treatises on various points connected with Christ's first miracle at Cana, in Latin, by Brendel (Isenb.1785), Bashaysen (Serv.1785, Georgius (Viteb.1744), Hebenstreit (Jen.1698), Hoheisel (Gedan.1792), Mayer (Gryph.1708), Oeder (Onold.1721), Sommel (Loud.1770), Vehring (Breit.1809), Vechner (Helm.1840); and in Quellen von Plat (in Steinkind's Magaz. iv. 73 sqq.; Britten (in Bibl. Stud. i. Berl.1867).

Canaan (Heb. Canaan, perhaps low; and N.T. Xarnov; Josephus Xaravoy, the name of a man of a country people by his descendants.

1. The fourth son of Ham, and grandson of Noah (Gen. x. 6; 1 Chron. i. 8; comp. Josephus, Ant. i. 6. 4). B.C. post 2613. The transgression of his father Ham (Gen. ix. 22-27), to which some suppose Canaan to have been subject in some way a party, gave occasion to Noah to pronounce that doom on the descendants of Canaan which was, perhaps, at that moment made known to him by one of those extra-temporal inspirations with which the patriarchal fathers appear in other instances to have been favored. See BLESSING. There is no just ground for the conclusion that the descendants of Canaan were an immediate consequence of the transgression of Ham, is shown by Professor Bush, who, in his Notes on Genesis, has fairly met the difficulties of the subject. See HAM.

The posterity of Canaan was numerous. His eldest son Zidon, founded the city of the same name, and was father of the Sidonians and Canaanites. Canaan had ten other sons, who were fathers of as many tribes, dwelling in Palestine and Syria (Gen. x. 15-19; 1 Chron. i. 18). It is believed that Canaan lived and died in Palestine, which from him was called the land of Canaan. See CANAANITE.

The name Canaan is sometimes employed for the country itself—more generally styled the "land of Cana." It is so in Zeph. ii. 5; and we also find "Language of C." (Isa. xix. 18); " Wars of C." (Judg. iii. 1); "Inhabitants of C." (Exod. xv. 15); "King of C." (Judg. iv. 23, 24; 18. 5); "Daughters of C." (Gen. xviii. 8; xxvi. 2); " Kings of C." (P. C. cxxxiv. 11). In the above, the word occurs in several passages where it is concealed in the Auth. Vers. by being translated. These are, Isa. xxiii. 8; "traffickers," and xxiii. 11, "the merchant city;" Hos. xii. 2, "He is a merchant;" Zeph. l, 11; "merchant-people." See COMMERCE.

LAND OF CANAAN (1722) 7x7, according to some, from its being low; see 2 Chron. xxvii. 19; Job xli. 12, among other passages in which the phrase is used. A name denoting the country west of the Jordan and Dead Sea (Gen. xiii. 12; Deut. vi. 20), and between those waters and the Mediterranean; especially opposed to the "land of Gilead"—that is, the h. b. table-land on the east of the Jordan (Num. xxxii. 26, 32; xxxiii. 51; Jos. xii. 32; see also Gen. xii. 5; xiii. 2, 19; xxxi. 18, 18; xxxii. 18; xxxvi. 6; xxxiv. 1; xlvi. 4; xlix. 80; Num. xiii. 2, 17; xxxiii. 40, 51; Josh. xvi. 12; Judg. xxi. 12). True, the district to which the name of "low land" is thus applied contained many very elevated spots: Shechem (Gen. xxxiii. 18), Hebron (xxiii. 19), Bethel (xxxvi. 6), Bethlehem (xxvii. 7), Shiloh (Josh. xxii. 1; Judg. xxi. 12), which are all stated in the "land of low land" as high as the level of much of the country west of the Jordan undoubtedly is, there are several things which must always have prevented it from leaving a marked impression of general elevation. These are, (1), that remarkable, wide, maritimes plain over which the eye ranges for miles, was from the earliest history the future of the country which cannot be overlooked by the most casual observer, and which impresses itself most indelibly on the recollection; (2), the still deeper and more remarkable and impressive hollow of the Jordan valley, a view into which may be commanded from almost any of the heights of Central Palestine; and, (3), there is the almost constant presence of the long high line of the mountains east of the Jordan, which, from their distance, have the effect more of an enormous cliff than of a mountain range—looking down on the more broken and isolated hills of Canaan, and furnishing a constant standard of height before which everything else is dwarfed. These considerations are based upon the supposition that the name was derived from the natural features of the country. But this is not conteneated by Scripture. Canaan was the son of Ham. He and his whole family colonized Western Syria, and while the whole region took his name, different sections of it were called after his son. (Gen. x. 15-20). Aram was a son of Shem, and his descendants colonized the country of Aram (Gen. x. 21-31). On the other hand, Aram cannot, at least absolutely, be termed a "highland region." It comprised the vast plains along the banks of the Euphrates, and westward to the Orontes and Anti-Libanus. Canaan, on the whole, however, is rather a hilly country with strips of plain along the coast. In one passage it is distinguished from the low valley of the Jordan (Gen. xiii. 12). In short, the terms Aram and Canaan, if bestowed with any reference to the comparative elevation of the respective countries, have a merely relative significance; the last lying under the sea-coast, while the former—especially that part of it where the Hebrew patriarchs originated—is situated toward the interior head-waters of the great river Euphrates. See ARAM.

The extent and boundaries of Canaan are given with tolerable expressiveness in the Bible text (Deut. xiii. 1-17), the sea was its northern border from Sidon to Gaza (Gen. x. 19). On the south it was bounded by a line running from Gaza to the southern end of the Dead Sea, including the Judean hills, but excluding the country of the Amalekites (Gen. x. 19; Num. xxxi. 29). The Jordan was the eastern boundary; no part of Canaan lay beyond that river (Num. xxxii. 51; Exod. xvi. 66, with Josh. x. 12; xii. 11. See Reland, Palest. p. 8 sqq.). On the north, Canaan extended as far as Hamath, which was also the utmost boundary of the "land of promise" (Gen. xvii. 8; Num. xxxiv. 8). The coast from Sidon northward to Arvad, and the ridge of Lata, were inhabited by Greeks, though they do not appear to have been included in Canaan proper (Gen. x. 15-19. See Bochart, Opp. i. 308 sqq.; Reland, Palest. p. 8 sq.). For geographical and other details, see PALESTINE.

The word "Canaan," in a few instances, e.g., Zeph. v. 5; xxvi. 15; Exod. xvi. 22, applied to the maritime plains of Phoenician and Phenicia (comp. Mark vii. 26; and see Gesenius on Isa. xxiii. 11). In the same manner, by the Greeks, the name Χαναάν was used for Phenicia, i.e., the sea-side plain north of the "Tyrian ladder" (see the extract in Reland, Palest. p. 7, and Gesenius, Theor. p. 986), and by the later Phenicians, both of Phenicia proper and of the Punic col-
The same occurs in this sense on the Egyptian mon-
ments as well as on Phoenician coins (Eckhel, Doct.
Ves. iv. 409), and was not even known to the Car-
The Sept. in two cases, in like manner, renders the
Hebrew by χωρα των Φωνεων (Exod. xvi, 35; Josh.
v, 12; comp. v, 1), as they do "Canaanites" by Φωνεως. Again, in Num. xii, 9, "The Hittites
and the Jebusites, and the Amorites dwell in the
mountains; and the Canaanites dwelt by the sea, and by
the coast of the Jordan." In 2 Sam. xxiv, 7, the Ca-
nanites are distinguished from the Hivites, though
the latter were descended from Canaan; and in sev-
eral passages the Canaanites are mentioned with the
Hittites, Amorites, Jebusites, etc., as if they consti-
tuted a special portion of the population (Exod. iii, 8;
Deut. vii, 1; Josh. iii, 10). The most probable ex-
planation of these limited applications of the name is,
that while some of the tribes which inhabited Syria
retained for their territories the name of their common
ancestor Canaan, others preferred taking, as a dis-
tinctive appellation, the name of some subsequent head
or chief of the tribe. The very same practice prevails
to this day among the great tribes of Arabia. See
Canaanite.

CANAAN, LANGUAGE OF (𝒜网投, lip of Ca-
naan), occurs Isa. xix, 18, where it undoubtedly
designates the language spoken by the Jews dwelling
in Palestine. That the language spoken by the Canaan-
ites was substantially identical with Hebrew appears,
1. From the fact that the proper names of Canaanitish
persons and places are Hebrew, and can be accounted
for etymologically from the Hebrew as readily as He-
brew proper names themselves (thus we have Abim-
el, Kirjath-Sapher, etc.); 2. Close as was the in-
tercourse of the Hebrews with the Canaanites, there
is no hint of their needing any interpreter to mediate
between them, which renders it probable that their
respective languages were so nearly allied to each
other as to be substantially the same; 3. The remains
of the Phoenician language, which was undoubtedly
Canaanitish, bear the closest analogy to the Hebrew,
and are best explained from it, which proves them to
be substantially the same language (Bochart, Geogr.
Syst. ii. col. 689 sq., ed. 1892).

To account for this, some have supposed that the
Canaanites and the Hebrews were of the same original
stock, and that the account in Genesis of their being
descended from different branches of the Noachic
family is a fiction to be put to the account of national big-

dony on the part of the writer. But this is a hypothe-
sis utterly without foundation, and which carries its own
confutation in itself; for, had national bigony directed
the writer, he would have excluded the Edomites, the
Ammonites, the Moabites, from the Semitic family,
as well as the Canaanites; nay, he would hardly have
allowed the Canaanites to claim descent from the right-
nous Noah. The list of the nations in Gen. xi is ac-
cepted by some of the most learned and esteemed
scholars of Germany as a valuable and trustworthy
document (Knobel, Vollkcrsbl. der Genesis, 1850; Ber-
thau, Beitrage, p. 174, 179). See Ethnography.
But if these were different races, how came they
to have the same language? Knobel thinks that the
country was first occupied by a Semitic race, the de-
scentants of Lud, and that the Hamites were immi-
grants who adopted the language of the country into
which they came (p. 204 sq.). On the other hand,
Grotius, Le Clerc, and others, are of opinion that Abra-
ham acquired the language of the country into which
he came, and that Hebrew is consequently a Hamitic
and not a Semitic language (Grotius, Dissert. de lang.
Heb., prefixed to his Commentary; Le Clerc, De Ling.
Heb.; Beke, Origines Biblicæ, p. 20; Winning, Man-
ual of Compars. Philology, p. 215): by some later writ-
ers Abraham's native tongue is supposed to have been
Indo-Germanic or Arian. On the contrary, most
maintain that Abraham retained the use of the pri-
meval language, and brought it with him to Canaan;
contending that, had he borrowed the language of the
country into which he came, the result would have
been a less pure language than the Hebrew, and we
should have found in it traces of idolatrous notions
and usages (Hâvernick, Einl. a. T. p. 183; Pa-
reau, trait. Interpr. p. 25, E. T. i. 27). This last is the
oldest opinion, and there is much to be urged in its
favor. It leaves, however, the close affinity of the
language of Abraham and that of the Canaanites un-
accounted for. The hypothesis that Abraham ac-
quired the language of the Canaanites, and that this
remained in his family, if admissible, would account
not only for the affinity of the Hebrew and Phoenician
tongues, but for the ease with which Abraham and his
son made themselves understood in Egypt, and for the
affinity of the ancient Egyptian and several modern
African languages with the Hebrew. (See Bleek,
Einleitung in a. T. p. 61 sq.; J. G. Müller, in Herzog's
Real-Encyklop. vii. 240 sq.; Kitto, s. v.)

Map of Canaan, with the Aboriginal Nations.
Ca‘nanite (Heb., usually in the sing., and with the art, hek-Kana‘iti, ḫekəna‘ānî, i.e. accurately according to Hebrew usage [Genesius, Heb. Gram. § 107], "the Canaanite;" but in the Auth. Vers., with few exceptions, rendered as plural, and therefore indistinguishable from ḥekəna‘ānî, which also, but unfreq., occurs; Sept. generally ḥapadai; [or ḥapada‘î]; but οἰρίστη, Exod. vi, 2; comp. Josh. vi, 20, 22; Judges, and all proper designation of the descendents of Canaan, the son of Ham and grandson of Noah, inhabitants of the land of Canaan and the adjoining districts. See Canaan.

Component Tribes.—1. These are most frequently enumerated in the formula used in the command and statement of their extermination by the Israelites, which, however, assumes the following different shapes:

(1) Six nations: the Canaanites, Hitites, Amorites, Perizzites, Hivites, and Jebusites. This is the usual form, and, with some variation in the order of the names, it is found in Exod. iii, 8, 17; xxiii, 28; xxiv, 3; Deut. vii, 1; Judges i, 1; Judges xi, 11; Judges xiii, 1; Judges xxi, 4; Judges xi, 8; Judges xii, 5. In Exod. xxxii, 5, the same names are given with the omission of the Perizzites.

(2) With the addition of the Gergashites, making up the mystic number seven (Deut. vii, 1; Josh. xi, 20; xxiv, 11). The Gergashites are retained and the Perizzites omitted in Ex. ii, 8 (comp. Ezek. ix, 1).

(3) In Exod. xxxii, 26, we find the Canaanite, the Hitite, and the Hivite.

(4) The list of ten nations in Gen. xv, 18-21 (where the Kenites, the Kenizzites, and the Kadmonites are added), includes some on the east of Jordan, and probably some on the south of Palestine.

2. Besides these there were several tribes of the Canaanites who lived beyond the borders of the Promised Land northward. These were the Arkites, Sinites, Arvadites, Zemarites, and Hamathites (Gen. x, 17, 18), with whom, of course, the Israelites had no concern. There were also other tribes of Canaanitish origin (or possibly other names given to some of those already mentioned), who were dispossessed by the Israelites. The chief of these were the Amalekites, the Anakites, and the Rephaim (or "giants," as they are frequently mentioned in our translation). See each of these, as well as the foregoing, in their alphabetical place.

Geographical Distribution. — In this respect the term "Canaanite" is used in two senses, a limited and a wide application.

1. For the tribe of "the Canaanites" only — the dwellers in the lowland, i. e. "who dwell by the sea and by the coasts of Jordan" (Num. xxii, 29). The whole of the country west of Jordan might, as we have seen, be in some sense called a "lowland" as compared with the loftier and more extended tracts on the east; but there was a part of this western country which was naturally a "lowland," and this is in our translation. (a.) There were the plains lying between the shore of the Mediterranean and the foot of the hills of Benjamin, Judah, and Ephraim — the Shephelah, or plain of Philistia, on the south; that of Sharon, between Jaffa and Carmel; the great plain of Edraelon, in the rear of the bay of Akko; and, lastly, the plain of Phoenicia, containing Tyre and Sidon, and all the other nations of that section. (b.) But separated entirely from these was the still lower region of the Jordan valley, or Arabah (q. v.), the modern Ghēr, a region which extended in length from the sea of Cinneroth (Gennearet) to the south of the Dead Sea about 120 miles, with a width of from 2 to 3 leagues. Nine of these regions, especially of the valley of the Jordan, is so peculiar, that it is natural to find them the special possession of one tribe. "Amalek" — so runs one of the earliest and most precise statements in the ancient records of Scripture — "Amalek dwells in the land of the south; and the Hittite, and the Jebusite, and the Amorite dwell in the mountains; and the Canaanite dwells by the sea, and by the side of Jordan" (Num. xxiii, 29). This describes the division of the country a few years only before the conquest. But there had been little or no variation for centuries. In the notice which purports to be the earliest of all, the seats of the Canaanite tribe — as distinguished from the sister tribes of Zidon, the Hittites, Amorites, and the other descendents of Canaan, as on the sea-shore from Zidon to Gaza, and in the Jordan valley to Sodom, Gomorrah, and Lasha (afterward Callirrhoe), on the shore of the present Dead Sea (Gen. x, 18-20). In Josh. xi, 3, at a time when the Israelites were actually in the western country, this is expressed more broadly. "The Canaanite on the east and the west" is carefully distinguished from the Amorite who held "the mountain" in the centre of the country. In Josh. xiii, 2, 3, we are told with more detail that "all the circles (יווּדְּלִיוּנָיו) of the Philistines from Sihor (the Wady al-Arial) unto Ekron northward, is counted to the Canaanite." Later still, the Canaanites are still dwelling in the upper part of the Jordan valley — Bethshean; the plain of Edraelon — Taanach, Ibleam, and Megiddo; the plain of Sharon — Dor; and also on the plain of Edraelon, Arauco and Zidon. Thus the Israelites selected the chariots which formed a prominent part of their armies (Judges i, 19; iv, 3; Judges xvii, 16), and which could indeed be driven nowhere but in these level low-lands (Stanley, Sinai and Palestine, p. 184).

The plains which thus appear to have been in possession of the Canaanites, especially south of the Jordan, not only of great extent; they were also the richest and most important parts of the country, and it is not unlikely that this was one of the reasons why —

2. The name "Canaanite" is also applied as a general name for the non-Israelite inhabitants of the land, as we have already seen was the case with "Canaan." Instances of this are Gen. xii, 6; Num. xxi, 5, where the name is applied to dwellers in the south, who in xiii, 29, are called Amalekites; Judges i, 10, with which comp. Gen. xiv, 13, and xiii, 18, and Josh. x, 5, where Hebron, the highest land in Palestine, is stated to be Amorite; and Gen. xii, 12, where the "land of Canaan" is distinguished from the very Jordan valley itself. See also Num. xxv, 2, 3, 37; Josh. xi, 22; Judges xiii, 11; comp. 5. But in many of its occurrences it is difficult to know in which category to place the word. Thus, in Gen. i, 11: if the floor of Atad was at Bethoglia, close to the west side of the Jordan, "the Canaanites must be intended in the narrower and stricter sense; but the expression "inhabitants of the land" appears as if intended to be more general. Again, in Gen. x, 18, 19, where some believe the tribe to be intended, Gesenius takes it to apply to the whole of the Canaanite nations. But in these and other similar instances, allowance must surely be made for the different dates at which the various records that compared were composed, and, besides this, it is often necessary to estimate how accurately a knowledge the Israelites may have possessed of a set of petty nations, from whom they had been entirely removed for four hundred years, and with whom they were now again brought into contact only that they might exterminate them as soon as possible. In answering such questions, we ought also to know more than we do of the usages and circumstances of people who differed not only from ourselves, but also possibly in a material degree from the Orientals of the present day. The tribe who possessed the ancient city of Hebron, before its destruction, as shown above, could not unreasonably call themselves "Canaanites," for there are a third period (Gen. xxxii) called the children of Heth, or Hittites (comp. also xxvii, 46, with xxvii, 1, 6). The Canaanites
who were dwelling in the land of the south when the Israelites made their attack on it may have been driven to these higher and more barren grounds by some other tribes, possibly by the Philistines, who displaced the Jebusites, also dwellers in the low country (Deut. ii. 23). See Kurz, Hist. of the Old Covenant, vol. i, § 45.

III. History of the Canaanitish Race.—The Israelites were delivered from Egypt under Moses, in order that they might take possession of the land which God had promised to their fathers. This country was then inhabited by the descendants of Canaan, as described above. These nations, and especially the six or seven so frequently mentioned by name, the Israelites were commanded to dispossess and utterly to destroy (Exod. xxiii, 23; Num. xxxviii, 65; Deut. xx, 16, 17). The destruction, however, was not to be accomplished at once. The promise on the part of God was that he would "put out those nations by little and little," and the command to the Israelites corresponded with it; the reason given being "lest the beasts of the field increase upon thee" (Exod. xxiii, 29; Deut. vii, 22).

The destructive war commenced with an attack on the Amorites, one of the Canaanites, which was issued in the destruction of several cities in the extreme south of Palestine, to which the name of Hormah was given (Num. xxxi, 1-8). The Israelites, however, did not follow up this victory, which was simply the consequence of an unprovoked assault on them; but, having crossed the land of Edom, they attempted to pass through the country on the other side of the Jordan, inhabited by a tribe of the Amorites. Their passage being refused, and an attack made on them by Sihon, king of the Amorites, they not only forced their way through his land, but destroyed its inhabitants, and, proceeding onward toward the adjoining kingdom of Bashan, they in like manner destroyed the inhabitants of that district, and slew Og, their king, who was the last of the Rephaim, or giants (Deut. iii, 11). The tract of which they thus became possessed was subsequently allotted to the tribes of Reuben and Gad, and the half tribe of Manasseh. See EXODO.

After the death of Moses, the Israelites crossed the Jordan, and, under the conduct of Joshua, took possession of the greater part of the Promised Land, and destroyed its inhabitants. Several cities, however, still held out, particularly Jericho, afterward Jerusalem, which was taken by the king of the country (2 Sam. v, 6), and Sidon, which seems never to have yielded to the tribe of Asher, to whom it was nominally allotted (Judg. i, 31). Scattered portions also of the Canaanitish nations escaped, and were frequently strong enough to harass, though not to dispossess, the Israelites. The inhabitants of Gilson, a tribe of the Hivites, made peace by stratagem, and thus escaped the destruction of their fellow-countriesmen. Individuals from among the Canaanites seem, in later times, to have united themselves, in some way, to the Israelites, and not only to have lived in peace, but to have held a higher rank in the state of power; thus Uriah, one of David's captains, was a Hittite (1 Chron. xi, 41). In the time of Solomon, when the kingdom had attained its highest glory and greatest power, all the remnants of these nations were made tributary, and bond-service was exacted from them (1 Kings ix, 20). The Girgasites seem to have been either Canaanites or Philistines, but not of either tribe. We find no mention of them subsequent to the book of Joshua; and the opinion that the Gergesenes, or Gadarenes, in the time of our Lord, were their descendants, has little evidence, except the similarity of names, to support it (Rosenmüller, Scholia in Gen. xi. 14; Reland, Palæstina). See T. G. The Anakites were completely destroyed by Joshua except in three cities, Gaza, Gath, and Ashdod (Josh. xi, 21-23); and the powerful nation of the Armeleites, many times de-

fested and continually harassing the Israelites, were at last totally destroyed by the tribe of Simeon (1 Chron. iv, 45). Even after the return of the Jews from the Babylonian captivity there were survivors of five of the Canaanitish nations, with whom alliances had been made by the Jews, contrary to the commands which had been given them. Some of the Canaanites, according to ancient tradition (see D’Herbelot, Bibloth. Orient, s. v. Falastin), left the land of Canaan on the approach of Joshua, and emigrated to the coast of Africa (to Armenia, according to Bitter, Erzik, vii. 585). Procopius (De Bello Vandalico, ii, 10) relates that there were in Numidia, at Timgad (Tinqua), two columns, on which were inscribed, in Phoenician characters, "We are those who fled from the face of Joshua, the robber, the son of Naue." (See Bochart, Phalæg., i, 24; Michaelis, Laws of Moses, art. 81, vol. i. p. 176; Smith’s trans;; Bachiene, i, ii, i sq.; Michaelis, Spicileg. i, 166 sq.; Hamelaveld, iii, 81 sq.) See PHOENICIA.

IV. Characteristics. — Beyond their chariots (see above) we have no clue to any manners or customs of the Canaanites. Like the Phoenicians, they were probably given to commerce, and thus the name doubtless became in later times an occasional synon-ym for a merchant (Job xii, 6; Prov. xxx, 27). See comp. Isa. xxxiii, 8, 11; Hos. xii, 2; Zeph. i, 11. See Kenrick, Phænicia, p. 232.) Under the name Kanvs they appear on the Egyptian monuments, distinguished by a coat of mail and helmet, and the use of spears, javelins, and a battle-axe similar to that of Egypt (Wilkinson, i, 405, abridgm.).

Of the language of the Canaanites little can be said. On the one hand, being—if the genealogy of Gen. x be rightly understood—Hamite, there could be no af-finity between their language and that of the Israelites who were descendants of Shem. On the other is the fact that Abram and Jacob, shortly after their entrance into the Promised Land, held converse with them, and also that the names of Canaanite persons and places which we possess are translatable into Hebrew. Such are Melchizedek, Hamor, Shechem, Sisera, Eph-rah, and also a great number of the names of places. (For an examination of this interesting but obscure subject, see Gesenius, Hebr. Spr. p. 229-253.) See CANAAN, LANGUAGE OF.

The "Nethinim," or servants of the Temple, seem to have originated in the dedication of captives taken in war from the petty states surrounding the Israelites. See NETHINIM. If this was the case, and if they were maintained in number from similar sources, there must be many non-Israelite names in the lists of their families which we possess in Ezra li, 43-54; Neh. vii, 45-56. Several of the names in these cata-logs, such as Sisera, Mehumim, Nephushim, are the same as those which we know to be foreign, and doubt-less others would be found on examination. The Gil-sonites especially were non-Canaanites, who, although reduced to a state of servitude, were allowed to exist among the Israelites. See GIBERONITE.

V. Conquest of Canaan.—The arbitrary and forcible invasion of the land of Canaan by the Israelites, the violent and absolute dispossession of its inhabit-ants by them, and the appropriation of their property —above all, the avowed purpose and actual warfare of utter extermination on their part respecting those who had never misused them, against whom they
inflicted on the Israelites. To all these and similar attempts to justify, on the ground of legal right, the forcible occupation of the land by the Israelites, and the extermination (at least to a great extent) of the existing community, there is another and more important reason as any of these is hinted at in the sacred record. The right to carry on a war of extermination is there rested simply on the divine command to do so. That the Israelites were instruments in God's hand is a lesson not only continually impressed on their minds by the teachers of the Bible, but is felt whenever they relied on their own strength. That there may have been grounds of justification, on the plea of human or legal right, ought not, indeed, to be denied; but it is, we imagine, quite clear, from the numerous attempts to find what these grounds were, that they are not stated in the Old Testament; and to seek for them as though they were necessary to the justification of the Israelites, seems to be an abandonment of the high ground on which alone their justification can be safely rested—the express command of God.

It may be said that this is only shifting the difficulty, and that it is just in proportion as we exculpate the Israelites from the charges of robbery and murder, in their making war without legal ground, we lower the character of the Being whose commands they obeyed, and throw doubt on those commands being really given by God. This has indeed been a favorite objection of Israelitish apologists; but it is not simply to say that the people were sojourners while in progress, or passed over as unavoidably after their occurrence, but positively, repeatedly, and strictly enjoined, with all their essential features of so-called atrocity or injustice, by special divine command, accompanied by the most awful sanctions direct from heaven itself. The question properly reduces to two somewhat distinct points: 1. The right of the Israelites to the territory itself; and, 2. The morality of warfare in which no quarter was to be given, and no property of the enemy to be spared; the consideration of these, however, is so connected, both in the similarity of the objections and the common ground of vindication, that we may most conveniently treat them together.

"Many have asserted, in order to alleviate the difficulty, that an allotment of the world was made by Noah to his three sons, and that by this allotment the Land of Promise fell to the share of Shem; that the descendants of Shem, either invaders and interlopers, and that, on this ground, the Israelites, as the descendants of Shem, had the right to possess them. This explanation is as old as Epiphanianus, who thus answered the objection of the Manicheans. Others justify the war on the ground that the Canaanites were the first aggressors—a justification which applies only to the territory on the other side of the Jordan. Michaelis, to whom we refer for a lengthened investigation of the subject (Laws of Moses, § 29, vol. i, p. 111-179, Smith's transl.), dissatisfied with these and other attempted apologies, asserts that the Israelites had a right to the land of Canaan as the Israelites in justification of his exterminating war, by all who have the power to persecute. As to the first of these objections, it must be remembered that the conduct of the war was never put into the hands of the Israelites; that they were continually reminded that it was for the wickedness of those nations that they were driven out; and, above all, that they themselves would be exposed to similar punishment if they were seduced into idolatry, an evil to which they were especially prone. As to the example, it can apply to no case where there is not an equally clear expression of God's will. A person without such a commission has no more right to plead the example of the Israelites in justification of his exterminating war than those who imagine to be God's enemies, than to plead the example of Moses in justification of his promulgating a new law purporting to come from God. In a word, the justification of the Israelites, as it appears to us, is to be sought in this alone, that they were clearly enjoined by the Lord to carry on this work of judgment, thus at once giving public testimony to, and receiving an awful impression of His power and authority, so as in some measure to check the outrageous idolatry into which almost the whole world had sunk."

CANDACE

Can'dacōr (Kavédār; Hiller compares the Ethiopic ḫavāč, as ruled, and ṣā, as slaves, as the Ethiopian kings are still in Oriental phrase styled "prince of servants"

[Cimôn, Onom. N. T. p. 88]; but the name itself is written כָּבֶד, cokndakî, in Ethiopic; comp. Ludolf, Hist. Eth. ii. 2, 7), was the name of that queen of the Ethiopians (אֱוָדִית, Oodáit, Aethiopos), whose high treasurer (טֵוָיְקָא, "enunch," i.e. chamberlain) was converted to Christianity under the preaching of Philip the Evangelist (Acts viii, 27), A.D. 80. The country over which she ruled was not, as some writers allege, as is known to us as Abyssinia; it is the region in Upper Canaan (Gen. xlv, 1755); Schubert, De justitia belli in Canaan (Graevius 1767); Hengstenberg, Authenticity of the Pentateuch, i. 387 sq.

CANANITE, or rather CANANITE (Received Text [with the Codex Sinaiticus], ב קְרַיִית; Codex A, Kavāraīnī; Lachm. with B C, ב קְרַיִית; D, Xavāraīnī; H, Chasm. adv. Canaanitum (Brennr. 1755); Schwabert, De justitia belli in Canaan (Graevius 1767); Hengstenberg, Authenticity of the Pentateuch, i. 387 sq.

Cananae, or rather CANANITE (Received Text [with the Codex Sinaiticus], ב קְרַיִית; Codex A, Kavāraīnī; Lachm. with B C, ב קְרַיִית; D, Xavāraīnī; H, Chasm. adv. Canaanitum (Brennr. 1755); Schwabert, De justitia belli in Canaan (Graevius 1767); Hengstenberg, Authenticity of the Pentateuch, i. 387 sq.

Pharaoh crowned Cana-anet, or rather the Chaldæo, or Syrian, Kavāraīnī, by which the Jewish sect or fiction of "the Zealots" was prominent in the latter days of the apostle Simon, otherwise known as "Simon Zelotes." It occurs in Matt. x, 4; Mark iii, 18. This word does not signify a descendant of Canaan, that being in the Greek both of the Sept. and the N. T. Xavāraīnī is כְּנַעֲנָה (comp. Matt. xxv, 22 with Mark vii, 26). Nor does it signify, as has been suggested, a native of Canaan, since that would probably be Kavāraīnī. But it comes from the Heb. קְנַעֲנָה, kānuw, seclusa, or rather from the Chaldæo כְּנַעֲנָה, Kanaanē, or Syrian Kavāraīnī, by which the Jewish sect or fiction of "the Zealots" was prominent in the latter days of the apostle Simon, otherwise known as "Simon Zelotes." It occurs in Matt. x, 4; Mark iii, 18. This word does not signify a descendant of Canaan, that being in the Greek both of the Sept. and the N. T. Xavāraīnī is כְּנַעֲנָה (comp. Matt. xxv, 22 with Mark vii, 26).

Cancelleri (Chancellors, Lay), one of the Inferior classes of servants of the ancient Church and clergy. "The precise nature of their duties is doubtful. Bingham supposes them to have had some such office in the Church as those of the same name in the state, and that they acted as guards of the judge's constabulary. Others suppose them to have been identical with the syngelici or defensores, whose duty it was to watch over the rights of the Church, to act as superintendents of the cypriotes, and to see that all clerics attended the celebration of morning and evening service in the Church."

— Bingham, Hist. Eccles. bk. iii. ch. xi, § 6; Farrar, Eccl. Dict. s. v.

Canceller, a lattice or balustrade; the rail separating the altar from the nave, in ancient churches, was called cancelli. See CHANCEL.

Cancellus, a word occasionally used in the meaning of pulpit. As the size of churches increased, preaching in the chancel became very difficult, and it often happened that the officiating bishop or priestly officers, in order to be in a better position, recollected the people. Hence a custom was introduced of placing a sceptre, or pulpit, from which the preacher delivered the sermon, in front of the partition which divided the chancel from the nave. It was therefore called, in consequence of its position, cancelli. — Farrar, Eccl. Dict. s. v.
the fourth century, says that in his day the queens of Ethiopia continued to be called Candace (Hist. Eccl. ii, 1, 10). A curious confirmation of the fact of female sovereignty having prevailed in Ethiopia has been remarked on the existing monuments of the country.

Thus, on the largest sepulchral pyramid near Assour, the ancient Meroe (see Cailliaud, plate xlvii), a female warrior, with the royal ensign on her head, drags forward a number of captives as offerings to the gods; on another compartment she is in a warlike habit, about to destroy the same group. Heren, after describing the monuments at Naga, or Naka, southeast of Shendy, says, "It is evident that these representations possess many peculiarities, and that they are not pure Egyptian. The most remarkable difference appears in the persons offering. The queens appear with the kinnis; and not merely as presenting offerings, but as heroines and conquers. Nothing of this kind has yet been discovered on the Egyptian reliefs, either in Egypt or Nubia. It may therefore with certainty be concluded that they are subjects peculiar to Ethiopia. Among the Ethiopians, says Strabo (p. 1177), the women also are armed. Herodotus (i, 100) mentions a Nitocris among the ancient queens of Ethiopia. Upon the relief [on the monument at Kalabsha] representing the conquest of Ethiopia by Sesostris, there is a queen, with her son, who appears before him as a captive" (Herren, On the Nations of Africa, ii, 359). The name Candace, or Kandakai, appears on the Egyptian mon-

CANDACE 68 CANDLE

ments on a royal cartouche, followed by the determinative sign for a woman. It is singular enough, that when Bruce was at Shendy, the government of the district was in the hands of a female called Sitina, i.e. the lady or mistress. He says, "There is a tradition there that a woman, whose name was Henda-qua, once governed all that country, whence we might imagine that this was part of the kingdom of Candace; for, writing this name in Greek letters, it will come to be no other than Hendaquaq, the native or mistress of Chendi or Chandj." (Travels to discover the Source of the Nile, iv, 529; comp. i, 505). It is true that, the name Kandas being foreign to the Jews, it is in vain to seek with Calmet for its etymology in Hebrew, but the conjectural derivation proposed by Bruce is wholly inadmissible; nor is the attempt (see above) of Hilfer to trace its meaning in the Ethiopic language much more satisfactory. De Dieu asserts, on the authority of ecclesiastical tradition, that the proper name of the queen mentioned in the Acts was Lasona, and that of her chamberlain Judek. It is not unlikely that some form of Judaism was at this period professed to a certain extent in Ethiopia, as well as in the neighboring country of Abyssinia. Ireneus (iii, 12) and Eusebius (Hist. Eccl. ii, 1) ascribe to Candace's minister her own conversion to Christianity, and the promulgation of the Gospel throughout her kingdom; and with this agrees the Abyssinian tradition that he was likewise the apostle of Tigre, that part of Abyssinia which lay nearest to Meroe; it is added that he afterward preached the Gospel in Arabia Felix, and also in the island of Ceylon, where he suffered martyrdom. (See Tillemont, Mem. Hist. Eccl. tom. ii.; Bannage, Excerpts anti-Baron. p. 118; Ludolf, Comment. ad Hist. Ethip. p. 89; Wolf, Caro, ii, 110; American Prob. Review, April, 1865.) See ETHIOPIAN EUNUCH.

Candidus, an Arian writer, who flourished about 384, and is the author of a book addressed to Marius Victorinus, de Generatione Divini, which, together with the answer of Victorinus, is extant. It will be found in Ziegler's Commentary on Genesis (Bazile, 1648, fol.). A fragment of an epistle of Candidus to Victorinus is preserved by Mabillon, Analecta, iv, 155.—Cave, Hist. Lit., Annae 864; Laden, Eccl. Dict. n. v.

Candle, "a, a lamp, as elsewhere rendered; λόγχα, a light, as elsewhere.

I. Houses in the East were, from the earliest times, lighted up with lamps, and those of the Hebrews probably resembled such as we find depicted in the tombs at Thebes. Job, describing the destruction of a family among the Arabs, and the rendering one of their habitations desolate, says, "The light shall be dark in his tabernacle, and his candle shall be put out with him" (xxvii, 6; xxxi, 17). On the other hand, when God promises to give David a lamp always in Jerusalem, it is an assurance that his house should never become desolate. In the language of Jeremiah, to extinguish the light in an apartment is a convertible phrase for total destruction (Job xxv, 10). A burning lamp is, on the other hand, a symbol of prosperity (Job xxix, 3). Mallet, in his Lettres d'Egypte, says, "The houses in Egypt are never without lights; they burn lamps all the night long, and in every occupied apartment. No request of a comfort of a family, not reckoned, that the poorest people would rather retrace a part of their food than neglect it." Roberts, in Illustration of the passage, "I will search Jerusalem with candles" (Zeph. i, 12), remarks, "Does a man declare his innocence of any crime, the accusers say, 'We will search thee with lamps.'" "Yes, yes, I will look into that affair with lamps;" "What, have your lamps gone out? I see you are not guilty." See LAMP.

There are monographs bearing on this subject as follows: D. W. Müller, De seraphimae vet. lucernae (Altorf, 1705); J. J. Müller, De vet. lamparum (Jen. 1661); Scharnowski, De comprehensis sanctis (in his Comment, xxvii); Stockhausen, De cultus et usum antiquum cujusc. (At. Rh. 1726). See CANDLESTICK.

II. Candles in Christian Worship. —I. Roman Church.

—The practice was probably derived from heathen and Jewish worship. Some Roman writers ascribe its origin to the early Christians, who, prevented by persecution from worshiping in daylight, held their meetings under ground, where artificial light was needed (Claude de Vert, Exposition des Ceremonies de l'Eglise). Others (e.g. Bergier, Dict. de Theologie, s. v.) quote the book of Revelation, wherein mention is made of "candles" and golden "candlesticks," in support of the custom, and also the Apocalypse of Baruch, where mention is made of "oil for the holy lamp." Bergier also cites Jerome (contra Vigilantium, c. 8) in support of the use of lights in worship; but the pas-
sage cited simply speaks of a usage in the Eastern Church of lighting candles when the Gospels were read as a symbol of joy at receiving the light. Jerome expressly says the usage did not exist in the West, though he seems to justify the lighting of candles and lamps before the tombs of the martyrs. See LAMPS. The use of candles in the worship of the Roman Church is ancient. They symbolized Christ as the "true light," and also of the injunction of Christ to his followers to be "the lights of men" (Matt. v. 14, 15).

The principal solemnities in the Roman Church at which candles are used are the mass, the administration of the sacraments, the benediction, and the holy offices, although they are also frequently employed before the statues and images of the saints, and many use them at their private devotions, especially while praying for the dead. Numerous liturgical prescriptions regulate their use. They must be, except in cases of emergency, of wax, and their color is generally white or yellow, but rarely red. The Paschal candle is a large candle to which five grains of incense are attached in the form of a cross; in most Roman Catholic churches it is lighted with a newly-made fire on Easter eve. Allan Butler says that "Ennodius, bishop of Pavia (6th century), has left us two forms of prayer for the blessing of the Paschal lamp before it was kindled." ( quoting penguins or particles of the wax thereof, after Low Sunday, were distributed among the people, who burnt them in their houses against the influence of evil spirits, in which there was no superstition if the effect was not certainly expected, because it was hoped for and asked of God through the public prayers and blessings of the Church, directed for that end (1) The paschal candle is an emblem of Christ rising from the dead, the light of the world, and is a sign which announces to us the joy and glory of his resurrection. The five grains of frankincense fixed in it symbolically represent his five precious wounds, and the enveloping of his body at his burial, and again in the grave, by the devout persons who brought spices to his monument. This great candle anciently gave light during the watching in the church on Easter-eve in the night. The triple candle arising from one stock signifies the Trinity of persons in one God, or the light of the world, or the three persons of Christ. This only burns during the office of holy Saturday morning; after which it is taken away, and no more made use of, not even on Easter-day." — Butler, Feasts and Fasts (Treat. vi. ch. viii).

2. In the Protestant Churches. — The Lutheran Church, after the Reformation, retained the use of lights on the altar; the Reformed churches abolished it. In the Church of England, the "Injunctions of Edward VI" (1547) forbade the use of lights, "except of two lights upon the high altar before the sacrament, which, for the signification that Christ is the very true light of the world, they shall suffer to remain still." In particular, the use of lights was abolished on the altar, but not lighted; and the great writers and leaders of the Church of England wrote against the use of lights as tending to idolatry. So the Homily on the Peril of Idolatry quotes Lactantius as follows: "Seemeth he to be in his right mind who offereth up to the Giver of all light the light of a wax candle for his gift? He hath preserved it, which is not smoky, but bright and clear, even the light of the mind and understanding. Their (the heathen) gods, because they are earthly, have need of light, lest they remain in darkness; whose worshippers, because they understand no heavenly thing, do despise the light of the sun. It is briefly described by Ov. (Fast. III. 5). Pope Sixtus (A.D. 641) has the credit of transferring this "false maenymery and untrue belief," as it is styled by Becon, in his Religions of Rome, to "God's worship." This pontiff hallowed the feast 'thorowe all Christendome; and every Christian man and woman of covenable age
is bound to come to church and offer up their candles, as though they were bodily with our Ladye; hoping for this reverence and worship that they do to our Ladye to have a great reward in heaven." The following explanation is given by Pope Innocent III.: "Why do we carry lighted candles at this festival? The answer may be derived from the book of Wisdom, where it is said (ch. xiv., 23) that the heathen offered sacrifices at night (sacrificii obsecru)." The Gentiles, indeed, had devoted the month of February to the infernal deities, because, as they ignorantly believed, it was the birthday of Pluto. That month the famous Proserpine, Ceres, her mother, had, according to their belief, sought her through Sicily for a whole night by the light of torches kindled at the flames of Etna. In commemoration of this, they every year, at the beginning of February, travelled the city during the night bearing lighted torches, wherefore this festival was called lambrodate. But the holy fathers, being unable to abolish this custom, decided that lighted candles should be carried in honor of the blessed Virgin Mary; and thus what was formerly done for Ceres is done to-day in honor of the Virgin, and what was done formerly for Proserpine is now done in the praise of Mary, II. Opera, "Seconde, in fest. purif. Maries," fol. xlvii, col. 2, ed. Colonie, 1552.

The following are the prayers for the hallowing of candles upon Candlemas-day, copied from "The Doctrine of the Mass-book," 1554. The asterisks indicate crossin: 2: "O Lord Jesus Christ, bless thou this creature of a sear tapers at our humble supplication, and by the virtue of the holy cross, after thou into their hands, to thee and thy servant, into an heavenly benediction; that as thou hast granted it unto man's use for the expelling of darkness, we may receive such a strength and blessing, through the token of thy holy cross, that in what places soever it be lighted or set, the Devil may avoid out of those habitations, and tremble for fear, and fly away discouraged, and presume no more to upbraid them that serve thee, who with God," etc. Then follow other prayers, in one of which occur these passages: "We humbly beseech thee that thou wilt vouchsafe to bless and sanctify these candles prepared unto the uses of men, and of health of bodies and souls, as well on the land as the waters." "Vouchsafe to bless and sanctify, and with the candle of heavenly benediction to lighten these tapers; which we thy servants taking in the honor of thy name (when they are lighted), desire to bear," etc. "Here let the candles be sprinkled with holy water." The service concludes with this Rubric: "When the hallowing of the candles is done, let the candles be lighted and distributed."

"The festival of St. Agatha, which commences on Candlemas-day in Sicily, strongly resembles the February rites. Lighted tapers form a distinguishing part of the ceremonial; and the memory of Proserpine is still cherished, though under another superstition. By kindling a blazing pine torch near the very spot to which the mythological legend assigned the scene of Pluto's amorous force. An account of this festival will be found in Blunt's Vestiges of Ancient Manners in Italy." —Bingham, Orig. Eccles. bk. xx, c. viii, § 4; Augusti, Denkwürdigkeiten, III. ii, p. 73; Siegel, Alterthümer, iii, p. 286; Eady, Ecclesi, Dictionary, s. v.; Chambers, Book of Days, i, 212 sq.; Brand, Popular Antiquities, i, 24 sq.

Candlestick (κεραθήκη, menorah; Chal. κεραθάθηκη, nebrakish; Sept. and N. T. λαμπαί, properly a lamp-stand) in Matt. xxi, 31, the candleholder which Moses was commanded to make for the tabernacle, after the model shown him in the mount. Its form is chiefly known to us by the passages in Exodus xxxv, 81-40; xxxvii, 17-24; on which some additional light is thrown by the Jewish writers, and by the representation of the spoils of the Temple on the arch (q. v.) of Titus at Rome, the only veritable monument extant of the kind (Prideaux, Connection, i, 166). It is called in Lev. xxiv, 4, the "pure," and in Ecclesi. xxvi, 19, the "holy candlestick." So Didacus Siculus describes it (ch. 100, ed. Bip.) as "the so-called immortal light perpetually burning in the face." (ἀδιανεξαιρήτως — λαμπρός κατ' αἰώνας ἀκαταλείπτως in τῷ ναῷ.)

The material of which it was made was made was fine (τινίο, "pure") gold, of which an entire talent was expended on the candlestick itself and its appendages. The mode in which the metal was to be worked is described by a term (τεξνύμησις, "beaten [rather turned] work," Sept. τεξνυμίαν, Vulg. textum) which appears to mean wrought with the hammer, as opposed to cast by fusion. Josephus, however, says (Ant. iii, 6, 7) that it was of cast gold (σφυγνωμίαν), and hollow. The structure of the candlestick, as far as it is defined in the passages referred to, consisted of a base (τινίον, Joseph. βάσις; according to Maimonides, three feet high); of a shaft (τρύπα, reed, l. e. stem) rising out of it; of six arms, which came out by threes from two opposite sides of the shaft; of seven lamps, which were supported on the summits of the central shaft and the six arms, terminating in seven heads all in one row [7]; standing parallel to one another, one by one, in imitation of the planets (Whiston's Josephus, 1. c.); and of three different kinds of ornaments belonging to the shaft and arms. These ornaments are called by names which mean cups, cireles, and blossoms: "four bowls made like unto almonds, with their knobs and their flowers." The cups (κεραθήκαι, Sept. καρασίτης, Vulg. κέρατ) receive, in verse 23, the epithet almondi- skopio (it being uncertain whether the resemblance was to the frukt or to the flowers). Three such cups are allotted to every arm, but four to the shaft: two-and-twenty in all. See Bowl. Of the four on the shaft, three are mentioned as if set severally under the spots where the three pairs of arms set out from the shaft. The place of the fourth is not assigned; but we may conceive it to have been either between the base and the cup below the lowest tier of arms, or, as Bähr prefers, to have been near the summit of the shaft. As for the name of the second ornament, the cireles (κεραθῆκαι), the word only occurs in two other places in the Old Testament (Am. i, 1; Zeph. ii, 14), in which it appears to mean the capitol of a column; but the Jewish writers generally (cited in Ugo- lini Theor. xix, 917) concur in considering it to mean appiles in this place. Josephus, as he enumerates four kinds of ornaments, and therefore two of his terms must be considered identical, may be supposed to have understood globes, or pomegranates (eyzepi, paleros,
of time. The whole weight of the candlestick was 100
mines (see Lamy, De Tab. Fod.). It has been calcu-
lated to have been worth $25,380, exclusive of work-
manship. See TABBANACL.

![Diagram of the "Golden Candlestick"]

The usual representation of the "Golden Candlestick," the arms being all in the same plane.

This candelabrum was placed in the Holy Place, on the south side (i.e. to the left of a person entering the tabernacle), opposite the table of shewbread (Exod. xxvii, 21; xxx, 7, 8; Lev. xxiv, 8; 1 Sam. iii, 8; 2 Chron. xiii, 11). Although the tabernacle had no windows (Exod. xxx, 8; 10, iv, 50), there is no good ground for believing that the lamps burnt by day in it, whatever may have been the usage of the second Temple. It has also been much disputed whether the candelabrum stood lengthwise or diagonally as regards the tabernacle; but no conclusive argument can be adduced for either view. According to Josephus, it was placed in an oblique position (Ant. ii, 5), so that the lamps looked to the east and south (Ant. iii, 6, 7; Exod. xxv, 35). As the lamp on the central shaft was by the Jewish writers called the western, or evening lamp, some maintain that the former name could not be applicable unless the candelabrum stood across the tabernacle, as then only would the central lamp point to the west. Others, again, adhere to the latter signification, and build on a tradition that the central lamp alone burnt from evening to evening, the other six being extinguished by day (Radd., Antiq. 1, 5, 8). The priest in the morning trimmed the lamps with
golden snuffers (ὠμομετρίς: ἱερογενής; ἱεροτρόπος), and carried away the snuff in golden dishes (ἰερομομετρίς, ἱεροθήκα; ἱεροτρέμος, Exod. xxv, 88). When carried about, the candlestick was covered with a cloth of blue, and put with its appendages in badger-skin bags, which were supported on a bar (Num. iv, 9).

In Solomon’s Temple, instead of this single candelabrum (or besides it, as the Rabbins say, but what became of it is not known; see Randell, vol, p. 109), there were ten of pure gold (whose structure is not described, although flwers are mentioned: 1 Kings vii, 49; 2 Chron. iv, 7), one half of which stood on the north and the other on the south side of the Holy Place. These are said to have formed a sort of railing before the vail, and to have been connected by golden chains, under which, on the day of atonement, the high priest crept. They were carried away to Babylon (Jer. iii, 19). In the Temple of Zerubbabel there appears to have been only one candelabrum again (1 Macc. 1, 21; iv, 49, 50). It is probable that also it had only seven lamps. At least, that was the case of the candelabrum of the Holy Temple, according to the description of Josephus (War, vii, 6).

This candelabrum is the one which, after the destruction of Jerusalem, was carried with other spoils to Rome, where, after the triumph of Titus, it was deposited in the Temple of Peace, and, according to one story, Titus, from the time that bridge during the flight of Maxentius from Constantine, Oct. 28, 312 A.D. but it probably, in A.D. 455, became a part of the plunder which Genseric transported to Carthage (Gibbon, iii, 291). It was, however, again, about A.D. 583, recaptured from the Vandals by Belisarius, and carried to Constantinople, and was thence sent off to Jerusalem (ib. iv, 21), from which time it has disappeared altogether. It is to this candelabrum that the representation on the Arch of Titus at Rome (see Flech, Wissenschaft. Reise, i, l, pl. 1) intended to apply; and although the existence of the figures of eagles and marine monsters on the pediment of that lamp treads, with other minor objections, to render the accuracy of that copy questionable (as it is unlikely that the Jews should have admitted any such graven images into their temple), yet there is reason to believe that in other points it may be relied upon as a reasonably correct representation of the Herodian candelabrum. It seems almost devoured by a valuable little work to this subject, De Spolis Templi Hierosolym. in Arcu Titano (2d ed. by Schulze, 1795), p. 82 sq. See also Stellmann, De candilbro aureo (1790); Schlichter, De Lychnocho sacro (1740); Doderlein, De Candilbratis Judaeorum sacris (Vitbe. 1711); Ullmann, De Candilbro (1789); see Candile. From the fact that the golden candelabrum was ex.

pressly made "after the pattern shown in the mount," many have endeavored to find a symbolic meaning in all its ornaments, especially Meyer and Bähr (Sym.

bol. l, 418, sq.). Generally it was a "type of preaching" (Godwin’s Moses and Aaron, ii, 1), or of the light, light, light. Other, e. c., similarly candlesticks are elsewhere made types of the Spirit of the Church, of witnesses (Zech. iv [see Scholze, De Lychnocho, Altona, 1741]; Rev. ii, 5; xi, 4; comp. Wimsatt, Clem. Symb. t. v. sq.). When our Lord cried: "I am the light of the World" (John viii, 12), the allusion was probably suggested by the two large golden chandeliers, lighted in the court of the women during the Feast of Tabernacles, which illuminated all Jerusalem (Weinstein, ad loc.), or perhaps to the lighting of this colossal candlestick, "the more remarkable in the profound darkness of an Oriental town" (Staalely, Nautz, p. 429). The figure of light, however, is common in all languages to express mental and moral illumination.

Cane, the rendering in only two passages (Isa. xiii, 24; Jer. vi, 20) of the Heb. word מָלָאשׁ, Lxxkµ, from which, indeed, the modern term (Chald., Syr., and Arab., essentially the same; Gr. κανά, Lat. canas) appears to have been derived, signifying properly a reed (as usually translated), i.e. the tall sedgy plant with a hollow stem (from מָלָאשׁ, to erect), growing in moist places (1 Kings xiv, 15; Job xli, 21; Isa. xix, 6; xxxv, 7; 8 Psa. lxviii, 31, beast of the reeds [A. V. "multitude of reeds," i.e. the crocodile]; also the sweet-flag (Ezek. xxvii, 20; Cant. iv, 14; fully Exod. xxx, 23); also the cultivated reed used as a reed bed (Isa, xxix, 6; Isa. xxxvi, 6); hence a measuring reed or rod (Exod. xi, 3, 5; xiii, 16-19); also a simple stalk of grain (Gen. xi, 5, 22); likewise the upper bome of the arm (Job xxxii, 22); the rod or beam of a balance, put for the balance itself (Isa, xvi, 6); the shaft or stem of the sacred candelabrum (Exod. xxv, 37, 39; xxxvii, 17), as well as its branches or tubes (Exod. xxv, 32, 33, 35, etc.). As the name of a plant, the word designates in Scripture three kinds of the genus Arundo, of which we accordingly give here a detailed description.

1. Common Cane.—In most of the passages of the Old Testament the word Hosea is applied strictly to reeds of different kinds growing in water—that is, to the hollow stems or culms of grasses, which are usually weak, easily shaken about by wind or by water, fragile, and breaking into sharp-pointed splinters. Thus, in 1 Kings xiv, 15, "As a reed is shaken in the water," Job xli, 21, "He lieth in the covert of the reeds;" Isa, xxxvi, 6, "And they shall be cut down before the reeders far away; and the reeds and flags shall wither." Also in ch. xxxv, 7; while in 2 Kings xviii, 21; Isa. xxxvi, 6; and Ezek. xxxix, 7, there is reference to the weak and fragile nature of the reed: "Lo, thou trustest in the staff of this broken reed, on Egypt, whereas it a mean reed, it will go into his hand like a staff." The Greek word καλαμὸς appears to have been considered the proper equivalent for the Hebrew kamekh, being the term used by Matthew (xii, 20) when quoting the words of Isaiah (xlii, 3), "A bruised reed shall he not break." The Greek word Latinized is well known in the forms of calamus and culmus. Both seem to have been derived from the Arabic kalm, signifying a "reed" or "pen," and forming numerous compounds, with the latter signification, in the languages of the East. It also denotes a weaver's reed, and even cuttings of trees for planting or grafting. Or they may all be derived from the Sanscrit kalma, having the same signification. The Greek καλαμὸς and the English kalum, usually applied to the straw or stems of grasses, would seem to have the same origin. The Greek καλαμὸς and the Latin calamus were used with as wide a signification as the Oriental kalm, and denoted a reed, the stalk or stem of corn, or any thing; made therefrom, as a pen, an arrow, a rod pipe. καλαμὸς is also applied to any plant which is neither shrub, bush (ὅλαμος), nor tree (εἶκονιος) (see Liddell and Scott's Greek Lex.). So calamus means any twig, sprig, or scion (Pliny, xvi, 14, 24). The term καλαμὸς occurs very frequently in the New Testament, and apparently with the same latitude of meaning: thus, in the sense of a reed or calm of wind: Matt. xi, 7; Luke vii, 24, "A reed shaken by the wind;" of a pen in 8 John 18, "But I will not with pen and ink write unto thee;" Matt. xxvii, 29, "Put a reed in his right hand;" ver. 30, "Took the reed and smote him on the head;" and in Mark xv, 19, it may mean a reed or twil of any kind. So also in Matt. xxvii, 48, and Mark xix, 29, where it is said that they filled a sponge with vinegar, and put it on a reed, while in the parallel passage, John xix, 29, it is said that they filled a sponge with vinegar, and put it upon ἀμπελόν, and put it to his mouth; from which it is probable that the term καλαμὸς was applied by both the Evangelists to the stem of the plant used by Jesus. Whatever this may have been, in like manner as Pliny
low, with frequent knots, fitted for writing, probably a species of Saccharum. 4. Thick and hollow, growing in rivers, which is called donax, and also Cyprus (Arundo donax). 5. Phragmites (Arundo phragmites), slender, light-colored, and well known. 6. The reed called Phlaos (Arundo ampelodesmos Cyrlilis). (Flora Neapol. t. xii.) These are all described (l. c.) immediately before the papyrus, while κάλαμος αρωματικός is described in a different part of the book, namely, in ch. 17, along with spices and perfumes. The Arabs describe the different kinds of reed under the head of كه، or كترب، of which they give Kalamus as the synonymous Greek term.

From the context of several of the above passages of Scripture in which κανός is mentioned, it is evident that it was a plant growing in water, and we have seen, from the meaning of the word in other languages, that it must have been applied to one of the true reeds, as, for instance, Arundo Εγγυπτικα (perhaps only a variety of A. donax), growing on the banks of the Nile. In the New Testament κύκλαμος seems to be applied chiefly to plants growing in dry and even barren situations, as in Luke vii, 24, "What went ye into the wilderness to see—a reed shaken by the wind?" To such passages, some of the species of reed-like grasses, with slender stems and light flocculent inflorescence, formerly referred to Saccharum, but now separated as distinct genera, are well suited. See Reed.

3. Sweet Cane.—This is designated in Heb. by קֶנֶר' בֹּשֶׂם (כֶּנֶר בֹּשֶׂם), reed of fragrance.
deviously popular. While in banishment in 1634, he published a work on the Necessity of Separation from the Church of England. In 1640 he returned on a visit to England, and founded the Baptist Church in Bredenend, Bristol. Mr. Canne was equally eminent for learning, piety, knowledge of the Scriptures, and zeal for reformation. Canne's most important labor is his selection of marginal references to the Bible. He was the author of three sets of notes, which accompanied three editions of the Bible. His great ambition was "to make the Bible its own interpreter."—Hymen. English Mech. Biblioth. Jameson. Cyclop. of Biography, 105; Neal, History of the Puritans.

Canne (Heb. קָנָן, qānān), one codex fully caul22; Sept. Xanav, v. r. Kânân; Vulg. Cano), doubtless a contracted form (Ezek. xxvii, 29) for the earlier Calem (q. v.) of Gen. x. 10.

Cannon James S., D.D., an eminent minister of the Reformed Dutch Church, was born in Curacao, Jan. 28, 1776, and was educated under Dr. Peter Wilson and Rev. Alex. Miller at Hackensack, N. J. He was licensed to preach in 1796 by the Classis of Hackensack, and shortly after became pastor of the Reformed Dutch Church of Millstone and Six-Mile Run, finally devoting his whole service to the latter church. His pastoral industry was remarkable, yet he wrote and committed to memory all his sermons. During part of his pastoral work he had to preach one sermon in Dutch and one in English every Sunday. In 1826 he was chosen Professor of Pastoral Theology and Ecclesiastical History in the Seminary at New Brunswick, and here he spent the remainder of his life, a laborious student, and a faithful and successful teacher. "His views of truth were more distinguished by exactness and solidity than by any far-reaching power; and yet, when he had discussed a subject, there was a weight to be said." Among the large number of ministers were trained by Dr. Cannon. He died in great peace, July 25, 1852. After his death, the substance of his course of instruction was published under the title Lectures on Pastoral Theology (New York, 1858, 8vo).

The subjects embraced in the lectures are: "The qualifications for the pastoral office," "Pastoral duties," "the administration of the sacraments," "catechetical instruction," "visitation of the sick," "pastoral visitation," "religious declension," "extension of the Church," "Instruction by example," Dr. Cannon's discussion of the sacraments is particularly able, clear, and comprehensive.-N. Brunswick Rev. and Rec., May, 1854, p. 104; Bibliotheca Sacra, April, 1854, p. 490.

Cannon of Scripture, as the phrase is usually employed, may be defined as "the Authoritative Standard of Religion and Morals, composed of those writings which have been given for this purpose by God to men." A definition frequently given of the Canon is, that it is "the Catalogue of the Sacred Books;" while Semler (Von Freih. Untersuchungen des Canons; Doctorin Inst. Theol. Christ. i, 65) and others, define it as "the List of the Books publicly read in the meetings of the early Christians;" both these, however, are defective, and the latter is not only historically incorrect, but omits the essential idea of the divine authority of these Scriptures. We here give a copious account of the subject in general, referring our readers to the articles for more details on the several books of the Bible. 1. Origin and uses of the term "Canon."—1. In classical Greek, the word (Kaino, akin to Kain, a "reed," [comp. Gesen. Theol. s. v.] καινός, καινα, καινά [cana-λος, channel), CANE, CANNON signifies, (1) Properly, a straight rod, as the rod of a shield, or that used in weaving (i.e., loom), or a carpenter's rule. (2) Metaphorically, a straight or regular path. (3) In New (Rev. iii, 4, 5), or in art (the Canons of Polycletus; Luc. de Bell. p. 948 B), or in language (the Canons of..."
Grammar. The gift of tongues (Acts ii, 7) was regarded as the "canon" or test which determined the direction of the labors of the several apostles (Sey envis. ap. Cram. Cat. in Act. ii, 7). Chronological tables were called "canons of time" (Plut. Sol. 27); and the summary of a book was called κατά τό άνθρωπον, as giving the "rule." The title "canon" of the prophets (e.g. Axler, Alex.) denoted grammarians applied the word in this sense to the great "classical" writers, who were styled "the rule" (ό κανών), or the perfect model of style and language. (3) But, in addition to these active meanings, the word was also used passively for a measured space of time, and, in later times, for a fixed tax (Du Cange, s.v.).

2. In ecclesiastical usage, the word occurs in the Sept. in its literal sense (Jud. xiii, 6), and again in Aquila (Job xxxviii, 5). In the N. T. it is found in two places in Paul's epistles (Gal. vi, 16; 2 Cor. x, 13-16), and in the second place the transition from an active to a passive sense is worthy of notice. In pastristic writings the word is commonly used both as a rule in the widest sense, and especially in the phrase "the rule of the church," "the rule of faith," "the rule of truth." In the fourth century, when the practice of the Church was farther systematized, the decided emphasis was laid on discipline by which ministers were bound was technically "the Rule," and those who were thus bound were styled Cenonici ("Canons"). In the phrase "the canon (i.e. fixed part) of the mass," from which the popular sense of "canonize" is derived, the passive sense again prevails. (See below.)

3. As applied to Scripture, the derivatives of κανών are used long before the simple word. The Latin translation of Origen speaks of Scriptura canonica (de Princ. iv, 38), libri regulares (Comm. in Matt. § 117), and libri canonum (id. § 28). In another place the phrase habet canonum (Phil. ii, 25) occurs, but probably only as a translation of κανών, which is used in this and cognate senses in Athanasius (Ep. Fest.), the Laodicene Canons (κανώνια) (Can., Ixxii), and later writers (Isid. Pelus. Ep. cxxvii; comp. Aug. de doctr. Chr. iv, 9 [6]; and as a contrast, Auct. ap. Euseb. H. E. v, 26).

The first fixing of the designation of the term κανών to the Scriptures seems to be by Amplilocchus (cir. 380), in his Catalogue of the Scriptures, where the word indicates the rule by which the contents of the Bible must be determined, and thus secondarily an index of the constituent books. Among Latin writers the word is commonly, but not exclusively, used by the Presbyterians and Augustinian (De Chr. xvii, 24; xviii, 38), and their usage of the word, which is wider than that of Greek writers, is the source of its modern acceptance.

The uncanonical books were described simply as "those without," or "those uncanonical" (κανώνια, Conc. Lodi. lxxii). The apocryphal books, which were supposed to occupy an intermediate position, were called books read (τά κανώνια τῶν ἄγνωστων, Athan. Ep. Fest.), or "ecclesiastical" (ecclesiastici, Rufin. in Symb. Apost. § 38), though the latter title was also applied to the canonical Scriptures, which (Leont. de Sect. ii) were also called "books of the Testament" (κανώνια τῶν Τεσταμέντων), and dextrally the whole collection by the striking name of "the holy library" (Βιβλιοθήκη Σαικάτου), which happily expresses the unity and variety of the Bible (Credner, Zur Gesch. d. Kan. § 1; Westcott, Hist. of Canon of N. T. App. D).

11. The Jewish Canon.—1. According to the common view of this word, it was "in the side of the ark" (Deut. xxxi, 25 seq.), but not in it (1 Kin. vii, 9; comp. Joseph. Antiq. ii, i, 7; 1 v, 17); and thus, in the reign of Josiah, Hilkhah is said to have "found the book of the law in the house of the Lord" (2 Kings xxii, 8; comp. 2 Chron. xxxix, 14). This "the book of the law," which, in addition to the direct precepta (Exod. xxiv, 7), contained general exhortations (Deut. xxviii, 61) and historical narratives (Exod. xvii, 14), was farther increased by the records of Josiah (Jos. xxiv, 26), and other writings (1 Sam. x, 25). From these sacredly guarded autographs copies were taken and circulated among the people (2 Chron. xvii, 9). At a subsequent time collections of pseudepigraphic prophets were made (see Pseudepigrapha). The books of the prophets (especially Jeremiah; comp. Kueper, Jerem. Litter. s. interp. et eidesc. Berol. 1887) were familiar with the writings of their predecessors, a circumstance which may naturally be connected with the training of "the prophetic schools." It perhaps forms a further step in the history of the canons when the "the book of the Lord" is mentioned by Isaiah as a general collection of sacred teaching (xxxiv, 16) where it is implied that his own writings were to be added to those previously regarded as sacred; see Gesenius, Comment. in loc.; comp. xxix, 15) at once familiar and authoritative; but it is unlikely that any definite collection either of "the Psalms" or of "the Prophets" existed before the Captivity. At that time Zechariah speaks of "the law" and "the former prophets" as in some measure co-ordinate (Zech. vii, 12); and Daniel refers to "the books" (Dan. ix, 2) in a manner which seems to mark the prophetic writings as already collected into a canon. With the change of the people from Babylon, the Levites read and expounded the word of the Lord to the people (Neh. viii, 1-8; ix, 1-8).

2. Popular belief assigned to Ezra and "the great synagogue" the task of collecting and promulgating the Scriptures as part of their work in organizing the Jewish Church. Doubts have been thrown upon this belief (Rau, De Synag. magnum, 1726; comp. Ewald, Gesch. d. V. Isr. iv, 191 [see below]); but the statement is in every way consistent with the history of Judaism, and with the internal evidence of the books themselves. The later embellishments of the tradition, which represent Ezra as the second author of all the books (2 Esdras), or defines more exactly the nature of his work, can only be accepted as signs of the universal belief in his labors, and ought not to cast discredit upon the simple fact that the foundation of the present Canon is due to him. Nor can it be supposed that the work was completed at once; so that the account (2 Esdras ii, 12) which places the end of the collection of books to Nehemiah is itself a confirmation of the general truth of the gradual formation of the Canon during the Persian period. The work of Nehemiah is not described as initiatory or final. The tradition omits all mention of the law, which may be supposed to have assumed its final shape under Ezra, but says that Nehemiah "gathered together" the "worthies concerning the kings and prophets, and the [writings] of David, and letters of kings concerning offerings," while "founding a library" (2 Mac. i. c.). The various classes of books were thus completely completed and conclusion; and this view harmonizes with what must have been the natural development of the Jewish faith after the Return. The constitution of the Church and the formation of the Canon were both, from their nature, gradual and mutually dependent. The construction of an ecclesiastical polity involved the practical determination of the divine rule of truth, though, as in the parallel case of the Christian Scriptures, even persecution first gave a clear and distinct expression to the implicit faith.

The foregoing tradition occurs in one of the oldest books of the Talmud, the Pirke Abodah; and it is repeated, with greater minuteness, in the Babylonian Gemara (Eshkol, t. 1, p. 10, 11, comp. Wachsmann, Anth. Hdb. 1, 18). The substance of it is that, after Moses and the elders, the sacred books were watched over by the prophets, and that the Canon was completed by Ezra, Nehemiah, and the men of the Great Synagogue. The earliest form in which this appears is in the fourth book of Esdras, a work dating from the end of the first
or beginning of the second century after Christ. Here it is asserted that Ezra, by divine command and by divine aid, caused to be compiled 94 books by three men (Vul. c. 204 books by five men) in forty days, 70 of which, wherein "a vein of understanding, a fountain of words and stories," were to be given to the wise of the people, while the rest were to be made public, that "both the worthy and the unworthy might read them" (xiv. 42-47). These twenty-four thus made public are doubtless the canonical books. The statement is very vague; but that this is its reference is rendered plausible in the words of some of the Christian fathers of a tradition that the sacred writings, which had been lost during the exile, were restored by Ezra in the time of Artaxerxes by inspiration (Clemens Alex., Strom. I, 29, p. 410; Potter; Tertullian, De culta fide, cap. 3; Ireneeus, Adv. Herr. III, 21 [25], etc.). Against this tradition it has been objected that it proves too much, for it says that the men of the Great Synagogue wrote the later books, such as the twelve minor prophets, etc. But that by writing is here meant, not the original composing of these books, but the subscription (the to-writing) of them to the sacred Canon, may be inferred, partly from the context, partly from the fact, in the tradition, that the men of Hezekiah are said to have written the Proverbs, which can only mean that they copied them (see Prov. xxx, i) for the purpose of inserting them in the Canon, and partly from the fact that the word here used (גזר) is equivalent to the Heb. גזר, to transcribe. An attempt has also been made to discredit this tradition by adducing the circumstance that Simon the Just, who lived long after Ezra, is said, in the Pirke Aboth, to have been one of the members of the Great Synagogue; but to this wish which cannot be allowed, partly because Simon is, in the passage referred to, said to have been one of the remnants of the Great Synagogue, which indicates his having outlived it, and principally because the same body of tradition which states this opinion makes him the successor of Ezra; so that either the whole is a mistake, or the Simon referred to must have been a different person from the Simon who is commonly known by the title of "Just" (comp. OthonisLex. Rabbin. Philos. p. 604, Gen. 1675; Hävernick's Einleitung in das A. Th. Th., 1. A. 1, 49). Or we may adopt the opinion of Hartmann (In- enge Verbindung des Alten Test. mit d. Neuen, p. 129), that this passage refers to the collection of many years after their death, by means of which it existed till the time of the Maccabees, without our being required to suppose that what is affirmed concerning its dating in the time of Ezra is meant to refer to it during the entire period of its existence. Suspicions have also been cast upon this tradition from the multitude of extravagant wonders narrated by the Jews respecting the Great Synagogue. But such are found in almost every traditonal record attaching to persons or bodies of men, however heroically characterized; and it is surely unreasonable, because a chronicler tells one or two things which are incredible, that we should disbelieve all besides that he records, however possible or even probable it may be. To this it may be added that there are some things, an order of daily prayer, the settling of the text of the Old Testament, the gift points of the Levites, the several measures of the traditional interpretation of Scripture, etc., which must be assigned to the period immediately after the Captivity, and which presuppose the existence of some institute such as the Great Synagogue, whether this is to be regarded as formally constituted by Ezra or as a voluntary association of priests and scribes (Zunz, Die Gottheitlichen Vortr. d. Juden, p. 33). Moreover there are some passages of Scripture (e. g. 1 Chron. iii. 28, 24) which belong to a period somewhat later than any of the canonical writers. See Ezra.

This tradition, again, is confirmed by the following circumstances: (a) The time in question was the latest at which this could be done. As the duty be performed was not merely that of determining the genuineness of certain books, but of pointing out those which had been divinely ordained as a rule of faith and morals to the Church, it was one which none but a prophet could discharge. Now in the days of Nehemiah and Ezra we have several prophets living, among whom we know the names of Haggai, Zechariah, and Malachi; but with that age expired the line of prophets which God had appointed "to comfort Jacob, and deliver them by assured hope" (Eccles. xlii, 10). On this point the evidence of Josephus, the apocryphal books, and Jewish tradition, is harmonious (comp. Joseph. cont. Apion. i. 8; 1 Macc. iv. 46; ix. 27; xiv. 41; Jerome, ad Jes. xlii, 21; Vitringa, Obs. Soc. lib. vi, cap. 6, 7; Hävernick, Einleit. i, 1, 27; Hengstenberg, Beiträge zur Einleitung ins A. T. 7. i. 245). As the men of the Great Synagogue were thus the last of the prophets, if the Canon was not fixed by this time, it could be fixed at all. (b) That it was fixed at that time appears from the fact that all subsequent references to the sacred writings presuppose the existence of the complete Canon, as well as from the fact that of none among the apocryphal books it is so much as hinted, either by the author or by any other Jewish writer, that it was the work of a place among the sacred books, though of some of them the pretensions are in other respects sufficiently high (e. g. Eccles. xxxiii, 16-18; 1, 28). Josephus, indeed, distinctly affirms (cont. Ap. 1. c.) that, during the long period that had elapsed between the time of the close of the Canon and his day, no one had dared either to add to, or to take from, or to alter any thing in the sacred books. This plainly shows that about the time of Artaxerxes, to which Josephus refers, and which was the age of Ezra and Nehemiah, the collection of the sacred books was completed by an authority which thenceforward ceased to exist. See SYNAGOGUE.

3. The persecution of Antiochus (B.C. 168) was for the Old Testament what the persecution of Diocletian was for the New, the final crisis which stamped the sacred writings with their peculiar character. The king sought out "the books of the law" (rè βιβλίον τοι από τον λόγο, 1 Macc. i. 50) and burnt them; and he "shut them up in the cleft of a rock" (βιβλίον διαμε-πηναν) was a capital crime (Joseph. Ant. xii, 5, 4). But this proscription of "the law" naturally served only to direct the attention of the people more closely to these sacred books themselves. After the Maccabean persecution the history of the formation of the Canon is merged in the history of its contents. The Bible appears from that time as a whole, though it was natural that the several parts were not yet placed on an equal footing, nor regarded universally and in every respect with equal reverence (comp. Zunz, D. Gottheitlichen Vortr. d. Jud. p. 14, 25, etc.). But while we are impressed with these notions of tradition and of the general course of Jewish history, we are led to the conclusion that the Canon in its present shape was formed gradually during a lengthened interval, beginning with Ezra and extending through a part or even the whole (Neh. xii, 11, 22) of the Persian period (B.C. 458-322), when the cessation of the prophetic office, the completion and the limits of the collection, it is of the utmost importance to notice that the collection was peculiar in character and circumscribed in contents. All the evidence which can be obtained tends to show that it is false, both in theory and fact, to describe the O. T. as "all the religious and moral work of the Jewish people during the Maccabean epoch" (De Wette, Einl. § 8), if the phrase is intended to refer to the time when the Canon was completed. See ECCLESIASIS.
The epilogue of Ecclesiastes (xii, 11 sq.) speaks of an extensive literature, with which the teaching of Wisdom is contrasted, and "weariness of the flesh" is described as the result of the study bestowed upon it. It is impossible that these "many writings" can have proceeded from the inspiration of Ecclesiastes and the Greek invasion, and the Apocalypse includes several fragments which must be referred to the Persian period (Buxtorf, Tiberias, c. 10 sq.; Hottinger, Thea. Phil.; Hengstenberg, Beiträge, i; Hävernick, Einl. i; Oehler, art. Kanon d. A. T. in Herzog's Encyklop.).

4. The division of the O-T. Canon into three parts, "the Law," "the Prophets," and "the Writings" (הכתובים), is very ancient; it appears in the prologue to Ecclesiasticus, in the New Testament, in Philo, in Josephus, and in the Talmud (Surenhusius Biët, Karall, p. 49). Respecting the principle on which the division has been made, there is considerable difference of opinion. All are agreed that the first part, the Law, which embraces the Pentateuch, was so named from its containing the national laws and regulations. The second embraces the rest of the books of the Old Testament, of Ruth, Esther, Ezra, Nehemiah, and the Chronicles; and the writings of the prophets, except Daniel and Lamentations. It is probable that it received its name a parte potiori, the majority of the books it contains being the production of men who were professionally prophets. The omission of Daniel and Lamentations, or insertion of a book in this second division, as asserted by Hengstenberg (Aauthen des Daniel, p. 27), and by Hävernick (Einl. i, sec. 11), cannot be admitted; for, on the one hand, we find inserted in this division the book of Amos, who was "neither a prophet nor a son of a prophet;" and on the other the Book of Lamentations, which was unquestionably the production of a prophet. The insertion of this book in the last rather than in the second division has its source probably in some liturgical reason, in order that it might stand beside the Psalms and other lyric poetry of the sacred books. It is more difficult to account for the insertion of the book of Daniel in the third rather than in the second division; and much stress has been laid on this circumstance, as affording evidence unfavorable to the canonical claims of this book. But it is not certain that this book always occupied its present position. Is it not possible that, under the pressure of controversy and universal kind, to both of which sources of influence the Jews during the early ages of Christianity were much exposed, they may have altered the position of Daniel from the second to the third division? What renders this probable is, that the Talmudists stand alone in this arrangement. Josephus, Sirachides, Philo, the New Testament, all refer to the Hagiographies in such a way as to induce the belief that it comprised only the poetical portions of the Old Testament—the psalms, hymns, and songs; while in all the catalogues of the Old Testament-writers given by the early fathers, up to the time of Jerome, Daniel is ranked among the prophets, generally in the position he occupies in our common version. In the version of the Sept., also, he is ranked with the prophets next to Ezekiel. Nor does Jerome agree with the Talmud in all respects, nor does one class of Jewish rabbis agree with another in the arrangement of the sacred books. All the books are given in the account of the probable arrangement of the sacred books, as that which is commonly assumed, existed anterior to the fifth century of the Christian era, and proves very distinctly that the place then assigned to Daniel by the Talmudists was not the place he had during the preceding period, or originally occupied. See Daniel, Book of. As respects the name given to the third division, the most probable account of it is, that at first it was fuller—viz., "the other writings," as distinguished from the Law and the Prophets (comp. the expression ρα αλλα βιβλια, used by the Son of Sirach, Ecclus. Prol.); and that in process of time it was abbreviated into "the writings." This part is commonly cited under the title Hagiographa, etc. 5. The O-T. Canon, as established in the time of Ezra, has remained unaltered to the present day. Some, indeed, have supposed that, because the Sept. version contains some books not in the Hebrew, there must have been a double Canon, a Palestinian and an Egyptian (Senec., Apocol. ad literam v. 7. interpret. § 9, 10; Cornill, Geschichte der chr. d. sch. u. christl. Kanons, p. 155-184; Augusti, Einl. ins. A. T. p. 79); but this notion has been completely disproved by Eichhorn (Einl. i, 28), Hävernick (Einl. i, § 16), and others. All extant evidence is against it. The Son of Sirach, and Philo, both Alexandrian Jews, make no allusion to it; and Josephus, who evidently used the Greek version, expressly declares against it in the passage above referred to (Ap. i, 8). The earlier notices of the Canon simply designate it by the threefold division already considered. The Son of Sirach mentions "the Law, the Prophets, and the Writings," and the Tetragrammaton, the Prophecies, and the rest of the books; "expressions which clearly indicate that in his day the Canon was fixed. In the New Test. our Lord frequently refers to the Old Test. under the title of "The Scriptures," or of "The Law" (Matt. xxv. 32, xxii. 29; John x, 35, 39, etc.); and the new dispensation speaks of "the Law of Moses, the Prophets, and the Psalms" (Luke xxii. 41); by the third of these titles intending, doubtless, to designate the Hagiographies, either after the Jewish custom of denoting a collection of books by the title of that with which it commenced, or, as Hävernick suggests, using the term γραμμαται as a general designation of these books on the ground of the exhaustiveness of the amount of lyric poetry contained in them (Einl. § 14). Paul applies to the Old Test. the appellations "the Holy Writings" (γραφαι αιςια, Rom. ii. 2); "the Sacred Letters" (τα παλαια εις αιςια, 2 Cor. iii. 14). Both our Lord and his apostles ascribe divine authority to the ancient Canon (Matt. xv. 5; John x, 34-36; 2 Tim. iii. 16; 2 Peter i. 19-21, etc.); and in the course of the New Test. quotations are made from all the books of the Old except Ruth, Ezra, Nehemiah, Esther, Canticles, Lamentations, and Ezekiel, the omission of which may be accounted for on the simple principle that the writers had no use for them. Coincidences of language show that the apostles were familiar with several of the apocryphal books (Bleck, Ueber d. Stellung d. Apokr. in der Stud. u. Krit. 1858, p. 267 sq.), but they do not contain one authoritative or direct quotation from them, while, with the exception of Judges, Eccles., Cant., Esther, Ezra, and Nehemiah, every other book in the Hebrew Canon is used either for illustration or proof. Philo attests the existence in his time of the εις αςια γραμματα, describes them as comprising laws, oracles uttered by the prophets, hymns, and the other books by which the knowledge and guidance of man is instructed (De Vita Contemplat. in Opp. ii. 275, ed Mangely); and quotations from or references to the most of the books are scattered through his writings. The evidence of Josephus is very important; for, besides general references to the sacred books, he gives a formal account of the composition of the books, and gives an account of the origin of the text of the Prophets, and four, containing songs of praise to God and ethical precepts for men, to different writers, and affirming that the faith of the Jews in these books is such that for them they would suffer all tortures and death itself (cont. Apion. i. 7, 8; Eichhorn, Einleit. i, § 50; Jahn, Introductio, p. 80). The popular belief
that the Sadducees received only the books of Moses (Tertull. De prav. haeret. 45; Jerome, in Matth. xxii, 31, p. 181; Origen, c. Clet. i. 49), rests on no sufficient authority; and if they had done so, Josephus could not have failed to notice the fact in his account of the different scriptures. So the tradition from the Talmud, on the other hand, Gamaliel is represented as using passages from the Prophets and the Hagiographa in his controversies with them, and they reply with quotations from the same sources without scruple or objection. (See Eichhorn, Einl., § 36; Lightfoot, in Phil. ii. 2.) Eichhorn (Einl., § 52) speaks of the Talmudic Tract entitled Baba Batra, a catalogue of the books of the sacred Canon is given, which exactly corresponds with that now found in the Hebrew Bible (Buxtorf, Tiberian, c. 11).

111. The Christian Canon of the Old Testament.—Melito, bishop of Sardis in the second century of the Christian era, gives, as the result of careful inquiry, the same books in the Old-Testament Canon as we have now, with the exception of Nehemiah, Esther, and Lamentations; the first two of which, however, he mentions in Ezra, and the latter in Jeremiah (Euseb. Hist. Eccles. iv. 26; Eichhorn, Einl., § 52). The catalogues of Origen (Euseb. Hist. Eccles. vi. 2, 5), of Jerome (Prov. Galat. in Opp. iii), and of others of the fathers, give substantially the same list (Eichhorn, l. c.; Augustin, Einl. § 54; Cosins, Scholastic. Hist. of the Canon, ch. iii, vi; Henderson, On Inspiration, p. 449).

The general use of the Septuagint (enlarged by apocryphal additions) produced effects which are plainly visible in the history of the O.-T. Canon among the early Christian writers. In proportion as the fathers were more or less absolutely dependent on that version for knowledge of the Old-Testament Scriptures, they gradually lost in common practice the sense of the difference between the books of the Hebrew Canon and the Apocrypha. The custom of individuals grew into the custom of the Church; and the public use of the apocryphal books obliterated in popular regard the characteristic marks of their origin and value, which could only be discovered by the scholar. But the custom of the Church was not fixed in an absolute judgment. The same remark applies to the details of patristic evidence on the contents of the Canon. Their habit must be distinguished from their judgment. 1. From what has been said, it is evident that the history of the Christian Canon must be sought in the first instance, from definite catalogues rather than from isolated quotations. But even this evidence is incomplete and unsatisfactory. (See the Tables i. and ii.)

During the first four centuries this Hebrew Canon is the only one which is distinctly recognized, and it is supported by the combined authority of those fathers whose critical judgment is entitled to the greatest weight. The real divergence as to the contents of the Old-Testament Canon is to be traced to Augustine, who enumerates the books contained in "the whole Canon of Scripture," including the Apocrypha, without any special mark of distinction, although it may be reasonably doubted whether he differed intentionally from Jerome except in language (De Doctr. Christ. ii, 8 [19]; comp. De Civ. xviii, 36; Grad. i, 38).

The enlarged Canon of Augustine, though wholly unsupported by any Greek authority, was adopted at the Council of Carthage (A.D. 397) though with a reservation (Can. 47, "de conferendo in Canone triumvariae ecclesiae consultature"), and afterward published in the decreats which bear the name of Innocent, Damasus, and Gelsius (comp. Credner, Zur Gesch. d. Kan. p. 151 sq.); and it recurs in many later writers. But, nevertheless, a continuous succession of the more learned fathers in the West maintained the distinctive authority of the Hebrew Canon up to the period of the Reformation. In the 6th century Primasius (Comm. in Apoc. iv, Can. § 927), in the 7th Gregory the Great (Moral. xix, 21, p. 622), in the 8th Bede (in Apoc. iv, 7), in the 9th Alcuin (ap. Hody, p. 654; yet see Carol. vii, viii), in the 10th Radulphus Flav. (in Lecit. xiv, Hody, p. 658), in the 12th Eusebius of Canosa (Ep. c. Petr. Hody, l. c.), Hugus de S. Victore (de Script. 6), and John of Salisbury (Hody, p. 656; Cosin, § 130), in the 13th Hugus Cardinalis (Hody, p. 656), in the 14th Nicholas Liranes (Hody, p. 657; Cosin, § 146), Wiclif (? comp. Hody, p. 656), and Occam (Hody, p. 657; Cosin, § 147), in the 15th Thomas Aquinas (Cosin, § 150), and Thomas de Walden (1d. § 151), in the 16th Card. Ximenes (Ed. Comp. Prof.), Sixtus Senenazies (Biblioth. i, 1), and Card. Cajetan (Hody, p. 662; Cosin, § 178), repeat with approval the decision of Jerome, and draw a clear line between the canonical and apocryphal books (Cosin, Scholastical History of the Canon; Beza, Die Gesch. d. heiligen Schriften d. N. T. ed. 2, § 328).

The list extends only to such books as are disputed. Of the signs * indicates that the book is expressly reckoned as Hebrew; and _ signifies that it is placed expressly in a second rank; T that it is mentioned with doubt.

A blank marks the absence of the author as to the book in question.
TABLE II.—QUOTATIONS OF THE APOCRYPHA AS SCRIPTURE.

The quotations in brackets are doubtful either as to the reference, or as to the character assigned to the book quoted.

2. Up to the date of the Council of Trent (q. v.), the Romanists allowed that the question of the Canon was open, but one of the first labors of that assembly was to circumscribe a freedom which the growth of literature seemed to render perilous. The decree of the Council “On the Canonical Scriptures,” which was made at the 4th session (April 8th, 1546), at which about 38 representatives were present, pronounced the enlarged Canon, including the apocryphal books, to be deserving in all parts of “equal veneration” (pari pietatis affectu), and added a list of books “to prevent the possibility of doubt” (ne cui dubitatio subserit positi). This hasty and peremptory decree, unlike in its form to any catalogue before published, was closed by a solemn anathema against all who should “not receive the entire books, with all their parts, as sacred and canonical” (Si quis autem libros ipsos integros cum omnibus suis partibus, prouit in ecclesia catholica legi consueverent et in vestra vetula Latina editione habuerent, pro sacris et canoniciis non susceptor... anathema esto, Cons. Trident. Sentent. 1). This decree was not, however, passed without opposition (Sarpi, p. 179 sq. ed. 1665, though Pallavacino denies this); and, in spite of the absolute terms in which it is expressed, later Romanists have sought to find a method of escaping from the definite equalization of the two classes of sacred writings by a forced interpretation of the subsidiary clauses. Du Pin (Disert. prelim. 1, 1) Lamy (App. Bll. ii. 5), and Jahn (Einth. in d. A.T. i. 141 sq. op. Reuss, § 835) endeavored to establish two classes of proto-canonical and deutero-canonical books, attributing to the first a domestic, and to the second only an ethical authority. But such a classification, however true it may be, is obviously at variance with the terms of the Tridentine decision, and has found comparatively little favor among Roman writers (comp. Herber Welte, Einb. ii. 1 sq.). See Deuterocanonical.

3. The reformed churches unanimously agreed in confirming the Hebrew Canon of Jerome, and refused to allow any dogmatic authority to the apocryphal books, but the form in which this judgment was expressed varied considerably in the different confessions. The Lutheran formularies contain no definite article on the subject, but the note which Luther placed in the front of his German translation of the Apocrypha (ed. 1534) is an adequate declaration of the later judgment of the Communion: “Apocrypha, that is, books which are not placed on an equal footing (nicht gleich geachtet) with Holy Scripture, and yet are profitable and good for reading.” This general view was further expanded in the special prefaces to the separate books, in which Luther freely criticised their individual worth, and wholly rejected 9 and 4 Ezra as unworthy of translation. At an earlier period Carlstadt (1520) published a critical essay, De canonicis scripturis...
The Calvinistic churches generally treated the question with more precision, and introduced into their systems a distinction between the "canonical" and "apocryphal," or "ecclesiastical" books. The Gallican Confession (1561), after an enumeration of the Hieronymian Canon (Art. 9), adds (Art. 4) "that the other ecclesiastical books are useful, yet not such that any article of faith could be established out of them" (quo sc. Spiritu Sancto) sugerentes docemur, illius [sc. librorum Canonicos] ab aliis libris ecclesiasticis discernere, qui, ut sint utilis, non sunt tamen ejusmodi, ut ex his constituti non alius aliquis fidei articulus). The Belgic Confession (1561?) contains a similar enumeration of the canonical books (Art. 4), and allows their public use by the Church, but denies to them full independent authority in matters of faith (Art. 6). The later Helvetic Confession (1562, Bullinger) notices the distinction between the canonical and apocryphal books, without pronouncing any judgment on the question (Niesmeyer, Liber. Synod. Eccles. Ref. p. 465). The Westminster Confession (Art. 9) places the apocryphal books on a level with the rest of Scripture, and concedes to them no other authority in the Church.

5. The English Church (Art. 6) appeals directly to the opinion of St. Jerome, and concedes to the apocryphal books (including [1571] 4 Ecles and the Prayer of Manasses) a use "for example of life and instruction of manners," but not for the establishment of doctrine; and a similar decision is given in the Irish Articles of 1615 (Hardwick, ut sup. p. 841 sq.). The original English Articles of 1552 contained no catalogue (Art. 5) of the contents of "Holy Scripture," and no mention of the Apocrypha, although the Tridentine decree (1546) might seem to have rendered this necessary. The example of foreign churches may have led to the addition upon the later revision. The Methodist Episcopal Church has adopted the same Canon of Scripture, but entirely omits the Apocrypha (Discipline, pt. i, ch. 1, § 2, Art. 5); and those books, as they stand in the Hebrew Canon and Greek Testament, are alone recognized in the Evangelical Church.

6. The expressed opinion of the later Greek Church on the Canon of Scripture has been modified in some cases by the circumstances under which the declaration was made. The "Confession" of Cyril Lucar, who was most favorably disposed toward the Protestant churches, confirms the Laodicene Canon, and marks the apocryphal books as not possessing the same divine authority as those whose canonicity is unquestioned (Kimmel, Mon. Fed. Eccles. Or. i, 42). In this judgment Cyril Lucar was followed by his friend Metaphrastes Critopulus, in whose confession a comparison of the books of the Greek and Hebrew Canons is given (Kimmel, ii, 105 sq.), while some value is assigned to the apocryphal books in consideration of their ethical value; and the detailed decision of Metaphrastes is quoted with approval in the "Orthodox Teaching" of Platon, Metropolitan of Moscow (ed. Athene, 1856, p. 503). The "Orthodox Confession" simply refers the subject of Scripture to the Church (Kimmel, p. 159; comp. p. 123). On the other hand, the Synod at Jerusalem, held in 1672, "against the Calvinists," which is commonly said to have been led by Roman influence (yet comp. Kimmel, lxxxvii), pronounces that the books which Cyril Lucar "ignorantly or maliciously called apocryphal" are "canonical and Holy Scripture," on the authority of the testimony of the ancient Church (Kimmel. Weissenhorn, Death. Confess. p. 467 sq.). The Constantinopolitan Synod, which was held in the same year, notices the difference existing between the Apostolic, Laodicene, and Cartaginian Catalogues, and appears disposed to distinguish between the apocryphal, Hagiographical, and other books, though not included in the Hebrew collection, while he rejected the remainder of the Apocrypha, with considerable parts of Daniel, as "utterly apocryphal" (plane apocrypho; Creden. p. 389, 410 sq.).

7. The history of the Syrian Canon of the O. T. is involved in great obscurity from the scantiness of the evidence which can be brought to bear upon it. The Peshito was made, in the first instance, directly from the Hebrew, and consequently adhered to the Hebrew Canon; but as the Sept. was used afterward in revising the version, many of the apocryphal books were translated from the Greek at an early period, and added to the original. As a result, the Sept. differs from the Hebrew. Yet this change was only made gradually. In the time of Ephrem (cir. A.D. 370) the apocryphal additions to Daniel were yet wanting, and his commentators were confined to the books of the Hebrew Canon, though he was acquainted with the Apocrypha (Lardner, Critical Library, iv, 427 sq.; see Lengerke, Daniel, p. 43). The Syriac writers wrote without any light upon the question. Gregory Bar Hebraeus, in his short commentary on Scripture, treats of the books in the following order (Assemani, Bibl. Orient. ii, 282): the Pentateuch, Josh., Judg., 1 and 2 Sam., Psalms, 1 and 2 Kings, Prov., Eccles., Cant., Wis., Ruth, Hiat., Sus., Job, Isa, 12 Proph., Jer., Lam., Ezek., Dan., Bel., 4 Gosp., Acts ... 14 Epist. of Paul; omitting 1 and 2 Chron., Ezra, Neh., Esther, Tobit, 1 and 2 Macc., Judith, (Baruch?), Apocalypse, Epistle, James, 1 Pet., 1 John.

In the Scriptural Vocabulary of Jacob of Edessa (Assemani, Bibl. Orient. iii, 5 sq.), there is rather a general survey of all the Hebrew and Christian literature with which he was acquainted (Catalogus litterarum omnium Ecclesiasticorum) than a Canon of Scripture. After enumerating the books of the Hebrew Canon, together with Eccles., Wis., Jud., add. to Dom., and Baruch, he adds, without any break, "the traditions of the Elders" (Mishna), the works of Josephus, including the Fables of Zosip which were popularly ascribed to him, and at the end mentions the works of the writing Tobit, and the five books of Haggai, after enumerating the 4 Gosp., Acts, 3 Cath. Epist. and 14 Epist. of Paul, he passes at once to the Diatessaron of Tatian, and the writings of "the disciples of the apostles." Little dependence, however, can be placed on these lists, as they rest on no critical foundation, and it is known from other sources that varieties in the order of the books exist ed in the Syrian Church (Assemani, Bibl. Orient. iii, 6 note).

One testimony, however, which derives its origin from the Syrian Church, is specially worthy of notice. Junilius, an African bishop of the 6th century, has preserved many of his writings of Paulus, a Persian, on Holy Scripture, who was educated at Nisibis, where "the Divine Law was regularly explained by public masters" as a branch of
common education (Jael. De part. leg. Praef.). He divides the books of the Bible into two classes, those of "perfect" and those of "mean" authority. The first class includes all the books of the Hebrew Canon with the exception of 1 and 2 Chron., Job, Canticles, and Esther, and with this he represents the common sense of the second class consists of Chronicles (2), Job, Esdras (2), Judith, Esther, and Maccabees (2), which are added by "very many" (plurimi) to the canonical books. The remaining books are pronounced to be of no authority, and of these Canticles and Wisdom are said to be added by some (quidam) to the Canon. The classification, as it stands in the text, is not in keeping with the order in which the voice of the Church has given more attention than it has received (comp. Hody, p. 538; Gallandii Biblioth. xii. 79 sq. The reprint in Wordsworth, On the Canon, App. A, p. 42 sq., is very imperfect).

8. The Armenian Canon, as far as it can be ascertained from editions, follows that of the Sept., but it is of no critical authority; and a similar remark applies to the Ethiopic Canon, though it is more easy in this case to trace the changes through which it has passed (Dillmann, Uber d. Aeth. Kan., in Ewald's Jahrbuch, 1853, p. 144 sq.).

The great work of Hody (De biblior. text. Oxon. 1705) contains a rich store of materials, though even this is not free from minor errors. Stuart's Critical History and Defence of the Old-Test. Canon is rather an apology than a history. See APOCRYPHA.

IV. The Canon of the New Testament.—The history of the N.T. Canon presents a remarkable analogy to that of the Canon of the O.T. The beginnings of both canons are lost in the obscurity of ages under which they arose; both grew silently under the guidance of an inward instinct rather than by the force of external authority; both were connected with other religious literature by a series of books which claimed a partial and questionable authority; both gained definiteness in times of persecution. The chief difference lies in the general consent with which all the churches of the West have joined in ratifying one Canon of the N.T., while they are divided as to the position of the O.T. Apocrypha.

1. An ecclesiastical tradition (Photius, Bibl. Cod. p. 254) ascribes to the apostle John the work of collecting the books which he had written. There is no trace of a place in the Canon; but this tradition is too late, too unsupported by collateral evidence, and too much opposed by certain facts, such as the existence of doubt in some of the early churches as to the canonicity of certain books, the different arrangement of the books apparent in catalogues of the Canon still extant, etc., for any weight to be allowed to it. A much more probable opinion, and one in which nearly all the modern writers who are favorable to the claims of the Canon are agreed, is, that each of the original churches, especially those of larger size and greater ability, collected for itself a complete set of books which could be preserved, by competition in testimony, to be the production of inspired men, and to have been communicated by them to any of the churches as part of the written word of God; so that in this way a great many complete collections of the N.T. Scriptures came to be extant, the accordance of which with one another, as to the books admitted, furnished irrefragable evidence of the correctness of the Canon as we now have it. This opinion, which in itself is highly probable, is rendered still more so when we consider the scrupulous care which the early churches took to discriminate spurious compositions from such as were authentic—the existence, among some, of doubt regarding certain of the N.T. Books, indicating that each Church claimed the right of ratifying itself in this matter—their high veneration for the genuine apostolic writings—their anxious regard for each other's prosperity leading to the free communication from one to another of whatever could promote this, and, of course, among things, of those writings which had been intrusted to books and texts, and by which, more than by any other means, the spiritual welfare of the whole would be promoted—the practice of the fathers of arguing the canonicity of any book, from its reception by the churches, as a sufficient proof of this—and the reason assigned by Eusebius (Hist. Eccles. i. 26) for the transference of the O.T. into ομολογίαμαι and ἀντιλογίαμαι, viz. that the former class was composed of those which the universal tradition of the churches authenticated, while the latter contained such as had been received by the majority, but not by all (Storch, Comment. Hist. Crit. de Libb. N. Testamenti Canonis, etc. p. 112 sq.; Olshausen's Ekthesis der IV. Evang. p. 489). In this way we may readily believe that, without the intervention of any authoritative decision, either from an individual or a council, but by the natural process of each body of Christians seeking to procure for themselves and to convey to their brethren authentic copies of writings in which all were deeply interested, the Canon of the New Testament was formed.

2. The first certain notice which we have of the existence of any of the New Testament writings in a collected form occurs in 2 Pet. iii. 16, where the writer speaks of the epistles of Paul in such a way as to lead us to infer that at that time the whole or the greater part of these were collected together, were known among the churches generally (for Peter is not addressing any particular church), and were regarded as on a par with "the other Scriptures," i.e. which latter expression Peter plainly means the sacred writings both of the Old and New Testaments under which they arose. That John must have had before him copies of the other evangelists is probable from the supplementory character of his own gospel. In the anonymous Epistle to Diognetus, which is, on good grounds, supposed to be one of the earliest of the uninspired Christian writings, the writer speaks of the Law, the Prophets, the Gospels, and the Apostles (§ xi. ed. Hefele).—Ignatius speaks of "betaking himself to the Gospel as the flesh of Jesus, and to the apostles as the presbytery of the Church," and adds, "the prophets also we love," thus showing that it was to the Scriptures he was referring (Ap. ad Philadelp. § 3, ed. Hefele).—The early church was in no wise overburdened with the New Testament writings under the appellation of ai Ὑγίαι γραφαὶ, οὐ δὲ λίθος λίθος, and in one place mentions the Law, the Prophets, and the Gospels as alike divinely inspired (ad. Autol. iii. 11).—Clement of Alexandria frequently refers to the books of the New Testament, and distinguishes them into "the Gospels and Apostolic Discourses" (Quis Divae Salutis prop. fin. : Str. mut. sagispe).—Tertullian distinctly intimates the existence of the New-Testament Canon in a complete form in his day by calling it "Evangelicam Instrumentum" (adv. Marc. iv. 2), by describing the whole Bible as "nouum instrumentum utriusque Testamenti" (adv. Pros. c. 20), and by distinguishing between the "Scriptura Vetus" and the "Novum Testamentum" (Ibid. c. 13).—Irenæus repeatedly calls the writings of the New Testament "the Holy Scriptures," "the Oracles of God" (adv. Hær. ii. 27; i. 8, etc.), and in one place he puts the evangelical and apostolical writings of the New Testament as being with the "Iudas" (Ibid. i. 3, § 6). From these allusions we may justly infer that before the middle of the third century the New-Testament Scriptures were generally known by the Christians in a collected form, and revered as the word of God. That the books they received were the same as those now possessed by us is evident from the quotations from them furnished by the early fa-
there, and which have been so carefully collected by the learned and laborious Lardner in his Creditibility of the Gospel History. The same thing appears from the researches of Origen and Eusebius, both of whom carefully inquired, and have accurately recorded what books were received as canonical by the tradition of the churches or the church writers (συμμαθητής ὁ ἐν Ἕλληνων), and both of whom enumerate the same books as are in our present Canon, though some of them, such as the Epistles of James and Jude, the 2d Ep. of Peter, the 2d and 3d of John, and the Apocalypse, they mention that though received by the majority, they were doubted by some (Euseb. H. E. iii. 25; vi. 24).

Besides these sources of information, we have no fewer than ten ancient catalogues of the New-Testament books still extant. Of these, six accord exactly with our present Canon, while of the rest three omit only the Apocalypse, and one omits, with this, the Epistle to the Hebrews (Lardner’s Works, vol. iv. and v, 8vo; Horne’s introduction, i, 70, 8th edition).

</table>

The persecution of Diocletian was directed in a great measure against the Christian writings (Lact. inst. 2; de mort. pers. 16). The influence of the Scriptures then was already so great an assurance, that the surest method of destroying the faith seemed to be the destruction of the records on which it was supported. The plan of the emperor was in part successful. Some were found who obtained protection by the surrender of the sacred books, and at a later time the question of the admission of these “traitors” (tragikoi), as they were emphatically called, created a schism in the Church. The Donatists, who maintained the sterner judgment on their crime, may be regarded as maintaining in its strictest integrity the popular judgment in Africa on the contents of the Canon of Scripture which was the occasion of the dissociation; and Augustine allows that they held, in common with the Catholics, the same “canonical Scriptures,” and were alike bound by the authority of both Testamenta (August. c. Cer. i. 51, 57; Ep. 129, 3). The only doubt which can be raised as to the integrity of the Donatist Canon arises from the uncertain language that Augustine himself uses as to the Epistle to the Hebrews, which the Donatists may also have counterenacted. But, however this may have been, the complete Canon of the N.T. as commonly received at present, was ratified at the third Council of Rome (A.D. 387), and from that time was accepted throughout the Latin Church (Jerome, Innocent, Rufinus, Philastrius), though occasional doubts as to the Epistle to the Hebrews still remained (Ishid. Hist. Proleg. § 85-109). It will be perceived that there was no dispute as to the authentic and inspired character of most of the books, and as to the remainder there exist very respectable testimonies even in this early age (see Table IV). See Antilegomena.

4. At the era of the Reformation the question of the N.T. Canon again assumed great importance. The hasty decree of the Council of Trent, which affirmed the authority of all the books as received, called out the opposition of controversialists, who quoted and enforced the early doubts. Erasmus, with characteristic moderation, denied the apostolic origin of the Epistle to the Hebrews, 3 Peter, and the Apocalypse, but left their canonical authority unquestioned (Prof. ad Antileg.). Luther, on the other hand, with bold self-reliance, called upon a purely subjective standard for the canonicity of the Scriptures in the character of their “teaching of Christ,” and while he placed the Gospel and first Epistle of John, the Epistles of Paul to the Romans, Galatians, Ephesians, and the first Epistle of Peter as containing “the foundation of Christianity,” he set aside the Epistle to the Hebrews, Jude, James, and the Apocalypse at the end of his version, and spoke of them and the remain-
### Antilegomena

Antilegomena with varying degrees of disrespect, though they did not separate 2 Peter and 3 John from the other Epistles (comp. Landerer, art. Konomon in Herzog’s Enzyklop. p. 290 sq.). The doubts which Luther rested mainly on internal evidence were variously extended by some of his followers (Melancthon, Creuzer, Mostel, Flaccus, Gerhard; comp. Reuss, § 834); and especially with a polemical aim against the Romish Church by Chemnitz (Examen Conc. Trid. I, 78). But while the tendency of the Lutheran writers was to place the Antilegomena on a lower stage of authority, their views received no direct sanction in any of the Lutheran symbolic books which admit the "prophetic and apostolic writings of the Old and New Testaments" as a whole, without further classification or detail. The doubts as to the Antilegomena of the N. T. were not confined to the Lutherans. Carlstadt, who was originally a friend of Luther and afterward professor at Zurich, endeavored to bring back the question to a critical discussion of evidence, and placed the Antilegomena in a third class "on account of the controversy as to the books, or rather cut certiori loquar as to their author" (De Con. Script. p. 410-12, ed Credn.). Calvin, while he denied the Pauline authorship of the Epistle of the Hebrews, and at least questioned the authenticity of 2 Peter, did not set aside their canonicity (Prof. ad Hebr.; ad 2 Petr.); and he notices the doubts as to James and Jude only to dismiss them.
5. The language of the Articles of the Church of England with regard to the N. T. is remarkable. In the Articles of 1552 no list of the books of Scripture is given; but in the Elizabethan Articles (1562, 1571) a definition of Holy Scripture is given as: "the canonical books of the Old and New Testament, of whose authority was never any doubt in the Church" (Art. vi). This definition is followed by an enumeration of the books of the O. T. and of the Apocalypse; and then it is said summarily, without a detailed catalogue, "all the books of the N. T. are common and received, and do receive and account them for canonical" (pro canonica habemus). A distinction thus remains between the "canonical books" and such "canonical books as have never been doubted in the Church:"; and it seems impossible to avoid the conclusion that the framers of the Articles intended to leave a freedom of judgment on a point on which the greatest of the Continental reformers, and even of Romish scholars (Sixtus Sen. Biblioth. 8, 1, 1; Cajetan, Prof. ad Epis. ad Hb., Joc., 2, 3 John, Jud.) were divided. The omission cannot have arisen solely from the fact that the Article in question was framed with reference to the Church of Rome, and that the language of that Church, it is agreed, was that of the N.-T. Canon, for all the other Protestant confessions which contain any list of books give a list of the books of the New as well as of the Old Testament (Conf. Belg. 4; Conf. Gall. 3; Conf. Fid. 1). But, if this license is rightly conceded by the Anglican Articles, the omission of the New Testament and of the Vulgate themselves of it. The early commentators on the Articles take little (Burnet) or no notice (Beveridge) of the doubts as to the Antilegomena; and the chief controversialists of the Reformation acknowledged the full Canon with emphatic avowal (Whitaker, Dep. on Scripture, cxlv, p. 105; Fulke’s Defence of Eng. Trans. p. 8; Jewell, Defence of Apr. ii, 9, 1).

6. The judgment of the Greek Church in the case of the O. T. was seen to be little more than a reflection of the opinions of the West. The difference between the Roman and Reformed Churches on the N. T. was less marked; and the two conflicting Greek confessions confirm, in general terms, without any distinct enumeration of books, the popular Canon of the N. T. (Cyr. Luc. Conf. 1, p. 42; Donith. Confess. 1, p. 467). The Confession of Metroponius gives a complete list of the books, and compares their number—thirty-three—with the years of the Savior’s life, that “not even the Papists dare devou of the divine mystery” (Metrop. Critop. Conf. ii, 105, ed. Kinn. et Weissemb.) At present, as was already the case at the close of the 17th century (Leo Allatius, ap. Fabric. Bibl. Graec. v, App. p. 86), the Antilegomena are reckoned by the Greek Church as equal in canonical authority in all respects with the remaining books (Catech., ut sup.).

V. Authority of the present Canon of Scripture.—I. The assaults which have been made, especially during the present century, upon the authenticity of the separate books of the O. and N. Test., are noticed under the special topics. The general nature of which they have taken is simple and natural.Semler (Untersuch. d. Kan. 1771—5) first led the way toward the later subjective criticism, though he rightly connected the formation of the Canon with the formation of the Catholic Church, but without any clear recognition of the providential power which wrought in both. Next followed a series of speculations in which several books were discussed individually, with little regard to the place which they occupy in the whole collection (Schleiermacher, Bretschneider, De Wette, etc.). At last an ideal view of the early history of Christianity was used as the standard by which the books were to be tried, and the books were considered separately, from the point of view of doctrine, and not the sources of them (F. C. Baur, Schwegr. Zeller). All true sense of historic evidence was thus lost. The growth of the Church was left without explanation, and the original relations and organic unity of the N. T. were disregarded.

2. In order to establish the Canon of Scripture, it is necessary to show that all the books of which it is composed are of divine authority; that they are truth and incorrupt; that, having them, it is complete without any addition from any other source; and that it comprises the whole of those books for which divine authority can be proved. It is obvious that, if any of these four particulars be not true, Scripture cannot be the sole and supreme authority; that religion is truth and duty. If any of the books of which it is composed be not of divine authority, then part of it we are not bound to submit to, and consequently, as a whole, it is not the standard of truth and morals. If its separate parts be not in the state in which they left the hands of their authors, but have been mutilated, interpolated, or altered, then it can form no safe standard; for, in appealing to it, one cannot be sure that the appeal is not made to what is spurious, and what, consequently, may be erroneous. If it require or admit of supplementary revelations from God, whether preserved by tradition or communicated from time to time to the Church, it is not the standard, in terms to call it complete, as a standard of the divine will. And if any other books were extant, having an equal claim, with the books of which it is composed, to be regarded as of divine authority, it would be absurd to call it the sole standard of truth, for in this case the one standard so frequent be as deserving of our reverence as the other.

3. Respecting the evidence by which the Canon is thus to be establishe there exists considerable difference of opinion among Christians. Some contend, with the Romanists, that the authoritative decision of the Church is alone competent to determine the Canon; others appeal to the concurrent testimony of the Jewish and early Christian writers; and others rest their strongest reliance on the internal evidence furnished by the books of Scripture themselves. We cannot say that we are satisfied with any of these sources of evidence exclusively. As Michaelis remark, the first is one to which no consistent Protestant can appeal, for the matter to be determined is of such a kind that, unless we grant the Church to be infallible, it is quite possible that she may, at any given period of her existence, determine erroneously; and one sees not why the question may not be as successfully investigated by a private man as it is by a private man. The concurrent testimony of the ancient witnesses is invaluable as far as it goes; but it may be doubted if it be sufficient of itself to settle this question, for the question is not entirely one of facts, and testimony is good proof only for facts. As for the internal evidence, one needs only to look at the canon which Semler and his school have made of the Canon, to be satisfied that where dogmatical considerations are allowed to determine exclusively such questions, each man will extend or curtail the Canon so as to adjust it to his own preconceived notions. As the question is one partly of fact and partly of opinion, the appropriate ground of decision will be best secured by a combination of authentic testimony with the evidence supplied by the books themselves. We want to know that these books were really written by the persons whose names they bear; we want to be satisfied that these persons were commonly reputed and held by their contemporaries to be divinely inspired and of the Divine assistance, and we want to be sure that care was taken by those to whom their writings were first addressed, that these should be preserved entire and uncorrupt. For all this we must appeal to the testimony of competent witnesses as the only suitable evidence for such matters. But, after we have thus satisfied ourselves on these points, and accordingly, we still require to be satisfied that the books themselves contain nothing obviously incompatible with the ascription to their authors of the divine assistance, but,
on the contrary, are in all respects favorable to this supposition. We want to see that they are in harmony with each other; that the statements they contain are credible; that the doctrines they teach are not foolish, immoral, or self-contradictory; that their authors really assumed to be under the divine inspiration is what they wrote, and afforded competent proofs of this to those among them; and that all the circumstances of the case, such as the style of the writers, the allusions made by them to places and events, etc., are in keeping with the conclusion to which the external evidence has already led us. We advance to a complete moral proof of the divine authority and canonical claims of the sacred writings. See EVIDENCES.

(1) The external evidence of the several books, in turn, relates to three principal points: (a) Their genuineness; in other words, the fact that we have the actual works which have heretofore been known by these names, without essential defect, corruption, or interpolation. This is the province of criticism (q.v.) to show, as has been done by an irreproachable chain of documentary testimony. (b) Their authenticity (q.v.); or that they are the productions of the respective authors; and (c) the genuineness of historical investigation, aided by grammatical comparison; and this has been shown respecting the most of them as in positive a manner as in the case of any other equally ancient writings. (c) Their inspiration (q.v.); the most essential point of the three is this relation, an element which, although confessedly obscure and difficult to adjust in every respect with their human features, especially in the absence of any similar experience in modern times, is yet capable of twofold proof: (1) from statements and implication of revelation contained in the books themselves, showing these to be a divine communication; and, (2) by the conscious voice of the church, as to the sentiments of the body of believers. This last argument is undoubtedly the chief one, of an external character, that must be relied upon in defence of the authority of the Holy Scriptures, and it may well be claimed as a sufficient satisfaction to all rightly constituted minds. [1] that these books, both singly and as a whole, were so generally and early recognised as of divine authority by those who had the best opportunity to judge of their claims, by reason of proximity in time and place to their origin and intimacy with their authors, while, at the same time, they exhibited their caution and freedom from every suggestion of superstition; and the more pretentious ones as unworthy their acceptance; and [2] that the universal Church, with few and unimportant exceptions, has ever since not only cordially acquiesced, but firmly retained, in the face of almost every conceivable effort that the in-censor force of those of an opposite opinion could bring to bear upon the question, the same traditional persuasion; nor [3] has any really unanswerable difficulty yet been alleged in the way of such a belief.

(2) With the external evidence furnished above in favor of the sacred Canon, the internal fully accords. Is the Old Testament all is in keeping with the assumption that its books were written by Jews, sustaining the character, surrounded by the circumstances, and living at the time ascribed to their authors; or, if any apparent discrepancies have been found in any of them, they are of such a kind as further inquiry has served to explain and reconcile. The literary peculiarities of the several parts of the Testament, its language, style, its allusions, are all accordant with the hypothesis that its authors were exactly what they profess to have been — Jews converted to Christianity, and living at the commencement of the Christian era. Of both Testaments the theological and ethical systems are of such a kind as to tend to one grand result — the manifestation of the power and perfection of Deity, and the restoration of man to the image, service, and love of his Creator. The conclusion from the whole facts of the case can be none other than that the Bible is entitled to that implicit and undivided reverence which it demands as the only divinely appointed Canon of religious truth and duty.

VI. Literature.—For the later period of the history of the N.-T. Canon, from the close of the second century, the great work of Lardner (Credibility of the Gospel History, in his Works, 1-vi., ed. Kipps, 1778; also 1836, 10 vols. 8vo) furnishes copious materials. For early criticism, as necessarily imperfect, and requires to be combined with the results of later inquiries. Kirchhoefer's collection of the original passages which bear on the history of the Canon (Quellensammlung, etc., Zürich, 1844) is useful and fairly complete, but frequently inaccurate. The writings of P. C. Baur and his followers often contain very valuable hints as to the characteristics of the several books in relation to later teaching, however perversive their conclusions may be. In opposition to them Thiersch has vindicated, perhaps with an excess of zeal, but yet, in the main, rightly, the position of the apostolic writings in relation to the first age (Versuch zur Herstellung, etc., Erlangen, 1843; ed. G. Wulf, 1846); and the section of Reuss on the subject (Die Gesch. d. heil. Schriften d. N. T., 2d ed. Brunsw. 1863; also in French, Histoire du Can. de France, Strasbourg, 1863, 8vo), and the article of Landor (Herzog's Ency. d. k. s. v. e.v.), contain valuable summaries of the evidence. Other references and a fuller discussion of the chief points are given by Westcott in The History of the Canon of the N. T. (Cambr. 1865). In addition to the works named throughout this article, the following may also be consulted: Cosin, Scholastical History of the Canon (4to, London, 1657, 1672, 1683; also Works, iii., 4th ed.); Du Pin, History of the Canon and Writers of the Books of the Old and New Test. (2 vols. folio, London. 1829, 1829); Extr. Biblíoc. Sacra, see D'Aubry. The History of the Canon of the N. T. (Cambr. 1865). In addition to the works named throughout this article, the following may also be consulted: Cosin, Scholastical History of the Canon (4to, London, 1657, 1672, 1683; also Works, iii., 4th ed.); Du Pin, History of the Canon and Writers of the Books of the Old and New Test. (2 vols. folio, London, 1829, 1829); Extr. Biblíoc. Sacra, see D'Aubry.

Canon, ecclesiastical (kanon, rule, see the foregoing article, § i), a term used in various senses, as follows:

CANON, a clerical title.

1. The roll or church register in which, in the ancient Church, the names of the clergy were written was called the canon; and the clergy were hence called canonicum (Bingham, Orig. Ecc. bk. 1, ch. v, § 10). In Cyril (Pref. Catech. n. 8), the presence of the clergy is expressed by the words κανονικοὶ κανονοῦς. See also Canonicum.

2. Cathedral Canons. — Chrodegangus, bishop of Metz, about A.D. 755, gave a common claster-life law to his clergy, and thus originated the proper vita canonicum, as attached to a cathedral church. (See Chapter.) Originally canons were only priests or bishops, or inferior ecclesiastics; but in time we find they were living near the cathedral church to assist the bishop, depending entirely on his will, supported by the reve-
nurse of the bishopric, and living in the same house, as his counsellors or domestics. They even inherited his movables till A.D. 817, when this was prohibited by the Council of Aix-la-Chapelle. By degrees these communities of priests, shaking off their dependence, formed separate bodies, of which the bishops were still the head. In the tenth century there were communities of the same kind, established even in cities where there were no bishops: these were called collegiates, as the terms “college” and “congregation” were used indifferently. Under the second half of French kings the canonical life spread over the country, and each cathedral had its chapter distinct from the rest of the clergy (Farrar, s. v.).

Benedict XII (1389) endeavored to secure a general adoption of the rule of Augustine by the canons, which gave rise to the distinction between canonas regulari (i. e. those who follow that rule) and canonica seculari (those who do not). See Canonas, Regular. As demoralization increased, the canons were filled by younger sons of nobles, without ordination, for the sake of the revenues. The expectancies (q. v.) of canons became objects of traffic, as adwasons (q. v.) now are in the English Church. The canons were in the majority in the chapels, and canons in Germany: a few remain at Brandenburg, Merseburg, Naumburg, and Meissen.

In the Church of England, canonas or prebendaries are clergymen who receive a stipend for the performance of divine service in a cathedral or collegiate church.

Canon Law, a part of the mass or communion service of the Church of Rome. The office of the mass is divided into three parts: (1) from the introit to the preface; (2) which contains the canons, from the Sanctus to the time of communion; and (3) the thanksgiving. The second is considered the essential part, being that which contains the concretion of the elements. The Greeks call it diazopo- 

da, probably because of the exhortation of the priest at the commencement to the people, surnon corda. In the Roman liturgy the canon begins at the words Te igitur, etc. In the Roman Church the form of the canon remains the same at every mass. It is sometimes, by ancient writers, called the actio. It is also known by the name secreta, or secretum, because the priest is ordered to say it in a low voice; and, according to Goar, the same practice is observed in the East. (See Conc. Trident. sess. 22, can. 8.)—Marzene, De offic. Rom. Missae, Epist. et Evang. (L. v. v.); 1. Procer De Common Prayer, 329. See Mass.

CANON LAW, Canonas of Discipline, Canons and Decretals of Rome. The canons of rules of discipline of the Romish Church form a body of law which has been accumulating for centuries. They are made up of the so-called Apostolical Canons, of decrees of councils, and of decrees and rules promulgated by the popes. The different collections of these are: 1. For the early ages, the so-called “Apostolical Canons,” the Greek “Collections” in the Codex Canonum; 2. For the Middle Age, up to Gratian’s time, a number of collections; 3. In the twelfth century onward, the decretals of Gratian, of Gregorv IX, of Boniface VIII, the Clementines, the Extraordinary, and the Corpus Juris Canonici.

I. Early Ages.—(1.) Canonas Apostolical, a collection of canons (in number seventy-six or eighty-five, according to the different methods of division), not to be attributed as the name implies to the apostles Beveridge, in his Codex Con. Evol. Prim., seeks to show that these canons are the synodal rules and regulations made in councils anterior to the Council of Nicaea, in which view Petrus de Marca, Dupin, and others agree. Daillé (De Pseudoepigrapha Apostolica) conclusively proves, especially in the fifth century, that they are not of apostolical origin; it is very clear from the use in them of terms and mention of ceremonies quite unknown in the apostolic age, as well as from the fact that they were never even cited under the name of apostolical before the Council of Ephesus, if, indeed, we ought not, as some think, to read in the acts of that council, instead of the canons of the apostles, “It is the canons of the fathers which are read.” In this synod they are cited as Canonas Patrum, Canonas antiqui or eclesiasticæ. Bellarmine and Baronius claim apostolical authority for only the first fifty canons. Pope Gelasius (Distinct. xxv. can. Sacta Rumana) plainly declares, “Like Canones Apostolorum apocryphus ret; but the authenticity of the fathers is not ascertained.” It is the opinion of Beveridge (Cod. Canones Eccles. Primar. Lond. 1678) that the Apost. Canons were enacted in different synods about the close of the second century and beginning of the third; and that the collection was made soon after, but that since time interpolated; and that the compiler of the collection cannot be ascertained. Dr. Schaff sums up the whole case in the following judicious passages: “The contents of the so-called Apostolical Canons are borrowed partly from the Scriptures, especially the Pastoral Epistles, partly from tradition, and partly from the decrees of early councils at Antioch, Nicea, Cones, etc. Canonas, and canons, were not the same (but probably the same) in the Middle Ages as they were fore evidently of gradual growth, and were collected either after the middle of the fourth century or not till the latter part of the fifth, by some unknown hand, probably also in Syria. They are designed to furnish a complete system of discipline for the clergy. Of the lathy the compiler added only a word. The first last canon settles the canon of the Scripture, but reckon among the New Testament books two epistles of Clement and the genuine books of the pseudo-Apostolic Constitutions. The Greek Church, at the Trilcan Council of 692, adopted the whole collection of eighty-five canons as authentic and binding, and John of Damascus even placed it on a parallel with the epistles of the apostle Paul, thus showing that he had no sense of the infinite superiority of the inspired writings. The Latin Church rejected it at first, but subsequently decided for the smaller collection of fifty canons, which Dionysius Exiguus, about the year 566, translated from a Greek manuscript.”—Schaff, Church History, vol. 1, § 114.

Although these canons have special reference to discipline, they are not entirely silent on the subject of dogmas, morals, and the ceremonial of worship. They clearly distinguish between the orders of bishop and priest; and between the celerity of an altar and a sacrifice in the Church of Christ, and prescribe matters to be observed in the administration of baptism, the eucharist, penance, ordination, with many other things evincing a late date. They may be found in Labbel Concilia, vol. 1, and in Coteleri Patr. Operis, i. 199; also in Ultenz, Constitutiones Apostolices (Rostock, 1638, 8vo); in English, in Chase, Constitutions and Canons of the Apostles (New York, 1849, 8vo), and in Hammond, Canons of the Church (N. Y., 1844, p. 188 sqq.) See Krabbe, De Codice Canonum, etc., translated by Chase, in Bibliotheca Sacra, iv, 1; Mosheim, Commentaries, cent. i, § 51; Bunsen, Hippolytus (Eng. transl. vol. v-vii); and the article Clemen-tines.

(II.) Greek Collections: Codex Canonum. 1. The first mention of a Codex Canonum is found in the Acts of the Council of Chalcedon (A.D. 451), where a number of canons of previous councils (Nice, Ancyra, Anti- oich, Laodicea, etc.) are ascribed to the apostles' names. Other collections existed at the time, and others, again, followed, but none were considered as law for the whole Church. The so-called Codex Canonum Ecclesiae Universalis (Book of the Canons) was first published by Justellus (Paris, 1610, 8vo), reproduced in the Bibliotheca Juris Canonici, etc., op. Tom. 1661, vol. i, and also in Migne, Patrolog. Cur. Compl. (Paris, 1848, vol. lixvii). It is not authentic; the title and arrangement are Justinian's, and the work is only
as a unsuccessful attempt of his to make an authentic Greek Codex from the old collections and MSS.

2. In the fifth century we find the Western Church recognizing the authority of the Greek canons, and there are three principal collections of them, viz.:

(1) The so-called Corsican Codex (c. 400), is in the Bibliotheca Sacra, C涟ano, i, 275, from an incomplete MS, and afterward, in more complete form, by Ballerini (Opp. Leon. iii, 478).

(2) The translation and collection made by Dionysius Exiguus (q. v.), made probably at Rome toward the end of the fifth century, is in 4 books (1066 fol.), but is now A.D. 507) made a second collection, adding a number of papal decretales.

These were merged into one, and the codex thus formed was generally accepted throughout the Church. Pope Adrian (A.D. 774) presented an enlarged copy of it to Charlemagne, and it became the basis of the French canon law. In this enlarged form it is designated as the Adrogio-Diogneten Codex.

II. Middle Age.—1. In Africa the Nicene canons were supplemented by those of native councils, especially of Cartagena (q. v.). Fulgentius Ferrandus (q. v.), who compiled the convent of Septimania, added African decretales up to 427; it was published by Pitton (Paris, 1868), and in Migne, Patrolog. (1846, vol. iv. lxvii, p. 949). Cresconius, an African bishop, about 690 issued a Concordia Canumum (Bibl. Jur. Can. i, App. p. 30).

2. In Spain a Codex existed in the sixth century, which was afterward the basis of the pseudo-Isidorian Decretals. In the seventh century it assumed the form in which we know it (Codex Canumum Evang. Hisp. (Madrid, 1806, fol.), and part ii. Epistolae decretales, etc. Rom. Pontificum (Madrid, 1821, fol.). It contains canons of the Greek, African, French, and Spanish councils, and synods with Papal decretales from Dionysius to Gregory I. It does not appear that Isidore of Seville really had any share in preparing the collection which, after the discovery of the fraudulent decretales (see Pseudo-Isidorian), was known by his name. A new edition of the fraudulent decretales appeared in 1603, viz. Decretalium Pseudo-Isidorianum, etc., ed. Paula Hinesclus (Leipzig, 2 vols. 8vo).

3. In the British Islands and in the Anglo-Saxon Church native canons prevailed, of which we have no early tree. D'Achery has gathered the fragments of an Irish Codex of the eighth century in his Spiril金银, i, 491 sqq., which contains Greek, African, Gallic, and Spanish canons, as well as native canons. See also Spelman, Convivium, decretales, etc. in re eccl. orbis Britanynci (Lond. 1829-34, 2 vols. fol.).

4. In France the Spanish collection came into use in the eighth century, along with the Adriano-Dionysian mentioned above. In the ninth century many papal decretales and the pseudo-Isidorian collection were authorized with the authentic canons. The confusion led to several new collections:

(1) Componum collectio, in 881 titles, toward the end of the eighth century; (2) Collectio Achaetana (perhaps of the beginning of the ninth century); (3) The Penitentiales of bishop Halisgar of Cambrai, A.D. 925. Besides these there were numerous small collections, called Capitula Episcoporum.

The great increase of the worldly power of the clergy under the Carolingian dynasty necessitated more copious and complete collections of the canons. Among the more important we name (1) the Collectio Anselmi dedicata (888-897, 12 vols.), of Italian origin. It includes the pseudonismata and decretales (708-805), called in Isidore of Seville's later collection). It contained the canons of Nice, Ancyra, Cesarea, and Gangra. As to its date, we know for certain only this much, that this translation of the Nicene canons was known in Gaul A.D. 489 (Concil. Rereques, c. 8), and some of the canons of the Council of Tours were noted in the Concil. Episcopalium, A.D. 517. A later translation, adding the canons of Antioch, Constantinople, and Chalcedon to those above named, was compiled toward the end of the fifth century. It was first published from an Oxford MS. under the title Codex Ecclesiae Romanae (ed. Paschalis. Quenell, in Opp. Leonis, Par. 1676, 4 li.), and at a later period,

(2) Regini's Libri duo de consulis Synodalibus et dicis episcopalia, was compiled about A.D. 906, and includes also some of the false decretales. It is important for its account of the acts of the Councils of Germany, as well as for Bernard's List of decretales collectorum (1012-1029), in 20 books. To set forth the authority of certain canons, Burchard ascribes them to too early dates, and his errors, followed by Gratian, have been incorporated into later books. The nineteenth century, treating of penitential discipline, one of whose titles is Consuetudines superclerici, throws much light on the state of society in that age. Several editions exist: the latest is in Migne, Patrolog. vol. 140 (Paris, 1860). (4) Important manuscript collections of the eleventh century are the Collectio duodecim pars (after 1028); that of Anselm of Lucca (died 1160), in 18 books; two collections of cardinal Desiderius, each in 4 books (1085-1156); in the Lateran, employed. (To Leop of Chartres (died 1117) two collections are ascribed, viz.: the Decretum, in 17 books, and the Panormensis, in 8 books, of which the former seems to be a collection of materials for the latter. They are given by Migne, Patrolog. Lat. vol. cxxii. There are several other MSS. collections of minor importance.

III. From the Twelfth Century.—1. Gratian's. The want of a collection containing all canons and decretales of general interest, omitting merely local ones, and having a good arrangement, began to be universal about the twelfth century. Gratian, a monk of the convent of Saint Victor, in 1139, compiled a collection of all the canons and decretales as far as he could collect them. His work is now known as the Decretum Gratianum. It was compiled from all preceding books and many MSS. It is divided into three parts. The first part is subdivided into 101 Distinctiones, and each of these into canons. Of the 811 cases, each relating to the clergy, and this part of the book is called by Gratian himself Tractatus ordinandi. Part II contains 26 causes, or points of law, subdivided into questions, of which is answered by canons. Part III, De concordationibus, contains the sacraments, in five Distinctiones. In this work Gratian not only made a collection of the different canons in the certain cases, but presented all the canons treating upon them not under the same head. The decretum, with all its shortcomings—for it was not yet a complete work—soon superseded all other collections. But what mostly helped to gain for this decretum its position is, that Gratian's comments and elucidations resulted in the formation of a new and school of canonists, and decretalists at Bologna. This made the decretum known to all the churches, and brought it into such high esteem that the popes themselves quoted it, though it was not received by them as an official codex.

2. Other Collections before Gregory IX.—The papal decretales after the twelfth century became so abundant on points of discipline that the collection of Gratian, however complete at first, soon ceased to be so, and new collections were made. We mention only the principal ones.

(1) The Breviariarum extraromanorum of Bernardus of Pavia (6 bishop of Pavia) was compiled in 1384, containing new decretales not in Gratian's Decretum, and therefore called extra decretales sive tolerate, for which he made use of several minor collections posterior to Gratian, e.g. the Appendix Concilii Latrones, etc. His divisions under the titles Indicium, Indiciium, Clerus, Consilia (Sponsalia), and Cerimoni were adopted in subsequent collections. The Breviariarum of this work, written by Bernardus himself, was approved
of the Bologna school. As this was the first collection of Extravagantes, it is known as Volumen primum, or Compilatio prima.

(2.) The compilation of Petrus Collinioensis, made by order of Innocent III, containing the decretales of Innocent during the first eleven years of his reign (1198-1210). It was approved by the Bolognese canonists, and known as Compilatio tercia. The decretales of the popes, from Alexander III (1181) to Celestine III (1198), were compiled by Gilbertus and Alanus, two Englishmen, but were not received at Bologna until they were revised and completed by Johannes Gallen- sis, which was admitted and known as Compilatio secunda.

(3.) The Compilatio quarta was made after the fourth Lateran Council (1215), and contains the decretales of Innocent after 1210. These four compilations are given by Labbé, Antiquae collectiones decretales cum Ant. August. et. I. Cucullii not. et. emend. (Paris, 1609-1621).

3. Decretal of Gregory IX. — In 1298 Gregory IX directed his chaplain, Raymond of Pennafort, to make a new collection of decretales, suppressing many superstitious and scandalous articles, and arranging the whole systematically. This Decretalium Gregorii IX compilatio was in 1294 sent by the pope to the University of Bologna, with the bull Volentes igiustit, superseding the older compilations, although two of them had been published by popes. The new collection was introduced into university instruction as well as general practical use. Appendices and supplements were added by Innocent IV (1245), Alexander IV, Urban IV, Clement IV, and Gregory X.

4. Decretal of Boniface VIII. — In 1306 a new collection, including the post-Gregorian decretales, was published by Pope Boniface VIII under the title Liber sextus, because it was compiled by a new collection, which was completed under his successor, John XXII, and sent to the Universities of Paris and Bologna. It became a full authority in the Church, under the name Clementina (Constitutiones Clementinae). With the Clementines the code of canon law, as such, may be said to have been completed, as "the power of the popes has not since been sufficient to give the force of law to their enactments throughout Christendom." Later laws have been added from papal decretales, decisions of Trent, etc., but they have never obtained legal authority.

5. The Clementines. — In 1311 Pope Clement V published Liber septimus, which included constitutions of the General Synod of Vienna (1311) and his own decretales, in five books, and sent it to the University of Orleans. Here it seems to have stopped its circulation, and was sent to the University of Paris, with the bull Volentes igiustit, superseding the older compilations, although two of them had been published by popes. The new collection was introduced into university instruction as well as general practical use. Appendices and supplements were added by Innocent IV (1245), Alexander IV, Urban IV, Clement IV, and Gregory X.

of the English Church. The legislative constitutions were ecclesiastical laws enacted in national synods, held under the cardinals Otho and Othobon, legates from Pope Gregory IX and Pope Clement IV, in the reign of
king Henry III, about the years 1220 and 1225. The proposed constitutions are principally the decrees of provincial synods, held under divers archbishops of Canterbury, from Stephen Langton, in the reign of
king Henry III, to Henry Chichele, in the reign of Henry V, and adopted also by the province of York in the reign of Henry VI. At the dawn of the Reformation, in the reign of Henry VIII, the Parliament
that a review should be had of the canon law; and till such review should be made, all canons, constitutions, ordinances, and synods of provincial being then already made, and not repugnant to the law of the land or the king's prerogative, should still be used and executed. And as no such review has yet been perfected, upon this enactment now stands the authority of the canon law in England, the limitations of which appear, upon the whole, to be as follows: that no canon contrary to the common or statute law, or the prerogative royal, is of any validity; that, subject to this condition, the canons made anterior to the parliament of the reign of Henry VIII, which constitute the law of the Church as adopted in our system (for there are some which have had no reception among us), are binding both on clergy and laity; but that canons made since that period, and having no sanction from the Parliament, are, as regards the laity at least, of no force." See CANONS OF THE CHURCH OF ENGLAND.

Before the Reformation, degrees were as frequent in the canon law as in the civil law. Many persons became graduates in both, or juris urbsque doctores; and this degree is still common in foreign universities. But Henry VIII, in the twenty-seventh year of his reign, issued a mandate to the University of Cambridge, and the College of the Bishops, that the canons of the common law should be read, and no degree whatever in that faculty conferred in the university for the future. It is probable that Oxford received a similar prohibition about the same time, as degrees in canon law have ever since been discontinued in England (Penny Cyclopaedia, vi, 544).

In Scotland, Presbyterian thought the ecclesiastical system of that country be, the old Roman canon law still prevails to a certain extent. "So deep hath this canon law been rooted," observes Lord Stair, in his Institutes of the Scotch Law, "that even where the secular authority is rejected, yet canon and civil law must be had to be considered, not only by those by which Church benefits have been erected and ordered, but as likewise containing many equitable and profitable laws, which, because of their weighty matter, and their being once received, may more fitly be retained than rejected." In two old Scotch acts of Parliament, made in 1540 and 1551, the canon law is used in conjunction with the Roman law to denote the common law of the country, the expression used being "the common law, both canon, civil, and statutes of the realm" (Chamber's Encyclopaedia, s. v.).

In the United States the Roman Catholic Church is ruled by the Roman canon law, and also by the decrees of national and provincial councils, and by the regulations set forth by the bishops, subject to the revision of Rome.

Scotisci, ii, 294 sq.; Cunningham, Historical Theology, vol. ii, ch. xv; Hagenbuch, Theol. Encylopädie, § 112; Walter, Frazer juris Ecclesiasticis (Bonn, 1852); Boehmer, Institutionum Juris Canonicum (Hdh. 1780, 5th ed.).

CANON OF THE CHURCH OF ENGLAND.

The authority of the English canons rests upon "the statute 25 Henry VIII, commonly called the act of

submission of the clergy, by which they acknowledged that the convocation had been always assembled by the king's writ; and they promised, in verbo auctoritas, not to attempt, claim, or put in use, or enact, promulge, or execute any new canons in convocation without the king's assent or license. Then follows this enacting clause, viz.: That they shall not attempt, allege, or claim, or put in use any constitutions or canons without the king's assent." The first book of English canons was published in Latins in 1571, archbishop Parker and the bishops of Ely and Winchester being the principal agents in its construction, though all the bishops in both provinces signed, in their own persons or by proxy, signed it." These canons underwent various modifications, until, in 1604, bishop Bancroft collected a hundred and forty-one canons out of the articles, injunctions, and synodical acts passed and published in the reigns of Edward VI and Elizabeth, which were adopted by the Convocation of that year. These canons, which at first appeared in Latin, we have in English, under the title of "Constitutions and Canons Ecclesiastical." The code of canons was amplified in 1606, and finally completed by the addition of seventeen more in 1640. They did not hold the land, nor were they to be constituted the law of the Church until made pursuant to the statute 25 Henry VIII, since they were made in a convocation, sitting by the king's writ to the archbishops, after the Parliament was dissolved. After the Restoration, when an act was passed to restore the bishops to their ordinary jurisdiction, a proviso was made that the act should not confirm the canons of 1640. This clause makes void the royal confirmation. Hence we may conclude that canons should be made in a convocation, the Parliament sitting; that, being so made, they are to be confirmed by the sovereign; and that without such confirmation they do not bind the laity, much less any order or rule made by a bishop, the canons, which were the barest congeries of a canonic major, or canon law for it. See Burn, Ecclesiastical Law, App. to vol. iv. The canons are also given by Hammond, Definitions of Faith and Canons of Discipline, etc. (New York, 1841, 12mo). See Cardwell, Synodalia (Oxford, 1842, 2 vols. 8vo); Hall, Inquiry on the Canons and Articles (London); Eden, Church Dictionary, s. v.; Hook, Church Dictionary, s. v. See ENGLAND, CHURCH OF.

CANON OF THE PROTESTANT EPISCOPAL CHURCH (of America), the law or discipline of that Church. The canons are of two kinds: (1.) "The constitutions and canons of the General Convention, forming a code for the church, as such, in each and every church;" (2.) "The constitutions and canons of the several dioceses, of force only within their several precincts, and generally subordinate to the power of the General Convention." The canons are liable to be repealed or altered by the successive Conventions. They are given by Hammond, Definitions of Faith and Canons of Discipline (N. York, 1844, p. 283 sq.). There is also a Digest of the Canons by Dr. Hawks and Judge Hoffman (N. Y. 1860); see also Hoffman, Treatise on the Law of the Protestant Episcopal Church (N. York, 1860); Digest of the Canons for the Government of the Protestant Episcopal Church, adopted in the General Conventions of 1855, 1856, and 1865 (Boston, 1866, 8vo). See PROTESTANT EPISCOPAL CHURCH.

CANON REGULAR, a class of monastic orders in the Roman Catholic Church. The class comprises those canons (q. v.) who were only laymen under the same rule, but also bind themselves by either simple or solemn vows, and who therefore really constitute what is called in the Roman Church a 'religious' order (see ORDER, RELIGIOUS). The 'canons' owe their origin to Chardeogang (s. v.), who established them on a monastic basis; but after the tenth century the common life began to cease among a large portion of them. In the eleventh and twelfth centuries many
attempts were made to restore their monastic character, and a number of congregations were founded.

The most important among them were the Premonstratensians (q.v.), the congregation of St. Genoveva (q.v.), St. Rufus (q.v.), and of St. Victor (q.v.) in France, the Gilbertine canons (q.v.) in England, and the canons of the Holy Cross, or sometimes also called canons of the Holy Sepulchre, at Jerusalem.

All the congregations followed either the rule of St. Augustine, or else the rule of St. Benedict. They were very numerous in England, where they were introduced about 1105, and where they had, at the time of their dissolution, 176 houses (including those of the canonesses). Their habit was a long black cassock, with a white rochet over it, and over that a black cloack and hood. In 1519 cardinal Wolsey undertook the reformation of all the congregations of regular canons existing in England, in virtue of a bull of Leo X. He ordered them to hold general chapters every third year, and to restore a rigid discipline. A few years after they were suppressed, together with all other English monasteries. In Ireland the regular canons were so numerous that they counted as many houses as other orders together. One of the most celebrated reformers of the order in France was bishop Ivo of Chartres († 1113); yet he did not found an independent congregation.

The Congregation of St. Lawrence, near Oulx, in the Dauphiné, which was founded in 1560 by Gerard Charrieres, spread especially in Savoy and southern-eastern France. At the end of the eighteenth century they had nearly disappeared. The superior of the monastery of St. Lawrence, which still existed, bore the title of provost, possessed episcopal jurisdiction in his provosty, and was only dependent on the pope. The Congregation of Marbach, in Alsace, was established about 1100 by Wolfram de Lambarzach, and is said by some writers to have had, at one time, about 800 monasteries. Very numerous was the Congregation of Arouais, established about the same time by three hermits, one of whom was made a cardinal. It spread over England, Scotland, Flanders, and Poland. A reformed congregation of the Regular Canons of Lorraine (called the "Congregation of our Sisters") was established by Pierre Fourrier in 1624, but many of the other congregations refused to recognize it. The most celebrated and numerous of the congregations in Italy, next to that of Lateran (see LATERAN), was the Congregation of our Silent (of Bologna), founded by Stephen Cioni in 1408, which possessed, in the eighteenth century, three monasteries in the city of Rome. Few orders of the Roman Church have been often and more generally pervaded by gross abuses and corruptions than the regular canons. The greater number of the French congregations were extinguished by the French Revolution. A number of the regular canons of "the Sacred Heart" (generally called, after the street in Paris in which they had their first house, the Congregation of Pièce) was founded in 1828 by abbé Coudrin (see PIESCE, Congregation of). See Helyot, Ordes Religieuses, i, 761 sq.; Fehr, Geschichte der anden Seculari, i, 58, and 408.

Canonesses (Canonesses), a class of female orders in the Roman Church, organized after the model of the regular canons (q.v.), observing the rule of St. Augustine, and living in common. They are first found in the seventh century. They took no solemn vows, but were to remain unmarried, were generally governed by an abbot, and were under the spiritual direction of the canons. Those female societies, like the canons (q.v.), fell into irregularities; gave up the common life, and their property fell mostly into the hands of the nobility, who provided for some of their daughters by canonically living. Reformed congregations were frequently instituted, sometimes following the reformed canons, sometimes independent of them. Reformatory movements were particularly extensive at the close of the twelfth century, when the Beghards (q.v.) and Beguines (q.v.) made their appearance in many towns of the Netherlands. Those who did not bind themselves by a monastic rule were called secular canonesses (Canonesses seculares, or also Domiciales), and they were almost exclusively found in the institutions of noble ladies. Many of them married and then resigned their benefices. The Reformation in Germany did not abolish the houses of the canonesses, but changed most of them into asylums for the Protestant nobility. Celebrated houses ("clerics") of this class were at Ganderheim, Herford, Quedlinburg, Gernrode, etc., and after their model even new Protestant houses were founded at Halle, Altenburg, Frankfurt, and in other places, especially in Mecklenburg and the Netherlands. See Helyot, Ordres Religieuses (Paris, 1747), i, 789.

Canonism, virgins who devoted themselves to the celibate before the monastic life was known, and therefore before there were monasteries to receive them; and called canonics (canonical virgins), because their names were enrolled in the canon or matricula of the Church, that is, in the catalogue of ecclesiastics. They did not form separate monasteries, but lived privately in their fathers' houses, and had their maintenance from them, or, in case of necessity, from the Church; but the others lived in communities, and upon their own labor; so that it is now out of dispute, says Bingham, that, as the ascetics for the first three hundred years were not monks, so neither were the sacred virgins of the Church nums confined to a cloister, as in after ages.—Bingham, Orig. Eccles. bk. vii, ch. iv, § 1.

Canonical hours, certain stated hours of the day assigned to prayer and devotion. Such are Nocturns, Matins, Lauds, None, Vespers, and Complin. It is not known at what period these hours were settled in the early Church. The Apostolical Constitutions direct prayers to be said at dawn, and at the third, sixth, and ninth hours, as well as at evening. In England the canonical hours are from eight to twelve in the forenoon, before or after which marriage cannot lawfully be performed in any church.—Bingham, Orig. Eccles. bk. xi, ch. ix, § 6; Froster On Common Prayers, p. 10.

Canonical obedience is that submission which, by the ecclesiastical laws, inferior clergy are to pay to their bishops, and members of religious orders to their superiors.

Canonist, a professor of, or a writer upon, the Canon Law (q.v.).

Canonization, in the Roman and Greek churches, the act and ceremony of proclaiming a deceased person who is supposed to have been beatified (see Beatification) a saint, and enrolling such a catalogue of saints to be honored. In the Roman Church this is done by the pope only, who, after examination, "declares the person in question to have led a perfect life, and that God hath worked miracles at his intercession, either during his life or after his death, and that, consequently, he is worthy to be honored as a saint, which implies permission to exhibit his relics, to
CANONIZATION

brakes him, and to celebrate mass and an office in his honor.

In the Greek Church the ceremony of canonization takes place by the decision of the patriarch, who, having assembled his bishops for this purpose in synod, causes the testimonies of the witnesses in favor of the person to be canonized to be examined. A thousand witnesses are required. The trouble and expense incident to this process are so great that canonizations in the East are few.

A canonization due to "saints" was thought to be fulfilled by putting the name of the saint on the Sacred Diptrychs, or Album Sanctorum, or erecting oratories or churches under the invocation of the saint.

"Canonization in the Roman sense was not known before the tenth century, but some hold that the first canonizations were celebrated by Pope Gregory V, 894, and, from the close correspondence of its ceremonies with those which were performed at the apothecosis or deification of the ancient Romans, it is with great probability supposed to derive its origin thence. In consequence of the multiplication of saints during the Dark Ages, the canonization of any deceased Christians was prohibited by a solemn ordinance in the ninth century, unless it were done with the consent of the bishop. This edict occasioned a new accession of power to the Roman pontiff, as it ultimately vested in him the exclusive right of canonizing whomsoever he pleased. John XV was the first pope who exercised this power without obtaining the consent of the imperial court. In great formality, enrolled Udalric, bishop of Augsburg, among the number of the saints. Before a beatified person can be canonized four consistories are held. In the first the pope causes the petition of the parties requesting the canonization to be examined by three auditors of the rota, and directs the cardinals to revise all the necessary instruments; in the second the cardinals report the matter to the Roman pontiff; in the third, which is a public consistory, the cardinals pay their adoration to the pope. One person, called the devil's advocate, says all he can against the person to be canonized, raises doubts on the genuineness of the miracles said to be wrought by him, and exposes any want of formality in the procedure. It is said that the ingenuity and eloquence of the devil's advocate nearly prevented the canonization of cardinal Borromeo in the seventeenth century. But another advocate makes a pompous oration in praise of the person who is to be created a saint, in which he expatiates on the miracles said to have been wrought by him, and even pretends to know from what motives he acted. In the fourth and last consistory, the pope, having convened all the cardinals, orders the report concerning the deceased to be read, and then proceeds to take their votes, whether he is to be canonized or not. Previously to pronouncing the sentence declaring the beatified party to be a saint, the pope makes a solemn protestation that, by this act of canonization, he does not intend to do anything contrary to faith, or to the Catholic [Romish] Church, or to the honor of God. On the day appointed for the ceremony the church of St. Peter at Rome is hung with a veil, on which are emblazoned the arms of the pope, and of the sovereign or prince who desires the canonization, and is also brilliantly illuminated. Thousands of devout members of the Romish communion fill that capacious edifice, eager to profit by the intercessions of the new saint. During the ceremony of canonizing, the pope and cardinals are all dressed in white. The expenses, which are very considerable, are defrayed by the royal or princely personage to whose request the beatified person is enrolled among the saints. The cost of canonizing the saints Pedro de Alcántara and Maria Maddalena di Fazzli, under the pontificate of Clement IX, amounted to forty-four thousand scudi" (Eadie, Écoles. Dict. s. v.). No person can be canonized until at least fifty years after death, nor if h: be believed to have passed into

purgatory, nor if he be a baptized infant dead before reaching years of discretion, except in cases of martyrdom. In the act of canonization, the pope proceeds to that of canonization. See BEATIFICATION.

The worship of "canonized saints" is enjoined by the Council of Trent (Sees. xxv, De invocatione, etc.). Many Romanists have declared against this superstition; and the Protestant churches reject it as idolatrous. Canonization is a relic of Paganism. In the thirteenth century a Dominican canonized a saint being canonized. In 1569 there died at Ferrara a wealthy citizen, Armando Pungilovo, whose extraordinary charities endeared him to the poor, while his austere and exemplary life procured him a general reputation of sanctity. He was buried in the cathedral, in the presence of an immense crowd, who lamented his benefactor; and such was the public veneration that miracles were soon wrought, or appeared to be, on the spot where he was buried. An altar was built over his remains, and statues were erected in his honor throughout the churches of the diocese. The bishop and chapter of Ferrara proceeded to an investigation of the miracles wrought at his tomb, as a preliminary step to applying for his canonization, and professed themselves satisfied of the veracity of persons who testified that they had themselves been cured—some of blindness, others of paralysis. What was the general constellation when the Dominican Aldobrandini, inquisitor general in Lombaria, saw an ex vomitamentum, a white excreta which he considered as insatiable evidence that the deceased was a member of the Catharists (q. v.); that his house had been for years the asylum of their teachers; and that he had both received and administered the concomitamentum (q. v.). The clergy of Ferrara were slowly and unwillingly convinced; the people not at all; but, after repeated investigations, and a delay of more than thirty years, those remains, which had well-nigh been proposed to the adoration of the faithful, were dug up with ignominy and burned to ashes. See Hellmann, Concordatio Sanctorum, etc. (Hai. 1754, 4to); Elliott, Delin- cionem di Romaniacum, bk. iv, ch. iv; Hurst, Religious Rites and Ceremonies, 244; Ferraria, Promiscus Bibliotheca, s. v. Veneratio Sanctorum, ix, 119 sq.; Chemnitz, Examen Concil. Trident. pt. ii, loc. 6; pt. iii, loc. 4; Herzog, Real-Enzyklopädie, vii, 526; Eadie, Eccl. Dictionary, s. v.; Hook, Ch. Dictionary, s. v.

Canopy (κωναπειον, from κωναφια, a pestis; Vulg. confusio): (1) In the O. T. the term employed for the hanging of the couch of Holofernes (Judith x, 21; xiii, 9; iv, 19), whereupon it occurs in the LXX. Although, perhaps, from the "pillars" of the litter described in Cant. iii, 10, it may be argued that its equipage would include a canopy. It probably remained the most common of canopies or curtains in which the name originated, although its description (Judith x, 21) betrays luxury and display rather than such simple usefulness. Varro (R. R. ii, 10, 8, ve, term the term (purus) in conopea sacra) of languid women very much as the book of Judith (λελαυβως της μικρής . . . και θεονομοιος) describes the position of a luxurious general. (For further classical illustration, see Smith, Dict. of Ant. s. v. Conopenum.) It might possibly be asked why Judith, whose business it was to escape with the body, should have any trouble to pull down the canopy on the body of Holofernes? Probably it was an instance of the Hebrew notion that blood should be instantly covered (comp. 2 Sam. xx, 12; Levit. xvii, 18 [see Blood]), and for this purpose the light bedding of Syria was inadequate. See BDB. Tent (in the O.T. also) is a shade, a shadow; hence even when most luxurious, that of a palace, and thus a woman's hand might unfix it from the pillars without much difficulty.

(2) In ecclesiastical use, see Baldachin.

Canstein, Karl Hiderbrand, Baron von, was born Aug. 15, 1867, at Lindenburg, in Germany, studied law at Frankfurt on the Oder, travelled much in
Europe, and in 1688 was appointed page of the elector of Brandenburg. He afterward served as a volunteer in the Netherlands. A dangerous sickness obliged him to leave the military service, and led him to a religious life, in which he was thereby helped by Spener (q. v.). His wish to spread the Bible among the poor led him to form the idea of printing it with stereotype plates. Thus originated the famous institution, called in German Die Canticaneische Biblianstalt. He lived to see 100,000 Testaments and 40,000 Bibles sold from these presses. It is still carried on on a very large scale; the books are furnished at cost prices (about twenty-five cents for the Bible and eight for the Testament). Up to 1854, 4,612,000 Bibles and 2,650,000 Testaments had been sold. He edited a Harmonie der 4 Evangelisten (2d ed. 1727, fol.), and also wrote Lebenbeschreibung Speners (Life of Spener), the edition of which by Lange, 1740, contains a La- raryph of Canstein, who died at Halle, Aug. 19, 1719. See also Niemeyer, Geschichte der Canticaneischen Biblianstalt (Halle, 1827, 8vo); Plath, Leben von Canstein (1681, 8vo); Bertram, Geschichte der Canticaneischen Bib- lianstalt (1863, 8vo); Jahrbcher f. Deutsche Theol- oge 1 (1845); Kronbergs, Neue, Nov., Nouv. Generale, viii, 510; Herszog, Real-Encyclopaedie, ii, 552.

Canterbury (Canterbury Doreorum), the capital of the county of Kent, a cathedral city and the seat of an archbishop, who is the metropolitan of all England. It is 56 miles from London, E.S.E., on the road to Dover. When Augustine became archbishop of this see, A.D. 597, king Ethelbert granted his palace here to the archbishop and his monks, who thereupon began to build a monastery, converting an ancient church in the neighborhood (said to have been used by the Roman Christians) into his cathedral church. Cuthbert, the eleventh archbishop, A.D. 740, added a church to the east of this. In the course of ages it received numerous additions, until it assumed its present magnificent form. Among those who helped to repair, enlarge, and rebuild were archbishops Odo (A.D. 940), Lan- franc (1070), and Anselm (1098). In 1174 the choir was destroyed by fire, and in order to the rebuilding of it a number of French and English artists were summoned. Among the former was a certain William of Sens, and to him, a man of real genius, the work was entrusted. The church was made a sort of reliquary: Plant- mond had brought hither the body of the martyr Bla- sius from Rome; there were the relics of St. Wilfred, St. Dunstan, and St. Ethelphe; the murder of Thomas Becket (q. v.) took place in the north transept. Dec. 29, 1173. The total exterior length of the cathedral is 346 ft., and the breadth is 175 ft.; the eastern transept is 117 ft. The crypt is of great extent and loftiness—owing to the choir being raised by numerous steps at the east end—than any other in England. The archbishop of Canterbury is primate of all England, metropolitan, and first peer of the realm. He ranks next to royalty, and crowns the sovereign. His ecclesiastical province includes all England, except the six northern counties. Among his privileges, he can confer degrees in divinity, law, and medicine. His seats are at Lambeth and Addington Palace. He is patron of 149 livings. The present archbishop is Charles Thomas Longley, translated to the see in 1862. —Landon, Ecc. Dict. Chambers, Enq. Encyclop., s. v.

Cantharis (a cup or pot). In the atrium of ancient churches there was commonly a fountain or ci- tern, in which worshippers could wash their hands and faces before entering the church. Eusebius says that in the court over against the church were placed fountains (sports) of water, as symbols of purification, for such to wash as entered into the church (De Orat. c. xi). Pliny, Natural History, Nola has this fountain candensus (Epit. xii, ad Ser.); in Sophocles' Phaedra, the fountain was surrounded with lions, from whose mouths water spouted; whence the place

is also called by some ecclesiastical writers leontarium. It is also called nympharum, σωματιζων, both of which signify a fountain. Tertullian exposes the absurdity of men going to prayers with washed hands while they retained a filthy spirit. Augustin was helped by Spener (q. v.). His wish to spread the Bible among the poor led him to form the idea of printing it with stereotype plates. Thus originated the famous institution, called in German Die Canticaneische Biblianstalt. He lived to see 100,000 Testaments and 40,000 Bibles sold from these presses. It is still carried on on a very large scale; the books are furnished at cost prices (about twenty-five cents for the Bible and eight for the Testament). Up to 1854, 4,612,000 Bibles and 2,650,000 Testaments had been sold. He edited a Harmonie der 4 Evangelisten (2d ed. 1727, fol.), and also wrote Lebenbeschreibung Speners (Life of Spener), the edition of which by Lange, 1740, contains a Lararyph of Canstein, who died at Halle, Aug. 19, 1719. See also Niemeyer, Geschichte der Canticaneischen Biblianstalt (Halle, 1827, 8vo); Plath, Leben von Canstein (1681, 8vo); Bertram, Geschichte der Canticaneischen Biblianstalt (1863, 8vo); Jahrbcher f. Deutsche Theologe 1 (1845); Kronbergs, Neue, Nov., Nouv. Generale, viii, 510; Herszog, Real-Encyclopaedie, ii, 552.

The name, however, occurs only once (iv, 4); and the insertion of the letter in this solitary inscrip- tion is easily accounted for by a supposed error in transcribing. At any rate, the insertion of the "would not bring the Canticles so far down as the time of Ezra, since we find the same peculiarity in Hos. iii, 5, and Amos vi, 5 (Genesis, Theaur., s. v.). The charge of Chaldais has been vigorously pressed by Rosenmuller, and espe- cially by Eichhorn, who, in his Heb. Gr., § 21, signs the book to the golden age of Hebrew literature, and traces the "few solitary Chaldais" which occur in the writings of that age to the hands of Chaldee copysts. Genesius has moreover suggested an impor- tant distinction between Chaldais and dialectic variations indigenous to Northern Palestine, where he conjectures that Judges and Canticles were composed. The application of this principle is sufficient to elim- inate most of the Chaldais alleged by Eichhorn (es. g. [shore] for [shore]); while the occurrence of similar forms in Phoenician affords an indication of other intrusive forces besides the Aramean acting upon the Biblical Hebrew. Nor is the suggestion of Genesius that the book was written in Northern Palestine, and con- sequently timed with a local coloring, inconsistent with the opinion which places it amonst the "one thou- sand and five" songs of Solomon (1 Kings iv, 32).
Comp. 1 Kings ix. 19 with 2 Chron. viii. 6, where the buildings of Lebanon are decidedly contrasted with those of Jerusalem, and are not, therefore, to be con-
 tended with the “house of the forest of Lebanon” (1 Kings vii. 2), which was probably in Jerusalem. By a further comparison of these passages with Robinson’s (Bible, 1840), Solomon, in English buildings as still standing on Lebanon, it will appear probable that Solomon had at least a hunting-seat somewhere on the slopes of that mountain (comp. Cant. iv. 9). In such a retreat, and under the influ-
 ence of its scenery, and the language of the surrounding
 land, minute details of the desert, a poet might easily add-
 tistically, this would have been in keeping with the
 general conditions of pastoral poetry. In our own
 language such compositions are not unfrequently ac-
 commodated to rustic ideas, and sometimes to provin-
 cial dialects. If, moreover, it should be urged that
 Chaldeans are not provincials, it may be replied that
 Solomon could scarcely be ignorant of the Ar-
 menian literature of his own time, and that he may
 have consciously used it for the purpose of enrichment (Gesen. Heb. Gr. § 2, 4).

 The title, though it is possibly too flattering to have
 come from the hand of Solomon, must have existed in
 the form for many centuries; it is not even any
 lay claim to a respectable antiquity. The moral argu-
 ment put forward by the supporters of the more re-
 cent Hieral interpretation, and based upon the impro-
 bability of Solomon’s criminating himself (see below), is
 not very conclusive. Even on the theory of those
 interpreters his conduct might be traced to a spirit of
 generous self-accusation; and, at any rate, it need not
 be exalted above the standard which was likely to
 flourish in the atmosphere of a court such as his. On
 the whole, then, it seems unnecessary to depart from
 the plain meaning of the Hebrew title.

 Supposing the date fixed to the reign of Solomon,
 it is too great intimacy has been employed by the Rabbinical
 and some Christian writers in determining at what pe-
 riod of that monarch’s life the poem was written (see Poli
 Synops. Pref. ad Cant.). The point at issue seems to
 have been whether Solomon ever repented after his
 fall. If he did, it was contended that the repentance
 exhibited in the Song seemed the natural growth of such an experience; if he did not, it
 was urged that no other than a spiritually-minded
 man could have composed such a poem, and that
 therefore it must have been written while Solomon
 was still the cherished of God. Then, again, it was a
 master element in the poetic composition, as the natural
 process of the growth of Solomon’s matured wisdom, or the fresh outbreak of his warm and passionate
 youth; whether, in fact, the master element of the poem
 was the literal form or the allegorical
 meaning. In either view of its
 interpretation, however, the only historical occasion
 in the life of Solomon for a poem like this is his marriage
 with the daughter of Pharaoh, B.C. 1008 (1 Kings ji.
 1); a reference that is strongly corroborated by the
 probable date of Psalm xlv, which indeed may be re-
 garded as the key of the Canticles themselves. An
 old commentator (Wiken, Wittgen. 1729) holds that
 the bride was “Nicae,” the queen of Shela, and
 that she was the consummation inimey with Solomon
 during her stay in Palestine. See SOLOMON.

 II. Form.—This question is not absolutely deter-
 mined by the Hebrew title. The rendering of יָאוֹת
 יָאוֹת, mentioned by Simonis (Lex. Heb.), “series of
 songs,” (comp. mp, chain, and adopted by Paul-
 us, Good, and other commentators, can scarcely com-
 pete with that of Gesenius, “Song of Songs, i.e. the
 most beautiful of songs” (comp. Pas. xiv, 1, יָאוֹת,
 יָאוֹת, “a delightful song;” comp. also Theor. Idyl.
 viii, πολύτρις μικρον). The non-continuity which
 many critics attribute to the poem is far from being
 a modern discovery (comp. the Lat. “Cantica canicu-
 ram,” and the Chaldee paraphrase, “the songs and
 hymns which Solomon, the prophet, the king of Israel,
 uttered in the spirit of prophecy before the Lord”).

 Ghilarerius (16th century) considered it a drama in five
 acts. One of the first separate translations published
 in England is entitled “The Canticles, or Balades of
 Solomon, in English Meter” (1556), and appeared Solomon’s Song in eight elegonies, by J. M.
 (Jervase Markham); the number of elegonies in this
 latter production being the same as that of the idyls
 into which the book was afterward divided by Jahn.
 Down to the 18th century, however, the Canticles
 were generally regarded as a mystical poem.

 Gregory Nazianzus calls it “a bridal dramatic
 song” (νυμφικόν ὑμνὸν τι και διηλ). According to
 Patrick, it is a “pastoral elegy“ or a “dramatic
 poem;” according to Lowth, “an epithalamium, or
 ὀλυμπικὸς νυτιπήμονας of a pastoral kind.”
 Michaelis and Rosenmüller, while differing as to its interpretation,
 agree in making it continuous, “carmen amatorium.”
 A modified continuity was suggested by Bosseut, who
 divided the Song into seven parts, or scenes of a pasto-
 ral drama, corresponding with the seven days of
 the Jewish nuptial ceremony (Lowth, Protect. xxxi).
 Bosseut is followed by Calmet, Percy, Williams, and
 other writers of the same school of interpreters
 (Frima Calmet), who proposes one of six days, and
 considers the drama to be post-nuptial, not ante-nup-
 tial, as it is explained by Bosseut. (See below.)
 The entire nuptial theory has been severely handled by J.
 D. Michaelis, and the literal school of interpreters in
 general. Michaelis attacks the first day of Bosseut,
 and involves in its destruction the remaining six (Not.
 ad Louth Perf. xxxi). It should be observed that
 Lowth makes it a drama, but only of the minor kind,
 i.e. dramatic as a dialogue, and therefore not more
dramatic than an idyll of Theocritus or a satire of
 Horace. The fact is that he was unable to discover a
 plan; and it seems clear that if the only dramatic ele-
 ment in Canticles be the dialogue, the rich pastoral
 character of its scenery and allusions renders the term
 drama less applicable than that of idyll.
 Bosseut, however, extravagantly claims it as a regular drama,
 with all the proprieties of the classic model; and if
 we desire a dramatic composition, poetical and sym-
 pathetic, and assistant, it is difficult to see how we can
 avoid calling the poem a drama: but in all the trans-
 lations of the allegorical school which are based upon
 the dramatic idea, the interference of the chorus is so
 infrequent or so indefinite, the absence of anything
 like a dramatic progress and development sufficient to
 enlist the sympathy of a chorus, it is so evident, that the
 strongly-marked idyllic scenery could not far outweigh
 the scarcely perceptible elements of dramatic inten-
 tion. The idyllic theory is confirmed by the use of a
 similar form among the Arabian, under the name of
 “Casidies” (Sir W. Jones, Peta. As. Comment. iii).

 By the reactionary allegorists, of whom Rosenmuller
 may be considered the representative, the Song of
 Solomon has either been made absolutely continuous,
 or has been divided with reference to its spiritual
 meaning rather than its external form (e.g. Heng-}
 stonberg and Prof. Burrowes).

 The supposition that the Canticles supplied a model
 to Theocritus seems based on merely verbal coinci-
 dences, such as could scarcely fail to occur between
 two writers of pastoral poetry (comp. Cant. i, 9; vi, 10,
 with Theocr. xviii, 80, 86; Cant. iv, 11, with
 Theocr. xx, 25, 27; Cant. viii, 6, 7, with Theocr.
 xxiii, 25-26; see other parallels in Pol. Syn.; Lowth, Prot.
 Gray’s Key). In the essential matter of the vivid and
 ethical teaching the resemblance does not exist.

 III. Meaning.—The schools of interpretation may
 be divided into three: the mystical, or tooval; the
 allegorical, and the literal.

 1. The mystical interpretation is properly an offshoot
 of the allegorical, and probably owes its origin to the
needlessly which was felt of supplying a literal basis for the speculations of the allegorists. This basis is either the marriage of Solomon with Pharaoh's daughter, or his marriage with an Israelite woman, the Shulamite. The former (taken together with Homer's variation) was the favorite opinion of the mysti-
cal interpreters to the end of the 18th century; the latter has been described in its latest version by Grotius (1803). The mystical interpretation makes its first appearance in Origen, who wrote a voluminous comment-
ary upon the Canticles. Its literal basis, minus the mystical application, is condemned by Theodoret (A.D. 420). It reappears in Abulfaragias (1228-
1265), and was received by Grotius. As involving a literal sense, it was subsequently adopted by Dupont du
durham, and Calovius, but approved of and systematized by Bossuet, indorsed by Leuth, and used for
the purpose of translation by Percy and Williams. The arguments of Calovius prevented its taking root in Germany; and the substitution by Go
er of an Israelitish for an Egyptian bride has not saved the general
theory from the neglect which was inevitable after the reactionary movement of the 19th century allegori-
asts.
2. Allegorical.—Notwithstanding the attempts which have been made to discover this principle of interpre-
tation in the Sept. (Cant. iv, 9); Jeremiah xxvii, 14-17; Wisd. of S. i, 9, 18; c. 4, 9 (4), 18), it is impossible to trace it, with any certainty, farther back than the Talmud (see Ginsburg, Intro.
). According to the Talmud, the beloved is taken to be God; the loved one, or bride, is the congregation of Israel. This general relation is expanded into more particular details by the Targum, or Chaldee Paraphrase, which treats the Song of Songs as an allegorical history of the Jewish people from the exodus to the coming of the Messiah and the building of the third temple. In order to make out the parallel, recourse was had to the most extraordinary devices: e.g., the reduction of words to their numerical value, and the free inter-
changing of words similar to each other in sound. Elaborate as it was, the interpretation of the Targum was still farther developed by the medieval Jews, but generally constructed upon the same allegorical hypothesis. It was introduced into their liturgical service; and during the persecutions of the Middle Ages its consoling appeal to the past and future glo-
ries of Israel maintained it as the popular exposition of a national poem. It would be strange if so univer-
sal an influence as that of the scholastic philosophy had not obtained an expression in the interpretation of the Canticles. Such an expression we find in the thirteenth century (1250), in a book as representing the union between the active intel-
llect (intelectus agens), and the receptive or material intellect (intelectus materialis). A new school of Jewish interpretation was originated by Mendelssohn (1729-1803), which, without actually denying the ex-
istence of an allegorical meaning, determined to keep it in abeyance, and meanwhile to devote itself to the literal interpretation. At present the most learned rabbis, following Loe
essohn, have abandoned the allegorical interpretation altogether (Herzfelder, 1848; Phillipson, 1854).
In the Christian Church, the Talmudical interpreta-
tion, imported by Origen, was all but universally re-
ceived. It was impugned by Theodore of Mopsuestia (350-429), but continued to hold its ground as the ortho-
doxo theory till the revival of letters, when it was called in question by Erasmus and Grotius, and was gradu-
ally superseded by the typical theory of Grotius, Bossuet, and Calovius. This latter was not effective without a severe struggle, in which Sanctius, Dur-
ham, and Calovius were the champions of the allegori-
cal against the typical theory. The latter seems to have been mainly identified with Grotius (Pol. Sac.), and was stigmatized by Calovius as the heresy of Theo-
codes Mopsuestia, condemned at the second council of Constantiople, and revived by the Anabaptists. In
the 18th century the allegorical theory was reasserted, and reconstructed by Puffendorf (1775) and the reac-
tionary allegorists, the majority of whom, however, with Rosemuller, return to the system of the Chaldee Paraphrase.
Some of the more remarkable variations of the alle-
gorical school are: (a.) The extension of the Chaldean allegory to the Christian Church, originally projected by Aponius (7th century), and more fully wrought out by De Lyra (1270-1340), Brightman (1600), and Coc-
cesus (1650-1690). According to De Lyra, chaps. ii-
vii describe the history of the Israelites from the exa-
odus to the coming of Christ. A similar view is adopted by Sacra-
dus, Durham, and Calovius, but approved of and sys-
temized by Bossuet, indorsed by Leuth, and used for
the purpose of translation by Percy and Williams. The arguments of Calovius prevented its taking root in Germany; and the substitution by Go
er of an Israelitish for an Egyptian bride has not saved the general theory from the neglect which was inevitable after the reactionary movement of the 19th-century allegori-
asts. (b.) According to Gelaérius and Corn. a Lapide, the bride is the Virgin Mary. (c.) Puffendorf refers the spiritual sense to the circumstances of our Saviour's death and burial.
4. The mystical interpretation is connected with the reactionary movement of Theodore Mopsue-
stia (360-429) and his followers, in opposition to the extravagances of the early Christian allegorists. Its
scheme was nuptial, with Pharaoh's daughter as the bride. That it was by many regarded as the only admissible interpretation appears from Theodoret, who mentions this opinion only to condemn it. Born down and overwhelmed by the prolific genius of medi-
ival allegory, we have a glimpse of it in Abulfaragias (see above), and in the MS. commentary (Bodl. Open.
coll. No. 825), cited by Mr. Ginsburg, and by him referred conjunctively to a French Jew of the 12th or 13th century. This commentary anticipates also more recent criticism by interpreting the Song as celebrating the humble love of a shepherd and shepherdess. The extreme literal view was propounded by Castellio (1544), who rejected it from the Canon. Following out this idea, Whiston (1728) recognized the book as a composi-
tion of Solomon, but denominated it as an epic, interest-

cal, and allegorical. Nearly the same view is enter-
tained by Dr. Clarke in his Commentary. Meanwhile the mystical theory was adopted by Grotius as the literal basis of a secondary and spiritual interpretation, and, after its dramatical development by Bossuet, long con-
tinued to be the standard scheme of the mystical school. In the 19th century considerable attention was paid to regular drama, or pastoral eclogue, consisting of seven acts, each act filling a day, concluding with the Sabbath,
insomuch as the bridegroom on this day does not, as usual, go forth to his rural employments, but proceeds from the marriage chamber into public with his bride.
The following are Bossuet's divisions of the plots:

<table>

</tr>
</tbody>
</table>

In 1808 this scheme was reconstructed by Good, with a Jewish instead of an Egyptian bride; and his version is still the most elegant. For the most ingenious and completely elaborated form in which this theory has been developed, see the new translation in scenic form by Tayler in his edition of Calver's Dict. More lately by Horner in the Methodist Quart. Review, July, 1862. See THEATRICAL REPRESENTATIONS. The purely literal theory, opposed on the one hand to the allegorical interpretation, and on the other to Castellio and Whiston, owes its origin to Germany. Michaelis (1770) regarded the Song as an exponent of

Digitized by Google
CANTICLES

med and live, innocent and happy. But, while justifying its admission into the Canon, he is betrayed into a levity of remark altogether inconsistent with the supposition that the book is inspired (Not. ad Locut., Pref.). From this time the scholarship of Germany was mainly enlisted on the side of the literalists. The literal basis became thoroughly disassociated from the mystical superstructure, and all that remained to be done was to elucidate the true scheme of the former. The most generally received interpretation of the modern literalists is that which was originally proposed by Jacobi (1777), adopted by Herder, Ammon, Ullermes, Erckmann, and prof. Meier of Tullingeringen (1854), and in England by Mr. Ginsberg, in his learned translation (1857). According to the detailed application of this view as given by Mr. Ginsberg, the Song is intended to display the victory of humble and constant love over the temptations of wealth and royalty. The tempter is Solomon; the object of his seductive efforts is a Shulamite shepherdess, who, surrounded by the glories of the court and the fascinations of unwonted splendor, pines for the shepherd-lover from whom she has been involuntarily separated. In this scheme the drama is divided into five sections, indicated by the thrice-repeated formulas of address (Is. xxiii. 4, 5, 8), and the use of another closing sentence (v. 1).

Section 1 (ch. 1-2, 7): scene, a country-seat of Solomon. The shepherdess is committed to the charge of the court ladies (the "chambermaids", i. 9), who have been impressed by her beauty and grace to put her to the way for the royal approach. Solomon makes an unsuccessful attempt to win her affections.

Section 2 (ii, 3-6): the shepherdess explains to the court ladies the cruelties of her brothers, which had led her to separate herself from her beloved.

Section 3 (v, 8-10): the joy of the royal train in Jerusalem. The shepherd follows his betrothed into the city, and proposes to rescue her. Some of her court companions are favorably impressed by her constancy.

Section 4 (v, 8-12): the shepherdess tells her dream, and still further engages the sympathy of her companions. The king proceeds to make her the bride of his son.

Section 5 (vii, 1-14): the conflict is over: virtue and truth have won the victory, and the shepherdess and her beloved return to their happy home, visiting on their way the tree beneath whose shade they first plighted their troth (vii, 2). Her brothers rejoice at the promises they had once made conditionally upon her virtuous and irreproachable conduct.

Even in Germany, however, a strong band of reactionist allegorists have maintained their ground, including such names as Hug, Kaiser, Rosenmüller, Hahn, and Hengstenberg. On the whole, their tendency is to return to the Chaldee paraphrase, a tendency which is specially marked in Hengstenberg. In fact, the literalism of the latter has been fought by Dr. Pye smith (Congre. Mag. for 1837, 89); in America by Prof. Noyes, who adopts the extreme eretic theory, and is unwilling to recognise in Canticles any moral or religious design. It should be observed that such a sentiment as this of Dr. Noyes is utterly alien to the views of Jacobi and his followers, who conceive the recommendation of virtuous love and constancy to be a portion of the very highest moral teaching, and in no way unworthy of an inspired writer.

The allegorical interpretation has been defended in America by Professors Stuart and Burrowes. The revised arguments adduced by the allegorists are substantially the same with those urged by Calvius against the literal basis of the mystical interpretation. The following are specimens: (a.) Particulars not applicable to Solomon (v. 2). (6.) Particulars not applicable to the wife of Solomon (i, 6, 8; v, 7; vii, 1, comp. 1). (c.) Solomon addressed in the second person (v. 12). (d.) Ordinary conditions of decent love (v. 2). (e.) Date twenty years after Solomon's marriage with Pharaoh's daughter (comp. Cant. iv, 4, and I Kings vi, 88). It will readily be observed that these arguments do not in any way affect the literal theory of Jacobi.

For external arguments the allegorists depend principally upon Jewish tradition and the analogies of Oriental poetry. The value of the former, as respects a composition of the 10th century B.C., is estimated by Michaelis (Not. ad Locut.) at a very low rate. For the latter, it is usual to refer to such authors as Chardin, Sir W. Jones, D'Herbelot, etc. (see Rosenm. Animad.). Rosenmüller gives a song of Hafez, with a paraphrase by a Buddhist monk, as furnishing the mystical meaning. For other specimens of the same kind, see Lane's Ethiopics, ii, 215 sq. On the other hand, the objections taken by Dr. Noyes are very important (New Trans.). It would seem that there is one essential difference between the Song of Solomon and the allegorical composition of which it is the question. In the latter the allegory is more or less avoided, and distinct reference is made to the Supreme Being; in the former there is nothing of the kind. But the most important consideration adduced by the literalists is the fact that the Canticles are the production of a different country, and separated from the songs of the Sufis and the Hindu mystics by an interval of nearly 2000 years. To this it may be added that the Song of Solomon springs out of a religion which has nothing in common with the pantheism of Persia and India. In short, the conditions of production in the two cases are utterly dissimilar. But the literalists are not content with denouncing the allegory; they proceed farther to maintain that allegories do not generally occur in the sacred writings without some intimation of their secondary meaning, which intimation in the case of the Canticles is not forthcoming. They argue, from the total silence of our Lord and his apostles respecting this book, not indeed that it is uninspired, but that it was never intended to bear within its poetic envelope that mystical sense which would have rendered it a perfect treasury of reference for Paul when unfolding the spiritual relation between Christ and his Church (see 2 Cor. xi, 2; Rom. vii, 4; Eph. v, 22-23). Finally, it is urged that it be allegorically spiritual, then its spirituality is of the highest order, and utterly inconsistent with the opinion which assigns it to Solomon. The philosophy of Solomon, as given in Ecclesiastes, is a philosophy of indifference, apparently suggested by the exchange of all sources of physical enjoyment. The religion of Solomon had but little practical influence on his life; if he wrote the glooming spiritualism of the Canticles when a young man, how can we account for his fearful degeneracy? If the poem was the production of his old age, how can we reconcile it with the last fact recorded of him, viz. that his heart was not right in the sight of the Lord? But it is maintained that no other writer would have selected Solomon as a symbol of the Messiah. The excessively amative character of some passages is designated as almost blasphemous when supposed to be addressed by Christ to his Church (v, 3, 4, 7, 8); and the fact that the dramatic persons are three is regarded as decidedly subservient of the allegorical theory.

The strongest argument on the side of the allegorists is the matrimonial metaphor so frequently employed in the Scriptures to describe the relation between Jehovah and Israel (Exod. xxxiv, 15, 16; Num. xv, 80; Ps. lxxxii, 27; Jer. iii, 1-11; Ezek. xvi, 1-21). It is fully stated by Prof. Stuart (i. T. Conson). On the other hand, the literalists deny so early a use of the metaphor. They contend that the phrases describing spiritual fornication and adultery represent the literal fact; and that even the metaphor, as used by the prophets who lived after Solom., implies a wedded relation, and therefore is to be interpreted with the nuptial affection which forms the subject of Canticles.—Smith, Dict. of Bible, s. v.

On the whole, a combination of the moderately literal interpretation with the general allegorical idea seems to be the true one, by which, under the figure of chaste conjugal love (probably that of Solomon and the Egyptian princess), set forth in Oriental style and
warmth [see Marriage], the union of Jehovah and his Church is represented after the analogy of a para-ble (v. q.v.). All attempts, however, hitherto made to carry the explanation into detail, especially in the application of the language to the phenomena of individual religious experience, have been signal failures, having been, indeed, rather the offering of a sensuous fanaticism or over-wrought enthusiasm, than of sound devotion or sober interpretation. See Allegory. Taking, therefore, the ground figure of cannibal as typical of divine union to be intended to be represented in this general expression only by this unique specimen of its meaning, we would venture to arrange it as dramatically somewhat as follows:

IV. Canon city. —It has already been observed that the book was rejected from the Canon by Castellio and Whiston, but in no case has its rejection been defended on puritanical grounds. It is found in the Sept., and in the translations of Aquila, Symmachus, and Theodotion. It is contained in the catalogue given in the Talmud, and in the catalogue of Melito; and, in short, we have the same evidence for its canonicity as that which is commonly adduced for the canonicity of any book.

V. Commentaries. —The following are the exegesises works expressly on the whole of this book, a few of the most important being indicated by an asterisk (*) prefixed: Origen, Homilies, etc. (in Opp. iii, 12, 28, 94); Theophylact, Fragmenta (in Grabe’s Speculum um, ii, 220; Eusebius, Epitom [Gr. and Lat.]; in Muredd Opera, vii, 125); Polyeuktos, Epistulae, Expositiones, etc. (Har. Leg., 1617, 410); Athanasius, Homilia (in Opp. iii, 57); also Fragmenta (b. i, ii, 1005); *Gregory Nyssen., Expositio (in Opp. 1, 468; also Bibl. Patr. Gall. vi, 645); Ambrose, Commentarius (in Opp. i, 1546); Ephraemi, Commentarius (ed. Foggini, Rom. 1750, 4to); Philo Carpathius, Interpretatio (Lat. in Bibl. Max. Patr. v, 681; Gr. and Lat. in Bibl. Patr. Gall. ix, 713; also Expositio, ed. Gr. and Lat. Gacomin, Rom. 1772, 4to); Theodoret, Expositio (Rom. 1563, fol.; Ven. 1574, 4to; also in Opp. ii, 1; tr. in “Voice of the Church”); Cassiodorus, Expositio (in Opp. ii, 479); Gregory the Great, Expositio (in Opp. i, 110); Cyprian Ortus Origenes (in Bibl. Max. Patr. ix, 731); Isidoro, Expositio (in Opp. p. 503); Apponius, Expositio (in Bibl. Max. Patr. xiv, 98); Lucian, Sermone (in Bibl. Max. Patr. xiv, 129); Udalricus, Scholion (b.); Bede, Expositio (in Opp. iv, 714; also Works by Giles, ix, 186); Alcuin, Compendium (in Opp. i, ii, 391); Angelomannus, Expositiones (q. Bibl. Max. Patr. xv); Bruno Antinianus, Commentarius (in Opp. i); Anselm, Expositiones (in Opp. ed. Picard); Rupertus Tutiensis, Respondat, Commentarius (Adv. i, 886); Bernard, Commentes (in Opp. ii, 2615; also ib. i, i, 555); Irmepres, Commentarius, (Pez. Theaur. ii, i, 343); Aquinas, Commentarius (in Opp. i); Honorius Augustodunensis, Commentarius (in Opp. iv); also Bibl. Max. Patr. ix, 983; *Jarchi’s annotations [Heb.], in Buxtor’s Rabbinical Bible, q. v.; Rashbi’s [Heb.]; in the Rabbinical Bibles; also with Lat. tr. by Genebrard, Par 1570 and 1585, 8vo; with notes by Breithaupt, Gothic, 1714, 4to; in Jewish-German by Bresch, Cremona, 1560, fol., and since; R. S. ben-Meir (Rashbam), (first published Lpz. 1855, 8vo); *Aben-Ezra, [Heb.]; in Franklin’s Rabbinical Bible; in Lat. by Genebrard, Paris, 1570 and 1588, 8vo; Alscheich, [Heb.]; (Ven. 1591 and 1606, 4to, and since); Nachmani (or rather Asariel, A.D. cir. 1200), [Heb.]; (Alton, 1764, 4to; including comments by Ibn-Tamar, Jehovah
them as the precursors of Antichrist, and so successfully that it was not until he had gone to the Canaries that they could establish themselves in Salamanca. He was consecrated bishop of the Canaries on 21 July 1651, before the bishop resigned, and retired into a convent of his order, of which he became, in 1554, provincial for the province of Spain. He died at Toledo, Sept. 80, 1650. His chief and best known work is his Locutus Theologico-
rum libri xii, relating to the sources whence polemical theologians may derive proofs, whether from opinions and arguments in the works of the Encyclopaedia (1635, 2 fol.). It may be read with his other writings, in his Opera, edit. nuncius. (Bas-

Canute. See Denmark.

Cap. (or Bonnet, piloula), in clerical dress. Cardinal Richelieu is said to be the first who wore the cap-
cot, or cap, in France. The red cap is peculiar to the college of cardinals. The bonnet or cap worn by the Jesuits, Barlavento, Theatines, and by that as generally, is three-cornered and square, and worn without the cape. See VESTMENTS OF THE CLERGY.

Caparocia (Kaparovia, a name of which the initial element is evidently the Heb. "Kapar", see Caphar), a town located by Polemy (iv, 16) in Galilee, and mentioned (Caparocam) in the Ptolemy Table as situated between Scythopolis and Cassarea Palestinae (Roland, Palest. p. 451, 487), 24 R. miles from the former and 28 from the latter. It was discovered by Burckhardt in 1848. It is supposed that "Kaparocam" was a village about one hour [16] west of Jenin, among the hills (Robinson, Researches, iii, 159), and half an hour west of Burkin (Wolcott, in the Biblioth. Sacra, 1843, p. 76; Robinson, Later Researches, p. 121), situated on an eminence, with a high wely north of the village, called Shuth Zeit, and visible from a great distance (Van der Velden, Memoir, p. 301).

Capella. See CaPFELLUS.

Caper-plant (Chenopodium, abobonak, from πατίς, to desire, Sept., καπηλών) is mentioned only once in the Bible (Eccles. xii, 5): "When the almond-tree shall flourish, and the grasshopper shall be a burden, and desire shall fail; because man goeth to his long home." The word here translated desire has been considered to signify the caper-berry. The reasons assigned for this opinion are that the rabbins apply the plural (πατίς, see Berth., xxxvii, 46, xxvi, to the small fruit of trees and berries, as well as to a part of the caper-bush (Buxtorf, Lex. Talm. col. 12); that the caper-bush is common in Syria and Arabia (see Galen, Facult. Alim. ii, 84); that its fruit was in early times eaten as a condiment, being stimulant in its nature, and therefore calculated to excite desire (Plutarch, Quaest. vili, 2; Pliny, Hist. Nat. xxxii, 28; xx, 15; comp. xxxii, 44; xx, 26); that, instead of the caper-bush grows on tombs, it will be liable to be destroyed when these are opened; and, finally, that as Solomon speaks here in symbols and allegories, we must suppose him to deviate from the course he had apparently prescribed to himself if he were to express in plain words, that desire shall fail. Instead of imitating the same thing by the failure of that which is supposed to have been used to excite desire. Celsus (Hierob. i, 210) argues, on the contrary, that Solomon in other places, when treating of the pleasures of youth, never speaks of capers, but of wine and perfumes; that, had he wished to adduce anything of the kind, he would have selected something more remarkable; that capers, moreover, instead of being pleasantly stimul-

Cantor. See CANTORUS.

Cantor (singer), an ancient ecclesiastical order so called, and a title still given to the master of the choir in many churches, as, in modern use, precentor. The Councils of Cologne, A.D. 1200 and 1356, give to the cantor or singer, the title of cantor episcoporum, or bishop of the choir. The cantor is also the same with the primicerius. The order of cantors appears to be of great antiquity, and is mentioned in the Canons called Apostolical, Nos. 28, 48, and 69, and in the Litura-
gy of St. Mark, which was written before the fourth century. See Liturg. Oriental. ii. tom. i, pref. p. xxxiv, and p. 151. The Council of Laodicea, can. 13, for bids any to sing in church except the singers or cantors whose names were inscribed on the canon of the church, and whose proper place was in the ambo. By can. 28 it forbade the cantors to wear the stole or orarium. The Roman writers endeavor to prove that the lector and cantor were the same, and they are every-
where spoken of in the ancient canons as distinct orders. There is no reason to believe this order to be of higher than ecclesiastical institution only. The cantor might be ordained even by a priest (Con. Carth. 4, cap. 10). This order is still retained in the Oriental Church. — Bingham, Orig. Eccl. bk. iii, ch. vii; Lan-
don, Eccl. Dict. s. v.
CAPERNAUM

1) by the terms Καπάρος, καπάρον, καπαρί, καπαρία, and even καπάραω, kapharía (Buxtorf, col. 1919, 1881, 2098). But as the Septuagint, the Vulgate, the Syriac, and the Arabic translations have understood the word kaphar to be meant, it is desirable to give some account of it, especially as, from its ornamental nature, it cannot but attract attention. There are, moreover, some points in its natural history which have been overlooked, but which may serve to show that in the passage under review it might without impropriety have been employed in carrying out the figurative language with which the verse commences (see Plenk, Plant. Med. p. 430; Sprengel, Hist. res herb. 1, 14).

The caper-plant belongs to a tribe of plants, the Capparidaceae, of which the species are found in considerable numbers in tropical countries, such as India, whence they extend northward into Arabia, the north of Africa, Syria, and the south of Europe (Forskal, Fl., p. 90; Shaw, p. 803). The common caper-bush—*Capparis spinosa*, Linn. (the *C. acuta* of Persoon)—is common in the countries immediately surrounding the Mediterranean. Dioscorides describes it as spreading in a circular manner on the ground, in poor soils and rugged situations; and Pliny "as being set and sown in stony places especially." Theophrastus states that it refuses to grow in cultivated ground. Dioscorides further states that it has thorns like a bramble, leaves like the quince, and fruit like the olive—characters almost sufficient to identify it. The caper is well known to the Arabs, being their *k∂∂∂∂*, and designated also by the name *əθθθθ* or *əθθθθ*. The bark of the root, which is still used in the East, as it formerly was in Europe, no doubt possesses some irritant property, as it was one of the five aperient roots. The unexpanded flower-buds, preserved in vinegar, are well known at our tables as a condiment by the name of capers.

Parts of the plant seem to have been similarly used by the ancients. The caper-plant is showy and ornamental, growing in barren places in the midst of the rubbish of ruins, or on the walls of buildings. It was observed by Ray on the Temple of Peace at Rome, and in other similar situations. It forms a much-branched, diffuse shrub, which annually loses its leaves. The branches are long and trailing; smooth, but armed with double curved stipular spines. The leaves are alternate, roundish or oblong-oval, a little fleshy, smooth, of a green color, but sometimes a little reddish. The flowers are large and showy, produced singly in the axils of the leaves, on stalks which are larger than the leaves. The calyx is four-leafed, concave; the petals are also four in number, and of an oval roundish form. The stamens are very numerous and long; and their filaments, being tinged with purple and terminated by the yellow anthers, give the flowers a very agreeable appearance. The ovary is borne upon a straight stalk, which is a little longer than the stamens, and which, as it ripens, droops and forms an oval or pear-shaped berry, inclining within its pulp numerous small seeds. Many of the caper tribe, being remarkable for the long stalks by which their fruit is supported, conspicuously display, what also takes place in other plants, namely, the drooping and hanging down of the fruit as it ripens. As, then, the flowering of the almond-tree, in the first part of the verse in question, has been supposed to refer to the whitening of the hair, so the drooping of the ripe fruit of a plant like the caper, which is conspicuous on the walls of buildings and on tombs, may be supposed to typify the hanging down of the head before "man goeth to his long home" (see the Pen. Cyclop. ed. v. Capparidaceae). See Υπ. 3.

*Caper* natum (Καπαρώνω; Lachm. [with Codex B]) *Καφαρωνών, as if δέκτης καταρων* "village of Nahum" [from some unknown person of that name]; Syriac, Curetonian *Καφαρον Ναχουμ, Peshito *Καφαρον *Ναχουμ; Vulg. *Capharnuuam*), the name of a Galilean city familiar as that of the scene of many acts and incidents in the life of Christ (see Stuart, Capparum or Capharnaum as the Scene of Christ's Miracles, 2d ed. London, 1864). There is no mention of Capernaum in the O. T. or Apocrypha, but the passage Is. ix. 1 [viii. 28] is applied to it by Matthew. The word *Capharor* in the name perhaps indicates that the place was of late foundation. See CAPHAR. There is named, however, by the rabbins (Midraoh, Koheloth, fol. 68, col. 4) a place called *Kaphar-Nachum* (מגלהמה "עש"), which Reland (Palast, p. 689) presumes to be the Capernaum of the Gospels (see Otho, Lex. Robb. p. 118). Josephus also mentions a remarkable fountain, called by the natives *Capharnuam* (Καφαρωνων), watering the fertile "plain of Gennesareth" (War, iii, 10, 8); as also a village by the name of *Capharnaye* (Καφαρναυα) in the same region (Life, 72). Ptolemy also (v, 10, 4) calls it *Capharum* (Καφαρωνων). Another Capernaum is mentioned by William of Tyre (De Bello Sac. x, 26) on the Kishon, six leagues from Cæsarea.

After the expulsion of Jesus from Nazareth (Luke iv, 15-51; Matt. iv, 13-16), where he was "brought up," Capernaum became emphatically his "own city," it was when he returned thither that he is said to have been "at home" (Mark ii, 2; such is the force of οικεῖον—A. V. "in the house"). Here he chose the evangelist Matthew or Levi (Matt. ii, 9). The brothers Simon-Peter and Andrew belonged to Capernaum (Mark i, 19, 20), and it is natural to assume that it was on the sea-beach near the town (for, doubtless, like true Orientals, these two fishermen kept close to home), while Jesus was "walking there" before "great multitudes" had learned to "gather together unto him," that they heard the quiet call which was to make them forever his "fishers of men" (Mark 1, 18, 17; comp. 28). It was here that Christ worked the miracle on the centurion's servant (Matt. viii, 5; Luke vii, 1), on Simon's wife's mother (Matt. viii, 14; Mark i, 30; Luke iv, 38), the paralytic (Matt. ix, 1; Mark ii, 5; Luke v, 18), and the man afflicted with an unclean spirit (Mark i, 26; Luke iv, 30). The son of the nobleman (John iv, 46), the ear of corn in Capernaum, healed by words which appear to have been spoken in Cana of Galilee. At Capernaum occurred the emblem-
CAPERNAUM

Taking an hour and a half to trace the inner sides of the plain. In this plain Josephus places a fountain called Capharnaum: he says nothing of the town; but if it can be collected from the scriptural intimations that the town of Capharnaum is in the same region, from a comparison of Mark vi, 47, with John vi, 19, it appears that it was at least six miles from the N.E. shore, it may be safely concluded that the fountain was not far from the town, and took its name therewith. In this plain there are now two fountains, one called 'Ain et-Tin, the 'Spring of the Fig,' near the northern shore of the plain, and the other called the Lake. It is surrounded by vegetation and overhung by a fig-tree, from which it derives its name. Near this are several other springs, the water of which is said to be brackish; but Burckhardt, who rested for some time under the great fig-tree, describes the water of the main source as sweet. This is the fountain which Dr. Robinson inclines to regard as that which Josephus mentions under the name of Capharnaum. M. De Saulcy, however, contends, in his usual confident manner, against the conclusion of Dr. Robinson (Narr. ii, 857-865). In the new edition of his Researches (1860), Dr. Robinson contents himself with arguing the importance of the position. Three miles southward, toward the other extremity of the plain, is the other large spring, called 'Ain el Mudaarwah, the 'Round Fountain'—a large and beautiful fountain rising immediately at the foot of the western line of hills. This Pocoke took to be the Fountain of Capharnaum, and Dr. Robinson was at one time disposed to adopt this conclusion. The 'Round Fountain' is a mile and a half from the lake, to which it sends a considerable stream with fish. Whichever of these fountains be that of Capharnaum, we should look for some traces of an ancient town in the vicinity, and, finding them, should be justified in supposing they formed the remains of Capharnaum. The only ancient remains of any kind near the Round Fountain are some large volcanic blocks strewed over the plain, or piloted together with little architectural order. But near the 'Ain et-Tin is the low mound of ruins, occupying a considerable circumference, which, if Capharnaum were situated in this plain, offer the best probability of being the remains of the doomed city; and if these be all its remains, it has, according to that doom, been brought low indeed. Near the fountain is also a khan, which gives the name of Khan Minyeh to the spot. This khan is now in ruins, but was once a large, well-built structure; and at the north of the khan, and to the south of the fountain, rocky hills of considerable elevation come down quite to the lake, and form the northern termination of the plain. It is important to add that Quaresimus expressly states that in his day the place called by the Arabia Moschii (i. e. Minyeh) was regarded as marking the site of Capharnaum (Kludic. Terr. Sancti, ii, 864). The mention by Josephus (Life, 72) of a village called Kephronea, situated between the mouth of the Jordan and Tarichas, will agree with either location of Capharnaum. Willibald, however (Vita, 15, 17), passed successively, on his way from Tiberias to the Upper Jordan, Capharnaum, and Chorazin, which would locate Capharnaum at the southern end of the plain, if (as appears true) this also contained Chorazin. The latter may have been immediately on the shore, and Capharnaum at a little distance from it (Luke ix, 57; comp. Matt. xii, 18, 21), as is the case at the southern spring, but not at the spring of the 'Round Fountain.' Khan Minyeh may be found in Robinson's Researches (new ed. ii. 403 sq; iii, 844-858). They are chiefly founded on Josephus's account of the fountain and of his visit to Capharnaum, which Dr. E. would identify with the mounds near the khan, and on the testimony of Ritter, who states that the ruins of the western side of the town, which, whose notices Dr. R. interprets—often, it must be confessed, not without difficulty—in reference to

1. Dr. Robinson (Bibl. Researches, iii, 298-294) exposes the errors of all previous travellers in their various attempts to identify the site of Capharnaum; and from a hint in Quaresimus, he is rather inclined to look for it in a part of Syria, only by a mound of ruins, called by the Arabs Khan Minyeh, but this is situated at the north-eastern extremity of the fertile plain (now called El Ghawe) on the eastern border of the Lake of Gennesareth, which the name of 'the land of Gennesareth' is given by Josephus (War, iii, 10, 8). This plain is a sort of triangular hollow, formed by the ruins of those remains of great, sometimes circular, the bowl-like form of the western shore. The base of this angle is along the shore, and is about one hour's journey in length, whereas it
CAPERNAUM

Khan Minyeh. The fountain Capharnaum, which Josephus mentions (War, iii, 10, 8) in a very emphatic manner as a chief source of the water of the plain of Gennesareth and as abounding with fish, would, however, certainly answer better to the "Round Fountain" than to a spring so close to the shore and so near one end of the district as 'Ain el-Tin. The name of Khan Minyeh is also strongly opposed by a later traveller (Bonar, p. 437-41), as also by Van de Velde (Memoir, p. 301, 302) and Thomson (Land and Book, i, 542 sq.). Another objection to the site of Khan Minyeh is that the ancient town of Cinnereth appears to have lain north of this site, on the plain of Gennesareth [see Cinnereth]; from which it is most natural to infer that Capharnaum lay at the southern end of the plain (at 'Ain el Mudaewara), and Cinnereth at the northern ('Ain el-Tin). In that case, the approach of Christ and his disciples to Capharnaum through the plain of Gennesareth (Matt. xiv, 84) was from the north, the direction most likely in coming from their last point on the north-eastern shore of the lake; for then the disciples would have fallen short of their destination, owing to the head wind, and, after landing, first traversed the plain. The site of Abu Shalshaleh, however, is in some respects more likely to have given name to the lake, if that of the Cinnereth, which will thus be distinguished from the localities of Capharnaum and Chorazin. See BETHSAIDA.

2. Three miles north of Khan Minyeh is the other claimant, Tell Hum, containing ruins (very extensive, according to Bonar, p. 415 sq.) of walls and foundations covering a space of half a mile long by a quarter wide, on a point of the shore projecting into the lake, and backed by very gently rising ground. The shapeless remains are piled up in confusion all along the shore, and are much more striking than those of any other city on this part of the lake. With two exceptions, the houses were all burned, quaint, black and very compact, but rudely cut. The stones of the temple, synagogue, or church, whatever it may have been, are of beautiful marble, cut from the mountains to the north-west (Thomson, i, 540). The ruins are described by Robinson (Researches, iii, 297 sq.). Rather more than three miles farther north is the point at which the Jordan enters the northern end of the lake. The arguments in favor of Tell Hum date from about 1675. The principal one is the name, which is maintained to be a relic of the Hebrew original—"Caphar" having given place to "Tell." Dr. Wilson also ranges Josephus on this side (Land of the Bible, ii, 138-140). See also Eusebius (Praef. Ev., 336, 343), who speaks of the same locality, as do also Van de Velde, Bonar, and Thomson.

Against Tell Hum, on the other hand, the following arguments seem almost conclusive: (1) It is not near the boundary-line between Zebulon and Naphthali, as appears to be required by Matt. iv, 18. (2) It is not likely to have been on the highway to Damascus (see above), for the mountains are so near the shore as to preclude this, while a thoroughfare still exists through the plain at the south. (2) It is rather too near the head of the lake for the scriptural notices, and apparently in the wrong direction from the plain of Gennesareth. (4) It does not by any means so suit the indications in Josephus of the position of the spring of Capharnaum and village of Capharnome: for [1] the latter was near a swampy ground (evidently, from the numerous springs, in the loamy plain), and at no great distance from Tiberias (or, at farthest, Tarichaea); [2] the fountain was a prominent feature in the plain of Gennesareth, which runs along the lake for three miles, apparently midway. To these arguments it may again be replied: (1) The language of the Evangelist respecting the proximity of the boundary-line is not to be taken so strictly, since none of the places in question were really situated on the border. (2) There is room enough for a road along the shore by Tell Hum, for the shortest route to the head of the lake actually lies through it. (3) The Scripture notices most in question relate to the miracle of the feeding of the five thousand, the scene of which may have been on the shore south-east of Bethsaida, beyond Jordan, and in that case Christ's return to Capharnaum may have been from the south through the plain of Gennesareth. (4) The matter of the Lake of Gennesareth may have happened at the mouth of the Upper Jordan, and the place into which he was borne was a "village" merely, not a large city like Capharnaum, although the name of the latter may naturally have included adjacent localities, as we know it was extended to the entire plain.

On the whole, however, later archaeologists incline to the site of Khan Minyeh, where extensive ruins have recently been discovered, Bethsaida (q.v.) being, perhaps, to be located at Tell Hum; and this conclusion is greatly confirmed by the almost certain position of Chorazin at Bir Karesheh, a little to the N.W. (see Jerusalem. Lit. Oct. 1854, p. 162 sq.; July, 1855, p. 354 sq.; Bibl. Sacra, April, 1855, p. 268 sq.; Lond. Archæum, Feb. 24, March 31, 1866; Stud. u. Krift., 1867, iv.). See CHORAZIN.

CAPE TOWN

William D.D., a bishop of the Methodist Episcopal Church South, was born in St. Thomas's Parish, S. C., Jan. 28, 1790. In 1805 he entered the sophomore class at the South-Carolina College, but left college before the time of graduation, and began the study of theology. He entered the intelligence of the delegates of the South-Carolina Conference in 1809, and located in 1815. He was readmitted to the Conference in 1818, and was first elected to General Conference in 1820, and was sent as delegate from the American Methodist Church to the British Wesleyan Conference in 1828. His subsequent posts of duty were, professor of Greek and History in Columbia College, 1828; editor of the Southern Christian Advocate, 1836-40; missionary secretary of the southern division of the Methodist Episcopal Church, 1840-44; superintendent of colored missions in the Southern States in 1844. In May, 1844, Dr. Capers attended the General Conference held at New York as one of the delegates of the South-Carolina Conference. This was the year in which the great anti-slavery agitation in the Methodist Episcopal Church came to its crisis in the division of that body. Dr. Capers took the Southern view of the question, and from that time till the close of his life he was in conflict with the Methodist Church South. At the General Conference of that Church held in 1844 he was elected bishop. The remainder of his life was spent in the discharge of the bishop's office, which he filled with pre-eminent dignity, diligence, and success. Dr. Capers came of a Huguenot family, and his father did gallant service in the Revolution. His house was one of the homes of Asbury and the early Methodist preachers. In the ministry his rise was rapid, and his usefulness and popularity constantly increased. His eloquence in the pulpit was sanctified by the uction of the Holy Ghost, and, though generally smooth and graceful, was at times powerful, and even overawing. He was also gifted in an elevated and refined, and labored with earnest fidelity for his Master's cause. His activity of mind and perseverance, together with the weight of his moral power, gave him great influence in his Conference and in the Church. He died in Anderson, S. C., Jan. 21, 1866. He left no literary remains except an autobiography (prefixed to Dr. Wightman's Life of Capers); Catechisms for the Negro Missions: Short Sermons and True Tales for Children (edited by Dr. Summers, Nashville, 1856);—Summers, Sketches of Eminent itinerants, p. 75; Wightman, Life of W. Capers, D.D. (Nashville, 1859, 12mo);—Sprague, Annals, vii, 400.

Cape Town, the capital of the English possessions at the Cape of Good Hope, erected into a bishop's see of the English Church in 1847. The see ows
its existence to the munificence of Miss Burdett Coutts. The first bishop was Robert Gray, D.D., of Stockton, consecrated at Westminster, June 29, 1847, who is still the incumbent. The bishop of Cape Town is the metropolis of the Anglican dioceses in South Africa, of which, in 1867, there were the following, besides Cape Town: Natal, established 1868; Mauritius, 1854; Graham's Town, 1856; St. Helena, 1862; Orange River State, 1863; Central Africa, 1866. The Wesleyan missions in the district of Cape Town embraced, in 1866, 10 circula, 25 chapels, 12 other preaching-places, 9 missionaries and assistant missionaries, 301 subordinate paid and unpaid agents, 1,510 members, 211 on trial for membership, 2,680 scholars in Sunday-schools, and 6,988 attendants on public worship. The Roman Catholics have at Cape Town a vicar apostolic (bishop in partibus), whose diocese embraces about half a dozen churches. See AFRIKA.

Caphar- (the Latinized form of the Heb. prefix כָּפָּר, kefār, the "construct form" of Kophar, קֶפֶר; from the root of the same form signifying "to cover," Gesenius, Thes. p. 707), one of the numerous words employed in the Bible (and still often in later or rabbinical Hebrew) to denote a village or collection of dwellings smaller than a city (Reland, Palæst. p. 516). See In.- Stanley proposes to render it by "hamlet" (Palæst. App. § 67), to distinguish its occurrences from those of Choresh, Chisroth. Bysiphon, and other similar words. As an inclusive it is found only three times: 1 Chron. xxvii, 25, Cant. vii, 11, and 1 Sam. vi, 18 (in the last the pointing being different, K'opher, וַּקְóפֶר; but in neither is there anything to enable us to fix any special force to the word. In names of places, it occurs in Chephar-Ammon, Chephirah, Caphar-Alam, and those here following; also Capharnaum, Capernaum, Caphar-Ashaph, Caphar-Asphah) or the number of the names compounded therewith mentioned in the Talmud shows that the name was a much commoner one at a time subsequent to the Biblical history. See the words beginning with Kephar.- In Arabic, the corresponding local epithet Kofar is in frequent use (see the lists in Robinson's Researches, iii, Append.).

Capharbis (Καφαρμίς), a town of Idumaea, with a wall, wall, surrounded by the citizens to Cæsarea, the general of Vespasian, after a siege thus rendered unexpectedly short (Josephus, War, iv, 9, 9). Reland (Palæst. p. 684) thinks it the Kophar-Bash (q. v.) of the rabbins; but Schwarz refers it to the Kophar-Abus (Δυναμων) of the Jerusalem Talmud (Shaked. ii), and finds it in the well near Gedor, in Wady Surat (meaning apparently that marked on Van de Velde's Map a little south-east of Ekron), which he says is still called "the Spring of Absa." This position, however, seems too northern.

Capharah. See KEPHAR-ACHKO.

CaphbaratVictoria (prob. for נֵבַר כָּפָר, נֵבַר כָּפָר, village of blessing; but different from the "valley of blessing" [see BERACHAH], named in 2 Chron. xx, 26), a place mentioned by Jerome (Ep. 86) as overlooking the desert of Sodom, and traditionally held to be the place where Abraham interceded with Jehovah for the guilty cities of the plain (Gen. xviii, 16; xix, 29). The name also occurs (in various forms) in several other ancient notices (Reland, Palæst. p. 685). It is probably the modern Beni Naim, an eminence on very high ground, three or four miles east of Hebron, commanding an extensive view of the Dead Sea (Robinson, Researches, ii, 189). The tomb of Lot has been shown there since the days of Mandaville (Trav. p. 65).

Capharota. See CAPAROTA.

Caphardagon. See Beth-Dagon.

Capharecho. See KEPHAR-ACHKO.

Capharetana, a village of Samaria, the native place of the heretic Manander, according to Justin Martyr (Kēpharotana, Apol. ii), but Eusebius (Eccl. Hist. iii, 26) cites the name somewhat differently (Kapharotana), and Theodoret (Compend. Hær. Fab. ii) has Chобра (יִשָּׂר); so that the place is altogether doubtful.

Capharammâli (prob. village of the camel), a village said to have been situated 20 miles from Jerusalel, the place of the presence Lucian, who wrote the memoir concerning the remains of St. Stephen, about the fifth century (Reland, Palæst. p. 688); but thought by Cotovicus (Iun. p. 284) to be the name of a person. See CAPHARAMMÂLI.

Capharnâmus. See CAPERNVAVM.

Caphararâ. See CAPHARAROSA.

Caphararosa, a place (Καφαραρωσα) named by Ptolemy as a town of Idumaea west of the Jordan, and thought by Reland (Palæst. p. 690) to be the Capchararos (or Caperaria) placed in the Penninger Table between Jerusalem and Askalon. See CEPERARIA. It is possibly the same with Caphar-Zacharia (q. v.).

Capharâliha. See APPIATRAS.

Capharâlihama (Καφαραλαλμανα v. r. Καφαραλαλματικα, appar. for Ναξός μων, "village of peace"), a place where Nicairos's troops were cut to pieces by Judas Maccabaeus (1 Mac. vii, 31). Josephus, in the parallel account (Ant. xii, 10, 4), calls it a village θυμων Καφαραλαλματικα. Reland suggests (Palæst. p. 503) that it has been the same as Caphar-Gamala (q. v.) where the presbyter Lucian was born, or the Kophar-zenelma mentioned in his writings. He also adds an allusion from the Talmud (Aboda Zara, folio 44, col. 4) to a wine-growing village, Kophar-Salam (דוע כפר), doubtless the same. From the fugitives in the above battle having taken refuge in the "city of David," it would appear to have been near Jerusalem, though it is possible that it was the village near Siloam (q. v.), the Arabic name of which is Kefer- selam. Ewald places it north of Ramla, on the Samarian boundary (Gesch. Isr. iv, 688, note), but this is quite arbitrary.

Caphar-Sorech. See SORKE.

Caphartoba. See KEPHAR-TEH.

Caphar-Zacharitis (village of Zacharias), a place mentioned by Sozomen (Hist. Eccl. ix, 17) as lying in the region of Eleutheropolis, and apparently visited by Vitalis on his way from Gaza to Hebron (Travels, c. 30). It seems to have been different from the Beth-Zacharitis (q. v.) of the Apocalypse (1 Mac. vii, 82) and Josephus (Ant. xii, 9, 4). It is probably the modern Kefer Zebakia (Robinson, Researches, ii, 54), a village on the north side of Wady Surot, opposite Tell Zacharia, about half way between Jerusalem and Ashkelon (Van de Velde, Notitiae, ii, 192). See CAPHAROSA.

Caphenatha (Xαφέναθα), a place apparently close to and on the east side of Jerusalem, which was repaired by Jonathan Maccabaeus (1 Mac. xii, 87). The name seems to be derived from נב הני, kophana, the Chaldee word for the seira date (Buxtorf, Lex. Talm. col. 1071), and thus has a remarkable correspondence with the names of Bethany (house of dates), Bethphage (house of figs), and of the Mount of Olives itself, on which the three were situated—all testifying to the ancient fruitfulness of the place (comp. Schwartz, Palæst. p. 205).

Caphithura (Καφιθύρα), a pretentious little town (σπέρνον τοιχανον) in Upper Idumaea, apparently not far from Capharabis (q. v.), taken and burnt by Cæsar, the general of Vespasian (Josephus, War, iv, 9, 9). The name occurs with considerable variety in the texts (Χαφιθύρα, Χαφιθύρα, etc., Hudson, in loc.), and Petrus Apolinarius (De eccid. Hier. iii, 65) gives it simply
CAPHIRA

as Caphara, from which it seems possible that the scriptural CEPHIRAH (q. v.) may be intended.

Caph'ir'a (Kophira), a place whose inhabitants returned from Babylon (1 Esdr. v, 19); evidently the Caphira (q. v.) of the Hebrew text (Exra ii, 25).

Caph'lothrim (1 Chron. i, 12). See CAPHTOR.

Caph'tor (Heb. Kaphtor), 'Kaphthor' ['Kaphthor'] in Dex. i, a chapelet, as in Amos ix, 1, etc.; Sept. Kaph'tor, Vulg. Caphpadora, a maritime country thrice mentioned as the primitive seat of the Philistines (Deut. ii, 25; Jer. xlvii, 4; Amos ix, 7), who are once called Caphtorim (Deut. ii, 28), as of the same race as the Międzir and the Maktar, the son of his wife (Gen. xvi, 12). There has been a great diversity of opinion with regard to the exact situation of that country (see Simonis, Onom. V. T. p. 441). See CAPHTOR.

1. The general opinion that Caphtor was Cappadoce (not the city Cappadocia, or Caphtorra in Phoenicia, see Schulte, Lei. v, 460) is, upon the whole, founded more on the ancient versions of the Bible, such as the Septuagint and the Targums, than on any sound argument (see Bochart, Phaleg, iv, 22; Miller, Septag. Herm. p. 167 sq.; Strauss, ad Zephraniam, p. 47).

Against this opinion have been urged: (1) The authority of Josephus (Ant. i, 6, 2), who seems to seek Caphtor in the neighborhood of Egypt and Ethiopia (see the map); and (2) that the Caphtorim came originally from Egypt, from which Cappadoce is so far removed that it seems highly improbable that an Egyptian colony should first have emigrated thereto, and then again removed to Palestine, still more remote; (3) that Caphtor and Cappadoce are very dissimilar names (see Herer in the Cyclopaedia, iii, 1 sq.; Geuenis, Theol. p. 709; Köster, Eriätxt. p. 157 sq.) even in sound; (4) that Caphtor is (Jer. viii, 4) designated as an island ('N), though 'N sometimes also signifies a coast. See CAPPADOCE.

2. Others again, as Calmet (Dissert. sur l'Origine des Philistins, p. 821), and still more Lessenmacher (Obev. Phil. p. 21, 11 sq.), have tried to prove that the Philistines derived their origin from the island of Crete (so Rosenmüller, Alterth. ii, ii, 368; iii, 385; Movers, Phäm. i, 28; Langerken, Ken. i, 194; Ewald, Gesch. Isr. i, 380; Tuch, Gen. p. 243; Hitzig, Zur Zeph. ii, 5; Berthel. Isr. Gesch. p. 167; Knobel, Gen. p. 110; Delitzsch, Gen. p. 290; Förster, Handb. v, s. v.), because — in the opinion of the latter (p. 100) the proper name of the Philistines is THON, Kerethim'. 'Crethites' (Ezek. xxv, 16; Zeph. ii, 5; 1 Sam. x, 14); (3) a city Aptera existed in Crete (Strabo, x, 479; Pliny, iv, 20). The Sept., however, evidently makes a distinction between the Caphtorim and Cherethim; nor is it probable either that a small island like Crete should be able to send forth thus early so large a body of emigrants as have must have landed on the territories of the Arim, so as to be able to expel them and take possession of their country, or that the Phoenicians would allow a seafaring race like the Cretans to settle in their vicinity (see Höch, Kretä, p. 867). See CRETE.

3. By far more probable is Calmet's previous opinion (found in the first edition of his Comment. on Genes. xix, but which he afterward-recalled), that Caphtor is the island of Cypris. From the geographical situation of that island, it may have been known to the Egyptians at a very early period, and they may have sent colonies thither, who afterward removed, from some reason or other, to the southern coast of Palestine bordering on the Mediterranean. Swinton (Journ. of the Oriental Soc. 1756, p. 78, 85) actually found on that island an ancient Phenanician coin, with the inscription which he reads 'Kab' dor' ('Kabtor'), not very unlike Kaphtor; but in the Alman. Lit. Zeitung (Leips. 1825, i, 440) it has been proved that Swinton was mistaken in the reading of that inscription (see Geuenis, Mon. Phän. ii, 520). Opposed to this identification also is the fact that the Cyprians are elsewhere (Gen. x, 4) called Chittim (q. v.). See CYPRUS.

4. A still more probable identification is with certain parts of Egypt: either (1) the coast of the Egyptian Delta (Stark, Gasa, p. 78); (2) Damietta (Sadilis, Arab. Vera., which has 'Dimyat'; Haine, Obs. Sac. ii, 6, 10); or (3) part of Morocco west of Egypt (Quatremerre, Journ. des Scénses, 1846, p. 250). The position of the country, since it was peopled by Miézdri, may naturally be supposed to be in Egypt, or near to it in Africa, for the idea of the south-west of Palestine is excluded by the migration of the Philistines. In Jer. xlvii, 4, the expression 'THON, THON' ("country of Caphtor") has a wider signification than an insular location; for the term 'THON' denotes any maritime land, whether coast or island, as in the expression Genitile shores (THON, THON, Gen. x, 5), by which the northern coasts and the islands of the Mediterranean seem to be intended, the former, in part at least, being certainly included. It must be remembered, however, that the Nile is spoken of as a sea (THON) by Nahum in the descriptive position of the Philistines (comp. Ezek. xxvii, 16), and that Caphtor is here poetically used for Caphtorim. Forster (Epist. of Michael, p. 17 sq.) thinks that the Caphtorim had lived on the Egyptian coast, somewhere about town Benja (comp. Benja, Gen. 41, 121, Bohn). From hence he supposes a colony of that people, and their brethren and casing neighbors, the Cašluhim, had gone forth, in the period between the first wars of the world (described in Gen. xiv) and the birth of Israel, and settled on the southern coast of Palestine, under the name of Philistines. But being expelled the Ammon (q. v.), who lived against Gaza. But in subsequent times, Forster thinks, these new Philistines had again sent a colony who conquered the province of Lapathus, in the island of Cyprus. This colony he identifies with the Ethiopians, who lived, according to Herodotus (vii, 88), upon the island. Following out these suggestions, Mommsen notes that Poole (in the Encyclopaedia Britannica, 8th ed., article Egypt, p. 419), after a conjecture in Heini Dissert. Sacr. p. 210 sq., has proposed to recognize Caphtor in the ancient Egyptian name Copato (Koеп), which, if literally transcript, is written in the hieroglyphic of K'da, probably the name of another part of Egypt, as Bin (Journ. pl. xxxviii. No. 899, 900), whence Copato Kepo, Arab. Kaf. The similarity of name is so great that it alone might satisfy us, but the correspondence of Aypnotos, as if Acts γνώρις, to ΥṆ ὀν, unless 'N refer to the Philistine coast, seems conclusive. We must not suppose, however, that Caphtor was Copato: it must rather be compared to the Copto nome, probably in primitive ages of greater extent than under the Ptolemies, for the number of names was in the course of time greatly increased. The Caphtorim stand last in the list of the Miézdri peoples in Gen. and Chron.; probably as dwellers in Upper Egypt, the names next before them being of Egyptian, and the earlier names of Libyan people.

"The migration of the Philistines is mentioned or alluded to in all the passages speaking of Caphtor or the Caphtorim. It thus appears to have been an event of great importance, and this supposition receives support from the statement in Amos. In the lists of Gen. and Chron., as the text now stands, the Philistines are said to have come forth from the Cašluhim — 'the Cašluhim, whence came forth the Philistines and the Caphtorim' — where the Heb. forbids us to suppose that the Philistines and Caphtorim both came from the Cašluhim. Here there seems to have been a transposition, for the other passages are as explicit, or more so, and their form does not admit of this explanation. The period of the migration must have been very remote,
since the Philistines were already established in Palestine in Abraham's time (Gen. xxi, 32, 54). The evidence of the Egyptian monuments, which is indirect, tends to the same conclusion, but takes us yet farther back in time. It leads us to suppose that the Philistines and kindred nations were cognate to the Egyptians, but so different in their habits that they must have separated before the character and institutions of the latter had attained that development in which they continued throughout the period to which their monuments belong. We find from the sculptures of Ramses II, at Memphis, that the Egyptians, about 1200 B.C., were at war with the Philistines, the Tok-kara and the Sharyratan of the Sea, and that other Sharyratan served them as mercenaries. The Philistines and Tok-kara were physically cognate, and had the same distinctive dress; the Tok-kara and Sharyratan were also physically cognate, and fought together in the same ships. There is reason to believe that the Tok-kara are the Carians, and the Sharyratan have been held to be the Cethethim of the Bible and the earlier Cretans of the Greeks, inhabiting Crete, and probably the coast of Palestine as (Encyclop. Brit. s. v. Egypt, p. 45; 43, c. 10, 20). All bear great resemblance to the Egyptians than does any other group of foreign peoples represented in their sculptures. This evidence points, therefore, to the spread of a seafaring race cognate to the Egyptians at a very remote time. Their origin is not alone spoken of in the record of the migration of the Philistines, but in the tradition of the Phenicians that they came from the Erythraean Sea [see Arabia], and we must look for the primeval seat of the whole race on the coasts of Arabia and Africa, where all ancient authorities lead us mainly to place the Cushites and the Ethiopians. See Cush. The difference of the Philistines from the Egyptians in dress and manners is, as we have seen, evident on the Egyptian monuments. From the Bible we learn that their laws and religion were likewise different from those of Egypt, and we may therefore consider our previous supposition as to the time of the separation of the peoples to which they belong to be positively true in their particular case. It is probable that they left Caphtor not long after the first arrival of the Miraite tribes, while they had not yet attained that attachment to the soil that afterward so eminently characterized the descendants of those which formed the Egyptian nation. The words of the prophet Amos (1x, 7) seem to indicate a deliverance of the Philistines from Canaan. The mention of the Ethiopian slave is worthy of note: they are perhaps spoken of as a degraded people. The intention appears to be to show that Israel was not the only nation which had been providentially led from one country to another where it might settle, and the interpolation would seem to imply oppression preceding the migration. It may be remarked that Manetho speaks of a revolt and return to allegiance of the Libyans, probably the Lehabim, or Lubim, from whose name Libya, etc., certainly came, in the reign of the first king of the third dynasty, Necerophes or Nechoth, in the earliest age of Egypt. This is, Cl. 4, 900 (Cory, Anc. Frag. 2d ed. p. 100, 101)." See Philistines.

Capistranus, Johannes (Giovanni di Capistrano), a Franciscan, was born at Capistrano, in the Abruzzi, June 23, 1385. Political troubles, during which he was imprisoned, led him to quit the world, and to assume the Franciscan habit. He led a life of extreme austerity, and spent himself in his short life (1392) sharply rebuking, but only temperately, the great daily, without touching flesh, for thirty-six years. He was made Inquisitor at Rome, especially against the Fraticelli (q. v.); and Cave states that, "heading the army of Crusaders, as they were called, he endeavored to root out heresy by fire and sword, and actually burned to the ground eighty-six villages of the Fraticelli in Cappadocia." In 1439 as nuncio to Sicily, and employed him at the Council of Florence in seeking to effect a union between the Greek and Latin Churches. In 1448 Nicholas V sent him on a crusade into Bohemia and Hungary against the Hussites. After this he stirred up a crusade against the Turks, and in 1456, putting himself in the midst of 100,000 troops of the chief of Belgrade, then besieged by Mohammed II, he carried the standard in the very forefront of the fight, and obtained a complete victory. He died Oct. 28, 1456, at Villach, in Carinthia. Alexander VII beatified him in 1608, and he was canonized by Benedict XIII in 1724. Among his works are: (1) De popis et cruciis, edit. E. E. L. e. aed. Auscultate, against the Fathers of Basle (Venice, 1580, 4to); and in the Tractatus Iuris (Urb. 1584, tom. xiii, pt. i, p. 82). (2) Speculum clericorum;—(3) Speculum concilia:—(4) De Canone penitentiali; all three in the Tract. Jur.; (5) De Excommunicata pietatis;—(6) De Alcibiade;—(7) De Cave, Hist. Lz. ii, App. p. 158; Hoefer, Nouv. Biog. Générale, viii, 580; Bailleit, Dict. des Saints, 23 Oct.; Giessler, Ch. History, period iii, § 182; Wetzer u. Welte, Kirchen-Lexikon, ii, 824.

Capitation or Poll-tax, among the Jews. Moses ordained (Exod. xxx, 18) that every Israelite should pay half a shekel for his soul, or person, as a redemption, "that there might be no plague among the people, when they were numbered." Many interpreters are of opinion that this payment was designed to take place as often as the people were numbered; and that this payment of the half shekel per head being evaded when David numbered his subjects, God punished the neglect with a pestilence (2 Sam. xxiv, 1). But it is more generally thought that Moses laid this tax on all the people, to be paid yearly, for the sacrifices, for the tabernacle, for the sacrifices, wood, oil, wine, flour, habits, and subsistence of the priests and Levites. In our Saviour's time the tribute was punctually paid. See DEDRACHMA. The Israelites, when returned from Babylon, paid one third part of a shekel to the Temple, being divided equally, at that time, among the Jews doing nothing (Nehem. x, 32). The rabbins observe that the Jews in general, and even the priests, except women, children under thirteen years of age, and slaves, were liable to pay the half shekel. The collectors demanded it in the beginning of Nisan, but used no compulsion till the Passover, when they either constrained its payment or took security for it. After the destruction of the Temple, the Jews were compelled to pay the half shekel to the temple of Jupiter Capitolinus. See ASSESSMENT.

Capito, Wolfgang Fabricius, an eminent coadjutor of Cæolampadius and Buæer in the Reformation, was born at Hagnauen in 1478, studied medicine, and afterward theology, and became D.D. at Freiburg, 1506. Cæolampadius called his name Fabricius, or blacksmith, whence the name Fabricius. For a while he was lecturer in the University of Freiburg, and in 1512 he became parish priest at Bruchal, where he studied Hebrew with a converted Jew, made the acquaintance of Cæolampadius, and was led to the study of Luther's writings. Called to the cathedral at Basle, he there, with his intimate friend Cæolampadius, held his lectures to the students on Romans he showed reformatory tendencies. In 1520 he became chaplain to Albrecht, elector and archbishop of Mayence, whom he defended, gently, against one of Luther's attacks, on account of the traffic in indulgences. Luther (Jan. 17, 1521) sharply rebuked him as a time-server. Studied, and, perhaps, convicted, Capito abandoned Mayence (1523), and took up a prebend there which Leo X had.
given him. At Strassburg Capito's prudence led him to moderate the zeal of Zell and other reformers; but he soon became himself ardent and earnest in the cause. From that time on he was one of the most efficient of all the coadjutors of Luther. In 1523 he married. In 1530 he took part in preparing the Confessio Tertulia (q. v.). His timidity, however, often drew on him the reproaches of Luther. In 1538 he had an interview with Calvin, at which he endeavored to bring about such a modification of the Genevan views on the subject as might be more to the liking of his contemporaries also in toleration. See Baum, Capito und Butzer, Strassburg's Reformatorum (84 vol. of Leben und ausgewählte Schriften der Väter der reform. Kirche [Elberfeld, 1889]); Adam, Vit. Thelologie, 41; Herzog, Real-Encyclopädie, ii, 551; Middleton, Evangelical Biography, 147; Biblioth. Sacra, Jan. 1861.

Capitularis (capitula, chapters), a term applied especially to the statutes of the Frankish kings made in the assembly of bishops and lords of the kingdom, and called capitula because published in chapters. The bishops reduced into the form of articles such rules as they deemed necessary, taken for the most part from the canons. The temporal lords also drew up on their part ordinances taken from the civil laws and customs, which the king afterward ratified and confirmed. These capitularies were in force throughout the kingdom. Those best known are the capitularis of Charlemagne and Louis le Debonnaire, which were first collected by Ansegis (q. v.) A.D. 827. The work was divided into four books, to which, about 845, Benedict, a deacon of Mayence, added some which Ansegis had omitted, together with the capitularis of Carlomann and Pepin. In the eighth and following centuries, bishops were accustomed to give the names of capitularies to the rules which they drew up from the canons of councils for the regulation of their dioceses. Such capitularies had no force beyond the particular diocese for which they were made, except they were confirmed by a provincial synod, which made them binding on the whole province. Other prelates, however, sometimes adopted the capitularies of particular bishops. An edition of the early capitularies was printed by Baluze (Paris, 1877, 2 vols. 4to), reprinted and re-edited by Chinnic, 1780; the latest and best edition is that of H. Pertz, Momumenta Germaniae Historica: Leipsic (Leipsic), t. i, ii (Hanover, 1833-1837).—Farrar, Ecc. Dict. a. v.; Herzog, Real-Encyclopädie, ii, 563.

Capnia. See Reuchlin.

Cappado'cia (Каппадоция, explained by Herod. viii, 72, as Persis, and latey thought by Lassen to be found in inscriptions on the form Катпадика); but Benfey, Momattamen, p. 117, interprets as Каппадико, "province of good horses," an ancient and the easternmost province of Asia Minor, bounded on the north by the Taurus, on the west by the Phrygians, on the east by the Galatae and Armenia Minor, on the south by the Mount Taurus (beyond which are Cilicia and Syria), and on the west by Pergamy and Galatia (Strabo, xii, p. 583 sq.; Ptolomy, v, 6; Pliny, vi, 3). The country is mountainous and abounds in water, and was celebrated for the production of horses of its fine pasture. It is the excellent breed of horses, asses, and sheep (Strabo, xii, 539; Solini, 47). The inhabitants were notorious for their dexterity and vice (Isidor. Pelus. I, 281; I, 497; Justin. xxxvii, 2; comp. Porphyrog. Them. 1, 2). They were called "Syrians" (comp. Jambloskiy, De lingua Graeca, ii, 115; Gismon. Mon. Phryg. p. 11) in the age of Herodotus (I, 72; v, 49), and even in Strabo's days they bore the name of Αντιξύριος, or "White Syrians." (xii, p. 544), in contradistinction to those dwelling beyond the Taurus, whose complexion was darkened by the sun (Strabo, xvi, 787). By the ancient interpreters (see Philo, Opp. ii, 676) they were thought to be meant by the "land of Captor" (op. cit.); but the ancient name of Cappadocia was Катпадико or Катпавтика (Rawlinson, Journ. of the Asiatic Soc. xi, 1, 95). Cappadocia was subdued by the Persians under Cyrus, but after the time of Alexander the Great it had kings of its own, although tributary to the Seleucids. Its geographical limits on the west and north were variable. In early times the name reached as far northward as the Euxine Sea. The region of Cappadocia, viewed in this extent, constituted two satrapies under the Persians, and afterward two independent monarchies. One was Cappadocia on the Pontus, the other Cappadocia near the Taurus. Here we have the germ of the two Roman provinces of Pontus and Cappadocia. See Pontes. Several of the monarchs who reigned in Cappadocia Proper bore the name of Ariairthes (q. v.). One of them is mentioned in 1 Mac. xv, 22. The last of these monarchs was called Archelaus (see Joseph. Ant. xvi, 4, 6). He was treacherously slain by the emperor Tiberius, who reduced his kingdom to a province A.D. 17, including what was anciently called Lesser Armenia (Tacit. Ann. ii, 42; Dio Cass. liv, 17). Christianity was very early propagated in Cappadocia, for the apostle Peter names it in addressing the Christian churches in Asia Minor (1 Pet. i, 1). Cappadocians (prop. Каппадоциане, also Каппадоциои) were present at Jerusalem on the day of Pentecost (Acts ii, 9). The Jewish community in this region doubtless formed the nucleus of the Christian; and the former may probably be traced to the first introduction of Jewish colonists into Asia Minor by Seleucus (Josephus, Ant. xii, 3, 4). The Roman period, through the growth of large cities and the construction of roads, would afford increased facilities for the spread both of Judaism and Christianity. It should be observed that Cappadocia was easily approached from the direction of Palestine and Syria by means of the pass called the Cilician Gates, which led up through the Taurus from the northern coast of Cilicia, and that it was connected, at least under the later emperors, by good roads with the district beyond the Euphrates (see Penny Cyclopaedia, s. v.; Smith, Dict. of Class. Geogr. a. v.). See Asia Minor.

Coin of Cappadocia.

Cappadocia was one of the seven provinces assigned to the diocese of Pontus, at its erection, by Constantine the Great and Constantius. Under the emperor Valens the province of Cappadocia was divided into the provinces of Cappadocia Prima and Secunda, which last was by the emperor Justinian subdivided, the new province being styled Cappadocia Tertia, and having for its metropolis see Mocisus, or, as it was thenforward styled, Justinianopolis. The chief see of the second Cappadocia was Tyana, and of the first, Cassin, which last was the mother and head of the whole Pontic diocese. See Cassarea.

Cappell (Cappelle), Jacques, a learned French Protestant divine, was born at Rennes in March, 1570, of an ancient and honorable family, which produced many theologians, jurists, and statesmen in the fifteenth, sixteenth, and seventeenth centuries. He became pastor at Sedan, and in 1599 professor of Hebrew at the academy there, and afterward of the University, which post he held until his death, September 7, 1624. Among his numerous writings are, Les Livres...

CAPTAIN

du Bébel, ou l'histoire du Siège Romain (Sedan, 1616, 8vo); Historiar Ecclesiastic Centurias quingee (Sedan, 1622, 4to). After his death appeared his Observationes in T. T. (Amst. 1674, 4to).—Observationes in libris Vet. Test. (in L. Cappell'sCommentarius, Amst. 1689, fol.). A list of his works is given by Nicoron, xxii, 406.—Hoefer, Nouv. Biog. Générale, viii, 615; Haag, La France Protestante, s. v.

Cappel (Cappellus), Louis, younger brother of the foregoing, was born near Sedan, October 15, 1585. In 1609 the church in Bordeaux provided funds for him, and he spent four years in travel and study in England, France, and Germany. In 1613 he became professor of Hebrew, and in 1638 (with Amyraldus and Placeus) was professor of divinity at Saumur. He was a pious Christian, a most learned theologian, and a thorough Protestant in a time of great trial. Besides his theological and exegetical writings, he is chiefly memorable for his controversy with Buxtorf concerning the antiquity of the vowel points. His view was published in his Arcanumunctionis reedection (1623; reprinted in the appendix to his Comm. et Notae Crítica, Amst. 1638). It was, that these points were invented by the Jews of Tiberias some six hundred years after the death of Jesus Christ; whereas Buxtorf held them to be coeval with the language. The opinion of Cappellus has since been generally received. His greatest work was the Crítica Sacra, containing, among many other learned and valuable dissertations, a collection of various readings and errors which had crept into the text of the Bible. He was occupied thirty-six years upon this work, which the Protestants so much disliked that they hindered the impression of it, and it was not given to the public until 1650, when John, his son, who joined the communion of the Church of Rome, obtained leave of the king to print it. Buxtorf (the son) criticised sharply, and also bitterly attacked Cappellus for his theory of the vowel points in his Tractatus de Punctorum Origine, etc. (Basel, 1618; 2d part 1651, 4to). Cappellus repaid in a Justa Defensione (printed in later editions of the Crítica Sacra). His further publication, on the text of the O. T., Disputa de verse et Annoius Ebraeorum lipses (Amst. 1645, 4to), is reprinted in Buxtorf. A new edition of the Crítica Sacra appeared at Halle (1775-86) in 8 vols. 8vo. In 1610 he visited Oxford. He died at Saumur, June 18, 1688. Among his other works are, Historia Apostolica illustrata (Geneva, 1634, 4to; and in the London edition of the Crítica Sacra, 1660).—Spicilegium, a collection of criticisms on the New Testament (Geneva, 1639, 4to).—De critica superior a se edita ad Rev. virum D. Jacob, Unitarium, Armamen- num in Hibernia Episcopum, Epistola Apologet. (Sal. 1603, 4to).—Commentarius et Notae Criticae in Vet. Test. (Amst. 1689, fol.). A full list is given by Haag, La France Protestante, iii, 199; in Nicoron, vol. xxii; and also in the edition, by his son, of his Comment. et Notae Criticae in T. T. (Amst. 1689, fol.), which also gives biographical sketches, under the title De Cappellorum Gente, of the distinguished members of the Cappel family. His Correspondence with Usher is given in Part's Collection of Usher's Letters. He also wrote Chronologia Sacra (1655, 4to), reprinted among the progeny of Walton's Polyglott.—Hoefer, Biog. Générale, viii, 615; Herzog, Real-Encyclopädie, ii, 506.

Captain is the rendering, in the Auth. Verc. of numerous Heb. and several Greek words, of which the following only require special elucidation. For the מָרָע, kari, rendered "captains," 2 Kings xi, 4, 19, see Cherebertes.

(1.) As a purely military title, captain answers to שָׁם, in the Hebrew army, and χυλαργος (triumvum) in the Roman. See Army. The "captain of the guard" (επαρχοςεξοργυσα) spoken of in Acts xxvii, 16 was the Praetorian praefect. See CHRONOLOGY, p. 812, b. (2.) מָרָע, kari, which is occasionally rendered captain, applies sometimes to a military (Josh. x, 24; Judg. xi, 6, 11; Isa. xxiii, 3; Dan. xi, 18), sometimes to a civil command (e. g. Isa. i, 20; iii, 6); its radical sense is dictation and hence decision, without reference to the means employed; the term illustrates the double office of the δικαστή, or dictior ("judge"). See Judges.

(3.) מָרָע, slahan, (Exod. xiv, 7; xv, 4; 2 Sam. xxii, 8; 1 Kings ix, 22; 2 Kings ix, 25; xx, 25; xxv, 1; 1 Chron. ii, 11; xii, 15; 2 Chron. viii, 9; "lord"); 2 Kings vii, 17, 19; 1 Esdr. xxiii, 23; "prince," Ezek. xxiii, 15, prop. a third man, i.e. one of three, Gr. τριαμθύρα, a higher order of soldiers, who fought from chariots, χαριστ-καριστα (Exod. xiv, 7; xv, 4; 2 Kings ix, 22; 2 Chron. xii, 23; 2 Esdr. xxii, 87; Eupr. Suppil. 679); employed also for the body-guard of kings (1 Kings ix, 22; 2 Kings x, 25; 1 Chron. xi, 11, xii, 16). The Sept. has τριαμθύρα, L. e. according to Origen and Gregory of Nyssa (in the Catena), "soldiers fighting from chariots," and so called because each chariot contained three soldiers, one of whom managed the horse, while the other two fought (comp. Ewald, Gesch. Isr. ii, 61). For although on the Egyptian monuments usually but one, or at most two appear in the war-chariots, yet occasionally, as certainly in the Assyrian bas-reliefs, in addition to the driver and the warrior, an armoured slave or unarmed man-lasher is depicted as standing in the chariot, who might properly be termed τριαμθύρα, of a third man. See Chariot. It is true the Hebrew army did not originally consist of cavalry, although chariots were in use among the Canaanites, and the first occurrences of the term בֶּן-שָׁם are in connection with the Egyptians; but at a later date a chariot-squadron was organized (1 Kings x, 26; 2 Kings vii, 5; 2 Sam. vii, 4). Consequently, it is not strange that among the battalions of David and Solomon (2 Sam. xxiii, 8) there should be named as a prominent hero the leader of these שָׁם, etc., or, rather שָׁם (comp. Gesenius, Lehrg. p. 825; Bötticher, Spec. p. 38 sqq.; Ewald, Gramm. Hdb. 5th ed. § 152, c. 177 a). Solomon's chariot-men (בֶּן-שָׁם) are mentioned (1 Kings ix, 22; 2 Kings x, 9) as next to the prefects of his chariot-force (בֶּן-שָׁם). After the times of Solomon there certainly were chariot-combatants (כֹּסְדָּר) as royal officers in the northern kingdom, and in the reign of Jehu runners and chariot-men (בֶּן-שָׁם) formed, as it were, the king's Praetorian cohort (2 Kings x, 25); and the chief of these Praetorians (called by eminence בֶּן-שָׁם or בֶּן-שָׁם יְבִא) was among the most noble of the royal attendants (q. d. adjutant-general). Accordingly, Jehoram had an officer of this title, "on whose hand the king leaned" (2 Kings vii, 2, 17, 19); Jehu's charioteer was Bidkar (2 Kings ix, 26); and Pekah held this eminent office under Pekahiah (2 Kings xv, 25). Others, however (after Drusius), hold that the בֶּן-שָׁם was merely the third officer in rank after the king, or commanded a third part of the army; thus, etc. So the Greek glossarist (ap. Drusch ad Exeç. and in Fragm. Vet. interpr. Gr. p. 145; Schleusner, Nos. Theaur. s. v. χαριστήριον; Dufresne, Glossar. s. v.; see Rosenmüller, Schola ad Exod. xiv, 7). See Chief of Three.

(4.) The "captain of the Temple" (πρεσβύτης τοῦ ἱεροῦ), mentioned by Luke (Acts iv, 1; v, 24) in connection with the priests, was not a military officer, but superintended the guard of priests and Levites who kept watch by night in the Temple. The "captains" mentioned Luke xxii, 4, were probably his subordinates.
The office appears to have existed from an early date; the "priests that kept the door" (2 Kings xii, 9; xxv, 18) are described by Josephus (Ant. x, 8, 5) as "the officers guarding the Temple" (τοῖς φυλασσονταῖς τὸ ἱερὸν γύμνωσιν): a notice occurs in 2 Macc. iii, 4, of a prefect of the Temple (εὐρωτὴν τοῦ ἱεροῦ); this officer is styled στρατηγός or captain by Josephus (Ant. xx, 6, 2; War, vi, 5, 8); and in the Mishna (Midr. i, 1) רמאוי יד תולה, "the captain of the mountain of the Temple;" his duty, as described in the place last quoted, was to visit the posts during the night, and see that the sentries were doing their duty (comp. 1 Chron. ix, 11; 2 Chron. xxxi, 18; xxxv, 8, 9; Jer. xx, 1). See Temple.

The rank or power of an Israelitish captain was designated by the number of men under his command, as captain of fifty, or captain of a thousand [comp. Centurion]; and the commander or chief of the whole army was called the captain of the host (q. v.). The divisions of the army were regulated in some measure by the division of families, as the heads of families were usually officers. Captains of hundreds, or larger companies, were probably what would be called in modern phrase staff-officers, and formed the councils of war. See War. Sometimes distinguished men who were not Hebrews were promoted to high stations in the army (Deut. i, 15; 1 Chron. xiii, 1; 2 Chron. xxv, 5; 2 Sam. xxiii, 39). See Officer.

God is called Captain ("Prince") of the Host (יוֹדֵעַ הָוֹאָר, Dan. viii, 11), not as equivalent to "Lord of Hosts," but because he is the head and protector of his people. So in the N. T. our Lord is called Captain of his people's salvation (αρχηγὸς τῶν σωτηρίας αὐτῶν, Heb. ii, 12), because he is the beginner, source, and author of their salvation, the head of his Church, which he conducts, with and in himself, to blessedness (comp. Josh. v, 14). See Jehovah.

Captive (properly בְּנִי, shebi; Gr. αἰχμαλώτος) is distinguished from a prisoner (q. v.) or one in bondage (q. v.). See Captivity. Various indignities and cruelties were inflicted on those who had the misfortune to be taken captive in war. Those who surrendered were led out with halters as if for execution (1 Kin, xx, 28). See Behistun. On some occasions particular districts were marked out with a line for destruction (2 Sam. viii, 2). The victors set their feet upon the necks (q. v.) of the captured kings and nobles (Josh. x, 24), or mutilated their persons by cutting off their thumbs, toes, or ears (Judg. i, 7; 2 Sam. iv, 12; Ezek. xxiii, 25); and sometimes they put out their eyes (q. v.) by passing a red-hot iron over them, or literally scooped or dug them out of their sockets (2 Kings xxv, 7; Isa. lxi, 1). These cruelties are still practised under some of the despotic governments of the Eastern countries. See Punishment. It was the barbarous custom of the conquerors of those times to suspend their unhappy cap-
CAPTIVITY

The word Captivity, as applied to the people of Israel, has been appropriated, contrary to the analogy of our language, to mean Expatriation. The violent removal of the entire population of a city, or sometimes even of a district, is not an uncommon event in ancient history. As a measure of policy, no objection to it on the ground of humanity was felt by any one, since, in fact, it was a very mild proceeding, in comparison with that of selling a tribe or nation into slavery. Every such destruction of national existence, even in modern times, is apt to be embittered by the simultaneous disruption of religious bonds; but in the ancient world, the positive sanctity attributed to special places, and the local attachment of Deity, made expatriation doubly severe. The Hebrew people, for instance, in many most vital points, could no longer obey their sacred law at all when personally expelled from Jerusalem; and in many others they were forced to modify it by reason of their change of circumstances. Two principal motives impelled conquering powers thus to transport families in the mass: first, the desire of rapidly filling with a valuable population new cities, built for patriotic or for personal reasons; secondly, the termination to break up hostile organizations, or dangerous reminiscences of past greatness. Both might sometimes be combined in the same act. To attain the former object, the skilled artisans would in particular be carried off; while the latter was better effected by transporting all the families of the highest birth, and all the well-trained soldiers. The Greeks used the special epithet άνδρασπάσιον for a population thus removed (Herod. vi. 93, passim).

I. ASYRIAN CAPTIVITY OF "ISRAEL."—1. Its Occurrence. The kingdom of Israel was invaded by three or four successive kings of Assyria. Pul or Sardanapalus, according to H. Rawlinson (Outline of Assyrian History, p. 14; but comp. G. Rawlinson, Herodotus, i, 465), imposed a tribute, B.C. cir. 725, upon Menahem (1 Chron. v. 26, and 2 Kings xv. 19). Tiglath-Pileser carried away, B.C. cir. 738, the trans-Jordanian tribes (1 Chron. x. 29) and the inhabitants of Galilee (2 Kings xv. 29; compare Isa. i. 1, 1).
CAPTIVITY

109
CAPTIVITY

to Assyria. Shalmaneser twice invaded (2 Kings xvii, 8, 9) the kingdom which remained to Hoshea, took Samaria, B.C. 720, after a siege of three years, and carried Israel away into Assyria. He destroyed Hoshea. In an inscription erected by Rawlinson (Herodotus, i, 472), the capture of Samaria is claimed by king Sargon ( Isa. xx, 1) as his own achievement. The cities of Samaria were occupied by people sent from Babylon, Cuthah, Ava, Hamath, and Sepharvaim; and Halah, Habor, Harra, and the river of Gozan became the seats of the dispersed Israelites, KINGDOMS. The book of Tobit exhibits Israelites in Media possessed of slaves themselves (viii, 18); the book of Daniel tells us of a Jew in eminent political station, and that of Esther celebrates their power and consequence in the Persian empire. Under the Seleucids [see Antiochus] they were occasionally important as garrison- men and soldiers; and in Egypt they were expected in their lot was milder than that of the other conquered nations among which they dwelt.

3. Eventual Fate of the Exiles in Assyria.—Many attempts have been made to discover the ten tribes existing as a distinct community. Josephus (Ant. xi, 5, 2) believed that in his day they dwelt in large multitudes somewhere beyond the Euphrates, in Ararat, according to the author of 2 Esdr. xii, 45. Rabbinical traditions and fables, committed to writing in the Middle Ages, assert the same fact (Lightfoot, Hor. Hebr. in 1 Cor. xiv, Appendix), with many marvellous amplifications (Zinzendorf, Enzyk. Jud. vol. ii, ch. x; Jahn, Ezræs, p. 174). But the tradition of Christian writers has sought them in the neighborhood of their last recorded habitation; Jewish features have been traced in the Affghân tribes; rumors are heard to this day of a Jewish colony at the foot of the Himalayas; the Black Jews of Malabar claim affinity to the Ten Tribes, but their place was not so closely supplied by colonies from Babylon and Suxis (2 Kings xvii, 24). See ASYRIA.

2. Condition of the Assyrian Captives.—This was probably not especially different in its external circumstances from that of their Judaite brethren subsequently during the exile in Babylon. (See above.) We know nothing, except by inference from the book of Tobit (q. v.), of the religious or social state of the Israelitish exiles in Assyria. Doubles the constant policy of seventeen successive kings had effectually estranged the people from that religion which centred in the Temple, and had reduced the number of faithful men below the 7000 who were revealed for the consolation of Elijah. Some priests at least were among them (2 Kings xvii, 38), though it is not certain that these were of the tribe of Levi (1 Kings xii, 31). The people had been nurtured for 250 years in idolatry in their own land, where they departed not (2 Kings xvii, 26), the change from their native land and the proximity of the Temple, and the succession of inspired prophets (2 Kings xvii, 13) among them. Deprived of these checks on their natural inclinations (2 Kings xvii, 15), torn from their native soil, destitute of a hereditary king, they probably became more and more closely assimilated to their heathen neighbors in Media. And when, after the lapse of more than a century, they were joined by the first exiles from Jerusalem, very few families probably retained sufficient faith in the God of their fathers to appreciate and follow the instruction of Ezekiel. But whether they were many or few, their genealogical records, probably kept at home, Jerusalen having taken place, Israel ceasing to envy Judah ( Isa. xi, 18); and Ezekiel may have seen his own symbolical prophecy (xxxvii, 15-19) partly fulfilled.

The nation thus transported by the monarchs of Assyria and Babylon were treated with no unnecessary harshness or severity. Daniel and Hosea are of them. So far were they from the condition of bondsmen (which the word "captive" suggests), that the book of Susanna represents their elders in Babylon as retaining the power of life and death over their own people (l, 28), when Daniel was as yet a very young man. Daniel's book is introduced as an apologetic as to the chronology, yet the notices given by Ezekiel (x, 1; xx, 1) concur in the general fact that they still held an internal jurisdiction over their own members. At a later time, under the Solonides, we have distinct proof that in the principal cities the Jews were governed by an officer (διδάσκαλος) of their own nation, as also under the Macedonians. The book of Tobit exhibits Israelites in Media possessed of slaves themselves (viii, 18); the book of Daniel tells us of a Jew in eminent political station, and that of Esther celebrates their power and consequence in the Persian empire. Under the Seleucids [see Antiochus] they were occasionally important as garrison-men and soldiers; and in Egypt they were expected in their lot was milder than that of the other conquered nations among which they dwelt.

3. Eventual Fate of the Exiles in Assyria.—Many attempts have been made to discover the ten tribes existing as a distinct community. See ASYRIA.

2. Condition of the Assyrian Captives.—This was probably not especially different in its external circumstances from that of their Judaite brethren subsequently during the exile in Babylon. (See above.) We know nothing, except by inference from the book of Tobit (q. v.), of the religious or social state of the Israelitish exiles in Assyria. Doubles the constant policy of seventeen successive kings had effectually estranged the people from that religion which centred in the Temple, and had reduced the number of faithful men below the 7000 who were revealed for the consolation of Elijah. Some priests at least were among them (2 Kings xvii, 38), though it is not certain that these were of the tribe of Levi (1 Kings xii, 31). The people had been nurtured for 250 years in idolatry in their own land, where they departed not (2 Kings xvii, 26), the change from their native land and the proximity of the Temple, and the succession of inspired prophets (2 Kings xvii, 13) among them. Deprived of these checks on their natural inclinations (2 Kings xvii, 15), torn from their native soil, destitute of a hereditary king, they probably became more and more closely assimilated to their heathen neighbors in Media. And when, after the lapse of more than a century, they were joined by the first exiles from Jerusalem, very few families probably retained sufficient faith in the God of their fathers to appreciate and follow the instruction of Ezekiel. But whether they were many or few, their genealogical records, probably kept at home, Jerusalen having taken place, Israel ceasing to envy Judah ( Isa. xi, 18); and Ezekiel may have seen his own symbolical prophecy (xxxvii, 15-19) partly fulfilled.

The nation thus transported by the monarchs of Assyria and Babylon were treated with no unnecessary harshness or severity. Daniel and Hosea are of them. So far were they from the condition of bondsmen (which the word "captive" suggests), that the book of Susanna represents their elders in Babylon as retaining the power of life and death over their own people (l, 28), when Daniel was as yet a very young man. Daniel's book is introduced as an apologetic as to the chronology, yet the notices given by Ezekiel (x, 1; xx, 1) concur in the general fact that they still held an internal jurisdiction over their own
Jer. iii, 28, 29, and one in Dan. i, 8. The two principal deportations were, (1) which took place B.C. 588, when Jehoiachin, with all the nobles, soldiers, and artisans, was carried away after the two principal deportations. The third is located by the date in B.C. 588. The captivity of certain selected children, B.C. 607, mentioned by Daniel (i, 8, 6), who was one of them, may have occurred when Nebuchadnezzar (q. v.) was colleague or lieutenant of his father Nabopolassar, a year before he reigned alone. The captivity of Ezekiel (q. v.) dates from B.C. 588, when the enemies of Jerusalem were the first portion of the people into captivity, among whom was Daniel. The text, however, does not explicitly say so much, although such is the obvious meaning; but if this is the only interpretation, we find it in direct collision with the books of Kings and Chronicles (which assigns to a period of twenty years the event which we are here told under the name of the third year of Nebuchadnezzar). The statement in Daniel partly rests on 2 Chron. xxxvi, 6, which is itself not in perfect accordance with 2 Kings xxiv. In the earlier history, the war broke out during the reign of Jehoiakim, who died before its close; and when his son and successor Jehoiachin had reigned three months, the city and its kings were captured. But in the Chronicles, the same event is made to happen twice, at an interval of three months and ten days (2 Chron. xxxvi, 6 and 9), and even thus we do not obtain accordance with the received interpretation of Daniel 1, 1-5. It seems, on the whole, the easiest supposition that the third year of Jehoiakim". Hengstenberg, however, and Havernick defend the common reading, and think they reconcile it with the other accounts; which may not unreasonable be done by understanding the date in Dan. i, 1, to refer to the setting out of Nebuchadnezzar on the campaign to Jerusalem, and the capture of the city. There has been considerable difference of opinion as to how the 70 years of captivity spoken of by Jeremiah (xxx, 12; xxx, 10) are to be estimated. A plausible opinion would make them last from the destruction of the first Temple, B.C. 588, to the finishing of the second. B.C. 586. But it is not so certain as to specify "the punishment of the king of Babylon" as the end of the 70 years—which gives us the date B.C. 538—that many, with Jahn, cling to the belief that a first captivity took place in the third year of Jehoiakim, B.C. 605. But, in fact, if we read Jeremiah himself, it may appear that in ch. xxvii he intends to compute the 70 years of captivity from B.C. 529, and that in the Mosaic law (Ex. xxvii, 1). It remains to be seen whether the captivity of Nebuchadnezzar to the decree of Cyrus B.C. 606-586), and the other ecclesiastical, from the burning of the Temple to its reconstruction (B.C. 588-577). See SEE. ENGY. YRS. CAPTIVITY. B.C. 586. Other dates by the years of Nebuchadnezzar's reign, and estimates that in his seventh year 9028 were carried off, in his eighteenth 882, and in his twenty-third only 745, making in all, as the writer is careful to note, 4600 (Jer. iii, 28, etc.). The third removal he ascribes to Nebuchadnezzar, the Babylonian general. That some misunderstanding here exists, at least in the numbers, appears undeniable; for according to 4600 persons were carried away. As for this, the vassal king Zedekiah having rebelled, his city is besieged, and finally, in his eleventh year, is reduced by Nebuchadnezzar in person; and in the course of the same year, "the fourtenth of Nebuchadnezzar" (2 Kings xxv, 8), Nebuzaradan carries away all the population except the peculiar class of Jews not that no mention is made in the book of Kings of the third deportation, for the account of the destruction was in a manner complete upon the second invasion. The first expedition was directed to swell the armies and strengthen the towns of the conqueror; for of the 18,000 then carried away, 1000 were "craftsmen and smiths and all strong for war," and 7000 of the rest are called "mighty men of valor." (Yet there is an uncertainty about verses 14 and 16 in 2 Kings xxv. Probably here, as well as in Jer. iii, heads of families only are counted.) It was not until the rebellion of Zedekiah that Nebuchadnezzar proceeded to besiege Jerusalem for the extermination of the royal race and the city. As the Temple was then burnt, with all the palaces and the city walls, and no government was left but that of the Babylonian satrap, this latter date is evidently the true era of the captivity. Previously Zedekiah was tributary, but were Josiah and Ahaz long before; the national existence was still saved. See BABYLON. 3. Its comparative Mildness.—The captive Jews were probably prostrated at first by their great calamity, till the glorious vision of Ezekiel (i, 1) in the fifth year of the captivity revived and reunited them. The wishes of their conqueror were satisfied when he had displayed his power by transporting them into another land, and gratified his pride by inscribing on the walls of the royal palace his victorious progress and the number of his captives. He could not have designed simply to increase the population of Babylon, for his Assyrian predecessor had sent Babylonian colonists into Samaria. One king knew only too well the uncouthness of the western world, and the more easy government of a people separated from local traditions and associations (see Genesis on Isa. xxxvi, 16, and compare Gen. xxvii, 21). It was also a great advantage to the Assyro-Babylonian king to remove from the Egyptian border of his empire a people who were notoriously well affected toward Egypt. The captives were treated not as slaves, but as colonists. There was nothing to hinder a Jew from rising to the highest eminence in the state (Dan. ii, 48), or holding the most confidential office near the person of the king (Neh. ii, 11; Tobit i, 13, 22). The advice of Jeremiah (xxix, 5, etc.) was generally followed. The exiles increased in number (2 Chron. xxxvi, 6). They became so numerous that they at least preserved their genealogical tables, and were at no loss to tell who was the rightful heir to David's throne. They had neither place nor time of national gathering: no temple, and they offered no sacrifices. But the rites of circumcision, and their laws regarding food, etc., were observed, as were also the Mosaic law (Ex. xxix, 1); and possibly the practice of erecting synagogues in every city (Acts xv, 21) was begun by the Jews in the Babylonian captivity. The captivity is not without contemporaneous hier-
CAPTIVITY

CHAPTER 11

nature. In the apocryphal book of Tobit, which is generally believed to be a mixture of poetical fiction with historical facts recorded by a contemporary, we have a picture of the life and family of the tribe of Naphtali, among the captives whom Shalmaneser brought to Nineveh. The apocryphal book of Beruch seems, in Mr. Layard's opinion, to have been written by one whose eyes, like those of Ezekiel, were familiar with the gigantic forms of Assyrian sculpture. Seven or eight pairs apocalyptic family of the tribe of Jews who were either partakers or witnesses of the Assyrian captivity. Ewald assigns to this period Psa. xii, xiii, xxiv, xvii, xvi, xli, xxxix, xxxv, lxx, lxxxvi, lxxxvii, lxxxviii, lxxxix, cxxi, cxlix, li, lix, x, xxxvi, xxxv, lixxiii, lxxiv, lixxv, cxli, cxlii, cxlv, cxlxi, cxlvii, cxxx, cxxi, cxlii. Also in Psa. lix, xxi, xcv, xxxvi, lix, cxliv, liv, dwel ling perhaps in Judea (2 Chron. xv, 9; xxxi, 6), who counted, of the departure of his countrymen to Assyria; and in Psa. cxxvii an outpouring of the first intense feelings of a Jewish exile in Babylon. But it is from the three great prophets—Jeremiah, Ezekiel, and Daniel—that we learn most of the condition of the children of the captivity. The distant warnings of Jeremiah, advising and counselling them, followed them into Assyria. There, for a few years, they had no prophetic guide; till suddenly the vision of Ezekiel at Chebar (in the immediate vicinity of Nineveh, according to Layard, or, according to others, near Carchemish on the Euphrates) foretold the destruction of the temple which filled the Temple at Jerusalem was hopelessly withdrawn from the outcast people of God. As Jer emiah warned them of coming woe, so Ezekiel taught them how to bear that which was come upon them. When Ezekiel died, after passing at least twenty-seven years (Ezek. xxix, 17) in captivity, Daniel survived even beyond the Return; and though his high station and ascetic life probably secluded him from frequent familiar intercourse with his people, he filled the place of chief interpreter of God's will to Israel, and gave the most conspicuous example of devotion and obedience to his laws.

4. The Restoration from Babylon.—The first great event in the Return is the decree of Cyrus, B.C. 526 (which was possibly framed by Daniel; see Milman, Hist. of Jews, ii, 8), in consequence of which 42,860 Jews of Babylon returned under Sheshbazzar, with 7857 slaves, besides cattle. This ended in their building the temple in Jerusalem. The Temple and people, fifty-three years after the destruction of the first. The progress of the work was, however, almost immediately stopped; for Zerubbabel, Jehusha, and the rest abruptly refused all help from the half-heathen inhabitants of Samaria, and soon felt the effects of the enmity thus induced. That the mind of Cyrus was changed by his intrigues we are not informed, but he was probably absent in distant parts through continual war. There is some difficulty in Ezra iv as to the names Abasaurus and Artaxerxes, yet the general facts are clear. When Darius (Hyestaspes), an able and generous monarch, ascended the throne, the Jews secured the return of Sheshbazzar, who was in chief authority (Sheshbazzar, if a different person, perhaps being dead), and under him the Temple was recommenced in the second and finished in the sixth year of Darius, B.C. 520-517. Although this must be reckoned an era in the history, it is not said to have been accompanied with any new immigration of Jews. We pass on to the "seventh year of king Artaxerxes" (Longman's), Ezra vii, 7, i. e. B.C. 459, when Ezra comes up from Babylon to Jerusalem, with the king's commendatory letters, accompanied by a large body of his nation. The enumeration in Ezra viii makes the number 12,000; but perhaps amounting to 5000 persons, young and old: of whom 113 are recounted as having heathen wives (Ezra x, 24-85). In the twentieth year of the same king, or B.C. 446, Nehemiah, his cup-bearer, gains his permission to restore "his fathers' sepulchres," and the walls of his native city, and is sent to Jerusalem with large powers. This is the crisis which decided the national restoration of the Jewish people; for before this city was fortified they had no defence against the new confirmed enmity of their Samaritan neighbours; and, in fact, before the walls could be built, several princes around were able to offer great opposition. See Sarm aux. The Jewish population was overwhelmed with debt, and had generally mortgaged their little estates to the rich; but Nehemiah's influence succeeded in bringing about a general forfeiture of debts, or, at least, of interest; after which we may regard the new order of things to have been finally established in Judæa. See Nehemiah. From this time forth it is probable that many of them had returned in small parties, as to a secure home, until all the waste land in the neighborhood was recouperated.

The great mass of the Israelitish race nevertheless remained in the lands to which they had been scattered. Previous to the captivity, many Israelites had settled in Egypt (Zech. xii, 11; Is. xix, 19), and many Jews afterward lived in the lands of the Philistines (Josh. xxi, 17). Others appear to have established themselves in Sheba (see Jos. ii, 19), where Jewish influence became very powerful. See Shema. Among those that returned to Judæa, about 10,000 are specified (comp. Ezra ii and Neh. vii) as belonging to the tribes of Judah, Benjamin, and Levi. It has been inferred (Prideaux, sub ann. 526) that the remaining 12,000 belonged to the tribes of Israel (comp. Ezra vi, 17). Also from the fact that out of the twenty-four courses of priests only four returned (Ezra ii, 86), it has been inferred that the whole number of exiles who chose to continue in Assyry was not six times the number of those who returned. Those who returned (Esth. viii, 9, 11), and kept up their national distinction, were known as The Dispersion (John vii, 55; 1 Pet. i, 1; James i, 1); and in course of time they served a great purpose in diffusing a knowledge of the true God, and in affording a point for the commencement of the efforts of the evangelists of the Christian faith. See below, and comp. RESTORATION (of the Jews).

5. Effects of the Captivity.—The exile was a period of change in the vernacular language of the Jews (see Neh. viii, 8, and comp. HALDER LANGUAGE) and in their national character. The Exile and the Artaxerxes remarkably free from the old sin of idolatry: a great spiritual renovation, in accordance with the divine promise (Ezek. xxxvii, 24-29), was wrought in them. A new and deep feeling of reverence for at least the letter of the law and the institutions of Moses was probably a result of the religious service which was performed in the synagogues. At the same time their theological and demonological views were developed by their contact with Oriental systems, and perhaps by the polemics thereby engendered, and especially by their review of their own religious resources, and their more careful study of the didactic portions of the O. T. Scripture. That it is that from which we can date not only a fuller angelology (see ANGEL), but also more subtle philosophical distinctions (see PHILOSOPHY), and in particular a more distinct recognition of the great doctrines of the Imortality of the soul, and even of the resurrection of the body, which we subsequently find so unquestioned by the orthodox Pharisees. See SECTS (OF THE JEWS). All this was the natural consequence of the absence of the ritual services of the Temple, which brought out the more spiritual elements of Mosaism, and thus was the nation better prepared for the dispensation of the Gospel. A new impulse was given to society both in Palestine and in the Dispersion (see James iv, 13), which they have continued to feel even to the present time. In fine, an innovation was effected upon the narrow and one-
CAPTIVITY

6. The Dispersion, ἡ Ἀπαράστατη (2 Macc. i, 27; James i, 1; 1 Pet. i, 1; John vii, 35; Josephus, Ant. xii, 1, 8, etc.; Sept. for Γραφή, which also renders ἀνώτατη, μυστικάς, ἑαυτῶν, λαλομοῦντα), is the collective name given to all those descendants of the twelve tribes (James i, 1; τὸ δεδεκαέφαλον, Acts xxxvi, 7) who lived without the confines of Palestine (ἵνα, 1 Cor. v, 13, etc.; Γένεσις, 52, 53, 55, Talmudic Mishna), during the time of the second Temple. The number of exiles, mostly of the tribe of Judah and Benjamin ( Ezra i, 5, etc.), those who were the possessors of the permission of Cyrus to return from their captivity in Babylonia to the land of their fathers, scarcely exceeded, if indeed it reached, the number of 50,000 (the total stated both in Ezra and Nehemiah is, exclusive of the slave, 42,360; but the sum of the items given—with slight difference—amounts to 38,800). Other Jewish authorities see in this surplus Israelites of the ten tribes (comp. Seder Olam Rabba, ch. xxix), and among these few but the lowest and humblest, or such as had yielded to authority, were to be found (comp. Mishna, Kiddushin, iv, 1; Gem. lxxi, 1). The great bulk of the nation returned over the wide dominions of the Persian empire, preferring the new homes in which they enjoyed all the privileges of native-born subjects, and where they had in many cases acquired wealth and honors, to the dangers and difficulties of a recreation of their former country. But while, by the hands of the despised minority who had bravely gone forth, was to be recreated not only the Temple, the visible centre of Judaism, but also the still more imposing and important edifice of the Jewish law and Jewish culture, to the much larger section which remained behind, and gradually diffused itself over the whole of the then known world, it was given to the Jews which intelligence had the progress of civilization in all the nations with whom their lot was cast. To the Dispersion is due the cosmopolitan element in Judaism which has added so vastly not only to its own strength and durability, but also, geographically at least, to the rapid spread of Christianity. So far, however, from the dispersion paving the way for the new faith by relaxing the rigor of Jewish law, written or oral—as has been assumed by some—one of the strongest ties by which these voluntary exiles were bound to Palestine and Jerusalem consisted in the very regulations and decisions on all ritual and legal points which they received from the supreme religious authority, either through their own delegates, or transmitted to them by special messengers from the Central Court, the Sanhedrim (Acts xxviii, 21). Generally it might be said of the whole Diaspora, as Philo (Pacch. § 7) said of that of Egypt: that while they looked upon the country in which they had been born and bred as their home, still they never ceased, so long as the Temple stood, to consider Jerusalem as the spiritual metropolis to which their eyes and hearts were directed. Many were the pilgrimages undertaken thither from their far-distant lands (Acts ii, 5, 9–11; Joseph. War, vi, 9, 8, etc.). The Talmud (Geb. Min. iii, 25; comp. the Macc. i, 24) speaks of less than 380 synagogues in Jerusalem, besides the Temple, all belonging to different communities of the Dispersion (comp. also Acts vi, 9). Abundant and far exceeding the normal tax of half a shekel (Shelii, v, 4) were the gifts they sent regularly for the support of the holy place (gold instead of silver and copper, Tob. Shek. c, 2), and still more liberal were the mone- tary equivalents for sacrifices, precious stones (γυρος, Philo), for vows, etc., which flowed from all countries into the sacred treasury. The Sanhedrim again regulated the year, with all its subdivisions, throughout the wide circle of the Dispersion; the fact that the commencement of the new month had been officially recognised being announced either by messen- dires to the adjoining countries, or by messengers to places more remote. That, in general, there existed, as far as circumstances permitted, an uninterrupted intercourse between the Jews abroad and those in Palestine cannot be doubted. Probably, owing to this very communication, two foreign academies seem to have existed during the time of the second Temple; the youth of the Dispersion naturally preferring to resort to the fountain-head of learning and religious instruction in the Holy City. The final destruction of the Temple and Jerusalem was thus a blow hardly less sensibly felt by the Dispersion than by their brethren of Jerusalem themselves. In some of these no visible centre bound the widely-scattered members of the Jewish nation together; nothing remained to them but common memories, common hopes, and a common faith.

(a.) Foremost in the two or three chief sections into which the Dispersion has been divided stands the Babylonian (ἱπποτάμιον, Josephus, Ant. xv, 3, 1), embracing all the Jews of the Persian empire, into every part of which (Esth. iii, 8) —Babylonia, Media, Persis, Susiana, Mesopotamia, Assyria, etc.—they penetrated. The Jews of Babylonia proper prided themselves on the excellence of their lineage—a boast uniformly recognised throughout the nation. What Judæa, it was said, was with respect to the Dispersion of other countries—as pure flour to dough—that Babylonia was to Judæa (Jer. Talm. Kid. vi, 1). Herod pretended to have sprung from Babylonian ancestors (Joseph. Ant. xiv, 1, 8), and also bestowed the high-priesthood upon a man from Babylonia (Joseph. Ant. xv, 2, 4). In the messages sent by the Sanhedrim to the whole Dispersion, Babylonia received the precedence (Sanh. 11); although it remained a standing reproach against the Babylonians that they had held aloof from the national cause when their brethren returned, that they were in the progress of the business of the Jewish state (Yoma, 3); and as living in Palestine under any circumstances is enumerated among the (515) Jewish ordinances (Nachmanides, Comm. to Maimonides' Sepher Hammin'oth). The very territory of Babylonia was, for certain ritual purposes, considered to be as pure as Palestine itself. Very little is known of the history of the Babylonian Diaspora; but there is no reason to suppose that its condition was, under Persian as well as under Seleu- cidian and Parthian rule, at most times other than flourishing and prosperous; such as we find that it was when it offered Hysmonas "honors not inferior to those of the king" (Joseph. Ant. xvi, 2, 2). Of Alexandria under the Great, Josephus records expressly that he confirmed the former privileges of the Jews in Babylonia (Joseph. Ant. xi, 8, 5), notwithstanding their firm re- fuse to assist in rebuilding the temple of Belus at Babylon (Hezek. ap. Joseph. Ap. i, 22). Two great cities, Nisibis in Mesopotamia, and Nahr ne on the Euphrates, where the moneys intended for transmission to Jerusalem were deposited (Joseph. Ant. xviii, 9, 1, 3, 4, etc.), as was the case also at Apamea in Asia Minor, Laodices in Phrygia, Pergamus and Adramyttium in Æolia—seem to have been entirely their own, and of which Josephus (Ant. xvi, 8, 1) speaks of them as having enjoyed the undisputed possession of a whole principality (ib. 5). Great calamities, however, befall them, both about this time under Mithridates (ib. 9), and later under Caligula, through the jealousy of the
Greeks and Syrians; and at both of these epochs they emigrated in large numbers. Whether they had in those times, as was afterward the case, a universally recognized ethnarch at their head, is open to doubt, although Seder Olam Rabbah enumerates the names of fifteen generations of such, down to the third century. The Moslems of Syria, and even the Egyptians, perhaps closer than in the case of any other portion of the Dispersion, both on account of their greater proximity, which enabled them to communicate by beacons (Beth-Biltin being the last station on the frontiers; Roah Ha-shu, ii, 7), and of their common Aramaic idiom, that this Dispersion was now without the influence of the demarcation of the Zoroastrian religion (comp. Spiegel, Introd. to Zend-Avesta), which in its turn arian influences Judaism (and, at a later stage, Gnosticism), can hardly be doubted; at the same time, it was Bib- yyon which, after the final destruction of the Temple, by its numerous and far-famed academies, became for a long time the spiritual centre of the Jewish race, and was the seat of the prince of the Diaspora (Rosch Gelutha). See BABYLON.

(b.) The second great and pre-eminently important group of the Dispersion we find in Egypt. Of the original immigrations from Palestine (comp. Zech. x, 11), the most likely is the all likelihood one of the last kings of Judah (Jer. xii, 17, 49), we have no more certain traces than of those under Artaxerxes Ochus (Josephus, Ap. i, etc.). It was only after Alexander the Great, who first settled 8000 Jewish soldiers in the Thebes, and peoples a third of his newly-founded city Alexandria with Jews, and Ptolemaeus, the son of Lysimachus, after him, who increased the number of Egyptian Jews by fresh importations from Palestine, that the Egyptian Dispersion began to spread over the whole country, from the Lilyan desert in the north to the boundaries of Ethiopia in the south (Philo, Fl. ii, 253), over the Cynerean and parts of Lilyba (Joseph. Ant. xvi, 7, 2), and along the borders of the African coast of the Mediterranean. They enjoyed equal rights with their fellow-subjects, both Egyptian and Greek (eporoiolitica, Joseph. Ap. ii, 4, etc.), and were admitted to the highest offices and dignities. The free development which was there allowed them enabled them to become the greatest eminence in science and art. Their artists and workmen were sent for to distant countries, as once the Phenicians had been (Yoma, iii, 8, a; Eruch, 10, 5). In Greek strategy and Greek statesmanship, Greek learning and Greek refinement, they were ready disciples. From the number of Jewish Greek fragments, historical, ethical, and apologetic (by Demetrius, Antipater, Ptolemaeus, Artapan, Aristaus, Jason, Eschecilus, Philo the Elder, Theodotion, etc.; collected in Müller, Fragm. Hist. Græc. iii, 207–230), which have survived, we may easily conclude that an immense literature this Egyptian Dispersion must have possessed. To them is owing the language in which the Greek translation of the Bible known as the Septuagint, which, in its turn, while it estranged the people more and more from the language of their fathers, the Hebrew, gave rise to a vast pseudo-apo- graphical and apocryphal literature (Orpica, Sybilines, Pseudepohcles; poems by Linus, Homer, He- siod; additions to Esther, Ezra, the Maccabees, Book of Wisdom, Baruch, Jeremiah, Susanna, etc.). Most momentous of all, however, was that peculiar Graeco-Jewish philosophy which sprang from a mixture of Hellenism and Orientalism, and which played such a prominent part in the early history of Christianity. The administrative government of this Egyptian, or, if you will, this Gallo-Greek, Dispersion, and the fresh immigration into it of all other branches, for all religious purposes looked to Jerusalem as the head, was, at the time of Christ, in the hands of a Georussa (Sukkah, 61, b; Philo, Fl. ii, 5, 28), consisting of seventy members and an ethnarch (ilabarch), chosen from their own body, of priestly lineage. These sat at Alexandria, where two of the five divisions of the city, situated on the Delta (the site best adapted for navigation and commercial purposes), were occupied exclusively by Jews (Josephus, Ant. xiv, 7, 2). Of the splendor of the Alexandriae or temple, there is a glowing account in the Jerus. Talm. (Suk. 10, b); and when, in consequence of the Syrian occupation, Cyrene and Alexandria were made high-priest of the line of Joshua, had fled to Egypt, where Ptolemy I Philomath gave him an extensive district near Heliopolis, a new temple (Beth Chonyo) had arisen at Leontopolis (Joseph. Ant. xiii, 3, 2, 5, 18), which bids fair to rival the Temple of Jerusalem. Such, indeed, was the case. For the Dispersion in Egypt, whom Philo (Fl. v, 6) in his time estimates at a million, that this new temple was treated with consideration even by the Sanhedrin (Menuch. 109, a). Their condition, it may easily be inferred, v. s flourishing both under the Seleucidian and Roman sway, but under Jigula, and still more under ...ro (Joseph. War, ii, 16, 7), they, like their brethren in other parts of the Roman empire, suffered greatly from sudden outbursts of the populace, prompte and countenanced in some instances by their rulers. From Egypt the Diaspora spread southward to Abyssinia, where some remnants of it still exist under the name of the Falasha, and in the eastward to Arabia. The intercourse between the parts of the Dispersion, where we find a Jewish kingdom (Yemen) in the south (Taberi ap. Silv. de Sacy, Mem. de l’Acad. de Inscr. p. 78), and a large Jewish settlement (Chatbar) in Hejaz in the north. See ALEXANDRIA.

(c.) Another principal section of the Dispersion we find in Syria, whether they had been brought chiefly by Seleucus Nicator or Nicanaor (Joseph. Ant. vii, 4, 1), when the battle of Ibus, B.C. 301, had put him in possession of the countries of Syria Proper, Babylonia, Mesoopotamia, Persia, Phenicia, Palestine, etc. Under his hold and his successors’ fostering rule they reached the highest degree of prosperity (c. c.), principally at Antioch on the Orontes, and Seleucia on the Tigris, and other great cities founded by Seleucus; and the privileges which this king had bestowed upon them were constantly confirmed up to the time of Josephus (Ant. xii, 3, 1). Antiochus Epiphanes, or Epimenes, as he was called, seems to have been the only Syrian potential to whom the Syrian Jewish eminence owed its existence, and it was no doubt under his reign that they, in order to escape from his cruelty, began to emigrate in all directions—to Armenia, Cappadocia (Helena, the Jewish queen of Adiabene, Joseph. Ant. xx, 2), Cyprus, and over the whole of Asia Minor; Phrygia and Lydia alone possessed Jewish colonies of a previous date, planted there by Antiochus the Great (Joseph. Ant. xii, 3, 4). Hence they dispersed themselves throughout the islands of the Aegean, to Macedonia, to Greece, where they inhabited chiefly the seaports and the marts of trade and commerce. See SYRIA.

(d.) Although, to use the words of Josephus (Ant. xiv, 7, 2), the habitable globe was as full of Jews that there was scarcely a corner of the Roman empire where they might not be found—a statement fully confirmed by the number of Roman decrees issued to various parts of the empire for their protection (Joseph. Ant. xiv, 10 sq.)—there is yet no absolute proof of their having acquired any fixed settlements in the republic itself anterior to the time of Pompey, who, after the tiding of Jerusalem, carried back with him many Jewish captives and prisoners to Rome, B.C. 68. These, being generally either allowed to retire from the service, or remained, no one having been there as Liberrini, and in time formed, by the addition to their number of fresh immigrants, all sorts of settled and highly influential communities, which occupied chiefly the Trastubetinae portion of the city, together with an island in the Tiber. Their prosperity grew with their numbers, and suffered but short interruptions under Tiberius (Suet. Tib. c. 30). The expulsion under Claudius (Suet. Cl. 20) and Caligula (Joseph. Ant. xviii, 6)
CAPTIVITY 114 CAPUCHINS

is contradicted (Dio Cass. ix. 6; Orosius, vii. 6). They built numerous synagogues, founded schools (even a short-lived academy), made proselytes, and enjoyed the full advantages of Roman citizenship (in the decrees they are styled "hos biblici") with the senate. Thus Josephus (Quint. Lond. Joseph. Ant. xiv, 10). The connection between the Roman Dispersion and Palestine was very close, especially so long as the young princes of the Herodian house were, in a manner, obliged to live in Rome. There is no doubt that to the influence of this powerful body, and especially of the strange rites and customs which attracted so small a number of public notice (Tacitus, Suetonius, Cicero, Juvenal, Horace, Martial, Justinian, etc., passim), and to their access to the imperial court was due the amelioration of the condition of the Jewish people throughout every country to which the sway of Rome extended. It was also through Rome chiefly, both before, and still more after the final destruction of Jerusalem, that the stream of Jewish emigration was poured over the greater part of Europe. Of the world-wide influence of the Jewish Dispersion on Christianity, which addressed itself first of all to the former as a body (Acts xix, 46; ii, 9, 11), few accounts can be found under the article Jews. The most important original authorities on the Dispersion are Joseph. Ant. xiv, 10; xiv, 7; Apion, ii, 5; Philo, Leg. ad Caes.; id., Flaccus. Frankel has collected the various points together in an exhaustive essay in his Miscelanea, Nov. Dec. 1853, p. 409-11, 449-51. Comp. Jost, Gesch. d. Judenheb. p. 962, 344; Ewald, Gesch. d. Volkerentwickel. iv. See Dispersion Jews.

III. Subsequent States of Captivity.—1. The extermination suffered by the Jewish inhabitants of Palestine under the Romans far better deserves the name of captivity; for, after the massacre of countless thousands, the captives were reduced to a real bondage. According to Josephus, in his detailed account (Wars, especially vi, 9, 5), 1,100,000 men fell in the siege of Jerusalem by Titus, and 97,000 were captured in the whole war. Of the latter number, the greatest part were distributed among the provinces, to be butchered in the amphitheatres, or cast there to wild beasts; others were doomed to work as public slaves in Egypt. Only those under the age of seventeen were sold into private bondage. See JERUSALEM. 2. An equally dreadful destruction fell upon the remains of the nation, which had once more assembled in Judaea, under the reign of Hadrian (A.D. 135), which Dion Cassius concisely relates; and by these two savage wars the Jewish nation might have been rooted out from the Holy Land itself, a result which did not follow from the Babylonian captivity. 3. Afterward, a dreary period of fifteen hundred years' oppression crushed in Europe all who bore the name of Israel, and Christian nations have visited on their head a crime perpetrated by a few thousand inhabitants of Jerusalem, who were not the real forefathers of the European Jews. 4. Nor in the East has their lot been much more cheering. With few and partial exceptions, they have ever since been a despised, an oppressed, and naturally a degraded people, though from them has shone forth light and truth to the distant nations of the earth. See Jews.

IV. Metaphorical Uses of the Term "Captivity."—"Children of the captivity" is a common figure of speech denoting those who were in captivity, or perhaps sometimes literally their posterity (Ezra, iv, 1). "Turn an inhabitant" (Gen. xxvi, 9), "away" (I. Kings, xi, 14), "turn back" (Zeph. iii, 20), or, "bringing again" (Ezck. xvi, 55) "the captivity," are figurative phrases, all referring to the Jewish nation in bondage and their return to Canaan. A similar expression is used in relation to individuals (Job xiii, 10): "The Lord turned the captivity of Job," i. e., he released him from the unjust and perplexing calamity which he had been in bondage, and caused him to rejoice again in the favor of God. "He led captivity captive," or "he led captive those who had led others captive" (Eph. iv, 8), is a figurative allusion to the victory which our blessed Redeemer achieved over sin, the world, death, and hell, by which our ruined race are brought into bondage (Ps. Ixxiii, 18; Rom. viii, 21; Gal. iv, 34; Heb. ii, 15; 2 Pet. ii, 19; Col. ii, 15). See EXILE.

CAPUCHINS, monks of the strictest observance of the rule of St. Francis, called Capuchins on account of the great pointed capuchum (or cowl) which they wear. Matteo da Falerna, the Franciscan friar, of the convent of Monte Falcone, in the vicinity of Urbino, in Italy, was the founder of this reformed order in 1525. Pretending that the Franciscans were no longer strict followers of St. Francis, as they wore a different cowl, did not let their beard grow, and had mitigated the vow of poverty, he, with the pope's permission, and accompanied by some others, retired into a solitary hermitage of the Camaldoli near Massacico. The reformed monks were much persecuted by the Franciscans, who drove them from place to place. In 1528 Pope Clement VII allowed them to put then selves under the obedience of the Conventuals, and to take the title of friars Minor, with the right of electing a vicar general. Their first establishment was at Colmenzone, near Camerino. In 1529 they held the first general chapter at Alvacinca, and drew up the rule of the new association, which received alterations and additions in 1536 and 1575. It enjoins, among other things, that the Capuchins shall perform divine service without singing; that they shall say but one mass each day in their convents; that they shall observe hours for mental prayer morning and evening, days for disciplining themselves, and days of silence; that they shall always travel on foot, and avoid ornament and costly furniture in their churches, contenting themselves with bare walls, and drapes of the altar of stuff and the chalices of tin. Pope Paul III, in 1556, gave them the name of Capuchins of the Order of Friars Minor, and subjected them to the visitation and correction of the Conventuals. In the same year the two founders and first vicars general of the order, Matteo da Baschi, and his friend Ludovico di Fossombone, were excluded from the order for disobedience. The fourth vicar general, Ochino, one of the most famous preachers of Italy, became a Protestant in 1548. For a time the whole order was forbidden to preach, and threatened with suppression, but their submission and humble petitions averted this danger. From this time the Capuchins were the most conspicuous, the most popular and learned of the orders, and spread a wonderful influence in the Christian and Moslem world. Their preaching was little better than that of the Capuchins. Their preaching was little better than that of the Capuchins. In 1538 they built at Rome the Capuchin Church, with the old name of the church of the Holy Sepulchre. The building was begun in 1538, and completed in 1584. The fund raised for it was not only an object of devotion to the people, but a great encouragement to the missionaries. The second church was the church of St. Francis, erected in the city of Rome, and dedicated to the Virgin and to St. Francis. The third church was the church of St. Joseph, erected in the city of Rome, and dedicated to the Virgin and to St. Joseph. The fourth church was the church of St. Anthony, erected in the city of Rome, and dedicated to the Virgin and to St. Anthony. The fifth church was the church of St. John the Baptist, erected in the city of Rome, and dedicated to the Virgin and to St. John the Baptist. The sixth church was the church of St. Peter, erected in the city of Rome, and dedicated to the Virgin and to St. Peter. The seventh church was the church of St. Paul, erected in the city of Rome, and dedicated to the Virgin and to St. Paul. The eighth church was the church of St. Mark, erected in the city of Rome, and dedicated to the Virgin and to St. Mark. The ninth church was the church of St. Luke, erected in the city of Rome, and dedicated to the Virgin and to St. Luke. The tenth church was the church of St. John the Evangelist, erected in the city of Rome, and dedicated to the Virgin and to St. John the Evangelist. The eleventh church was the church of St. Philip, erected in the city of Rome, and dedicated to the Virgin and to St. Philip. The twelfth church was the church of St. James, erected in the city of Rome, and dedicated to the Virgin and to St. James. The thirteenth church was the church of St. Andrew, erected in the city of Rome, and dedicated to the Virgin and to St. Andrew. The fourteenth church was the church of St. Thomas, erected in the city of Rome, and dedicated to the Virgin and to St. Thomas. The fifteenth church was the church of St. Simon, erected in the city of Rome, and dedicated to the Virgin and to St. Simon. The sixteenth church was the church of St. Matthew, erected in the city of Rome, and dedicated to the Virgin and to St. Matthew. The seventeenth church was the church of St. James the Less, erected in the city of Rome, and dedicated to the Virgin and to St. James the Less. The eighteenth church was the church of St. Philip the Apostle, erected in the city of Rome, and dedicated to the Virgin and to St. Philip the Apostle. The nineteenth church was the church of St. Peter the Apostle, erected in the city of Rome, and dedicated to the Virgin and to St. Peter the Apostle. The twentieth church was the church of St. John the Apostle, erected in the city of Rome, and dedicated to the Virgin and to St. John the Apostle. The twenty-first church was the church of St. James the Greater, erected in the city of Rome, and dedicated to the Virgin and to St. James the Greater. The twenty-second church was the church of St. Thomas the Apostle, erected in the city of Rome, and dedicated to the Virgin and to St. Thomas the Apostle. The twenty-third church was the church of St. Philip the Apostle, erected in the city of Rome, and dedicated to the Virgin and to St. Philip the Apostle. The twenty-fourth church was the church of St. James the Less, erected in the city of Rome, and dedicated to the Virgin and to St. James the Less. The twenty-fifth church was the church of St. Peter the Apostle, erected in the city of Rome, and dedicated to the Virgin and to St. Peter the Apostle. The twenty-sixth church was the church of St. John the Apostle, erected in the city of Rome, and dedicated to the Virgin and to St. John the Apostle. The twenty-seventh church was the church of St. James the Greater, erected in the city of Rome, and dedicated to the Virgin and to St. James the Greater. The twenty-eighth church was the church of St. Thomas the Apostle, erected in the city of Rome, and dedicated to the Virgin and to St. Thomas the Apostle. The twenty-ninth church was the church of St. Philip the Apostle, erected in the city of Rome, and dedicated to the Virgin and to St. Philip the Apostle. The thirtieth church was the church of St. James the Less, erected in the city of Rome, and dedicated to the Virgin and to St. James the Less. The thirty-first church was the church of St. Peter the Apostle, erected in the city of Rome, and dedicated to the Virgin and to St. Peter the Apostle. The thirty-second church was the church of St. John the Apostle, erected in the city of Rome, and dedicated to the Virgin and to St. John the Apostle.
CARACALLA

Caras, Simeon, ben-Chelbo, also called R. Simeon b. Darshana, a celebrated Jewish commentator, lived in the eleventh century. He was a brother of the celebrated Menachem ben-Chelbo, and received the name Karas (קרס) in the synagogue for his lesson on the Sabbath, and the name b. Darshana from his collecting and explaining (ברשנה) the Midrashim. Caras is the author of the celebrated julak (זָלָק), a collection of Midrashim on almost every verse of the Old Testament. He brought together a catena of traditional expositions from upward of fifty different works of all ages, many of which are of great value. Ten different editions of this work appeared between 1526 and 1805; one of the best and most convenient is that published at Frankfurt on the Maine, 1687, folio. See Rapport in the Hebrew annual called kerem chomed (קרן חומץ, vii, 4, etc.); Zunz, Die Gottesdienstlichen Vorträge der Juden (p. 295-303); Steinmetscher, Catalog Librorum Hebraeorum in Bibliotheca Bodleiana (Berlin, 1862-65, col. 2600, 2804; Kittro, Cyclop. i, 444).

Carabašašon (Kapašen-w v. Pafanšon, Vulg. Maranatha), a name given (1 Esdr. ix, 34) as one of the "sons" of Mani (Bani) that divorced his gentle wife after the exile, and apparently corresponding to the Chelebeg (q. v.) of the Hebrew text (Esra x, 35), although the list is here greatly corrupt.

Caracalla of caracalbus (properly Marcus aurelius Antoninus Barhebas), a Roman emperor. He was son of the emperor Septimius Severus, and was born at Lyons, A.D. 188. The name Caracalla never appears on medals, but was a nickname from his long-headed manner, made in the fashion of the Gauls, and so called in their language. "After his father's death, A.D. 211, he ascended the throne as co-regent with his brother Publius Septimius Antoninus Geta, whom he afterward caused to be murdered. Having bribed the Praetorians to make him sole emperor, Caracalla next directed his cruelty against all the adherents of Geta, of whom twenty thousand of both sexes—including the great Jurist Papinius—were put to death. Innumerable acts of oppression and robbery were employed to raise supplies for the unbounded extravagance of the despot, and to pay his soldiers. In his famous constitution, he bestowed Roman citizenship on all his free subjects not citizens—who formed the majority, especially in the provinces—but simply in order to levy a
CARACCIOLI was born at Madrid, May 23, 1606. He became a Cistercian, and after several preferments, among which was the abbey of Melrose, in Scotland, was made vicar general of the archbishopric of Prague. When the Swedes, in 1648, besieged the city, Caracuel, forgetting his episcopal character, set himself at the head of a body of ecclesiastics on the battle-field. His services were rewarded by the emperor with a collar of gold. In 1657 he was made bishop of Campagna, in Naples, where he resigned in 1678, but afterward became bishop of Vigezano, in the Milaneze, where he died, Sept. 8, 1685. He was “a man of vast but ill-digested learning, with an ill-regulated imagination. His moral theology (Theologia Moralis, Louvain, 1648, fol.) is so universally decried that even Romanists have censured it. He taught that the commands of the Decalogue are not immutable in their nature, and that God is able to change or dispense with them, as in cases of theft, adultery, etc.; he also held that the smallest degree of probability justified any criminal action." A list of his numerous writings (37 volumes) is given by Nicolas Antonio, Bibb. Altae. Hisp. Nova.—Nov. Bg. Generale, viii, 666.

CARANZA. See CARANZA.

CARAVAN, the Arabic name for a body of pilgrims or merchants travelling in the East. Orientals who have occasion to journey—whether for pleasure, religion, or profit—usually do so in companies, for the sake of society as well as protection. Hence the most motley associations may take place. They often consist of hundreds of persons, mostly mounted on camels, which (including those for baggage) frequently amount to several thousands. Such spectacles are common in all parts of Turkey, Persia, and Arabia, especially through the sandy deserts. They march at first disorderly, but after a short period of practice with great regularity, mostly by night, in companies which are each kept together by a large beacon-fire on the top of its own peculiar standard. Much time is consumed in packing and unpacking; but when this confused scene of preparation is over, they travel with great uniformity (see Bk. xii, 8) from about eight P.M. till about midnight (Luke xi, 8, 6). In the cooler seasons they journey by day, only halting for a brief rest at noon. Seven or eight hours is the usual day's stage (Hornemann, p. 160), or about 17 to 20 miles. See TRAVELLER.
CARAVANSELAI

1. Commercial Caravans.—The earliest of these on record is that to which Joseph was sold (Gen. xxxviii), consisting of Ishmaelites (ver. 25), Midianites (ver. 28), and Medinites (ver. 38; Heb.), who were on the high-road through Dothan to the mart of Egypt with the spices of Canaan. Commentators, and Navigation of the Ancients, ii, 262). Such often avail themselves at the present day of the second class of caravans mentioned below. See COMMERC.

2. Religious Caravans.—Such companies of pilgrims pass regularly along the route (hence termed the Huj) to Mecca, four each month of the holy month of Rabi'a, a second of Turks from Damascus, a third of Parasians from Babylon, and the fourth of the Arabians and Indians from Zibith, at the mouth of the Red Sea. They are under the strictest discipline, a chief or basiki being in command, and five officers having respectively charge of the march, the bakt, the servants and cattle, the baggage, and the commissariat. The kyveer, or guide, is also an indispensable companion—a person not only well acquainted with the route, the wells, the hostile or friendly tribes, and other features on the route, but also skilled in the signs of the weather, and an individual of general sagacity and fidelity. See PILGRIM.

These large travelling masses illustrate many features of the exodus of the Israelites from Egypt. They, too, had their leader, Moses, and were divided into twelve companies, each with its chief (Num. vii), and ranged under its distinctive banner (Num. ii. 5). They set out in turn (Exod. xii, 11), but were soon reduced to almost military order, starting at the blast of trumpets (Num. x, 2), under the guide of the fiery pillar (q. v.). Hence, too, the anxiety of Moses to secure the services of Hobab (q. v.) as a guide. See EXOD.

The processions of Israelites to their national festivity at Jerusalem were probably made up very much after the caravans, style, villages and acquaintances travelling together by companies. Hence the youthful Saviour was not missed until the party halted at night (Luke xii. 44) at a place which tradition fixes about three miles from Jerusalem (Manro, Summer Khamile, i, 263); for the first day's journey is always a short one. See CARAVANSELAI.

CARAVANSELAI, the Arabic name of a building for the accommodation of strangers in sequestered places, while khan is the usual designation of a similar structure situated in or near towns. See KHAN.

Khan, a word frequently seems to have been no such provision for travellers, for we find Abraham looking out for their entertainment (Gen. xxiii), and the visitors of Lot proposed to lodge in the street, apparently as a matter of course (Gen. xix, 2), just as modern Orientals often do, wrapped in their hykes, although in Arab towns generally the stranger is conducted by the shiek (the mens), where he is provided for the night (La Roque, De la Palestine, p. 124). In Egypt, however, there seems to have been some such building (Gen. xlii, 27), probably only a rude shed. The innkeepers in that country were usually women (Hered. ii. 99), just as in the days of the Hebrew spies (Josh. ii. 13); apparently women of easy virtue (Heb. xi. 31; James ii. 26), if not absolutely courtesans. See HARLOT. In the times of Christ and his apostles, inns must have been common in Palestine, yet the frequent injunction contained in the Epistles to entertain strangers (e. g. Heb. xiii, 2; Rom. xii. 13) as a great lesson of hospitality, is not such as to render certain their arrangements. See HOSPITALITY. They are mentioned in the N. T. under two names, παναγιστέων, or house for the reception of all kinds of guests, where the good Samaritan took the wounded stranger (Luke x. 34); probably a building like the modern comfortless and homely round houses of travel, with a host (or janitor), however, who, on such occasions, will furnish supplies to the sick and destitute. The other word is κατάλυμα, properly the upper room reserved in large houses for guests (Mark xiv. 14; Luke xxi. 11), and also applied to the place where the nativity occurred (Luke ii. 7). The tradition connects this event with a certain Syrampyrius, Dial. c. Trypho, p. 303; Origen, commentary, Col. 1), and the spot, as such, is still pointed out. See BETHLEHEM. But this is opposed to all the circumstances and usages of the case. The exact distinction between this and the previous term has been matter of dispute, but the editor of the Pictori i. Bildt (note in loc.) suggests the most probable explanation, that the latter term, the house of which Mary brought forth the Saviour, was one of the stalls running along the outside of the building, behind the apartments destined for the guests; and that the "manger" (q. v.), or φοιτείον, was not the crib or contrivance for this purpose known to us (for such we not used in the East), but simply the projection of the floor of the guest-room into the cattle-shed, which was properly lower on the ground (see Strong's Harmony and Exp. of the Gospels, p. 14). See INN.

Modern oriental Caravanserai.

Oriental "inns," whether called khans or caravanserais, are not at all comparable, in point of comfort and convenience, with modern hotel accommodations, nor have they the least resemblance to the characters and appurtenances of a respectable tavern. A khan is always to be found in the neighborhood of a town; and caravanserais, of various sizes and degrees of completeness, are generally disposed at regular stages along public roads, especially the mercantile and pilgrim thoroughfares, characteristic of the ancient empire. They have usually been built by rich merchants for trading purposes, or by wealthy devotees as an act of religious munificence. At a distance they resemble a castellated fort, but on a nearer approach are found to be a simple quadrangular building, enclosed by a high wall, usually about 100 yards on each side, and about 20 feet high, resting on a stone foundation. In the middle of the front there is a large arched entrance, with a porter's lodge on one or both sides, and apartments for the better class over it, surmounted by a dome. The interior is an open space for cattle, baggage, etc., with a fountain in the middle. Along the sides of this inner court-yard are piazzas opening every few yards into arched recesses or alcoves for travellers, having an inner door communicating with a small oblong chamber, sometimes lighted at the farther end, but entirely destitute of furniture, shelves, or closets. These cells are intended for dormitories, while travellers usually prefer the open door-way, which is either paved or level and hard earth, and raised two or three feet above the general area of the court. These sets of rooms have no communication with each other, but in the middle of the three sides there is a large hall for general assemblages; at the end of each is a hall-case for smoking, with a flat roof for enjoying the breeze and the landscape. These lodging-chambers are thus usually on the ground-floor; but in the few buildings which have two stories, the lower rooms are used for servants, storage, etc., while the upper story serves for the travellers themselves. Sometimes also the porter's lodge affords a supply of commodities for their use, and cooks are occasionally found in attendance. Generally, however, the accommodations are of the most wretched description—bare walls, rooms filled with dirt and vermin, and no cooking apparatus to be obtained for love or money. They are regarded by some as a man's own work, and even furnish his own subsistence. His baggage must supply his bed, his clothing must
CARBUNCLE

be his covering. He is usually obliged to content himself with such cold food or fruits as he has himself brought. His outfit should therefore consist at least of the following articles: a carpet, a mattress, a blanket, two sansepons with lids, contained within each other; two dishes, two plates, etc., a coffee-pot, all of well-tinned copper; also a small wooden box for salt and pepper, a round leather table, which he suspends from his saddle, small leather bottles or bags for oil, melted butter, water, a tinder-box, a coconut cup, some rice, dried raisins, dates, and, above all, coffee-berries, with a roaster and a wooden mortar to pound them; all this is in addition to much more substantial provisions as he may prefer or can conveniently carry. The porter in attendance can only be relied upon to show him his chamber, and perhaps furnish him with a key. In case of sickness, however, the latter is generally able to administer simple remedies, and may even set a broken limb. See CARAVAN.

Carbuncle is the rendering in the Auth. Vers. of the following Heb. and Gr. words: 1. παρουσία, ekdakei', only Isa. lii, 12 (Sept. εἰσίστασθαι, Vulg. [lapis] sculp- tus), some sparkling gem (from παρειμή, to infame). 2. μεριδσμός, barekhath, only Exod. xxviii, 17, and xxxix, 10, as the third in the first row of the high-priest's breastplate (Sept. οἰκολογος, Vulg. smaragdus, i.e. emerald); or μὴρείδσμος, barekhath, only Ezek. xxviii, 18 (Sept. μιριστος, Vulg. smaragdus). From the etymology (παροῦσα), to flash), we assume that a stone of a bright coruscant color is meant. Kalisch translates it smaragd, or emerald, and says it is a sort of precious co- rumoured of strong glass lustre, a beautiful green color, with many degrees of shade, pellucid and doubly refractive. Pliny enumerates twelve species of emerald. They are not rare in Egypt (see Braun, de Vind. Stucb. p. 517 sq.). 3. Αἰβραμ, lit. a coal of fire, Tobit xii, 17; Ecclus. xxiii, 4. The carbuncle is thought by many to be denoted by the word παροῦσα, mo'it' pesh' ("emerald"). Exod. xxviii, 18; xxxix, 11; Ezek. xxviii, 16; xxxviii, 13. See EMERALD. Under the name "carbuncle" are comprehended several brilliant red stones of the clay family which resemble a glowing coal, such as the ruby, the garnet, the spinel, but particularly the adulzima, that is, the noble Oriental garnet, a transparent red stone with a violet shade and strong glass lustre. Probably it is not so hard as the ruby, which, indeed, is the most beautiful and costly of the precious stones of red color, but, at the same time, so hard that engravings cannot easily be made in it (Rosenmüller, Altert. iv, 1, 34). In the present state of our knowledge respecting the ancient Hebrew mineralogy, it is impossible to determine with precision what particular gem is denoted by either of these terms, although they all evidently were precious stones of a brilliant fiery hue. See GEM.

Car'can (Heb. נָשָׁבָה, Karkas', comp. the Sanscrit karkasa, severe; Sept. Θαβαλ', v. r. Θαβάλ, Vulg. Charchas), the last named of the seven eunuchs ("chamberlains") in the harem of Absaeraus (Xerxes), who were directed to bring queen Varshet into the royal convivial party (Esth. i, 10). B.C. 468.

Carcase (Heb. נֶשֶׂם, נֵשֶׂם, בֶּן נֶשֶׂם, פֶּן נֶשֶׂם, פֶּן נֶשֶׂם, פֶּן נֶשֶׂם, פֶּן נֶשֶׂם, פֶּן נֶשֶׂם, פֶּן נֶשֶׂם, פֶּן נֶשֶׂם, פֶּן נֶשֶׂם, פֶּן Neshemah), the dead body of a man or beast (Josh. viii, 29; Isa. xiv, 19; Heb. iii, 17, etc.). According to the Mosaic law, any Israelite became ceremonially unclean until the evening (and in turn rendered whatever he touched unclean, Hag. ii, 14; comp. Num. xix, 27; by (unwitting) contact, under any circumstances, with a dead animal of the "unclean" class (Lev. v, 2; xiii, 8 sq.); comp. Deut. xiv, 8), or with any "clean" animal, in case it had not been regularly slain according to the prescribed mode (Lev. xi, 89 sq.). The eating of any "clean" beast that had died an accidental or natural death was still more strictly forbidden (Lev. xxi, 8; comp. Ezek. iv, 14; xliv, 31); but it might be sold as food to a foreigner (Deut. xiv, 2). Carcass was doubtless buried or burned. On the sepulture of persons found dead, see HOMICIDE. An unabrided carcase (Jer. xxxv, 50; Psa. lxxxix, 8) was considered by the ancients the height of indignity and misfortune (Virgil, Æn. x, 589). See BURIAL. The Levitical enactments respecting all dead bodies evidently had their origin in sanitary reasons in a climate so liable to pestilence (Michaelis, Mos. Beekl. iv, 500 sq.). On the incident of the beeche in the skeleton (Judg. xiv, 8), see BEE. On the allusion to the vulture's scat for putrid flesh, Matt. xxiv, 28 (Loder, De condurre Judaico, ob aequas Romanis discorpendas, Argent. 1715; Riechenberg, De adusto Christi, ecc., Lips., 1890), see EAGLE.

Car'chamin (1 Esdr. i, 25). See Carc measheh.

Carchemish (Heb. Karkemish, כְּרוֹכֶּמֶשׁ, prot. fort. of Chemosh; Sept. Χαρκαμης v. r. Χαρκαμης in Jer., but omitted in Chron. and Isa., Xarpemis in 1 Esdr. i, 5), mentionned in Isa. x, 9 among other places in Syria which had been subdued by an Assyrian king,
probably Tiglath-pileser. That Carchemish was a stronghold on the Euphrates appears from the title of a prophecy of Jeremiah against Egypt (xvi, 2): "Against the army of Pharaoh-necho, king of Egypt, which lay on the river Euphrates, at Carchemish, and which Nebuchadnezzar, king of Babylon, overthrew, in the fourth year of Jehoiakim, the son of Josiah, king of Judah," L. E. B. C. 606. According to 2 Chron. xxxv, 20, Necho had advanced with his ally Josiah, the father of Jehoiakim, against the Babylonians, on the Euphrates, to take Carchemish, B.C. 698. These two circumscriptions, the king of Babylon, overthrown, the year of Jehoiakim, the son of Josiah, which lay on the river Euphrates, and its being a frontier town, render it probable (see Layard, Nineveh and Babylon, p. 190) that the Hebrew name points to a city which the Greeks called Καρχημής, the Latinis Carchemis, and the Araba Kerkelesh (Schulten, Index. Geogr. s. v.); Ritter, Erdk. ii, 605; for this too lay on the western back of the Euphrates, where it is joined by the Chaboras (comp. Bochart, Pharaq, iv, 21; Cellarius Notit. ii, 715 sq.; Michaelis, Sept. p. 1352 sq.). It was a large city, and surrounded by strong walls, which, in the time of the Romans, were occasionally renewed, as this was the remotest outpost of their empire, toward the north, of the Euphrates. Marcell. xxiii, 5; Zosimus, iii, 12; Procop. Bell. Persi, ii, 5; comp. Procop. Edif. i, 6; Polony, v, 18, 6. Carchemish is named in the cuneiform inscriptions (q. v.), which show it to have been, from about B.C. 1100 to B.C. 666, a chief city of the Hittites, who were masters of the whole of Syria from the borders of Damascus to the Euphrates at Bir, or Bireb-jik; it is also mentioned on the Egyptian hieroglyphical sculptures (Layard, ut sup. p. 306, 538). At the point where the Khabur (the ancient Chelar) joins the Euphrates, there are large mounds on both banks of the former river, marking the site of old cities, or perhaps of different sections of one great city. The mound on the right bank is crowned with a modern Arab village, called Abu Bersi, or "Father of Palaces" (Chesney, Exk. Exp., i, 118). It stands on a narrow wedge-shaped plain, in the fork of the two rivers. This corresponds exactly to Procopius's description of Carchemish, who says that its fortifications had the form of a triangle at the junction of the Chaboras and Euphrates (Bell. Persi, ii, 5). This seems to be the true site of Carchemish. It was visited by Benjamin of Tudela in the twelfth century, who found in it two hundred Jews (Early Travels in Pal., p. 93). According to others (D pasture, and the book of Sirach, the name is to be explained; whereupon Pope Eugenius IV wrote to the former, reprehending him for his conduct, and declaring that the cardinalate had been instituted by St. Peter himself, and that the dignity of the cardinals, who, with the pope, governed the Universal Church, and sat in judgment upon bishops, was past all doubt, greater than that of even patriarchs, who had jurisdiction over only a part of the Church, and from whom there lay an appeal to the see of Rome. The same dispute occurred between the cardinal-bishop of camer and the primate of Gnesa in 1440. As time went on, these arrogant pretensions of the college increased; we find the cardinal saying to the kings of France, in which the whole government of the Church turns; or as they have, from the pope's grant, the hinge and government of the Romish Church. Pope Eugenius IV states the derivation from cardo, a hinge, as follows: Sicut per cardines resolvitur octo domus, ita per suos cardinaliam regneretur universam, quaeque et sustentatur (see Dufrense, s. v. cardinalis).

1. Cardinal Priest, etc. — In early days the name cardinal was used with great latitude in the Roman Church. Its first definite application was to the principal priests of the parishes of Rome; the chief priest of each assigned the title of cardinalis, or cardinalis, to distinguish him from the other priests who had no church. It is uncertain when the term was first applied, but it seems that Stephen IV (770) was the first who selected seven bishops out of the number of the see of Rome, and gave them the title of cardinal, obliging them to say mass every Sunday in St. Peter's. Leo IV, in a council of Rome held in 858, calls them cardinales et cardinalines, and their charge cardinalice. At a subsequent period the priests and deacons of other cities of importance assumed the title of cardinal, to distinguish them from other priests and deacons over whom they claimed supremacy; but the popes subsequently ordained that none but those whom they should choose could be admitted with that title. Among those whom the popes thus appointed were the seven bishops suburbicarii, who took their titles from places in the neighborhood of Rome. These bishops were called held-madari, because they attended the pope for a week each in his turn. These cardinals took part with the Roman clergy in the election of the pope, who was generally chosen from their number. But it was not until the edict of Nicholas II, A.D. 1059 (see below), that the body of cardinals, as such, had a proper existence as a recognized branch of the ecclesiastical system.

2. College of Cardinals. — "The college of Cardinals, in its origin, was nothing else than the council which, according to the canons, every metropolitan was obliged to consult, and in which, during a vacancy, all the metropolitan powers resided, viz., the synod of provincial bishops, and the chapter of the metropolitan church; and it is not difficult to see that this college would share in the supreme glory of the see of Rome, in the same proportion as every other church participated in the honor of its particular metropolitan. It was not, however, for a long time that the cardinalate attained to its present exiguous and usurped degree of power and dignity. In the Synod of Rome, under Benedict VIII, 1016, the sees of the cardinals still signed after the bishops, and the cardinals, bishops after other bishops of older standing in the order than themselves; but in 1060 we find a vast change, for Humbertus, bishop of Silva Candida, who was a cardinal-bishop of the see of Rome, took precedence at Constantinople of the archbishop of Amalfi; and from that time we perceive the cardinal-bishops, and even the priests and deacons, arrogating to themselves that precedence over all other ecclesiastical dignitaries which they now possess. This, however, was not done without resistance. Thus, in 1440, the archbishop of Canterbury refused to allow to the cardinal-archbishops of the metropolis the precedence which was thereby claimed; whereupon Pope Eugenius IV wrote to the former, reprehending him for his conduct, and declaring that the cardinalate had been instituted by St. Peter himself, and that the dignity of the cardinals, who, with the pope, governed the Universal Church, and sat in judgment upon bishops, was past all doubt, greater than that of even patriarchs, who had jurisdiction over only a part of the Church, and from whom there lay an appeal to the see of Rome. The same dispute occurred between the cardinal-bishop of camer and the primate of Gnesa in 1440. As time went on, these arrogant pretensions of the college increased; we find the cardinal saying to the kings of France,
The Style of the cardinals, until the time of Urban VIII, was Most Illustrious; that pope, however, Jan. 10, 1630, granted to all the cardinals the title of Eminence. Thereupon the cardinals are called Cardinalissimi. A carriage and livery servants are obligatory parts of the establishment of a cardinal. 6. Form of making cardinals. The pope alone can elevate any one to the cardinalate, which he does by declaring in the secret Consistory the names of those whom he proposes to make cardinals, saying Habemus Frustras. He afterward, in a public Consistory, puts the red bonnet on the head of the newly-appointed cardinal, signs him with the cross, and creates him cardinal, with the form of words following: Ad laudem Unanimi potestas Dei et Sancta Sedis Apostolicae ornamento accepit gelatum rubrum, in unius singularis dignitatis cardinalis, per quod designatus, quod unque ad sanctos et sanctissimos effusionem invenerunt, pro exulatione Sanctorum solii, pax et quiete populi christianorum, augmento et statu Sacrosanctae Romanae Ecclesiae te interiudum exhibebo de de. In nomine Patris, et Filii, et Spiritus Sancti. Amen. 7. Duties, Privileges, etc., of cardinals. The legal status of cardinals, and their relations to the papal see, are fixed by the Cerimoniale Romanum, by the decree of Trent (eas. xxiv, cap. 1, de Reforma.), by the bull of Sixtus V, Religiosa Sunt, April 13, 1587, and by later papal constitutions. By the canon of Trent, as above cited, it is decreed that all and each of the particulars which have been elsewhere ordained in the synod, touching the life, age, learning, and other qualifications of those who are to be promoted to be bishops, are the same, as also to be required in the creation of cardinals of the holy Roman Church, even though they be deacons; whom the most holy Roman pontiff shall, as far as can conveniently be done, choose out of all the nations of Christendom, as he shall find persons competent. Finally, the same holy synod, moved by the so many most grievous difficulties of the Church, cannot avoid calling to mind that nothing is more necessary for the Church of God than that the most blessed Roman pontiff apply especially here that solicitude which, by the duty of his office, he owes to the universal Church, that he take unto himself, to wit as cardinals, men the most select only. No bastard, nor ecclesiastic who has not been a year in orders, can be chosen. Cardinals may be taken from any country, but the pope has always chosen a large majority of Italians. He, in October, 1666, of 52 cardinals, 29 were Italians by birth, 8 Frenchmen, 4 Spaniards, 4 Germans, 1 Croatian, 1 Belgian, 1 Portuguese, and 1 Irishman. The rank of cardinal is next to that of pope, and the pope is always chosen from their number. Since the time of Alexander III the right of electing the pope lies in the College of Cardinals. See PAPACY. The pope often employs cardinals as ambassadors, and the individual thus employed is styled Legato a Latere. A cardinal-legate acted, before the recent absorption of the Papal States by the kingdom of Italy, as governor of the Northern provinces of the Papal States, which throne receives the name of legation. The vice-secretary of state, the Camerlengo, or minister of finances, the vicar of Rome, and other leading officials, are always chosen from among the cardinals. Their dignity is held to place them in the rank of European princes; and, so long as the temporal power of the popes lasted, they held civil as well as ecclesiastical offices. For the Congregation of e. papal commissions, which are under the direction of cardinals, see Congregation, Papal. 8. Literature. Ferraris, Promota Bibliotheca, ii. 99; Kleiner, Der Orig. et Antiq. etc. Cardinali; Buddeus, Der Orig. Card. Dignitatis (Susa, 1698, 4to); De, De Orig. et Antiq. Card. in S. Petri Basilic. (Heidelberg, 1679); History of the Cardinals, to Pope Clement IX, from the Italian (Lond. 1670, fol.); Augusti, Dankeordn. p. 151; Thomasin, l'et Histoire Ecclesiastique (vol. i. c. 312).

Caret'th (2 Kings xxv, 28). See Kareah.

Carem (Kap'î), one of the additional group of eleven who returned from Judah (q. v.) into the Sep- tainties at Josh. xv, 59, and thought to be the present village Alm Karim, about 1/4 hour west of Jerusalem (Wilson, Lands of Bible, ii, 268; Schwarz, Palest. p. 96, 108; Robinson, Leder Bib. Res. p. 367-9), but the position agrees better with that of Beth-haccerem (q. v.).

Cares, John, a minister of the German Reformed Church, was born in Northumberland county, Pa., in September, 1811. He studied theology in the Theological Seminary of the German Reformed Church at York, Pa. In 1832 he was licensed and ordained, and immediately became pastor of the German Reformed church in York, Pa., which post he occupied till his death, April 5, 1843. As a preacher, he was clear, compact, earnest, and solemn. In his manner, looks and tones there was a peculiarity which belongs but to few—a kind of holy fascination which charmed the hearer, and awed his conscience. Deep impressions were made wherever he preached; and for this, more than for an extempore or learning, he was widely known and gratefully remembered. He possessed also the rare talent of preaching in both German and English with a correctness that made it impossible to determine which was his native tongue.

Carey, Felix, son of Dr. William Carey, was born in 1786, assisted his father in his labors in Bengal, and died at Serampore in 1822. Among his works were, Grammar and Dictionary of the Bengalee Language (Serampore, 1814, 8vo); Pali Grammar; a Bengalee translation of the Pilgrim's Progress, etc.—Gorton, Bibl. Dictionary, s. v.

Carey, William, an eminent Baptist missionary, was born Aug. 17, 1761, at Pauiersure, Northam-ptonshire, England. His father was clerk of the parish, and master of a free school, in which his son re-ceived his elementary education. Having early embraced Baptist principles, he was in 1783 immersed in the river Nen, and afterward became pastor of a Baptist church in the village of Moulton. Here he was a diligent student, not only of theology, but also of natural history, belles lettres, and modern languages. In 1789 he was transferred to a church in Leicester, where he had every prospect of a useful and happy life. But his mind, long occupied with the duty of missionary exertions among the heathen, would not allow him to indulge the prospect of remaining at home. The cause of missions was his favorite theme; and having, at the urgent recom- mendation of his friends, Fuller, Ryland, and Sattche of Olney, directed public attention to the subject through the press, steps were forthwith taken to com-mence practical operations among the Baptists. Chiefly through his exertions the Baptist Missionary Soci-ety was formed, Oct. 2, 1792. Mr. John Thomas, who had already spent some years in Bengal, and was im- pressed with a similar enthusiasm in the cause of mis-sions to the heathen, had recently returned home. Carey volunteered for India, associated Thomas with him, and embarked June 17, 1793, accompanied by his wife and whole family. Mrs. Carey's sister having con-ceived in the passage home, the ship arrived in Ireland, all their property was lost on the river Hooghly. Thus left destitute in a strange land, Carey retained unshaken faith in the providence of God. In 1794 he was employed by a Mr. Udney in an indigo factory, and was brought into close contact, in this sphere, with the French missionaries. From this situation of religious influence, he was soon drawn, studying the Bengalee and Sanscrit languages, and establishing schools. Carey, having made satisfac-tory inquiries, resolved to establish his head-quar-
ters at Mudnabatty. The home society sent out two pious and excellent laborers—Marshman and Ward—and the former of whom had been a teacher, the latter a printer. On their arrival at Calcutta in 1799, the Indian government permitted them to commence their missionary force at Mudnabatty, and accordingly forced them to break up that establishment at a great loss to their funds. Mr. Carey and his friends fixed their residence at the Danish settlement of Serampore, where, under the patronage of the governor, who was the most friendly of all the object of their mission, they en-joyed a tide of prosperity beyond their most sanguine expectations, and were placed in the centre of a much more numerous population, among whom they were free to carry on their work of Christian instruction. In 1801 the marquis of Wellesley, who founded the College of Fort William for instructing the youth in the Company's service in the vernacular languages of India, offered Carey the professorship of Bengalee. After considerable hesitation, and satisfactory evidence that the duties of this situation would not interfere with his missionary labors, Carey accepted the situation; and though the teaching of the Sanscrit and Brahmi languages, being subsequently engaged on the occupier of this chair, added greatly to the routine of his duties, he continued for thirty years—the whole period of its existence—to contribute to the usefulness and the fame of that institution. He now formed the acquaintance of learned pundits from all parts of India, through whose aid, in the course of a few years, he was enabled to translate the Scriptures into all the principal languages of Northern Hindostan. For the students in the college he had to compile grammars of the lan-guages he taught them, and after many years he com-pleted his voluminous Bengalee dictionary. All his philological researches were made subservient to the design of translating the Sacred Oracles into the vernacular languages of India. "The versions of the sacred Scriptures, in the preparation of which he took an active and laborious part, included the Sanscrit, Hindsee, Brijbhasse, Mahraatta, Bengalee, Vortic, Teling-ga, Kurnata, Maldivian, Gujarattee, Bilooyee, Fush- tuee, Punjahee or Shikch, Reenmee, Assam, Burman, Pali or Magudha, Tamil, Cinglee, Armenian, Mal- lay, Hindostanee, and Persian. In six of these tongues the whole Scriptures of the Old and New Testaments were printed and circulated; the New Testament ap-peared in twenty-three languages, besides various dia-lects and provincial forms. Not a single page of the printed. The whole number of languages is stated at forty, and we are probably below the truth when we state that the Serampore press, under the auspices chiefly of Dr. Carey, was honored to be the instrument, in about thirty years, of rendering the Word of God accessible to three hundred millions of human beings, or nearly one third of the population of the world."
He died June 9, 1834. See Life of Carey, by Eustace Carey (Lond. 1837, 2d ed. 12mo); Belcher, Biography of Carey (Phil. 1855, 18mo); Jamieson, Cyclop. of Biog-raphy, 108; Marshman, Lives of Carey, Marshman, and Ward (Lond. 1859, 2 vols. 8vo); Christian Review, 531.

Cargill, Donald, one of the leaders of the Scotch Covenanters (q. v.), was born in Perthshire about 1610. He received his education at Aberdeen, entered the ministry of the Presbyterian Church, and was pasto-r of the Barony church at Glasgow. When the English Church was restored, he arrived in England, and refused to accept his charge from the archbishop, and also re-fused to leave Scotland when banished. After the battle of Bothwell Bridge, in which he took part, he fled to Holland, but returned to Scotland, and took part with the "Cameronians" (q. v.), or strict Presbyterian party. He was joined by his friend, Henry Hall, at Queensferry, June 3, 1680, but he escaped, while Hall was mortally wounding.
On Hall's person was found a "Declaration of
Principles," which caused a still hotter pursuit of Car
gill. Cargill, Cameron, and others now prepared what is
known as the "Sanquhar Declaration," because it was
inscribed to the market cross of Sanquhar, June 22,
of 1689. Cargill was declared a traitor, and a price set
on his head. In September he publicly "communicat
ed" the king and others at Torwood. Hunted from
place to place, he reached his last sermon on
Dunsyre Common, July 10, 1681, and was arrested the
same night at Covington Mill. He was tried and con
demned, and the guilty vote being given by the duke of
Argyle, who afterward bitterly repeated this act.
Cargill was executed at Edinburgh, July 27, 1681.—
Hetherington, History of the Church of Scotland, vol. ii,
ch. ii; Biographia Presbyteriana, (ii (Edinburgh, 2d ed.
1830); History of the Covenanters (Presbyterian Board,
Car'tin (Kapio), the south-western district of Asia
Minor (q. v.), washed on the S. by the Mediterranean
and on the W. by the Aegean Sea, and indented by
many bays and creeks. On the N. lay Lydia, east
ward were Phrygia and Lycia, here separated by
mountainous landmarks, yet without any fixed bound
ary, which continually fluctuated on the N., where
the Lydians were never formed not only from a political to
the natural border (Strabo, xii, 577, 578; comp. xiii,
628). The S. W. angle of this region, having been
settled by Dorian colonies, was sometimes distinguished
from Caria by the name of Doria (Plinky, v, 29).
Mountain ranges stretched through its entire territory,
justly set off by terraces and some great river valleys,
and yet considerable plains intervened, which were well watered,
and fruitful in grain, oil, wine. Etc. The inhabitants,
composcd of various mixed races (among which were some
of Semitic stock, Berthena, ser. Gesch. p. 193 sq.),
were engaged, at least on the shore, in navigation and
piracy (Herod. ii, 152; Thucyd. i, 4, 5; Strabo, xiv,
662; Ptolemy). The Ionian colony is referred to the
Apocrypha (1 Macc. xv, 22, 33) as being favorably addressed
by the Romans in a decree which names the principal
towns Halicarnassus (the birthplace of the historical
Herodotus), Chiusus (mentioned in Acts xxvii, 7),
which to may be added Miletus (comp. Acts xx, 13, 28);
and the same passage alludes to the fact that the Car
rians were then (B.C. 130?) endowed with the privilege
of Roman citizenship (Liv., xili, 15), having been
obtained for some time subject to Rhodes (comp. Ptolemy,
v, 2; Mela, 1, 16; Forbiger, Alle Geogr. ii, 204 sq;;
Heeren, Itiner. 1, 158 sq). Some years later (B.C. 110)
Caria became a free and independent state of the Roman empire
(comp. Smith's Dict. of Class. Geogr. s. v. x.). Some
ancienties (see Verbrugge, De num. plur. Hebr. p. 68)
have discovered the Carrians in the O. T. under the
name Karim (2 Sam. ii, 22, 23) as the life-guards of the Jewish kings; but these terms are rather to be taken as appellatives, describ,
erum et personam (Genes., Theocr. p. 671). See CHER
nTrust and Paternosters.
Carinthia and Carniola. The province of Car
inthia (German, Kärnten), since 1866, has been an
appanage of the dukedom of Austria. In olden times
it was included in Slavonia, and during the wars with
Germany the first seeds of Christianity were sown.
The princes of Carinthia had become Christians by
the middle of the 7th century. The people did not embrace it before the latter part of the ninth
century. In Caroina (German, Kärn) which is also
a duky of Austria, Christianity was earlier propagat
ed. Fortunatus, dean of Hermagoras, first bishop of
Aquileia, is said to have first introduced it in Laib
ach, and up to 1463 Laibach was an archiepiscopal of
Carinthia.
At the Reformation, Luther's doctrine spread rapidly
through these two provinces, and Primus Truber (q.
v.), who first promulgated them there, became canon
of Laibach in 1518; yet he had afterward to leave the
country and retire to Wurttemberg, from whence he
supplied his countrymen with evangelical books and
tracts, partly in Polonese, and partly in Latin. In 1555
almost the whole population of both provinces
adoption the Reformation, and Truber went back in
1561, taking with him the first printer there had been
in the country, John Mandel (Manilius). In 1587, a letter of prince-bishop Thomas Chrn to
the pope shows that but one twentieth of the population, and that among them was a zeal for Roman.
ism. Yet want of unity among the ministers, and a
Growing tendency to indulge in scholastic and dog
matic discussions, opened the doors again to Rome, and
in 1579 Rome of the ministers were driven away.
The Roman Catholic element steadily increased until,
in 1598, all the Protestant ministers were commanded
by the emperor Ferdinand II to leave within fourteen
days. In 1601 the same command was issued for the
laity, who were to recant or emigrate within six weeks.
Most preferred the latter alternative, and went into
Bohemia, Hungary, and Germany. This state of
things continued until the proclamation of the cele
rated edict of toleration by Joseph II in 1781.

The denominational statistics of the two provinces
were, according to the official census of 1860, as fol
ows: Carinthia — Roman Catholics, 381,027; United
Greeks, 9; Non-united Greeks, 1; Lutherans, 17,466;
Reformed, 2,079; Carniola—Roman Catholics, 180,603;
Non-united Greeks, 201; Non-united Greeks, 319; Luther
ans, 881; Reformed, 129; other sects, 4. There are three
biopolitical: 1st, the see of Laibach, suffragan of the
diocese of GÖrzes, with 205 livings, 83 curates, 50 benefices,
676 secular priests, and 44 regular priests; 2d, the see
of Gurk, belonging to the archbishopric of Salzburg,
containing 204 livings, 72 curates, 11 deaconesses, and counts
421 secular priests, and 17 regular priests; 3d, the see
of Lavant, suffragan of Salzburg, with 169 livings, 48
cures, 171 benefices, 406 secular priests, and 72 regular
priests. In Carniola there are also 5 convents, occupied
by 67 monks, and 2 by 55 nuns; in Carinthia there
are 70 of the latter, and 8 convents.
The Lutherans are subject to the Superintendent of
Vienna. They have in the district of Klagenfurt 2
circuits, with 2 ministers; and in that of Villach, 14
districts and 14 ministers. The latter districts are:
1, Orlich, 1415 persons; 2, Bleiberg, 1005; 3, Dorn
bach, 605; 4, Eisenbraten, 553; 5, Peflitz, 621; 6,
St. Peter, 1027; 7, Jesenitz, 1606; 8, St. Peter, 1035; 9,
Gronbach, 1429; 10, Trebesing, 1250; 11, Freising, 851; 12,
Watschig, 1162; 12, Zlan, 1586; 13, Wei bach, 1178;
14, Gnesau, 900; 15, Feldkirchen, 890.—De conversione
Carantonomorum (anonymous); Waldau, d. Geschicthe d.

Carleton, George, D.D., bishop of Chichester,
was born at Northam, Northumberland, 1559. He
was educated by Bernard Gilpin, by whom he was sent to
Edmund Hall, Oxford, where he graduated A.B. in
1580, and A.M. in 1583. He remained there two years
as fellow and master until 1616. In 1617 he was made
bishop of Llandaf. In 1618 he was sent by James I,
with Drs. Hall, Davenant, and Ward, to the Synod of
Dort, where he defended episcopacy. On his return,
the States sent a letter to King James highly commen
ting him for his observance of the duties of his
office, learning, piety, and love of peace. He was
advanced to the see of Chichester in 1619, of which he
continued bishop until his death in 1628. He was
a man of solid judgment and various reading, partic
ularly in the fathers and schoolmen: a strenuous oppo
nent of Rome, and a steady Calvinist. He wrote

CARLISLE

Carilale (Carileolum), a city in Cumberlandshire, and an episcopal see of the Church of England. It belongs to the province of the archbishop of York. A monastery was commenced here about 1063, and afterward fulled by King Henry I, who richly endowed it, and filled it with regular canons, and further, at the request of archbishop Thurstan, erected it into a cathedral church. It was the only regular chapter in England composed of Augustinian canons, and who, with the consent of the pope and the king, enjoyed the right of electing their own bishop. The monastery was dissolved in January, 1540, and its site and manor given to maintain a dean, prebendaries, etc. The diocese is composed of parts of Cumberland and Westmoreland, and the chapter consists of a dean, archdeacon, chancellor, four canons, and three minor canons. The incumbents (1866) is Harvey Goodwin, D.D., consecrated in 1869.

Carlstadt or Carloeul, an eminent but violent coadjutor of Luther. His name was Andrew Bodenstein, but he took his surname from his native place in Franconia. The date of his birth is unknown. He studied theology and the canon law at Rome. In 1564 he went to Wittenberg, and after taking several academic degrees and obtaining a great reputation for scholarship lectures himself in the chair of theology and archdeacon. His intimacy with Luther began in 1512. When Carlstadt came back from a stay at Rome, about 1515, and found that Luther's opinions were subverting scholasticism in the University, he at first opposed them violently, but afterward devoted himself to Biblical study, and became one of Luther's most zealous followers. It is evident that his erudition is at this time highly spoken of, but Melanchthon denied him either sound learning, genius, or piety. In escapism from scholasticism he seems to have gone to the opposite extreme of mysticism. In the celebrated Leipzig Disputation (June 27, 1519) he disputed with Eck (q. v.) upon "human freedom and divine grace." Luther, being drawn into the debate, surprised the other disputants, and from this time the breach between Carlstadt and the great reformer openly manifested itself. The next year (1520) he published a treatise, De canonico Scripturae (Frankfort, 1517): in which, although it is true that the author was nevertheless an able work, setting forth the greatest principle of Protestantism, viz., the paramount authority of scripture. He also at this time contended for the authority of the epistle of St. James against Luther. On the publication of the bull of Leo X against the reformers, Carlstadt showed a real and honest courage in standing firm with Luther. His work on Papal and Church State (1520) attacks the infallibility of the pope on the bases of the Bible. In 1521, during Luther's confinement in the Wartburg, Carlstadt had almost sole control of the reform movement at Wittenberg, and was supreme in the University. He attacked monachism and celibacy in a treatise de coebibus, monachibus at vicentis. His next point of assault was the Mass, and a riot of students and young citizens against the mass soon followed. On Christmas, 1521, he gave the sacrament in both kinds to the laity, and in German; and in January, 1522, he married. His headlong zeal led him to do very many things, right, at once and arbitrarily. But he soon outran Luther, and one of his great mistakes was in putting the O. T. on the same footing as the N. T. On Jan. 24, 1522, Carlstadt obtained the adoption of a new church constitution at Wittenberg, which is of interest only as the first Protestant organization of the Reformation. In 1525 he gave way to a fanaticism against academic learning, insisting that ascalical degrees were sin-

ful, and that the spirit was sufficient for the illumination of the faithful. The ferment increased until Wittenberg was in a storm, the University in danger of dissolution, and the timid Melanchthon, although countenancing all the reasonable steps of Carlstadt, was nevertheless in such fear that his reformation would be disastrous to the reform. This is the culminating point of Carlstadt's influence. When Luther returned from the Wartburg, and found how things were going at Wittenberg, his eloquence and strength soon restored order, and Carlstadt's violence was rebuked and humbly assid. Carlstadt's vanity and empty pretensions were mortified, and his influence at Wittenberg was broken. In 1528 he abandoned his academic honors and degree, left Wittenberg, and, calling himself a "new layman," went into the country. He soon published a number of mystical works, asserting the entire passivity of the human will in relation to predestination, and soon went almost to the verge of apostasy. He was especially fanatical in regard to the right to use "physical forces," and treated with contempt Luther's consideration for the weakness of others. After his banishment from Wittenberg he obtained the pastorate of a church at Orlamünde, in Saxony, but after his discussion with Luther the election of the elector was also from the state. Hence he went to Strasburg, and published several writings on the Eucharist, in which he opposed Luther's doctrine of the real (spiritual) presence, and coincided with Zwingle's views, which were also those of Ecolampadius, and are now held by most Protestants. In 1533 he was dismissed from Orlamünde. In 1534, and from this date until 1538 he wandered through Germany, pursued by the persecuting opinions of both Lutherans and Papists, and at times reduced to great straits by indigence and unpopularity. But, although he always found sympathy and hospitality among the Anabaptists, yet he is accused of being evidently clear of the church of the Anabaptists' rebellion. Yet he was forbidden to write, his life was sometimes in danger, and he exhibited the melancholy spectacle of a man great and right in many respects, but whose rashness, ambition, and insincere zeal, together with many fanatical opinions, had put him under the well-founded but immoderate censure of both friends and foes.

By these severe reverses the intemperate zealot was humbled. In 1530 Bucer sent him with warm commendations from Strasbourg to Zurich, where, in 1532, he became a second time pastor of a church. In 1534 he was made protonotary and minister of St. Peter's, and, being a dispute with Miconius, he lived in comparative quiet and comfort. He died of the plague on Christmas, 1541. It cannot be denied that in many respects he was apparently in advance of Luther, but his error lay in his haste to subvert and abolish the external forms and pomeb before the hearts of the people, and therefore doubly his own, were prepared by an internal change. Biographies of him are numerous, and the Reformation no doubt owes him much of good for which he has not the credit, as it was overshadowed by the mischief he produced. Theol., 1867, p. 121 sq.

Carm:manian (Vulg. Carmanianus, for the Gr. text is not extant), an inhabitant of Carmania (occuring in the Bible only in 2 Esdr. xv, 30, where the Carmians are predicted as the ravagers of Assyria), an extensive province of Asia along the northern side of the Persian Gulf, extending from Carpella (the present Cape Bomarce, or else C. Isk) on the E. to the river Bagradas (now Wabend) on the W., and comprehending the modern coast-line of Kirman, including Laris-
CARMEL

tan and Moghost.n. See Persia. It was rugged, but fruitful, and inhabited by a warlike race (see Smith's Dict. of Class. Geogr. s. v.). They are described by Strabo (xv, p. 277) as worshipping Ares elsewhere, but the gods of the war which they sacrificed an ass to. None of them married till he had cut off the head of an enemy and presented it to the king, who placed it on his palace, having first cut out the tongue, which was chopped up into small pieces and mixed with meal, and in this condition, after being tasted by the king, was given to the warrior who brought it and to his family to eat. Nearchus says that most of the customs of the Cimmerians, and their language, were Persian and Median. Arrian gives the same testimony (Ind. ii, 36), adding that they used the same order of battle as the Persians. See Asia.

Carmel (Χαρμῆς v. r. Χαρμῆς), given (1 Ecd. v, 23) as the family head of 1017 Jews who returned from Babylonia: evidently meaning the ἅρμη (q. v.) of the Heb. texts ( Ezra ii, 52; Neh. vii, 35).

Carmel (Heb. Karmel, כַּרְמוֹל, park, as in Is. x, 18; xvi, 10; xxxii, 17; xxxiii, 15, 16; Jer. ii, 7; xliv, 23 [also 2 Kings xix, 25]; 2 Chron. xxvi, 10, in both which passages the A. V. incorrect makes it for the proper name, "Karmel"; hence girt as a garden fruit, Lev. ii, 14; xxxiii, 14; 2 Kings iv, 49, the name of a noted promontory (often with the art. [as in several of the above occurrences of the appellation), kab-Karmel, כַּרְמוֹל, q. d. the orchard, Amos i, 2; 1, 3; Jer. iv, 28; Cant. v, 6; fully "Mt. Carmel," har hakah-Karmel, חַרְמַה כַּרְמוֹל, q. d. garden-mountain, 1 Kings xviii, 19, 20; or without the art. Is. xxxiii, 9; Nah. i, 4; Josh. xia, 20), and also of a town; both doubletless so called from their varied fertility. For details of both see the Memoire accompanying the Map lately issued by the "Pal. Explor. Fund."

2. (Sept. usually קָרָם, καράμ; so Josephus, Ant. v, 1, 22, etc.; Tacitus, "Carmelus," Hist. ii, 78; also Suetonius, "Theobal., iv, 5]; but Karmiel in 1 Kings xvii, 19, 20; 2 Kings ii, 25; iv, 25 [so Josephus, Ant. xii, 5, 4, and Χαρμίλ in Jos. xii, 29]. A prominent headland of lower or central Palestine, bounding southerly the Bay of Acre, and running out boldly almost into the waves of the Mediterranean, from which it stretches in a straight line, bearing about S.S.E. for a little more than twelve miles, when it terminates suddenly by a corresponding breach in its western end, breaking down abruptly into the hills of Jenin and Samaria, which form at that part the central mass of the country. The average height is about 1500 feet; and at the foot of the mountain, on the north, runs the brook Kishon, and a little further north the river Belus. Mount Carmel consists rather of several connected hills than of one ridge, being at the W. end about 600, and at the E. about 1600 feet above the sea. The highest part is some four miles from the E. end, at the village of Esfieh, which, according to the measurements of the English engineers, is 1726 feet above the sea. The foot of the northern portion approaches the water closely, but farther south it retires more inland. The slopes are steepest on the northern side toward the Kishon (q. v.).

Carmel fell within the lot of the tribe of Asher (Josh. xix, 26), which was extended as far south as Dor (Tantura), probably to give the Asherites a share of the rich plain on the north of the mountain, as well as the plain of Joppas, Ant. v, 22; War, iii, 8, 1). The king of "Jokneam of Carmel" was one of the Canaanites who fell before the arms of Joshua (xii, 22). There is not in these earliest notices a hint of any sanctity attaching to the mount; but from the facts that an altar to the sun stood before the Baal worship into the kingdom (1 Kings xviii, 80); that Eliah chose the place for the assembly of the people, such assemblies being commonly held at holy places; and from the custom, which appears to have been prevalent, of resorting thither on new-moon and sabbaths (2 Kings iv, 28), there seems to be grounds for believing that from very early times it was considered a sacred spot, if not an asylum of the ancients. According to the most sacred story, it was consecrated to it by that reputation, according to his biographer Evidensius (Vita Pythag. c. 8, p. 40, 42, ed. Kiel.), himself visited the mount; Vespasian, too, came thither to consult—so we are told by Tacitus (Hist. ii, 7), with that mixture of fact and fable which marks all the accounts of the sojourn of the Lord's servant in the wilderness, to which the name of the god, whose name was the same as that of the mountain itself; an oracle without image or temple (see Smith's Dict. of Classical Geogr. s. v. Carmelus). But the circumstances that have made the name of Carmel most familiar are that here Elijah brought back Israel to the true Jehovah, and also the prophets of the foreign and false god; here at his entreaty were consumed the successive "fifteen" out of the royal guard; and here, on the other hand, Eliah received the visit of the bereaved mother whose son he was soon to restore to her arms (2 Kings iv, 25, etc.) See Eliah. The first of these three events, without doubt the most important in the place at the entrance to the Carpathian ridge, at a spot called el-Mulka'dakah, near the ruined village of el-Manuras, first described by Van de Velde (Journey, i, 324 sqq.). The tradition preserved in the convent, and among the Druses of the neighborhood villages, the names of the places, the distance from Jerusalem, and the presence of the locality, of the former name of the never-failing spring, are all favorable (see Stanley, Sinai and Palæst. p. 345 sqq.; Thomson, Land and Book, i, 223 sqq.). The terrace on which the traditionary structure stands commands a noble view over the whole plain of Esdraelon, from the banks of the Kishon down at the bottom of the steep declivity, away to the distant hill of Gilboa, at whose base stood the royal city of Jezreel. To the 860 prophets, ranged doubtless on the wide upland sweep, just beneath the terrace, to the multitudes of people, many of whom may have remained on the plain, the altar of Eliah would be in full view, and they could all see, in the evening twilight, that "the fire of the Lord fell, and consumed the burnt-sacrifices, and the wood, and the stones, and the dust, and licked up the water" (ver. 88). The people then, trembling with fear and indignation, seized, at Eliah's bidding, the prophets of Baal; and Eliah brought them down to the brook Kishon, and saw them all, and slew them. In correspondence with its western end, the mountain is a mound called Tell el-Kusis, "the Hill of the Priests," which probably marks the very scene of the execution. May not the present name of the Kishon itself have originated in this tragic event; it is called Naher el-Mokatta, "the River of Slaughter." The prophet went up again to the altar, which was near, but not upon the summit of the mountain. While he prayed, he said to his servant, "Go up now, and look toward the sea." The sea is not visible from the terrace, but a few minutes' ascent leads to a peak which commands its whole expanse. Seven times did the servant climb the height, and at last saw the little cloud "like a man's hand" rising out of the sea. See Eliah.

According to the reports of most travellers, the mountain well deserves its Holzwel name (see above). Marriti describes it as "a delightful region," and says the good quality of its soil is apparent from the fact that there are no fields in the mountains that manured with manure (comp. Josephus), Ant. v, 3, 3), that many trees such as junquils, tazettos, anemonies, etc., grow wild upon the mountain (Travels, p. 274 sqq.). Otto von Richter (Waffenschr., p. 64) gives a glowing account of its beauty and varied scenery. Mr. Carme also says, "No mountain in or around Palestine retains its ancient beauty to so great an extent, for the greatest part of the mountain is covered with a dense growth of olive and cypress; the most beautiful views in the land are obtained from the mountain, and from the top of the highest peaks great mountains can be seen to the north, east, and south. The mountain is divided into two distinct parts, the western part being more of a sandy character, and the western part being more of a rocky character. The western part is covered with a dense growth of olive and cypress trees, and the eastern part is covered with a dense growth of oak and pine trees."
face is covered with a rich and constant verdure" (Lett
era, ii, 119). "There is not a flower," says Van de Velde, "that I have seen in Galilee, or on the plains along the coast, that I do not find here on Carmel... still the fragrant, lovely mountain that he was of old" (Narvattera, i, 317, 8). The whole mountain side was fragrant with gums, sweet gums, and fragrant herbs" (Martineau, p. 589). So Isaiah (33xv, 2) alludes to "the excellency (splendid ornaments) of Carmel." So, on account of the graceful form and verdant beauty of the summit, the head of the bride in Cant. vii, 5 is compared to Carmel. It was also celeb
erated from the days of the Judges in Israel. It was linked with Bashan in Isa. xxxiii, 9; Jer. i, 19; Amos i, 2; Mic. vii, 14; Nah. i, 4. Its conspicuous position is also compared with that of Tabor (Jer. xvi, 18). Its great elevation is referred to in Amos ix, 8. A much less glowing account of Carmel is given, however, by many trav
erellers whose visit has been later in the year—to
ward the end of summer or in autumn—and who con
sequently found everything parched, dry, and brown. (See Hackett's Illustra. of Scripture, p. 324-325.) The western extremity of the ridge—that, unfortunately, with which ordinary travellers are most familiar, and from which they take their impressions—is more bleak than the eastern. It is rocky, scantily covered with dwarf shrubs and aromatic herbs, and having only a few scattered trees here and there in the gleans (Crescent and Cross, i, 54 sqq.).

The structure of Carmel is in the main the Jura for
mation (upper olite), which is prevalent in the centre of Western Palestine—a soft white limestone, with nodules and veins of flint. As usual in limestone for
mations, it abounds in caves ("more than 2000")—Mis
ilin, ii, 46,—often of great length, and extremely tortu
ous. See Cave. At the west end are found chalk and tertiary breccia formed of fragments of chalk and flint (See Chalk and Flint). On the north-east of the mount, beyond the Nahal el-Mokatta, plutonic rocks appear, breaking through the deposited strata, and forming the beginning of the basalt for
mation which runs through the plain of Esdraelon to Ta
bor and the Sea of Galilee (Ritter, ii, 5). The round stones known by the names of "Leptides Judaici" and "Eljah" is its plural, are known to geologists as "geodes." Their exterior is chert or flint of a light brown color; the interior is hollow, and lined with crystals of quartz or chalcedony. They are of the form and often the size of the large water-melons of the East. Formerly they were easily obtained, but are now very rarely found (See Chalk and Flint.) Par
kinson's Organic Remains, i, 222, 451. The "olives" are more common. They are the fossil spines of a kind of echinus (Cidarina glandifera) frequent in these strata, and in size and shape are exactly like the fruit (Parkinson, iii, 45). The "aples" are probably the shells of the cidaris itself. For the legend of the origin of these "fruits," and the position of the "field" or "garden" of Elijah in which they are found, see Mis
nilin, ii, 64, 65. The whole ridge of Carmel is deeply furrowed with rocky ravines, filled with such dense jungle as scarcely to be penetrable. Here jackals, wolves, hyenas, and wild swine make their lairs, and wild figs, persea (pişme), and wild almond, feed the birds, partridges, quails, and hares sport about. In the sides of the mountain, especially round the convent and overhanging the sea, are great numbers of caves and grottoes, formed partly by nature and part
tly by art and industry in the soft calcareous rock. Caravansersais and caravanserai, and bands of Bedou
inits, who burrowed in these comfortless dens. Cu
rious traditions cling to some of them, in part con
firmed by the Greek inscriptions and names that may still be traced upon their walls. One of them is called the Cave of the Sons of the Prophets," and is said to be that in which the pious O délaid hid the prophets from the fury of the infamous Jezebel (1 Kings xvii, 4). In one tract, called the Monks' Cave, there are as many as 400 caves adjacent to each other, furnished with windows, and with places for sleeping hewn in the rock. A peculiarity of many of these caves is men
tioned by Shulz (Leitung, v, 187, 382), that the entrances into them are so narrow that only a single person can crawl in at a time; and that the passages are so crooked that a person is immediately out of sight unless closely followed. This may serve to illus
trate Amos ix, 8. To these grottoes the prophets Eli
jah and Eliisha often resorted (1 Kings xviii, 9 sq., 42; 2 Kings ii, 25; iv, 15; and comp. 1 Kings x, 14, 18). The most famous, called the cave of Elijah, a little below the Monks' Cave already mentioned, and which is now a Moe
lem sanctuary. Upon the north-west summit is an ancient establishment of Carmelite monks, which or
der, indeed, derived its name from this mountain. See Carmelites. The order is said in the traditions of the Latin Church to have originated with Elijah himself (St. John of Jerusalem, quoted in Misslin, ii, 49), but the convent was founded by St. Louis, and its French origin is still shown by the practice of unfurling the French flag on various occasions. Edward i of England was a brother of the order, and one of its most famous—and perhaps its most impor
tant—members was the English translator of the extracts in Wilson's Bible Lands, ii, 246; for the convent and the singular legends connecting Mount Carmel with the Virgin Mary and our Lord, see Mis
lin, ii, 47-50. By Napoleon it was used as a hospital during the siege of Acre, and after his retreat was de
stroyed by the Arabs. At the time of Irbly and Man
gles's visit (1817) only one friar remained there (Irbly, p. 60). The old convent was destroyed by Abdallah Pasha, who converted the materials to his own use; but it has of late years been rebuilt on a somewhat imposing scale by the aid of contributions from Eu
rope. Elijah is known by the name of El-Jebel, or El-Biter, in Arabu
n writers. At present it is called to be called by the Arabs Jebel Mur Elbas, from the convent of Elias near its northern end. (See generally Phil. a S. Trinitate, Orientale, Reisebeschreib, iii, 1, p. 156 sq.; Reland, Pales. iii, 32 sq.; Hamesveld, i, 849; Schubert, Reise, iii, 205; Robinson, Researches, iii, 160, 189; Thomson, Life and Works of Sinai, p. 143; Porter, a cate
ue for Syria, p. 371; Tristram, Land of Israel, p. 406.)

2. (Sept. Χεριδ in Jos., 5 Καρμαριος in Sam. and Chron.) A mountain in the mountains of Judah (Jos. xv, 55), the residence of Nabal (1 Sam. xxxv, 2, 5, 7, 40), and the native place of David's for
vite wife, "Abigail the Carmelites" (1 Sam. xxvii, 3; 1 Chron. iii, 1). This was doubtless the Carmel at which Saul set up a "place" (τόν), a hand; compare 2 Sam. xvii, 18, "Absalom's place," where the same
word is used) after his victory over Amalek (1 Sam. xv, 12). This Carmel, and not the northern mount, must have also been the spot at which king Uzziah had his vineyards (2 Chron xvi, 10). In the time of Eusebius and Jerome it was the seat of a Roman garrison (Gonomaist. s. v. Καρμυρος, Carmelus). The place appears in the wars of the Crusades, having been held by king Amalric against Saladin in 1172 (Wil
ams, ii, 59). The Gilliam of Tyre are said to have opened, or discovered, it (Francesco, p. 995). The ruins of the town, now Kurma, still remain at ten miles below Hebron, in a slightly south-east direction, close to those of Main (Moon), Zif (Zeph), and other places named with Car
mel in Jos. xv, 55. They are described both by Rob
inson, ii, 295, and by Tylor, ii, 270, and by Van de Velde (Narvattera, ii, 77-79), and appear to be of great extent. They lie around the semicircular head and along the shelving sides of a little valley, which is shut in by rugged limestone rocks. The houses are all in ruins, and their sites are covered with heaps of rubbish and hewn stones. In the centre of the valley is a large artificial reservoir, supplied by a
fountain among the neighboring rocks. This is mentioned in the account of king Amalrich's occupation of the place, and now gives the name of Kaar el-Birkeh to a ruined castle of great strength, situated westward of the reservoir, on high ground, the most remarkable object in the place... Its walls are ten feet thick; their sloping basement and bevelled masonry are evidently of Jewish origin, probably the work of Herod. The interior was remodeled, and the upper part rebuilt by the Saracens. Beside it are the ruins of a massive round tower. Around and among the ruins of the locality are the foundations of several old churches, which in the 11th century were at one period a large Christian population. (See Seetzen, Reise, iii, 8, 9; Porter, Handbook for Syria, p. 61; Schwarz, Paten, p. 106.) See Carmelites.

Carmellite (Heb. Karmeli), כַּרְמֶלִי, "כַּרְמַלֵת", the designation of Nabat (Sept. קַרְמְלָא, 1 Sam. xxviii. 8; xxx, 51; 2 Sam. ii. 2) and his wife Abigail (Sept. קָרְמַלָּה, A. V. "Carmelites", 2 Sam. iii. 3; 1 Chron. iii. 1); as also of one of David's warriors, Hezrai (Sept. קָרְמַלָּה, 2 Sam. xx. 25), 25) or Hezrai (Sept. קְרֹמֶל, 1 Chron. xi. 37); doubtless as being inhabitants of Carmel (q. v.) in Judah (Josh. xv. 53).

Carmelites, the monastic order of "St. Mary of Mount Carmel." It was founded as an association of hermits by Berthold, count of Limoges, about 1156, on Mount Carmel, and received its first rule in 1209 from Albert, patriarch of Jerusalem, to whose diocese Mount Carmel belonged, which rule was sanctioned by Pope Honorius III in 1224. The rule was founded on that of St. Basil, and enjoined that the prior be elected unanimously or by majority; to have places in deserts, separate cells, common refectory; all to remain in their cells meditating by day and night, excepting when at fit hours, in church, etc.; to have all things common; no flesh allowed save to the sick; fast from Holyrood to Easter every day except to the sick; to observe chastity, to labor, and to keep silence from after Compline till Prime. The habit was at first white, as well as the mantle, of which the bottom was laced thick with yellow bands, an ornament suppressed by Honorius IV. They then assumed the role of the Minims, and a white mantle. The Carmelites were also known by the name of Barred or Barry Friars (Frères Barres), because of the barred dress of black and white which the Saracens, when they took possession of the East, compelled them to wear, instead of the white dress, white being with them a mark of distinction. They came to Europe in 1226, and had seven establishments in England. The first General Chapter was held in 1245 in England, after which, through the activity of their general, Simon Stock, and the protection of Innocent IV, they spread with great rapidity. From Innocent IV they received, in 1247, a new rule, which was better suited for the new situation, and which classed them among the mendicant orders. Instigated by the desire to excel their rivals, they invented the most absurd legends. They pretended that the prophet Elijah had been the founder of their order and the Virgin Mary a member, wherefore they called themselves Fraires Helets Marie de Monte Carmelo. The succession of the generals of the order, according to their historians, has never been interrupted since the prophet Elijah. They were duly castigated and ridiculed for such pretensions by the Jesuits, and particularly by the learned Hollandist Papelroch. Still the Church never decided against them; Pope Innocent IV imposed the objections upon the mendicants, and the fables of the Carmelites can be read in their liturgical books to this day.

The great schism of the 14th century split also the order of the Carmelites, and completed their corruption and disorganization. Several attempts at a reformation were made, of which that of Thomas Connece, who laid the foundation of the Congregation of Mantua, was the most successful. Thomas himself (a celebrated penitentiary in France and in the Netherlands) was burned in Rome as a heretic, but his congregation soon extended widely, and received the privilege of electing a vicar general. Pope Eugenius IV mitigated the rule of Innocent IV in 1431, and endeavored to unite all the Carmelites, except the Congregation of Mantua, on this mitigated rule as a new basis. For the same purpose, the general received from Pius II, in 1459, the authority to proceed with regard to fast-days according to their own judgment. In 1462, general John Soreth tried to introduce a greater strictness of the rule into the whole order. His plans were approved by Pope Paul II, but the author was poisoned by discontented monks in 1471. The same Soreth established, in 1452, the first convent of Carmelite nuns. In 1476 Sixtus IV established the Territorians of the order. They received a rule in 1458, which was reformed in 1678.

The Discalced Carmelites received their name from going barefooted, and took their rise in the 16th century. They professed the order as reformed by Teresa of Avila, in Spain, who, desiring a stricter rule than that which the Carmelites (farther mitigated by Eugenius IV in 1431) afforded, about 1562 established a new house at Avila under her reformed rule; and in 1577 the Discalces were exempted from the jurisdiction of the Mitigated Carmelites. They were divided into two distinct bodies, those of Spain, who were composed of six provinces under one general, being the strictest. The others had seventeen provinces in France, Italy, Poland, Germany, Persia, etc. It is a rule with them that in every province there shall be a hermitage attached to some one monastery, in which hermitage shall be not more than twenty monks, who after three weeks return to the monastery, and are replaced by twenty other monks. Their manner of life is very austere (Landon, Enc. Dictionary, s. v.).

The Spanish congregation has become nearly extinct in consequence of the suppression of all the monastic orders in Spain. In 1448 no more than fourteen convents belonging to it were left in South America. Their procurator general lived in the general house of the Italian congregation in Rome. At the same date the Italian congregation counted 63 convents, with about 400 members, in Italy, France, Belgium, Holland, Austria, Bavaria, Ireland, Poland, and Turkey. The Mitigated or Calceate Carmelites had convents in Italy, Austria, Bavaria, Ireland, and Poland, with about 600 members. In 1800 the Carmelite monks altogether numbered 125 houses in Italy; 12 in Germany, Holland, and Belgium; 12 in France, 8 in Ireland, 22 in Eastern Europe (Poland, Galicia, Russia, Hungary), 6 in Asia, 17 in Mexico and South America, and a few
CARMELITESS 127 CARNIVAL

In Spain. The number of members was estimated at about 4000. Since then the number has been reduced by the suppression of a number of convents in Italy. The Carmelite nuns of the reform of Theresa had, in 1843, about 90 houses in Italy, France, Belgium, England, Ireland, Bavarica, Prussia, Austria, Poland, North America (at Baltimore), South America, and India: 60 of these convents were in France. In 1860, Spain and Portugal had 15 houses; Italy, 19; France, 71; Germany, Holland, and Belgium, 28; Great Britain and Ireland, 16; Poland and Russia in America, 7; Asia, 1; altogether, 160 houses, with about 3200 members.

A congregation of our Lady of Mount Carmel was founded in France in 1702. Its members are not obliged to enter a convent, but can pass their novitiate in the world. They have many institutions in France, principally devoted to teaching and the nursing of the sick, and have once a year a great gathering at Avranches for the purpose of a common spiritual retreat.

There is also a congregation of Carmelites in the archdiocese of New Orleans, U. S., who teach four schools.

Car-hellitess (2 Sam. xxvii, 8; 1 Chron. iii, 3).

See Carmelites.

Carmel (Heb. Karmi), "wine-dresser, otherwise noble; Sept. Xaupi, but Xaupsi in Exod. vi, 14), the name of three men.

1. The last named of the four sons of Reuben (Gen. xvi, 9; Exod. vi, 14). B.C. 1872. His descendants were called after him Karmites (Num. xxvi, 6).

2. A son of Hezron (Judah's grandson), and father of Walz (Numbers xii, 1), who was also called Caleb (ib. 13) or Cheleb (ib. 9). B.C. post 1856.

3. The son of Zimri or Zadli, and father of the traitor Achian (I Chron. vii, 1; 1 Chron. ii, 7). B.C. ante 1618. Some have erroneously identified him with the preceding; but the names in 1 Chron. iv, 2, are evidently in direct succession of father and son from Judah.

Carmite (Heb. Carmi, in xvi, 3, Sept. Xaupi, the patronymic of the descendants of the Reubenite Carmi (Num. xxvi, 6).

Carnahan, James, D.D., president of Princeton College, was born Nov. 15, 1775, near Carlisle, Cumberland Co., Pa. In November, 1798, he entered the junior class in the college of New Jersey, and received the first degree in the arts in September, 1800. He read theology under John M'Gillan, D.D., in Western Pennsylvania. In 1801 he returned to Princeton as tutor, and resigned his tutorship in the fall of 1808. He was licensed by the presbytery of New Brunswick at Baskenridge in April, 1804, and preached in the vicinity of Hackettstown, Oxford, and Knowlton. January 5, 1806, he was ordained pastor of the united churches of New Union and Utica, N. Y. In February, 1814, he moved for his health to Georgetown, D. Co., and opened a school, teaching there for nine years. In May, 1823, he was chosen president of the college of New Jersey, was inaugurated on the 5th of August, 1823, and, after a service of thirty years, resigned in 1853, and his connection with the college was dissolved June, 1854. He was in different capacities connected with the college for thirty-five years, viz. two years as a student, two as a tutor, and thirty-one as president. "His character was distinguished by mildness, joined to firmness and vigor; his learning was extensive, and his practical ability in the ordinary affairs of life exceedingly acute. His labors were very useful in every department of activity—as a man, a Christian clergyman, the head of a most important educational institution, and an efficient co-operator in numerous schemes of benevolent enterprise." He died in Newark, N. J., March 8, 1859.—New York Observer; Wilson, Presb. Almanac, 1860, p. 68.

Carnailm (Kapsavo v. t. Kapaises, Vulg. Carnaia), a large and fortified city in the country east of Jordan.—"the city in the prime or fertile part" (ro ripusoc in K.). It was besieged and taken by Judas Maccabeus (1 Macc. v, 26, 48, 44). Under the name of Carnion (ro Kapsioes) the same occurrence is related in 2 Macc. xii, 21, 26, the temple being called the Atarhatrion (ro Atrarurion). This identifies us to identify it with ASHEROTH-KARNAIM (q. v.).

Carnal (παροικία), fleshly, sensual. Wicked or unconquered men are represented as under the domination of a "carnal mind, which is enmity against God," and which must issue in death (Rom. viii, 6, 7). Worldly enjoyments are carnal, because they only minister to the wants and desires of the animal part of man (Rom. xv, 27; 1 Cor. ix, 11). The ceremonial parts of the Mosaic dispensation were carnal; they related immediately to the bodies of men and beasts (Heb. vii, 16; ix, 10). The weapons of a Christian's warfare are not carnal; they are not of human origin, nor are they directed by human wisdom (2 Cor. x, 4). See Flesh.

Carnelian. See Sardius.

Carnesecchi, Pietro, an Italian reformer and martyr of the 16th century, was born in Florence, of a good family. His education and culture gained him the esteem of the best scholars of the time, such as Sadoletus and Bembo. He became secretary and prothonotary to Pope Clement VII, and had so much influence that it was said "the Church was governed by Carnesecchi rather than by Clement." At Naples he imbibed the Reformed doctrine from Valdes (q. v.), and in 1546 he was accused as a heretic and cited to Rome. Through the favor of Paul IV he escaped, but sought safety in France, where he remained at the court of Henry VI until 1552, when he thought he might return to Italy, and took up his abode at Padua. In 1557 he was summoned to Rome; but, failing to appear, he was excommunicated as a heretic, April 6, 1559. Pius IV, on his accession, removed the sentence of excommunication, without any recantation on the part of Carnesecchi. When Pius V became pope, Carnesecchi apprehended danger, and took refuge with Cosmo, grand-duke of Tuscany, who hastily surrendered him on a demand in the pope's own writing. He was tried by the Inquisition, adhered steadfastly to the faith, and was condemned. On Oct. 3, 1557, he was beheaded, and his body afterward was confirmed.—Mc Crie, Reformation in Italy, chap. v (and authorities there given).

Carniola. See Carnithia.

Car'nia (2 Macc. xii, 21, 26). See Carnaim.

Carnival, a period of festivity in Roman Catholic countries, beginning on the day after the Epiphany, and ending at the commencement of Lent, on Ash Wednesday, resembling the Lupercalia of the Romans and the Yule-feasts of the Saxons. Some derive the word from caro (carnis), flesh, and raie, to kill, to slay, to slay flesh; others from the Italian carne, flesh, and availare, to swallow. In an iernal Latin it is called carnisavemen, carnepitriam. Carneval owes its origin to pagan festivals, and pious Roman Catholics themselves have testified their sense of the scandal which this season occasions. In Rome the Carnival is observed with revelry, masquerades, feasts, and grotesque processions. The Greeks have a similar period, which they call Καρναψας, Αρτατρος; it comprehends the week, which, as Marinus says, "unumque pro facultate sua, laete et opus aut contumilatur." A good account of the Roman Carnival is given in Appleton's Cyclopdia, iii, 447. See also Nicolai, Comment, de Ritu Baccanale.
CAROB

orum (Helmst. 1673, 4to); Zeuner, Bacchanales Chris-
Landon, Excl. Dict. s. v.

See Husk.

Carol, a hymn sung by the people at Christmas.

"The Christmas carol may be traced to the primitive
Church. Tertullian (advers. Gentil. 90) states that at
their feasts it was customary for the Christians to
place in the middle such as were able to sing, and call
upon them to praise God in a hymn, either out of the
Scriptures or of their own invention. Durand also
informs us (Ref. vi. 86, 9) that it was usual for the
bishops on Christmas day to make sport, and even to
sing with their clergy; and this custom was an imita-
tion of the Colbris in excelsis of the angels, as we learn
from song. "These hymns, which have been generally
so called, were sung, as the Church said, the Christmas
carol, and taught the Church a hymn to put into her offices forever, on the anniver-
sary of this festivity." For the popular carols of Eng-
lund, see Brand, Popular Antiquities, i, 262 sq.; Cham-
ers, Book of Days, ii, 741 sq.—Eadite, Eccles. Dictio-
nary, s. v.; Sandy, Christmas Carols, Ancient and Mod-
ern (ld. 30, 1838, 5vo). See MYSTERIES.

Caroline Books (Libri Carolini or Opus Caroli-
num), four books written against decrees of the sec-
ond Council of Nice on the adoration of images, con-
tained in the Capitulare Prolixum of Charlemagne. These
books were drawn up under the direction of Charle-
magne, but their preparation has been ascribed to An-
gilram, bishop of Metz, Angilbert, and to Alcuin. Roger
Hovener says directly names the last, and the most
probable opinion is that Alcuin was the writer.

At all events, they were written before the Synod of
Frankfort in 794, and were pub-

lished in the name of Charlemagne during the sitting of that
council. In the preface the emperor declares that
he had undertaken the work

"Zelo Dei et veritatis studio, cum

conscientia regni sui sacerdomini.

The great principles of these books are the
following:

Lib. II. c. 21: Solus iligitur Deus colen-
dus, solus adoramus, solus glorificari
dus est, de quo per Prophetem dictum:

"Exaltatum est nomen ejus soli-

tum." (Ps. 138, 11.) Quius est

Sanctus, qui triumphans diabolo communem

evit quae virilem certaveraet, ut ad nos

incolumentum stabilius perveniret,

ut quicca eadem ecclesiastis adissent ehs

fragilis et intercessiones adiuvare nos-
cum, velut nolita exhibenda est: ima-

gines vero, omni salutre adorat

tones acceperimus, utrum in basilicali

propitia moribundorum visione et orna-

mento sit, an eum non sit, nullum

fidet ahilem sine:" poterunt prince-
didum: quippe cum ad perspexa

tratra solvita mysteria nullum penitus of-
ficiar haeresi non custatur. Lib. III. c. 16:

Nam dum nos nihil in imaginibus spe-

remus praeter adorasionem, quippe qui in basilicali Sancto-

num imaginem habebat, ad nascentem, vel ad moribundum germinat et venustatem perfecit habere emolumen-
tum, illi vero penes nobis mihi credibilissima sperat in imaginibus colo-

cent: resistentia, in eam corporis vel putis reliquias corporum, quia "ceontis vestimentis veneratur, in praefi

qnis puter adorationem): illi vero sacros et tabulas adorantes in eo se arbitratione magnum fidem habere emolu-

mentum, eo quod opulentus sit subjectior picturam. Nam et

a doctes quibusque virtati pres teit hoc, quid illi in adoranda

imago patirs sit, quid videant non quid sit, sed quod

inmutissimum veneratur, indecet tarnen quibusque scandalum ger-

nent, qui nihil alibi in his preser id quod vident

venerant et actum.

The Caroline books were first printed by Jean du
Tillet, bishop of Meaux, under the assumed name of
Eriphilus, or Elias Philyra (Paris, 1549, 4vo), at Co-

logne in 1555; by Goldastus, 1608; and in his Cita-

tationes, i. c. 1635. Lastly, by Hennepinus et

Hannover (1735, 8vo), under the title Augustii Concilii

Nicomi Secundum Censura.—Palmer, Treat. in the Church,

pt. iv. ch. x, § 4; Bergler, Dict. de Theologo s. v. Im-

age: Gieseler, Church History, per. iii, § 12; Herzog

Real-Encyclopedia, vii, 429; Landon, Eccles. Dict. s. v.

See IMAGE-WORSHIP.

Caroletstadt. See CARLSTADT.

Carpenter, the rendering in the Author. Vers. of
the Heb. wadj, charawth' (2 Sam. v, 11; 1 Chron.
iv. 1; Isa. xlv. 13, etc.), as also of its Greek equivalent

rywtyon (Matt. xiii. 50; Mark vi. 3; 1 Esdr. v. 14; Ec-

clus. xxxviii. 21, etc.), a general name, applicable to

an artisan in stone, iron, or copper, as well as in

wood. See ARTIFICER. The Hebrews, at a very
erly period, appear to have made considerable pro-
gress in these arts (Exod. xxxiv, 20 sq.). See ART.

Of their works, however, we have no existing remains;

but by a reference to the antiquities of Egypt, the
country where the proficiency was acquired, we may

obtain a satisfactory notion of their general character.

See HANDICRAFT. Tools of various kinds used in

carpentry, as axes, hammers, saws, planes, chisels,

and centre-bits, are represented on the ancient mon-

uments, and to most of them we find allusions in

Scripture (1 Sam. xiii, 20; Judg. iv. 21; Isa. x, 15;

xiv. 13). The implements differ but little between

these implements and those of our time. See TURN.

The ancient Egyptians were acquainted with the art

of veneering; this proves that they knew the use of

glue. They had chairs and couches of very graceful

form (comp. Gen. xiii, 33; 1 Sam. iv, 18). Among

the works of the Egyptian artisans are found tables, bu-

nerous, wardrobes, and coffers; several of the latter,

probably designed for jewel-cases, rival in beauty the

caskets of gold and silver. See MECHANIC.

Modern Oriental Wooden Lock-maker.

Carpenter, Charles W., a Methodist Episcopal
minister, was born in New York, Dec. 16, 1792, where
his parents were members of the John Street Church.

He entered Columbia College, but was compelled by
ill health to quit before graduation. He was in-

volved in his eighteenth year, and was licensed by Free-

born Garretson to preach in 1812. He entered the

itinerant ministry in the New York Conference in 1814,

but in 1816 he was obliged, by the weakness of his

health, to go to Savannah, where he was engaged in

business for ten years. During this time he lab-

ored as a local preacher, and was ordained deacon in

1820, and elder in 1826. In 1828 he returned to the

North, and was readmitted into the New York Confer-

ence, in which he filled important appointments, as

pastor and elder, i.e., in 1856, when he was com-

pelled by ill health to become a local preacher.

He died May, 1858, at Platekhill, N. Y. He was

very uniform character, good literary acquirements.
and great loveliness of disposition. As a minister he was able and sound, and his influence was great and durable. He was several times delegate to the General Conference, and as presiding elder his administrative talent was remarkable. He was secretary of the New York Conference for several years, and in all he was a man of influence. His death at five and thirty was joyful.—Minutes of Conferences, v., 194; Sprague, Annals, viii, 558; Wightman, Life of Bishop Cypers, p. 211.

Carpenter, Coles, a minister of the Methodist Episcopal Church, was born in Westchester county, N. Y., March 17, 1784. His parents were earnest Methodists, and he was carefully trained in religion. At seventeen he was converted, and began at once to exhort his young neighbors. In 1809 he was admitted on trial in the New York Conference; ordained deacon in 1811, and elder in 1813. He filled various important appointments in the New York Conference until 1832, when the Troy Conference was organized, and he remained in it. In 1833 he was appointed presiding elder of the Troy District, in which service he labored acceptably until his death, Feb. 17, 1834. In direct appeals to the heart and conscience he had few superiors.—Sprague, Annals, vii, 466; Minutes of Conferences, 1834, p. 263.

Carpenter, Lant, LL.D., an English Unitarian minister, was born Sept. 2, 1790, at Kidderminster, and educated at Exeter and Pembroke College, Oxford. In 1806 he became pastor of a Unitarian congregation at Exeter, and in 1817 removed to Bristol, where he remained as pastor and classical teacher till 1829, when, his health failing, he undertook a Continental tour. While going in a steam-boat from Naples to Leghorn, he fell overboard, and was drowned, in the night of April 5, 1840. Dr. Carpenter was an industrious writer. His publications included: introduction to the Geography of the New Testament (12mo, 1805);—Unitarianism the Doctrine of the Gospel (12mo, 1809);—An Examination of the Charges made against Unitarians by Dr. Magie (8vo, 1809);—A Harmony of the Gospels (8vo, 1835, of which a second edition, under the title of An Apoloitical Harmony of the Gospels, was published in 1838);—Sermons on Practical Subjects (8vo, 1840, posthumous);—Lectures on the Scripture Doctrine of Atonement (12mo, 1848, posthumous). He was a contributor to the Cyclopaedia, and to the Unitarian journals. There is a memoir of him by his son, the Rev. R. L. Carpenter (Lond. 1840).—English Cyclopaedia, a v.; Darling, Cyclopaedia Bibliographica, i, 582.

Carpocrates, a Gnostic of Alexandria in the second century, probably during the reign of Hadrian (A.D. 117-138). Of his personal history little is known. Clement of Alexandria speaks of his son Epiphanes, who died at seventeen, and was honored as a god at Sama, in Cephalonia.—Clemens, Strom. iii, 438; Lardner, Works, viii, 393. See Carpocrates.

Carpocrates, Gnostic heretics of the second century, so named from Carpocrates of Alexandria (q. v.). In common with the Gnostics generally, they held the existence of one Supreme Being, the Primeval Being, or Nous, toward which all finite things are striving to return. They taught that the visible world was formed by angels, inferior to the Father (Epiphan. Heres. xxvii, c. xi; Iren. Heres. i, 25). They regarded Christ as a religious genius, born, in the ordinary course of nature, of Joseph and Mary, but as having exalted other men not only to the holiness and virtue of his life, but by the wonderful elasticity of his mind (érronov), which retained the remembrance of what he had seen when circled in the train of the Father. They admitted that he had been educated among the Jews, but had despised them, and had therefore obtained the power to surmount his sufferings, and afterward ascended to the Father (Tren. Herr, 1, 25). The Carpocrates boasted of resembling Christ, and even allowed, hypothetically speaking, that if any one had a purer soul, or despised in a greater degree the things here below, he might exceed him. They had statues and images of Christ and his apostles, and also of Pythagoras, Plato. His destination was, according to Carpocrates, to raise up to another nation, whom they are said to have honored with superstitious rites in the temple of Epiphanes in Cephalenna. Carpocrates maintained the transmigration of the soul, which must perform all to which it was destined before it can obtain rest. In support of his doctrine he cited the words of our Lord, "Verily thou shalt not depart hence until thou hast paid the uttermost farthing." Those souls, however, which are deeply impressed with the remembrance of their former existence, are enabled to deny the influence of the spirits governing this world, and, soaring to the contemplation of the Supreme Being, finally reach a state of eternal rest. In proof of this, Carpocrates adduced the examples of Pythagoras, Plato, and Aristotle among the heathen, and Jesus among the Jews. To the latter he ascribed extraordinary strength of soul, which, animated by the remembrance of its former existence, soared to the heights of contemplation, and enabled him to obtain a knowledge of all things, which, in working miracles, he set at naught the spirits of this world, cast off the thralldom of the God of the Jews, and overthrown the religion which this god had devised. Every human soul was supposed by contemplation capable of becoming equal in every respect with Jesus Christ. The Carpocrates are stigmatized on account of the consequences which they drew from their principles. They are charged with asserting that there was nothing good or evil in itself; that the distinction between right and wrong was not real, but depended merely on human opinion—an assertion which appears inconsistent with their view of the character of Christ, and which was, perhaps, applied, not to moral duties, but to positive rites. They are also said to have taught the community of women—a doctrine which, together with their notions of a preexistent state, and of metempsychosis, may be traced to Plato, in whose writings Carpocrates and his son Epiphanes (who held the opinions that the opinions of the Logos were much amplified, and to whom extraordinary honor was paid) were familiarly versed (Clement, Strom. iii, 428). As the fruit of those last opinions, they are represented as having indulged in the grossest licentiousness, and as having given occasion to the dreadful calamities by which the early Christians were señal. The name of Carpocrates in the later literature is given by Ireneus, who is the oldest source of our knowledge of the Carpocrates. Epiphanus says the Carpocrates rejected the Old Testament. It appears not certain that they rejected any part of the New (Euseb. Eccl. Hist. iv, 7; Epiphan. Herr. xxvii).—Jerome, Church Hist. 154; Neander, Ch. Hist. i, 448-441; Lardner, Works, viii, 391-403; Dorner, Person of Christ, div. i, vol. i, p. 186; Hase, Church History, § 78; especially Mosheim, Commentaries, etc., cent. ii, § 50.

Carpus (Κάρπος, perhaps for ὀσπίς, fru't; on the accentuation, see Winer's Grammar, 6th ed. p. 49), a Christian at Troas, with whom the apostle Paul states that he left a cloak (2 Tim. iv, 13); on which of his journeys it is uncertain, but probably in passing through Asia Minor after his first missionary sojourn, according to the last time before his martyrdom at Rome, A.D. 64. According to Hippolytus, Carpus was bishop of Berytus, in Thrace, called Berrhosa in the Synopsis of Vital et Morti Prophetae, which passes under the name of Dorotheus of Tyre.

Carpov, the surname of a family which was one of the most distinguished of the 17th century for theological learning. The first eminent man of the name was Benedikt Carpov, professor of law at Witten-
berg, who died in 1624; and the latest, Johann Benedikt (the fourth), died as professor at Helmstädt in 1808. The most important are:

CARPZOV, JOHANN BENEDIKT, born at Roahlitz, June 22, 1607, who became archdeacon of St. Thomas' cathedral, and in 1648, professor extraordinarius, and in 1646 professor ordinarius of theology at Leipzig. He died Oct. 22, 1657. He was noted for piety as well as for learning. His chief writings are, De Ministriis Passionis (Leipzig, 1640, 4to); — Hodiernicum (1656; enlarged by his son, J. B., 1689, 4to); — iageo in libris Eec. Latinis Synodaliis, held in his lifetime after his death (asbourg, 1665; 1675, 4to). In view of this book, Gass calls Carpzov the "first really distinguished laborer in Symbolica" (Geschichte d. Prot. Dogmatik, i, 172).

In 1702 he became almoner to the Saxo-ambassador, and in this capacity he had the opportunity of travel in Holland and England, which he used to advantage for his culture in the Oriental languages. He was engaged in pastoral work at Dresden from 1704 to 1708, in which year he was called to St. Thomas' church in Leipzig. His chief work was a wide range on the subject of the development of Hebrew literature and philosophy. In 1719 he was made professor of Oriental literature at Leipzig, where he died in 1739, where he became general superintendent at Löbeck, where he died April 7, 1767. His writings form an epoch in the history of Biblical criticism. He was a bitter opponent of the Moravians and Pietists, and wrote a historic-political treatise against the Moravians (mentioned below). His most important works are: Disput. de vet. phis. sensit. circa naturam Dei (Lips, 1652, 4to); — Disp. de pluralitate personarum in una Dei essentia (Lips, 1720, 4to); — Introductio ad Biblias Concord. Vet. Test. (Lips, 1741, 2d ed. 4to); — Crítica Sacra Veteris Test. pt. i. Text. Original: pt. ii. Versiones; pt. iii. Circa pseudo criticos G. W. d'Alton s. s. (Lips, 1729, 4to); — Religions-Ueberreichung der Bästzischen u. Mährischen Brüder (Lips, 1742, 8vo); — Apparatus Hist.-Crit. Antiquitatum et codicis sacri et gentis Hebraei (Leipzig, 1748, 4to). — Erich u. Grauber, Allgen. Encyclopädie, s. v. Hoeft, Nouv. Bibl. Générale, viii, 842.

CARPZOV, JOHANN BENEDIKT, born in Leipzig, 1720, became professor of philosophy at Leipzig in 1747; professor of Greek at Helmstädt, 1748. He published Liber clavis theologiarum (1785); — Sacra Exercit. in Epist. ad Heb. (1750); — Structurae in Epist. ad Rom. (1756); — Septuagesimae Epist. Curs. (1770). His repute as a philologist was very great. He died April 28, 1803.

Carr (in some editions "cart") is an Anglicized form of the term χαρτόν (v. καρτόν), occurring only in 1 Esr. v. 55, as the name of something given to the Phoenicians for furnishing cedar to rebuild the Temple. Breitnacher (Spicileg. p. 270) thinks we should read χαρτόν, i. e. money; perhaps, however, the word is simply a corruption for κοίνον, coin (see Fritzsche, Handb. in loc.).

Carranza, Bartolomé de, an eminent Spanish theologian and prelate, was born at Miranda. Navarras, in 1553, of noble parents. Having studied theology at Alcala, he entered the order of the Dominicans in 1570. He was professor of theology at Valladolid in 1548. In 1614 Charles V sent him to the Council of Trent, where he vindicated the rights of bishops. jure divino against the papal pretensions. Philip of Spain took him (1554) to England, where queen Mary appointed him her confessor, and charged him with the re-establishment of the Roman Church. This office he discharged, and by his eloquence opposed, of a Spanish Inquisitor than a minister of Jesus Christ, and was rewarded with the archbishopric of Toledo in 1558.

On entering his diocese he put forth a catechism, which his enemies made a subject of attack. It was censured by the Inquisition, but sanctioned by the commission of the Council of Trent. A more heavy charge awaited him. A report was spread abroad that Charles V had not died in the "faith of the Church," and that this was owing to the archbishop of Toledo, who had instilled into his mind "heretical opinions." Carranza was seized by the Inquisition and imprisoned in 1559. After eight years' duration in Spain he was transferred to Rome, where Pius V kept him ten years longer immersed in the castle of St. Angelo. In 1576 he was finally acquitted, but was suspended from his episcopal functions for five years, and was compelled to reside in the Dominican cloister of Della Minerva at Rome. He lived only seventeen days afterwards, dying May 5, 1576. He wrote, (1) Commentaria sobre el Catecismo Christiano (Antwerp, 1558, fol.) — (2) Summa Conciliorum (Venice, 1546, 8vo) — (3) De sucesoriae sacri Episc. et alior. pontificum (Venice, 1547); and several practical treatises. — Bisag. Univ. vii, 199; Burnet, Hist. of Engl. Reformation, iii, 381; Bayle, Dictionary, s. v.; Eckard, Script. ordin. Presb. et Concil. ii, 173; Gass, Nouv. Bibl. Générale, viii, 884; Dupin, Eccl. Writings, cent. xvi.

Carriage. Vehicles answering to this term in modern usage were not known to the ancients. See CART. In the English Bible this word stands, therefore, as the incongruous rendering of several totally different terms. In 1 Sam. xvii, 20, the Hebrew word יִבְּשַׁלְמָה, magasalah, rendered "trench" in our version, and "place of the carriage" in the margin, probably signifies a wagon-trench, a half-built form of the wagons and other vehicles of the army (1 Sam. xxvi, 6, 7). In Judg. xxviii, 21, the original is יֶבֶשׁ, yeshem, and means wealth, i. e. booty. In Isa. xvi, 1, "carriage" stands for יָבֹא, yaba, a load for a beast of burden. In 1 Sam. xvii, 22, the word הֹלֵךְ, holach, "carriage," properly means implements, equipaments; and in Isa. x, 28, implements of war. In Acts xxix, 15, the phrase, "we took up our carriages" (ἀναλάτησαν), should be, "we packed up our baggage." See WAGON.

Carrières, Louis de, born at Claville, near Angers, in 1582, was first a soldier, but in 1689 entered the congregation of the Oratory, and died at Paris, June 11, 1717. He is chiefly known by his Commentaire littéral, or "Literal Commentary" on the whole Bible, which is so managed that his comments are introduced into the text (translated) in italic characters. They are for the most part in the words of holy Scripture itself, which is thus made to be its own interpreter. This work, which was carried through at the request of Bossuet, was completed in twenty-four 12mo volumes (1701 to 1716). It has since gone through many editions, and is much used. It is the only French version authorized in Italy. — Biographie Universelle, vi, 219.

Carroll, Daniel Lynn, D.D., a Presbyterian minister, was born in Fayette county, Pa., May 10, 1797, and graduated at Jefferson College, 1828. Having completed his theological course at Princeton, he was licensed in 1826, and supplied the churches of Shrewsbury and Mendipoint Town. Thence, after a brief sojourn at Princeton and Newburyport, he removed to Litchfield, Conn, where he was installed in 1827. In 1831 he emigrated to the First Presbyterian Church, Brooklyn, in 1829, but his health soon obliged him to resign, and in 1833 he was appointed to the presidency of Hampden Sidney College, Va., which he held for three years. On retiring he took charge of the First Presbyterian Church in the Northern Liberties of Philadelphi, and lastly was president of an Indian College for the Colonization Society of the state of New York till 1845, when he was obliged to give up all active service,
He died Nov. 28, 1831. He published Sermons (1846-7, 2 vols. 12mo), besides detached sermons and addresses.—Sprague, _Annales_, iv, 697.

Carroll, John, D.D., first Roman Catholic archbishop in the United States, was born at Upper Marlborough, Maryland, in 1735. He was educated at St. Omer's, France, and at the colleges of Liège and Drugeon, in Belgium. In 1763 he was ordained priest, and became a Jesuit. When the order was dissolved in France he went to England, and became tutor to a son of Lord Stuart, with whom he travelled on the Continent. On the breaking out of the Revolutionary War he returned to America, and took an active part on the side of the patriots. After the close of the war the Roman Catholic clergy in the United States requested from the pope the establishment of a hierarchy, and Mr. Carroll was appointed vicar-general. He fixed his residence at Baltimore. In 1789 he was named bishop, and in the ensuing year was consecrated. In 1791 he assumed the title of bishop of Baltimore. A few years before his death he was made archbishop. He died Dec. 3, 1815.

Carhesh (Heb. Karkesha, נַרְכֶּשָׁ, probably of Persian derivation; comp. mod. Pers. Karken, "spoil-er," or Zend Kerkema, Sanscr. Kreshna, "black;" Sept. has but three names, of which the first is 'Aparecasios; Vulg. Charsesmo,') is an alkali unalloyed with itself at the court of Xerxes (Ahasuerus). When the king meant to push himself at the royal banquet (Esth. i, 14). B.C. 483.

Carson, Alexander, LL.D., a Baptist minister, was born in Scotland about 1776, but early removed to Ireland. He began his public life at Tubbermore as a minister in connection with the Presbyterian Synod of Ulster, but having changed his opinions as to Church government, and adopted the views of the Independents, he emigrated to America in 1803. Embracing independent Baptist views, he formed a society at Tubbermore, of which he remained pastor to the time of his death. He wrote, in 1803, his _Reasons for separating from the Synod of Ulster_; and afterward produced numerous books and pamphlets—on baptism and other subjects of controversy—which are highly esteemed by the Baptists. Though a strenuous advocate of immersion, he was not a "close" communionist. After many years of incessant activity, pastoral and literary, he died at Belfast, Aug. 24, 1844, from the effects of a fall into the Mersey at Liverpool a few days before. Dr. Carson was an earnest and often bitter controversialist. His vehemence and arrogance dispersed easily from the effect of his arguments. He is often right, often wrong; but, whether right or wrong, he is equally self-confident. Besides a number of pamphlets, reviews, etc., he published The God of Providence the God of the Bible (18mo);—_The Knowledge of Jesus (18mo);—The Unio Mystica (8vo);—Examination of the Principles of Biblical Interpretation of Ernesti, Stuart, Ammon, etc. — _A Treatise on Figures of Speech, and a Treatise on the Right and Duty of all men to read the Scriptures (N. Y. 1853, 12mo);— _Baptism, in its Mode and Subj. etc, with a Sketch of the Life of D. Carson (Philadelphia, 1857, 5th ed. 8vo);_—Jameson, _Cyclopaedia of Biography; Reid, History of the Presbyterian Church in Ireland_, iii, 449.

Carstares, William, a Scotch divine and politician, was born in 1649, at Cuthcart, near Glasgow, and completed his studies at the Universities of London and Utrecht. While in Holland he was introduced to the prince of Orange, who honored him with his confidence. After his return to England he became connected with the party which strove to exclude James from the throne, and, on suspicion of being one of the Rye-house conspirators, he was sent to Scotland, and put to the torture of the thumbscrew, which he bore with unshrinking firmness. On his liberation he went back to Holland, and became one of the prince of Orange's chaplains. He accompanied William to England in 1688, and was appointed king's chaplain for Scotland. He was subsequently of great service in producing a reconciliation between the Scotch Presbyterians and William III. A General Assembly being about to convene, at which it was understood that there would be opposition to the oath of allegiance, the king had delivered to a messenger dispatches directing the peremptory enforcement of the act. It is said that Carstares assumed authority to stop the messenger; and, presenting himself to the king (who had gone to bed) in the middle of the night, in the guise of a petitioner for his life, forfeited by his having thus committed high treason, to have prevailed on him to dispense with the oath. Whether the anecdotc be true or not, there is little doubt that his influence obtained the dispensation. He became now virtually prime minister for Scotland, and received the popular designation of "Cardinal Carstares." Event after the death of William, his knowledge of Scotch affairs, and the respect paid to his talents, left him with considerable influence. In 1704 he was chosen principal of the University of Edinburgh. He died Dec. 28, 1715. See _State Papers and Letters, to which is prefixed the Life of Mr. Carstares. (4to, 1714);_ _Engl. Cyclingopaedia; Hetherington, Church of Scotland, ii, 216._

_Cart_ (םַרְכָּל, _aqołāh_), from פַּרְשָׁל, to roll; Sept. _qošāca_ [so in Judith xv, 11], Vulg. planusm; also rendered "wagon." (Gen. xlv, 33, 21, 27; xlvii, 1; Num. vii, 3, 6, 7, 8; and "chariot" in Psa. xlvi, 9 [comp. _Carr-wheel_], a vehicle moving on wheels, and usually drawn by cattle (2 Sam. vi, 6), to be distinguished from the chariot drawn by horses. See _Chariot_.

1. The carts which the king of Egypt sent to assist in transporting Jacob's family from Canaan (Gen. xlv, 19, 27) were manifestly not used in the latter country, but were peculiar to Egypt. These carts or wagons were, of course, not war-chariots, nor such curricles as were in use among the Egyptian nobility. The ready means of transport and travel by the Nile seems to have rendered in a great measure unnecessary any other wheel-carriages than those for war or pleasure. The sculptures, however, exhibit some carts as used by a nomade people (enemies of the Egyptians) in their migrations (comp. Figs. 1 and 2, below).

An ancient Ethiopian Prince travelling in a Car drawn by Ozen, with a sort of Umbrella, a Driver, and a Footman.

2. Elsewhere (Num. vii, 8, 6; 1 Sam. vi, 7) we read of carts used for the removal of the sacred ark and utensils. These also were drawn by two oxen. In Rossellini we have found a very curious representation of the vehicle used for such purposes by the Egyptians (Fig. 8). It is little more than a platform
CART

on wheels; and the apprehension which induced Uz-zah to put forth his hand to stay the cart when shaken by the oxen (2 Sam. vi, 6) may suggest that the cart employed on that occasion was not unlike this, as it would be easy for a jerk to displace whatever might be upon it. See Ark.

Ancient Egyptian Carts: 1, 2, for ordinary purposes; 3, for conveying a Shrine containing a Mummy.

3. In Isa. xxviii, 27, 28, a threshing-dray or sledge is to be understood. See Agriculture.

As it appears that the Israelites used carts, they doubtless employed them sometimes in the removal of agricultural produce. The load or bundles appear to have been bound fast by a large rope; hence "a cart-rope" is made in Isa. v, 18, a symbol of the strong attachment to sinful pleasures and practices induced by long and frequent habit. Carts and wagons were either open or covered (Num. vii, 9), and were used for conveying of persons (Gen. xlv, 19), burdens (1 Sam. vi, 7, 8), or produce (Amos ii, 13). As there are no roads in Syria and Palestine and the neighboring countries, wheel-carryages for any purpose except conveyance of agricultural produce are all but unknown; and though modern usage has introduced European carryages drawn by horses into Egypt, they were unknown there also in times comparatively recent (Stanley, Sinai and Pal. p. 125; Porter, Damascus, i, 329; Lynch, Narrative, p. 75, 81; Niebuhr, Voy. ii, 123; Layard, Nineveh, ii, 73; Mrs. Poole, Englishwomen in Egypt, 2d series, p. 71). The only cart used in Western Asia has two wheels of solid wood (Olearius, Travels, p. 419; drawn by oxen, conveying female captives; and others represent carts captured from enemies with captives, and also some used in carrying timber and other articles (Layard, Nineveh, ii, 896; Nim. and Bab. p. 134, 447, 583; Mon. of Babylon, pt. ii, pls. 12, 17). Four-wheeled carryages are said by Pliny (Nat. Hist. vii, 56) to have been invented by the Phrygians (Wilkinson, Anc. Egyptians. Attribution, i, 384, 385; ii, 39, 47). The carts used in India for conveying goods, called sugger or hackkeri, have two wheels, in the former case of solid wood, in the latter with spokes. They are drawn by oxen harnessed to a pole (Capper, Ind. and, p. 446, 552). See Wagon.

Modern Indian Cart.

Carter, Asbert, a minister of the Protestant Episcopal Church, was born at Concord, N. H., May 2, 1751. He graduated A.B. at Dartmouth College in 1813, and soon after began the study of law at New York; but, turning his attention to religion, he left the Congregational Church, in which he had been educated, and became a student of theology under bishop Hurlbut, by whom he was ordained deacon in 1815. He at once became assistant to Dr. Lyell at Christ Church, New York. He was ordained priest in 1816, and became rector of Trinity Church, Pittsburg, Pa., whence he removed in 1818 to St. Michael's Church, Trenton, N. J. In 1822 he became rector of Christ Church, Savannah, Georgia. In 1827 the yellow fever raged in Savannah, and although it had been stipulated in his call that he should spend the summer of each year in the North, he refused to leave his people. His wife soon fell a victim to the pestilence, which also carried him away, Nov. 1, 1827. He published a number of occasional sermons. — Sprague, Annals, v, 564.

Carthage, a famous ancient city on the coast of Africa, founded by Tyrian colonists, and long the rival
of Rome, by which it was taken and destroyed, B.C. 146. It was again rebuilt, however, and continued to flourish till the Vandal invasion (see a full account in Smith's Dict. of Class. Geogr. s. v.). Its site has lately been explored (Davis, Ruins of Carthage, Lond. 1861).

In Christian and ecclesiastical times Carthage was the metropolis of the proconsular province of Africa, and the seat of a bishop, having metropolitan authority over all the provinces of the African Church. All the African churches were dependent on the see of Rome, probably because their greater intercourse with Rome had made Latin the language of the country, and it was therefore more natural that they should be connected with the Latin than the Greek Church. Until the time of Constantine, the bishop of Carthage was the only prelate in the African Church having metropolitan jurisdiction; but under Constantine Africa was divided into six provinces, and each province began to have its own metropolitan, taking, however, the title of primates, and not that of metropolitan, which was still peculiar to the bishop of Carthage. This prelate, from the first, had authority to select whom he pleased from any church in Africa to consecrate to a vacant see (third Council of Carthage); for the bishop of Carthage had also the privilege of nominating all the vacant sees of Africa. It was farther a privilege enjoyed by the primates of Carthage to convocate general and diocesan synods, to reside in them, and to judge thereof of appeals brought thither from the provincial councils. That the African Church acknowledged no episcopal authority in the Roman see is evident from the well-known case of the priest Apianus, where the African bishops denied the authority of the pope to receive appeals from the decisions of their synods, and his right to send a legate to take any sort of cognizance of their proceedings. In 691 the Saracens got possession of the city of Carthage, and of all this part of Africa, from which the bishop began to fall away; and though it was still in existence, under Leo IX., in the eleventh century, it soon after became entirely extinct.

**CARTHAGE, COUNCILS OF.** Among the most important are the following:

I. In 218-22 (f), under Agrippinus, on the baptism of heretics.

II. In 251, on the election of Cornelius as bishop of Rome, and the disputes of Novatian and Felicius.

III. In 302, on early baptism.

IV. In 325, on the baptism of infants and heretics. Cyprian and 66 bishops said to have been present. On the question whether baptism should be administered to infants before the eighth day, in view of the rite of circumcision, the council decided unanimously that God had no respect either to persons or ages; that circumcision was but the figure of the mystery of Jesus Christ, and that no one may be shut out from the grace of God. Cyprian, who wrote this decision to Fidus in his own name and in that of his colleagues, gives the reason for it in these words: "If the greatest sinners coming to the faith receive remission of sin and baptism, how much less can we reject a little infant just born into the world, free from actual sin, and only so far a sinner as being born of Adam after the flesh, and by its first birth having contracted the pollution of the former death; it ought to have so much the easier access to the remission of sins, inasmuch as not its own sins, but those of others, are remitted." These words are quoted by Jerome in his dialogue, De Origen. Cyprian was condemned in his 294th sermon, in order to prove that belief in original sin has always been the faith of the Church. — Cyprian, Epist. 55, Labbe et Cossart, Concilii, t. i, p. 740; London, Manual of Councils, 101.

V. Held in 324 (f), when the Spanish bishops Marcial, Martin, and others were condemned as Libellolists.

VI. Held in 255 and 256, under Cyprian, on the necessity of rebaptizing heretics—attended by 71 bishops.

They decided that there can be no valid baptism out of the Catholic Church, and addressed a synodical letter to Stephen of Rome upon the subject, informing him of their decision upon this and other matters. Stephen refused to admit the decision, and separated himself from the communion of Cyprian and the other bishops who acted with him in the council. The conflict lasted until the pontificate of Sixtus, when the African bishops gave up their theory of the invalidity of heretical baptism. — Labbe et Cossart, Concilii, t. i, p. 798; London, Manual of Councils, p. 109.

VII. Held in 380, in favor of those who were steadfast in the persecution.

VIII. Held in 397 and 398, on discipline and the baptism of children.

IX. Two in 401, in which numerous canons were made on receiving converted children of Donatists among the clergy.

X. Two in 408, on pagans, heretics, and Donatists.

XI. Commencing June 1, 411, in which conferences were held with the Donatists, with a view to their reunion with the Church. Augustine was present, and argued the case from the side of the Church. At the close of the conference, Marcellinus, who represented the emperor Honorius in the council, gave sentence to the effect that the Donatists had been entirely refuted by the Catholics; and that, accordingly, those of the Donatists who should refuse to unite themselves to the Church should be punished as the laws directed. From this sentence the Donatists appealed to the emperor, but in vain. Honorius confirmed the acts of the Conference of Carthage by a law, bearing date Aug. 30, 414. This conference and the severe measures which followed it gave the death-blow to Donatism. — Labbe et Cossart, Concilii, t. iii, p. 107; Neander, Church History, ii, 208 sq.; London, Manual of Councils, p. 111.

XII. Held in 411 or 412, against Celestius, disciple of Pelagius. Celestius was accused by Paulinus, among other things, of teaching that the sin of Adam only injured himself, and that its effects have not descended to his posterity, and that every child is born into the world in the same condition in which Adam was before the Fall. Celestius did not deny the accusation; for, although he agreed that children must of necessity receive redemption by baptism, yet he refused to acknowledge that the sin of Adam had passed upon them; nor would he confess unequivocally that they receive therein remission of any sin; accordingly he was condemned and excommunicated. — Labbe
CARThUSIANS 134 CARTrIGHT

XIII. Held in 416, against Pelagius and Celestius. The doctrines of Pelagius were condemned by this council in a decree which was approved by Innocent I himself. The council was held in 416, against Pelagius and Celestius. A decree against Pelagianism was adopted, and finally received the general approval of the Church. Preparatory to the adoption of this decree, in which the council declares that the grace of God given to us through Jesus Christ not only assists us to know what is right, but also to practise it in each particular action, so that without it we can neither have, nor think, nor say, nor do anything which appertains to holiness and true piety. The council agreed upon a letter to Zosimus, bishop of Rome, demanding that the sentence of condemnation passed by Innocent I against Pelagius and Celestius should be enforced until they should abjure their errors. — Manisi, Concil. iii, 810; iv, 577; Landau, Manual of Councils, p. 112; Schaff, CH. Hist. iii, 799.

Carthusians, an order of monks in the Roman Catholic Church, founded by St. Bruno (q. v.) A.D. 1086. A legend of much later origin tells the following story: At the funeral of a friend of Bruno's, in 1082, the dead man raised himself up, saying, "By the just judgment of God I am accused!" This was repeated several times. The following day Bruno had such an effect on Bruno and six more that they immediately retired to the desert of the Chartreuse, and thus the first monastery. This absurd legend found its way into the Roman breviary, but was struck out by order of Pope Urban VIII. After Bruno had governed the first establishment for about six years, Pope Urban II, his former pupil, called him to Rome, and retained him there, although Bruno begged for permission to return to his brethren. The order increased slowly. In 1137 they counted four, in 1151 fourteen, and in 1258 fifty-six houses. In 1170 the order was recognised by the pope. Martin V exempted all the property of the order from tithes. Julius II provided, in 1508, by a bull, that the prior of the Grande Chartreuse, near Grenoble, should always be general of the whole order, and that a general chapter should meet annually. At the beginning of the 18th century the number of houses was 170, of which 78 belonged to France. Many houses perished in the French Revolution, but the re-establishment of the order was re-established in 1816. Their principal establishment, the Grande Chartreuse, was reoccupied in 1816. In England the Carthusians settled in 1180, and had a famous monastery in London, since called, from the Carthusians who settled there, the "Charter-house." The order has given to the Church several saints, three cardinals, and more than seventy archbishops and bishops.

Until 1130 the order had no written statutes. Then the fifth prior of the Chartreuse, Guijo, compiled the Consuetudines Cartusiae. Bernard de la Tour collected, in 1258, the resolutions of all general chapters which had been held since 1141. This collection was confirmed by the General Chapter of 1259, and bears the title Statuta cartusiæ. Another collection, Statuta nova, was added in 1387. A third collection, Tertia complémentum statutorum, dates from the year 1509; a fourth, Nova collectio statutorum ordinis Cartusiænsis, from the year 1691. The characteristic of the statutes of this order is that they fix the Church of England with great accuracy and learning. It was his conviction that the reformation of the Church had not gone far enough; and he advocated his views with a clearness and boldness which none could mistake. The following statement of the doctrines for which he was expelled from the University is given by Hook, in vindication of the severity with which Carthew was treated. It will be seen that, with a
few exceptions, they are views in which most moderate men in the Church of England would now espouse, with other Catholics; that notion ordained that, in reforming the Church, it was necessary to reduce all things to the apostolical institution; that no one ought to be admitted into the Christian ministry who was unable to preach; that those only who ministered the word ought to pray publicly in the Church, or administer the sacraments; that proper orders were not valid; that only canonical Scripture ought to be read publicly in the Church; that the public liturgy ought to be so framed that there might be no private praying or reading in the Church, but that all the people should attend to the prayers of the minister; that the service of the Church ought to be more to the ministerial office than to the rest of the Church; that equal reverence was due to all canonical Scripture, and to all the names of God: there was, therefore, no reason why the people should stand at the reading of the Gospel, or bow at the name of Jesus; that it was as lawful to sit at the Lord's table as to kneel or stand; that the Lord's Supper ought not to be administered in private, nor baptism administered by women or laymen: that the sign of the cross in baptism was superstitious; that it was reasonable and proper that the parent should offer his own child to baptism, making confession of that faith in which he intended to educate it, which was an obligation to the child's name, 'I will,' 'I will not,' 'I believe,' etc., nor ought women or persons under age to be sponsors; that, in giving names to children, it was convenient to avoid pagan names, as well as the names and offices of Christ and angels; that it was papistical to forbid marriages at any particular time of the year, and to grant licenses at those times was intolerable; that private marriages, or such as were not published in the congregation, were highly inconvenient, etc.

Archbishop Grindal and Dr. Whitgift zealously opposed Cartwright, and in 1571 he was deprived of his professorship and fellowship. He retired from England to the Continent, became chaplain at Antwerp, and afterward at Middleburg. At the end of about two years he returned to England, and published a Second Admonition to the Parliament, with a petition for relief from the subscription required by the ecclesiastical commissioners. He had a controversy of pamphlets with Whitgift, and was twice imprisoned by that prelate, and was twice imprisoned. In 1583 he obtained from the earl of Leicester the mastership of the new hospital at Warwick. In 1592 he was liberated from his second imprisonment, and returned to the mastership of the hospital at Warwick, where he died Dec. 23, 1593, (or 16 December, according to Isaac Walton.) Cartwright was a man of great parts. Beza wrote of him: "I think the sun does not see a more learned man." Froude, in his History of England (1866, vol. iv), gives an elaborate panegyric of Cartwright. Among his writings are, Commentaria Pravitatis de tota Ecclesie Anglicana (1630, 4to); and by L. Elsevier, at Amsterdam, 1647; Eng. trans., 1850).—Commentaria in Proverbia Solanomia (Amsterdarn, 1638, 4to).—Metaphysica et Historiae Librum Ecclesiasticum (ibid, 1647, etc.).—A Body of Divinity (London, 1616, 4to).—Directory for Church Government (1644, 4to).—Confutation of the Rhenish Testament (1618, fol.). His exegetical writings are still of value. Dr. Alexander (In Kitto's Cyclopaedia, s. v.) says that Hengstenberg, in his work on Ecclesiastics, borrows largely from Cartwright's Metaphysica. See Strype, Life of Whitgift; Hook, Ecl. Biogrophy, iii. 479; Neal, History of the Puritans, i, 172, ii. 48, et alii; i. 404; Wallis, Ecl. Biogrophy, ii. 396.

Cartwright, Thomas, D.D., bishop of diocesan, was born at Northampton Sept. 1, 1684. He studied at Magdalen Hall and Queen's College, Oxford, and, after taking orders, became chaplain of Queen's, and vicar of Walthamstow. In 1695 he was preacher of St. Mary Magdalen, Fish Street. After the Restoration he was made dean of St. Paul's. He was the Duke of Gloucester's prebendary of Twyford, in the church of St. Paul; of Chalford, in the church of Wells; a chaplain in ordinary to the king; and rector of St. Thomas the Apostle, London. In 1672 he was made prebendary of Durham, and in 1677 dean of Ripon. His loyalty was, in 1688, rewarded with the bishopric of Chester. At the Revolution he fled to France, and performed divine service at St. Germain, according to the English ritual, for such as resorted to him. On the death of Dr. Seth Ward, king James nominated him to the see of Salisbury. In the spring of 1688 he went to Ireland, and finally died there, April 15, 1699. He wrote a number of tracts. He was a member of the Chevalier Society in 1843.—Hook, Ecl. Biogrophy, iii. p. 480 sq.

Carvajal. I. Giovannii, born in the year 1400, of an illustrious family of Andalusia, became bishop of Placentia, and governor of Rome. He was present at the Council of Braga, where he so warmly defended the interest of the papacy that Eugene IV created him cardinal in 1445. The succeeding popes sent him as their legate to Bohemia, Hungary, and Spain. He died at Rome in 1465.

II. Bernardino, nephew of the preceding, was born at Placentia in 1466. In 1483 he became cardinal and papal nuncio in Spain. He was put under an ban by Pope Julius II for having, in 1511, assembled the Council of Pisa, before which he appeared on an account of his conduct toward the emperor Maximilian and king Louis XII of France. Leo X., however, restored him his dignities in 1518, and he was employed on important missions by the succeeding popes. He died bishop of Ostia in 1523.—Pierer, Universal-Lexicon, s. v.

Carve, in some of its forms, is the rendering in the A. U. V. A. and General H. E. words from the following roots: 1. Prop. כְּמַה, to "carve" wood (1 Kings vii, 29, 35); hence כְּמַת, miklat, thistle, sculpture in relief (1 Kings vi, 18, 29, 32); "graving," vi, 31); 2. כָּמָש, karash, to engrave; whence כָּמָש, chareish, cutting, cutting of wood or stone (Exod. xxxii, 5; xxxv, 38). 3. כָּמָש, kam, to carve; whence כָּמָשׁ, mechach, carved (1 Kings vi, 85). 4. כָּמָשׁ, pathach, to open; in Piel, to sculpture ("graving") wood (1 Kings vii, 86; 2 Chron. iii, 7, 8; Exod. xxvii, 9, 86; 2 Chron. ii, 7, 14), etc. (Exod. xxviii, 11, xxxix, 6; Zech. iii, 9); whence כָּמָשׁ, pitta, to cut, to separate (Exod. xxxviii, 11, 21, 38; Psa. lxix, 6; 1 Kings vi, 29; elsewhere "graving," etc.). 5. כָּמָשׁ, chalah, to cut into figures; whence כָּמָשׁ, 'arabah, walled in (Prov. vii, 16). 6. Especially, כָּמָשׁ, pasach, to carve, to hew or shape; whence כָּמָשׁ, pe'el, a "carved" or "graven" image (Exod. xx, 4, and often). 7. The Greek word "carve" in the Apocrypha is χαλάζω (Wis. xiii, 18; 1 Macc. v, 66). See EKOVRA.

The Egyptians were extremely fond of carving on articles of furniture, and also in the decoration of walls and ceilings; and, indeed, there was scarcely a corner in an Egyptian palace destitute of carved ornaments. See HANDICRAFT. The ebony and ivory required for these costly works were obtained, either as a tribute or by traffic from the independent nations. We frequently find both elephants' tusks and logs of ebony represented on the monuments as brought to the Egyptian monarchs; and we learn that Solomon did not erect his splendid ivory throne until he had opened a communication with the nations bordering on the Red Sea, through his alliance with the king of Tyre. The arts of carving and gilding were such a request in the construction both of the Tabernacle and the Temple (Exod. xxxi, 2, 5, xxxv, 35; 1 Kings vi, 18, 35; Psa. lxix, 4), as well as in the ornamentation of the priestly dresses (Exod. xxviii, 9, 30; Zech. iii, 9;
CARVOSSO 136

2 Chron. ii, 6, 14). In Solomon's time, Huram the Phoenician had the chief care of this, as of the larger architectural works. That the art of carving, however, was cultivated by the Hebrews themselves to a considerable extent, is evident, not only from the chariots, which were set first in the Tabernacle, and afterwards in Solomon's Temple, but also from the lions which were placed on each side of his throne (1 Kings x, 29). The carving of timber is mentioned in Exod. xxxi, 8, and the prophet Isaiah gives us a minute description of the process of it (xlix, 18). The origin and progress of the art of carving, as connected with Biblical inquiries, have been investigated and illustrated with much ingenuity by Mr. Landseer, in his Soloman's Researches. See Graven Image.

Carvoso, Benjamin, a Methodist missionary, son of William Carvoso, was born in Cornwall, Eng., Sept. 27, 1789. The eminent piety of his parents saved his youth from vice, and in 1811 he was converted. In 1814 he entered the itinerant ministry, and in 1820 was appointed missionary to New South Wales. There and in Van Diemen's Land, where he introduced Methodism, his labors were abundant and useful. In 1839 he returned to England, and re-entered the mission field. He died Dec. 1854. He commenced the first religious magazine in Australia, and wrote also Memoir of William Carvoso (q. v., New York, 1837, 12mo), which has been sold by thousands. — Wesleyan Minutes (Lond. 1856), p. 12.

Carvoso, William, a lay Methodist, one of the "saints" of modern times. He was born in Cornwall, England, March 11, 1795, and bred on a farm. In his youth he fell into the prevailing licentiousness of the time, such as cock-fighting and Sabbath-breaking; but in 1771 he was converted, after a severe mental struggle. In 1774 he became a class-leader in the Wesleyan Church, and held that useful office for sixty years. His whole life was a wonderful illustration of the power of Christian faith, and his visits, prayers, and exhortations were the means of hundreds of conversions. He died Oct. 13, 1834. See Memoir of William Carvoso, edited by his son (N. Y. 18mo, a book which has had a vast circulation), and Stevens, History of Methodism, iii, 218, 279, 455.

Cary, Lor., a colored Baptist minister, was born a slave about 1780, in Charles City county, Va. He joined the Baptist Church in 1807 at Richmond, and, having learned to read and write, he held meetin's with the colored people so successfully that the Church licensed him to preach. By rigid economy he was enabled to purchase his own freedom and that of his two children in 1813; and in 1814, having become deeply interested in the missions to Africa, he succeeded in establishing the "Richmond African Missionary Society." Having been ordained, he sailed for Sierra Leone Jan. 23, 1821, in company with Colin Teague, another colored preacher. He established a school at Monrovia and a hospital at Grand Cape Mount. Having studied the diseases of the country, he was in 1824 appointed physician to the colony. In September, 1826, he was appointed to the office of vice-agent, and on Mr. Ashmun's return to America in 1828 he became acting governor of Liberia. An accidental explosion, Nov. 8, 1828, while he was engaged in manufacturing carriages wherewith to defend the colony against the attacks of some slave-dealers, caused his death on the 10th of the same month. — Sprague, Anmala, vi, 578.

Caryl, Joseph, a nonconformist divine of good abilities, learning, and industry, was born in London in 1602. He was for some time a companion at Exeter College, Oxford, and preached several years with great success before the Hon. Society of Lincoln's Inn. Appointed one of the triers in 1635, he was ejected in 1632, and afterward, when a congregation was established in the neighborhood of St. Magnus, London Bridge. He died Feb. 7, 1675. His principal work, showing great learning, if not judgment, is his exposition, with Practical Observations on the Book of Job (Lond. 1648-68, 12 vols. 4to; 2d edit. 2 vols. fol. 1670-71), abridged by Berrie (Edinb. 1636, 8vo).—Bancroft, Cyclop. Bibliotheca, i, 550; Neal, History of the Puritans, v, 17; v, 351; Calamy, Nonconformist's Memorial, i, 221.

Casas, Bartolome de Las, bishop of Chiapa, Mexico, was born of a noble family at Seville in 1474. His father Antonio, who went to Hispaniola with Columbus in 1493, and returned rich to Seville in 1498, made him a present of an Indian slave while he was pursuing his studies at Salamanca. At nineteen he accompanied his father to St. Domingo, and returned to Spain, entered the Dominican order, and fitted himself for a missionary. In 1535 he fixed his residence at St. Domingo, and employed himself in preaching Christianity to the Indians. Afflicted by the cruelties which the Indians endured from their conquerors, Las Casas made another voyage to Spain in order to interest Charles V in their behalf, and so far succeeded as to procure orders for the observance of the governors in the west, restricting the exercise of their powers. Upon his arrival in America he traveled through Mexico, New Spain, and even into Peru, notifying everywhere the imperial commands. In 1569 he again crossed the ocean to solicit aid of the emperor in behalf of the Indians. After infinite disappointments, the emperor granted all that he had asked for, and conferred upon him the bishopric of Chiapa. In 1544 he was consecrated at Seville, and returned with a band of missionaries to America, where he labored with incessant toil and unyielding kindness to the last, and at length retired to Spain, where he continued his endeavors in their behalf until his death, about 1566. One of his chief opponents was Sepulveda, a canon of Salamanca, who published an infamous work justifying the cruelties exercised upon the Indians, and even their murder. Las Casas replied by a writing entitled Breve relaciön de la destrucciön de las Indias (Seville, 1552, 4to). Charles V forbade its publication, but it was printed, and Sepulveda persisted, nevertheless, in his devilish doctrine, endeavoring in all ways to propagate the notion that, by the laws of the Church, it was a duty for the faithful to refuse to embrace the Christian faith." Charles V appointed his confessor, thecelebrated D. miniclo Soto, to examine the subject. Soto made his report to the council of Spain, but no judgment was ever pronounced, and the horrible massacres of the Indians continued to such an extent that, it is said, fifteen millions of these innocent victims perished, and at length the clergy of Guatemala, Llorente, and others. The other works of Las Casas are Narratio regionum Indicorum per Hispanos quodam deestatatarum, etc. (Frankfort, 1598, 4to, and at Tabula-
CASAUBON, ISAAC, one of the most learned men of his own or of any age, was born Feb. 18th, 1559, at Geneva, whither, origin of his family, originating by marriage, the Casaubons moved, to avoid the persecutions to which the French Protestants were exposed. His father, Arnauld Casaubon, a minister of the Reformed Church, returned into France, and devoted himself to the education of his son, who, at nine years of age, spoke Latin. In 1578 he went to Lausanne, and studied law, theology, and the Greek and Oriental languages. He soon became professor of Greek at Geneva, and married the daughter of Henry Stephens, the celebrated printer, and soon began to put forth translations of the Greek and Latin writers, with notes and commentaries. In 1590 he accepted the professorship of Hebrew at Montpellier, but held it only until 1592, when he was expelled partly by Henry IV, and received the appointment of librarian to the king. Henry appointed him one of the Protestant judges in the controversy between Du Perron, bishop of Evreux, and Du Plessis Mornay, at Fontainebleau (1600). The Roman Catholics made many attempts to gain so distinguished a convert; but there does not seem to be any reason for concluding that they had even partial success, although it was given out that he had wavered in a conference with Du Perron. On the death of Henry IV, 1610, Casaubon went to England with Sir Henry Wotton. James I received him with distinction, and presented him through a layman, to a prebend at Canterbury, and (it was said) to another in the church of St. Peter, at Westminster. He died July 1, 1614, and was buried in Westminster Abbey.

Besides his classical works he published Exercitaciones contra Baronium (London, 1614, fol., Frankfort, 1619, and Geneva, 1660, 4to); Novum Testamentum Graece (Geneva, 1587, 1589, with notes, reprinted in the Criticus Sacri); De libertate Ecclesiastica (1617, 8vo), undertaken by order of Henry IV on occasion of the difference between the republic of Venice and Pope Paul V, with the aim to maintain the rights of the temporal power against the court of Rome. It was stopped by the king, who, when the difference between the two powers was settled, he also wrote Ad Fraternity Ducum Epistolae (Lond. 1611, 4to) against the Jesuitical doctrine of authority. The best edition of his Letters is that of Rotterdam (1709, fol.). It is a full account of his life and writings in Haag, La France Protestante, iii. 239, —Bibl. Univ. vii. 299, —London, Excl. Dictionary, s. v.; Hoefer, Nouv. Biog. Générale, vi. 864.

Case, ISAAC, a Baptist minister, was born at Rehoboth, Bristol Co., Mass., Feb. 25, 1761, united with the Baptist Church in 1779, was licensed the following year, and was ordained in 1783. For many years Mr. Case labored as a missionary in Maine, New Brunswick, and Nova Scotia, and with much success, until advancing age rendered him incapable of farther exertion. He died at Readefield, Nov. 3, 1852. In the year of his age and the 72d of his ministry.—Sprague, Annals, vi, 265.

Case, WILLIAM, missionary to the Indians in Canada, was born in Swansea, Mass., Aug. 27, 1769. He embraced a religious life in 1803, and was received on trial in the New York Conference of the Methodist Episcopal Church in 1806. His first appointment was to the Bay of Quinte, Canada. In 1809 he was named missionary at Detroit. From 1810 to 1827 he served as presiding elder in various districts in Western and Northern New York, and in Canada. In 1828 Canada was given up to the Wesleyan Methodists, and Case was made superintendent of Indian missions and schools. And from 1830 to 1833 he was general superintendent, without episcopal powers, of the Methodist societies in Canada. A great part of his time, in all these years, was spent in missionary work among the Indians. In 1837 he was made principal of the Wesleyan native industrial school at Alnwick, in which service he remained until 1851. In 1854 he delivered a sermon before the Canadian Conference in commemoration of the fiftieth year of his service in the ministry. He died, in consequence of a fall from his horse, at the Alnwick mission-house, Canada, Oct. 19th, 1855. He filled all his ecclesiastical posts with honor; but his greatest field of usefulness was among the Indians.

Caselius, JOHANN, an eminent German scholar, was born at Göttingen in 1633. He studied first in the schools of Gandersheim and Nordhausen, and afterwards in the universities of Wittenberg and Leipzig, where he received the lessons of Melancthon and J. Camerarius. He then visited Italy, where he continued his studies, and became a firm adherent of the current parties in politics or of philosophy and rhetoric in the University of Jena. During a second journey he made in Italy he received the degree of LL.D. at Pisa, in 1656, and the following year received a patent of nobility from the emperor Maximilian. In 1659 he accepted a professorship in the University of Helmstadt, where he opposed, in union with the Melanchthonians, the efforts of ultra Lutheran orthodoxy, principally represented by his colleague, Daniel Hoffmann (q. v.), to proscribe science and philosophy. He was the teacher of George Calixtus (q. v.), and wrote a great number of works, most of which remain unpublished. He died in 1673.

Seek J. Burkhardt's Der Anschnitt der K. und S. Ver. meriti episcopatus lucubrationen editione (Wittenb. 1707, 4to).—Hertzog, Real-Enzyklopädie, ii, 508.

Casement (κασαμέντ), cásamh, Prot. vii, 6; "latticework" (Judg. v, 28), a kind of barrier of open-work, placed before windows in the East, which, being usually open in summer down to the floor, require some such defence. See House.

Cashel, formerly an archiepiscopal see in Ireland. This ancient see is now deprived of its metropolitan dignity, and has united to it the sees of Emly, Waterford, and Lismore; the united diocese consisting of the counties of Tipperary, Waterford, and part of Limerick. The inception in 1666 was Robert Daly, D.D., consecrated in 1643.

Casiphi'la (Heb. کاسيفيا, Naphth, perhaps from כ뿐, silver, or shikhah, if the name be not of Arian origin; Sept. so translates ἄργιφω), a "place" (κασπία, ι. e. region) of the Persian empire, where Levites had settled during the Captivity, whence Idas, with others of the eagle powers, sent for by Ezra to make his party returning to Jerusalem (Ezra viii, 17). Gese-

nianus (Theor. p. 703) objects to the identification by some with the Caspian Pyles, and of others with the city Kasrên, that these are not on the route from Bala-ylon to Palestine. As this position of the place in question, however, is not clear, it is not surprising that the Caspian Sea be not designated by this name, it may refer to the "Caspian" Mountains, situated in Media (Strabo, xi, p. 522, 525; Pliny, vi, 15), where Jewish exiles seem to have been located (Tobit i, 16; ii, 7). This is at least favored by the rabbinical tradition, Fâ-irá Naţâk (v, 6), and is defended by Fürst in Handwörter, a.v., who adds also the local title Alba- nia as a coincidence with the silvery summits of the
CASSELI

138

snow-capped range of Caucasus (comp. Apj, i. e. albus, "white").

Caslev (Xaotlis), a Grecized form (1 Macc. i, 54; iv, 55, 59; 2 Macc. i, 9, 18; x, 5) of the name of the Jewish month elsewhere (Neh. i, 1; Zech. vii, 1) Anglicized Chislev (q. v.).

Caslihim (Heb. Kasliuch), the "princes," uncertain, but prob. foreign etymology; Sept. in Gen. Xachwotus, Vulg. Chalilin; in Chron. Xachwotius v. r. Xhoulis, Ciska i, a people whose progenitor was a son of Miriam (Gen. x, 14; 1 Chron. i, 12). In both passages, however, they appear, as their name Caslihim stands, the Phœnicians came forth from the Caslihim, and not from the Caslihemthas, as elsewhere expressly stated: here, therefore, there may be a transposition. See CAPHOR.

The only clue we have as yet to the position of the Caslihim is their place in the list of the sons of Miriam between the Pathurom and the Caslihemthas, whence it is probable that they were seated in Upper Egypt. See PATHROS. The Sept. seems to identify them with the Chashommin, פָּעָלִים, of Ps. lxviii, 81 (A. V. "princes"), which some (Michaelis, Suppl. p. 973), though not the Sept. in that place, take to be a proper name, and compare with the native civil name of Hermopolis Magna. This would place the Caslihim in the Heptanomos. See HASKHAMINIM.

Bochart (Phal. iv, 31) suggests the identity of the Caslihim with the Colchis (comp. Michaelis, Specilog, i, 275 sq.), who were said to have been an Egyptian colony (Herod. ii, 104; Diod. Sic. i, 28; Dionys. Perig. p. 689; Ammian. Marc. xxii, 22; comp. Agath. Hist. ii, 18); but this story and the similarity of names do not seem sufficient to render the supposition a probable one, although Gesenius (see Hitzig, Philist. p. 86 sq.) gives it his support (Teh. p. 702; comp. Ritter, Vorhalle, p. 85 sq.; Breherer, Enidick, i, 354 sq.). Forster (Ep. ad Michael. p. 16 sq.) conjectures the Caslihim to be the inhabitants of Cassonia, the tract in which is the slight elevation called Mount Casnius (Pliny, v, 12 and 14; Strabo, xviii, 759; Steph. Byz. p. 455). Bunsen assumes this to have been proved (Biblewerk, p. 26). There is, however, a serious difficulty in the way of this supposition—the nature of the ground, a low littoral tract of rock, covered with shifting and ever-changing shifting sand. But Ptolemy (Geogr. iv, 5, 12; comp. Joseph. War, iv, 5, 11) gives us the names of several towns lying in this district, so that it must have been capable of supporting a population, and may, in an earlier period, have been quite adequate to the support of a tribe. The position of the Caslihim in the list beside the Pathurom and the Caslihemthas renders it probable that the original Caslihim was somewhere in Lower Egypt, and not far from the vicinity of that "Serboni in Boz betwixt Damias and Mount Casnius old" (Par. Lost, ii, 592). Hiller (Syntag. Herm. p. 178 sq.) refers the name to the Solymi of the Greeks (Strabo, i, 84; xiv, 657), in the neighborhood of the Lycians (comp. Schultbus, Terr. p. 166 sq.). The supposition of Hitzig (Philist. p. 90 sq.) that the Caslihim were a Cretan colony in Libya, whence again a colony was sent to Phœnicia, is merely based upon a vague allusion in Tacitus (Hist. v, 2). See ETHNOLOGY.

Casphon (Xanipov v. r. Xanipov and Xanipov, 1 Macc. v, 30) or Casphor (Xanipov v. r. Xanipov and Xanipov, 1 Macc. v, 26), one of the fortified cities in the land of Gilead (1 Macc. v, 26). See CASPHE.

in which the Jews took refuge from the Ammonites under Timotheus (comp. ver. 6), and which, with other cities, was taken by Judas Maccabaeus (v, 86). Josephus, in the parallel account (Ant. xii, 8, 8), calls it Chasaphra (Χασαφρα). Grocius and Calmet (in loc.) consider it the "one that is very slight grounds" with Hesbion (q. v.). It was situated near Rostha, Astathor-Karmian, and Edrei, and was perhaps one of the ruined sites in the Hauran still found by travelers. See HAUHAN. Seetzen's commentators (notes on p. 7, March, 1806, iv, 190) suggest the modern Kasbân as the possible site of Casphon, but add, "Site, however, uncertain." See also CAS. etc.

Casphæa (Κασφαία), a strongly-fortified city—whether east or west of Jordan is not plain—having near it a lake (λίμνη) two stadia in breadth. It was taken by Judas Maccabaeus with great slaughter (2 Macc. xii, 13, 16). The parallel history of the 1st Book of Maccabees mentions a city named Casphor or Casphus (q. v.), which may be identical with the narratives differ materially (see Ewald, Isr. Gesch. iv, 599, note). Roland (Palest. p. 184) compares a city Chasmah (חסמא) on the borders of Palestine (Jer. Talm. Demai, xxii, 4).

Cassander, George, one of the most amiable and enlightened divines of the Roman Church, was born about 1515, in the island of Cazand, at the mouth of the Scheldt. He was for a time professor of theology, first at Bruges, then at Ghent; after which he went to Cologne, where he devoted himself to the study of the controversy between the Roman Catholics and Reformers, hoping to allay the dissensions of the time. The duke of Cleves called him to Duisburg, to bring back the Analectists, if possible, to the Church; and this he at last effectually accomplished, by a firm and judicious use of argument. His first publication was De officio pii et s. hoc discitio religiosis (Basle, 1561, 8vo). He shared the common fate of those who endeavor to unite parties warmly opposed to each other, and his lot was disliked by both Protestants and Romanists. The emperor Ferdinand induced him to write his Consultatio de orificio s. iure inter papas et protestantes communis (1564), in which he endeavored to reconcile the various articles of the Confession of Augsburg with the faith of the Roman Church. He was willing to grant the cup to the laity, and, in extreme cases, the marriage of priests. Cassander died Feb. 8, 1566. His works were collected by Descrides, Opera quae repertae potuerunt transmittam (Paris, 1616, fol.). This collection contains, among other things, a commentary on the two nature of Jesus Christ; various treatises against the Analectists, with testimonies from the fathers, and the doctrine of the early Church on the subject of the baptism of pagans; and also a treatise against the Socinians, with notes; one hundred and seven letters, etc. Some of these treatises were condemned by the Council of Trent.—Landon, Ecc. Dictionary, s. v.; Hoffer, Neur. Biog. Generalis, ix, 27; Gieseler, Church History, vol. iv, p. 80, 51; Hook, Eccles. Eclog, ii, 5, 2 sq.

Cassel, Conference of, a meeting held at Cassel in 1661 between the Reformed theologians of England and the Lutheran theologians of Hildes. Peter Musäus and Johann Hennichen, both zealous disciples of Calixtus (q. v.), represented the Lutherans, and Sebastian Curtis and Johannes Hein the Reformed. The object of the Conference was, according to the officially-published brevis relatio colloquii, etc., to reconcile, by a full and free discussion, to remove the obstacles to union. The principal subjects of discussion were the Eucharist, Predestination, Baptism, and the person of Christ, and both parties agreed that in these fundamental points their doctrines were essentially similar. The landgrave was petitioned to call on the neighboring electors, and the Unionists of Hildes- benburg and Brunswick, to adopt the resolutions of the Conference, and also to invite a general congress of the theologians of all countries. The landgrave's death (in 1663) destroyed all these projects of union. See Rommel, Gesch. von Hessen, ix, p. 48; Moeshin, Church History, iii, 309; Herzog, Real-Encyklopädie, i, 600.

Cassell, Leonard, a minister of the Methodist Episcopal Church, was born in Maryland in 1794, entered the itinerant ministry in 1802, and died of yellow
CASSIA

fear Sept. 28, 1806. He was of German parent-

age, and his mind remained in "uncultured darkness

until his conversion. From that day it was mani-

fested how great a mind had thus been called forth.

The improvement he made astonished his friends." His

genius, eloquence, and piety soon placed him in the

most important positions as a preacher, and his ear-

ly death was a great loss to the Church.—Minutes of Con-

ferences, ii, 186.

Cassia is the rendering in the Auth. Vers. of two

Heb. words.

1. Kiddon, מִיתָן, mentioned in Exod. xxx. 24 (Sept.

Loci) among the ingredients of the holy oil of anoint-

ing, and in Ezek. xxvii, 19 (Sept. שָׂפָרְפָא) as one of

the articles of merchandise in the markets of Tyre.

The Sept. (in one passage) and Josephus (Ant. iii, 8, 8)

have iris, i. e. some species of myog, perhaps the Iris

floribunda, which has an aromatic root-stock. Sym-

machus and the Vulg. (in one place) read アーқ, "li-

quid myrrh." The Arabic versions of Sadias and Es-

penius conjecture coastis (see below). The Chaldean

and Syriac, with most of the European versions, fol-

lowed by Gesenius, Simon, Fürst, Lee, and all the lec-

tographers, understand the Arabian cassia, or casia-

bark, a species of aromatic cortical resembling cinnamon,

but less fragrant and valuable; so called from its

rolls being split (from מַקֶּשׁ, to cleanse). See Dioscor.

I, 12; Theophr. Hist. Plnt. ix, 5; Celsius, Hierob. ii,

186, 330 sq.

2. Ketas, מִיתָן, named only in the plural in

Psa. xlv, 8 (Sept. κασταβί, Vulg. causta), in connection

with myrhh and aloes, as being used to scent gar-

ments with. The word comes from the root מַקֶּשׁ to au-

brade, and appears to refer to the peeled bark of some species of

cinnamon, perhaps differing in this from the preced-

ing only as designating some έλ or prepared aromatic,

of which that denotes the raw material (see Celsius Hier-

ob. ii, 367). See AROMATICS.

Under the name cassia (which appears to be identi-

cal with this last Heb. term) the ancients designated

an aromatic bark derived from the East, and employed

as an ingredient in costly unguents (Theophr. Plnt.

ix, 7; Pliny, xii, 46; Dioscor. i, 12; Diod. Sic. iii, 46;

Athen. x, 449; Plut. Curcul. i, 9, 7; Virg. Geo. ii, 466;

Martial, vi, 55, 1; x, 97, 2; Pers. Sat. ii, 64; l, 38).

It was obtained from a tree or shrub growing in India

and Austria (Herod. iii, 119; Diod. Sic. l. c.; Aega-

therch. in Hudson, i, 61; Arrian, Alex. vii, 20; but see

Pliny, xii, 41), which Pliny (xiii, 48) more closely, but

still not exactly, describes, and which Columella

(iii, 8) saw in Roman fancy gardens. It is clear that

the Latin writers by the term cassia understood both

the Oriental product now under consideration, as well

as some low, sweet herbaceous plant, perhaps the Dophe

gnidiun, Linn. (see Poe, Flora de Virgile, p. 32, and

Du Molin, Flora Poet. Ancienne, p. 277); but the Greek

word, which is first used by Herodotus (ii, 86), who

says (iii, 110) the Arabians procured it from a shallow

lake in their country, is limited to the Eastern product.

Dioscorides (i. c.) and Galen enumerate three better

sorts of cassia, and there are still in Europe held to

be different kinds, but they all are distinguished from

the true cinnamon by their darker color, weaker

odor, and less lively taste. The tree from which the

bark is produced is regarded by naturalists as the Lau-

rus cassia (Linn.), that flourishes in the East Indies and

Malaysia (Ainslie, Med. Prod. i, 58 sq.); yet the broth-

ers Nee von Evenbeek (De cinnamonum disputat. Bonn,

1828, in the Botan. Zeitung, 1831, No. 84) have shown

that this plant (the Laurus cassia) is not a distinct spe-

cies, but only a wild or original form of the cinnamon-

num Cyminum or Zeylanicum. See the Penny Cyclo-

pedia, s. v. Cassia; Laurus.

The name Cassia has been applied by botanists to a
genus containing the plants yielding scent, and to

others, as the Cinnamomum, which have nothing to do

with the original cassia. "Cassia-buds," again, though

no doubt produced by a plant belonging to the same,
or to some genus allied to that producing cinnamon

and cassia, were probably not known in commerce at

so early a period as the two latter substances. Dr.

Boyle, in his Antiquity of Indian Medicine, p. 84, has

remarked, "The cassia of the ancients it is not easy to
determine; that of commerce, Mr. Marshall says, con-
sists of only the inferior kinds of cinnamon. Some

consider cassia to be distinguished from cinnamon by

the outer cellular covering of the bark being scraped

off the latter, but allowed to remain on the former.

This is, however, the characteristic of the (Cochin-

Chinese) Cinnamomum aromaticum, as we are informed by

Mr. Crawford (Embassy to Siam, p. 470) that it is not

cured, like that of Ceylon, by freeing it from the epi-

dermis. There is no doubt that some cassia is pro-

duced on the borders of the Malabar. This appear to be of Eastern origin, as kasae kordi is one kind of cinnamon, mentioned by Burman in his Flo-

ra Zeylancis.

The Heb. word kétšon, however, has a strong re-

semblance to the booth and booth of the Arabs, of which

Kosha is said by their authors to be the Syriac name,

and from which there is little doubt that the kótroq

of the Greeks and cortus of the Latins are derived.

Kótoq is enumerated by Theophrastus (Hist. Pl. ix, 7)

among the fragrant substances employed in making

ointment. Three kinds of it are described by Dioscor-

ides among his Aromatica (i, 15), of which the Arabian

is said to be the best, the Indian to hold the second

place, and the Syriac the third. An inferior kind is

termed by him κώτοζ (l, 12), a word which has a strong

resemblance to the Heb. kiddah above. Pliny men-

tions only two kinds (xvi, 12), the white and the black,

brought from India. The Persian writers on Materia

Medica in use in India, in giving the above synonymes,

evidently refer to the three kinds of kótoq in two of the

three kinds of cortus described by Dioscorides, one being called

Kosht Hindir, and the other Kosht Arabes. Both these kinds are

found in the bazzars of India, and the booth or booth of

the natives is often, by European merchants, called

Indian oree, i. e. iris root, the odor of which it somewhat

resembles. The same article is known in Calcutta as

Pochak, the name under which it is exported to China.

The identity of the substance indicated by these var-

ious names was long ago ascertained by Garciaa. The

booth obtained in the northwestern provinces of India
CASSIAN
140
CASSIANUS

is one of the substances brought across the Indus from Lahore (Royle, Illust. Himal. Bot. p. 360). Dr. Falconer, on his journey to Cashmer, discovered that it was exported from that valley in large quantities into the Punjab, whence it finds its way to Bombay (as in the time of Pliny to Patae) and Calcutta for export to the celebrated abbey of St. Victor. He may thus be considered as the founder of monachism in the West; and his treatise De Institutis Conobitorum, libri xii, afforded a code by which the monasteries were long after ruled (trans. into French by Salgny, Paris, 1667, 8vo). Cassianus, according to different writers, died (aged 87) in 440, or 448, or 455. The Chronicle of Prosper represents him as alive in 488. Some churches honor him as a saint on the 26th of July, though he was never canonized. He was a strong opponent of Augustine's doctrine of predestination, but at the same time, by recognising the universal corruption of human nature, he opposed Pelagius just as strongly. (See his Collationes Patrum.) He admitted the necessity of preventing and assisting grace, but held that, in most men, faith and good will, and the desire of conversion, wrought by natural strength alone, precede such grace, and prepare the mind to receive it; and that such first efforts of the natural man cannot indeed deserve the gift of grace, but assist to the obtaining of it. "His attention was turned to experience; he observed religious natures; a system of mere logical speculation had no charms for him. His doctrines, which are all found written through his writings, were designed to represent in its simplicity the faith of the Gallican fishermen, which had been girt by Cleronian eloquence. Free will and grace agreed, and hence there was an opposing onenesside which maintained either grace alone, or free will alone. Augustine and Pelagius were quite wrong in their own ways. The idea of the divine justice in the determination of man's lot after the first transgression did not preponderate in Cassian's writings as in Augustine's, but the idea of a disciplinary divine love, by the leadings of which men are to be led to repentance. He appeals also to the mysteriousness of God's ways, but not as concerns predestination, but the variety of the leadings by which God leads different individuals to salvation. Nor is one law applicable to all; in some cases grace anticipated (gesta praevenientes), in others a conflict precedes, and then divine help comes to them as grace. In no instance can divine grace operate independently of the free self-determination of man. As the lust and man must do his part, but all this avail nothing without the divine blessing, so man must do his part, yet this profits nothing without divine grace" (Neander, Hist. Dogm. ii, 387). Among his writings are Collationes Patrum, xxiv, in which Cassian introduces Germanus and other ecclesiastics as interlocutors, with him dealing with disputations on various monastic and moral duties. In the 12th Conference, Cassian, under the patron of Charlemont, sets forth what has been called his semi-Pelagianism, viz. his views of predestination and grace. The 17th Conference defends occasional falseness, as not contrary to Scripture: "A lie may be to be and used, and so as if it possessed the nature of falsehood, which, if taken in an extreme case of disease, may be healthful, but if taken rashly, is the cause of instant death; people the most holy and most approved of God have used falsehood without blame," etc. The 20th shows several ways of obtaining remission of sins besides through death and intercession of Christ. He wrote also a treatise, De Incarnatione Christi, lib. vii, in confirmation of Nestorius, about A.D. 450, at the request of Leo, afterwards bishop of Rome. Cassian maintains the propriety of the term "Mother of God." The Collectiones were translated into French by Salgny (Paris, 1668, 8vo). Two editions were published at Antwerp in 1757: at Rome (cura Petri Giacometti), 1580 and 1611, 8vo; at Douai (1616, two vols., 8vo), by Alardus Gazehe: reprinted at Leipsic 1722, fol. (the best edition). They are also in the Biblioth. Patrum, vol. vii. —Neander, Church Hist. ii, 627-630; Hoefer, Nouv. Biotheol., i, 35; Delsarte, Eccl. Hist. vii, 765; 6th century: Meier, Jean Cassianus (Strasb. 1840); Wiggers, de Johanne Cassianono, etc. (Rostock, 1824, 1825); Wiggers, Augustinianus et Pelagianizmus, ii, 19, 47, etc.

Cinnamomum Cassia, with enlarged view of the Bud.

China, where it is highly valued as one of the ingredients in the incense which the Chinese burn in their temples and private houses. He named the species Austroaspis Cassia (Linn. Trans. xii, 28) (see Smith's Dict. of Class. Ant. Am. ed., s. v. Cassia; Costum). See CINNAMON.

Cassian, Julio (Ksianov), a leader of the Docetæ in the second century: Cave gives the date A.D. 174; Tillemont about A.D. 200. He is mentioned by Hippolytus and Ireneus, but what is known of him is chiefly derived from Clemens Alexandrinus, who calls him the founder of the sect of the Docetæ, and refers to one of his works, entitled Concerning Continence, from which it appears that he adopted the notions of Tarsus respecting the impurity of marriage. He quoted passages from apocryphal Scriptures, and perverted passages from the genuine Scriptures in order to support his opinions. Clement says that "he had recourse to the fiction—that Christ was only a man in appearance—through unwillingness to believe that he had been born of the Virgin, or partaken in any way of generation." Clement accuses him of borrowing from Plato his notions respecting the evil nature of generation, as well as the notion that the soul was originally divine, but, being rendered effeminate by desire, came down from above to this world of generation and destruction. Eusebius (vi, 13) speaks of Cassian as author of "a history of the times in chronological order." (Clement, Stromat. iii, 13, § 91.)—Lardner, Works, viii, 611-614; Neander, Church Hist. i, 436; Cave, Hist. Lit. Cont. ii; Matter, Hist. du Gnosticisme, ch. i, § 8.

Cassianus, Johannes (also called Joannes Mas- silianus, Joannes Emnus), according to Genesius (De Vir. Illust. c. 61), a Scythian; but the more likely view makes him a native of Marseilles. He was brought up at the celebrated monastery of Bethle- hem (q. v.), under Germanus, with whom, about A.D. 890, he went to visit the hermits of Egypt, among whom he lived several years. In 403 he went to Constantinople, where he listened to Chrysostom, who ordained him deacon. About 415 he founded a monastery at Marseilles for monks and another for nuns; the first is
CASSIODORUS

also his article Cassianus, in Erach u. Gruber's Encyclopädie; Hagenbach, History of Doctrines, § 114; Lardner, Works, v. 27; Clarke, Sacred Literature, ii. 188.

Cassiodorus, or Cassiodorus Magnus Aurelius Senator, was born at Scylacium (Squillace), in Bruttium (Lucania), of a noble Roman family, about 468, and enjoyed a high reputation for wisdom and eloquence at a comparatively early age. Theodoric loaded him with honors and employments near his own person, and about 500 made him prefect of the Pretorian, and raised him to the patronic rank. In 514 he was sole consul. He retained his influence at court under Theodoric, and in 527 he retired to the country, and founded the monastery of Viviers (Visseriens), in Calabria. He was still living in 562, and is believed to have lived beyond a hundred years. In his retreat he devoted himself to literature, even to copying manuscripts, and it is an undoubted fact that we owe to him the preservation of many precious manuscripts. Some, indeed, say that he first of all set the monks to this labor of copying. Besides some grammatical works, he wrote Historia Ecclesiast. Tripartita (Frankf. 1588); Computus Paschal, etc., etc.; De Institutione Diuinarum litterarum; Epistolae in Psalmos; Complementum Epist. Apostol. (Rost. 1775). His works were collected and published in 1491 and 1588; the most exact is the edition of Dom Garet (Rouen, 1675, 2 vols., fol., and Ven. 1729). They are also in Migne,Patrologia. Maffei published at Verona (1792) a commentary of Cassiodorus on the Acts and Epistles, which he discovered in the library of that city. His life was written by the Benedictine St. Marthe (La vie de Cassiodore, Paris, 1694).—Landon, Eccles. Dictionary, s. v.; Gisseler, Church History, i, § 112; Herzog, Recol-Eccle.

clopedia, ii, 68; Cavé, Hist. Lit. (1720), p. 325.

Cassius (fully Caius Cassius Longinus), one of the murderers of Julius Caesar, first appears in history as the sequestor of Crassus in the unfortunate campaign against the Parthians, B.C. 58, when he greatly distinguished himself by his military skill. After various public services he conspired with Brutus against Caesar, B.C. 44, and in the anarchy that followed he usurped the presidency of Syria, in which capacity his violent conduct toward the Jews is related by Josephus (Ant. xiv, 11 and 12). The forces of the conspirators were defeated by Antony at Philippi, and Cassius committed suicide by plunging his sword into his belly, B.C. 42.

—Smith, Dict. of Class. Biog., s. v. Longinus.

Josephus also mentions another (Callus) Cassius Longinus as appointed governor of Syria, A.D. 50, by Claudius, in the place of Marcus (Ant. xx, i, 1; comp. xxv, 11, 4). He was banished by Nero, A.D. 66, who dreaded his popularity at Rome (Smith, ut sup.).

Cassock, the coat formerly worn by all orders of the clergy in the Roman and English churches; in the Church of Rome it varies in color, with the dignity of the wearer. Priests wear black; bishops, purple; cardinals, scarlet; and popes, white. In the Church of England, black is worn by all the three orders of the clergy, and the garment is of cloth or silk, with plain sleeves like a coat, made to fit close to the body, and tied round the middle with a girdle. It is worn under the gown, and is sometimes called a cassock, or originally appropriated to the clergy: the word is used in Shakespeare for a military coat.

Cast (the representative of many Heb. words, and usually of the Greek βασιλεύω) occurs in many applications as a synonyme of throw. The following seem to deserve special notice.

1. Amaziah, king of Judah, caused the punishment of his son Jehoahaz, the eldest of his two sons, to be inflicted on ten thousand Edomites, whom he had besieged (2 Chron. xxv, 22); and the Greeks and Romans were in the habit of condemning certain criminals to be cast down from the top of a rock, especially the later nation, whence the famous "Tarpeian Rock" at Rome. See Punishment.

2. The phrase "cast up a bank" is one frequently employed in scripture for the preliminary act in besiegers of raising a rampart of blockade around a hostile city. See Siege.

3. For the practice of "casting metal," see Metalurgy.

4. On the act of "casting out of the synagogue," see Excommunication.

5. "Casting" (δησαυμον, not accepted, reprobrate) occurs 1 Cor. ix, 27, as a term equivalent to apostate. See Apostasy.

Castallon, Castello, or Castello, Sebastian, a Protestant writer of extraordinary talent, was born of poor parents in Dauphine in 1515. His family name was Chastellion, which he Latinized into Castallon. He applied himself early to the ancient languages, and became a great proficient in Greek and Hebrew. In 1540-1 Calvin invited him to Geneva, and had him appointed to a professor's chair. In a few years Castallo, having become obnoxious to Calvin on account of his opinions on predestinaion, left Geneva for Basle, where he employed himself in teaching and writing. He wrote a number of works: the most important is Of the Bondage of Zion (In Carmina et Precautiones (1547, with notes)—Jonus Propoleta, heroico carmine Latino descriptus—Dialogorum Sacrorum ad linguam et mores praecurantium, libri (translated into English by Bellamy under the title Youth's Scripture Remembrancer, or Select Sacred Stories by way of familiar Dialogues, Lat. and Eng., London, 1745). He also published a version in Latin verse of the Sibylline Books, with notes, and a Latin translation of the Dialogues of Bernardino Ochino. Before he left Geneva he had undertaken a complete Latin version of the Bible from the Hebrew and Greek, and he completed it at Basle (Biblias et Nov. Test. ex versione Sbr. Castalloni, Basil. 1551), and dedicated it to Edward VI of England. He published a French version of the same in 1555. Castallo's versions were made the subject of much conflicting criticism. His Latin Bible went through several editions; that of Leipzig, 1591, contains also his Delineatio Bibliorum Judaeorum et Christianorum contra Th. Beza, and Nota prolaps in cap. xx. Epistle ad Rom. was published on his own initiative before he had driven himself to power. He passed his latter years at Basle in great poverty, and died Dec. 22, 1563, leaving his family in want. "In 1562 Castallo published De feminis et translatationum Bibliorum et maxime Novi Testamenti contra Th. Bezaum, and Nota prolepsis in cap. xii. Epistle ad Rom. He carried on an epistolary controversy with Calvin and Beza, who assailed him with many charges, and even used the magnates of Basle to drive him away. He passed his latter years at Basle in great poverty, and died Dec. 22, 1563, leaving his family in want. "In 1562 Castallo published De feminis et translatationum Bibliorum et maxime Novi Testamenti contra Th. Bezaum, and Nota prolepsis in cap. xii. Epistle ad Rom.

Caste. See INDIAN CASTE.

Castell, Edmund, a learned English divine, was born at Hatley, Cambridgeshire, 1606, and was educated at Emmanuel and St. John's colleges, Cambridge. While at the University he compiled his Lexicon Heptaglotton, Diction. Méd. (2 vols. fol.), after seventeen years' labors on it. The publication cost him £12,000, and ruined him. He had, however, previously been appointed king's chap-
lains (1666) and Arabic professor at Cambridge, to which were afterwards added a prebend of Canterbury and the livings of Hatfield Peverell and Wodowaham Water. He died in 1663 rector of Highham Gobion, Bedfordshire. His Lexicon is one of the greatest monuments of industry known in literature. He was added to its preparation by Dr. Murray, bishop Beveridge, and Dr. Lightfoot. Besides his vast labors on the Lexicon, he was eminently useful to Walton in the preparation of his Polyglott Bible. He acknowledges his services, but not adequately.—New General Biograph. Dictionary, iii, 194; Bibl. repository, x, 11; Todd Life of Walton, vol. i, ch. v; Horne, Introduc. v, 222 (9th ed.).

CASTELIUM. See CASTALION.

Castellum (or Castra Peregrinorum (Foreigners’ Station) or Petra Inca (Cut Rock), a fortified seaport of the Crusaders in Palestine, between Mt. Carmel and Casarea (Ritter, Erdk. xvi, 615; Raumer, Paulet, p. 138); now Athlit, a most formidable-looking ruin (Van de Velde, Narrative, 1, 312–314; Wilson, Land of Bible, ii, 248). See ACHAB. Under the form Castri (카스티리아) it seems to be mentioned by the Rabbins (Reland, Palest. p. 697; Schwartz, Palest. p. 162).

Castle is the rendering in the A. V. of the following words in certain passages: ʿashram, a fortress (Prov. xxviii, 19; elsewhere uniformly "palace"); ירבא, tirah ("towr"); Ezek. xlvii, 25, hence an enclosure, e.g., a. s. a fortress ("palace," Cant. viii, 9), or a nomad hamlet of palmiers (Gen. xxxv, 16; Num. xxx, 10; xxi, 31); הַתֹּבֲאָר, "palace," xxviii, 4; politically, "habituation," Ps. lxiii, 25; יֵרְבָּא, hera- smith [from the synonymous יֵרְבָּא, birach], "palace"; see BARKS, a. c. a. d. (2 Chron. xxviii, 12; xxvii, 4); ירבע, migdal (1 Chron. xxvii, 25), a tower (as elsewhere rendered: "םְאַל, metad" (1 Chron. xi, 7), or ירבע, metadak (1 Chron. xi, 5), a fort or strong-hold (as elsewhere usually rendered): אַרְכֹּו, acropolis (2 Macc. iv, 27; v, 5); תָּulfill, a tower along a wall (2 Macc. x, 18, 20, 22); דָּשַׁי, a military enclosure (Acts xxii, 34, 37; xxiii, 24; xxiii, xii, 16, 92; or station ("camp," Heb. xi, 94; xli, 11, 13; Rev. xii, 9). See CASTRIUM.

Castles among the Hebrews were a kind of military fortress, frequently built on an eminence (1 Chron. xi, 7). The priests’ castles, mentioned in 1 Chron. vi, 54, may also have been a kind of tower, for the purpose of making known anything discovered at a distance, and for blowing the trumpets, in like manner as the Mohammedans imitate the maimarab of the mosques at the present day to call the people to prayers. The castles of the sons of Ishmael, mentioned in Gen. xxvi, 16, were watch-towers, used by the nomade shepherds for security against marauders. The "castle" in Acts xxii, 34, refers to the quarters of the Roman soldiers at Jerusalem in the fortress Antonia (q. v.), which was adjacent to the Temple and commanded it. See FORTIFICATION.

Caster and POL’LUX, the Dioscuri (Dióscóroi, Acts xxviii, 11), two heroes of Greek and Roman mythology, the twin-sons of Jupiter and Leda (see Smith’s Dict. of Classical Biog., s. v. Dioscuri). They were regarded as the tutelary deities (Thou anwteres) of sailors (Hom. Odyssey, ii, 29). They appeared in heaven as the constellation of Gemini. On shipboard they were recognised in the phosphoric lights called by modern Italian sailors the fires of St. Elmo, which play about the masts and the sails (Seneca, Nat. Quaest. 1, 1; comp. Pliny, xi, 57). Hence the frequent allusions to poets and heroes in connection with navigation (see especially Horace, Carm. i, 6, 2, and iv, 8, 81). As the ship mentioned by Luke was from Alexandria, it may be worth while to note that Castor and Pollux were specially honored in the neighboring district of Cyrenaica (Sokol. Pind. Pyg. v, 6). In Castull. iv, 27, we have distinct mention of a boat dedicated to them also lviii, 65. In art, these divinities were sometimes represented simply as stars hovering over a ship, but more frequently as young men on horseback, with conical caps, and stars above them (see the coins of Rhegim, a city of the Brutii, at which Paul touched on the voyage in question, verse 13). Such figures were probably painted or sculptured at the bow of the ship (hence πανναγόν: see Smith, Dict. of Class. Antiq., s. v. Insigne). This custom was very frequent in ancient ship-building. See Ship. Herodotus says (iii, 27) that the Phoenicians used to place the figures of deities at the bow of their vessels. Virgil (Aenid, x, 209) and Ovid (Trist. 1, 10, 2) supply us with illustrations of the practice; and Cyril of Alexandria (Cramer’s Catec. ad l. c.) says that such was always the Alexandrian method of ornamenting each side of the prow. See DIOCU/S.

CASUISTRY. That branch of Christian morals which treats of casus conscientia (cases of conscience); that is to say, of questions of conduct in which apparently conflicting duties seem at first to perplex and disturb the moral faculty, and make it necessary to trace, with a careful exclusion of everything but moral considerations, the consequences of the rules of morality (V. von BELL, History of Moral Philosophy, xxiv). Kant calls casuistry "the dialectics of conscience." In this sense the word might have a good meaning; but its ordinary use is to designate sophistical perversion or evasion of the moral law. Pope supplies examples of both shades of signification as, first, in the good sense: "When, sober Peter, dost thou give my bounds? And soundest casuista doubt, like you and me?"

Again, in the unfavorable sense: "Morality by her false guardians drawn, Chiseles in foul and casuistry in law."

But the theory of "collision of duties," on which this so-called science of casuistry rests, is unsound. Duty is one, though there may be various ways of performing it, and with regard to these, instruction and guidance of course may be needed. What appears to be collision of duties is generally only a collision between duty and inclination. In true Christian ethics, principles of life are set forth, not rules for individual cases. There is nothing like casuistry in the moral teaching of Christ and his apostles. If the "eye be single, the whole body will be full of light;" and if the ultimate aim of man be to do the will of God, this aim, by the aid of the divine Spirit, will clear up all special perplexities as they arise. "When truth must be dealt out in drams or scruples, the health of the soul must be in a very feeble and crazy condition." Bish-op Heber tells us that when Owen was dean of Christ Church, a regular office for the satisfaction of doubtful consciences was held in Oxford, to which the students at last gave the name of "scruple shop" (Heber’s Works of Jeremy Taylor, 1, 270). The "cure for diseased consciences is not to be found in a 'scruple shop,' but in the love and care of the great Physician. The law of love, under the guidance of the Holy Spirit, is a solvent of all subordinate moral questions in the practice of life. For the application of this law our
reason must be constantly and carefully used" (Wesley, Works, ii, 129).

2. The Church of Rome.—As the Roman doctrines of penance and absolution grew up in the Middle Age, casuistry grew up also, in the form of decisions on special cases of moral difficulty. "The schoolmen delighted in this species of intellectual labor. They transferred their zeal for the most fanciful and frivolous dogma to the Romanesque mystic light of its precepts; they systematized the different virtues; nicely examined all the circumstances by which our estimate of them should be influenced; and they thus rendered the study of morality inextricable, confounded the natural notions of right and wrong, and so accustomed themselves and others to weigh the morality of the case as if it were an exact science, for what was most culpable, while they continued under the impression that they were not deviating from what, as moral beings, was incumbent upon them" (Watson, Theol. Dictionary, s. v.). The works which contained collections of cases of conscience, and of which the title commonly was Summa Casuisticae, or something resembling this, were compiled at first for the use of Roman confessors. It was requisite for them to know, for instance, in what cases penance of a heavier or lighter kind was to be imposed; and what offenses must, for the time, exclude the offender from the unabsolved sacraments. The work on casuistry was that of Raymond of Penafort, who published a Summa de Casibus Punitivis, which came into very general use in the 13th century, largely followed by succeeding casuists. In the 14th and 15th centuries the number of such books increased very greatly. These Summæ were in common speech known by certain abbreviated names, borrowed from the name of the author or his birthplace. Thus there was the Astronom, which derived its name from its author, Astronomus, a Minorite of Asti, in Piedmont (Nuremberg, 1482); the Angelicus, compiled by Angelus de Clavasio, a Genevois Minorite (Nuremberg, 1492); the Prævia or Prævia, which was also termed Bartholomaeus or Magister Arius (Par. 1470); the Pecfica (Venice, 1574); the Rossella, the Scolastica. "In these works the subjects were usually arranged alphabetically, and the decisions were given in the form of responses to questions proposed, the opinions being often quoted from or supporting one another; for the fathers, or schoolmen. There was no attempt to lay down general principles which might enable the inquirer to determine for himself the matter by which his conscience was disturbed. The lay discipline was supposed to be in entire dependence upon his spiritual teachers for the guidance of his conscience, or, rather, for the determination of the penance and mortification by which his sins were to be obliterated. Moreover, a very large proportion of the offenses which were pointed out in such works were transgressions of the observances required by the Church of those days, and referred to matters of which conscience could not take cognizance, as a consequence of the scholastic training. Questions of rites and ceremonies were put upon an equal footing with the gravest questions of morals. The Church had given her decision respecting both; and the neglect or violation of her precepts, and of the interpretations of her doctors, could never, it was held, be other than sinful. Thus this body of casuistry was intimately connected with the authority and practices of the Church of Rome, and fell into disuse along with them (Whewell, l.c.). After the Reformation, the vices of the casuistical system developed themselves in the Church of Rome more fully than ever before. The so-called Moral Theology, or Doctrinal Jurisprudence, was called See Jesuits; Pascal. The abbe Maynard published in 1851 a defence of the Jesuits and of their casuistry, under the title Les Provinciales et leur refutation (2 vols. 3vo), which is ably reviewed in the Christian Remembrancer (July, 1853), from which we take the following passage: The first source of the Jesuitical casuistry is to be sought in the inherent thought which had been formed in the Middle-age schools. Conditions, restrictions, distinctions multiplied, of course; but so did the authorities and decisions, inventing doubts, extending liberty, and taking away scruples. Its next cause was the practical need of casuistry (under the names of exorcism and deception) to fix what cannot be fixed—the limits, in every possible case, of mortal sin. Doubtless moral questions are very important and very often hard. But there are endless questions on which no answer can be given except a bad one—which cannot be answered in the shape proposed. We may think it very difficult to be in a state in the abstract, yet for practical use, the extreme cases, which excuse killing, or taking what is not our own; but if we cannot get beyond decisions which leave the door open for unquestionable murders or thefts, or shut it only by vague verbal restrictions, unexplained and inexplicable, about 'prudence,' 'moderation,' and 'necessity,' and 'gravity of circumstances,' it is a practical illustration of the difficulty of casuistry, which seems to point out that, unless we can do better, we had best leave it alone. But these men were hard to daunt. They could not trust the consciences of mankind with principles of duty, but their system, true and not false, stood on its own dialectic forms, as a calculus which nothing could resist. The consequence was twofold. Their method often did fail, and in the attempt to give exact formulæ of right and wrong action, they proved unable to express the right without comprehending the wrong with it. From all evil designs the leaders, at any rate, may be safely absolved; though whether they did not lose their sense of the reality of human action in the formal terms in which they contemplated it, may be a question. But, though the design of corrupting morality is one of the most improbable charges against any men, the effect may more easily follow, even where not intended. These casuists would not trust the individual conscience, and it had its revenge. They were driven on, and still till they had no choice left between talking nonsense, or what was worse. They would set conscience to rights in minutest detail, and so they had to take the responsibility of whatever could not be fixed to rights. Nature outwitted them: it gave up its liberty in the greatest, forced them to surrender it again in detail. And thus, at length, under the treatment of compilers and abridgers, and under the influence of that idea of authority which referred to opinions on the same rule as it referred to testimony—exhibited in the coarsest brevity, and with the affection of outbidding the boldest predecessors—grew up that form of casuistry which is exhibited in the Escobars and Banuas, which, professing to be the indispensable aid to common sense, envelopes it in a very Charybdis of discordant opinions; amid whose grotesque suppositions, and whimsical distinctions, and vague expression of terms, band about between metaphysics and real life, the mind sinks into a hopeless confusion of moral ideas, and loses every clew to simple and straightforward action."

ent. p. 468.

Casus Reservat (cases reserved), in the Roman
Church, are cases of sin such as an ordinary
cleric (q. v.) cannot absolve, but only an ecclesiastic of
high rank, or one specially authorized by the pope for
the purpose. See Canonum de Tresil, sess. xiv., ch. vii.

Cat (aloukos, so called, according to Phavorinus,
from moro oricks), a animal mentioned only in Be-
ruch vi, 22, as among those which deifie the gods of the

heathen with impunity (see below). They are alluded
to, however, in the Targum (at Isa. xiii, 22; Hos. ix,
6) under the name chalcut, 'v. x. Arabic chuscat.
Martial (xiii, 89) makes the only mention of catta in
 classical writers. Bochart (Hieroz. ii, 206 sq.) thinks
that by the word ελπνας, teunyn, in Isa. xiii, 21; xxxiv,
14; Jer. 1, 89, and Psa. lxix, 14, some species of cats
are meant; but this is very doubtful (Michaels, Suppl.
p. 206). See BEAST. The Greek aloukos, as used by
Aristotle, has more particular reference to the wild cat
(Felis catus, etc.). Herodotus (ii, 66) uses aloukos
to denote the domestic animal; similarly, Cicero (Tusc.
v, 27, 78) employs felis; but both Greek and Latin
words are used to denote other animals, apparently
some kinds of marten (Martes). The context of the
passage in Baruch appears to point to the domesticated
animals. Perhaps the people of Babylon originally
procured the cat from Egypt, where it was a capital
offence to kill one (Diod. Sic. i., 85) —Smith, s. v. See

ANIMAL WORSHIP. The Egyptians treated it as a
divinity, under the denomination of Beshit, the lunar
Goddess, or Diana, holding every domesticated indi-
sidual sacred, embalming it after death, and often
sending it for interment to Bubastis (see Jubalonski,
Panth. Agi, ii, 66). Yet we find the cat nowhcre men
tioned in the canonical books as a domestic animal.
In Baruch it is noticed only as a tenant of pagan tem-
ple, where, no doubt, the fragments of sacrificed ani-
mal and vegetables attracted vermin, and rendered the
presence of cats necessary. With regard to the neigh-
boring nations, they all had domestic cats, derived,
it is presumed, from a wild species found in Nubia,
and first described by Ruppel under the name of Felis
maniculata. Two species are here given from these

Ancient Egyptian domestic Cats.
CATACOMBIONS

found. The number of graves in each tier depends on the height of the wall; there are commonly three to five; but even twelve are found in one instance. The tomb is closed up, either with a slab of marble (as in Fig. 8) or with large bricks (as in Fig. 2). Inscriptions and emblems are found sculptured or painted on many of the slabs (see Fig. 8) and in some cases a

Catacombs. Fig. 1.

III. Early Uses.—The Catacombs have served three distinct purposes:

1. As places of burial. These underground receptacles consist of long galleries, with transverse corridors connecting them. These passages are sometimes regular for a considerable distance, but the multiplication of cross alleys and branches at last forms a labyrinth in which it is rash to venture without a guide. These galleries and corridors are of various lengths and heights, generally seven to eight feet high, and three to five wide. The roof is supported by that part of the tufa which is left between the passages, and in these walls the tombs (localia) are excavated. In most cases the tomb is just large enough for a single corpse; in some tombs, however, two or more skeletons have been

Catacombs. Fig. 2.
CATACOMBS

small vase (Fig. 2), supposed to have held blood, is found attached to the end of the tomb.

Besides the loculi in the corridors and passages, there are also larger spaces (called arcosoli), having an arch over the tomb, or over a sarcophagus, hallowed out of the wall. There are also larger sepulchral chambers, called cubicula, of various shapes—square, triangular, semicircular, etc. These were doubleless family vaults; their walls are full of separate loculi. On the arch in front was a family inscription; e.g., on one found in the Catacombs of St. Agnes is the title Cubiculum Domitiani; while the separate loculi within had their individual inscriptions.

2. As Places of Worship in Times of Persecution and Trouble.—Chambers are found adapted to this purpose, some capable of holding a small assembly of worshipers, and others having room for but a few, who probably went there to commemorate the dead buried in the crypts. In some cases there is an opening from these crypts to the upper air sufficient to let in light, but commonly they were illuminated by lamps suspended by bronze chains from the roof. Cisterns and wells are sometimes found in them which served for use in baptisms.

"The superstitious reverence which in later times was paid to the relics of martyrs was perhaps owing, in some measure, to the living and the dead being brought into so close contact in the early ages, and to the necessity of the same place being used at once for the offices of devotion and for burial" (Burton, Eccles. History, p. 841). In later times cemeteries were built over the entrances to the chief catacombs; e.g., St. Peter's, over those of the Vatican; St. Paul's, over those of St. Lucina; St. Agnes, over the catacombs which bear her name, and in which, according to tradition, she was buried.

3. As Places of Refuge.—It is among the Roman traditions that Pope Stephen long dwelt in the Catacombs, held synods there, and was finally killed in his episcopal chair. Even after the establishment of the Church under Constantine, the Catacombs served for places of refuge for various popes in times of trouble. Liberius, it is said, lived a year in the cemetery of St. Agnes; and in the beginning of the fifth century, during one of the many disputes for the papal chair, Boniface concealed himself in one of the catacombs. There is little doubt that large numbers of Christians took refuge in the Catacombs during the early persecutions. A Protestant writer remarks that in the preparation of these vast caverns we may trace the presiding care of Providence. "As America, discovered a few years before the Reformation, furnished a hiding-place of refuge to the Protestants who fled from ecclesiastical intolerance, so the catacombs, reopened shortly before the 1st of our Lord, supplied shelter to the Christians in Rome during the frequent proscriptions of the second and third centuries. When the Gospel was first propagated in the imperial city its adherents belonged chiefly to the lower classes; and, for reasons of which it is now impossible to speak with certainty, it seems to have been soon very generally enshrined by the quarrymen and sand-diggers. It is probable that many were commanded to labor in those mines as a punishment for having embraced Christianity (see Lee's Three Lectures on the Christian Church in the Catacombs, p. 24).

Dr. Maitland visited Rome in 1841, but his inspection of the Lapidarian Gallery seems to have been regarded with extreme jealousy by the authorities there. Thus it was when persecution raged in the capital; the Christian felt himself comparatively safe in the catacombs. The parties in charge of them were his friends; they could give him reasonable intimation of the approach of the soldiery, and among these, 'den and caves of the earth,' with countless places of ingress and egress, the officers of government must have attempted in vain to overtake a fugitive" (Kilmen, The Ancient Church, p. 390).

IV. Number and Extent of the Catacombs.—The actual number of catacombs has never been accurately known. Aringhi, followed by other writers, gave the number as high as sixty-two, but without any other proof. De Rossi's list gives forty-two, only twenty-six of which are extensive, while five date after the peace secured for the Church under Constantine, mostly within a circle of three miles from the modern walls; the most remote being that of St. Alexander, about six miles on the Via Nomentana. It was formerly held that the catacombs around Rome were connected together in a vast system, but De Rossi has shown that there is no such connection. The most remarkable catacombs are on the left bank of the Tiber; viz. the catacombs of Sta. Juliana, Valerianus, Basiliana, Glanitius, Priscilla, Brigid, Agnes, Hippolytus, Peter, and Marcellinus, etc. On the Via Appia there are the extensive catacombs of Pontius Pilate, Petronius, and Cestius, and of the Pretextatus, Callistus (not far from the latter is an interesting Jewish catacomb, discovered in 1850), Sta. Neorius and Achilleus, and others. On the right bank there are few catacombs of interest except those of the Vatican. Tradition fixes upon this as the spot where St. Peter was buried; and in the belief of this tradition the church of St. Peter was built on the neighboring hill. The modern cemetery of the Vatican is over the more ancient one, contrary to the general rule. The number of bodies deposited in the catacombs cannot, of course, be accurately ascertained; P. Marchi estimates it at six millions. Michael Faber, in his text, calculates, from carefully-gathered data, that the total length of all the galleries known to exist near Rome is 595,600 yards, equal to about 500 miles, but only a small part of this vast range has been explored.

V. Inscriptions and Symbols.—For a specific account of the inscriptions and symbols of the Catacombs, see the articles INSCRIPTIONS; SYMBOLS; and the collections of the Vatican and the Lateran contain multitudes of these remains, which can now be studied in De Rossi's Inscriptiones Christianae Urbis Romae (1863), and in other works named at the end of this article. On most of the slabs is found the Constantinian monogram of Christ Χ and a ρ, or ρ. The sculptures and paintings are either historical or symbolical. Among the former, from the Old Testament, are the fall of Adam and Eve, Noah in the ark, the sacrifice of Abraham, Moses striking the rock, the story of Jonah, Daniel in the lions' den, the three Israelites in the furnace, the ascent of Elias, etc. From the New Testament, the Nativity, the adoration of the Magi, the change of water into wine, the multiplication of the loaves, the healing of the cripple, the raising of Lazarus, Christ entering Jerusalem on an ass, Peter denying Christ, between two Jews; the arrest of Peter, Pilate washing his hands; in one instance (on a sarcophagus), the soldiers crowning our Lord in mockery, but a garland of flowers being substituted for the crown of thorns. The most interesting occurs among the remains; nor does the Virgin Mary or St. Peter appear before the fourth century.

"Turning to the purely symbolic, we find most frequently introduced, the lamb (later appearing with the nimbus round its head), and the various other forms in which faith contemplated the Redeemer, namely, the good shepherd, Orpheus charming wild animals with his lyre, the figure of the sun, the column, a fountain, a lion; and we may read seven poetic lines by Pope Damascius enumerating all the titles of..."
symbols referring to the same divine personality, comprising, besides the above, a king, a giant, a gem, a gate, a rod, a hand, a house, a net, a vineyard. But, among all others, the symbol most frequently seen is the fish. See ILLUSTRUS. We find also the dove for the Holy Spirit, or for beaftified spirits generally; the stag, for the courage of the martyrs; the candelabra, for illumination through the Gospel; a ship, for the Church—sometimes represented sailing near a light-house, to signify the Church guided by the source of all light and truth; a fish swimming with a basket of bread on its back, for the eucharistic aspect of the Church; an embrace divinæ doctrine; the lion, for martyr foritude, or vigilance against the snares of sin (as well as with that higher allusion above noticed); the peacock, for immortality; the phoenix, for the resurrection; the hare, for persecution, or the peril to which the faithful must be exposed; the cock, for vigilance—the fox, being taken in a negative sense for warning against austerities and prides, as the dove (besides its other meaning) reminded of the simplicity becoming to be heirs. Certain trees also appear in the same mystic order: the cypress and the pine, for death; the palm, for victory; the olive, for the fruit of good works, the light, for the Christian's wisdom, who is only for the eucharist and the person of the Lord, but also for the union of the faithful in and with him (Hermas, in Contemp. Review, Sept. 1866).

As to the spirit of the inspirations and symbols, two things are to be noticed: 1. Their entire opposition to the Pagan spirit. 2. Their almost entire freedom from the later Roman errors. As to the first, the inscriptions on Pagan tombs are remarkable for their painful exhibition either of despair or of rebellion against the Divine will; for instance, one taken from the right-hand wall of the Lapidarian gallery: "Caius Julius Maximus, aged two years and five months. O relentles fortune, ouch delightful in cruel death, why is Maximus so soon snatched from me?" He who lastly used to be joyful on my bosom. This stone now marks his tomb—"suhid his mother." In the Christian inscriptions, on the other hand, we find expressions of hope, peace, resignation, but nothing of despair, hardly even sorrow. Testimony, ouch sanctified and in such use: "Vive in santo," "Pax spiritu tua;" "In pace Domini dormiam," frequently introduced before the period of Constantine's conversion, but later falling into disuse; "In pace" continuing to be the established Christian formula, though also found in the epistles of Jesus; while the two phrases are rare in Roman inscriptions, appears common among the African and of several French cities, otherwise that distinctive phrase of the pagan epitaph, "Vixit" (as if even in the records of the grave to present life rather than death to the mental eye), does not pertain to Christian terminology (Hermans, l. c.).

As to the other point, that the freedom from later Roman doctrines and superstitions, we take the following passage from Kilen (The Ancient Church, p. 851 sq.):

"These witnesses to the faith of the early Church of Rome altogether repudiate the worship of the Virgin Mary, for the inscriptions of the Lapidarian Gallery, all arranged under the papal supervision, contain no address to the mother of our Lord (Mainland, p. 14). They point only to Jesus as the great Mediator, Redeemer, and Friend. Further, instead of speaking of masses for the repose of souls, or representing departed believers as still to pass through purgatory, the inscriptions generally have entered immedately into eternal rest. "Alexander rests in this tomb." "There," says another, "lies Paulina, in the place of the blessed." "Gemmola," says a third, "sleeps in peace." "Aesius," says a fourth, "sleeps in Christ" (Mainland, pp. 83, 41, 43, 170). On a third point, viz. celibacy, we gather the following testimony from the tombs. Hippolytus tells us (Philosophumena, lib. ix) that, during the episcopate of Zephyrinus, Callistus was 'set over the cemetery.' This was probably considered a highly important trust, as, in those perilous times, the safety of the Christians very much depended on the prudence, activity, and zeal of the bishop in their everyday life of constant peril. Hence also the custodian of the cemetery was considered a worthy object of the ascetic spirit beginning so strongly to prevail in the commencement of the third century, was opposed to all second marriages, so that he was sadly scandalized by the exceedingly literal views of his Roman brother on the subject of matrimony; and he was so ill-informed as to pronounce them novel. In his time, says he indignantly, bishops, presbyters, and deacons, though they had been two or three times married, began to be recognized as God's ministers; and if any one of the clergy married, it was determined that such a person should remain among the clergy as not having sinned (Philosophumena, lib. ix, cap. 1). We cannot tell how many of the ancient bishops of the great cities were husbands. We know, however, that, long after this period, married bishops were to be found almost everywhere. One of the most eminent martyrs in the Diocletian persecution was a bishop who had a wife and children (Eusebius, lib. viii, c. 3). Clemens Romanus speaks as a married man (Ep. ad Cor. § 21). But the inscriptions in the Catacombs show that the primitive Church of Rome did not impose celibacy on her ministers. There is, for instance, a monument 'To Basilius, the presbyter, and Felicitas, his wife;' and on another tombstone, erected about A.D. 472, or only four years before the fall of the Western Empire, there is the following singular record: 'Petronia, a deacon's wife, the type of modesty. In this place I lay my bones: spare your tears, dear husband and daughters, and believe that it is forbidden to weep for one who lives in God' (Mainland, p. 191–193; Aringhi, p. 421). Hence, in the third century, the happy daughter of the late presbyter Gabinius, lies in peace along with her father (Aringhi, ii, 228; Rome, 1651). In the Lapidarian Gallery of the Vatican there are other epitaphs to the same effect.'

The doctrinal lessons to be drawn from the Catacombs are two: 1. that the Church, as the true Church Christiana (15 May, 1864; 15 June, 1864), by Rolla, who, after a careful study of the formation, etc. of the Catacombs, and of their tombs, chapels, etc., of the inscriptions, of the paintings, and, finally, of the sarcophagi, with their sculptures, arrives at the following conclusions: The use of the Catacombs as places of worship dates from the 3rd century; the substitution of the altar for the communion-table dates from the 4th. The Episcopal Cathedral appears at about the beginning of the 5th century. No specifically Romanist doctrine finds any support in inscriptions dating before the 4th century. We begin to trace scenes of saintly worship in the 5th century. The first idea of the transmission of power from Christ to Peter dates from the latter part of the 5th to the beginning of the 6th, and even then Peter's figure does not appear armed with the keys, as in the later symbolism. Finally, Protestantism has every thing to gain, and nothing to lose, from the most thorough study of the remains gathered in the Catacombs by the authorities of the Church of Rome.

VI. Later History and Literature.—1. Middle Age.—After the 6th century no additions seem to have been made to the Catacombs. After a coriolar or passage was filled, it appears to have been blocked up with stone. The irruption of the barbarians seems to coin-
CATACOMBS

cide with the disuse of the ancient cemeteries as burial
places, and they fell into neglect and ruin. Pope Paul
I (+ 767) removed the bones of many martyrs and so-
called saints from the Catacombs, and distributed them
among churches and monasteries. But the tombs of the
martyrs continued to be objects of veneration, and par-
ticularly those of St. Sebastian, over which a church had been built, and
which remained accessible. The Crusaders thorden the subterranea-
corridors, and carried off bones of the dead in such numbers that the popes denounced the act as a crime for which the penalty should be excomm-
unication. To prevent such excesses the Catacombs may be said to have been almost entirely forgotten for several centuries. Their ingress became, for the most part, unknown even to the clergy; and one of the earliest records of their being visited in later ages is found in the names of Raynuzio Farnese (father of Paul III) and others, marked by an inscription in the Catacombs of St. Callistus, of date 1490.

2. Modern Scientific Exploitation.—In 1578 a Dominican named Alphonse Ciacono, learning that a cemetery (St. Priscilla's) had been opened on the Salaria Way, made a partial exploration of it, and ravaged designs of sculptures, etc. found in it. About 1590 he was joined by two Frenchmen, Fouquet and Lingh. But Antonio Bosio (+ 1600) was the real founder of the modern study of the Catacombs. He devoted to it thirty years of labor, the fruits of which appeared only after his death, in Roma Sotterranea, compiled from Bosio's MSS. by Severano, an Oratorian priest (Rome, 1637, 1 vol. fol.), and subsequently another Oratorian, Arini,
brought out, with additional, the same work in Lat-
in (Rome, 1651, 2 vols. fol.; Cologne, 1658, 2 vols. fol.).

The works of Bosio and Arini were like a revelation to the learned world, and gave a great impulse to ar-
cheological studies. In 1702 appeared Fabretti's In-
scriptions Antiquae, and in 1720 Cimier de San Marti-
ti, by Bulotetti, the fruit of thirty years' labor. The
Scultura e Pintura Sacra (Sacred Sculptures and Paint-
ings from the Cemeteries of Rome, 8 vols. fol.), by Bottari (1797-54), is a very valuable and fully illustrated
work, using Bosio's materials, and even his copper-
plates. Original sketches of sculptures from the Cata-
combs, made by D'Agostino, and
les Monuments (Paris, 1811-18, 6 vols. fol.).

But in the eighteenth century little was done for the exploration or illustration of the Catacombs, and it is only since 1820 that the research has been carried on in a really scientific way, and the honor of this is largely due to the Jesuit padre Cesare Moretti, who issued the Monumenti Pio-
vesani de Christiani (Rome, 1844, 70 plates, 4to) is con-
cluded wholly to the topography and architecture of the Cata-
combs. It was to have been followed by a second volume on the paintings, and a third on the sculptures. The French government has been at the expense of publishing, under the patronage of the Academy of Inscriptions, the finely-illustrated work of Perret, Les Catacombes de Rome (Paris, 1852-3, 6 vols. fol.), a work of more artistic than original scientific value, but yet exceedingly valuable for study. The 5th volume gives 430 Christian inscriptions, carefully reproduced. But all previous works are thrown into the shade by those of Cesare Moretti, who has given many years to personal research in the Cata-
combs (aided by his brother Michele di Rossi), and whose Roma Sotterranea, of which vol. i appeared in 1866 (4to, with Atlas of 40 plates), will, when completed (in 8 vols.), make the study of the Catacombs easy, with which the present volume also aims.

Published (under the patronage of Pius IX) Inscriptions Christianae urbis Romae (1861, vol. i, fol.), containing the Christian inscriptions of Rome anterior to the 6th century. Among minor works are Norbertine (Rom. Cath.), The Roman Catacombs (London, 1852, 2d ed. 12mo); Maitland, Church in the Catacombs (London, 1847, 2d ed. 8vo); Kip, The Catacombs of Rome (N. Y., 1854, 12mo); Bellermann, Arch. christliche Begräbnisstätten u. d. Catacomben zu Neapel (Hamb. 1839). See also Murray, Handbook of Rome, § 85; Schaaff, Christ Hist. i, § 98; Rémusat, Mém. Chrét. de Rome (in Rev. de Deux Mondes, 13 June, 1863); Jehan, Dict. des Origines du Christianisme, p. 212 sq.; Martigny, Dict. des Antiquités Chrétiennes, p. 100 sq.; Overbeck, Gesch. d. Christentums, i, 216 sq.; English Review, v. 476; Edinburgh Rev., vol. xvi, 1861; vol. xxx, p. 112 (Am. ed.); Bouix, Théologie des Catacombes (Arts, 1864). See also CRYPTS; LOCUS; INSRIPTIONS; SYMBOLISM.

Catafalco (Ital. a scalfod), or CATAFALQUE, a temporary cenotaph of carpentry, intended to represent a tomb, and with decorations of sculpture, and painting or upholstery. It is employed in funeral ceremonies in the Church of Rome, especially in Italy.

Catalcis, bishop of Tarentum, a saint of the Ro-
man calendar. According to one account, he was born in Ireland, and came to Italy in the fifth or sixth century. Marvelous stories of miracles and wonders are connected with his birth and history in the Tarentine traditions. See, for example, Nov. Rom. vi, 141; Heron, Real-Encyclopedia, suppl. p. 508; Acta Sanctorum, t. ii, Malii, p. 569.

Cataphrygians, a name allegedly given to the Montanists, because Montanus first published his opinions in a village of Myasia, on the borders of Phrygia. See MONTANISTS.

Catechetical Instruction. See CATECHETICS; CATECHETICAL SCHOOLS.

Catechetical Schools. See ANTIOCH and AL-
KAANDRIA (SCHOOLS OF) Catechetical instruction.

Catechetics, Catechizatio. Catechetics is that part of the science of theology which treats of catechetical religious instruction (under Church authority), both with regard to theory and practice. It belongs to the department of Practical Theology.

1. Name and Scope.—The term is derived from Greek, to sound out aloud; to sound into one's ears; and hence, in N. T., to instruct orally (1 Cor. xiv, 19; Gal. vi, 6, et al.). In the N. T. the word applies to all kinds of oral instruction; but its derivatives, in later use, acquired a special application to instruction given to proselytes, and to infants of the Christian Church. The terms in question, in a religious sense, came to apply to elementary instruction in Christianity, whether given to proselytes seeking baptism, or (and this chiefly) to baptized children in the Church. The act of giving such instruction is called catechising, or catechization. The person instructing is called a catechist (q. v.); the persons taught are called cate-
chumens (q. v.), the plural of chum, or substance, a later times a small book) is called The Catechism (q. v.). It belongs to Catechetics, as a branch of theology, to treat of all these heads; but, for convenience of refer-
ence, we treat the three latter in separate articles, in their alphabetical order.

2. History.—The science of Catechetics, as such, can hardly be said to have taken its rise until after the Reformation. But as the necessities of the case gave rise to oral instruction in Christianity from the very beginning, and to the subsequent development of this instruction into a systematic ræch of Church activity, we find indications of Catechetics at all periods. (1.) Before the Reformation.—The first teaching of Christ and his apostles was necessarily oral, and partly homiletical, partly catechetical. But we find no mention in the N. T. of catechists as Church functionaries. In the second century we find mention of catechists and catechumen, and catechumenes is also mentioned (q. v.). Under the catechetical system of the fourth century, the catechumens were taught the Ten Commandments, a creed, or summary confession of faith, and the Lord's Prayer, with suitable expositions; but, prior to baptis-

mation, the nature of the sacraments was carefully concealed. See ANCIENT DISCIPLINE; CATECHUMEN. The Apostolical Constitutions (q. v.) not only mention the
catechumenus, but fix three years as the period of instruction (viii, 82). See Alexandria; Antioch (Schools of). In Gregory of Nyssa's († 394) λόγος καταγγέλλειν ο ημέρας (ed. Krabinger, Monza, 1865), and in Cyril of Jerusalem's († 386) Καταγγελίας (Catechetical discourses), there was a change from catechumenate to instruction for both catechumenates and newly-baptized persons. Augustin wrote a tract, De Catecheticis juvenibus (op. ed. Bened. t. vi). After the Church had become established, and its increase was obtained by the birth and baptism of children rather than by conversions from heathendom, the idea of catechetical instruction passed from being that of preparation for baptism to that of a culture of baptized children. When confirmation became general, catechetical instruction began to bear the same relation to it that it had formerly done to baptism. In the missions to heathens, in the Middle Age, it became usual to baptize converts at once, and the ancient catechumenate fell into disuse. Nor was great attention given to the catechizing of baptized children in the Roman Church up to the time of the Reformation; the confessional took the place of the Catechism. See Catechism. The names of Bruno, bishop of Würzburg (11th century), Hugo of St. Victor, Otto of Freising, and others are suggestive of an active restoring, catechetical instruction. The Wal- densians, Wiclifites, and other reforming sects gave attention to the subject. On the Waldensian Catechism, see Zeeschel, 'Waldesianer und Böhm. Brüder' (Erlangen, 1835); 'Jahrhundert der deutsche Theologie,' ix, 2, 386.

(3) Since the Reformation.—As the Reformation was a revival of religion for the human intellect as well as for the heart, it naturally followed that the training of children soon came to demand new methods, or the restoration of old methods, of grounding them in the faith. Luther was the father of modern catechetics, both by the way he catechized himself prepared, and by the writings in which he explained Catechetics and gave an impulse to their pursuit. The principal points of Luther's Catechisms are the Decalogue, the Creed, the Lord's Prayer, and the Sacraments (1529). Luther, with true insight, however, taught that catechization should not merely include the hearing of a recitation from the text book, but also an explanation and an application of it to the hearts of the pupils (see prefaces to his larger and smaller Catechism, and also Brüsteim, Luther's Einfuss auf das Volschulwesen, etc., Jena, 1892). Calvin also published Catechisms (1558, 1541), and in the preface to the Catechism for the French, gives the views of the nature and design of Catechisms and of catechetical instruction at length. He defines the Catechism to be 'formula erudiendi pueros in doctrina Christi' (Augusti, Corpus Libror. Symbolicor. p. 460-464). The Reformed churches generally followed: e.g. the Heidelberg Catechism (1563) for the German Reformed; the Church of England Catechism (1558, 1572), etc. The Helvetic Confession (brevis et simplex) makes catechization a duty of positive obligation in the Church: "... pastores, qui juventutem mature et diligenter categ- chuant, prius adfeminae jactantes, explicando Deo et scriptis, S. Scripturam, quam ejus religiosam, et spiritualis principiis, et religiosis nostris capilibus praeceptis" (Capiat xxiv). See also the preface to the Heidelberg Catechism (Augusti, Lib. Symbol. 52° ed.), and the article Catechism. In Germany, after the fervor of the Reforma- tion period, and after the collapse of the theological reign, the catechetical instruction degenerated into a mere formal routine of preparation for confirmation, and the same thing happened in the Church of Eng- land. Indeed, this result appears to be inevitable where baptismal regeneration is believed, and confirmation is made to follow as a matter of course. Spe- ner and the Pietists gave new life to catechetical in- struction by connecting it with spiritual teaching and life (see Hurst, History of Rationalism, p. 90; Thilo, Sperer als Kategori, Berl. 1840). The Church of Rome was compelled to follow the Reformers in catechetical instruction; the Catechism Romanus (1560) became the basis of instruction for both the scholastic theologians and the laity. Bucer, Melancthon, Bucer, and others, in the Middle Ages, in our time, have been important. As any bishop can authorize a Catechism for his diocese, the Romanists have now a great variety, and they are still increasing (see Tholog. Quartalschrif., 1853, p. 443).

The theory of catechization in the Protestant Church grew up gradually from the germs in Lu- ther's teaching, through the period of decay and dry scholasticism, and finally shot up into full bloom in Pietism. Its principles are, 1. That the Catechism of the Church, stamped with its authority, shall be used in instruction; 2. That the instruction is not Socratic, i.e., does not aim to draw out what is in the mind of the pupil, but rather to convey revealed truth to the mind in a way which it can appreciate and understand; 3. That while the pupil is to learn the words of the Catechism by heart, the teacher is to explain and illustrate them from the Bible, and to enforce them on the heart and understanding. Hence, any kind of cateche- tization is to be not merely didactic, but practical. It is farther well settled that the Catechism of each particular church should be taught to the children of that church (1) by parents or guardians in the family; (2) by the Sunday-school teacher, who should always be a constant catechist; and (3) by the pastor, whose catechization should not only be a test of the proficien- cy of the children under home and Sunday-school instruction, but should include exhortation, illustration, and application also. It was one of Spener's glories that he introduced public catechization; and the pas- tor who fails, at fixed times, to catechize the children in presence of the congregation, loses one of the most important means of Christian culture within the sphere of Church life.

Dr. Asbel Green (Lectures on the Shorter Cat- echism, vol. i), in his Introductory Lecture, thus speaks of the advantages of catechization: "The catechetical or questionary form of religious summaries renders them most easily accessible to children and youth, and, indeed, to Christians of all ages and descriptions. For myself, I have no reluctance to state here publicly what I have frequently mentioned in private, that in the composition of sermons one of the readiest and best aids I have ever found has been my Catechism. Let me add, farther, that I have been convinced that a principal reason why instruction and exhorta- tion from the pulpit are so little efficacious, is, that they presuppose a degree of information, or an acquain- tance with the truths and doctrines of divine revelation, which, by a great part of the hearers, is not possessed, and which would best of all have been sup- plied by catechetical instruction. It is exactly this kind of instruction which is at the present time most urgently needed in many, perhaps in most of our congregations. It is needed to imbue effectually the minds of our people with "the first principles of the oracles of God," to indoctrinate them soundly and sys- tematically in the basis of numerous truths and principles, a 'ninth being "carried about with every wind of doctrine," as well as to qualify them to join in the weekly service of the sanctuary with full understanding, and with minds in all respects prepared for the right and deep impression of what they hear."
struct, and teach them the Catechism set forth in the Book of Common Prayer. And all fathers, mothers, masters, and mistresses shall cause their children, servants, and apprentices, which have not learned the Catechism, to be instructed in an obedient manner to hear, and to be ordered by the minister until they have learned the same. And if any minister neglect his duty herein, let him be sharply reproved upon the first complaint, and true notice thereof given to the bishop or ordinary of the place. If, after submitting himself, he shall willingly offend therein again, let him be solemnly dismissed from the church, and upon sufficient proof that so many children of the parish sent unto him as he shall think convenient, in some part of the Catechism. And all fathers and mothers, masters and dames, shall cause their children, servants, and apprentices (who have not learned their Catechism) to come to the church at the time appointed, and obediently attend, and be ordered by the curate, until such time as they have learned all that there is appointed for them to learn. These careful rules, however, have become nearly a dead letter. In the Protestant Episcopal Church, the xxviiiith Canon (of 1892) enjoins that "the ministers of this Church who have charge of parishes or cures are thereby enjoined in instructing the children in the Catechism, but shall also, by stated catechetical lectures and instruction, be diligent in informing the youth and others in the doctrines, constitution, and liturgy of the Church." The Methodist Episcopal Church makes it the "duty of preachers to see that the Catechism is used in Sunday-schools and families, to preach to the children, and to publicly catechize them in the Sunday-schools and at public meetings appointed for that purpose" (Discipline, part v, § 2). "It shall also be the duty of each preacher, in his report to each Quarterly Conference, to state to what extent he has publicly or privately catechized the children in the church;" (p. 144). As the age of ten years, or earlier, the preacher in charge shall organize the baptized children of the church into classes, and appoint suitable leaders, male or female, whose duty it shall be to meet them in class once a week, and instruct them in the nature, d:sign, and obligation of baptism, and the truths of religion necessary to make them wise unto salvation (part i, ch. ii, § 2). The Presbyterian Church makes catechizing "one of the ordinances in a particular church" (Form of Government, ch. vii), and enjoins the duty in its Directory for Worship, ch. i, § 6; also ch. ix, § 1: "Children born within the pale of the visible Church, and dedicated to God in the church of the covenanters, and members of the government of the Church, and are to be taught the Catechism, the Apostles' Creed, and the Lord's Prayer." In the Reformed Dutch Church each pastor is bound to expound the Heidelberg Catechism, and the Classis is bound to see that "the catechizing of children and of all who are brought up in the home, is so diligently practiced (ch. i, art. iii, § 8). The Lutheran and German Reformed churches, not only by their traditions, but also by Church law, are bound to fidelity in catechizing.

3. Literature.—The science of Catechetics was treated by Hyperius, De Catechesi (1570); ed. Schmidt, Helmst. 1788; 2 vols. De Catechesi, ed. P. Voetius, Theol. Theologica, 1616, 4to; Rambach, Wohltuernichtchen Catechism (Jona, 1727, and Lipei, 1736, 8vo). Dr. Watts gave an impetus to Catechetics by his Discourse on Instruction by Catechism (London, 1728; Works, ed. of 1812, vol. v), in which he explained the Catechism of the Westminster Assembly, and gave two smaller Catechisms. A thorough work on this branch of theology, in English, lay at a distance. The relation of the Catechism and of catechetical instruction to the Church and to baptism has not been made so pronounced in the English-speaking churches as in the German. On minor points, especially relating to the ancient Church, Bingham and other English writers have done well. There has been little theory of Catechetics in general, our chief references must be to German writers. Among them are, besides those already mentioned, J. Angemack, Historia Catechetic (8 vols. 1729-40); Walch, Einführung in die katholische Geschichte, etc. (1753); Köhler, Einleitung in die katholische Theologie (1758); the same, Klost. Geschichte der pietistischen Kirche (1758); the same, Kot. Gesch. d. ref. Kirche (1756); the same, Klost. Geschichte d. Wallenauer, u. a. Secten (1756—the four books constituting a body of Catechetical science). Of more or less Rationalistic tendencies are the following: Scheler, Geschichte der katholischen Kirche von der neu-ersten bis zur neuesten Zeit (2 vols. Halle, 1802); Graeff, Lehrbuch der alten Kirche, Kathechistik (on Kantian principles, Göttingen, 1799, 3 vols.; 1805, 1 vol.); Graeff, Grundriss der Alten Kathechistik (1796, 8vo). Of the same school: Schmid, Kathech. Hand- buch (Jena, 2d ed. 1799-1801); Müller, Lehrbuch d. Katholik (Altona, 2d ed. 1828, 8vo). More evangelical, but yet resting on the Kantian philosophy in its French form, is Daub, Lehrbuch der Katholik (Frankfort, 1801, 8vo); and more practical are Schwarz, Katochistik (Giessen, 1819, 8vo); Harnisch (Halle, 1829); Hoffmann, Katochistik (1841). Since the modification of German theology through Schleiermacher's influence, and as still better class of work the spirited, among which are Palmer, Evangel. Kathechistik (1844; 4th ed. 1856, 8vo); Kranssohl, Kathechistik (1843): Plato, Lehrbuch d. Katholik (Leips. 1853, 12mo): Puchta, Handbuch d. prakt. Kathechistik (1861): Zeschschwitz, System der christlich-kirchlichen Kathechistik (1p. 1864, 66. 2 vols. 8vo, the fullest treatise on the subject, but not yet translated). In books of practical theology, Catechetics, of course, is treated in its place. Among Roman Catholic writers we name Gallara, Grundriss d. wahren Kathöch (Freiburg, 1795); Winter, Katholisch (Landshut, 1816, 8vo); Gruber; Müller; and especially Hircher, Kathechistik (1831, 4th ed. Tübing, 1840), whose comprehensive mind, acuteness of mind, and brilliancy of style, are not lost on others, but especially in its true relations to the pastoral work. Among writers in English, see Cannen, Thes. Katholic (London, 1828, 8vo); Doddridge On Preaching, Lecture xvi; Paton, A Manual of Catechetical Instruction (High-church; London, 1851, 12mo); Green, A Manual of the Shorter Catechism (2 vols. 8vo); Alexander, A. A., Manual of Catechetical Instruction (London); Ramsay, Catechetical Instruction (Church of England; London, 1851, 12mo); Aids to Catechetical Teaching (London, 1843, 12mo); Bather, Art of Catechizing (revised by author, N. T. 1847). Catechetical hints may be found in many books on Sunday-school and Bible-class teaching; in particular, the Education of Youth (London); and in the various expositions of the different Church Catechisms. Also Claritas, Encyclopædia Theologica, §§ 99; Siegel, Handbuch der christ. kirch. Alterthümer, i, 940 sq.; Hagenbach, Enzyklöpädie, §§ 99; Pelt, Theol. g. Enzyklöpädie, §§ 103; Harzog, Real-Enzyklöpädie, vols. 15, 16, 17; Alsted, Entstehung der Literatur; Walch, Bibel, Bibliotheca Theologica, vol. i, ch. iv.
CATECHISM

Christian instruction, put forth under the authority of the Church, for the oral instruction of children and prostrate. Generally, at the present day, the Catechism is in the form of question and answer.

1. The Catechism. The name Catechism is derived from κατ' ηδονήν (see CATECHEM). In its existing sense it probably originated with Luther. In the early ages the catechumens (q.v.) were taught the Creed, the Lord's Prayer, and certain rudiments of doctrine (Bingham, Orig. Eccl. bk. x, ch. 1, § 6). Cyril (†880) and Gregory of Nyssa (†394) wrote what would now in substance be contained in a Catechism, as did Augustine (†430) in his Exposition of the Creed. See CATECHETICS. But in Augustine's usage, the word Catechism means the act of preparatory instruction through which the catechumens went before baptism. In the Middle Ages, Kuno of St. Gall (9th century) published the Creed and Lord's Prayer in German, for the instruction of children and ignorant people. Wicliffe also did the same in English, adding the Decalogue. But Luther first gave the name Catechism (1529) to the sum of Christian knowledge made up for elementary instruction into a book. It is possible, however, that the title was taken from the books of Edwards, which the Wittenberg academics before Luther's time in the same sense. See Zschacht, Die Kationismen der Waldenser und böhmischen Brüder (Erlangen, 1863, 8vo).

II. The principal Catechisms. — 1. Lutheranism. — In 1529 Luther published his first short Catechism, containing a short form of the Creed, the Commandments, and the Lord's Prayer; but his experience of the gross ignorance of the people in religious things, especially as seen by him in his visitations of 1527, led him to prepare larger and smaller Catechisms, which afterwards found a place among the symboical books or standards of the Lutheran churches. They are to be found in Hase, Libri Symboles. Die Lutherische (Leipsic, 1847), where a brief sketch of their history is given; also in Francke, Lib. Symbo. Eccles. Lutheran. (Leipsic, 1847). The Catechismus Major was intended for the use of the clergy and schoolmasters, the Minor for the use of the people and the children. The Formular Conciadones calls these Catechisms "quasi laicorum Biblia, in quibus omnibus illius breviter comprehensurunt quae in sacra Scriptura sustinum tractantar" (Pars I, § 6; also Pars II, § 8). The Smaller Catechism is in the form of question and answer; the Larger is not.

The contents of the Smaller are: Par. 1. The Decalogue; Chap. I. The Creed; Chap. II. The Lord's Prayer; Chap. IV. The Sacrament of Baptism; Chap. V. The Lord's Supper; Appendix I. Morning and Evening Devotion; Appendix II. Blessing and Grace at Table; Appendix III. The Home Table (containing a brief summary of ethics). This arrangement of topics is followed also in the Larger Catechism (omitting the appendices), but more simply treated. The German churches still use Luther's Catechism generally, but not without opposition. See Zschacht, System der christlich-kirchlichen Katechesis (Leipzig, 1864, 1866, 2 vols., 8vo.; Nitzsch, Prakt. Theol., i, 191, and Jahrb. d. christl. Theol. v, 86). For the various editions of Luther's Catechisms, and the works written upon them, see Walch, Bibliotheca Th. Logica, i, 452 sq.; Wins, theol. Literatur, pt. xi, pt. xxvii.

2. Reformed. — (1) Genera Catechism. — Calvin drew up a Catechism in French in 1556; in Latin, in 1558 (the Catechesis Christianae). This latter was published in French in 1541, and in Latin, in 1545. Its headings are: 1. Doctrine, or Truth (the Apostles' Creed); 2. Duty (the Decalogue); 3. Prayer (the Lord's Prayer); 4. The Word; 5. The Sacraments. Attached is a form for public prayer and the administration of the sacraments (see Calvin, Opera, Geneva, 1617, vol. xxv, 12 sq. In English, it was speedily translated into other languages, and adopted in the Reformed churches of Switzerland, France, England, Scotland, Hungary, and the Netherlands. As late as 1578 it was ordered to be used in the University of Cambridge, England. See Köcher, Katechet. Gesch. der reform. Kirche, Jena, 1786, 8vo, 210 sq.; Bonar, Catechisms of the Scottish Reformation.

(2) Heidelberg. — The most important of the Reformed Catechisms is that of Heidelberg, compiled by Caspar Olevianus and Zacharias Ursinus, at the request of the Elector of the Palatinate, Frederick III, and published at Heidelberg in 1562. After its approval by the Synod of Dort (1618), it became one of the symbolical books of the Reformed churches of the northern nations, as well as of the German Reformed Church. It may be found in Latin in Augusti, Libr. Symbol. 592 sq.; in English in many separate editions. The best English version is that of the Psevonom (N.Y. 4to, 1683); the best German ed. is that of Schaff (Philadelphia, 1866, 1880). In view of the special importance of this Catechism, it is treated in a separate article. See HEIDELBERG CATECHISM.

Church of England. — We give the following account from Procter, On Common Prayer, chap. v:

"Previously to 1661 the Catechism was inserted in the Order of Confirmation. The title in the Prayer-Book was Catechism. The Act of 1592, 23 Eliz. c. XXVIII., contains a Catechism for Children; and in 1604, The Order of Confirmation, or laying on of hands upon children baptized, and able to render an account of their faith according to the Catechism following; with a farther title to the Catechism itself, that is to say, An Instruction to be he done of every Child before he be brought to be confirmed by the Bishop. The insertion in the Prayer-book of such an authorized exposition of the elements of the Christian faith and practice belongs to the Reformation. English versions and expositions of the Lord's Prayer and Creed had existed in early times. But immediately before the Reformation, it appeared that these elements were not known generally. The origin of the rubrics about catechizing may be referred to the injunctions issued in 1586 and 1598 (Strype, Eccl. Mem. Hist. VII, i, 42), which ordered the curates to teach the people the Lord's Prayer, the Creed, and the Ten Commandments, sentence by sentence, on Sundays and holy days, and to make all persons recite them when they came to confession (Burnet, Hist. Ref. i, 101, ed. Nares [Records, book lii, No. x]). As soon as a book of service was prepared, a Catechism was placed in it, that the exposition of these Christian elements might not depend on the care or ability of the curates. This manual still remains in service in the Prayer-book in the form of the 'Ten Commandments' and the addition of an explanation of the sacraments in 1604. The composition of this latter part is generally attributed to Bishop Overall, who was the prolocutor of the Convocation, and at that time dean of St. Paul's. It was added by royal authority, by way of examination, in compliance with the wish which the Puritans had expressed at the conference at Hampton Court (Cardwell, Conv. p. 187), and, with two emendations, was afterwards confirmed by Convocation and Parliament in 1661.

"An intention was formed, in the time of Edward and Elizabeth, of passing also another authorized Catechism for the instruction of more advanced students, and especially those in public schools, touching the grounds of the Christian religion. The original of this work is ascribed to Poyntz (Oriz. Lett. [Park Soc.] ii, 268, 304, 356, 357, 364, 365)."
which were adopted by many teachers, and occasioned much complaint as to the want of a uniform system of religious instruction (see Hardwick's Hist. of the Articles, p. 106 sq.). Of these the Cathedral of Erasmus (1547), ordered to be used in Winchester College and elsewhere; the Smaller and Larger Catechisms of Calvin (1548 and 1545), that of Ecolampadius (1546), Leo Judas (1558), and more especially Bullinger (1559). Even in 1578, when the exclusive use of Notker's Catechism had been enjoined by the Council of 1571, those of Calvin, Bullinger, and others were still ordered by statute to be used in the University of Oxford (see Cardwell, Doc. Ann. i. 300, note). Hence it was agreed by the bishops in 1561 that, besides the Catechism for children which were to be confirmed, another somewhat longer should be devised for communicants, and a third, in Latin, for schools. It is probable that at this time Dean Nowell was employed upon such a Catechism, taking Poynter's as his groundwork; so that it was completed before the meeting of Convocation (Nov. 11, 1562), by which it was approved and amended, but not formally sanctioned, as the only form of Larger design, which was not realized, viz. to publish Nowell's Catechism, the Articles, and Jewell's Apology in one book 'by common consent to be authorized, as containing true doctrine, and enjoined to be taught to the youth in the universities and grammar-schools through the land.' The Catechism, therefore, remained unpublished until 1570, when it was printed at the request of the archbishops, and appeared in several forms, in Latin and in English. The Larger Catechism, in Latin, intended to be used in places of liberal education, is reprinted in Bp. Randolph's Enchirid. Theologicum, vol. ii. Its title is 'Catechismus, sive prima institutionis, disciplinarum pietatis Christianae, Expositio pro explicatis.' In the same year it was translated into English by Norton. Also an abridgment of it, called the Shorter or the Middle Catechism, was prepared by Nowell for the use of schools. He also published a third, called the Smaller Catechism, differing but slightly from that in the Book of Common Prayer. It is probable that Overall abridged the questions and answers on the Sacraments from this Catechism (see Churton's Life of Nowell, p. 185 sq.; Latbury, Hist. of Convoc. p. 167 sq.). Cranmer's Catechism was reprinted, London, 1529, 8vo.

Several commentaries on the Catechism are: Nicholson (Bp.), An Exposition of the Catechism of the Church of England (2d ed. Oxf. 1844, 8vo); Beveridge (Bp.), Church Catechism Explained (12mo); Nixon (F. R.), Lectures, Historical, Doctrinal, and Practical, on the Catechism of the Church of England (2d ed. Lond. 1847, 8vo); Fitzgerald (A. D.), Lectures on the Church Catechism (12mo); James (J.), A Commentary on the Church Catechism and Occasional Offices, or the Mother's Help (Lond. 1842, 12mo); Secker (Arp.), Lectures on the Church Catechism (12mo); Burnett's Exposition of the Church Catechism (8vo). John Wesley says of it: 'Our Church Catechism is utterly improper for children of six or seven years old' (Works, N. Y. ed. vii, 170).

4. Presbyterian Church. — The Westminster Catechisms, with the Westminster Confession of Faith, constitute the standards or symbolical books of the Presbyterian churches. They were prepared by committees of the Westminster Assembly; the Shorter Catechism was presented to the House of Commons November 5, 1647; the Larger, April 5, 1648; and by resolution of September 15, 1648, the Catechisms were ordered printed by authority, for public use. The shorter is not an abridgment of the larger, but the latter is an expansion of the former. They were both adopted by the General Assembly of the Church of Scotland in 1648. The Shorter Catechism 'has been, and still is, in almost universal use among Presbyterians speaking the English language, and to a considerable extent among Independents and Congregationalists both in Britain and America. In Holland, also, a translation of it has been much used. It is very generally regarded, by those whose doctrinal views are in accordance with it, as an admirable compend of Christian doctrine and duty. The authorship of the Westminster Assembly's Catechism has been the subject of much debate, or at least the authorship of the first drafts of them, it being admitted that they were prepared with the assistance of that Assembly. But the probability appears to be that the authorship is to be ascribed entirely to these committees, and that, like the Westminster Confession of Faith, they are thus the result of the joint labors of many. From discoveries recently made by Dr. M'Crie, it seems probable that at least the plan or scheme of the Shorter Catechism is to be ascribed to Mr. Palner' (Chambers, s. v.).

There are numerous editions of the Catechisms; the latest are those of the Presbyterian Board of Publication (Philadelphia). They teach the Calvinistic theology. Among the many commentaries on the Catechisms, we may mention: J. S. Bruce, Shorter Catechism (Philadelphia, 1841, 2 vols. 8vo); Bulpage, Exposition of the Assembly's Catechism (London, 2 vols. 12mo); Fisher, Exposition of the Assembly's Catechism (London, 1819, 12mo); Paterca, The Shorter Catechism (London, 1841, 12mo); Vincent, The Catechism Explained (London, 1847, 12mo); The Westminster Shorter Catechism (N. Y., 1849, 11mo).

5. The Method of Church. — In the Wesleyan Methodist Church, in England, the Catechisms in use are three, arranged in gradation, for pupils of different ages, by the Rev. Richard Watson. They are printed as The Wesleyan Method at Catechisms. For many years these Catechisms were used also in the Methodist Episcopal Church in the United States, together with A Short Scriptural Catechism, prepared by the Rev. J. Edmondson (?). In 1848 the General Conference ordered the preparation of a Church Catechism, which was undertaken by the Rev. Dr. Kidder (then Sunday-school Editor), who, with the aid of other divines, prepared a series of Catechisms which were approved and adopted by the General Conference of 1852. They are published as Catechisms of the Methodist Episcopal Church, No. 1, 2, 3 (New York, Methodist Book Room). The series does not consist of three separate Catechisms, but is divided into the three stages of knowledge in the Christian life, the language of the basis being unchanged in the different numbers of the series. No. 1 is the Catechism; No. 2 is the same, with the addition of numerous Scripture proofs and illustrations printed side by side with the several questions and answers; No. 3 expands the answers of No. 2 and presents the proofs of No. 2 into something like a system of Christian doctrine in a condensed form. The Catechism proper is taken up section by section, and a summary is given, in comprehensive language, of the subject-matter of each section. Then follow a full analysis of the section, a number of explanatory and practical questions, and a set of definitions. The outline is as follows: 1. God: § 1. The Nature and Attributes; § 2. The Persons of God. II. Creation: § 1. The World; § 2. Man. III. Man's Fall and Sinful State: § 1 Sin; § 2. Guilt, Prevalence, and Consequences of Sin. IV. Salvation: § 1. The Source and Grounds of Salvation, viz.: The Love of God in Christ, and Redemption through Christ; § 2. Conditions of Salvation; § 3. The Fruits and Extent of Salvation. V. The Means of Grace: § 1. The Church and Ministry; § 2. The Sacraments: (1.) Baptism; (2.) The Lord's Supper; § 3. The Word of God and Prayer. VI. God's Law: Duties to God and Man. VII. The Eternal State: Eternity. Appendix: The Beatitudes; The Lord's Prayer; The Ten Commandments; The Apostles' Creed; Baptismal Covenant; Examples of Prayers for the Young.
CATECHISM

6. The Church of Rome.—In the Church of Rome the Tridentine Catechism (Catechismus Romanus) is a book of symbolical authority. It was prepared in o'edience to a decree of the Council of Trent (Sess. 21, de Ref. c. 7), by archbishop Leonardo Marino, bishop Agidius Roccaferrari, and the Portuguese Dominican Francisco Fureire, with the aid, as later writers (e.g. Tiraboschi) conclude, of Musio Calcini, archbishop of Zara; revised by cardinals Borromeo, Siret, and Antonian; and sanctioned by Pope Pius V. It was published at Rome in 1566, the Latin version being either by Paulus Manutius or Poggianus. The Council of Trent had ordered (l.c.) that the Catechism, when prepared, should "be faithfully translated into every separate language of the people; that the people may understand the words spoken to the people by all pastors." It was subsequently approved by special bulls, and adopted by votes of provincial synods in the various Roman Catholic countries. It consists of four parts: the Apostles' Creed, the Sacraments, the Decalogue, and the Lord's Prayer. It is one of the standards of doctrine in the Church of Rome, though the Jesuits deny its symbolical authority. Möhler refuses to it the character of a "public confession," but admits "the great authority which undoubtedly belongs to it." (Symbolism, Introduction, p. 102; see also Elliott, Dissection of Romanism, bk. i, ch. 1; Cramp, Text-book of Popery, ch. xxi). The Catechism was reprinted by Centlivres in 1667, but is a manual for the use of pastors. It was not originally in the form of a question and answer, but some of the later editions took that shape. There is an English translation by Dr. Donovan, of Maynoff College (Dublin, 1829; Baltimore, n.d. 8vo). Cramp remarks of this translation that it "suppresses or alters such passages as express the peculiar tenets of popery in too open and undisguised a manner," and furnishes proofs of the charge (Text-book of Popery, p. 430). Besides the Catechismus Romanus, numerous other Catechisms have appeared within the Church of Rome from time to time. The most important are those of Canisius (q. v.), the Jesuit (1544 and 1566), which have been largely used from that time to this, especially in Germany; and that of Bllarme (1603), and of Bossuet (1687). On recent Roman Catholic Catechisms, as compared with Canisius, see Theologische Quartalschrift, 1869, i, p. 143. The former (in Herzog, Real-Encyklop., s. v. Catechismus) remarks that the only Church without an authorized Catechism is the Greek Church. But a Catechism prepared by Mogilas, metropolitan of Kiew (1642), was recognised by a synod of Jerusalem (1672) as a standard.

The Council of Trent, Catechism was drawn up by Schomann, 1574, for the Polish churches; it is made up chiefly of verses of Scripture. 2. The Catechism of Faustus Socinus was published at Racovi, 1518, in an unfinished form, owing to the death of Socinus, under the title Christi Religio, brevissima instituti, etc. 3. The C. concilii Catechismus, larger and smaller, composed for Moscow by Fontan, nobleman, and Schmalz, a Socinian minister (Latin, Racovi, 1669, 12mo; new ed. by Crellian, 1830, 4to; and another, with refutation, by Eber, Frankfort and Lips. 1739, 8vo; English translation by Ross, Lond. 1818, with preface, treating of the literary history of the Catechism.

There have been many Catechisms prepared by individuals and used in various countries and churches, but as none of them have been clothed with symbolical authority, we do not attempt to give a list of them. —Smith's Hist. of the Church, vol. ii, section 522; Sheldon, Hist. and Proc. of Conv. of London, vol. ii, 457-458; Smith's Gieseler's Hist. of the Church, vol. iv., § 193, 190; Wüstenberg, Lehrbuch der Kathol. Theol., 11. ix., ch. iv.; Leiser, De Exercit. Reform. (Ueberf, 1827, 8vo); Winer, Theol. Lit. hist., § 106; Walch, Bibelam schescundas, ii, ch. vi.; Herzog, Real-Ency clopaedie, vii, 454 sqq.; Zettelcrift f. lit. Theol., 1865, p. 300.

Catechism, i.e. catechizer, in the ecclesiastical sense, one who teaches religion to children as neophytes, catechetically. For the derivation, see CATHERCHET, 1. (1) At first it was the office of the bishop to prepare the catechismus for baptism, as well as to admit them into the Church by that sacrament. But in course of time it became impossible for the bishops to devote the requisite attention to this part of their work, and consequently they transferred it to such presbyters and deacons as they deemed competent to the undertaking. They were called catechetes; and their employment was considered peculiarly honorable, as requiring the possession and use of eminent talents and qualifications. But there never was a separate office of catechist. The work was only a function, assigned, as need arose, to persons capable of it. Cyril of Jerusalem and Chrysostom (Hom. 21 ad popul. Antioch.) were originally catechists. They were sometimes called by a figurative name, ναοτολόγοι, that is, those whose office it was to admit passengers to the temple and contract with them for the fare. The Church, by a well-known figure, was compared to a ship; the bishop was ο μητρώος, the pilot; the presbyters, οι ναυτικοί, the mariners; the deacons, οι ροιχαρχοί, the chief rowers; the catechists, οι ναοτολόγοι. It was properly the catechists' duty to show the catechumens the contract they were to sign, and to make, and instruct the children in the art in order to their admittance into the Christian ship. The deaconesses were also catechists to the more ignorant and rustic women catechumens, which proves that catechists were not necessary to the clerical order. Origen, when only eighteen years of age, and consequently when incapable of being ordained a deacon, was appointed a catechist (Eusebius, Hist. Eccles. vi, 3). (2.) In the modern churches, ministers are generally required by Church law to be catechists (i.e. for the instruction of children); and since the growth of the Sunday-school (q. v.), the Sunday-school teachers are, or ought to be, all catechists. —Farrar, Eccles. Dict. s. v.; Bingham, Orig. Eccles. bk. iii, ch. x; Coleman, Christian Antiq., ch. iv, § 8; Krause, De Catechesi primi tiae ecclesiae (Lips. 1704); Siegel, Aftertämer, p. 340.

Catechumen, in the ancient Church, candidates for baptism, who were placed under a course of religious instruction in order to their admission into the Church. For the derivation, see CATECHETES, 1. They are classed by ancient writers as members of the Church, but the lowest order of members (e.g. Origen, Eusebius, Jerome; cited by Bingham, bk. i, ch. iii).

1. Names.—Besides the name catechumen, they were called catechumen (cudodul) by the Gallican Church, and in the East, by Latin writers, was aptly expressed in so wise on their admission to the Church. They were also called novitii, tyronum Dri, rudes, incipientes (e.g. by Tertullian, De Pa ni ment. c. vi.; and by Augustine, De Fide ad Catechum. lib. ii, cap. 1).

2. Admission to the Catechumenate.—Heathens were admitted to the catechumenate by the imposition of hands and prayer, with the sign of the cross. The children of believers were admitted as soon as they were of age to receive instruction, but there does not appear to have been any specific age fixed at which Jewish and heathen converts were considered as catechumen. The lowest age for this purpose was to Constantin the Great was in this class. But it was essential that they should not have been baptized.

3. Period of the Catechumenate.—The time spent in preparation varied according to the usages of various churches, and particularly according to the proficiency of each individual. In the Apostolic Constitutions these three years are fixed (ch. vii., 14); but by the Apostolic Constitutions of the Council of Elberius, A.D. 673, two years; and by that of Agatha, A.D. 506, eight months. Sometimes the catechumenate period was limited to the forty days of Lent. Socrates observes that, in the conversion of the Burgundians, the
CATECHUMENS

French bishop who converted them took only seven days to catechise them, and then baptized them. But, in case of sickness or imminent death, the catechumens were immediately supplied with what was called clinical baptism. Cyril of Jerusalem and Jerome direct the catechumens to observe a season of fasting and prayer forty days.

4. Classes of Catechumens.—They were early divided into separate classes, the number and names of which were somewhat different. The Greek canonists, following the practice of the church fathers, spoke of the ἀπόστισμα, the uninitiated, and the προστάτες, the more advanced. Suidas distinguishes them as ἑκρύφωμοι, such as were occupied in learning, and ἆφαρμοι, such as are engaged in devotional pursuits. Binham specifies four classes: First, the ἔκτρωμοι; or those who had professed privately without the Church, and kept at a distance from the privilege of entering into the Church for some time, to make them the more eager and desirous of it. The next degree above these were the ἑκρύφωμοι, the esclaves, or hearers. They were so called from being admitted to hear sermons and the Scriptures read in the Church, but not allowed to take part in the offices of the Church. The third sort of catechumens were the γοναθέωνες, the young, or knoers, so called because they received imposition of hands kneeling upon their knees. The fourth order was the βαπτισμείον, the candidate and elect, which denote the immediate candidates of baptism, or such as were appointed to be baptized the next approaching festival, before which strict examination was made into their proficiency under the several stages of catechetical exercises. The age, sex, and circumstances of the catechumens were duly observed, men of age and rank not being classified with children (Antiquitatis, bk. x, ch. ii, § 2).

5. Instruction and Admission to the Church.—The exercises of the parties till their union with the "believers" were generally directed with reference to their preparation for baptism. They were required to attend to various doctrinal and catechetical instruction, to reading the Scriptures, etc. One of Chrysostom's homilies (ed 2 Cor. 5) is an exposition of the prayer of the Church for the catechumens (see Ncander, Life of Chrysostom, tr. by Stapleton, Appendix to vol. 1). That part of divine service which preceded the common prayers of the communicants at the altar, that is, the psalmody, the reading of the Scriptures, the sermon, etc. was called μέσα catechumenorum, because the spirit of the liturgy was not complete at this part of the service. The advanced classes before baptism were subjected to repeated examinations, and, in later times, to a kind of oecumism, accompanied by the imposition of hands; they received the sign of the cross, and insurrection, or the breathing of the priest upon them. They also passed many days in fasting and prayer, and in learning the Apostles Creed and the Lord's Prayer. Some days before baptism they were required to wear a veil. Their mode of admission was simple. The bishop examined the candidate, and, if he was found worthy, enrolled his name in the roll of candidates. The sacristy was included by prayer, by the imposition of hands, and by the signing of the cross.

"No such arrangement as the catechumenate is indicated in the New Testament: when an individual professed faith in the Lord Jesus Christ, he was immediately admitted to the initiatory rite of Christianity. All lower classes, as to their knowledge or attainments, were equally entitled to the outward rite, as they were to the inward and spiritual grace. But when the Church was augmented by the accession to her pale of large numbers from heathenism, and when her purity was no longer guarded by the presence of the great numbers who possessed the power of discerning spirits, the custom of deferring the admission of members was adopted, in order to obtain satisfactory evidence of their fitness to be enrolled in the rank of the disciples. The experience of the primitive Christians had taught them that the gross numbers of idolaters were not at once relinquished for the pure and spiritual principle of the Gospel, and that multitudes of professed believers held their faith by so slender a tie that the slightest temptation plunged them again into their former sensuality. The protracted inquiry into the character and views of candidates for admission into the Church was therefore designed, if possible, to enable the ecclesiastics to examine those persons, who had disturbed the peace and prosperity of the Church, and may be traced to a laudable desire of instructing young and uninitiated converts in the principles of the Christian faith."

In modern Christian usage, the words catechumen, catechumens, are not found in the books of Church law, except with historical reference to the ancient Church. But the things designated by these terms have always existed, and the terms themselves appear likely (and very properly) to come into use again, to designate the children of the Church and their period of instruction preparatory to confirmation, in the same way as they were formerly used for the churches which obtained permission to admit catechumens in full membership, in those churches which do not. In the Methodist Church in England the term has been revived, especially in the efforts of the Rev. S. Jackson to establish a fixed method and course of instruction for young persons between childhood and puberty (see the volumes of Reformer, London). The whole subject is also carefully discussed by Zschätzchitz, System der christl. kirchl. Kauthechistik (Leipzig, 1862, i, 70 sq.).

See the copious treatment of the ancient catechumene by Bingham, Origins Ecclesiæ, ch. x; and Coleman, Ancient Christianity, ch. vii, sec. vi, § 7. See also Siegel, Alterthümer, i, 384 sq.; Pfänner, De Catechumenis, Antiquæ Ecclesiæ (Frankfort et Gotha, 1688, 4to); Farrar, Ecclesiæ Dictionarium, s. v.; Buck, Theol. Dictionarium, s. v.; Ncander, Church History, i, 856; and the article ARCANI DISCIPLINA.

Catena (a chain), in Biblical criticism, is an exposition of a portion of the Scriptures, formed of collections from various authors. Thus we have Catena of the Greek fathers by Procopius, Iy Olympiodorus, and by Nicephorus, on several books of the Old Testament. Poole's Synopsis may be regarded as a catena of modern interpretations of the Bible. The ancient catena seems to have originated in the short scholia, or glosses, which are present only in the margin of the Scriptures to introduce the margin. There, degrees were expanded, and passages from the homilies or sermons of the fathers were added. The most celebrated catena is the catena aurea of Thomas Aquinas, which was translated at Oxford under the superintendence of Mr. J. H. Newman. The subsequent conduct of Mr. Newman has led those who were willing to attach some authority to that work to examine it carefully, and the result has been the detection that Thomas Aquinas has sometimes modified the quotations he has made from the fathers; and the whole, as a commentary, is a monument of the reformation and modern theologians (Farrar, Ecc. Diction. s. v.; Book, Ch. Dictionarium, s. v.).

The application of this name to works of this sort has been attributed to Thomas Aquinas in consequence of the above collection on the four Gospels; but it is of later invention appears from the fact that the older editions of his work bear the title of glossa continua, according to what was the customary phraseology of the time, and that Thomas himself, in his dedication to Pope Urban IV, calls his work continua expositionis. The early names for these among the Greeks were παντοτικα ὁμορροις, συναγωγας ἡγεομεν, συναγω- γας ἀπαστρατισμων, etc., and others. The name is much more justly descriptive of its contents than the later names γοναθεια κεφαλας και συναγωνας. These catenas are
terms also indicate a creature whose chief characteristic is voracity, and this attaches to all the species of locust. The ancients, indeed, concur in referring the word to the locust tribe of insects, but are not agreed whether it signifies any particular species of locust, or is the name for any of those *states* or *transformations* through which the perfect insect passes. The Latin locustae. In some passages it ascribes *flight* to the *papio*; and speaks of it as a distinct species; and in the former particular, especially, it is difficult to suspect it of an egregious error. The statement of Aristotle is also worthy of notice, who speaks of the *attacabos* as a mature insect, for he refers it to its transformation and eggs (Hist. An. v. 29). The arguments and speculations of the most eminent modern writers may be seen in Bochart, Hieroz. ed. Rosenmüller, iii. 256 sqq. (Lips. 1739–6). See *Locust*.

Cathari (*cæcatoi*, *pars*) or Cathariests (q. d. *Puritans*), a name given at different times in Church history to different sects; all, however, characterized by aiming at, or at least pretending to, peculiar purity of life and manners. 1. It was assumed by the Novatians in the third century, who excluded from the Church all who fell into sin after baptism. See Novatians. 2. The name of Cathari was also given to the twelfth century to the sects of the Albigenses, Vaudois, Pitarini, and others. The Roman Catholic historians abound in frightful accounts of the heresies and immoralities of all these sects, to whom they attributed all the bad men and bad deeds of their times. Some modern Protestant writers, yielding too ready credence to the Roman historians, regard the Cathari as if they were all dualists, if not Manicheans. The truth seems to be that the origin of most, if not all, of the sects above named is to be sought in circumstances of general operation, and principally in a prevailing sense of the corruptions of the dominant Church, and of her perversion of the pure and simple faith. This natural and thus originated professed dualistic doctrines is not to be doubted; that all were corrupt in doctrine and life is probably an invention of their persecutors. See *Albigenses*.

1. History.—The origin of the Cathari is unknown; the name itself, though Greek, and indeed of Oriental origin. That an earnest spirit of protest against the corruptions of Rome arose in Western Europe during the Middle Ages, and manifested itself especially about the thirteenth century, is certain; but the doctrines and some of the rites of the really dualistic Cathari were doubtless derived from the East. It was formerly thought that the Cathari were indeed the descendants of the Manichees of the third and fourth centuries; but this view is now abandoned. There is no subtle religious philosophy like that of the Manicheans found among the Cathari; their whole system was popular rather than mysterious. According to the Manicheans, the creation is the result of the union of the soul of the world with matter, while the Cathari taught that the whole material creation was exclusively the work of the evil principle. Above all, there is among them no trace of the profound personal reverence for Manes, and worship of his memory, which was one essential characteristic of the Manichean system, who looked upon his founder as the Paraclete promised by Jesus to his disciples. The Priscillianists succeeded the Manichees in the West, and the Paulicians in the East; yet these latter, properly Syrian Gnostics, excrated Manes. The Paulicians were thought by Mosheim, Gibbon, and Maitland to have been the immediate religious ancestors of the Cathari. It is
well known that numbers of those revolutionists were transplanted into Thrace by Constantine Cophonynus about the middle of the eighth century. Yet the Paulicians had no rites or ceremonies whatever, no ecclesiastical or hierarchical organization, they were strangers to ascetic abstinence from animal food, and did not condemn marriage. Such radical differences as these will not allow us to suppose the heterodox movement of Southern and Western Europe to have been a simple transplantation of Asiatic Paulicianism, though this second source—more or less directly—to the formation of Catharism. The fact seems to be that Dualism manifested itself in Christendom at different periods under various successive and independent forms” (Lond. Quart. Rev., iv, 10).

Schmidt assigns it a Slavonic origin (South Macedonial, and ascribes its introduction into Italy to Slavonic traders. The first Cathari in Italy were found about A.D. 1035 near Turin, and their chief and others were burned. By the twelfth century they were established at various points, from Upper Italy to Calabria. A Romanist writer has recently sought to show that Dante was a Catharis (Avue, Dante hérétique, Paris, 1892, and Dante de l'Eglise Alphérié, Paris, 1896). In the thirteenth century, Pungibio, said to have been a Catharist, but a man of eminent charity and goodness, came near being canonized by the Roman Church. See CANONIZATION.

The greatest successes of the Catharists in Western Europe were in France, where they were either identical with the Albigenes, or confounded with them. See ALBIGENES. During the twelfth century they, and all other heretics from Rome, suffered grievous local persecutions; but there “had been no general, persevering, systematic attempt to exterminate them. Meanwhile they had spread from Constantinople to Spain, they were masters in the Slavonic provinces which now form the north-east of Turkey; they were formidable in Lombardy; they had audaciously insinuated themselves into the pontifical city itself; above all, the only transalpine nation that had emerged from barbarism had almost thrown off its allegiance to Rome; heresy sat enthroned in a central region, whence, in one generation, it could spread over France, Spain, and Italy. The Church was in peril; but the year 1198 witnessed the beginning of a pontificate in which an iron will was put to forth in her service all the resources of rare intrepidity, unremitting vigilance, and a special and extraordinary spirit of war. The very incarnation of the idea of the papacy; he was distinguished by precisely the sort of character and talents which were qualified to effect the purposes of the hierarchy of which he was the head.” During his pontificate, the cruel crusades against the Albigenes and Cathari, which have made the names of Innocent and Dominic notorious in history, swept away thousands of Catharist Dualists and of simple-minded Albigenes together. See ALBIGENES. There were congregations of them enough to constitute whole dioceses in the thirteenth century; but the Inquisition, directed by Innocent III, and established by the Council of Toulouse, 1229, for the purpose of putting down heresy, pursued them relentlessly; so that after the fourteenth century no traces of them are to be found.

11. DOCTRINES. — The heretical Cathari held to Dualism, i.e. to God as the original good, and to an evil principle as the author of evil. This is a simple, and, to an uneducated mind, a natural solution of the problem of the origin of evil. The heretical Dualists held that the evil principle was an original one as well as the good. The struggle between them is eternal. “It was believed that some souls had been created by the evil being, and, of course, would never be saved. Such were all strong sinners, tyrants, persecutors, enemies of God and of the Church. After the good God, had been seduced from the heavenly world above by Satan, who disguised himself, for the purpose, as an angel of beauty and light. These were condemned to expiate their offences in earthly bodies, and to pass from one body to another, sometimes even, as an additional punishment, assuming the shape of animals, until, at last, they should obtain deliverance from their terrestrial hell by being admitted into the true Church. The consolation (see above) reunites the exiles to their guardian angels (called ‘Holy Ghost’ or ‘Paraclete’), of whom there is a distinct one for every soul of heavenly creation. St. Paul, in particular, had succeeded in rescuing men directly with his apostles.” St. Paul, in particular, had succeeded in rescuing men directly with his apostles. Of course there was to be no real resurrection.”

The majority of the Cathari held to a more moderate form of Dualism. Of this class were the Bogomiles (q. v.), in Slavonia and the East; and in Italy, the Concorlarians or Concaccianes, so called from a corruption of the name of the town Corias, in Dalmatia. They held to one God, who created matter from nothing; but the arrangement of matter into the existing form of the visible world, in which so much evil exists, was due, not to God, but to a fallen spirit—an exceedingly mighty angel, who seduced a third of the heavenly host. The absolute Dualists held that all souls came to the world from the evil principle. They maintained that Adam and Eve were created (their bodies by the evil power, their souls from God), and that all souls are derived from them. Hence the metaphysic of the absolute duality had no place in their system. The Word of God, both in the O.T. and in the New Testament, was interpreted in a mystical theory. Jesus Christ, the highest of created beings, was sent from heaven to teach the captives the secret of setting themselves free from the chains of matter and of evil. He came in an ethereal form, which had only the appearance of the human form; for, as he said himself, he is “from above” (John viii, 28); or, as St. Paul said, from heaven (1 Cor., xvi, 47). He expressly denied having inherited anything from his mother (John ii, 4). He had but the likeness of flesh (Rom. viii, 8; Phil. ii, 8). It was for this reason that he could walk upon the water; and this was the glory revealed on the Mount of Transfiguration. His death, not being real, was but an apparent triumph of the evil one.

In Ethics, all classes of Cathari held that sin is “the last after the created.” The world, as the work of the evil one, is evil, and all contact with it leads to sin. Among mortal sins were wealth, war, killing of animals, and the like. After the death of the soul, the evil soul fell out of wedlock (inasmuch as it increases the number of fallen souls). Purification from sin was to be obtained by renouncing the world and entering the Church of the Cathari, out of which salvation could not be had.

11. Usage. — The various sects of Cathari agreed very generally in their usages, however they might differ in doctrine. There were two classes of members, the perfect (perfecti) and simple believers (credentes). The former were admitted by the “spirit-baptism,” called the consacratio, the ceremony being a simple imposition of hands. (Water baptism was then rejected.) By the andression of hands, the soul was said to be imparted, and the recipient became one of the perfect. To this class belonged the actual authority of the Church; they administered its rites, and governed it as successors of the apostles. A manuscript in the Romance language was discovered in 1651, and is now in the Palais des ducs at Lyons, written by Cunitz, Jeruzalem, 1582; also in the Strasburg Beiträge z. d. theolog. Wissenschaften, vol. iv, 1582. It contains a short liturgy, beginning with the Lord’s Prayer, the Doxology, and the first seventeen verses of St. John’s Gospel in Latin. Then follow in Provençal, first, an act of confession; secondly, an act of reception among the number of the perfect; thirdly, an act of receiving among the number of Christians or Perfects; fourthly, some special directions for the faithful; and, lastly, an
CATHARI

act of confession in case of sickness. The formula for the act of confession terminates with the following prayer:

O thou holy and good Lord, all these things which happen to us in this life, we know not whether in our thoughts we do man, or they do us. Let them, therefore, be justified, holy Lord; and all the multitude of sins we lay upon the mercy of God, and upon holy prayer, and upon the holy Sacraments of the Church, which are our sains. Of this act and of the remission of the sins, and of the blessing and of the communion of the flesh; have mercy on the flesh born of corruption, but have mercy on the spirit placed in prison, and admit them, O Lord, in days and hours of remission, and of fasts, and orisons, and preachings, as is the custom of good Christsians, that we may not be judged nor condemned in the day of judgment with falseness.

The first degree of initiation, or the act of reception into the number of believers, is called "the delivery of the orison," because a copy of the Lord's Prayer was given to the neophyte. It begins thus:

"If a believer is in abstinence, and the Christians are agreed to deliver him the orison, let them wash their hands, and the believers present likewise. And then one of the bone homines, the one that comes after the elder, is to make three bows, and then to prepare a desk (dece) then three more bows, and then he is to put a nappin (tunica) upon the desk, and then three more bows, and to put the book upon the nappin, and then let him say the benedicte, parens nobile.

And then let the believer make his salute, and take the book from the hand of the bishop, and he adorns him, and preach from fitting testimonies (that is, texts). And if the believer's name is Peter, he is to say, 'St Peter, you may do what you wish, and let your hands be covered with the book of the Lord, and have nothing to fear from the Church of God, you are before the Father, and the Son, and the Holy Ghost. For the Church is called assembly: and where are the true Christians? The Father, the Son, the Holy Ghost.'

The final initiation, or consolamentum, is called "the baptism of the Spirit." Here is an extract from the formula of its celebration:

Jesus Christ says, in the Acts of the Apostles, that "John was baptised with water; but ye shall be baptised with the Holy Ghost." This holy baptism of imposition of hands wrought Jesus Christ, according as St. Luke reports, and he said, "The Holy Ghost will come upon you, and your hands shall work it." And their hands lay on the sick, and they shall receive good. And Ananiah wrought this baptism on St. Paul when he was at Ephesus. And afterwards Peter worked it in many places. And St. Peter and St. John wrought it on the Samaritans. This holy baptism, by which the Holy Ghost was consecrated, and the Church of God hath it from the apostles until now; and it has come down from bone homines to bone homines, and it will do so to the end of the world.

The perfect were bound to special fasting and abstinence—from property, and from marriage. They had signs by which their persons, and even their houses, could be recognised by the initiated. Rainiarius (apostatized from Catharism to the Church of Rome) estimated the number of "the perfect" at about 4000 in all Europe. The credentes, or simple believers, were not subject to these restrictions, nor were the ecclesiastics, but were bound to confession to their ministers, and to seek the consolamentum before death, as essential to salvation unattainable by the great mass of mankind.

With them, quite as much as with the Roman Catholics, salvation was made to depend upon adhesion to a given religious community, and as the auditors generally put off receiving the consolamentum to the hour of death, this ceremony became invested with a magical virtue, like the sacraments of the dominant Church.

Their religious services were entirely free from the pomp and display of the Established Church. The place of worship were destitute of ornaments, crosses, and images; at one end was the New Testament. Worship consisted of reading the Scriptures, exposition of it, and prayer. They rejected the baptism of the Church of Rome both because the hierarchy was not the true one, and because water was created by the sacrifice of animals, it being the mark of the devils, and substituted the blessing and breaking of bread, without wine, for the Romish eucharist.

The excellent writer in the London Review, whom we have cited, makes the following just remarks upon the source of the false views of the Cathari, as existing in all ages:

"The whole subject of the Cistercians is displayed in our own day in the false asceticism of the Puseyite; and if there be no latent Manichaeism in the views of the extremely opposite side of Protestants, whence the tendency to treat human nature as intrinsically evil, not as merely subjected to evil; to make human powers, physical and mental, evil in their use, and not merely in their abuse; to identify society and its institutions with the devil, and against which we must be warned; no; however it may disguise itself, and however its manifestations may be varied, that has ever been one and the same instinct of self-justification, hidden in the recesses of the heart, which treats sin as something external to the will, and, to a certain extent, involuntary; imposed, why not voluntary? And faithfulness to God consist in something easier than the abdication of the idol self. This insidious instinct stops at no sacrifices provided it can maintain itself. It inspired the stern 'Touch not, taste not, handle not,' of the earliest Gnostics of the apostolic times (Col., ii., 21); and it has worked, with more or less intensity, in every age of the Christian Church."

IV. Literature.—The Roman sources are Bonacorsi, in D'Achery, Spr. cit. i., 208; Moneta, ad e. Catharos et Valdenses (Rom. 1745); Rainierius (about 1200), whose account is analyzed by Maitland, Fecta et Documenta, ch. v.; the History, etc., of the Albigenses and Waldenses (Lond. 1832). The principal writers are Neuerburg, Ch. xvi., 560 sq.; Maitland (as above); Schmidt, Hist. et Doct. de la Secte des Cathares (Par., 1840, 2 vols. 8vo); Hahn, Geschichte d. Ketzer im Mittelalter (Stuttgart, 1845-47).

See also London Review, April, 1855, art. i.; Gieseler, Ch. History, ii., § 64, 67; Hahn, in Studien u. Kritiken, 1862, Heft iv.; Schmidt, in Herzogs Real-Encycl-pädie, vii., 461 sq.

Catharina, the name of several so-called saints of the Greek and Roman Church.

1. A martyr, who suffered at Alexandria under Maximin II. The Greek and Roman accounts, which are not at all to be depended on, state that she was a rich and noble lady, who, having entered upon a dispute with certain heathen philosophers at the command of Maximin, and vanquished and converted them to the faith, was, together with them, put to death. She is said to have been put upon an engine made of wheels armed with spikes to lacerate her body, but when the machine was put into motion her bonds were miraculously broken, but she was immediately beheaded. Hence the name of Catharina-wheel.

2. Eusebius (Eccl. Hist. VIII, 14) speaks of a famous Alexandrian woman, who, when other women of the city yielded to the lust of the tyrant Maximin, resolutely resisted and was scourged and banished with exile and the loss of all her property. Joseph Assemanii thinks that this is the only account of St. Catharina that can be depended on. Her remains are said to be still kept in a marble chest in the monastery of Mount Sinai, in Arabia (Pococke's Travels, i., 140, 4to.). She is commemorated on Nov. 26.—Butler, Lives of Saints, Nov. 25; Landen, Eccl. Dict. s. v.

2. Of Sweden, a princess, born about 1330, who, being contracted in marriage to a young nobleman named Egard, persuaded him to join her in making a vow of perpetual chastity! She died abbess of the monastery of St. Gertrude, March 24, 1382. She wrote a treatise on the Causes of Divorce, Nov. 22; Io. Stund, Eccl. Doct. s. v.

3. Of Sienna, was born at Sienna in 1347, and early devoted herself to an austere life. In 1865 she received the habit of the third order of St. Dominic, and soon became celebrated for her recluse life, revelations, and miraculous powers of conversion! She in- cluded Pope Clement VI in her visions, they travelled to Rome from Avignon. She used all her efforts to cause Urban VI to be recognised as the lawful successor of Gregory. She died April 29, 1380. Pius II published the bull for her canonization June 29, 1461, and her festival is observed on April 30.—A. Butler, Lives of Saints, April 30; Chavign, Hist de St. Catharine (1484); Landon, Eccl. Dictionary, s. v.

4. Of Bologna, born of noble parents Sept. 8, 1418.
CATHARINUS

In 1427 she entered among the nuns of St. Francis at Ferrara, who soon after adopted the severe rule of St. Clare. Afterwards she became abbess of a new convent of the order in Bologna. She is said by Roman writers to have had the gifts of prophecy and miracles! She died March 9, 1463, on which day she is commemorated. A spurious book of her Revelations was published at Bologna in 1531.—Butler, Lives of Saints, March 9.

6. Of Genoa, daughter of James Fieschi, viceroy of Naples, was born at Genoa in 1448, and at about sixteen was married, against her will, to a gay young nobleman named Julius Adorna, who for many years caused her the greatest affliction. Being left a widow, she devoted herself to the care of the sick and poor. She died Sept. 14, 1510, leaving a few works of devotion.—Butler, Lives of Saints, Sept. 14; Upham, Life of Cath. Adorna (N. Y., 1856, 12mo).

Catholic Ambrose, or, more properly, Lambold Politi, was born at Sienna in 1488. He studied law, and afterwards taught that science in several Italian universities. In 1521 he entered the Dominical order at Florence, and in 1545 accompanied the cardinal de Monte to the Council of Trent. He became afterwards bishop of Minori in 1546, and archbishop of Conza in 1551. He died at Rome in 1555.

Cathcart, Robert, D.D., a Presbyterian minister, was born Nov. 1769, near Coleraine, Ireland, where he was classically educated. He afterwards entered the University of Glasgow, was licensed by the Presbytery of Route, and labored within its bounds for several years. On coming to America in 1790 he became a member of the Presbytery of Philadelphia, and in 1792 he was chosen professor of Greek and Latin in Hopewell, Pa., where he spent nearly fifty years of eminent usefulness. He was a member of the General Assembly for nearly thirty years in succession. He pursued his labors with unwearied diligence, and died Oct. 19, 1849. He published A Sermon on the Death of Rev. Dr. Dunlop, 1812.—Sprague, Annals, iii. 559; Prob. Quart. Rev. Oct. 1849, art. vi.

Cathédral (Latin cathedra; Gr. καθή&phi; — from κατά, down, and σέα, a seat). In classical archeology cathedra means a chair with a back, but without arms, and usually used by women. Cathedrae were also used by teachers of gymnastics while giving instruction, and, later, by all public teachers. Following this usage of the word, the term has been applied to the chair or other sedilia in churches or other public buildings designed to build churches. In many of the crypts in the Catacombs at Rome and elsewhere are seats cut in the rocks, supposed to have been thus used. Later, when church edifices were erected, the cathedrae were placed in the middle of the semicircular apsis at the eastern or near end of the church, and occupied by the choir. In Rome many of the cathedrae were taken from the public baths, and were thus of marble, and decorated with designs from classical mythology. Later, they were decorated with symbolic designs of the Christian faith, as the head of a lion, representing the forces and vigilance of a good bishop; the head of a dog, representing his vigilant and fidelity; or a dove crowned with a nimbus over the back of the chair, representing the Holy Spirit which was to shed light into his heart. The cathedrae of the 5th and 6th centuries were often inlaid with ivory and precious stones, after the style of the Alexandrian mosaics. Later, they were richly decorated and heavily gilt. Very early in the history of the Church they were held as precious, even among the favorite bishops. Traditions, unworthy of credit, are attached to the reputed chairs of St. Peter in the Vatican (Rome), of St. Mark in Venice, and of St. Paul in Salonic. In the Gallic Church, for a time, the bishops were buried seated in their chairs, which were afterwards the emblems of great respect.

In the paintings of the Catacombs, in early mosaics, and miniatures, cathedrae are often represented with either a literal or figurative meaning. Thus, in the Catacombs, a bishop is represented stretching out his hand to a woman and to a sheep, thus representing the church and the faithful. In another, the bishop is holding up the Word; God the Father is shown on the left of the cathedra receiving the gifts of Cain and Abel; the Redeemer is thus seated, receiving the crowns of gold from the seven elders [see Apocalypse]; Christ is seated on a cathedra surrounded by eight martyrs. Two chairs in two niches, with a table between them bearing the open Bible, represent a council (in the Baptistry of Ravenna).

In the church of Santa Maria delia Mentorella (in Latium) is a work in gilded bronze, representing the twelve apostles on seats; between them is a cathedra supporting the open Bible, as the source of all authority; above is a lamb, bearing a cross with a banner, having the inscription "Ego sum catholicon et ortus occisum."—I am the gate and the fold of the sheep;" a chasuble in Cortena has a cathedra with Tybics cut on it.—Bingham, Orig. Eccles. bk. vii, chapter vi, § 10.

Cathedral [see Cathedra]. (1.) The church edifice containing the cathedra or bishop's chair, i. e. the bishop's church in a diocese, usually the largest and most magnificent church in a diocese. The modern use of the term is cathedral, as designating the church in which the bishop has his seat; it is confined to the Western Church, and is posterior to the tenth century. In the East such churches are called the great church, the episcopal church, or simply the church.

(2) CATHEDRAL (adjective)—(a) pertaining to a cathedral, as "cathedrical service," (b) official of or authoritative, as the "cathedrical determination of an article." Catholic (καθολικός katholikos and ἄριστος, general universal), a title given to the Christian Church on account of its being not confined (like the Jewish) to one people, but embracing members of every nation. "As 'the Church' is (in one of its senses) employed to signify all Christians, who are 'members one of another,' and who compose the body of which Christ is the head, so the title 'catholic,' or 'universal' is a necessary indication of the use of the word 'church' in that sense. The Catholic Church comprehends the entire body of true Christians; but it is no one community on earth—it has no one visible ruler or governor. Any individual church may be included in it, but we improperly call it the Catholic Church" (Eden, s. v.).

1. In the primitive Church, the title "catholic" came into use at an early period to distinguish the
Christian Church from the Jewish, which was national, while the Christian body was to include all mankind. At a later period it was used to distinguish those who adopted the so-called "heretical" within the Christian Church, from the body of believers who held the orthodox faith. The word was appropriated to the Church whose belief, the term "catholic" was applied. The earliest uses of the word (e.g. of Polycarp [† 255], in an epistle preserved in Eusebius, H. E. iv, 15; Clemens Alex. [† 220], Stromata, vii) are in the sense of the general diffusion of the Church. It is used in the Apostles' Creed (the first article), and on that ground of the Nicene Creed it becomes a common title of the Church (see Pearson, On the Creed, art. ix, note c). Chillingworth interprets the "Holy Catholic Church" in the Creed to mean "the right that the Church of Christ, or rather, to speak properly, the Gospel of Christ, hath to be universally believed. And therefore the article may be true, though there were no Christian Church in the world" (Chillingworth, Works, fol. p. 196). Paerianus (A.D. 372), in answer to Severian the Novatian, who demanded of him why Christians called themselves Catholics, replied, "Christian is my name, and Catholic my surname; the one is my title, the other is my profession." (Cited by Binham.) Clarke (Sermes [vol. iv, ed. 1729] on the Catholic Church) gives the following meanings of the word: "The first and largest sense of the term Catholic is that which appears to be the most obvious and literal meaning of the words in the text (Heb. xii, 23). The general assembly and church of the first-born who are written in heaven; that is, the whole number of those who shall finally attain unto salvation. Secondly, the Catholic or Universal Church signifies, in the next place, and indeed more frequently, the Christian Church only—the Christian Church, as distinguished from that of the Jews and patriarchs of old. The Church of Christ spread universallly from our Saviour's days over all the world, in contradistinction to the Jewish Church, which was particularly confined to one nation or people. Thirdly, the Catholic Church signifies very frequently, in a still more particular and restrained sense, that part of the Universal Church of Christ which in the present age is now living upon earth, as distinguished from those which have been before and shall come after. Fourthly and lastly, the term Catholic Church signifies, in the 1st place, and most frequently of all, that part of the Universal Church of Christ which in the present generation is visible upon earth, in an outward profession of the belief of the positive dogmas of the Catholic Church, with a veneration of the Word and sacraments." Pearson (Exposition of the Apostles' Creed, art. ix) explains the catholicity of the Church as consisting, generally, in "universality, as embracing all sorts of persons, as to be disseminated through all nations, as comprehended all ages, as containing all necessary and saving truths, as obliging all men to all kinds of obedience, as curing all diseases, and planting all graces in the souls of men." 2. The Roman Church arrogantly claims the name Catholic as exclusively her own, and designates all who do not belong to it as "heretics" and schismatics. It is bad enough in the Church of Rome to make this claim of the title "Catholic;" it is still worse for Protestants to concede it. The result of this concession, in most Protestant countries, is that common people have really no conception of the true use of the word. The words "Catholic," "Papist," "Papal," "Romanist," are all pejorative terms used of the Church of Rome, and imply no offensive meaning, as they are all legitimately derived. At all events, the word "Roman" should always be prefixed to "Catholic," if the latter term be used as part of the title of the Church of Rome. There is a strange enchantment in words, which being (although with no great color of reason) assumed, do work on the fancies of men, especially of the weaker sort. Of these power doth ever arrogate to itself such as are most operative, by their force sustaining and extending itself. So divers prevalent factions did assume to themselves the name of Catholic, and the Roman Church particularly hath been adopted as the sign of an unholy claim of divine favor. The bull, imposing Rome and the universe to be the same place, and the perpetual canting of this term hath been one of the most effectual charms to weak people. I am a Catholic, that is, a universal; therefore all I hold is true; this is their great argument" (Barrow, On the Pope and Papal Power, p. xiii). The Church of which Rome was so long the centre is not Catholic, but Latin; just as the Church of which Constantineople was the centre is not Catholic, but Greek. There is, indeed, a Catholic or Universal Church, and therefore a universal Christianity. But to assert that the unity implied in the conjunction of these terms is, and must be, a visible unity, is, in a word, to give the lie to all Church history, both Greek and Latin, from a date almost immediately subsequent on the apostolic age. And neither Greek, nor Latin, nor Teutonic Christianity, nor all of them together, can be Catholic Christianity, any more than a part of anything can be so considered to the whole" (Loom. Quarterly Review, April, 1855, p. 150). Bishop Bilson, in his True Difference between Christ in Subjection and Unchristian Rebellion (1856), sums up the reasons for denying Catholicity as a note of the Roman Church as follows (in dialogue form): "Phileander (Romainist): What is the point of our religion but that of Catholic? Theophrastus (Anglican): No one point of that which this realm hath refused is truly Catholic. Your having and adorning of images in the church; your public service in a tongue not understood of the people; your gazing on the priest while he alone eateth and drinketh at the Lord's table; your barring the poor people from the door; the Children of God to his Father for the sins of the world; your adorning the elements of bread and wine with Divine honor instead of Christ; your seven sacraments; your shrift; your releasing souls out of purgatory by prayers and pardons; your compelling priests to live single; your meritorious vowing and performing pilgrimages; your invocation of saints departed; your rules of perfection for monks and friars; your relying on the Pope as head of the Church, and vicar-general unto Christ—these, with infinite other superstitions in action and errors in doctrine, we deny to have any foundation in the Scriptures, or confirmation in the general consent of the ancient Catholic Church. In fact, for Protestants to concede to Romanists the title "Catholic" is equivalent to acknowledging themselves heretics. This concession may be harmless and innocent enough as far as Protestants are concerned, but it is most pernicious to those to whom the title is conceded. Men at all times have an inclination to trust in names and privileges, and nothing has proved, or will prove, it is a greater obstacle to progress in Christian truth than this feeling of being possessed of exclusive privileges—of being exclusively Catholics, i.e. members of the Catholic Church—of that holy community that must secure a special grace of divine favor to every member of it."--Bingham, Orig. Eccles., bk. i, ch. i, § 7; Suicer, Thesaurus Eccles. s. v. catholici; Eden, Churchman's Dictionary, s. v.; Elliott, Delineations of Romanism, bk. iii, ch. ii, § vii; Bellarmine's Notes of the Church confined (Lond. 1867, 4to, pp. 29- 94); Litten, The Church of Christ, bk. ii, pt. ii, Introduction; Pahlav, The Roman Church, pt. i, ch. xi, § 8. See Roman Catholic Church.

CATHOLIC, title of a prelate. See CATHOLICOS.

Catholic Apostolic Church, the name of a body of Christians which has had a separate organization for somewhat more than thirty years. The following article is from a member of the body.
I. History.—Towards the end of the first quarter of this century there began to be an increased spirit of prayer in Great Britain for the outpouring of the Holy Spirit, in promoting which the labors of the Rev. I. Haldane Stewart (of the Church of England) were much helpful. About the same time the Rev. Edward Irving (q. v.) was called up from Glasgow to London, where for a number of years he preached with great power and effect on the coming and kingdom of Christ, his true humanity, and his work as the baptizer with the Holy Ghost, and taught that the Church is now, and at all times, entitled to the spiritual endowments of the primitive age, because “the gifts and callings of God are without repentance;” but he had no clear conviction that they would be restored, nor did he urge his flock to pray for their restoration. The missionary employed by his Church to preach to the poor of the city, the Rev. A. J. Scott, had much stronger faith that they would be recovered than Mr. Irving himself, and, when on a visit to his friends in the west of Scotland in '28 or '29, he labored to convince them of the permanency of the gift of the Holy Ghost. Among them was Miss Mary Campbell, sister of two of the most revered clergymen who had been widely circulated more than thirty years ago, then living at Ferncarray. Through the careful study of the New Testament, she became convinced that the promise of the Comforter was for all generations, and she was led to pray, in concert with some friends, that God would again bestow the gifts of the Holy Spirit. In March, 1830, when engaged in prayer with her friends, the power of the Holy Ghost came mightily upon her, and she was made to speak in tongues and prophesyings. Very soon afterwards, the same spiritual phenomena appeared in a family by the name of Macdonald, living at Port Glasgow, who, like Miss Campbell, were convinced, and distinguished as well for purity of life as for zeal and devotion. One of the sisters, who was dangerously ill, was restored instantaneously to health through the faith of her brother, by whose instrumentality Mary Campbell was also raised up from what seemed to be the very brink of death. These occurrences naturally excited much attention not only in the immediate neighborhood, but throughout Great Britain, and in the summer of that year several persons—almost all of them members of the Church of England—went down from London and spent some weeks at Port Glasgow, to satisfy themselves as to the reality of these spiritual utterances. Being convinced by what they saw and heard that they were the work of the Holy Ghost, they met together after their return, with others of like faith, to pray that God would pour out his Spirit upon his whole Church. These meetings, which were held weekly at private houses, were continued throughout the winter, and it was not until April of the following year (1831) that any spiritual manifestation appeared. Then the mouth of a pious lady of the Church of England, under the pastoral care of the Rev. Baptist Noel, was opened in power, and she too spake in tongues and prophesying. In the course of that year other persons, both the male and female, received the same spiritual gifts. Some of them were members of the Established Church, and others were Presbyterians and Dissenters; but it was chiefly in the congregation of Mr. Irving (and that after long and careful examination) that liberty was given to speak in spiritual power. This, together with his presence in the eyes of the world, led to the connecting of his name with the work, although he and all who were of the same faith with him never ceased to protest against the name of Irvingites as a designation of the body.

These utterances, accompanied by many and striking cases of healing, continued in great power and frequency down to the middle of 1835. During the months of January and February of that year, a man was converted to a form of faith not previously in the Church of England, and he subsequently was received into the Church in the March following, and in the same year was ordained a deacon of the Church. This work was most beneficial to the Church. The number of communicants was at first from 30 to 40, and at the end of the year had increased to 150. This was not, however, by popular election, nor by any act of man, but by the voice of the Holy Ghost speaking through prophets, and thus expressing the mind and will of God, that one who had been a godly member of the Church of England, and had stood as a faithful witness to the truth of the Gospel, should serve him in this highest ministry. Others were afterwards, from time to time, called to the same office, until, in the year 1836, the full number was completed. Mr. Irving was not one of them, nor, with a single exception, any of his original congregation; three of them who were members of the bar, two of them had been members of Parliament, and all were men of high religious character.

At this time there existed a considerable number of congregations which had been gathered by the preaching of evangelists, and organized by the apostles previously called. When the number had been filled up, they were solemnly separated to their work with prayer and benediction in an assembly of the churches, as was done in Antioch in the case of Barnabas and Saul. They were then bidden, in the word of prophecy, to go to a secluded village in the south of England—Allony, the residence of Mr. Henry Drummond—and there they were widowed relatives of the apostles who had been the instruments of the grace of the prophets, that light might be thrown upon them by the word of the Holy Ghost. They were also directed to prepare a testimony of what God was doing, and to present it to the bishops of the Church of England and Ireland, which was done in Jan. 1835. A larger testimony was given to the Emperor of Austria, and the King of the French, as the representatives of the great principles of government existing in Christendom—priestly rule, absolutism, and popular election—and afterwards to others of the chief rulers in church and state throughout Europe. In these testimonies (especially in the latter) they declared the sins of Christendom in denouncing to the ways of God were pointed out, his approaching judgments proclaimed, and the coming of the Lord (for which the restoration of the Church was the preparation) held up as the only hope of deliverance to the sin-burdened and weary creation.

For a number of years the work made little progress outside of the British Isles, but the revolutionary movement in Europe in 1848 drew to it the attention of many in Germany, and churches were soon organized in Berlin and other cities and towns. It has gradually extended itself into Switzerland, France, Holland, Belgium, Russia, Italy, and into North America, and believers are to be found in countries where there is as yet no liberty of worship.

II. Organization and Polity.—This body of Christians, who take the name of the Catholic Apostolic Church, as being the proper designation of all the baptized, and not as exclusively their own, look upon the spiritual work which has been briefly described, as a divine movement in the one Church to restore to it its original structure and endowments, in preparation for the now rapidly approaching advent of the Lord Jesus Christ. They believe it to be, not the founding of a new sect, much less the setting up of a new dispensation, but the restoration of spiritual gifts and the unity of the Church of Christ, which has had a continuous and historic existence from the day of Pentecost to this hour. They recognize, therefore, the whole Christian Church as brethren, according to the measure of truth in doctrine and ordinances which it has retained in its several divisions, and not as a new church, differing from Christ's Church in its own nature, it is one body; and that intercommunion between the parts is the true law of its being, and the necessary condition of its healthful growth; intercommunion, not as between distinct and independent nations, but as between the different portions of one and the same nation, having one central authority, which is the supreme common law, and an authority which God gave to the Church in its beginning they believed him to have now restored, not for
the supereding of the existing ministries, but for the conveying of grace and strength more abundantly to all who will receive it. The apostolic office belongs to no sect, but is for the whole Church; and those who are gathered under it are not a sect, but a part of the one body brought into their right relations to the Head and to one another.

In respect to the organization of the Catholic Apostolic Church, its chief peculiarity lies in the fourfold ministry of apostle, prophet, evangelist, and pastor, as described by St. Paul in the 4th of the Ephesians. Apostles are rulers in the Church universal, by whom the Church is governed through an apostolic hierarchy; prophets are the special organs of the Holy Ghost, by whom light is imparted for the guidance of apostles in their work; evangelists carry forth the Gospel; and pastors feed and care for the flock. The same fourfold distinction is brought out in the particulars of the Church, in each of which, where circumstances allow of its being fully organized, there is an angel or chief pastor, representing to his own flock the Angel of the Covenant in the heavens, who has under him a body of elders in whom there should be seen the same fourfoldness of ministry as in the Church universal, although in less distinct form. Some exercising the prophetic gift, others exercising the priestly gift, others exercising the prophetic gift, and others exercising the apostolic gift, under the guidance of the Holy Ghost, which is distributed to all the members of the Church, all working in the one Spirit, to build up the body of Christ, and are walking in holiness of life. In respect to the Eucharist, they reject the Roman Catholic doctrine of transubstantiation on the one hand, and that of Zwingli on the other, holding that the elements of bread and wine are unchanged in their physical properties and essence by consecration, while they are made, by the operation of the Holy Ghost, to be spiritually and not carnally, the body and blood of the Lord.

To gather the Church as the election of God out of all the nations of the earth, they believe to be the great work of this dispensation, at the completion of which the Lord will gather the Israel of the living; and to the dispensation in raising the dead and changing the living saints, and will then proceed to set up his kingdom in the earth. First of all, he will deliver the Jews—both the two tribes which are known and the ten which are lost—from their dispersion and exile, and reconstitute them as the metropolitán nation in the land which God gave to their fathers; and then, by their instrumentality, he will extend his salvation to all the families of mankind. This millennial dispensation will continue through the thousand years spoken of by St. John, at the expiration of which there will be an apocalyptic among the nations outside the camp of the saints and the beloved city, there to receive the diverticuities of the Church, both from the Church and the restored nation of Israel, through the instigation of Satan, then for the last time loosed from his prison-house, after which the final judgment, with its eternal retributions of good and evil, will ensue.

The Eucharist is made the centre of worship, as being the commemoration of the death of Christ, which opened the way of entrance into the Holy of Holies, where he now, as our great High-priest, fulfils the work of intercession. In this work his Church is called to take part, which he does in the highest sense when she shows forth his death in this holy sacrament, by presenting unto God in the institution upon the altar the memorial of his sacrifice, and thereupon offering prayers and intercessions for all men. It is not the expiatory sacrifice of Jesus on the Cross which the Church thus renews and continues in the Eucharist (as the Roman Catholics teach), for he died once for all to make atonement for sin, and there can be no repetition of his death; but it is his present intercessory work in heaven. The Eucharist is celebrated on the forenoon of every Lord's day, and on other solemn and special occasions. The tithes and offerings of the people are brought up during the services, and solemnly dedicated to the Lord. There are also morning and evening services for worship on every day of the year, at 6 A.M. and 5 P.M., consisting of confession of sin with absolution, the reading of the Holy Scriptures, the reciting of the Psalms, and prayers in the fourfold form of supplications, prayers, intercessions, and giving of thanks, which are offered in God's name and in the name of those for whom they respectively minister, all being gathered up and presented to God in the name of Jesus Christ, the great High-priest and Mediator, by the angel of the Church. In the principal congregations there are shorter services every forenoon and afternoon at nine and at three. There are also meetings for extem- poraneous prayer, that all whom the Spirit moves to
pray may have liberty to express their desires unto God, and for the exercise of spiritual gifts, in which events the great awakener of souls may yield themselves to speak in the power of the Holy Ghost. Sermons are preached on Sundays and at appointed times during the week. A ritual is used, constructed on the principle of gathering in one all that is most valuable in the worship of the whole Church. The ministers wear vestments in the public services, and the lights necessary for the symbolical character. The ancient ordinance for anointing the sick with oil is restored to its right use; and for the relief of penitents there is the rite of private confession and absolution, but which is not compulsory, nor for the extirpation of secrets. They believe that the end of the divine operations is the consummation of the object and aim of all these ministrations, and spiritual gifts, and ecclesiastical services, is to make ready a people for the Lord.

There are no published statistics of this body, but there are churches in many of the principal cities of England (seven in London) and Scotland; in Dublin and Belfast; in Paris, and a few other places in France; in Baalbe, and Berne, and other towns in Switzerland; in Berlin, and many other places in North Germany; and a number of smaller congregations in Holland, and Belgium, and North America.

To the above account it is proper to add that, in the judgment of the Christian Church generally, the distinctive doctrines of the Catholic Apostolic Church are regarded as erroneous, and its polity and usages as reactionary, and opposed to the true development of the Church.

1. As to doctrine. — The C. A. Church is especially distinguished by its doctrine as to spiritual gifts. "Like the Montanists of the second century, they look upon these apostolic gifts and offices as the necessary conditions of a healthy state of the Church at any time; make their disappearance the fault of Christianitv; and hold it impossible to remedy the defects of the Church without a revival of the charisms and the apostolate. They appeal to such passages as 1 Cor. xii, 27–81; Eph. iv, 11–13, where undue emphasis is laid on 'till; and to these, v. 19, 20; 1 Cor. xii, 31; xiv, 1, where the apostle not only warns Christians against quenching the Spirit, but also positively remunerates them to strive earnestly after His miraculous gifts. There seems to us to be here a mixture of truth and error on both sides. In these charisms we must distinguish between the essence and the temporary form. The first is permanent; the second has disappeared, yet breaks out at times sporadically, though not with the same strength and purity as in the apostolic period. In the nature of the case, the Holy Ghost, when first entering into humanity, came with peculiar creative power, copiousness, and freshness; presented a striking contrast to the mass of the unchristian world; and, by this very exhibition of what we may call the miracle of the miracle, exerted a mighty attraction upon the world, without which it never could have been conquered. Christianity, however, aims to incorporate herself in the life of humanity, enter into all its conditions and spheres of activity as the ruling principle, and thus to become the second, higher nature. As it raises the natural more and more into the sphere of the Spirit, so in this very process it makes the supernatural more and more natural. These are but two aspects of one and the same operation. Accordingly we find that, as fast as the reign of heathenism is broken, those charisms which exhibited most of the miraculous become less frequent, and after the fourth century almost entirely disappear. This is not owing to a fault of Christianity, for at that very time the Church produced some of her greatest teachers, her Athanasius and her Ambrose, her Chrysostom and her Augustine. It is rather a result of its victory over the world. Spiritual gifts, however, did not then fully and forever disappear, for in times of eventful and great awakener of souls may yield themselves to speak in the power of the Holy Ghost. Sermons are preached on Sundays and at appointed times during the week. A ritual is used, constructed on the principle of gathering in one all that is most valuable in the worship of the whole Church. The ministers wear vestments in the public services, and the lights necessary for the symbolical character. The ancient ordinance for anointing the sick with oil is restored to its right use; and for the relief of penitents there is the rite of private confession and absolution, but which is not compulsory, nor for the extirpation of secrets. They believe that the end of the divine operations is the consummation of the object and aim of all these ministrations, and spiritual gifts, and ecclesiastical services, is to make ready a people for the Lord.

There are no published statistics of this body, but there are churches in many of the principal cities of England (seven in London) and Scotland; in Dublin and Belfast; in Paris, and a few other places in France; in Baalbe, and Berne, and other towns in Switzerland; in Berlin, and many other places in North Germany; and a number of smaller congregations in Holland, and Belgium, and North America.

To the above account it is proper to add that, in the judgment of the Christian Church generally, the distinctive doctrines of the Catholic Apostolic Church are regarded as erroneous, and its polity and usages as reactionary, and opposed to the true development of the Church.

1. As to doctrine. — The C. A. Church is especially distinguished by its doctrine as to spiritual gifts. "Like the Montanists of the second century, they look upon these apostolic gifts and offices as the necessary conditions of a healthy state of the Church at any time; make their disappearance the fault of Christianitv; and hold it impossible to remedy the defects of the Church without a revival of the charisms and the apostolate. CATHUA

Constantine, to his prosecutor, or vicar-general (after the organization of dioceses under imperial law), whose duty it was to see that all imperial rescripts were duly carried out. So in a letter from Constantine to Eusebius (preserved in Socrates, Hist. eccl., iv, 11), the emperor says: "Letters have been sent to the bishopric of CATHUA, that he may provide all things necessary," etc. See Suid. Thes. Eccles. s. v.

(2.) The official title of certain of the Oriental prelates, especially of the patriarchs of the Armenian Church. The title is given to the head of that part of the church over which his jurisdiction extends; he only can ordain bishops and consecrate the sacred oil. The dignity of Catholicae is inferior to that of patriarch, but superior to that of metropolitan. There are three dignitaries bearing the title in the Armenian Church at present—the Catholicae of Etchmiadzin, the Catholicae of Agdam, the Catholicae of Sis.—Coleman, Ancient Christianity, ch. xxvii, § 2. See ARABIAN CHURCH.

Cath&m (Καθωμ), one of the family heads of the "servants of the Temple" (Nehemiah) that returned from Babylon (1 Esd. v, 30); apparently the Giddel (q. v.) of the Heb. texts (Ezra ii, 47; Neh. vii, 49).

Cathin, Jacob, D. D., a Congregational minister, was born at Hauvinton, Conn., March, 1758, and graduated at Yale, 1774. He became pastor in New Marlborough, Mass., July 4, 1787, was made D. D. by Yale in 1797, and died, April 19, 1816. He published a work on theology, What is Truth? (1816); a volume, Sermons collected (1797); and a Discourse before a Free-saran's Lodge (1796).—Sprague, Annals, ii, 260.

Cattenburgh, Adrien van, an Armenian or Roman Catholic theologian, born at Rotterdam Nov. 2, 1664, and filled the professorship of theology at Amsterdam for twenty-five years. He was intimately connected with Philip Limborch. He died at Spicilegium Theologia Christiana Philomatharum (Amst. 1726, 2 vols. fol.).—(2.) Bibliotheca Scripturam Remonstrantium (Amst. 1726, 8vo).—(3.) Syntagma Sapiens Mosaicus (ibid. 1737, 4to), against Atheists and Deists. He also wrote a life of Grotius in Dutch.—Hoeffer, Nouv. Biogr. Générales, ix, 226.

Cattle (the representative in various passages in the A. V. of the Heb. words בָּשָׂר, בְּשָׂר, בְּשָׂר, "behemah," a "large herd" in general, usually "beast" [see Beemat]; in Num. xx, 4, and Ps. lxxvii, 46, "בַּשָּׂר," "sheep"; in Gen. iii, 24, elsewhere "beast"; so the Gr. ἄγρια, as being φαῦλα, 2 Sam. vi, 22, from Spajura, from being reared, John iv, 12; most frequently and characteristically בַּשָּׂר, בַּשָּׂר, a "possession," as possessed from the fact that Oriental wealth ["substance," Job i, 8, 10] largely consisted in this kind of property; like the Gr. ἀμένα, as being possessa-
ed, 1 Mac. xii, 28; also idiomatically בַּשָּׂר, בַּשָּׂר, Gen. xxx, 32; Isa. vili, 25; xiii, 22; Ezek. xxxiv, 17, 20, 22, an individual sheep or lamb, as elsewhere rendered; or בַּשָּׂר, Gen. xxx, 80, 40, 41, 42, 43; Ezek. xxx, 10, 12, 14, 16; Ecclus. ii, 7, "sheep collectively or a flock," as rendered elsewhere. In scripture language, embraces the same tames quadrupeds employed by mankind for domestic purposes, as oxen, buffaloes, horses, sheep, goats, camels, and asses (Gen. i, 25; xiii, 2; xxiii, 18-17; Ezek. xii, 29; xxxiv, 19; Num. xx, 19; xxxii, 16; Ps. l, 10). See each of these in their alphabetical place. The Holy Land was eminently distinguished for its abundance of cattle, to the management of which, the inhabitants, from the earliest times, chief-
ly applied themselves, as indeed they have always constituted the principal and almost only possession of a nomadic race. In this case, wealthy people were exposed to all the misfortunes of the seasons (Gen. xxxii, 40). Moses was a shepherd during his early life. Shammug was taken from the herd to be a judge in Israel, and Gideon from his threshing-floor (Judg. vi, 11), as were

Jair and Jephtahiah from the keeping of sheep; Saul and David might also be mentioned. Some of the prophets were called from that employment to the prophetic dignity, as Elisha was from the plough (1 Kings xix, 19), and Amos from being a herdsman. But the tending of flocks was not confined to the men. Rachel, the daughter of Laban, kept her father's sheep (Gen. xxix, 9), and Zipporah and her six sisters had the care of their father Jethro's flocks, who was a prince or priest of Midian (Exod. xii, 16). The following is a general treatment of the subject under its two great sections. See HERD; FLOCK.

Bull of Palestine.

I. Next. Cattle.—These are designated collectively by the Heb. term בַּשָּׂר, "baker;" single animals of this kind are called בַּשָּׂר, "all'aph," an "ox," or יִשְׂר, "shor" (Chald. יִשְׂר, tor), a "bullcock;" the calves are styled בַּשָּׂר, e'gul, often a yearling—fem. בַּשָּׂר, עַגָּל, a "heifer" (also a young cow, even when broken to the yoke, Judg. xiv, 18; Hos. x, 11); when grown, but still in full youthful vigor, יַבַּשָּׂר, a "steer"—fem. יַבְשָׂר, עָגָל, a "heifer" (juvena, jarenae; comp. Varro, Rea Rust. ii, 5, 8). The nomadic Abrahamite (like the Humeric chiefs, see Fecht, Antiq. Hos. p. 406) already practiced the raising of cattle (Gen. xii, 16; xvii, 7; xxxiv, 5; xxxii, 5; xxxiv, 28; comp. xiii, 5), and when they emigrated into Egypt still carried it on (Exod. x, 2, 21; xii, 32). In later times, also, this was a principal pursuit of the Israelites, especially in several districts of Palestine (Deut. viii, 13; xiii, 21; 1 Sam. xi, 5; xii, 3; 2 Sam. xii, 2; Ps. cxiv, 14; Jer. iii, 24; v, 11; Judith vii, 5, 6). The oxen are there somewhat small, with short horns, and a bunch of fat on the shoulders (Haisseguis, Travels, p. 180; comp. Shaw, Travels, p. 160). The finest herds and strongest bullocks were found in Bashan, beyond Jordan (Num. xxxii, 4); hence the Bashanite steers are often put metaphorically for formidable enemies (Ps. xxxii, 13), while Bashanite cows are a symbol of sate-
ly women (Amos i, 4). In the district west of the Jordan, the plain of Sharon, extending to the Medi-
terranean Sea, afforded the finest pastures (Isa. lxv, 10; see Jerome in loc.). Even the kings had their herdsmen (1 Chron. xxviii, 29). There was great de-

mand for neat cattle; many hundreds were yearly slaughtered in sacrifices (and these were animals of the finest quality, as among other nations, see Herod. ii, 41; Xenoph. Cyrop. viii, 31; Varro, Rea Rust. ii, 5, 11; Pliny, viii, 10, etc.). Other were employed for food or festive occasions (Deut. xii, 21; 2 Sam. xii, 4; Tobit viii, 21; Matt. xxiii, 4), as then generally beef (1 Sam. xiv, 22; 1 Kings xix, 21; comp. iv, 28; Neh. v, 18), and still often veal was a feast to the Israelites (Gen. xviii, 7; 1 Sam. xxviii, 24; Amos iv, 6; Luke xvi, 25, 27, 30), it being anciently regarded as an animal of wan-
ton prodigality to slay useful agricultural beasts (compare Apollo. Rhod. ii, 655 sq.) in order to enjoy their flesh (Alian. Var. Hist. v, 14; Anim. xii, 84; Varro, R. R. ii, 5, 6; Pliny, Hist. Nat. viii, 70; Valer. Max. vii, 1; Gie. Nat. Deor. ii, 65). See FOOD. The milk was used either sweet or curdled, and was made also into cheese. See MILK; CHEESE; BUTTER. Cattle
were yoked to the plough (Deut. xxii, 10; 1 Kings xix, 19 sq.; Isa. xxx, 24; Amos vi, 12; Job i, 14; comp. Judg. xiv, 18; Josephus, Ant. xii, 4, 6), likewise for draught (Num. vii, 8, 7; 1 Sam. vii, 7; 2 Sam. vi, 3, 6), and were sometimes employed for burdens (1 Chron. xii, 40; comp. Elish, Anim. vii, 4), but especially for threshing (comp. Baha Mesia, vi, 4; Chelum, xvi, 7). See AGRICULTURE. They were driven (Judg. iii, 31; 1 Sam. xiii, 21; compare Sirach xxxviii, 20; Acts ix, 5) with a pointed stick (גָּלֶה, malaad, or אָדוֹג, dorbon; φηγόμενον, also βολβολίζω in ἱερά, vi, 130, Lat. stimulus [comp. prók. ad Pindar, Pyth. ii, 178]), an instrument employed also for horses (Ovid, Metam. xiii, 517; see Schoenherr, Anim. xii, 400). To avoid άληθείας, the Goath. During summer cattle ranged under the open sky. In the stalls (2 Chron. xxxvii, 28) their fodder (Prov. xiv, 25; Luke xii, 15) was placed in a crib (בָּכָר, ebus; φάρυγν). Besides fresh grass and meadow-plants (Dan. iv, 29; Num. xxxii, 4), meslin (בָּכָר, beln), Job vi, 5; Isa. xxx, 24; דָּלָה, dal, Ben, Isa. xi, 7) is mentioned as provender of cattle, a mixed food, like the Roman farrago (Gesenius, Theaur. p. 212). That salt (to gratify the appetite) was added may be inferred from Isa. xxx, 24 (see Gesenius, loc. cit.). Cler. were greatly annoyed by insects, and perhaps the אָדוֹג, kēts (A. V., 'destruction'), of Jer. xlvi, 30, indicates some sort of such noxious creature, namely, the gadfly or astrus (see Hitzig in loc.; otherwise Gesenius in loc.). See BREVE.

In the Mosaic law the following enactments relate especially to oxen: 1. The mouth of the threshing z-cattle was not to be bound so as to prevent their eating the provender spread under them (compare Burkhardt, Prosbebi, p. 67). See MIZRAH. Hence the term 'threshing oxen' sometimes stands for t. or well-conditioned animals (Jer. i, 11; see Rosenmüller in loc.), 2. Whoever stole and then sold or slaughtered an ox must give five oxen in satisfaction (Exod. xxii, 1); but if the animal was found alive in the possession of the thief, he was merely required to make double restitution (Exod. xxii, 4). See THREET. 3. Whoever met an ox that had fallen or strayed was obliged immediately to help it up and bring it back to the owner (Exod. xxii, 4; Deut. xxii, 1, 4), an injunction the more needful in a country not only thinly inhabited, but intersected by many meandering tracks. See PALESTINE. 4. An ox and an ass must not be yoked together to the plough (Deut. xxii, 10). This prohibition is evidently akin to those relating to heterogeneous combinations, although Michaelis (Mose. Rech., iii, 145) gives it another interpretation. See DIVERSE. Respecting unruly cattle (Exod. xxii, 28 sq.), see DAMAGED. It was considered unmerciful to take the only beast of a widow in payment (Job xxiv, 3). See DEBT. On the subject generally, see Bochart, Hieros. i, 268 sq.; Ugolino, De Re Rust. Hbr. (in his Theaur. xix, ii), 9 sq. For the symbolic worship of the young bull, see CALF, GOLDEN. Compare BEAST.

II. Small Cattle: 1. Sheep.—These are designated collectively by נָצָר, tann (a general term, like μῦλον and pecus, including also goats), singly by רָאוֹשׁ, rosh; while רָאָשׁ, rō'ach, means ox: אָשֶׁר, ašer, wether (Child. רָאָשׁ, dekar); רָאָשׁ, kar, a fat pasture lamb: שְׁבָא, leza, a lamb of one to three years (compare Gesen. Thes. p. 659); רָעֲשׁ, rōsh, or רָעָשׁ, rōsh, a suckling or milk-lamb; דְּבִי, melchim ("fattening"); 1 Sam. xv, 9), is an obscure term, possibly signifying two or three milk calves (compare melamella, Res Rust. vii, 8; comp. Bochart, Hieros, i, 469). Next to near herds, sheep formed the most important staple of Oriental nomadic pursuits in Arabia (Gen. xxix, xxx) and Palestine (Gen. xii, 16; xiii, 5; xx, 14; xxi, 27; xxiv, 25; xxvii, 5; xxxiv, 28), as in Egypt (Gen. xvi, 17; Exod. ix, 8), Arabia Petraea and Deserts (Exod. ii, 16, 18; iii, 1; Num. xxxii, 8; Isa. xlvii, 6; Jer. xlvii, 5), and Moabitis (2 Kings iii, 4; Isa. xxi, 1). In military feuds between such tribes, we always find sheep mentioned among the booty of the victors (Num. xxxii, 8; Josh. vi, 21; 1 Sam. xiv, 22; xv, 3 sq.; xxvii, 9; 1 Chron. vii, 21, etc.). The same is still universally true of modern Bedouin Arabs, whose traffic in sheep (comp. Ezek. xxvi, 21) is their leading mark of prosperity and even opulence (comp. Arvieu, iii, 132). The patriarchs had large flocks of sheep in Palestine, as later in Egypt or Gothon (Exod. x, 9, 24; compare Hengstenberg, Pent. p. 5 sq.); also upon the occupation of Canaan by the Israelites, sheep-reed: continued to be the chief employment of a large part of the population down to the latest period, being carried on amid the numerous open tracts and hills of the country (Isa. vi, 18), many of which were productive of saline plants (comp. Deut. vii, 13; viii, 18; xxviii, 4; Judg. vi, 4; 1 Sam. xxii, 19; 2 Sam. xii, 2; Prov. xxvii, 23; Eccl. ii, 7; Jer. iii, 24; v, 17; Hos. v, 6; Joel i, 18; Judith viii, 6, etc.). There were rich owners of flocks (1 Sam. xxi, 2; 2 Sam. xii, 2; comp. Job i, 8; xiii, 12), and even kings had their shepherds (1 Chron. xxxvii, 31; Amos vi, 1; compare 2 Chron. xxxiii, 28), from whom they derived a revenue of sheep and wool as presents (2 Sam. xxix, 29; 1 Chron. xiii, 40) or tributes (2 Kings iii, 4; Isa. xvi, 13). Among the regions most favorable for sheep-rearing are mentioned the plain of Sharon (Isa. ix, 10), Mt. Carmel (Mic. vii, 14), Bashan (Ezek. xxxix), and Gilead (Mic. i. c.). The sheep in the patriarchal age were tended oftentimes by the daughters of the owners (Gen. xxix, 9; compare Exod. ii, 16); later by overseers or hired men (John x, 12); sometimes by the sons of the family (1 Sam. vii, 11; xvii, 15). See SHEPHERD. The keepers gave their sheep, especially the bell-wethers, regular names (John x, 3; compare Theoc. v, 102 sq.; Aristot. Anim. vi, 16; Longin. Pastor. v, 17 and 19), and familiarized these animals with their voice so as to follow them (compare 2 Sam. xii, 2). The sheep roamed all summer in the open air, being folded only at night (Num. xxxii, 16; 2 Chron. xxiii, 28) in a pen (םוֹס, gederaḥ; Talmud, "םוס"), where, in exposed positions, they were guarded by sentries (Luke ii, 8). In the daytime they appear to have been sometimes sheltered from the heat of the sun in canvases (רְמִית, Zeph. ii, 6; which, however, according to others, signifies only צֶרֶךְ, i.e. cisterns for watering the sheep). Shepherds' dogs were indispensable (Job xxx, 1). Of the young, which sheep bear twice a year, the autumn lambs were considered the more vigorous (Varro, Res Rust. ii, 2, 18; Colum. R. E. vii, 8; Pliny, viii, 72; comp. Hamaker, Miscell. Phemic. p. 117 sq.). The flesh of the sheep, especially that of wethers and lambs,
CATTLE

The milk of sheep was also an article of culinary use (Deut. xxix, 14; comp. Diod. Sic. i, 18; Pliny xxviii, 3; Strabo, xvii, 835; Colum. R. R. v. 2; Dioscor. ii, 73). Sheep, especially lambs and rams (q. v.), were a prominent animal in sacrifices (q. v.), and a stock of them was often sacrificially offered for sale is the Jewish temple (John ii, 14). The wool (κατελθήναι, τέμνερ, or Ἰς, γείτων), which, on account of the pasturing of the flock under the open sky, attained a high degree of fineness (as in Spain), was worth a high price (Rev. xvi, 11; Ezek. xxviii, 14; Job xxxi, 20; Prov. xxvii, 26; xxxi, 13), and the Israelites were obliged to pay tithes of this product (Deut. xii, 5). Sheep-shearing (Gen. xxxix, 12) was a rural festive occasion (1 Sam. xiv, 4; 2 Sam. xili, 28).

As enemies of the shepherd are named the lion (Mic. v, 7), the bear (1 Sam. xiii, 23), and the wolf (Strabo, xvii; Matt. x, 16; John x, 12; comp. Isa. xi, 6; lx, 25), which might easily carry off a single animal in the extensive and solitary pastures, although even this was often rescued by the sheep-tender (1 Sam. xvii, 34 sq.). See Lion. The sheep were very liable also to the diseases that prevail in the wide pastures of Spain and Italy (Isa. liii, 6; Hosea, iv, 16; Matt. xviii, 12). On the "rot," or disease peculiar to flocks, see Bochart, i, 596; Aristot. Anim. ix, 3. The color of sheep is in the East generally white (Psa. cviii, 16; Isa. i, 18; Dan. vii, 9; Cant. vi, 5; Rev. i, 14; comp. Ezek. xxviii, 18); although black (κάτωθι, dusky, Gen. xxx, 82) ones are also found (Colum. R. R. vii, 2; Pliny, viii, 73; comp. Whatm. ii, 215; Strabo, xx, 449; Pliny, xxxii, 9; comp. Rossellini, Monum. Civil. i, 246). See Jacob. A peculiar species of sheep (Ovis lat. camandia, Linn.) is found in the East, with a long fat tail (αὐγάκτον, αὐγαθή, Arab. αὐγάθ; A. V. "rump"); Lev. iii, 9; vii, 5; viii, 25; 13, 5; 14, 15 (Gen. xxv, 24) and the intestines and pounds, turned up at the end, and often drawn by the animal upon a board or small two-wheeled cart (Herod. iii, 113; Aristot. Anim. viii, 28; Pliny, vii, 75; Diod. Sic. ii, 54; Εὐλίαν, Amm. iii, 8; Εἰνατος, 4; Olear. Persian. v, 8; Kämpfer, Amor. p. 56 sq.; Lucas, Reise nach d. Levante, p. 192; Rossell, Aleppo, ii, 8; Descript. de l'Egypte, p. 452; Trav. en E. xxi, 358 sq.; Oedem, i, 759 sq.; comp. Korte, Orient. p. 429; Robinson, Ros. ii, 169, 180; Schubert, iii, 118). That the same contrivance was customary with the Jews may be seen from the Mijmim (Skabb, v, 4). This kind of sheep is farther distinguished from the common species of the Bedouins by its turned-up nose, and long, pendent ears. On the Mosaic enactments respecting the rights of property in sheep (Exod. xxii; Deut. xxii), see above. Compare generally Bochart, Hieroz. i, 451 sq.; Michaelis, Vorn. Schrift. i, 118 sq. In Dan. viii the Persian empire (king) is personified by a ram. See Persia. On this figure (which represents the subjects as a flock), see Lengerke, Diniel, p. 356 sq. Compare Sheper.

2. Goats.—This kind of stock is usually classed with sheep under the word חץ, lexem, or (when a single head is intended) שֹׁרֶכֶת, seker, and thus associated with neat cattle, לְבָנָה, bakoar (as in Hom. μύκτην, then βελών). The terms for goats individually are: בּוֹרֶכֶת, a ke-goat; בּוֹרֶכֶת סֵיֵירִית, seyeruth izim (shaggy female of the goats), a she-goat; for the buck, more distinctively, there are several terms: בּוֹרֶכֶת, torath; בּוֹרֶכֶת סֵיֵירִית (more fully בּוֹרֶכֶת סֵיֵירִית, seyeruth izim), i.e. shaggy male of the goats); בּוֹרֶכֶת, torath; בּוֹרֶכֶת, gaddi, is a collective term. Goats were reared by the early patriarchs (Gen. xxv, 9; xxvii, 14; xxxvii, 31), as by the modern Bedouins; and in later times they also formed an important element (in all the hilly regions of Palestine) of agricultural wealth.

Goat of Palestine (Cupra Mammibrae). (comp. 1 Sam. xcv, 2; Cant. vi, 5; Prov. xxvii, 26; see Ezek. xxvii, 21). They were used not only for sacrifice, but also for food (Deut. xlv, 4; comp. Buchanan, ii, 67; Robinson, i, 342; Wellsted, p. 406), especially the young males (Gen. xxvii, 9, 14, 17; Judg. vi, 19; xiii, 15; 1 Sam. xv, 20), as still in the East (Russel, Aleppo, ii, 28). The milk of goats was also an article of food (Prov. xxvii, 27), being more wholesome than that of sheep (Pliny, xxxvi, 83; comp. Bochart, Hieroz. i, 717; Prosp. Alpin. Res. Egypt. p. 229). Goat-skins were only employed as clothing by poor persons, or such as chose to wear mean apparel (Heb. xi, 37). They were generally made into water or wine casks. See Bottle. Goat's hair is often the material of tent-cloth (Exod. xxvii, 7; xxxvi, 14; comp. Deuta. Valle, Prov. i, 206; Arriuex, iii, 256; Volney, i, 208; Thevenot, i, 196), as well as of mats, resses and bedding (1 Sam. xix, 18, 16; but see on this passage Kolker, Quest. Bibl. spec. ii, 56 sq.), and frequently of cloaks (Robinson, i, 270). See Tent; Boster; Clothing. The goats of the nomadic Arabs are generally black; but in Syria (Russel, ut sup.; Thevenot, ii, 196; Russegerger, i, 717) and Lower Egypt (Sonini, i, 229) there are found goats of a large size, like the European, with hanging ears (often a foot or more in length), and of a bright red color; this species is called Cupra Mammibrae. Whether the Angora goat (Cupra Angoraerum of Linn.) (see Haussel, p. 285; Tournefort, iii, 488; Scheuchzer, i, 879), whose long, soft, silky hair is made into the well-known "camlet" stuff, was also indigenous to Palestine (Schulte, Leit. v, 28; will have it found on Lesbos), is undetermined; it is possibly that referred to in Cant. vi, 5. On the Mosaic enactment respecting the cooking of a kid in its mother's milk (Exod. xxiii, 19; xxxv, 26; Deut. xiv, 21), see Kid. The symbol of the Macedonian (Alexander's) empire by a goat (γατός, γάτης) in Dan. viii, 5 sq., may be illustrated by the epithet Egean (αἰγηνής, q. d. goatmen), applied to the Greek colonies on that part of the Mediterranean Sea (comp. Justin. vii, 1, 7). See Macedonia. See generally Bochart, Hieroz. i, 705. On the Syrian wild goats, see Inex. Comp. Goat.

Caul (חֹרֶת, gohe) reth, properly a redundant part, i.e. Rep. Exod. xxix, 13, 22; Levit. iii, 4, 10, 15; iv, 9; vii, 4; viii, 16, 25; ix, 10, 19) is, according to Septuagint and Vulgate, the great lobe of the liver; the margin of our version says, "It seemeth by anatomy and the Hebrew doctors to be the midstrif." The word might be rendered the lobe over the liver, although it makes a part of the liver itself, and this appears to be more applicable than the net over the liver, termed the lesser omentum. In 110, 8 the word rendered "caul" of the heart is מַעֲרֵות (maare), literally enclosed), and means the pericardium, or parts about the heart.
CAUL

The term translated "cauls" in Isa. iii, 18 (ןבישים, shebiyim, literally settings, Sept. ʾispaläion) was perhaps a cap of network worn by females. The caps of network in the accompanying wood-cut are from a relief in the British Museum, representing singers and harpists welcoming Sennacherib on his return from conquest. Fig. 1 has the hair curiously arranged, but perhaps not in a caul. There is also in the British Museum a real cap of network for the hair, from Thbes, the meshes of which are very fine. See Headdress. As to the true meaning in this passage, the versions give but little assistance. The Sept. renders יִמְלֹא (implóa, "plaited work," to which κοσκύλοι, "fringes," appears to have been added originally as a gloss, and afterwards to have crept into the text. Aquila has γυλαγωγεῖς, "belts." The Targum merely adopts the Hebrew word without translating it, and the Syriac and Arabic vaguely render it "their ornaments." It occurs but once, and its root is not elsewhere found in Hebrew. The Rabbinical commentators connect it with חֵלֶּבֶת, shibbehēth, rendered "embroider" in Exod. xxviii, 39, but properly "to work in squares, make checker-work." So Kimchi (Lex. s. v.) explains shebiyim as "the name of garments wrought in checker-work." Rashi says they are "a kind of network to adorn the head." Abarbanel is more full; he describes them as "head-dresses made of silk or gold thread, with which the women bound their heads about, and they were of checker-work." The word occurs again in the Mishna (Kelim, xxviii, 19), but nothing can possibly be inferred from the passage itself, and the explanations of the commentators do not throw much light upon it. It there appears to be used as part of a network worn as a head-dress by women. Bartenora says it was "a sort, which they made upon the network for ornament, standing in front of it, and going round from one ear to the other." Schroeder (De Vest. Mul. cap. ii) conjectured that they were medallions worn on the necklace, and identified them with the Arab shomah, the diminutive of shama, the sun, which is applied to denote the sun-shaped ornaments worn by Arab women about their necks. But to this Gesenius very properly objects (Jesua, i, 209), as well as to the explanation of John (Archæol. i, ii, 129), who renders the word "gauze veil" (Smith, s. v.). Others understand golden ornaments appended to braids of the hair behind (see Kitto's Daily Illustration in loc.). The hair of Oriental women is usually divided into a number of braids or tresses, which fall down upon the back, and to each of which is added three silken threads, each charged with small ornaments in gold, and terminating in small coins of the same metal (see Kitto, Pict. Bible in loc.; Lane, Mod. Ezg. i, 59, 60; ii, 409, 410). See Ornament.

Causeway (גָּשַׁי, medrash), a raised way (1 Chron. xxxvi, 16, 19), or a stairs of work ("terrace," 2 Chron. ix, 11). In these passages it apparently refers to an ascent by steps, or a raised slope between Zion and the Temple, which in subsequent times was replaced by the bridge. In 2 Chron. ix, 4, it is called יָשָׁש (yalash), an "ascent." In most of the passages where it occurs, the former word signifies any public road, and is translated "highway."

Caussin, Nicholas, a French Roman Catholic divine, was born at Troyes, in Champagne, in 1583, and was received in the order of the Jesuits in 1607. He taught rhetoric for a time in different colleges, and Richelieu made him confessor to Louis XIII. He died July 2, 1651. His principal work is Cour Sainte (5 vols. 12mo, The Holy Court, transl. by Sir Thomas Hawkins, Lond. 1658, fol.). It had great success from the style of its biographies and its fervid devotion. Fuller has adopted much of its style in his Holy and Profane State. Part of it was translated into Latin, under the title Aulae Impia Heroida (Col. 1644, 8vo).

He published also De eloquentia sacra et humana, libri xvi (7th ed. Lugd. 1651, 4to); Symbolica Lyceorum apudianorum, s et Anhemi, in quibus populi edocti sunt. (Paris, 1617, 4to); Hoefer, Nouv. Bibl. Générale, ix, 282.

Cavalleri or Cavallier, Jean, one of the chief leaders of the Camerolese (q. v.), was born in 1679, at Ribante, near Alais, in Languedoc. He was a Protestant, and in the persecution of 1701 he fled to Geneva. When the insurrection in the Cévennes broke out in 1702 he joined the insurrents, and soon rose to command. With incredible skill and courage he kept up the warfare until 1704, when he made a treaty with Marshal Villars. He then became a colonel in the king's service, and was even introduced at Versailles. Afterwards feeling himself to be an object of suspicion, he escaped, and subsequently went to Great Britain. Here he published his Memoirs, which were translated into English (Dublin, 1726, 8vo). After having commanded a regiment of Huguenot refugees at the battle of Almanza, he died, governor of Jersey, in 1740.—Smedley, Hist. of the Reform. Rel. in France, vol. iii, chap. xxxv; Hoefer, Nouv. Bibl. Générale, ix, 294; Bibl. Univ. tom. iii, p. 448.

Cavalleri, Giovanni Michele, an Augustinian monk of Lombardy, born at Bergamo about the end of the 17th century. He died in 1757, leaving behind him as a monument of learning and industry a work entitled Opera omnia literaria (Aug. Vind. 1764, 5 vols. folio), containing a vast mass of information in the shape of commentaries on the decrees of the "Sacred Congregation of Rites" at Rome.—Hoefer, Nouv. Bibl. Générale, ix, 294; Bibl. Univ. tom. iii, p. 448.

Cavalry. See Horse; Chariot.

Cavaslar. See Caramaslas.

Cave, properly תֶּנֶס, medrash (everywhere so rendered, except "don" in Isa. xxiii, 14; Jer. vii, 11; "Mearah" [q. v.]. In Josh. xiii, 4; χωρον ["don" except in John xiii]. Occasionally "a" hole," as generally rendered; hence a cavern, Job xxx, 6, etc.; whence the name Horite, i.e. tropogeia;
CAVE
also HAINAX, i. e. cavernous; HORONAIM, i. e. twin caves; BETH-HORON, i. e. place in the hollow), or 'מִין, chur' (also rendered "hole"); once רַעֲשֹׁת, mekhelith, Isa. ii. 19. Grottoes seem also to be indirectly denoted by the terms דִּינְעָה, chirwim (refuges in the rocks, "clefts"); Cant., ii, 14; Jer. xlvi, 16; Obad. 8; and דִּינְעָה, misharakh (a fissure through which a stream flows, "den"); Judg. vi, 2; both of which are combined in the Greek term σπηλιά ("cave"), Heb. xl, 36; "place" of water; James iii, 12. See DEX.

1. At Natural Features.—The geological formation of Syria is highly favorable to the production of caves. It consists chiefly of limestone, in different degrees of density, and abounds with subterranean rivulets. The springs issuing from limestone generally contain carbonate of lime, and most of them yield a large quantity of free carbonic acid upon exposure to the air. To the erosive effect upon limestone rocks of water charged with this acid the formation of caves is chiefly to be ascribed (Enc. Metropol. art. Geology, p. 692, 693).

Many of these have also been artificially enlarged and adapted to various purposes both of shelter and defence (Parks, Text-Book of Geology, p. 141; Kitto, Phys. Geogr. of Jud., p. 72). This circumstance has also given occasion to the use of so large a number of words as are employed in the Scriptures to denote caves, holes, and fissures, some of them giving names to the towns and places and their neighborhood (Gen. xix, 6; xxxvi, 21; Deut. ii, 12; Job xxx, 6; comp. Strabo, i, 42; xvi, 756, 776; see Burchardt, Syria, 410; Robinson, ii, 424; Stanley, Sinai and Palestine, Append. § 68-71).

The strata of strata of Syria, sandstone, chalk, basalt, natron, etc. favor the formation of caves; consequently the whole region abounds with subterranean hollows of different dimensions. Some of them are of immense extent; these are noticed by Strabo, who speaks of a cavern near Damascus capable of holding 4000 men (xvi, p. 1096, edit. 1707). This cavern is shown to the present day. Modern travels abound with descriptions of the caves of Syria. The Crusade writers record the local traditions respecting them current in their times (William of Tyre; Quaresimus, Elucid. Ter. Sanc.).

Tavernier (Voyage de Perse, part ii, chap. iv) speaks of a grotto between Alepp and Bir, which would hold near 3000 horse. Maundrell has described a large cavern under a high rocky mountain, in the vicinity of Sidon, containing 200 smaller caverns (Travels, p. 154, 156). Shaw mentions the numerous caves, holes, and caverns in the mountains on the sea-coast, extending through a long range on each side of Joppa. An innumerable multitude of excavations are found in the rocks and valleys round Wady Musa, which were probably formed at first as sepulchres, but afterwards inhabited, like the tombs of Thebes (Robinson's Researches, ii, 593). Other excavations occur at Deir Dubbâan (ii, 353); others in the Wady leading to Santa Hanneh (ii, 360)." "In the mountains of Kûl'at Hû Mû'ân, the natural caverns have been used by passages cut in the rocks, in order to render them more commodious habitations. In the midst of these caverns several cisterns have been built; the whole would afford refuge for 600 men" (Burchardt's Travels, p. 381). Almost all the habitations at Om-keis (Gadara) are caves (Burchardt, p. 273). An extensive system of caves exists between Bethlehem and Hebron (Irby and Mangles, p. 108).

2. Scriptural Notices.-(1) The first mention of a cave in Scripture relates to that into which Lot and his two daughters retired from Zoar, after the destruction of Sodom and Gomorrah (Gen. xix, 30). It was some cavern in the mountains of Moab, but tradition has not fixed upon any of the numerous hollows in that region. See ZOAR.

(2) The next is the cave of Machpelah, in the field of Ephron, which Abraham purchased of the sons of Heth (Gen. xxv, 9, 10). Here Abraham buried Sarah, his wife. It was said of himself after his death (xxvii, 10). Here also Isaac, Rebekah, Leah, and Jacob were buried (Gen. xlix, 31; i, 13). The cave of Machpelah is said to be under the Mohammedan mosque at Hebron, surrounded by a high wall called the Haram; but even the Moslems do not allow to descend into the cavern (Ben. of Tudela, Early Trav. p. 86; Stanley, p. 139). The tradition that this is the burial-place of the patriarchs is supported by an immense array of evidence (Robinson, Researches, ii, 433-440). See MACHEPHEL.

(3) The situation of the cave at Makkekah, into which the five kings of the Amorites retired upon their defeat by Joshua, and into which their carcasses were ultimately cast, is not known (Josh. x, 16, 57). It is thought by many that the cave of Makkekah can hardly be the one to which tradition has assigned the name (Irby and Mangles, p. 93); for, though it is not necessary to suppose that the cave was close to the town of Makkekah, yet the situation of the great caverns both at Beit Jibrin and at Deir Dubbân in neither case agrees with that of Makkekah as given by Eusebius, eight miles from Eleutheropolis (Reland, p. 885; Robinson, ii, 392, 397; Stanley, p. 211). See MACKEDAH.

(4) The cave of Adullam, to which David retired to avoid the persecutions of Saul (1 Sam. xxii, 1, 2). This, according to tradition, is an immense natural cavern at the Wady Khureitan, which passes below the Frank mountain. The site assigned by Eusebius to Adullam, 10 m. E. of Eleutheropolis, agrees little with that of this cave, which in some respects agrees with the Scripture narrative better than the neighborhood of Deir Dubbân, assigned to it by Mr. Stanley (see 1 Sam. xx, 6, and particularly xxii, 4, 3; Josephus, Ant. vi, 12, 3, Reland, p. 549; Irby and Mangles, p. 108; Robinson, ii, 175; Stanley, p. 239). See ADUL-

(5) The cave at Engedi, which afforded a retreat to David and his followers (1 Sam. xxiii, 29; xxiv, 1), and in which he cut off the skirt of Saul's robe (1 Sam. xxiv, 4), can be clearly identified. The place is now called 'Ain Jidy by the Arabs, which means the same as the Hebrew, namely, "The Fountain of the Kid." "On all sides the country is full of caverns, which might serve as lurking-places for David and his men, as they do for outlaws at the present day. The whole scene is drawn to the life" (Robinson,
The cave in which Obadiah concealed the prophet (1 Kings xix, 9), as well as that of the "cleft" of Moses on Mount Horeb (Exod. xxxiv, 22), is also obviously indeterminate; for, though there are not said to be a place for the former on Jebel Mûsâ, and consecrated the spot by a church, there are caves on the competing summit of Serbâl to one or another of which it might with equal probability be transferred (Stanley, p. 49; Robinson, i, 153; Burchhardt, p. 688). See HOREB. The cave of Elijah is pretended to be shown at the foot of Mount Sinai, in a chapel dedicated to him; and a hole near the altar is pointed out as the place where he lay (Robinson, i, 152). See also CARMEL.

(7.) In the New Test. are mentioned the rock sepulchres of Lazarus (John xi, 38) and Christ (Matt. xxvii, 60). The former is still shown with little probability by the monks at Bethany (see Robinson, ii, 100), and the latter a disputed question. See CALVARY.

Besides these special caves there is frequent mention in O. T. of caves as places of refuge. Thus the Israelites are said to have taken refuge from the Philistines in "holes" (1 Sam. xiv, 11), to which the name of the well of Jonathan's compound is prefixed (Mishma, sufficiently answers (Stanley, p. 204; Robinson, ii, 112; Iryb, p. 89). So, also, in the time of Gideon, they had taken refuge from the Midianites in dens, and caves, and strongholds, such as abound in the mountain region of Manasseh (Judg. vi, 2; see Stanley, p. 341).

3. Uses of Caves.—(1.) Caves were used as dwellings-places by the early inhabitants of Syria. The Horites, the ancient inhabitants of Idumæa Proper, were troglodytes, or dwellers in caves, as their name imports. Jerome records that in his time Idumæa, or the whole southern region from Eleutheropolis to Petra and Ailah, was full of habitations in caves, the inhabitants using subterranean dwellings on account of the great heat (Comm. on Obad. v, 6). "The excavations at Deir Dubban and on the south side of the wady, leading to Santa Hanneh, are probably the dwellings of the ancient Horites" (Robinson, ii, 350), and they are peculiarly early and in the ground Belt Eleutheropolis (ii, 425). The Scriptures abound with references to habitations in rocks; among others, see Num. xxxiv, 21; Cant. ii, 14; Jer. xxix, 16; Obad. 3. Even at the present time many persons live in caves. The inhabitants of Anah, a town on the east of the Jordan, all live in grottoes or caves hollowed out of the rock (Buckingham's Travels among the Arab Tribes, p. 61). In the neighborhood of Hebron peasants still live in caves, and especially during summer, to be near their flocks (Wilkinson's Travels, i, 333). Poor families live in caves in the rocks which seem formerly to have been inhabited villages, near the ruins of El Bori, also at Siloam, and in the neighborhood of Nazareth. For the rock-dwellings and temples of Idumæa, see PETRA.

(2.) Caves afforded excellent refuge in the time of war. Thus the Israelites (1 Sam. xiii, 6) are said to have hid themselves in caves, and in thickets, and in rock holes (in clefts in the rocks, see Jer. xi, 9; Josephus, Ant. xii, 11). Hence, then, to "enter into the rock, to go into the holes of the rocks, and into the caves of the earth" (Isa. ii, 19), would, to the Israelites, be a very proper and familiar way to express terror and consternation. Such were most of the caves named, especially the strongholds of Adullam and Engedi.

(3.) Not only have the caves of Palestine afforded refuge from enemies, but during the earthquakes also, by which the country has been so often visited, the inhabitants have found in them a safe retreat. This was the case in the great convulsion of 1837, when Safed was destroyed; and in 1849, when the near-by rocks on the summit of Betel, which form one of the most celebrated cataracts of the Jordan, and the river near the ruins of El Bori, also at Siloam, were raised in the air by some of the most intense earthquakes that have ever been felt. The cave in which Lazarus was buried was possibly something of this kind. No use, indeed, of rock caverns more frequently used for other purposes more or less akin with the above, such as stables for horses and for granaries (Iryb and Manges, p. 140). Again, the "pits" spoken of in such a context (Isa. xxi, 10) seem to have consisted of large wells, in "the sides" of which excavations were made leading into various chambers. See CISTERNS. Such pits were sometimes used as prisons (Isa. xxxiv, 22; ii, 14; Zech. ix, 11). See PRISON. Those with nickes in the sides were even occupied for brick-making (Ezek. xi, 20). Many of these vaulted pits remain to this day. The cave in which Lazarus was buried was possibly something of this kind. No use, indeed, of rock caverns more
CAVE

strikingly connects the modern usages of Palestine and the adjacent regions with their ancient history than the employment of them as tombs or vaults (compare the early Christian Catacombs). The rocky soil of so large a portion of the Holy Land almost forbids interment, excepting in caves either natural or hewn out. But the caves of Edessa (see Demonstrations, vol. ii, 36; Stanley, p. 148). Among these may be mentioned the cave of Machpelah, the tomb of Aaron on Mount Hor, of Joseph, and of Rachel, as those for which every probability of identity, in site at least, may be claimed (Irry and Mangles, p. 184; Robinson, v. 321, 322; iii, 38-57). More questionable are the sites of the tombs of Elisah, Obadiah, and John the Baptist at Samaria; of Habakkuk at Jebaâtha (Gabatha), Micah near Keila, and of Deborah, Rebekah's nurse, at Bethel (Stanley, p. 143, 149); Reland, p. 772, 698, 981; Robinson, iii, 140). The questions so much debated relating to the tombs in and near Jerusalem and Betha- naiah, and the biography of the most remarkable rock-tombs of Jerusalem, there can be no doubt that the caves bearing these names are sepulchral caverns enlarged and embellished by art. The sides of the valley of Jehoshaphat are studded with caves, many of which are inhabited by Arab families (Sandy, p. 188; Maundrell, p. 446; Robinson, i, 355, 516, 539; Bartlett, Wals about Jerusalem, p. 117). It is not the doubt of vast numbers of caves throughout the country, together with, perhaps, as Maundrell remarks, the taste for hermit life which prevailed in the fifth and sixth centuries of the Christian era which has placed the sites of so many important events in caves and grottoes: e.g. the birth of the Virgin, the Annunciation, the Salutation, the birth of the Baptist and of our Lord, the scene of the Agony, of Peter's denial, the composition of the Apostles' Creed, the Transfiguration (Oliphant, pr. ii, 2; Maundrell's Early Travels, p. 479); and the like causes have created a traditionary cave-site for the altar of Eliah on Mount Carmel (1 Kings xviii, 19; comp. Amos iv, 8), and people its sides, as well as those of Mount Tabor, with hermit habitations (see Irry and Mangles, p. 60; Reland, p. 343). Sir J. Maundrell, in his Antiquities of Palestine, p. 83; Sandy, p. 203; Maundrell, Early Travels, p. 478; John, Bibl. Arch. p. 9; Stanley, p. 853; Kitto, Phys. Geogr. p. 50, 51; Van Egmont, Travels, ii, 5-7). See SEPULCHRE.

CAVE, William, an eminent English divine, was born at Pickhill, Leicestershire, Dec. 30, 1637. He studied at St. John's College, Cambridge, where he graduated A.B. in 1656; A.M. in 1660. In 1662 he was appointed vicar of Islington; and afterwards he became chaplain in ordinary to Charles II. In 1671 he was made rector of All-Hallows, London; in 1681 he was made rector at Windsor; and in 1690 became vicar of St. Alfege. He died at Windsor, Aug. 4, 1718. His works are: 1. Primitive Christianity (Lond. 1672); and several times reprinted—A French translation, Amsterdam, 1712, 2 vols. 12mo)—2. Tabula Ec- clesiastica, or Tables of Ecclesiastical Writers (Lond. 1674; Hamburg, 1676)—3. Antiquitates Apostolicâs, or Historical Illustrations of the Holy Apostles, Mark and Luke (Lond. 1676 and 1684, fol.; also, edited by Cary, Oxon. 1840, 8vo)—4. Apostoli, or the Lives, Acts, etc., of the Contemporaries or Immediate Successors of the Apostles, and the most eminent of the Fathers of the Church in the first three centuries (Lond. 1677, fol.; also, edited by Cary, Oxon. 1840, 8 vols. 8vo)—5. A Dissertation concerning the Government of the Ancient Church, by Bish-
CECILIA

he was ordained priest, and settled at Lewes; but his health failed there, and in 1780 he became minister of St. John's, Bedforf. London. In 1800 he obtained the livings of Chobham and Bisham, Surrey. In 1818 he was attacked by a paralytic seizure, and was compelled to visit Clifton. The journey did not much, however, improve his health, and he retired in May, 1809, to Tunbridge Wells. He died August 15, 1810.

"The exertions of Mr. Cecil as a preacher were immense. His talents were eminent; his eloquence was impassioned, yet solemn, and sometimes argumentative. As a Christian, he was habitually spiritually minded; modest and unassuming, he never intruded his capacities on the attention of mankind. He was contented with doing good and getting good; and his works, though few, are valuable for their sterling sense and genuine piety" (Jones). The Works, edited by Pratt (London, 1811, 4 vols. 8vo), of which vol. i contains a Life of Cecil, by Pratt, with Cecil's Lives of Bacon and Newton, vol. ii contains sermons and miscellaneous tracts; vol. iii, thirty-three sermons; vol. iv, Cecil's Remains, which are among the most valuable writings on pastoral life and work, as recorded by the faithful preacher of the Gospel in modern times. There is also an American edition (N. Y. 1845, 3 vols. 8vo).—Pratt, Memoir of Cecil; Jones, Christian Biography, s. v.

CECILIAN, bishop of Carthage (A.D. 311). See DOMASTISTS.

CEDAR ("περα, s. v, trees, from its deep root or compressed form; Gr. cedroph, occurs in numerous places of Scripture, and is not agreed on the exact meaning of the term. Celsus (Hierobol. I, 106, sq.), for instance, conceives that it is a general name for the pine tribe, to the exclusion of the cedar of Lebanon, which he considers to be indicated by the word bereth, or "בֶּרֶה". The majority of authors, however, are of opinion that the cedar of Lebanon (Cedrus cedror, or Cedrus Libani of botanists) is alone intended. This opinion is confirmed by the Septuagint and Vulgate, which uniformly (as in the English version) render the word by cedroph. cedræ; and also by the fact that the Arabic name for the cedar of Lebanon is arz, evidently cognate with cedrus, the true cedar. In all these respects it is difficult to be discriminative on the subject. See BOTANY.

1. The earliest notice of the cedar is in Lev. xiv, 4, 6, where we are told that Moses commanded the leper that was to be cleansed to make an offering of two sparrow, cedar-wood, wool dyed in scarlet, and hyssop; and in ver. 49, 51, 52, the houses in which the leper dwelt are ordered to be purified with the same materials. Again, in Num. xix, 6, Moses and Aaron are commanded to sacrifice a red heifer: "And the priest shall take cedar-wood, and hyssop, and scarlet." Here the proper cedar can hardly be meant, as it does not grow in Egypt, and its wood is scarcely aromatic. The Hebrew word cuero is occasionally rendered, the wood and berries of which were annually applied to such purposes. The term cedar is applied by Pliny to the lesser cedar, Apycedrus, a Phoenician juniper, which is still common on the Lebanon, and whose wood is aromatic. The wood or fruit of this tree was anciently burnt by way of perfume, especially at funerals (Pliny, H. N. xii, 1, 5; Ovid, Fast. ii, 158; Homer, Od. v, 90). The tree is common in Egypt and Nubia, and also in Arabia, in the Wady Mouse, where the greater cedar is not found. It is obviously likely that the use of the more common cedar should be enjoined while the people were still in the wilderness, rather than of the uncommon (Shaw, Tureela, p. 454; Burchhardt, Syria, p. 430; Russell, Nabata, p. 425). See JUNIPER.

At a later period we have notices of the various uses to which the wood of the cedrus was applied, as 2 Sam. v, 11; vii, 2, 7; 1 Kings v, 6, 8, 10; vi, 9, 10, 15, 16, 18, 20; 2 Sam. v, 7, 11, 12; ix, 11; x, 27; 1 Chron. xlvii, 6; 2 Chron. ii, 8; ix, 27; xxx, 18. In these passages we are informed of the negotiations with Hiram, king of Tyre, for the supply of the cedr. trees out of Lebanon, and of the uses to which the timber was applied in the construction of the Temple, and of the king's palace: he "covered the house with beams and boards of cedar; "the walls of the house within were covered with'the wood" as well as boards of polished pine, the pillars, and the "beams of cedar," and the altar was of cedar. But in these passages of Scripture, likewise, the common cedar cannot well be signified, as the wood is neither hard nor strong enough for building purposes. Other kinds varied trees, however, doubtless existed in the same locality with the cedar of Lebanon, which were suitable in these respects, as well as on account of beauty and durability, for architecture. Perhaps nothing more is meant than the pine-tree, which is known to grow on Mt. Lebanon. This opinion seems to be confirmed by Ezek. xxvii, 5: "They have made all thy ship-boards of fir-trees of Senir; they have taken cedar from Lebanon to make masts for thee;" nor is it probable that any other tree than the common pine would be taken for masts, when this was procurable. Also in the second Temple, rebuilt under Zerubbabel, the timber employed was cedar from Lebanon (Ezra iii, 7; 1 Esdr. iv, 48; v, 65). Cedar is also said by Josephus to have been used by Herod in the roof of his temple (War, v, 5, 2). The roof of the round church of the Holy Sepulchre at Jerusalem is said to have been of cedar, and that of the church of the Virgin at Bethlehem to have been of cedar or cypress (Williams, Holy City, ii, 202; Quarenghi, Edin. Arch. Trans. vi, 12; Todd, Bethlem, p. 110, 112). See Cedar.

It may here also be remarked that the Syriac and Heb. interpreters generally, at Isa. xxi, 19; lx, 13, render the word taslabur ("ץלובער," literally erectness), translated in our version (after the Vulg. and Chaldee) "box-tree," by sherbin-cedar, a species of cedar distinguished by the smallness of its cones and the upward direction of its branches (see Rosenmüller, Afterthmsk. IV, 1, 292). Another form of this word, nasan, used in Ezek. xxvii, 6, has there been mistranslated in our version by "Ashurites," where the clause "the cedar of the Ashurites" is translated "thy benches of ivory," is literally, "thy benches they make of ivory, the daughter of the cedar-tree," i. e. inlaid or bordered with it. For a full account of the various readings of that passage, see Rosenmüller's Schol. In Ezek. xxvii, 6. The most satisfactory translation appears to be given by the Vulg., based on the LXX (c. 6, 180) and Rosenmüller: "They have benches they make of ivory, inlaid with box-wood from the isles of Chittim." Now it is probable that the isles of Chittim may refer to any of the islands or maritime districts of the Mediterranean. Borchart believes Corsica is intended here, and in the adjoining verse, Sardinia, and so Italia. Corsica was celebrated for its box-trees (Plin. xxxvi, 16; Theophrast, H. P. ii, 15, § 5), and it is well known that the ancients understood the art of veneer-
CEDAR 171

CEDAR

ing wood, especially box-wood, with ivory, tortoise-shell, etc. (Virg. Aen. x, 137). However, Celsus (Hier. rob. 1, 80) and Sprengel (Hist. Rei Herb. i, 267) identify the sternum with the Pinus cedrus (Linn.), the cedar of Lebanon. See Box-tree.

If, on the other hand, we consider some of the remaining passages of Scripture, we cannot fail to perceive that they forcibly apply to the cedar of Lebanon, and to the cedar of Lebanon only. Thus, in Ps. xci, 12, it is said, "The righteous shall flourish like a palm-tree, and spread abroad like a cedar of Lebanon." But Ezekiel (chap. xxxi) is justly adduced as giving the most magnificent, and, at the same time, the most graphic description of this celebrated tree (comp. Homer, H. xiii, 359; Virgil, Æne. ii, 628; v, 447; Horace, Od. iv, 6). The other principal passages in which the cedar is mentioned are 1 Kings iv, 33; 2 Kings xix, 28; Job xi, 17; Psalms xxxix, 6; xxx, 10; civ, 16; cxxviii, 9; Cant. i, 17; v, 15; viii, 9; Isa. ii, 13; ix, 10; xiv, 8; xxxvii, 24; xii, 19; xiv, 14; Jer. xxii, 7, 14, 23; Ezek. xvii, 3, 22, 28; Amos ii, 9; Zeph. ii, 14; Zech. xi, 1, 2; and in the Apocrypha, Ecclus. xxiv, 13; 1, 12. See Tree.

The conditions to be fulfilled in order to answer all the descriptions in the Bible of a cedar-tree are that it should be tall (Isa. ii, 12), spreading (Ezek. xxxi, 5), abundant (1 Kings v, 6, 10), fit for beams, pillars, and boards (1 Kings vi, 10, 15; vii, 2), mast of ships (Ezek. xxvii, 5), and for carved work, as images (Isa. xiv, 14). To these may be added qualities ascribed to cedar-wood by profane writers. Pliny speaks of the cedar of Crete, Africa, and Syria as being most esteemed and imperishable. In Egypt and Syria ships were built of cedar, and in Cyprus a tree was cut down 120 feet long and proportionately thick. The durability of cedar was proved, he says, by the duration of the cedar roof of the Temple of Diana at Ephesus, which had lasted 400 years. At Utica the beams, made of Numidian cedar, of a temple of Apollo had lasted 1178 years! (Pliny, Hist. Nat. xiii, 5; xvi, 40). Vitruvius (ii, 9) speaks of the antiseptic properties of the oil of cedar (comp. Josephus, Ant. viii, 5, 2; Sandys, Travels, p. 166, 167). The corresponding Arabic word, ars, is used to express not only the cedar of Lebanon, but also at Aleppo the Pinus sylvestris, which is abundant both near the coast on Lebanon. A similar statement will apply also to the Thuya articulata of Mount Atlas, which is called by the Arabs al-ars, a name that led to the mistake as to the material of the Cordova roof from its similarity to the Spanish acerce (Niebuhr, Desc. de l'Aubar., p. 131, etc., and Questions, xc, 169, etc.: Pliny, H. N., xiii, 11, 12; Hey, West Barb. c. iv, 49; Gesenius, Thea., p. 148). Besides the trees which belong to the one grove, known by the name of "the Cedars," groves and green woods of cedar are found in other parts of the range (Buckingham, Travels among the Arabs, p. 488; Eng. Cyclopaedia, s. v. Syria; Robinson, new ed. of Bes. iii, 593; Burckhardt, Syria, p. 19; Loudon, Arboretum, iv, 2400, 2407, 2408; Celsius, Hierobo. i, 89; Belon, Obs. de arboribus coniferis, ii, 162, 165, 166). The remains of wood used in the Nineveh palaces were supposed by Layard to be cedar, a supposition confirmed by the inscriptions, which show that the Assyrian kings imported cedar from Lebanon. This wood is now proved by microscopic examination to be yew (Layard, Nin. and Bab, p. 366, 357; Loudon, Fl. sup. p. 2431). See Fin. Gen. Text. The Lebanon is well known to be a widely-spreading tree, generally from 50 to 80 feet high, and, when standing singly, often covering a space with its branches the diameter of which is much greater than its height. The horizontal branches, when the tree is exposed on all sides, are very large in proportion to the trunk, being disposed in distinct layers or stages, and the distance to which they extend diminishes as they approach the top, where they form a pyramidal head, broad in proportion to its height. The branchlets are disposed in a flat, fan-like manner on the branches (see Shelby, Forest Trees, p. 522). The leaves, produced in tufts, are straight, about one inch long, slender, nearly cylindrical, tapering to a point, and are on short footstalks. The male catkins are single, solitary, of a reddish hue, about two inches long, terminal, and turning upwards. The female catkins are short, erect, roundish, and rather oval; they change after fecundation into oval oblong cones, which, when they approach maturity, become from 2 inches to 6 inches long. Every part of the cone abounds with resin, which sometimes exudes from between the scales. As its leaves remain two years on the branches, and as every spring contributes a fresh supply, the tree is an evergreen, in this resembling other members of the fir family, which, the larches excepted, retain the same suit for a year or upwards, and drop the old foliage so gradually as to render the "fall of the leaf" in their case imperceptible. As far as is at present known, the cedar of Lebanon is confined in Syria to one valley of the Lebanon range, viz. that of the Kedisha River, which flows from near the highest point of the range westward to the Mediterranean, and enters the sea at the port of Tripoli. The
grove is at the very upper part of the valley, about 15 miles from the sea, 6000 feet above that level, and their position is moreover above that of all other arboresous vegetation. Belon, who traveled in Syria about 1550, found the cedars about 28 in number, in a valley on the sides of the King’s Mountains. Bauwels described the cedars in 1574, ‘‘could tell no more but 24, that stood round about in a circle, and two others, the branches whereof are quite decayed from age.’’ De la Roque, in 1688, found but 20. Maundrel, in 1696, found them reduced to 16; and Dr. Pococke, who visited Syria in 1744 and 1745, discovered ‘‘The wood,’’ he says, ‘‘does not differ from white deal in appearance, nor does it seem to be harder. It has a fine smell, but is not so fragrant as the juniper of America, which is commonly called cedar, and it also falls short of it in beauty.’’ M. Lamartine, in 1882, says, ‘‘These trees diminish in every succeeding age. There are now but 7. These, however, from their size and general appearance, may fairly be presumed to have existed in biblical times. Around these ancient witnesses of ages long since past there still remains a little grove of yellow cedars, appearing to me to form a group from 400 to 500 trees or shrubs. Every year, in the month of June, the inhabitants of Kandib, of Ednun, of Kandib, and of the neighboring valleys and villages, climb up to these cedars and celebrate mass at their feet.’’ Dr. Graham gives the following measurements of the twelve largest cedars: the circumferences of the trunk at the base respectively 40 feet, 38, 47, 184, 30, 223, 28, 253, 254, 293, 22, 294; the largest having thus a diameter of nearly 48 feet (Jordan and the Rhine, p. 26). Within a few years past a chapel has been erected there (Robinson, Later Res., p. 590, 591: S. anley, Sinai and Pal., p. 140). See Trew’s treatises, Cedror. Libri H. et Apologia de cedro lib (Nornim. 1757 and 1767); Penny Cyclop. s. v. Abies; Thomson, Land and People of the Holy Land, pp. 338 and 339; Dr. Hooker, in the Nat. History Review, Jan., 1862, p. 11-18; and Mr. Jessup, in the Hours at Home, March and April, 1867.

Cedron, the name of a place and of a rivulet.

1. (q) Kedron v. τ. Kedaron. A place fortified by Cendeusus, under the orders of king Antiochus (Sidelos), as a station from which to command the roads of Judea (1 Mac. xxv. 39, 41, xvi. 9). It was not far from Janmab (Janmeh), or from Asotus (Ashod), and had a winter-torrent or wady (ζυγιμπος) on the eastward of it. On the westward the river Adonis had its course before Cendeusus could be attacked (xvi. 5). These conditions are well fulfilled in the modern place Kudur or Kutrah, which lies on the maritime plain below the river Rubin, and three miles south-west of Akir (Ekron). Schwarz (Palest., p. 119) gives the modern name as Kudran, but this wants confirmation. Ewald (Jr. Gesch. iv. 380, note) suggests Tel-Tummeis, five or six miles farther south. The Syriac has Hebron, and the Vulg. Gedor, which some compare with the village Gedorus (Kedrun), mentioned by Eusebius and Jerome (Onomat., s. v. 'Iebrin, Gedor) as lying ten miles from Diopis, toward Elathropolis.

2. In this form is given in the N. T. the name of the brook Kidron (‘‘γεφυρος Κεδρον’’ the black torrent’) in the ravine below the eastern wall of Jerusalem (John xvii. 1), Lachmann, with codices A and D, has ζυγιμπος του Kedud; but the Lce. Text with B has του Kedron, i.e. ‘‘the brook of the cedars’’ (so, too, the Sept. in 2 Sam. xxv. 28). Other MSS. have the name even so far corrupted as του Kedron (so K), cedri, and του Cerdou. The word, however, has no connection with ‘‘cedar.’’ In English, the name in this form is often erroneously pronounced as (if written Kedron) with a hard G. See Kimon.

Ce'lanon (Kedwan, Vulg. Cian), a person named (1 Esdr. v. 15) as the family head (in connection with Azetas) of sixty-seven Israelites who returned from Babylon; but the Heb. texts (Ezra ii. 16; Neh. vii. 21) do not contain either name.

Ceiling. There are three Heb. words employed in the Old Test. which our translators have rendered "ceiled" or "covering." 1. צタイトル (chaphak), to cover or overlay, as it is, elsewhere rendered occurs 2 Chron. iii. 5, where it is said, ‘‘He ceiled the greater house with fir-trees.’’ 2. צ שאנחנו (sawasacon) or pl. saksakim, to cover, render ‘‘ceiled’’ (e.g. Amos ii. 7), or (as in Ezek. xlii. 15) ‘‘is ceiled with cedars, and painted with white paint’’; by the Heb. צvalueOf (from the same root), in this manner were called ‘‘ceiled houses’’ (Hag. i, 4). The ‘‘ceiling’’ of the walls itself is likewise spoken of (Ps. cxviii, Isaiah, vii, 15). In Ezek. xlii. 16, the word rendered ‘‘ceiled’’ is פֶּן (sakilj), ‘‘the ceiling of this house, a board simply, used for that purpose. These ceilings were adorned with ornaments in stucco, with gold, silver, gems, and ivory. Oriental houses appear to have been the reverse of such as we inhabit, the ceiling being richly ornamented and painted, and the floor plastered or stucco, the walls being generally wainscoted. The Egyptian monuments still exhibit elegant specimens of painted ceilings, no doubt greatly resembling those mentioned in the above texts (Wilkinson’s Anc. Egypt., ii, 125). According to Mr. Layard, in the ancient Assyrian houses also the ceiling was made of planks covered with stucco, painted with flowers or with the figures of animals. Some were inlaid with ivory, each compartment being surrounded by elegant borders and mouldings” (Nineveh, i., 208). The following remarks are from Smith’s Dict. s. v.: The descriptions of Scripture (1 Kings vi. 1, 2; vii. 5, 9; Jer. xxxii. 14, Psag. i, 4); and of Josephus (Ant. viii. 3, 2-9; xxv. 11, 5) show that the ceilings of the Temple and the palaces of the Jewish kings were formed of clear planks applied to the beams or joints crossing from wall to wall, probably with sunk panels (φαραγγυατα), edged and ornamented with gold, and carved with incised or other patterns (Keykubad: tlystac), sometimes painted (Jer. xxxii. 14). It is probable that both Egyptian and Assyrian models were in this, as in other branches of architectural construction, followed before the Roman period. See Architecture. The construction and designs of Assyrian ceilings in the more important buildings can only be conjectured (Layard, Nineveh, ii, 265, 280), but the proportions in the walls themselves answer in a great degree to those mentioned in Scripture (Nin. and Bab., p. 642; Ferguson, Hand-book of Architecture, i, 203). Examples, however, are extant of Egyptian ceilings in stucco painted with devices of a date much earlier than that of Solomon’s Temple. Of these devices, the principal are the guilloche, the chevron, and the scroll. Some are painted in blue, with stars, and other bear representations of birds and other emblems (Wilkinson, Anc. Egypt., ii, 290). The excessive use of vermilion and other glaring colors in Roman house-painting, of which Vitruvius at a later date complains (vi. 7, 5, ii), may have been introduced from Egypt, whence also came, in all probability, the taste for vermilion painting shown in Jehoahaz’s palace (Jer. xxii. 14; Amos iii. 15; Wilkinson, i, 19). See also the descriptions given by Atheneus (v. 196) of the tent of Ptolemy Philadelphus and the ship of Philopator (ib. 296), and of the so-called sepulchres of the kings of Syria, near Tyre, by Hasselquist (p. 165).
Celmiarchae (σημειοφατικοὶ, keepers of the sacred vessels), a class of inferior officers in the ancient church. They had charge of all utensils and precious things laid up in the sacred repository of the church. The name σημειοφατίκος is used in the same significance; also chartophylax, or custos archierarum, custodian of the rolls or archives (Sicuer, Theaurum, ii, 971). This officer was commonly a presbyter; Macedonius was both presbyter and sceiotophylax of the church of Constantiople; and Sozomen styles Theodore, presbyter of Antioch, who in the days of suffered martyrdom in the days of Julian, φιλάκα τῶν ειρημένων, "keeper of the sacred utensils." He was put to death because he would not deliver up what he had in his custody. In the Greek Church the chartophylax acts as the patriarch's substitute, excommunicating and licensing presbyters and deacons, and sitting as supreme ecclesiastical judge in many cases.—Bingham, Orig. Eccl. bk. iii, ch. xii, § 3; Sozomen, Hist. Eccl. v, 8.

Celestine (or Celsestina) I, Pope, a Roman by birth, was elected Pope in 422, on the death of Boniface I. During his pontificate the Council of Ephesus, against Nestorius, was held, upon which occasion he wrote several letters to the Eastern bishops, claiming authority and primacy in the Roman See, and sought to exercise it over the African Church in vain. In the Nestorian dispute above mentioned he was more successful, as Cyril, in order to put down Nestorius, accepted the authority of Celestine against him. He left thirteen letters; among them is a complaint to the Pope against the dress of bishops; but it is doubtful whether it means that the clergy should dress like the laity, or should abstain from some special garment which some had adopted. He died March 25 (or July 26), 432. Celestine is said to have sent Palladius and St. Patrick as missionaries to Ireland, but the story is very doubtful. It is not clear that either of them ever had any connection with Rome. His letters are preserved in the Collection of Councils. He is counted among the saints of the Church of Rome.—BHG. Unit. vii, 497; Cornemn, Lives of the Popes, l, 79.

II. Pope, originally Guido, of Città di Castello, in Tuscany, studied under Abelard, and succeeded Innocent II September 26th, 1148. He died in March, 1144.

III. Pope, a Roman named Iacinto Orsini, cardinal of Santa Maria, was elected Pope March 30, 1101, at eighty-five. He crowned Henry V and his wife Constance, and gave a great display of arrogation in doing it; entered warmly into the scheme for delivering the Holy Land, on which account he espoused the cause of Richard I of England, and fulminated censures against Leopold of Austria and the emperor, who detained Richard prisoner. He died January 6, 1109. During his last illness he proposed to transfer his papal authority to cardinal Colonna, to which, of course, the cardinals objected.

IV. Pope, originally called Goffredo, of the family of Castiglione, of Milan. He was elected Pope October 26, 1241, and died on the 17th of November following.

V. Pope, originally Pietro de Murrone, was born 1215 at Isernia. With a few companions he withdrew to a cave on Monte Majella, where he lived a life of extreme austerity. After a time his disciples multiplied so greatly that he was induced to form them into a new order (called first the congregation of St. Damian, but subsequently and by order of Celestine II) of the order of St. Benedict. This order was confirmed by Gregory X in the Synod of Lyons, 1274. On the 6th of July, 1294, he was elected pope, and took the name of Celestine V. He proved to be too ignorant of the world and its ways, as well as of literature, for the office which he was so suddenly thrown upon. Upon this account, finding that many abuses were committed in his name, he resigned Dec. 13, 1294, and retired to his solitude. He was cruelly imprisoned by
his successor Boniface, who detained him in custody until his death, May 19, 1296. Clement V canonized him, and his day in the calendar is May 19.—Monast. Hist, i. 489; Hoefer, Nouv. Biog. Generale, ix, 346.

Celestines, or Celestines (I.), an order of bare-footed Minorites (see Discalcani); (II.) a monastic order, so called from the founder, Pietro de Murreone, afterwards Celestine V, in 1254. After his death his order made great progress, not only in Italy, but likewise in France, whither the then general, Peter of Tar- vol, sent twelve religious, at the request of king Philip the Fair, who gave them two monasteries, one in the forest of Orleans, and the other in the forest of Compeigne, at Mont Chartres. This order had at one time 200 monasteries in Italy, France, Germany, and the Netherlands. They had about ninety-six convents in Italy, and twenty-one in France, under the name of priories. Their Constitutions consisted of three parts: the first refers to the provincial chapters and the election of superiors; the second contains the regular observances; and the third, the visitation and correction of the monks. The rule required the Celestines to be absent from Rome from midnight to say mass, to eat no flesh except when it was necessary; to fast every Wednesday and Friday from Easter to the feast of the Exaltation of the Holy Cross; and from that feast to Easter, every day. Their dress was a white gown, a capuche, and a black scapulary; in the choir, and out of the monastery, a black cowl with the capuche; shirts of serge. The order is decayed; in Italy a few monasteries survive. See Franciscans.

Celestines. See Celestines.

Celibacy (celestia, Lat. cœlebs or cœlebs, unmarried, derived by some Roman writers from cæli hosti- tudio, the blessedness of heaven), the state of virginity, or of unmarried persons.

I. In the Scripture.—Under the Mosaic law, priests were not only allowed, but encouraged to marry. The priesthood was confirmed to the descendants of one family, and consequently involved even an obligation to marry. In the N.T. we find passages in which an unmarried life, voluntarily assumed, is commended, under certain circumstances (Matt. xix, 12; 1 Cor. vii, 1-80). But no passage in the N.T. can be interpreted into a prohibition against the marriage of the clergy under the Gospel dispensation; on the contrary, there are many indications that marriage was approved. One of the twelve, Peter, was certainly a married man (Matt. viii, 14), and it is supposed that several of the others were also married. Philip, one of the seven deacons, was also a married man (Acts xxii, 5); and if our Lord did not require celibacy in the first preachers of the Gospel, it cannot be argued that indissoluble matrimony is forbidden to their successors. Paul says, “Let every man have his own wife” (1 Cor. vii, 2); and that marriage is honorable in all (Heb. xiii, 4), without excepting those who are employed in the public offices of religion. He expressly says that “a bishop must be the husband of one wife” (1 Tim. iii, 2), and gives the same direction concerning elders, priests, and deacons. When Aquila traveled about to preach the Gospel, he was not only married, but his wife Priscilla accompanied him (Acts xviii, 2); and Paul insists that he might have claimed the privilege of carrying about a sister or wife (1 Cor. ix, 5), as other apostles did. The “for- bidden of to marry” (1 Tim. iv, 11) is mentioned as a character of the apostacy of the latter times.

II. In the Early Church.—At an early period virginity came to be held in honor in the Church. Several passages of the N.T. (e. g. Matt. xix, 10, 12; 1 Cor. vii, 7, 8) in which voluntary virginity for “the kingdom of heaven,” “of God,” and under certain circumstances, were interpreted as favoring asceticism and as deprecating marriage. Moreover, in the old Pagan times celibacy had been held in honor (e.g. the Vestal Virgins). Wherever dualistic ideas of a good and evil principle, and of matter as the seat of evil, prevailed, there it was natural that ascetic notions of virginity should arise. An undue regard for virginity, and corresponding deprecation of marriage, began to appear strongly about the middle of the second century, and reached their height in the fourth. Few of the so-called fathers escaped from extravagant notions and opinions on this subject; in fact, their errors here have done more, perhaps, than any other cause to weaken their authority as guides for Church doctrine (see, e.g., Chrys, Ancient Christianity, passim). But not enforced celibacy of the clergy was known in the Church immediately following the apostolic age. Bingham collects the facts carefully (Orig. Ecclés. bk. iv, ch. vii) to the following effect. In the age immediately succeeding that of the apostles we read of the wives of Valens, presbyter of Philippi (Polycarp, Ep. ad Philipp. ii, 31), of Chereemon, bishop of Nilus (Euseb. vi, 42), of Novatus, presbyter of Carthage (Cyprian, Ep. 49), of Cyprian himself, of Cecilius, who converted him (Pont. Vit. Opy.), and of several other bishops and presbyters. But it has been said by the advocates of celibacy that married persons promised to separate themselves from their wives as soon as they should receive ordination. The history of Novatus distinctly proves the contrary. He was accused, long after he was a presbyter, of having caused the miscarriage of his wife by a passionate blow. In fact, throughout the first three centuries we read of no exact laws of clerical celibacy. Christianity combats the notion that the clergy, peculiarly, were required to live unmarried (Ep. 1 ad Cor.: Hom. XIX ad I Cor. vii, 1). But the first step towards clerical celibacy was taken in the disapproval of second marriages. “Yet so late as the beginning of the third century there were many clergymen in the Catholic Church who were married a second time. This appears from the accusation of Tertullian, who asks the Catholics, with Montanistic indignation: ‘Quot enim et vigili presbyteri aut episcopi sunt, insolentiae utique apostolae? ... Digamos turgidis digamos offeris!’ Second marriage thus seems to him disgraceful, for the administration of the sacraments of baptism and the Lord’s Supper. Hippolytus, in the Philo-Apothecary, reproaches the Roman bishop Callistus with admitting to sacerdotal and episcopal office those who were married the second and even the third time, and allowing the clergy to marry after having been ordained. The next step was to forbid marriage for the clergy, but not yet the prohibition of it. The priesthood and marriage became more and more incompatible in the prevailing view. The Montanists shared in this feeling; among the oracles of the prophetic Frisca is one to the effect, ‘Only a holy (that is, an unmarried) minister can administer in holy things.’ Even those fathers who were married, like the presbyter Tertullian and the bishop Gregory of Nyssa, gave decided preference to virginity. The apostolic constitutions and some provincial councils accordingly prohibited priests not only from marrying a widow, but from marrying at all. That marriage is essential for the clergy, and also from contracting marriage after ordination. The Synod of Ancona, in s14, allowed it to deacons, but only when they expressly stipulated for it before taking orders. The rigoristic Spanish Council of Elvira (Iliberis), in 305, went farther. It appears even to have forbidden the continuance of nuptial intercourse after the confimation upon pain of deposition” (Schauff, Church Hist., i, § 96).

Phileas, bishop of Thumis, and Philoromus, had both wife and children, and were on that account urged by the heathen magistrate to deny the faith and save themselves (Euseb. lib. vi, cap. 42; lib. vii, cap. 9). Eusebius (iv, 22) mentions a certain presbyter of Puyatun in Crete, being desirous to enforce celibacy, was rebuked by Dionysius, bishop of Corinth. In the great Council of Nicaea it was proposed to enact a law to
CELIBACY

that effect, but Paphnutius, an Egyptian bishop, himself unmarried, resolutely withstood it as an innovation, declared that marriage is honorable in all men, and desired that the ancient tradition of the Church should continue to be observed. It is, though individual bishops, such as Socrates, H. E. i. 11 ; Sozomen, H. E. i. 23. The only reply which Bellarmine and Val-risea give to this statement is to suspect the veracity of the historians; in which they are followed by Thomassin, who, cautious and judicious, asserts that the practice of marriage among the bishops of Alexandria was not unconnected with the first very ancient, and that neither Socrates, Sozomen, nor any such irreproachable writers, nor of such weight, that we need believe their word in a matter of such importance. In opposition to all this, Roman writers allege the testimony of Ephraim and Jerome, and the tenth canon of Anency, which forbids deacons who did not, at ordination, declare their intention to marry, to do so afterwards. But all these testimonies are subsequent to the third century; and the Council of Gangra, held probably about 378, long after all of which Anency, mathematicizes those who separate from the communion of a married priest: "Sic quis discerneret propter conjunxitum, tamquam occasionem noniurationis quodammodo excessit, qud emptius rationemque habent in Distributione," etc. (Canon iv). See Wilson, The Doctrine of the Apostolic Fathers (Liverpool, 1845), p. 178.

311. In the Church of Rome.—Sirisicus, bishop of Rome (A.D. 385), decided against the Canon of Gangra (ad Epist. v. 21), although by the Decretals of Innocent I, A.D. 404, 405, c. 6, xxxi; of Leo I, A. D. 416-458, in e. 1, i. xxxii. 10, 12, xxxii, etc.; Conc. Carth. ii. A.D. 390, c. 8, in 3, xxxiii; c. 8, lxxxiv; Conc. Carth. v. A.D. 401, c. 3, in 13, xxxiii; c. 4, lxxvii, etc.). The prohibition applied at first only to bishops, priests, and deacons, but from the fifth century onward subdeacons were prohibited marriage after ordination (Leo I, A. D. 449); in c. 1, i. xxxi; Gregory I, A.D. 591-609, in c. 1, i. xxxii; c. 1, xxvii; Conc. Agath. A.D. 506, c. 38, in 19, c. 38, xxvi; Conc. Carth. v. A.D. 401, c. 8, in 13, xxxiii; Greg. I, A. D. 601, in 3). The civil law confirmed these regulations, enacting that married persons, or such as have children or grandchildren, should not be chosen bishops. It was further enjoined by the civil law that all marriages of higher clergy after their ordination should be held as invalid, and the children of such marriages illegitimate (Zehrg, Real-Encyklop. p. 772)

19 centuries this question of the celibacy of the clergy was a subject of constant struggle within the Church. See History, iv. 94. Many priests lived openly in wedlock, although the councils were always issuing new decrees against them. 15 Popes Leo IX (1049-1054), Nicholas II (1059-1061) interdicted all priests that married wives or concubines from the exercise of any spiritual function, on pain of excommunication. Alexander II (1061-1073) decreed excommunication against any priest who married, and that any priest married should be depredated by a priest having no wife or concubine. This decision was renewed by Gregory IX (Hildebrand) in a recent synod at Rome in 1240, and was approved by every canon law. By this law a priest could receive the communion from the hands of any priest who married or lived in concubinage should be deposed. The decree met with the most violent opposition in all countries, but Gregory succeeded in carrying it out with the greatest rigor; and, although it has been said that this law cannot be still to be found in the twelfth and thirteenth centuries, the celibacy of the Roman Catholic clergy was established, and has since continued both in theory and practice (Chambers, s. v.). Nevertheless, after the Reformation, the question came up, and at the Council of Trent, the doctrine of celibacy for the Roman Catholic clergy was inspired by the emperor Charles V, favored a relaxation of the rule. But the majority of voices decided that God would not withhold the gift of chastity from those that that is not prayed for, and the rule of celibacy was thus finally and forever imposed on the ministers of the Roman Catholic Church. Those who have only recently known the lower kinds of consecration may marry on resigning their office. For all grades above a sub-deacon, a papal dispensation is necessary. A priest that marry inures excommunication, and is incapable of any spiritual function. If a married man wishes to become a priest, he receives consecration only on condition that he loses his wife, and that his consent to the separation, and enter a religious order, or take the vow of chastity (e.g. xxvii, c. viii). It is a question among divines of the Roman communion whether the law of the celibacy of clergymen be of divine right, e. whether marriage is by holy Scripture forbidden to the clergy, or whether it is a ponens of canonical authority, and binding on every clergyman in consequence of the vow to that effect voluntarily made at his ordination. Their best and most moderate writers maintain the second view.

IV. In the Greek Church.—The Greek Church has never adopted the law of celibacy absolutely for all its clergy, but adheres to the ancient canon law. The Council in Trullo (A.D. 692) enacted, that though bishops may observe celibacy, yet presbyters and deacons might live with their wives (c. 14; Conc. Chal. A.D. 451, c. 8, 16, 18, 48; Conc. Trullan, A.D. 692, c. 7, 19). In the Russian Church, a parish priest must be married before ordination; if he loses his wife, he generally enters a monastery; or, if he marries again, he lays aside his priestly functions (Nesel, Voices from the East, p. 58). Celibacy is to this day enjoined upon the bishops, who are therefore generally chosen from the monks, or from widowed presbyters; and, during the middle ages, no ordinands for the marriage of priests, deacons, and subdeacons, after ordination, on, they do not forbid the ordination of married men, nor require them to abstain from the conversation of their wives. In the Armenian Church marriage is imperative; an unmarried man cannot be ordained; but he cannot marry again. The Vartanets (regulars), on the other hand, take the vow of celibacy, live in convents, and from their ranks the bishops are chosen (Dwight, in Coleman's Ancient Christianity, ch. xxv., § 2); and the Roman Church allowed this in the case of the Greeks, Maronites, etc., who united with her (Benedict XIV, in the constitution Eeti Pastoralis Bullar. Mag. t. xvii, fol. 100, and his Ecunus et tempore. May 1746, t. xvi, 6, 296). The priests of the united Greek Church have received permission from the popes to continue in marriage, if entered into before consecration, but on condition of always living apart from their wives three days before they celebrate mass. There have been discussions in the Roman Church even in regard to the validity or nullity of marriages among the Copts and Greeks entered into after ordination (see Bullar. Mag. t. xvi, p. 67). "The Greek Church differs from the Latin, not by any higher standard of marriage, but only by a closer adherence to the presbytery usage, and by the more stringent application of the ascetic principle. It is in theory as remote from the evangelical Protestant Church as the Latin is, and ap-
proaches it only in practice. It sets virginity far above marriage, and regards marriage only in its aspect of negative utilitv. In the single state a priest is expected to be an ecclesiastic - at best only a conditionally good, a wholesome concession to the flesh for the prevention of immorality - and requires of its highest office-bearers total abstinence from all matrimonial intercourse. It wavers, therefore, between a partial permission and a partial condemnation of priestly marriage. Such a system seems to be a necessary evil - but only a condition of a good, a wholesome concession to the flesh for the prevention of immorality - and requires of its highest office-bearers total abstinence from all matrimonial intercourse. It wavers, therefore, between a partial permission and a partial condemnation of priestly marriage. Such a system seems to be a necessary evil - but only a condition of a good, a wholesome concession to the flesh for the prevention of immorality - and requires of its highest office-bearers total abstinence from all matrimonial intercourse. It wavers, therefore, between a partial permission and a partial condemnation of priestly marriage. Such a system seems to be a necessary evil - but only a condition of a good, a wholesome concession to the flesh for the prevention of immorality - and requires of its highest office-bearers total abstinence from all matrimonial intercourse. It wavers, therefore, between a partial permission and a partial condemnation of priestly marriage. Such a system seems to be a necessary evil - but only a condition of a good, a wholesome concession to the flesh for the prevention of immorality - and requires of its highest office-bearers total abstinence from all matrimonial intercourse. the special points demanded is the abolition of celibacy.

On the other hand, the Romanizing party in the Church of England seemed inclined to revive celibacy and the ancient admiration of virginity. See Shipley, The Church and the World (Vaux's Essay), London, 1856, 8vo.

Cell (Lat. cella).—In classical archaeology cella is applied to a cave or cellar to preserve wine, oil, or other provision. It also was applied to the enclosed space of a temple, to bath-rooms, to the sleeping apartments of slaves.

But from last use of the word it was transferred in the fourth century to the sleeping apartments of monks and nuns in cloisters (q. v.). These at first held three or four occupants, but later they usually received but one person. These cells are small, have one door and window, and are generally plainly furnished.

3. The word was also applied to a monastic dwelling, either for a single monk or for a community, subordinate to some great abbey. The former was mostly the abode of hermits, and erected in solitary places. See Hermits. In the Quininal Palace at Rome are the cells of the concilae (q. v.).

Cellar (lm. cella, something laid up in store). This word is in 1 Chron. xxvii, 28 rendered "cellar," but in another verse of the same chapter, "treasury," and "store-house," from which we may conclude that subterranean vaults were spoken of in each case. The same word is sometimes applied to the treasury of the Temple (1 Kings vii, 51) and of the king (xiv, 25).

Cellarius, or Cellarer, an officer in monasteries to whom belonged the care of procuring provisions for the monks. See Annates. He was one of the four officii priori, or great officers; under his ordering was the piastrum, or bake-house, and the brachium, or brew-house. In the richer houses there were lands set apart for the maintenance of the office, called, in ancient writings, ad cibum monachorum. His whole office had respect to that oriri in. He was to see the corn got in and laid up in the house, and his wages consisted of a portion of the property, usually fixed at a thirteenth part of the whole, and a furred pown. The office was equivalent to that of bursar.—Footebrooke, Antiquities, i, 177; Farrar, Eccl. Dict. a. v.

Cellarius, Martinus (surnamed Borrhaeus), was born at Stuttgart in 1499; studied at Tubingen, and afterwards at Wittenberg (under Melanchthon)
Both conclude that the persons were different. The evidence of their oneness is chiefly Origen's conjecture that they were the same person (cont. Cels., iv, 36). The evidence against it is: (1) That Lucian's friend attacked magical rites; (2) Celsus of Origen seems to have believed them. (2) That Lucian's friend was probably an Epicurean; the other Celsus a Platonic or Eclectic. (3) That the former is praised for his mildness; the latter shows want of moderation. Presnial (Très Prem. Siciles, vol. ii, 163) regards them as the same. (p. 53). Frequent is quite in harmony with the whole spirit of the book, as well as of the Pagan philosophy of the time, to suppose that Celsus is, as Origen supposed, the Epicurean friend of Lucian; and that, in this treatise, he argues on any principles that may serve his purpose. But, whatever Celsus may have been, his writings are very important to Christian apologetics. They "are valuable on account of their admissions of the grand facts and doctrines of the Gospel as preached by the apostles and contained in their writings, by an enemy who lived little more than one hundred and thirty years after the ascension of our Lord. He has nearly equal respect for the doctrines of the New Testament, which he not only applies to as existing, but as universally received by the Christians of that age as credible and divine. He is most minute in his references to the circumstances of the life of Christ and his apostles, which shows that he was well acquainted with them, and can be depended on. If of old he ridicules the idea of our Lord's divinity, contrasting it with that of his poverty, sufferings, and death; which proves not only that the Christians of that early age avowed their belief in the doctrine, but that Celsus himself, though an unbeliever, found it in the documents to which he refers, as the source of his acquaintance with the Christian religion and its divinity" (Buck, s. v.). Moreover, he is the "original representative of a kind of intellect which has presented itself over and over again in the various attacks made on Christianity: wit and acuteness, without earnest purpose or depth of research; a worldly understanding, that glances merely on the surface, and delights in hunting up difficulties and contradictions. His objections against Christianity serve one important end: they present in the clearest manner the opposition between the Christian standing-ground and that of the ancient world; and, in general, the relation which revealed religion will ever maintain to the human intellect by natural reason. Thus many of his objections and strictures became testimonies for the truth" (Neander, l.c.).

Lardner (Testimonia, chap. xviii; Works, vii, 210 sq.) gives full summaries of the book, classified under different heads, especially with reference to the authenticity of the books of the N. T., for which these allusions and citations are of special value, as coming from a heathen opponent. A full analysis is also given by Neander, Ch. History, i, 160 sq. (Torrey's transl.), and by Tischendorf, Fall des Heidenkultus, i, 280 sq. Presented, in his Hist. de l'Eglise des Très Prem. Siciles (2d series, ii, 140 sq.), attempts ingeniously a reproduction of the treatise as it was stated from Origen, while Farrar follows (Critical History of Free Thought, lect. ii) in the outline which we here present. The references are to the Benedictine edition (Paris, 1783). Celsus introduces a Jewish rabbi as opposing Christianity from the Hebrew monotheistic point of view. "The rabbi first criticizes the doctrine of Christianity, and then the facts narrated. He points out difficulties in the Gospel narratives of the genealogy of Christ: utters the most blasphemous calumnies concerning the incarnation; turns the narrative of the infancy into ridicule; imputes our Saviour's miracles to magic; attacks Christianity by the literal meaning of the Scripture on the affecting narrative of our blessed Lord's most holy passion. Each fact of deepening sorrow in that divine tragedy, the betrayal, the men-

178 CELSUS

tal anguish, the sacred agony (ii, 24), is made the subject of remarks characterized no less by coarseness of taste and unfairness, than to the Christian mind by irreverence. Instead of his heart being touched by the majesty of our Saviour's suffering, Celsus only finds an argument against the divine character of the adorable sufferer (ii, 16). The wonders accompanying Christ's death are treated as legends (iii, 8); the resurrection regarded as an invention or an optical delusion (iii, 50, 55, 57, 78).

"After Celsus has thus made the Jew the means of a ruthless attack on Christianity, he himself directs a similar one against the Jewish religion itself (iii, § 1 and elsewhere). He goes to the origin of their history; describes the Jews as having left Egypt in a sedition (iii, § 6); as being true types of the Christians in their ancient fastfulness (iii, § 6); considers Moses to be only on a level with the early Greek legislators (i, 17, 18; i, 52); regards Jewish rites like circumcision to be borrowed from Egypt; charges anthropomorphism on Jewish theology (iv, 71; vi, 62), and declines allowing the allegorical interpretation in explanation of it (iv, 46); examines Jewish prophecy, parallels it with heathen prophecies, thus falsifying the goodness, not the truth of a prophecy, ought to be considered (vii, 14); points to the ancient idolatry of the Jews as proof that they were not better than other nations (iv, 22, 23); and to the destruction of Jerusalem as proof that they were not special favorites of the God of heaven. If Celsus be nowhere else everywhere (iv, 74; vi, 49, etc.) and here reveals the real ground of his antipathy. While he objects to details in the narrative, such as the mention of days before the existence of the sun (vi, 60), his real hatred is against the idea of the unity of God, and the freedom of Deity in the act of creation. It is the struggle, of pantheism against theism.

"When Celsus has thus made use of the Jew to refute Christianity from the Jewish stand-point, and afterwards refuted the Jew from his own, he proceeds to make his own attack on Christianity; in doing which, he first examines the lives of Christians (iii, 10), and afterwards the Christian doctrine (vi, vii), thus skillfully prejudicing the mind of his readers against the persons before attacking the doctrines. He alludes to the quarrelsomeness shown in the various sects of Christians (iii, 10), and repeats the calumnious suspicion of disloyalty (ii, 14), want of patriotism (iii, 55; viii, 75), and political uselessness (viii, 8), and hence defends himself by the persecution of the Christians. Filled with the esoteric pride of ancient philosophy, he reproaches the Christians with their carefulness to proselytize the poor (iii, 44, 50) and to convert the vicious (iii, 58, 62, 74), thus unconsciously giving a noble testimony to one of the most divine features in our religion, and testifying to the preaching of the doctrine of a Saviour for sinners.

"Having thus defamed the Christians, he passes to the examination of the Christian doctrine, in its form, its method, and its substance. His aesthetic sense, ruined with the idolatry of form, and unable to appreciate the thought, is then allowed to detest Christianity through simplicity (iii, 55; viii, 87). The method of Christian teaching also seems to him to be defective, as lacking philosophy and dialectic, and as denouncing the use of reason (vii, 9; i, 2; i, 9; iii, 39; vi, 10). Lastly, he turns to the substance of the doctrine itself. He finds regular, and sometimes obvious, elements in it, the one of which, as bearing resemblance to philosophy or to heathen religion, he regards as incontestably true, but denies its originality, and endeavors to derive it from Persia or from Platonism (vi, 15; vii, 22, 58, 62; v, 63; vi, 1), resolving, for example, the worship of a human being into the ordinary phenomenon of apotheosis (iv, 40). The other class of doctrines which he attacks as false consists of those which relate to creation (iv, 87; vi, 49), the incarn-
Celtic Religion

Celtic Church or Christians. See CULDEES; GALLATANS.

Celtic Religion. Unless preceded by the Hel- layars, and then from the Caspian Sea, spread them- selves over Europe. This people, of unknown antiquity, not only at one time held all of Western and Central, but also an important part of Southern and Eastern Europe, and their armies threatened Rome and Asia Minor by the Black Sea and the Danube. In the 4th and 5th centuries, they were conquered and then conquered by the Romans and Saxons, the Celts have now ceased to be active agents in history as distinct national bodies, and have, indeed, a clear descent, as an unmixed race, only in Brittany, in France, Ireland, Wales, and part of Scotland and the Ionian islands. The Celts occupied a low stage of culture. They despised agriculture, were skillful traders and miners, and passionately fond of war, piracy, ornaments, and wine. They were cruel to their wives and children on the death of chiefs, practised polygamy, had few roads, but built great fortresses. They destroyed the barrier which separates the Celts from the mali is, obliterate the perception of the fact that a single free responsible being may be of more dignity than the universe."

The order in which the objections of Celsus are ar- ranged in Origen's reply is different from that above given in some respects, and it is therefore here subjoined: "The first half of book i is a preface (ch. i-xl); the second half, together with book ii, contains the attack by the Jews on Christianity given in lect. ii. The early part of book iii (1-9) contains Origen's ref-utation of the Jews. The subsequent parts and remain- ing books of book iii add some things to the subject, but the main attack is on Christianity. First, Celsus attacks the char-acter of Christians in the remainder of book iii. In book iv he returns to his attack on Judaism, and on the Scriptures of the Old Testament, especially on many of the narratives, either regarding them as false or as borrowed, and objecting to their anthropomorphic character; also objecting to the account of man's place in creation, and of divine interference. In book v he continues his attack on the doctrines of both religions, chiefly so far as he considers them to be untrue; and in book vi so far as he considers them to be borrowed, dragging to light the difference which existed between Judaism and Christianity. In book vii the subject of prophecy and some other doctrines, as well as the ethics of Christianity, are examined; and in book viii, when the attack on Christianity is mainly over, a de- fence of paganism is offered by Celsus. Such is the type of a philosophical objector against Christianity a little later than Celsus, and whose ideas meet here for the first time a remarkable effort of pagan thought, endeavoring to extingush the new religi- on; the definite statements of a mind that investigated its claims and rejected it. Most of the objections of Celsus are sophistical, a few are admitted difficulties, but the anthropomorphic claims of them will be seen to be the corollary from his general principle before ex- plained."
CELTIC RELIGION

appeared on the battle-field, firing the soldiers to deeds of heroic valor. By the touching tones of their lyres and songs they often stayed the flow of blood between hostile clans. In the early ages the bard stood in the highest esteem. At Caesar's time they had sunk to be beggar-poets, seeking their living by singing flattering songs in the palaces of rich men and princes.

The religion of the Druids seems to have been originally a monotheism, which developed later into the deification of the powers of Nature, and the final incorporation of them as deities. Tanumus (the Thundereous) was the god of thunder, Cerat the god of lightning, the highest judge, scattering the thunderbolts of his vengeance among mortals. Belenus was the benevolent son of God, who gives life to the vegetable world and healing power to plants. Henua, Hues or Hu, originally the founder of the religion of the Druids, was the god of war and of agricultural labor. Trestates was the god of manufactures, the arts, and trade, therefore was identified by the Romans as Mercury. Fairias, "motherly virgins," were female deities who spun out the thread of life and of fate, and who were guardian angels of both lands, cities, and individual persons, and in the minds of the people were clothed with all attractions and virtues. Many places had also their local female deities.

The instruction in the schools of the priests consisted largely in tracing out the attributes of their deities. This was done with a surprising completeness. Instruction was also given concerning the stars and their courses, the size of the universe, the nature of matter and of existence, and especially of the human soul. The Druids taught the immortality of the soul; that after death it enters into another body, and that it leads in a more beautiful world than this a happy life, like the earthly life in its better phases, with the same occupations; and its same friends and enemies. The dead and living stand in a certain communication. At burial, letters were thus often thrown into the flames, that the dead might read them. This belief gave the Celta a high regard for their dead, and spurred them to deeds of great bravery. But it also brought with it deeds of horrible cruelty. In their earlier history it was not unusual, on the death of a man of station, for some of his nearest friends to throw themselves into the flames of his funeral pile. This led to tragic results. Thus, after the feudal system of the late Celtic period had developed itself, it was not rare, on the death of a chieftain, for some of his favorite slaves or followers to be set on fire, and burnt as sacrifices to the dead.

Sacred trees formed the chief part of the Celtic religious rites. Human sacrifices were frequent, being regarded as the most effectual and acceptable way of appeasing Deity. It was believed that one human life could only be redeemed by the life of another human being. Thus, a person suffering from a dangerous sickness, a person in danger or in battle, offered to the deities instead of animals a human being, or vowed to do so, so that the gods might feel pity for them. In behalf of the state also the Druids offered human sacrifices. Great figures in the human form, made of wicker-work, were filled with human beings and then set on fire. The sacrifice of criminals was considered especially grateful to the deities. Tribes and nations, in the days of their innocence and ignorance, innocent persons were offered up. For a long time also the custom of sacrificing all prisoners of war, accompanying the dreadful offering with loud songs and wild music, and out of the flowing blood and quivering members to diviné the future.

The Celta also had Druidesses, or female priests, who, however, held less respect and privileges than the Druids. Companies of these priestesses inhabited certain islands, which no man dared to set foot upon. When they wished to have intercourse with the people of the mainland, they had to come in boats, and then return to their islands. These islands were avoided by sailors, as their fancy attributed to the Druidesses the power of sending tempests to destroy them. Once each year these priestesses had to remove from their houses, and to restore a new one before the setting of the sun. If one of them, crowned with ivy and other leaves, let a stick fall while at this work, the others fell upon her with wild cries and tore her to pieces.

All legal questions were decided by the Druids. All the Druids gathered every year at chartres, and there decided all matters of dispute, both public and private. They appointed the punishment for murder and other crimes, and decided all disputes of inheritance and boundaries of estates. If any private person or chieftain refused to stand by their decision, he was refused permission to attend the religious rites—the worst severe punishment they could inflict. He was an outcast, a godless criminal, avoided by all, and deprived of all rights at the hand of his fellow-man or of the law itself.

The medicine of the Druids consisted mostly in incantations, the power being deemed only the vehicles of accomplishing the healing power. The most prized plant was the mistletoe. This was gathered from the oak in dark forests on winter's nights of the holy festival days, and was cut with golden sickles. It was called the "oil-healing."

Theologiae of various kinds were prepared with incantations by the priests and given to the people. The eggs of snakes, gathered by moonlight and carried in the bosom, were considered the most powerful protection against evil fortune. Many of these rites have left their traces on the religious customs of modern times, and are the foundation of many superstitions in Christian times. These practices were observed in Brittany, and are so much in modern France are similar remains of Druidical worship, also in Anglesea (Wales), on the Isle of Man, and other places in England. The tombs of the chiefs are mounds, or subterranean chambers. In the first are usually found bronze and earthen urns, bones, and ashes; in the latter, skeletons, earthen vessels, knives, battle-axes, chairs gathered up in his grave. The warrior's favorite steed, his arms, dress, and ornaments, were also buried with him, that he might lack nothing in the other life. Sacrifices formed the chief part of the Celtic religious rites. Human sacrifices were frequent, being regarded as the most effectual and acceptable way of appeasing Deity. It was believed that one human life could only be redeemed by the life of another human being. Thus, a person suffering from a dangerous sickness, a person in danger or in battle, offered to the deities instead of animals a human being, or vowed to do so, so that the gods might feel pity for them. In behalf of the state also the Druids offered human sacrifices. Great figures in the human form, made of wicker-work, were filled with human beings and then set on fire. The sacrifice of criminals was considered especially grateful to the deities. Tribes and nations, in the days of their innocence and ignorance, innocent persons were offered up. For a long time also the custom of sacrificing all prisoners of war, accompanying the dreadful offering with loud songs and wild music, and out of the flowing blood and quivering members to diviné the future.

The Celta also had Druidesses, or female priests, who, however, held less respect and privileges than the Druids. Companies of these priestesses inhabited certain islands, which no man dared to set foot upon. When they wished to have intercourse with the people of the mainland, they had to come in boats, and then return to their islands. These islands were avoided by sailors, as their fancy attributed to the Druidesses the power of sending tempests to destroy them. Once each year these priestesses had to remove from their houses, and to restore a new one before the setting of the sun. If one of them, crowned with ivy and other leaves, let a stick fall while at this work, the others fell upon her with wild cries and tore her to pieces.

All legal questions were decided by the Druids. All the Druids gathered every year at chartres, and there decided all matters of dispute, both public and private. They appointed the punishment for murder and other crimes, and decided all disputes of inheritance and boundaries of estates. If any private person or chieftain refused to stand by their decision, he was refused permission to attend the religious rites—the most severe punishment they could inflict. He was an outcast, a godless criminal, avoided by all, and deprived of all rights at the hand of his fellow-man or of the law itself.

The medicine of the Druids consisted mostly in incantations, the power being deemed only the vehicles of accomplishing the healing power. The most prized plant was the mistletoe. This was gathered from the oak in dark forests on winter's nights of the holy festival days, and was cut with golden sickles. It was called the "oil-healing."

The warrior's favorite steed, his arms, dress, and ornaments, were also buried with him, that he might lack nothing in the other life.

Cemeteries (connuque, dormitoriae, or sleeping-places), a place of burial for the dead. The word cemetery, in this use, is exclusively Christian origin; the burial-places of the Christians were so called to denote not only that they rested from their earthy labors and sorrows, but to point out the hope of a future resurrection (Bingham, Orig. Ecles., bk. xxiii, ch. I). See BURIAL; CATACOMB; SEPULCHR.

Cen'chre'ai (rather Cenchre, Kychreai), the eastern port (περιοι) of Corinth (i.e. Ορσερος, the Saronic Gulf) and of its trade with the Asiatic shores of the Mediterranean, as Lesbos (now Lutaki) on the Corinthian Gulf connected it with Italy and the west (Philo, Opp. ii, 559; Theoret., in Rom. xvi). A line of walls extended from the citadel of Corinth to Leucisium, and thus the Pass of Cenchreas was of peculiar military importance in reference to the approach and retreat of the Thracians from the Morea. See CORINTH. The apostle Paul sailed from Cenchreas (Acts xviii, 18) on his return to Syria.
from his second missionary journey; and when he
wrote his epistle to the Romans, in the course of the
third journey, an organized church seems to have been
formed here (Rom. xvi, 1), probably a branch of that
in Corinth (see Paul, in the Miscell. Diui b, i, 51 sq.).
See Phoebus. The first bishop of this church is said
(Apost. Const. vii, 40) to have been named Lucas, and
to have been appointed by Paul. The distance of Cy-
nesas from Corinth was seventy stadia, or about nine
miles (Strabo, viii, 380; Livy, xxxii, 17; Pliny, iv, 4;
Apulej. Metam. x, p. 255, Bip. ed.). Pausanias (i, 8)
describes the road as having tombs and a grove of
eypress trees by the wayside. The modern village of Kik-
dres retains the ancient name which is conjectured by
Dr. Sibthorpe to be derived from the millet (kikdon),
which still grows there (Walpole’s Travels, p. 41).
The site is now occupied by one small farm-house.
Close to the sea, and in parts even covered by its waters,
are the foundations of a variety of buildings, the plans of
which may yet be traced, as the walls still remain to
the height of from two feet to three feet and a half.
Some traces of the moles of the port are also still visi-
ble (Leake’s Moreen, iii, 238-239). The following coin
exhibits the port exactly as it was described by Pau-
sanias, with a temple at the extremity of each mole,
and a statue of Neptune on a rock between them (see
Conybeare and Howson, St. Paul, ii, 193).

Cendebeus, a member left by Antiocbus VII (q. v.) in command (στρατηγός την Ἰπποτικήν) of the sea-board (στρατι-
Δόνας) of Palestine (1 Macc. xxv, 38 sq.) after the defeat of Tryphon, B.C. 138. He fortified Kedron (q. v.)
and harassed the Jews for some time, but was afterwards
defeated by Judas and John, the sons of Simon Maccas-
baius, with great loss (1 Macc. xxxvi, 1-10). The account
of Josephus (Ant. iv, 7, 3; War, i, 2, 2) is somewhat
different.

Cendevia, according to Pline (xxxvi, 26), the
name of a lake from which the river Brus (q. v.) takes
its rise, near Mt. Carmel (see Roland, Palest., p. 267);
probably the fountain now called Kuridjana, near Shefr
Amur (Thomson, Lond. and Scot. i, 486).

Cênne. See LÊcne.

Cenckick, John, was originally one of Wesley’s
lay preachers, who appointed him as a sort of lay-chap-
lain at the High School in 1738. In a year or two
he began to preach against Wesley’s Arminian doc-
trines, and to raise a party within the Wesleyan So-
ciety. After unavailing delays and setbacks of peace,
Wesley read publicly a paper declaring, “by the con-
sent and approbation of the Band Society of Kings-
wood ret瘾, that Cenckick and his followers were no lo-
ger members thereof.” Cenckick corresponded con-
stantly with the Whitefield Methodists, but did not continue
long with them. He became at last a Moravian. He
was a good though weak man, and his subsequent en-
nest and laborious life shows that he deserves more
lentiness than has usually been accorded to him by Meth-
oist writers. After many years of deplorable labor as an
evangelist, he died July 4, 1755. His Discourses
were published in 1770 (2 vols. sm. 8vo); and a new edition,
with a ‘Life,’ was published in 1852 by Matthew
Wilks, who says: “He possessed a sweet simplicity of
spirit, with an ardent zeal in the cause of his divin-

Censer, a vessel in which incense was presented
in the Temple, being used by the Jews in the daily offer-
ing of incense, and yearly on the Day of Atonement,
when the high-priest entered the Holy of Holies (2
Chron. xxviii, 12; Ezek. vii, 11; Lev. xvi, 12, 13). In
the latter occasion the priest filled the censer with live
coals from the sacred fire on the altar of burnt-offer-
ing, and bore it into the sanctuary, where he threw
upon the burning coals the ‘sweet incense beaten
small’ which he had brought in his hand (Lev. xvi,
12, 13). In this way he strewed the incense over the
high-priest held the censer in his hand; but in the
daily offering the censer in which the live coals were
brought from the altar of burnt-offering was set down
upon the altar of incense. This alone would suggest
the probability of some difference of shape between
the censers used on these occasions. The daily censers
must have had handles standing to a great height,
placed on the golden altar, while those employed on
the Day of Atonement were probably furnished with a
handle. In fact, there are different names for these
vessels. Those in daily use were called רמיבש רמיבש
(miskite’rels, occurs only in 2 Chron. xxvi, 19; Ezek.
vi, 11), from הָנַח מַעֲשֶׂה; whereas that used on
the Day of Atonement is distinguished by the title of
יִשְׂרִי חֹתַם, something to take fire with, or coal-
pan (often ‘fire-pan’ in the English version). We
learn also that the daily censers were of brass (Num.
xxvi, 89) (according to the Mishna, Tamid, v, 5, in
the second temple, also of silver), whereas the yearly
one was of gold (Josephus, Ant. xiv, 4, 4). The latter is
also said to have had a handle (Mishna, Yoma, iv, 4),
which, indeed, as being held by the priest while the
incense was burning, it seems to have required. It is
conjectured that this distinction is alluded to in Rev.
v, 8; viii, 8, where the angel is represented with a
golden ‘censer’ (Ἄθαρμον, from λιθαρμός, incense),
and the twenty-four elders each with a golden ‘vial’
(βαλάντια). In the Apocrypha, silver (1 Esdr. ii, 18)
as well as golden (1 Macc. i, 22) ‘censers’ (Συλλεκτήρια)
are similarly referred to. Paul, in Heb. ix, 4, speaks of
the golden ‘censer’ as a thing which remained in the
Tabernacle, but the Greek word βυθαρμιου, which
there occurs, may signify ‘altar of incense’ (see
Bleek, Comment. p. 488; Meyer, Bibelbúvat. p. 7 sq.;
Mynster, in the Stud. u. Krit. 1829, ii, 842 sq.). The
latter of the above Hebrew words seems used gene-

eralh for any instrument to seize or hold burning coals,
or to receive ashes, etc., such as the appendages of
the brazen altar and golden candlestick mentioned in
Exod. xxv, 38; xxxvii, 2 (in which sense it seems
rendered in the Sept. by יִשְׂרִי חֹתַם, יִשְׂרִי חֹתַם, or
perhaps יִשְׂרִי חֹתַם). It, however, generally bears the
limited meaning of a small vessel or pan, viz. a small
portable vessel of metal, on which the incense was sprinkled by the priest to whose office this exclusively belonged (2 Chron. xxvi, 18; Luke
i, 9). Thus “Korah and his company were bidden
to take ‘censers,’ with which, in emulation of Aaron
and his sons, they had perhaps provided themselves (comp.
Ezek. viii, 13); and Moses tells Aaron to take the
‘censer’ (not s, as in the A. V.); i.e. of the sacri-
ficary or that of the high-priest, to stay the plague by
atonement. The only distinct precepts regarding the
use of the censer are found in Num. iv, 14, where
among the vessels of the golden altar, i.e. of incense,
‘censers’ are reckoned (comp. Lev. xii, 1), and two
theology. We find that the high-priest was to carry it (here also
it is ‘the,’ not ‘a censer,’ that he is ordered to
‘take’) into the most holy place within the valley,
where the ‘incense’ was to be ‘put on the fire,’ i.e.
on the coals in the censer, ‘before the Lord.’ This
must have been on the Day of Atonement, for then only was that place entered. Solomon prepared "censers of pure gold" as part of the same furniture (1 Kings vii, 50; 2 Chron. iv, 22). Possibly their general use may be explained by the imagery of Lev. viii, 3, 4, and may have been to take up coals from the brazen altar, and convey the incense while burning to the "golden altar," or "altar of incense," on which it was to be offered morning and evening (Exod. xxx, 7, 8). So Uzziah, when he was intending "to burn incense upon the altar of incense," took "a censer in his hand" (2 Chron. xxvi, 16, 19). See Altar.

Ancient Egyptian Censers.

1. Throwing incense on the flames in censer. 2. Balls of incense burning in censer; a, Box for holding incense. 3, 4. Censers of different forms. 5. Box or cup for incense. 6. Head of handle and pan of censer, in bronze.

These intimations help us to conclude that the Jewish censers were unlike those of the classical ancients, with which the sculptures of Greece and Rome have made us familiar, as well as those (with perforated lids, and swung by chains) which are used in the Church of Rome. It is observable that in all cases the Egyptian priests had their incense broken up into small round pellets, which they projected successively from between their fingers and thumb into the censer at such a distance that the operation must have required a peculiar knack, such as could have been acquired only by much practice. As the incense used by the Jews was made up into a kind of paste, it was probably employed in the same manner. See Sonnechmidt, De Thymisterio sanctissimi (Veteb. 1729); Devling, Obser. ii, 565 sq.; J. G. Michælis, in the Mus. Brom. ii, 6 sq., and in Ugolinii Thesaur. xi; Wentz, in the Nova Biblioth. Brom. v, 357 sq.; Zehlich, De thuribus aureis (Gerl. 1768); Kocher, id. (Jen. 1769); Braun, Selzbacher, p. 200 sq.; Regna, De thuribulis (Regiom. 1724); also in Ugolinii Theor. xii. See Incense.

CENSOR, in Roman Catholic worship. See THURIBLE.

Censorship of Books, supervision of publications by means of a preliminary examination and authorization, under Church or state law. The design of censorship has always been to hinder the publication of writings supposed to be dangerous either to the state or to religion (i.e. under Roman Catholic authority, to the Church). The practice has been defended (1) by the example given in Acts xix, 9, where the "books of curious arts" were burnt; (2) by the responsibility of the Church for the souls of the flock, liable to be destroyed by bad books; (3) by the duty of teaching, which includes the withholding of bad doctrine as well as the furnishing of good. History shows that the practice was comparatively easy to control the circulation of manuscripts, and to destroy them when thought necessary. But the discovery of that art, and the spread of the Reformation in the sixteenth century, induced stronger measures and rules on the part of the Roman Church than had been known before, in order to prevent the diffusion of heretical literature. A censorship was officially established by the bull of Leo X, May 12, 1515, commanding the bishops and inquisitors to examine all works before publication, and not to tolerate any of heretical tendencies. The Council of Trent expressly prohibited the printing or reading of heretical books in the terms for which No. 18 had been laid down; if any book should be printed, or cause to be printed, any books relating to religion without the name of the author; neither shall any one hereafter sell such books, or even retain them in his possession, unless they have been first examined and approved by the ordinary, under penalty of anathema, and of a pecuniary fine adjudged by the last Council of Lateran. And if they be regular they shall obtain, besides this examination and approval, the license of their superiors, who shall examine the books according to the forms of their statutes. Those who circulate or publish them in manuscript, without being examined and approved, shall be liable to the same penalties as the printers; and those who possess or read them, unless they declare the authors of them, shall themselves be considered as the author. The approbation of books of this description shall be given in writing, and shall be placed in due form on the title-page of the book, whether manuscript or printed; and the whole, before that, and examination and approval, shall be gratuitous, that what is deserving may be approved, and what is unworthy may be rejected" (Session IV). A committee was appointed to carry out this law by proper enactments, which resulted in the Index Librorum prohibitorum, or Index Expurgatorius, and in the establishment of the Congregation of the Index as a perpetual censorship. The popes sought also to obtain the assistance of the civil authorities in the carrying out of the censorship, and we find that several German states published edicts in 1624, 1580, 1541, 1518, 1567, 1577, etc. recommending a stricter control of the press. Still stricter regulations were afterwards enacted in New England, in 1646; in France, in 1664; in Legate Chiericiatti maintained in the free town of Novauberg that it was right to take and burn all works printed without authority, and that the printers and publishers of such works were punishable. In most Roman Catholic countries there arose a twofold censorship, that of the bishops and that of the state. In many cases the two were united into one. The process was simple: the censor or licensor read over the MS, to be printed, and, after striking out any objectionable passages, certified that the work might be printed. Hence, in old books, we see the word imprimitur (let it be printed), followed by the signatures of the authorities. In England the censorship was begun by an act of Parliament in 1662, 18 Char. II, c. 38: "An act for preventing the frequent abuses in printing seditions, treasonable, and unlicensed books and pamphlets, and for regulating of printing and printing presses." This was a temporary act, renewed from time to time, and its renewal was refused in 1683, owing to a quarrel between the House of Commons and the licensor. Since that time there has been, generally speaking, no restriction on what any man may publish; and he is merely responsible to the law if in his publication he should commit any public or private wrong. On the Continent, however, censorship became generally less stringent after the conclusion of the peace of Westphalia, although Leopold I and Francis II continued to enforce it. It was abolished in Denmark in 1770; Sweden, 1809; France, 1827; Belgium, 1850; Spain, 1853; Germany and Austria, 1848. — Poer, Universal Lexicon, v. v.; Chambers, Encyclopaedia,其中; Poer's Lexicon, vol. viii; Machen, Library Policy of the Ch. of Rome; M'Crie, Reformation in Italy, ch. v. See INDEX (EXPURGATORIUS).

Censures, Church (Censura Ecclesiastica), the penalties by which crimes are visited by Church authority (pecunias, pecuniarum), the scriptural authority for which is found in such passages as Tit. i, 12, 11,
10; 1 Tim, v, 20; Matt, xvii, 17, 18; John xx, 23; 1 Cor, v, 3; 2 Thess, iii, 6, 7; Gal, v, 12. These censures are, in the state churches, admonition, degradation (q. v.), excommunication (q. v.), suspension, interdict (q. v.), and irregularity (q. v.), which hinders a man from being admitted into higher orders.

The canonists define an ecclesiastical censure to be a spiritual punishment, inflicted by some ecclesiastical judge, whereby he deprives a person baptized of the use of some spiritual things, which conduce not only to his present welfare in the Church, but likewise to his future and eternal salvation. It differs from civil punishments, which consist only in things temporal—such as confiscation of goods, pecuniary mulcts or fines, and the like—but the Church, by its censures, does not deprive a man of all spirituals, but only of some in particular. This definition speaks of such things as conduce to eternal salvation, in order to manifest the end of this censure; for the Church, by censures, does not intend the destroying of men's souls, but only the avenging them, by enforcing repentance for past errors, a return from contumacy, and an abstaining from future sins" (Hook, Church Dictionary, s. v.). All churches claim the right of censure. Art. 30 of the Westminster Confession is as follows: "Of Church Censures. The Lord Jesus, as king and head of his Church, hath therein appointed a government in the land of Church officers, distinct from the civil magistrate. To these officers the keys of the kingdom of heaven are committed, by virtue whereof they have power respectively to retain and remit sins, to shut that kingdom against the impudent both by the word and censures, and to open it unto penitent sinners by the ministry of the Gospel, and by absolution from censures, as occasion shall require. Church censures are necessary for the reclaiming and gaining of offending brethren; for deterring of others from like offenses; for purging out of that leaven which might infect the whole lump; for vindicating the honor of Christ, and the holy profession of the Gospel; and for preventing the wrath of God, which might justly fall upon the Church, if they should suffer his covenant, and the seals thereof, to be profaned by notorious and obstinate offenders. For the better attaining of these ends, the officers of the Church are to proceed by admonition, suspension, from the sacrament of the Lord's Supper for a season, and by excommunication from the Church, according to the nature of the crime and demerit of the person."

In most Protestant churches, censures can only be inflicted after trial by the peers of the accused person. On the persons liable to Church censures, and the crimes for which they were inflicted in the ancient Church, see Bingham, Orig, Eccles, lk. xvi, ch. iii; and on the rightfulness of Church censures, Burnet, On the Articles, art. 33; Palmer, On the Church, ii, 277; Watson, Theol, Institutes, ii, 600 (N. Y. ed.). See also DISCIPLINE; EXCOMMUNICATION.

Census, a term that does not occur in the A. V. (although it is found in the original text of the N. T. in the Greek form εκκοιτον, "tribute," Matt, xviii, 25, etc.), while the act denoted by it is severally times re-

ferred to both in the Heb. and Gr. Scriptures (אכיקת, or אכיקת, "numbering", combined with lustration, from אכיקת, to survey in order to purg. Genenius, Theo, p. 1120; Sept, עיקת; N. T. ἐκκοιτος; Vulg, de- nuntiaitor, descripunt). See POPULATION.

1. Jewish.—Moises laid down the law (Exod, xxx, 13, 18) that whenever the people were numbered an offering of half a shekel should be made by every man above twenty years of age, by way of atonement or propitiation. A previous law had also ordered that the first-born of man and beast should be set apart, as well as the first-fruits of agricultural produce; the first to be redeemed, and the rest, with one exception, offered to God (Exod, xiii, 12, 13; xxii, 29). The idea of lustration in connection with numbering predominated also in the Roman census (Smith, Dict, of Class. Antiq, s. v. Lustrum), and among Mohammedan nations at the present day a prejudice exists against numbering their possessions, especially the fruits of the field (Hay, Western Barbery, p. 15; Crichton, Arbaia, i, 180; see also lana, Mod. Egypt, ii, 72, 73). The instances of numbering recorded in the O. T. are as follows:

1. Under the express direction of God (Exod, xxxix, 26), in the third or fourth month after the Exodus, during the encampment at Sinai, chiefly for the purpose of raising money for the Tabernacle. The numbers then taken amounted to 603,550 men, which may be presumed to express with greater precision the round number of 600,000 who are said to have left Egypt at first (Exod, xii, 37).

2. Again, in the second month of the second year after the Exodus (Num, i, 2, 3). This census was taken for a double purpose: (a) To ascertain the number of fighting men from the age of 20 to 50 (Joseph, Anti, iii, 12, 4). The total number on this occasion, exclusive of children, was 400,000; the total number 609,560 (Num, ii, 32); Josephus says 603,650: each tribe was numbered, and placed under a special leader, the head of the tribe. (b) To ascertain the amount of the redemption-offering due on account of all the first-born, both of persons and cattle. Accordingly, the numbers were taken of all the first-born male persons of the whole nation above one month old, including all of the tribe of Levi of the same age. The Levites, whose numbers amounted to 22,000, were taken in lieu of the first-born males of the rest of Israel, whose numbers were 22,737, and for the surplus of 273 a money payment of 1350 shekels, or 5 shekels each, was made to Aaron and Levi (Num, iii, 39, 38).

If the numbers in our present copies, from which those given by Josephus do not materially differ, be correct, it seems likely that these two numberings were in fact one, but applied to different purposes. We can hardly otherwise account for the identity of numbers even within the few months of interval (Calmel on Num, i; Kittto, Pictorial Bible, ii.). It may be remarked that the system of appointing head men in each tribe as leaders, as well as the care taken in preserving the pedigrees of the families, corresponds with the practice of the Arab tribes at the present day (Crichton, Arbaia, ii, 185, 186; Niebuhr, Descr. de l'Arabie, p. 14; Buckingham, Arab Tribes, p. 88; John, Hist, lk, ii, 8, 11; Malcolm, Sketches of Persia, xiv, 157, 159).

3. Another numbering took place 38 years afterwards, previous to the entrance into Canaan, when the total number, excepting the Levites, amounted to 603,780 males, showing a decrease of 1870. All the tribes presented an increase, except Reuben, which had decreased 2770; Simeon, 87,100; Gad, 5150; Ephraim and Naphthali, 8000 each. The tribe of Levi had increased 727 (Num, xxvi). The great diminution which took place in the tribe of Simeon may probably be assigned to the plague consequent on the misconduct of
Zimri (Calmet on Num. xxv, 9). On the other hand, the chief instances of increase are found in Manasseh of 20,500; Benjamin, 10,200; Asher, 11,900; and Issachar, 9000. None were numbered at this census who had been above 20 years of age at the previous one in the second year, excepting Caleb and Joshua (Num. xxxvi, 63-65).

4. The next formal numbering of the whole people was in the reign of David, who in a moment of premonition, contrary to the advice of Joab, gave orders to number the people, without requiring the statuteable offering of a half-shekel. The men of Israel above 20 years of age were 800,000, and of Judah 500,000; total, 1,300,000. The book of Chron. gives the numbers of Israel, 1,100,000, and of Judah 470,000; total, 1,570,000; but informs us that Levi and Benjamin were not numbered (1 Chron. xxvi, 6; xxvii, 24). Josephus gives the numbers of Israel and Judah respectively 900,000 and 400,000 (2 Sam. xxiv, 1, 9; and Calmet, in loc.; 1 Chron. xxi, 1, 5; xxvii, 24; Joseph. Ant. viii, 13, 1). The census of David was completed by Solomon, by causing the foreigners and remnant of the conquered nations resident within Palestine to be numbered in, by first caravans, and by these or others, and they were employed in forced labor on his great architectural works (Josh. ix, 27; 1 Kings v, 15; ix, 20, 21; 1 Chron. xxii, 2; 2 Chron. ii, 17, 18).

Between this time and the Captivity, mention is made of the numbers of armies under successive kings of Israel and Judah, from which may be gathered with more or less probability, and with due consideration of the circumstances of the times as influencing the numbers of the levies, estimates of the population at the various times mentioned.

5. Rehoboam collected from Judah and Benjamin 180,000 men to fight against Jeroboam (1 Kings, xii, 21).

7. Abijah, with 400,000 men, made war on Jeroboam with 800,000, of whom 500,000 were slain (2 Chron. xiii, 3, 17).

8. Asa had an army of 300,000 men from Judah, and 280,000 (Josephus says 250,000) from Benjamin, with which he defeated Zerah the Ethiopian, with an army of 1,000,000 (2 Chron. xiv, 8, 9; Josephus, Ant. viii, 12, 1).

9. Jehoshaphat, besides men in garrisons, had under arms 1,000,000 men, including perhaps subject foreigners (2 Chron. xviii, 14-19; 2 Kings, xix, 7, 8).

10. Amaziah had from Judah and Benjamin 300,000, besides 100,000 mercenaries from Israel (2 Chron. xxiv, 5, 6).

11. Uzziah could bring into the field 307,500 men (307,000, Josephus), well armed, under 2,600 officers (2 Chron. xxvi, 11-15; Joseph. Ant. ix, 10, 3).

Besides these more general statements, we have other and partial notices of numbers indicating population. Thus, a. Gideon from 4 tribes collected 32,000 men (Judg. vi, 35; vii, 3). b. Jephthah put to death 42,000 Ephraimites (Judg. xi, 6). The numbers of Ephraim 300 years before were 32,500 (Num. xxvi, 67). c. Of Benjamin 25,000 were slain at the battle of Gibeah by which slaughter, and that of the inhabitants of its cities, the tribe was reduced to 600 men. Its numbers in the wilderness were 45,600 (Num. xxvi, 41; Judg. xx, 35, 46). d. The number of those who joined David after Saul's death, besides the tribe of Issachar, was 4,922 (1 Chron. xxii, 28-36). e. At the time when Jehoshaphat could muster 1,100,000 men, Ahaz in Israel could only bring 7000 against the Syrians (1 Kings xx, 15). f. The numbers carried captive to Babylon, B.C. 688-692, from Judah are said (2 Kings xxiv, 14, 16) to have been from 8000 to 10,000, by Jeremiah 460 (Jer. iii, 80).

12. The number of those who returned with Zerubbabel in the first caravans is reckoned at 42,860 (Ezra lii, 64), but of these perhaps 12,542 belonged to other tribes than Judah and Benjamin. It is thus that the difference between the total (v, 64) and the several details is to be accounted for. The purpose of this census, which does not materially differ from the statement in Nehemiah (vii, vii), was to provide an accurate reference to the year of Jubilee the inheritances in the Holy Land, which had been disturbed by the Captivity, and also to ascertain the family genealogies, and ensure, as far as possible, the purity of the Jewish race (Ezra ii, 59; x, 7, 8, 18, 42; Lev. xxy, 10).

In the second caravan the number was 1496. Women and children are in neither case included (Ezra viii, 1-14).

It was probably for kindred objects that the pedigrees and enumerations which occupy the first 9 chapters of the 1st book of Chronicles were either composed before the Captivity, or compiled afterwards from existing records by Ezra and others (1 Chron. vii, 28, 82, 89; v, 9, vi, 57, 61; vii, 28; ix, 2). In the course of this we meet with notices of the numbers of the tribes, but at what periods is uncertain. Thus Reuben, Gad, and half the tribe of Manasseh are set down at 44,760 (v, 18), Issachar at 67,000 (vii, 6), Benjamin 48,484 (vii, 7, 9, 11), Asher 26,000 (vi, 40), and Simeon 22,200 (vi, 40). Between these figures and the numbers given in some cases can with difficulty be reconciled with other numbers of no very distant date, as well as with the presumed capacity of the country for supporting population. Thus the entire male population above 20 years of age, excepting Levi and Benjamin, at David's census, is given as 1,200,000, or 1,570,000 (2 Sam. xxiv, 1; 1 Chron. xxii), strangers 153,600; total, 1,453,600, or 1,728,000. These numbers (the excepted tribes being borne in mind) represent a population of less than 4 times this amount, or at least 5,814,000, of whom not less than 2,000,000 belonged to Judah alone (2 Sam. xxiv, 9). About 100 years after, Jehoshaphat was able to gather from Judah and Benjamin (including subject foreigners) an army of 1,100,000, besides garrisons, representing a population of 4,640,000. Fifty years later, Amaziah could only raise 300,000 from the same 2 tribes, and 27 years after this, Uzziah had 307,500 men and 2600 officers. Whether the population of the foreigner, as subject to Jehovah, constitutes the difference at these periods must remain uncertain.

To compare these estimates with the probable capacity of the country, the whole area of Palestine, including the trans-Jordanic tribes, so far as it is possible to ascertain their limits, may be set down not exceeding 11,000 square miles; Judah and Benjamin at 8132, and Galilee at 900 square miles. The population, making allowance for the excepted tribes, would thus be not less than 580 to the square mile. This considerably exceeds the ratio in most European countries, and also the capacity of the country of England. But while, on the one hand, great doubt rests on the genuineness of numerical expressions in O. T., it must be considered, on the other, that the readings on which our version is founded give, with trifling variations, the same results as those presented by the Sept. and by Josephus (John, v, 68; Glasser, Phil. 4, 4). In the list of cities occupied by the tribe of Judah, including Simeon, are found 129 "with their villages," and by Benjamin 26. Of one city, Ai, situate in Benjamin, which like many, if not all the others, was walled, we know that the population, probably exclusive of chief servants 12,000, while Josephus said that it was larger than Ai (Josh. viii, 25, 29; x, 2, xxvi, 21-22; xvii, 21, 28; xix, 1-9). If these "cities" may be taken as samples of the rest, it is clear that South-
CENSUS

But Josephus, in his accounts (1) of the population of Galilee in his own time, and (2) of the numbers congregated at Jerusalem at the time of the Passover, shows a large population inhabiting Palestine. He says there were many cities in Galilee, besides villages, of which the least, whether cities or villages is not stated, being inhabited by a certain number of people; and he says that its population in 66 AD (War, iii, 8, 2 and 4; comp. Tacit. Hist. v, 8). After the defeat of Cestius, A.D. 66, before the formal outbreak of the war, a census taken at Jerusalem by the priests, of the numbers assembled there for the Passover, founded on the number of lambs sacrificed, compiled in the account of the annual sacrifices pertaining to that occasion and that gave 2,700,000 persons, besides foreigners and those who were excluded by ceremonial defilement (see Tacit. Hist. v, 12). In the siege itself 1,100,000 perished, and during the war 97,000 were made captives. Besides these many deserted to the Romans, and were disinherited by them (War, vi, 6, 9, 9). These numbers, on any supposition of foreign influx (μικρὶς ἀληθείας) imply a large native population; and 53 years later, in the insurrection of Barcochebaeus, Dion Cassius says that 50 fortified towns and 980 villages were destroyed, and 500,000 persons were slain in war, besides a countless multitude who perished by famine. All this makes the Jewish race become almost depopulated (Dion Cass. xix, 14).

Lastly, there are abundant traces throughout the whole of Palestine of a much higher rate of fertility in former times as compared with present times—a fertility remarked by profane writers, and of which the present neglected state of cultivation affords no test. This, combined with the positive divine promises of population, increases the probability of at least approximately correctness in the foregoing estimates of population (Tacit. Hist. v, 6; Amm. Marc. xiv, 8; Josephus, War, iii, 8; Jerome on Ezek. xxii, and Rabbinic authorities in Rendel, c. xxi; Shaw, Travel. ii, pt. ii, c. i, p. 336, 340, and 275; Hasselquist, Travels, p. 120, 137, 130; Stanley, Palest. p. 129, 374; Kittel, Phys. Geogr. p. 38; Ramler, Palestina, p. 8o, 80, 88, App. cxxi; Gen. xiii, 16; xxii, 15; Num. xxiii, 10; 1 Kings iv, 19; Acts xii, 20, 33; See Meiner, De Hebr. & Classical, & De Hebrorum & De Semitic Hebrorum). See Palestine.

II. Roman.—This, under the Republic, consisted, so far as the present purpose is concerned, of an enrolment of persons and property by tribes and households. Every paterfamilias was required to appear before the censors, and give his own name and his father’s; if married, also that of his wife and of his children; after this, an account and valuation of his property, on which a tax was then imposed. By these lists obtained every man’s position in the state was regulated. After these duties had been performed, a faurum, or solemn purification of the people, followed, but not always immediately (Smith, Dict. of Class. Antiq. s. v. Census). See Dionys. iv, 15, 25; Cicer. de Legg. iii, 8; Clinton, Fast. Heil. iii, p. 457, c. 10). The census was taken, more or less regularly, in the provinces, under the republic, by provincial censors, and the tribute regulated at their discretion (Cicero, Verr. ii, liii, 53, 56), but no complete census was made before the time of Augustus. The census carried out under these three general inspections of this kind, viz. (1.) B.C. 98; (2.) B.C. 8; (3.) A.D. 14; and a partial one, A.D. 4. The reason of the partial extent of this last was that he feared disturbances out of Italy, also, and that he might not appear as an exactor. Of the returns made, Augustus, Nov. 17, 101, Tacitus, Ann. i, 11; Tab. Anncy. ap. Ernesti, Tacit. ii, 188). A special assessment of Gaul, under commissioners sent for the purpose, is mentioned in the time of Tiberius (Tacit. Ann. i, 21; ii, 6: Livy, Ep. 134, 136). In the New Test., two enrolments of this kind, executed under the Roman government, are mentioned by Luke (ἀπογραφή, "taking"). See Tax. 1. In Acts v, 37, a census is referred to as at the time a well-known event, during which certain Judas of Galilee raised an insurrection. This import of the term there employed is sustained by Josephus (Ant. xviii, 1, 1; 19, 1, 10), who says that it was an assessment of property (ἀποτίμησις τῶν ὀνόματος τρητίμων), which the prosul pirus, Kepnos, Cyreniis), carried out on behalf of the emperor Augustus after the banishment of king Archelaus (A.D. 6), in which Samaria, Judea, and Idumea were joined with the province of Syria; the name for such a valuation, which was occasionally instiuted in all the provinces of the Roman empire, is the well-known one census; by it new lists (ἀπογραφαὶ, tabulae census), Polyb. ii, 25, 9) were made out, of persons, property, and business, and upon this basis the tax was imposed. See Assessment. The matter was naturally odious generally to the subjects, especially to the Jews (see Publican); not only on account of their religious prejudices (see Zealots), but also the violent and extortionate manner in which Oriental taxation is always enforced. See Tribute. The word ἀπογραφή is used almost invariably by Greek writers of the Roman period for the census, and for enrolment for taxation is more properly called αὐτογραφία, a sense, however, not inapplicable (even in the Attic dialect) to ἀπογραφή and ἀπογραφέας (see Wachsmuth, Hellen. Alterth. ii, 71, 238, 280). See Judas (The Galilæan).

2. In Luke ii, 1, there is mentioned an enrolment or ἀπογραφή as having taken place in the year of Christ’s birth, by order of Augustus, and, as the words seem to express, under the superintendence of Quirinus or Cyrenius, president of Syria, extending over the entire land (ῥιτα ὀνομασία). This seems, according to the date indicated, to have been different from the census above mentioned, as it is indeed implied in the language “this the first tax-list was made while Quirinus was governor” (αὕτη ἡ ἀπογραφή πρὸ τοῦ ἵνα ἵματος ἡμείς ὁ Ἱωάννου Κυρίου). But this passage contains great historical difficulty as well as importance (see Huschke, Über die Aufnahme der Juden in Christen gehaltenem Census, Breslau, 1840; Wieseler, Joseph. p. 82 sqq.; Kirmis, in the Jenaer Lit.-Zeitung, 184, No. 100 eqq.). The principal discrepancies alleged with regard to the tax itself have been adduced by Strauss (Leben Jesu, 128, De Wette (Comment. ad loc. in loc.)..1. Palestine was not yet directly Roman, or immediately liable to such a measure, and Augustus, A.D. xviii, 1, 1; Apian, Civ. vi, 70); an ἀπογραφή at this time, therefore, as being neither available for the purposes of the emperor, nor adapted to the relations of the Jewish vassal-kings towards him, would have been the more likely to have created a popular or governmental disturbance than the later one above referred to. 2. At all events, no historical mention of so unusual a proceeding occurs either in Josephus or the Roman writers of the period. 3. Yet some notice of this event is the more to be expected, inasmuch as the ἀπογραφή in question covered the whole empire, the restriction of its terms (‘the whole earth’ or ‘land’) to Palestine being impossible, and also the fact that the “census” the subjects were assessed at their actual residences; a journey to the family seat could only be requisite on the supposition of a Jewish genealogical registry. 5. As wives were in no case required to repair to the assessors, Mary must have undertaken unnecessarily a journey to Bethlehem, and, as she was wearing her condition, was harassing in her condition. Some of these objections were canvassed by Paulus (in his Comment. in loc.), Tholuck (Glaubenslehre d. d. evang. Gesch. p. 188 sqq.), Huschke (sup. sup.), and others have pretty effectually answered them all. They may mostly be oliv-
CENTRAL AMERICA 188 CENTURIES OF MAGDEBURG

atplied by simply and naturally assuming that this was a registration instituted indeed by the Roman emperor, but executed in accordance with the local usages (see Strong's *Harmony of the Gospels*, notes to viii). See Cyrenius.

In the first place, an *a p o r p a h* was properly only an enrollment of the inhabitants, which may have been set on foot for statistical purposes, in order to obtain a complete account of the population, perhaps as a basis for a levy of troops from this as a subject territory. The emperor Augustus caused such a roll or a list to be made out ("breviarium totius imperii," Suetonius, *Octav. 101*), which included an account of the provincial allies ("quantum sociorum in armis,"Tacitus, *Annal. 11, 11*), and from this Palestine could not well have been excepted. The ordering of such a register was not inconsistent with the political relations of Herod (as thought by Hoven, *Ober Ritter*, ii, 57 sq.), since he was himself but a dependent monarch; and as the word in question has usually the sense of a list with a view toassessment, the probability of such taxation in this instance can certainly not be denied. Similar exactions are mentioned in the Gospels in modern times among dependent countries. Moreover, Herod was so subject to the rule of Augustus that he did not even assume to judge two of his own sons, but referred the trial to the emperor (Josephus, *Ant*. xvi, 4, 1; conf. p. xxvi, 5, 8); and he, in fact, submitted to an oath of allegiance to which the Jews were required to take (Ant. xvii, 2, 4). The latter circumstance may indeed be naturally attributed to the vassalage of a nation, but the former was a voluntary act on the part of Herod, who nevertheless, without such ceremony, executed other members of his family (conf. however, Josephus, *Ant*. xvi, 11, 2). At all events, it abundantly appears from Josephus that Augustus, in moments of passion, was capaible of resolving to proceed to extremities with Herod (*Ant*. xvi, 9, 3); and that, after Herod's death, he hesitated about transferring the land to the sons of the latter (*Ant*. xvi, 11).

There are monographs in Latin on the census of Quirinus by Ammon (Erlang, 1810), Birch (Hafn. 1799), Bornitz (Viteb, 1650), Breithaupt (Helmst. 1737), Dayling (Observe. ii, 824 sq.), Hascer (Regiom. 1796), Heinemann (Gottting. 1783), Janus (Viteb. 1715); also in IkeniT. The. ii, 424 sq.), Ourecht (Argentor. 1672); and in French by Bross (Paris, 1672), Philimatier (Abbe, 1785), Richard (Viteb. 1774); also in IkeniT. The. ii, 434 sq.), Volberth (Gottting. 1767), Wredel (Jen. 1708), Wernsdorf (Viteb, 1683, 1720); in Greek, by Friberg (Alexo, 1730); in German, by Kist (Utr. 1701), Pichelmans (Doub. ser. Inst. i, 1-13), Steckman (Grund. Nachrichten. 1770).

**Central America** comprised, in 1868, five sovereign states, viz. Costa Rica, Nicaragua, Guatemala, Honduras, and Salvador. The eastern coast of Central America was discovered by Columbus in 1502, the western by H. Ponce in 1526. The Spaniards soon subjected to their rule the greater part of the country. Mexico was long continued as the seat of their independence, and the districts of Peten was not taken possession of until 1697. In 1821 the five states overthrew the Spanish rule by a bloody revolution; in 1822 they called a Constituent Assembly, and in 1828 they declared themselves an independent republic, under the name the United States of Central America. The new confederacy was continually a prey to civil war, arising principally from the mutual hostility of the three races: the white, which prevails in Costa Rica; the Indian, to which in Guatemala almost 90 per cent. of the entire population belong; and the mixed, which is predominant in the other states. The year 1838 marked the end to the union, and the confederacy was divided into five sovereign and independent states. Together with the Spanish dominion, the ecclesiastical rule of the Roman Catholic Church was established throughout the whole extent of Central America. After the declaration of independence, the Central American confederacy showed itself favorably to the (Ottomist) ideas of religious toleration. The Constituent Assembly forbade the proclamation of papal bulls, and the receiving of money for indulgences. From 1826 to 1831 all the converts of monks except those of the Bapthlemites (q. v.) were suppressed, and in 1825 an annual visitation of the female convents was ordered, in order to see that no nun was retained in a convent against her will. In 1825 religious liberty was proclaimed, and Hindus even arrogated for some time the celibacy of priests. Since the dissolution of the union there has always been a fierce struggle between the clerical and the liberal parties. Some of the states, in particular Guatema, have retained the priests, and the others have enforced the most odious laws of intolerance which ever disgraced a papal country; others, in particular Honduras, have been more faithful to the principles of liberalism. The religious conditions of the people, as in all the papal countries of America, is very low. The grossness of the superstition is well shown in the modern time.

In the Indian villages the rule of the priest is almost absolute. Worship consists mostly in processions and in the veneration of the images of the saints. Every Indian endeavors to possess a saint's image, which is preserved in the church, and which he carries about atprocessions. Some of these processions are regulated by the law of the state, that the saint the possessor of the image gives a great banquet, and the priest receives for the mass which he says, in honor of the saint, money and food. If the possessor of the image dies without heirs, it is bought by another Indian, lest it be rejected from the church; for the church rejects every image that has no owner, and every such rejection is expected to forebode a calamity to the village. The processions are attended by flutes and other instruments, by immense clouds of frankincense, and by a great display of fireworks. A peculiar custom is observed on the day of Pentecost, when a white dove, ornamented with flowers, is placed on the head of the priest who stands before the altar, and flowers are showered upon him from all sides. Marriages are conducted in the villages before sunrise, a custom probably transmitted from the times of Indian paganism.

Efforts to establish Protestantism in Central America have been repeatedly made, especially by missionaries sent out from the States and elsewhere, but thus far without great permanent fruit. The Moravians, however, have had (since 1848) some flourishing missions on the Mosquito Coast, an independent district of Central America inhabited by about 20,000 Indians. Their missionary statistics in 1868 were as follows: stations, 3; in all, 5; converts, 216. The Roman Catholic Church in the five states of Central America is under the jurisdiction of the archbishop of Guatemala (who is assisted in his diocese by two bishops in *portu laicorum*) and four bishops, at San Salvador, Nicaragua, Camaquaya (the capital of Honduras), and St. Thomas (in the state of Costa Rica). The aggregate number of Roman Catholics in 1868, according to the last account, is 248, with 4 missions, and the number of churches 716. See Reichard, *Centro-America* (Bruneon. 1861); Fröel, *Sever Years Travel in Centro-America* (Lond. 1868); Marr, *Reise nach Central-Amerika* (Hamb. 1868, 2 vols.); Equier, *The States of Central America* (N. Y. 1868). See AMERICA.

**Centurions,** the writers of the Centuries of Magdeburg (q. v.) are so called.

**Centuries of Magdeburg** (Centuriae Magdeburgenses), the name given to the first great work on Church History by Protestant reformers. It was projected by Matthias Flacius, and prosecuted by him in conjunction with Joh. Wiegand, Matt. Judex, Basilius Taler, Andr. Corvinus, and Them. Holzheuter, of Magdeburg. Several of the Protestant princes joined to defray the
expense incurred in the preparation of the work. "The centuriorum thus describe the process employed in the composition of their work. Five directors were appointed to manage the whole design, and ten paid agents supplied the necessary labor. Seven of these were well-informed students, who were employed in the main work, and five were instructed by the members of the directors, who carefully examined what had been done, and made the necessary alterations; and, finally, a regular amanuensis made a fair copy of the whole. At length, in the year 1599, appeared the first volume of their laborious undertaking. It was printed at Basle, where the thirteenth and final volume (61 vol.) appeared in 1574; but, as it was projected at Magdeburg, that name was to remain on its title; and the first great Protestant work on Church History has been always commonly known as the Magdeburg Centuries. It was in every point of view an extraordinary production. Though the first modern attempts to set up an independent Church, it was written upon a scale which has scarcely been exceeded. It brought to light a large quantity of unpublished materials, and cast the whole subject into a fixed and regular form. One of its most remarkable features is the elaborate classification. This was strictly original, and, with all its inconveniences, undoubtedly tended to introduce scientific arrangement and minute accuracy into the study of Church History. Each century is treated separately, in sixteen heads or chapters. The first of these gives a general view of the history of the century; then follows, 2. The extent and progress of the Church; 3. The condition and tranquillity of the Church; 4. Doctrine; 5. Heroes; 6. Rites and Ceremonies; 7. Government; 8. Schisms; 9. Councils; 10. Lives of Bishops and Doctors; 11. Heretics; 12. Martyrs; 13. Miracles; 14. Condition of the Jews; 15. Other religions not Christian; 16. Political changes of the world" (Hook, Church History, s. v.).

The whole section on the Roman emperors of the age. It was distinguished for its familiarity with original authorities, for its frequent citations, for a criticism which paid no deference to earlier writers on the same subject, and for its passionate style of controversy. For more than a century afterwards, nothing was published but text-books filled from the materials supplied by the Centuries, and written in the same spirit."(Hase, Church History, §10). As a whole, the work is controversial rather than purely historical; but its spirit, its thoroughness, and its method were far in advance of any book in the same field that had arisen in the Roman Church. The "Annales" of Baronius were undertaken in order to counteract the influence of this great work.

The "Centuries" do not reach beyond the 1st century. The best edition is the original one (Ecclesiastica Historia, etc. per aitque Studiious et plus viris in urbe Magdeburgiensi, Basili, 1609, 74, 43 volumes, 9 fol., 12, 269 pages, 84 volumes, 9 fol.).

Cantuaria (καστόριον και ιστορίων), a translation of the Latin centurio, which also occurs in the Graecized form καστυρίων, Mark XV, 29, 44, 45, a Roman military officer in command of a hundred men, as the title implies. The number under him, however, was not always uniform, being enlarged or lessened according to circumstances (see Smith's Dict. of Cass. Antiq. s. v.).

Cornelius, the first Gentile convert to Christianity, held this rank (Acts x, 1, 22). See Cornelius. Other centurions are mentioned in Matt. viii, 5, 8, 13; Luke vii, 2, 6; Acts XXI, 32; xxii, 23, 26; xxiii, 25, 39; xiv, 29, 31; xvi, 6, 4, 11, 13, 26; xxvii, 18. See Army. The centurion by Bar's Saviour's cross (Matt. xxvii, 54; Luke xxii, 47) is said to have been named Longinus (see the treatises on this point by Goetze and by Möller, Obs. philol. Rost. 1696, p. 4 sq.). See Captain.

Ceolfrid, or Ceolfrith, a Saxon monk and writer, was born about the year 642, in the kingdom of Northumberland. In 674 he is mentioned by Bede as a scribe, Benedict Bishop in building the monastery of St. Peter at Wearmouth; and when Benedict founded the monastery of St. Paul at Jarrow, he made Ceolfrid the abbot. Benedict, on his death-bed, designated Ceolfrid abbot of both the monasteries at Wearmouth and Jarrow. Bede describes him as "a man of great perseverance, of acute intellect, bold in action, experienced in judgment, and zealous in religion." He died on his way to Rome, when he had nearly reached Lannores, in France, on the 28th of September, 716. His remains were carried to Wearmouth, but were subsequently removed to Durham. His most famous letter, addressed to Neitain, king of the Picts, and preserved by Bede, is distinguished by strength of reasoning and clearness of style. Bala attributes to him some homilies, epistles, and a tract, De sua Pergrinacione.—Wright, Beg. Brit. Lit. i, 234 sq.; Bede, Hist. Eccles. bk. v, ch. xxi; Hook, Eccles. Biography, iii. 539.

Cephorasia (ἐκποράσια), a compound of the Hebrew קָפַר (see Caphar), a town of Palestine mentioned in the Pentecost Table as lying between Ashkelon and Jerusalem, 8 (or 18) miles from Eleutheropolis, and thought by Roland (Pales, p. 684) to be the same as Caparossa (q. v.); but identified by Robinson with "a deserted village, Kefer Ubrich, in or near the plain, not far from Tlmeh and the mouth of the Surah" (Researches, ii, 649).

Cephas (Κάφας; in later Heb. or Syriac Κφας), a surname which Christ bestowed upon Simon (John i, 42), and which the Greeks rendered by Κφαζος, and the Latins by Petrus, both words meaning "a rock," which is the signification of the original. See Peter.

Ceras (Καράσ), mentioned (I Esdr. v, 29) as one of the "temple servants" whose sons returned from Babylon; evidently the Kebar (q. v.) of the Heb. texta (Ezra ii, 44; Neh. vii, 47).

Cerasites. See Serpents.

Ceratone, Ceratonia. See Hek.

Cerdus, or Cerron, a Gnostic of the second century. Little is known of his history. Ireneus says that he came to Rome from Syria in the time of Hyginus, A.D. 140. Lardner rests the testimonies of the fathers with regard to his history as follows: Cerdon taught, according to Ireneus, that "the God declared in the law and the prophet is not the father of our Lord Jesus Christ. For he was well known, the latter unknown; the former was just, the latter good" (Ireneus, as cited by Eusebius (Hist. Eccles. iv, 11). Epiphanius's summary is to this purpose (Hier. 41): "That Cerdon learned his doctrine from Iacelon, making, however, some additions of his own; that he came from Syria to Rome, and that he held the notions in the time of Hyginus. He held two contrary principles; he said that Christ was not born. He denied the resurrection of the dead, and rejected the Old Testament." In his larger article Epiphanius writes that "Cerdon succeeded Iacelon, and came from Syria to Rome in the time of Hyginus, the ninth bishop after the apostles; that, like many other heretics, he held two principles and two gods: one good and unknown,
the Father of Jesus; the other the Creator, evil and known, who spake in the law, appeared to the prophets, and was often seen. He taught, moreover, that Jesus was not born of Mary, and that he had flesh in appearance only. He denied the resurrection of the body; and rejected the Old Testament. He said that Christ descended from the unknown Father; that he came to overthrow the empire and dominion of the Creator of the world, as many other heretics do; and, having been a short time at Rome, he transmitted his venom to Marcion, who succeeded him.

Theodore's account of Cerdo is to this effect: "He was in the time of the first Antinous. He taught that there is one God, the Father of our Lord Jesus Christ, unknown to the prophets; another, the Maker of the universe, the giver of the Mosaic Law; and this last is just, the other good. For he goes in the law orders that an eye should be given for an eye, and a tooth for a tooth; but the good God in the Gospel commands that to him who smiteth thee on the right cheek, turn the other also; and that to him who would take away thy coat, thou shouldest give thy cloak also. He in the law directs to love a friend and hate an enemy; but the other, to love even our enemies. 'Not-otherwise,' he says, for in the law it is directed that if a man meet his enemy's ox going astray, he should bring him back; and not forbear to help his beast when lying under his burden; and that he who, according to him, is alone good, threatens 'hell-fire to him who calls his brother fool,' and showing himself to be just, said, 'With what measure ye mete, it shall be meted to you again.'" Irenæus says that when Cerdo was at Rome, he several times renounced his errors; but at length, for returning to them again, or for teaching them in a clandestine manner, he was finally excluded from the Church. Cerdo's views were adopted and amplified by Marcion. See Mosheim, Commentaries, cent. ii, 53; Lardner, Works, viii, 445 sq.; Bauer, Die Christliche Gnosis, p. 101, 278 sq.; and the articles Gnostics; Marcion.

Cerealis, Pettius, a relative of the emperor Vespasian, and a Roman general of note in several provincial campaigns (Tacitus, ann. xiv, 82; Hist. iii, 59, 78, 79; iv, 71, 66; Agr. 8, 17). During the war of Titus against the Jews he commanded a detachment against the Jews; took Josephus and the temple, and was ac-
tive in the siege of Jerusalem (ib. iv, 9, 9; vi, 2, 5, 4, 8).

Cereals, a general term embracing all those kinds of grain ("μάλλυ" = "corn") of which bread (q. v.) is made. See Agriculture. These, among the Hebrews, were the following (see Jahn, Bibl. Arch. col. 58). See Grain.

1. Wheat ("μύθη", "chithah", i.e. "mumin"
un kinhah; the several kernels are denoted by the plur. breshmin; Greek φύκος; in the N. T. the generic term σῖρος; in modern Egypt and Barbary kamunchus, Heb. הֵשָׁרֹת) was the most important kind of bread-corn grown in Palestine (Isa. xxxviii, 25; Ezek. iv, 9), and, like barley, was raised throughout the land (Deut. viii, 8; Judg. vi, 11; Is. vii, 21; 2 Sam. vi, 18; 2 Sam. iv, 6; xviii, 20; comp. Piny. xvii, 21); so fully supplying the inhab-
tants that Solomon was enabled with a surplus to procure the services of king Hiram's artificers (1 Kings v, 11), and considerable exports of wheat to Tyre were spoken of at a later date (Ezek. xxvii, 17). The culture of wheat is still practised there (Robinson, Researches, ii, 276 etc.). The finest wheat said to be grown is Michmash, and an unknown locality called Masewichah (מַעְיָן הָיוֹיָה). In Ezek. (i. c.) a peculiar kind of wheat ("אַיִלְוֹת, "wheat of Minnith") is spoken of. See Minnith. The sowing of wheat fell in March-September; and the reapings (בּוֹזָה, "wheat-harvest") at the end of Nisan (March-April). See Calendar. Wheat still ripens in Palestine sometimes in April (Korte, Reise, p. 145, 482; Shaw, Trav. p. 290), although it is usually fit to cut in May or the beginning of June (Robinson, Researches, ii, 89, etc.). See First-fruits. Wheat flour (יֵצָר, "Exod. xxi, 2) was used for bread and cakes (q. v.), and the grains were also roasted (see Parceled Corn) when green (Joshua v, 11; Ruth ii, 14; Sam. xxvii, 17; 2 Sam. vi, 18); and baked in the case in Palestine, especially by the reapers (Hes- seh, p. 91). See Harvest. The kernels were also pounded (Lev. vi, 14; xxvii, 14; 2 Kings iv, 42) into a kind of gruta (גְּרֵעַ). See Ear (or Corn). In the sanctuary wheat was used in considerable quantity (Exod. vii, 22; comp. vi, 9; see Bel 2). Wheat was universally cultivated in the lands of both Asia and Europe, being an adjoining part (Egypt), from the earliest times; but how it was intro-
duced to the Hebrews is unknown. See generally Link, in the Abhandl. der Berliner Akademie, 1816-17, p. 127 sq.; Celcius Hierobol. ii, 112 sq. See Wheat.

2. Barley (איילות, "sebroth"), of various kinds (chiefly the six-rowed), was largely cultivated (Gen. xxvii, 16; 2 Chron. xxvii, 26; 1 Sam. vi, 17; 2 Sam. xxxiv, 10; Isaiah xxi, 25; Jer. xii, 8) by the Egyptians (ib. vii, 81 sq.) and Hebrews (as one of the staple products of Pale-
est, Deut. viii, 8; comp. Joel i, 11), and was used partly as fodder (1 Kings iv, 28; comp. Pesh. f. iii, 2) for cattle (Phaedr. v, 5; Jos. vii, 104; Piny. xxvii, 47; xviii, 14; xxvii, 11) or horses (Ezech. I, 140; comp. Num. xxiii, 20), partly for making bread (Piny. Hist. Nat. xviii, 20) for the poorer classes (Judg. vii, 13; 2 Kings iv, 42; John vi, 15, 15; comp. Ezek. iv, 9; Joseph. War, v, 10, 2; Philo, ii, 807; Sene-
ce, Ep. 18, p. 25; Bib. Athen. vii, 304; Plutarch, Apoph. v. p. 6; Lips. Xenoph. Anab. iv, 51; see Barley). In Egypt (Westenr. Ges. ar. 177) it was regarded as wholesome (Lucian, Macrod. b; Piny. xxii, 65); but, being less palatable than wheat (Athen. iii, 115), it was not usually eaten except under the pressure of hunger (Wihlerym. xi, 22, p. 860); and there-
fore constituted the regular fare of Roman soldiers when undergoing correction (Liv. xxvii, 18; Sueton. Aug. 24; Verg. Mill. i, 13; Dio Cass. 102, c. 27 and 36; Polyb. viii, 88, 4; Polyen. iv, 24), as of the hermits in the Christian Church (Jerome, Opp. ii, 5); although in early times it was a common article of food (Piny. xviii, 14; Artim. i, 71), and is still highly relished by the Arabs in Morocco (Hest. Nasc. p. 337). It was also used for malt for a special barley중의 맛 (q. v.). See Wine. Barley was sown in the middle of the month of Marchesan (q. v.), or November (Lightfoot, p. 830, 1004), and was reaped in the month Abil (q. v.), or April (at Jericho in March; see Bulbe, Calendar. Palest. comm. p. 14, 26; in less favor-
ed situations even in May, Robinson, Res. ii, 98, 100); and these seasons became regular notations of time (2 Sam. xxix, 16; Ruth ii, 22; Judith viii, 2). See Har-
est. See generally Celsius, Hierob. ii, 239 sq. On the kinds of barley known to the ancients, see Link, in the Abhandl. der physikal. Classe der kön. preuss. Akademie d. Wissenschaft. 1823, p. 108. See Comp. the article BARLEY-OFFERING. See Bulbe.

3. Spelt (יִשְׁבַּל, kushe'meth; Aram. kusumath; Aram. ᵁᵘⁿᵘᵗ: Triticum spelta of Linn.: by the Latins ador or odorum, Aadam, Rom. Ant. ii, 454), mentioned in Exod. ix, 22; Isa. xxxvi, 25; Ezek. iv, 9 (see Fitch-
wha), is a species of bread-corn with a four-petaled, minute calyx, hermaphrodite blossoms, followed by lit-	le bearded slender ears, seemingly small (hence the name, from יִשְׁבַּל to carvulx), whose grains adhere so firmly in the husk as to be with difficulty separated from it. It is said about as tall as barley, and is cultivated in the southern parts of Europe (Strabo, v
CEREMONY

227, as well as in Egypt (Herod. ii. 88; Pliny, xviii, 19), Arabia, and Palestine (where it is still raised), of several varieties, the winter grain being esteemed the best (Exod. ix. 32). Among the Israelites it was usually associated with barley as a field-crop (Isa. i. c.). The meal was first eaten only with the first-fruits (Exod. xxviii, 11); the bread made of it (Phocaes, c. 23) is more brittle and less nutritious than wheat (Dioscor. ii. 111). Comp. generally Celsus, Hiero. ii. 98 sq.

Various other significations of the above Heb. term may be seen in Liddell and Scott, s.v. hebel and among modern terms (S. St. John, "Agriculture" and "Fruit""); the Sept. has ζύζα in Isa., but σκόρος in both the other passages (both are synonymous terms, Herod. ii. 84). Comp. Link, Utwelt, i. 404 sq.

See SPERT.

4. Millet appears to be denoted by the Heb. סַדִּיק (Arab. duchna) of Ezek. iv. 9, which, however, Gesenius (Thea. p. 302) regards as a generic term, in distinction from the Indus duchna (Hulchus duchna, Linn.), a species of cereal (Pliny, xxvii, 63) peculiar for its hermaphroditic or two-bearded and mostly two-petaled calyx. It stands quite tall, and bears prolate brown kernels pressed together and resembling rice. It blossoms in Egypt (Roscellini, Monum. civ. 1, 363 sq.; Forcellini, Rosetta) in the beginning of November, and is also now cultivated in Arabia (Wellste, Trad. i. 295), where the grain is used for a poor sort of bread (Niebuhr, Reise, i. 156). See generally Celsi Hiero. i. 458 sq.; Oedmann, Summt, v. 92 sq. See MILLET.

Some distinct species of grain is thought by many (so the Sept., Aquila, Theod., and Vulg.) to be designated by the term סַדִּיק, nismun, of Isa. xxvii, 5; whether a variety of millet, spelt, or barley, or some totally different cereal, is not agreed; but the word is perhaps rather an appellative indicative (so the A. V. "appointed" barley) of a barley-field (see Rosenmüller and Gesenius, in loc.). Other modern grainaceous plants, as rye, oats, maize, rice, etc. do not appear to be mentioned in Scripture. See RY. Some of the smaller grasses, however, seem to have been employed as farinacea. See CUMMIN. Certain legumes also, as beans, peas, etc. were used for similar culinary purposes. See PULSES.

Ceremony, Latin ceremonia, a word sanctioned by Ciceronian usage; but of uncertain etymology, and variously explained by (1) from Cere, and the offerings made to her; (2) from Cares, the Egyptian scene, which traced to the sacred things and Vestals of the Romans were conveyed for safety from the Gauls (Forcellini, Lex. tot. Latin.); (3) from Carere; (4) from Curru and Curditic; (5) from Curus, an obsolete Latin word = pium, sanctus, s. a. pieus, sacred (Scalegge); (6) from Cura = Curu (Georgen's Lexicon); (7) from Calum, as though it should be Calsulmin.

Particular ceremonies are treated in this work under their appropriate heads. We propose only to consider here (1) whether the term is a suitable one to denote Christian church services, and (2) its import in creedal and symbolical books, making free use of Paul's article in Herzog, Real-Encyclopaedia. (Suppl. i. 814.)

Whenever the word ceremony is used in an indeterminate way of a religious act, we must not overlook the distinction between the essential, necessary part of the act, without which no worship can be, and its accompanying forms, which then serve to give it greater solemnity, and bring out more strikingly the contrast with common life. This non-essential part only is ceremony.

To illustrate further: the religious act may be defined as something done in obedience to divine command, and therefore necessary to salvation; while ceremony regards man's voluntary work, the offspring of the connection of the religious impulse and his aesthetic taste. Hence results the truly Protestant doctrine that these forms, because they are subjective-

ly conditioned, may vary according to times and places. The Roman Catholic Church, in spite of her longing for absolute unity, is unable to prevent some freedom and variety in this respect, and allows that particular rites (ritus particulares) need not be everywhere exactly the same; that is correct, and the only question would seem to be, which rites belong to the one and which to the other class. Yet, under the Romish view, we have only to rank among the universals as many as possible of the most formal, unmeaning, and arbitrary things, and thus make them obligatory.

In the distinction of the divinely commanded and the humanly devised, we must keep in view (1) that the Mosaic law made what we call ceremony the subject of divine enactment, and did not leave it to man's choice; and (2) that this choice is not individual caprice. Whatever, through the Church's tendency to improvement in matters of worship, has grown into ritual form, which has become ceremonial, the Church, should be respected by the individual, as a custom inherited from the fathers—with the condition, indeed, that when a ceremony has lost its original, correct meaning, or assumed a false one, or when its outward form has become opposed to the moral consciousness and conviction of the Church, it is for him, as a freeman, to assert his right to abolish, simplify, or replace such ceremony.

The distinction may be made clearer by the following illustrations: To baptize is not a ceremony, but a necessary church act; but the use of a cope and surplice, of a chalice and the usual cup and bowl, of liturgically prescribed words, the laying on of the hands, the sign of the cross—these constitute ceremony. Again, we celebrate the Lord's Supper in obedience to Christ's command, but ceremony prescribes how we shall furnish a table, as a New Testament altar; what kind of vessels we shall use; whether, like the Lutherans, we shall give the minister to each communicant, with the same words, or, like the Reformers, shall cut the bread, etc.; whether the communicants shall kneel or not, etc. These examples show that what is necessary and what is voluntary, what is divinely enjoined and what is pleasing to man, the kernel and the husk, the idea and the form, are so connected and that, though some ceremony enters into all religious services, it should never be more empty, unmeaning, form. What are called in public life court ceremonies are indeed such, but the minister of the Gospel may not be merely a master of ceremonies. In judicial proceedings ceremony may have real significance, e.g., in the taking of oaths, the raised hand and set form of words, the assumption of a black cap by the judge when pronouncing sentence of death, and the breaking of a staff before the execution, non-essential, yet symbolic acts, powerfully influence the imagination.

The application of the term ceremony to the rites of Christian baptism, marriage, burial, etc. is repugnant to our feelings, as implying excessive formality. The Socinians alone call baptism and the Lord's Supper ceremonies, regarding them as essentially unmeaning observances, though enjoined by Christ. On the other hand, the Roman Catholic and High-Church view assigns to certain outward acts such Christian efficacy, to attain which duly authorized forms must be observed. The evangelical Protestant, eschewing either extremes, accepts as helps in the Christian life such ritual forms as by their outward correspondence with the religious idea tend to edify; but he does not trust in them for empowering to a more important than sprinkled water, folded hands, chrism, or holy vessel, is the Word of God, understood.
CEREMONY

190

of divine authority, implied in their respect to the ritual which that authority is conceived to have sanctioned, may be taken as a proof that they have nothing to apprehend from the violation of the law under which they are placed (Watson, s. v.).

"The rites and ceremonies of the Christian Church, agreeable to the general rules of Scripture, ought to be of such a kind as to promote the order, the decency, and the solemnity of public worship. At the same time they ought not to be numerous, but should preserve that simplicity and purity which flow from true divinity, and which accords especially with the spiritual character of the religion of Christ. The apostles often remind Christians that they are delivered from the ceremonies of the law, which are styled by Peter 'a yoke which neither their fathers nor they were able to bear' (Acts xv, 10). The whole tendency of our Lord's discourses, and of the writings of his apostles, elevates the mind above those superstitious observances in which the Pharisees placed the substance of religion; and, according to the divine saying of Paul, 'The kingdom of God is not meat and drink, but righteousness and peace and joy in the Holy Ghost' (Rom. xiv, 17). The nature of this kingdom is forgotten when frivolous observances are multiplied by human authority; and the complicated, expensive pageantry of Roman Catholic worship, together with the still more childish ceremonies which abound in the Eastern or Greek Church, appear to deserve the application of that censure which is pronounced against them. The Reformation represented the attempts made in his days to revive the Mosaic ritual as a 'turning again to weak and beggarly elements.' Further, all the Scripture rules and examples suggest that, in enacting ceremonies, regard should be had to the opinions, the manners, and prejudices of those to whom they are prescribed, and that those who entertain more enlightened views upon the subject should not despise their weak brethren. Upon the same principle, it is obvious that ceremonies ought not to be lightly changed. In the eyes of most people, those practices appear venerable which have been handed down from remote antiquity. To many the want of those helps to which they have been accustomed in the exercises of devotion might prove very hurtful, and frequent changes in the external parts of worship might shake the steadfastness of their faith. The last rule deductible from the Scripture examples is this, that the authority which enacts the ceremonies should clearly explain the light in which they are to be considered; should never employ any expressions, or any means of enforcing them, which tend to convey to the people that they are accounted necessary to salvation; and should beware of seeming to teach that the most punctual observance of things in themselves indifferent is of equal importance with judgment, mercy, and the love of God."—Hill, Lectures on Divinity (N. Y. ed., p. 778).

Cerithians, followers of Cerinthus (q. v.).

Cerinthus (Κηρίνθος), a heresarch, who lived in the time of the apostle John, towards the end of the first and at the beginning of the second century. The accounts of the ancients and the opinions of modern writers are very at variance with respect to him. He was a Jew by nation and religion, who, after having studied in the schools of Alexandria, appeared in Palestine, and spread his errors chiefly in Asia Minor. Our sources of information as to his doctrines are Irenæus, ode. Hær. i, 25; Esselhull, Hist. Eccl. iii, 28; Eadmer de Picardia, i, 28; and so wonderful a source of information as undeniably Erasmen, Feb. Hær. ii, 3 (Opp. tom. iii). Epiphanius makes him to have been one of those Jews who, in their zeal for the law of Moses, troubled the Church.
CERTITUDE

of Antioch by insisting on the necessity of the legal ceremonies for the Gentile converts; but in this he is probably mistaken. The account of Ireneus is that he appeared about the year 86, and was known to St. John, who wrote his Gospel in refutation of his errors. Ireneus, on the authority of Polycarp, narrates that the apostle John, when at Ephesus, going on a certain day to the bath, and finding Cerinthus within, fled from the building, saying: "Let us even be gone lest the bath should fall to pieces, Cerinthus, that enemy of the truth, being within." (iii, 28. 30.) Quoting from the presbyter Calus, states that Cerin-
thus put forth some Revolutions, written by himself, as it were by some great apostle, filled with the most monstrous narrations, which he pretended to have re-
ceived from angels.

As to his peculiar tenets, also, there is great dif-
fERENCE OF OPINION. Some consider his system to be
pure Gnosticism; others a compound of Gnosticism, Judaism, and Christianity. Ireneus says, 'Cerinthus taught that the world was not made by the supreme
God, but by a certain power (Demijuge) separate from
Him, and below Him, and ignorant of Him. Jesus he
supposed to be the son of a virgin, not the son of Joseph and Mary, born altogether as other men are; but he excelled all men in virtue, knowledge, and wisdom.
At His baptism, the Christ came down upon Him, from God who is over all, in the ships of a dove; and then He declared to the world the unknown Father, and sent angelic miracles. At the time of his death, first Judas, and Jesus suffered and rose again, but the Christ, being spiritual, was impassible.' Epiphanius says near-
ly the same, but asserts that Cerinthus taught that the
world was made by angels, and that he opposed the
apostles in Judea. It appears that Cerinthus consid-
ered Christ an ordinary man, born in the usual way,
and devoid of miracles, but distinguished from the
rest of the Jews by possessing superior wis-
dom, so that He was worthy to be chosen as the Mes-
siah; that he knew nothing of his high dignity till
it was revealed to Him in His baptism by John, when He
was consecrated to the Messiahship, and furnished,
with the necessary powers for the fullness of His
office by the descent of the supreme Logos or Spirit
from the heavens, which hun over Him like a dove,
and at length entered into His heart; that He was
then raised to the dignity of the Son of God, began
to perform miracles, and even angels were now taught by
Him. The opinion that redemption was to be effect-
ed by His sufferings, Jesus, in union with the mighty
Spirit of God, could not suffer, but must triumph over all
His enemies. The very fact of suffering was as-
sumed to be a proof that the Spirit of God, which had
been previously united to Him, was now separated
from Him, and had returned to the Father. The suf-
f erings were of the man Jesus, now left to himself.
Cerinthus denied also the resurrection of Christ. He
adhered in part to Judaism, and considered the Mosaic
law binding on Christians. He taught that the right-
geous would enjoy a paradise of delights in Palestine,
and that the man Jesus, through the power of the Log-
os, again coming upon Him, on the Messiah, would
reign a thousand years" (Parrar, Eccles. Dict. s. v.).

It is supposed that Cerinthus and his doctrines are all-
luded to in John's Gospel. The system of Cerinthus
seems to combine Eudionism with Gnosticism, and the
Judaico-Christian millenarianism. A full discus-
sion of Cerinth and his doctrines is given by Mos-
heim, Comment. c. i, § 70. See also Glæser, Ch. Hist.

Certitude of Salvation. See Assurance.

CEYLON

Cerulianus. See CERULIUS.

Cesar, Cesarea, Cesarius. See CesAR, CESA-
AREA, CESARIUS.

Cestius Gallus, son of C. Cestius Gallus Camer-
onus, was governor (legatus) of Syria A.D. 64, 65, when
the Jews broke out into the rebellion which ended in
the destruction of their metropolis and Temple by Titus.
Maddened by the tyranny of Gessius Florus (q.v.),
they applied to Gallus for protection; but, though he
sent Neposianus, one of his officers, to investigate the
case, and received from him a report favorable to the
Jews, he took no effectual steps either to redress their
injuries or to prepare for any outbreak into which their
discontent might drive them. When at last he found
it necessary to act, he marched from Antioch, and, hav-
ing LKen Ptolemais and Lydia, advanced on Jerusa-
lem. There he drove the Jews into the upper part of
the city and the precincts of the Temple, and might,
according to Josephus, have finished the war at once,
but he had not been dissuaded by some of his officers
from pursuing his advantage. Soon after he unaccount-
ably (comp. Matt. xxiv, 15, 16) drew off his forces, and
was much harassed in his retreat by the Jews, who
looked for him a quantity of spoil. Nero was at the
time in Achia, and Gallus sent messengers to him to
give an account of his affairs as favorable as possible
to himself. The emperor, however, much exasperated,
was commissioned by Vespasian to conduct the war; and
the language of Tacitus seems to imply that Gallus died
before the arrival of his successor, his death being probably hastened by vexation. (Josephus, Life, 43;
War, ii, 14, 5; 16, 1 and 2; 18, 9 and 10; 19, 1-9; ? 2,
1; iii, 1; Tacit. Hist. v, 10; Sueto. Vesp. 4.)—Smith,
Dictionary of Biography, ii, 226. See Jerusalem.

Cetab (Karbis. Vulg. Celtra), given (1 Exod. v,
32) as one of the officers of the 'servants of the Temple' whose "sons" returned from Babylon; he was a native of Jerusalem (Ezra ii, 46; Neh. vii, 48) do not contain any corre-
sponding name.

Cetubim (the usual Anglo-Latin form of the Heb
term מֶ֫הֶ֫בֵ֫מָ֫מָ֫א, Kethubim, the Writings), one of the
tree large divisions of the Old Test. used by the Jews,
and thus distin. quished from the Law and the Prophets
(the other divisions), as being, in the first instance,
committed to writing, and not orally delivered. Hence
the name of the Book of Psalms. In this section, his prop-
hecies having been originally written, they were there-
uttered orally. This division of Scripture is also shown
by the equivalent Greek name Hagiographa (q. v.).

It contains the Psalms, Proverbs, Job, Canticles, Ruth,
Lamentations, Ecclesiastes, Esther, Daniel, Ezra and
Nehemiah (reckoned as one), and Chronicles. See
Bible.

Ceylon (the Tippobini of the Greeks and Romans,
the Sermonides of the Arabian Nights' Lanterns), in Sin-
galese; Sevedare, in the Indian language, whence,
probably, Ceylon or Ceylon, the European name), an
island in the Indian Ocean, southeast of the coast of Cor-
opand (Hindostan), from which it is separated by the
Gulf of Mannar. It lies between 8° 55' and 8°
51° N. lat. and 79° 42' and 81° 55' E. long. From
north to south its length is about 270 miles; its nar-
rowest width 40 miles, and its greatest 1374 miles.
Its area is about 25,000 square miles. Ceylon can vie
with any part of the world in natural beauty, richness
of soil, and variety of fauna and flora.

The climate is much more equable than that of the
main land of India. The average temperature is about
80°; 80 inches is the average annual fall of rain.
The population, according to the Gotha Almanac for
1867, numbers 2,079,881. The European and other inhabitants, including the military, amount to about 25,000, and the E. Tennessee and Ceylon, when in the height of its prosperity, must have been ten times as densely populated as at the present
day. The natives are divided into four classes: first, the Ceylonese or Singhalese, occupying the Kandian territories and the coast; second, the Moormen, who are found in all parts of the island; third, the Veddahs, a wild race who live in the mountains in the eastern part of the island, and, fourth, the Hindoos, who occupy chiefly the N. and E. coasts, and speak the Tamil language. Besides these there are also in the island some 30,000 Dutch and British colonists; and an intermixture of these with each other, and with the native races, forms still another class called "burghers." The Singhalese believe themselves to have been the aborigines. The Portuguese discovered Ceylon in 1505. They subsequently became masters of the island, and it was conquered by the Dutch in 1656, just a century and a half after the arrival of the Portuguese. In 1796 the English took possession of Colombo, and in 1815 of Kandy (Newcomb, Cyclopaedia of Missions, s. v.).

Religion.—The Singhalese are devoted to Buddhism, which is the prevailing religion of the island. It does not exist, however, in that state of purity in which it is still found in the Indo-Chinese peninsula. Its sacred books are identical with those of Burmah and Siam, and both record the doctrines of Gautama in the Pali language; the deviations are in matters of practice. The Malabar kings adulterated Buddhism to such an extent that it was Bramhism. Intronized into the worship of Hindoo deities into the Buddhist temples, and this continues more or less to be the case. More than once have the Buddhists of Ceylon sought to restore the purity of their faith—at one time sending deputes to Siam, at another to Burmah, with this object in view. The Burman or Amarapura sect has long been the reformers of Singhalese Buddhism, and maintain no very friendly relations with the party who, supported by the priests of Siam, acknowledge the civil power in matters of religion, sanction the worship of Hindoo deities and the employment of the priesthood in secular occupations, uphold caste, and restrict the sacred books. Casta was acknowledged by the Singhalese prior to the introduction of Buddhism, which in principle is opposed to it; but so firmly was it rooted that it still endures, though more as a social than a sacred institution. Gautama Buddha is said to have visited Ceylon three different times to propound, and his scriptures, or sacred footstep, on the summit of Adam's Peak still commands the homage of the faithful. Buddhism was not, however, permanently introduced into Ceylon till 807 B.C., when Mahindo, obtaining the support of the king, established it as the national faith. The influence of the Buddhism was gradually increased by the administration of the Singhalese kings, monasteries were richly endowed; for though the Buddhist monk is individually forbidden to possess goods, a community may own property to any extent; and it is a remarkable fact that, at the present day, no less than one third of the cultivated land of the island is computed to belong to the priesthood, and is exempt from taxation" (Chambers, s. v.). The Moormen, scattered through the island, are Mohammedans. The Hindoos (Malabar or Tamils), who form the chief population of the district of Jaffna, follow Brahminism. See Brahminism. Buddhism. Jaffna.

MISSIONS IN CEYLON.—1. Roman Catholic.—During the tenure of Ceylon by the Portuguese (1505-1565), they introduced the Roman Catholic religion. In 1544, Xavier (q. v.) preached to the Hindoos in Ceylon. The mission was very successful; a Jesuit college and several convents were erected, and the province of Jaffna became wholly Christian. The missionaries did not penetrate far into the interior. The Church of Rome has at present two vicariates apostolical, Colombo and Jaffna, and claim a membership of about 140,000, of whom 55,000 belong to the vicariate of Jaffna. Detailed statistical information on the vicariate of Jaffna is given in Battersea's Catholic Directory for 1817 (Dublin, 1816, p. 287-300).

2. Dutch.—When the Dutch drove out the Portuguese, they began at once to plant the Reformed religion. (In the remainder of this account we follow Newcomb, Cyclopaedia of Missions, p. 228 sq., and Brown, History of Missions, vol. i.) They took possession of the Roman Catholic churches and convents, and banished the priests, and the Dutch missionaries; and an intermixture of these with each other, and with the native races, forms still another class called "burghers." The Singhalese believe themselves to have been the aborigines. The Portuguese discovered Ceylon in 1505. They subsequently became masters of the island, and it was conquered by the Dutch in 1656, just a century and a half after the arrival of the Portuguese. In 1796 the English took possession of Colombo, and in 1815 of Kandy (Newcomb, Cyclopaedia of Missions, s. v.).

The London Missionary Society.—In 1804 this society entered upon a mission in Ceylon, and the Rev. Messrs. Vos, Ehrhardt, Palm, and Read were employed as missionaries for several years; but after several years of toil and peril, the Rev. Mr. Vos died in 1812, in the person of Mr. Chater, whose efforts to Christianize the Singhalese, or Buddhists, and to systematize the study of their language, have made his name memorable. He died in 1819. The labors of his successors had reached, in 1868, to 131 villages of the Singhalese, in which they maintained 78 schools, with an average attendance of 2987 pupils. They had also 961 enrolled as Church members.

5. The American Board.—One of the first missionaries of the American Board to the East was the Rev. Samuel Newell. This missionary spent some time at Ceylon. In a letter dated at Colombo, Dec. 20, 1813, Mr. Newell urged an American mission in Ceylon on the following grounds, among others, that the government (English) was friendly to missions; that the population of the island is very small, and that there were but two languages to be learned in order to preach to three millions of people; that the natives could read and write; that the whole Bible had been translated into Tamil, and the New Testament into Singhalese; that there were 200,000 native Christians so called, and at least 100 schools were in operation, and that the piety of the Singhalese was very great. The board decided to make Ceylon a mission field, and sent, in 1815, the Rev. Messrs. Meigs, Richards, Warren, Bardwell, and Poor, who landed at Colombo in March, 1816. In a year Mr. Poor was able to preach in Tamil, and schools were established at different points. By 1818, through deaths and changes, Messrs. Meigs and Poor only were left in Ceylon; but in 1819, Messrs. Winlow, Spalding, and Woodward, with John Scudder, M.D., arrived in Ceylon. A printing-press was established in 1820. In 1824 an extensive revival occurred in the island. By 1827 there was a high school, 80 scholars, and 16 assistants. The mission has passed through many vicissitudes, but, on the whole, its results have been very satisfactory. In 1849 a new version of the Bible in the Tamil was published. The statistics in 1889 were as follows: stations 7; out-stations 25; 18 American laborers, 8 women; 800 native scholars, 300 native laborers, 30 native teachers; 15 churches, with 1442 communicants and 3116 adherents; 185 schools of all grades, with 8358 under instruction. The native contributions for the year amounted to $8466. The government schools are in charge of the missionaries, so that the mission has no expense from this part of the work.
The addition by confession during the year 1865 was only 18, while 9 were removed by death and 3 by excommunication. The aggregate number reported as attending the Sabbath morning exercises at 9 of the 10 stations was 1328; 46 preaching-places were reported, and 63 prayer-meetings were conducted each week; 15 adults and 38 children were baptized. The contributions of the churches for 1865 amounted to £102 7s. 2d. The income of the Native Evangelical Society was £51.

There were 7 stations, 7 sub-stations, 6 missionaries, 1 physician, 8 female assistant missionaries, 5 native pastors, 22 children, 92 attachees, 6 teachers in seminaries, 40 school-teachers, and 9 other helpers.

6. The Church Missionary Society.—The Church Missionary Society sent four missionaries in 1818 to Ceylon. Two of them—Mr. Mayor and Mr. Lambrick—stationed themselves in Kandy. The town itself has only about 3000 people, but in the neighboring mountains, to which the labors of these missionaries extended, there is a population of 200,000. The fruits of this mission among the Kandians have been very small. The secluded and solitary condition of the Kandian territory, within which Europeans seldom entered, had kept this region under the sway of Buddhism for ages, and prevented the establishment of any permanent mission amongst them.

After five years five schools had been established, numbering 127 pupils; and in 1839 the number of schools had increased to 15, and the number of scholars to 400. During the last twenty years Europeans have settled among the Kandian Hills, causing some irritation to the peasants, but affording protection to the mission, which is still continued. It is stated in a recent report that the labors of the missionaries are confined in a great measure to sojourners from the maritime provinces, who reside at Kandy and other places in the interior, and who are nominal Christians, and that the native Kandians have received comparatively little attention.

The Church mission station at Baddagame, in the low country, ten miles north of Point de Galle, commenced at the same time as that at Kandy, has been even less successful. Schools have been established, printed books have been circulated and read, and many have been made acquainted with the principles of Christianity. Still there have been but few conversions.

In the annual report for 1852, the Rev. Mr. Parsons, one of the missionaries, says: "At this place the church is built (it was dedicated by bishop Heber), and here are the mission residences, seminary, and girls' school. But here, alas! is the greatest indifference to the good news of salvation."

By far the most important of the stations of the Church of England mission in Ceylon is that at Cotta, a populous district within a few miles of Colombo. Here the mission commenced its labors in 1829, and a collegiate institute was founded in 1827 for the training of native teachers and assistants. It commenced with ten pupils, and has continued to the present time with success, being resorted to by the Tamils of Jaffna, the Kandians from the hills, and the Singhalese from the low country. In this "Oriental college" there were ten pupils in Greek, Latin, Euclid, Scripture History, etc. A printing-press has been in operation for some years, in operation, which has issued a translation of the Scriptures known as the "Cotta version."

7. Wesleyan Methodist Missions.—The British Conference, stimulated by the earnest appeals of Dr. Coke (q.v.), and by the wishes of Sir A. Johnstone, chief justice of Ceylon, determined in 1818 to organize a mission in Ceylon. Dr. Coke, accompanied by six missionaries, Messrs. William Ault, James Lynch, George Erskine, William Martin Harvard, Thomas Hall Squance, and Benjamin Clough, set sail from Portsmouth on the 8th of December, 1818. Two of the party, Mr. Squance and Mr. Clough, soon acquiesced with the management of the printing-press, which subsequently became the chief instrument in the mission.
The word rendered "chaff" in Isa. v. 24; xxxiii, 11, is שָׁבַע (šavah), and means rather dried grass or hay. In Jer. xxxii, 28, it is צַעֲרָה (tezera), elsewhere "straw." In Exod. v, 12, we read of אֶפֶן (aphen), stubble for straw; so that it is not the same as stubble. It means straw cut into small portions, in which state it was mixed with the mud of which bricks were made to give it consistency. See STRAW. In 1 Kings iv, 28, mention is made of a mixed provender for horses and camels of barley and דַּשָּׁה (dashah), such as the Arabs call ḫaṣ to this day. In Dan. i, 35, the term is the Chaldee _MUT (ur). See THRESHING.

Chaff in the Scriptures is a frequent emblem of abortive wickedness (Isa. i, 4; Matt. iii, 12, etc.). False doctrines are called chaff; they are unproductive, and cannot abide the trial of the word and Spirit of God (Jer. xxiii, 29). See BAPTISM OR FIRE. The carrying away of chaff by the wind is an ordinary scriptural image of the destruction of the wicked, and of their powerlessness to resist God's judgments (Isa. xvii, 13; Hos. xii, 3; Zeph. ii, 2). Chagab. See LOCUST.

Chagigah. See TALMUD.

Chains (represented by several Heb. and Gr. terms). Chains of different metals appear to have been used by the ancients for various purposes, similar to those of modern times.

1. As a Badge of Office.—The gold chain (סֵפֶך, saph), placed about Joseph's neck (Gen. xii, 40), and that promised to Daniel (Dan. v, 7; Matt. ii, 1); חָּזָן (chazan), are instances of the first use (comp. 1 Esdr. iii, 6). In Egypt it was one of the insignia of a judge, who wore a jewelled image of Thmei or Truth attached to it (Wilkinson's Anc. Egypt. ii, 26); it was also worn by the prime minister. In Persia it was considered not only a mark of royal favor (Xenophon, Anab. i, 2, § 57), but a token of investiture (Dan. i. c.; Morier's Second Journey, p. 83). In Egypt xvi, 11, the chain is mentioned as the symbol of sovereignty. The breastplate of the high-priest was in like manner fastened to the ephod with golden chains (Exx. xxix, 16, 21). See ATTIRE.

2. Chains for ornamental purposes (comp. Judith x, 4) were worn by men as well as women in many countries both of Europe (Smith's Dict. of Class. Ant. s. v. Torques) and Asia (Wilkinson, iii, 578), and probably this was the case among the Hebrews (Prov. i, 9). The necklace (טֶפֶך, ŭneak) consisted of pearls, corals, etc., threaded on a string; the beads were called מַחְצָר, machzar, that is, perforated (Cant. i, 10, "chains," where "of gold" is interpolated. Besides...
the necklace, other chains were worn (Judith 4, 4) hanging down as far as the waist, or even lower. Some were adorned with pieces of metal, shaped in the form of the moon, named לָבַע (sharānīm), נְפָרָכה (Sept. ψυκονον, Vulg. lunules; A. V. round tiers like the moon) Isa. iii, 18); a similar ornament, the kisil, still exists in Egypt (Lane’s Modern Egyptians, App. A.). The Midianites adorned the necks of their camels with such (Judg. viii, 21, 26); the Arabs still use a similar ornament (Wellsted, i, 301). To other chains were suspended various trinkets, as scent-bottles, יֶשֶׂנֶה (bottles han-nsē’eh, phials, tablets or houses of the soul) Isa. iii, 20), and mirrors, מַעַסֵּרִים (giltymirrors) Isa. iii, 23). Step-chains, בָּשָׁבָא (beshābā, tinkling ornaments), were attached to the ankle-rings, which shortened the step and produced a mincing gait (Isa. iii, 16, 18). See AKLET; NECKLACE. The particular female ornaments thus rendered in Isa. iii, 19 (יִשֶּׂנֶה, netzphoth, Sept. kisahma, Vulg. torques), signify drops or pendants to earrings or other articles of jewelry. See EARRING.

3. The means adopted for confining prisoners among the Jews were either manacles or fetters of copper or iron, similar to our handcuffs, יֶשֶׂנֶה (neckshita’gam, lit. ṭevo brasses, as though made in halves), fastened on the wrists and ankles, and attached to each other by a chain (Judg. xvi, 21; 2 Sam. iii, 34; 2 Kings xxv, 7; Jer. xxxix, 7). It was a custom among the Romans to fasten a chain to the neck of a light chain to the soldier who was appointed to guard him. One end of it was attached to the right hand of the prisoner, and the other to the left hand of the soldier. This is the chain by which Paul was so often bound, and to which he repeatedly alludes (Acts xxvii, 20; Eph. vi, 19; 2 Tim. i, 16). When the utmost security was desired, the prisoner was attached by two chains to two soldiers, as was the case with Peter (Acts xii, 6; Walch, De vinculis Petri, Jen. 1758). (See Smith’s Dict. of Class. Antiq. a. v. Catena.) See FETTER.

Idols, it appears, were fixed in their shrines with chains (Isa. xi, 19). Pride is emblematically termed a chain which keeps men under its power (Ps. lxxii, 6; comp. 1 Esdr. i, 40; Wisd. xvii, 37; Ecclus. vi, 24, 29).

Chair. See CATHEDRA; SEAT; THRONE.

Chair, CHARLES-PIERRE, a Swiss divine of the Reformed Church, was born at Geneva in January, 1701. In 1728 he became pastor of the French congregation there, and remained on the charge until his death, October 1735. He translated, from the English of Stackhouse, Le Sens littéral de l’Écriture Sainte (La Haye, 1788, 3 vols. 8vo), and also published a commentary on the Bible (La Sainte Bible avec un Comment. littéral, et des Notes choi- nées et tirées de divers auteurs Anglais, 6 vols. 8vo; La Haye, 1742-77; a seventh volume was issued after his death by Dr. Maclaune, with preliminary dissertations, 1790; a work on Biblical Theology (Theol. de l’Écriture Sainte, ou la Science du Salut, 2 vols. 1792); Catéchisme historique et dogmatique (La Haye, 1755; 8vo); and numerous minor works.—Senebier, Histoire Lit. de Genève; Hoeffer, Nouv. Biog. Generale, i, 556.

Chair. See LA CHAISE.

Chajug, JERUSA BEN-DAVID, commonly called CHIDO, and in Arabia Abukariz, Jacky B. Duid el- Fasi el-Kurtabi, and Jackia, a Jewish writer who is regarded by Jewish critics as the chief of Hebrew grammarians (שִׁדּוֹ) (תְּאֹלוֹ), was born in Fes about A.D. 1020-1040, and hence is sometimes also called Jhuda Fasi (טונד טוני). He was the first who recognised that the stem words of the Hebrew consist of three consonants, as up to his time some of the chief etymologists and expositors, e. g. Saadia Gaon, Menahem, Ibn-Saruk, maintained that there were bi-literary and even monoliteral stems. He, too, was the first who discovered the true relation of the quiescent letters, forming the mnemonic יונק, and their changes. It was he, too, who arranged the Heb. verbs according to their conjugations, distributing them under two heads: 1. קא. light, not burdened with any forma- tive additions; and, 2. כבש, heavy, being burdened with formative additions. Some of his works are cited in Cioc. vi. 1; Kud.; 2. Napk.; 3. Hitpapp; 4. Hiphap; 5. Pual and Hophal; and, 6. Pic. This arrangement has been substantially adopted by all grammarians, and is exhibited in all the regular paradigms of the verb given by Gesenius, Ewald, and all modern linguists in their Hebrew grammars. These discoveries and scientific principles of Chajug are considerably treated in three books. The first is called יונק אֲשֶׁר יונק by ierr, and treats chiefly of the quiescent letters, in three sections. The second book is called יונק אֲשֶׁר יונק by ierr, and treats of verbs whose second and third radicals are alike—Agin doubled. The third book is called יונק אֲשֶׁר יונק, and treats of the vowel points and accents. Originally written in Arabic, these marvellous grammatical discoveries were at first inaccessible and unknown to the German-French interpreters, but they exercised so extraordinary an influence upon the Spanish school of interpreters, that it is generally supposed that they were translated into Hebrew by Aben-Ezra. They have been published by Leop. Duke, of Frankfort a. M. 1844, 8vo, who has given a sketch of the life and linguistic discoveries of Chajug in his Libraturhistorische Mittheilungen, etc. (Stuttg. 1844).

Chalalim (חַלְם), a place in Palestine mentioned by the Talmudists (Baba Bathra, 17) as being near Nave’a, in Galilee, in East (p. 706); also by Schwartz (Palest. p. 290) as the same with the modern Sunamim. See Sunamim.

Chaldæon, a city of Bithynia. It was the seat of one of the so-called General Councils of the Church, held A.D. 461 (the fourth ecumenical council), which was called by the emperor Marcianus, at the request of the bishops (especially of Leo I), to put down the Eutychian and Nestorian heresies. The emperor sent 12 bishops and deputies, all Eastern except four legates sent by Leo I from Rome. The sessions began Oct. 8, 451, and ended Oct. 31. As the two parties in the Council were roused to the hilt of pitch of passion, the proceedings, especially during the early sessions, were very tumultuous, until the lay commissioners and senators had to urge the bishops to keep order, saying that such iñiqos διώκοντοι (vulgar outcries) were disgraceful. (See the account from Mansi, cited by Stanley, Eastern Churches, i, p. 165.)

At the first session (October 8, 451) the Council assembled in the Church of St. Euphemia; in the centre sat the officers of the emperor; at their left, or on the epistle side, sat the bishops of Constantinople, Antioch, Cæsarea in Cappadocia, and of the other Eastern dioceses, and Pontus, Asia, and Thrace, together with the four legates; on the other side were Dioscorus, Juvenal, Theodassius of Cæsarea, and the other bishops of Egypt, Paphlagonia, and Illyria, most of whom had been present in the pseudo-council of Ephesus. In the midst were the Holy Gospels, placed upon a raised seat. When they had taken their seats, the legates of the pope demanded that Dioscorus should withdraw from the assembly, accusing him of his scandalous conduct at Ephesus, and declaring that otherwise they would depart. Then the imperial officers ordered him
to withdraw from the Council, and to take his seat among the accused. The acts of the so-called "Robber Council" of Ephesus (q. v.) were discussed and condemned, and Diocletian was left with only twelve bishops to stand by him. The Eutychian heresy, that in our Lord we were two natures before his incarnation, and but one afterwards, was anathematized. The majority of the assembled bishops then proceeded to anathematize Diocletian himself, and demanded that he, together with Justinian of Jerusalem, Thalassium of Caesarea, Eusebius of Cup, and Eusebius of Berytus, and Basil of Seleucia, who had presided at the Council, should be deposed from the episcopate. See Diocletian.

At the second session (Oct. 10), the following exposition of faith, substantially taken from a letter of Leo to Flavianus, was approved, and its opponents anathematized: "The divine nature and the human nature, each remaining perfect, have been united in one person, to the intent that the same Mediator might die, being yet immortal and impassible. . . . Neither nature is altered by the other; he who is truly God is also truly man. . . . The Word and the flesh preserve their proper functions. His capture proved equally the verity of the two natures. He is God, since it is written, 'In the beginning was the Word, and the Word was God.' He is also man, since it is written, 'The Word was made flesh, and dwelt among us.' As man, he was tempted by the devil; as God, he is exalted above angels. As man, he went under the tomb of Lazarus; as God, he raised him from the dead. As man, he pleased to the cross; as God, he makes all nature tremble at his death. It is by reason of the unity of person that we say that the Son of Man came down from heaven, and that the Son of God was crucified and buried, although he was so only . . . as his human nature. At the third session the deposition of Diocletian was pronounced irreconcilable, and soon after he was banished to Gangra, in Paphlagonia, where, in the course of three years, he died.

In the fifth session the following formula of faith on the question at issue was adopted: "We confess, and with one accord teach one and the same Son, our Lord Jesus Christ, perfect in the divinity, perfect in the humanity, truly God and truly man, consisting of a reasonable soul and body; consubstantial with the Father according to the Godhead, and consubstantial with us according to the manhood, all things being alike in us, sin only excepted; who was begotten of the Father before all ages, according to the Godhead; and in the last day, the same was born according to the manhood, of Mary the Virgin, mother of God, for us and for our salvation; who is to be acknowledged one and the same Son, the Son of God, the Lord, the only begotten in two natures, without mixture, change, division, or separation; the difference of natures not being removed by their union, but rather the propriety of each nature being preserved and concurring in one person and in one incarnate, so that he is not divided or separated into two persons, but the only Son, God and Lord, Jesus Christ, one and the same person." At the later sessions (ix-xv) a number of questions of order, supremacy, discipline, etc. were settled. But by far the most important was the 28th canon, sees. xv, by which the patriarch of Constantinople was placed on equality of authority with the bishop of Rome, saving only to the latter priority of honor. The Roman delegates protested against this and, after its adoption, Leo constantly opposed it, upon the plea that it contradicted the sixth of Nicæa, which assigned the second place in dignity to Alexandria; however, in spite of his opposition and that of his successors, the canon remained and was executed. See SUPREMACY OF THE POPE.

The acts of this Council in Greek, with the exception of the anathemas, are lost. See Evagrius, Hist. Eccl.
CHALCOL

107 CLHADÆA

7, 1; War, I, 9, 2; ii, 12, 1) and Strabo (xvi, 2, 16, p. 753, 755) as lying under Mount Lebanon, near Heliopolis; but thought by Beland (Palot. p. 81d) to be different from the Chalde in Syria, placed by the Antesine Itinerary between Beroa (Senna or Bara) and Androta. Modern travellers (Thomson, in the Bibliotheca Sacra, 1848, p. 761; Seetzen, Reise, i, 262; Porter, i, 14-16; Robinson, Lat. Bibl. Res. p. 497, 498) have sought its site in the considerable ruins near Medjez Anjar, 8 hours S. of Zalakh (Van de Velde, Memorie, p. 805).

Chalcol' (Heb. Kalkol, חֲרֵךְ, perhaps sustenta- mance; Sept. Χαληχαί v. r. Χαλήχα, Josephus Χαληχίς, Ast. viii, 2, 6), one of the four sons of Mahal, who were famous for their wisdom before the time of Solomon (1 Kings iv, 31). B.C. ante 1010. In 1 Chron. ii, 6 (where the name is Anglicized “Calcol”) he and his brothers are enumerated as the sons of Zerah, the son of Judah, perhaps by an error for the name Hamul preceding, which may be a transposition for Mahal. See Darda.

Chal'da's (Jer. i, 10; ii, 24, 85; Ezek. xvi, 29; xxiii, 16; Gr. Χαλδαίαν for the Heb. חֲרֵךְ, elsewhere “Chaldeans”) is properly only the southern portion of Babylonia. It is used, however, in our version for the Hebrew ethnic appellative Kasdim or “Chaldees,” under which term the inhabitants of the entire country is designated, and it will therefore here be taken in this extended sense. The origin of the term is very uncertain. Its most approved etymology is that of the Talmudic sages, who consider it in minuscule shape that Kadmi or Kaldi, not Kasdim, is the native form (Rawlinson, Herod. i, 533, note). The Chaldeans are mentioned in the cuneiform inscriptions (q.v.). In Persian cuneiform the name of Babylon or Babylonia is written very differently:

\[\text{B ab i r u sh}\]

The Babylonian cuneiform writes it in many ways, but none have any resemblance to Kasdim or Kadmi. See Babylon.

1. Extent and Boundaries.—The tract of country viewed in Scripture as the land of the Chaldeans is that vast alluvial plain which has been formed by the deposits of the Euphrates and the Tigris—at least so far as it lies to the west of the latter stream. The country to the east is Elam or Susiana; but the entire tract between the rivers, as well as the low country on the Arabian side of the Euphrates, which is cultivable by irrigation from that stream, must be considered as comprised within the Chaldeans of which Nebuchadnezzar was king. This extraordinary expanse of land, covering a distance, in expression, of the long and the short of the expected distance of 400 miles along the course of the rivers, and is on the average about 100 miles in width. A line drawn from the junction of the river Khabur with the Euphrates to that of the Lesser Zab with the Tigris may be considered as marking its northern limit; the southern boundary of the city of Ctesiphon is the line of the Tigris itself; the southern the Persian Gulf; on the west its boundary is somewhat ill defined, and in fact would vary according to the degree of skill and industry devoted to the regulation of the waters and the extension of works for irrigation. In the most flourishing times of the Chaldean empire the watercourses had been brought to the extreme limit of the alluvium, a canal having been cut along the edge of the tertiary formation on the Arabian side throughout its entire extent, running at an average distance from the Euphrates of about 80 miles.

2. General Character of the Country.—The general aspect of the country is thus described by a modern traveller, who writes from the condition of things at this time, the appearance which it must have presented in ancient times. “In former days,” he says, “the vast plains of Babylon were furnished by a complicated system of canals and water-courses, which spread over the surface of the country like a net-work. The wants of a teeming population were supplied by a rich soil, not less bountiful than that on the banks of the Egyptian Nile. Like islands rising from a golden sea of waving corn stood frequent groves of palm-trees and pleasant gardens, according to the idler or traveller their grateful and highly valued shade. Crowds of passengers hurried along the dusty roads to and from the busy city. The land was rich in corn and wine. How changed is the aspect of that region at the present day! Long lines of mounds, it is true, mark the courses of those main arteries which formerly diffused life and vegetation among their banks, but their channels are now bereft of moisture and choked with drifted sand; the smaller offshoots are wholly effaced, and the whole countryside is now a desolate waste. The soil is upon her waters,” says the prophet, “and they shall be dried up!” All that remains of that ancient civilization—that glory of kingdoms—‘the praise of the whole earth’—is recognisable in the numerous mouldering heaps of brick and rubbish which overspread the landscape. Instead of the groves and gardens, nothing now meets the eye but an arid waste—the dense population of former times is vanished, and no man dwells there” (Lortuit’s Chaldea, p. 14, 15). The cause of the change is to be found in the neglect of man. “There is no physical reason,” says the same writer elsewhere, “why Babylon should not be as beautiful and as thickly inhabited as in days of yore; a little care and labor bestowed on the ancient canals would again restore the fertility and population which it originally possessed.” The prosperity and fertility of the country depend entirely on the regulation of the waters. Carefully and properly applied and husbanded, they are sufficient to make the entire plain a garden. Left to themselves, they desert the river courses to accumulate in lakes and marshes, leaving large districts waterless, and others most scantily supplied, while they overwork streams formerly under cultivation, which become covered with a forest of reeds, and consequently the summer season is a pestilential misera. This is the present condition of the greater part of Babylonia under Turkish rule; the evil is said to be advancing, and the whole country threatens to become within a short time either marsh or desert.

3. Divisions.—In a country so uniform and so devoid of natural features as this, political divisions could be only accidental or arbitrary. Few are found of any importance. The true Chaldeans, as has been already noticed, is always in the geographers a distinct region, being the portion most southerly from Babylon, lying chiefly (if not solely) on the right bank of the Euphrates (Strabo, xvi, i, § 6; Pliny, v. 26). Babylon above this is separated into two parts, called respectively Amardacia and Auramitis. The former is the name of the central territorial round Babylon itself; the latter is applied to the regions toward the north, where Babylonia borders on Assyria (Ptol. v. 20).

4. Cities.—Babylonia was celebrated all times for the number and magnificence of its cities: Babylon, Erech, and Accad, and Calneh in the land of Shinar, are the first towns mentioned in Scripture (Gen. x, 10). The “vast number of great cities” which the country possessed was noted by Herodotus (i, 178), and the whole region is, in fact, studded with huge mounds, each with a name, on which it has been supposed that the site of a considerable town. The most important of those which have been identified are Borsippa (now Birs-Nimrud), Sippa or Sepharvaim (Mousai), Cutha
(Ibrahim), Calneh (Niffer), Erech (Warka), Ur (Mugheir), Chilimad (Kabradha), Larancha (Senkeresh), Is (Hit), Durara (Akkerka); but of these not fully, and of many others not at all, have the exact sites been determined, as the Accad of Genesis (x, 10); the Teredon of Abydenus (Fragment. 8); Așši, Achara, etc., towns mentioned in the inscriptions. Two of these places—Ur and Borsippa—are of particular note. Of the rest, Erech, Larancha, and Calneh were in early times of the most consequence, while Cutha, Sippa, and Teredon attained their celebrity at a comparatively recent period. (See each name in its place.)
5. Canals.—These constituted one of the most remarkable features of ancient Babylonia. Three principal canals carried off the waters of the Euphrates toward the Tigris, above Babylon. These were, 1. the original canal (or river), which drained the Nineveh plain, which left the Euphrates at Perisbar or Anbar, and followed the line of the modern Saklaweyh canal, passing by Akkeruf, and entering the Tigris a little below Bagdad; 2. the Nahir Ma’ch’s of the Arabs, which branched off at Ridhivaniyah, and ran across to the site of Seleucia; and, 3. the Nahir Kutha, which, starting from the Euphrates near the town of Mosail, passed through Cutha, and fell into the Tigris twenty miles below the site of Seleucia. On the other side of the stream, a large canal, perhaps the most important of all, leaving the Euphrates at Hit, where the alluvial plain commences, skirted the deposit on the west along its entire extent, and fell into the Persian Gulf at the head of the Bubian creek, about twenty miles west of the Shat-el-Arab; while a second main artery (the Pallacora of Arrrian) branched from the Euphrates nearly at Mosail, and ran into a great lake in the neighborhood of Borsipa, whence the land to the southeast was watered by various streams from the sea. Other similar channels numerous branches were carried out, from which further cross cuts were made until at length every field was duly supplied with the precious fluid.

6. Sea of Nedjef, Chaldaean Marshes, etc.—Chaldaea contains one natural feature deserving of special description—the great inland fresh-water sea of Nedjef” (Loftus, p. 45). This sheet of water, which does not owe its origin to the inundations, but is a permanent lake of considerable depth, surrounded by cliffs of a reddish sandstone in places forty feet high, extends in a south-easterly direction a distance of forty miles, from about 31° 30’ N. lat. to 31° 52’ N. lat.; 44° 45’ to 44° 35’ long. Its greatest width is thirty-five miles. It lies thus on the right bank of the Euphrates, from which it is distant (at the nearest point) about twenty miles, and receives from it a certain quantity of water at the time of the inundation, which flows through it, and is carried back to the Euphrates at Samawa by a natural river course known as the Shat-el-Atcham. Above and below the sea of Nedjef, from the Birs-Nimrud to Kufa, and from the south-eastern extremity of the sea to Samawa, extend the famous Chaldaean marshes (Strab. xvi. 1, § 12; Arrian, Esp. A. vii, 22), where Alexander was nearly lost; but they are distinctly distinct from the sea itself, depending on the state of the Hindiyeh canal, and disappearing altogether when that is effectually closed.

7. Productions.—The extraordinary fertility of the Chaldaean soil has been noticed by various writers. It is said to be the only country in the world where wheat grows wild. Baro is noticed this production (Fragm. 1, § 2), and also the spontaneous growth of barley, sesame, ochra, peas, apples, and many kinds of shell fruit. Herodatus declared (i. 195) that grain commonly returned 200-fold to the sower, and occasionally 300-fold. Strabo made nearly the same assertion (vii. 11). Not. xvi. 17) that the wheat was cut twice, and afterwards was good for beasts. The palm was undoubtedly one of the principal objects of cultivation. According to Strabo it furnishes the natives with bread, wine, vinegar, honey, porridge, and rope; with a fuel equal to charcoal, and with a means of fattening cattle and sheep. An ancient poem celebrating the fertility of the country (Strab. xvi. 1, 14). Herodatus says (i. 198) that the whole of the flat country was planted with palms, and Amnumus Marcellinus (xxiv, 8) observes that from the point reached by Julian’s army to the shores of the Persian Gulf was one continuous forest of verdure. At present it is reported that there is no forest to be seen, and even there they do not grow thickly except about the villages on their banks. The soil is rich, but there is little cultivation, the inhabitants subsisting chiefly upon dates. More than half the country is left dry and waste from the want of a proper system of irrigation, while the remaining half is to a great extent covered with marshes, owing to the same neglect. Thus it is at once true that “the sea has come up upon Babylon, and she is covered with the waves thereof” (Jer. ii. 42); that she is made “a possession for the bittern, and pools of water” (Isa. xiv. 28); and also that “a drought is upon her waters, and they are dried up” (Jer. i. 89); that she is “a wilderness, a dry land, and a desert” (ib. 12, 13). (See Loftus’s Chaldaea and Susiana; Layard’s Nin. and Bab. ch. xii-xiv; Rawlinson’s Herodotus, vol. i, Essay ix; and Mr. Taylor’s Paper in the Journal of the Asiatic Society, vol. xv.) See BASSITYA.

8. Inhabitants.—The monuments of Babylonia furnish abundant evidence of the fact that a Hamitic race held possession of that country in the earliest times, and continued to be a powerful element in the population down to a period very little preceding the accession of Nebuchadnezzar. The most ancient historical records found in Babylon, the most curious and scientific documents, are written in a language which belongs to the Alphilian family, presenting affinities with the dialects of Africa on the one hand, and with those of High Asia on the other. The people by whom this language was spoken, whose principal tribe was the Akkad (Akech) of Genesis, x, 10, may be regarded as represented by the Chaldeans on the one hand, and the Greeks, the Kassidim of the Hebrew writers. This race seems to have gradually developed the type of language known as Semitism, which became in course of time the general language of the country; still, however, as a priest-caste, a portion of the Akkad preserved their ancient tongue and formed the learned and scientific Chaldeans of later times (Rawlinson, Herodotus, i, 533). Their language was the language of science in those countries; and the Chaldeans devoted themselves to the study of the sciences, and especially astronomy. See CHALDEAN PHILOSOPHY.

The scientific tables discovered at Nineveh and Tell-el-Amarna in this dialect. These facts throw new and clear light on the many allusions to the Chaldean wise men in the Bible (Dan. i, 4; ii, 2; iv, 7; Ezek. xxiii, 14). The influence and power of the Chaldeans rapidly increased, so that in the early part of the ninth century B.C. they became the dominant race of Babylonia, and gave their name to the mountains of Armenia. (2 Chron. xxxvi. 17; Dan. iv, 1). During the eighth century B.C. a number of them emigrated from their native plains, and settled in the mountains of Armenia. This is possibly the true explanation of the occurrence of the Chaldeans in that region, as noted by many ancient writers (Xenoph. Anab. iv, 3, 4; Strabo, xii, Steph. Byz., s. v. Xalacria); and this, too, shows why Gesenius and other recent authors were led to believe that the Chaldeans of Babylonia were a colony from the northern mountains, settled in that country by one of the later Assyrian monarchs. (See Rawlinson, First Great Monarchies, c. 404 B.C.; Ditmar, Ritterland K. Challäer, Berlin, 1786; Palmblad, De rebus Babylonicis, Upsal, 1829; Bochart, Geography.) See CHALDEANS.

Chaldean. See CHALDEANS; CHALDEES.

Chaldean Philosophy. Ritter (History of Philosophy, bk. ii, ch. i) remarks that he passes over the philosophy of the Chaldeans without special notice; both because the fragments of Manetho, Berosus, and Sanchoniathon are not free from suspicion as to genuineness and antiquity, and also because the ideas and conceptions prevailing in that portion of the Alphilian family of literature, in Kitto’s Cyclopaedia (s. v. Philosophy), remarks, nevertheless, that the subject is “of interest to the student of the Bible, in con-
sequence of the general and decided influence which the Babylonian philosophy exerted on the opinions and manner of thinking of the Jews during their captivity in Babylon (Roeh Haskanah, p. 66). See Captivity. The system of opinion and manner of thinking which the captives met with in Babylon was made up of elements whose birthplace was in various parts of the East, and which appear to have found in Babylon a not ungenial soil, where they grew and coalesced into one system. Of these elements the two principal were the Chaldean and the Medo-Persian or Zoroastrian.

The former of these, which alone we shall here consider, was a system cultivated in the province of astronomy (q. v.), a science very early pursued under the clear sky of Babylonia, although generally corrupted with a mixture of astrology (q. v.). Light naturally came to be regarded as a divine principle, and the heavenly bodies were worshiped as the residence or incarnation of Deity. This soon diverged into polytheism, as the celestial luminaries were assigned to separate powers of Nature. See Idolatry. An observation of the astronomical phenomena led not only to the formation of horoscopes with a view to divining the future, but it likewise induced a belief in certain intermediate powers, which were supposed (as by many pagans) to affect the course of the heavenly bodies together, and whose presence was made to fill the void between them and the invisible Being at the centre. This arose the emanation theory, which figures so conspicuously in the Cabalistic (q. v.) and in Gnosticism (q. v.). These intermediate or derived existences were invested with intelligence, and formed again a link between spirit and matter, giving rise to a whole world of demons (q. v.), of various characters and capacities. To guard against the malignant influence of some of these, tallismans (q. v.) were used, and the arts of sorcery (q. v.) were resorted to. See Chaldeans.

The fragments of Berosus, preserved by Eusebius and Josephus, and to be found in Scaliger (De Emendat. Temp.), and more fully in Fabricius (Hist. Gr. xiv. 170), afford some information on the subject of Chaldean philosophy. Berosus was a priest of the god Bala, at Babylon, in the reign of Alexander the Great. The chief and most noted works of the Jewish Rabbins may also be advantageously consulted, together with the following authors: Euseb. Prepar. Evang. ix. 10; Philo, De Mijg. M.; Selden, De Deis Syriis, Proleg. 8; Stanley’s History of Oriental Philosophy; Rosenroth, Caballes damudicae (1. 1. Solis, 1827, t. 2); Liber Joh. resumus (Francois 1834); Kleuker, Emansations-lehre den Cabalisten (Riga, 1726); Molitor, Philosophie der Geschichte (1827–8); Hartmann, Verbindung des A. T. mit dem Neuen (1831); Fritz, Ketzer-Lexicon (1838); Brucker, Hist. Crit. Phil.; Nork, Vergleichende Mythologie (Lpz. 1830). See Magi. Chaldean Christians, a name by which the Nestorians (q. v.) call themselves. More commonly it is used to designate that portion of the Nestorians who have acknowledged the supremacy of the Pope.

The writings of Ibas, bishop of Odessa, and the activity of the school of Odessa disseminated the Nestorian doctrines in Mesopotamia, Assyria, Persia, and other Eastern countries in the 5th century. The adherents of these doctrines received from the orthodox party the name of Nestorians, while they chose for themselves that of Chaldean Christians. Thus separated from cooperation with the Western Church, and theologically distinct from the schism of the Greek Church, they formed a separate organization, and established an ecclesiastical system of their own, having at its head Ctesiphon, patriarch of Seleucia. After the Council of Florence (q. v.) had to some extent reunited the Greek and Latin Churches, a large number of Nestorians returned to them. Timothaeus, archbishop of Ctesiphon, was received by the emperor Constantine V, by the patriarch of Jerusalem, and by the patriarch of Alexandria, and was consecrated in the church of Gaza. See Chaldean Christians. The Greek and Latin Churches, however, did not receive the Nestorian Church as fully integrated in their communion, and the same restrictions were applied to it which had been applied to the Roman Catholic Church in virtue of a bull of Pope Eugene IV (1446), which bull also decided that the name of Nestorians should no longer be applied to the Chaldean Christians. After this, partial accessions of Nestorians to the Roman Catholic Church took place. In 1618, and from time to time, the union of the Nestorians with the Roman Church was carried on, and in 1555, the patriarch of the Nestorians of Mosul, asked and obtained the ratification of his election by the Pope. This union was continued by the patriarch Elias, who, in 1618, assembled a synod at Amid, where the patriarch, together with five bishops, was confirmed in the tenets of the Roman Catholic Confession of Faith, and declared in favor of union with Rome. Yet separations occurred from time to time. Under Pope Innocent IX a large number of Nestorians joined the Roman Church, and he gave them, as well as to all Chaldean Christians, a patriarch in the person of Joseph I, who made his residence at Amid, usually called Diarbekir. From this time forward the Roman Catholics of Chaldeas have had a patriarch of their own, bearing the title of patriarch of Babylon, and residing at Bagdad. They also preserve a ritual of their own in the Chaldean language. Besides the patriarch, the Chaldeans have a different kind of archbishop, called the head of the Chaldean church (q. v.) (tetarchs or patriarchal bishops), who, with five other bishops, are in the East (chiefly in Persia and Armenia) and four bishops in Turkey, and two in Persia. This sect is accessible through the missions of the A. B. C. F. M. at Oromiah and Diarbekir, but principally through the station at Mosul, where some of the members of the Protestant Church are converted Chaldeans. Recently, through papal intrigues with the pasha, the large Chaldean village of Telkeif has been closed to missionary efforts, and even Protestants who own property there have been forbidden to visit it. But such a state of things cannot last, and we may hope soon to hear that such measures have been redone, as they always do, to the furtherance of the truth! (Newcomb, Cyclop. of Missions, 248.)—Wetzer und Welte, Kirchenlex. n. Schem, Year-book for 1859, p. 38; Assemani, Biblioth. Orient. t. i, p. 203–251, 543–544; ii, p. 457; iii, part ii, p. 412; Guriel (a Chaldean priest), Elementa lingvis Chaldaicae quibus occedit series Patrologiachalous. Chaldeorum (Louvain 1847–9); Aneoty of the Propagation of the Faith (1815); Perkins, Eighteenth Annual Report of the Nestorian Christians (N. Y. 1848). See Nestorians. Chaldean Language is the name by which the elder or Eastern form of the Aramaic idiom is generally distinguished (see the Intro. to Winer’s Chalda. Gramm. 2d ed. tr. by Prof. Hackett, N. Y. 1861, p. 9 sq.). Whether there is any authority in the Old Testament for applying this designation to the Aramaic language is a question which depends on the sense in which the expression “tongue of the Chaldees,” in Dan. i, 4, is to be taken, and which involves such important historical points that it does not come within the scope of this article (see Hinnom and Aramea des Donzel, p. 810). Another preliminary question is, whether there is any propriety in the common definition of the Chaldean language as the Eastern, and especially as the Babylonian dialect—or, indeed, even as a dialect at all—of the Aramaic. Hufschl sternly maintains the necessity of these qualifications in the Theologische Studien for 1880, p. 290 sq. Avoiding these debatable points, however, we apply the name Chaldean language to that Aramaic idiom which, in our present text of the Old Testament, is employed in the passages of Daniel, from ii, 4, to vii, 28; in Ezra, from iv, 6, to vi, 18, and vii, from 12 to 26; in the books of Esra, Nehem. and Ben. xxxix. 27, xxxvi. 11, in which several translations and paraphrases of portions of the Old Testament, the so-called Targums, are written. The language is thus distinguished, as to the nature of the documents in which it is employed, into
Biblical and Targumical Chaldees. Winer, however, regarding linguistic characteristics chiefly, distinguishes three grades of its purity: the language, as found in the Targum of Onkelos, as most free from Hebrewisms; the Biblical Chaldean, which, as it frequently intermixes certain peculiarities of Hebrew (as the מ of the article, the plural ending יוא, the dual form, and the conjunction Hosaph), ranks below the first class; and the idiom of the other Targums, which, though not always with foreign words, but possesses several peculiar formations bordering on those of the Syriac and the Biblical Hebrew. See Targum. The language of the Talmud is also usually called Chaldean; and, if we except the Mishnah (which is written in an idiom not so very far removed from Biblical Hebrew, with a tincture of Chaldean), it is true of the Gemaras that they are written in such very corrupt Chaldean that their idiom is more properly designated as the Talmudical dialect. See TALMUD.

Under the article ARAMÆAN LANGUAGE have been noticed those several features which the Chaldean possesses in common with the Syriac; and it now remains to define those, certainly not marked, characteristics by which it is distinguished from it. These are—the prevalent use of the Hebrew ש as a sound with a guttural. Chaldean has this avoidance of diphthongs and of isotic letters; the use of dagesh-forte; the regular accentuation of the last syllable; and the formation of the infinitives, except in פל, without the preformative מ. The mode of writing is also much less defective than in Syriac.

Writers auxiliary to the study of the Chaldean:

Graeco: Cellarius, Grammat. Ling. Chald. (Cisam, 1684); Opitz, Chaldæusis Targum. Talmud. Robbin. (Kiel, 1696); Holgermaier, Chaldæonis Biblii fundamenta (Tub. 1770); J. D. Michaelis, Grammatica Chaldaica (Göttingen, 1771); H. Axen, Anno israelini zum Chald. (Lemgo, 1787); Schroeder, Instruct. ad Chaldæam. Biblicum (1787, 1810); Wittich, Grundzüge d. bl. u. torp. Chaldæismus (Leipzig, 1824); Hirschl, De Chaldæis biblii ori. et auct. criticæ (Lips. 1830); Dietrich, De sermo Chaldæi propriitate; Longfield, Introduction to Chaldee (London 1839); Riggs, Manual of Chald. Language (N. Y. 1856); Gariel (a Chaldean priest), Elementa Semiticæ, (Rome, 1837); Lehmann, Revidirte Übersetzung der aram. Idioms. (Leipzig, 1856). The best manual is Winer's Grammaticæ (Lpz. 1824), 2d ed. translated by Professor Hackett, Grammar of the Chaldee Language as contained in the Bible and Targums (N. Y. 1855). The most complete Lexicon is Buxtorf's Lexicon Chaldaico-latinum-russinicum (Basel, 1659); a new edition, in 8vo, with G. H. Lepsius in the editors, (Lpz. 1846, sq., 4to). There are also Landau's Rabbinisch-aramäisch-deutsch-österreichischer Wörterbuch. (Prag, 1819-24), new ed. by Spenerling (Lemgo, 1857); Levy, Chald. Wörterbuch (Lpz. 1866, sq.). The Biblical Chaldee words are contained in the Hebrew lexicons. CHRISTIANITIES have been edited by Bauer (Norhni, 1792); J. Jahn (Wien, 1800); Grimm (Lemgo, 1801); Winer, Chald. Lexicon a. d. Targumim, m. Anmerk. u. Wortregister (Leipzig, 1823); P. Ewald, 'Ueber die kirchlichen u. m. Lehnwörter (2 vols., 1827); Petermann (Borol, 1840). The Biblical Chaldean is contained in the Heb. Bible.

Chaldee Paraphrases. See TARGUMS.

Chal'dees (or "Chaldeans," Hebrew <a title="Hebrew word in the Old Testament" href="https://www.biblegateway.com/isv/bible/1781/001#p=1781/1731">קדמ</a> in Sept. Χαλδαιοι, Chal. קדמ, "Chaldee" or קדמ, "Chaldean") appear in Scripture, until the time of the Captivity, as the people of the country which has Babylon for its capital. ② The Chaldees (2 Esdr. ii, 12; Isa. xlix, 19; xlix, 13; comp. Isa. xxxii, 14; Jer. xxxi, 4; xxxii, 2 sqq.; Ezek. xxviii, 15, etc.), and which is itself termed Shinar (ניא), but in the book of Daniel, while this meaning is still found (v. 30, and ix, 1), a new sense shows itself. The Chaldeans are there classed with the magicians and astronomers, and evidently form a sort of priest class, who have a peculiar "tongue" and "learning" (i. 4), and are consulted by the king on religious subjects.

The same word is variously applied to personages of no regular or recognized rank, or to the non-regular, the non-professional, the non-ordained. In this view, however, is joined another, namely, that the Chaldeans are the inhabitants of a particular part of Babylonia, viz. the country bordering on the Persian Gulf and on Arabia (Strab. xvi, 1, § 6; Ptol. v, 20, 3). See BABYLONIA.

1. It appears that the Chaldeans (Kalda or Kaldi) were in the earliest times merely one of the many Cushiite tribes inhabiting the great alluvial plain known afterwards as Chaldea or Babylon. Their special seat was probably that southern portion of the country which is found to have so late retained the name of Chaldea. Here was Ur of the Chaldees, the modern Warka, which lies some 30 miles east of Borsippa, near its junction with the Shat el-Hilê. Hence would readily come those "three bands of Chaldeans" who were instruments, simultaneously with the Salsams, in the affliction of Job (1, 15-17). In process of time, as the Kaldi grew in power, their name gradually prevailed over that of the others, until all the rest of the country, and by the era of the Jewish Captivity it had begun to be used generally for all the inhabitants of Babylonia. We may suspect that when the name is applied by Berosus to the dynasties which preceded the Assyrian, it is by way of protest. The dynasty of Nabopolassar, however, was (it is probable) really Chaldean, and this greatly helped to establish the wider use of the appellation. It had thus come by this time to have two senses, both ethnic; in the one it was the special appellation of a particular race, to whom it had belonged from the remotest times; in the other it designated the nation at large in which this race was predominant.—Smith, a. v. Probably it was a branch of the same people that are spoken of in Greek writers as an uncultivated tribe of mountain-dwellers, on the Carduchian mountains, in the neighborhood of Armenia, whom Xenophon describes as brave and rich and joyous (Cyrop. i, 1; Anab. iv, 8, 7, 8, 9, 20). In Hephthalites, the Chaldean was the corresponding term. The circumstances, moreover, that a Semitic dialect is found to have prevailed in Babylon, corroborates the idea that the Chaldeans were of a mixed character. See CHALDEA.

2. The kingdom of the Chaldees is found among the four "thrones" spoken of by Daniel (vii, 6 sq.), and is set forth under the symbol of a lion having eagles' wings. The government was despotic, and the will of the monarch, who bore the title of "king of kings" (Dan. ii, 87), was supreme law, as may be seen in Dan. iii, 12; xiv, 28. The kings lived inaccessible to their subjects in a well-guarded palace, denominated, as with the ancient Persians (Xenoph. Cyrop. i), "the house of the king," or "king's house" (compared with Esther xii, 19, 21, and iii, 7). The number of court and state servants was not small; in Dan. vi, 1, Darius is said to have set over the whole kingdom no fewer than "a hundred and twenty princes." The chief officers appear to have been a sort of "mayor of the palace," or prime minister, to whom was given the office of "the chief governor" (Dan. ii, 49), "a master of the eunuchs" (Dan. i, 8), "a captain of the king's guard" (Dan. ii, 14), and "a master of the magicians," or president of the magi (Dan. iv, 9). Distinct, probably, from the foregoing, was the class termed (Dan. iii, 22, 27) "the king's counsellors," who seem to have been a kind of prime minister, or even "cabinet," for advising the monarch and governing the kingdom. The entire empire was divided into several provinces (Dan. ii, 48; iii, 1), presided
over by officers of various ranks. An enumeration of several kinds may be found in Dan. iii, 2, 3. The head officers, who united in themselves the highest civil and military power, were denominated "rulers" (Jer. ii, 23, 25, 57), or "princes" (Dan. vi, 2); those who resided over single provinces or districts bore the title of "governors" (Hagg. i, 1; ii, 2; in Chald. Matt.). The administration of criminal justice was rigorous and cruel, which being substituted for law, and human life and human suffering being totally disregarded. Nebuchadnezzar (Dan. ii, 5) declares to the college of the magi: "If ye will not make known unto me the dream, with the interpretation thereof, ye shall be cut in pieces, and your houses shall be made a dung-hill" (see also Dan. iii, 19; vi, 5; Jer. xxii. 22). The religion of the Chaldeans was, as with the ancient Arameans and Syrians, the worship of the heavenly bodies; the planets Jupiter, Mercury, and Venus were honored as Bel, Nebo, and Meni, besides Saturn and Mars (Genesius, Jes. ii, 382 sqq.). The language spoken in Babylon was what is designated Chaldee, which is Semitic in its origin, belonging to the Arabic branch. See Chaldean Language.

8. That the Kalád proper, however, were a Cushite race, is proved by the remains of their language, which closely resembles the Galla or ancient language of Ethiopia. Now it appears by the inscriptions that while both in Assyria and in later Babylon the Semitic type of speech prevailed for all purposes, the ancient Cushite dialect was retained, as a learned language, for scientific and religious literature. This is no doubt the "learning" and the "tongue" to which reference is made in the book of Daniel (1, 4). It became gradually inaccessible to the great mass of the people, who were Semitized by means (chiefly) of Assyrian influence. But it was the Chaldean language, in the old Chaldean or Cushite language. Hence all who studied it, whatever their origin or race, were, on account of their knowledge, termed Chaldeans. In this sense Daniel himself, the "master of the Chaldeans" (Dan. vi, 13), would no doubt have been reckoned among them; and so we find Seleucus, a Greek, called a Chaldean by Strabo (xvi, i, § 6). It may be doubted whether the Chaldeans at any time were all priests, though no doubt priests were required to be Chaldeans. They were really the learned class, who by their acquaintance with the language of science had become degenerates. They were priests, magicians, or astronomers, as their preference for one or other of those occupations inclined them; and in the last of the three capacities they probably effected discoveries of great importance.

According to Strabo, who well distinguishes (xvi, i, § 6) between the learned Chaldeans and the mere race descended from the ancient Kalád, which continued to predominate in the country bordering upon Arabia and the Gulf, there were these chief seats of Chaldean learning, Borsippa, and Ur or Orchose. To these we may add from Pliny (H. N. vi, 26) two others, Babylon, and Sopharavim. These seats (it would appear) congregated into bodies, forming what we may perhaps call universities, and pursuing the studies in which they engaged together. They probably mixed up to some extent astrology with their astronomy, even in the earlier times, but they certainly made great advances in astronomical science, to which their contact with the transparent atmosphere, and regular horizon specially invited them. The observations, covering a space of 1908 years, which Callisthenes sent from Aristotle from Babylon (Simplic. ad Arist. de Cal. ii, p. 128), indicate at once the antiquity of such knowledge in the country, and the care with which it had been preserved; for many learned classes in later times they seem certainly to have degenerated into mere fortune-tellers (Cicero, de Div. i, 1; Aul. Gell. i, 9; Juv. vi, 552; x, 94, eto.); but this protract is not justly levelled against the Chaldeans of the empire, and indeed it was but partially deserved so late as the reign of Augustus (see Strabo, xvi, i, § 6). Josephus, however, uses the word in this sense (War, ii, 7, 88).

Upon the walls of the Assyrian palaces are representations of various magi, all distinguished by a peculiarity of dress. It is possible that the elaborations of the so-called Botta, pl. xlix and pl. xciv, that may be particularly mentioned in the diviner, and probably of the Chaldean race, for his person is much thinner, and his features are more delicate than are those of the other attendants of the court, indicating a different order of occupations, and an exemption from the kudr and more active employment of life. See Diviner.

Challice (Lat. calix), the cup in which the wine of the Eucharist is administered. At first, when the Christians were few, the cups were of common materials; but when they grew rich, the cups were of the most costly materials they could afford, such as gold, sardonyx, silver, and gold. The chalices are of two kinds, the greater, containing a large quantity of wine, and the less, called ministeriales, because the priests deliver them to the people to be drunk out of them. —Binyon, Orig. Eccles. bk. viii, ch. vi, § 21; Doughton, de Coel. Euchar. Vet. (Helmst. 1725); Siegel, Alterthumer, i, 61.

Chalk. The Heb. נ"ב, gir, thus rendered in Isa. xxvii, 9, properly denotes limon. To make the stones of the Hebrew altars like lime-stones is to crumble and destroy them. See Lime.

Challilah. See Talmud.

Challamish. See Flint.

Challamuth. See Persia.

Challenge. See Single Combat.

Challoner, Richard, an English Romanist, was born at Lewes, Sussex, Sept. 29, 1691. His parents were Protestants, but he was led over to Rome by his tutor, Mr. Gother, a Romish chaplain at Warworth, Northamptonshire. In 1704 he went to the English college in the University of Douay, where he was appointed professor of poetry, afterwards of rhetoric, in 1718 of philosophy, and in 1718 of divinity. In 1720 he became vice-president of his college, and ten years afterwards went on a mission to England. He now commenced a series of controversial works, among which was a reply to Coynes Middleton's Letter from Rome. In 1741 he was made titular bishop of London and Salisbury, and vicar apostolic. He was accused of acting against the anti-papal law of William III, but was acquitted. In 1760 he was again in danger from Lord George Gordon's riots. He died in 1761. See Barnard, Life of Richard Challoner (Lond. 1784, 8vo). Among his writings are, 1. The Catholic Christian Instructed in the Sacraments, Sacraments, and Ceremonies of the Church (against Middleton's Conformity between Popery and Papism).—2. Britannia Sancta Memoirs of British Saints, 1745, 2 vols. 4to.—3. A Catechism against Methodism, etc.—Gorton, Biog. Diction. xiv, v; Allibone, Diction. of Authors, i, 861.

Chalmers, Thomas, D.D., LL.D., eminent alike
as preacher, philanthropist, and philosopher, was born in
Anstruther, in Fifehire, Scotland, March 17, 1780. He was sent at an early age to the ancient University of St. Andrew's. He devoted himself chiefly to ph
cisical science, especially to astronomy, in which he be
came a proficient. In May, 1803, he was appointed
minister of Kilmany, in Fife. During his first y
years he was more busy than usual in his scientific
pursuits, and published his first impor
ant work, the Inquiry into the Extent and Stability of
National Resources, in which two points are especially
prominent—an intense dislike of the spirit of trade, and a burning military ardor. About 1809 he was engaged in the Dictionnaire Science and his article on
Edinburgh Encyclopedia. In prosecuting the studies
necessary for this article, he began to perceive that
there was something in Christianity which he had
never yet comprehended. The reflections to which a
severe illness gave rise completed his "conversion,
and on his recovery he began to confine publicly his
previous blindness, and to preach Christ crucified.
In 1815 he was invited by the town council of Glas
go to take charge of the Tron Church and parish in that
city. It was here, perhaps, that the highest triumphs of
his eloquence were achieved. In 1828 he was trans
ferred to the chair of moral philosophy in the Univer
sity of St. Andrews; and in 1830, when he had before
presented a beggary account of empty
benches, was soon crowded with classes of enthusiastic
students. In 1830 he was appointed to the chair of
theology in the College of Edinburgh—the summit of
ecclesiastical elevation and influence in the National
Establishment. In this post he continued to labor un
til the disruption of the Establishment. See Free
CHURCH OF SCOTLAND. In May, 1843, the pride
and power of the ancient Church—four hundred ministers,
with Chalmers at their head—departed from her, and
organized the first "General Assembly of the Free
Church of Scotland," over which he presided. With
the stupendous exertions that were then put forth to
direct churches, manse, school-houses, and colleges;
to send missions to Jews and heathen, and to set on
foot all the machinery of an efficient Church; with
the amazing labors of Chalmers, who travelled over
the length and breadth of Scotland, breathing his own
burning words, like a flaming wave, seeming, like
the eagle, to have renewed his youth; and with the
wonderful success that Crowned these exertions, we
cannot be detained without exceeding our limits.
Suf
face to say that, in a great measure, by the infusion
of his own untiring energy into every class, rank, and
age, the ancient Church was thrown into a new
state, like Aladdin's palace, as it was in a single
night, and the world stood amazed at the unparalleled
spectacle." Chalmers was appointed principal and
professor of theology in the Free Church College, in
which post he continued till his death. Buined with
his professorship, with the preparation of his Institutes
of Theology and his Daily Scripture Readings he has yet
found time for varied works of benevolence and phi
lanthropy. On Sunday night, May 30, 1847, he retired
to his chamber apparently in his ordinary health,
and was found dead in his bed next morning.
In analyzing the "intellectual character of Dr.
Chalmers we find but two prominent peculiarities.
The first is the large development of the perceptive
faculties. It was this peculiarity that directed his
mind to natural science, and fitted him to excel in
those departments that demanded the exercise of the
perceptive powers; that determined his thoughts to
the study of the organic, the vegetable, the animal,
the physical, the moral, the political; etc., etc.,
that furnished him with the exuberance of illustration
that adorns his discourses, and led him generally to
reason by analogy rather than on abstract principles
or by metaphysical deductions. The other prominent
fact in his intellectual structure was imagination. He
did not look at a subject in the cold, dry light of pure
intellection, but in the warm and vivid light of a po
etical fancy. The "body of divinity," or ethics, which
in the hands of other analysts became a skeleton of
rattling bones, by his plastic touch was transformed
into an image of living, breathing beauty, warm and
bright with a glorious life. The abstractions of cold
er and more logical minds were to him concrete,
embodied, and he presented them in a shape in which
we critically find much to condemn. There is an ut
ter disregard of all the laws of style and language.
The sentences are long, involved, and tangled. The
veriest colloquialisms, the most unauthorized idioms,
and in some cases even an approach to vulgarisms, ap
pear with their fullorate in his "Polity." Upon his
ignificent efforts, he tells his hearers that he does not
expect by such appeals to break the "confounded spell"
that chained them to the world. The most offensive
trait in his style is its endless amplification and repeti
tion" (Moore, cited below).
We cannot assign Chalmers a high rank as an ex
positor of Scripture. His Lectures on Romans,
and still more fully his Posthumous Works, prove that
his excursions into this vast field were short and nar
row in their range.
The Works of Dr. Chalmers are published in a uni
and 12mo). The following are the principal vol
vols.; Christian Evidence, 2 vols.; Moral Philosophy,
1 vol.; Commercial Discourses, 1 vol.; Astronomical
Discourses, 1 vol.; Congregational Sermons, 3 vols.;
Public Sermons, 1 vol.; Tracts and Essays, 1 vol.; Es
seys on Christian Authors, 1 vol.; Christian and Eco
nomic Polity, 3 vols.; Church Establishment's, 1 vol.;
Church Examinations, 1 vol.; Political Economy, 2 vols.;
Parochial System, 1 vol.; Lectures on Romans, 4 vols.
Besides these, his Posthumous Works contain, Daily
Scripture Readings, 3 vols.; Sabbath Scripture Read
ings, 2 vols.; Discourses hitherto unpublished, 1 vol.;
Lectures on Butler, Hald, etc. 1 vol.; Institutes of Chris
tianity, 1 vol.; His Life and Correspondence, by the
Rev. W. Hanna, D.D. (4 vols. 12mo), is not equal to
the reputation of Dr. Chalmers. An abstract of his
Theology, by the Rev. J. M. Manning, is given in the
Bibliotheca Sacra, xiii, 477 sq.—Moore, in the Methodis
ist Quart. Review, Oct. 1849; Hanna, Life of Chalmers
(New York, 1850); N. Brit. Review, vii, 292;
viii, 210; xvii, 110; Princeton Review, xiii, 20.
Chalon. See HALL.
Chalons, a town in France, on the Saone, on the
site of the ancient Cubillumum. See FRANCE.
Several provincial councils were held during the
Middle Ages at Chalons, of which the most impor
tant was that of A.D. 819, ordered by Charlemagne. It
published sixty-six canons, of which the first eleven re
late to bishops, and direct that they shall read the
holy Scriptures, the councils, and the pastoral of St.
Gregory: that they shall preach to their people and
effitably: that they shall establish schools, etc. The twenty-sev
enth forbids the repetition of confirmation. The thir
ny-third declares that spiritual sins must be confess
ed, as well as bodily sins. The thirty-sixth declares that
almsgiving avails only to release from senial sins,
raising from frurity, and repaves those who go on in
sin, thinking to escape punishment for their much
almsgiving. The forty-ninth ordains that the dead to be
said at every mass, and declares it to be an
ancient custom in the Church to commend to the Lord
the spirits of those asleep. The forty-third declares
the ordination of certain priests and deacons conferred by
certain Scotch bishops to be null and void, being done without the consent of their dioceses, and with
suspicion of simony. The forty-fifth condemns pil
grimages made in order to obtain remission of sins,
which, on that pretext, the persons about to make
the pilgrimage go on committing more freely; pilgrim
ages made from proper devotional motives are com

Chaluza. See *Chelusia*.

Chamber. (The translation of various Heb. words.) Oriental houses have in general a court in the centre, with cloisters and a gallery, into which the chambers open, the apartments of the women being at the back, and only to be approached by passing through the others. Toward the street is a dead wall, with a porch, over which is a chamber, sometimes used as a lodging for guests, and sometimes as a store-room, it being used (as a place of rest) for these purposes, by being connected with the rest of the house by a door in the gallery, and having a separate staircase opening into the porch. This is the "chamber on the wall" (חֹ֣מֶר בֵּ֛ית). In a particular sense it was the place where a man received his guests. In modern times, a large room is called "chamber" by analogy (אֲוֹרָה מִּשְׁרָקָה).

Modern Oriental "Chamber on the Wall."

*wall* of the Sept. (יוֹרְפַע) which the Shunammite prepared for the prophet Elisha (2 Kings iv, 10). Such an "upper chamber" (יוֹרְפַע) is still the guest-chamber where entertainments are made, which was the custom with the Greeks as well as with the Jews (Matt. ix, 14; Mark xiv, 14). Among the former it occupied the upper story; among the Hebrews it seems to have been on, or connected with, the flat roof of their dwellings (comp. Acts xx, 8). These upper chambers were also sometimes used for the performance of idolatrous rites (2 Kings xxii, 12), and in them the bodies of the dead were laid out (Acts ix, 37). The early Christians, too, held their meetings for worship in such places. Besides these, there were inner chambers, or a "chamber within a chamber" (1 Kings xxiii, 25), such as that into which the messenger of Elisha retired to anoint Jeho (2 Kings ii, 25). See *Horaz*.

The term "chamber" is used metaphorically in many places of the Scriptures, as Ps. civ, 3, 13; Prov. vii, 27. To apply ourselves to earnest prayer and supplication, and to depend on the promises and providence of God for special protection, is to enter into our chambers, that we may be safe, as the Hebrews were in their houses, from the destroying angel (Isa. xxxi, 20). See *Bed-chamber*.

The "chambers of the south" (Job ix, 9) are the constellations, or clusters of stars, belonging to the southern part of the firmament. See *Astronomy*.

The term "Chamber of Imagery" (יוֹרְפַע עֵינָיִים, *figura-orsomenia*; Sept. οὐρανός ἐξωτικός) is used by the prophet Ezekiel of (vili, 12) to denote the vision which he had of the abominations practiced by the Jews in the distant Jerusalem. As the practices there denounced were evidently borrowed from their Chaldean oppressors, they derive striking elucidation from the gorgeous halls of the Assyrian palaces lately brought to light by Layard, with their long rows of sculptured animals, and kings worshipping before them (Nimrud, ii, 299). See *Imagery*.

"Chambering:" (coïtus) signifies in Rom. xiv, 18, that lawword accompanied with courteous and similar characters that was a peculiar feature of the heathenism of that age. See *Harlot*.

Chamberlain (גּוּר עֵנָיִים, saris', 2 Kings xxiii, 18; Esth. i, 10, 12, 14; ii, 5, 14, 15; iv, 4, 5; vi, 14; Sept. regularly קָנָן, twice κρατέος, all signifying constrained; in other places it is translated "exhibit," or "officer."). The term appears to have been applied to officers confidentially employed about the person of the sovereign; thus Potiphar, who was also captain of the guard, in the Egyptian court, is styled thus (Gen. xxxviii, 26; xxxix, 1). It probably also occurs in the title Ralazaris (q. v.). The title "chamberlain" (coινονεύος), in Rom. xvi, 23, probably denotes the steward or treasurer of the city, called by the Romans the *questor*.

The Vulg. renders it by arcarius, which was the title of a class of inferior magistrates, who had the charge of the public chest (arcus publicus), and were under the authority of the senate. The duties of these officers were similar to the accounts of the public revenues. (See Reinsius, *Synag. Inscrip. p. 481; La Cerda, *Aederae Sacr. cap. 56; Elsner, *Obs. Sacr. ii, p. 68; and a note by Reinsius in the *Marmor Ozonense*, p. 515, ed. 1732.) Blastos is said in Acts xii, 20, to have been the king's (Herod's) chamberlain (βιο τοῦ κυρίου τοῦ βασιλέως), by which is probably meant his personal attendant or eunuch of the chamber. It was a post of honor, which involved great intimacy and influence with the king. The margin of our version gives "that was over the king's bedchamber," the office thus corresponding to that of the *profectus cubiculi* (Suetonius, *Dom. 10*). See *Burgh*.

Chamberlain, Jeremiah, D.D., a Presbyterian minister, was born in York Co., Pa., Jan. 5, 1754, graduated at Dickinson College in 1814, and studied theology at Princeton. He was licensed in 1817, when he became a missionary to the West and South, visiting Natchez, New Orleans, and Mobile. In 1818 he supplied the Bedford church, Pa., and in 1822-23 removed to Danville, Ky., to the Presidency of Centre College. In 1824 he became President in a State institution at Jackson, La., but resigned in 1828, and opened an academy. In 1880 he was made President of Oakland College, Claiborne Co., Miss., the establishment of which was the result of his own efforts, and which was established to the heart (Sept. 5th, 1850) by a student, who afterward committed suicide. He published *A Sermon on the Sanctity and Perpetuity of the Sabbath, 1831.* Some of his Addresses and Letters were published in the current newspapers.—Sprague, *Annals*, iv, 500.

Chamberlain, Schuyler, a minister of the Methodist Episcopal Church, was born in Woodstock, Conn., Sept. 4th, 1800. In 1818 he joined the first Methodist class formed in Craftsbury, Vt. He was received into the New England Conference in 1828, and during his itinerant career filled a number of important appointments, including the presidency of the society. He died at Craftsbury, May 5, 1862. He possessed superior abilities as a preacher; his style was easy, impressive, and attractive, and there was great clearness and definiteness in his sermons. He was elected three times a delegate to the General Conference. He also represented the town of Craftsbury in the State Legislature three terms.—*Minutes of Conferences*, 1863, p. 104.

Chameleon, a reptile belonging to the *saurian* or lizard-like order. In the original of Lev. xi, 80, occur the words *κίσκις* (712), so called apparently on account of its great strength) and *τίνακης* (711), the
first of which, in our version, is rendered "chameleou" (after the Sept. and Vulg. χαμαλέον, chameleoon), and the second "mole;" but Bochart and others consider both words as relating to animals of the saurian or lizard tribe, and that our translators have termed the mole is, in reality, the chameleon (Chamaeleo vulgaris), while the chameleon of our version is some other and larger creature of the same order, perhaps a species of the land crocodile. See Mol. "The chameleon is a small species of lizard, celebrated for the faculty it has of changing the color of its skin. This property, however, has no reference to the substance it may be placed on, as generally asserted, but is solely derived from the bulk of its respiratory organs acting upon its transparent skin and on the blood of the animal. The chameleons form a small genus of saurians, easily distinguished by the shagreened character of the skin, and the five toes on the feet, divided differently from those of most other animals, there being, if the expression may be allowed, two thumbs opposed to three fingers. Their eyes are telescopic, move separately, and can be directed backward or forward. Chameleons are slow, inoffensive, and capable of considerable abstinence from food, which consists solely of flies, caught by a rapid protrusion of a long and viscid tongue. Among themselves they are irascible, and are then liable to change their colors rapidly; dark yellow or gray is predominant when they are in a quiescent state, but, while the emotions are in activity, it passes into green, purple, and even ash black. The species found in Palestine and all Northern Africa is the common 'African chameleon,' and probably is that referred to in Is. xx. 29, where unclean animals are mentioned." (See Penny Cyclopædia, s. v.) See Lizard.

Chamier, Daniel, a French Protestant divine, was born in 1565; studied at Orange; and at 16 became one of the professors of the college at Nismes. In 1583 he went to study at Geneva, where he was ordained. On his return he was made pastor of Vans, and afterward of Ambes, and some time afterward succeeded his father, Adrian Chamier, as pastor of Montélimar. In 1596 he was sent by the province to the National Synod of Saumur, and several times afterwards to the Assemblies of Laudun, Vendôme, Saumur, and Châtellerault. He gained great credit by his firmness in the negotiations relating to the Edict of Nantes. In 1600 he distinguished himself in a controversy with Father Coton at Nismes, and the next year with the Jesuit Gaultier. In 1601 he became a delegate to the National Synod of Germain, and, together with Marinval, went as a deputation to the king to ask for the continuation of the Saumur Assembly; this was refused, but the convocation of an assembly at Sainte Poix was granted, and of this he also became a member, as well as of several succeeding assemblies. Made pastor of Montauban, he also applied himself to the restoration of his college, and continued his labors as preacher and professor until he was killed by a cannon-ball at the siege of that city on Oct. 21, 1621. His principal works are: Dispute de l'occupation des ministres en l'Eglise Réformée (La Rochelle, 1598, 8vo); Epistola Jansenios (Gen. 1599, 8vo); Confusion des disputes prétendues (Gen. 1600, 8vo); Disputatio scholastico-theologica de assumpto corpore (Gen. 1601, 8vo); La honte de Babylom (pt. i. 1612, 8vo); Panstria catholicoe sive controversiarum de religione conf. pontifici usurps (Gen. 1628, 4 vols. fol.); 2d ed. Frankf. x. ed. M. 1627, 4 vols. fol.); Corpus theologick, sive Loes communes (Gen. 1618, fol.). See Memoir of Chamier (London, 1822, 8vo).—Haug, La France protestante, iii, 317.

Chamois, the rendering in the Authorized Version at Deut. xix. 5, of the Heb. :req, ze'mer (so called from leaping; Sept. and Vulg. understand the giraffe, ܪܡܐܥܡܐܕܐ, cameloparda, Luther "elend" or elé). The enumeration there requires us to understand ze'mer to be a clean ruminant; but it is plain that the Mosaic list of clean animals would not include such as were totally out of the reach of the Hebrew people, and at best only known to them from specimens seen in Egypt, consisting of presents sent from Nubia, or in pictures on the walls of temples. The camelopard is exclusively an inhabitant of Southern Africa (comp. Strabo, xvi. 771; xviii. 837; Pliny, viii. 27), and therefore could not come in the way of the people of Israel (see Michaelis, Suppl. iii, 628). The same objection applies to the deer than that species of deer never appears further south than Northern Germany and Poland (Cuvier, Anim. Kingd., 576 sq.). As to the chamois (Gazella, Thes. 1. 420), though it did exist in the mountains of Greece, and is still found in Central Asia, there is no vestige of its having at any time frequented Libanus or any other part of Syria. Zamer is still used in Persia and India for any large species of ruminants, particularly those of the stag kind. In the sacred text, however, the word ze'mer is not general, but strictly specific. All, or "stag," is mentioned, as well as several Antilopides, in the same verse; we must, therefore, look for an animal not hitherto noticed, and withal sufficiently important to merit being named in such an ordinance. See DEER; GOAT; GAELLE, etc.

The only species that seems to answer the conditions required is a wild sheep, still not uncommon in the Mokattam rocks near Cairo, found in Sinai, and eastward in the broken ridges of Stony Arabia, where it is known under the name of keba, a slight mutation of the old Hebrew כַּבָּס, keeb, or, rather, כַּבַּס, kebas, which is applied, indeed, to a domestic sheep, one that grazed. This animal is frequently represented and hieroglyphically named on Egyptian monuments (Wilkinson, Anc. Eg. i, 19). It is a fearless climber, and secure on its feet, among the sharpest and most elevated ridges. In stature the animal exceeds a large domestic sheep, though it is not more bulky of body. Instead of wool, it is covered with
close, fine, rufous hair: from the throat to the breast, and on the upper arms above the knees, there is abundance of long, loose, reddish hair, forming a compact protection to the knees and brisket, and indicating that the habits of the species require extraordinary defence while sporting among the most rugged cliffs (see Bochart, Hieros. ii, 278 sq.; Rosenmüller, Alterth. I, v, 186 sq.). The head and face are perfectly ovine, the eyes are bluish, and the horns, of a yellowish color, are set on as in sheep; they rise obliquely, and are directed backward and outward, with the points bending downward. The tail, about nine inches long, is heavy and round. See Antelope.

Chamor. See Ass.

Champaign (चाँचे), arable, desert, an open or uninhabited district (Deut. xi, 30). See Arably.

Champagne. See William of Champoux.

Champion (चाँद, gibbor, 1 Sam. xvii, 51; elsewhere "mighty man"). The Heb. phrase קונה gain, rendered "champion" in 1 Sam. xvii, 4, 23, literally signifies a man between the two, that is, a go-between, an arbitrator, or one who offers a challenge, and appropriately denotes the position of Goliath when he stood up between the Hebrew and Philistine armies. Single combats at the head of armies were not usual in ancient times: in many cases it was a condition that the result should determine the national quarrel. An example of this kind is the combat between Paris and Menelaus, described by Homer. A similar practice obtains in the present day among the Bedouin Arabs. See Single Combat.

Cha'na'kin (Xavāds), a mode of Anglicizing, or, rather, Greeking the name CAA'NA in the A.V. of the Apocalypse and N. T. (Judith v, 9, 10; Bar. iii, 22; Sata, 56; 1 Mac. ix, 87; Acta vii, xii, 19).

Cha'na'litne (Xavāvaloç), another form for Ca'na'nitte (Judith v, 16).

Chanaam. See Frost.

Chancel (Lat. cænællum, from cancer, a lattice), in modern usage, part of a church set off from the rest by a railing. See Cænællum. Modern French writers use the word cænæle in its original sense of a lattice or screen, as they apply it to the screen (trancense) which is placed between the nave or main body of the church. In English Protestant churches the term chancel is applied mostly to that part of the smaller churches cut off from the nave by the cænæle, or rather, the railing where formerly the cænæle stood. The original term choir (q. v.) is retained in the larger churches and cathedrals. The chancel is reserved for the use of the clergy in the administration of their offices during divine service. In the German churches the term "kæsnel" is applied to the pulpit, which projects from the side of a gallery, that all in the church may easily hear.

"By the rubric of the Church of England before the Common Prayer, it is ordained that the chancels shall remain as they have done in times past, "that is to say, distinguished from the body of the church in manner aforesaid; against which distinction Bucer and bishop Hooper (at the time of the Reformation) inveighed vehemently, as tending only to magnify the priesthood; but though the king and the Parliament yielded so far as to allow the daily service to be read in the body of the church, if the ordinary thought fit, yet they would not suffer the chancel to be taken away or altered." See Bingham, Orig. Ecc. bk. viii, ch. iii: Hook, Church Dictionary, s. v.; Guerick, Manual of Antiquities, p. 104 (Eng. translation).

Chancellor (चार्चील, bel êkim; Sept. Bala'tu and Bala'titu). The original word signifies a commander, or lord of the edicts or causes; it was the Chalidean title of the Persian governor at Samaria, but is rendered in our version the title "chancellor" (Esth iv, 8, 9, 17).

Chancellor (Conciliarius), a lay officer who is judge in a bishop's court, under his authority. "In ancient times bishops had jurisdiction in particular causes, as in marriages, adultery, last wills, etc., which were determined by them in their consistory courts. But when many controversies arose in these and other causes, it was not consistent with the character of a bishop to interpose in every litigious matter, and it became necessary for the bishop to depute some subordinate officer, experienced both in the civil and canon law, to determine these. Thence, as a political causes, and this was the original of diocesan chancellors. Henry II of England, requiring the attendance of bishops in his state councils, and other public affairs, it was thought necessary to substitute chancellors in their room, to dispatch those causes which were proper to the bishop's jurisdiction. In a few years a chancellor became such a necessary officer to the bishop that he was not to be without him; for if he would have none, the archbishop of the province might enjoin him to depute one, and if he refused, the archbishop might appoint one himself. The person thus deputed by the bishop has his authority from the law, and his jurisdiction is not, like that of an exarch, limited to a certain district and certain causes, but extends throughout the whole diocese, and to all ecclesiastical matters; not only for reformation of manners, in punishment of criminals, but in all abuses concerning marriages, last wills, administrations, etc." (Hook, Church Dictionary, s. v.). In England a chancellor presides at the bishop's court, and is called his vicar-general, as being clothed with the bishop's authority. In Ireland the chancellor has no ecclesiastical jurisdiction, all matters pertaining to his office being executed by a distinct officer, called the vicar-general. —Bingham, Orig. Eccles. bk. ii, ch. vii, § 5; Marsden, Churches and Sects, 331.

Chandler, Edward, D.D., bishop of Durham, was born in Dublin about 1670. He received his education at Emmanuel College, Cambridge, where he took his degree of M.A., and in 1693 he became chaplain to bishop Lloyd, of Lichfield (afterwards of Worcester), who gave him prebend in both those cathedrals. In 1717 Dr. Chandler was nominated to the see of Lichfield, from whence, in 1720, he was translated to Durham. He died in London July 20th, 1760. Among his writings may be noted the choicer of the Prophecies of the O. T., in reply to Anthony Collins (London, 1725, 8vo), a work which compelled Collins to produce, in 1727, his The Scheme of Literal Prophecy considered, which occasioned a second answer from the bishop, entitled A Vindication of the Defence of Christianity, 1728. He also wrote Eight Occasional Sermons; the Chronological Dissertation prefixed to Arnold's Ecclesiastics; and a preface to Cudworth's Immutability of Morality. —Rose, New Biographical Dictionary, vi, 206; Hook, Eccl. Biography, iii, 530.

Chandler, Samuel, D.D., an eminent dissenting minister, was born at Malmesbury in 1688, and completed his studies at Leyden. In 1716 he was chosen minister to the congregation at Perkham, where he took a seat there was also a bookseller. In 1718 he was chosen lecturer at the Old Jewry, and, about 1726, pastor at the latter place; this last office he held forty years. In 1738 the universities of Edinburgh and Glasgow gave him the degree of D.D. He died May 8, 1766. Among his numerous works, published or published from MS. (London, 1768, 4 vols. 8vo); A Critical History of Davod (London, 1766, 2 vols. 8vo); A Vindication of the Authority of Daniel's Prophecies (London, 1778, 8vo); Paraphrases and Notes on the Prophetic Scriptures (London, 1763, 4to); Paraphrase and Commentary on Joel (London, 1733, 4to). His apologetic writings are still of value. In theology he was a semi-Arian.
CHANDLER 207  CHANNING

-Chasuring Britishamica, iii. 480; Allibone's Dictionary of Authors, i. 386; Rose, New Biog. Dict. vi. 201.

Chandler, Thomas Bradbury, D.D., a Protestant Episcopal minister, was born in Woodstock on the 26th of April, 1758, and graduated at Yale College in 1774. On his return from England in 1761, he entered the business of a mission in downtown and Woodbridge, N. J. In the winter of 1768-9 Whitefield visited Elizabethan town, and Mr. Chandler refused him his pulpits on the ground of "the rules of our ecclesiastical policy." In 1766 he was made D.D. by the University of Oxford. In 1767 a controversy arose between him and Bostock, Bishop of Rochester, on the subject of epi-
ceracy, and the pamphlets on both sides showed great ability. The Revolution did not enlist the sympathies of Mr. Chandler, and he retired to England, where he remained till 1785, when he returned to Elizabethan town, having previously declined the appointment of bishop of Nova Scotia. He died at Elizabethan town, June 17th, 1790.

-Sprague, Annals, v. 137.

Chandler, William Penn, one of the most eminent Methodist preachers of his time, was born in Charles Co., Maryland, June 22d, 1764. He entered the Philadelphia Conference in 1797, and filled in succession the most important stations in the Church. He took a supernumerary relation in 1811, and located in 1816, returning to the Conference, however, in 1822, the year before his death. As a preacher and a minister, Mr. Chandler was a man of no ordinary mark; in the pulpit, the divineunction that rested upon him, and the evangelical energy of his sermons, gave eminent success to his labors (Minutes of Conference, i. 402). Boehm styles him "one of the most powerful ministers that ever wielded the sword of the Spirit." In May, 1820, he had a paralytic stroke. He visited the West Indies in hope of benefit, but returned no better, and died in Philadelphia, Dec. 8th, 1822. Stevens, Hist. of the M. E. Church, iii. 409-418; Sprague, Annals, vii. 281; Boehm, Reminiscences of Methodism, chap. xv; Ware, Autobiography.

Change of Raiment. See Garment.

Change of Money, or Money-changer (ἐπι-
μαντείαν, John ii, 14; συλλέγεται, Matt. xxi, 22; 
Mark xi, 15; John ii, 15). When Judea became a province of Rome, the Jews were required to pay taxes in Roman currency, and at the same time the annual tribute for the service of the sanctuary was the half shekel of Jewish currency. See Tax. To exchange these foreign coins for Jewish money, or for money-changers, like the business of modern brokers. To obtain custom, they stationed themselves in the outer courts of the Temple, the places of general resort for strangers from every part of Judea, and their oppressive and fraudulent practices probably justified the al-
legation of our Saviour to 'a den of thieves.' Perhaps they were also like the προμάχοι, "exchange-
ers," accustomed to pay and receive interest on loans, and this practice is recognised in Matt. xxi, 12; xxv, 16, 27; John ii, 14. At the present day, in Oriental cit-
es, money-changers are found in the most public places, sitting at little tables covered with coins. See Money.

Channel, the rendering in the Auth. Vers. in cer-
tain passages of two Heb. words: מַעַן, apān', the bed of a brook (2 Sam. xxvii, 16; Ps. xviii, 15; Isa. viii, 7; elsewhere "stream," "river," etc.); and מַעַל, šabbideth, a stream (Isa. xxvii, 12; "good," Ps. lxix, 2, 15).

Channing, William Ellery, D.D., an eminent Unitarian and philanthropist, was born at New-
port, Rhode Island, April 7th, 1780; entered Harvard University in his 14th year; graduated at the age of 18; spent a part of the ensuing two years as a private tutor in Richmond, Va.; returned to Cambridge as re-
cent (a subordinate office) in 1801; was settled as pas-
tor of Federal Street Church, Boston, in June, 1803; visited Europe in 1822; began his celebrated essays on Milton, Napoleon, and Fénelon, which distinguish the commencement of his literary career, proper, in 1826; visited the West Indies in 1890; commenced his anti-
slavery labors in 1830; and died in Boston, Mass., in 1870.

To the American community in general Channing is chiefly known as a theologian, while on the other side of the Atlantic his fame is chiefly that of a literary man and a philanthropist. The common impression that he was the leader of the Unitarian movement in this country is quite erroneous. The publication of the cele-
bated sermon at the ordination of Mr. Sparks, in Bal-
timore, in 1819, the doctoral position of Unitarianism was more generally made known in the American community than at any former date. By this accident, and still more, perhaps, by the fact that his literary reputa-
tion elevated him above all others engaged in the movement, he became recognised as his head, although it could boast of earlier advocates and abler polemics. He is perhaps rather to be classed with Samuel Clarke and Locke, as a high Arian, than with Priest-
ley, Belsham, and the Socinians generally. He is de-
scribed by his biographers "as a member of the Church of God and the New Testament." But he himself says that "he had long ceased to at-
tach any importance to the rank or dignity of Christ, or to believe in the Trinity; that the idea of Christ's death being a satisfaction is nowhere taught in Scrip-
ture; and that evil spirits have no existence, Satan being merely a personification of evil." Still, according to his peculiar views of religious faith and duty, Dr. Channing was a devout and serious man, who had a profound reverence for the authority of Scripture, and was accustomed habitually to view all things in connection with eternity.

With Unitarianism as a system or movement, he unquestionably did not feel satisfied in his later years. In 1837 he wrote as follows: "I feel that among lib-
eral Christians the preaching has been too vague, has wanted unity, has scattered attention too much." In 1839 he thus expresses himself: "I would that I could look to Unitarianism with more hope. But this sys-
tem was, at its recent revival, a protest of the under-
standing against absurd dogmas, rather than the work of deep religious principle, and was early paralysed by the mixture of a material philosophy, and fell too much into the hands of scholars and political reformers; and the consequence is a want of vitality and force, which, however, our contemporaries can only judge under its present auspices or in its present form.

As a preacher Channing was pre-eminent, though he had very few natural oratorical qualities. His pres-
cence in the pulpit was not commanding; he was small in stature, exceedingly emaciated, and enveloped in a superabundance of clothing; his cheeks were sunken, his eye hollow, and his voice feeble though remarkably flexible. He generally read his discourses. Through-
out his long ministry he was the most popular preach-
er in Boston. In philanthropic enterprise he was the Chalmers of America. His journals contain "long lists" of plans for "public works, benevolent operations, special reforms." These plans include, "As-
sociations among Mechanics," "A work to be written on ardent Spirits," "Fire Clubs," "Poor-houses," "Female Employment Societies," "Provisions of Wood on a large Scale," "Bake-houses for the Poor," "Associations for the Relief of the Sick, Old, Debt-
ers," "Societies of Virgins and Brides," for the Reformation of Prostitutes, the Improvement of Af-
cans," etc. His liberality was not absorbed in de
te-
ning plans of good, but his personal charities were great. His latest and maturest strength was devoted to the discussion of American slavery, and no writer has treated the subject with more candor or more impres-
sive eloquence. His literary reputation, especially in England, was scarcely paralleled by that of any other
American author of his time. He possessed the best elements of immediate success as a writer—a poetic temperament, and a style of remarkable transparency and power. The greatest faults of his style are repetition and expansion, the fine gold being often beaten out into very thin leaf. Channing's works were reviewed by Macaulay in the Edinburgh Review (vol. ixix, p. 214), and a graphic sketch of him is given by Stevens in the Methodist Quarterly Review (Jan. 1849, art. iv), from which the present article is condensed. His Works have been published in Boston in 8 vols. 12mo (reprinted in England). Many of them have been translated into German (Berlin, 1850-56), also into French, with an Essay on his Life and Writings, by Laboulaye.—Memoirs and Correspondence of Channing (Boston, 1849, 4 vols. 12mo); Ware, American Unitarian Biography, ii. 1877; Sprague, Church music. 290 sq.; British Quarterly, Nov. 1848, 1st; Literary and Theological Review, i, 804; N. American Review, xii, 366; Democratic Review (Bancroft), xil, 524; Westminster Review (J. Martineau), i, 817; Edinburgh Review, ixix, 214; Allibone, Dict. of Authors, i, 567.

Channuneus (Xαννυνεύς), given (1 Esdr. viii, 49) as a person, several of whose "sons" (there named) were among the priests or Levites secured by Ezra to accompany his party to Jerusalem; corresponding apparently to Merari of the Heb. text (Ezra viii, 19).

Chant ("θύρα, παράθυρον", to chaster, spoken contemptuously; Sept. ἵσχυρος) occurs only in Amos vi, 5, where the passage, "That chans to the sound of the viol," may be rendered, "That sing to the sound of the harp." The Chaldean, Syriac, and Vulgate read, "who sing to the sound of the pæstaly" and the margin of our version gives "quaver." Josephus informs us that the instrument here termed nœbel was of a triangular shape, and carried in the hand. In the paintings on the monuments at Thebes we find players on the harp in the act of singing to the sound of their own music. (See the cut below.) Similar scenes are depicted on the Assyrian monuments. See Musick. Both among the Jews and the Egyptians musical instruments were chiefly played upon by women: the Psalmist, describing a musical procession, says, "The singers went before, the players on instruments followed after; among them were the damsels playing with timbrels." (Ps. lxvii, 23.) See Harp.

Chant (canus, a song), the word employed in the early Church to designate the vocal music of the congregation. The term was applied, later, to special tunes adapted to prose; e. g. the Ambronas, established by St. Ambrose, and the Gregoryes, introduced by Pope Gregory the Great, who established schools of chanters who composed the Church music. This, at first, was called the Roman song; afterwards the plain song, as the choir and people sing in unison. In modern liturgical worship, the word designates the musical performance of all those parts of a prose liturgy which are permitted to be sung or recited in a musical manner. In a wider sense, it is used to denote those forms of sacred music in which prose (e. g. passages of Scripture) is sung in simple harmonies. See Musick.

Chantry (old French chancerie, from chanter, to sing), an ecclesiastical benefice or endowment to provide for the chanting of masses for the repose of the souls of the founders. Money was often left also for the building of a chapel in which the masses were to be chanted, and hence the term was applied also to such chapels. They were sometimes built in or near a church, but more usually were attached to an abbey or monastery, and were frequently very richly decorated.

Chaoos. See Dedication (Feast of).

Chaoos, a term taken from the Greek mythology, according to which Chaoos was the first existence and the origin of all subsequent forms of being (Hesiod, Theog. 116; Ovid, Met. deor. i, 3). The word itself (in Greek, chaoos, or cháoos) signifies the vast void, or the confused mass of elements from which it was supposed by the ancient philosophers that the world was formed. It has been employed in later times to denote the undefined mass of primordial matter described by the sacred historian in Gen. 1, 2, corresponding to the Heb. words און, 'ephah, and און, 'onah, a waste void, a desert, a waste solitude, rendered in the Sept. διάπορος and διακρατοῦς, distant and unknown order. These two words, combined for the sake of the paraphrasm into the phrase און און, in which the repetition of similar terms is a Hebrew method of designating intensity or superlativeness, signify simply uter desolation.

The description which Ovid (I. c.) gives of Chaoos itself, and of the formation of the world from the chaotic mass is very remarkable. The following is a literal version:

"Ere sea, or land, or sky, that covers all, Existed, over all of nature's round One sea there was which men have Chaoos named— A rude, unshaped mass, with naught save weight And here were heaped the jarring elements Of ill-harmonious things. No sun as here His rays afforded to the world; the moon Filled not a fresh her horns by monthly growth; Nor hung the globe in circumambient air, Powed by its balanced weight; nor had the sea Reached forth its arms along the distant shore. Where'er was earth, there also sea and air; No land to stand upon, no wave to swim, And rayless air. Nothing preserved its form; Each thing opposed the rest: since in one frame The cold with hot things fought, the moist with dry, The soft with hard, and light with heavy things. This wrote the God and knews Notae, by the sea. An all-mighty power, By cleaving sky from land, and land from sea, And parting liquid sky from thicker air. These thus evolved and from the primeval drawn, Disjoined in space, were tied in friendly peace: The fiery force of heaven's weightless arch, Lashed forth, and chose the topmost point its seat; The air comes next in gravity and place; The denser earth draws down the bulky parts, Crushed with its weight; the water, flowing round, The outset held, and bound the orb entire."

"This statement bears so many striking resemblances to the Mosaic account of the creation that one can scarcely fail to regard it as having been derived by tradition from the same source. There is, however, this great difference between the Egyptian and the heathen cosmogonies—that the former sets out with the emphatic declaration that the unformed mass was the creation of God; while the latter speaks of it as the existing matter out of which He formed the world, or even as itself the cause and author of all things. Most interpreters, who have been ignorant of geological phenomena, have at once decided that the chaoos of which Moses speaks was the form in which
matters was first created. Some have even declared that there cannot have been any such interval as this we have spoken of (Prof. Stuart, in Bib. Reps. No. 357, Jan. 1830). But, on the other hand, the world gives intimations, in the rocks which compose its crust, of various and long-continued changes both of condition and nature, which have taken place in the world since it has existed during some long period before the Mosaic record of creation in six days; (2) that during that period it was the abode of animals differing in organization and structure from those now found on its surface; and (3) that it has been exposed to various changes, such as earthquake and volcanic disturbances generally. A favorite mode of explaining the Mosaic account, a few years back, was to take the six days of creation for unlimited periods, during which the changes we are speaking of took place. This ground has, however, been almost completely abandoned, both because the account, so understood, does not agree with the physical phenomena, and because such an interpretation is, to say the least, hardly admissible on exegetical principles. The first sentence of the inspired record may therefore be regarded as the majestic declaration of a fact, which the world had lost sight of, but which is deeply concerned men to know. What it occurs to those who contemplate the cosmic history of the earth, the abode of man, is to be gathered, not from the written word, but from the memorials engraven on the tablets of the world itself. The succeeding verse of the Mosaic account then relates to a state of chaos, or confusion, into which the world was thrown immediately before the last reorganization of it. Nor is such a chaos opposed to geological phenomena, which plainly tell of 'critical periods' and of 'revolutions of organic life' (Phillip's Geology, in Cab. Cyclop., ii. 284). Whether the chaos of which we are now speaking was universal, or was confined to those regions which formed the cradle of the human race, is a distinct question. The latter supposition has been adopted by Dr. R. Smith, in his lectures On the Relation between the holy Scriptures and some Parts of Natural Science. To these lectures, as well as to the articles by Prof. Hitchcock, in the Biblical Repository (Nos. 17, 18, 20, and 22), and to various papers which have appeared as different parts of the Christian Scholar, the reader is referred for a fuller discussion of this and kindred questions (Kitto, Cyclop., s. v.). The difficulty advanced by some that geology (q. v.) gives no intimation of any such total break in the chain of organized beings as is implied in a chaotic condition of the globe just before its first reorganization, or, in short, is hardly on a consistent with truth; for although the rocky tablets of the earth's crust do indeed exhibit a continued series of organized life, yet they also record great changes of species, and even wholesale demolitions of imperfect orders, not now extant, while they cont in few, if any, specimens identifiable with those that inhabit the present surface of our planet. See also Hitchcock's Relig. of Geology (Bost., 1835). See CREATION.

Chapel (church, holy house, holy place), a general name for a sanctuary (as it is elsewhere rendered) or place of worship, occurs in Amos vii, 13, where Bethel is called "the king's chapel" by one of the idol priests because there the kings of Israel paid idolatrous worship to the golden calves. In 1 Macc. i, 47, the Greek word is εἰδώλευος, and in 2 Macc. x, 2; xl, 5, τίμευος; both used in a similar sense.

Chapel (Lat. capella, a little cloak or hood). The king of Judah is said to have had a piece of the cloak of St. Martin in a little church, and to have taken it with them to the field of battle. The tent or church containing this capella hence received its name. The term was afterward applied to all small churches, and especially to the side rooms or chapels added to the side aisles of a church, and which were separately dedicated, usually to the service of some saint. Before 209

CHAPIN

The term chapel was also sometimes applied to the seats of vessels or the vestments necessary for the celebration of the church services. It is also sometimes applied to a choir of singers; also to a printer's work-house, or a body of printers, because printing in England was first carried on in a chapel of Westminster Abbey.

In England the word is now used to denote: 1. Domestic chapels, built by noblemen for the use of their families; 2. College chapels, attached to colleges; 3. Chapels of ease, built for the use of parishes; 4. Parish church, which differ from chapels of ease on account of their having a permanent minister or incumbent, though they are in some degree dependent upon the mother church; 5. Free chapels, such as were founded by kings of England, and made exempt from episcopal jurisdiction; 6. Chapels which adjoin to any part of the church; such were formerly built by persons of consideration as burial-places. In the great Roman cathedrals and churches of Europe side-rooms are frequently fitted up for prayer, with an altar and the other necessary appendages.

The Methodists and Dissenters in England call their churches chapels, and this erroneous use of the word has crept somewhat into use in America.

Chapelle ardente. See Mole.

Chapin, Calvin, D.D., an eminent Congregational minister, was born in Springfield, Mass., about 1764. He graduated at Yale in 1786, and in 1790 was ordained as the same college, where he remained until March 1794, when he was ordained as the same college, where he was ordained as the same college, where he was ordained as the same college, where he was ordained at Rocky Hill. He was a trustee of the Conn. Miss. Soc., and one of the five organizers of the "American Board of Commissioners for Foreign Missions." He was made D.D. by Dartmouth College in 1804. He moved his pastoral charge in 1847, and died March 16, 1861. He published several sermons on funeral and other occasions.—Sprague, Annals, ii, 322.

Chapin, Stephen, D.D., a Baptist minister, was born at Milford, Mass., Nov. 4, 1778. He graduated at Harvard in 1804, and in 1805 was ordained pastor of the Congregational church in Hillsborough, N. H., from whence he removed, in Nov. 1809, to the Congregational church in Mount Vernon, N. H. Here he remained nine years, but, on account of a change in his views concerning baptism, he was discharged Nov. 18, 1818, and the same month he was received a member of the Baptist Church. In the fall of 1819 he was installed pastor of the Baptist church at North Arm- mouth, Me., where he was greatly esteemed. In 1822 he was made D.D. by Brown University. In 1823 he became professor of Theology at Waterville College, Me., and remained there until his appointment as president of Columbia College, Washington, D. C., where he was installed pastor of the Baptist church to be held for twelve years with unfailing zeal and energy. In consequence of growing infirmities he resigned the presidency in 1841, and retired to a small farm near Washington, where he died Oct. 1st, 1845. Dr. Chapin published a pamphlet on Baptism in 1819, and a number of occasional sermons, addresses, etc.—Sprague: Annals, vi, 765.
CHAPTER 210

CHAPLAIN (capellanus), a person who performs divine service in a capella (chapel). The position of the chaplain was contingent upon the nature of the capella, which was a church with or without a chancel, or an oratory, a sanctuary, or parts (altar, etc.) of a particular church. See CHAPEL. Thus the chaplain was sometimes the assistant of a parish priest; sometimes even exempted from episcopal jurisdiction. The "royal or palace chaplains" (capellani regii or politiani) usually received large privileges from the pope. At the time the title "chaplain" (capellanus ierarii, et in absentia militaris) was a chaplain general (Capellanus major regiae), to whom usually extraordinary faculties were transferred. There were also special chaplains in the castles of noblemen and in the houses of wealthy citizens. The chaplains of the bishops usually served as their secretaries. The chaplains attached to the papal court were divided into three classes: titular chaplains (capellani honorarii), chaplains assisting at the pontifical ceremonies (ceremonarii), and chaplains employed as private secretaries of the pope (capellini privati). Chaplains were also commonly appointed for the religious services in monasteries, hospitals, and other ecclesiastical institutions; but the common employment of chaplains in the Church of Rome soon became a service at non-parochial churches and religious orders, or as assistants of the parish priests at large churches requiring the services of more than one clergyman.

In many of the Protestant churches the name chaplain was for a long time retained for the assistant clergyman at large churches, but this use has gradually disappeared, and is now only to be found in a few places, especially in Hungary. It is used in modern times as the title of court preachers, of preachers appointed for the chapels of ambassadors or for private chapels, and more commonly for clergyman appointed to the service of the army (navy and army chaplains). In England there are 40 chaplains to the king, who wait four each month, preach in the chapel, read the service to the family, and to the king in his private oratory, and say grace in the absence of the clerk of the closet.

While in other countries they have a table at their attendance, but no salary. In Scotland the king has six chaplains, with a salary of £50 each; three of them having, in addition, the deanship of the chapel royal divided between them, making up above £100 to each. Their only duty at present is to say prayers at the election of peers for Scotland to sit in Parliament.

In England, when the system of army chaplains was remodelled in 1736, a chaplain-general was appointed: this office was abolished by the Duke of Wellington soon after the termination of the great war, but revived by Mr. Sidney Herbert in 1846. The chaplain-general, who receives £1000 per annum, has duties partaking somewhat of those of an archdeacon. He assists the War Office in selecting chaplains, and in regulating the religious matters of the army. His office forms one of the 17 departments under the new organization of the War Office. There are about 80 chaplains on the staff, besides assistant clergymen and chapel clergymen. The commissioned chaplains receive from 156 to 252 a day, and there are still chaplains on half pay, while the assistant clergymen receive from £200 to £400 a year. The whole expenditure for commissioned chaplains, assistant clergymen, chaplains, and church and chapel books, figures in the Army Estimates for 1860 at about £45,900. In the navy every ship in commission, down to and including fifth-rates, has a chaplain. The Navy Estimates (1860-61) provide for 19 commissioned chaplains, at stipends varying from £100 to £256 per annum; 9 others in district guard-ships, at average stips of £175; and 66 on half-pay, at a to. per day. The chaplains perform their services on stated times on shipsboard, visit the sick sailors, and assist in maintaining moral discipline among the crew.

In the United States the national government has not only army and navy chaplains, but also chaplains for both houses of Congress and representatives. Many of the state Legislatures have chaplains also.

Chaplet (French chapel), a string of beads, or other material, used by Romanists in counting the number of their prayers. It is more commonly called the Rosary (q. v.).

Chaplin, Daniel, D.D., a Congregational minister, and native of Bowley, Mass., was born Dec. 80, 1748. He graduated at Harvard, 1772, and was made D.D. by the same college in 1817. He was ordained...
paster at Groton, Jan. 1, 1778, and remained in the
same charge for fifty years. His great piety and de-
cision of character gave him great influence in the
stormy times of the Revolution, and his long ministry
was acceptable and useful, until, toward the close of
his life, part of his congregation chose a Unitarian
minister. He died in peace in 1831.—Sprague, Ann.
als, ii., 150.

Chaplin, Jeremiah D., a Baptist minister,
was born at Georgetown (then Rowley), Mass., Jan. 2,
1776; graduated at Brown University in 1799, and
took charge of the Baptist Church in Danvers, Mass.,
about 1802. In 1817 he became principal of a theo-
logical school in Waterville, Me., of which he was
chiefly charged as Waterville College in 1820, he
was elected President. He held the office thirteen
years with great success. He was made D.D. by the
College of South Carolina in 1819. In 1833 he resign-
ed the presidency of the college, and, after preaching
for some time at Rowley, Mass., and at Willington,
Conn., finally settled at Hamilton, N. Y., where he
died suddenly, May 7th, 1841. Dr. Chaplin published
*The Evening of Life; or, Light and Comfort amidst
the Shadows of Declining Years.*—Sprague, Annals, vii., 463;
Pattison, *Eulogy on Dr. Chaplin,* Boston, 1846.

Chaplin, Jonathan B., a Methodist Episcopal
minister, was born in Connecticut in 1789, was con-
verted in 1792, was made a deacon in 1803, was
appointed in 1804, and was ordained in 1810. He
was one of the first appointees to the Ohio Conference in 1814. He was three years principal of
Norwalk Seminary, Ohio, and then remained in the
itinerant work in Ohio till 1840, when he removed to
the Michigan Conference, and was made principal of
White Pigeon Branch of the Michigan University.
Here he remained until his death, March 1st, 1846. While
young he studied law in the State of New York, and
during the winter of 1812 was aid-de-camp to General
Porter. Soon after the peace he settled at Urbana,
Ohio, where he practiced law till his conversion.
In the cause of education he was of lastling service and
benefit to the Church in Ohio and Michigan.
His care of the institutions committed to him was very
satisfactory. His last words were, "Live holiness, and
preach it from the heart."—*Minutes of Conf.* iv., 176.

Chapman (＇χαρμαν), mosh' hat-tsr, man of
the journeying, traveller, i.e. for purposes of traffic), a
trader who transports articles of commerce from the
place of production to a mart (2 Chron. ix. 14); a mer-
chant-man, as the same phrase is rendered in the para-
ble of the merchants (Matt. xxv. 19, 21; Luke x. 10).

Chapman, John D., an eminent English theo-
logian, was born at Strathfieldaye in 1704; studied at
King's College, Cambridge, and in 1789 became recer-
tor of Merham, in Kent, from whence, in 1744, he
removed to the rectorship of Alderton. He afterwards
became archdeacon of Sudbury, and treasurer of
Chichester, and died Oct. 14, 1764. The most important
of his works are: *Eusebius; or, the true Chris'ti' an's De-
ference ag inst a late Book esteemed the Moral Philosopher
[by Dr. Morgan] (1789-41, 2 vols. 8vo); Miscellaneous
Tracts relating to Antiquity, revised and corrected,
with Additions (London, 1743, 480); Expediency and Cred-
bility of Miraculous Powers among the Primitive Chris-
tians (London, 1789, 4to).”—Darling, Cyclopaedia
Bibliographica, i, 682; Hook, Eccl. Bibliography, iii., 554.

Chappell, William D., bishop of Cork, was
born at Lancing, near the town of the same name,
Dec. 10, 1822, and was educated at Mansfield, from
whence he removed to Christ's College, Cambridge, where he obtained a first class in the
philosophy of science. In 1848 he was made dean of Cashel, Ireland, in 1853, and soon after
provost of Trinity College, Dublin. In 1858 he was
made bishop of Cork. He suffered many hardships in
the Rebellion, and on landing in England was sent to
prison, but soon obtained his liberty. He died at Der-
by in 1862. He wrote *Methodus Concimandii (London,
1648), and A Treatise on the Use of Holy Scripture (Lon-
don, 1655, 8vo). The Whole Duty of Man has also been
assigned to him, but without probability. Archibishop
Usher and bishop Martin opposed him on account of
his apparent leaning to Romanist views of discipline.
—Hook, Church Dictionary, iii., 554; Kipps, Bibliography
Britannica, iii., 493.

Chappelow, Leonard D., an eminent Oriental
scholar, was born in England in 1688. He was edu-
icated at St. John's College, Cambridge, chosen fellow
in 1717, and became Arabic professor in that university
in 1720. He also obtained the livings of Great and
Little Hornead. He died in 1768. His principal works
are: *A Commentary on the Text of the New Testament
in the Languag of the Hebrew Text and English Translation
(London, 1752, 2 vols. 4to); Elementa lingua Arabic (1730, 8vo); Six
Assemblies, or Ingenious Conversations of learned Men among the Arabsians (1767, 8vo).—Darling, Cyclo-
opaedia Bibliographica, i, 683; Rose, New Gen. Bibli.
Dict. vii., 646.

Chapter, an abbreviated form of the word chap-
ter (q. v.), heading, e. g. of a column.

CHAPTER OF THE BIBLE. The present numeral
division of the Scriptures into chapters and verses is,
in some respects, of comparatively recent origin. The
Pentateuch was divided by the Jews, at an early peri-
od, into fifty-four parshiah (םְפָרֶשָׁה) = sections, one
of which was assigned to each day of the week (Acts xiii., 15). These sections were subdivided,
probably by the Masoretes, into 669 edrim (אֶדְרִים),
or orders. After the reading of the law, it was also
customary, from an early period, to read a passage
from the prophets, and with that to dissolve the as-
sembly. Such passages were called hizkhoroth (יהֵזְכָּרוֹת) = dissimi-
nus, and appear to have been selected according
to the choice of any reader (Acts xiii., 15; xxvii. 49; Luke iv. 16). The divisions or sections
found in the Greek and Latin manuscripts are different
from those of the Hebrew books: they are of unequal
and arbitrary length, and very different from the
chapters in our printed Bibles. So, also, the books of
the New Testament were divided, at an early period, into
certain portions, which appear under various names.
The division into church lessons, read in the assem-
bly, is generally recognized as the least of the law and the prophets, was the most ancient. Subsequently the New Testament
was divided into two kinds of sections, called tîlîm (רִ
לְשׁוֹן) and chapters (נְטֵרָה = heads). The tîlîms were portions of the Gospels, with summaries placed at the
top or bottom of the page. The chapters were divi-
sions, with numerical divisions, chief among them the
gospel harmony of Ammonius. Other sectional divisions
are occasionally seen in manuscripts, which ap-
ppear to have varied at different times and in different
churches, accordingly as festival days were multiplied.
See Bible.

The numerical division of the Old and New Testa-
ments into modern chapters is by some ascribed to
Lanfranc, who was archbishop of Canterbury in the
reigns of William the Conqueror and William II., while
others attribute it to Stephen Langton, who was arch-
bishop of the same see in the reigns of John and Henry
III. Its authorship, however, is usually assigned to
the schoolmen, who, with the cardinal Hugh of St. Ch.,
were the authors of the Concordance for the Latin Vul-
gate, about A.D. 1240. This cardinal wrote remarks,
or Postils, as they were called, on all the books of
Scripture: and this Latin Bible, published by him, is
generally supposed to be the first Bible divided into
the present chapters. Yet cardinal Humbert, about
A.D. 1059, cites the 12th and 13th chapters of Exodus,
and the 23rd of Leviticus, according to our present
division of chapters. Whoever was the author, from
about this period the division of the several books into
chapters was gradually adopted in the Latin and other
versions; and, finally, in the Hebrew, with a few va-

Digitalized by Google
CHAPTER 212

CHARACTER

rations, and also in the Greek text. The several Psalms were not included in this division. See Varse. CHAPTER, as an ecclesiastical term, the name of a corporation of ecclesiastics, bound by canonical rules, and generally attached to a cathedral. The name chapter rose from the fact that the first communities of canons (q. v.) were called together daily in a common hall, to hear a chapter of the Bible, or of their common rules, read aloud. The hall was hence called the Chapter, or Chapter-house (q. v.), and the name finally passed to the body of ecclesiastics assembling in it.

Originally the property of the chapter belonged to the diocese; and the monks or canons had a common life, and kept strict obedience. Corporations of this kind rapidly multiplied, however, and soon began to have wealth of their own; by the 12th century these 

episcopal canons were attached to almost every see.

The nomination of the bishop fell to the chapter, and this was allowed by the popes, thus enlarging greatly the power of the chapter, and diminishing the authority of the bishop over it. The nobility of Europe found the canons rich, and the chapters were made sources of income for their children, who in some dioceses filled the see. In some instances these accumulated the revenues of the chapters, and appointed vicars to do the work. The Council of Trent introduced many reforms (vers. 28, 29). In 1803 the chapters, as corporations, were abolished in South Germany, and in 1810 in Prussia. Whatever rights the chapters now have are based upon the canon law, and upon the special legislation of each country in which they exist. In Switzerland, Prussia, and other Protestant countries of Germany, the chapters have received the right of electing the bishops, who in most of the Roman Catholic countries are appointed by the sovereigns.

In the chapter of a cathedral church consists "of persons ecclesiastical, canons and prebendaries, whereof the dean is chief, all subordinate to the bishop, to whom they are as assistants in matters relating to the church, for the better ordering and disposing the things thereof, and for confirmation of such leases of the temporals and officers relating to the bishopric as the bishop from time to time shall happen to make" (Hook, s. v.). The dean and chapter had formerly the right to choose the bishop in England, but that right was assumed by Henry VIII as a prerogative of the crown. In Germany, Luther made an attempt to preserve the chapters as ecclesiastical corporations, but most of them burnt their ecclesiastical character, and nearly all of them perished at the beginning of the present century. A few chapters, like those of Halberstadt, Minden, and Osnabruck, had both Protestant and Roman Catholic canons, and in Osnabruck even the election of the bishop had to alternate between the two denominations.—Herzog, Real-Encyclopädie, ii, 554 sq.; Ersch u. Grube, Enzyklop., xxxii, 383 seq. See Canons; Dean.

CHAPTERS, THE THREE, a title given to three points (epitheta, capitula) condemned by the fifth Council of Constantinoople. They were: 1. The person and writings of Theodore of Mopsuestia; 2. The writings of Theodoret of Cappadocia; 3. The writings of Theodore of Mopsuestia, together with the decrees of Cyril. This, however, was not done. This question involved most of the Eastern bishops, but was opposed by the African and Western bishops, especially by Vigilius, the Roman pontiff, who was ordered to Constantinoople (A.D. 547), and obliged to give a written declaration (Judicatum) approving the condemnation of the "Three Chapters," which he refused to do. The condemnation was finally determined upon by Justinian, A.D. 551, and by the fifth Council of Constantinople, A.D. 553. Dr. Schaff remarks (iii, 770) that the "controversy of the 'Three Chapters' has filled more volumes than it is worth lines."

—Mosheim, Ch. Hist. cent. vi, pt. ii, ch. iii, § 10, note; Schaff, Ch. History, iii, § 144; Gieseler, Church History, i, § 109. See Constantinople.

Chapter-house (see Chapter), an apartment or hall in which the monks and canons of a monastic establishment, or the deans and prebendaries of cathedrals and collegiate churches, meet for transacting the business of the body of the society. Chapter-houses were often built in the most magnificent and costly style of architecture. They are of various forms, more usually contiguous to a church, and often mere places of burial, having occasionally elves under them.

In medieval Latin the chapter-house is denominated capsiulum, and also Domus Capitularis. The former term was also applied to the east end of the church (caput ecclesie), and hence there have been errors of translation.

Charakth'ara (Χαρακθάρα v. r. Χαρακθάραν, Vulg. Cornella et Coreth) is given among the pseudo-priests in 1 Esdr. v, 86, where "Charatharal, leading them and Aalar," is the confused translation for "Cerebus (q. v.), Addan (or Addon), and Immor," of the Heb. texts ( Ezra ii, 99; Neh. vii, 61).

Char'aka (Χαράκα, Vulg. Chorac) is a place obscurely mentioned only in 2 Mac. xii, 17 (κ' εἰς Χαράκα), as to which Judas Maccabaeus retired after his attack of the city of Damascus. It was once inhabited by the Jews called "Tubieni," or of "Tobie" (see Tob), who were in Gilead (comp. 1 Mac. v, 9, 13); and it was 750 stadia from the city Capsin; but where the latter place was situated, or in which direction Charax was with regard to it, there is no clue. It is "between Damascus and the coast of the Holy Spirit," and identifies it with Raphon. The only name now known on the east of Jordan which recalls Charax is Kerak, the ancient Ker-meh, on the S.E. of the Dead Sea, which in post-biblical times was called Χαράκαμος, and Μουσθωνηρασ (see Reland, Polest. p. 705). The Syriac has Kerka, which suggests Ker (Judg. viii, 10).

Character (χαρακτήρ, impress, image), Christian, is the force of a man's moral personality, as modified and developed by the work of the Holy Spirit. Christianity does not seek to destroy the natural and moral qualities of man, but to elevate, strengthen, and sanctify them. But the individual man, under the Christian influence, together with the Holy Spirit, shapes the way of life; and, under his own responsibility, the influence of the Holy Spirit must be voluntarily accepted as the inspiring and controlling principle of the qualities which belong to him by nature. If this be not the case, the man remains a "natural man," and his character is his natural character. But the beginning of a new moral course of life, through the work of the Holy Spirit, is regeneration, and in regeneration the true foundation of the Christian character is laid. But this regeneration, though it requires active faith on the part of man, is, nevertheless, the work of God, and therefore character is necessary to a divine work, "lost any man should boast" (Eph. ii, 8). Of course, all the practical forms of goodness, the cardinal virtues, so called (2 Pet. i, 5-7), and the special Christian virtue of charity, are elements of this Christian character. It manifests itself in the "fruits of the Spirit," which always, in turn, react upon the character, bringing about that inner form, which is a sign of the true or "spiritual" man (Eph. iii, 16; iv, 28). It fixes the moral worth of the individual, as well as his fitness for the kingdom of God, in which the entire character, the whole man, is peremptorily required (Matt. vi, 24; xii, 23). Christianity demands the whole heart; for "out of the heart come evil deeds" (Matt. v, 21). The disposition of a man's heart forms the essence of his character. With Paul, character is the man: the holy
CHARACTER DOMINICUS 213

CHARIOT

character is the "new man;" the corrupt character the "old man."

But, though the Spirit works this Christian character in man, it leaves free play for the special gifts and endowments of the individual. Although "in Christ there is neither Jew nor Greek," there is room in Christ's kingdom for diversities springing from temperament, race, or nationality. The apostles Peter, Paul, John, and Jude have been taken, by some writers, as types of the four temperaments, sanguine, nervous, lymphatic, and bilious. The Word of God is regarded, in the Christian system, as the rule of life and standard of appeal for the Christian character.

On perfection of character, see HOMILETICS; SACRIFICIAL; THEOLOGY. — Herwegh, Real-Encyklop. vii, 376: Bibliotheca Sacra, iii, 22.

Character Dominicus (the mark of the Lord), a name by which, as well as character regius (royal mark), Augustine designates the sacrament of baptism; "by which he does not mean any internal quality or spiritual power distinct from baptism imprinted on the soul, but only an external form common to all receivers, both good and bad, who are duly baptized in the name of the Holy Trinity; that they are so far signed by the mark or the Lord as thereby to be distinguished from unbaptized Jews and Gentiles, who never made any formal profession of Christianity, nor ever were so much as the external signification of baptism. He allowed this character to be so far indelible that a Christian, though he turn Jew or pagan, can never need a second baptism, but only repentance and absolution to reintegrate him in the Church." It is clear that Augustine did not dream of the later Romanist theory of sacramental "character." —Bingham, Orig. Eccles. bk. ix, ch. 1, § 7.

Character Indelible. In the Church of Rome it is held that a spiritual sign, called character, is impressed in the soul by certain sacraments. Aquinas taught that, "in consequence of the death of Jesus, the sacraments instituted in the New Testament have obtained what is called ehrus in trium-nuillis, or effects, which those of the Old Testament did not possess. Therefore, by partaking of the sacraments, man acquires a certain character, which, in the case of some sacraments, such as baptism, confirmation, and the ordination of priests, is chacter indelible, and, consequently, renders impossible the repetition of such sacraments, save by grace alone."

The Council of Florence (1439) laid down the following canon (Mansi, t. xxxi, col. 1064 sq.): Inter hae sacramenta tria sunt, baptismus, confirmation et ordo, quaerantur, i.e. spiritualiter quodam signum a careris distinctivm imprimtum in anima indelible. Unde in cadem persona non reiteratur. Reliqua vero quattuor charakterem non imprimt ex reiterationem admittunt.—"Among the sacraments there are three, baptism, confirmation, and orders, which impose in the soul a character, that is, a certain spiritual and indelible sign, distinguishing it from others. Hence, in the same person, these sacraments are not repeated. The other four do not impose a character, and admit of repetition." The Council of Trent gives the following: "9. Whoever shall affirm that a character, that is, a certain spiritual and indelible mark, is not impressed on the soul by the three sacraments of baptism, confirmation, and orders, for which reason they cannot repeat, let him be accursed." (N. C. v, c. 9). There is a great variety of opinions (naturally enough) among Roman miss theologians concerning the nature of this "character." See Ferraris, Promota Biblio-theca, viii, 221 (s. v. Sacramentum); Elliott, Delineation of Romanism, bk. ii, ch. 1.

Char'ashim (Heb. Charashim, נָרָ֖שֶׁשׁ, a valley) inhabitated by the descendants of Jacob (v. 9), of the tribe of Judah, so called from their employment as artificers (1 Chron. iv, 14). The same place is mentioned in Neh. xi, 35, (A. V. "valley of craftsmen;" Sept. γῆ δυνατή) as extant after the Captivity, and inhabited by the Benjamites, and as lying not far from Jerusalem. The Talmud (as quoted by Schwarz, Palest. p. 335) reports the valley of Charashim to consist of Lod and Uno, which lay therein. These notices appear to fix its position as in the undulating ground at the back of the plain of Sharon, east of Jaffa, being, in fact, the depression now marked by Wady Masseiah. See CRAFTSMEN.

Char'chams (Χαράχμας v. r. Χαλαχμᾶς, 1 Esdr. i, 25), Char'chemish (2 Chron. xxxv, 20), other methods of Anglicizing the name CARCHEMISH (q. v.).

Char'cuss (Barqad — Vulg. Barcus), given (1 Esdr. v, 33) as one of the heads of the tribe of Manasseh returned from Babylon; a corruption for Barquos (q. v.) in the lists of Ezra (ii, 58) and Nehemiah (vii, 55), possibly by a change of ר into כ. But it does not appear whence the translators of the A. V. got their reading of the name. In the edition of 1611 it is "Charcus."

Char'ea (Χαριά, given (1 Esdr. v, 62) as the name of another head of the Temple servants who returned with Zerubbabel; see ZEERUBBABEL (q. v.) of the Heb. text (Ezra ii, 52; Neh. vii, 64).

Charleston, a town of France, five miles from Paris. A Protestant Synod was held there in 1631, in which the Confession of Augsburg was declared free of errors on all fundamental doctrinal points, and its adherents are to be entitled to the sacrament of the Lord's Supper in the Reformed churches, to be accepted as sperm with the children, and to intermarry with the Reformed. See FRANCE, REFORMED CHURCH OF.

Charas (Χαράς), one of the most influential of the Jewish commanders, who died of illness during the final struggle with the Romans (Josephus, War, i, 4, 9).

Chariot. See DOVES' DUNG.

Charger. The silver vessels offered by the heads of the tribes for the service of the Tabernacle (Num. viii) are thus termed in our translation, being in the original 诽ש (שֶׁהֶר), literally a deep dish, a bowl, elsewhere rendered "dish" (Exod. xx, 29; xxxvi, 16; Num. iv, 2). These are said to have been of silver, and to have weighed each 130 shekels, or 65 oz. (Hussey, Anc. Weights, chap. ix, p. 190). The "charger" upon which the Baptist's head was presented to Herodias (comp. Homer, H, 1, 111) must have been a large platter (πάταγ), strictly a broad tablet (comp. αρίσταρχος, a wide table in Luke vi, 25). These are said to have been of silver, and to have weighed each 130 shekels, or 65 oz. (Hussey, Anc. Weights, chap. ix, p. 190). The "chargers" of gold and silver, in Ezra i, 9 (בֶּן סִפְּרוֹנָה, apogalma), were probably as interpreted by the Sept., Vulg., and Syriac, braha for containing the blood of sacrifices; although others make them to have been baskets for first-fruit offerings. See BASKET; DISH.

Chariot. See BATTLE.

Chariot (properly 诽ש, merkabh, a vehicle for riding; αἰνος, a car) used either for warlike or peaceful purposes, but most commonly the former. Of the latter use there is but one probable instance as regards the Jews (1 Kings xviii, 44), and as regards other nations, but few (Gen. xii, 43; xlv, 21; 2 Kings v, 9; Acts viii, 26). The Scriptures employ different words to denote carriages of different sorts, but it is not in every case easy to distinguish the vehicle which these words severally denote. We are now, however, through the discovery of ancient sculptures and paintings, in possession of much new information respecting the chariots of Egypt, Assyria, Babylonia, and Persia, which are, in fact, mentioned in the Scri-
CHARIOT

CHARIOT

There has been some speculation as to any difference of meaning between the above word and the bierai (masc.) form ἴρπαμο, merobab, which occurs in three passages only. In 1 Kings vi, 6, the latter obviously means chariots, taken collectively. But in Lev. xv, 9 (Auth. Vers., "saddle"), and Cant. iii, 10 ("the covering"), it has been understood to denote this word chariot. To view there is the fatal objection that ancient chariots had no seats. It appears to denote the seat of a litter (the only vehicle that had a seat), and its name merobab may have been derived from the general resemblance of the body of a litter (distinguished from the canopy, etc.), both in form and use, to this same chariot. Another still simpler form, the word ἵρπα, ἵκα (with the analogous forms ἴρπα, ἴκα, Ezek. xxvii, 20, and ἵκα, ἰκα, Ps. civ, 3) from the same root, appears to signify a carriage of any kind, and is especially used with reference to large bodies of carriages, and hence most generally of war-chariots; for chariots were almost never seen together in large numbers except in war. It is applied to the war-chariots of the Egyptians (Exod. xiv, 9), the Canaanites (Josh. xvii, 18; Judg. i, 19; iv, 3), the Hebrews (2 Kings ix, 21, 24; x, 16), the Syrians (2 Kings v, 9), the Persians (Isa. xxi, 7, 9). To this corresponds the ἵρπα of Rev. xviii, 13; the Latin rhedus, a carriage with four wheels, an improvement of later times. By a comparison of these references with those passages in which merobab occurs, the two words applied to all sorts of carriages indifferently and interchangeably, just as we should say either "carriage" or "coach"—neither of which is specific, and both of which differ more from each other than the Hebrew words in question—to denote the same vehicle. Indeed, there are passages in which both words are manifestly applied to the same identical vehicle, as in 2 Kings v, 9, 21, and 1 Kings xxii, 85, 88, where some have endeavored to make out a difference between the Heb. terms. There is another word once rendered chariot, viz. ἰκα (galeb), Psal. xxvi, 9, but it denotes a planum, cart, or wagon drawn by oxen. See CART. The only other word rendered "chariot" in the Bible are ἵλος (ophir), Cant. iii, 9, which the stiymol, as well as the rendering in the Sept. and Vulg. shows to have been a portable sedan or palæonum [see LITTERM.] and ἵρπα (chariot), only in Ezek. xxiii, 24), which, according to etymology and the Rabbinics, means weapon or defensive armor. It is demonstrated that the word ἵκα rendered "horsemen," does not mean "cavalry," but merely riders in the chariots—in other words, chariot-warriors; for Exod. xiv, 7, which gives the first account of the Egyptian army, says, "he took rix hundred chosen chariots, and all the chariots of Egypt, and captains over every one of them" (or each). The "horsemen" in verse 9 and the subsequent verses means literally "riders," not upon the horses, but in the chariots. Hence, though Moses' song of triumph mentions the "horse and his rider" (Exod. xvi, 1), yet ver. 4 clearly indicates that by rider chariot-rider is understood: "Pharaoh's chariots and his horsemen go into the Red Sea also, the chosen captains of Pharaoh also (the chariot-warrors) are drowned in the Red Sea." See HORSE.

The earliest mention of chariots in Scripture is in Egypt, where Joseph, as a mark of distinction, was placed in Pharaoh's second chariot (Gen. xii, 43), and later when he went in his own chariot to meet his father on his entrance into Egypt from Canaan (xivvi, 29).

In the famous procession of Jacob chariots (Gen. xxx, 24) are mentioned as a part, possibly by way of escort or as a guard of honor (i, 9). The next mention of Egyptian chariots is for a warlike purpose (Exod. xiv, 7). In this point of view chariots among some nations of antiquity, as elephants among others, may be regarded as filling the place of heavy artillery in modern times, so that the military power of a nation might be estimated by the number of its chariots. Thus Pharaoh, in pursuing Israel, took with him 600 chariots. The Canaanites of the valleys of Palestine were enabled to resist the Israelites successfully in consequence of the number of their chariots (Deut. i, 17; 2 Sam. xxv, 18). The war chariots with iron scythes (Josh. xvii, 18; Judg. i, 19; see Schickendorf, De curribus falsatis, Zerbust. 1754). Jabin, king of Canaan, had 900 chariots (Judg. iv, 5). The Philistines in Saul's time had 80,000, a number which seems excessive (3 Sam. xiii, 5; but comp. the Sept. and Joseph. Ant. vi, 6, 1). David took from Hadadezer, king of Zobah, 1000 chariots (2 Sam. viii, 4), and from the Syrians a little later 700 (x, 18), who, in order to recover their ground, collected 12,000 chariots (1 Chron. xix, 7). Up to this time the Israelites possessed few or no chariots, partly, no doubt, in consequence of the theocratic prohibition against multiplying horses, for fear of intercurrences of Egypt, and the result of this prohibition is implied in the possession of them (Deut. xvii, 16; i Sam. xiii, 15). But to some extent David (2 Sam. viii, 4), and in a much greater degree Solomon, broke through the prohibition from seeing the necessity of placing his kingdom, under its altered circumstances, on a footing of military equality r superior to other nations. He purchased, therefore, and maintained a force of 1400 chariots (1 Kings xvi, 15) by taxation on certain cities, agreeably to Eastern custom in such matters (1 Kings ix, 19; x, 25; 2 Chron. v, 4, 9). He chariots themselves, and also the horses, were imported chiefly from Egypt, and the cost of each chariot was 600 shekels of silver, and of each horse 50 shekels (1 Kings x, 29). See SIEGE.

From this time chariots were regarded as among the most important arms of war, than the supplies of them and of horses appear to have been still drawn from Egypt (1 Kings xii, 34; 2 Kings ix, 10, 21; xiii, 7, 14; xvii, 24; xxvii, 30; Isa. xxvi, 1). The prophets also allude frequently to chariots as typical of power (Ps. xxvii, 7; rev. 3; Jer. li, 11; Zech. vi, 1). Chariots of other nations are likewise mentioned, as of Assyria (2 Kings xi, 23; Ezek. xxiii, 24), Syria (2 Sam. viii, and 2 Kings vi, 14, 15), Persia (Isa. xxvi, 6); and, lastly, Antiochus Eupator is said to have had 90 chariots armed with scythes (2 Macc. xiii, 2). In the N.T. the only mention made of a chariot, except in Rev. xix, is in the case of the Ethiopian or Abyssinian eunuch of Queen Candace, who is described as sitting in his chariot reading (Acts vii, 28, 29, 36). See RIDE.

Jewish chariots were not doubt imitated from Egyptian models not actually imported from Egypt. These appear to have come into use not earlier than the 18th dynasty (B.C. 1580). The war-chariot, from which the chariot used in peace did not essentially differ, was extremely simple in its construction. It consisted, as appears both from Egyptian paintings and reliefs, as well as from an actual specimen preserved at Florence, of a nearly semicircular wooden frame with

Ancient Egyptian War Car and Horses, designed from a comp. view of differ. Monuments.
straightened sides, resting posteriorly on the axle-tree of a pair of wheels, and supporting a rail of wood or ivory attached to the frame by leather thongs and one wooden upright in front. The floor of the car was made of rope net-work, intended to give a more springy footing to the occupants. The car was mounted from the back, which was open, and the sides were strengthened and ornamented with leather and metal binding.

Attached to the off or right-hand side, and crossing each other diagonally, were the bow-case, and inclining backwards, the quiver and spear-case. If two persons were in the chariot a second bow-case was added. The wheels, of which there were 2, had 6 spokes; those of pace chariots had sometimes 4, fastened to the axle by a linch-pin secured by a thong. There were no traces; but the horses, which were often of different colors, wore only a breast-band and girths, which were attached to the saddle, together with head furniture, consisting of cheek-pieces, throat-lash, head-stall, and straps across the forehead and nose. A bearing-rein was fastened to a ring or hook in front of the saddle, and the driving-reins passed through other rings on each side of both horses. From the central point of the saddle rose a short stem of metal, ending in a knob, whether for use or mere ornament is not certain. The driver stood on the off side, and in discharging his arrow hung his whip from the wrist. In some instances the king is represented alone in his chariot, with the reins fastened round his body, thus using his weapons with his hands at liberty. Most commonly two persons, and sometimes three, rode in the chariot, of whom the third was employed to carry the state umbrella (2 Kings ix, 29, 24; 1 Kings xxvii, 34; Acts viii, 38). A second chariot usually accompanied the king to battle, to be used in case of necessity (2 Chron. xxxv, 84).

On peaceable occasions the Egyptian gentleman sometimes drove alone in his chariot, attended by servants on foot. The horses wore housings to protect them from heat and insects. For royal personages and women of rank, an umbrelia was carried by a bearer or fixed upright in the chariot. Sometimes mules were driven instead of horses, and in travelling sometimes oxen; but for travelling purposes the sides of the chariot appear to have been closed. One instance occurs of a 4-wheeled car, which (like the ἄγαλμα of Herod. ii, 63) was used for religious purposes. See CART. The processes of manufacture of chariots and harness are fully illustrated by existing sculptures, in which also are represented the chariots used by neighboring nations (Wilkinson, Anc. Egyptians, ii, 506, 507; ii, 70, 76, 2d ed.).

Ancient Egyptian Chariot-makers.

Fig. 1. Sawing out the Axle; 2, Preparing the bent pieces of Wood; 3, b, 3, 4, Shaping the Pole; f, c, Wheel.

The earliest Egyptian chariot noticed in Scripture (Gen. xii, 45) was a two-horse chariot; but, among the Egyptians, it does not appear to have been different from the war-chariot, the splendid military appointments of which rendered it fit for purposes of royal pomp. Hence, although the same word (7ς7γ7γ, merkabah) is again used for chariots of state in Gen. xlvi, 29; 1 Sam. viii, 11; 2 Sam. xv, 1, it undoubtedly denotes a war-chariot in Exod. xvi, 4; Joel ii, 5. In Isa. ii, 7, the same word appears to comprehend chariots of every kind which were found in cities. In fact, chariots anciently in the East were used almost entirely for purposes of state or of war, being very rarely employed by private persons. We also observe that where private carriages were known, as in Egypt, they were of the same shape as those used in war, only having less complete military accoutrements, although retaining the case for arrows. One of the most interesting of the Egyptian paintings represents a person of quality arriving late at an entertainment in his chariot, drawn (like all the Egyptian chariots) by two horses (on hidden by the other in profile). He is attended by a number of running footmen, one of whom hastens forward to knock at the door of the house, another advances to take the reins, a third bears a stool to assist his master in alighting, and most of them carry their sandals in their hands, that they may run with the more ease. This conveys a lively illustration of such passages as 1 Sam. viii, 11; 2 Sam. xv, 1. The principal distinction between these private chariots and those actually used in war was, as appears from the monuments, that in the former the party drove himself, whereas in war the chariot, as among the Greeks, often contained a second person to drive it, that the warrior might be at liberty to employ his weapons with the more effect. But this was not always the case; for in the Egyptian monuments we often see even royal personages alone in their chariots, warring furiously, with the reins lashed round their waist. So it appears that Jehu (who certainly rode in a war-chariot) drove himself, for his peculiar style of driving was recognised at a considerable distance (2 Kings ix, 20). The Egyptians used horses in the equipment of an armed force before Jacob and his sons had settled in Goshen; they had chariots of war, and mounted asses and mules, and
therefore could not be ignorant of the art of riding; but for ages after that period Arab nations rode on the bare back, and guided the animals with a wand. Others, and probably the shepherd invaders, noosed a single rope in a slip-knot round the lower jaw, forming an imperfect bridle with only one rein: a practice still in vogue among the Bedouins. Thus cavalry were but little formidable, compared with chariots, until a complete command over the horse was obtained by the discovery of a true bridle. This seems to have been first introduced by chariot-drivers, and there are figures of well-constructed harness, reins, and mouth-pieces in very early Egyptian monuments, representing both native and foreign chariots of war. In fighting from chariots great dexterity was shown by the warrior, not only in handling his weapons, but also in stepping out upon the pole to the horses’ shoulders, in order the better to attain his enemies; and the charioteer was an important person, sometimes equal in rank to the warrior himself. Both the kingdoms of Judah and Israel had war-chariots, and, from the case of king Josiah at the battle of Megiddo, it is clear they had also traveling vehicles, for, being wounded, he quitied his fighting chariot, and in a second, evidently more common, he was brought to Jerusalem (2 Chron. xxxv. 24). Chariots of war continued to be used in Syria in the time of the Maccabees (2 Macc. xiii. 5), and in Britain when Caesar invaded the island (Bell. Gall. iv. 29).

In the prophecy of Nahum, who was of the first captivity, and resident (if not born) at Elkosh in Assyria, there is much allusion to chariots, suggested doubtless by their frequency before his eyes in the streets of Nineveh and throughout the Assyrian empire. In fact, when prophesying the downfall of Nineveh, he gives a particular and animated description (ii, 84) of their action in the streets of the great city:

The shield of his horses is reddened,
The men of prowess are crimsoned [in drawn]:
With the fire of iron [shining steel armatures] is the chariot in the day of his array,
And the cypress [lances] are brandished;
In the streets will madness the chariot-force,
They will race in the broad places;
Their appearance is as the torches,
As the lightnings will they rush.

Abundant illustrations of this passage occur on the recently discovered sculptures of Nineveh and Babylon. They are minutely described by Layard (Nineveh, i, 268 sq.). The earlier Assyrian war-chariot and harness did not differ much from the Egyptian. Two or three persons stood in the car, but the driver is sometimes represented as standing on the near side, while a third warrior in the chariot held a shield to protect the archer in discharging his arrow. The car appears to have had closed sides. The war-chariot wheels had 6 spokes; the state or peace chariot 8 or more; and a third person in state processions carried the royal umbrella. A third horse, like the Greek παπηρός, was generally attached (Layard, Nineveh, ii, 350). In later times the third horse was laid aside, the wheels were made wider, and had 8 spokes, and the front of the car, to which the quiver was removed from its

Ancient Assyrian Warriors in a Chariot.

former side position, was made square instead of round. The cars were more highly ornamented, panelled, and inlaid with valuable woods and metals, and painted. The embroidered housings, in which in earlier times the horses were clothed, were laid aside, and plumes

Royal Chariot. From the later Assyrian Monuments.

and tassels used to decorate their necks and foreheads (Layard, Nineveh, ii, 353, 356; Nineveh and Babylon, p. 541, 587, 608, 618; Mon. of Nim. 2d series, pl. 24; comp. Ezek. xxvii, 20). Chariots used for other purposes than that of war, especially in hunting, were

Also found sculptured on the Assyrian monuments, as well as occasionally carts for the transportation of persons or baggage.

The Persian art, as appears from the sculptures at Persepolis, and also at Koyounjik, shows great similarity to the Assyrian; but the processions represented at the former place contains a chariot or car with wheels of 12 spokes, while, from the sculptures at the latter, it appears that the Elamites, or Persians, besides chariots

Ancient Persian Chariot.
CHARIOT

containing two persons, which were sometimes drawn by four horses, used a kind of cart, drawn by a single mule or more, consisting of a stage on high wheels, capable of holding five or six persons, of whom the driver sat on a low stool, with his legs hanging on each side of the pole (Isa. xxvii, 6; Ezek. xxviii, 24); see Xenophon, Cyrop. iv, 3, 1; ii, 22; Niebuhr, Voyage, ii, 105; Chardin, Voyage, vii, 257, pl. lix; Layard, Ninev. & Bab. p. 447, 449; Olearius, Travel. p. 502. Chariots armed with scythes (lapis se kravipora, Xen. Ancab. i, 7, 10) may perhaps be intended by the "chariots of iron" of the Canaanites; they are mentioned as part of the equipment of Antiochus (2 Macc. xiii, 2), and of Darius (Diod. Sic. xvii, 58; Appian, Syr. 82). Xenophon mentions a Persian chariot with 4 poles and 8 horses (Cyrop. vi, 4). The Persian custom of sacrificing horses to the Sun (Xen. Cyrop. vii, 3, 12), seems to have led to offerings of chariots and horses for the same object among the Jewish monarchs who fell into idolatry (Ezek. viii, 17; 2 Kings xxii, 11; see P. della Valle, p. 255). See WAGON.

Not very different from the Persian chariot is one represented on a coin found at Babylon, but somewhat ruder; but the spokes of the wheels are eight, as in the Assyrian chariot. This coin has given occasion to much inaccurate speculation in the attempt to connect it with the history of Daniel. See BABYLON.

Ancient Babylonian Chariot.

Among the Greeks and Romans, chariots were used at all times for purposes of war, and the chariot-race of the "Isthmian Games" were especially famous (see Smith's Dict. of Class. Antiquity, s. v. Carraus). See CHARIOT-RACE.

Ancient Greek Chariot.

Among the parts of wheel-carriages mentioned in the Scriptures are: 1, the wheel, בָּתֶן (Bethan, Exod. xiv, 25, etc.); also בָּתֶן (Bethan, Exod. xxviii, 28) or בָּתֶן (Bethan, Isa. v, 28; Ezek. x, 2, 6; xxviii, 34; xxvi, 10; id. Chald. Dan. vii, 1); 2, the rim, בַּל (Bal, 1 Kings vii, 33; Ezek. i, 18); 3, the spoke, בָּתֶן (Bethan), 1 Kings vi, 33; 4, the hub, בָּתֶן (Bethan), 1 Kings vii, 33; 5, the axle, בָּתֶן (Bethan, 1 Kings vii, 33, 38). To horses (yoke) the horses or other animals is designated by בָּתֶן (Bethan, Gen. xxii, 29; 1 Sam. vi, 7; 1 Kings xxiv, 14), or בָּתֶן (Bethan, Mic. i, 13); also בָּתֶן (Bethan, Hos. v, 11), which properly signifies to ride or drive. See WHEEL.

The word chariot is sometimes used figuratively for horses or armies (Psa. cxviii, 17; 2 Kings vi, 17); and Elijah, by his prayers and counsels, and power with God, was "the chariot of Israel, and the horsemen thereof" (2 Kings ii, 12; see Rashi, De curra Israel, Buntz. 1756). See also נַגְד (Ngad), as he did more for them than all the chariots they could muster (Psa. xxv, 7; Isa. lii, 1). See WAR.

The term "chariot" is likewise used poetically in Scripture to designate the rapid agencies of God in nature (Psa. cv, 3; lxvii, 17; Isa. lxvi, 16; Hab. iii, 8).

CAPTAINS OF CHARIOTS (Exod. xix, 4) might be supposed to denote the officer or officers who had charge of the chariot forces, but the literal meaning is mounted third men (תְּנִינָה). This passage seems obscure, but a picture from an Egyptian tomb (the Ramesseum of Thebes), nearly or quite as ancient as the period to which the above-cited passage relates, furnishes a key to this otherwise difficult expression. It represents three men standing upon a chariot, two of whom are prepared for action, and the third manages the horses (compare the large cut above of the Assyrian chariot). They were probably selected for their valor, and perhaps formed by themselves a distinct division of the army, and each had its distinct officer (Exod. xiv, 7). See CAPTAINS.

CHARIOT OF THE CHERUBIM probably means the frame-work on which the cherubim rested, and one pattern of which might resemble the body of a chariot (1 Chron. xiii, 18). See CHERUB.

CHARIOT-CITIES, cities specially designated for storing the chariots of war during the time of peace, as magazines and arsenals of modern times are used (2 Chron. i, 14). See CITY.

CHARIOT-HORSES, such as were peculiarly fitted, by size, spirit, docility, or special training, for service in chariots, as carriage, draught, and saddle horses of later days (2 Kings vii, 14). See HORSE.

CHARIOT-MAN, the driver or charioteer, or perhaps an officer who had charge of the chariot (2 Chron. xviii, 38). See DRIVER.

CHARIOTS OF WAR (Exod. xiv, 7; 2 Sam. viii, 4). One class of carriages thus deminated were used as the common vehicles of princes and generaces; but another formed the most terrible of military engines, and were employed in great numbers to break the enemy's battalions by rushing in among them (1 Sam. xiii, 5; 1 Chron. xviii, 4). Like other ancient carriages, they had usually only two wheels; and iron hooks or scythes, strong and sharp, were affixed to the extremities of the axles on each side, which made dreadful havoc among the troops (Josh. xi, 4; Judg. iv, 8, 18). War-
CHARISMA: 218 • CHARITY

rators sometimes fought standing on them, or leaping from them upon the enemy. The chariots in the army of Cyrus, were numerous, and fully twenty men fought from them. If we examine the sculptures of Egypt, we find that the strength of the armies of the Pharaohs was in their chariots, an Egyptian army being composed exclusively of infantry and bigas, or two-horsed chariots, which carried the driver and the warrior. In no instance is an Egyptian ever represented on horseback. Such evidence shows that the Egyptians did not employ cavalry is difficult to reconcile with the Scripture account of the pursuit of the Israelites, which expressly speaks of "the horses and chariots of Pharaoh, and his horsemen" (Exod. xiv. 9). Hengstenberg, after a critical examination of the text (loc. cit.), writes in the Doctor's Manual (p. 126), that "Moses does not mention cavalry at all; that, according to him, the Egyptian army is composed only of chariots of war, and that he therefore agrees in a wonderful manner with the native Egyptian monuments." See Army; CHARIOT.

CHARIOTS OF THE SUN. The ancient Persians who worshipped the sun dedicated to that luminary certain horses and chariots, which, in allusion to his rapid course, they consecrated to him. The kings of Judah fell into this peculiar idolatry. In these chariots, the Rabbins informs us, the king and nobles rode when they went forth to meet the morning sun. The idolatry was prohibited by the Mosaic law, and the penalty for using them was death on the spot (2 Kings xx. xxi. 11). See SUN.

In the narrative of the translation of Elijah (2 Kings ii. 11), it is said "there appeared a chariot of fire, and horses of fire," and a corrupt tradition of this miraculous ascension seems to have been preserved in the East. Mr. Roberts says, "The Hindoes believe their supreme god Siva sends his angels with a chariot, to fetch the souls of those who are devoted to him; and there are occasionally horses, but at other times none. The holy king Tirru-Sangiv (divine chank) was taken to heaven, body and soul, without the pain of dying."

CHARIOT-RACE, the most renowned of all the exercises used in the Olympic games of the ancient Greeks and Romans, and those from which the victors were held to derive the greatest honor. There appear to be but one or two allusions to them in the New Testament, and these are involved in some uncertainty. In the Old Testament verse properly success is in collecting a church at Ephesus: "But I will tarry at Ephesus until Pentecost, for a great door and effectual is opened unto me, and there are many adversaries;" alluding, it is thought, to the door of the circus, which was opened to admit the chariots when the races were to be in; and by the word εὐρωπίαμος, "adversaries," which Doddridge renders "oppressors," he is supposed to mean antagonists or competitors. In Colos. iii. 15, he says, "Let the peace of God rule (ἡ τύχῃ προείστη, preside, as the arbiters or judges of the games) in your hearts:" 2 Thess. iii. 1, "that the word of God may have free course (τεῦχω, run), and be glorified;" reiterating the wish of the apostles to the expositors; 1 Tim. iv. 8, "Bodily exercises (γυμνασία, gymnastic discipline) profiteth little," alluding to the training of the racers; Heb. xii. 23, "the general assembly (καὶ ἡ συνόδος, crowd of attendants). See GAMES.

Charisma (χαρίσμα), (1) one of the names by which baptism was designated in the early Church; (2) a spiritual gift. See Gifts, Spiritual.

Charity, one of the three chief Christian graces. The Greek word χάρις, rendered in the authorized version love, is occasionally translated charity, and is rendered throughout 1 Cor. xiii. The old English word charité meant—love to God and man, which is the fulfilling of the law. Perhaps it would have been better had the word been rendered "love." The meaning of the term can, however, scarcely be misunderstood after a careful perusal of that important chapter. In popular usage, charity is often restricted to one's giving, which is only one of its manifestations. See Love. Charity considered, in this sense of love, is to be the habitual affection of the heart, in all our relations to our fellow-creatures. Charity considered, 1. As to its source, implies a regenerated state of mind. 2. As to its exclusiveness, shuts out all, 1; anger; 2, impecability; 8, hatred; 4, pride; 5, jealousy; 6, envy; 7, artificial distinctions, as its limitations. 3. As to its active expression; (1) it delights in sympathy, liberty, and, in general, in benevolence; (2) it dictates and regulates works of mercy; (3) it teaches us that we are only stewards of the divine goodness. "All spiritual gifts are surpassed by charity, which alone puts on them the crown of perfection (1 Cor. xiii, 8-13). By this we are to understand not a mere indelation and emotion, however pure, or natural benevolence and philanthropy, however disinterested; but a disposition wrought by the Holy Ghost, springing from the consciousness of reconciliation to a vital supernatural energy, uniting all the powers of the soul with God, the essence of all love, and consecrating them to the service of his kingdom. Without this, even speaking with the tongues of angels were but 'sounding brass or a tinkling cymbal.' Without this, the beauty of Charity, the splendor of knowledge, and a power of faith which could call the impossible into being, have no abiding worth or practical importance. Without this, the other gifts would separate, pass into the service of ambition, and thus ruin themselves and the whole church. Without this, the gift of tongues is as a wind and enthusiasm, knowledge puffs up (1 Cor. xiii, 8), and the gift of government degenerates to despotism. As faith lies at the bottom of all the charisms, and forms their common root, so also love is properly not a gift by itself, but the soul of all gifts, binding them together like the members of a body, making them work in for each other, and directing them to the common good. It maintains the unity of the manifold divine powers, subordinates every thing individual and personal to the general, and makes it subservient to the interests of the body of Christ."

"For another reason, love transcends all the other gifts. For it is the root of all. In the future world the other gifts will disappear, at least in their present nature. The mysterious tongues will cease in the land, where all understand them. Prophecies will be lost in their fulfilment, like the aurora in the moon. Knowledge, which on earth is but partial, will merge in immediate, perfect intuition. Nay, faith itself will be exchanged for sight, and hope for fruition. But love, by which even here we have fellowship of life with God through Christ, remains love. It changes not. It rises not out of its element. It passes not into another sphere. It only deepens and expands. It can never gain higher grounds, never reach another and letter form of union with another. It is appraised of all and can behold the more fully, more lively, and more blissful (1 Cor. xiii, 8-13)." Charity, says Bishop Warburton somewhere, "regulates and perfects all the other virtues, and is in itself in no want of a reformer."

"Hence Paul exhorts the Corinthians, who were inclined to place an undue estimate on the more striking and showy charisms, to strive after charity, above all, as the greatest and most precious gift, the cardinal and universal Christian virtue, of which heathenism had scarce the faintest notion. 'Heathenism,' observes Olshausen (Comment. iii. p. 698), 'did not get beyond χαρίς. It knew nothing of the Christian χάρις, in the Old Testament being but the same as χαρίσμα. Eros, even in its purest, noblest form, is but the result of want, the longing for love, springing from the consciousness that we have not what is worth loving.
CHARITY, BROTHERS OF • 219 CHARITY, SISTERS OF

But the Christian diēgýv of charity is the streaming forth of positive love, God himself dwelling in the believer, so that streams of living water flow out of him (John iv, 14). And he commands it, in the most glowing and attractive description ever uttered by tongue of man or angel, in language which draws the heart with perpetual freshness, like music from the bowers of eternity, and is of itself enough to put beyond all doubt the divinity of Christianity and its infinite superiority to all other religions. 'And now (and in the present earthly life of Christians) alidith faith, hope, charity, these three; but the greatest of these is charity.' (1 Cor. xiii, 13.) (Schaff: Apostolical Church, § 124). See also Watson, Theol. Institutes, pt. iii, ch. iv, § 8; Fellowes, Body of Theology, ii, 61, etc.; Barrow, Works, vol. i, ser. 27, 28; Fletcher, Works (N.Y. ed.), iii, 156 sq.

Charity, Brothers of (called, in Italy, Fate ben fratelli; in France, Frères de l'Charité; in Spain, Brothers of Hospitality), a Romanist order, founded in 1540 at Seville, by the Portuguese Johannes a Deco, for caring for the poor in France by reforming their home life. In 1572 Pope Pius V confirmed it, under the rule of St. Augustine, and it then limited itself to serving hospitals for the sick of all nations and religions. In 1590 it had a number of institutions in France, Italy, Germany, Poland, both Indies, and other countries. In 1617 it was received into the number of regular orders by adopting the solemn vows. In 1638 the brethren were exempted from the jurisdiction of the diocesan bishops, and in 1624 they received all the privileges of the mendicant orders. Among the hospitals of this order, those of Milan, Paris, Rome, Naples, Vienna, Prague, are especially celebrated. The number of houses amounts at present to over a hundred, in Italy, France, Spain, Austria, Prussia, Bavaria, and North and South America. See Helyot, Ordres Religieux, vol. ii; Fehr, Geschichte der Mönchskorben, ii, 80 sq.

Charity, Sisters of, called also Daughters of Christian Charity (Sœurs ou Filles de la Charité), a community of women in the Roman Catholic Church for nursing the poor and the sick, founded in 1629 at Caen in France by Vincent de Paul, aided by Madame Louise de Marillac le Gras. The rule which Vincent gave to his community was confirmed by the pope in 1666, when the community spread rapidly, and by 1685 had two hundred and twenty-four houses were established. It still at the end of the eighteenth century they remained almost entirely confined to France, where their labors were interrupted by the Revolution. After a few years they were permitted to take them up again, and in 1807 they were placed under the protection of the mother of Napoleon. Since that time they have enjoyed the patronage of all French governments. In 1827 they nursed in France 145,000 sick persons and 220,000 children, whom they served after their own fashion. They have rapidly established themselves in all states in which monastic orders are not forbidden. Several states, as Prussia and Baden, which exclude most of the monastic orders, have made an exception in favor of the Sisters of Charity. Since 1849 they have been admitted into all the German states except Saxony. In all Germany they had, in 1868, establishments in 194 places, with about 2000 members. Spain promised to admit them in the Concordat of 1851. They established themselves in Portugal in 1857, but were thrown out as also in Brazil, by the then liberal party, and mobbed by the populace. Large numbers of them were called to Russia by the government of Alexander II, and they have penetrated even into Denmark and Sweden. In Turkey they conduct several largely-attended schools. They are also found in many of the states of the United States, in Canada, and in several of the states of Central and South America. In the United States they were established in 1809 by Elisabeth Seton (a convert from Protestantism), with a distinct rule, which is still followed in the dioceses of New York, Brooklyn, Newark, and Halifax. The houses in the other dioceses have abandoned Mrs. Seton's rule, and have united with the French order. In 1852 there were 86 houses under the charge of the sisters in different parts of the United States, and the number of sisters was 420. This number has since considerably increased. In the diocese of New York alone there are now about 290 sisters, having under their care, besides children, the Charity schools in New York, a hospital, and female asylums, and an industrial school. Their mother-house is at Fonthill, on the Hudson River, near Yonkers.

Numerous other communities of women have been established on the same plan, and on nearly the same principle. The most important among them is the congregation of St. Carolus Borromeus, so called because they chose Borromeo as their patron. Their mother-house is at Nancy, France; and in 1845 they counted 70 houses, with about 700 members. Another was founded in 1808 in Westphalia, by baron Droste zu Vischerling, who became afterwards archbishop of Cologne. It counted, in 1858, 41 establishments, with about 2500 members. The United States have also a number of similar institutions, as Sisters of Charity of Montreal, Sisters of Charity of Nazareth, Sisters of our Lady of Mercy, Sisters of Mercy, Sisters of Charity of the Blessed Virgin, Sisters of Charity of St. Augustine, most of which have been founded during the present century.

No monastic institution has spread so rapidly since the beginning of the present century with equal rapidity, and the increase is still going on in nearly every part of the world. In 1862, the number of establishments, as far as known, was 1064; namely, 947 in Europe, 60 in America, 17 in Asia, 17 in Africa, and 5 in Australia and Oceania (from the last edition of the Buch der Kirche, Basle, 1862). The number of members of the French order was estimated at 13,000, and that of all the Sisters of Charity at 28,000.

"Conscious that celibacy alone excites little admiration in modern times, Rome has sought, by her "Sisters of Charity," and by her educational orders, to give her female aristocracy better claims on the gratitude of mankind. In England and America the female orders have attracted many to the Church of Rome, and softened many antipathies. The association of unmarried females for such purposes will ever have an attraction for romantic minds; yet the well-worked Protestant congregations in our cities send out more such sisters of charity and educators of the young than any of the sisterhoods of Rome. Without any bond but the law of love, and without observation, because without the dress and separation of Rome's "Sisters of Charity," thousands now do the part of Priests in this part of the world, and, like Counties, duties and enjoyments, unconscious that they are better than others, or that they have attained a higher perfection than their fathers and mothers" (Lewis, Bible, Missal, and Dictionary, i, 124). See also Fahr, Geschichte der Mönchskorben, ii, 3 sqq.; Erenites, Der Orden der barmherzigen Schwestern (Schaafhausen, 1814); Methodist Quarterly Review, Jan., 1819, art. v.
Charlemagne (Charles I, or the Great), Emperor of the West, was born at Salzburg, in Bavaria, about 742, and, jointly with his brother Krollof, succeeded his father, Pepin-le-Bref, in 768. Karolom died in 771, and Charlemagne became sole sovereign. By his wars against the Saxons and the Saracens of Spain, he increased his empire until he was master of the best part of Europe. Pepin had granted the exarchate of Ravenna to the pope and his successors forever. After Pepin's death, Diedrich, the Lombard king, attacked the pope (Adrian I), who applied to Charlemagne for aid. He crossed the Alps (A.D. 774) with a formidable army, and terminated the contest between the bishops of Rome and the kings of Lombardy forever. The exarchate of Ravenna was overthrown, its vanquished prince was sent into France, and Charlemagne proclaimed himself king of the Lombards. The conqueror visited Rome, where it is said he not only confirmed the grants which Pepin had made to his bishops, but added to them new donations. By these acts he opened a way to the attainment of an object which Pepin had contemplated, but was unable to accomplish—he was enabled to gain the authority as well as to assume the title of Emperor of the West. When the Lombards were defeated, he was anointed by Pope Leo III crowned him Emperor of the West, with the title of Carolus I, Caesar Augustus. "Although this added

nothing directly to his power, yet it greatly confirmed and increased the respect entertained for him; such was still the lustre of a title with which were associated recollections of all the greatness of the Roman empire. Nicephorus I, emperor of Constantinople, also acknowledged him, and between them they fixed the limits of the Eastern and Western Empires. A profound statesman and legislator, as well as a successful conqueror, he then devoted the remainder of his life to the internal improvement of his vast empire, and to the fortification of its frontiers against the incursions of the Normans and Danes. In 813 he named his third son, Louis (Louis le Débonnaire), his colleague in the empire, and died at Aix-la-Chapelle January 28, 814. "His last days, after the coronation of his son Louis, were occupied in correcting the text of the four Evangelists, in which he was assisted by Greeks and Syrians. Charlemagne had long shown a great zeal for religion; he never failed, while his health permitted, to attend divine service daily, morning and evening. He took great care that the service should be conducted with decorum and propriety, supplied his chapels with abundance of vestments and ornaments, and, being perfectly instructed in the best manner of reading and singing, he corrected the mode of performing both; but he himself never read publicly in church, but contented himself with singing in a low tone and with others. His aims were not only liberally bestowed in his own dominions, but on all the poor and distressed Christians in Syria, Egypt, Africa, Jerusalem, Alexandria, and Carthage; and he cultivated the friendship of unbelieving princes with a view to assuage the sufferings of the Christians under their dominion" (Palmer, Church History, ch. xv).

Charlemagne was throughout his reign the champion of Christianity. He never rested until the Saxons were not only subjected, but baptized, if not Christianized; his war against the Lombards, whose kingdom he finally annexed, was originally commenced at the instance of the pope, whose power was menaced by the inroads of these barbarians. It cannot be denied, however, that Charlemagne propagated Christianity by the use of "campaigns" and "knights" (as he called the Saracens of Spain), he increased his empire until he was master of the best part of Europe. Pepin had granted the exarchate of Ravenna to the pope and his successors forever. After Pepin's death, Diedrich, the Lombard king, attacked the pope (Adrian I), who applied to Charlemagne for aid. He crossed the Alps (A.D. 774) with a formidable army, and terminated the contest between the bishops of Rome and the kings of Lombardy forever. The exarchate of Ravenna was overthrown, its vanquished prince was sent into France, and Charlemagne proclaimed himself king of the Lombards. The conqueror visited Rome, where it is said he not only confirmed the grants which Pepin had made to its bishops, but added to them new donations. By these acts he opened a way to the attainment of an object which Pepin had contemplated, but was unable to accomplish—he was enabled to gain the authority as well as to assume the title of Emperor of the West. When the Lombards were defeated, he was anointed by Pope Leo III crowned him Emperor of the West, with the title of Carolus I, Caesar Augustus. "Although this added

nothing directly to his power, yet it greatly confirmed and increased the respect entertained for him; such was still the lustre of a title with which were associated recollections of all the greatness of the Roman empire. Nicephorus I, emperor of Constantinople, also acknowledged him, and between them they fixed the limits of the Eastern and Western Empires. A profound statesman and legislator, as well as a successful conqueror, he then devoted the remainder of his life to the internal improvement of his vast empire, and to the fortification of its frontiers against the incursions of the Normans and Danes. In 813 he named his third son, Louis (Louis le Débonnaire), his colleague in the empire, and died at Aix-la-Chapelle January 28, 814. "His last days, after the coronation of his son Louis, were occupied in correcting the text of the four Evangelists, in which he was assisted by Greeks and Syrians. Charlemagne had long shown a great zeal for religion; he never failed, while his health permitted, to attend divine service daily, morning and evening. He took great care that the service should be conducted with decorum and propriety, supplied his chapels with abundance of vestments and ornaments, and, being perfectly instructed in the best manner of reading and singing, he corrected the mode of performing both; but he himself never read publicly in church, but contented himself with singing in a low tone and with others. His aims were not only liberally bestowed in his own dominions, but on all the poor and distressed Christians in Syria, Egypt, Africa, Jerusalem, Alexandria, and Carthage; and he cultivated the friendship of unbelieving princes with a view to assuage the sufferings of the Christians under their dominion" (Palmer, Church History, ch. xv).

Charlemagne was throughout his reign the champion of Christianity. He never rested until the Saxons were not only subjected, but baptized, if not Christianized; his war against the Lombards, whose kingdom he finally annexed, was originally commenced at the instance of the pope, whose power was menaced by the inroads of these barbarians. It cannot be denied, however, that Charlemagne propagated Christianity by the use of "campaigns" and "knights" (as he called the Saracens of Spain).
Charles was crowned emperor with great pomp at Aix-la-Chapelle, Oct. 22, 1526. His first act was to issue a call for convoking a diet at Worms early the next year, in order to consider the means of suppressing the new religious ideas awakened by the teachings of Luther. This assembly was held April 17-26, 1521, and thither Luther repaired under a safe-conduct, and plead his case; but an edict of outlawry was pronounced against him. See Worms. The prudent action of Charles was proverbial. Having alienated the Emperor, who was naturally jealous of the Habsburg power, and thither left to himself the affairs of the empire, Charles had to meet the new danger with a strong army. He marched against the Imperialists, and after a bitter struggle in which many of his troops were killed, he forced the Imperialists to agree to a truce. The treaty was signed at Passau, Aug. 2, 1523, and was a great victory for Charles. He had now established his power in Germany, and was able to turn his attention to other matters.

Shortly before this, the death of Francis I of France had given Charles the opportunity of acquiring new possessions in Italy. He therefore decided to take the field against the Turks, who were threatening to invade the empire. He marched against the Turks, and after a hard-fought battle, he captured the city of Belgrade. This was a great victory for Charles, and he was now able to turn his attention to the affairs of the empire.

In 1526, Charles issued a decree for the suppression of the religious wars in Germany. This was a great victory for Charles, and he was now able to turn his attention to the affairs of the empire.

In 1528, Charles issued a decree for the suppression of the religious wars in Germany. This was a great victory for Charles, and he was now able to turn his attention to the affairs of the empire.

In 1530, Charles issued a decree for the suppression of the religious wars in Germany. This was a great victory for Charles, and he was now able to turn his attention to the affairs of the empire.

In 1531, Charles issued a decree for the suppression of the religious wars in Germany. This was a great victory for Charles, and he was now able to turn his attention to the affairs of the empire.

In 1532, Charles issued a decree for the suppression of the religious wars in Germany. This was a great victory for Charles, and he was now able to turn his attention to the affairs of the empire.

In 1533, Charles issued a decree for the suppression of the religious wars in Germany. This was a great victory for Charles, and he was now able to turn his attention to the affairs of the empire.

In 1534, Charles issued a decree for the suppression of the religious wars in Germany. This was a great victory for Charles, and he was now able to turn his attention to the affairs of the empire.

In 1535, Charles issued a decree for the suppression of the religious wars in Germany. This was a great victory for Charles, and he was now able to turn his attention to the affairs of the empire.

In 1536, Charles issued a decree for the suppression of the religious wars in Germany. This was a great victory for Charles, and he was now able to turn his attention to the affairs of the empire.

In 1537, Charles issued a decree for the suppression of the religious wars in Germany. This was a great victory for Charles, and he was now able to turn his attention to the affairs of the empire.

In 1538, Charles issued a decree for the suppression of the religious wars in Germany. This was a great victory for Charles, and he was now able to turn his attention to the affairs of the empire.

In 1539, Charles issued a decree for the suppression of the religious wars in Germany. This was a great victory for Charles, and he was now able to turn his attention to the affairs of the empire.

In 1540, Charles issued a decree for the suppression of the religious wars in Germany. This was a great victory for Charles, and he was now able to turn his attention to the affairs of the empire.

In 1541, Charles issued a decree for the suppression of the religious wars in Germany. This was a great victory for Charles, and he was now able to turn his attention to the affairs of the empire.

In 1542, Charles issued a decree for the suppression of the religious wars in Germany. This was a great victory for Charles, and he was now able to turn his attention to the affairs of the empire.

In 1543, Charles issued a decree for the suppression of the religious wars in Germany. This was a great victory for Charles, and he was now able to turn his attention to the affairs of the empire.

In 1544, Charles issued a decree for the suppression of the religious wars in Germany. This was a great victory for Charles, and he was now able to turn his attention to the affairs of the empire.

In 1545, Charles issued a decree for the suppression of the religious wars in Germany. This was a great victory for Charles, and he was now able to turn his attention to the affairs of the empire.

In 1546, Charles issued a decree for the suppression of the religious wars in Germany. This was a great victory for Charles, and he was now able to turn his attention to the affairs of the empire.

In 1547, Charles issued a decree for the suppression of the religious wars in Germany. This was a great victory for Charles, and he was now able to turn his attention to the affairs of the empire.

In 1548, Charles issued a decree for the suppression of the religious wars in Germany. This was a great victory for Charles, and he was now able to turn his attention to the affairs of the empire.

In 1549, Charles issued a decree for the suppression of the religious wars in Germany. This was a great victory for Charles, and he was now able to turn his attention to the affairs of the empire.
CHARLES IX

N. Y. 1857); Sismondi, Histoire des Francais, 18 vols. 8vo (Bruxelles, 1849; see index in 18th vol.); Robertson, History of the Reign of Charles V; Lanz, Correspondence des Kaisers Karl V (Leips. 1844-46, 8 vols.); Kervyn de Lettenhove, Aufzeichnungen des Kaisers Karl V (Germany trans. Leips. 1862); Gachard, Correspond. de Charles Quint (Brussels, 1860). Special works on the life of Charles V after his abdication and retirement have been written by Stirling (Cloake's Life of the Emperor Charles the Fifth, N. Y. 1:mo); Gachard (Ritrac et Mort de Ch. V (Brussels, 1864-55); Pichot (Chronique de Charles V, Paris, 1864), and Migne (Charles Quint, Paris, 1864).

Charles IX, second son of Henry II and of Catharine de Medicis, was born at St. Germain-en-Laye June 27, 1550, and on December 5, 1550, succeeded his brother, Francis II. "His character was a compound of passion, acuteness, heartlessness, and cunning. Although only twenty-four years of age when he died, so well had he acquired this talent that he had a love of perfidy and cruelty, that he found time, with her assistance and that of the Guises, to perpetrate an act so hideously diabolical that all civilized Europe still shudders at the recollection. The massacre of St. Bartholomew's (q. v.), Aug. 24, 1572, was the culmination of a campaign of terror that the ambiguities which disgraced his reign. The result was that civil war broke out anew, and assumed a very threatening character, as political malcontents associated themselves with the Protestants. Charles died May 30, 1574."—Chambers, Encyclopedia, s. v.; and a good article, with an account of the massacre of St. B., in the English Cyclopedia, s. v. Charles IX. See France, Reformed Church of.

Charleton, Walter, M. D., an English physician, was born Feb. 3, 1619, was educated at Magdalen Hall, Oxford, became an eminent practitioner in London, president of the College of Physicians in 1669, and died in 1707. He was mentioned here on account of his Darkness of Atheism dispelled by the Light of Nature (London, 1692, 4to); and Harmony of Natural and Positive Divine Laws (London, 1860, 8vo).—Darling, Cyclopaedia Bibliographica, ii, 637; Rippin, Bibliographia Britannica, iii, 448 sq.

Charm (��), n. [haskh, to whisper, as enchanters]. In Psa. lvii, 5; Jer. viii, 17; Eccles. x, 11 ("enchantment"); this word is used to express serpent-charm ag. In most of the first passages it occurs in connection with תוי (cher, strictly a confederacy, i. e. with spirits of the other world), which is rendered in the same manner, and has a similar meaning. In other passages, although still rendered "charm," both words, as is the case also with other terms, signify ordinary necromancy or conjuration. That the most venomous reptiles might be rendered tame and harmless by certain charms, is a matter of much doubt, and was first supposed to be true when Virgil said, "that they were accustomed to try the legitimacy of their new-born children by exposing them to the most cruel and venomous serpents, which dared not molest or even approach them unless they were illegitimate. He thinks their power resided in some kind of charm which is supposed to be in London, and present in the abhorred (Hist. Nat. lib. vii, c. 2). Shaw, Bruce, and indeed all travellers who have been in the Levant, speak of the charm of serpents as a thing frequent, seen (especially Thomson, Land and Book, ii, 216, 238). The much-dreaded Cobra di Capello, or good Serpent of the Hindoos, is capable of being tamed; and the Malabar jugglers have the art of teaching them to dance to the music of the harmonious sounds of their diageleot. The serpent first seems astonished, then begins to renew himself, and sometimes, by a gentle undulatory motion of the head, and with distended hood, seems to listen with pleasure to the notes. These dancing snakes are carried about in baskets by the jugglers all the winter. It is a well-attested fact that when a house is infested with these snakes, and some others of the Coluber genus, which destroy poultry, or with some even of the larger serpents of the boa tribe, the musicians are sent for, who charm the reptiles from their hiding-places to their own destruction (Oriental Memoirs). It is often said that the charmer introduces the tame serpents, and that they obey the accustomed call, and are exhibited in proof of the triumph of the charmer's art. This may sometimes be the case, but instances are known in which there could not have been any collusion or contrivance; and, after the severest test and scrutiny, many have been obliged to rest in the conclusion that the charmers do really possess the physical means of discovering the presence of serpents without seeing them, and of attracting them from their lurking-places. This is Mr. Lane's conclusion, who also suspects that they discover the presence of serpents by the growth of the animal. "The principal power is a voice or noise, to those of the Fowler, who, by the fascination of his voice, allures the bird into his net (Modern Egyptians)."

Charnock, Stephen, D. D., an eminent English Nonconformist, was born in London in 1628. He received his earliest education from his father, and when very young he entered Emanuel College, Cambridge, under Dr. William Sancroft. He commenced his labors in the north of England, where he was a minister in the church of Manchester, and was afterwards sent to Oxford, where he became chaplain to the Bishop of Durham in 1652, and became fellow of New College, Oxford, and in 1652 became senior proctor of the university. In 1663 he went to Dublin, and his ministry there was eminently successful. About 1660, ejected by the Act of Uniformity, he returned to England, and spent fifteen years in some parts of the country, and in about London, and was for some time kept in prison. He then settled at the house of the Lord Mayor of Bath, and was granted a pension by the Duke of Buckingham, and settled congregation until about 1675. He died July 27, 1680. His sermons constitute the chief of his works; and while on the doctrines they contain, being
decidedly Calvinistic, a variety of opinions are entertained, yet it is universally admitted that they are distinguished by great originality and genius, and are well deserving of the widely-spread attention they have so long received. His reasons are nervous and his appeals affecting. His judgment was sound, his taste correct, his imagination lively; his piety undismayed. He was grave without being dull, and perspicuous without being wearisome. His "Treatise on the Attributes of God" is acknowledged to be the best in the English language" (Jones). His Works were republished in 1615 (Lond. 9 vols. 8vo), with a life prefixed by Edward Parsons. There is an American edition of the Attributes, with a life of Charnock, by Symington (N. Y. 2 vols. 8vo), and a new edition of his Works is now going on at Edinburgh (Nichols), 1866, vols. 1-9, 8vo. See Jones, Christian Biography, p. 106; Symington, Charnock, with his Life (N. Y. 12mo); Middleton, Eccles. Biography, iii. 448; Calamy, Non-conformist's Memorial (Lond. 1778), i. 159 sq.

Charr'd (Kaph cid), another mode of Anglicizing the name Haran (q.v.).

Charter-house (a corruption of Chartreux, i.e. Carthusian house) is a hospital, chapel, and school-house in London, established in 1611 by Sir Thomas Sutton. It had originally been a Carthusian monastery, but after the dissolution of monastic establishments by Henry VIII it fell into various hands, and was finally purchased from Lord Suffolk by Sir Thomas Sutton for £15,000, who endowed it with the revenues of upward of 20 manors, lordships, and other estates in various parts of England. This "masterpiece of Protestant English charity," as old Fuller calls it, serves three uses—it is an asylum for poor brethren, an educational, and a religious institution; hence Bacon terms it a "triple good." The Charter-house school is memorable as the place where Barrow, Addison, and John Wesley received their early education.

Chase (חַץ, חַץ, ḫ̄oww, etc.). The practice of hunting wild animals early prevailed among the nomadic Hebrews (Gen. xxv, 28; xxvii, 8 sq.), and continued to later times to be a common employment (Lev. xvii, 13; Prov. xii, 3; Josephus, War, i. 21, 18), both for the sake of the flesh of the game (Sirach xxxvi, 21; but in the Sabatical year it was allowed to multiply, Exod. xxiii, 11; Lev. xxv, 7; comp. Michaelis, Mos. Reck, iii, 178 sq.), and also for the extermination of noxious beasts (2 Sam. xxiii, 20), of both which there was no lack in Palestine (see Harmar, i. 828 sq.). The means employed in this pursuit were usually the bow (Gen. xxvii, 3), the spear or javelin (comp. Strabo, xv, 754), the net (נֶפֶשׁ, נֶפֶשׁ); which was likewise used for the larger kinds of animals, as gazelles, Isa. ii, 21, and even for lions, Ezek. xix, 8), the sling (ןָבָּר, נָבָּר, Eccles. ix, 12; Psa. xci, 8), and the pitfall (הֶבְדֶל, הֶבְדֶל, Plix. x, 54; comp. Ezek. xix, 4; 2 Sam. xxiii, 20), the last especially for the

Ancient Chase in the Desert of Thebaid (Wilkinson).

tion (Shaw, Trav. 152 sq.). Compare the description in Job xviii, 8 sq. They do not appear to have had hunting dogs (yet comp. Joseph. Ant. iv, 8, 9), and it is doubtful if in hunting for them they trained falcons or other species of birds (Elian, Anim. viii, 54), although hawks (Harmar, iii, 79), like hounds (Odys. xix, 418; Strabo, v, 215; Philostr. jovm. i, 28; Polyb. xxxi, 22; Curt. i, 3, 31; Plin. viii, 61; Becker, Char- thole. i, 889) were anciently, and still are universally common in the East (Shaw, Trav. p. 506; Kampfer, Amm. p. 131). On the Egyptian monuments hunting scenes are frequently represented (Wilkinson, i, 213 sq.). Hunting became an aristocratic sport (Meurs. ad Lyco. p. 499 at least in later periods of Jewish history (Josephus, Ant. xv, 7, 7; xvi, 10, 3; see also Philo, ii, 886; comp. Heindorf on Horace, Sat. ii, 2, 9). Scenes occur in which when he removed over new wild animals even without weapons (Jugd. xiv, 6; 1 Sam. xvii, 35). (See Jahns Bibli. Arch. § 52.) See NIMROD.

The instruments and modes of the chase are sometimes used figuratively, to indicate the wiles of an adversary, great danger, or impending destruction (Ps. xix, 19; Prov. xi, 21; xv, 32; Prov. xxi, 27; Isa. xxxiv, 17; xiii, 12; Jer. v, 26; vi, 21; xvi, 16; xviii, 22; xlviii, 44; Amos iii, 5; Hosea, xiii, 14; Luke xxii, 35; Rom. xi, 9; 1 Cor. xv, 53). See Hunt.

Chase, Abner, a minister of the Methodist Episcopal Church, was born in Stonington, Conn., Dec. 31, 1784, and died in Peoria, Ill., April 27, 1864. At the age of 19 he was converted, and joined the Methodist Episcopal Church. When 22 years of age he was licensed to exhort, and soon after received license to preach. He continued as an exhorter and local preacher about six years, laboring very successfully in winning souls to Christ. In 1819 he was admitted to the New York Conference, and appointed to the Delaware Circuit. The next year, at his own request, he was transferred to the Genesee Conference, in whose ranks he remained, part of the time as superannuated, until his death. Very few men have served the Church more faithfully, acceptably, and usefully.

Minutes of Conf. v, 419; Sprague, Annals, vii, 497.

Chase, Henry, a minister of the Methodist Epis- copal Church, was born in East Haddam, Conn., Sept. 10, 1790. His father being unable to send him to a classical school, he began, unaided, in youth a course of study which ended only with his life, and which included Latin, Greek, Hebrew, French, and German, besides general literature and theology. In 1819 he entered the New York Conference, and served in several laborious circuits until 1829, when he removed to New York, and became a teacher in the Wesleyan Seminary. In 1823 he devoted himself to the service of the scenes of New York, and continued, with short interruptions, to be pastor of "The Mariners' Church" until his death, July 8, 1858. He was greatly beloved and esteemed both by his own flock and by the general public.

Sprague, Annals, vii, 478.

Chase, Philander, D.D., a bishop of the Protestant Episcopal Church, was born at Cornish, N. H., Dec. 14th, 1775, and graduated at Dartmouth College in 1795. After ordination, he was occupied for about a year and a half as a missionary in the State of New York, extending his services to Ulitsa, Auburn, Canaan-digua, and other places. In 1797 he accepted the charge of the Protestant Episcopal churches at Poughkeepsie and Fishkill. He was next appointed to Christ Church, New Orleans, but returned to New England in 1811 to become rector of Christ Church, Hartford, "where he labored with great assiduity, accepting also the churches." His thoughts, however, were directed to the "Great West," and in 1817 he journeyed thither, preaching as he advanced. In May, 1817, he presided at the first meeting of the parishioners of Christ Church, Cincinnati, and became rector at Walth- ington, Columbus, and Delaware, and accepted also the charge of an academy. In 1819 he was elected bishop of Ohio; in 1821 he became President of Cincinnati College. Desiring to supply the West with an efficient ministry, he visited England, and received large contributions for education. About 1826 he en- gaged in the foundation of Kenyon College and the Theological Seminary of Ohio. This activity and energy were, however, ill rewarded, for a "stand was taken by the professors of Kenyon College as to the extent of his powers over the institution of which he was the originator; and on the same day, in September, 1831, with his usual magnanimity, he resigned his offices of president and bishop of Ohio." Being now in search of temporary repose, he selected as his residence a place in Illinois, which he named "The Val- ley of Peace," engaged here, and on the St. Joseph, Michigan, in missionary labors, and planning for himself a wide circle of visitation, which "invaded no man's diocese, parish, or labor." In 1835 he was elected bishop of Illinois, and used similar expedients for the interests of his diocese as those which he had employed in Ohio. Before addressing his new See, however, he paid a visit to England, and collected nearly $10,000 for this purpose. In 1838 he laid the foundation of Jubilee College, and shortly after visited Mississippi, Louisiana, Georgia, and South Carolina, where he received liberal contributions. His colleges were subsequently better endowed, and his own circumstances were correspondingly improved; but he soon died, and thus, towards his latter end, "the smiles of Providence beamed on his broad philanthropy and in- domitable perseverance."

He died Sept. 20th, 1842. His published works are: A Plea for the West (1820); The Star in the West, or Kenyon College (1828); De- fense of Kenyon College, Ohio (1831); Reminiscences: An Autobiography, containing a History of the principal Events in the Author's Life to 1844 (1846; 3 vols. 8vo).

Chase, Equire, a Methodist Episcopal minister and missionary. He was born in Scipio, Cayuga Co., New York, February 15, 1802; was converted at about fourteen; entered the travelling ministry in the Genesee Conference in 1822; was set off with the Black River Conference at its organization in 1826; sailed as missionary to Liberia, Oct. 15, 1866; returned to America in August, 1877; was delegate to General Conference in 1840; sailed again to Africa in January, 1872; returned to Liberia in May, 1874; continued on his mission in Cur- nsey, N. Y., July 26, 1843. Mr. Chase was of pre- possessing appearance, natural amiability, and unaffected piety. In the pulpit his "commanding figure and earnest manner gave him great advantage over his audience, and his sermons bespoke a cultivated mind and diligent preparation." He was a good scient- ific and classical scholar, and a vigorous writer. At presiding elder he was eminently efficient. In 1840 he published An Examination of the Doctrine, His- tory, and Moral Tendency of Roman Catholic Indul- gences. — Black River Conference Memorial, p. 10; Sprague, Annals, vii, 564.

Chase's E'ba (Xen. 5, 7, 6; Vulg. Chaves), a name among the list of the "servants of the Temple" (Ezech. v, 81), which has nothing corresponding to it in Ezra (Josh. 48) or Nehemiah (vii, 50), and is probably a mere cor- ruption of that succeeding it—GazerA (q. v.).

Chasham. See Amber.

Chasidah. See Stork.

Chasidim (מじゃדיה), i. e. wisdom; comp. 'A'zolah, 1 Macc. vii, 18), a name which among the ancient Jews was given to all who manifested their attachment to the Jewish creed in some extraordinary manner. In
a more special sense it was given to a sect which was organized for the purpose of opposing Hellenistic innovations, and uniting the true believers by voluntary imposition of works of supererogation. In the time of Judas Macabaeus the sect readily joined the great leader of the true Jewish faith (1 Macc. 10, 10); the essential principles of the Chasidim were as follows: most rigidly to observe all the ritual laws of purification; to meet together frequently for devotion, carefully preparing themselves for it by ablutions, and wearing their phylactery longer than others; to seek diligently for opponents of their liturgy; not to impose upon themselves voluntarily great acts of self-denial and mortification; to abstain from wine and all intoxicating liquors sometimes for several weeks, and sometimes for their whole lives; and to observe, like the priests, the Levitical purifications during the time of their being Nazarites, and sometimes longer. It also appears from the Mishna that they frequently had all things in common (Abod. Zav., v., 10); that they sometimes withdrew altogether from general society, and devoted themselves entirely to contemplation, and to the study of the written and oral law, while others of the sect, by pursuing secular avocations, procured the common necessaries of life, which they distributed, not to their own wives, and would not at all look at strange women. The Mishna states (Sota, iii., 7) that these principles were carried by some to extravagant excesses. In the course of time the association was split up into parties, those insisting upon the rigid observances forming separate denominations, such as the Essenes, etc., while the moderate party retained the name Chasidim. In the Talmudic period (A.D. 200-500) the meaning of Chasidim was on the whole that of the word in the Old Testament, denoting those who are pious, temperate, mild, forbearing, benevolent, etc. They were, however, occasionally at variance, and sometimes the name of Chasidim would not, for instance, extinguish a fire which broke out on the Sabbath; but they were an exception. In the post-Talmudic period, and in the Middle Ages, the philosophical school appears to have understood by the term those who possessed simple piety in contradistinction to scientific knowledge. The Karaite declared the name for those who earnestly strove to know God as he is, and only gave it to their spiritual heads. The German and French schools also fixed so high a standard for the qualifications of a Chasid that few except the Rabbins could attain it. In these schools it somewhat approaches the ascetics of the old sect, and it was the case in the Cabalistical school representing the gnosticism, in which a rigorous observance of externals and mortifications is insisted upon.

The Chasidim were reorganized as a special sect in the eighteenth century by Rabbi Israel ben-Eliezer Baal-Shem (בּאל-שֶם, "lord of the name") = שְׁמוֹנָה, a man who by words of conjuration and other formulas knows how to exercise a power over the visible and invisible world, also called Baal, בָּאל, from the initials of בַּל פְּרָא תָּבוּךְ. Baal-Shem made his public appearance about 1740 in Tisat, in the district of Czernow, from whence he subsequently removed to Medzhibozh, in Podolia. His moral and prophetic words attracted attention in large circles; his mode of life, consisting of contemplation, study of the book of Psalms, giving advice to all applying for it, and frequent washings in rivers, soon spread a halo round him, while his liberal views on the gratification of asceticism,相结合 with his mode of life, disposed a large number to become his disciples. To promote the separate organization of a sect, his disciples circulated many miraculous reports; for instance, that his father had been visited by the prophet Elijah, to predict his birth, and that his mother was a hundred years old when she was delivered of him; that, when a youth, he had vitally struggled with evil spirits, etc.—all of which may be found in the book הרמחים, published in 1815 by the grandson of Baal-Shem, R. Bar Linnz. Baal-Shem and his successors received the name Zadik (זָדִיק, i.e. righteous), and his fame attracted multitudes of Jews from all parts of Poland, who were desirous to submit themselves to his guidance, and become members of the sect. The following are the chief principles of the Chasidim: 1. The great aim of every Chasid is to be in intimate communion with הוראות, or wedded to the Deity (הָבִיא, 39), who is regarded as a bride. This communion is effected through prayer, and more especially through frequent contact with the Zadik, or spiritual head, who is espoused to God, and who, as his delegate upon earth, can do all manner of wonderful things. The Zadik is therefore the king and supreme judge of the community; has absolute power over their thoughts, words, and deeds; is richly supported by the voluntary contributions of his followers; they perform pilgrimages to him to spend the Sabbaths and festivals with him, when the rich sit with him at the table, and the poor esteem it the greatest privilege to touch the hem of his garment. 2. The Zadik is required to give his disciples a glimpse of him. 2. Revelation and the reward of all good works depend upon absolute faith, which is greatly interfered with by research and philosophy. 3. Miracles must be implicitly believed in; the greatest devotion is to be manifested during prayer, and hence shouting, clapping of hands, singing, dancing before the Lord, etc., must be resorted to, so as to preclude the intrusion of profane thoughts. 4. Repentance and conversion are essential to salvation; a man must always prepare himself for them, and never despair. 5. The Chasid must keep aloof from profane knowledge, and from the loss of mammon, which leads to unbelief, but worship God, and is necessary for the performance of his business. 6. He must be exceedingly cheerful, contented, unsullied, beneficent, peaceable, charitable in judging others, courageous, temperate in his dress and mode of living, etc. In every town or village where ten Chasidim are to be found, they must meet separately for prayer and meditation, and use the Spanish form of prayer, introducing it into the Cabalistic elements. The Chasidim derive their doctrines from the Bible, the Talmud, and more especially from the Sohar. At the death of Baal-Shem, his three grandsons, Bär of Meseritz, Mendel of Przemielz, and Michael of Kolk, continued to govern the sect, which at that time numbered about 45,000 men and women, and had established in Poland, Wallachia, Moldavia, Galicia, and Palestine, in all of which countries it still exists, though divided into several parties. Into Hungary it was introduced in 1809, by R. Moses Dattelbaum, one of the ablest men that have thus far belonged to the sect.

The Chasidim have published a number of works in defence of their doctrines. The following are some of them: 1. A small work called תורתון (Tradition), by Senior Samuel Lidan, 1780, reprinted in Königsberg, 1823; 2. רַבִּי אַרְוָן לְגֵשׁוֹת וּלְטְהָרָה (Gates of Love and Truth), by R. Aaron the Levite, Sklow, 1820; 3. רַבִּי אַרְוָן לְגֵשׁוֹת וּלְטְהָרָה, a book of ethics, arranged in alphabetical order by R. Nachman, 1821. See Kitto, Cyclop., i., 475 sq.; Herzog, Real-Encyklop. ii., 657 sq.; Jost, Geschichte des Judenthums und seiner Secten, iii., 185 sq.; Ben Chananja, ii., 1, 49, 145, 198; Pirrest, Bib. Jud., i., 74. Compare T. & S. Z.A.N. See T.S.B. Z.A.N. See T.S.B.

Chasid. See CATERPILLAR.

Chasikuni ben-Manoach, a learned Jew, who flourished in the last half of the 13th century. See T.Z.A.N. Ben-Hana, in which he made large use of the Midrashic literature; indeed, it is almost entirely a compilation.
from some twenty older annalists. It was printed by Bomberg at Venice in 1524, fol., and again at Basle in 1566, and in 1559 a carefully revised edition, by Vittorino Elano, appeared at Cremona, 4to. It may be found also in the Edition magna of Moses Furtwangler (q. v.), Amst. 1724-27. — Kitto, Cyclopaedia, i, 476; First, Bib. Jud., i, 171.

Chassidim. See CHASSIDISM.

Chasten; chastises, correct. (1.) To strike or afflict one for his advantage and correction; and to refuse or despise chastisement, or correction, is to undervalue it, and be not reformed by it (Jer. ii, 30, and vii, 28; Heb. xii, 5). The overthrow of the Jewish nation by the Chaldeans was the chastisement of a cruel one; it was visited and inflicted by cruel instruments and means (xxx, 14). (2.) To punish in just wrath (Lev. xxvi, 28). Thus the chastisement of our peace was laid on Christ; that punishment, by the bearing of which our reconciliation with God is effected, was laid on him as our surety (Isa, iii, 5). To chasten one's self is to be exercised before God in self-abasement, fasting, and prayer (Dan. x, 12). The Scriptures are for correction; by their powerful influence they pierce a man to the heart, and make him amend his evil courses (2 Tim. iii, 16).

Chastity (Lat. castitas), in the Christian sense, denotes (1) freedom from impure thoughts, desires, or imaginations; and (2) a abstinence from illicit sexual intercourse. It requires a control of the passions and of the senses (1 Tim. iii, 12). He who lives in the system of morals, except the Christian, has ever succeeded in securing the love of God in the heart. The only sure safeguard against evil lusts. The body, in Christian ethics, is "the temple of the Holy Ghost." But, apart from pure religious life, a strict morality may do a great deal in securing purity, in the use of heart, and at least of life. The evil consequences of sexual disorder should be taught in morals as hindrances to lust. Among them is the certainty that domestic happiness, as well as the physical and mental health of the criminal, are endangered by it. Chastity is the noblest result of pure morality, or of the free mastery of spiritual elevation and purity over the natural instinct; it protects liberty from sinking into subjection to the flesh, so far only, however, as it is the result of virtue, not of a natural indiistence arising from temperament. The best sources of chastity are, first, the true fear of God, which leads to avoid offending God by a sinful misuse of the forces of nature; and, secondly, the divinizing human reproduction by beastly indulgences; secondly, education, inculcating honesty, modesty, and morality; thirdly, active occupation both of mind and body; fourth, moderation in the use of drink and spirits. Chastity is highly blessed in its results, for from it results the purity of the soul, the liberty of the will, the preservation of health and strength, and freedom from the difficulties and misfortunes which unchastity entails on its unfortunate victims. It is also the seal of a high mind, a true virtue, and a sincere fear of God (Mark vii, 21, 22; Rom. xiii, 13). Let us walk honestly, as in the day: not in rioting and drunkenness, not in chamberings and wantonings, not in strife and envying; 2 Cor. vi, 4, 6; Gal. v, 19-22; 1 Cor. vii, 5. Defraud ye not one the other, except it be with consent for a time, that ye may give yourselves to fasting and prayer; and come together again, that so Satan be not your mastermind: This iv, 8; 1 Tim. iv, 12; v, 2; Titus, i, 8, 15; 2 Pet. i, 22; iii, 2. While they behold your chaste conversation coupled with fear; iv, 3. For the time past of our life may suffice us to have wrought the will of the Gentiles, when we walked in lasciviousness, lusts, excess of wine, revellings, banquettings, and abominable idolatries. But now have we left all these; the lusts which walked according to the course of this world, according to the prince of the power of the air, the spirit that now worketh in the children of disobedience, who in time past knew not God, are admonished, and are called also penitents. It succeeded the old Roman toga. The penula was a circular cloth, with an aperture to admit the head in the centre, while it fell down over the body, so as completely to cover it. It was otherwise called χαστίζω, amphibalium, and planeta. This penula, worn by the women longer than commonly expected, was admet by an early age for the outer dress of the clergy. The Romish Church has altered it by cutting it away at the sides, so as to expose the arms, and leave only a straight piece before and behind. The color of the vestment varies according to the different festivals of the Church at which it is used. The Greek Church retains it in its primitive shape. It often appears on the older sculptures and mosaics, and also in old brasses in England. — Palmer, Orig. Liturg. iii, 390; Hook, Church Dictionary, s. v.; Siegel, Althichthner, iii, 63 sq.; Martigny, Dictionnaire des Antiquites, 146.

Chatel, Du. See DU CHATEL.

Chatlinim (칙린) or Chatulin (瞋禮) or Chastum, a place in Palestine mentioned by the Talmudists (Me'arnoch, 86 b), and made by Schwartz (Palest. p. 178) to be "the modern village Al-Chaft, east of Mt. Tabor, not far from Jordan," where it is marked as El-Bahl on Van de Velde's Map.

Chatuir. See LEER.

Chaucer, Charles, a Congregational minister, was born in Yardleybury, Hertfordshire, Eng., 1592. He entered as student in Trinity College, Cambridge, and passed M.A. in 1617. He was chosen fellow, and was made bachelor of divinity in 1624, and, still later, was elected professor of Greek. He left the University, entered the ministry, and in 1627 became vicar of Ware. He was brought before Laud for his opposition to the "Book of Sports" in 1639, and in 1656 he was found guilty of disobedience and contempt of Church authority, but he made a recantation. He was afterwards silenced, and came to New England in 1639. About three years he lived at Plymouth, and then became pastor in Scituate. In November, 1654, he was chosen president of Harvard College, in which station he remained with honor until his death, Feb. 19, 1672. He was the author of several Latin and Greek poems, and also of Reformation of Chas. Chau- cher, formerly written by Ware, in his life of Ware, in which it is marked "his master". He was also a translator of Shakespeare's works, and was one of the first to translate the "Comedy of Errors" (1623) and "The Merchant of Venice" (1634). He was the author of a few occasional sermons. — Sprague, Annals, i, 110.

Chaucer, Charles, D.D., a descendant of president Chaucer, of Harvard University (see preceding article), was born in Boston Jan. 1, 1706, graduated at Harvard in 1724, studied divinity, and in 1727 became pastor of the First Church in Boston. He was distinguished for learning and independence, and was one of the founders of Universalism. He died Feb. 10, 1787, in the eighty-third year of his age. He published A complete View of Episcopacy: Senseable Thoughts (opposed to Whiffard), 1778: The Fall and its Consequences, 1785: — The Benediction of the Deity, 1784, 8vo: — The Surfeit of all Men, 1784, 8vo; answered by Edwards, Jun. (Works, N. Y. ed., vol. i, 5-278).

Chaucer, Isaac, an English Nonconformist divine (son of Charles Chaucer 1st [q. v.]), was one of the ministers ejected in 1662, and afterwards became pastor of the church at Andover. In 1687 he became pastor of the Independent Church in London, which had previously been Dr. John Owen's.
In 1704 he retired from the ministry, and was professor of divinity for several years in the Dissenters' Academy in London. He died Feb. 28, 1712. Among his writings are, The Divine Institution of Congregational Churches:—The Doctrine according to Godliness (in calf, 1 line, 12mo) London, 1692; Nonconformists' Memorial, ii, 317.

Chazar. See Swine.

Chebar (Heb. Kebor), חֵ֖בָּר, perhaps from its length; Sept. Χαβαρ, a river in the "land of the Chaldæans" (Ezek. i, 3), i.e. apparently of Mesopotamia (comp. 2 Kings xxiv, 15), on the banks of which some of the Jews were located at the time of the captivity, and where Ezekiel saw his earlier visions (Ezek. i, 1; iii, 15, 28; x, 15, 20, 28; xiii, 8). It is commonly regarded as identified with the Habor (חָבָּר), or river of Gangan, to which some portion of the Israelites were removed by the Assyrians (2 Kings xvii, 6). But this is a mere conjecture, resting wholly upon the similarity of name, which, after all, is not very close. It is perhaps better to suppose the two streams distinct, more especially if we regard the Habor as the ancient Chaboras (modern Khbour), which fell into the Euphrates at Calah, for in the latitude of the name of Chaldea is never extended so far northward. The Chebar of Ezekiel must be looked for in Babylonia. It is a name which might properly have been given to any great stream (comp. גֵּבֶר, great.) Perhap the view, which finds some support in Pliny (H. N. vi, 26), and is adopted by Bochart (Phaleg, i, 8) and Cellarius (Geograph. c. 22), that the Chebar of Ezekiel is the same as the Dyphala, or Royal Canal, in Mesopotamia—"the greatest of all the cuttings in Mesopotamia"—may be regarded as best deserving acceptance. In that case we may suppose the Jewish captives to have been employed in the excavation of the channel. That Chaldea, not Upper Mesopotamia, was the scene of Ezekiel's preaching, is indicated by the tradition which places his tomb at Kefti (Lotus's Chaldia, p. 35). See Ezechiel.

Chebel (צְבֵּל, ch'bel; usually rendered in the older versions גָּבֵר, גָּבִר, גְּבֵר, גָּבָּר: גָּבְר; רְגֵּיָה, *regia, fuincula*), one of the singular topographical terms (q. v.) in which the ancient Hebrew language abounded, and which add so much force and precision to its records. The ordinary meaning of the word is a "rope," and in this sense it frequently occurs both literally (as Josh. ii, 15, "a cord") and figuratively:—"1. Kings xxx, 33, "ropes."—Isa. xxxii, 23, "tacklings;"—Amos vii, 17, "line") and metaphorically (as Eccles. xii, 6; Isa. v, 18; Hos. xi, 4). From this it has passed—with a curious corresponsive to our own modes of speech—to denote a body of men, a "band" (as in Psa. cxxx, 61). In 1 Sam. v, 10, our word "string" would not be inappropriate to the circumstances—a string of prophets coming down from the high place. Further it is found in other metaphorical senses, arising out of its original meaning (as Job xviii, 10; Psa. xviii, 4; Jer. xiii, 21). From the idea of a measuring-line (Mic. ii, 8), it has come to mean a "portion" or "allotment." (As in 1 Chron. xvi, 18; Psa. cv, 11; Ezek. xlvii, 15.) It is the word used in the familiar passage "the lines are fallen unto me in pleasant places" (Psa. xvi, 6). But in its topographical sense, as meaning a "tract" or "district," we find it always attached to the region of Argob, which is invariably designated by this, and by no other term. (iii, 10; 1 Kings ii, 10; 1 Chron. vii, 25.) Its propriety is illustrated by a late traveller in those regions, who shows the abrupt definiteness of the boundary of the district (Graham, in Cambridge Essays, 1858). A comparison of the fact that Argob was taken possession of by Manasseh—a part of the great tribe of Joseph—with the use of this word by that tribe, and by Joshua in his retrospect, in the very early and characteristic fragment, Josh. xvii, 5, 14 (A. V. "portion"), prompts the suggestion that it may have been a provincialism in use among that large and independent part of Israel. Or its application to the "rocky shore" of Argob may be illustrated and justified by its use (Zeph. ii, 5, 7; A. V. "coast") for the coast line of the Mediterranean along Philistia. In connection with the sea-shore it is also employed in Josh. xix, 29. See Aroon.

Chedek. See Thorn.

Chedorlaomer (Heb. Kedorlaomer, קְדוֹרֵלָה簡単, Sept. Χαδολαομής, 1 Kings, iv, 9, 1), a king of Elam, who, in the time of Abraham, with three other chiefs, made war upon the kings of Sodom, Gomorrah, Admah, Zeboim, and Zoar, and reduced them to servitude (Gen. xiv, 1 sqq.) B. C. cir. 1900. For twelve years he retained his hold of them; in the thirteenth they rebelled; in the next year, however, he and his allies marched upon their country, and, after defeating many neighboring tribes, encountered the five kings of the plain in the vale of Siddim. He completely routed them, slew the kings of Sodom and Gomorrah, and carried away much spoil, together with the family of Lot (comp. Psa. cxv.). Chedorlaomer seems to have perished in the rescue, which was effected by Abraham upon hearing of the captivity of his nephew (Gen. xiv, 17). According to Genesis (Thes. Heb. p. 600 b), the meaning of the word may be "handful of sheaves" (A. V. "Amurath") and the Heb. פֶּרֶשׁ, sheph, an etymology with which First (Heb. Hanum, s. v.) coincides; but this is little satisfactory. The name of a king is found upon the bricks recently discovered in Chaldea, which is read Kudur-mulpula. See Babylon. This man has been supposed to be identical with Chedorlaomer, and the opinion is confirmed by the fact that he is farther distinguished by a title which may be translated "Ravager of the West." "As, however, one type alone of his legends has been discovered," says Colonel Rawlinson, "it is impossible to pronounce at present on the identification. The second element in the name 'Chedorlaomer' is of course distinct from that in 'Kudur-mulpula.' Its substitution may be thus accounted for. In the names of Babylonian kings the latter portion is often dropped. Thus Shalmaneser becomes Shalman in Hosea; Merodach-bal-adan becomes Mardocempal, etc. Kudur-mulpula might therefore become known as Kudur simply. The Arabic epithet 'el-Ahmar,' which means the Red, may afterwards have been added to the name, and may have been corrupted into Loomer, which, as the orthography now stands, has no apparent meaning. Kedar el-Ahmar, or 'Kedar the Red,' is in fact a famous hero in Arabian tradition, and his history bears no inconsiderable resemblance to the Scripture narrative of Chedorlaomer. It is also very possible that the second element in the name of Chedorlaomer, whatever be its true form, may be a Semitic translation of the original Hamite term *mulpula.* "Chedorlaomer may have been the leader of certain immigrant Chaldean Elamites who founded the great Chaldean empire of Berosus in the early part of the 20th [21st] century B.C., while Amraphel and Arioch, under their king of Elam, the Hamite king Meshech (see Meshech), under his banner in the Syrian war as subordinate chiefs, and Tidal, who led a contingent of Median Scythia belonging to the old population, may have been the local governors who had submitted to his power when he invaded Chaldea." (Rawlinson's Herod. I, 348, 356.)

Mr. Stuart Poole supposes that the first invasion of
CHEEK

Palestine by Chechodlosmer and his confederates caused the shepherd-kings to leave the East and settle in Egypt (Horne, Egypt, p. 150). The narrative is strangely

coming in to me here at 12.45 p.m. r.ferring to the expedition of Sennacherib against Jerusalem (comp. Gen. xiv, 5, and 2 Kings xviii, 13).

See, on the other side, Tuch (Graecia, p. 808); Bertheau (Israel. Geschichte, p. 217). See ELAM.

Cheek (יוֹנָּה, lech, the jaws, as often rendered; στόμα). Smiting upon the cheek is frequently spoken of in the Scriptures as a most grievous insult and injury (Job vi. 10; Lam. iii. 80; Mic. v. 1; Luke vi. 29); and the incidental notices of modern travellers on this subject, exhibit the same vindictive accuracy of the language of the inspired writers. Lord Valentia, in his Travels, alluding to one of his servants, says, "Davagé was deeply incensed; nor could I do more than induce him to come to the factory on business while I was there, Mr. Fringle having, in one of his fits, struck him on the cheek with the sole of his slip-
por." Sir W. Ouseley, speaking of the Persian court, remarks, "When the vizir declared himself unable to procure the money, Fath Ali Shah reproached him for his crimes, struck him on the face, and, with the high wooden heel of a slipper, always iron-bound, beat out several eyes of a jew." Robertson remarks that the Hindoo can bear almost any thing without emotion except slippering—that is, a stroke with the sole of a slipper or sandal, after a person has taken it off his foot and spit upon it: this is dreaded above all affronts, and considered as less ignominious than spitting in the face or bespattering with dirt among Europeans. An angry man often says, "I will beat thy cheek, thou low-caste fellow."

The term "check-bone," in Psa. iii, 7, is used figuratively, and presents the Psalmist surrounded by his enemies as by a herd of wild beasts, and denotes their complete deprivation of the power of seizing upon or devouring their prey. In Joel i, 6, the 'check-leth' (ירד הַלֶּחֶת, metathetical), grinders of locusts are compared to those of a beast of prey.

Cheese (in 2 Sam. xvii, 18, בָּלָקָה רָעָה, charit- sey' ha-shalih; slices of the [curdled] milk; Sept. προ- χάλις τῶν γαλακτῶν, Vulg. pingo, formidale caseis; in 2 Sam. xvii, 29, רָעָה שֶׁבֶךָ), according to the Rabbins, so called from being filtered from the whey; Sept. ξεχαρίας, Vulg. pingo; in Job x, 10, בָּלָקָה, geinah, coagulated milk; Sept. τιπαζόντας). It is difficult to decide how far these terms correspond with our notion of cheese, for they simply express various degrees of coagulation (see Gesenius, Thes. Heb. p. 25, 920). It may be observed that cheese is not at the present day common among the Bedouin Arabs, butter being decidedly preferred; but there is a substance, closely corresponding to those mentioned in 1 Sam. xvii; 2 Sam. xvii, consisting of coagulated buttermilk, which is dried until it becomes quite hard, and is then ground: the Arabs eat it mixed with butter (Burckhardt, Notes on the Bedouins, i, 60). It is noticeable that the ancients seem generally to have used buttermilk either boiled or curdled cheese, but not both: thus the Greeks had in reality but one expression for the two, for βαστίνας = βαστίς, τιπαζόντας, "cheese of kine." The Romans used cheese exclusively (see Beroald, ad Apuleii Metam. p. 26), while all nomad tribes preferred butter. The distinction between cheese prepared and coagulated milk seems to be referred to in Pliny, x, 96. See BUTTER.

The most important passage in which this preparation from milk is mentioned in Scripture is that where Job (x, 10), figuratively describing the formation of the fetus in the womb, says:

They are like the wines that would pour out,

Even like cheese wouldst cure me?

This text alludes to that progressive solidification which is common to all cheese, which is always soft when new, though it hardens when it becomes old. Undoubtedly the Orientals do eat curds, or curdled milk, but that, therefore, their cheese consists of curd, milk is not the correct inference. We also eat curds, but do not regard curds as cheese; neither do they. The other passages describe "cheese" in the plural, as parts of military provision, for which the most solid and compact substances are always preferred. Persons on a march would not like to encumber themselves with curdled milk (2 Sam. xvii, 29). See CURDLE.

There is much reason to conclude that the cheese used by the Jews differed in no respect from that still common in the East, which is usually exhibited in small cakes about the size of a tea-saucer, white in color, and excessively salt. It has no rind, and soon becomes accordingly hard and dry, being, indeed, not made for long keeping. It is less when new and comparatively soft, and in this state large quantities are consumed in lumpa or crumbs not made up into cakes. All cheese in the East is of very indifferent quality, and the natives infinitely prefer English or Dutch cheese when they can obtain it. In making cheese the common practice is either buttermilk or oatmilk, or sometimes the great-headed thistle or wild artichoke. The curds are afterwards put into small baskets made of rushes or palm leaves, which are then tied close and the necessary pressure applied. (See Kitto, Fict. Lib. note on 1 Sam. xvii, 19.) See MILK.

There are also several decisions in the Mishna relative to the pressure by which cheese was made (Chos. viii, 2). This proves that, as observed above, no preparation of milk was regarded as cheese while in a fluid state, or before being subjected to pressure. In another place (Aboda Sura, ii, 5) it is decided that cheese made by foreigners could not be eaten, from the fear that it might possibly be derived from the milk of some animal which had been offered in sacrifice to idols. It is therefore certain that cheese was known to the Jews (comp. Philo, Cont. p. 827; Otho, Leg. Bab. p. 120), and there was even a valley at Jerusalem called the Tepanos (q. v.), i.e. cheese-makers' valley (ἐἰσιπᾶς τῶν ῥαψανων), doubtless from its being occupied by persons of this craft (Josephus, War, v, 5, 1). See BAZAAR. An instrument for cutting firm cheese is even named in the Mishna (Shabb. xvii, 2). (See generally Ugolini, De rusticae vet. Hiern. [in his Theocr. xxi, ii, 13.] See FOOD.

Cheke, Sir John, was born at Cambridge June 16, 1514, and was educated at the University there, devoting himself especially to the study of Greek, then much neglected in England. When the first professorship of Greek was founded in Cambridge by king Henry VIII, about 1540, Cheke was appointed professor. He was made tutor of the prince, afterwards Edward VI, but when queen Mary came to the throne his property was confiscated. He fled to the Continent, but was arrested at Brussels by order of Philip II, and sent back to London. He adjured Protestantism, but this act preyed on his mind, and he died in the following year, September 13, 1567. His writings were very numerous and learned; among them are De Officiis Martini Frueri (Lond. 1551, 4to); De Promiscuitate Linguarum Graecarum (Basil. 1558); Translation of Matthew (from the Greek, ed. Goodwin, Cambri.)—2nd ed. Biog. Dict. iii, 801; Strype, Life of Cheke (Lond. 1705, 8vo); Kippis, Biog. Britannica, iii, 484.

Che'elal (Heb. Kital, קִתַל, explanation; Sept. Χα- ιλά), one of the sons of Caleb-Moab who divorced his Goutite wife after the return from Babylon (Ezra x, 80). B.C. 458.

Chelebstan. See GALBANUM.

Che'ls'cia (Χαλέσια, i. e. Heilisah), the name of three or four men.
CHELLIAN 229

CHEMNIITZ

1. The father of Asadiah and ancestor of Baruch (q. v.), (Bar. i, 3). B.C. considerably ante 605.

2. A priest, son of Salom (Shallum), and father of Joschim (Bar. i, 7); evidently the Hilkiah (q. v.) of the Old Testament. (1 Chron. vi, 13).

3. The father of Susanna (Sus. 2, 29, 63). B.C. post 588. He was perhaps identical with the Hilkiah of Neb. xi, 7, or of Neb. viii, 4. Tradition, however (Hase, Susanna i, 689, ed. M. Nahum), represents him as identical with the father of Jeremiah (Jer. i, 1), and also with the priest who found the copy of the law in the time of Josiah (2 Kings xxii, 8).

4. One of the two Alexandrian Jewish generals of Cleopatra in her contest with her son Ptolemy Lathyros, in which he died in Cœle-Syria (Josephus, Ant. xiii, 10, 4; 18, 1).

CHEL'IAN (or, rather, Chel'iam, Hληκτιον), an inhabitant of a region mentioned (Judith ii, 23) as adjoining Arabia Deserta on the north; probably that elsewhere (Judith i, 9) called Chellitus (q. v.).

CHEL'ITUS (Heb. Kel'itu, כֶּלִּית, text כֶּלִּית, v. r. כֶּלִּית or כֶּלִּית, completed; Sept. Χληκτίου, v. r. Χληκτίου and Χληκτίσια, Vulg. Chel'itius), one of the "sons of Bani who divorced their Gentile wives after the Babylonian exile (Ezra x, 85). B.C. 458.

CHEL'EIA (or, rather, Chel'eia, Vulg. omits, named beyond the places beyond (i.e. on the west of) Jordan to which Nabuchodonosor sent his summons (Judith i, 9). Except its mention with "Kades" there is no clew to its situation; this, however, would seem to locate it near Kadesh-barnea. Hence Rendall (Palast., p. 717) conjectures that it may be Chel'ella (Χληκτελλα), a place which, under the altered form of Calea (q. v.), was well known to the Roman and Graeco-geographers. With this agrees the subsequent expression of the "land of the Chel'ians" (ι Χληκτίας, Vulg. terra Celin), "by the wilderness," to the south of whom were the children of Ishmael (Judith ii, 23). Movers (Zeitschr. f. Philol. 1885, p. 38) supposes it to be the same as Ahal'm (Josh. xv, 58), and that Be'tane, mentioned with it, is the same as Beth-anoth (Josh. xv, 59).

CHE'LOD (Χληλῶ, v. r. Xlēlô, Vulg. omits, old Lat. ver. Chelalæt, Syr. "Chalmæns"). "Many nations of the sons of Chelod" were among those who obeyed the summons of Nabuchodonosor to his war with Arphaxad (Judith i, 6): The word is apparently corrupt (see Fritzsche, Ezrg. Handb., in loc.). Simonis supposed it to be the same as Calnea, etc., i.e. Calnæa, Xlēlô, Ewald (Isser. iii, 102, 343) conjectures it to be a nickname for the Syræans, "sons of the mole" (טיל, chelod).".

CHE'LIN (Heb. Kel'bo, כֶּלִּב, a cow, as in Jer. vi, 27), the name of two men.

2. (Sept. Xalîb). The father of Ezri, which latter was David's chief gardener (1 Chron. xxvii, 26). B.C. 964.

CHEL'BAI (Heb. Kel'bab, כֶּלָּב, v. r. Xlēlab; Sept. Χληλεβ, v. r. Xlēlab), one of the sons of Herezon (1 Chron. i, 9); elsewhere (ver. 18, 42) called Caleb (q. v.). It is worth noting that, while in this passage Jerahmeel is stated to be a brother of Cheluba, it appears from 1 Sam. xxvii, 10, that the Jerahmeelites were placed on the "south of Judah," where also were the possessions of the house of Caleb (Judg. i, 15; 1 Sam. xxv, 0; xxx, 14).

Chem'arim (Heb. Kemarim, כֵּמָרִים, idol-priests). This word occurs only once in our version of the Bible (1 Chron. i, 4; Sept. confounds with qoph following); but it is met with in the Hebrew in 2 Kings xxiii, 5 (Sept. Xar'mi); Hos. x, 5 (Sept. omits), where it is rendered "idolatrous priests," and "priests;" and in both of these passages the margin has "chemarim." According to Gesenius (Thes. Heb. p. 803), the corresponding Syriac word signifies "a priest in general; but that as well as other Syriac words relating to divine worship, is restricted by the Hebrews to idol-worship. As to the etymology, the singular form כֵּמָר, ко'mer, is properly blackness, sadness, and concretely, one who goes about in black, in mourning, hence an ascetic, a priest." Fürst (Hebr. Lex. s. v.) suggests a derivation from כֵּמָר כֵּמָר, in the sense of worship, and remarks that the title chema'rim, although proper to the peculiar priests of Baal, was also applied to other idolatrous priests. Zeph. i, 4, the chemarim being coupled with the apostates, and the passage may signify, "I will destroy the chemarim together with the priests of the tribe of Levi who have joined in the worship of idols." The priests who officiated in the service of the golden calves at Dan and Bethel were called chemarim (see the other passages referred to). Even to this day the Jews retain the word, and apply it in derision to Christian ministers, on account of their black robes. See Baal.

Chemnititz (properly von Kemnitz), Martin, an eminent German theologian, was born at Treuenbrietzen, in Brandenburg, Nov. 9, 1522. His parents designed him for an artisan, but he took kindly to no trade, and a distant relative (Niemann) called him to Magdeburg (1530), where he spent three years preparing for the parochial ministry. In 1534 he left for Breslau, where he spent some years of money to become a teacher at Kalbe in 1542, and at Writzen in 1544; studied mathematics and astrology at Wittenberg in 1545-47; was made rector at Königsberg, Prussia, in 1548, and two years afterwards became librarian of duke Albrecht. He now turned his attention to the church, and became through student of the Bible and the fathers. In the controversy on the doctrine of justification he took part against Osiander; but the controversy so annoyed him that, in 1552, much against the will of the duke, he left Königsberg. He immediately after began the scientific study of dogmatics at Wittenberg, attaching himself closely to Melanchthon, and lecturing in the University. He became preacher at Brunswick in 1554, and also delivered lectures there on theology, which gained great celebrity, and were published after his death by Polykarp Lyser (Frankfurt, 1591, 8 vols. 8vo, and often). His work, entitled Theologiae Jesu Christi praeceptor comparata, published in 1562, involved him in controversy with the Roman Catholics, and led to his writing the Examen concilii Tridentini (Freiburg 1565-1573, 4 vols.; Frankfurt, 1707, fol.), which is still a classical work on the subject. After the death of Melanchthon he showed himself a zealous Lutheran, and in 1566 became associated with Mörlin in the preparation of the Corpus doctrinae Prutenicum, designed as the symbolic text-book of Prussia. In 1567, having become superintendent of Brunswick, he prepared the Confession of the Church of Lower Saxony. From 1574 he exerted himself, with Jacob Andreae, to induce the churches of Saxony and Swabia to adopt the Formula Concordiæ (q. v.), in the substance of which he had been a leading part. He devoted himself almost exclusively to this work, took with Andreae a leading part in all the meetings that were held on the subject, and obtained the admiration of his contemporaries as well by the prudence and firmness of his conduct as by the depth and extent of his knowledge. He resided at Brunswick in 1565, and died April 8, 1566. Besides the above-named works, he wrote also Repetitio sanae doctrinae de vera praesentia corporis et sanctorum Dominii in corona saeura (Leipzigg, 1661).—Die fahrmeistern Hauptecke der christlichen Lehre (Wolfenb., 1565).—De duabus in Christo naturatur humanitate et divinitate, completed by Leyer and Gerhard (Hamburg, 1704, 3 vols. fol.). Chemnitz has been pronounced the "first great theologian produced by the Reformation." Schenkel (in Herzog, cited below) says that he was
cherub

[the proper name is pronounced "cherub"

(Heb. Keswâb, כֶּרֶב, etymology uncertain; Sept. λευκός v. r. Χρυσός and Χρυσίς; Vulg. Cherub), a place apparently in the Babylonian dominions, associated with Tel-barras, Addan, etc., from which some Jewish exiles returned with Zorobabel, who had lost their pedigree (Ezra ii, 59; Neh. vii, 61). The true construction of these names, however, would rather make this to be that of a man than unregistered. B.C. 586. See ADDON.

cherub (Heb. Keswâb, כֶּרֶב, in the sing. only in Exod. xxv, 19; 2 Sam. xxii, 11; I Kings vi, 24, 25, 27; 2 Chron. iii, 11, 12; Psa. xviii, 10; Ezek. x, 2, 7, 9, 14; xxviii, 14, 16; Sept. χρυσός), plur. CHERUBIM (Heb. Kerubim, כֶּרֶבִים, sometimes כֶּרֶבִים; Sept. χρυσόμην v. r. χρυσόμιν, and so in Ecles. xiii, 8, and Heb. ix, 5; Eng. Versa. invariably "cherubim"), the name for many of the heavenly beings, the construction of which is frequently mentioned in Scripture. See SERAPHU.

I. IMPORT OF THE NAME.—The origin and signification of the word it is impossible to determine with any certainty. Those who seek it in a Semitic root are still divided in opinion, some deriving it from the Chal. כֶּרֶב, kerub, to plaster, so that cherub = "plougher," i.e. ox, urging the parallel between Ezek. x, 14, and i, 10; others (L. Gesselin, L. i, De Diei, and Kögler) take it by a transposition of letters for כֶּרֶב, kerub, q. d. divine "beast" (Psa. xxiii, 11), comp. the Arabic karub, a skip of transport; others (see Hyde, De relig. vet. Pers. p. 265) make it l q. d. karâb, "near" to God, i.e. admitted to his presence; with others (see Maurer, Comment. in Vett. Test. at Isa. vi, 2) it is equivalent to כָּרָם, karam' (Arabic the same), "to be noble," i.e. chief (comp. seraphim); finally, to pass over other less probable conjectures (e. g. Rosenmüller, Alberttunac, i, 1, 181; and Paulius ap. Zul- liger, p. 81, the Talmudists regard it as the Chal. כָּרָם, kerubhâ, bendikhe (see Berodok, Jan., Exercit. tott. p. 100; Others, Berodok, a. v.). Gesenius at first proposed a derivation from the Syriac karrûb, strong, but afterwards, convinced that he was misled by an error of Castell (see his Anecdot. Orient. i, 66), he proposed a new etymology, as כָּרָם, charum' (Arabic the same), "to prohibit from a common use," to consecrate (Theesur. p. 711), compare the Ethiope kindred word for sanctuary; so that the signification would be keep, or guard, or seal of the Deity against all profane approach. Others (e. g. Eichhorn, Eorden, iis A. T. iii, 80; Vatke, Bibl. Theolog. i, 235) think the cherubim were the same with the יְרוֹם, grimmâ, of the Oriental imagination, guardians of the golden mountains; and seek the root in the Persic kerûb, to group (Tychsen in Heeren's Ideen, i, 886). Forer even seeks an Egyptian derivation of the same (ie byroso, p. 116). Hävernick (Zu Ezek. p. 8) suggests a derivation from a Syriac root, meaning to cut or carve (Kell on 1 Kings v, 9; so Aben Ezra says that "cherub" is the same as יְרוּם, and means any artistic figure (Schultens, Prov. Sol. p. 472). An early etymology it makes from בָּרָם, kerab, great-as-it-were, q. d. like Cabeiri=20aii dowari (see Psa. cij, 20; יְרוֹם, i Pet. iii, 22; òpôp, Eph. i, 21; so Procopius on Gen. iii, 21). As Achen (J. i, 1087, ch. vii) the oldest derivation is from בָּרָם and יְרוֹם, is thought the "abundance of knowledge," a meaning once universally adopted (i hilo, Vv. Mat. p. 688; Clem. Alex. Strom. v, 240, ed. Syrh.; Origen, Frag. Hex. p. 115; Jerome on Isa. vi, 2; Dionys. De Cel. Hier. vii, 96; Spencer, De Legg. III, iii, 1, etc.). Hence the remark of Aquinas. "The name Seraphim is given from their fervor, as belonging to love; but the name Cherubim is given from their knowledge" (I, i, 1087, ch. vii). First (Concord. p. 571), followed by Delitzsch (Gen. ii, 208), regards the root as properly Shemitic, allied to the above sense of grasping (Sanarc. grâba, Eng. grip).

II. HISTORY AND CLASSIFICATION.—I. The first occasion on which they are mentioned is on the expulsion of our first parents from Eden (Gen. iii, 24). The office of preventing man's access to the tree of life is assigned to "the cherubim (כָּרָם כָּרָם, not as in A.V. 'cherubim') with the flame of the waving sword." They are thus abruptly introduced, without any intimation of their shape and nature, as though they were too well understood to require comment. That some angelic beings are intended is obvious, and the attempt to refer the passage to volcanic agency (Sickler, Idâsu suinem Vulkan, p. 6), or to the inflammable bituminous region near Babylon (Plin. ii, 109, etc.), is a specimen of that valueless rationalism which unwarily turns the attention from the inner spirit of the narrative to its mere external form. It might perhaps conjecture, from the use of the artice, that cherub is supposed to be a definite number of cherubim, and that seems small is the mystic number usually attached to the conception of them. As the number four has special significance in Hebrew symbolism—being the number to express the world and divine revelation (Bähr's Symbolik, ii, 119 sq.)—this consideration must not be lost sight of.

The word כָּרָם, there translated "on the east," may signify as well "before" or on the edge of. Besides, כָּרָם, rendered by our translators "placed," signifies properly "to place in a tabernacle," an ex-
pression which, viewed in connection with some incidents in the after history of the primeval family (Gen. iv, 14–16), seems a conclusive establishment of the opinion that this was a local tabernacle, in which the symbols of the Divine presence were manifested, suitably to the altered circumstances in which man, after the Fall, was left before God, and to the acceptable mode of worship he was taught to observe. That consecrated place, with its striking symbols, called "the presence of the Lord," there is reason to believe, continued till the time of the Deluge, otherwise there would have been nothing to guard the way to the tree of life; and thus the knowledge of their form, from the longevity of the Tabernacle (Gen. vi. 17) and its apparent total destruction as early as the time of Abraham (Faber, Hora Mosaiice, bk. ii, ch. vi). Moreover, it is an approved opinion that, when those emblems were removed at the close of the patriarchal dispensation from the place of public worship, the ancestors of that patriarchal formed small models of them for domestic use, under the name of Sephiroth or Teraphim, according to the Chaldee dialect (Faber, Orig. of Pop. Idol., i, 256).

In like manner were lion-shapéd and eagle-formed griffins supposed by the aborigines of Northern Europe (Herod. iii, 102, 116) and India (Ctesias, Ind. p. 12) as guardians of the gold-bearing hills (comp. Gen. ii, 12); and as such appear in Graeco-Symbolik (bk. ii, ch. 447) they were sacred to the deities (e. g. Apollo, Minerva, Bacchus). But the cherub was anointed as a divine emblem (Ezek. xxviii, 14; where some, however, take נין for יין, in the sense merely of "extended"), presiding over sacred mountains blazing with precious ores (ver. 16); at least the king of Tyre is there compared to such a being, unless, with others, we refer the whole description to the cherub forms of the Jewish sanctuary (see Henderson, Comm., in loc.).

2. The next occasion on which the cherubim are noticed is when Moses was commanded to provide the furniture of the tabernacle; and, although he received Instructions to make all things according to the pattern thereof in their several parts, he is not supposed to have seen a figure of the cherubim, yet we find no minute and special description of them, as is given of everything else, for the direction of the artificers (Exod. xxvi. 31). The simple mention which the sacred historian makes, in both these passages, of the cherubim conveys the impression that the symbol forms of the tabernacle and the vitrival tabernacle were substantially the same with those established in the primitive place of worship on the outskirts of Eden, and that by traditional information, or some other means, their form was so well known, both to Bezaleel and the whole congregation of Israel, as to render superfluous all further description of them.

Similar figures were to be enwoven on the ten blue, red, and crimson curtains of the tabernacle (Exod. xxvi. 1). The promise that God would "meet and commune with Moses from between the two cherubim" (Exod. xxv. 22) originates the constant occurrence of that expression as a description of the abode and presence (Num. vii. 89; 1 Sam. iv. 4; Isa. xxxi. 16; Psa. lxxx. 1; xcix. 1, etc.).

3. Cherubim after this appear likewise in the theophanic descriptions of the prophets and inspired poets (2 Sam. xxii. 11), especially in the remarkable visions of Ezekiel by the river Chebar (Ezek. xiv). Yet there was no mystery as to those remarkable figures, for Ezekiel himself at once (x. 20) living creatures, which appeared in his vision supporting the throne of God, and bearing it in majesty from place to place, to be cherubim, from having frequently seen them, in common with all other worshippers, in the carved work of the outer sanctuary. Moreover, as is the opinion of many eminent divines, the visionary scene, with which this prophet was favored, exhibited a transcript of the Temple, which was shown in pattern to David, and afterwards erected by his son and successor; and, as the chief design of that later vision was to inspire the Hebrew exiles in Babylon with the hope of seeing, on their return to Judæa, another temple, the Temple of Solomon (though less glorious) incapable of being able to believe that, as the whole style and apparatus of this mystic temple bore an exact resemblance (1 Kings vii, 20) to that of Solomon's magnificent edifice, so the cherubs also that appeared to his fancy portrayed on the walls would be fac-similes of those that belonged to its ancient prototype. See TEMPLE.

Still the question arises, are these beings familiar, or kept designingly mysterious? From the fact that cherubim were blaunched on the doors, walls, curtains, etc., of the house, and from the detailed description of shapes by Ezekiel, the latter idea might seem out of place. But if the text of Ezekiel, and the carvings, etc., of the Temple had made them popular, it could not possibly have said (Ass. viii, 3, 8), "No one can say or conjecture what the cherubim (χρυσάβηκται) actually were." It is also remarkable that Ezekiel (chap. i) speaks of them as "living creatures" (נאם, נאם), under mere animal forms. Into this description in chap. x, 14, the remarkable expression, "the face of a cherub," is introduced, and the prophet concludes by a reference to his former vision, and an identification of those creatures with the cherubim (x. 20). On the whole, it seems likely that the "cherub" meant not only the composite creature-form, of which the man, lion, ox, and eagle were the elements, but, further, some peculiar and mystical form, which Ezekiel, being a priest, would know and recognize as "the face of a cherub," but which was kept secret from all others; and which certainly were then easily seen, when which, which when it was moved, was always covered (see ARK OF COVENANT), though those on the hangings and panels might be of the popular device. What this peculiar cherubic form was is a mystery perhaps impenetrable. It was probably believed popularly to be something of the loving type (though Psa. xvi, 20, the notion appears to be marked as degraded); so Spencer (de leg. Hebr. rit. iii, dis. 5, 4, 2) thinks that the ox was the forma praecox, and quotes Grotius on Exod. xxv. 18 (Bochart, Hierozoic. p. 87, edit. 1690).

Hence the "golden calf." The symbolism of the visions of Ezekiel is more complicated. In the earlier Scripture the signification of the cherubim is certainly that each composite creature-form had four faces, so as to look four ways at once; was four-sided and four-winged, so as to move with instant readiness in every direction without turning, whereas the Mosaic ideal was probably single-faced, and with but one pair of wings. Ezekiel adds also the imagery of the wheels—a mechanical to the previous animal forms. This might typify inanimate nature revolving in a fixed course, informed by the spiritual power of God. The additional symbol of being "full of eyes" is one of obvious meaning. See CREATURE (LIVING).

III. Their Form and Character. If we may trust the unanimous testimony of Jewish tradition, we must suppose that they had the faces of human beings, this leading to the positive assertion of Maimonides, AbaBarañel, Aben Ezra, etc. (Oboe, Lek. Rab. s. v. Cherubin; Buxtorf, Hist. Arc. Fed. p. 100). But, taking Ezekiel's description of them to be the proper appearance that belonged in common to all his cherubic creatures (ch. i, x, xii), we are led to conclude that these pound figures only have any living animals or real object in nature, but rather a combination, in one non-descriptive artificial image, of the distinguishing features and properties of several. The ox, as chief among the tame and useful animals, the lion among the wild ones, the eagle among the feathery tribes, and man, as head over all, were the animals which, or rather parts of...
which, composed the symbolic figures. Each cherub had four distinct faces on one neck—that of a man in front, that of a lion on the right side, and of an ox on the left, while behind was the face of an eagle. Each had four wings, the two under ones covering the lower extremities, or rather the centre of the person (Heb. the feet), in token of decency and humility, while the upper ones, spread out on a level with the head and shoulders, were so joined together, to the edge of his neighbours', as to form a canopy; and in this manner they soared rather than flew, with any vibratory motion with their wings, through the air. Each had straight feet (Heb. "their feet were a straight foot," Ezek. i, 7), and the probability is that the legs were destitute of any flexible joint at the knee, and so joined together that its locomotions must have been performed in some other way than by the ordinary process of walking, or lifting one foot after another. Bähr (whose entire remarks on this subject are valuable and often profound) inclines to think that the precise form varied within certain limits; e. g. the cherubic figure might have one, two, or four faces, two or four feet, one or two pair of wings, and might have the bovine or leonine type as its basis, the imagery being modified to suit the prominently intended attribute, and the highest forms of creature-being expressing best the highest attributes of the Creator (Symbolik, i, 313 sq.). Thus, he thinks, the human form might indicate spirituality (p. 340). (Comp. Grotius on Exod. xxv, 18, and Heb. ix, 5.) Some useful hints as to the connection of cherubim with other mythological forms may be found in Creuzer (Symbolik, i, 441, 540).

It has been sometimes disputed whether the colossal cherubim of olive wood, overlaid with gold, with outspread wings, touching in the centre of the oracle and reaching to either wall, placed by Solomon in the Holy of Holies, were substitutes for or additions to the original golden pair. The latter is probably the truth, for had the Mosaic cherubim been lost we should have been informed of the fact. All that we learn about these figures is that they each had a body ten cubits high (1 Kings v, 20), and stood on their feet (2 Chron. iii, 15), so that the monstrous conception of winged child-faces is an error which should long ago have been banished from Christian iconography (De Saulcy, Hist. de l'Art Judaique, p. 25). The expression "cherubims of image work," in 2 Chron. iii, 10 (בֵּיתֵיהֶם וּבָאִישׁוֹן Sept. ἐπὶ μὲν τὸν ξύλον, Vulg. opera statuarior, Marg., of monurle work), is very obscure, but would probably give us no farther insight into the subject (Dorrien, De opere Zangius in Ugoleti Thes. viii, No. 6) but in 1 Chron. xxviii, 18, 19, we learn that David had given to Solomon a model for these figures, which are there called "the chariot of the cherubim" (Vulg. quadrirgim, cherubim). We are not to suppose from this that any wheels supported the figures, but we must take "cherubim" in apposition to "chariots" (Berthell, ad loc.). The same phrase is found in Exclus. xlix, 5, and is in both cases an allusion to the poetical expression, "He rode upon a cherub, and did fly" (2 Sam. xxii, 11; Psa. xvi, 10), an image magnificently expanded in the subsequent vision of Ezekiel, which for that reason has received from the Rabbis the title of הַמָּשֶׁה, "the chariot." Although the mere word "cherub" is used in these passages, yet the simple human figure is so totally unadapted to perform the function of a chariot, that we are almost driven to the conclusion arrived at by De Saulcy on this ground alone, that the normal type of the cherub involved the body of an ox, as well
Whether the golden calf constructed by Aaron might be, not the Apsis of Egypt, but a representation of the antediluvian Cherubim, as some suppose, from its being made on "a feast to the Lord," and called "the gods of Israel." (Exod. xxxiv, 20), it is open to the same objections as the oak-tree, in the erection of his two calves, intended a schismatic imitation of the sacred symbols in the Temple of Jerusalem rather than the introduction of a new species of idolatry (1 Kings xii, 28), we shall not stop to inquire. See CALE. But as paganism is a corruption of patriarchal worship, each nation having added something according to their superstitions, we may find a confirmation of the views given above of the compound form of the cherubim, in the strange figures that are grouped together in the heavenly deities. The numerous ox-heads, for instance, in the statue of the ancient Diana, and particularly the Asiatic idols, almost all of which exhibit several heads and arms attached to one person, or the heads of different animals combined, afford a collateral proof, similar to the universal prevalence of sacrifice, that the form of the primitive cherubim has been traditionally preserved and extended over a large portion of the world. This may indeed be learned by the inscriptions, copied from ancient monuments, all of which illustrate some one or more of the notions which we attach to the cherubical forms; and while they afford material assistance to our ideas on the subject, they show that figures of this kind, as sacred symbols, were not peculiar to the Hebrews, and that their presence in the sanctuary was not calculated to excite any surprise among the neighboring nations, or to lead to the notion that the Jews also were worshippers of idols, for even in the pagan monument they never appear as idols, but as symbols; and it was very possibly this fact—that the cherubic figures were not liable to be misunderstood—which induced the wisdom of the Israelitish nation to permit their introduction into the most holy place.

Mr. Layard traces many striking points of analogy between the form and position of the above figures, especially between the last ones of the Assyrian group and the cherubim of the Temple: "Within the sacred oracle itself were the two cherubim of olive-wood, ten cubits high, with wings each five cubits long; and Solomon carved all the house round with carved figures of cherubim, and palm-trees, and open flowers, within and without. The cherubim have been described by Biblical commentators as mythic figures, uniting the human head with the body of a lion, or an ox, and the wings of an eagle. The right side of the sacred tree of the Ninevite sculptures, and for the open flowers the Assyrian tulip-shaped ornament—objects most probably very nearly resembling each other—we find the oracle of the Temple was almost identical, in general form and in its ornaments, with some of the characters of Nimroud and Khorsabad. In the Assyrian halls, too, the winged human-headed bulls were on the side of the wall, and their wings, like those of the cherubim, 'touched one another in the midst of the house.' The dimensions of these figures were in some cases nearly the same, namely, fifteen feet of human height, five and a half of the design of the cherubim, and palm-trees, and open flowers, and thus, with the other parts of the building, corresponded with those of the Assyrian palaces" (Nineveh and Babylon, 2d series, p. 643).
of Nature which transcend that of man. Among the Greeks the dragon (Plutus, Cod. 190, p. 250), and among the Indians the griffin (Pliny, vii, 2), were especially such creatures of mythological imagination. See DRAGON. In the various legends of Hercules the bull and the lion constantly appear as forms of hostile and evil power; and some of the Persian sculptures apparently represent evil genii under similar quasi-cherubic forms. The Hebrew idea seems to number the cherubim. A pair (Exod. xxv, 18, etc.) were placed on the mercy-seat of the ark; a pair of colossal size overshadowed it in Solomon’s Temple with the canopy of their contiguously extended wings. Ezekiel, 1, 4–14, speaks of four, and similarly the apocalyptic living creatures, 2Q1a (Rev. iv, 6), are four. So at the front or east of Eden were posted “the cherubim,” as though the whole of the specialized number. They utter no voice, though one is “heard from above them,” nor have dealings with men save to awe and repel. A “man clothed in linen” is introduced as a medium of communication between them and the prophet, whereas for a similar office one of the sarmaph personally officiates; and these later also “cry one to another.” The cherubim are placed beneath the actual presence of Jehovah, whose moving throne they appear to draw (Gen. iii, 24; Ezek. i. 5, 22, 25; x, 1, 2, 6, 7; Isa. vi. 2, 3, 6). The expression, however, “the chariot of the cherubim” (1 Chron. xxviii, 18) does not imply wheels, but the whole apparatus of ark and cherubim is probably so called in reference to its being carried on staves, and the words “chariot” and “cherubim” are in asposition. So a seat might be called “a carriage,” and the musc, form בֶּן־עָרוֹב is used for the body of a litter. See, however, Dorjen, De cherub. Sanct. (ap. Ugozlini, vol. viii.), where the opposite opinion is actually supported. The glory symbolizing that presence which eye cannot see rests or rides on them, or one of them, thence mounts to the temple threshold, and then departs and mounts again (Ezek. x, 4, 18; comp. Is. 8; Psa. xviii, 10). There is in them an entire absence of human sympathy, and even on the mercy-seat they probably appear not merely as admiring and wondering (1 Pet. i, 12), but as guardians of the covenant and avengers of its breach. A single figure there would have suggested an idol, cherubim being represented as regarding something greater than themselves, could not do. They thus became subordinate, like the supporters to a shield, and are repeated, as it were, the distinctive bearings of divine heralry — the mark, carved or wrought, everywhere on the house and furniture of God (Exod. xxv, 20; 1 Kings vi, 29, 55; vii, 29, 36). Those on the ark were to be placed with wings stretched forth, one at each end of the mercy-seat, and to be made “of the mercy-seat,” which Abar- benel (Spencer, De leg. Hebr. ritual. iii, 3, 23) and others interpret of the same mass of gold with it, viz. wrought by hammering, not cast and then joined on. This seems doubtful; but from the word employed (יְהוָא) the solidity of the metal may perhaps be inferred. They are called “cherubim of glory” (Heb. ix, 5), as on them the glory, when visible, rested; but, whether thus visibly symbolized or not, a perpetual presence of God is attributed to the Holy of Holies. They were anointed with the holy oil, like the ark itself and the other sacred furniture. Their wings were to be stretched upwards, and their faces “towards each other and towards the mercy-seat.” It is remarkable that with such precise directions as to their position, attitude, and material, nothing, save that they were winged, is said concerning their shape. See TA- MURACH .

IV. Their Meaning.—All, whether ancients or moderns, have agreed that the cherubim were symbolical, but they have greatly differed as to their figurative design; many regarding them as having a twofold significance, both physical and metaphysical. They were clearly referred, in a general sense, to represent divine existences in immediate communion with God. This was the view of Chrysostom, Ambrose, Augustine, and the fathers generally (Sixt. Senens. Bibli. Sacri, p. 484), and the Pseudo Dionysius places them second (between seraphim and thrones) in the nine orders of the celestial hierarchy (Dionys. Aret. de Caelo, Heli. 5–9). The Caiaphas, upon the hand, placed them ninth in their ten choirs of spirits (Buddus. Philo. Hebr. p. 415). In a special sense, Philo regarded them as signifying the two hemispheres, and the flaming sword the motion of the planets, in which opinion he is joined by some moderns, who consider them to have been nothing more than astronomical emblems—the Lion and the Man being equivalent to Leo and Aquarius—the signs of the zodiac (Landseer, Sub. Reser. p. 815). Irenæus views them as emblematical of several things, such as the four elements, the four quarters of the globe, the four Gospels, the four universal covenants (ead. Hier. iii, 11). Tertullian supposed that the choric figures, particularly the flaming sword, denoted the torrid zone (Apol. cap. 47). Justin Martyr imagined that the living creatures of Ezekiel were symbolical of Nebuchadnezar, the Assyrian monarch, in his distresses; when he ate grass like an ox, his hair was like a lion’s, and his nails like a serpent’s claw (Quest. c. Mar. vii). Athenæus supposed that they were significant of the visible heavens (Quest. ad Antioch, xxxix). The nature of the passages in which cherubim occur—passages poetical and highly wrought—the existence of exactly similar images among other nations, and the purely symbolic character of their form, has led not only Jewish allegorists like Philo, and Christian philosophers like Clemens of Alexandria, but even such writers as Hengstenberg, Keil, Neumann, etc., to deny them any personal reality; and in this way we may explain Zöllner’s definition of them as “mythical servants of Jehovah” (Zöllner-Wiegand, Gesch. des Heeren, ii, 45). Thus, in the vision of Ezekiel, it is obvious that their animal shape and position implies subjectation to the Almighty; that the four heads, uniting what were, according to the Jewish proverb, the four highest things in the world (Schoettgen’s Hor. Hebr. ad Rev. iv.), viz. the lion among beasts, the ox among cattle, the eagle among birds, and man among all, while God is the highest of all—constitute them the representative and quintessence of creation, placed in subordination to the great Creator (Leyer, in Zeller’s Werterb. s. v.). The heads, too, represent not only creatures, perfect after their kind, but also perfect qualities, as love, constancy, magnanimity, sublimity, the free consciousness of man, the strong courage of the lion, the enduring strength of the ox, the rapid flight of the eagle (Hoffman); and possibly the number four may
indicate the universe as composed of four elements or four quarters. The four traditional (7) standards of the quadrilateral Israelite encampment (Num. ii), the lion of Judah, the ox of Beunah, the eagle of the sun, and the ox of Ephraim, are far too uncertain to be relied upon. Their eyes represent universal knowledge and insight (comp. Ovid, Metamor., i, 624, and the similar symbol of the Phenician god Taut, mentioned by Sanchonathiap, ap. Euseb. Prep. Exeg. x, 39), for they are the eyes of God and, when they break through the whole earth (Zech. iv. 10). The wings imply speed and ubiquity; the wheels are necessary for the throne-chariot, itself a perfect and royal emblem, and so used by other nations (Chrysost. Orat. xxxvi, i; and the straight feet imply the fiery gliding and lightning-like flash of their divine motion (vitrales). We must purposely avoid the error of pressing the minor particulars, such as those suggested by Clemens Alexandrinus, when he supposes that the twelve wings hint at the twelve signs of the zodiac (Str cataet, v, cap. vi, sec. 57, p. 240, ed. Syll.). Thus explained, they become a striking hieroglyph of the dazzling, comprehensive, and universal character of the divine Creatur, whose attributes are reflected in his works.

The leading opinions of moderns may be reduced to three systems. (1) Hutchinson and his followers consider the cherubim as emblems of the Trinity, with much of the formative divinity in God, in proper person of which they remark that the words rendered "a flaming sword" (Gen. iii, 24) signify either a flaming fiery sword, as the words are rendered by the Sept., or, rather, a flame of fire and a sword or knife; so that, in this figure, there was exhibited in visible form, to the minds of our first parents, fire—the emblem of divine wrath, as well as an instrument of sacrifice—which, as it enfolded or revolved round itself, can mean nothing else than a picture of the satisfaction to be made by deity itself. But the grand objection to this theory, where it is at all intelligible, is, that not only are the cherubim, in all the places of Scripture where they are introduced, described as distinct from God, and no more than his attendants, but that it represents the divine Being, who is a pure spirit, without parts, passions, or anything material, making a visible picture of himself, when in all ages, from the beginning of time, he has expressly prohibited "the likeness of any image" (see through the whole 

(2) Another system regards the cherubim as symbolical of the chief ruling powers by which God carries on the operations of nature. As the heaven of heavens was typified by the holy of holies in the Levitical tabernacle (Heb. ii, 5-12, 24-28), this system considers that the visible heavens may be typified by the holy place or the outer sanctuary, and accordingly, finding, as its supporters imagine they do, the cherubim identified with the aerial firmament and its elements in such passages as the following: "He rode upon a cherub, and did fly, yea, he did fly upon the wings of the wind," where the last hemistich is excellent for the purpose. Who rides upon the heavens in thy help, and in his excellency upon the sky" (Deut. xxxii, 26; Ps. lxviii, 4); "He maketh crooked paths straight, when he delighteth in imperial service, the atmospheric, the great physical powers by which the Creator and preserver of the universe carries on the operations of nature. This view, however, although doubtless truly representative of the cherub symbol, fails, by reason of its vague and extensive character, to explain the peculiar form of representation adopted. (8) A third system considers the cherubim, from their being instituted immediately after the Fall, as having particular reference to the redemption of man, and as symbolical of the great and active energy of Christ, and active in the Church, and it was a plague to the people of the world, who adopt this theory are accustomed to refer to the living creatures, or cherubim, mentioned in the Apocalyptic vision (Rev. iv. 6), improperly rendered in our English translation "beasts" (ζώα), and which, it is clear, were not angels, but redeemed men connected with the Church through their preserve the heavens and glory procured by the Lamb. The same character may be ascribed to the living creatures in Ezekiel's visions, and to the cherubim, which stood over and looked into the mercy-seat, sprinkled with the blood of the atonement, and on the Shechinah, or divine glory arising from it, as well as the cherub figures which were placed on the edge of Eden; and thus the cherubim, which are prominently introduced in all the three successive dispensations of the covenant of grace, appear to be symbols of those who, in every age, should officially study and proclaim the glory and manifold wisdom of God. Of this view, likewise, it may be said That, while the Old Testament views only for the institution of some symbol having a moral import, it does not show why the special form in question should have been selected.

It is evident that the interpretation of the symbol must be as variable as the symbol itself, and we shall find it accordingly. In every instance it is clear that the cherubim can be accepted as adequate, but that the best of the various explanations contain elements of truth which melt and fade into each other, and are each true under one aspect. Unsatisfactory and vague as is the treatment of Philo "the Cherubim and flaming Sword," it has at least the merit of seizing this truth. Thus, discarding his astronomical vagaries which are alien to the spirit of Mosaism (Kalisch, ed Exod. p. 496), we may safely follow him in regarding the cherubim as emblems at once of divine perfection—personifications, in fact, of natural power employed in God's service, as De Wette holds; and emblems also of the divine attributes, his bowness to anger, his speed to love (Crotius on Exod. xxv, 18; Bochart, Hieroz. ii, 18; Rosenmüller, Scholia in Ezek. i; Heli, πτω των Χρυσώμ, και της φασιο, ὥρθ. § 7-9; De Vita Mos. p. 698). Both of these views are admirable; the cherubim represent at once the subordination of the universe to God (Rabbin. 3; Scheuch. Robo. § 35, ap Scherotzeg, loc. loco. ad Apoc. ix, 6, της Βασιλειας απολογίας; I kron. l. e. iv. 70; Alford on Rev. iv, 8), and the glory of his whom creative life, and uniting in themselves the most perfect created life, they are the most perfect revelation of God and the divine life." This is the conclusion of Bähr, whose whole treatment of the subject, though over-inclusive, is the most valuable contribution to a right understanding of this important and interesting question (Symboles, i, 840).

As the other suggestions of their meaning are, for the most part, mere adaptations, they may simply be mentioned and passed over; as that the cherubim represent the four archangels; the four major prophets; the Church (Coesius); the two uncreated angels, i.e. the Son and the Holy Spirit (Hulse); the two natures of Christ (Lichtung); the four ages of the world (Kar- se, De Cherubim hancimeri cunctis mundi ortus, 1. 87); or God's fourfold covenant with man in Christ, as man, as sacrificed, as risen, and ascended (Arndt, Untersuchungen Theisthenen, iv, 1, 6). We may compare also the absurd explanation of Clermont, that they are the northern army of Chaldea; and of Vajke that they symbolize the four great symbols of the gods. The very widespread and early fancy which attached the cherub figures to the four evangelists is equally untenable, though it first appears in the Pastor.
HERMAE, and was adopted by the school of St. John (Iren. odo. Herr. iii, 2, 8; Athanas. Opp. v, 2, p. 155; August. de comens. Evang. i, 6; Jerome, Prot. ad Evv.; ep. 50, ad Pudlia.; Greg. Hom. 4 in Ev.; Adam de St. Victor, Hymn. de St. Evang., etc.). The union, when those two beings are mainly twofold—1, a protective vengeful function in guarding from man’s too close intrusion the physical and moral splendors of a lost paradise and a sacred revelation; and, 2, to form the throne and chariot of the divine being in his earthly manifestations, and to guard the outskirts of his unapproachable glory (Echchorn, Einlert. iii, § 80). The cherubim carved and woven in the Temple decorations, while they symbolize this function, serve also as a seal of similitude, i.e., as heraldic insignia of the divine attributes to mark Jehovah’s presence by their guardian ministries (Isidor. iv, ep. 78). At the same time, from another point of view, they are Egyptian gods of the fullness of life subordinated to him who created it. A reference to the Apocalypse enables us to combine these conceptions with a far sublimier truth, and to explain the connection of the cherubim with the mercy-seat as a type not only of vengeance, but of expiation and forgiveness. The John of John xvi, 26, and of Eph. ii, 14, appear in the same choir with the redeemed innumerable multitude of the universal church (iv, 7; v, 13); no longer armed with flaming swords, with wrathful aspect and repellant silence, but mingling with the elders and joining in the new song. And here, too, we find the recovered Eden, the water of life flowing freely, and the tree of life with its fruits to hedge it round. Thus it is in the Apocalypse that the fullest and divinest significance is attached to this profound emblem. In the cherubim of the last book of the Bible we find the highest explanation of the cherubim in the first. The apparent wrath which excluded man from the forfeited paradise was but the mercy in disguise which secured for him its final fruition in a nobler form of life. Thus, to give the last touch of meaning to this changeful symbol, we catch in it a gleam, dim at first, but growing into steady brightness, of that redeemed created perfection, that exalted spiritual body, for which the Hebrews strove in the path of God. Beyond this we cannot go; but we have said enough to show the many-sided applicability of this inspired conception—a many-sidedness which is the strongest proof of its value and greatness.

VI. It is important to observe the extraordinary resemblance of the cherubim, as described in Scripture, to the symbolical religious fancies of heathen nations. It is not true, in any sense, to say, with Kurz, that the animal character is far more predominant in the emblems of heathen pantheonism. Even if we concede (which is more than doubtful) that the simplest conception of cherubim was represented by winged men, we have clear proof that the cherubim found in the sculptures of Niniveh (Layard, i, 125). In fact, there is no single cherubim combination, whether of bull, eagle, man (Layard, Niniveh, i, 127); man, lion, and eagle (Ibid. pp. 70, 349); man and eagle (Ibid. i, 64); man and lion (Ibid. ii, 465); or, to take the most prevalent (both in Scripture, and in the sculptures of Niniveh), man and lion (Ibid. i, 5), which may not be profusely paraded. In fact, these wood-cuts might stand for direct illustrations of Ezek. xii, 19; Rev. iv, 6 sq.; 1 Kings vii, 29, etc., and when we also find “wheels within wheels” represented in the same sculptures (Ibid. ii, 448), it is Mr. Layard’s natural inference that Ezekiel was familiar with certain divine attributes, chose forms familiar not only to himself, but to the people whom he addressed” (Ibid. Ibid.; see, too, Niniveh and Babylon, li, 648); or, as we should greatly prefer to see it expressed, the familiar decorations of the Assyrian temples moulded the forms of his imagination even at its most exalted moments. But, as we have already seen, it is more likely to have been supplied with this imagery by the sacerdotal sympathies which impressed his memory with the minutest details of the temple at Jerusalem; and the same symbols were not exclusively Assyrian, but were no less familiar to the Egyptians (Poorphr. de Abstinent. iv, 9; Ritter, Erdehl. d. Alterth. iii, 947; Witsius), nor to the Persians (Hdt. iii, 116; Ctes. Ind.; Plin. vii, 22; Wilkinson’s Anc. Egypt., passion; Chardin’s and Niebuhr’s Travels), the Greeks (Pausani. i, 24, 6), the Arabsians (D’Herbelot, Bibliothèque Orient. s. v. S. Morgi), and many other nations (Plin. x, 49, 69; Parkhurst’s Lexicon, s. v.). On this subject, generally, see Creuzer, Symbolik, i, 456; Rhode, Relig. Sage, p. 217; and Rüdiger in Ersch and Gruber’s Encyclopädie, s. v. Cherub. The similarity to the sphinx is such as to have led, even in early times, to a very strong belief that the idea of the Mosaic cherubim was in some way derived from them (Clem. Alex. Strom. v, cap. vii, § 7; ed. Syll. iii, p. 948; Orig. iii, 17; Comp. Resp. Evang. iii, 12). For a number of weighty arguments to this effect, see Bochart, Hieros. ii, xxvii, xxxiv, and xli; Spencer, ut sup. bk. iii, chap. iv; and especially Hengstenberg, De BB. Mos. v. Ægypt. p. 167 sqq. Besides these external coincidences, still more striking, perhaps, after a subsequent moralization of the form, is the usage ascribed in Greek mythology to the fiery-breathing bulls which guarded the golden fleece (Ovid, Met. vii, 104), to the winged dragon of the Hesperides, to the resuscitated Phœnxis, to the Gryphons (lion-eagles) which kept the Arimaspans from their guarded gold (Xesch. Prom. v, 848; Meld. ii, 1; comp. Milton, Par. Lost. ii, 498), and to the thunderbolts that draw the chariot of Jupiter (Horace, Od. i, 54, 7). Influenced by too exclusive an attention to these single resemblances, Herder identifies the cherubim with the mythic gold-guarding monsters of antiquity (Geist. der Hebr. Poes. i, 168), and J. D. Michaelis with the Equi Tonantes (De Cherub.; compare Valthebigen, Von den Cherub.; Schleusner, Lex. N. Test. s. v. Χρυσός). Similarly, Justin Martyr considers that Plato borrowed from the Scriptures his θυγρόν ἀναμη, or “winged chariot” of Zeus (προτι “Ελληνας, p. 80). From these conclusions we dissent. It seems far more likely that the Hebrews were acquainted with a similar Cherub, with a symbol familiar to so many nations, than to suppose either that they borrowed it from the Egyptians, or that any other nations adopted it from them. In fact, the conception belongs to the common cycle of Oriental traditions, fragments of which were freely adopted by the Hebrew writers, who always infused into them a nobler meaning and an unwooded truth.

VII. For further information on the subject, see (in addition to works and monographs cited above) Hufnagel, Der Cherubim im Paradiese (Franfurt a. M. 1821 [fantastic]); Gabler in Echhorn’s Ursprache, ii, 1, 246 sq.; Salis, Über die Symbolik des Gottes ein, p. 268 sqq.; Bemer, Gottend. ii, 36 sq.; Grünseelen, in the Stutt. Kunsth. 1834, No. 1-6; Jour. Sc. Arts. Oct. 1856, p. 154 sqq.; Critici Sacri, i, 120; Leone, De Cherubinis (Amst. 1847; also Helmst. 1065, and in Spanish, Amsterd. 1854); Wegler, De Cherubia (Mart. 1777); Geiger, Die Tiere der Bibel, p. 171 sqq.; Carovino, Der Werk, De Cherub. et Seraph. (Region. 1887); Jac. Ode, Comment. de Angelia, i, v, 78 sqq.; Deleyan, Obs. Sacar. ii, 442; Michællis, in the C. Comm. Soc. Reg. Gott, i, 167 sqq.; Velthebigen, Von den Cherubin (Brusnuchw. 1764); Hutchinson, Reps. of Cherubim (in his Works, Lond. 1740); De Cherubinis (Vienne 1813); chart; Herder, i, bk. iii, ch. 5; Labrun, Ecdrunea, pt. ii, p. 63 sqq. CHESALON

M'Cleod, *Cherubim and the Apocalypse* (London, 1856); Anon. *Angeles, Cherubim,* etc. (Lond. 1861). See Serafin.

*Chesalon* (Heb. *Kesalon,* קְסָלוֹן, place of confidence; Sept. *Χασαλόν* v. r. *Χάσαλον*), a place named as one of the landmarks on the north boundary of Judah, beyond Mt. Seir, and apparently situated on the shoulder (A. V. "side") of Mt. Jearim (Josh. xvi. 10). This last, the "Mount of Forests," has not necessarily any connection with Kirjath-Jearim, though the two were evidently, from their proximity in this statement of the boundary, not far apart. See Jeraim. Chesalon was the next landmark to Bethhemesh, and it is quite in accordance with this that Dr. Robinson has observed a modern village named Kesla, about six miles to the N.E. of Annahems, on the western mountains of Judah (Researches, ii. 864, note; *Later Rev. p. 154*). Eusebius and Jerome, in the *Onomasticon* (s. v. *Χασαλόν, Chesalon*), mention a place of a similar name, but they differ as to its situation, the former placing it in Benjamin, the latter in Judah; both agree that it was a very large village in the neighborhood of Jerusalem. The position of the border-line at this point determines that it lay within Judah. See Tribe.

Ches'e'd (Heb. *Kes'ed,* קְסֶד, of uncertain signif.; Sept. *Χεσσίτι, Vulg. Ceseid, Josephus Χασίδος, Am. i. 6, 5), the fourth of the eight sons of Nahor by Milcah (Gen. xxii. 22). B.C. cir. 2088. The name is the same as would be the sing. form of the Heb. for Chaldians; but it is doubtful whether there is any connection. See Chaldea.

Ches'oil (Heb. *Kesíl,* קְסֵיל, a foot, i.e. profile, as in Psa. xxi. 11, and elsewhere; Sept. *Χεσσίλις* v. r. *Χασίλις* and Besa; Vulg. Cesiul), a town in the extreme south of Palestine, named between Eloth and Hormah (Josh. xv. 30). In the list of towns given out of Judah to Simeon, the name Bethshil (q. v.) occurs in place of it (xix. 4), as if the one were identical with, or a corruption of, the other. This is confirmed by the reading of 1 Chron. iv. 50, Betshil; by that of the Sept. as given above, and by the mention in I Sam. xxx. 27, of a Bethshil among the cities of the extreme south. It is merely mentioned by Eusebius and Jerome in the *Onomasticon* (s. v. *Χεσσίλις, Kesil*). See also UNION.

Cheanut. See CHESTNUT.

Chest. The rendering is in certain passages in the Auth. Ver. of two distinct Hebrew terms: 1. "gëb or gëw, aron" (from מיכ, to gather; Sept. κηρώς, Vulg. gnosplacium), invariably used for the Ark (q. v.) of the Covenant, and, with two exceptions, for that only. (It is instructive to be reminded that there is no connection whatever between this word and that for the "ark" of Noah, and for the "ark" in which Moses was hid among the flags [both מיכ, tebah]). The two exceptions alluded to are (a) the "coffin" or mummy-case in which the bones of Joseph were carried from Egypt (Gen. i. 26, 27; rendered in the Targum of P'son. by γιοςκομωμον—compare John xii. 6—in Hebrew letters: the reading of the whole passage is very singular); and (b) the "chest" in which Jehoiada the priest collected the alms for the repairs of the Temple (2 Kings xii. 9, 10; 2 Chron. xxiv. 8-11). See COFFIN. 2. דָּאָש, gënasim (only in the plur.; from דָּא, to hoard, "cheasts," Ezek. xxvii. 24; "treasure," Eath. iii. 9; iv. 7).

Many boxes of various forms have been discovered among the Egyptian monuments. Some of these had lids which gave a certain degree of secrecy, and were ornamented with the usual cornice; others had a simple flat cover, and some few a pointed summit, resembling the shelving roof of a house. The sides were secured with wooden nails and glue, and
dovetailed together. This last kind of lid was divided into two parts, one of which alone opened, turning on two small hinges on the base, on the principle of the doors of their houses and temples; and, when necessary, the two knobs at the top could be tied together and sealed. These boxes were frequently of costly materials, veneered with rare woods, or made of ebony inlaid with ivory, painted with various devices, or stained to imitate materials of a valuable nature; and the mode of fastening the lid, and the curious substitute for a hinge given to some of them, show that the former was entirely removed, and that the box remained open while used. When not veneered, or inlaid with rare wood, the sides and lid were painted, and those intended for the tombs, to be deposited there in honor of the deceased, had usually funereal inscriptions or religious subjects painted upon them, among which were offerings presented by members of their family. (See Wilkinson, *Anc. Eg.* i. 168; ii. 116, abridgment.) See Box.

Chester, an ancient city of England, on the river Dee, founded by the Romans. In the 10th century it had several churches, a college, and the shrines of St. Anne and of St. John Baptist, the latter of which remains to this day. Under Henry VIII the Church of the monastery of St. Werburgh became the Cathedral for the new see of Chester, which took in Cheshire (from the diocese of Lichfield) and Lancashire (from the diocese of York). The revenues of the disolved monasteries were made a provision for the bishop, dean, and chapter. The present (1867) bishop is William Jacobson, DD, consecrated in 1865.

Chestnut-tree (אֲרֹנָם, armón; Chald. בַּרְנָן, Sept. κλάρινας [but in Ezek. διάρνας, Vulg. platanus], mentioned among the "speckled rods" which Jacob placed in the watering-troughs before the sheep (Gen. xxx. 37): its grandeur is indicated in Ezek. xxxii. 8 (as well as in Exx. xxix. 19), as one of the trees to which the Assyrian empire in its strength and beauty is likened, it being there noted for its magnificence, shooting its high boughs aloft. This description agrees well with the *plane-tree* (Platanus orientalis), which is adopted by the above ancient translators, to which modern critical opinion inclines, and which actually grows in Palestine (see Ritter, *Ed. xi. 611 sqq.*). The beech, the maple, and the chestnut have been adopted, in different modern versions, as representing the Hebrew armón, but scarcely any one now doubts that it means the plane-tree. It may be remarked that this tree is in Genesis associated with others—the willow and the poplar—which belong to the same class, but they never appear together. The chestnut, with its broad leaves, is a tree of the low grounds, and love to grow where the soil is rich and humid. This is strikingly illustrated by the fact that Russel (N. H. of *Alp-pi*., i. 47) expressly names the plane, the willow, and the poplar (along with the asp) as trees which grow in the same situations near Aleppo. But this congruity would be lost if the chestnut were understood, as that tree prefers dry and hilly situations. There is a latent beauty also in the passage in Ezekiel, where, in describing the greatness and glory of Assyria, the prophet says, "The armón-trees were
not like his boughs, nor any tree in the garden of God like unto him for beauty." This not only expresses the grandeur of the tree, but is singularly appropriate, from the fact that the plane-trees (platanus, as they are called) in the plains of Assyria are of extraordinary size and beauty, in both respects exceeding even those of Palestine (comp. Plin. xiii. 3; xvi. 18; Virg. Georg. iv. 146; Cicero, Rep. i. 7; Staturius, Syr. ii. 3, 59 sqq.; Martial, ix. 61, 5). Moreover, the etymology of the word connects it with רָעָם, 'aram, "to be naked," and with Arab. 'aram, "to strip off bark," the shedding of its bark yearly being characteristic of the plane-tree (see Hiller in Hierophyti, i. 402). The following account discriminates the several species.

Oriental Plane-tree (Platanus Orientalis).

The Oriental plane-tree ranks in the Linnean class and order Monocotyledonaria, and in the natural order among the Platanaceae. Westernmost Asia is its native country, although, according to Prof. Royle, it extends as far eastward as Cashmere. The stem is tall, erect, and covered with a smooth bark which annually falls off. The flowers are small and scarcely distinguishable; they come out a little before the leaves. The wood of the plane-tree is fine-grained, hard, and rather brittle than tough; when old, it is said to acquire dark veins, and to take the appearance of walnut-wood. In those situations which are favorable to its growth, huge branches spread out in all directions from the massive trunk, invested with broad, deeply-divided, and glossy green leaves. This body of rich foliage, joined to the smoothness of the stem and the symmetry of the general growth, renders the plane-tree one of the noblest objects in the vegetable kingdom. It has now, and had also of old (Plin. Nat. Hist. xii. 1), the reputation of being the tree which most effectually excludes the sun's beams in summer and most readily admits them in winter, thus affording the best shelter from the extremes of both seasons. For this reason it was planted near public buildings and palaces, a practice which the Greeks and Romans adopted; and the former delighted to adorn with it their academical walks and places of public exercise. In the East the plane seems to have been considered sacred, as the oak was formerly in Britain. This distinction is in most countries awarded to the most magnificent species of tree which it produces (see Kitto, Nat. Hist. of Persia, p. ccxlii). In Palestine, for instance, where the plane does not appear to have been very common, the terebinth seems to have possessed pre-emience. See OAK. In the celebrated story of Xerxes arresting the march of his grand army before a noble plane-tree in Lydia, that he might render honor to it, and adorn its boughs with golden chains, bracelets, and other rich ornaments, the action was misunderstood and egregiously misrepresented by Xélian (Var. Hist. ii. 14). The Oriental plane endures more northern climates well, and grows to a fine tree, but not to the enormous size which it sometimes attains in the East. Pausanias (i. viii. c. 23) notices a noble plane in Arcadia, the planting of which was ascribed, by tradition, to Menelaus. Pliny (Nat. Hist. xii. 1) mentions one in Lycia, in the trunk of which had gradually been formed an immense cavern, eighty feet in circumference. L. Mutianus, tribune consul and governor of the province, with eighteen other persons, often dined and supped commodiously within it. Caligula also had a tree of this sort at his villa, near Velletra, the hollow of which accommodated fifteen persons at dinner, with a proper suite of attendants. The emperor called it "his nest"; and it is highly probable that his friend, Herod Agrippa, may occasionally have been one of the fifteen birds which nestled there along with him. A fine specimen of the plane-tree was growing a few years ago (1844) at Vostizza, on the Gulf of Lepanto: it measured forty-six feet in circumference, according to the Rev. S. Clark, of Battersea, who has given an interesting account of it in John's Forest Trees of Britain (ii. 206). The plane-trees of Palestine in ancient days were probably more numerous than they are now, though modern travellers occasionally refer to them. Belon (Obs. Sing. ii. 106), La Roque (Voy. de Syrte, p. 197-199), and others, mention the groves of noble planes which adorn the plain of Antioch; and the last-named traveller records a night's rest which he enjoyed under planes of great beauty in a valley of Lebanon (p. 76). Buckingham names them among the trees which line the Jazbok (Travels in Palestine, ii. 108). Evelyn (in his Sylva) seems to ascribe the introduction of the plane-tree into England to the great Lord Bacon, who planted some which were still flourishing at Verulam in 1706. This was, perhaps, the first plantation of any note; but it appears from Turner's Herbal (published in 1651)
CHESULLOTH

Chesuiloth (Heb. with the article kāk-Kesuiloth, קְשֵׁלְוָת, the hopes [or, according to some, the loin, from its position on the "flank" or slope of the mountain]. (Josephus, Ant. x. 150)), a city of the tribe of Issachar, mentioned between Jezreel and Shunem, apparently near the border (Josh. xix. 18). It is probably the same with Chesiloth-Tabor (q. v.) of verse 12, and the simple Tabor of 1 Chron. vi. 77; the modern Kasil (Robinson's Researches, iii. 182; comp. Schwartz, Palest. p. 163). Eusebius and Jerome (Onomast. s. v. ἀγαθός; Achilleus; Ἀχίλλειος, Achileus) describe it as still extant under the same name (Ἀχίλλειος, Achileus).

Chevitim (χεβίτης v. Χεβίτης, Vulg. Cethiam), a Grecized form (I Macc. i. 1) of the Hebrew Chittim (q. v.).

Cheverus, Jean Louis, a cardinal of the Roman Church, was born at Mayenne, France, Jan. 29, 1678, of noble parentage. He entered the Jesuits when he was about sixteen years of age. He received his classical education at the college of Louis-le-Grand, and his theological at the seminary of St. Magloire. He was ordained priest in 1700, and soon after became vicar of Mayenne. During the later troubles of the Revolution he took refuge in England, exercised his ministry for a while in London, and then sailed for Boston, Mass., where he passed many years of successful labor in organizing and spreading the Roman Church. In 1804 he was made bishop, and continued his labors until 1828, when, on account of failing health, he returned to France as bishop of Montauban. In 1826 he was made archbishop of Bordeaux and peer of France. His labors among all classes, rich and poor, in hospitals and prisons, were incessant, during all his service in the highest ecclesiastical posts. In 1838 he was made cardinal, and he died of apoplexy July 10 of that year. Few clerics of the Roman Church have been more highly and deservedly esteemed by Protestants than cardinal Cheverus.—Hoefer, Nouv. Biogr. Générale, x. 270; Christian Examiner, xxvi. 88; Huen-Dubourg, Vie de Cheverus (Engl. tr. Philad. 3vo).

Cheynell, Francis, an English Nonconformist, was born at Oxford in 1608, and was educated at the University there. He was elected fellow of MerTon College in 1629, and took orders; but in 1640 he embraced the side of Parliament, and in 1643 was one of the assembly of divines and rector of Petworth. In 1647 he was made Margaret professor of divinity at Oxford, on leaving which he returned to his rectory at Petworth. At the Restoration (1660) he was deprived of his rectory, and retired to Preston, Sussex, where he died in 1665. He was a strong, if not bitter, but not abuser, and published, in 1648, The Rise, Growth, and Danger of Socinianism, in which archbishop Laud, Hales of Eton, Chillingworth, and other eminent divines, were sharply charged with Socinianism. In 1644, after Chillingworth's death, Cheynell published Chil lingwoorthe Norisima, or the Sicknesse, Herry, Death, and Burial of William Chillingworth, with a severe, if not abusive dedication to Drs. Bayly, Prideaux, Fell, etc., who had given their imprimatur to Chillingworth's Religion of Protants. After the dedication follows the narration itself, in which Cheynell relates how he became acquainted with "this man of reason," as he calls Chillingworth; what care he took of him, and how, as his illness increased, "they remembr'd him in their prayers, and prayed heartily that God would give him new light and new eyes, that he might see, and acknowledge, and recant his errors; that he might cease from his carnal reason and submit to faith."—New Gen. Biog. Dict. iii. 806; Sketch by Dr. Johnson, Gentleman's Mag. March and April, 1755; Calamy, Nonconformist's Memorial, ii. 457.

Chez'abi (Heb. קְשַׁבֵּי, קְשַׁבִּי, קְשַׁבֵּא; Sept. Καιβάρ), the birth-place of Shelah, Judah's youngest son by the daughter of Shuah (Gen. xxxviii. 5); probably the same with Chozena (1 Chron. iv. 22), and also the Aqib (q. v.) of later times (Josh. xv. 44). Schwartz (Palest. p. 162) identifies it with the northern city Achib (Josh. xix. 29), in referring to a Talmudical notice of the "river of Chezib;" an error into which also Grotius was led from the reading (Κηκάβα) of the Sept. at Josh. xv. 44. Jerome, however (Quast. Heb. in loc.), regards the name as an appellation merely (so Aqib, in Montfaucon's ed. of Origen's Hæxapla, De la Rue's Orig. Opp. v, 267), indicating that this was the last of Hothabah's sons.

Chichester, an ancient city of Sussex, England, the see of a bishop. It was a Roman station. The present cathedral was built in the 18th century; it is 407 feet long, 150 wide, with a tower and spire 800 feet high. The diocese comprises nearly the whole of Sussex, with a total population, in 1891, 188,355. It has 12 deaneries and 138,512 church situations. The present (1867) bishop is Archb. Turner Gilbert, D.D., consecrated in 1842. Two provincial councils were held here, in 1299 and 1292, convened by Gilbert, bishop of Chichester.—Landon, Manual of Councils, p. 130.

Chicheley, Chichley, or Chicheley, Henry, archbishop of Canterbury, was born at Higham Ferrars in 1602, and was educated at Oxford. He was consecrated bishop of St.David's by Pope Gregory XII, and in 1409 he was sent to represent the province of Canterbury at the Council of Pisa (q. v.). In 1411 he became archbishop of Canterbury. He stimulated Henry V to the war against France (see Shakespeare, Henry V), which he afterwards bitterly regretted, erecting All Saints' College, which still stands, as a memorial of his penitence. Chicheley was a man of vigor and courage; he resisted the king and the pope, when occasion demanded, as energetically as he resisted what he thought to be the heresy of the followers of Wickliffe. He died at Canterbury, April 12, 1448.—Duck, Life of Chicheley, ii. 162, 5vo; Leland, Cosmographica Britannica, iii. 499; Hook, Eccles. Biog. iii. 575 sq.

Chicken (ovanor, pullus), a word that occurs but twice in the English Bible (2 Esdr. i. 30; Matt. xxxii. 37), and only in allusion to "a ben (q. v.) gathering her chickens under her wings." See Fowl.

Chidon (Heb. קידון, ק"דרון, a dart; Sept. Χιδόν, but some omit), the name which in 1 Chron. xiii, 9 is given to the threshing-floor at which the accident to the ark, on its transport from Kirjath-jearim to Jerusalem, took place, and the death of Uzzah; on this account it was afterwards known as Penna-Uzzah. In the parallel account in 2 Sam. vi, the name is given as Nachon (q. v.), which is nearly equivalent in sense. Whether there were really two distinct names for the same spot, or whether the one is simply a corruption or alteration of the other, is quite uncertain (see Genesis, Theour. p. 238; Simson, Onom. p. 336-420, 429). Josephus (Ant. vi. 4, 2) has "Chidon" (Χιδόν). Some have even ventured to identify the spot with the threshing-floor of Ornan the Jebusite, on Mount Moriah. The Jewish tradition (Jerome, Quast. Heb. on 1 Chron. xi, 9) was that Chidon acquired its name from being the spot on which Joshua stood when he stretched out the weapon of that name (A.V. 'a'sh Pe' towards it) (Josh. viii, 18). But this is irreconcilable with all our ideas of the topography of the locality, which was evi-
dently not far N.W. of Jerusalem, possibly at the present ruins Kurbet el-Bistun (Van de Velde's Map).

Chief Captain. See ChILlARCH.

Chief Musician. See Music.

Chief of Asia. See ASIARCH.

Chief of Three ("תלמי וֹתְנִי הַשָּׁלֶשׁ," rosh kash-shalish), or rather דָּלִים, d'alim, the third-men, a title of Adino (q. v.) the Eznite, one of David's greatest braves (2 Sam. xxii, 8; Sept. ποισην τῶν ποισην; Vulg. prisci cepi inter tres; A. V., "chief among the captains"); otherwise called Jashobeam (1 Chron. xi, 11, where the text again corruptly has דָּלִים; Sept. ποισης τῶν ποισης; Vulg. prisci cepi inter tribus; A. V., "chief of the captains"); and also of Abishai (2 Sam. xxii, 18, ובַּלֵּה דָּלִים, of tribus, "among three"); and Amasa (1 Chron. xii, 18, דָּלִים, inter tribus, "of the captains").

In all these passages it designates the superior officer or commander of the triacontai, esarriori, or warriors who fought three in a chariot, and formed the phalanx nearest the king's person (Lydus, Synagoge, de re milite; lib. ii, c. iii, p. 38). He is also briefly called דָּלִים, rosh-kash-shalish (lit. the ternary) = old-de-camp, or general executive officer (2 Kings vii, 2, 17, 19; lx, 29; 19, 29), like the Roman "master of horse." See Captain.

Chief Priest. See Priest.

Chief Ruler. See SYNAGOGUE.

Child (properly בָּנָי, yeled, rixov; but represented by several other Hebrew and Greek words; comp. Children). Mothers, in the earliest times, suckled their offspring themselves until they were from thirty months to three years of age. The day on which a child was weaned was a festival (Gen. xxvi, 8; Exod. ii, 7; 1 Kings ix, 2; 1 Chron. xiii, 16). Nurses were employed, in case the mother died before the child was old enough to be weaned, and when, from any circumstances, she was unable to afford a sufficient supply of milk for its nourishment. In later ages, when matrons had become more delicate, and thought themselves too infirm to fulfill the duties which nature devolves on them, they employed to take their place, and were reckoned among the principal members of the family. They are, accordingly, in consequence of the respectable station which they sustained, frequently mentioned in sacred history (Gen. xxxvi, 5; 2 Kings xi, 2; 2 Chron. xxii, 11; Jer. xix, 1). They were to be till the fifth year in the care of the women; they then came into the father's hands, and were taught not only the arts and duties of life, but were instructed in the Mosaic law, and in all parts of the religion of their country (Deut. vi, 20-25; xi, 19). Those who wished to have them further instructed either employed private teachers, or sent them to some priest or Levite, who sometimes had had a hand in the education of other children under his care. It appears from 1 Sam. i, 24-28, that there was a school near the holy tabernacle dedicated to the instruction of youth. There had formerly been many other schools of this kind, which had fallen into discredit, but were restored by the prophet Samuel, after whose time the members of the seminaries in question, who were denominated by way of distinction the sons of the prophets, acquired much celebrity. The daughters rarely departed from the apartments appropriated to the females, except when they went out with an urn to draw water, or occasionally joined in the labors of the field—as keeping sheep—which was the practice with those who belonged to those humbler stations in life in which the more ancient simplicity of manners was still retained (Gen. xxiv, 16; xxix, 9; Exod. ii, 16; 1 Sam. ix, 11; Ruth ii, 2; John iv, 7). They spent their time in learning those domestic and other arts, which are befitting a woman's situation and character, until they arrived at that period in life when they were to be sold, or, by a better fortune, given away in marriage (Prov. xxxi, 18; 2 Sam. xii, 7). The daughters of such as possessed rank and wealth spent the greater part of their time within the walls of their palaces, and, in imitation of their mothers, adorned themselves with graces, singing, and dancing. Sometimes their apartments were the scenes of vice (Ezek. xxiii, 18). They went abroad very rarely, but they received with cordiality female visitants. The sports of children were doubtless such as have always prevailed among youth, especially in the East. Hackett (Illustrations of Scripture, p. 120) mentions having seen children playing in the streets with flying kites, and playing at leap-frog and ball.

The more children—especially of male children—a person had among the Hebrews, the more he honored it; being considered a mark of divine favor, while sterile people were, on the contrary, held in contempt (comp. Gen. xi, 80; xxxi, 1; 1 Sam. ii, 5; 2 Sam. vi, 28; Psa. cxxvii, 3 sq.; cxxviii, 8; Luke i, 7; ii, 5). That children were often taken as bondmen by a creditor for debts contracted by the father, is evident from 2 Kings iv, 1; Isa. i, 1; Neeb. v. Among the Hebrews a father had almost unlimited power over his children, not only in rearing them, but in restricting that power to a certain age; it was, indeed, the parents who even selected wives for their sons (Gen. xxii, 21; Exod. xxix, 9, 10, 11; Judg. xiv, 2, 5). It might of course be expected, while they lived in their father's house, and were in a manner pensioners on his bounty, that he would exercise his authority over the children of his sons, as well as over the sons themselves. In this case the power of the father had no narrow limits, and whenever he found it necessary to resort to measures of severity, he was at liberty to inflict the extremity of punishment (Gen. xxxviii, 24). This power extended to the life of the child; if he judged the son worthy of death, was bound to bring the cause before a judge. But he enacted, at the same time, that the judge should pronounce sentence of death upon the son if, on inquiry, it could be proved that he had maltreated his father or mother, or that he was a spendthrift, or contumacious, and could not be reformed (Gen. xiv, xxix, 9; Exod. xxii, 18, 21). It would appear, however, that a father's power over his daughters was still greater than that over his sons, since he might even annul a sacred vow made by a daughter, but not one made by a son (Num. xxx, 4, 16). Children cursing or assaulting their parents were punished by the Mosaic law with death (Exod. xxi, 15, 17; Lev. xx, 9), a remarkable instance of which is quoted by Christ (Matt. xv, 4, 6; Mark vii, 9, 13). The authority of the parents, and the service and love due to them, are recognised in the most prominent of the moral laws of the Jewish polity, the Ten Commandments (Exod. xx, 12); but the Pharisees devised a mode of evasion which our Lord strongly reprobates (Matt. xv, 5, 6; Mark vii, 11, 18). The prophetic curse or blessing of the father also possessed no little efficacy (Gen. xxix, 2, 28). (On punishing children for their parents' faults, Ezek. xviii, see Musaeus, De iure potest libertos propri prorsit parent. Lips. 1714.) It is mentioned in the Scriptures as those born in the house, the children of maid-servants, the sons or children of the house (Gen. xiv, 14; xv, 3; xxvii, 23; Psa. lxxxvi, 16; cxvi, 16). Few things appear more shocking to humanity than the custom, of which frequent mention is made in the books of Esther and Daniel, of putting the children of the king on the flames in honor of Moroc, a custom the antiquity of which is proved by its having been repeatedly forbidden by Moses (Lev. xxviii, 21; xx, 1, 5; 2 Kings xvi, 8). See MOLOCH.

There are some allusions in Scripture to the modes in which children were carried. These appear to be adequately represented by the existing usages, as
CHILD

shown in the following cut, in which fig. 1 represents a Nestorian woman bearing her child bundled at her back, and fig. 2, an Egyptian female bearing her child on her shoulder. The former mode appears to be adopted in several places, and the latter in Isa. xlix. 22. (See Hackett's Illustrations of Scripture, p. 57.)

In Scripture the word "child," or "children," has considerable latitude; disciples are often called children or sons. Solomon, in his Proverbs, says "to his disciple, 'Hear, my son;'" so also our Saviour (John xxi. 5). The descendants of a man, how remote soever, are denominated his sons or children, as "the children of Edom," "the children of Moab," "the children of Israel." Such expressions as "the children of light," "the children of darkness," "the children of the kingdom," signify those who follow truth, those who remain in error, and those who belong to the Church. Persons arrived almost at the age of maturity are sometimes called children. Thus Joseph is termed the "child," though he was at least sixteen years old (Gen. xxxvii. 30), and Benjamin, even when above thirty, was so denominated (Gen. xlv. 20). Solomon called himself a little child when he came to the kingdom of his father (1 Kings iii. 7). See ADOPTION; BIRTH; SON; INHERITANCE; EDUCATION, etc.; and comp. OFFSPRING.

CHILD OF GOD. The terms "child," "children," "babe," etc., are used in the N.T. in the following senses:

I. Psychologically these terms are used to denote a state of innocence and of intellectual narrowness or darkness (Matt. xi. 16; Luke vii. 82; 1 Cor. xiii. 11: "When I was a child, I spake as a child. I understood as a child. I thought as a child."); xiv. 20: "Brethren, be not children in understanding;" Eph. iv. 14: "That which was yesternight was more children, naked and fro

CHILD BIRTH. The term "child-bearin". The "child" is the offspring of a woman for her agency in the fall of Eden. Her passive lot in thus continuing the race is aptly expressed in that primeval sentence: "Unto the woman he said, I will greatly multiply thy sorrow and thy conception; in sorrow thou shalt bring forth children; and thy desire shall be to thy husband, and he shall rule over thee." See CONJUGATION. The language of the Apostle in 1 Tim. ii. 15, which expresses that a patient endurance of this penalty shall contribute to woman's spiritual benefit. The Prayer-book of the Church of England prescribes a form of public thanksgiving to be offered for women after safe delivery in childbirth. See BIRTH; CHURCHING.

Children. John Wesley, a minister of the Methodist Episcopal Church South, was born in Calvert Co., Md., in 1800. In 1814 he went to Richmond, Va., where he was employed as a clerk. In 1826 he received license as a local preacher; in 1827 he entered the Baltimore Conference on probation; and in 1828 he was admitted into full connection. In 1844, when the Methodist Episcopal Church was divided on the slavery question, he adhered to the Southern Church, and continued to serve in important appointments up to the year of his death. He died May 9, 1850, at Norfolk, Va., in great peace. His highest distinction lay in his extraordinary spirituality, his love for the world, his devotion to Christ; and in this respect it may reasonably be doubted whether he has had his superior in modern times."

—Sprague, Annals, viii., 126.
CHILEAB

Chili (Heb. Kîloth נִ ultimo, protected by the fin-
ther, L. s. God; Sept. Kîloth נִ ultimo, the second
son of king David by Abigail, Bala's widow (2
Sam. iii, 34), called in the parallel passage (1 Chron.
iii, 1) by the equivalent name Daniel (q. v.). The rea-
son of this twofold name is uncertain; but for the rab-
inical notions concerning it, and some speculations of
his own, see Bochart, Hieras, i, 603.

Chili, a republic of South America, with an area of
about 170,000 square miles, and, according to the cen-
sus of April, 1866, a population of 2,624,767 souls, al-
most exclusively Roman Catholic. There is one Ro-
man-Catholic Bishopric, of which the Archbishop is
Serena, la Conception, and San Carlos de Chiloé (An-
cud). The number of parish priests in 1858 was 153,
of convents of monks 41, of convents of nuns 7; and a
law provided that in future none of the 13 provinces
should have more than one convent of every order.
In 1854 the landed property of the Church was con-
fiscated, and since that time the clergy have been paid by
the state. In the budget of 1847, 180,000 pesos [Span-
ish dollars] were appropriated for this purpose.

The educational institutions are far ahead of those of any
other South American state. At the University of
Santiago, which was reorganized in 1842, and which
superseded the Supreme Council of the Church, in
1857, all other educational institutions, several Ger-
man Protestant professors have been teaching since
1857. The Plaza de Armas, published at Santiago, is
considered by Romanists as one of the best papers of
the Roman Church in South America.

In July, 1866, the ChiliMISSIONARY congress had a long
and animated discussion on amending Article 5 of the Chil-
lian Constitution, which is as follows: "The religion of
the republic of Chili is the Roman Catholic, to the
exclusion of the public exercise of any other." The
discussion terminated in a way quite satisfactory to the
Liberal party, notwithstanding the full strength of the
Ultramontane party was brought to bear in favor of
the old article. The amendment to the Constitution,
as adopted by Congress and sanctioned by the ex-
ecutives, declared: 1. That worship within buildings
belonging to private persons is allowed to those who
do not profess the Roman Catholic religion; and, 2.
That disaster is allowed to schools and private in-
schools for the instruction of their own children.
The first Protestant mission of Chili was established for
Americans and Englishmen in Valparaiso in 1846, and
has now become self-sustaining. The congregation had
in 1857 50 communicants, and the number of Sunday-
school scholars rose in 1865 to 100. A second Protes-
tant mission has been established in Valparaiso for the
German residents. In Santiago, the capital of the repub-
lie, the Protestant (chiefly American) residents in
January, 1866, fitted up a chapel at an expense of $800,
capable of seating 125 persons. The press of the city
generally made a kindly notice of the opening exer-
cise, in which the American and English ministers took
part, and not the least sign of dissatisfaction was
manifested. The Protstants with great unanimity
Threw forward in support of the movement, and within
one week after the opening of the chapel all the pests
were rented. In 1868 a missionary of the South Amer-
ican Missonary Society (of England), the Rev. Alva
Gardiner, established himself at Lota, in Arauco Bay
(Southern Chili), a town which derived its chief im-
portance from the coal mines in its neighborhood. In
1859 not less than 34 of these were worked, and some
300 workmen were connected with them. At the re-
quest of the English and Scotch families engaged in
the coal mines, the Government established Sunday ser-
ices at the mission-house, and a Sunday-school for the
children. The opposition at first shown by a portion
of the Roman Catholic population was gradually over-
come, and the Protestant mission procured and secured
religious toleration for the Protestant community of the
Lota mines, by a contract signed to that effect at the
company's office in a public manner, and after a pub-
lie meeting, and without a dissenting voice. The mis-
ionaries also took care of the spiritual interests of the
sailors visiting Arauco Bay, and provided the German
settlers in the neighborhood with opportunities of
Christian worship. Having in the meanwhile ac-
quired and perfected themselves in the Spanish lan-
guage, they, in 1865 and 1866, made several itinerant
visits into the territory of the Indians, and took the
preliminary steps for establishing the Indian missions
upon a firm basis. In 1866 the society had stations at
Lota and Coquimbo, at El Carmen in Northern Pata-
gonia, Rapanui, Chiloé, and others, and was extending
stations among the Araucanian Indians. In Dec. 1866,
the society's ship, the "Allen Gardner," left England
with four natives of the Terra del Fuego, who had re-
ceived a Christian education in England. The first
German missionary was sent to Southern Chili in 1866
by the Gustavus Adolphus Society of Germany. He
began preaching half of the time at Osorno, and the
other half at Puerto Monte, a (mostly German) town of
15,000 inhabitants, in a region which, as late as 1850,
was peopled only by small bodies of savages. The
German Protestants of this town have built a house in
the principal square, and propose to build a chapel.

Chilarch (χιλιαρχος, captain of a thousand; A.
V. "high captain," 1 M. vi, 21; Acts ii, 18; John

a military title occurring frequently in the (Greek)
New Testament in the following senses. See ARMY.
1. As a general state officer (Mark vi, 21; Acts
xxv, 28; Rev. vi, 15; xix, 18; comp. Josephus,
Ant. vii. 2, 2).
2. Specifically, a titular of the soldiers among the Ro-
man; six of whom formed the field which was
"legion" (q. v.), corresponding in rank nearly to our

 delegation (see Smith's Hist. of the Aegypt. e. s. Exerci-
tus); in the N. T. spoken individually of Claudius Ly-
sias, who, as military tribune, in the capacity of a
modern major, commanded the garrison of Fort Antonia at
Jerusalem (Acts xxii, 31 sq.; comp. Herodian, ii, 12,
18; Dion. Hal. Ant. vii, 4). Particularly applied to the
"prefect or (Lavish) superintendent of order in the
Temple (John xvi, 12). See CAPTAIN.

Chilaxa. See Millennium.

Chillastas. See Adventists; Millenarians.

Chill'lon (Heb. Kilgon',ぎるょん, pining; Sept. Xo-
λιαν v. Ἠκλων), the younger son of Elimelch
and Naomi of Bethlehem, and hus'and of Orphah,
Ruth's sister, who died childless without issue in
the country of Moab (Ruth i, 2; iv, 9). B.C. 1360.

Chillingworth, William, an eminent English
divine and controversialist, was born at Oxford, Octo-
ber, 1602. (The following account of him is mod-
ified from an article in the English Cyclopædia, which
is based on the Biographia Britannica.) In 1618 he
was a scholar, and in 1626 a fellow, of Trinity College
at Cambridge. In 1628 he became a fellow of Univer-
sity College, which was occupied by certain teachers
preserved by Anth. Wood ("Athen. Oxon., c. 20), who
says "he would often walk in the college grove, and
dispute with any scholar he met, purposely to facil-
itate and make the way of erring common with him,
which was a fashion used in those days, especially
among the disputing theologians, as he kept himself
apart purposely for divinity." The comparative meri-
ture of the English and Roman churches were at that
time a subject of zealous and incessant disputation among the University students, and sev-
eral learned Jesuits succeeded in making distinguishing
proselytes among the Protestant community. Chillingworth being an able disputant, was singled out by the famous Jesuit Father, alias Johannes Perseus (Hillich. Soc. Jes.), by whom he was convic-
ted of the necessity for an infallible living "Rule of Faith." On this he at once adopted the Roman Catholic system, wrote out his reasons for joining
Protestantism, and joined the Jesuits in their college at Douay. After the lapse of a few months, the arguments addressed to him by his godfather Land, then bishop of London, induced him to abandon his new faith, an he returned to Oxford in 1631, where he remained about two years in reconsidering the Protestant tenets. The reading of Daille on the Right Use of the Fathers is said to have finally determined him.

In 1635 he published his great work, The Religion of Protestants, a safe Way to Salvation. It passed through two editions in less than five months. The principle of Chillingworth's work is that the volume of Divine Scriptures, in order to be by such the ordinary rules of historical and critical investigation, is to be considered the sole authority of Christians, to the utter exclusion of ecclesiastical tradition. The Jesuit Knott, alias Matthias Wilson (Bibl. Patrum Soc. Jesu, p. 180), contended that he "destroyed the nature of faith by resolving it into reason." Cheynell (q. v.) also opposed Chillingworth from the Puritan side. Chillingworth in the mean time, unable to approve every statement in the Thirty-nine Articles, refused to accept any premiss in the Church. "However, in a very short time he was persuaded by the arguments of some members of Laud and Hook, that the laws and usages are the real object of subscription, not belief or assent—a doctrine held by Archbishop Sancroft and many other eminent divines. Accordingly he accepted the chancellorship of Salisbury, with the prebend of Brixworth, Northamptnmshire, annexed. Chillingworth, in 1640, was deputed by the chapter of Salisbury as their proctor to the Convocation in London. He was attached very zealously to the royal party, and wrote a treatise (unpublished) on The Unlawfulness of resisting the lawful Prince, although most impious, tyrannical, and idolatrous." Being present in the army of Charles I at the siege of Gloucester, August, 1643, he acted as envoys as well as devisers of engines, in imitation of the Roman "testudines cum plated, to assault the rebels and take the city by storm. Having accompanied the king's forces under Lord Hopton to Arundel Castle, he was there, with his com­rades, taken prisoner by the Parliament army under Sir William Waller, and falling ill, he was thence conveyed to the bishop's palace at Chichester, where he died, and was buried in January, 1644. (The precise day is not ascertained, but it was probably January 30.) Dr. Cheynell, then rector of Petworth, who had shown Chillingworth great kindness during his illness, appeared at the grave, with the work of Chillingworth (Chillingworth's Works) in his hands. After an earnest oration on the dangerous tendency of its rationalism, he flung it into the grave, exclaiming, "Get thee gone, thou cursed book, which has seduced so many precious souls; get thee gone, thou corrupt, rotten book, earth to earth, dust to dust—go rot with thy author!" See CHEYNELL.

The result of his remarkable proficiency in "wring­ling" is stated by his friend Lord Clarendon (Histo­ry of the Rebellion) to have been that "Chillingworth had contracted such an irreconcilable hatred of disputing, that at last he was contented of nothing." Tillotson accused him of "the impudence of his writings," and Locke says (on "Education"). "If you would have your son to reason well, let him read Chillingworth;" and again (on "Study"). "For attaining right reasoning I propose the constant reading of Chillingworth; for this purpose he deserves to be read over and over again." But Anst. Wood's opinion is not without its charm: "Chillingworth had such extraordinary clear reason that, if the great Turk or the devil could be converted, he was able to do it." In theology he is classed with the "Li­titu­dinarists" (q. v.). The best edition of The Religion of Protestants is that in fol. 1742, with sermons, etc., and a life of the author by Dr. Birch. It has been often reprinted. —Des Maizaux, Life of Chillingworth (1725, 8vo); Kippis, Biographia Britannica, iii, 508 sq.; Hook, Eccl. Biography, iv, 1. The best modern edition of his works is that of Oxford, 1838 (3 vols. 8vo). There is also a cheap American edition (8vo), with Life by Birch (Philadelphia, 1848). Ch'il'mad (Heb. Kil'mad, פִּלְמָד, etymology unknown; Sept. Χαρμαύνιος v. r. Χαρμαύνια and Χαρμαβ; Vulg. Chimaum), an Asiatic place or country mentioned, in conjunction with Bebaea and Asshur, as a trading emporium with the Tyrians (Ezek. xxvii, 28). The only name bearing any similarity to it is Charmand (Χαρμάνδης), a "large and flourishing" town near the Euphrates, between the Mascas and the Babylonian frontier (Xen. Anab. i, 5, 10; comp. Steph. Byz. p. 74), an idea adopted generally adopted by Conon. (Cicero, ad Phil. i, 18, 480). Hitzig (Comment. on Ezek. i. c.) proposes to alter the punctuation to פִּלְמָד, Ke-linmad', giving the sense "Asshur was as thy popil in commerce," as first suggested by Kimchi (in loc.). The Chaldee Targum has פֶּלִם, Media. For other conjectures, see Rosenmuller in loc. See CHALDEA, p. 198. Chine. See Bell; Cymral.

Chimere (Fr. chimère, from the Italian chimera). The upper robe worn by a bishop, to which the lawn sleeves are generally attached. Before Elizabeth's time the bishops wore a scarlet chimere over the rochet, as they still do when assembled in convocation; but bishop Hooper having courted at the scarlet, it was used thither for black satin.—Salmer, Orig. Liturg., ii, 319.

Chim'ham (Heb. Kim'ham, כִּמְחָם, pining; Sept. Χαμάμα v. r. Χαμάα), a follower, and probably a son (Joseph. Αἰγυπτίων, vii. 11, 4, and comp. I Kings ii, 7) of Barzillai the Gileadite, who returned in his stead from beyond Jordan with David on his restoration after Absalom's rebellion (2 Sam. xix, 57, 38, 40, which last verse gives the name as כִּמָּח, Kimham). B.C. 1023. David appears to have bestowed on him, as a reward for his loyalty, a possession at Bethlehem, on which, in later times, an inn or khan (קָנָה), called after him (Sept. μικρόςυγιοντας; Vulg. peregrinatus in Chamae; A. V., habitation of Chimham; the text has the name מִכָּח, i.e. מַכָּח, Makham; Sept. v. r. מַכָּחָן, מַכָּח לְאֵשׁ, etc.), was standing, well known as the starting-point for travellers from Jerusalem to Egypt (Jer. xlii, 17). Blunt notices in this mention of the dwelling of Chimham at Beth­lehem an indication of the actual munificence of David to the family of Barzillai, for which we are prepared by the narrative of Samuel and 1 Kings (Under-ing enclosed, 6th ed. p. 150). See IXR.

Chimney (קָמִית, arūbāḥ, a lattice, in the sing., Hos. xiii, 5; Sept. νήσυτικον; Vulg. funarium; elsewhere in the plur. a window, as closed by lattice-work instead of glass, Excl. xii, 3; a dove-cote, as sealed with lattice-work, Isa. ix, 8, especially in the phrase "windows of heaven" [q. v.]), an opening covered with lattice-work through which the smoke passes (Hos. xiii, 5). The inclosure for the smoke-work is elsewhere rendered "window." Houses in the East are not furnished with stoves and fireplaces as among us. The fuel is heaped into a pot, which is placed in a part hollowed out for that purpose in the centre of the paved floor. The smoke, therefore, escapes through the windows (Isa. xlix, 16; xlvii, 14). See Hollow. Sometimes the fire is preyed through the hole, or else, in the middle of the floor, as mentioned by Jeremiah (xxvi, 22). Chimneys appear to have been employed in the round towers for furnaces, but never in dwelling-houses. They were termed Gor-Akan, a smoking furnace, which is the name of a city mentioned in 1 Sam. xxx, 50, probably where many workers in metal resided. Such appears to be referred to by the
"chimneys in Sion" of the Apocrypha (2 Esdr. vi, 4, cussions). See Furnace.

China (see Sinia), a vast country of Asia, extending (including its dependencies) from 20° to 56° N., and from 144° 60' E. to 90° E. Its area is over four and a half million square miles, including one third of Asia, and nearly one tenth of the habitable globe. The empire is divided into three principal parts: first, the eighteen provinces; second, Manchuria; third, colonial possessions. The last includes Mongolia, Sunkaia, Eastern Turkistan, Koko-nor, and Thibet. The second is the native country of the Manchus, the reigning family in China, and includes the territory lying east of the Inner Daurian Mountains, and north of the Gulf of Lian Yung. The first division is China Proper (between 16° and 40° N. lat., including Hainan on the south; and between 95° and 124° E. long.). It is the only part settled by Chinese. It lies on the eastern slope of the high table-land of Central Asia, and in the south-east angle of the continent, and for beauty of scenery, fertility of soil, salubrity of climate, magnificent and beautiful rivers, and variety and abundance of its productions, will compare with any portion of the globe" (Williams, Middle Kingdom, i, 7). Its estimated area is nearly 2,000,000 square miles, or two fifths of the empire.

and impartial judgment; and those who have resided long in the country, and know them well, have arrived at very different conclusions. M. Huc asserts that they are 'destitute of religious feelings and beliefs, 'skeptical and indifferent to everything that concerns the moral side of man,' 'their whole lives but materialism put in action'; but 'all this,' says Mr. Meadows (The Chinese and their rebellions, Lond. 1856), 'is baseless calumny of the higher life of a great portion of the human race.' He admits, indeed, that these charges are true of the mass of the Chinese, just as they are true of the English, French, and Americans; but as among these there is a large amount of generosity and right feeling, and also a minority higher in nature, actuated by higher motives, aiming at higher aims,' so also, he maintains, there is among the Chinese a similar right feeling, and a like minority who live a higher life than the people generally. The Chinese are, as a race, unwarlike, fond of peace and domestic order, capable of a high degree of organization and local self-government, sober, industrious, practical, unimaginative, literary, and deeply imbued with the mercantile spirit. It is to be observed that the inhabitants of China Proper are essentially one people, the differences, except in dialect, being hardly more marked than between the Northumbrian peasant and

Map of China Proper.

I. Population, Usages, etc.—The total population of China Proper was 871 millions in 1816, 986 millions in 1852, and is at present estimated at 410 or 420 millions. This vast population has an ancient and peculiar civilization. The Chinese are generally classed in the Mongolian variety of the human race. "A tawny or parchment-colored skin, black hair, lank and coarse, a thin beard, oblique eyes, and high cheek-bones, are the principal characteristics of the race. Of the general character of the Chinese, it is not easy to form a fair
Women hold a very inferior position, and are little better than slaves. Polygamy is not recognised by law, but secondary wives are common, especially when the chief is young, and each other, especially in the upper classes, is regulated by a tedious and elaborate etiquette; indeed, they are the slaves of custom, and everything is done by precedent. 'A Chinaman,' says Mr. Oliphant, 'has wonderful command of feature; he generally looks most pleased when he has least reason to be so, and maintains an expression of imperturbable politeness and amiability when he is secretly regretting devoutly that he cannot bastinado you to death.' The Le-King, or Book of Rites, regulates Chinese manners, and is one cause of their不变seasbility, for here they are stereotyped and handed down from age to age. The ceremonial usages of China have been extended and improved, and one of the first acts at Peking, the Board of Rites—is charged with their interpretation.

In everything that relates to death and sepulture, the customs of the Chinese are singular. They meet their last enemy with apparent unconsciousness, and, while their faces are intent on something else, they regard the quality of their coffins as of vital importance, and frequently provide them during their lifetime; indeed, a coffin is reckoned a most acceptable present, and is frequently given by children their parents. Education, as: the high road to official employment, to rank, wealth, and influence, is eagerly sought by all classes. Literacy proficiency (conferred, however, to the ancient 'classics' of the country) commands everywhere respect and consideration, and primary instruction penetrates to the remotest villages. Self-supporting day-schooals are universal throughout the country, and the office of teacher is followed by a great number of the literati. Government provides state examiners, but does not otherwise assist in the education of the people" (Chambers, Encyclopaedia, s. v.). The best modern account of the customs and religious usages of the Chinese is given in Doolittle's Social Life of the Chinese (N. Y., Harper and Brothers, 1865, 2 vols. 12mo).

From the commencement of Protestant missions in China, by the Rev. Dr. Morrison, A.D. 1807 to 1847, a period of forty years, eighty-six missionaries had entered this field. During that time twelve died, and twenty-three retired from the work. Of those who died, one had lived twenty-seven years in the field, another sixteen years, four for eight years, and three for shorter periods. Thus, on an average, during forty years, the number of deaths among the Protestant missionaries was at the rate of one in three years. Of those who retired from the work, some engaged in other departments of labor in China; some returned, for various reasons, to their native land, and others were obliged, in consequence of ill health, to leave the field. Forty-one of the eighty-six are still in China. Of these, one has been more than thirty years in the field, and still enjoys excellent health. Others have been here for twenty, ten, and five years, according to the time they entered the work. We have not the means for making an extensive comparison, but it is believed that these statistics will compare favorably with those of any body of ministers in America or England. It should also be remembered, that as China has only recently been opened to missionaries, a great part of those referred to in the foregoing calculation labored at other places on the coast, south of China—as Malacca, Singapore, and Batavia, where the climate regarded as a crime, is undoubtedly practised to some extent, as is proved by edicts issued against it. Milne (Life in China) denies its prevalence [but Doolittle (vol. ii. ch. viii) abundantly confirms it]. Parents possess almost unlimited authority over their children. The intercourse of the Chinese is, with each other, especially in the upper classes, regulated by a tedious and elaborate etiquette; indeed, they are the slaves of custom, and everything is done by precedent. 'A Chinaman,' says Mr. Oliphant, 'has wonderful command of feature; he generally looks most pleased when he has least reason to be so, and maintains an expression of imperturbable politeness and amiability when he is secretly regretting devoutly that he cannot bastinado you to death.' The Le-King, or Book of Rites, regulates Chinese manners, and is one cause of their unchangingness, for here they are stereotyped and handed down from age to age. The ceremonial usages of China have been extended and improved, and one of the first acts at Peking, the Board of Rites—is charged with their interpretation.

In everything that relates to death and sepulture, the customs of the Chinese are singular. The best modern account of the customs and religious usages of the Chinese is given in Doolittle's Social Life of the Chinese (N. Y., Harper and Brothers, 1865, 2 vols. 12mo).

There is a general impression that the climate of China is specially insalubrious. That this is not so may be seen from the following statement, condensed from the Chinese Repository (vol. xvi, p. 12 sq.): "From the commencement of Protestant missions in China, by the Rev. Dr. Morrison, A.D. 1807 to 1847, a period of forty years, eighty-six missionaries had entered this field. During that time twelve died, and twenty-three retired from the work. Of those who died, one had lived twenty-seven years in the field, another sixteen years, four for eight years, and three for shorter periods. Thus, on an average, during forty years, the number of deaths among the Protestant missionaries was at the rate of one in three years. Of those who retired from the work, some engaged in other departments of labor in China; some returned, for various reasons, to their native land, and others were obliged, in consequence of ill health, to leave the field. Forty-one of the eighty-six are still in China. Of these, one has been more than thirty years in the field, and still enjoys excellent health. Others have been here for twenty, ten, and five years, according to the time they entered the work. We have not the means for making an extensive comparison, but it is believed that these statistics will compare favorably with those of any body of ministers in America or England. It should also be remembered, that as China has only recently been opened to missionaries, a great part of those referred to in the foregoing calculation labored at other places on the coast, south of China—as Malacca, Singapore, and Batavia, where the climate regarded as a crime, is undoubtedly practised to some extent, as is proved by edicts issued against it. Milne (Life in China) denies its prevalence [but Doolittle (vol. ii. ch. viii) abundantly confirms it]. Parents possess almost unlimited authority over their children. The intercourse of the Chinese is, with each other, especially in the upper classes, regulated by a tedious and elaborate etiquette; indeed, they are the slaves of custom, and everything is done by precedent. 'A Chinaman,' says Mr. Oliphant, 'has wonderful command of feature; he generally looks most pleased when he has least reason to be so, and maintains an expression of imperturbable politeness and amiability when he is secretly regretting devoutly that he cannot bastinado you to death.' The Le-King, or Book of Rites, regulates Chinese manners, and is one cause of their unchangingness, for here they are stereotyped and handed down from age to age. The ceremonial usages of China have been extended and improved, and one of the first acts at Peking, the Board of Rites—is charged with their interpretation.

Venerable custom refers to the veneration of the dead, which is the custom of the Chinese. The Chinese have a strong affection for their ancestors, and they venerate them in a way that is not unlike the way in which we venerate our dead. The veneration of the dead is an important part of Chinese culture, and it is often reflected in the way that Chinese people conduct themselves in daily life. The Chinese believe that the spirits of the dead continue to exist and that they have the power to influence the living. As a result, the Chinese are very careful to honor and respect their ancestors, and they often hold special ceremonies and rituals to show their respect.

1. Conformity.—After the fall of the Taikou dynasty this old religion fell into disuse. About B.C. 551 appeared the reformer Kong-fu-tse (see Confucius), who attempted to introduce better morals, and at the same time to improve the political and social relations of the people. Confucius taught that from the Original Being Tao-li (see proverbs and Yen, Yung, the P'ef-f, is the essence of heaven, of the sun, day, heat, and manhood, and is represented by

Yen, the Imperfect, is the essence of the moon, earth, night, cold, and womanhood, and is represented by

These two, by simple combination, give four signs (Sce-si-pu), viz.:

Believe in the simple combination the eight tri-igrams of the Kun, viz.

Heaven, the original dampness, the fire, wind, water, mountains, thunder, the earth. These figures, disposed in a circle, were used by Confucius to illustrate the creation of the world. They had also an ethical meaning, being used to represent the cardinal virtues, piety, morality, justice, and chastity. But of any spoken or written revelation there is no trace in his doctrines. Confucius says himself that the Heavens are silent; they are to be known in their effects, but not further. Those who obey the law of Heaven as presented in Nature will be happy; those who do not, because in this system we find no notion either of immortality or of religious doctrine; it contemplates life only, not the future. It has no special priesthood nor temples; each family sacrifices to the tutelar deities of the household in its own dwelling, but the emperor alone is permitted to sacrifice to the highest Heaven. The writings of Confucius are read and expounded with great solemnity on the 1st and 15th of every month by a mandarin in robes of ceremony, and Confucius himself is honored as a saint. His doctrines are followed by the higher and more cultivated classes of China almost universally. The golden rule, "Do not do to others what you would not have done to yourself," which Locke designates as the foundation of all social virtue, is found among the sayings of Confucius in the negative form: "What you do not wish done to yourself, do not do to others." In the "Conversations," bk. xxv, ch. xxiii, it appears condensed, like a telegram, into eight characters, a good specimen of Chinese style:
The Three Pure Ones.

of certain three idols found in temples belonging to the Taulist religion and worshipped by Taulist priests. The images are seated side by side. One of them, as some explain, represents Lō-chū, or the 'Old Boy,' the founder of that religion. Others explain that the three images refer to three different incarnations of Lō-chū.

There is very little known among the common people about these divinities, and they are very seldom worshipped by them. Taulist priests of both classes universally worship the Three Pure Ones" (Doolittle, Social Life of the Chinese, i. 249).

4. Buddha.—The third religion of China is that of Fo, or Buddha, introduced from India about the year A.D. 65, which, however, became commingled with the remains of the old Chinese religion and with the maxims of Confucius. With the great majority of the people it has sunk into a coarse idolatry. The Dalai Lama is in China replaced by the Bon-dachi-in-er-dem as the spiritual head. The priests are called bonzes (Chinese Seng or Ho-shang), and number more than one million. The lower orders of priests are ignorant, live in convents, and go about begging; the higher orders (Tu-ho-shang) are educated, and obliged to study their religious books. There are also female bonzes, living in convents like the Romanist nuns. The temples are either mere chapels, or else large edifices surrounded by columns, at the end of which is a hall (Ting) containing the image of the god. The larger temples are merely a reunion of several smaller ones, having in the corners pavilions, two stories high, in which the image of the god is kept, and which are surmounted by pyramidal octagonal towers (Tu-tz) 7

Worshipping the Ancestral Tablet in its Niche.—(From Doolittle's China.)
In the back, containing pieces of paper bearing the names of the higher ancestors, or other members of the family. Incense and papers are daily burned before them, accompanied by a bow or act of homage, from the heart, and prayers. The tablets are ranged in chronological order, those of the same generation being placed in a line. When the hall is large and the family rich, no pains are spared to adorn it with banners and insignia of wealth and rank; and on festival days it serves as a convenient place for friends to meet, or, indeed, for ordinary family occasion. A person residing near Macao spent about $1500 in the erection of a hall, and on the dedication day the female members of the family assembled with his sons and descendants to assist in the ceremonies. The portraits of the deceased are also suspended in the hall, but effigies or images are not now made.

"In the first part of April, during the term called tsiung-ming, a general worship of ancestors, called pai sha, or worshiping at the hills, is observed. The whole population, men, women, and children, repair to their family tombs, carrying a tray containing the sacrificial food, vegetable cake, incense paper, and incense for burning, and then go through a variety of ceremonies and prayers. The grave is also carefully repaired and swept, and at the close of the service three pieces of turf are placed at the back and front of the grave, to retain long strips of red and white paper. Then the ghost is satisfied. That which has been performed, and these fugitive testimonials remain fluttering in the wind long enough to announce it to all the friends, for when a grave has been neglected three years it is sometimes dug over and the land resold" (Williams, Middle Kingdom, ii, 265, 269).

Aside from the above-named religions, there has lately appeared another, the Tai-ping, which is a mixture of the ancient religions with some fragments of Christian doctrine made known by the missionaries. This religion is purely theocratic, partly on the model of the O. T. It holds that its God is the only true one; that he came to earth and spoke to his children, telling them what to do and what to avoid. The leader of the movement, Hung-Siu Tuen, or, as he styles himself, Tien-Wang (king of Heaven), was a native of an insignificant village 30 miles from Canton, and was born in 1813. His parents were too poor to give him the education required for competing successfully at the examinations. In the year he commenced reading he prepared annually for half a dozen years to Canton to these examinations, but each time failed of success. At one of these visits, an American missionary, Rev. I. J. Roberts, gave him a package of tracts in Chinese. He did not read them until five years later, after his recovery from a severe illness, during which he had seen visions and uttered inflamed rhapsodies in regard to his future. He now found in these tracts the key to the visions; he abandoned the belief in the teaching of Confucius, adopted views which were a mixture of ancient Chinese and of Christian doctrines, and bestowed himself to the mountains to make converts for his views. In 1840 he had made a number of converts, who were called God-worshippers. Not long after, in a single district, the number of his followers was reported to exceed 2000. Attacks on some Buddhist temples brought him into collision with the state authorities, and for several years he again led a wandering life. But he had become a great lover of his God and was ever constant in communication with his followers. A great change in his views took place in 1850. A rebellion had sprung up in the province of Canton, and the rebels, when pressed by the government troops, endeavored to enlist the influence of the God-worshippers in prodigious numbers, and promised him the throne. To assert Tuen's authority, as their leader, when he, calling together his followers, seized a market-town, and thus, in December, 1850, the Tai-ping (great peace) rebellion assumed more formidable dimensions. Siu-Tuen gave to several of his most prominent adherents the title Wang (king), and began to issue political-religious proclamations. He assumed the title Tien-Wang (king of Heaven), and began to wear the cord of heaven. At this time he declared himself the brother and equal of Christ, and required the same homage; but subsequently he grouped in his manifestoes God the Father, Jesus Christ, himself, and his son, whom he styles the Junior Lord, and the equal rulers of the universe. At one time he declared that he had the third person of the Trinity upon Tung-Wang, the most blood-thirsty of the subordinate kings; but later this title was again withdrawn, and no other divine personages were recognised but those already mentioned. He professed to have often visited heaven, and declared that his favorite wife (he was reported to have 110) had also been permitted to ascend to the heavenly regions. The rebellion made rapid progress, and in 1855 Nanking was captured, and made the capital of the insurrectionary government. The inhabitants of Nanking and other captured towns were treated with extreme severity, which was justified by Tien-Wang by reference to the Old Testament. In closing the churches, he formed a sort of theocratic government, and it was his right, as king of Heaven, to destroy. The advance of the rebels was not arrested until, after the conclusion of a peace treaty between the imperial government and England and France, the two latter powers deemed it their interest to come to the aid of the Chinese government, which had been made manifest by the fall of the powerful city of the Tai-pings steadily declined, until, on the 19th of July, their capital, Nanking, fell into the hands of the Imperialists. The head of the sect, Tien-Wang, burned himself in his palace with all his wives. Thus the Tai-pings lost their centre and nearly all their leaders, and ceased to be formidable, but the rebellion still continued in May, 1867. For several years, however, the political character of the movement had altogether overshadowed the religious. See Annual American Cyclopaedia for 1823, s. v. Tai-ping Rebellion; for 1868, 1864, 1865, and 1866, s. v. China; Die Gegenwart (vol. viii, Leipzig, 1862); Unsere Zeit (vol. i, Leipzig, 1856; vol. viii, Leipzig, 1864).

II. Christianity in China.—Arnobius (3d cent.) mentions the Ceres, who are generally held to have been Christians. It is certain that the Nestorians (q. v.) had flourishing missions, which began in the 7th century (see below). The missions of the Roman Church commenced about the same time. In the 19th century (see below). In 1586 Macao was ceded to the Portuguese, under whose dominion it has since remained. In 1842 the English secured the island of Hong Kong, and at the same time five cities (Canton, Fuhuau, Ningpo, Amoy, and Shanghai) were declared free ports. In 1848, France made a treaty with China in which China promised toleration of Christianity in the five cities. In 1858, after a two years' war with England and China, treaties were made with France, England, the United States, and Russia, in each of which toleration of Christianity throughout the empire was stipulated. The privileges of the Chinese government, which tried to evade the extinction of the treaties, later led to a renewal of the war in 1869 and 1860. It ended with a ratification of treaties with England and France on the 24th and 25th of October, 1860. These treaties not only grant toleration to the professors of Christianity, but expressly acknowledge that the principles and practices of Christianity are beneficial to mankind. Permission was also given to preach and travel in the interior, provided that the missionary be furnished with a passport. The stipulations of the four treaties were as follows (see Schem, Eccles. Year-book for 1860, p. 222 sq.): American Treaty, Article 29. "The principles of the Christian religion, as professed by the Protestant and Roman Catholic churches, are recognised as teaching men to do good, to do to others as they would have
others to do to them. Hereafter, those who quietly profess and teach these doctrines shall not be harassed or persecuted on account of their faith. Any person, either citizen of the United States or Chinese convert, who, according to these tenets, peacefully teaches and practises the principles of Christianity, shall in no case be disturbed.

English Treaty, Article 8. "The Christian religion, as professed by Protestants or Roman Catholics, incurs the practice of virtue, and teaches man to do as he would be done by. Persons teaching or professing it, therefore, shall alike be entitled to the protection of the law, and may such peaceably pursue their calling and not offending against the laws, be persecuted or interfered with."

French Treaty, Article 15. "The Christian religion having for its essential object to lead men to virtue, the members of all Christian bodies (communions) shall enjoy full security for their persons, their property, and the free exercise of their religious worship; and entire protection shall be given to missionaries who peacefully enter the country, furnished with passports such as are described in Article 8. No obstacle shall be interposed by the Chinese authorities to the recognised right of any person in China to embrace Christianity, subject only to its requirements, without being subject, on that account, to any penalty. Whatever has been heretofore written, proclaimed, or published in China, by order of government, against the Christian faith, is wholly abrogated and nullified in all the provinces of the empire."

Russian Treaty, Article 8. "The Chinese government, recognising the truth that the doctrines of Christianity promote the establishment of peace and good order among mankind, promises not to persecute its subjects who may wish to follow the requirements of this faith; but they shall enjoy the same protection which is granted to those who profess other forms of religion tolerated in the empire."

The Chinese government, believing that Christian missionaries are good men, who seek no material advantages for themselves, hereby permits them to propagate the doctrines of Christianity among its subjects, and allows them to pass everywhere in the country. A strict reglement forbidding passing through the cities or open ports shall be furnished with passports, signed by the Russian authorities."

In March, 1861, the ambassadors of England and France, and in July, 1861, the ambassador of the United States, took up their permanent abode at Peking, and this city became at once a centre for the missionary efforts of the Protestants and Roman Catholics. Since that time the free propagation of Christianity has not been again interrupted. After the death of the emperor Hien-Fung (Aug. 22, 1861), the administration of the empire, which, in the name of the minor emperor Ki-Tsiang, was conducted by Prince Kung, became still more favorable to the free and friendly intercourse with Christian nations. Commercial treaties were concluded with almost all the nations of Europe; thus, on Sept. 1, 1861, with Prussia and the German Zollverein (ratified 1863); in 1862, with Spain, Belgium (Aug. 8), and Portugal (Aug. 18); in 1863, with Denmark (July 10). Besides the ambassadors of the United States, England, and France, those of Russia and Spain took up their residence at Peking, while a Portuguese minister was appointed at Macao and a Prussian at Shanghai.

1. Nestorian Missions. — The Nestorian patriarchs are said to have sent missionaries to China in the 5th century. (Isidore, D. 628, and 787.) In the reign of Yung Ta (689-705), a Nestorian patriarch was sent to China. His genuineness, long doubted, has been recently defended by Abel Remusat and others. In 714 the patriarch Saliazcha is reported to have sent a metropolitan to China. Timotheus, who appears to have been the Nestorian patriarch upwards of forty years, was zealously devoted to Christian missions. During his patriarchate, Subchaljune, a learned monk from the convent of Beth-eben, after having been ordained bishop, persecuted China, and was eventually executed. He was soon followed by others. In the 9th century Christians were found in Southern China by two Arabian travellers, and in 877 many Christians, jointly with Jews, Mohammedans, and Persians, were massacred in Canton by one Balch, who had revolted from the government. In 845, Long-nsoung, is reported to have ordered 9,000 priests from Tartary to retire to private life. Marco Polo, the distinguished traveller of the 13th century, who spent more than twenty years in China, for a time holding a high office, speaks of his meeting with Chinese Christians. Rubruquis, in 1230, tells of fifteen cities where there were Nestorians; and the author of the F. Estat du gros Cais (1580) reports 80,000 Nestorians in China. The Nestorian missions seem to have been wholly or nearly extinguished simultaneously with the expulsion of the Mongols in 1669 by the Ming dynasty. At present no Nestorian churches are known to exist in China, and no Nestorian translation of the Bible is known to exist. (Cyclopaedia of Missions, p. 992.) See Nestorians.

2. Roman Catholic Missions. — (1.) The first period in the history of Roman Catholic missions in China was introduced by the labors of Johannes de Monte Corvino, who entered India in 1291, and after meeting with great opposition, not only from the pagans, but also from the Nestorians, was so successful in his labors that in 1305 he had baptized 600 converts. His labors were confined principally to the Tartars, whose language he had learned, and into which he translated the N. T. and the Psalms. In 1305 Pope Clement V constituted him bishop of Pekin, and sent seven Asian bishops (Franciscans) to his assistance. He died in 1380. Another bishop of Pekin was appointed in 1386, and 26 additional laborers joined the mission. In 1389 the Ming dynasty came into power, and seems to have crushed out Christianity altogether, both Roman and Nestorian. (2.) Several unsuccessful attempts were made in the years 1556, 1575, and 1578, by Dominicans, Franciscans, and Augustines, to re-establish missions in China, but it was left for the Jesuits finally to accomplish it. Matteo Ricci led the way. He reached Macao in 1581, and by persevering efforts made his way to Pekin, and into the good graces of the reigning emperor. Several high mandarins were converted to his efforts, chief among whom was Siu, an officer of the highest rank and of great personal influence. Ricci died in 1610 at the age of 80, and was buried with great pomp and solemnity. In 1628 Adam Schaal, a German Jesuit, arrived, and through the influence of Siu was favorably received by the emperor. His great talents and extensive acquirements caused him to be ranked among the first men of the empire. In 1631 the Dominicans and Franciscans entered China, but their success was not very great. The cause of Christianity suffered a great loss in 1638 in the death of Siu. In 1644 the Tartars came into the country of China, and with the Ming dynasty the Christian missions almost expired. Schaal, however, by his genius and learning, rose into favor with the new dynasty, and by his influence obtained permission for 14 other missionaries to enter the country, among whom were the celebrated Ferdinand Verbiest. The patron of Schaal died in 1662, and the mission was interrupted. The Jesuit star remained for a short time in the zenith, but Schaal was soon thrown into prison, and sentenced "to be cut into a thousand pieces." This decree was not executed; Schaal died in 1669, in the 78th year of his age. Another missionary died in prison, and several Franciscans and 21 Jesuits were banished to Can-
China

Verbeest became a favorite of the emperor Kanghí after he had dismissed the regents and assumed supreme control. Satisfied with the great abilities of Verbeest, Kanghí commanded him to correct the calendar, which he did with entire satisfaction to the emperor. He was appointed president of the Astronomical Tribunal. He cast many cannons, and in other ways rendered himself serviceable to government.

In 1703 they numbered 100 churches and 100,000 converts in the province of Nankin alone. But in 1734, not only the Jesuits, but all Roman missionaries, were expelled. Yet many congregations survived under protracted persecutions. Native priests were trained both in China and Europe (in the Propaganda at Rome and in a Chinese seminary at Naples), and many European missionaries were able to penetrate into the interior. Not a few were put to death, but the missions survived. Since the treaties of 1858, which promise liberty of worship for both Roman Catholics and Protestants, great preparations have been made for extending the Romanist missions. A few years ago, when China was divided into 20 Vicariates Apostolic, the Roman Catholic population of China amounted, according to the Unicera, to about 800,000. Other Roman Catholic writers claim a much higher number, e.g., Huc, who estimates it at 700,000.

Some of the French Catholic missionaries claim to have received large accessions to their congregations, and to have a total membership in their Church of about one million. The number of missionaries, especially French, who have since been sent to China, is considerable. On January 1, 1867, a new cathedral was consecrated at Pekin, which is one of the largest buildings of the capital. A bloody persecution of Roman Catholic missionaries took place in 1866 in one of the dependencies of China, Corea. See Corea.

According to the Skahgall Courier for 1887, there were in Korea 35 Roman Catholic Vicariates Apostolic divided among the orders as follows: Fubkin and Formosa, Dominicans; North Shantung, Shanxi, Shensi, South Hunan, Hupeh, the Franciscans; South Shantung, Kansu, Mongolia, Belghian Seminary; Honan, Hong Hong, Mallid Seminary; North Hunan, Augustines; Kwangtung, S. W. Chihli, Jesuits; Kiangsi, Chekiang and Anhui, the Missionary Society; Shansi, Corea, Manchuria, Thibet, Peruvian Seminary; Kwangtung, Kweichow. The European priests in all China number 628; the native Chinese priests, 385. The Catholic population was 541,720; catechumens, 24,900; churches and chapels, 2942; schools, 1879; pupils, 5396; students, 356. The oldest missionary mission is the Jesuit mission of Kiangnan, established in 1690, where the Catholics number 105,000, and have 18,300 pupils. The Lazarists were the next to enter the field, they did in 1690. The Dominicans and Franciscans entered in 1696; the Paravian Seminary in 1831; the Mallid Seminary in 1849; the Belghian in 1878; and the Augustines in 1879. The missions are mostly supported by the "Society for the Propagation of the Faith," which has its centre in France. Special attention to Chinese missions is also paid by the "Society of the Holy Childhood of Jesus," a children's missionary society for buying and baptizing those children who by their parents have been destined to death, and giving to them a Christian education. The receipts of the society amounted in 1856 to 872,000 francs. Up to that year 329,388 children had been bought and baptized, of whom 247,041 had died shortly after baptism.

Protestant Missions.—The first Protestant mission was undertaken by the London Missionary Society, which in 1807 sent the Rev. Robert Morrison to Canton, principally for the object of translating the holy Scriptures into Chinese. He was appointed (in 1808) translator of the East India Company's factory, with a salary which rendered him independent of the society's fund. In 1813 he was joined by the zealous and learned Mr. William Milne, and the Translation was completed in 1814; of the whole Bible in 1818. In 1814 the first Chinese convert was baptized. A valuable assistant the missionaries found afterwards in Leang-Afa (baptized by Milne in 1816), who distinguished himself as the author of several valuable tracts, and by his zeal in preaching the Gospel, and in distributing books at the liter of examinations. One of the books distributed on this occasion fell into the hands of the leader of the insurgents, and was the foundation of his earliest Christian impressions. The American missions commenced in 1829, when the American Seamen's Friend Society sent out two missions, one to Japan and the other to China. The first permanent settlement of American missionaries was made at Canton. The Rhenish Missionary Society sent out, about 1880, Mr. Götztuff, who soon became perfectly master of the language, and made frequent journeys through the coast countries of China. He was especially active in circulating the Scriptures, which were received with great eagerness. In 1885 the American Protestant Episcopal Church established a mission in Batavia, which in 1842 was removed to Macao. During this first period the continual hostility of the Chinese compelled the English, American, and German missionaries to move to the Roman Catholic missions, and to engage in teaching and circulating of Christian books. Permanent settlements were only made at Canton, but at Malacca also an Anglo-Chinese college was founded.

The mission of Hong Kong to the English, and the opening of the five ports to European and American Christians, gave a new impulse to missionary zeal. The London Missionary Society gave instructions to their Chinese missionaries to meet in Hong Kong to consider the plan for future operations. Agreeably to the recommendations of this meeting (August, 1840), the Anglo-Chinese college in Malacca was changed into a theological seminary for the training of a native ministry. Also the printing apparatus of the mission was transferred from Malacca to Hong Kong, and a medical establishment opened in connection with the mission. In 1843 Shanghai was occupied, and in 1844, Amoy. The American Board stationed missionaries at Amoy in 1842, and at Fuh-chau in 1843. The American Episcopalian missionary, Dr. Boone, while on a visit to the United States, had been consecrated missionary bishop, fixed on Shanghai as the most suitable station. Other missionary societies hastened to occupy the interesting field. The operations of the American Baptist Union commenced in 1843. The oldest Protestant Baptist Convention (of America) and of the (American) Presbyterian Board in 1844; those of the Church Missionary Society, one of whose missionaries, Rev. George Smith, was appointed bishop of Victoria, in 1849; of the General Baptist Missionary Society (England) in 1845; those of the Methodist Episcopal Church in 1846; those of the (American) Seventh-day Baptist in 1847; of the Methodist Episcopal Church South in 1848; those of the English Wesleyans and the Free Church of Scotland in 1850.

The first Protestant mission at Fuh-chau was established by a missionary of the American Board of Commissioners for Foreign Missions in 1848. Since its commencement in 1848, the mission has averaged three or four families since its commencement. In April, 1855, occurred the first baptism of a Chinaman at this city in connection with Protestant missions. In May, 1857, a brick church, called the "Church of the Saviour," built on the street in the southern district, and a house for the use of the Saviour's Bread, was dedicated to the worship of God. Its first native church, consisting of four members, was organized in October of the same year. In May, 1863, a church of seven members was formed at Ching-loh, distant seventeen miles from the city.
### CHINA

June of the same year a church of nine members was organized in the city of Fuh-chau, having been dismissed from the church in the suburbs of the city. For the first ten years of this mission's existence only one was baptized. During the next five years twenty-two members were received into the first church formed. During the next twenty years twenty-five persons were baptized. Between 1853 and 1858 a small boarding-school, i.e., a school where the pupils were boarded, clothed, and educated at the expense of the mission, was maintained in this station. Among the pupils were four or five young men, who, after two to three years as native helpers, and three girls, all of whom became church members, and two of whom were wives of two of the native helpers. There are now a training-school for native helpers and a small boarding-school for boys, and a small boarding-school for girls connected with the mission. It employs six or seven native helpers, and three or four foreign stations are occupied by it. Part of the members of this mission live at Ponasang, not far from the Church of the Saviour, and part live in the city, on a hill not far from the White Pagoda, in houses built and owned by the American Board (see Statistics of Societies, below).

The mission of the Methodist Episcopal Church was established in the fall of 1847. It has an average number of four or five families. In 1857 it baptized the first convert in connection with its labors. In August, 1868, a brick church, called the 'Church of the True God,' the first substantial church building erected at Foochow by Protestant missions, was dedicated to the worship of God. It is located near Tating, on the main street, in the southern suburbs, about two thirds of the way between the Big Bridge and the city. In the winter of the same year another brick church, located on the hill in the suburbs on the south bank of the Min, was finished and dedicated, called the 'Chinese Church.' In the fall of 1864 this mission erected a commodious brick church on East Street, in the city. Its members reside principally on the hill on which the Church of Heavenly Rest is built. One family lives at a country station ten or twelve miles from Fuh-chau. This mission has received great and signal encouragement in several country villages and farming districts, as well as in the city and suburbs. It has some eight or ten country stations, which are more or less regularly visited by the foreign missionaries, and where native helpers are appointed to preach regularly. It has a flourishing boys' boarding-school, and a flourishing girls' boarding-school, and a printing-press. At the close of 1863 there were twenty-six probationary members of its native churches, and ninety-nine in full communion. It employs ten or twelve native helpers. It has established a system of regular Quarterly Meetings and 3 Annual Conferences in conformity with the Discipline of the Methodist Episcopal Church" (Doolittle, *Social Life of the Chinese*, N.Y., Harper and Brothers, 1865, 2 vols. 12mo).

The following table will show the work of the Methodist Episcopal Church in China for the year 1889. It is compiled from the Society's *Report for 1890.*

*Statistics of Protestant Missions in China* (Dec. 1888.) Compiled by Dr. L. H. Gulick for the *Missionary Review.*
One of the most remarkable awakenings that is known in the whole history of Protestantism of China took place in 1866, in connection with the out-stations of the Tientsin mission of the English New-Connection Methodists, especially at Lou-Leing, where, in September, 45 persons were smitten by the baptism. The conversion led to the mission churches of the London Society, in Shanghai, and the province of which it forms the capital, numbered, during the year 1866, 189. An event of considerable importance for the Protestant missions of China is the establishment of a monthly religious paper in the English language (the Missionary Recorder) by the missionaries of the Methodist Episcopal Church of Fuh-chau.

4. Greek Missions.—A mission of the Greek Church was established by the Russians in Pekin under the reign of Peter the Great. Its object, until recently, was limited to the spiritual care of a colony of Russian subjects, who had been captured on the Amoor and settled near Pekin. A treaty between China and Russia authorized the Russian government to keep six missionaries at Pekin, changing them once in ten years, with the right of having a few students to learn the Chinese and Manchou language, and to obtain a general knowledge of the habits and customs of the Chinese. The missionaries of the American missionaries in Pekin, in the Boston Missionary Herald (February, 1865), states that “the Russian missionaries in Pekin now labor devoutly for the Chinese in the country as well as in the city. It is an interesting fact, and one which marks a difference between them and the Roman Catholics, that they translate and use the sacred Scriptures. Their version of the New Testament in Chinese is now in print in this city [Pekin]. They have obtained also from the English missionaries the version of the Bible by Mears. Swan and Hallybran, and published by the British and Foreign Bible Society, for the use of their ministers to the Mongolians, and the versions of the New Testament published by the same society for the use of their missions in Russian Manchuria.” In 1866, the Pekin mission numbered about 200 converted Chinese and Tartars. See Annual American Cyclopaedia for 1865, s. v. China.

Chin'nereth (Heb. קִנְנֶרֶת, כִּנֶּרֶת; in parsa Kinnareh [Josh.], כִּנְנֶרֶת; Sept. Xipsi deported. There was also called in the plural. Chin'neroth (Heb. קִנְנֶרֶת, כִּנְנֶרֶת, 1 Kings xx, 20; Sept. Xipsi deported. In A V. "Circleneroth" or "Kinnaroth," כִּנְנֶרֶת, Josh. xi, 2, Xipsi deported) or perhaps the latter form designates the region of which the other was the metropolis. A similar variety appears in the name of the adjoining lake, which is perhaps intended in some of the above passages. The town was a fortified city in the district of Rakkath and Adamah (Josh. xix, 85), the only certain reference to the city exclusively. Whether it gave its name to or received it from the lake, which was possibly adjacent, is uncertain. Jerome identifies Chinnereth (Onomast. a. v., Eusebius Xipsi deported) with the later Tiberias. This may have been from some tradition then existing the only corroboration which we can find for it is the mention in Joshua of Hammath as near it, which was possibly the Emmanus (modern Hamman), near the shore of the lake, a little south of Tiberias. This situation of Chinnereth is denied by Rendel (Palms, p. 161) on the ground that Capernaum is said by the Pauline Epistle to be near the borders of Zebulon and Naphtali, and that Zebulon was to the south of Naphtali. But the evangelist's expression hardly requires this strict interpretation. The town, or the lake, appears to have given its name (slightly altered) to a district—"all Chinnereth" (1 Kings xv, 20). See Chinnereth.

Sea of Chinnereith (קִנְנֶרֶת, כִּנְנֶרֶת, Sept. [v.] סְדָנָה Xipsi deported, Num. xxiv, 11; Josh. xiii, 27) of Chinnereith (קִנְנֶרֶת, כִּנְנֶרֶת, Josh. xi, 9), the inland sea, which is most familiarly known to us by its New-Test. name as "the Sea of Gennessaret," or the "Sea of Tiberias" or "of Galilee." This is evident from the mode in which it is mentioned in various passages in the Pentateuch and Joshua as being at the end of Jordan, opposite to the "Sea of the Arabah," i.e. the Dead Sea, as having the Arabah or Ghor below it, etc. (Deut. xii, 17; Josh. xi, 2; xili, 8). In the two former of these passages the word "sea" is perhaps omitted. The word is by some derived from the Heb. צִינְנָה, צִינְנָה (כִּנְנֶרֶת, כִּנְנֶרֶת), "a harp," as if in allusion to the oval shape of the lake. But it is possible that Chinnereth was an ancient Canaanite name existing long prior to the Israelite conquest, and, like other names, adopted by the Israelites into their language. The subsequent name "Gennessaret" was derived from "Chinnereth" by a change of letters of a kind frequent in the East. See Gennerath.

Chin'neroth (Josh. xi, 2; xili, 5). See Chinnereth.

Chintin. See Wheat.

Ch'io's (Xio, according to some, from yioyw, мове, with which its mountains are perpetually covered; according to others, from a Syrian word for moist, with which its forests abounded), one of the principal islands of the Ionian Archipelago, mentioned in Acts XXI, 14, and famous as one of the reputed birthplaces of the poet Homer. It belonged to Ionia (Mela, ii, 7), and lay between the islands Lesbos and Samos, and distant eight miles from the nearest promontory (Arennum Pr.) of Asia Minor. The position of this island in reference to the neighboring islands and coasts could hardly be better described than in the following passage of the apostle Paul's shipwreck voyage from Troas to Caesarea (Acts xx, xxi). Having come from Assos to Miletos in Lesbos (xx, 14), he arrived the next day over against Chios (ver. 15), the next day at Samos, and tarried at Trogylus (η ρύθμια των δύο); and the following day at Miletus (η ρύθμια των δύο); thence he went by Cos and Rhodes to Patara (xx, 1). See Mitylene; Samos.
In the account of Herod's voyage to join Marcus Agrippa in the Black Sea, we are told (Josephus, Ant. xvi, 2, 2) that, after passing by Rhodes and Cos, he was detained some time by north winds at Chios, and sailed on to Mitylene when the winds became more favorable. It appears that during this stay at Chios Herod gave very liberal sums, through the resignation of some of his public works which had suffered in the Mithridatic war. This island does not appear to have any other association with the Jews, nor is it specially mentioned in connection with the first spread of Christianity by the apostles. When Paul was there, on the occasion referred to, he did not tarry but only passed the night at anchor (Conybeare and Howson, St. Paul, ii, 211).

At that time Chios enjoyed the privilege of freedom (Plin. v, 38; comp. xvi, 6), and it is not certain that it ever was politically a part of the Roman proconsular Asia. No record exists of its connection with Christianity in apostolic times; but after the lapse of ages we read of a bishop of Chios, showing that the Gospel had obtained a footing on the shores. Its length is about 32 miles, and in breadth it varies from 8 to 18 (having a periphery of 900 stadia, Strabo, xiv, 645, or 120 Italian miles, Tornoref, Vol. ii, 84). Its Outline is mountainous and bold, and it has always been celebrated for its beauty and fruits. Its principal towns are Eryx (Plin. vi, 169; Schubert, Reis. i, 414). It is very fertile in cotton, silk, and fruit, and was anciently celebrated for its wine (Pliny, xiv, 9; xvii, 84, 22; Strabo, xiv, 637; Horace, Od. iii, 19, 5; Verg. Aen. vii, 7; Athen. iv, 167, i, 92) and mastic (Pliny, xii, 96; xxiv, 74; Dio. Chir. i, 90). The principal town was also called Chios, and had the advantage of a good harbor (Strabo, xiv, p. 645).

The island is now called by the Greeks Χίος, and by the Italians Seio (Hamilton, Researches, ii, 5; Thevenot, Travels, i, 98; Chandler, Asia Minor, c. 16; Clarke, Trav. iii, 236; Sonnini, Trav. c. 87; Olivier, Voy. ii, 103). The wholesale market and enslavement of the inhabitants by the Turks in 1822 forms one of the most shocking incidents of the Greek war of independence (Huges, Tract on G. Revolutions, London, 1822). See also Malte Brun, Geography, ii, 86 sq.; Mannert, Geogr. vi, iii, 228 sq.; Hassel, Erdkunde, xiii, 116 sq.; Cellarius Notit. ii, 19; Smith's Dict. of Class. Antiquity, ii; M'Culloch's Gazetteer, s. v. Seio. See Asia Minor.

Chisleu (Heb. קִּשְׁלֵע) in the LXX, כִּשְׁלֵע, according to some, from Arabic, i. q. lehurjiq; according to others [Benfey, Mommsen, Berl. 1857], of Persic origin; and as it appears, in a very remarkable manner (ed. Swin- ton, Phila. Transactions, xliii, 1882, tab. 29) in the form of כִּשְׁלֵע, i. q. קִּשְׁלֵע. It probably represents the name of the third of the Amab-hashpas or celestial genii [Bour- nouf, Commentaire sur le Yasa, p. 146, 151, 174]; Sept. Xανάλας, Anglicized "Casula" in 1 Macc. i, 54; iv, 59; Chaldee כִּשׁלֵע, Targ. on Eccl. xi, 3; Josephus Xανάλας or Xαναλίδι, Ant. iii, 5, 4; 7, 6), the name adopted from the Babylonians, after the Captivity, by the Jews for the third or ninth ecclesiastical month (Neh. i, 1; Zech. vii, 1), corresponding to the Macedonian month Apellus (Ἀπελλαοῦ: see Spanheim in Haver- camp's Josephus, ii, 407), and answering mainly to the moon of November. See CHITTIM. The following were the days specially memorable for religious exercises: On the 8d, a feast in memory of the idols which the Ammonians cast out of the Temple; on the 7th, a fast instituted because king Jehoikim burned the prophecy of Jeremiah, which Baruch had written (Jer. xxxvi, 23). Scaliger believes that it was instituted on account of Zedekiah's having his eyes put out, after his children had been slain in his sight. This fast Prie- desux places on the 29th of the month; but Calmet, with the modern Jews, makes it the 6th, and places on the 7th a festival in memory of the death of Herod the Great, the son of Antipater. There is also some dispute whether this fast was not observed on the 28th of the month. It is an argument in favor of the earlier day that the other would fall in the middle of the eight days' Festival of Tabernacles.

On the 25th, the Chanuca, or feast of Dedication (q. v.), so called (John x, 22), and kept as a minor festival in commemoration of the dedication of the altar after the cleansing of the Temple from the pollution of Antiochus by Judas Maccabaeus, by whom it was ordered to be observed (1 Mac. iv, 50). This feast lasted eight days. A prayer for the world in general is offered up on the eighth day of the feast. In this month the winter prayer for rain commences; the precise day is sixty days after the autumnal equinox, by the calculations of Rab Samuel, which varies from the 23d to the 8th, but is generally on the 4th of December. See Chanukah.

Chisalon (Heb. קִשְׂלוֹן, ἡ ἐπαρχία, πόλεις, Σεπτ. Χασαλίου), the father of Eilid, which latter was one of the princes of Benjamin, selected on the part of that tribe by Jehovah to divide Canaan (Num. xxxiv, 21). B.C. ante 1618.

Chisloth-tabor (Hebrew קִשְׁלָת-תָּבוֹר), the fringes of Tabor; Sept. Χασαλίου ὁ ὀψιαφόρος, Vulg. Ceclesea-thabor), a place to the "border" (בָּלוֹן), of which the "border" (בָּלוֹן) of Zebulon extended eastward from Sarid on the southern boundary (Josh. xix, 12), apparently outside its territory, at the western foot of Mt. Tabor. See TRIBE. It is probably the same place where simply Chisloth (Heb. קִשְׁלוֹת, xvi, 18) and Tabor (1 Chron. vi, 7), and seems to be identical with the Χασαλίου (Χασαλίου, Χασαλίου) of the Onomasticon (s. v. Χασαλίους, Acharasale; comp. s. v. Χεσαλαθσατωρ, Chaslatabor; Χασαλιον τοῦ βασιλέως, Chaslahet), near Mt. Tabor, in the plain [of Esdraelen], 8 miles E. of Dioscarea; also with the Χασαλίου (Χασαλίου) mentioned by Josephus (Ant. xii, 6, 3; comp. Joesphus, Ant. xii, 6), as the village in the great plain, and one of the landmarks of lower Galilee (comp. Zunz, On the Geography of Palestine from Jewish Sources in Asher's Benj. of Tudela, ii, 492; and Seetzen's Reisen durch Syrien, iv, 211). See Αζινοθ-Ταβωρ. It is doubtless the modern Ἰσαρά, seen by Dr. Robinson on his way from Nablous to Nazareth, "in the plain toward Sabor, on a low rocky ridge or mound, not far from the foot of the northern hills, described as containing many excavated sepulchers." (Researches, i, 182.) It was also observed by De Saulcy, while passing through the plain of Esdraelen towards Nain, to the north, and to his right side, as a long narrow valley, resembling a long building or a low mound, built at the foot of the mountain of Nazareth" (Narrative, i, 74). Pococke (ii, 65) mentions a village which he calls Zal, about three miles from Tabor.

Chittim. See WHEAT.

Chitthim (Heb. קִיתִית, כִּיתִית), a Gentile plural form of foreign origin, Gen. x, 4; Sept. Κύπριος, A. V. "Kittim;" Num. xxiv, 24, Kyrtau; 1 Chron. i, 7 ("Kittim"), and Dan. xi, 30, Κύπριον v. r. Πομηλία; Isa. xxiii, 1, Κύπριος v. r. Κυρτευάς; and more properly, national form Kitiym, "Kittim," Jer. ii, 10, Κύπριος; Κύπριον, Isa. xxiii, 12, Κυπριος v. r. Κυρτευάς; Ezek. xxvi, 6, Κυπριαίς v. r. Κυρτευάς), a branch of the descendants of Javan, the son of Japheth (Gen. x, 4; 1 Chron. i, 7), closely related to
CHITTIM

256

CHOBA

the Dodanim, and remotely (as we may conclude from the absence of the conjunction before it) to the other descendants of Javan (see Hiller, Synonym. horensei, p. 185). Balaam foretold "that ships should come from the west of Chittim, and should afflict Assyria [the Assyrians], and afflict Eber" [the Hebrews] (Num. xxvi. 24), thus foreshadowing the Grecian and Roman invasions. Daniel prophesied (xi. 18) that the ships of Chittim should come against the king of the North, and that he should therefore be grieved and return, which was fulfilled when Antiochus Ephiphanes, the king of Syria, having invaded Egypt, was by the Roman ambassadors commanded to desist, and withdrew to his own country (Livy, xlv, 29; xlv, 10). In Isa. xxiii, 1, 12, it appears as a resort of the fleets of Tyre; in Jer. ii, 10, the "isles (מִזְרַח, L. e. maritimes districts) of Chittim" are to the far west, as Kedar to the east of Palestine; the Tyrians procured thence the cedar or box-wood, which they inflaid with ivory for the decks of their vessels (Ezek. xxvii, 6, מָלֵא דַּבָּר, A. V. "the company of the Ashurites," but rather [ivory] the daughter of box-wood, i. e. inclosed in it). At a later period the phrase was applied to the Macedonian armies under Alexander the Great (1 Macc. i, 1, Χείμερα, A. V. "Chittim") and Perseus (viii, 1, Κηρίσων "Cittimus"). On the authority of Josephus, who is followed by Ephiphanus (Haer. xxx, 25, p. 100) and Jerome (Quast. in Gen. 2), it has generally been admitted that the Chittim of the Greeks was Phoenicia or Cyprus, and founded there the town of Citium, the modern Chitti; "Chittimius possessed the island of Chethima, which is now called Cyprus, and from this all islands and maritime places are called Chethimia (Χηθημία) by the Hebrews" (Joseph. Ant. i, 4, 1). Other ancient writers, it may be remarked, speak of the city of the Chethimians as a Phoenician colony (Pilay, v, 35; xxxi, 39; Strabo, xv, 682; Cicero, De Finibus, iv, 20). Pococke copied at Citium thirty-three inscriptions in Phoenician characters, of which an engraving is given in his Description of the East (ii, 213), and which have more recently been explained by Gesenius in his Monum. Phoenic. (p. 124-130). From the town the name extended to the whole island of Cyprus, which was occupied by Phoenician colonies, and remained under Tyre certainly until about B.C. 720 (Josephus, Ant. ix, 14, 2). With the decay of the Phoenician power (circ. B.C. 600) the Greeks began to found flourishing settlements on its coasts, as they have done ever since. Ptolemy (iv, 1393) of the 1st century, and Strabo, x, 4, 3, regarded the island as a Phoenician possession (see Early Egyptian Sea). The name Chittim, which in the first instance had applied to Phoenicians only (for סֵפֶךְ — סֵפֶךְ, Hitites, a branch of the Canaanitish race—Gesenius, Comment. ad Jeux, i, 721 sq.), passed over to the islands which they had occupied, and thence to the people who succeeded the Phoenicians in the occupation of them. The use of the term was extended yet farther as to embrace Italy (Bochart, Phileas, iii, 5, compares the Κόλσα, Κρία, in Latium, mentioned by Dionys. Hal., vii, 19, c. 36), according to Sept. (Dan.), and the Vulgate (Num. and Dan.), to which we may add the rendering of the Chaldee Targum, which gives Italian (תַּרְגֻּמָה) in 1 Chron. i, 7, and Apulia (אֲפָוּלִים) in Ezek. xxvii, 6. In an etiological point of view, Chittim, associated as the name is with Javan and Elisah, must be regarded as applying, not to the original Phoenician settlers of Cyprus, but to the race which succeeded them. The Carian territory was widely dispersed over the Mediterranean coasts, and were settled in the Cyclades (Thucyd. i, 6), Crete (Herod. i, 171), and in the islands called Macaron Insulae, perhaps as being the residence of the Carians. From these islands they were displaced by the Dorians and Ionians (Herod. i, 171), who emigrated to the adjacent land, where they occupied the district named after them. The Carians were connected with the Leleges, and must be considered as related to the Pelasgic family, though quite distinct from the Hallenic branch (Knobel, Vollk. Unterr., p. 59 sq.). Hengstenberg has lately endeavoured (Hist. of the Jews, p. 500) to prove that in every passage in the Old Testament where the word occurs it means a place in Asia Minor. The most probable view, however, is that expressed by Kitt: "Chittim seems to be a name of large signification (such as our Levant), applied to the islands and coasts of the Mediterranean in a loose sense, without fixing the particular part, though particular and different in different cases to be understood" (Pict. Biblo, note on Ezek. xxvii, 9). (For further discussion, see Michaelis, speliegesch. i, 1-7, 10-114; also Supplement. p. 1138, 1370-1380; Gesenius, Theaur. p. 726; Newton, On the Prophecies, v; Rosenmüller, Bibl. Geogr. iii, 576.) See ETHNOLOGY.

Chi'un (Heb. Kigen', קִיֵּן), a word that occurs only once in the Scriptures, and that in an obscure and variously-interpreted passage (Amos v, 26), "but ye have borne the tabernacle of your Molech and Chus, your images, the star of your god, which ye made to yourselves." The Sept. translates it as a proper name, Σίρφησαν (Ταρφάιον or Παρφάιον, which became still further corrupted into Παρφάιον), and it is quoted in that form by Stephen (Acts vii, 43). See REMPHAN. The Syriac translates it by Sārūm, whom the Semitic nations are said to have worshipped, though it is possible that it really is not a proper name at all, being derived from the root יָסַר, קר, to stand upright, and therefore signifies simply a statue or idol, as the Vulgate renders it (in connection with the following word), "imaginum idolorum vestrum." The same is probably true of the word rendered "Moloch" in the same passage, so that the whole may be translated (with Gesenius), "To bore the tabernacle of your Moloch, and the statue of your idol, the star of your god which ye made to yourselves;" referring not to any specific deity by name, but to the secret idolatrous practices which the Jews kept up along with the worship connected with the divine ark in the wilderness, and which reappeared in different forms from time to time in their later history. See CALP. Yet, as a "star" is mentioned, it has naturally been inferred that the worship of some planet is alluded to, and this Jerome supposed to be Lucifer or Venus. Layard thinks the name identical with that of the Egyptian goddess Κιαν, figured on the Egyptian and Assyrian monuments in the character of Astarte or Venus. In 1989, the suggestion that her worship was borrowed from Assyria into Egypt at a period later than the Exodus (p. 170). On the whole, the above supposition that the planet Saturn is intended is the most plausible, although this interpretation cannot be successfully defended merely from the name, either in the form Chium or Remph. (See Mal. in his Select. Exercit. i, 763 sq.; Year, De Chym [Viteb., 1705]; Harenberc, De idola Chym et Rempham [Brunsw. 1728]; Meyer, De sacelio et bas idolior. etc. [adv. loc.], [Helvet. 1726]; Wolf, De Chym et Rempham [Lips. 1741]; Braun, Selecta Sacra, p. 471 sq.) See SATURN.

Chlo'oë (Χλοο'ε, verdure, a classical name), a female Christian mentioned in 1 Cor. i, 11, some of whose household at Corinth, where she had no doubtless an ellipse of orieflion, comp. Rom. xvi, 10, 11) had informed the apostle Paul of the fact that there were divisions in the Corinthian Church. A.D. 54. She is supposed by Theophylact and others to have been an inhabitant of Corinth; by Estius, some Christian woman known to the Corinthians elsewhere—so Diodorus and Meyer, an Ephesian, having friends at Corinth. See CORINTHIANS, EPHESIANS TO.

Choïch. See THORN.

Cho'ba (Χωβά; Vulg. omits), a place mentioned in Judith iv, 4, apparently situated in the central part of Palestine. It is probably the same place as
CHOBAI 257 CHORAZIN

Chobai (Χοβαί), which occurs in Judg vii. 4, 5 (in the latter verse Χωβαί). The name suggests the Hebrew (q.v.) of Gen. xiv. 15 (חובא, which agrees with the reading of the Syriac), especially in connection with the mention of Dananbuc in verse 5, if the distance from the probable site of Bethulia (q .v.) were not too great. Van de Velde suggests (Memoir, p. 304) that it is probably the modern Kibariel, a village of Jenin, on the west bank of the Jordan. On the same view see Sarazin, a name given to a village near the River Jordan, on the Tyropoea, and used by St. John the Baptist (q.v.).

Chorazin (q.v. Mez.) rendered "measure" in our version, Rev. vi. 6), a Greek measure of capacity, equal in dry commodities to one eighth the modius (see Bushell), but varying, according to different ancient authors, from one to two and a half to two pints English. See METROLOGY.

Choir (Gr. χορός). The Greeks applied the term chorus to a circular dance performed during sacrifices by a company of singers around the altar of a deity. Later it was applied to this body of singing dancers. Actors afterwards were introduced, who related some myth or legend of the deity between the songs of the chorus, thus laying the foundation of the Greek drama. In the Attic tragedy, the chorus (composed of fifty persons in the tragedy and of twenty-four in the comedy) occupied a position intermediate between the actors and the audience, giving in a recitative manner, rather than in a song, counsel, warning, encouragement, or consolation to the actors.

 Similar bodies of singers attended the religious observances of nearly all nations of antiquity. In the Jewish worship they were specially prominent after the time of David, being composed at times of 4000 singers and 288 leaders.

1. In the development of the ritual in the Christian churches, the body of singers received the same name of chorus. The French modification of the word, chœur, passed into the Norman and early English as chure or choir.

The original term chorus is now applied to a body of singers carrying all the parts of music, in distinction from solo, duet, or quartet singers; also to the portion of music sung by this chorus. The two terms, however, are not used in quite the same sense that of the Vatican, in which the oratorio and also are sung by eunuchs, and the choir of the Cathedral of Berlin, in which the soprano and alto are sung by boys.

In the English Church, strictly, the term denotes a body of men set apart for the performance of all the services of the Church in the most sacred form. Properly speaking, the whole corporate body of a cathedral, including capitular and lay members, forms the choir, and in this extended sense ancient writers frequently use the word. But, in its more restricted sense, we are to understand that body of men and boys who form a part of the foundation of these places, and whose special duty it is to perform the service to music. The choir properly consists of clergymen, laymen, and chorister boys, and should have at least six men and six boys, these being essential to the due performance of the chants, services, and anthems. Every choir is divided into two parts, stationed on each side of the chancel, in order to sing alternately the verses of the psalms and hymns, one side answering the other.

2. The term choir is also applied in Roman churches to that portion of the church edifice allotted to the singers, nearly analogous to the chancel (q.v.) of Protestant churches. The choir is usually in the apsis (q.v.), behind the high altar, at the east (in the earlier churches in the west) end of the church. It is generally elevated one step above the level of the rest of the edifice. It has at least one row of seats or stalls. When there is more than one row, each row is a step above that before it. In this ritual sense of place for the singers, the choir is sometimes, especially in cruciform churches, under the tower or in front of the high altar. Large cathedrals also often have several choirs or chapels for singing mass. In Greek and Armenian churches the stalls for the singers are usually in the nave of the church, to the right and left of the front of the altar. In nunneries the choir is a part of the church, separated from the rest by a screen, where the nuns chant the service.

3. In Protestant churches generally, the word designates the body of singers, composed both of males and females, who conduct the congregational singing, with or without the aid of an organ. The name is also given to the place in the church occupied by the singers. See BURLES.

See ORG. Ecles. bk. viii, ch. vi, § 7; Bergier, Dict. de Théologie, i, 461.

Choir-wall, or Choir-screen, is the wall or screen of wood, metal, or stone which divides the choir or presbytery from the rest of the church. It is usually ornamented, often with great beauty.

Chol. See SABD.

Choled. See WHASEL.

Cholin. See TALMUD.

Chomer. See HOMER.

Chomet. See SNAIL.

Chosch. See CHOSEN.

Chor. See LINEN.

Choral. (1.) This term is applied to that portion of the Liturgy of the Roman and other churches in which simple melodies, usually consisting of but four or five notes, are sung by the officiating priest, with responses from the choir or the congregation. These date their origin from the earliest period of the Christian Church, and are thought by some to have been originally ancient pagan melodies adapted to Christian worship.

(2.) It is also, and more usually, applied to hymn tunes of a slow and majestic or pathetic movement, as "Old Hundred," the "Judgment Hymn," and "Mezra." The Germans call all psalm tunes choral, but they always retain the original slow movement, and all the voices join in the melody, the organ giving the accompaniment. In many Protestant countries all the four parts are sung by choirs as well as in other hymn tunes. For a historical development of choral singing, see MUSIC (HISTORY OF).

Chor-‘a-ghan (Heb. Kor-Ashan ywē-të, smocking furnace; Sept. Bapasa in v. Bapašā and even Bapasi, i.e. Beer-sheba; Vulg. locus Ashan; so that both appear to have read yē-tē', one of the places (named between Hormah and Atach) in which "David and his men were wont to haunt," and to his friends in which he sent presents of the plunder taken from the Amalekites who had robed Ziklag (1 Sam. xxx, 20). The towns names in this catalogue are all south of Hebrew; and Chorazin, therefore, is probably identical with the simple Ashan (q.v.) of Simeon (Josb. xv, 42; xix, 7).

Chorasζain (Xoρazιν v. χοραζίν, Choražin, and Xorazin, one of the cities (πόλεις) in which our Lord's mighty works were done, but named only in his de

unciation (Matt. xi, 21; Luke x, 18; see Scherer, Sinaiticae omendae, Von tibi Chorazin, Lips. 1710), in connection with Bethsaida and Capernaum, not far from which, in Galilee, it appears to have been situated. It was known to Jerome, who describes it (Comm. in Matth. xi) as on the shore of the lake, 2 miles from Capernaum, or 12 miles, according to Eusebius (Om

ant. s. v. Xorazin, Chorozain). Some compare the Talmudical Keraszi (q. v.) (Yehah, Menachoth, fol. 85, 1), mentioned above, that is famous for the feast of Keraszi (fest. 722; Schwarz, Poët. p. 189); while others compare "Harosheth (q. v.) of the Gentiles" (Τερεσίας)
CHRISTIANS

The heathen made a mistake in the name of our Saviour, whom they generally called Christos, and his followers Christiasts (Suetonius, in Claud. 25). This was probably owing to a local usage, and was in fact a misapprehension of the word. (Apoll. c. 8.) Tertullian (iv. 7) states that he was the same with the Hebrew Messiah, and signifies a person anointed; while Christos, χρωμεσσις, means good. Tertullian tells the heathen that they were unpardonable for persecuting Christians merely for their name, for both Jews and heathens were persecuted and excellent.—Bingham, Orig. Eccles. bk. i. ch. ii. § 11.

Christus, a name given by Suetonius to Christ (Claud. 25), having insinuated a sedition among the Jews in Rome, which led to their expulsion from the city (comp. Acts xviii. 2). Comp. FULVIA. There have been two different opinions as to whom Suetonius meant by Christus (see Kuinöf, ad Act. in loc.); whether some Hellenist, who had excited political disturbances (as Meyer and De Wette suppose; see Conybeare and Howson, St. Paul, i. 386), the name Christus (Gr. χρωμεσσις, useful) frequently occurring as borne by manumitted slaves; or whether, as there is good reason to think (Lipsius on Tacit. Annal. xvi. 44; Grotius, in Act. xviii, 2; Neander, Planting and Training, ii. 231), Suetonius does not refer to some actual instance of the way Jews and Christians confused the name Christus, which was most usual as a proper name, with the much more frequent appellation of Christus (see Tertullian, Apol. 8; Lactantius, Instit. iv. 7, 5; Milman, Hist. of Christendom, i. 430). Oratio (Hist. vii, 6) places Claudius’s edict of banishment in the ninth year of his reign (Act. A. D. 49 or 50), when he refers to Josephus, who, however, says nothing about the matter. In King Alfred’s Anglo-Saxon version of Oratio, however, this reference to Josephus does not occur; the register simply connects the expulsion with a famine: “In the ninth year of his government there was a great famine in Rome, and Claudius ordered all the Jews that were therein to be driven out” (Boivin’s Oratio, p. 119 of the Saxon and 179 of the trans. See this statement of Oratio commented on by Scaliger, Animad. on Euseb. Chron. p. 192). On the contrary, Pearson (Am. Paulinisii) and Vogel (in Gabler’s Journal), without, however, giving decisive reasons for their opinion, suppose Claudianum’s twelfth year (i.e. A.D. 52) to be the more likely one. With Anger (De temporum ratione in Act. Apol. p. 118), one might, on negative grounds, assert that, so long as Herod Agrippa was at Rome with Claudius, the edict of expulsion would hardly be published; i.e. previous to the year A.D. 49. Dr. Burnet (On the Chronology of the Acts, p. 26) puts the date of the edict some time between A.D. 41 and 46, supporting his opinion by the fact “that no mention is made of Claudianus’s decree in the Annals of Tacitus which have come down to us; and that, since the lost books of the Annals occupy the first six years of the reign of Claudius, it is probable that Tacitus mentioned this decree in one of those books.” The year referred to in Acts xviii. 2, is A.D. 49. See CLAUDIUS.

CHRISTIANS

Chiasmus (from ιχθυς, oil, unctum), consecrated oil, used in the Roman and Eastern churches in the rites of baptism, confirmation, ordination, and extreme unction.

1. Origin of the Usage.—In the N. T. the word is used metaphorically for the soul of the Spirit; e.g. 1 John ii. 20, Ye have on ye oil (ιχθυς) from the Holy One. The actual use of oil in Christian rites is ascribed by Basil (and some Romanist writers follow him) to the apostles, but there is no foundation for this. It is probable that the name Christian (Μιστρειωι) itself gave rise, at an early period, to the anointing of heathens being consecrated as such. Uniting these ideas, Tertullian, Cyril of Jerusalem, and the Apostolic Constitutions; and in the fourth century it seems to be found in general use throughout the Church.

From Tertullian’s time (A.D. 200) onward we find mention of a double anointing at baptism, one before, the other after. The latter is called, by way of distinction, Χρωμιστος. The first (Χρωμοσ) was a mere pious form, and took place immediately after exorcism and the signature of the cross. Of the design of chrism, Cyril of Jerusalem (Cateches. Mystag. 2) says, “Men were anointed from head to foot with this consecrated oil, and this made them partakers of the true olive-tree, Jesus Christ. For every being cut out of a wild olive-tree, and ingrafted into a good olive-tree, is made partakers of the fatness of the good olive-tree.” Ambrose (De Sacramentis, lib. i. c. 2) compares it to the anointing of the wrestlers before the combat: “Thou camest to the font and wast anointed as a champion of Christ, to fight the fight of this world.” A distinction between the two anointings is made. “Men were first anoint ed with the ancient oil, that they may be Christ’s; that is, the anointed of God; but they were anointed with the precious ointment after baptism in remembrance of him who reputed the anointing of himself with ointment to be his burial” (Justin Martyr, Respon. ad Orthodoxos Grecos. The Apostol. Orig. bk. xi. ch. iv.): “Christians take the same distinction” (lk. vii. ch. 22). Chrysostom says, “Every person, before he was baptized, was anointed as wrestlers entering the field; and this not as the high-priest was anointed of old, only on the head, or right hand, or ear, but all over his body, because he came not only to be taught, but to exorcise himself in the combat” (Hom. in Isai, tom. i. cap. 21). For the same reason, the Church regards the act of anointing as a new symbol of the Sacrament, a doctrine resting ultimately upon the forged decreetals (q.v.), and is applied to the forehead of the person confirmed (Cateches. de baptr., p. 141 sqq.).

(3) In extreme unction, olive oil alone can be used (without balsam), and it is applied to the organs of the five senses, and also to the loins and feet.

The Greek Church agrees with the Roman as to the special use of chrism, but there are some differences of usage. Both require that the person be first consecrated; but every bishop has the right to consecrate it in the Roman Church, while the Greek confines this power to the patriarchs. The Greek Church, however, uses a chrism compounded of some forty ingredients, besides oil (see list of them in Siegel, i. 297). See Confirmation; Extreme Uction.

In the Protestant churches chrism is not used.—Bingham, Orig. Eccles. bk. xi. ch. 9, 10; Siegel, Alterthümer, i. 896 sq.; Elliott, Delination of Romanism, bk. ii. ch. 2, 3; Burnet, On the Articles, art. xxv.

CHRISOME (chrismale). In the Roman Church the priest puts on a baptized person a chrisome of Chrysos, a white robe, saying, “Receive this white garment, which mayest thou carry un tainted, etc.” In the baptism of infants a white kirkchief is given instead of the garment, with the same words.

By a constitution of Edmund, archbishop of Canterbury, A.D. 776, the chrismes, after having served the purposes of baptism, were to be made use of only for the making or mending of surplices, etc., or for the wrapping of chalices. A “chrisome child,” in old English usage, was a child in its chrismale crust. Thus Jeremy Taylor: “This day is mine and yours, but ye know not what shall be on the morrow; and every morning fresh chrism is given you in an ignorance and silence deep as midnight, and undiscerned as are the phantasm of the poor child to smile” (Holy Dying, chap. i, sec. 2).
The first Common Prayer-book of King Edward orders that the woman shall offer the chrism when she comes to be buried; but, if the child happens to die before her churching, she was excused from offering it, as also if she be in a round, and then wrap the child in it when it was buried. Hence, by an abuse of words, the term is now used in England not to denote children who die between the time of their baptism and the churching of the mother, but to denote children who die before they are baptized, and this is termed in Leviticus (i. 13) as a "shroud," and it is a parallel clause are termed the "people of God," "greater riches than the treasures of Egypt."

(3.) In the prophetic Scriptures we find this appellation given to an illustrious personage, who, under various designations, is so often spoken of as destined to appear in a divinical age as a great deliverer. As the royal prophet David seems to have been the first who spoke of the Great Deliverer under this appellation. He represents the heathen (the Gentile nations) raging, and the people (the Jewish people) imagining a vain thing; "against Jehovah, and against his Anointed" (Psa. ii. 2). He adds, "Now I know that the Lord saveth his Anointed" (Psa. xxii. 6), "Thou hast loved righteousness and hated iniquity," says he, addressing himself to "Him who was to come," "therefore God, even thy God, hath anointed thee with the oil of gladness above thy fellows" (Psa. xlv. 7). In all the passages in which the Great Deliverer is spoken of as the "Anointed of God," the word is used as a synonym of Christ, He is plainly viewed as sustaining the character of a king.

5. The prophet Isaiah also uses the appellation "the Anointed One" with reference to the promised deliverer, but when he does so, he speaks of him as a prophet or great teacher. He introduces him as saying, "The Spirit of the Lord is upon me; because he hath anointed me to preach good tidings unto the meek; he hath sent me to bind up the broken-hearted, to proclaim liberty to the captives, and the opening of the prison to them that are bound; to proclaim the acceptable year of the Lord, and the day of vengeance of our God; to comfort all that mourn," etc. (Isa. lxi. 1, etc.).

c. Daniel is the only other of the prophets who uses the appellation "the Anointed One" in reference to the Great Deliverer, and he plainly represents him as not only a prince, but also a high-priest, an exalter of guilt. "Seventy weeks are determined upon thy people and upon thy holy city, to finish the transgression, and to make an end of sins, and to make reconciliation for iniquity, and to bring in everlasting righteousness, and to seal up the vision and the prophecy, and to anoint the most holy." Know therefore and understand that from the going forth of the commandment to restore Jerusalem unto Messiah the Prince shall be seven weeks and sixty-two weeks, and two weeks shall be built again, and the wall, even in troublous times; and after threescore and two weeks shall Messiah be cut off, but not for himself" (Dan. ix. 24-26). See Seventy Weeks.

(4.) During the period which elapsed from the close of the prophetic canon till the birth of Jesus no appellation of the expected deliverer seems to have been so common as the Messiah or Anointed One, and this is still the name which the unbelieving Jews ordinarily employ when speaking of him whom they still look for to avenge their wrongs and restore them to more than their former greatness. Messiah, Christ, Anointed, is, then, a term equivalent to consecrated, sacred, set apart; and as the record of divine revelation is called, by way of eminence, The Bible, or book, so is the Great Deliverer called The Messiah, or Anointed One, much in the same way as he is termed The Man, The Son of Man. See Anointing.

2. The import of this designation as given to Jesus of Nazareth may now readily be apprehended.

(1.) No attentive reader of the Old Testament can help noticing that in every part of the prophecies there is ever and anon presented to our view an illustrious personage destined to appear at some future distant period, and, however varied may be the figurative representations given of him, no reasonable doubt can be
CHRIST 281

CHRIST

entertained as the identity of the individual. Thus the Messiah is the same person as "the seed of the woman" who was to "bruise the head of the serpent" (Gen. iii, 15); "the seed of Abraham, in whom all the nations of the earth were to be blessed" (Gen. xxii, 18); the great "prophet to be raised up like unto Moses" (Deut. xviii, 15); the "priest after the order of Melchizedek," "the rod out of the stem of Jesse, which should stand for an ensign of the people to which the Gentiles should seek" (Isa. xi, 10); the virgin's son, whose name was to be Immanuel (Isa. vii, 14); "the branch of a root of Jesse" (Isa. xi, 1); "the angel of the Lord descending into the Covenant" (Mal. iii, 1); "the Lord of the Temple," etc., etc. (Isa. xlii, 1). When we say, then, that Jesus is the Christ, we in effect say, "This is He of whom Moses in the law and the prophets did write" (John i, 43); and all that they say of Him is true of Jesus.

The sum of this prophetic testimony respecting Him is that He should belong to the very highest order of being, the incommunicable name Jehovah being represented as rightfully belonging to him; that his goings forth have been from old, from everlasting" (Mic. vii, 2); that his appropriate appellations should be "Wonderful, Counsellor, the Mighty God" (Isa. ix, 6); that his intellectual and spiritual capacities and accomplishments should be "a child born" of the Israelitish nation of the tribe of Judah (Gen. xlix, 10), of the family of David (Isa. xi, 1); that the object of his appearance should be the salvation of mankind, both Jews and Gentiles (Isa. xi, 6); that he should be "dissipate and rejected" of his countrymen; that he should be "cut off, but not for himself; that he should be "wounded for men's transgressions, bruised for their iniquities, and under- go the chastisement of their peace"; that "by his stripes men should be healed;" that "the Lord should lay on him the iniquity of men;" that "exaction should be laid upon him;" that he should "make his soul an offering for sin;" that after these sufferings he should be "exalted and exalted, and made very high;" that he should "see of the travail of his soul and be satisfied, and by his knowledge judge many" (Isa. liii, passim); that Jehovah should say to him, "Sit at my right hand until I make thine enemies thy footstool" (Ps. lxxl, 1); that he should be brought near to the Ancient of Days, and that to him should be given "dominion, and glory, and a kingdom, that all people, and nations, and languages, should serve him—an everlasting dominion which shall not pass away—a kingdom that shall not be destroyed," as is implied in saying Jesus is the Christ. In the plainer language of the New Testament, "Jesus is the Christ" is equivalent to Jesus is "God manifest in the flesh" (1 Tim. iii, 16)—the Son of God, who, in human nature, by his obedience, and sufferings, and death in the room of the guilty, has obtained salvation for them, and all power in heaven and earth given unto him, that he may give eternal life to all coming to the Father through him.

(2.) While the statement "Jesus is the Christ" is thus materially equivalent to the statement "all that is said of the Great Deliverer in the Old Testament Scriptures is true of Him," it brings more directly before our minds those truths respecting him which the appellation "the Anointed One" naturally suggests. He is a prophet, a priest, and a king. He is the great revealer of divine truth; the only expiator of human guilt, and reconciler of man to God; the supreme and sole legislative ruler over the understandings, consciences, and affections of the person, his work, and word, by his spirit and providence, he unfolds the truth with respect to the divine character and will, and so conveys it into the mind as to make it the effectual means of conforming man's will to God's will, man's character to God's character. He has by his spotless, all-perfect obedience, amid the severest sufferings, obedience unto death, even the death of the cross," so illustrated the excellence of the divine law and the wickedness and danger of violating it, as to make it a righteous thing in "the just God" to "justify the ungodly," thus propitiating the offended majesty of heaven; while the manifestation of the divine love in appointing and accepting this atonement, when the sinner had apprehended that his case was too far and obsolete for the Holy Spirit, becomes the effectual means of reconciling man to God and to his law, "transforming him by the renewing of his mind." And now, possessed of "all power in heaven and earth," "all power over all flesh," "He is Lord of all." All external events and all spiritual actions are under his control, and as a king he exerts his authority in carrying into full effect all the great purposes which his revelations as a prophet, and his great atoning sacrifice as a high priest, were intended to accomplish. See CHRIST, OFFICES OF.

(3.) But the full import of the appellation the Christ is not yet brought out. It indicates that He to whom it belongs is the anointed prophet, priest, and king—not that he was anointed by material oil, but that he was divinely appointed, qualified, commissioned, and accredited to be the Saviour of men. These are the ideas which the term "anointed" seems specially intended to convey to the mind. "Anoint" seems to mean to pour oil upon. Why was he anointed? He was called of God as was Aaron" (Heb. v, 4), "Behold mine Elect, in whom my soul delighteth." b. He was divinely qualified: "God gave to him the Spirit not by measure. "The Spirit of the Lord was upon him," etc. (Isa. vi, 4). c. He was divinely commissioned: "The Father sent him." Jehovah said to him, "Thou art my servant, in thee will I be glorified," etc. (Isa. xlix, 6). "Behold," says Jehovah, "I have given Him for a witness to the people—a leader and commander to the people." d. He is divinely accredited: "Jesus of Nazareth," says the apostle Peter, was "a man approved of God among you by miracles, and wonders, and signs which God did by him in the midst of you." (Acts ii, 22). "The Father who hath sent me," says Jesus himself, "hath borne witness of me" (John v, 37). This he did again and again by a voice from heaven, as well as by the miracles which he performed by the influence of his person and his Father's. Such is the import of the appellation Christ.

8. If these observations are clearly apprehended, there will be little difficulty in giving a satisfactory answer to the question which has sometimes been proposed—what is the true meaning of the appellation the Anointed of God? We have seen that the expression is a figurative or analogical one, and therefore we need not wonder that its references are varying. The appoimntment of the Saviour, like all the other divine purposes, was of course from eternity: he "was set up from everlasting" (Prov. viii, 22); he "was foreordained before the foundation of the world" (1 Pet. i, 20). His qualifications, such of them as were conferred, were bestowed in or during his incarnation, when "God anointed him with the Holy Ghost and with power" (Acts x, 38). His commission may be considered as given him when called to enter on the functions of his office. He himself, after quoting in the synagouge of Nazareth, in the commencement of his ministry, the passage from the prophecies of Isaiah in which his union to the prophetical office is predicted, declared, "This day is this Scripture fulfilled in your ears. And in his resurrection and ascension, God, as the reward and punishment of the person, his holiness, and iniquity, "anointed him with the oil of gladness above his fellows" (Ps. lxxl, 7), i.e. conferred on him a regal power, fruitful in blessings to himself and others, far superior to that which any king had ever possessed, making him, as the apostle Peter expresses it, "both Lord and Christ" (Acts ii, 36). As to his being accredited, every miraculous event performed in refer-
ence to him or by him may be viewed as included in this species of anointing, especially the visible descent of the Spirit on him in his baptism.

4. These statements, with regard to the import of the appellation "the Christ," show us how we are to understand the statement of the apostle John: "Who soever believeth that Jesus is the Christ is born of the living God." (1 John v. 1) i.e. is "a child of God," "is born again," "a new creature;" and the similar declaration of the apostle Paul, "No man can say that Jesus is the Lord, but by the Holy Ghost." (1 Cor. xii, 3). It is plain that the proposition, "Jesus is the Christ," when understood in the latitude of meaning which we have shown belongs to it, contains a complete summary of the truth respecting the divine method of salvation. To believe that proposition, rightly understood, is to believe the Gospel—the saving truth, by the faith of which a man is, and by the faith of which only a man can be, brought into the relation or formed to the character of a child of God; and though a man may, without divine influence, be brought to acknowledge that "Jesus is the Lord," "Messiah the Prince," and even firmly to believe that these words embody a truth, yet no man can be brought really to believe and cordially to acknowledge the truth contained in these words, as we have seen, unless he is first enabled to unfold it, without a peculiar divine influence. That Jesus is the great Saviour (ὁ θεός τῶν ἀνθρωπῶν, ὁ Ἡσαυροῦ) is the testimony of God, the faith of which constitutes a Christian, the one thing (τὸ πάντα) to which the Spirit, the water, and the blood unites in bearing witness (1 John v. 6-9). This historical view of Jesus is not inconsistent, with the Jewish Messianic idea, but continuous and expansive of it. See Jesus.

CHRIST, IMAGES AND PORTRAITS OF. The Gospels contain no notice whatever of the personal appearance of Christ. The passages in the G. T. which refer to his person (Isa. iii. 14; liii. 2) seem almost like premonitory warnings against any worship of Christ "after the flesh." The Apocryphal Fathers are as silent on this subject as the Scriptures are. "Either the Church was too spiritual to desire such descriptions, or this wretchedness was too faithful to them." So completely, indeed, had all tradition of the personal appearance of Christ died out, that, as early as a hundred years after his death, a long controversy arose as to whether he was in form and features as described by the prophet Isaiah (lilii. 14; lili. 2), without comeliness and beauty. Justin Martyr, Tertullian, and Cyril took the ground that Christ was physically丑恶-comely; Cyril even declares that Christ was the "uilest of the sons of men." Ambrose, Jerome, and the later fathers generally, declared him to have been the most beautiful of mankind (Oldon, Christian Iconography, i. 285). The episcopal letter of Lentinus to the Roman senators describing Christ as a man of noble appearance, with curled hair parted in front, and falling, dark and glossy, over his shoulders, with a smooth, high forehead, a strong, reddish, and irregular beard, dated probably also from the third century, but has not been known, in its present form, only since the eleventh. See LENTINUS.

Wherever this arose, the early Christians felt soon the need of some visible sign of their faith. The earliest adopted was the fish (q. v.). Afterwards the figures under which Christ presented himself in the New Testament, as the vine, the Lamb (of God which taketh away the sins of the world), and, above all, as the Good Shepherd (q. v.) carrying a lamb on his shoulders, were introduced into the paintings and sculptures of the Catacombs of Rome, Naples, and Syracuse. The so-called monogram of Christ, viz. χ (for Χρ, the two first letters of the name Χριστός), with or without the letters Α, Ω (the Alpha and Omega of the Apocalypse), appears about the time of Constantine (+ 337). See CHRIST, MONOGRAM OF; ALCHEMIA; AGNUS DEI.

Again, the best men of pagan thinkers in the Roman empire, even before the official adoption of Christianity, had become dissatisfied with the complications of polytheism, and were seeking for a simpler faith. Perhaps the mystery of the unity of the Godhead, which had been celebrated through nearly all forms of paganism in secret rites, had become the common property of educated minds. Explain a mystery, with the sun as its great centre, had also made its impress on the Roman mind. And thus, towards the later periods of the supremacy of paganism in the Roman empire, Apollo, as the deity of the sun, had assumed the chief place in heathen worship. As indicating that Christ was the true "light of the world," the "Son of the Sun" or "Son of the morning"—the morning or first ray used in speaking of the Saviour in the early centuries—this first figure of Apollo was often introduced as indicating Christ. Orpheus was also frequently thus introduced, as indicating that Christ is the true charmer of the evil passions of the human heart—indicated by the beasts that are consecrated to his music and the true ruler of the powers of nature—indicated by the trees and other plants bowing to his music.

The figure of the Good Shepherd, usually a beardless youth not over twenty years of age, with long, curly hair and a joyful countenance, gave the most usual type of the personal figure of Christ, when represented on the sarcophagi and in some of the frescoes of the Catacombs. Many of these sarcophagi are now in the Museum of the Lateran. One of the most interesting of these youthful figures of the Saviour in sculptured monuments is that in the tomb of Junius Bassus (A.D. 589), in the church of St. Peter, at Rome, in which Christ is represented disputing with the doctors. This type of the Saviour as a youth appeared again in some manuscripts, and in other paintings of the early part of the Middle Ages.

Quite a different type, however, predominated at a later period in all Christian art through the entire Middle Ages. The first example of it occurs in a tablet of ivory now in the Vatican museum. The second, and by far the best example of this typical representation is found in a painting hanging in a chapel in the catacombs of Callistus. It is considered by recent Roman archaeologists to be of the second century, but this is not at all probable. It represents the Saviour as about thirty-three years of age, with a somewhat elongated oval face, bearded, with a grave and somewhat melancholy, but still sweet and benign expression of injured innocence. The features are not to be recognised as distinctively Greek, Roman, or Jewish, but they are highly ideal. The brow is high; the beard is sparse, somewhat pointed, and of a reddish hue; the hair parts in the middle, and flows in a beautiful mass of curls and shoulder-length. Of the many varieties of representations of Christ, of which Augustine speaks as existing in his day, this type soon gained the predominance in the Christian world, and it has held its place till modern times. In the mosaics of the Basilicas and the Byzantine churches, in Rome, Constantinople, and Ravenna, it gained an inexpressible veneration, which was not entirely lost during the decadence of the so-called Byzantine period of painting (A.D. 600-1000). Almost its original power was renewed under the hand of Giotto. It finally reached its highest development in Christ as the Redeemer in Leonardo's Last Supper, and in Christ the Judge in Michelangelo's Last Judgment (q. v.).

In the scenes of the birth, infancy, and early childhood of the Saviour, attempts have usually been made...
to infuse into his face indications of the divinity of his nature. This reached its climax in the miniatures of some Byzantine manuscripts and in others of the greater Raphaelites, and especially in the Christ of the Sistine Madonna (at Dresden). Later in life, even Raphael painted the youthful Christ as merely a blooming or laughing child. Other Italian painters, in the decadence of morals of the seventeenth and eighteenth centuries, painted portraits of beautiful children as males as madness. Some Flemish and Dutch painters imagined scenes in which Christ, as a dutiful child obedient to the law, was helping his mother in such homely duties as hanging out clothes which she was washing, or as helping his father in his labors as carpenter.

When represented as disputing with the doctors, he is usually placed on a seat above the other figures, with his feet on a stool, as symbol of his high position and authority.

In whatever scene of his life he appeared, he is often represented, after the time of Constantine, with a nimbus (q. v.) around his head, as a symbol of his heavenly nature and origin. This often also included a cross, or the monogram Ω. He is usually represented as wearing a tunic, or tunic and surplice. As indicating his authority and power, the Saviour is often represented with a globe—the universe—under his feet; or as sitting on the globe, or the rainbow, or with a wand in his hand, especially while performing miracles. The Saviour was usually represented in the early works as wearing a tunic, over which was thrown the pallium or the Greek chlamys. The tunic often had two bands of purple or of gold on the breast, and, like the pallium, it was of white cloth. Sometimes a volume, the New Testament, was placed in his hand, or he was placed between two cases of volumes, the Old and the New Testament.

Besides direct scenes from his own life, or representations indicating his holy mission, the Saviour was, during the first centuries, when symbolism was carried to a very great perfection, sometimes represented in scenes from the Old Testament, as in the fiery furnace with the three worthies, with Daniel in the lions' den, and in the place of Moses, when that patriarch was striking the rock. Besides these extant representations of the Saviour in Christian art, we know that the Gnostics had it as their images of Christ as early as the second century. Raoul Rochette (Tippe de l'Art, p. 9 sq.) says that the cast of features described above as belonging to the best portraits of Christ was derived from the Gnostics. Compare with the Severan, ad Haer., i, 25, § 6. A century later, the emperor Alexander Severus (A.D. 222-235) placed among his household gods figures of Abraham and Christ beside those of the heathen deities.

Images of Christ, claimed by the Romanists to be of miraculous origin, are preserved in several churches in Italy and the Orient. Most of them are really of Byzantine origin, and probably dated from the tenth and twelfth centuries. The power of working miracles is ascribed to these images! One of the most noted of them is the Veronica (the picture known as the Ecce Homo), on a linen cloth which a woman named Veronica is held by tradition to have given to Christ while bearing his cross to Calvary to wipe his brow. See VERONICA. On the cloth is the face of the Saviour, with an expression of great grief, and the brow pierced by the crown of thorns. Another is that which is said to have appeared miraculously when St. Sylvester was consecrating the basilica of St. John Lateran, which was formerly preserved above the tribune of that church. Another is the Abgarus picture, a portrait without colors, which a baseless tradition (of the tenth century) has it that Christ sent to king Abgarus of Edessa, when that king wished Christ to come and heal him of a sickness, and the original of which picture two churches—the church of St. Sylvester in Pisa, near Rome, and a church at Genoa—profess to have. See ABGARUS. Another is preserved in the sacristy of the basilica of St. Lawrence, near Rome. There are also several wooden images of the infant Saviour said to have been carved and painted by St. Luke, or by angels!

Paintings or sculptures of the crucifixion [see CRUCIFIX] are usually placed over the altar in Roman, Greek, Armenian, and Lutheran churches. In some Protestant churches, other than the Lutheran, the figure of the Saviour is often introduced in paintings of the parables, the miracles, and other Biblical subjects, rendered in a Protestant sense. See Piper, Mythologie und Symbolik der christlichen Kunst (Weimarer, 1867); Martigny, Dictionnaire des Antiquités Chrétientes (Paris, 1865); Rossi, Roma Sottotravata (Rome, 1866); also the works of Aringhi, Botturi, Perret, etc., on the Catacombs; Glücksdie, Christi-Archaologie (1663, 4to); reproduces the so-called Edessa picture in colors, and gives six other plates); Manager, Istoria della Cappella di S. S., di Roma (Rome, 1717); Mara, History of our Lord in Art (London, 1864, 2 vols. 8vo); Lecky, History of Religion (London, 1862, 2 vols. 8vo), i, 221-257; Diron, Christian Iconography (Bohn's ed.), i, 242-298; Lewis, Bible, Mission, and Directory (Edinburgh, 1855, 2 vols. 8vo), i, 138 sq.; Schaaf, Church History, iii, 110. See CATACOMB AND ECHENGEWERK.

CHRIST, LIFE OF. See Jesus.

CHRIST, MONOGRAM OF. In the Catacombs and elsewhere is to be found a monogram in the forms Χ, ΧΡ, ΧΡΙ, composed of the Greek letters X and P, the initial letters of the name Xristos, Christ. Sometimes the Greek letters α, ω (Alpha and Omega, the first and the last) are combined with the others, in the form αω, or suspended by chains from the transverse bar, thus ΧΡΙ. The precise date of its origin is unknown; but Kilian (Ancient Church, p. 317, note) asserts that it is found on coins of the Ptolemies, and cites Aringhi (Roma Sottotravata, ii, 567) as his authority. But, whatever the origin of the monogram, it came into prominence and wider use from the fact that Constantine (A.D. 312) applied it to the day by which he reigned in the world, then military standard. See LABARUM. It is called, therefore, not only the monogram of Christ, but sometimes also the monogram of Constantine.—Schaff, CH, History, ii, 27; Jameson, History of our Lord in Art, ii, 131; Martigny, Dict. des antiquités, p. 414; Perret, Les Catacombes, iii, 96. See CATACOMBS.

CHRIST, OFFICES OF (as Prophet, Priest, and King).

1. Origins and History of this Division.—Eusebius, in his Church History (i, 3), and also in his Demonstratio Evangelica (iv, 15), is the first person who appears to have considered the mediatorial work of Christ as consisting in the three offices. The division became common in the Greek Church, and it is still used in the Russian Church. In the Latin Church it has not passed so generally into use, although Bellarinus and many others allow it. Luther, Melanchthon, and the other early Lutheran theologians do not use the distinction. It was introduced into Lutheran theology by Gerhard (q. v.) in his Elet, die das Christentum, which was admitted to Spener into his Catechism, and remained prevalent among Lutheran theologians until the time of Ernesti, who wrote against it under the title De officio Christi triptic, and was followed by Zacharias, Deiderlein, Knapp, and others (see Knapp, Theology, § 107). In the Reformers the term Trias adiutorio, by Calvin (Inst., ii, 15), was admitted into the Heidelberg Catechism, and was generally followed by the dogmatic writers of the Reformed churches, both on the Continent and in England. The modern theology of Germany (as the works of De Wette, Schleiermacher, Tho-
CHRIST, OFFICES OF

ACK, Nitzsch, Liebner, Ebrard, etc.) generally adhere to it, regarding it as an essential, and not merely accidental and formal division of the mediatorial work, as the only one which exhausts it. It is used by many of the best English theologians. We give here a modification of Ebrard's article on the topic in Herzog's Real-Encyclopädie, vi, 607 sq.

II. Biblical View.—The prophecies of the O. T. designate the Redeemer as the perfect and model prophet, as the servant of God to whom the attributes of priestly, prophetic, and royalty alike belong; as the kingly seed of David, or the second, perfect David; and finally as the priest-king. He, moreover, in spirit, calls itself, in the Gospels, "prophet," and "son of David." In the Epistle to the Hebrews he is represented as the only true and eternal high-priest. This threefold aspect of his mission is united in the conception of the Anointed or Messiah; for as Elisha was by Elijah anointed a prophet (2 Kings xix, 16), so was the promised "servant of God" to be anointed by the Spirit of the Lord; and as the kings of Israel were anointed (1 Sam. x. 1; xvi. 18; 1 Kings i. 18; xix. 15, etc.), so was Christ anointed king of righteousness (Heb. i. 8, 9). And it is ordained by the prophet that the high-priest should be anointed to his office (Exod. xxviii. 41; xxix. 7; xxx. 30; Lev. iv. 8; vi. 22; vii. 36), so Christ was made high-priest "not after the law of a carnal commandment, but after the power of an endless life" (Heb. vii. 16). The conception of the Messiah of the Apocrypha divides itself into the three aspects of prophet, priest, and king.

The first prophecy bearing on the subject is in Deut. xviii. 15. The people, afraid of hearing the commandments of God, sent up Moses to hear them (Exod. xx. 19; Deut. v. 27). The Lord "heard" the people (Deut. v. 29), and promised (as they had sent up Moses to hear Him) that He would send them a prophet whom they could and should hear. The God who revealed his law in the midst of thunder and lightning, so that the people durst not approach him, would afterwards approach the people through a prophet. On Mount Sinai the people had sent up Moses up to God, and God promised, in the future, to send down a prophet to the people. Thus the difference between the Law and the Gospel is sketched in its dawning outline.

The latter part of Isaiah (chapters xi-lxvi) is related, though not in the most direct way, to the prophecy in Deuteronomy. In Isaiah, not "the prophet," but the "servant of God," is the predominant conception. He is the true and faithful minister of God in Israel; a common servant of God, however, will accomplish both Isaiah's task in Israel and the mission of the people of Israel to the Gentiles together and perfectly (xli. 6); and this because he is more than a prophet; because he takes upon himself the penalty of our sins (iii. v.—δεινόν ἢ χείραν, "the chastisement of our peace," i.e. the punishment whose fulfillment secures our exemption.

He brings a sin-offering, χείρων (ver. 10). The prophet's mercy indicates that the prophet's mission should entail death. It is true that this was the case with Paul (Col. i. 24; 2 Tim. i. 11), but that he should die as an expiatory sacrifice. And in chap. xlix. 7, he appears as "King of kings," for "kings and princes" are to bow down before him.

Thus we find in Deut. xviii. 15 a promise of the "prophet," and in Isaiah xlix. 3—iii. 9 a promise of a "servant of God," of whom prophetic teaching, priestly self-offering, and crowning with kingly power are predicated. But regal dominion is not merely assigned to the future Redeemer as the predicate, or as the issue of his destiny, but, on the contrary, the very root of the Messianic conception lies in the promise of "one of the seed of David," whose " throne would endure forever.

Redemption from future servitude was promised to the seed of Abraham (Gen. xv.). Through Moses, Joshua, and David, this promise, in its outward and material sense, was gradually fulfilled. It was for this reason that David intended to build a temple to the Lord, that the "Eternal might dwell with his people." But such a union of God, " who is a spirit," with a material place and edifice, did not agree with the divine plan of salvation (compare John iv. 23, 24).

Israel was to acknowledge that the temporal redemption, obtained through David, was not yet the true redemption, but a mere faint foreshadowing thereunto. This was the topic of the seventh chapter of 2 Samuel, in which it was shown that not David himself, but David's seed after his death, was to build the Lord a house, and that the Lord would assure the throne of his kingdom forever. Even here no mention is made of an individual, but merely of a successor of David (chap. vii, 12—18). David at the same time understood that his sinfull race was not fit to build the Lord a temple, and to rule on his eternal throne, as he said, "Thou hast spoken also of thy servant's house for a great while to come. And is this the manner of man, O Lord God? (2 Sam. vii. 19; comp. 1 Chron. xvii., 17). The assurance in Psa. ii. 6, 7, to this principle is an unmistakable poetic explanation of the passage 2 Sam. vii. 19. So Christ himself (Matt. xxii. 42) explains it.

Solomon also was aware that the prediction of Nathan would not have its final fulfillment in his material temple (1 Kings viii. 26—27). After the death of Solomon, messianic expectations were divided more towards a certain, particular, future descendent of David, entirely distinct from his then existing posterity (comp. Isaiah vii. 14; ix. 6, with x. 21). From the chasti
ed house of David, the fallen trunk, a fresh branch was to spring (Isaiah xi. 1), and to rule over the nations through a reign of peace and righteousness. Yet that he was not to be an ordinary earthly King, nor a Levitical priest, but a king-priest according to the order of Melchizedeck, had already been shown in Psa. cx. 4, and is more fully developed in Zech. vi. 12, 13, with distinct reference to 2 Sam. vii, Psa. cx. and Isaiah xi.

2. The Manifestation in N. T.—The carnal Israel awaited a worldly, earthly, Messiah, who should establish a worldly kingdom. "The Prophet" (ὁ προφήτης, John vi. 14) appeared to them to be distinct from the Messiah, a sort of precursor of the latter (comp. Mark viii. 27, and John i. 21); but the faithful, enlightened by the spirit of prophecy, thought otherwise. John the Baptist, already been announced by John the Baptist (Matt. iii. 8; comp. with xii. 18, Luke iii. 4) as the "servant of God" promised by Isaiah, in whom the prophetic, priestly, and kingly offices should be united; and the Lord himself appears in these three aspects in his life, his passion, and his death.

When he goes about teaching that the "kingdom of God" has come, and confirming his words by miracles, he does a prophet's work, and therefore the people themselves recognise him as the "prophet" (Luke vii. 16; ix. 6; John iv. 19; vii. 40). But he not only spoke as a prophet, but he was and is The Prophet, the Revealer, the Spirit of God, the very key to this conception is given us in the passage Heb. i. 1: "God, who at sundry times and in divers manners spake in times past unto the fathers by the prophets, hath in these last days spoken unto us by his Son," etc., i.e. he has manifested the fullness of his essence and of his will in a personal revelation to Him who from all eternity has been the one God and consubstantial with the Father. Therefore he is in John i. 1, called the Word, in whom God iv. 9 ως χειρὶ expressed his essence to himself (πρὸς τὴν κεφαλὴν τούτον), "by whom all things were made; without whom was not any thing made that was made; in whom was life; and the life was the light of men, and is the light of all men, and is the light of all men; and is the light of all men, and is the light of all men."

CHRIST, SINSLESSNESS OF

The Epistle to the Hebrews represents Christ as a priest, may, even as the eternal high-priest (Heb. vii). His being in other parts of the Scriptures considered more as the hostia (victim) than as the priest, is merely a formal, not a material difference. Christ, on the one hand, as he bore the entire burden of our sins, holy, and filled with the love of God, and thus rendered the obedientia acutae which we do not render; and, on the other hand, he assumed the penalty which the law inflicted on the sinner, "Thou shalt die the death," on himself; he who owes nothing suffering for our sins. See the Dei. li. 14. Daur. li. 14.

He, thus, by substitution, took upon himself our debt and its penalty, and became an expiatory offering for us. For the fundamental principle of all offerings for sin under the old dispensation was this very substitution of one to suffer death for another; who could have been the mediating priest between Christ and the Father? He himself, the sinless, holy, the λύγος-προφήτης, who had ever been with the Father, was the priest who, in eternal high-priestly purity, gave himself as an offering. His actions and his sufferings cannot be divided. He did not make an offering of himself suddenly, ex abrupto, when he was already in the latter days of his life. On the contrary, his priestly, holy life brought him to his death. Thus was his offering a priestly one.

From the death of Christ the crown of thorns is inseparable. So from the crown of thorns the crown of kingly dignity and power is inseparable. When, in the days of his humiliation, he was recognised and proclaimed as the promised "Son of David," the expected "Messiah-king," he accepted the title (Matt. i. 27; viii. 30; xvi. 22; xii. 23; xxi. 9). But the fulfilment of his kingly mission took place in a manner entirely opposite to that which the people had expected. His kingly mission culminated at the very moment when he declared unto Pilate that he was king, and thereupon received the crown of thorns (John xix. 37, and 2 x, comp. with verses 12-15 and verse 21). Here the kingly office became closely connected with the priestly. As a reward for this royal abnegation he was crowned with the crown of glory (Heb. ii. 9; Phil. ii. 9-10), headed the procession of the Feast of Weeks (Ephes. i. 22), and Lord over all (Ephes. i. 21). And all who come to him by faith are given to himself as his own (John xiv. 6), and he claims for them a share in his glory (verses 22, 24, 26). The Christian Church is thus fully justified in considering the prayer in John xvii as a true high-priestly prayer of the priestly king and kingly priest (Psa. cx. 4) for his people, and not merely as the intercession of a prophet for his disciples.

Finally, redemption by Christ is best understood under this threefold aspect of his entire work. He who in his own person was the revelation of God, the λύγος-προφήτης, had, by his advent, revealed man, in his state of error, ignorance, and sin, the law of God to man, and the mercy of God to the sinner. He who in his own person was the son of man, clothed with priestly holiness, and making of himself a pure offering unto God, has, as a member of a race which is subject to the consequences of his first forefather's sins, by his own personal circumstances which caused the curse of human sin to fall on the head of him, the sinner, and has thereby submitted himself to the judgment of God in our stead, i. e. has given himself as an expiatory offering. He who in his own person was the kingly chief of mankind, has, in order that he might accomplish this kingly power and worn the crown of thorns, but thereby has attained the crown of glory, the dominion over the Church he has redeemed, in which and for which he now reigns over heaven and earth.

We find, in all the N. T. account, that in Christ's teachings he was not exclusively a prophet, in his passion he was not exclusively having of a high-priest, nor was he a king only after his resurrection. On the contrary, the three offices cannot be thus mechanically set off from each other. The Scripture certainly ascribes to Christ a munus propheticum immodicium (direct prophetic office) only during his visible life in the state of humiliation (viz. a prophetis personae, by which his whole being was in himself a revelation of God, and a prophetis officii, in words and doctrines). But it teaches also that, as Prophet and Revealers, the exalted Christ continues to operate (munus propheticum mediatrix, mediate prophetic office) by his Word, which he gave once for all, as well as by his Spirit, through which he continues to operate. The last, however, is more especially in the munus academiale (priestly office) we distinguish (scripturally) the once-offered oblation from the yet continuing intercession; and in the former, the obedientia and satisfactio aeterna, the assumption of the undeserved expiatory suffering. Finally, the Scripture teaches that Christ, in his state of humiliation, was already king (rex sui, or rex natus erat), as in John xvii, 37. He disclaims only the "exercise" of kingly power, not the fact. We distinguish also the inherent regal glory and power of Christ from his exercise of them—the dignitas regis from the officium regis. In the latter, as the regnum gratiae, the governing of his people by his spirit, from the regnum gloriae, the dominion over all. There is, in fact, no concrete point in the existence and activity of Christ, whether in the state of humiliation or of glorification, in which the three offices are not found constantly connected. Thus Christ remains in all respects, inseparably, the Revealers of the Father to man, the Intercensor for man with God, and the Chief and King of his people. See Knapp, Christian Theology. § 107; Nitzsch, System der christlichen Lehre, § 193; Herzog, Real-Encyclopädie, vi. 607; Fyfe Smith, First Lines of Christian Theology, bk. v. ch. iv. § 2.

CHRIST, RESURRECTION OF. See Resurrection.

CHRIST, SINSLESSNESS OF. The Christian Church has always held that Christ was absolutely free from sin. (This article is based upon Weiss, in Herzog's Real-Encyclopädie [Supplement, i. 198 sq.], and Ullmann, Sinneresse of Jesus [Edinburgh trans. 1868].)

I. Historical.—1. To the minds of the apostles the perfect sinlessness of their divine Master presented itself as an unquestionable fact, and this view continued to prevail, through the period immediately succeeding, in the development of the Church's doctrine of the person and work of Christ. No explicit statement of it seems to have been made or deemed necessary, but the allusions in the early ecclesiastical writers show that the doctrine was received as necessary and not ignored as unimportant. Tentallian inferred the sinlessness of Christ from his divinity; Origen regarded it as a peculiar property of the human soul of Christ, resulting from its union with the divine Logos, by whose virtue it was interpenetrated as red-hot iron is by fire, so that sin became for him impassibility. Apollinaris differed from this theory altogether in that he held that nature implies limitation, mutability, conflict, sin, etc., held that no man can be a perfect man without sin; and in order to preserve, consistently with this view, the sinlessness of Christ, sacrificed his true humanity by adopting the opinion that the Logos took the place of the human soul in Christ, and imparted to him an irresistible tendency to the good. Athanasius held the doctrine of a sinless yet perfectly human nature in Christ, arguing that sin does not belong to human nature pr se, which was originally pure and sinless;
and that Christ could, consequently, assume the nature of man without thereby being made subject to sin, was a view that made a man, becomes man's exemplar and guide in his conflict with evil and progress towards the good.

2. At the Council of Chalcedon (A.D. 451) the doctrine of Christ's true yet sinless manhood was formulated in the words, "truly man, with a rational soul and body of like essence with us, and in his manhood, and also in all things like us, sin excepted;" and there has not since been any change within the accepted Christological doctrine of the Church. The theologians of the Middle Ages contended themselves with the traditional doctrine, without any special efforts for its further development; but in the controversies with the so-called "Sententiae" of the Virgin Mary, her champions sought to add weight to their arguments by claiming that the acceptance of whose views these would recognise also the sinlessness of Christ. A doctrinal error of a different sort hence arose, viz. the putting Christ in the background as too holy for mortals to address, and substituting the mediation of the Virgin and the priesthood.

3. One of the chief merits of the Reformers is the fact that they taught that Christ is individually and immediately apprehended by faith, and that the Holy Scriptures, not the dogmatic and liturgical traditions of the Church, are the sources whence Christian truth is derived. They accepted the doctrine of the Roman Catholic Church concerning the person and character of Christ, of which his sinlessness formed an essential part.

4. It was received, as in the apostolical times, as an intuition not needing proof, but "above mere demonstrative demonstration."

5. Socinians might have been expected to open up a new and fruitful discussion of this subject, yet, apparently in antagonism with its views of the person and office of Christ, it asserted not only the sinlessness of Jesus as a fact, but also the non poe secare, and indeed denied that he was really subject to temptation, because of his supernatural generation.

6. From the rise of German Rationalism, about the middle of the 18th century, this doctrine has been repeatedly impugned by writers of that school. Some (as Reimarus, Bahrdt, Venturini) even go so far as to characterize Christ as an impostor. So also, among English Rationalists, Newman, Phases of Faith, finds in the divine moral character of Christ, "a denial of Christ's sinlessness on the ground principally of its à priori impossibility, or of the necessary connection of sin with finite existence. Pécaut, a recent French writer, adds an as proofs of Christ's moral imperfections (Le Christ et la conscience, Paris, 1859), his treatment of his mother (Luke ii, 42–50; John ii, 4); the expulsion of the profilers of the Temple (Matt. xxi, 12–17, et al.; the cursing of the fig-tree (Matt. xxv., 17–22; Mark xi, 12–20); the destruction of the swine (Matt. xxviii, 33–34, et al.); his severe reproofs of the Pharisees (Matt. xvi, 10, et al.); and also his suppressed admittance of the title and good (Matt. xxi, 17, et al.); but, in strange contradiction of his views of the divine nature, he uses such language as this: "To what a height does the character of Jesus Christ rise above the most sublime and yet ever imperfect types of antiquity. Jesus Christ has been humble and patient; holy, holy, holy, before God; terrible to devils; without any sin. This is a whole penetrability by God (Schaff, Person of Christ, The Miracle of History, p. 268, 209, 346–348). Other Rationalistic writers (as Kant, Jacobin, and others) have labored to place in clear light the unparalleled moral excellence of Christ, as the abiding type and proof of the divinity of his teachings. The doctrine of this doctrine, whether original or covert, mostly arises from shallow moral and religious conceptions, or from lowering the fundamental moral nature of sin, justification, etc., into mere relations.

7. On the other hand, Ulmann has laid the Church under lasting obligations by his monograph, Die Sündenlosigkeit Jesu (last ed. 1863, Gottha, transl. by Brown, The Sinslessness of Jesus, 1st ed. 1865, 2nd ed. 1866, 1st mo); Dörner, Schwarz, and Weiss have still further contended for its elucidation (see references at end of this article). The subject has been more or less fully treated: in relation to Rationalism by Hase (Streifenschiben, iii, 1887; Leben Jesu, and Dogmatik); Scharnhorst (in Studien und Kritiken, 1854, iii and iv, 1867, iii, iv), in connection with historicism and the denomination of the Church, by Kieß (Der geschichtliche Christus, p. 48, 160–166); from the standpoint of the doctrine of the Christian morals and Church history, by De Wette (Christliche Sittenlehre, vol. i, §§ 50–50), Weiss (Evangelische Theologie, i, Schinkel (Dogmatik, and very winningly in his Charakterbild Jesu, p. 39 and 39), Weisskeller (Evangelische Geschichte, p. 437); from the standpoint of Church confessions, by Thomasius, Hofmann, Philippi, and Ebrard; from a purely biblical point of view, by Schmidt, Beck, Hess, Gars, Garret (Christ as Prophet, Priest, and King [Lond. 1842, 2 vols., 2nd ed.]), Stevenson (On the Offices of Christ [Lond. 1834, 4th ed.]), and Riggenbach; from that of the mediation theology of Schleiermacher, in treatises on the life of Christ, by Neander and others, and in works on dogmatics and the history of dogmas by Roth, Liebner, Dörner, Nietzsche, J. Müller, Lange, Marutsen, Schütz, and other German theologians.

II. Statement of the Doctrine.—The term sinlessness, avayagga, involves a twofold idea, first, a negative one, viz., "the absence of antagonism to the moral law and to the divine will, of which that law is the expression; and this not only in relation to separate acts of will and outward actions, but also in relation to the tendency of the whole moral nature, and to its most deep-seated disposition" (Ullmann, Sinlessness of Jesus, p. 41), which may be expressed by the term innocence, goodness of nature, etc.; and, secondly, a positive one, viz., the expression in outward form of this inward harmony: by a life of complete and perfectly holy activity, working out in full obedience to the will of God the duties of each hour, while keeping both spirit and life unstained by evil. This we term absolute holiness.

We hold, then, that our Saviour, in his humanity, was, in both these respects, sinless; at first relatively, just as Adam before his fall, with a perfectly human nature to the degree of his first state of innocence; secondly, after the fall, yet less than Adam, inasmuch as, after the fall, man's power to sin is not absolutely confined; otherwise no true man could have existed, no true example for our race could have been presented in his life. The doctrine of Edward Irving, however, that Christ partook of the sinful nature of Adam after the fall, cannot be allowed. It is not necessary at all to the true conception of his perfect example as a man for sinful men; which, on the contrary, implies that the second Adam should not be placed in his human nature below the original condition of the first, and thus burdened with the sin and weakness of fallen manhood. This view would demand of his divine nature so miraculous a support of the human as to destroy its self-activity. In his view of human nature, Christ, in his humanity, clothed with man's original purity of nature, lived, suffered, "was tempted in all points like as we are, yet without sin," and so could "justify the ways of God to man," and show that man was made "sufficient to have stood, though free to fall.

His relative sinlessness become absolute holiness in the development of his moral life, in his free, yet perfect, active, and passive obedience to the will of his Father. To use the terms of the schoolmen, the poe sua ecce or imperceptibilitas minor, in him, grew, through vanquished opposition and the achieved results of perfect obedience, with the poe suus or imperceptibilitas major, into the impossibility of sinning, which cannot be because it will not" (Schaff).
argue, a priori, that as Christ's acknowledged mission on earth was the moral elevation and the salvation of our race from sin, it was fitting, nay, necessary, in order to accomplish these objects, that he should be superior to us in these respects. To raise man from his ruins, the Prince of his salvation must be one "who is like unto his brethren," he must sympathize with the suffering and made higher than the heavens," while his heart, "touched by the feeling of our infirmities," would yearn for the renewal of humanity. How fully Christ's perfect life meets this ideal every Christian feels; and with what deep and grateful confidence does he, when occasion offers, say approvingly of his probation, turn to him who "needeth not daily to offer up sacrifices first for his own sins," and "then for the sins of the people," as did other priests.

2. A posteriori, we find that Christianity has exerted and does exert a power for moral good upon the world. Wherever it has taken hold of the hearts and minds of men in its purifying power, we see that they have attained a higher moral and religious state, a condition of life far beyond the pagan or even the Jewish types. How shall we account for this, apart from the life of the founder of Christianity, imparting its renewing power to the hearts of his followers? More than moral elevation is wrought out in this world, not capable of producing such results. Streams do not rise above the level of their sources; no more do followers of religious systems rise above the laws and principles of religious life prescribed in the conduct as well as teachings of their founders. We may justly claim that the higher moral condition of Christian nations is due mainly to the influence proceeding from the spotless life of Christ.

Many of the early as well as recent opponents of Christianity as a system bear testimony to the surpassing moral greatness of its founder. Pilate declared that he found no fault in him touching the things whereof the Jews accused him, and thrice asked the question, "What evil hath he done?" (Luke xxiii. 22). The Roman centurion, who witnessed his sufferings on the cross, said, "Certainly this was a righteous man." Josephus, if the passage be authentic (Antiq. bk. xviii. ch. iii. § 3), says of him that he "was a teacher of the Jews." The apostle Paul (Phil. ii. 8) says, "But himself is plous, and gone to heaven as other plous men do. Him therefore thou shalt not blaspheme." The celebrated tribute of Rousseau to the Gospel and its author need not be quoted here. A fuller view of the testimony of unbelievers to the person and character of Christ is given in the reference to the "Comparative Ethics," in the part on "Religion." Phrynry (A.D. 804) says, "But himself is plous, and gone to heaven as other plous men do. Him therefore thou shalt not blaspheme." The celebrated tribute of Rousseau to the Gospel and its author need not be quoted here. A fuller view of the testimony of unbelievers to the person and character of Christ is given in the reference to the "Comparative Ethics," in the part on "Religion.

3. Biblical View of the Doctrine. —The doctrine of the Old Testament writers in regard to the original purity and grandeur of man's moral and intellectual nature is shown conclusively by the language employed in describing his creation and endowments; that he was made in the image of God; that the dominion over the earth and lower animals was given to him, etc. When man by disobedience fell, the promise was given of one to come, who should repair, by his obedience and perfectness, the ruin made, and through whom man might be reconciled to God. The coming of such a Redeemer was prefigured in the worship and sacrifices of patriarchal times, in the separation of the Israelite from the rest of the Jewish nation, and in those holy men who from time to time appeared as lights amidst the darkness of the world. Throughout all these preparatory manifestations the idea of the sinlessness of the coming Messiah appears. In the spotless victims, in the purifying sacrifice of the priests of Israel, and in the magnificent imagery and language of the prophets are found, more or less complete, the elements whose union culminates in the idea of the sinless Son of God and Redeemer of men (Isa. lx. 1, xi. 9; Jer. xxxi. 18, 8 sq.; Ezek. xxxvi. 16, 8 sq., etc.).

The New Testament writings bear unequivocal and harmonious testimony to the truth of this doctrine. Christ is described in them as the Holy One, the Just and Righteous (Acts iii. 14; xxii. 14; 1 Pet. iii. 18; 1 John ii. 1, 29; iii. 7); as tempted "like as we are, yet without sin" (Heb. iv. 15); as our example "who did no sin, neither was guile found in his mouth" (1 Pet. xi. 22); as "without sin; he is separated from sinners, and made higher than the heavens," while his heart, "touched by the feeling of our infirmities," would yearn for the renewal of humanity. How fully Christ's perfect life meets this ideal every Christian feels; and with what deep and grateful confidence does he, when occasion offers, say approvingly of his probation, turn to him who "needeth not daily to offer up sacrifices first for his own sins," and "then for the sins of the people," as did other priests.

2. A posteriori, we find that Christianity has exerted and does exert a power for moral good upon the world. Wherever it has taken hold of the hearts and minds of men in its purifying power, we see that they have attained a higher moral and religious state, a condition of life far beyond the pagan or even the Jewish types. How shall we account for this, apart from the life of the founder of Christianity, imparting its renewing power to the hearts of his followers? More than moral elevation is wrought out in this world, not capable of producing such results. Streams do not rise above the level of their sources; no more do followers of religious systems rise above the laws and principles of religious life prescribed in the conduct as well as teachings of their founders. We may justly claim that the higher moral condition of Christian nations is due mainly to the influence proceeding from the spotless life of Christ.

Many of the early as well as recent opponents of Christianity as a system bear testimony to the surpassing moral greatness of its founder. CHRIST, ORDER OF

...dow above their fellows. Is it then irrational to suppose that in view of the great work which Christ came to do, he would be superior in purity to those whom he sought to elevate?

In all the relations of his life on earth, Jesus always did what was due to him. He did not seek, in virtue of the connection of his humanity in one personality with his divinity, to exempt his human nature from the influences which legitimately operate on it; but, meeting fully his duties as they came to him, he asserted in himself the triumph of one unalloyed nature over the power of evil in the world. Thus his perfect holiness of life stands out clearly in the moral heavens, the unchanging, ever-brilliant star of hope whose light no cloud can ever dim, a safe and surely-guiding beacon to those who traverse the sea of life in search for the Promised Land.

Christ, Order of. KINGS OF THE. After the abolition of the order of Knights Templars, in 1312, king Dionysius of Portugal left such as resided in his dominions a large share of their estates, and in 1317 reconsecrated them into a new spiritual order of "Knights of Christ." It was sanctioned by Pope John XXII on condition of obedience to the papal see. He also instituted a branch of the order in the Papal States.

The knights were secularized in Portugal in 1769, and divided into three classes: great crosses; of which there were 2; "commanders," numbering 450; and knights, the number of which was unlimited. The distinctive marks of the order are a golden cross, carved and ornamented with red enamel, the ends terminating in two points; a scarlet band, which, by the pall knights, is carried around the neck. The Portuguese grand crosses wear a particular dress on great occasions, with a golden chain wound three times around the neck, but which is usually thrown across the right shoulder; a band; and on the breast a star, containing in its centre the cross of the order. The commanders and knights wear a similar but smaller cross, the former in a star and on the breast, with the band; the latter pending from the button-hole, and without the star.

As a religious order, they have been suppressed, with all such orders, in Portugal.—Pierer, Universal-Lexikon, s. v.; Chambers, Encyclopaedia, s. v.

Christ, Work of. See Atonement; Christ, Offices of; Christology; Redemption.

Christendom, the kingdom of Christ in its diffusion among men on the earth. In the way of territory it has been enlarging almost without interruption from the beginning. In the second and third centuries congregations were established in all parts of the Roman empire, and beyond the limits of the empire it collected churches in Parthia, Persia, and India, and extended to several barbarian nations whose languages have never been reduced to writing.

The conversion of Constantine established the first Christian state. By A.D. 428 the whole eastern portion of the Roman empire was free from paganism, which lingered a little longer in the western, without, however, disputing any longer the ascendency. In the fifth and sixth centuries Christiani- ty conquered in great part Northern Africa, Spain, Gaul, Scotland, England, and a number of German tribes. The erection of the empire of Charlemagne paved the way for the conversion of Northern Europe. The Saxons consented to accept Christianity in 803, and Scandinavia in the tenth and eleventh centuries. Thence it spread soon to Iceland and Greenland. The conversion of the Ostrogoths commenced in the ninth century, and was nearly completed in the twelfth. In the tenth and eleventh centuries the dissemination of Christianity in Hungary, Transylvania, and Russia commenced. At the same time, its territory was lessened in Western Asia, Northern Africa, and a part of Southern Europe, by the progress of Mohommedanism, but, on the other hand, a large new territory was secured to Christianity in Eastern Africa, East India, and Ameri- ca, in connection with the discoveries of the Portuguese and Spaniards. After the sixteenth century the newly-discovered continent of America began to be filled up by a Christian population, thus making the second Christian continent. The Roman Church for some time seemed successful in Christianizing Eastern Asia, especially China and Japan, but its progress was stopped by persecution.

In the eighteenth century a new Christian state sprang up in South Africa, in connection with the political rule of the Dutch and the English. The nineteenth century opened with brighter prospects than any preceding. In South Africa the new kingdom of Christian nations, the Union of South Africa, was established. In West Africa, Liberia was founded as a Christian republic; in Northern Africa, Algeria is filling up with a Christian population; and in Eastern Africa, Abyssinia, which, in spite of its isolation, has preserved since the fourth century a kind of Christianity, promises to re-enter the union of the Christian states. Aus- tralia has already become the third Christian division of the world, with only a few weak remnants of paganism. In Asia the Kares of Farther India have been brought under the influence of Christianity, while in the north nearly one third of the continent forms part of Christian state. The country of Christianity at present comprises three out of the five large divisions of the world, with a considerable part of the two others. Moreover, large territories in Asia and Africa, though not yet Christianized, are under the dominion of Christian nations, and hardly a single country is at present left into which Christian missionaries have not forced their way. Thus the time seems near when the extent of Christendom will coincide with the extent of the earth.

The following estimate of the Christian population of the world is based upon the latest (1889) works on political and ecclesiastical statistics:

Christ-emporia (Kristosopsyopia), selling of Christ. See SIMONY.

Christening, a name given to the act of baptism, (1) as if thereby the child were made a Christian; or
CHRISTIAN
(2), as baptism fixes the Christian or Christianized name of the child.

Christian (Χριστιανός), the name given to those who believe Jesus to be the Messiah (Acts xi, 26). Commentators on the New Testament are agreed that the followers of Christ gave this appellation to themselves, or whether it was bestowed on them by others. Neither view appears to be wholly true or wholly false. Such titles do not usually originate in any arbitrary way, nor do they spring from a single party, but rather from a sense of historical and social importance. It was, indeed, the interest of the Christians to have some name which might not, like the Jewish ones (Nazarenes or Galileans), imply reproach. And though the terms brethren, the faithful, elect, saints, believers, disciples, or the Church, might suffice among themselves, yet none of them were sufficiently definite for an appellation, and might perhaps be thought to carry a savor of vanity. They would therefore be not disinclined to adopt one, especially for exoteric use. Yet the necessity was not so great as to stimulate them to do this very soon; whereas the people at large, in having to speak of this new sect, would soon need some distinctive appellation; and what so distinctive as one formed from the name of its founder? It is therefore most likely to have been suggested by the Gentile inhabitants of Antioch, and to have early come into general use by a sort of common consent. (See Conybeare and Howson's Life and Epistles of St. Paul, 1, 4.)

There is no reason to think with some that the name "Christians" was given in absolute derision. When used by Agrippa (Acts xxvi, 28), there is no proof that it was a term of reproach; had he intended derision, he might have employed the term Nazarene, which was in frequent use among the Jews, and has continued current in the East, wherever the Arabic language is spoken, to the present day. The early adoption of it by the Christians themselves, and the manner in which they employ it, are sufficient to dispel all idea of this nature (1 Pet. iv, 16). The only reproach connected with the name would be the inevitable one arising from the profession of faith implied in it. Neither is the view of others more probable, that it was a name imposed by divine appointment. The term χριστιανός (translated "called" in the passage first quoted), usually relied upon to sustain this view, has other significations that of an oracular response, and is capable of the meaning assigned to it in our version.

"This world-famous name (William of Tyre, iv, 9) occurs but three times in the New Testament (Acts xx, 26; xxxvi, 28; 1 Pet. iv, 16). In the first of these passages we are informed that it arose in the city of Antioch, during the year spent there in preaching by Paul and Barnabas, A.D. 34. Both Suidas (ii, 2800), ed. Gisford and Malalas (Chronograph, x) say that that was first used in the episcopate of Eudosius at Antioch, who is said to have been appointed by the apostle Peter as his successor (Jerome, Chron. p. 429). That Eudosius is the one invented by Malalas (l. c.) is an assertion which may be true in the sense as the mediaval fiction that it was adopted at a counsel held for the purpose.

"The name itself was only contemptuous in the mouths of those who regarded with contempt him from whom it was derived; and as it was a universal practice in religious and philosophical societies from the name of their founders (as Pythagoreans, Epicureans, Apollonii, Cesarizani, Vitelliani, etc.), it was advantageous rather than otherwise for the Christians to adopt a title which was not necessarily offensive, and which bore witness to their love and honor for the revered master or master of the mystery degrading—such as the witty Antiochines, notorious in the ancient world for their propensity to bestow nicknames, might easily have discovered (Philost. Fila Apol. iii, 16; Zosim. iii, 11; Ammon. Marcell. xxii; Procop. Bell. Pers. ii, 8)—would certainly have retarded the progress of the new religion; and as we see, even in modern times, that the adoption of the title of rival sects to brand each other with disrepute, it is natural to suppose that the name 'Christians' resulted rather from philosophical indifference than from theological hatred. The Latinized form of the word—Greek in form, Latin in termination—is not indeed a conclusive proof that it emanated from the Romans, but such terminations had already been familiarized throughout the East by the Roman dominion; but it is precisely the kind of name which would have been bestowed by the haughty and disdainful spirit of victorious Rome, which is so often marked in early Christian history (John xviii, 31; Acts xxiii, 24; xxv, 19; xviii, 14). That the disciples should have been called from 'Christus,' a word implying the office, and not from 'Jesus,' the name of our blessed Lord, leads us to infer that the former word was most frequently on their lips, which harmonizes with the most important fact, that in the epistles he is usually called, not 'Jesus,' but 'Christ' (Laurent. Dis. Instr. iv, 7); and the peculiar form of the 'exsiaitias superstitio' were better known, because of its ever-widening progress (Tatian. Anm. xlv, 44), this indifferencism was superseded by a hatred against the name as intense as the Christian love for it, and for this reason the emperor Julian 'countenanced, and perhaps recommended, the use of the appellation of Galileans' (Gibbon, v, 312, ed. Milman; Greg. Nazarenes, Orat. iii, 81). Yet, as Tertullian, in an interesting passage, points out, the name so detested was harmless in every sense, for it merely called them by the office of their master, and that office merely implied one set apart by solemn union (Apolog. 5). It appears that by a widely prevalent error, the Christians were generally called Christiani to the ancients (Chron. sv. excerpt. excellat), a mistake which is very easily accounted for (Laurent. Dis. Instr. iv, 7), and one which the Christians were the less inclined to rectify, because it implied their true and ideal character (Clem. Alex. Strom. ii, iv, 18; Tert. Apol. c. 8). See CHRISTIAN.

The explanation of the name Christian, as referring to the 'union from the Holy One,' although supported by the authority of Theophilus Anti-ochenus (A.D. 170), who lived not long after the death of John (ad Autolycum, i, 19), can only be regarded as an adaptation or an after-thought (see J. Taylor, Disc. of Conform. § 3).

"The adoption of the name marks a very important epoch in the history of the Church; the period when it had emerged, even in the Gentile observation, from its Jewish environment, and had enrolled followers who continued Gentiles in every respect, and who differed widely from the Jewish proselytes. It expressed the memorable fact that a community consisting primarily of Jews, and directed exclusively by them, could not be denoted by that name, or by any name among them. To the disciples it signified that they were released from their former condition, and all the limitations which would be brought in due time to acknowledge' (Maurice, Eccl. Hist. p. 70). See Buddeus, De origin. d'gnatiae et usus nominis Christiani (Jen. 1711; also his Marc. Sacr. i, 289 sq.); Wetstenii Nov. Test. in Acts xi; Zeller, Isid. Wörterb. a. v. Christen, etc. (Kitto, a. v.).

To be denominated Christian was, in the estimation of the confessors and martyrs, their highest honor. This is illustrated in the narrative which Eusebius has copied from an ancient record, of one Sanctus of Vienna, who endured all the inhuman tortures which art could inflict. His torturer had to confess how much greater honor and severity of his pains, to extort from him some acknowledgment which might implicate him; but he withstood them with unflinching fortitude, neither dis-
Christians were cruelly persecuted, and Stephen was stoned and became the first martyr. But one of the leading instigators of the persecution, Saul of Tarsus, was soon converted in amost a miracle, and his kindness all were included in this. Of the same import was the department of the martyr Lucian, as related by Chrysostom. To every question he replied, "I am a Christian." "Of what country are you?" "I am a Christian." "What is your occupation?" "I am a Christian." "Who are your parents?" "I am a Christian." —Bingham, Orig. Eccles. bk. i. ch. i.

Christian, first bishop of Prussia, was born at Freienwalde, in Pomerania, in the latter part of the 12th century. He became a monk of the Cistercian order, in which he acquired great eminence for his piety and learning. In 1210 he went as missionary to Prussia, which country had before resisted all attempts at Christianization. He proved successful in his undertaking, and was made bishop of Prussia 1214. In order to give a permanent protection to the Church, he founded, in 1215, the order of the Knights of Christ. He died in 1241.—Neander, Ch. History (Torrrey), iv. 43; M'Lear, Missions in Middle Ages, p. 284.

Christianity, (1) In the objective sense, is the religion of Christians, including doctrines, morals, and institutions. Of Christianity, the Scriptures of the Old Testament are the source, as containing "all things necessary to salvation; so that whatever is not read therein, may not be proved thereby, is not to be required of any man that it should be believed as an article of the faith, or be thought requisite or necessary to salvation" (art. vi.: The Church of England). (2) In the subjective sense, it denotes the Christian faith and life of the individual, in which is manifested the life of Christ, the God-man, imparted through the Holy Spirit. The statement of Christian doctrines, in scientific form, is the object of theology (v. q.). The special doctrines are treated under their proper heads in this dictionary. The proof of the divine origin and authority of Christianity is the province of Apologetics, or the Evidences of Christianity. See Apologetics; Evidences.

The statement of the practical principles of Christianity belongs to Ethics or Morals (v. q.). The institutions of Christianity are treated under the heads Christ, the Church, Baptism, Vows, and Sacraments. The aggressive movements of Christianity in heathen countries are treated under Missions; its present territorial extent under Christendom.

The history of Christianity is the history of the reception of the teachings, ordinances, and institutions of Christ among men, and embraces what is more commonly, but less properly, called the history of the Christian Church. We give a brief survey of the history of Christianity, and divide it for this purpose into five periods.

I. From the Foundation of Christianity until its Establishment as a State Religion in the Fourth Century.—When Christ appeared upon earth, both pagans and Jews had lost their influence: the mass of the people, Presentiments of the proclamation of a purer religion were widely disseminated. Among the Jews, the Messianic hopes which had been awakened by the prophets had gained new strength from the political oppression under which the nation so long suffered. Christ confined his preaching to the Jews, and we read in the Gospels that large crowds of the people were always eager to hear him, though the most influential sects of those times, the Pharisees and Sadducees, opposed him. After the ascension of Christ, the disciples were on the Mount of Olives, by the Holy Ghost on the day of Pentecost, to carry on the dissemination of Christianity. The first congregation was established at Jerusalem, the second at Antioch. In Judea, and especially in Jerusalem, the apostles and other
free Christians to be made slaves. According to an edict of 804, all Christians were to be compelled by tortures to sacrifice to the pagan gods. With the abdication of Diocletian in 305, the era of persecutions ended (see Beunkendorf, *Histoire de ses Hautevonfu- gung**); but the Christians who in any way or other, succumbed in the persecution, were called *Lapiti* (q.v.), of whom there were several classes, as *Liibilatici*, *Satrificati*, *Thirufoci*, and *Tra- ditori*; those who remained steadfast were called Confessores. See CONFESSORS. Christianity was, however, not persecuted by all the Roman emperors, but was tolerated, or was favored by a few, e.g., Caracalla, Alexander Severus, and Philipus. In 806 Constantine established toleration of Christianity in the provinces of Britain, Gaul, and Spain. Conversion to Christianity was expressly permitted by another edict of Constantine in 313, and restoration of the Christian churches ordered. Even an indemnification from the public treasury was promised. Constantine, by a decree of 324, established full religious liberty for the Christian religion in the whole Roman empire, and restored to liberty those who, under Diocletian, had been enslaved. Toward the end of his reign he even issued a Mandatum Rhaetum. He himself was baptized, Eunus, shorty before his death. See CONSTANTINE.

Christianity during the first period of its history was not only exposed to the persecution of the emperors, but also to the literary attacks of many pagan scholars, as Lucian, Celsius, Porphyry, Hierocles, and others, which called forth among the Christians a number of apologetic writers. See Apologia. Dissensions and divisions were very numerous among the Christians from the earliest period of the Church. A strict line of demarcation established itself between the common faith (orthodoxy) and the heretics (hersesy). As early as the apostolic age we find the Gnostic Doctrines, Nicolas, Cerinthians; in the second century the Basilidians, Carcoplaticians, Valentinians, Nazarenes, Ophtes, Patplassians, Artemonites, Montanists, Manicheans, and others; in the third century the Monarchians, Samoanastians, Noetians, Sabellians, Novatians, etc. Most of these controversies concerned the person of Christ; some related to the creation of the world and of the spirits; others to the Lord's Supper; only a few had regard to the discipline of the Church and some other points.

The *diocesan* constitution gradually developed itself, the congregations in villages and smaller places seeking a connection with the bishops of cities or towns. Of a remarkably early date is the first beginning is found during this period, but the churches of Rome, Alexandria, and Antioch were already regarded as the heads of very extensive ecclesiastical districts. Christian ministers assumed a distinguishing name (clericus), and a peculiar dress for divine service, and they were divided into many classes (see Bingham, *Origines Ecclesiae: Planck, Grusch, der christlich-sirh- lichen Gesellschaftsverfassung, Hanov. 1808*). Towards the end of this period, resort began to be had to synods and councils to settle ecclesiastical disputes. See COUNCILS. The form of public worship was gradually fixed in imitation of that of the Jewish synagogue, and consisted of prayer, singing, reading, and interpreting the Scriptures. Baptism was performed in the name of Jesus; the agape (q.v.) and the Lord's Supper (q.v.) were celebrated after divine service. The sources of doctrine were the epistles of the apostles and the record of the life of Jesus (the Gospels). Some of the latter were rapidly advanced; the Gospels were in use in some of the churches, and some importance was also attributed to ecclesiastical tradition. Church discipline was very strict, and all grave offences were punished with exclusion (excommunication). Asceticism and monasticism found their first adherents in this period in Anthony, Paul of Thebes, and others.

II. From the *Death of Constantine the Great to Charle- magne* (A.D. 857 to 800).—The last attempt to suppress Christianity by force, or at least to repress its further advancement, was made by Julian the Apostate (q.v.), but it failed utterly. His successors remained Chris- tians, and the history of the Church belongs to the states. The Church and the state began to exert a powerful and reciprocal influence upon each other. See CHURCH AND STATE. The metropolitan constitution was organized throughout the whole Church, and in connection with it the patriarchal constitution, represented by the patriarchs of Rome, Constantinople, Alexandria, and Antioch. The Church began to claim jurisdiction over the whole Church. Councils and synods became more frequent. In addition to the provincial councils of the first period, ecumenical councils (q.v.) (of which one had been held during the first period, viz. that of Nice, A.D. 325), to which all bishops of the Christian Church were in- vited, were held at Constantinople (381, 553), at Ephes- sus (431, 449), at Chalcedon (451). See COUNCILS. They were occasioned by doctrinal controversies, the number of which greatly increased during this period. The doctrine of the Church on the person of Christ was attacked by the Arians, Apollinarians, Monomachists, Adoptians, Nestorians, Eutychians, Monophysites, Jacobites, Monothelitians, and other sects; that of the Trinity by the Trithesites; that of nature of God by the Sclerulians and the Anthropomorphites. The Church also rejected the views of the Antidike- marians, Bonosians, Jovians, Collyridians, on the Virgin Mary; those of the Enchites and Paschalini- lists (modified Gnostic-Manichaeus doctrines); those of the Meletians and Donatists on the constitution of the Church. Monasticism was rapidly developed after the fourth century; and as the lower secular clergy were generally ignorant, the missionary work and the culture of letters fell into the hands of the monks. The ignorance of clergy and people facilitated the introduction of many innovations and corruptions in the doctrine of the Church, such as the veneration of saints and relics. Pomp and magnificence were introduced into the celebration of divine worship, and the arts began to be used to serve ecclesiastical ends. The Latin language was retained in worship, though it was no longer understood by all the people. The changes in the ancient discipline of the Church (for which in many cases even payments of money were substituted) exerted a most disastrous influence on the Christian life. In the literature of the Church, the *C HIGHBOS* (c. 400) at Corinth, *Theodoret*, Isidor of Pelusium, Isidor of Hispalis (Seville), and Johannes Damascenus, stand forth most conspicuous.

III. From Charlemagne to Gregory VII (A.D. 800 to 1053).—Among the Germanic tribes, the Franks were among the most firmly to Christianity. Charlemagne in his conquests always sought to make Christianity the established religion, and his wars against the Saxons and Slavonians were for the extension of Chris- tianity. The degraded condition of the clergy and the Church in his states induced Charlemagne to attempt various reformationary measures in behalf of the Church. By the establishment of convents and cathedral schools, he sought to promote the education of the clergy. By his order the corrupt translation of the Bible was cor- rected, the congregational singing improved, more prominence given to the sermon in divine worship, and annual visitations of the bishops by the bishops introduced. See CHARLEMAGNE. While Christian theocracy rapidly advanced, the sovereignty of the Church was divided, in consequence of the rivalry of the bishops of Rome and Constantinople, into the Western or Latin, and the Eastern or Greek Church. The two churches excommunicated each other, and a permanent union has never since been effected. The Greek Church, first enrolled by the emperors of Con- stantinople, and afterwards trodden down by the Turks.
CHRISTIANITY

became petrified and stationary. In the Roman Church the
rights of metropolitans and bishops were more and
more curtailed, and those of the pope enlarged, especial-
ly by the papal bulls of DECRETALES.

Spain, England, and the other European
countries gradually surrendered their ecclesiastical in-
dependence, and the pope became all-powerful in the
exercise of jurisdiction as well as in doctrinal decisions.
Bishops and abbots became the possessors of large
property; the pope entered the ranks of secular princes,
and the papacy had obtained a high influence and rule.
Most of the literary insti-
tutions founded by Charlemagne were suspended within
half a century after his death, and the general igno-
rance of the clergy became so great that the bishops
had to order that "every clergyman must know at
least the Apostles' Creed." The theology of this pe-
riod spoke little of Christ, his work and his merits;
the belief in the intercession of the saints, in the effi-
cacy of their relics, and similar points, became prom-
inent in the mind of the Church. The pope re-
served to himself the examination of the genuineness of
the relics of the institutions and canonization of holy
men. In the eleventh century the rosary (q. v.)
came up in England and Holland, and new festivals
were introduced, especially festivals in honor of the
Virgin Mary Pilgrimages (q. v.) commenced in this
period. In ecclesiastical architecture the Romanesque
style was adopted in the tendiferent sects. Among
the doctrinal controversies those on the Lord's Supper
(q. v.) were the most important. Morality was gen-
erally at a low ebb, and there was no vice which was
not prevalent among the clergy and in the monasteries,
and immorality passed over from them to the people.

IV. From Gregory VII to the Reformation (1073-
1517).—The oppression of Christianity by the Turks
called forth the crusades against the Saracens (1096-
1246), in order to deliver the Holy Land. See Cru-
saades. Palestine was conquered and held for a short
time, and several orders of Christian knights were es-
established there for the protection of Christianity; but
towards the close of the 13th century it was recon-
quered by the Saracens, by whom Christianity was
barely tolerated. The oppression suffered by the
Greek church led to an attempt at a new union with
the Roman, which, however, was soon given up as im-
practicable. The power of the popes reached its cli-
mact under Gregory VII and Innocent III, but it soon
began to wane, especially with the partial schism (1075-
1414), during which two papal sees existed—
Rome and Avignon. The popes secured the right of
the investiture of the bishops and abbots, and the ex-
emption of the clergy, and enforced throughout the
Church the celibacy (q. v.) of the clergy. The Bible
was less and less appealed to as the rule of faith; the
fathers and tradition took its place. The pope be-
came the sole legislator and judge in matters of faith.
New doctrines and practices, such as auricular con-
fession, transubstantiation, and indulgences, together with
new festivals (e. g. Corpus Christi), were established.

The Councils of Trent (q. v.), especially the Councils of
the Franciscans and Dominicans, crushed out all op-
position to the ruling Church. Public worship greatly
degenerated. The Mass became its centre; sermons
became rare, and consisted mostly either in unintelli-
gible scholastic lectures, or in comic invectives against
the follies of the times. The increasing corruption
made the people still more liable to more in-
dulgences, undermined the piety of the people.
Attempts to stop the prevailing abuses were frequently
made, both by individuals and by smaller and larger
denominations, among which the Allgienes (q. v.),
Waldenses (q. v.), and Husites (q. v.) were promi-
nant. The governments of France and the

governments proceeded against these sects, and crusades
were preached for their extermination. Most of them
were extirpated; but the Waldenses in Italy, the Mo-
rasian Brethren in Germany, and the Lollards in Eng-
lond, survived to see and to share in the great Refor-
mation of the 16th century. In THEological science,
the Scholasticism among the DECRETES.

V. From the Reformation until the present time.—
The controversies called forth by Wycliffe, Huss, and
other reformers of the Middle Ages, awakened in large
circles the longing for a thorough reformation of the
Church. The councils of Constance (q. v.) and Basle
(q. v.) at first attempted to carry through this refor-
mation, but they only diminished a few of the grossest
abuses, being both unable and unwilling to remedy
them thoroughly. At the same time the Church not
only continued, but certain abuses (e. g. the traffic in
indulgences) became so flagrant that at the beginning
of the 16th century contempt of the Church, her of-
cicers, doctrines, and ordinances, became almost general
throughout Europe. When, therefore, Luther, Zwing-
lie, and others raised the standard of a radical refor-
mation of the Church, they made a stand on the survi-

tion of Christians, especially in Germany, Switzer-
land, Holland, England, Denmark, Sweden, Prussia,
at once rallied around it. See Reformation. Though
the Reformers did not agree on all points of doctrine,
they were unanimous in claiming the Bible as the rule
of faith, desiring reformation everywhere, and as a
result of the Reformation, the most powerful and influen-
tial of all monastic institutions was instituted for this special purpose. These attempts,
which led to the war of the Huguenots in France, and
the Thirty Years' War in Germany, were in vain.

From some countries the Roman Church was entirely
excluded, while in others it had at least to grant to
Protestants equal rights and toleration. The Church
saw itself also compelled to convokе a General Coun-
cil, see Taxis, on which occasion the partial schism (1075-
1414) was ended. Further attempts to suppress the
reformatory movements, and the new order of the Jesuits
(q. v.), the most pow-
erful and influential of all monastic institutions, was
instituted for this special purpose. These attempts,
which led to the war of the Huguenots in France, and
the Thirty Years' War in Germany, were in vain.

CHRISTIANITY

Europe, in which the Roman Church is recognized as a state religion, and the pope, is regulated by Concor-

dates (q.v.).

The Protestants in course of time formed a number of

denominations, among which two main tendencies are to be distinguished, viz. the Lutheran and the Reformed Churches. The latter were subdivided into the German Reformed, Swiss Reformed, Dutch Reformed, Presbyterians, Baptist, Congrega-
tional, and other minor churches. The Church of Eng-

land sprang from the Reformation, belongs to the class of Reformed churches; yet it retains also enough elements from the time before the Reformation to leave room for the continuance of a party which rejects altogether the Protestant char-

acter of the Church, refuses association with other

Protestant denominations, and acknowledges only the

churches which claim the so-called apostolical succes-

sion of bishops as valid. From the Church of Eng-

gland sprang the Methodists (q.v.), who discarded ev-

everything un-Protestant in the mother Church, and

took at once a prominent place among the Reformed

denominations. In the rapidity of their extension they

have surpassed all other bodies of Protestant

Christians.

In a large part of Europe the Protestant churches

have unfortunately allowed to the secular govern-

ment an undue influence over ecclesiastical affairs—an

influence which has generally been used for the entire

subjugation of the Church. Only by hard struggle have

disorders from state religious secured toleration. Many

of them had to cross the Atlantic in order to be

at liberty to worship God according to the dictates of

conscience. The declaration of American independ-

ence was the first heavy blow against state-churchism;

and the independence of the Church, which was now,

for the first time, carried through on a large scale, worked

so well, that all the European churches began to

feel the influence of the new principle, and gradual-

ly to loosen, at least, the connection between Church

and state. The question of a union between various

Protestant bodies has been, from the beginning of the

Reformation, a favorite idea of many distinguished

men, though it has frequently led to an increase of

parties and of controversies, especially as generally

these schemes of ecclesiastical union have been at-

tempted with the aid of the secular arm. The most

important of these attempts was the establishment of

the United Evangelical Church in Germany in 1817,

through the instrumentality of Frederick William

III of Prussia. In modern times the opinion has

gained ground that at large number of evangelical de-

nominations has had a beneficial rather than a disas-

trous influence on the advancement of Christianity, and

that it would be better, instead of aiming at ecclesiastical

uniformity, to form a cordial alliance of evangelical

Christians of all denominations. This led to the for-

mation of the so-called "Evangelical Alliance" (q.v.),

which soon assumed grand dimensions. It has held

some large assemblies, which have been called the

first ecumenical councils of Protestant Christianity.

The development of theology during this period has

centred mostly in Germany. See GERMAN THEO-

LOGY. The struggle, after the Reformation, between

Lutheranism and Calvinism, was soon followed by the

more important contest between Christianity and an

infidel philosophy, represented by the Deists in Eng-

land, the Encyclopaedists in France, and Rationalism

in Germany. The belief in Christianity was for a time

undermined in a large proportion of the European pop-

ulation, but with the beginning of the nineteenth cen-

tury a powerful reaction in favor of Christianity has

set in. The influence of Christianity over the politi-

cal, social, and literary life of mankind is now greater

than at any period in the history of the human race.

But the infidel maelstrom has not been

waning in the nineteenth century. Among them may

be named Young Germany, the Free Congregations

II.—8

and German Catholics, the Young Hegelians, the So-

cialistic Mechanics' Associations in Switzerland and

France, the Materialism in natural science, the Posi-
tivist followers of Comte, the Westminster Review

and its party in England, the Agnostics and Spiritualists

in America. The movements of these parties have led to a new development of powerful agen-

cies in defence of Christianity. In nearly every de-

partment of science and literature the works of former

centuries have been surpassed by modern Christian

writers. The Protestant Churches in different parts of America, in particular, have endeavored to

rival each other in establishing religious periodicals, which already form one of the grandest characteristics of the church history of the nineteenth century. Free

associations for religious and other charitable purposes have rapidly multiplied; missionary societies, Bible, tract, and book societies have displayed a wonderful and unparalleled activity.

Thus the spread of Christianity from the beginning has been like to the growth of the "grain of mustard seed;" to-day its branches overshadow the whole earth; the prospects of Christ's kingdom on earth are bright-

er than at any previous period of its history. Compare Smith's "A History of the Church" (see v. iv. the col-

umn "General Characteristics"). See CHRISTENDOM;

CHURCH HISTORY; THEOLOGY.

Christians (improperly pronounced Christ-lans), a denomination usually styled "the Christian Connection."

1. History.—This body is purely American in its or-

gin, having sprung from three different sources wide-

ely apart from each other—the Methodist, Baptist, and

Presbyterian Churches in different parts of America.

1. When the so-called "O'Kelly secession" from the Methodist Episcopal Church (q.v.) took place in the year 1789, the seceders at first took the name of "Republican Methodists," but afterward assumed the name of "Christians," avowing the N.T. as their only code of doctrine and discipline. (2.) In the year 1800, Dr. Abner Jones, a member of the Baptist Church in Hartford, Vermont, "becoming dissatisfied with the creed of his church, and with all sectarian denominations, and preferring the Bible alone as the confession of his faith," organized a church of twenty-five members in the town of Lyndon, Vt. In a few years he was joined by some from the Clovernook Union, and Free-will Baptist churches, who left their former as-

sociations, and, in some cases, brought their flocks with them. (3.) The third source of the new sect was found in Kentucky and Tennessee. About the year 1801, several ministers withdrew from the jurisdiction of the Presbyterian Church, and "organized themselves into a new and independent presbytery, called the Spring-

field Presbytery. They kept up this organization for about two years, when they formally adopted a new name for themselves and followers—the name of Christians." (See Davidson, Presbyterian Church in Ken-

tucky, chap. viii.)

The three bodies thus separately organized were finally brought into one society, adopting the common name "Christians." They have become quite numerous.

At the Quadrennial General Conference of the de-

nomination held at Marshall, Michigan, on October 2:

1876, and the following days, the following 40 Annual Conferences were represented by delegates:

The Rev. I. C. Goff, of Illinois, was elected President. A letter, expressing harmony of views and fraternal feelings, was read from the Association of General Baptists in England, this being the first communication of that kind since 1829. The General conference replied by a series of resolutions, reciprocating the feelings of the General Baptists, and by appointing a delegate to attend their next annual meeting. It was resolved to establish a Biblical institute in the State of New York, and to increase the number of denominational periodicals for the establishment of a Quarterly and an Annual Register. The original plan of the denomination, namely, "That the name Christian is the only name of distinction which we take, and by which we, as a denomination, desire to be known, and the Bible our only rule of faith and practice," was unanimously reaffirmed.

A convention of members of the denomination in the Southern States ("Southern Christian Convention") was held at Mount Auburn, N. C., on May 2, 1866, at which it was resolved to revive the denominational book concern at Suffolk, Va., which had been destroyed by fire soon after the beginning of the war. See Appendix A, page 560, for 1866. The convention adopted the following resolutions taken from the previous year's report: "Christian Connection; Minutes of the U. S. Quadrilateral Christian Connection (Dayton, 1865)."

II. Doctrines.—Each congregation of "Christians" is independent, and they take the Bible as their binding standard of doctrine. The following principles appear to be generally recognized among them: (1) The Scriptures are inspired, and are of divine authority. (2) Every man has a right to interpret the Bible for himself, and therefore differences of theological views are no bar to Church fellowship. (3) There is one God, but the doctrine of the Trinity is not generally received. (4) Christ is a divine being, pre-existent, and is the mediator between God and man. (5) Christ is the only savior of men, who, by repentance and faith, may be saved. (6) Immanence is the only proper form of baptism, and believers the only proper subjects (rejecting infant baptism). (7) Communion at the Lord's table is open to believers of all denominations.

II. Government and Usages.—Though each congregation is theoretically independent, there are "Annual" or "Triennial" conventions, composed of ministerial and lay delegates from the churches, which receive and ordain pastors, etc., but can pass no laws binding the several churches. They have an American Christian Convention, whose officers from 1866 to 1867 were:

President, D. P. Pike, of Massachusetts; Secretary, N. Summerbell, of Ohio; Secretary of Missionary Department, D. E. Millard, of Michigan; Secretary of Educational Department, J. W. Hare, of Massachusetts; Secretary of the Sabbath-school Department, I. C. Goff, of Illinois; Secretary of the Publishing Department, C. A. Morse, of Ohio. The forms of worship, etc., are in general the same as those in the Baptist churches.

The Constitution of the General Convention, as amended in 1866, is as follows:

ARTICLE I.—This organization shall be styled "The American Christian Convention".

ART II. The President of the Convention shall be elected, and shall hold office for a term of four years, and his successors shall be elected at the same time and for a term of as long as four years. If the President shall die during his term of office, or resign, the Vice-president shall be elected to fill the vacancy for the whole term of four years, and his successors shall be elected at the same time and for the same term.

ART III. The officers of the Convention shall consist of a President, one Vice-president from each state or province connected with the Convention, a Secretary of the Convention, and one Secretary for each department hereinafter provided for; all of the above officers, except the Vice-president, shall be chosen for a term of four years, and their successors shall be elected at the same time.

ART IV. It shall be the duty of the President to preside in all meetings of the Convention and of the Executive Board.

ART V. In case of the President's being unable to act, the Vice-president shall act in his stead.

ART VI. The Secretary shall faithfully keep and record all the proceedings of the Convention and of the Executive Board.

ART VII. The Convention shall consist of the following named departments: 1. Missionary; 2. Educational; 3. the Publishing; 4. the Sabbath-school; 5. the Treasury Department. Each department shall have an appropriate secretary, who shall have the supervision of the subject to which the secretaries of the Executive Board hereinafter named.

ART VIII. The Executive Board shall consist of the President and the three members of the Convention above named, who shall have the power to call a meeting of the Convention whenever they shall think it necessary, either to carry out any measure determined on by the Convention, and any other measure which it may deem necessary and proper; and such Secretary shall, not less than one month prior to a regular meeting of the Convention, make a written or printed report of the doings of his department, accompanied with such statistics as he may deem necessary. At the opening of the Convention, the President shall lay before it, together with a like report and recommendation made by himself to the Convention.

ART IX. The Secretary of the Treasury shall keep and invest funds belonging to the Convention, subject only to be drawn by a vote of the Convention or Executive Board. It is not in either case the order to bear the sanction and signature of the President and Secretary of the Convention. He shall give bonds to the acceptance of the Executive Board.

ART X. Any person shall, on the payment of twenty-five dollars into the treasury, be entitled to a certificate for one hundred and fifty dollars, or, on the like payment of three dollars, to a certificate of such amount. Every Christian benevolent organization, Convention, or Sunday school conference, which shall contribute to the treasury of the Convention shall be entitled to membership, with one vote for every three dollars contributed. Also the following shall be entitled to one vote: C. E. references, state associations or state Conferences, and colleges or institutes, shall be ex-officio members of the Convention.

ART XI. The Missionary Department shall have charge of the missionary enterprises of the denomination, with the power to acquire and hold the title to real estate, appropriate to church purposes, erect churches, and aid in their erection and maintenance, and in general promote the cause of Christ in all parts of the world. The Educational Department shall establish colleges and Biblical and literary institutes, as well as all those structures supported by the denomination, and the young men preparing for the ministry by pecuniary loan or gift. The Publishing Department shall have charge of the publishing interests of the denomination, and shall be the sole channel of issuing of useful books, magazines, papers, tracts, and every form of literature suitable to religious and moral culture. The Sabbath-school Department shall have charge of the work of Sabbath-schools, their establishment support, and successful operation throughout the denomination, endeavoring to secure their welfare, and promote interest, zeal, and efficiency in this department.

ART XII. The see-ions of the Convention, under this Constitution, shall be held by the Executive Board, and at the time and place determined on by them, and at other times when deemed by them necessary and proper.

IV. Statistics.—The denomination published in 1867 in the United States three periodicals, viz., The Christian Sun (discontinued during the war, but revived in 1867), at Suffolk, Va.; The Herald of Gospel Liberty—the first religious newspaper published in this country, first number issued September 1st, 1808—now pub-
CHRISTIANS, BIBLE
listed at Newburyport, Mass.; and The Gospel Herald, at Dayton, O. The statements concerning their statistics greatly vary. Belcher, *The Religious Denominations in the United States* (1864), gives to them 607 organized churches, 469 ministers, and 54,000 communicants. In 1889 they claimed 1906 churches and 1458 ministers, and 147,258 communicants. The denomination has spread in England and the English possessions. Their institutions of learning are Christian Union College, at Mercer, Ind.; Graham College, in North Carolina; and academies at Wolfsborough, N. H., and Starkey, N. Y. The Pitsburg Seminary is a Biblical School and Theological Seminary. It has its location in New York, N. Y. More than sixty Conferences have been organized in the United States and Canada, which meet annually.—Winebrenner, *History of all Denominations; Belcher, History of Relig. Denom. in the U. S., Gorrie, Churches and Sects; Schem. Ecclesiastical Year-book, p. 78; Baid, Religion in America."

Christians, Bible, also called Bryanites, after their founder, William Bryan, a Methodist local preacher in Cornwall, who left the Wesleyan body in 1815. He rapidly gathered churches in Devon and Cornwall, but left the party which he had formed in 1819. The denomination commenced its operations in Canada in the year 1811, and was organized there under a separate Conference in 1834. In 1866 the Church of Christians had 37 circuits and 48 home missions in England and 53 abroad, with 245 itinerant preachers, 1691 local preachers, 25,138 members, 1050 on trial, 39,249 scholars, and 8927 teachers. Their creed is Wesleyan, and so is their government, only more popular. See METHODISM.

Christians of St. John. "In the middle of the 17th century certain Carmelite missionaries discovered a sect residing in the neighborhood of Harsh and Susah, calling themselves Nazoreanos or Mandaeanos, and called by the Mohammedans Sabians (Saba'il, a name taken probably from the Koran), to whom they gave the name of Johannites, or St. John Christians. Compliments of the Sabians to origina, ration, et errorum Christianorum S. Johannis (Rom. 1652, 8vo). One of their books has been published entire (Codex Nazaraeus, liber Adamy appellatus, Syriace transscriptus luteque redditus a Mith. Norberg, 8 vols. London, 1815-1816, 4to), and fragments of others, besides many accounts of the sect. In the Universal Encyclopaedia of Erich and Gruber, Gesenius has given a general view of their system (art. Zabir), which he shows to be Gnostic-aetic, and nearly related to that of Zoroaster, John being represented as an incarnated son. The language of their holy books is an Aramean dialect intermediate between Syriac and Chaldean. They pretend to have come from the Jordan, and to have been driven thence by the Mohammedans. Some writers admit that they are really the descendants of John's disciples, or of John Baptist's. On the other side, see O. G. Tychoberg in Deutschen Museum, 1781-1812, 414; Baumgarten Crisnatis, Bibl. Thed., p. 148. "—Gieseler, CHJ. Hist. Suppl., p. 72; Gieseler, *Commentaria* (N. Y. 1851), i, 60 note; Neander, *Church Hist.* (Torr's), I, 376. See HEMERO-BAPTISTS; MANDAEANS; SABIANs.

Christians of St. Thomas. This name is now applied only to a people residing on the Malabar coast, in the south of India. But in former centuries St. Thomas Christians were mentioned also in other Eastern countries. The apostles found them in Arabia before 558. The accounts of the Portuguese navigators, who first visited the Thomas Christians of India in the fifteenth century, represent them as professing to be descendants of the proselytes of the apostle Thomas, who is believed by some to have carried the Gospel into India. Other accounts represent them as the descendants of a colony of Nestorians. It seems most probable that they were originally an offshoot of the ancient Christian churches in Persia. In the sixth century they were in regular connection with the Nestorian Church of Western Asia. Under the patriarch Timotheus (778 to 820) they received a metropolitan, and thenceforth, also, their bishops were ordained by the Nestorians. After the extinction of the royal line, fall by inheritance to the rulers of Cochin. They greatly suffered from the many contests of the Indian princes among each other, which the Mohammedans skilfully turned to their advantage. The St. Thomas Christians, therefore, offered, in 1592, the crown to Vasco da Gama. Their connection with the Nestorian patriarchs seems to have been early interrupted. Between 1120 and 1230 their ecclesiastical head, John, is said to have gone to Constantinople to ask for the episcopal consecration, and from there to Rome; later the church and the clergy became altogether adrift, and it was only on June 28, 1668 that the Nestorians were received into communion with Rome. Hence, in 1490, two delegates were sent to the Nestorian patriarch to ask for a bishop. The patriarch ordained the two delegates priests, and sent home with them two bishops, Thomas and John. John remained in India, but Thomas soon returned. Patriarch Elias (1492) sent him again to India, with one metropolitan Jelalallah, and two bishops, Jacques and Denha. They reported that they found bishop John still alive, and 80,000 Christian families in twenty towns. Later Portuguese reports estimate the number of families at 16,000. On account of their poverty, and the oppression which they suffered from many sides, they invoked the protection of the Portuguese. The ecclesiastical patriarchate was soon followed by the establishment of Jesuit missions among them. In 1699 the archbishop of Goa prevailed upon them to submit to the pope, and to accept the decrees of the synod held by him at Diiramer. Only a few congregations in the mountains kept aloof from this union. But in 1658 a large number of them broke off the connection with Rome, and established the independence of the Church. In 1889 the number of (non-unioned) Thomas Christians was estimated at 70,000; of those united with Rome, 150,000, of whom 98,000, with 97 churches, still follow their old Syrian rite, while the others have entirely identified themselves with the Latin rite. They pay a tithe to the British government, free from any ecclesiastical restraint, and form among themselves a kind of spiritual republic, under a bishop chosen by themselves, and in which the priests and elders administer justice, using excommunication as a means of punishment. They are said still to acknowledge dependence on the patriarch of Antioch. They call themselves Syrian Christians, or the Syrian Church of Malegano. They still celebrate the agape, and their ideas respecting the Lord's Supper incline to those of the Protestants, but in preparing the bread they are said to use salt and oil. They anoint with oil the body of the infant at baptism. Their priests are distinguished by the tonsure, and are allowed to marry. Their churches contain, except the cross, no symbols or pictures. Syriac is the language employed in their liturgies and other church services, but the Scriptures are expounded in Malayar. See also HERRING, *Theology of the East*; SADLEIR, *Ecclesiastical Year-book for 1860*. See NESTORIANS.

Christie, William B., an eminent Methodist Episcopal minister, was born in Clermont County, O., Sept. 2, 1803, studied at Augusta College, Kentucky, entered the itinerant ministry in 1825, and died in Cincinnati, March 26, 1842. During his term of ministry in the ministry he occupied the most important pulpits of the denomination with great honor and usefulness.
His stations were, 1895, Union; 1896, Piqua; 1897-8, Zanesville; 1899, Cincinnati; 1890, Lebanon District; 1894, Cincinnati; 1895-8, Cincinnati District; 1899-1900, Urbana. He was three times elected a member of the General Conference. His mind was of broad compass, and he was well versed in theology and ecclesiastic politics. In all discussions in the conferences he was not the least of our men, and seldom failed of his aim. In the pulpit he was pre-eminent. His preaching was logical and vigorous, and he poured forth a flood of fervid and passionate eloquence that carried his audiences with him, and brought very many to Christ. His death was triumphant. — Minutes of Conferences, ii, 347; Spees, Annals of Methodism, p. 703.  

The Christmas cycle, which is designated by the date of December 25th, which is celebrated throughout nearly the whole of Christendom as the birthday of our Saviour. "It is occupied, therefore, with the event—the incarnation—which forms the centre and turning-point of the history of the world. It is, of all the festivals, the one most thoroughly interwoven with the popular and family life, and stands at the head of the great feasts in the Western Church year. It continues to be, in the entire Catholic world, and in the greater part of Protestant Christendom, the grand jubilee of children, on which innumerable gifts celebrate the infinite love of God in the giving of his beloved Son. It is the holy fire of love and gratitude, and preaches in the longest night the rising of the Sun of Life and the glory of the Lord. It denotes the advent of the true Golden Age, of the freedom and equality of all the redeemed before God and in God. No one can measure the joy and blessing which from year to year flow forth upon all ages of life from the contemplation of the holy child Jesus in his heavenly innocence and divine humility" (Schaaf, Church History, iii, § 77).  

The observance of Christmas is not of divine appointment, nor is it of N. T. origin. The day of Christ's birth cannot be ascertained from the N. T., or, indeed, from any other source. The fathers of the first three centuries do not speak of any special observance of the nativity. The baptism of Jesus was celebrated in the Eastern Church by A.D. 220, but not in the Western until the fourth century; and the Eastern Church finally adopted the Christmas festival about A.D. 273. The present date (e. g. Cave, Primitive Christianity, pt. i, ch. vii, p. 194) trace the observance to the 2nd century, about the time of the emperor Commodus. Cave adds, to prove that it was observed before the time of Constantine, the following sad story from Baronius (Ann. 301, p. 41): "There is a custom, which has gotten rage, in which the Christians, when then kept his court in Nicomedia, the tyrant, finding multitudes of Christians, young and old, met together to celebrate Christ's nativity, commanded the church door to be shut, and fire put to it, which reduced them and the church to ashes." But it is historically certain that the Christmas festival proper "is of comparatively late institution. This may doubtless be accounted for in the following manner. In the first place, no corresponding festival was presented by the Old Testament, as in the case of Easter and Pentecost. In the second place, the day and month of the birth of Christ are nowhere stated in the Gospel history, and cannot be certainly determined. Again, the Church lingered at first about the death and resurrection of Christ, the completed fact of redemption, and made this the centre of the weekly worship and the Church year. Finally, the earlier feast of Epiphany afforded a substitute. The artistic religious impulses, however, which produced the whole Church cycle or later have called into existence a festival which forms the groundwork of all other annual festivals in honor of Christ" (Schaff, i, c.). To account for the origin of Christmas, therefore, it is not necessary to trace it, as some writers do, to the feast of dedication celebrated by the Jews; or, as others do, to the heathen Saturnalia. Jablonski endeavors to show that it originated with the Bastulidians in Egypt (Quaest. ii, 272). "The institution may be sufficiently explained by the circumstance that it was the taste of the age to multiply festivals, and that the analogy of other events in our Saviour's history, which had already been marked by a distinct celebration, may, naturally have pointed out the place of a similar and seldomen event to the same honorable distinction. It was celebrated with all the marks of respect usually bestowed on high festivals, and distinguished also by the custom, derived probably from heathen antiquity, ofinterchanging presents and making entertainments." At the same time, the heathen winter holidays (Saturnalia, Jovemalia, Brumalia) were undoubtedly so to speak, sanctified by the establishment of the Christmas cycle of holidays; and the heathen customs, so far as they were harmless (e. g. the giving of presents, lightinc tapers, etc.), were brought over into Christian use. The Christmas cycle of festivals gradually grew up around the observance of the day of nativity. It embraced Christmas eve, or Vigils, which were celebrated with especial solemnity, because, though the precise day of Christ's birth could not be ascertained, it is certain that he was born in the night (Luke ii, 8).  

The Four Sundays before Christmas were sacrifice days for the festival, and called Advent-Sundays. See Advent. Memorial days, etc., for the Martyr Stephen (Dec. 26), St. John (Dec. 27), Massacre of the Innocents (Dec. 28), were established in the fourth century. The festival of Circumcision and New Year (Jan. 1) is of later origin, while Epiphany (Jan. 6) is earlier than Christmas. In later ages many observances, some pleasant, others absurd, grew up around the Christmas festival. Accounts of old English Christmas usages may be found in Chambers, Book of Days (Edinb. 1864, 2 vols. 8vo), and in Brand, Popular Antiquities (Lond. 1841, 9 vols. 12mo). Among them are the following. It was customary to light candles of large size, and to lay upon the fire a huge log, called a Yule clog or Christmas block, a custom not yet extinct in some parts of England. Yule (from huil, a wheel) was a sun feast, commemorative of the turn of the sun and the lengthening of the day. The names written into the period of pagan festival in Europe from ancient times. At court, among many public bodies, and in distinguished families, an officer, under various titles, was appointed to preside over the revels. Leland, speaking of the court of Henry VII, A.D. 1485, mentions an "Abbot of Mistletoe," a Christian, who won the personal favor of the king, who made much sport, and did right well his office (Collect. iii, App. 256). In Scotland he was termed the Abbot of Unreason; but the office was suppressed by act of Parliament, A.D. 1555. Stow (Survey of London, p. 79) describes the same officer as Lord of Misrule. The Puritans regarded these diversions, which appear to have offended more against the school of thought against morality, with a holy horror. Prynne says, in his strong way (in Histr. Myst.): "Our Christian lords of misrule, together with dancing, maeske, mummeries, stage-players, and such other Christmas disorders, now in use with Christians, were derived from these Roman Saturnalia and Bacchanalian festivals, which should cause all pious Christians eternally to obominate them." The dishes most in vogue were formerly, for breakfast and supper on Christmas eve, a boar's head stuck with rosemary, with an apple or an orange in the mouth, plum porridge, and minc pie. Eating the latter was a test for the guests, as the Puritans conceived it to be an abomination; they were originally made long, in imitation of the manger in which our Lord was laid (Selden's Table Talk). The houses and churches were dressed with evergreens, and the former especially with mistletoe—a custom probably as old as the Druidical worship. Whether this festi-
CHRISTOLOGY

was always celebrated on December 25th is a subject of dispute. It was not till the sixth century that the whole Christian world concurred in celebrating the nativity on the same day. As to the question of the date of Christ's birth, see NATIVITY.

Christmas day is observed by nearly all churches in the Western Church, especially the British and American churches that have sprung from them. In the Roman Church three masses are performed: one at midnight, one at daybreak, and one in the morning. Sometimes, however, the three masses are said directly one after the other. Both in the Greek and Roman churches, the manger, the holy font, and the representation of the Nativity is shown in the Church of England, and in the Protestant Episcopal Church, divine service is held always on Christmas day. In the former, the Athanasian Creed is required to be said or sung. If Christmas fall on a Friday, it is not to be fast. In the Wesleyan Methodist Church in England the day is always observed, and generally in the Methodist Episcopal Church in the large cities.—Bingham, Orig. Eccles. bk. x., ch. iv.; Coleman, Christian Antiquities, ch. xxii., § 4.; Dorner, Person of Christ, i., 178; Neander, Life of Chrysostom (Lond. 1845, 8vo), p. 340 (gives Chrysostom's Catechesis); Ewbank, The Church and the Churchman (Churchman and the Churchman, Bibliotheca Sacra, xlii., 144); North British Review, vii. 202 (Christian Literature); Siegel, Christlich-kirchliche Alterthümer, ii., 199; Cassel, Weihnachten—Urpriing, Brauche, and Aberglauben (Berl. 1861); Marbach, Die heilliche Weihnachtszeit (Frankfort, 1865).

CHRISTOLOGY, a word of comparatively recent origin in theological science, now used to denote the doctrine of or concerning Christ. Trench (Study of Words) finds it in use in one or two cases among the English divines of the 17th century. Owen gave the title Χριστολογία to his treatise on the Person of Christ (Owen's Works, Russell's ed. 1826, vol. xi). Fleming's Christology (Lond. 1705-6, 3 vols. 8vo), contains (1) a general view of Christology; (2) concerning Christ as the Logos; (3) concerning Christ as he is Logos made man. The word has only been common in English theology within the last twenty years; and both the common use of the term and the special treatment of the subject are due to German theologians within the present half century.

As to the scope of Christology, and its proper place in systematic theology, some writers include under it all that relates to the history, the person, and the work of Christ. Hase (Evangel-protest. Dogmatik) makes Christology the second chief division of Dogmatik; and so it may be described, for the work of Christ as commonly defined, but also Christ in the Church, the sacraments, etc. Coquerel (Christologie, Paris, 1858, 2 vols. 12mo) gives the following definition: "Une Christologie est une étude de la personne ou de la nature de Jésus Christ, de ses rapports avec Dieu et avec l'humanité, ainsi que de son œuvre en ce monde" (p. 1). Christology and Soteriology are closely related to each other. Some writers (e. g. Pelt) include the former under the latter. Kling includes under Christology both the person and the work of Christ; it is impossible, he says, to separate them, because Christ is the Saviour of men in virtue of what he is in his divine human person, in order to the accomplishment of the work (Herzog, Real-Encyklopädie, ii., 683). The latest tendency appears to be to confine the word Christology more strictly to the doctrine of the person of Christ, leaving his work to be treated separately, though in close and vital connection. Thus Hengstenberg, in his History of Doctrines; Schaff, History of Doctrines; Beck, Dogmengeschichte, etc. In this article we confine ourselves to this narrower use of the term. The work of Christ (προσωπον, John iv., 84; xvii., 4, renders in the Latin Church manus, officium] is treated under the heads CHRIST, OFFICES OF; ATONEMENT; IN-

TERSION; JUSTIFICATION; REDEMPTION; SAVIOUR.

The doctrine of the person of Christ is the central doctrine of Christianity. Our view of the whole character and issues of his redemption, and consequently our whole system of thought, both theological and ethical, depends upon the view we take of Christ. The Church has always, with a sure instinct, understood the fundamental importance of this doctrine; but after the settlement of the early disputes by the Council of Chalcedon (see below), the discussion of other topics (e. g. sin, grace, and predestination), especially in the Western Church, became necessary, and Christological disputes took place over the ground. So, at a later period, the discussions concerning the atoning work of Christ, and of the merits of his death, took precedence of that of his person. But all classes of orthodox theologians, in all communions, have held to the fundamental importance of Christology; and with the subsistence of what may be called minor discussions, Christology has of late assumed new prominence. The Puritan theology, no less than the so-called sacramental theology, holds that Christ is the centre of the Christian system. So Flavel: "The knowledge of Christ is the very marrow and kernel of the Gospel, and the centre and centre of all divine revelations; both Testaments meet in Christ. The right knowledge of Christ, like a cleft, leads you through the whole labyrinth of the Scriptures" (Fountain of Life: opened up, Sermon. 1). Liebner, a modern German divine, expresses the same thought in more scientific form (Christologie, Göttingen, 1849): "The question, What do you think of Christ; whose son is he? has become again, in its full force, the cardinal question of theology; theologians become pre-eminently Christologists; the stone which the (theological) builders had rejected has again, in reality, become the corner. And there arises again for us, as with peculiar importance for apologetic purposes, that grand and majestic train of Christological truths, from the centre of which all is seen in true evangelical fulness, and in the proper evangelical order, up to the doctrine concerning the Triune and only true God, and down to every question connected with Christian ethics. And what here comes to light is, to say it in a few words, the system of all systems. The ancient Church has in sanctified and gigantic speculations laid the foundation; the Church of every succeeding period, when alive to her calling, has continued her efforts in the same direction, and its copecution will require the efforts of the Church to the very end of days. For the person and work of Christ, thoughts that are laid down in the facts of revelation, and have been actualized most distinctly in Christ, the only-begotten Son, and which are reproduced by the believer, who by a living faith has received these facts within himself. We shall grow in the knowledge and the understanding of Jesus Christ as the truth, in whom all riches of wisdom and knowledge are hid, and shall learn to understand and show more clearly that only those views of God, of creation, of the world, of men, of sin and grace, that have their root in the Christological truths, are tenable and victorious; in short, that Christianity embodies all true philosophy as well as all spiritual life." So, with a vision of the great issues of the age, especially in Germany, Dorner remarks: "It is gratifying to see how, in the long conflict between Christianity and reason, the point, on the handling of which the decision of the controversy turns, has become ever more and more distinct to the Christian consciousness, and all questions connected with it. In this conflict are gathered ever more and more around the person of Christ, as the central point at which the matter must be determined. The advantage of this is obvious as respects the settlement of this great strife; as in other things, so here, with the right statement of the question, the answer is already half found-
It is easy also to see that, in point of fact, all lies in the question whether such a Christ as dwells, if not always in the words, yet ever in the mind of the Church, in the hearts of all believers. The union of the divine and human appeared historically—be necessary and actual. For let us suppose that philosophy could incontrovertibly establish and carry to the conviction of all thoughtful men that the person of a Christ in the sense above set forth is a self-contradiction, in the sense of impossibly infinite such a person would be, and no longer any conflict between Christian theology and philosophy, because with the person of Christ would be abolished the Christian theology, as well as the Christian Church altogether. And, conversely, were it brought under the recognition of philosophy that the idea of an historical as well as a personal person of Christ is necessary, and were a speculative construction of the person of Christ once reached, it is clear that philosophy and theology, essentially and intrinsically reconciled, would henceforward have a common work, or, rather, properly speaking, would have become one, and philosophy would consequently not have relinquished its duties, but would undertake them all. Caes is it to be taken, however, not to run into the Romanist error of substituting the incarnation for the death of Christ, and of putting aside the work of the Holy Spirit, which is the special life of the present dispensation of grace. The "sacramental" system tends to this by its theory that the idea of the body of the Church is in itself, instead of in his Holy Spirit. See Holy Spirit.

The Christology of the Old Testament will be treated under the article MESSIAH. See also the article CHRIST. We here discuss, briefly, 1. The Christology of the N. T.; 2. The Christology of the Church; III. The principal Christological heresies.

1. CHRISTOLOGY OF THE NEW TESTAMENT. — The older divines generally adduce the passages of the N. T. which treat of the person of Christ under the heads of (1) the Divinity of Christ; (2) the Humanity of Christ. The first class of passages adduced generally includes those which assert the pre-existence of Christ; then follow passages which ascribe divine functions and attributes to Christ; and, thirdly, those which give him divine titles (comp. Watson, Thol. Institutes, I. ch. xxv—xxxi; Hill, Divinity, book ii). The recent discussions as to the origin of the Gospels, and as to the so-called development of doctrine in the N. T., have much affected the theory of Christ under these heads. The N. T. under the following heads: (1) Christ's own testimony as to his person, with the doctrine taught by his acts, as recorded in the Gospels, (a) the Synoptists; (b) John; (2) The Christology of the apostles. Pye Smith (Scripture Testimony to the Messiah, books iii, iv) makes the two heads following: 1. The Person of Christ, as taught in the Gospels and in our Lord's assertions and intimations; 2. The Person of Christ, as taught by the Apostles. 1. The Synoptical Gospels, with the Testimony of Christ as to His Person (see Dorner, Person of Christ, vol. i, p. 52 sqq.; and Schaff, Person of Christ the Miracle of History, book iv, chapters 1 to 3, in which this subject is more fully treated). — (1) Christ calls himself ζηύς Θεος, Son of God, and this in the highest sense, as implying the divinity of his own person (Matt. xxvi, 63; xvi, 16, 17). "He is not merely a son of God (as David, the kings of Israel, or the prophets were so styled); not merely one of the sons of God, but The Son, the only, the well-beloved (Matt. iii, 17; xvii, 5; xxii, 42—45). David's son is David's Lord. The phrase "Son of God" has three meanings in the synoptical Gospels: (1) What may be called the physical meaning (Matt. i, 23; Luke i, 35), because he has this name by nature, and on account of the mode of his birth. Of John it is said, "The true light [i.e., "the light of the world"] has come into the world, and the light of the world" (John i, 9). (2) The Messianic meaning (Matt. i, 20), which ascribes to him such a Messianic office that he is the "anointed one" (John x, 37). (3) The divine Sonship, we have (2) the second meaning of the phrase "Son of God," viz. the ethical sonship (Luke ii, 49, 52; iv, 8, 9). That he also, in this sense, perfectly represented the Sonship of God was, for the time preceding this public manifestation, attested by the utterance at his baptism (Matt. iii, 17). Without the physical sonship as a presupposition, the ethical would be impossible, whereby he is the Holy One of God, the sinless man, come to bring, personally in himself, the divine law into actual manifestation (Matt. v, 17); but even on that account, in a perfectly human way, in a progressive manifestation, advancing through conflict (Matt. vi, 17; v, 33, 40; vii, 28; ix, 39, 49, 50). So (3) without both the physical and the ethical, the official sonship would be impossible; which, conversely, is as naturally and necessarily the end of both the others as the ethical is of the physical. This third meaning of the phrase is, indeed, that commonly ascribed to the "Messiah," and in the Church, instead of in his Holy Spirit. See Holy Spirit.

CHRISTOLOGY

The Christology of the Old Testament will be treated under the article MESSIAH. See also the article CHRIST. We here discuss, briefly, 1. The Christology of the N. T.; 2. The Christology of the Church; III. The principal Christological heresies.

1. CHRISTOLOGY OF THE NEW TESTAMENT. — The older divines generally adduce the passages of the N. T. which treat of the person of Christ under the heads of (1) the Divinity of Christ; (2) the Humanity of Christ. The first class of passages adduced generally includes those which assert the pre-existence of Christ; then follow passages which ascribe divine functions and attributes to Christ; and, thirdly, those which give him divine titles (comp. Watson, Thol. Institutes, I. ch. xxv—xxxi; Hill, Divinity, book ii). The recent discussions as to the origin of the Gospels, and as to the so-called development of doctrine in the N. T., have much affected the theory of Christ under these heads. The N. T. under the following heads: (1) Christ's own testimony as to his person, with the doctrine taught by his acts, as recorded in the Gospels, (a) the Synoptists; (b) John; (2) The Christology of the apostles. Pye Smith (Scripture Testimony to the Messiah, books iii, iv) makes the two heads following: 1. The Person of Christ, as taught in the Gospels and in our Lord's assertions and intimations; 2. The Person of Christ, as taught by the Apostles. 1. The Synoptical Gospels, with the Testimony of Christ as to His Person (see Dorner, Person of Christ, vol. i, p. 52 sqq.; and Schaff, Person of Christ the Miracle of History, book iv, chapters 1 to 3, in which this subject is more fully treated). — (1) Christ calls himself ζηύς Θεος, Son of God, and this in the highest sense, as implying the divinity of his own person (Matt. xxvi, 63; xvi, 16, 17). "He is not merely a son of God (as David, the kings of Israel, or the prophets were so styled); not merely one of the sons of God, but The Son, the only, the well-beloved (Matt. iii, 17; xvii, 5; xxii, 42—45). David's son is David's Lord. The phrase "Son of God" has three meanings in the synoptical Gospels: (1) What may be called the physical meaning (Matt. i, 23; Luke i, 35), because he has this name by nature, and on account of the mode of his birth. Of John it is said, "The true light [i.e., "the light of the world"] has come into the world, and the light of the world" (John i, 9). (2) The Messianic meaning (Matt. i, 20), which ascribes to him such a Messianic office that he is the "anointed one" (John x, 37). (3) The divine Sonship, we have (2) the second meaning of the phrase "Son of God," viz. the ethical sonship (Luke ii, 49, 52; iv, 8, 9). That he also, in this sense, perfectly represented the Sonship of God was, for the time preceding this public manifestation, attested by the utterance at his baptism (Matt. iii, 17). Without the physical sonship as a presupposition, the ethical would be impossible, whereby he is the Holy One of God, the sinless man, come to bring, personally in himself, the divine law into actual manifestation (Matt. v, 17); but even on that account, in a perfectly human way, in a progressive manifestation, advancing through conflict (Matt. vi, 17; v, 33, 40; vii, 28; ix, 39, 49, 50). So (3) without both the physical and the ethical, the official sonship would be impossible; which, conversely, is as naturally and necessarily the end of both the others as the ethical is of the physical. This third meaning of the phrase is, indeed, that commonly ascribed to the "Messiah," and in the Church, instead of in his Holy Spirit. See Holy Spirit.
fation to God. This interpretation is suggested grammatically by the use of the definite article, and historically by the origin of the term in Dan. vii, 13, where it signifies the Messiah, as the head of a universal and eternal kingdom. It commends itself, moreover, at once to faith and common sense. In such passages as, 'The Son of Man hath power to forgive sins' (Matt. ix, 6; Mark ii, 10); 'The Son of Man is Lord even of the Sabbath day' (Matt. xii, 8; Mark ii, 28); 'The Son of Man shall come in the glory of His Father' (Matt. xii, 38); 'The Son of Man is come to save' (Matt. xviii, 11; comp. Luke ix, 16), the terms are chosen for the compound view receive, in our interpretation, a greater force and beauty from the sublime contrast which places the voluntary condescension and humility of Christ in the most striking light, as when he says, 'Foxes have holes, and birds of the air have nests; but the Son of Man hath not where to lay his head' (Luke iii, 28); or, 'Whosoever will be chief among you, let him be your servant; even as the Son of Man came not to be ministered unto, but to minister, and to give his life a ransom for many' (Matt. xx, 27, 28). Thus the manhood of Christ, rising far above all ordinary manhood, though freely coming down to us on the 15th March, to the elevation and redemption, is already the portal of his Godhead."

(Schaff, Person of Christ, 113 sq.). Christ also, in many passages, calls himself simply 'The Son,' who stands to the Father in relations so peculiar that he never calls God 'Our Father,' as he directs his followers to do. It is in the image of the Son, whom he received witness at the Transfiguration as the only and well-beloved Son. Among the acts ascribed to Christ in the synoptical Gospels (leaving out his miracles), one of the most significant is the forgiveness of sins, which he claims as his attribute as the "Son of Man" (Matt. ix, 2, 6; Luke, v, 20, 24); and which the Pharisees considered a prerogative of God alone. If Christ had been simply man. In instituting the rite of baptism, he puts his own title, "Son," along with that of the Father and of the Holy Ghost. Further, he ascribes to himself a power infinitely beyond the human, and in this respect puts himself on an equality with God (Luke x, 22; Matt. xxviii, 18) (Dorner, i. e.).

See Son of Man.

2. John's Gospel.—Here it is not necessary to dilate as with regard to the Synoptical Gospels, inasmuch as in St. John the Christological doctrine takes a more definite, if not more scientific form, and its teaching is not, at least, at any rate, as a mere concept. John's Gospel teaches the pre-existence of Christ. "It ascribes to the Son not merely a moral, but an essential divinity; not merely economical, but an ontological or metaphysical relation to the Father. It also teaches the true manhood of Christ, and its perfect historical relation; and, finally, that the Son, with the Father and the Holy Ghost, complete the end of creation in the reconciliation of man with God (John i, 1, 2, 14, 16 [comp. xvii, 2]; i, 32, 34, 51; iv, 6; v, 26, 27; vi, 53; viii, 16; x, 15, 33; xii, 24; xiv, 23; xix, 26, 30; xx, 17)." (Dorner, i. e.; Bloomfield, Five Lectures on the Gospel of St. John [1863, 2nd ed.]; Sadler, Emmanuel, ch. i, 1867, i. 2.)

3. The Apostles.—(1) St. Paul gives his testimony both to the divinity and the humanity of Christ, his sonship and his Messianic work, as fully as St. John, especially setting forth the purely Christian idea of the Messiah (Rom. i, 3; v, 6, 10; vi, 3, 10; iv, 5; xvii, 20; 1 Pet. ii, 20; Gal. ii, 21; Acts xxii, 8, 9); i Cor. xiv, 47 [1 Cor. iii, 13 18 2 Cor. iii, 21]; Gal. iv, 4, 5; Eph. i, 9-20; Phil. ii, 6-10; Col. i, 15-17, etc.; comp. Heb. i, 6, 10-12). The testimony of Paul is well stated by Sadler, Emmanuel, ch. i, § 2. See also Dorner, i, 51.

(2) The Epistle of James has been called an Ebionite Gospel, as its Christology were of a lower type. But James evidently presupposes the faith, as the groundwork of the ethical teaching which is the main object of his epistle. He calls Christ "our Lord Jesus Christ, the Lord of Glory" (i, 1), in which passage the royal function of Christ is expressly set forth, as also in his second coming to judgment (v, 7-9; comp. iv, 12, 16).

(8) "The Teaching of the Acts in such passages as, 'The Son of Man hath power to forgive sins' (Matt. ix, 6; Mark ii, 10); 'The Son of Man is Lord even of the Sabbath day' (Matt. xii, 8; Mark ii, 28); 'The Son of Man shall come in the glory of His Father;' (Matt. xii, 38); 'The Son of Man is come to save' (Matt. xviii, 11; comp. Luke ix, 16), the terms are chosen for the compound view receive, in our interpretation, a greater force and beauty from the sublime contrast which places the voluntary condescension and humility of Christ in the most striking light, as when he says, 'Foxes have holes, and birds of the air have nests, but the Son of Man hath not where to lay his head' (Luke ix, 28); or, 'Whosoever will be chief among you, let him be your servant; even as the Son of Man came not to be ministered unto, but to minister, and to give his life a ransom for many' (Matt. xx, 27, 28). Thus the manhood of Christ, rising far above all ordinary manhood, though freely coming down to us on the 15th March, to the elevation and redemption, is already the portal of his Godhead."

(Schaff, Person of Christ, 113 sq.). Christ also, in many passages, calls himself simply 'The Son,' who stands to the Father in relations so peculiar that he never calls God 'Our Father,' as he directs his followers to do. It is in the image of the Son, whom he received witness at the Transfiguration as the only and well-beloved Son. Among the acts ascribed to Christ in the synoptical Gospels (leaving out his miracles), one of the most significant is the forgiveness of sins, which he claims as his attribute as the "Son of Man" (Matt. ix, 2, 6; Luke, v, 20, 24); and which the Pharisees considered a prerogative of God alone. If Christ had been simply man. In instituting the rite of baptism, he puts his own title, "Son," along with that of the Father and of the Holy Ghost. Further, he ascribes to himself a power infinitely beyond the human, and in this respect puts himself on an equality with God (Luke x, 22; Matt. xxviii, 18) (Dorner, i. e.). Thus the epistle is as far from Docetism as from Ebionism.

Jude places Christ along with the Father in the formula of salutation (ver. 2) and in the doxology (ver. 24, 25); the being kept in the true and most holy faith (ver. 20) is a being preserved in Christ Jesus (ver. 1, 5) and in the Holy Ghost (ver. 20). The persons whom Jude opposes are not merely such as have practically swerved from the right way (ver. 16); they are also to be regarded as a denial of the only God and our Lord Jesus Christ (ver. 4).

The Second Epistle of Peter has more definitely to do with heretics, especially the "heretics" who "deny the Lord that bought them" (II, 1). To Christ belong μεγαλεργής (i, 16), δόξα και αἰρέτη (i, 17); he is the beloved Son of God, in whom he is well pleased (i, 17); he is our ἡφαίστεια (i, 1, 11, etc.), our Lord (i, 2, 8, etc.), who hath an everlasting kingdom (i, 2), and whose exaltation is not taught in cunningly devised myths, but is attested by the prophets and eye-witnesses (i, 16, 18; iii, 3) (Dorner, i, 72).

On the Christology of the N. T., see, besides the works already cited, Ges, Lehre von der Person Christi (Basil, 1866, 8vo); Sadler, Emmanuel (Lond. 1867, 8vo, especially ch. 1); Schaff, Apostolic Church, § 148; Goodwin, Christ the Mediator (Plymouth, 1819, 8vo); Hooker, Eccles. Polity, bks. v, 51; Waterland's Works (12 vols., 4th ed.), Vol. IV; Pye Smith, First Lines of Theology, bks. ii, 7, iii, 14; Trench, Life of Christ; Duchesne, For the Deity of Christ (Lond. 1880, 8vo), and the writers generally on the Trinity, on the Divinity of Christ, and the Life of Christ. Prof. Beyechlag, of Halle, in his Christologie des N. T. (Berlin, 1866, 8vo), attempts to show that the N. T. represents Christ as divine, but not as pre-existent, or equal with the Father.

II. CHRISTOLOGY OF THE CHURCH. The doc-
trine of the person and work of Christ formed the main topic of theological speculation and controversy in the early Church, and is again the most prominent religious theme in modern times. The peculiarity of his Person consists in the perfect union of the divine and human which constitutes him the Mediator between God and man, and the Saviour of the fallen race. This has always been the faith of the Christian Church, but in every age it has had to encounter a new enemy, or the old enemy in ever-varying phases, and to achieve new triumphs, to maintain the vindication of truth. The orthodox Christology is derived from the New Testament, especially from St. Paul and St. John (see above), and has gradually been unfolded in sharp conflict with a large number of Christological heresies, each serving to elicit a clearer view of some particular aspect either of the divinity of the humanity of Christ, or of the union of the two natures. "The person of Jesus Christ in the fullness of its theanthropic life cannot be exhaustively set forth by any formulas of human logic. Even the imperfect, finite personality of man has a mysterious background that escapes the speculative comprehension; much more, then, the perfect personality of Christ, in which the tremendous antithesis of Creator and creature, infinite and finite, immutable, eternal Being and changing temporal becoming, are harmoniously conjoined! The formulas of orthodox can neither beget the faith nor nourish it; they are not the bread and the water of life, but a standard of investigation and a rule of public teaching" (Schaaf).

The Orthodox Christology is essentially the same in the Greek, Latin, and evangelical Protestant churches. It forms (like the doctrine of the Trinity, so closely connected with it) one of the fundamental bonds of unity in the great divisions of Christendom. Yet there have been some new features brought out since the Reformation. We subdivide it into ecumenical, scholastic, and evangelical.

1. The Ecumenical or Catholic Christology was prepared in the ante-Nicene age (see Bull's De fide et Nicae). It is fully matured in the Nicene and Post-Nicene age. The doctrine of the person of Christ, in inseparable connection with the doctrine of the Holy Trinity, was the chief problem of theological speculation from the third to the middle of the fifth century, and was settled by the four great ecumenical councils of Nicea (325), Constantinople (381), Ephesus (431), and Chalcedon (451). The Nicene and Post-Nicene Fathers were mainly concerned with the assertion of the strict divinity of Christ against its partial denial by Arius and Semi-Arianism. The last two set forth the relation of the divine and the human nature of the one person against the opposite extremes of Nestorianism and Eutychianism. The decree of the Council of Ephesus was more negative, a condemnation of Nestorius. But the Council of Chalcedon gave a clear and full statement of the positive doctrine of Christ's person, and summed up the final result of those deep, earnest, and violent Trinitarian and Christological controversies which had agitated the Church so long.

This problem of modern symbol of the Chalcedonian or fourth ecumenical Synod of 461 ranks next in authority to the Apostles' and Nicene Creeds, and has not been superseded to this day. "It does not aspire to comprehend the Christological mystery, but contents itself with setting forth the facts and establishing the orthodox doctrine. It does not mean to preclude further theological discussion, but to guard against such erroneous conceptions as would mutilate either the divine or the human in Christ, or would place the two in a false relation. It is a lighthouse to point out to the ship of Christological speculation the harbor between Scylla and Charybdis, and to save it from stranding upon the coasts of Nestorianism, Dyophysitism, or of Eutychian Monophysitism. As the Nicene doctrine of the Trinity stands midway between Trinitism and Sabellianism, so the Chalcedonian formula strikes the true mean between Nestorianism and Eutychianism. But it contains itself with setting forth, in clear outlines, the final result of the theanthropic problem. The study of the process itself to scientific theology" (Schaaf).

The Chalcedonian symbol is as follows:

"Following the holy fathers, we unanimously teach one and the same Son, our Lord Jesus Christ, complete as to his Godhead and complete as to his manhood, one and the same Son, of a reasonable soul and human flesh substantiating: concurring in the substance with the Father as to his Godhead, and con-substantial also as to his manhood; begotten of the Father before all ages, but as to his manhood in these last days, born, for us and for our salvation; God, the Father, the Sender, the Virgin Mary, the mother of God; and the one and same Christ, Son, Lord, Only Begotten, known of (of) two natures: de icio, in duas naturas, or, with the present Greek text, de icio, in duas naturae, which signifies essentially the same thing, without confusion (ἀμαρτωλότης), without conversion (ἀπρόσωπος), without severance (ἀκολούθος), and without division (ἀπαριθμητός); the distinction of the natures being in no way abolished by union, but the peculiarity of each nature being maintained, and both concurring in one person and hypostasis. We confess not a Son divided and separated into two persons, but one and the same Son, of a reasonable soul and human flesh substantiating: equal to the Father as touching his Godhead; in substance of the Father begotten of the Father before all ages; and as to his manhood in these last days, born, for us and for our salvation; and God, the Father, the Sender, the Virgin Mary, the mother of God; and the one and same Christ, Son, Lord, Only Begotten, known of (of) two natures: de icio, in duas naturas, or, with the present Greek text, de icio, in duas naturae, which signifies essentially the same thing, without confusion (ἀμαρτωλότης)...."  

The same doctrine is set forth in a more condensed form in the second part of the so-called Athanasian Creed, which originated probably in the school of Apollinaris during the fifth century, and is the third of the ecumenical symbols:

"Furthermore, it is necessary to everlasting salvation that we believe also rightly in the incarnation of our Lord Jesus Christ. Now the faith which is, that we confess and believe that our Lord Jesus Christ, the Son of God, is God and man; God, of the substance of the Father, begotten before the world; and man, of the substance of his mother, born in the world. I perfect God; perfect man, of a reasonable soul and human flesh substantiating. Equal to the Father as touching his Godhead; in substance of the Father begotten of the Father before all ages. And although he is God and man, yet he is not two, but one Christ. One, not by conversion of the Godhead into flesh, but by assumption of the manhood into God. One altogether, not by confusion of substance, but by unity of person. For as the reasonable soul and flesh is one man, so God and man is one Christ, who is the Lord our God and Lord Jesus Christ." (For an analysis and criticism of this ecumenical or Catholic Christology, see Shed's History of Christian Doctrine, i, 899 sq.; Schaaf's Church History, iii, 747-762, and the respective sections of the works of Baur, Dorner, and others quoted below.)

2. The Scholastic Christology of the Middle Ages is represented mainly by Anselm (the author of Deus homo, with his epoch-making theory of the atonement; see ANSELM), Peter the Lombard, and Thomas Aquinas. It confined itself, as regards the person of Christ, to a dialectical analysis and defense of the old Catholic dogmas, with some unsatisfactory speculations on minor points, especially on the abstract question whether Christ would have become incarnate if the Fall had not taken place. Thomas Aquinas decided for the former, as the safer formula (si homo non pess. Deus incarnatus non fuisse); Burepf de Deuts, Duns Scotus, and Alexander Hales for the other view. This question has not been fully attacked hitherto, and especially discussed by J. Muller against, Do ner and Liebner for, the doctrine of Incarnation without a Fall. See Brit. and For. Evangel. Review, Jan. 1861, art. iv.

3. The Protestant or Evangelical Christology. The churches of the Reformation, both Lutheran and Reformed, hold a modified Christology. It does not mean to reject the three great symbols of faith, either in form or in substance, the three ecumenical Creeds (the Apostles', the Nicene, and the Athanasian), and with them the ancient Catholic doctrine of the Trinity and Christ's divine-human character and work, which doctrine is, in fact, the sum and substance of those symbols. We quote from the principal Protestant theologians:

The Augsburg Confession of the Lutheran Church, Art. III. De Filo Dei:
CHRISTOLOGY

"Item docent, quod Verbum, hoc est, Filius Dei, assumptus
serat humanae naturae in utroque Merce Mariae virginis,
inseparabiliter coniunctus, unum Christum, vere Deus, et vere
 homo, natus ex Virgo Maria, et per sana, crucifixus, mor-
tus et resurrexit, unum est hominum capax. Nam tan
tum pro culpa originis, sed etiam pro omnis actus
nibus humanis potestas.

The Thirty-nine Articles of the Church of England
Art. II. Of the Word or Son of God, which was made
very man

"The Son, which is the Word of the Father, begotten
from everlasting of the Father, without beginning or end;
conceived in the bosom of the Father, took man's nature
in the womb of the Virgin, of her substance: that so
this, which is the Word of the Father, become man;
and was incarnate by the Holy Ghost in the womb of
the Virgin Mary, of her substance: so that two
wholes, perfect and distinct natures, the Godhead
and manhood, were joined together in one Person,
never to be divided, whereof is one Christ, very God
and very man; who was, &c., ascended, &c., reconciled
His Father to us, and to be a sacrifice not only for
original guilt, but also for actual sins of men.

The Westminster Confession, which gives the
clairest and strongest expression to the faith of the strictly
Reformed or Calvinistic churches, thus states the
doctrine of Christ's person in ch. vili, § 2:

"The Son of God, the second person in the Trinity,
being very and eternal God, of one substance and equal with
the Father, in all things, and sending time was come, took upon
him man's nature, with all the essential properties and
communications without sin, but was conceived by
the Holy Ghost in the womb of the Virgin Mary, of her
substance: so that two whole, perfect, and distinct
natures, the Godhead and manhood, were joined together
in one person, without conversion, composition, or confusion.
Which person is very God and very man, yet one Christ,
the only begotten of the Father.

The 2d Article of the Methodist Episcopal Church
is the same as that of the Church of England, except
that the words "begotten from everlasting of the
Father," and "of her substance," are omitted (probably
by typographical error).

On this general basis of the Chalcedonian Christology,
and following the indications of the Scriptures as
the only rule of faith, the Lutheran and Reformed
churches have built some additional views or
developed new aspects of Christ's person. Protestantism
cannot consistently adopt any doctrinal or disciplinary
decisions of the Church as strictly infallible and as an
absolute finale, but simply with the reservation of
the right of further research, and with the understanding
of a constant progress in theo x—not, indeed, of
a progress beyond Christ and the Bible, but in the ever-
deepening apprehension and subjective appropriation
of Christ and his infallible word. There is a charac-
teristic chrestological characteristic of the Church of
Lutheran and that of the Reformed Confessions which
affects the whole system. Upon the whole, we may
say that the former has a leaning towards the Eutychi-
itan confusion of the divine and human nature, the
latter to the Nestorian separation; yet both distinctly
disseminate the Eutychian and Nestorian heresies. (On
the difference between the Lutheran and Reformed
Christology, compare especially the very able and
acute treatise of Schneckenburger, Die orthodoxe Lehr
vom doppelt Stande Christi nach lutherischer und reformierer
Prassing [Pforzheim, 2d ed. 1861]; also his Verzeichnisse
D. lutherischen u. reformierten Lehre, edited by Guder [Stuttgart, 1865].) The
progress made in Christology since the Reformation
within the limits of the Chalcedonian orthodoxy, or,
at all events, not in conflict with it, relates to the com-
munion of the two natures, and to the states and the
offices of Christ.

The doctrine of the communicatio idiomatum, the
communication of attributes or properties of one
nature to the other or to the whole person. The begin-
ing of it may be found in Cyril of Alexandria and
John of Damascus; but it has been much more fully
developed by the Lutheran Church in the interest of
her peculiar tenet of the ubiquity of Christ's body, in
order to prove that there were no substantial
substantiation so called. It was embodied in the Formul-
ae Concordiae, but has never been adopted in the Re-
formed or Calvinistic churches. The Lutheran divines
distinguish three kinds of the communicatio idiomatum, which
is derived from the communio naturarum: (1) ge-
num idiomatum (of ioni in ioni), whereby the prop-
erties of one nature are communicated to the
whole person (Rom. i, 8; 1 Pet. iii, 18; iv, 1); (2) ge-
num apoteleseumaticum (oneon apoteleseous), whereby the
apote-
tes uerget, i.e., the redemptive functions and actions
which belong to the whole person are predicated only
of one or the other nature (1 Tim. ii, 5 sq.; Heb. i, 2 sq.); (3) ge-
nom apotesiatomicum (oneon apotesiatoes), whereby the human
nature is clothed and magnified by the attributes of the divine
nature (John iii, 18; 13, v. 27; Matt. xxix, 18, 20; Rom. ix, 5; Phil.
ii, 10). Under this head the Lutheran Church claims
a certain ubiquity or omnipresence for the body of
Christ, on the ground of its personal union with the
divine nature; yet she makes this ubiquity dependent
on the will of Christ, who can be present with his
whole person wherever he pleases to be or has
promised to be. For this very reason the Reformed
divines reject the whole doctrine of the communicatio
idiomatum, and pronounce the propositiones idiomatae
incommunicatae, as proceeding from idolatrous
propositional exchange of one part for another. See COMMUNICA-
TION IDIOMATICUM.

The doctrine of a twofold state of Christ—the state of
humiliation and the state of exaltation. This is
based upon Phil. ii, 6-8, and is no doubt substan-
tially true. The verb from ( χρωματιζε χωριωματιζε 
embraces the supernatural conception, birth, circum-
cision, education, earthly life, passion, death, and
burial of Christ; the status exaltationis includes the
resurrection, ascension, and the sitting at the right hand
of God. As to the descent into hell, or Hades rather,
the Lutheran and the Reformed churches differ accord-
ing to their different conceptions of this difficult
article in the Apostles' Creed. The Lutheran Confessions,
regarding it as a triumph over hell, make the descensus
ad inferos the first stage of the status exaltationis, while
the Reformed Confessions view it as the last stage
of the status exaltationis. It is properly the turning-
point from the one state to the other, and thus belongs
to both. The Lutheran Creed, moreover, refers the
two states only to the human nature of Christ, regard-
ing the divine as not susceptible of any humiliation
or exaltation. The Reformed symbols refer them to
both natures, so that Christ's human nature was in a
state of humiliation as compared with its future
exaltation, and his divine nature was in the state of
humiliation as to its external manifestation (racione occultu-
tionis). With them the incarnation itself is the begin-
ing of the state of humiliation, while the Lutheran
symbols exclude the incarnation from the humiliation.
Between the Lutheran divines of Tübingen and Giese-
en there was a controversy in the 17th century about
the question whether Christ in the state of humilia-
tion entirely abstained from the use of his divine
attributes (eirf hrc), or whether he used them secretly
(eirf hrc). The divines of Gissend declared the former,
those of Tübingen the latter view. Both schools were
agreed as to the ascension (eirf hrc), as to the use
(eirf hrc), of the divine attributes. This
controversy has been renewed, in a modified form,
among recent German divines. See KENOSIS.

The threefold office of Christ. (1) The proph-
etical office (manning, or officium propheticum) includes
preaching and the miracles of Christ. (2) The priestly
office (manning, or officium sacrificiale) consists in
the holy sacrifices made for the sins of the world by the
death of the cross, and in the continued intercession of the exalted
Saviour for his people (redemptio et intercessio sacer-
dotalis). (3) The kingly office (manning, or officium regius), where-
by Christ founded his kingdom, defends his Church
against all enemies and rules all things in heaven and
on earth. The old divines distinguish between the
reign of nature (regnum natura sive potentia), which
embraces all things; the reign of grace (regnum gratiae), which relates to the church militant on earth; and the reign of glory (regnum gloriae), which belongs to the church triumphant in heaven.

4. Modern Christological speculations. Upon the whole, the orthodox doctrine has laid the main stress upon the divine element in Christ, and left the human element more or less out of sight, without ever denying it. Rationalism, on the contrary, developed the human element to the exclusion and denial of the divinity. While evangelical theology revived after the reign of Rationalism in Germany, it endeavored to do justice to both elements, and so to reconstruct the old Christology as to set forth the sinless, yet truly human character of Christ from infancy to full maturity, without prejudice to his deity. Schleiermacher opened a new era of Christological speculation, but, forsaking the Chalcedonian basis of two natures in one person, he discarded the proper idea of the incarnation as the union of the eternal personal Logos with human nature, and, after all, presented Christ merely as a perfect model man without sin, in whom God dwelt in union with his soul, as he did in another man before or since. This indwelling of God is with him only a principle, a power of life, and not the second person of the Holy Trinity. Schleiermacher's view of the Trinity is essentially Sabellian. From him and from Hegel's philosophy proceeded two opposite currents of Christological thought, under the ordinary Emanitarian, negative and infidel, culminating in Strauss and Renan (see below, under the second division, No. 15), and an evangelical, positive and in the main orthodox, which labors to reconcile the old faith of the Church in the God-Man with the demands and forms of modern thought. The principal evangelical writers on the Christological problem, under its latest phases, are Dorner, Lange, Goeschel, Lieberer, Martensen, Thomasius, Gess, Kahn, Ehrard. Some of these, especially Thomasius, Gess, and Gedot (Commentary on John), have strained the Pauline idea of the koinos, the self-limitation, self-renunciation of the Logos, far beyond former conceptions, even to a partial or entire self-emptying of the divine essence and suspension of the Inner Trinitarian process during the earthly life of Christ, while others restrict the koinos to the laying aside of the divine form of existence or divine dignity and glory. Dorner opposes these modern Kenotics or Kenoists (Kenotikos) as a new sect of Theopaschites and Ehrard's mysticism, and he does not hesitate to see vital unification of the pre-existent Logos and the human nature, by a condescension of the former and an elevation of the latter. This view leaves room for the growth of the Messianic consciousness, but makes the incarnation itself a process of growth which was not completed till the resurrection, or at least till the baptism of Christ.

These modern inquiries, however, earnest, profound, and valuable as they are, have not yet led to definite and generally-accepted results. English and American theology have not been affected by them to any considerable extent. Dr. Broadhead, while though in his complete History of Christian Doctrine, even ignores them altogether, and pronounces the Chalcedonian symbols the ne plus ultra of Christological knowledge, "beyond which it is probable the human mind is unable to go in the endeavor to unfold the mystery of Christ's complete person" (I, 100). But there certainly have been, since 1840, important advances made within the last thirty years in the critical history of the life of Christ, and in the manifold exhibition of his perfect humanity; which itself is an overwhelming proof of his divinity. (For a review of the recent Christological speculations, see Dorner, in his large work on the history of Christian doctrine, 1856, 2nd ed., 2 vols., 110 sqq., and in several dissertations upon the immutability of God in the Jahrbucher für Deutsche Theologie, 1856 and 1858; also Woldemar Schmidt, Das Dogma vom Gottmenschcn, mit Beziehung auf die neuesten Lösungsversuche der Gegenwärte [Leipzig, 1855].)

III. CHRISTOLOGICAL HERESIES. The numerous Christological errors may be divided into three classes, according as they relate either to the divine or to the human nature of Christ, or to both. Ebonism, Socinianism, and Rationalism, in its various shapes, deny, either in whole or in part, the divinity of Christ; Gnosticism, Manichaeism, Apollinarism, deny, more or less, his real humanity; while Nestorianism, Eutychianism, Monophysitism, and Mo- notheletism, admit the Godhead and manhood of Christ, but place them in a false relation to each other. We present them here in chronological order.

1. Ebionism (see that article), the earliest Christian heresy, was essentially Jewish, and looked upon Christianity merely as a perfected Judaism, upon the Gospel as a new law, and upon Christ as a second Moses. Origen derived the name of the sect from the poverty of their doctrine of Christ (τοῖς ἀσπίσιν, poor); but they regarded themselves as the genuine followers of the poor Christ. They held that Jesus was, indeed, the promised Messiah, the Son of David, and the supreme law-giver of the Church; yet a mere man, the son of Joseph and Mary, and that his death had no atoning efficiency. With this were closely connected other heresies. The pseudo-Clementine Homilies (see Clementine Literature) denied the ordinary Emanitarian, negative and semi-Gnostic ideas, and teach that Christ was the last and highest representative of the primitive religion which appeared in the seven pillars of the world, Adam, Enoch, Noah, Abraham, Isaac, Jacob, Moses, and Christ. These are, in reality, only different incarnations of the same Adam, or primitive man, the true prophet of God. Christianity and Moses are identical, and both coincide with the religion of Adam. Whether a man believe in Moses or Christ is all the same, provided he blaspheme neither. Christianity is an advance only in extending this primitive religion to the Gentiles (comp. Schillemann, Die Clementinen und der Ebionitismus, 1844, p. 362-552).

2. Gnosticism, which flourished in the second century (see article), varied in its Christology according to its numerous schools of Cerinthus, Barilides, Valentine, Marcion, etc., and generally dealt more in vague notions and speculative fancies than in solid, clearly-defined doctrines and arguments. But its Christology was a radical denial of the mystery of the Incarnation and therefore anti-Christian, according to the criterion of John (1 John iv, 3), although from a view the very opposite of Ebionism. While the latter denied the divinity of Christ, Gnosticism was docetism (hence Docetism), i.e. it denied the reality of Christ's human nature, and resolved it into an empty show and deceptive appearance (δεκτήσας, φαντασμα), or a transient vision, after the manner of the Indian Mythology. The real Christ, or Saviour, is one of the sons or divine powers, which either assumed this spectral form of humanity, or united himself temporarily, at the baptism of Jesus, in the human flesh, to foreseen him again at the passion. But he entered into no real contact with a human body which, as a part of matter (οὐρά), was regarded as essentially evil and antagonistic to God; he was not actually born, he did not suffer and die, nor rise again. He appeared like a meteor from heaven, to certain sects he was reduced to a modern philosophical conception, the Gnostic Christ is, in the end, nothing more than the ideal spirit of man himself, the Christ of Strauss and modern pantheism. Valentinus, the most ingenious among the Gnostics, distinguished the θεός Χριστός, or heavenly Christ; the σωρος, or iasus; and the κόσμος Χριστός, or the Jewish Christ, the man who, passing through the sun and the moon, and the world, and Mary as water through a pipe, and was crucified by the Jews, although, having no material body, he did not actually suffer. With him Soter, the proper re-
deemer, united himself at the baptism in Jordan, to announce his divine gnosia on earth, and lead spiritual persons to perfection.

3. The Manichæan system, which we know best from the writings of St. Augustine (who himself believed in the heresy for many years before he was thereby led to repudiate it), was essentially Gnostic and Docetic, and by its perverted view of body and matter as essentially evil, wholly excluded the idea of an incarnation of God. The Manichæans held that the apostles corrupted and falsified the real teachings of Christ, but that Mani, the promised Paraclete, has restored them. Traces of the Manichæan heresy ran through a number of sects of the Middle Ages.

4. Ante-Nicene Unitarianism, or Monarchianism.—The Antitrinitarians of the third century must be divided into two distinct classes: (a) The rationalistic or dynamic Monarchians denied the divinity of Christ, or explained it as a mere power (δύναμις), although they generally admitted his supernatural generation by the Holy Spirit. To these belong the Alogians, Theodotus and the Theodotians, Artemon and the Artemontes, and Paul of Samosata. (See the several articles.) (b) The Pneumatoioms (so called from their conception of the persons of the divine unity or monarchy, the doctrine of the divinity of Christ, but they sacrificed his independent personality to the divinity, and merged it into the essence of the Father, so that the Father was asserted to have suffered and died on the cross, which is absurd. This school was represented by Apollinaris, Nosterius, Callistus ( Pope Callixtus I), Beryllus of Bostra, and, in connection with a very original and ingenius doctrine of the Trinity, by Sabellius, all of the third century. (See the separate articles on these heretics, and the relevant sections of the Doctrine Histories of Muenzer, Hackett, North, Garbit, Thackeray, etc.)

5. Arianism, so called after Arius, priest of Alexandria (†386), shook the Church to its very base during the greater part of the fourth century, and called forth the first two ecumenical councils, viz. Nicea, 325, and Constantinople, 381. Its doctrine was, that Christ is a middle being between God and man, a sort of demi-god, who pre-existed before this world, and who created this world, yet was himself created out of nothing, the first creature of God, and consequently of a different essence (ησυχοισίας), and not eternal (ετερούσιος, ἐν πασί οὐκ οίκῳ προ), against the view the Nicene Creed asserts that Christ is "God of God" (οὐκ αὑτοῦ οὐκ ὑπερφυσικά). It was a kind of heretical church party, under the emperor Constantius (†361), and was led by Eusebius, bishop of Nicomedia, but it disappeared before the second ecumenical council in 381, which marked the final downfall of Arianism within the limits of the Roman empire, while it continued to linger, without vitality, among the Goths, Alani, etc.

6. Semi-Arianism is an inconsistent middle doctrine between the Arian heresy and the Athanasian or Nicene orthodoxy. It asserts the similarity of Christ to the Father (οὐκ ἔσεσθαι—a very elastic term), in opposition to the Nicene co-equality (οὐκ ἔσεσθαι) and the Arian difference of essence (ησυχοισίας). It was a kind of heretical church party, under the emperor Constantius (†361), and was led by Eusebius, bishop of Nicomedia, but it disappeared before the second ecumenical council in 381, which marked the final downfall of Arianism within the limits of the Roman empire, while it continued to linger, without vitality, among the Goths, Alani, etc.

7. Apollinarism is a partial denial of the humanity, as Arianism of the divinity of Christ. Apollinarius the younger, bishop of Laodicea (died about 390), otherwise orthodox, and highly esteemed for his learning and piety, ascribed to Christ a human body (σώμα) and a human soul (δύναμις, δύναμις), but not a human spirit or reason (δύναμις λογικής, anima rationis, νευρικόν, νευρικόν); putting the divine Logos in the place of the human reason. He wished to secure a true incarnation and vital unity of the eternal Word with the human nature, but at the expense of the most important constituent in man, and thus he reached, instead of the idea of the God-man, Σώμαν καὶ Φύσιν, only the idea of a ζωὴ εν φυσίν (οὐκ ἔσεσθαι ἔν Φύσιν). This heresy was condemned by a council at Alexandria in 362. (For particulars, see art. Apollinaris, vol. i, p. 296, 297; and Schaff, Church History, vol. iii, p. 705-714.)

8. Nestorianism, from Nestorius, patriarch of Constantinople, 428-431. It is the doctrine that Christ has two natures rooted in the Antiochian school of theology, of which Nestorius was a pupil, and agitated the Church with great violence from 428-431. Nestorius believed that Christ was fully God and fully man, but he put the two natures only into an external mechanical relation to each other (συνενωμένη, affinity, intercourse, attachment, as distinct from διάνοια, true interior union). He pressed the distinction of the two natures in the sense of the unity of the person. Hence he took great offence at the term Mother of God (Παναγία, Θεοτόκος, Μητέρα Δωρεάντος), which then began to be applied to the Virgin Mary, and has since passed into the devotional and theological language of the Church by the name of Theotokos. He denounced the term as heathenish, absurd, and blasphemous, since the eternal Godhead could not be born in any sense whatever. This gave rise to the Nestorian controversy, in which the violent Cyril of Alexandria took the most prominent part, as the champion of the Monophysite doctrine (against Constantinople). The name of a real incarnation, although with a decided leaning to the opposite extreme of Monophysitism. See art. Cyril of Alexandria. Nestorius was condemned by the third ecumenical council, held at Ephesus in 431, and deposed from the sacerdotal office; but his name and doctrine are perpetuated to this day in the sect of the Nestorians, and the Nestorians, and the Nestorianism, and the literature below.

9. Eutychianism, so called from Eutyches (q. v.), an aged presbyter and archimandrite of Constantinople (died soon after 431), is the exact counterpart of Nestorianism, and presents the consistent development of the Alexandrian school of theology as opposed to the Antiochian. Eutyches likewise held Christ to be the God-man as well as Nestorius, but he pressed the unity of person to the exclusion of the distinction of the two natures. He denied that two natures could be spoken of after the incarnation. The human nature was absorbed in the divine by that act, or defined by the personal Logos, so that even his body was unlike ours, of a heavenly character and substance (ἡμίανθρωπον, ἄνθρωπον). Hence it was proper to say, God is born, God suffered, God was crucified and died. The strongest opponent of this view was the Nestorian, the well-known Church historian, a friend of Nestorius. At first Eutychianism triumphed at the robber synod, so called, which was held at Ephesus A.D. 449, under the lead of the violent patriarch Dioscorus of Alexandria, who inherited all the bad and none of the good qualities of his predecessor Cyril. But the fourth ecumenical council, held at Chalcedon (451) and Constantinople A.D. 451, reversed this decision, condemned the Eutychian doctrine as heresy, and set forth in clear and precise terms the orthodox doctrine of the person of Christ, maintaining with equal decision the distinction of natures against Eutyches, and the unity of person against Nestorius. (See art. Eutyches, q. v.) In triumph of the orthodox faith, Leo I, bishop of Rome, had an important share, and his dogmatic letter to Flavian of Constantinople was made the basis of the synodical decision.

10. Monophysitism is only a modification and constitution of Eutychianism. As the term indicates, the Monophysites, although they rejected the Eutychian notion of an absorption of the human nature into the
CHRISTOLOGY

CHRISTOLOGY

284

 chlorine, nevertheless held firmly to the doctrine of but one nature in Christ. They conceded, indeed, a com-
ponent of the divine Logos, **Logos Theou**, to Christ; but not two natures. They assumed a diversity of qualities without corresponding substances, and made the humanity of Christ a mere accident of the immu-
table divine substance. Their liturgical shibboleth was, *God has been crucified*, which they introduced into the *trisagion* (γιος ὁ θεός, ὁ γιος Ἰησοῦς, ὁ δύος ὁ θεός, ὁ θεός Βασιλεύς), an extension of the seraphic ascription, Isa. vi. 3). Hence they were also called *Theopaschites* (θεοπασχίτες). The Monophysite controversy commenced soon after the Council of Chalcedon, which failed to pacify the Church, and convulsed the East, from patriarchs and emperors down, for more than a hundred years. The detailed history will be presented in a special article. The fifth ecumenical council, held at Constantinople A.D. 553, which was to end these violent strife, resulted in the condemnation of the Antiochian (Nestorian and semi-Nestorian) theol-
vory, and a partial victory of the Alexandrian Monophys-

ism, as far as it could be reconciled with the sym-
bol of Chalcedon. Notwithstanding this concession, the Monophysites, like their antipodes, the Nestorians, continued as separate sects in hostile opposition to the orthodox Greek Church. They are divided into separate Jacobite families, the Coptics in Egypt, the Assyrians, the Armenians, and the Ma-

runites. (See the respective articles.)

11. The Monothelite controversy is a continuation of the Nestorian and Eutychian controversies, and relates to the question whether Christ had but one will (Σιλάριον) or two, a divine and a human. Nestorian-

ism, of course, required two wills as a complement of two natures, while the Monophysites taught but one will. The emperor Heraclius proposed a compromise formula—one divine human energy (μεθενωτική ἐν-

εργυς), but it was opposed in the West. The sixth ecumenical council in Constantinople, A.D. 680, set-
tled the dispute by teaching the doctrine of two wills harmoniously co-operating, the human will following the divine (ἀντι διὰ θέλεμα, ἀντὶ ὑπενεργία, ἀλλὰ ἐνέργεια τῷ ἑνόρκειν τοῦ Θεοῦ καὶ ἑπατο-

σιμονίων). Thus Monothelitism was condemned, but was adhered to by the Mononites on Mount Lebanon till the Council of Constantinople. The Monophysites (q. v.) are all Monothelites (q. v.).

12. The Adoptian controversy arose in Spain to-
ward the close of the eighth century, and turned upon the question whether Christ, according to his human nature, was the Son of God by nature (naturaliter), or only by adoption (adop
cu) The last position was condemned as heretical in a synod at Frankfort on the Maine, 794. (See article ADOPTANISTS, vol. i., 76, and EPHELISIUS OF TOLEDO AND FELIX OF URGEL.)

13. Socinianism, a system of ultra and pseudo Pro-
estantism, founded by Laius Socinus (died 1652) and his nephew Faustus Socinus (died 1604), returned almost to the pure doctrine of the Unitarians of Eutyches and Nazarenes, and added to it the heathenish notion of an apothecary of Christ after his death. It teaches that Jesus of Nazareth, though supernaturally conceived, was a mere man, but favored by God with extraordinary revelations, elevated to heaven, defined in reward of his holy life, and intrusted with the gov-

ernment of the Church which he founded. It substit-
te for a incarnate divinity a created and delegated divinity. Invocation of Christ is allowed, but not en-

joined; it is an adiaphore. See SOCINIANS; SOC-

NUS.

14. Modern Unitarianism in England and America has no uniform and settled belief concerning the per-
son of Christ, and branches out into two very different tendencies, the conservative, represented by Channing, which in its approach towards orthodoxy rises to a sort of high Arianism, and the radical, represented by the erratic Theodore Parker, which sinks almost to the mythical Christ of Strauss, and sacrifices his sinless perfection to the passions and idiosyncrasies which mistook extraordinary medical cures for supernatural miracles, and an extraordinary man for a divine being; Strauss and Renan, the theory of poetical fiction, the one in its mythical, the other in its legend-

ary form. (Comp. on these different Christological hy-

petheses, Schaff, *The Person of Christ*; the *Mystery of History*, with a Reply to Strauss and Renan, and a *Collection of Testimonies of Unbelievers*, 1865.) But all these rationalist attempts, instead of explaining the mystery of Christ's life, only substitute an unnatural prodigy for a supernatural miracle. They have been tried, and not even by the One who knows better how to try the other, even during the lifetime of their champions. Paulus rejects the hypothesis of Reimarus; Strauss most acutely refutes Paulus; Renan, in part at least, dissents from Strauss; the unprincipled Schenkel makes a half-way approach to both in his insignificant *Characterbild Jesu*, and is in turn treated with con-
temptuous scorn and the keenest sarcasm by Strauss. (See *Die Halben und die Gansen*, 1865.) The old and ever young faith in the divine-human Redeemer has outlived all these attacks, and is now stronger than ever, the only refuge and comfort of a sinful world. It is in conflict with these latest forms of unbelief that the evangelical theology of Germany has achieved its greatest triumphs and most lasting merits. France, England, and America have engaged in the battle, and contributed their share towards the defeat of the moder-

anti-Christ, and the defence of the true Christ of the Gospel and of the Church, on whom the salvation of the worlds, and, in fact, the Crusades.

**Literature.**—Besides the works on special topics already quoted, we mention on the general subject Dionysius Petavium (Jesus, died 1652), *De theologica dog-

ma*, (Paris, 1644-50, and other editions), tom. iv.

and v. *De incarnatione Verbi,* (the most profoundly learned of all tracts on this subject) by George Bull, *Defensio fidei Nicene* (Oxford, 1665, and often since; a standard work in defence of the essential identity of the Trinitarian and Christological faith of the first four centuries, though defective in not ad-

mitting a gradual development of doctrine and logical statement, which is entirely compatible with the essen-
tial identity of the doctrine of the Divinity of Christ. *Post-

ulation of Christ's Divinity* (Oxf. 1719; a very able defense of the orthodox faith against the high Arian-

ism of Dr. Sam. Clarke and Dr. Whitby); Ch. W. F.

lichen Entwicklung* (Tübingen, 1841-43, 3 vols.; very learned, able, and critical, but skeletal); J. A. Dor-

ner, *Entwicklungsgeschichte der Lehre von Christi* (1866, 2d ed.; Stuttgart, 1845-53, in 2 vols.; the most learned and complete history of Christology; Eng. transl. by Alexander and Simon in Clark's For-

eign Theol. Library, Edinb. 1861, 5 vols.). R. Wilber-

force, *The Doctrine of the Incarnation of our Lord Jesus
making pretensions to be the Christ. In the maintenance of their claims to the Messiahship there has been a great expenditure of blood and treasure. They have appeared at different times, from an early date in the second century till 1828. The first was called Caucas, the second Barchocheba, the Jew, and the Jews admit that, in the defence of this false Messiah, they lost between five and six hundred thousand souls. The last that gained any considerable number of converts was Mordecai, a Jew, of Germany, who lived in 1622. Our Lord warned his followers that such false Christs should make their appearance (Matt. xx. 24). See ANTICHRIST.

Chrodegang, bishop of Metz in the eighth century, was born to noble Frankish parents, brought up at the court of Charles Martel, and was master of the music of his time. In 742 he was raised by Pepin to the bishopric of Metz, and was very active in building churches, and in increasing the influence of Rome during the rest of his life. He is chiefly known as the founder of the Order of Cathedral and Collegiate Canons, and as the author of a Rule of Monastic Life (Regula Serrna) for the residence of the monks of the monastery that he founded, whither he transported the relics of Gorgonius, Nabor, and Nazarius, given him by Paul I. See CANONS. He died A.D. 766. His Rule (that of Benedict of Nursia modified) consists of thirty-four canons. The preface, in the Latin text, and the note that "the necessity of his new rule arises from the clergy neglecting the rules already in existence, and therefore he comes forward to remind them how they should live." — D'Achery, Specicel, i, 565; Peits, Monument, Germ., ii, 267; Mansi, Concil. xiv, 318; Montheim, Ch. Hist. c. viii, pt. ii, i, n. 28; Neander, Ch. History (Torrey's), ii, 104 sq.

Chromatius, bishop of Aquileia (after 888), a distinguished theological writer of the Latin Church. The place and date of his birth are not known. He was a friend of Jerome, Ambrose, Rufinus, and other distinguished men of that period. It was Chromatius who induced Jerome to translate the Old Testament into Latin, and Jerome dedicated to him the commentary on Habakkuk. When the controversy on the writings of Origen broke out between Jerome and Rufinus, Chromatius in vain endeavored to reconcile the former friends. He disapproved of the writings of Origen, but opposed the exclusion of the church of Rufinus, whose writings had been dedicated to him by his works. When bishop Anastasia of Rome condemned Rufinus, and communicated the sentence to Chromatius, the latter deemed it his right to dissent from the Roman bishop, and received Rufinus into the communion of his church. Chromatius was a warm defender of Chrysostom, and the latter wrote him a letter of thanks. Most of the works of Chromatius are lost, among others his Letter to Jerome (on Rufinus), and his Letter to the Emperor Honorius (in defence of Chrysostom); but there are still extant Discourses on the Eight Beatitudes, treatises On the Fifth and Sixth Chapters of St. Matthew and On Baptism, and a number of Letters. Most of his works have been edited at Basle (1528 and 1551), Louvain (1646), in Galland's Bibliotheca Patrum, vol. vii, and by Pietro Braidat, at Udine (Sancti Chormatii episcopi Aquileijensis Scripta, see Opuscula, etc., Ultima, 1816, 4to).

Chronicles (Σημαντικά, διάγραμμα του καιρού; words [or acta] of the days, 1 Kings xiv. 10, Sept. ἀρχαι τοῦ χρόνου, The works dierpolwv Khrystou tonan meta Delfu (Lyd. 1801. 24, μητριό ψηφιών, fusti; Esth. vi, 1, μητριό ψηφιών, omnes; 1 Esdr. ii, 12, ὑπομνηματισμοι; 1 Macc. xvi, 24, μητριό ψηφιών, journals or diaries, i. e. the record of the daily occurrences; the name originally given to the record made by the appointed historiographers in the kingdoms of Judah and Israel, usually called more simply "book of the kings of Israel and Judah."
CHRONICLES

(1 Chron. ix. 1); so also of separate sovereigns, e. g.: Solomon (1 Kings xi. 41), Jehu (2 Chron. xx. 24), etc. See History.

CHRONICLES, (First and Second) Books of, the designation in the English Bible of the last of the historical records in the Old Testament in the King James Version, but in the Hebrew Scriptures they constitute the entire volume of the Bible. See Bible.

I. Name.—The Hebrews call them הַרְאוּבִּים (she'ach) or, more rarely, הַרְאוּבִּים (she'ach) or, more rarely, הַרְאוּבִּים (she'ach), and reckon them but one book. The Sept. and Vulg. translators, who regarded them as two books, used the appellation הַרְאוּבִּים (she'ach) omitted, as if they were supplementary to the other historical records in the Hebrew Bible. The Vulg. retains both the Heb. and Greek name in Latin characters, Dubre jannam, or jannamin, and Paralipomenon. Jerome tells us (ad Dominiun. et Rosatuim) that in his time they formed only one book in the Heb. MSS., but had been divided by the Christian churches using the Sept. for convenience, on account of their length. In his Ep. to Paulinus he further explains the name Paralipomenon, and eulogizes the book. The name Chronica, or Chroniconur libert, which is given in some copies of the Vulg., and from which we derive our English name of "Chronicles," seems to be taken from Jerimiah's saying in his prophecies (Jer. lxxiii. 14), "If it is not a burden of stones, but of stones which the show more significantly call the Chronicon of the whole human history." It was possibly suggested to him by his having translated the Chronica of Eusebius into Latin. Later Latin writers have given them the name of Ephemeriides. The division into two books, after the example of the Sept. and later versions, was adopted by Bemburg in his Heb. Bible, since which time it has been universal.

II. Contents.—(a. A) In 1 Chron. i-xii is given a series of genealogical tables, interspersed with historical, geographical, and other notices. These genealogies are not complete: the generations of Adam to Abraham (ch. i. 1-28); of Abraham and Isaac (i. 29-54); of Jacob and his son Judah (ii.); of king David (iii.); of Judah in another line (iv. 1-23); of Simeon (iv. 24-48); of Reuben, Gad, and Manasseh, with historical and topographical notices (v.); two lists of the sons of Levi (vi. 1-30); genealogical registers of Heman and Asaph (vi. 31-45); of Merari (vi. 46-53); of Aaron, with a list of the residences of the Levitical families (vii. 50-83); list of the sons of Issachar (vii. 1-5); of Benjamin and Naphtali (vii. 6-13); of Manasseh (vii. 14-19); of Ephraim, with notices of their possessions (vii. 20-29); of Asher (vii. 30-40); a second list of the descendants of Benjamin, with the genealogy of Simeon (viii.); list of families dwelling at Jerusalem, with indications of the tribes to which they belonged (ix.).

(b. 1) 1 Chron. x-xliv contains the history of David's reign from the death of Saul, partly agreeing with the account given of him in the books of Samuel, though with several important additions relating to the Levites.

2. Chron. i-xix contains the history of Solomon.

2. Chron. x-xviii contains a succinct account of the kingdom of Judah while Israel still remained, but separate from the history of the latter.

2. Chron. xxii-xxxvi describes the kingdom of Judah after the fall of Israel, especially with reference to the worship of God.

From this analysis it appears that the Chronicles contain an epitome of sacred history, particularly from the origin of the Jewish nation to the end of the first captivity. Besides important notices of a historical character not found in the other books, there are others of a doctrinal and devotional nature. There is one psalm (1 Chron. xvi. 7-36), the first which David assigned for public worship (verse 7).

III. Diction.—This is so close as to suite the time immediately subsequent to the Captivity. It is substantial.

ly the same with that of Ezra, Nehemiah, and Esther, which were all written shortly after the Babylonian exile. It is mixed with Aramaic, marking at once the decline of the Hebrew speech in power and the corruption of their native tongue. The pure Hebrew had then been largely abandoned. It was lost during their sojourn in Babylon. The orthography is characterized by an adoption of the matres lectionis and frequent interchanges of the weak letters, with other peculiarities (see below, § 4).

IV. Age and Author.—Internal evidence sufficiently demonstrates that the Chronicles were written after the Captivity. Thus the history is brought down to the end of the exile, and mention is made of the restoration by Cyrus (2 Chron. xxxv. 21, 22). It is certain that they were compiled after the time of Jeremiah (2 Chron. xxxv. 25), who lived to see the destruction of Jerusalem by the Chaldaeans. The same opinion is supported by the character of the orthography and the nature of the language employed, as we have already seen, both which are Aramean in complexion, and harmonize with the books confessedly written after the exile. The Jews generally (unanimously, according to Huet, Deumet. Eclog., iv. 14) ascribe the Chronicles to Ezra and Nehemiah, Ezech. xxv; it is hardly probable that internal evidence as to the time when the books of Chronicles were compiled seems to tally remarkably with the tradition concerning their authorship. Notwithstanding this agreement, however, the authenticity of Chronicles has been vehemently impugned by De Wette and other German critics, whose arguments have been successfully refuted by Dahler, Keil, Moer, and others. It has been clearly shown that the attack was grounded not upon any real marks of spuriousness in the books themselves, but solely upon the desire of the critics in question to remove a witness whose evidence was fatal to the post-Behistlonic origin of the books of Moses. If the books in the Chronicles of the courses of priests and Levites, and the ordinances of divine service as arranged by David, and restored by Hezeckiah and Josiah, are genuine, it necessarily follows that the Levitical law as set forth in the Pentateuch was not invented after the return from the Captivity. Hence the successful vindication of the authenticity of Chronicles has a very important bearing upon many of the very gravest theological questions.

There is particularly the circumstance that these books bring down the genealogy of David (1 Chron. iii. 19, etc.) to a period admitted on all hands to be subsequent to the Babylonian restoration. This additional semblance of several of the names given in that list with some of those in the ancestry of Christ (Luke iii. 25, 26), the genealogy of David is there brought down to the ninth generation after Zerubbabel (Strong's Harmony and Exposition of the Gospels, p. 77, note m). This passage, however, may have been added by final editors of the sacred canon, traditionally reputed to have been the members of the Great Synagogue (q. v.). That the author was at least a contemporary of Zerubbabel is clear; and to show still more the writer's intimate acquaintance with and interest in his own country, a daughter of Zerubbabel is inserted, and numerous details given about the family. The name Hattush (verse 22) occurs also in Ezra viii, 2, as that of a descendant of David who returned with Ezra from Babylon: this would favor the view advanced if the identity could be established; but for this there is no evidence. But a more important note of time is given in 1 Chron. x-xviii, 1, among the Levitical porters, "who hitherto (נָעֵד, "םָנָכֹז, to the time of the writer) waited in the king's gate;" and of two of which, Akkub and Talmon, mention is made in Neh. xii, 25, 26, as "keeping the ward at the thresholds of the gates . . . . in the days of Nehemiah, and of Ezra the priest the scribe."
These conclusions of date from historical notices are confirmed by various peculiarities of expression and by the whole literary character of the composition. Of the peculiarities marking the late age of the writer is the term בִּרְאָת (b'rafah, "palace"), applied to the Temple, instead of the old and usual מִשְׁ_fwd (mishpah). This was an imitation of the great Persian cities, in which the king was considered as having its palace, afterwards called Бaχs. See BAR.- Another term with which the Hebrews became acquainted in Babylon was מַשְׁקֶה (mashke), byssua, which occurs in none of the older books, notwithstanding the frequent mention of מַשְׁק (mashk), or "fine linen," and is found only in 1 Chron. iv. 21; xv. 27; 2 Chron. ii. 14; iii. 14; v. 12; Esth. i. 6; vii. 16; and in a book written in Chaldean, Eze. xxvii, 16 (Eichhorn, Einleitung, § 498). So also the mention of מַשְׁק (mashk), "dram," but more correctly daric, 1 Chron. xxix, 7; also Ezra ii. 69; viii. 27; Neh. vii, 70), a Persian coin, the current money of the time. Jahn (Einleitung, § 50) refers to a remark in 2 Chron. iii, 8, that the cubit was after the "first (or old) measure," intimating that a new standard was in use in the time of the writer. The literary character of the work, in general, entirely betokens a period when the language was greatly deteriorated through foreign influences, particularly during the exile. So many peculiarities of style and diction. Many examples of the latter, as the interchange of אָלֹפ (aleph) with ke quiescent, may be seen on comparing the two lists of David's heroes in 1 Chron. ix. and 2 Sam. xiii. With respect, again, to the later books, more particularly that of Ezra, there are many important resemblances, a list of which may be found in Haverinck, p. 270.

This determination of the age of the composition narrows the ground of inquiry as to its authorship. The Jewish opinion that Ezra was the author of the Chronicles was universally received down to the middle of the seventeenth century, when it was called in question by the English deistical writer Hobbes, who assigned to it an earlier date. It was Spinoza who first referred it, on the contrary, to a later period than the time of Ezra, bringing it down to the time of the Maccabees, a view adopted in modern times by Gramberg, and partly by De Wette. Carpozon, Eichhorn, Haverinck, Vitringa, and several others, consider Ezra to be the author. Ewald (Siebenb. des Volkes Israel, 2d ed., i, 292) admits that the Chronicles and the book of Ezra are by the same author, and even contends that they originally formed one work, not the production of Ezra himself, but a much later writer. Jahn denies all appearance of similarity between the Chronicles and Ezra, and ascribes the former to some unknown writer at the close of the Captivity.

The identity of authorship of the books of Chronicles and Ezra can be established by numerous arguments, besides the marks of similarity in expression already adverted to. The internal relation of the Chronicles and of Ezra, the identity of the Sept. different from that of the Jewish canon. Further, the writer of the third (apocryphal) book of Ezra has wrought up the two writings into one. The conclusion of Chronicles and the beginning of the book of Ezra are almost identical in expression, from which it is inferred that the second writer intended to be a continuation of the other; the one history terminating with the decree for the restoration from captivity, the other narrating how that decree was obtained and how it was carried out. Without this connection the opening words of the book of Ezra, "In the year that Artaxerxes reigned, that which the king had ordered by the hand of his spirit, in a book written in the language of the Orientals," apply only to a form of commencement which is in reality only a continuation. (See Ezra i, 1.) The connection thus indicated is further evinced by the style, the manner of narration, and of regarding events from a Levitical point of view, common to the two works; the whole spirit, in fact, and characteristics are identical. Thus the frequent citations of the law, and in similar terms, as מִשְׁפַת (moshphat), meaning "according to the law of Moses" (1 Chron. xxiii, 31; 2 Chron. xxxv, 18; Ezra iii, 4; yet also in Neh. viii, 16). The descriptions of the sacrificial rites are in the two books very full, and in nearly the same terms (comp. Ezra ii, 2-5, with passages like 1 Chron. xvi, 40; 2 Chron. xvii, 18; xiii, 11); so also the account of the celebration of the passover (Ezra vi, 19, etc., and 2 Chron. xxx, 38), and the order of the Levites in charge of the Temple (Ezra iii, 8, 9; 1 Chron. vii, 2, 8). What presents the greatest apparent contrast in the two books is the high-priest's genealogy in 1 Chron. vi, 1-15, in the descending line, terminating with the Captivity, and in Ezra vii, 1-5, in the ascending line, from that priest himself to Aaron; but a little consideration will reconcile the discrepancy. Two lists are set beside each other; and partly the one is a continuation of the other; as regards the latter point there can be no conflict, and as to the former it will be observed that the list in Ezra is considerably abridged, many links being omitted (Bertheau), and this could be the more readily done if the writer had elsewhere given a complete register. See Ezra (Bible). The only serious objection to their authorship by Ezra is the fact (above noticed) that certain genealogies (e. g. of Zerubbabel (1 Chron. iii, 19-24); comp. that of the high-priests, Neh. xii, 11) are continued much later than his time; but these few verses may have been inserted by a later hand, without affecting the general authorship. Just as the notices of the death of Moses (Deut. xxxiv) must have been added to the Pentateuch by another hand than his own. See CANON (OF SCRIPTURE).

V. Scope and Method. The books of Chronicles, as compared with those of Kings, are more didactic than historical. The historical tendency is subordinated to the didactic. Indeed, the purely historic form appears to be preserved only in so far as it presented an appropriate medium for those religious and moral observations which the author specially aimed to adduce. Samuel and Kings are more occupied with the relation of political occurrences, while the Chronicles furnish a detailed account of the several changes of the people. Compare 1 Chron. xvii, 11-14, compared with 2 Sam. viii, 12-16, manifests more distinctly the Messianic character of the promises made to David (see Fye, Script. Testimony, i, 171). So, too, in the genealogical table, while no place is given to some of the tribes, as Dan and Asher, that of Judah in the line of David is traced down to the writer's own time (1 Chron. i, 27; ii, 3, 15-11; iii, beyond any other historical notice of the O. T., and connecting with the genealogy of Christ (Matt. i). See GENEALOGY.

The plan of these books, of which the book of Ezra is a continuation, forming one work, immediately becomes apparent if we consider it as the compilation of Ezra, or some one nearly contemporary with him. One of the greatest difficulties connected with the Captivity and the return must have been the maintenance of that genealogical distribution of the lands which yet was a vital point of the Jewish economy. Accordingly it appears, to have been one to which both Ezra and Nehemiah have contributed. This work was done before them. Another difficulty intimately connected with this was the maintenance of the Temple services at Jerusalem. This could only be effected by the residence of the priests and Levites in Jerusalem in the time of Nehemiah, and not practicable in case of the payment of the appointed tithes, first-fruits, and other offerings. As soon as these ceased the priests and Levites were obliged to
disperse to their own villages to obtain a livelihood, and the Temple services were neglected. But then, again, the registers of the Levitical genealogies were necessary in order that it might be known who were entitled to such and such allowances, as porters, as singers, as priests, and so on, because all these offices went by families: and, again, the payment of the tithe, etc., was dependent upon the different families of Israel being established each in his inheritance. Obviously, therefore, one of the most pressing wants of the Jewish community after their return from Babylon would be trusty genealogical records, and if there were any such in existence, the acknowledgment and publication of these would be one of the greatest services a person in Ezra's situation could confer. But further, not only had Zerubbabel (Ezra iii, v, vi), and after him Ezra and Nehemiah (Ezra ii, vii; Neh. vii, viii), labored most earnestly in the teeth of immense difficulties to restore the Temple and the public worship of God there to the condition it had been in under the kings of Judah, but it appears clearly from their policy, and from the language of the contemporary prophets, Haggai and Zechariah, that they had it much at heart to reinfuse something of national life and spirit into the bosom of the people, and to make them feel that they were still the inheritors of God's ancient promises, and that the Captivity had only temporarily interrupted, not dried up, the stream of God's favor to their nation. Now nothing could more effectually aid these pious and patriotic designs than setting before the people a comprehensive history of the kingdom of David, which should embrace a full account of its prosperity, should trace the sins which led to its overthrow, but should carry the thread through the period of the Captivity, and continue it, as it were, unbroken on the other side; and those passages in their former history would be especially important which exhibited their greatest and best kings as engaged in building or restoring the Temple, in reforming all corruptions in religion, and zealously regulating the services of the house of God. As regards the kingdom of Israel or Samaria, seeing it had utterly and hopelessly passed away, and that the existing inhabitants were among the bitterest "adversaries of Judah and Benjamin," it would naturally engage very little of the compiler's attention. These considerations explain exactly the design of that historical work which consists of the two books of Chronicles and the book of Ezra. For, after having in the first eight chapters given the genealogical divisions and settlements of the various tribes, the compiler makes an entire change of purpose and | informing us, in ch. ix, 1, of the disturbance of those settlements by the Babylonish Captivity, and, in the following verses, of the partial restoration of them at the return from Babylon (2-24); and that this list refers to the families who had returned from Babylon is clear, not only from the context, but from its reinsertion, Neh. xi, 8-22, with additional matter evidently extracted from the public archives, and relating to times subsequent to the return from Babylon, extending to Neh. xii, 27, where Nehemiah's narrative is again resumed in continuance with Neh. xi, 2. Having thus shown the re-establishment of the returned families, each in their own inheritance according to the houses of their fathers, the compiler proceeds to the other part of his plan, which is to give a continuous history of the kingdom of Judah from David to his own times, introduced by the closing scene of Saul's life (ch. x), which introduction is itself prefaced by a genealogy of the house of Saul (ix, 8-44), extracted (as from the genealogical tables drawn up in the reign of king Hezekiah, as is at once manifest by counting the thirteen or fourteen generations, from Jonathan to the sons of Azel inclusive, exactly corresponding to the fourteen from David to Hezekiah inclusive). This part of the plan extends from 1 Chron. ix, 85, to the end of the book of Ezra; 1 Chron. xv-xvii, xxii-xxix; 2 Chron. xiii-xvi, xvi-xvii, xvi-xviii, and xvi-xix; among the passages wholly or in part peculiar to the books of Chronicles, which mark the purpose of the compiler, and are especially suited to the age and the work of Ezra (q. v.).

VI. Sources.—It is evident that the Chronicles were compiled not only from former inspired writers, but, for the most part, from public records, registers, and genealogies belonging to the Jews. That national annals existed there can be no doubt. They are expressly mentioned, as in 1 Chron. xxvii, 24. They contained an account of the most important events in the history of the Hebrews, and were generally lodged in the temple or Temple, where they could most conveniently be consulted.

The following are the explicit references by the compiler himself to older memoirs or historical works: (1) The book of Samuel, words or acts of Samuel the seer, the book of Nathan the prophet, and the book of Gad the seer (1 Chron. xxxi, 29). This cannot mean the inspired books of Samuel, because they do not contain the entire history of David ("his acts first and last"). It refers probably to one of his own times, and to the earlier part of his reign, and to a continuation of it, embracing succeeding times, written by Nathan and Gad, from which it is probable that part of the contents of the present books of Samuel was drawn. See Nathan; Gad. (2) The book of Nathan the prophet, the prophecy of Ahijah the Shilonite, and the visions of the Lord the seer (2 Chron. ix, 29). See Ahijah; Shiloh. (3) The book of Shemihazah, the prophet, and of Iddo the seer concerning genealogies (or, as De Wette translates it, after the manner of family-registers (2 Chron. xii, 15). See Shemihazah. (4) The story, or, rather, the interpretation (טִּירֶפֶּט, midrash) of the prophet Iddo (2 Chron. xiii, 22). (5) The book of Jehu the son of Hanani, inserted in the book of the Kings of Israel (2 Chron. xx, 24). See Hanani. (6) The history of Uzziah, by Isaiah the son of Amoz (2 Chron. xxvi, 22). (7) The vision of Isaiah the prophet, in the book of the Kings of Judah and Israel (2 Chron. xxxii, 32). See Isaiah. (8) Genesis's Commentar über den Jesaja; Einzels. § 4.) (8) The sayings of the seers (2 Chron. xxxii, 19). See Hozai. (9) The interpretation of the book of Iddo (2 Chron. xxiv, 22). (10) The book of the Kings of Judah and Israel (2 Chron. xvi, 11; xxv, 26; xxvii, 7; xxxvii, 26; xxxv, 27; xxxvi, 8). This could not have been our present books of Kings, but public annals, because, in several instances where th: reader is referred to them for information, our books of Kings contain less than what is stated in the Chronicles. (11) The book of the Kings of Israel (2 Chron. xx, 34). (12) The words or histories of the Kings of Israel (2 Chron. xxxii, 19). It is probable that Nos. 10, 11, and 12 refer to the same historical work. See Kings (Books of). (13) The Chronicles of King David (1 Chron. xxvii, 24). (14) The Lamentations (2 Chron. xxxv, 25). This, however, has been thought by some not to mean the Lamentations of Jeremiah which we now have, but other Lamentations, composed by the prophet on the death of Josiah, and long since lost. See Lamentations (Scriptures). In addition to the above aforesaid documents, the compiler must have had others. Thus the lists of David's heroes (xi, 10-47), of those who came to him at Ziklag (xii, 1-22), of the captains, princes of the tribes, and officers of David's household (xxvii), the number and distribution of the Levites, and the minute information given respecting divine worship (xxiii-xxvi), must have been derived from written sources not included in the book of the Kings of Israel and Judah. Some documents are mentioned by the compiler which he did not use. Thus a writing of Elijah, addressed to Jehoram, is spoken of in 2 Chron. xxv, 12. See Elijah.
In 1 Chron. i, 9, we have only a few references to the origin of the genealogical lists. Throughout most of this portion the compiler relied on registers, which he carefully followed, but does not definitely cite (yet see 1 Chron. v, 7, 17; vii, 7, 9; ix, 1). Although the genealogies of 1 Chron. i-ii, 2, are substantially the same and exhibit the same internal consistency as the older genealogies there is manifestly much independence. In proof of this it is only necessary to observe some of the appended notices, e. g.: 1 Chron. i, 51, "Hasid died also," an addition to Gen. xxxvi, 89, belif inferred by Hengstenberg (Genesis of the Pentateuch, ii, 248) and others, from the Litter passage, that Hasid was still living in the time of Moses. See HABAD. After 1 Chron. ii, 2, the genealogical lists are interspersed with fuller details, and the work attains to more completeness and independence.

It has been inferred whether our present books of Samuel and Kings were among the sources whence the Chronicles were written; there is no question that the answers given in the affirmative by De Wette, Movers, and Bleek; by Haenverick and others in the negative. The first named critic adds three arguments in favor of the hypothesis that the parallel accounts were derived from the earlier books, only one of which appears to us valid, viz., the certainty that the Chronicler's having known the earlier books. After denying the force of all these arguments, Keil proceeds to adduce some positive grounds against the hypothesis that the books of Kings and Samuel were used as sources. The considerations adduced by him, however, are singularly wanting in validity (Samuel, p. 480-482). Indeed, the compiler of Chronicles knew the canonical books, why should it be thought that he abstained from using them? They would have facilitated his work. The most convincing proof that he both knew and used them is furnished by some forty parallels, which are often verbal. Thus, in 2 Chron. i, 1-17, there is a paragraph almost word for word with 1 Kings x, 26-29. Again, 1 Chron. xvii and xviii are in many places verbatim parallel with 2 Sam. vii and viii. Compare also 1 Chron. x, 1-xxi, 4, with 1 Chron. x, xi-xii; 2 Chron. x, 1-xxi, with 1 Kings xii, 1-24; 2 Chron. xv, 16-18, with 1 Kings xv, 16-18; 2 Chron. xxv, 1-17, with 2 Kings xxv, 1-21; 2 Chron. xxxii, 1-9; 2 Chron. xxxiii, 21-25, with 2 Kings xix, 20-26, etc. Nor can all these coincidences be explained by a common use of the older documents, for in many of the passages, evidently abridgments, the compression or selection is identical. See SAMUEL (Books of).

On the other hand, many particulars, more especially in the lives of David and Solomon, recorded in these books, are entirely passed over in the Chronicles, and in their stead are given notices of the state of religion and of public worship.

(1.) The principal omissions in the Chronicles are: The family of the widow Michal and David (2 Sam. vi, 19-25); David's kindness to Mephibosheth (2 Sam. iii, 1-15); his adultery with Bathsheba (2 Sam. xi, 1-22); his son Amnon's defilement of Tamar, and the rebellion of Absalom (2 Sam. xiv-xix); the revolt of Sheba (2 Sam. xx); the delivering up of Saul's sons to the Gibeonites (2 Sam. xii, 14); the war with the Philistines (2 Sam. xiii, 1-3); David's burning the last words (2 Sam. xxiv-xviii); the attempted usurpation, and the anointing of Solomon (1 Kings i); David's last will (1 Kings ii, 1-9); Solomon's throne established by the punishment of his opponents (1 Kings ii, 13-46); his marriage with the daughter of Pharaoh (1 Kings iii, 1); his wise decision (1 Kings iii, 15-28); his officers, glory, and wisdom (1 Kings iv); his strange wives, and idolatry (1 Kings xi, 1-40). The entire omission of the history of the kingdom of Israel, except that it was carried away captive by the Assyrians, as a punishment for its sins (1 Chron. v, 25, 30), is noteworthy (see above, § 5).

(2.) Matthew's practice (Matt. xiii) in the Chronicles. The list of the heroes who came to David at Ziklag, and of the hosts who came to Hebron to make him king (1 Chron. xii); David's preparation for building the Temple (ch. xxvii); the enumeration and order of the Levites and priests (ch. xxviii-xxix); the order of the army and its captains (ch. xxix); the taking of the temple materials shortly before his death (ch. xxviii, xxix); Rehoboam's fortifications, his reception of the priests and Levites who fled from the kingdom of Israel, his wives and children (2 Chron. xi, 5-24); Abijah's war with Jeroboam (xiii, 8-20); the notice of Abijah's wives and children (xiv, 17); Asa's work in fortifying his kingdom and his victory over Zerah the Cushite (xiv, 8-19); a prophecy of Azariah, which induced Asa to put down idolatry (xv, 1-16); the address of the prophet Hanani (xiv, 7-10); Jehoshaphat's endeavors to restore the worship of Jehovah, his power and riches (xvii, xviii, 1-9); his instructions and ordinances as to judgment (ch. xviii); his war with the Moabites (xx, 1-20); his provision for his sons, and their death by his son and successor, Jehoram (xix, 1-4); Jehoram's idolatry and punishment (xviii, 11-19); the death of the high-priest Jehoiada, and the apostasy of Joash (xxiv, 15-22); Amaziah's warlike preparations (xxv, 5-10); his idolatry (xxv, 14-16); Uziah's wars, victories, and forces (xxvi, 6-15); Jotham's war with the Ammonites (xxvii, 4-5); Hezekiah's reception and passover (xxiv, 6-31); his riches (xxviii, 19-30); Manasseh's captivity, release, and reformation (xxix, 1-17).

(3.) Matthew's special reliance on the Chronicles. — The list of David's heroes (1 Chron. xii, 1-47), of which the names (ver. 42-47) are wanting in 2 Sam. xxiii, 8, etc.; the removal of the ark from Kirjath-Jearim to Mount Zion (1 Chron. xiii, xx, 2-4; xxiv, 4-33; comp. with 2 Sam. vi); the candlesticks, tables, and courts of the Temple (2 Chron. iv, 6-9; comp. with 1 Kings vii, 8, 9); the dedication of the altar (1 Kings iv, 22); Solomon's knelt (2 Chron. vi, 12, 13, with 1 Kings vii, 22); in Solomon's prayer, the passage 2 Chron. vi, 14, 42, from Psa. cxxxii, 7; the mention of the fire from heaven consuming the burnt-offering (2 Chron. vii, 1, etc.); the enlarging of the divine promise (2 Chron. xi, 12, 16, with 1 Kings xi, 14, 15); the death of Judas; the address of the prophet Shemaiah (2 Chron. xii, 2-8, with 1 Kings xiv, 23); Amaziah's victory over the Edomites (2 Chron. xxv, 16-16, with 2 Kings xiv, 7); Uziah's leprosy; its cause (2 Chron. xxvi, 16-21, with 2 Kings xv, 5); the passover under Josiah (2 Chron. xxxv, 4-9, with 2 Kings xxi, 19, etc.).

(4.) Other peculiarities distinguishing the book of Chronicles, and fitting it for the altered circumstances in the time of its composition, are the substitution of modern and more common expressions for such as had become unusual or obsolete (comp. in the original 1 Chron. x, 12, with 1 Sam. xxx, 12; 1 Chron. xv, 29, with 2 Sam. vi, 16, etc.), particularly the substitution for the old names of persons, those which were in use during the writer's own day; thus, Gezer (1 Chron. xx, 4), instead of Gob (2 Sam. xx, 18); Abel Maim, Abel on the water [Merom] (2 Chron. xxvi, 4), instead of Abeling-Mashach (1 Kings xv, 20). So also the omission of geographical names which had become unknown, or had ceased to be used, as Saphir (2 Sam. xix, 17), omitted in 1 Chron. xix, 17; so also Zair (2 Kings vii, 21; comp. with 2 Chron. xxix, 9). See particularly 2 Sam. xxiv, 4-8, compared with 1 Chron. xxi, 4. There is also the endeavor to substitute more definite expressions for such as were indefinite, and so possibly ambiguous (as 2 Chron. xxxviii, 5; comp. with
this time the affairs of each king's reign were regularly recorded in a book called at first "the book of the acts of Solomon" (םִּירְבִּי נַחֲלָם), 1 Kings xi, 41), by the name of the king, as before of David, but afterwards in both kingdoms by the general name of chronicles, as in the continually-recurring formula, "Now the rest of the acts of..." («וְיַעֲבֹרָה הַלָּאֹת הָעִקְבָּדִי») of Rehoboam, Abijam, etc.; Jeroboam, Nadab, etc., are they not written in the book of the Chronicles of the kings of Judah" or "of Israel" (1 Kings xiv, 28; xxv, 7, etc.)? This continues to the end of Jehoiakim's reign, as appears from 2 Kings xiv, 5; 2 Chron. xxxvi, 8. It was doubtless from this common source that the passages in the books of Samuel and Kings which deal with the books of Chronicles were derived. All these several works have perished, but the most important matters in them have been providentially preserved to us in the Chronicles.

VII. Discrepancies and Contradictions.—The credibility of the books of Chronicles has been greatly contested by rationalistic writers, but by none with more tenacity than De Wette, first in his Beiträge zur Einleistung (Halle, 1806, i, 1-182), and subsequently in the successive editions of his Einleitung, where he has brought together every sort of difficulty and alleged contradiction, many of which rest only on assumptions which can hardly be entertained as equally probable by another than a Biblical writer. It indeed cannot be denied that many difficulties do exist in this portion of Scripture, and not a few apparent contradictions between its statements and those of the other historical books, particularly as regards proper names and numbers; but these, even if they cannot be satisfactorily explained, scarcely warrant calling in question the sincerity or the credibility of the writer. Thus, for instance, it is objected that 1 Chron. ii, 6 is a false combination of 1 Kings v, 11 [iv, 31]; but nothing is more common than the recurrence of the same names in different families and tribes, and at different periods; and although Havernick unnecessarily admits that some of the names in the two passages are identical, it would certainly indicate rare confusion on the part of the writer of the Chronicles to bring together times and persons so far apart from one another. Ethan the Ezrahite, of the family of Merari (1 Chron. ii, 29 [44]); the son of David's carob (1 Chron. xvi, 17), and the author of Psa. lxxxi. Hezran, also an Ezrahite, and author of Psa. lxviii, was a leader of David's sacred choir (1 Chron. xv, 17), and it is utterly inconceivable that persons, as it would appear, so well known to the writer of the Chronicles, should so considerably be reckoned among the posterity of Judah, and assigned to a time so long antecedent to that of David. See Hezran.

There are, however, real difficulties, particularly in the genealogical tables, and also in various numerical statements, and these, it may be supposed, arose in a greater measure from corruption of the text itself, for in such cases that there is the greatest facility for the rise and the perpetuation of false readings, the context affording little aid for their detection, or rectification if detected. The text of the Chronicles furnishes many instances of such corruptions, although in several cases, where it differs from the corresponding passages in the books of Samuel and Kings, it is just as possible that it shows the true reading. A remarkable case is 1 Chron. vi, 28 [28]. "And the sons of Samuel, the first-born Vashni and Abiah," comp. with 1 Sam. vii, 2, "Now the name of his first-born was Joel, and the name of his second Abiah." It is easy to see how this contradiction has arisen. Samuel Joel had fallen out of 1 Chron. vi, 18, and some transcriber, seeing the necessity for some name after "the first-born," transformed יִשָּׂחֵנ (re-shak-sheni), "and the second," into a proper name, Vashni. The mistake is as old as the Sept._—ורֻתְנֶכֶס וְאֶבָּא נִשָּׂא וְאֶבָּא.
Abad. The Syriac and Arabic read as in Samuel
(Jour. of Soc. Lit. Amer. 1852, p. 198).

(1.) Passages where the readings in Chronicles are
obviously corrupt; sometimes the work itself showing
the erroneousness of the reading, e.g. 2 Chron. ii, 15;
iv, 5, compared with 1 Kings ix, 15, 5.

(2.) Passages where the correct reading is that of the
Chronicles. The father of Amasa is designated in 1
Chron. ii, 17, "Jether, the Ishmaelite:," in 2 Sam. xvii, 25, "Irha, an Ishmeelite.
"Examples of numerical statements: 1 Chron. xviii, 4, compared with 2
Sam. xiii, 4, 1; 1 Chron. xix, 14; 2 Chron. xi, 12, with 2 Sam. xxiv, 13; 2
Chron. xii, 15, and 1 Kings vii, 16, with 2 Kings xxv, 17, where the height of the "chapters" on the "brass pillars," as given in the first two passages, is confirmed by Jer.
ii, 22; 2 Chron. ix, 25, compared with 1 Kings iv, 26; 1
Chron. xi, 11, compared with 2 Sam. xxii, 8; 2
Chron. xvi, 1, 5, etc. comp. with 2 Sam. xv, 1, 5, etc.

(3.) Passages where the correct reading is doubt-
ful: 2 Chron. ii, 2, 17 [18], comp. with 1 Kings v, 30
[18]; 2 Chron. viii, 10, comp. with 1 Kings ix, 23; 2
Chron. viii, 18, comp. with 1 Kin.xx ix, 28, etc. (On
the former, see the probability and verisibility sur-
faced in the introduction. On the latter, see Erklä
rung des alt. Testamentes, I, 1.) See Number. In
Movers, Kennicott, and Gramberg, others may be
found which are injudiciously brought forward as truly
at variance; yet 2 Chron. viii, 18, compared with 1
Kings ix, 28; 1 Chron. xx, 5, comp. with 2 Sam.
xxv, 9, where the numbers of Judah are different,
and other places that might be quoted, present contra-
dictions which evince that the text is corrupt. It
is well known, although the cause has not fully hitherto
been ascertained, that the text of the books of Samuel,
Kings, and Chronicles is in a worse condition than that
of the other inspired writings. Jerome (Pref. ad
Pent.), speaking of the text of Chronicles, says: "I am
hopelessly confused in his days, and assigns this as a
reason why he made a new translation from the He-
brew. Many of the names and words that are differ-
ently written should be referred to this head. Some
omissions and some interpolations also belong to it.
But the principal contradictions relate to numbers.
These seem to have been expressed in various ways;
and copyists, having different methods of marking
them, were naturally exposed to errors. Sometimes
numbers were designated by letters, occasionally by
eipheres, and again they were marked by words. See
Amasa, etc.

(4.) Passages erroneously regarded as contradic-
tory: Between 2 Chron. xxvii, 20, and 2 Kings vii, 79,
there is no contradiction, as they relate to different
stages of the war; and it is quite possible that the mer-
cenary Tiglath-pileser from an ally became an oppo-
nent; a fact even intimated in 2 Kings xi. 18, by
Ahaz's removal of a gallery, which might afford ac-
cess to an enemy. Between 1 Chron. xi, 28, "An
Egyptian, a man of great stature, five cubits high, and
in the Egyptian's hand was a spear like a weaver's
beam," and 2 Sam. xxii, 21, "An Egyptian, a goodly
man, and the Egyptian had a spear in his hand," there
is no contradiction; the one passage being more speci-
cific, but still in accordance with and its purport im-
plied in the other. The Egyptian's noticeable appear-
ance was his stature, with which also his spear corre-
sponded. 2 Chron. xxxiv, 8-7, places the reformation
under Josiah in the twelfth year of his age, while 2
Kings xxviii, 21, referred only to the former passage
referring only to the beginning of the work, while the
other passage points to some great progress in it, the
rooting out of idolatry, as is required by 2 Chron.
xxxiv, 19. Many other passages, which are usually adduced
under this head, do not belong to it: e.g. 2 Chron. ix, 25,
compared with 1 Kings x, 15; 2 Chron. xxii, 22, with 2
Kings vii, 26; 1 Chron. xxi, 1, with 2 Sam.
xxiv, 1; 1 Chron. xxi, 5, with 2 Sam. xxiv, 9; 1
Chron. xxi, 25, with 2 Sam. xxiv, 24; 2 Chron.
xxii, 2, with 1 Kings xv, 10; on the true mode of harmoni-
zation which we refer to Davidson's Sacred Harmonieites,
p. 544-551, where they are resolved. A large class
of the discrepancies in question, affecting the ages and
less conspicuous reigns of the kings, is due simply to the mode of reck-

oning either (a) according to the civil as distinct from the
sacrilegious, or (b) according to dates of associa-
tion with the respective fathers on the throne (Meth.
Quart. Rev., Oct. 1860, p. 619 sq., where all these are
reconciled.). See Chronicle.

Many less important discrepancies are here passed over,
as being referrible to the arbitrary choice of the com-
piler, such as omissions, additions, differences of order,
change of style, etc. Most or all of the real difficulties,
with respect to facts, will be examined under the several
articles to which they relate. Many of the obscurities,
and not a few discrepancies, are apparently insoluble,
owing to the loss of the original data, which alone can
serve to explain them. These are more numerous and
formidable, perhaps, in the Chronicles than in any oth-
er book of Scripture; yet the discrepancies, even were
there no satisfactory solution, cannot greatly affect the
character of the writer of the Chronicles; for the
author was not constrained to follow the historical
纪录s of the kings as the scribe of the former history,
part of the later writer, who, having the earlier works
before him, would not unnecessarily, in matters of fact
and plain numerical statements, where differences and
contradictions were so easily discernible, vary from the
earlier accounts favored by the authority arising from
age and prior acceptance. There can be no ques-
tion, moreover, that many of the discrepancies are owing
to the fault of copyists, while in some they are the
result of the different views and designs of the respect-
ive writers, or the brevity of their statements. In
proof, however, of the accuracy of the Chronicles, the
following particulars are worthy of consideration:

a. The writing of these books is contemporaneous
with the events to which they relate. The time when it occurred to David
to build the Temple of the Lord is indicated (2 Sam. vii, 1), "It came to pass
when ("the") king sat in his house," etc., but more definitely stated in 1 Chron.
xvi, 1 ("as soon as he sat," etc. (see Heng-
stenberg, Christol, I, 144, Berlin, 1854); while the omis-
sion of the words, "and the Lord had given him rest
round about from all his enemies," removes the chron-
ological difficulty in that statement. Of his accuracy,
again, in the genealogical notices, the following ex-
ample may be given: In 1 Chron.
xxvi, 15, Amasa is made of two sisters of David, Abigail and Zeruiah,
the latter of whom was the mother of Joab, Abishai, and
Asahel, who are never designated after their father,
but always after their more illustrious mother (2 Sam.
ii, 18; xxi, 17, etc.). Amasa is referred to as a blood
relation of David (2 Sam. xix, 14); accordingly, 2 Sam.
xxv, Amasa was a son of Abigail, and she sister of Zeruiah, the mother of Joab; but the daugh-
ter of Nahash, not positively of Jesse, and thus per-
haps only half-sister of David. See Nah-
ash. Therefore it is that, in the genealogy of Jesse (1 Chron.
ii, 19-17), she is not styled his daughter, but referred to as the sister of David; a distinction which does not at first sight strike the reader, and the force of
which could not indeed be learned without the infor-
mation furnished in the book of Samuel. So also 2 Chron.
xxi, 7-10 explains the abbreviated statement
(1 Kings viii, 65), and the otherwise contradictory ex-
pressions "the day was over" in the former, referring only to the beginning of the work, while the
many of the discrepancies arise simply from the brev-
ity of the statement.

b. The scrupulous exactness with which the writer
accepted the excerpts from the original documents is vouched for by the fact of his sometimes retaining the very words,
although involving expressions no longer applicable to his own time—a practice which, strange to say, has
furnished ground to assail his accuracy. Thus the
CHRONICLES

Simeonites are said to possess the seats of the Amalekites in Mount Seir, dwelling there "unto this day" (1 Chron. iv, 42, 43), although, long prior to the composition of the history, they had been removed from all their possessions. So also, in the account of the removal of the ark to Solomon's Temple, it is added, "and there it is unto this day" (2 Chron. v, 9).

c. But of more importance is the indirect confirmation given to several statements in the Chronicles by other passages of Scripture. Thus Hezekiah's preparation of the Temple (2 Chron. xxiv, 27) is attested by 2 Kings xxiv, 27. To this incident the prophet Joel refers (ch. iv [iii], 5, 6), where the Philistines are threatened for their plundering of the Lord's property and sale of the Israelites captives; the same also in Amos i, 6. The Philistines again, in the time of Ahaz, invaded the south of Judah, and the text gives important clues (Isa. xviii, 18). With this agrees the prophecy of Isa. xiv, 28-52, which again finds its fulfillment in 2 Kings xviii, 8.

It is important also to notice how the Chronicles form a commentary on various passages of the other books, and errive the accuracy of such statements as at first sight seem to contain discrepancies. Thus, in 2 Sam. vii, 6, no reason is assigned why David should not build the house of Jerusalem, the temple of God, which was included in the promise. But in the other (2 Sam. vii), the truthfulness of the history may be said to be even attested by the names of the exiles born shortly before the restoration, from their so naturally reflecting the hopes which about that time must have been strongly entertained. Thus, in 2 Sam. vii, 13, 19, 20; Hananiah (Jehovah's grace); Berechiah (Jehovah's blessing); Haddadiah (Jehovah's mercy); and Jashobeam (mercy's return).

VIII. Exegetical Helps.—The principal works introductory to these books specially are: Dahler, De lib. Paralipem in antiquitate (Argent. 1815, 8vo); Gräunte, Die Chronik des Alten Testaments (Halle, 1829, 8vo); Movers, Unters. ub. d. Chronik (Bonn, 1834, 8vo); Keil, Versuch ub. d. Chronik (Berl, 1833, 8vo; also De Wette, Hist.-krit. Unters. ub. d. Bücher d. Chronik, in his Beitr. zur Kritik des A. T. 1, 1-152; and against this, Hertz's Vers. u. Vertheid. d. Chronik (Köln, 1839, new edition). Compare the Flapullographia of De Wette, Eichhorn, Hahn, Hävénrück, Keil, and especially Bleek (1860); also Davidson in Horne's Introduction (new ed. ii, 673-688); finally, the remarks by Gese- nius, Gesch. d. hebr. Sprache (1. p. 1815). See Introduction.

Some commentaries on Chronicles are few and defective; in the following list, the most valuable are indicated by an asterisk [*]; prefixed: Jerome, Questions (in his Opp. [Sparta], iii, 769); Theodoret, Questiones (opp. i, pt. 1); Procopius, Scholi (in Opp. viii, 1); Maurus, Commentarii (Opp.); Rabbi and Sene- chii's Commentaries (in Buxtorfii Biblia Hebr. iv); Sarcer, Commentarii (Basil, 1608, 4to); Strigel, Com- mentarii (Lips, 1619, fol.); Savio, Comment- tarii (Tart., 1578; Heidelberg, 1599, fol.); Lortet, Hypomnemata (Rut., 1608, 1614, 8vo); Sarrusius, Commentarii (Moquent. 1609-10, 2 vols. fol.); Sanctius, Commentarii (Antv., 1624; Lyons, 1625, fol.); Bonfère, Commentarii (Tornai, 1645, 2 vols. fol.); Jackson, Annotationes (Lem., 1645, 2 vols. 4to); Beck, Paraphr. hebr. Chronicon cum notis (Lips, 1640, 4to); Wilkins, Rabbi Josephi Paphragr. Chal. (Can- tab., 1717; Amsterd., 1725, 4to); Corn. a Lapide, Lib. Puraeh (in his Commentaria); Michaelis and Ramb- bach, in the Annotationes in Hebr. (Rut., 1646, 251 (Hal- le, 1729); "Horsley, Notes (in the Bibl. Crit. i); Jelleites, Die Propheten (Vienna, 1835, 8vo); Weisse, Die Gesch. (Prag, 1836, 8vo); Königsfeld, Annotationes (Hav., 1839, 4to); Bertholdt, Buchar der Chronik erlautert (Lips, 1854, 8vo, being Lief. 15 of the Esg. Handb.; also in English, Edinburgh, 1857, 8vo); Rahmer, Commentarii (Thorn, 1866, 8vo, vol. i). See Commentary.

Chronology, the science which measures time by the succession of events that occur in the heavens or on the earth. According to the ordinary chronology, chronology may be divided into two kinds, theoretical or technical, and practical or applied; in other words, into mathematical and historical. It is a scientific discipline, by its very nature, trustworthy, as being the result of fixed laws; while the latter is, to a greater degree, contingent and irregular. In this article we have to do only with Biblical dates and the method of their determination. See Astronomy.

1. Elements.—The knowledge of the Hebrews in chronology rested altogether on appearances; not a trace of anything like a scientific view is to be found in their literature. The looks of the Old Testament recognize none of the great areas which other nations have employed. Nor is it until the first book of the Maccabees that such a guide is found. Instead of these, the Hebrews were usually guided by the national and local or national epochs. (See below.) Genealogical tables, indeed, are not wanting, but they are of little service for the general purposes of chronology. (See below.) Formerly great exactness was hoped for in the determination of Hebrew chronology. Although the material is not always accurate, it is true, we may probably date within a few years, it was nevertheless expected that the very day could be ascertained. Hence arose unsoundness and variety of results, and ultimately a general feeling of distrust. At present critics are rather prone to run into this latter extreme. The truth, as might be expected, lies between these two extreme judgments. The character of the records whence we draw our information forbids us to hope for a perfect system. The Bible does not give a complete history of the times to which it refers; in its historical portions it deals with special and detached periods. The chronological information is, therefore, not absolutely certain, although often, with the evident purpose of forming a kind of connection between these different portions, it has a more continuous character than might have been expected. It is rather historical than strictly chronological in its character, and thus the technical part of the subject depends, so far as the Bible is concerned, almost wholly upon inference. See History.

In one particular, however, great care has been usually exercised in the Hebrew records, namely, the prevention of error by the neglect or accumulation of fractional parts of a year in the continuous series of generations, dynasties, events, or reigns. This has been systematically done (as in most other ancient chronologies) by adding these into the beginning of each successive number, i.e., by reckoning, in all cases, from a

Chronology, the science which measures time by the succession of events that occur in the heavens or on the earth. It is a scientific discipline, by its very nature, trustworthy, as being the result of fixed laws; while the latter is, to a greater degree, contingent and irregular. In this article we have to do only with Biblical dates and the method of their determination. See Astronomy.

1. Elements.—The knowledge of the Hebrews in chronology rested altogether on appearances; not a trace of anything like a scientific view is to be found in their literature. The looks of the Old Testament recognize none of the great areas which other nations have employed. Nor is it until the first book of the Maccabees that such a guide is found. Instead of these, the Hebrews were usually guided by the national and local or national epochs. (See below.) Genealogical tables, indeed, are not wanting, but they are of little service for the general purposes of chronology. (See below.) Formerly great exactness was hoped for in the determination of Hebrew chronology. Although the material is not always accurate, it is true, we may probably date within a few years, it was nevertheless expected that the very day could be ascertained. Hence arose unsoundness and variety of results, and ultimately a general feeling of distrust. At present critics are rather prone to run into this latter extreme. The truth, as might be expected, lies between these two extreme judgments. The character of the records whence we draw our information forbids us to hope for a perfect system. The Bible does not give a complete history of the times to which it refers; in its historical portions it deals with special and detached periods. The chronological information is, therefore, not absolutely certain, although often, with the evident purpose of forming a kind of connection between these different portions, it has a more continuous character than might have been expected. It is rather historical than strictly chronological in its character, and thus the technical part of the subject depends, so far as the Bible is concerned, almost wholly upon inference. See History.

In one particular, however, great care has been usually exercised in the Hebrew records, namely, the prevention of error by the neglect or accumulation of fractional parts of a year in the continuous series of generations, dynasties, events, or reigns. This has been systematically done (as in most other ancient chronologies) by adding these into the beginning of each successive number, i.e., by reckoning, in all cases, from a
fixed point in the calendar, so that the years are always to be accounted "full" unless specified as current. Nevertheless, in consequence of the brief and sometimes double lines of era, beginning at various seasons of the year, confusion, or at least difficulty, is often crept into the statements, which is enhanced by the fact that the rule here stated is not observed always with the same care. It is especially true in the parallel lists of the kings of Judah and Israel (q. v.).

1. Generations. It is commonly supposed that the genealogies given in the Bible are invariably continuous. When, however, we come to examine them closely, we find that many are broken without being so in consequence technically defective as Hebrew genealogies. A notable instance is that of the genealogy of our Saviour given by Matthew, where Joseph is immediately followed by Oziel, as if his son—Ahaaiel, Joseph, and Amaziah being omitted (Matt. i, 6). That this is not an accidental omission of a copier is evident from the specification of the number of generations from Abraham to David, from David to the Babylonian Captivity, and from the Babylonian Captivity to Christ, in each case fourteen generations. Probably these missing names were purposely left out to make the number for the interval equal to that of the other branch omitting such an omission as obvious and not liable to cause error. In Ezra's genealogy (Ezra vii, 1-5) there is a similar omission, which in so famous a line can scarcely be attributed to the carelessness of a copier. There are also examples of a man being called the son of a remote ancestor, as "Shebuel the son of Gershom [Gershon], the son of Moses" (1 Chron. xxvi, 24). So, in historical narratives, Jehu is called "the son of Nimshi" (1 Kings xix, 16; 2 Kings ix, 20; 2 Chron. xxii, 7), as well as "the son of Jehoshaphat the son of Nimshi" (1 Kings ix, 2, 14). Laban is called "the son of Nahor" (Gen. xxvii, 5), for grandson (xxviii, 2, 5; comp. xxii, 20-22). We cannot, therefore, venture to use the Hebrew genealogical lists to compute intervals of time except where we can prove each descent to be immediate, and where the length of each generation is given. See Genealogy.

Ideler remarks that Moses reckons by generations (Handbuch, i, 506); but this is not the manner of Hebrew time. In Genesis there are three generations to a century (ii, 142). There is no use of a generation as a division of time in the Pentateuch, unless, with some, we suppose that "the" a "generation," in Gen. xv, 16, is so used; those, however, who hold this opinion make it an interval of a hundred years, since it would, if a period of time, seem to be the fourth part of the 400 years of verse 15; most probably, however, the meaning is that some of the fourth generation should come forth from Egypt. See Generation.

2. Divisions of Time. See Time. (1) Hour. The hour is supposed to be mentioned in Daniel (iii, 15: iv, 16, 30 [Engl. 19, 38: v, 5]), but in no one of these cases is a definite period of time clearly intended by the Chaldean term (םבש, nнбш, nнбш) employed. The Egyptians divide the day and night into 24 parts (see below), as do ourselves from at least B.C. cir. 1200 (Lepelus, Chronologie der Äg., i, 130). It is therefore not improbable that the Israelites were acquainted with the hour from an early period. The "sun-dial of Ahaz," whatever instrument, fixed or movable, it may have been, is simply a division of the kind. See Dial. In the N. T. we find the same system as the modern, the hours being reckoned from the beginning of the Jewish night and day. See Hour.

(2) Day. For the civil day of 24 hours we find in one place (Dan. viii, 14) the term נבנב, nнбн, "evening-morning," Sept. νεβητηρα (also in 2 Cor. xi, 25, A. V. "a night and a day"). Whatever may be the proper meaning of this Hebrew term, it cannot be doubted here to signify "nights and days." The common word for day as distinguished from night is also used for the civil day, or else both day and night are mentioned to avoid vagueness, as in the case of Jonah's "three days and three nights" (Jon. ii, 1 [A. V. 1, 17]; comp. Matt. xii, 40). The civil day was divided into night and natural day, the periods of darkness and light, and this is especially true of the Jewish day, which stands first in the special term given above. The night, נבנב, and therefore the civil day, is generally held to have begun at sunset. Ideler, however, while admitting that this point of time was that of the commencement of the civil day among all other nations known to us which followed a lunar reckoning, objects to the opinion that this was the case with the Jews. He argues in favor of the beginning of deep night, reasoning that, for instance, in the ordaining of the Day of Atonement, on the 10th of the 7th month, it is said "in the ninth day of the month at even, from even unto even, shall ye celebrate (literally, rest) your Sabbath" (Lev. xxiii, 32); where, if the civil day began at sunset, it would have been said that they should commence the observance on the evening of the 10th day, or merely on the 10th day, supposing the word "evening" (נבנב) to mean the latter part of our afternoon. He cites, as probably supporting this view, the expression נבנב נבנב, "between the two evenings" used of the time of offering the passover and the daily evening sacrifice (Exod. xii, 6; Num. ix, 8; xxviii, 4); for the Pharisees, whom the present Jews follow, took it to be the time between the 9th and 11th hour of the day or from 6 to 8 P.M. to 9 to 11 P.M., the Samaritans and Karaites supposed it to be the time between sunset and full darkness, particularly on account of the phrase נבנב בִּשְׁנָשָׁה, "when the sun is setting," used in a parallel passage (Deut. xxxi, 6) (see Handbuch, i, 482-484). These passages and expressions may, however, be not unreasonably held to support the common opinion that the civil day began at sunset. This "between the two evenings" can scarcely be supposed to have originally indicated a long period; a special short period, though scarcely a point, the time of sunset, is shown to correspond to it. This is a natural division between the late afternoon, when the sun is low, and the evening, when his light has not yet disappeared—the transition into which the natural evening would be cut by the commencement of the civil day, if it began at sunset. There is no difficulty in the command that the observance of so solemn a day as that of Atonement should commence a little before the true beginning of the civil day, that due preparation might be made for the sacrifices. In Judæa, where the duration of twilight is very short at all times, the most natural division would be at sunset. The natural "day" (נבנב) probably was held to commence at sunrise, morning-twilight being included in the last watch of the night, according to the old as well as the later division; some, however, made the morning-watch part of the day. See Day; Night. Four natural periods, smaller than the civil day, are divided into: the evening, or נבנב, morning of which there is frequent mention, and the less usual תּילֹה, תיל, "the two lights," as though "double light," noon, and תילֹה תיל, תיל, "half the night," midnight. No one of these with a people not given to astronomy seems to indicate a point of time, but all to deal: nate periods, evening and morning being, however, much longer than noon and midnight. The night was divided into watches (תיל תיל). In the O. T. but two are expressly mentioned, and we have to infer the existence of a third, the first watch of the night. (In Lxxm. ii, 19, תיל תיל תיל of course refers to, without absolutely designating, the first watch.) The middle watch
The Hebrew week was a period of seven days, ending with the Sabbath; therefore it could not have been a division of the month, which was lunar, without intercalation. But there was no such intercalation, since the Sabbath was to begin its seven days at the new moon, as it is mentioned for weeks and months. The mention together of Sabbaths and new moons proves nothing but that the two observances were similar, the one closing the week, the other commencing the month. The week, whether a period of seven days or a quarter of the month, is of common use in antiquity. The Egyptians, however, were without it (with Dion Cassius, xxxvii. 19, comp. Lepsius, Chronol. d. Äg., i, 131, 133), dividing their month of 30 days into decades, as did the Athenians. The Hebrew week, therefore, cannot have been adopted from Egypt; probably both it and the Sabbath were used and observed by the Canaanites. See Month and Sabbath.

The months by which the time is measured in the account of the Flood may have been of 30 days each, possibly forming a year of 360 days, for the 1st, 2d, 7th, and 10th months are mentioned (Gen. viii. 13; vii. 11; viii. 14, 4, 5). Ideler, however, contests this, arguing that as the water first began to sink after 150 days (and then had been raised by all the糇e, as it must have sunk) for some days were the ark could have rested on Ararat, so that the second date must be more than 150 days later than the first (Handbuch, i, 69, 70, 478, 479). This argument depends upon the meaning of "high mountains," and upon the height of those "the mountains of Ararat" (vii. 5), of which the ark rested on. But this is connected with the universal height of the Flood. See Deluge. On the other hand, it must be urged that the exact correspondence of the interval to five months of 30 days each, and the use of a year of 360 days, in prophetic passages of both Testaments, are of no slight weight. That the months from the giving of the Law until the time of the Second Temple, when we have certain knowledge of their character, were always lunar, appears from the command to keep new-moons, and from the unlikelihood of a change in the calendar. These lunar months have been supposed to have been always alternately of 29 and 30 days. Their average length would of course be a lunation, or a little (44) above 294 days, and therefore they would in general be alternately of 29 and 30 days; but it is possible that occasionally months might occur of 28 and 31 days, if, as is highly probable, the commencement of each was strictly determined by observation; that observation was employed for this purpose is distinctly affirmed in the Babylonian Talmud of the practice of the time at which it was written, when, however, a month was not allowed to be less than 29, or more than 30 days in length. The first day of the month is called kal'ah, "new moon;" Sept. ἀρχιμήνια, from the root מַעֲנֵי, to be new; and in speaking of the first day of a month this word was sometimes used with the addition of a number for the whole expression, "in such a month, on the first day," as וְהָיָה הַיָּמִים לְצָרְכֵי הוא, "On the third new-moon . . . on that day" (Exod. xix, 1); hence the word came to signify month, though then it was sometimes qualified (יוֹם יֵשִׁירָה). The new-moon was kept as a sacred festival (q. v.). In the Pentateuch and Josiah in the second, Ethannim, יָהָשְׁמִים, the seventh, and Bul, בַּעַל, the tenth, have no name, appear, like that of Ahith, to be connected with the phenomena of a tropical year. No other names are found in any book prior to the Capitvity, but in the books written after the return the later nomenclature still in use appears. This is evidently of Babylonian origin, as the Jews themselves affirm. See Month.
new moon was chosen through observation of the forwardness of the barley-crops in the warmer districts of the country (Handbuch, l, 490). There is, however, this difficulty, that the different times of barley-harvest in various parts of the country made it liable to cause confusion. It seems, therefore, not unlikely that the Hebrews adopted the solar means of determining their new-year's day by observations of heliacal risings or similar stellar phenomena known to mark the right time before the barley-harvest. Certainly the ancient Egyptians and the Arabs made similar means.

The method of intercalation can only have been that which obtained after the Captivity—the addition of a thirteenth month, whenever the twelfth ended too long before the equinox for the first-fruits of the harvest to be offered in the middle of the month following, and the similar offerings at the times appointed. This method would be in accordance with the permission granted to postpone the celebration of the Passover in the case of any one who was either legally unclean or journeying at a distance, for a whole month, to the 14th day of the second month (Num. ix. 9-13), of which permission we find Hezekiah to have availed himself for both these reasons, and the reason of safety, by the intercalation of 454 days before the Babylonian Captivity. The later Jews had two beginnings to the year, or, as it is commonly, but somewhat inaccurately, said, two years. At the time of the Second Temple these two beginnings obtained, the seventh month being the civil reckoning before Abib, the first of the sacred. Hence it has been held that the institution of the time of the Exodus was merely a change of commencement, and not the introduction of a new year; and also that from this time there were the two beginnings. The former opinion is at present purely hypothetical, and has been too much mixed up with the latter, for which, on the contrary, there is some evidence. See YEAR.

(6.) SEASONS.—The ancient Hebrews do not appear to have divided their year into fixed seasons. We find mention of the natural seasons, γαύρι, "summer," and γεφυρώ, "winter," which are used for the whole year (in Ps. lxxiv. 17; Zech. xiv. 8; and perhaps Gen. viii. 22). The former of these properly means the time of cutting fruits, and the latter that of gathering fruits; the season of harvests corresponding to the early fruit season, the other to the late one. Their true significations are, therefore, rather summer and autumn than summer and winter. There can be no doubt, however, that they came to signify the two grand divisions of the year, both from their use together as the two seasons, and from the mention of the "winter-house" (ἴδρυμα ἡμείως) and the "summer-house" (γεφυριζόμενον), Amos iii. 15. The latter evidence is the stronger, since the winter is the time in Palestine when a palace or house of different construction would be needed from the light summer pavilion, and in the only passage where referred to in which the winter-house is mentioned, we read that Jehoiakim "sat in the winter-house in the ninth month"; that is, almost at mid-winter; "and there was a fire burning in the hearth burning before him" (Jer. xxxvi. 22). It is probable, however, that "winter," or γεφυρώ, when used without reference to the year, as in Job xxix. 4, has its original significance. The phrase ἡμερας ἀγενέκτων, "cold and heat," in Gen. viii. 22, is still more general, and cannot be held to indicate more than the great alternations of temperature, which, like those of day and night, were promised not to cease (Ideler, Handbuch, i, 494). There are two agricultural seasons in a more proper character, harvest and seed-time, which were in their ordinary use. These are γεφυρώ, "seed-time," and ἐφόρω, "harvest." Ideler makes these equal to the foregoing seasons when similarly used together; but he has not proved this, and the passage he quotes (Gen. l. c.) cannot be held to afford any evidence of the kind, until some other two terms in it are proved to be strictly correspondent. See SEASON.

3. Festivals and Holy Days.—Besides the Sabbaths and new moons, there were four great festivals and a fast in the month Abib. The celebration of every seventh and fifthieth year. See FESTIVAL.

(1.) The Feast of the Passover (πάσχας) was properly only the time of the sacrifice and eating of the paschal lamb, that is, the evening, ἡμέρας ἐπιτιήσεως, between the two evenings" (Lev. xxiii. 5)—a phrase previously considered—of the 14th day of the first month, and the night following, the Feast of Unleavened Bread (πάσχας) commencing on the morning of the 15th day of the month, and lasting seven days, until the 21st inclusive. The 15th and 21st days of the month were Sabbaths, that is, holy days. See PASSOVER.

(2.) The Feast of Weeks (πάσχας τῆς Μειναίων), or Pentecost, was kept at the close of seven weeks, counted from the day inclusive following the 16th of the 1st month. Hence its name means the feast of seven weeks, as indeed it is called in Tobit (ギαν ιστρα ιπποδώμαπ, i, 1). As the ears of barley as first-fruits of the harvest were offered on the 16th day of the 1st month, so on this day thanksgiving was paid for the blessing of the harvest, and fruit, chiefly of wheat offered as first-fruits; hence the names πάσχας Μειναίων, Feast of the Harvest, and πάσχας τῆς Μειναίων, Day of the First-fruits. See PENTECOST.

(3.) The Feast of Trumpets, πάσχας τῆς Μέγας, lit. day of trumpet-sound, also called πάσχας τῆς Μειναίων, i. e., "a great festival of celebration by the sound of the trumpet," was the 1st day of the 7th month, the civil commencement of the year. See TRUMPET.

(4.) The Day of Atonement, ἡμέρα ἡμέρας, was the 10th day of the 7th month. It was a Sabbath, that is, a holy day, and also a fast, the only one in the Hebrew year before the Babylonian Captivity. Upon this day the high-priest made an offering of atonement for the nation. This annual solemn rite seems more appropriate to the commencement than to the middle of the year; and the time of its celebration thus affords some evidence in favor of the theory of a double beginning. See ATONEMENT (DAY-OF).

(5.) The Feast of Tabernacles, ἡμέρας τῆς ἡμέρας, was kept in the 7th month, from the 15th to the 22nd days inclusive. Its chief days were the first and seventh Sabbaths. It was taken from the people dwelling in tabernacles, to commemorate the Exodus. It was otherwise called πάσχας τῆς ἁγιασµον, i. e., "the feast of gathering," because it was also instituted as a time of thanksgiving for the end of the gathering of fruit and of the vintage. See TABERNACLES (FEAST OF).

The small number and simplicity of these primitive Hebrew festivals and holy days is especially worthy of note. It is also observable that they are not of an astronomical character; and that when they are connected with nature, it is as directing the gratitude of the people to him who, in giving good things, leaves not himself without witness. In later times many holy days were added. Of these the most worthy of remark are the Feast of Purim, or "Long," commemorative of the deliverance of the Jews from Haman's plot, the Feast of the Dedication, recording the cleansing and rededication of the Temple by Judas Maccabaeus, and fasts on the anniversaries of great national misfortunes connected with the Babylonian Captivity. These last were doubtless instituted during that period (comp. Zech. vii. 1, Ps. cxxxix. 11), and the memory of the most recent event.

(6.) Sabbatical and Jubilee Years.—The sabbatical year, ἡμέρας τῆς ἡμέρας, "the fallow year," or possibly "year of remission," or ἱεραυνία alone, also called a "sabbath," and a "great sabbath," was an institution of strictly the same character as the Sabbath—a year.
of rest, like the day of rest. It has not been sufficiently noticed that as the day has a side of physical necessity with reference to man, so the year has a side of physical necessity with reference to the earth. Every seventh year appears to be a very suitable time for the recurrence of a sabbatical year, on agricultural principles. Besides the rest from the labors of the field and vineyard, there was in this year to be remissness, temporary or absolute, of debts and obligations among the people. The sabbatical year seems to have commenced at the civil beginning of the year, the seventh month. Although doubtless held to commence with the first of the month, its beginning appears to have been kept at the Feast of Tabernacles (Deut. xxxi., 10), while that of the jubilee year was kept on the Day of Atonement. This institution seems to have been greatly neglected, as indeed was prophesied by Moses, who speaks of the desolation of the land as an enjoying the sabbaths which had not been kept (Lev. xxvi., 34, 35, 43). The seventy years' captivity is also spoken of in 2 Chron. (xxvi., 21) as an enjoying sabbath; but this may be on account of the number being sabbatical, as ten times seven, which, indeed, seems to be indicated in the sabbatical periods, or forty-nine years, a year of jubilee was to be kept, immediately following the last sabbatical year. This was called בְּרוֹאָל the "year of the trumpet," or הָרְוֹאָל alone, the latter word meaning either the sound of the trumpet or the instrument itself, because the commencement of the year was announced on the Day of Atonement by sound of trumpet. It was similar to the sabbatical year in its character, although doubtless yet more important. In the jubilee year debts were to be remitted, and lands were to be restored to their former owners. It is obvious from the words of the law (Lev. xxv., 8-11) that this year followed every seventh sabbatical year, so that the opinion that it was always identical with a sabbatical year is untenable. There is a further question as to the length of each jubilee period, if we may use the term, some holding that it had a duration of fifty, but others of forty-nine years. The latter opinion does not depend upon the supposition that the seventh sabbatical year was the jubilee, since the jubilee might be the first year of the next seven years after. That such was the case is rendered most probable by the analogy of the weekly Sabbath, and the custom of the Jews in the days of the Maccabees; although it must be noted that, according to Maimonides, the jubilee period was of fifty years, the fifty-first year commencing a new period, and that the same writer mentions that the Jews had a tradition that after the destruction of the first Temple only sabbatical years, and no jubilee years were observed (Ideler, Romane Chronik, i., 468, 504). The testimony of Josephus does not seem to us at all conclusive, although Ideler (L. c.) holds it to be so; for his language (πάντα παντοφάναι μία ημερία πάντα, Ant. iii., 12, 8) cannot be held to prove absolutely that the jubilee was not the first year of a sabbatical period, instead of standing between two such periods. It is important to ascertain whether the first sabbatical year ought to have been kept; whether the sabbatical and jubilee periods seem to have been continuous; what positive record there is of any sabbatical or jubilee years having been kept; and what indications there are of a reckoning by such years. It can be contested that the first sabbatical year to be kept after the Israelites had entered Canaan would be about the fourteenth (Jennings, Jewish Antiquities, bk. iii., cap. 9). It is possible that it might have been somewhat earlier or later; but the narrative will not admit of much latitude, and the jubilee years kept from the time of Joshua until the destruction of the first Temple would have been reckoned from the first one, but it may be questioned if any kept after the return would be counted in the same manner: from the nature of the institutions, it is rather to be supposed that the reckoning, in the second case, would be from the first cultivation of the country after its reoccupation. The first year of the period do not enable us to test this supposition, because we do not know exactly the year of return, or that of the first cultivation of the country. The recorded dates of sabbatical years would make that next after the return to commence in B.C. 528, and be current in B.C. 527, which would run. The first year of the period B.C. 584-3, which would not probably be the first year of cultivation; but in the case of so short a period this cannot be regarded as evidence of much weight. There is no positive record of any jubilee year having been kept at any time. The dates of three sabbatical years have, however, been preserved. These were current B.C. 169, 185, and 57, and therefore commenced in each case about three months earlier than the beginning of these Julian years (Josephus, Ant. xii., 9, 5; xiii., 8, 1; xiv., 10, 2; xv., 1, 2; War. i., 2, 4; and 1 Macc. vi., 49, 58). There are some chronological indications in the O. T. that may not unreasonably be supposed to be referred to such periods. The prophet Ezekiel dates his first prophecy of those in the book "in the thirtieth year," etc., "which was the fifth year of king Jehoiachin's captivity" (i., 2); thus apparently dating in the former case from a better known era than that of Jehoiachin's captivity, which he placed later, having, however, in general again describing it. This date of the 59th year has been variously explained; some, with Usher, suppose that the era is the 18th year of Josiah, when the book of the law was found, and a great passover celebrated (see Hävernick, Commentar über Ezeli. p. 12, 13). This year of Josiah would certainly be the first of the reckoning, and might be used as a kind of reformation-era, not unlike the era of Simon the Macabee. Others suppose that the thirtieth year of the prophet's life is meant, but this seems very unlikely. Others again, including Scaliger (De Emendatione Temporum, p. 73, 216, ed. 1680) and Rosenmüller (Schell. in loc.), hold that the 59th was from the commencement of the reign of Nataopollassar. There is no record of an era of Nabopolassar; that king had been dead some years; and we have no instance in the O. T. of the use of a foreign era. The evidence, therefore, is in favor of Josiah's 18th year, B.C. 628. There remains the question whether the time when the iniquity of Judah is said to be 40 years, for the final captivity of Judah (Jer. iii., 8), was in the 41st year of this reckoning. In the same place (Ezek. iv., 6) the time of the iniquity of Israel is said to be 390 years, which sum, added to the date of the captivity, is the date of the part of the nation, B.C. 720, goes back to B.C. 1111. This result leads to the indication of possible jubilee dates; for the interval between B.C. 1111 and B.C. 623-2 is 488-9 years, almost exactly ten jubilee periods; and it must be remembered that the seventy weeks of the prophet Daniel seem to indicate the unit of such a great number. The prophetic theory, whether of Josiah's reformation present any indications of celebrations connected with the sabbatical system. The finding of the book of the Law might seem to point to its being specially required for some public service. Such a service was the great reading of the Law to the whole congregation of Israel, in the first month of the first sabbatical year (Deut. xxxi., 10-18). The finding of the book was certainly followed by a public reading, apparently in the first month, by the king to the whole people of Judah and Jerusalem, and afterwards a solemn passover was kept. Of the latter celebration it is said, "Ye kept not the sabbath, ye kept not such a passover from the days of the Judges that judged Israel, nor in all the days of the kings of Israel, nor of the kings of Judah" (2 Kings xxiii., 22) and in
Chronology. "There was no passover like to that kept in Israel from the days of Samuel the prophet; neither did all the kings of Israel keep such a passover as Josiah kept" (2 Chron. xxiv. 11). The institution of Samuel is remarkable, since in his time the earlier supposed date (B.C. 1111) falls. It may be objected that the passover is nowhere connected with the sabbatical reckoning; but these passovers can scarcely have been greater in sacrifices than at least one in Solomon's reign, nor is it likely that they were considered as characterized by greater zeal than any others whatever, so that we are almost driven to the idea of some relation to chronology. See SABBATICAL YEAR; JUBILEES.

4. Era.—There are indications of several historical eras having been used by the ancient Hebrews, but our information is so scanty that we are generally unable to come to positive conclusions. Some of these possible eras may be no more than dates employed by writers, and not national eras; others, however, can scarcely have been used in this special or individual manner from their referring to events of the highest importance to the Hebrews. See EXODUS.

(1.) The Exodus is used as an era in 1 Kings vi, 1, in giving the date of the foundation of Solomon's Temple. This is the only positive instance of the occurrence of this era, for we cannot agree with Ideler that it is certainly employed in the Pentateuch. He refers to 1 Sam. xxi. 1 (Numb., xxiv. 10); Jer. xi. 31; Ezek. xxv. 27; 2 Kings xxiii. 28; 1 Chron. xiv. 24; and 2 Chron. xvi. 13; xix. 5. Here, as elsewhere in the same part of the Bible, the beginning of the Exodus-year—not.of course, the actual date of the Exodus (see REGnal YEARS, below)—is used as the point whence time is counted; but during the interval of which it formed the natural commencement it cannot be shown to be an era, though it may have been, any more than the beginning of a sovereign's reign is one. See EXODUS.

(2.) The foundation of Solomon's Temple is conjectured by Ideler to have been an era. The passages to which he refers (1 Kings ix, 10; 2 Chron. viii, 1) merely speak of occurrences subsequent to the interval of 20 years occupied in the building of the Temple and the king's house, both being distinctly specified; so that his reading ("Wanzig Jahre, nachdem Salomo das Haus des Herrn erbaut") leaves out half the statement, and so makes it incorrect (Hahn, l. c.). It is elsewhere stated that the building of the Temple occupied 20 years (1 Kings vi. 14-30; 2 Chron. iii. 1-17), and that of Solomon's house thirteen (vii, 1), making up the interval of twenty years. See TEMPLE.

(3.) The era once used by Ezekiel, and commencing in Josiah's 18th year, we have discussed above. See JOSIAH; EZEKIEL.

(4.) The era of Jehoiachin's captivity is constantly used by Ezekiel. The earliest date is the 6th year (i, 2), and the latest the 27th (xxix, 17). The prophet generally gives the date without applying any distinctive term to the era. He speaks, however, of "the fifth year of king Jehoiachin's captivity" (i, 2), and "the twelfth year of our captivity" (xxiii, 21), the latter of which expression may explain the constant use of the era. The same era is necessarily employed, though not such, as where the advancement of Jehoiachin in the 37th year of his captivity is mentioned (2 Kings xxiv, 27; Jer. ii, 31). We have no proof that it was used except by those to whose captivity it referred. Its first year was current B.C. 598, commencing in the spring of that year. See JEHONACHIN.

(5.) The beginning of the seventy years' captivity does not appear to have been used as an era; but the destruction of Jerusalem by the Babylonians is occasionally referred to for chronological purposes (Ezek. xl. 1). See LXX.

(6.) The return from Babylon does not appear to be employed as an era; it is, however, reckoned from in Ezra (iii, 1, 9), as is the Exodus in the Pentateuch. See EXODUS.

(7.) The era of the Seleucidæ is used in the first and second books of Maccabees. See SELECTUS.

(8.) The liberation of the Jews from the Syrian yoke in the first year of Simon is stated to have been commemorated by an era used in contracts and agreements (1 Mac. xiii, 41). The years 1, 2, and 3 on the coins ascribed to Simon [see Money; Shekel] are probably of this era, although it is related that the right of coining money with his own stamp was not conferred upon him until somewhat later than its beginning (xv, 6), for it may be reasonably supposed either that Antiochus VII confirmed privileges before granted by his brother Demetrius II (comp. xv, 5), or that he gave his sanction to money already issued (Encycl. Brit., 8th ed., s. v. Numismat., p. 379). See PTOLEMAIUS, MACCABEES.

(9.) Regnal Years.—By the Hebrews regnal years appear to have been counted from the beginning of the year, not from the day of the king's accession. Thus, if a king came to the throne in the last month of one year, reigned for the whole of the next year, and died in the first month of the third year, we might have dates in his second and third years, although he governed for no more than thirteen or fourteen months. Any dates in the year of his accession before that event, or in the year of his death after it, would be assigned to the last year of his predecessor and the first of his successor. The same principle would apply to non-Hebrew regnal years. The events, but the whole stated lengths of reigns or intervals would not be affected by it. See KING; KINGDOM.

II. Data.—The historical part of Hebrew chronology is not less difficult than the technical. The information in the Bible that is neither more accurate than inferential, although there is very important evidence of the latter kind; but the present state of the numbers makes absolute certainty in some cases impossible. In addition to this difficulty, there are several gaps in the series of smaller numbers which we have no means of supplying with exactness. When, therefore, we compare several of these smaller numbers with a larger number, or with independent evidence, we are frequently prevented from putting a conclusive test by the deficiencies in the first series. Lately some have laid great stress upon the frequent occurrence of the number 40, alleging that it and 70 are vague terms equivalent to "many" or "several," but this would mean no more than "many years." Prima facie this idea would seem reasonable, but on a further examination it will be seen that the details of some periods of 40 years are given, and show that the number is not indeterminate where it would at first especially seem to be so. Thus the 40 years in the wilderness can be divided into three periods: 1. From the Exodus to the sending out of the spies was about one year and a quarter (1 year, 1 + 2 [?] months, Num. ix, 1; x, 11; comp. ver. 29, showing it was this year, and xiii, 20, proving that the search ended somewhat after midsummer); 2. The time of search, 40 days (Num. xiii, 23); 3. The time of the crossing of the river Zered was crossed, 38 years (Deut. ii, 14)—making altogether almost 394 years. This perfectly accords with the date (yr. 40, m. 11, d. 1) of the address of Moses after the conquest of Sihon and Og (Deut. i, 3, 4), which was subsequent to the crossing of the river Zered. So, again, David's reign of 40 years is divided into 7 years 6 months in Hebron, and 38 in Jerusalem (2 Sam. ii, 11; v, 5; 1 Chron. iii, 4; but 1 Kings ii, 11, 7 years, omitting the months, and 38). This, therefore, cannot be an indefinite number, as some might conjecture from its following Saul's 40 years, and providing Solomon with the very numbers of Saul's life. The last two numbers have not been much more or less from the circumstances of the history. The occurrence of some round numbers, therefore, does not warrant our supposing the constant use of vague ones. See NUMBER.
The attempt to "correct" or improve the Hebrew chronology by means of the dates lately deciphered from the Egyptian and Assyro-Babylonian inscriptions has in fact been a favorite method of late, as was in previous times a similar comparison with the records of ancient records in heathen authors. But, unfortunately, these statements are so discrepant with one another, and the results vary so widely, as to be of very little practical value, for such a purpose. The hieroglyphical dates are too fragmentary and disconnected, as well as too uncertainly translated hitherto, to afford any definite chronological chain; and the eponymous legends do not rise so early as the disputed part of Biblical chronology. See Egypt; Assyria.

1. From Adam to Abram: Departure out of Haran. — All the numerical data in the little for the chronology of this interval are comprised in two genealogical lists in Genesis, the first from Adam to Noah and his sons (Gen. v, 3 to the end), and the second from Shem to Abram (xi, 10-26), and in certain passages in the same book (vii, 6, 11; viii, 18; ix, 26, 29; xi, 9, xii, 4). The Masoretic Hebrew text, the Septuagint Version, and the Samaritan Pentateuch greatly differ, as may be seen by the following table, while the parallel causes whatever. As no two of the lists correspond throughout, and as a high degree of antiquity undoubtedly belongs to them all, each has his advocates as the true original. The cardinal importance of the subject demands a clear, full, and impartial examination of the arguments that bear upon their authority severally, as well as upon the accuracy of particular numbers.

accounts of Josephus (Ant. i, 8, 8, and 4, 9; 6, 5; 7, 1) do not exactly tally with any of them. The Latin Vulgate strictly conforms to the Hebrew. The principal various readings are given between brackets, and the numbers which are combined from statements in the text are enclosed in a parenthesis. In this period there are a number of serious difficulties.

(1.) The number of generations in the Sept. is one in excess of the Heb. and Samar., on account of the "Second Cainan," whom the best chronologists are agreed in rejecting as spurious. He is found elsewhere only in some copies at 1 Chron. i, 17, and in Luke iii, 38. Josephus, Philo, and the earlier Christian writers appear, however, to have known nothing of him, and it is therefore probable either that he was first introduced by a copyster into the Gospel and thence into the Sept., or else that he was found in some MSS. of the Sept. and thence introduced into the Gospel, and afterwards into all other copies of the Sept. See CAINAN.

(2.) The remarkable discrepancies in nearly all the names as to the respective ages before and after the birth of the eldest son, while the totals given generally agree, has occasioned greater variety in the schemes of different Biblical chronologists than any or all other is here of more weight, but in his present text it shows contradiction, though preponderating in favor of the Sept. numbers. A comparison of the lists would lead us to suppose, on internal evidence, that they had first two forms, and that the third version of them originated from these two. This supposed later version of the lists would seem to be the Samar., which certainly is less internally consistent, on the supposition of the original correctness of the numbers, than the other two. The cause of the alterations is most uncertain. It has indeed been conjectured that the Jews shortened the chronology, in order that an ancient prophecy that the Messiah should come in the sixth millenary of the world's age might be fulfilled in the advent of our Lord. The reason may be sufficient in itself, but it does not rest upon sufficient evidence. It is, however, worthy of remark, that in the apostolic age there were hot discussions respecting genealogies (Tit. iii, 9), which would seem to indicate that great importance was attached to them, perhaps also that the differences, or some difference, then existed. The different proportions of the generations and lives in the Sept. and Heb. have been asserted to afford an argument in favor of the former. At a later period, however, when we find instances of longevity
recorded in all versions, the time of marriage is not different from what it is at the present day, although there are some long generations. A stronger argument for the Sept., in view of the unity of the human race, is found in the long period required from the Flood to the Dispersion and the establishment of kingdoms, when all the wisdom would, if the patriarchal generations should be either exceptional or represent generations. For the former of these hypotheses we shall see there is some ground in the similar case of certain generations, just alluded to, from Abraham downwards. With respect to probability of accuracy, the Sept., with its various readings, 2:42 or 22:3 plus 942 or 1042, or 1072, or 1172; the Samaritan, 1307 plus 942.

This last, however, need not come into consideration, since it is well understood that the Samaritan text, here as elsewhere, is merely fabricated from the Greek (Hengstenberg, _A nth. der Pent._, 1 sqq.) and those who treat it as an independent authority (e. g. Lepelletier, _Chr. der saeral. Forsch._, iv, 1 sqq.) only are ignorant of the results of criticism on this subject. Of course the Sept., in one or more of its enumerations, would be followed by those early inquirers who had access to that text only; the earliest extant estimate, by Demetrius, an Alexandrine Jew of the third century B.C. (quoted from Alexander Polyhistor by Eusebius, _Prap._, iv, 9), took the number of men from Adam to the birth of Abraham 2262 plus 1072. Josephus certainly did not follow the Sept.; his numbers in the generations before and after the Flood have been forced into conformity with the Greek by a later and unskilful hand, which betrays itself by leaving its work incomplete (Brown, _Ordo Sacr._, § 210–221). As the chronology of Dr. Hales (which some still accept as authoritative) professes to be based on the Sept., rectified by the aid of Josephus, it ought to be known that the text of this author, besides having been palpably vitiated in this portion of it (Jud. 1, 3, 4, 5, 6, 7), swarms with gross inconsistencies, caused, it would seem, by his own efforts to force such umnum readings, a series of years having been deducted from the earlier generations, the operation was not carried on with the later. It is noticeable that the stated sums in the post-diluvian generations in the Samar. generally agree with the computed sums of the Heb., and not with those of the Sept., which would be explained by the theory of an adaptation of one of these two to the other, although it would not give us reason for supposing either form to be the earlier. The general presumption, on external grounds, would certainly be in favor of the Heb., both as being unquestionably the original from which the text of Josephus (which is oral, and the later, or conjectural, and the numbers, (all) are known to have been translated—and a version can never rise higher in authority than its source; and also because of the manifestly greater state of purity in which this text has been transmitted to us, in comparison with either of the others. See Smek, _The Bible in the Greek Church_ , p. 185. But the text of Josephus is too corrupt in its numbers to be at all relied upon, as may be seen from the slightest comparison of the sums in the title of the chapters with the detailed contents, having doubtless been tampered with by readers who used only the Sept. or Vulg. versions.

The Sept. harmony with the Patriarchal text, on the other hand, is too strong to be neglected. The redactor of the book of Genesis intended that the narrative should be connected by this continuous series of time-marks. Jewish and Christian chronographers accepted the statements unquestioned, and held that the series of years of the world thus formed, from the creation of the man to the death of Joseph, accor-
ded with the truth of facts. The import and the authority of the numerical statements were to them unimpeachable; the only question was that which related to their genuine form. And supposing the inquirer to have decided in favor of the Greek text, even so there are diversities to be discussed, for the Sept. has various readings of the numbers both before and after the Flood; in particular, while most of the copists have a second Caiian after Archaxaas, with a descent of 130 years, this addition is ignored by other copies and by important authorities (see Brown, _Ordo Sacr._, § 307; and note; Mill, _On the Descent and Paternity of the Patriarchs_ , pp. 149, 150). The later commentators will account for the enormous discrepancy which appears in the estimates formed by different chronologists of the number of years contained in the book of Genesis. The Hebrew numbers, from Adam to Terah's 7th year, make 1550 plus 292 years; the Sept., with its various readings, 2:42 or 22:3 plus 942, or 1042, or 1072, or 1172; the Samaritan, 1307 plus 942.

The fundamental importance of the subject in Biblical chronology requires a more exact and detailed examination than we find in the Dictionaries of Smith and Kitto, from which the preceding investigations are chiefly taken, as are also portions of subsequent discussions in this article.

(a.) General. — Evidence. — It is a noticeable fact that in the antediluvian portion the Heb. is the only list (unless we except that of Josephus, which has no independent value) in which every number is corroborated by the corresponding one in some one or other of the rest; while in the post-diluvian line, after the exclusion of the Pseudo-Camhronian, the condition is even more extreme alone: the preponderance of evidence from this method of comparison is therefore about balanced. Again, it is a most suspicious circumstance in the Samar., that its numbers, where there is any variation, regularly lessens the period prior to parentage, as the lineage descends, by removing the irregular hundred years before the Flood, and appending it to the ages below that...
point; while the Sept. (and Josephus) attain a similar uniformity by adding one hundred years to the deficient numbers throughout; whereas the Heb. exhibits no such marks of gradation, but presents a natural irregularity in these numbers, giving the whole, decrease as the period of longevity contracts; while, on the other hand, if either of the other lists be assumed as the prototype, no possible reason can be assigned or imagined for the arbitrary enlargement or diminution here and there of a particular number, unless it be, that, with the alteration of the margin, an genealogy is also exactly sustained by the sum 367; (i.e. the birth of Abram 292 years from the Deluge + 75 years to his departure from Haran) definitely given by Josephus, in opposition to his own magnified numbers in detail, although the weight of this argument is affected by the existence of various readings of that aggregate in his text. We must not omit to observe that those who espouse the schedule transmitted by the Sept. and Josephus, as affording the longer space between the Creation and the Deluge for the extensive propagation of the antediluvian race, and also after the Flood for the dissemination of mankind into power- ful nations in the earliest times, have only defended their own argument; for it is obvious that, so long as the entire length of each patriarch's life remains unaltered, by whatever amount the period prior to marriage is augmented, just so much time is taken from the remainder for procreation: the earlier the age of paternity, the greater will naturally be the increase of population in a given number of generations. The rapid advance in adolescence after the Deluge, so marked in the Heb. numbers, was doubtless providential for the purpose of replenishing the earth as speedily as possible after that cataclysm.

(b.) Individual Acrescens. — In addition to the post-diluvian Canaan noticed above, the following names appear to furnish decided proof of the superior trustworthiness of the Heb. list (see the conclusive treatise of Michaelis on this subject, translated in the Amer. Bib. Repos., 2d ser., vii, 114 sq.; also some judicious remarks by Dr. Pond in the Med. Quart. Review, July, 1887).

[1.] In the cases of Adam and Seth, the addition of 100 years to their age before paternity disturbs the average ratio between the season of growth and the total life, which in man, as in other animals, is a well-established proportion. These two patriarchs passed nearly one quarter of their lives childless, although their immediate successors were blessed with offspring when they had advanced but about one tenth to one twelfth in life. Was the command to "increase and multiply and fill the earth" so much less urgent in the first centuries of the world than subsequently? In the numbers assigned to the first two generations, moreover, the various readings found in the text of Josephus nearly destroy the support which it gives to the Sept., leaving the balance of evidence decidedly in favor of the tallying numbers in the Heb. and Samar.; and in the next three generations there is at least an equipoise between the authorities, which are arrayed in the same line.

[2.] The Heb. numbers in the case of Jared are sustained by all the other lists except the Samar., which not only deducts the century from his minority, but also arbitrarily curtails his subsequent years by a different amount (25 years), evidently in order to force the total life into conformity with the plan of gradual reduction in the length of life which we find in the Sept. In the next name, that of Enoch, the Heb. and Samar. again appear in unison against the Sept. and Josephus, the testimony of the last being impaired by the corrupt state of his numbers at this point.

[3.] The numbers given under Methuselah and Lamech are also thereby confirmed, according to the settled laws of internal criticism, marks of intentional corruption in all but the Heb. list. Not only are the years of each of the others totally unsupported by one another, where they differ from this, under both these names, and also embarrassed by various readings of a glaring character, but a comparison of them with the date of the Deluge makes it apparent that they were altered so as to place the demise of these two patriarchs "high and dry" beyond the reach of this event. Those who have sneeringly remarked that, according to the Hebrew chronology of Usher, "Methuselah was drowned in Noah's Flood by act of British Parliament," have forgotten to mention that the Sept. scheme is авторizing its insertion in the margin in neither the English Bible), are not only incorrect in that particular (for Methuselah [q. v.], according to the Heb. numbers, died a full month before the Deluge began), but they reason uncritically, inasmuch as so palpable an objection only shows the honesty of the Masoretic editors, who allowed it to remain upon the face of their text, when they might, by a slight alteration, so quietly have obviated it. The ingenious tinkers of the Samar. and Greek chronologies, on the contrary, have carefully attempted to remove this stumbling-block from the way of their version by a violent modification of the numbers (Enoch 105 years in the Sept. and splicing off before and after, etc.) in order to suit circumstances. Yet, like floggers usually, they have, after all, fallen into confusion, and convicted themselves by their own traces; the Samar. and most of the readings of the Greek copies do but make the year of the death of these patriarchs coincide with that of the Flood, while the very suspicious fact remains that the lives of the two alone (besides that of Jared in the Samar.) are abbreviated not only in comparison with the longer and more difficult dates of the other lists, but suddenly, as if for a special purpose, between instances of greater longevity immediately before (excluding Enoch, who was translated alive), and after. The Heb. list can alone be defended at this point on critical grounds.

[4.] The general agreement in greater age assigned to the post-diluvian patriarchs by the Samar. and Greek lists is not more difficult to explain to the advantage of the Heb. If the former be the original form, no reason can be assigned for the change; but if the latter be assumed as giving the genuine numbers, it is easy to perceive how readily they may have been augmented in order to swell the primitive era of repopulation after the Flood into a nearer conformity with the extravagant mythical periods of early heathen history. It will also be seen that the Sept. is known to have originated, the influence of which may plainly be traced in the present account of Josephus (and possibly, through some indirect channel, that of the Samar. also), this temptation would be peculiarly strong. The internal evidence here, however, it must be confessed, is rather in favor of the Samar. numbers, corroborated as they are throughout as to the age of paternity by those of the Sept. and (but less accurately) Josephus; and we might even be inclined to adopt them, as consistent in gradation with those preferred in the antediluvian portion, did not the manifest want of authority in the extending schemes for that part cast a strong doubt of accuracy over them in this part likewise. This suripision is confirmed by the want of harmony between the Samar. and Sept. as to the post-diluvian ages after paternity, the latter list conforming in this respect quite closely to the Heb. If we turn to the evidence of ancient records as well as to the nature of the Hebrew language, we shall find the Sept. confirmed rather than those of the Heb. The history and civilization of Egypt, as well as of Assyria and Babylonia, reach to a time about as early as the Heb. date of the Flood. Moreover, the concurrent evidence of antiquity carries the origin of Gentile civilization to the North of Egypt and Syria, accord the accepted position of the name of the Hebrews numbers we must place (as we easily may) the dispersion of nations [see ETHNOLOGY] very soon
CHRONOLOGY

after the Deluge. Important aid in this approximation of sacred with profane chronology is afforded by the considerable extension of the Biblical period of the Judges, noticed below, beyond that fixed by Usher.

(5.) An Americanization of the last generation is required in all the lists. According to them, it would appear that Terah was 70 years old at Abram's birth. "Terah lived seventy years, and begat Abram, Nahor, and Haran" (Gen. xi, 26). It is afterwards said that Terah went from Ur of the Chaldees to Haran, and died there at the age of 205 years [Samar. 148] (xi, 31). 205 years would make Terah 130 years old at Abram's birth. The Babylonia of Abram is then narrated (comp. Acts vii, 4), his age being stated to have been at that time 75 years (xii, 1-5). Usher therefore conjectures that Terah was 130 years old at Abram's birth (205-75 = 130), and supposes the latter not to have been the eldest son, but mentioned first on account of his eminence, as is Shem in several places (v. 32; vi. 10; vii. 18; ix. 18; x. 1), who yet appears to have been the third son of Noah, and certainly not the eldest (x. 21). To this it has been objected, however, that it seems scarcely probable that if Abram had been born to his father at the age of 205 years, he should have asked in wonder, "Is the father of my father a hundred years old? and shall Sarah, that is ninety years old, bear?" (Gen. xvii, 17). But the force of this objection is almost entirely obviated when it is considered that Terah had previously had a son, whereas Abraham at the time of his observation was altogether childless. It is better, therefore, to adopt this arrangement, than to make an arbitrary change in the numbers, as the Samar. apparently has done.

2. From Abram's departure out of Haran to the Exodus.—The length of this period is stated by Paul as 430 years from the promise to Abraham to the giving of the Law (Gal. iii. 17), the first of the sojourn being held to be that recorded in Gen. xii, 1-5. The same number of years is given in Exodus (xii, 40, 41), where the Heb. reads, "Now the sojourn of the children of Israel which dwelt in Egypt [was] four hundred and thirty years. And it came to pass at the end of the four hundred and thirty years, even the self-same day it came to pass, that all the hosts of the Lord went out from the land of Egypt." Here the Sept. and Samar. add after "in Egypt" the words "and in Canaan," while the Alexandrian and other MSS. of the former also add after the "children of Israel" the words "and their fathers." It seems most reasonable to regard both these additions as glosses; if so excluded, the passage appears to make the duration of the sojourn in Egypt 430 years, but this is not an absolutely certain conclusion. The "sojourning" might well include the period after the promise to Abraham, while that patriarch and his descendants "sojourned in the land of promise [as in a strange country]" (Heb. xi, 9), for it is not positively said "the sojourn of the children of Israel in Egypt," but "who dwelt in Egypt." As for the very day of close being that of commencement, it might refer either to Abraham's entrance or to the promise of the time. A third passage is adduced in the declaration to Abraham of future history of his children: "Know of a surety that thy seed shall be a stranger in a land that is not their's, and shall serve them; and they shall afflict them four hundred years; and also that nation, whom they shall serve, will I judge; and afterward shall they come out with great substance" (Gen. xv, 14, 16; comp. Acts vii, 4; compare also x, 16). The period of 430 years would be held to be the period of oppression without a denial of the historical character of the narrative of that time, but can only be supposed to mean the time from this declaration to the Exodus. It is also noticeable that after the citation given above the events of the whole sojourn are stated (comp. Gen. xxvii, 20; viii, 6). The period of the sojourn is thus put into four hundred years, and the period of speaking of that time, and perhaps, therefore, the period defined (xv, 15, 16) as "the fourth generation." But the question, From what point of time are these years reckoned? has been variously answered, and chronological schemes vary accordingly. Some, as the Sept., Josephus, the Jewish Chronology, and most Christian writers, assign the generation that was the period of the sojourn in Canaan and Egypt, beginning either with the Call of Abraham (Gen. xii.), or the Promise (xv); others date it from the close of the period during which the Promises were made (Perizonius, Schöttgen); some (as Bengel) from the birth of Jacob; while numerous recent writers give the whole period to the sojourn in Egypt (Eusebius, Jerome, Ambrose, Augustine, etc.). Jacob and the patriarchs into that country (see Knobel, in loc.; Browne, Ordo Sacell. § 284-288). The genealogy of Moses is inconsistent with so long an interval as 430 years between Jacob's 180th and Moses's 80th year; for we learn that between Levi and Moses there were only two descents—indeed, by the mother's side (Jochebed, "daughter" of Levi), only one; and as the sum of the lives of Levi, Kohath, and Amram is 137+138+137, it follows that from the birth of Levi to the birth of Moses must be considerably less than 407 years. So also the other genealogies, in which (with one exception, and that only apparently) we find contemporary births falling in the 4th, 5th, and 6th descent from the twelve patriarchs (Browne, Ordo Sacell. § 284-288). Hence we must measure this interval of 430 years (Gal. iii, 17) from the call of Abraham, in his 70th year (Gen. xi, 4), after the death of Terah (Acts vii, 4; Gen. xi, 32), to the Exodus.

The narrative affords the following data, which we place under two periods—that from Abraham's leaving Haran to Jacob's entering Egypt, and that from Jacob's entering Egypt to the Exodus.

These data make up at least 837 or 866 years, to which some addition must be made, since it appears that all Joseph's generation died before the oppression commenced, and it is probable that it had begun some time before the birth of Moses. The sum we thus obtain cannot be far different from 430 years, a period for the whole sojourn that these data must thus be held to confirm.

The genealogies relating to the time of the dwelling in Egypt, if continuous, as there is much reason to suppose that some are, do not seem repugnant to this scheme; but, on the other hand, only a few of them, that of Chron. (vii. 28, 25, 26, 27), if a succession, can be reconciled with the opinion that dates the 430 years from Jacob's entering into Egypt. Another important historical point of evidence is the increase of the Israelites from the few souls who went with Jacob into Egypt, and Joseph and his sons, to the six hundred thousand, and which will be held to be the period of oppression without a denial of the historical character of the narrative of that time, but can only be supposed to mean the time from this declaration to the Exodus. It is also noticeable that after the citation given above the events of the whole sojourn are stated (comp. Gen. xxvii, 20; viii, 6). The period of speaking of that time, and perhaps, therefore, the period defined (xv, 15, 16) as "the fourth generation."
are males except one, who probably married a cousin. This computation takes no account of polygamy, which was certainly practised at the time by the Hebrews. This first generation must, except at the time other female grandchildren of Jacob besides the one mentioned (comp. Gen. xlii, 7), have taken foreign wives, and it is reasonable to suppose the same to have been constantly done afterwards, though probably in a less degree. We cannot, therefore, find our calculation solid on these 51 pairs, but must allow for polygamy and foreign marriages. These admissions being made, and the especial blessing which attended the people bome in mind, the interval of about 215 years does not seem too short for the increase. — On the whole, we have no hesitation in accepting the 430 years as the length of the interval from Abram’s leaving Haran to the Exodus.

3. From the Exodus to the Foundation of Solomon’s Temple. — There is but one passage from which we obtain the length of this period as a whole (see Walther, in Baumgarten’s Sammlungen, 1748, ii. 518—488). It is that in which the Foundation of the Temple is dated in the 48th (Hebron), or 46th (Judg.) year after the Exodus, in the 4th year 2 month of Solomon’s reign (1 Kings vi, 1). This sum we have first to compare with the detailed numbers. These are as follows: (a) From the Exodus to the death of Moses, 40 years. (b) Leadership of Joshua, 7½ years. (c) Interval between the death of Joshua and the First Servitude, 3 years. (d) Servitude of Israel and rule of first death, 430 years. (e) Period from Eli’s death to Saul’s accession, 20 + 8 years. (f) Saul’s reign, 40 years. (g) David’s reign, 40 years. (k) Solomon’s reign to Foundation of Temple, 3 years. Sum, 568 + 2 + 8 years. It is possible to obtain approximately the length of the three writing numbers. (1) Joshua’s age at the Exodus was at least 20 years (Num. xiv, 29, 30), and at his death, 110; therefore the utmost length of his rule must be 110 — (20 + 40) = 50 years. The duration of Joshua’s government is limited by the circumstance that Caleb’s lot was apportioned to him in the 7th year of his death, and therefore of Joshua’s rule, when he was 85 years old, and that he conquered the lot after Joshua’s death. Caleb cannot be supposed to have been a very old man on taking his portion, and it is unlikely that he would have waited long before attacking the heathen who held it, to say nothing of the portion being his claimed reward. Hence when, as might be expected, he died there, a reward promised him of the Lord by Moses and claimed of Joshua, who alone of his fellow-apostles had shown the same faith and courage (Num. xiv, 24; Deut. i, 36; Josh. xiv, 6 ad loc. xvi, 13-19; Judg. 1, 9-15, 20). The least length of Joshua’s rule would be about 10 years. Josephus (Ant. v, 1, 20) fixes it midway between these limits, or at 25 years, which may be adopted as the probable length. (2) The interval between Joshua’s death and the First Servitude is limited by the history of Othniel. After Joshua there is the time of the elders who overlived him, then a period of about 8 years, a deliverance by Othniel the son of Kenaz, the nephew of Caleb, and rest for 40 years, until Othniel’s death. He was already a warrior when Caleb conquered his lot; he lived to deliver Israel from the Mesopotamian oppressor, and died at the end of the subsequent 40 years of rest. Supposing Othnial to have been 30 years of age at the end of his father’s rule, he was 40 years old at his death, then 110 — (30 + 10 + 8 + 40) = 24 years would remain for the interval in question. Josephus (Ant. vi, 4, 4) reasonably fixes it at 18 years, which cannot be far from correct. (3). The residence of Samuel’s judgeship after the 20 years from Eli’s death, ending with the lot of Judah at Mizpeh, can scarcely have much exceeded 20 years; Josephus (Ant. vi, 4, 5) assigns it a length of 12 years. Samuel must have been still young at the time of Eli’s death, and he died near the close of Saul’s reign (1 Sam. xxv, 1; xxxviii, 6). If he were 20 years old at the former date, and, judged for 12 years after the victory at Mizpeh, he was born near 65 years old (20 + 20 + 12 + 32 = 84) at his death, which appears to have been a long period of life at that time. We arrive thus for the following numbers for the various portions of this period:

Wandering in the desert 25 years.
Joshua’s rule 20 years.
Surviving Elders 18 years.
First Servitude 10 years.
Othniel’s judgeship 40 years.
Abdon’s judgeship 8 years.
Second Servitude 18 years.
Elihu’s judgeship 16 years.
Khm’s judgeship 30 years.
Samson’s judging 30 years.
Jephthah’s judgeship 8 years.
Abdon’s judgeship 40 years.
Eli’s judgeship 40 years.
Seventh Servitude 20 years.
Hannah’s judgeship 40 years.
Saul’s reign 40 years.
Fourth Servitude 40 years.
David’s reign 40 years.
Abimelech’s reign 8 years.
Saul’s reign 40 years.
Total 430 years.

Two independent large numbers seem to confirm this result. One is Paul’s address at Athens, where, after speaking of the Exodus and the 40 years in the desert, he adds: “And when he had destroyed seven nations in the land of Chanaan, he divided their land unto them by lot. And after that he gave unto them judges about the space of four hundred and fifty years, until Samuel the prophet. And afterward they desired a king; and God gave unto them a king, until David the son of Jesse came.” This interval of 450 years may be variously explained — as commencing with Othniiel’s deliverance and ending with Eli’s death, a period which the numbers of the earlier books of the Bible, if added together, make 442 years; or as commencing with the First Servitude, 8 years more, which would be exactly 450 years; or with Joshua’s death, which would raise these numbers by about 18 years; or again, it may be held to end at Saul’s accession, which would raise the numbers given respectively by about 82 years. However explained, this sum of 450 years supports the authority of the detailed numbers as forming an essentially correct measure of the period; and the precise coincidence with one of the foregoing modes of computation seems to show that it was that which Paul adopted. The other large number occurs in Jephthah’s message to the king of the Children of Ammon, where the period during which Israel had held the land of the Amorites from the first conquest to the time to which he was desirous of making war, from which they were about to be freed, or up to the very time, is given as 800 years (Judg. xi, 26). The above detailed numbers, including the uncertain periods, would make these intervals respectively 244 and 362 years. Here, therefore, there appears to be an agreement, although not positive, since the meaning might be either three centuries, as a vague sum, or about 800 years. So far as the evidence of the numbers goes, we must decide in favor of the longer interval, from the Exodus to the building of the first Temple, in preference to the period of 480 or 440 years.

The evidence of the latter is altogether derived by some to sustain a different conclusion. These lists, as they now stand, would, if of continuous generations, be decidedly in favor of an interval of about 800, 400, or even 500 years, some being much shorter than others. It is, however, impossible to reduce them to consistency with each other without arbitrarily altering some, and possibly others, and 110 years of the list of Samson as the safest guides, has been the adoption of the shortest of the numbers just given, about 800 years. The evidence of the genealogies may therefore be considered as probably leading to the rejection of all numerical statements, but as perhaps less inconsistent with that which is stated at Mizpeh, as the 480 years one of the elements for the con-
struction of his Mundane era; by Usher also, by Pe-
tavius, who, however, dates the period from the Exode, and
by many others. In more recent times, Hengsten-
berg (Authentia des Pentateuchs, ii. 28 sq.), Hofmann
(in the Studien u. Kritiken, 1838), Thenius (On a Kings
vi, 1), Tieke (Chronol. des A. T.), Gehring (Usher die
die beiden verschieben, 1824), and others, uphold the
statement as historical. But though this measure,
by bridging over the interval from Moses to Solomon,
enables the chronologist, when he has formed
his mundane series down to the Exode, to assign
the year anno mundi of 4 Solomon and so of 1 David,
or, without the help of the reckoning of the King of
Solomon, to give the year B.C. of the Exode, the whole tract of
time occupied by the Judges is still loose at either end,
and needs much management to define its bearings.
For the items actually enumerated, being (even if the
entire 40 years of Eli and the 20 years of the Ark at
Kirjath-Jearim be included in the 500 of the Judges)
47 + 390 + 48 = 480, no room is left for Joshua and the
elders, Samuel and Saul. Accordingly, the chronol-
gists who accept this measure are obliged to resort to
violent expedients—the assumption that some of the
servitudes were contemporary, and others, which it is
clearly impossible to exalt above the rank of ingenious
conjectures, were contemporaneous, open to grave
suspicion. The Sept. has instead of it 440. Jo-
sephus takes no notice of either, and on various occa-
sions makes the intervals 592, 612, and 632 years; the
early Christian chronographers also ignore the meas-
ure—thus Theophil. Antloch. reckons 406 to 1 David;
Clem. Alex. to 1 Saul, 490; Africanus, 677 years.
Paul's enumeration, in Acts xiii, 18-21, also proves at
least this, that Jews in his time reckoned the interval
in a way which is inconsistent with the statement in
1 Kings vi, 1. He gives from the Exode to 1 David
40 + 450 +4=530; therefore to 4 Solomon, 578 years.
Paul's term of 450 years is evidence of the interval from
the First Servitude to the end of the 20 years of the
Ark, 1 Sam. vi, 2 (composed of 890 +40 +20). Clin-
ton (Past. Hist., i, 812) dates the 450 from the partition
of lands (47th after Exode), assumes 20 years for
Joshua and the elders, and another term of 12 years
between the 20 years of the Ark (1 Sam. vii, 2) and the
40 years (Exod). Nelson (Gotha Paul., ii, 34) gives as the
time making the sum 612 years. It remains only to state that
the text in 1 Kings vi, 1, cannot be impugned on strict-
ly critical grounds, excepting the various reading in
the Sept.; the other versions and the Heb. MSS. are
uniform in their testimony: that date, therefore, must
be accepted as an early interpolation, as is done by most modern chronologers. For a further ex-
amination of the period in question, see JUDGES.
(See also in the Stud. u. Kritiken, 1868, iv.)
4. From the Foundation of Solomon's Temple to its Destruc-
tion.—We have now reached a period in which
the differences of chronologers are no longer to be
easured by centuries, but by tens of years and even
single years, and towards the close of which almost per-
fact accuracy is attainable. The most important num-
bers in the Bible are here generally stated more than
once, and several means are afforded by which their
accuracy may be tested. The principal of these testa-
are the statements of kings' ages at their ascensions, the
double dating of the ascensions of kings of Judah in
the reigns of kings of Israel and the converse, and the dou-
ble reckoning by the years of kings of Judah and of
Neubuchadnezzar. Of these tests the most valuable is
the second, the chronology of the period being given by part
of the period under consideration, and prevents our mak-
ing any very serious error in computing its length.
The notice of kings of Egypt and Assyria, contempo-
rary with Hebrew sovereigns during this period, are
also of importance, and are likely to be more so, when,
as we may expect, the chronological places of all these
contemporaries are more nearly determined. All rec-
ords, therefore, tending to fix the chronologies of Egypt
and Assyria, as well as of Babylonia, in these times, are
of greater value, from their bearing on Hebrew chronol-
ogy. At present the most important of such records is
Fulmeny's Canon, from which no sound chronologer
will venture to deviate. In the Biblical statements the
number and importance of inaccuracies has usually
been much exaggerated, since several supposed dis-
agreements depend upon the non-recognition of the
mode of reckoning regnal years from the commence-
ment of the year, and not from the day of the king's
accession; still a few difficulties cannot be resolved
without the supposition that the initials of names have been alter-
dated by copyists. Many of the dates are reckoned from
a joint accession of several of the kings with their re-
spective fathers, and a few are even posthumous.
Two interregna in the kingdom of Israel have generally
been supposed, and none others are necessary; namo-
ively, one of 11 years, between Jeroboam II and Zacha-
rias, and the other of 8 years, between Pekah and Hoshea.
The former supposition might seem to receive some support from the words of the prophet Hos-
ea (x, 3, 7, and perhaps 15), which, however, may only
imply a lax government, and the great power of the
Israelite princes and captains, as an absolute anarchy.
Some interregna also in the kingdom of Judah are
thus adjusted, according to the double line of kings;
for the details of the chronology, see ISRAEL (KING-
DOM OF); JUDAH (KINGDOM OF).

The gross sum total of the regnal years of Judah, to the
year of the Assyrian Captivity, is 260, as the num-
ers stand in the text of the Talmud and the Targums;
they may be corrected by synchronal data, only 257
and 286 years respectively. This deficit of 19 years
has been by most chroniclers taken to imply that the
two gaps in the Israelite succession, which are brought
to light by the synchronisms, were intervals of an-
archy, filled up (as above) by interregna—one of 11 years,
between the death of Jeroboam II. in 27 Uzziah,
and the accession of Zacharias, in 38 Uzziah; the other,
of 8 years, between the death of Pekah, in 4 Ahaz,
and the accession of Hoshea, in the 12th of the same reign.
But later writers prefer to liquidate the reckoning by
assuming an error in the regnal years of Jeroboam II
and Pekah. Thus Ewald, making the difference 21

years, gives these kings 55 and 29 years respectively, instead of 41 and 20 (Gesch. des Volkes Isr. iii, 1, p. 261–83); Thenius (Die BB. der Könige, p. 336), by a more facile emendation, makes the numbers 51 and 30 (\(N\) for \(N\), and \(\gamma\) for \(\gamma\)) for Jeroboam (Chronik der Äg.) makes the reigns 52 and 30; and Bunsen, Egiptasche Stelle, bk. iv, p. 381, 395-402, makes Jeroboam reign 61 years, and retains for Pekah his 20 years. Movers (Die Phönizier, ii, 1, 158), by a peculiar method of treatment, reduces the reigns of Israel to 208 years, and brings the reigns of Judah into conformity with this sum by the omission of 7 years beginning with Jehoshaphat 4 years, Uziah with Amaziah 12, and Jotham with Uziah 11 years. How arbitrary, and therefore unjustifiable, such reduction of numbers is, must be evident to every critical eye. The supposition of co-regencies is only allowable in order to explain the apparent discrepancies in some of the kings' years, but in no case are they suffered to disturb the length of reigns, as given in the text. See each name in its alphabetical place in this Cyclopaedia. (See Wolff, in the Theol. Stud. u. Krit. 1868, iv). 5. From the Destruction of Solomon's Temple to the Return of the Captives. The determination of the length of this period depends upon the date of the return to Palestine. The decree of Cyrus leading to that event was made in the first year of his reign (Exa i, 1), which, if it date from his conquest of Babylon (q. v.), as determined by Ptolemy's Canon, would be B.C. 588; but the decree in question appears to date from his personal supersede of "Darius the Mede" (q. v.) at Baby- lon, B.C. 586, where the edict was evidently issued. See Cyrus. Others date the decree from the earlier point, and suppose that so great a migration must have occupied much time; they therefore allow two years as not too long an interval for its complete accomplish- ment after the promulgation of the decree. Another method of arriving at the time in question is by means of fixing the termination of the so-called "70 years' captivity". Two numbers, held by some to be identical, must here be considered. One is the period of 70 years, during which the tyranny of Babylon over the East was last prophesied by Jeremiah (xxv), and the other, the 70 years of the city's overthrow and utter depopulation (2 Chron. xxxvi, 21; Dan. ix, 2). The commencement of the former period is plainly the 1st year of Nebuchadnezzar (as viceroy), and 4th (according to Dan. i, 1, the 81 complete year of Jehoiakim (Jr. xxv, 1). B.C. 587. After the successes of the Babylonian hel- gan (xlvi, 2), and the miseries of Jerusalem (xxv, 22), and its conclusion will be the fall of Babylon (ver. 26). The famous 70 years of captivity would seem to be the same period as this, since it was to terminate with the return of the captives (Jer. xxix, 10). The second period of 70 years dates from the burning of the Temple, late in B.C. 588 (Ezek. xi, 1), and terminates with its complete restoration, some time in B.C. 517 (Exa, vi, 15). The two passages in Zechariah, which speak of such an interval as one of desolation (l, 12), and during which fasts connected with the captivity had been kept (vii, 5), are quite reconcilable with this explanation. These two passages are of the 2d and 4th years of Da- rius Hystaspis, in whose 6th year the Temple was fin- ished. The details of this period are made up of the following Babylonian reigns, from profane sources:
