Among the modern Protestant churches, the Church of England and the Protestant Episcopal Church use forms of prayer to the exclusion (generally) of free prayer in public worship. The Methodist Episcopal Church, however, has no sacraments for social use, no exhortation, and other services, and free prayer in worship. The Presbyterian churches use free prayer (Directory of Worship, ch. v). The Lutheran and Reformed churches have liturgical forms for certain services, but generally use free prayer in worship. A movement toward more full liturgical services has been going on for some time in the German Reformed Church. See German Reformed Church, and Liturgy. A tendency in the same direction appears to have arisen in the Presbyterian Church in the United States (see Shields, Liturgy Espirical, Philadelphia, 1864; see also Beazley, Duties of the Presbyterian Liturgist, N. York, 1855, 18mo; reprinted in London as A Chapter on Liturgies, edited by Thomas Binney, 1856, 18mo). In the Established Church of Scotland, Dr. Robert Lee, of Edinburgh, was tried before the General Assembly in 1831 for his sermons, which tended to dispense with the public in the services of Old Grayfriars’ Church, Edinburgh; and the Assembly enjoined Dr. Lee to discontinue the practice. But the tendency went on; and in 1867 appeared Euchologia, or Book of Prayers, being Forms of Worship issued by the Church-service Society (Edinburgh, and London, 1867), under the auspices of Dr. Lee and Dr. Macleod. See, besides the works already mentioned, Bingham, Orig. Eccl. bk. xiii; Palestine, Orig. Liturgies, London, Words, ii, 429; Milton, Prose Works (Philadelphia, 1880), i, 96 sq. (against forms); Shields, The Book of Comm. Prayer as amended by the Westminster Divines A.D. 1661, with a historical and liturgical treatment (Philadelphia, 1867, 12mo); Brownell, Family Prayer-book (Introduction); Butler, Common Prayer Illustrated, Long, xiii, 489 sq.; xviii, 487 sq.; xxvii, 445 sq.; Merriam, Review, Jan. 1868, art. vii; Evangelical Quarterly Review, Jan. 1869, p. 80.

Formularies, a general name for the articles of religion, forms of service, etc., adopted by any particular church. See CREEDS; CONFESSIONS; LITURGY.

Formula Concordiae. See Concord, Formula of.

Formula Consensus Helvetica. See Hel- vetic Confessions.

Formula (ουτη), tauta, ἡ τινος, illicit sexual intercourse, especially of a married woman). See ADULTERY. From the Scriptures we learn that long before the time of Moses morals had become very much corrupted, and not only the prostitution of females, but also the licentiousness of boys, and the immorality of the need
FORTI D'UrbAN

is an elaborate article on Forster in the *Zitschrif f.

FORTER, Nathaniel, a learned English divine, was born at Stadsmes, Devonshire, Feb. 8, 1717; educated at Corpus Christi, of which he became fellow in 1729; and was in 1750 a grand stall of the cathedral of Bristol and the vicarage of Rochdale in 1754. In 1757 he became preacher at the Rolls, and died Oct. 20 in that year. He wrote *Reflections on the high Antiquity of Government, Arts, and Sciences in Egypt (Oxf. 1745, 8vo);—A Dissertation on Joseph's Account of the Jews Christ (Oxf. 1740); Bible Hebraica Minchach (1755, 2 vols. 4to)—Popey destruction of the Evidences of Christianity (Oxf. 1746).—Biog. Britannica, s. v.

Forster, William, a member of the Society of Friends, was born at Tottenham, England, in 1794. He was carefully trained by his parents, who were excellent "Friends," and at nineteen began to exercise his gifts as a "minister." Most of his life was devoted to missionary journeys through the British Islands, the Continent of Europe, and the United States, on his third visit to which, "with an antiallevial address to the president and governors," he died in Tennessee, in the sixty-first year of his age. In the preceding year, 1822, he visited the Vaalhuis of Riedemond, and printed a large number of books and tracts in Italian for circulation. Everywhere he scattered blessings by word and deed, "leaving his mark for good on everything he set his hand to." His son, William, a regular member of the Board of the Testamen-t, and an eminent Liberal in politics.—Seeborn, *Memoirs of William Forster (London, 1866, 2 vols.); Christian Remembrance, January, 1866, art. iv.

Fort, the rendering in the A. V. of the following Heb. words: תֶּבַע, betah (so called as a place of lying in wail), a cave, esp. on a hill, Exxx. xxxii, 27 (elsewhere usually "stronghold"); or fem. מַטָּסָה, metasah, a kind of small fastness, e. g. the Citadel of Zion, 2 Sam. vii, 9 (elsewhere "fortress," etc.). מַטָּס, mas (so called from its strength), a stronghold, fortified by nature and art, Dan. xi, 19 (elsewhere usually "strength," etc.). דָּגֵק, dagik (so called from looking out), a watch-tower, especially a scaling-tower in a siege, 2 Kings xxi, 1; Jer. ili, 4; Ezek. iv, 2; xvii, 21, 22; xxvi, 8. מַטָּס, metasah (so called as being compact), a fortification, e. g. in the siege of a city; generally for defence ("fenced city," q. v.), but also for assault, Isa. xxix, 8. דָּגֵק, ophel (q. v.), a mount (so called from its tumulus form), Isa. xxxii, 14 (elsewhere "tower," "stronghold"). מַטָּס, masgul (so called from its height), a refuge (as often rendered; also "tower," "defence," Isa. xxv, 12. See FORTIFICATION.

Forti d'UrbAN, Marquis of, was born Feb. 18, 1756, and died at Paris Aug. 4, 1848. After completing his studies at the Military School in Paris, he entered the army in 1773, but resigned his commission in 1779 to attend to an important suit in Rome before the papal court of appeals (the Rota), pending the decision of which he devoted himself to the study of the fine arts, antiquities, and mathematics. He was a prolific author, and wrote on a variety of subjects, of which we mention Principes et Questions de Mora Naturelle (Paris, new ed., 1834, 2 vols.); *Essai de la Connaissance d'un roi (Paris, 1821, 12mo);—Chronologie de la vie de Jezus-Christ (Paris, 1827, 8vo, and 1830, 12mo);—Note sur la Gene de du Christiaannisme (Paris, 1830, 8vo);—Essai sur l'Origine de l'ecriture, etc. (Paris, 1830, 8vo);—Essai sur l'impossibilité de l'Anes et sur la resurrection (Paris, 1833, 12mo);—Discours prononces au Cirque de Morule Universelle (Paris, 1835-9, 12mo);—Membres pour servir a l'histoire de l'introduction du Christiannisme dans les Guzes (Par.
FORTIFICATION

He was also a collaborator in the Chiefes des Planches of the Fortifications, and the Annales de la Philosophie Chrétienne. — Hoefer, Nouv. Bio. Générale, viii, 217—221. (J. W. M.)

Fortification. The Hebrews had several terms which include the idea of military walls, and which are variously rendered in the Auth. Vers., as "fort," "fortress," "fenced city," "castle," "strong-hold," "mound," "trench," etc., all of which see in their places.

Inventions for the defence of men in social life are older than history. The walls, towers, and gates represented on Egyptian monuments, though dating back to a period of fifteen centuries before the Christian era, bear evidence of an advanced state of fortifications—of walls built of squared stones, or of squared timber judiciously placed on the summit of bare rocks, or within the circumference of one or two wet ditches, and furnished along the top with regular battlements to protect the defenders (see Wilkinson, i, 407 sq.). All these are of later invention than the accumulation of unbewn or rude-chipped uncemented stones, piled on each other in the form of walls, in the so-called Cyclopean, Pelasgian, Etruscan, and Celtic styles, where there are no ditches, or towers, or other gateways than mere openings occasionally left between the enormous blocks employed in the works. As the first three styles occur in Etruria they show the progressive advance of military architecture, and may be considered as more primitive, though perhaps posterior to the era when the progress of Israel, under the guidance of Joshua, expelled several Canaanitish tribes, whose system of fortification, in common with that of the rest of Western Asia, bore an Egyptian type, and whose

Ancient Assyrians attacking a Fort.

As among the Hebrews there was no system of construction of an elaborate kind, and so called fortifications of the means of defence to the localities, no uniformity of adaptation existed, and therefore we refer to the foregoing as specimens of the numerous illustrations of this subject which occur on the Egyptian and Assyrian monuments, and to other explanations which are given under the several terms in other parts of this work. See also CITY; TREB; WAR, etc.

The wall, מָעַן, chomah, was sometimes double or triple (2 Chron. xxxii, 5), successively girding a rocky elevation; and "building a city" originally meant the construction of the wall. See WALL. Before wall-towers, מָעַן, migdaloth, were introduced, the gate of a city, originally single, formed a kind of citadel, and was the strongest part of all the defences: it was the armory of the community, and the council-house of the authorities. "Sitting in the gate" was, and still is, synonymous with the possession of power, and even now there is commonly in the fortified gate of a royal palace in the East, on the floor above the doorway, a council-room with a kind of balcony, whence the sovereign sometimes sees his people, and where he may sit in judgment. Hence the Turkish government is not unfrequently termed the Porte, and in this sense allusion to gates often occurs in the Scriptures. The tower, נֵבֶן, tera'ach, was another fortification of the earliest date, being often the citadel or last retreat when a city was taken; or, standing alone in some naturally strong position, was intended to protect a frontier, command a pass, or to be a place of refuge and deposit of treasure in the mountains, when the plain should be no longer defensible. This was the kind of citadel which defended passes, and in the mountains served for retreat in times of calamity, and for the security of the royal treasures; and it was on account of the confined space within, and the great elevation of the ramparts, that private houses frequently stood upon their summit, as was the case when the harlot Rahab received Joshua's spies in Jericho (Josh. ii, 1). Watch-towers, מִשְׁמַר, mishaph, and מִשְׁמַר, n.
Fortress, the rendering in the A. V. of the following Hebrew terms: "mētsor, "mas ter" (from its increasement), "fortification," Jer. x. 17 (elsewhere "bulwark," "fenced city," etc.). הָסְרוֹמָה, "metodch" (from its security), a castle, esp. post, 2 Sam. xvii, 2; Ps. cviii, 2, 8; lxxi, 8; xci, 8; cxlv, 2 (elsewhere usually "stronghold"). נַמְלָשׁ, "milbar" (as being inaccessible), a fortified place, Isa. xviii, 8; xxv, 12; xxix, 18; Hos. xii, 14; Amos v, 9 (elsewhere "fenced city" ["q. v."] "stronghold," etc.). מָשָׂא, "mose" (from its strength), a stronghold, Jer. xvi, 19; Dan. xi, 7, 10 (elsewhere "strength," etc.). See fortification.

Fortunatius, bishop of Aquileia, was of African origin, and an active participant in the strife which agitated the Church in the 4th century. At the Council of Milan, A.D. 355, he joined in the condemnation of Arianism, but after 367 we hear no more of him. He wrote commentaries on the Gospels, characterized by Jerome as useful, though incorrect in style.—Hoefer, Nouv. Biog. Générale, xxvii, 222; Cellier, Histoire des Autres Eclesiastiques, t. vi, p. 11. (J. W. M.)

Fortunatus (Græcized Φωτονταύς), a disciple of Corinth, of Roman birth or his name, as his epistles indicate, who visited Paul at Ephesus, and returned, along with Stephenas and Achaicus, in charge of that apostle's first Epistle to the Corinthian Church (1 Cor. xvi, 17), A.D. 54. Some have supposed that these three Corinthian brethren were "they which are of the house of Chloe" (oi Xλοοις), alluded to in 1 Cor. i, 11; but the language of irony, in which the apostle must in that case be interpreted in ch. xvi as speaking of their presence, would become sarcasm too cutting for so tender a heart as Paul's to have uttered among his valedictions. "The household of Stephanas" is mentioned in chap. i, 16 as having been baptised by Paul himself; perhaps Fortunatus and Achaicus may have been members of that household. There is a Fortunatus mentioned at the end of Clement's first Epistle to the Corinthians, who was possibly the same person.

Fortunatus, Venantius, Honorius Clemen-

rak, used by shepherds all over Asia, and even now built on eminences above some city in the plain, in order to keep a look-out upon the distant country, were already in use, and occasionally converted into places of defence (2 Chron. xxvi, 10; xxvii, 4). See TOWNS. The gateways were likewise surmounted by folding doors, דֶּלֶּת הַנָּחָה, being secured by wooden bars: both the doors and bars were in after times plated with metal. See GATE. A ditch (מַעֲרָה, "chezy"), where the nature of the locality required it, was dug in front of the rampart, and sometimes there was an inner wall, with a second ditch before it. See Ditch. As the experience of ages increased, huge "counter forts," double bulwark, or masses of solid stone and masonry (not bulwarks), were built in particular parts to sustain the outer wall, and afford space on the summit to place military engines (2 Chron. xxvi, 15). See FORTIFICATION.

Modern Persian Fort.
he scholar. He was the author of, 1. The Washing of Repentation, or the Divine Right of Immersion:—2. Primitive Baptism defined:—3. A Dissertation on the Seventy Weeks of Daniel (Newport, 1787). (L. E. S.)

Foster, James, D.D., an eminent Nonconformist divine, was born at Exeter in 1697. He began preaching as an Independent in 1718. In 1724 he became a Baptist, succeeding the eminent Gale. His eloquence gained for him enthusiastic popularity. Pope, Savage, and Bolingbroke were among his eulogists. But, with all his personal virtues and popular talents, 2 he neither professed nor possessed much zeal for the essential doctrines of Christianity. He published Sermons (London, 1745, 4th ed. 8vo);—Discourses on Natural Religion and the Social Virtues (London, 1749); and an Essay on Fundamentals, especially the doctrine of the Trinity. His most important work, and that by which he is best known, is his Defence of the Unfallah, Truth, and Excellency of the Christian Religion, written against Tyndale (London, 1734, 3d ed. 8vo). He died in 1753. (L. E. S.)

Foster, John, the celebrated essayist, was born at Chichester, Sept. 17, 1755. In early life he was set to the trade of a weaver. At the age of seventeen, having joined a Baptist church, he entered the Baptist College at Bristol. On the completion of his studies he began preaching at Newcastle-on-Tyne. Being somewhat unsettled in his doctrinal views, he soon returned to Dublin. He then made an unsuccessful attempt to establish himself at Dublin. Returning to England, he labored successively at Chichester, Frome, and Downend. His moderate success as a preacher was in striking contrast with his unquestionable intellectual powers and his literary reputation. While residing at Downend he produced the Essays which have won a permanent place in English literature. Becoming disabled for labor in the pulpit, he removed to Stapleton, near Bristol, and gave himself wholly to literary pursuits. For thirteen years he was a prominent contributor to the Eclectic Review. In 1819 he published his essay On the Evils of Popular Ignorance, which he esteemed his best production, though it has never attained to the popularity of the essay On Decision of Character. His contributions to the Eclectic Review were published in 1842 in two volumes. A volume selected from these has been published in this country. He died Oct. 15, 1843. Since his death have appeared Lectures delivered at Broadmead Chapel, Bristol (2 vols.), a discourse on Missions, an essay On the Importance of Religion, written in Dedication of the Commission for the Propagation of the Gospel, and an unfinished essay On the Improvement of Time. His Life and Correspondence, edited by J. E. Ryland (1846), is a work of great interest (reprinted in Boston). A letter written late in life, and then first published, disclosed the fact, before unsuspected, that he had renounced the doctrine of the eternity of future punishment. His writings are marked by strong, original, often sombre thought, stimulating to the best principles and purposes. (L. E. S.)

Fothergill, Samuel, an eminent Quaker preacher, was born Sept. 3, 1715 (O. S.), travelled and preached in many parts of England, Scotland, Ireland, and North America, and died June 15, 1772. He wrote Remarks on an Address to the People called Quakers, etc. (1716, 8vo).—Reply to E. Owen on Water Baptism (1758, 8vo).—Letters (1816).—Allibone, Dictionary of Authors, s. v.; Rose, vii, 428.

Foucher, Paul, a learned French abbot, was born at Tours in 1704, and died at Paris in 1778. He studied theology at the Sorbonne, but showed more fondness for foreign languages. His chief work, Titres historiques de la Religion des Prés, inserted in the Memoirs of the Academy of Inscriptions (tomo. xxvi, xxxix, xxxvi, xxxix); German translation by Kleuker, Riga, 1781-3, 2 vols. 4to), combats the opinion of Hyde that the Persians had preserved natural religion and the worship of the true God. A supplement, after the appearance of Du Perron's Œd Aosta, retracts many of his previous opinions. His next most important work, Recherches sur l'Origine et la Nature de la Religions des Prés, inserted in the Memóires de l'Académie, considers the gods of the Greek and Roman pantheon as only deified men, and claims a historical basis for their myths.—Hoefer, Nouv. Encyc. Géner. xlviii, 284, 285.

Foucher de Chartres. See Fulcherius.

Foullas, Henry, was born about 1685, and died in 1766. He pursued his studies at Oxford, was ordained for the ministry, but devoted himself to history. We have from him, History of the wrecked Plata and Composition of the extended Samian, etc. (London, 1689, and Oxford, 1674, fol.);—History of the Roman Treasons and Usurpations, etc. (Oxford, 1671, fol.); and, according to Watt, Cudoba, or the History of the Constitution Uncased (1664, 4to).—Sermons, etc. Allibone, Dict. of Authors, s. v.; Wood, Ath. Oxon. (J. W. M.)

Foulques de Neulliy. See Fulco.

Foundling Hospitals are institutions for the reception and care of children, especially illegitimate ones, abandoned by their parents. They owe their origin, it is said, to the desire of preventing infanticide and childbirth in the Mazowsze of the Christian Pagans, and the infant children of the鼗cient Greeks and Romans, infanticide and abortion not only prevailed to a fearful extent, but were tolerated, nay, in certain cases, even sanctioned by the laws and by the opinions of philosophers (see Plato, De Leg. v, 460, C.; Aristotle, De Leg., xili, 87; Cicero, De Leg. iii, 8, et al.). The exposure of children was a still more prevalent custom, commended itself, we may suppose, to the natural feelings of the parents as less cruel than infanticide, since it promised a chance, at least, of saving life. The foundling became the slave of the individual, or community, at whose expense it was cared for and educated. To facilitate the finding of exposed infants, places of public resort were chosen for the exposure, such as market-places, temples, road-crossings, wells, etc. In Athens the cynoarges, and in Rome the columnar lacticinum, were usually chosen for this purpose. It was usually taken (crepusculo), as rings or other costly ornaments, or, in the case of poor parents, trinkets of small value, were deposited with the child, for the purpose of inducing some one to receive it, or as a means of identifying the child, should its parents ever discover it. In the time of Gibbon this custom fell under the limitations of paternal authority in his chapter on Roman jurisprudence (Hist. iv, 344, N. Y. 1862), says: "The exposition of children was the prevailing and stubborn vice of antiquity; it was sometimes prescribed, often permitted, almost always practiced with impunity by nations who never entertained the Roman ideas of paternal power; and the dramatic poets, who appeal to the human heart, represent with indulgence a popular custom which was palliated by the motives of economy and compassion." As some relief to the dark shading of this picture, and yet a proof of its correctness, let it suffice to mention the strange and curious custom of exposing children to be adopted and brought up by the spoilt gods (see Tacitus, Hist. v, 5; Josephus, Contra Apion, ii, 24; Philo Jud. De Leg. Spec. ad precept. 6 et 7).
The teachings of Christianity, by causing infanticide and child-exposure to be regarded as sins, gradually wrought a change in the laws and customs in regard to them, though the first Christian emperors did not venture to forbid exposure as a crime. Constantine, however, is reported to have been persuaded by the humane Lactantius, sought in his decrees, A.D. 315, 322, 331, to prevent the murder, sale, giving in pawn or exposure of children, by making provision out of the public treasury for those whose parents were too poor to support or receive them (Cod. Theod., lib. vi, tit. 7, De Expositis, l. i, p. 467, ed. Bitter). The cruel custom was, however, not entirely prohibited until the first half of the 4th century, when, under Valentinian and his colleagues, such murders were brought "within the letter and spirit of the Cornellian law" (Codex Justinian, lib. iv, tit. 52). A further advance of opinion in the right direction was made by Justinian, A.D. 529, which forbade the enslavement of foundlings (Codex Justinian, lib. viii, tit. 21, De Infantia, Expos. l. iii).

Some suppose that foundling hospitals, or institutions of a similar character, were, at a very early period, established in the cities of Rome and Athens, mentioned above as places of exposure. The Justinian Code, by the term brephotrophium (βρηφοτροφίου), mentioned in connection with, but as distinct from, other institutions (for the relief of strangers, the poor, orphans, etc.), appear to refer to hospitals for foundlings. An establishment of the kind is said to have been founded at Treves in the 6th or 7th century. The Capitulaires of Charlemagne employ the Justinian term brephotrophia apparently with reference to foundling hospitals, though the Franks at that time regarded foundlings as the children of evil or impure parents and anathematized all foundlings. An attempt at the kind was said to have been founded at Milan, A.D. 787, by Datheus, a priest, because of the prevalence of infanticide. If the child had not been washed, salt was strewn before it to drive the swaddling-clothes before it to the hospital to denote that fact. The children were suckled by hired nurses, supplied with necessaries, taught some handicraft, and at seven years of age discharged as free. In 1070 Olivier de la Trave founded at Montpellier, in Languedoc, one of whose vows was to provide for the maintenance and education of foundlings. Since that time hospitals for foundlings have been gradually established in most European, and Spanish, and Portuguese-American states, to the most important of which only we have space to refer. Attached to the hospital of the Spirito Santo in Rome is one for foundlings, with accommodations for 3000 children; the number annually received is about 800, some of whom are sent to the country to be nursed; the mortality in the hospital was 1850 57 per cent., and still greater in the country. The Speciale degli Innocenti at Florence was founded in 1616; special means are taken to identify each child by securely fastening a leaden badge, stamped with a certain number, around the neck. The use of tokens of some sort, attached to the person or clothing of the child, is not uncommon in the history of other hospitals. There are many other foundling hospitals in Italy to provide for the numerous foundlings, for whom it is stated that Naples makes the best provision (1850). The Hospices des Enfants Trouvés at Paris was founded in 1635, by Mary de la Prés. In this hospital and many others in France, in order to secure secrecy in depositing the child, a turning-box (tour) is provided, in which the child is placed, and a bell rung for its removal without the person who brought it being seen. A decree in 1811 ordered that such boxes should be provided for all the French foundling hospitals, but, owing to a conviction that the great increase in the number of foundlings since that time was due largely to the tours, they were abolished in 1856 in connection with the 141 hospitals then existing in France. In 1856 the number of foundlings in France was estimated at 120,000 under 12 years of age, when the administrative control ceased; and 50,000 to 70,000 between the ages of 12 and 21 years. (C. N. of France, 1856.) The number of deaths was 1 to 488; to births, 1 to 89; the annual number, 25,000 to 30,000, of whom nine tenths were illegitimate. The average life of the foundlings was only 4 years; the mortality 52 per cent. the first year, and 78 per cent. up to 12 years; while the general average for the country was only 15 per cent. up to 21 years. The male foundlings constituted 18 per cent. of the convicts and prisoners, and the female one fifth of the prostitutes in that country. Foundling hospitals are numerous in Belgium, where the number of abandoned children in that country was estimated in 1859 to be 1 to 18 births. In 1859 there were only two foundling hospitals in Holland; that of Amsterdam receives at once 8000 children annually. There is a well-managed one in Vienna, founded in 1784 by Joseph II, and others, in the chief cities of the Austrian empire, but the system of foundlings in that country is not regarded with favor in Germany. In Spain the number may be reckoned at 60 to 70, with some 13,000 foundlings, with larger proportionals for Portugal. The great hospitals of Moscow and St. Petersburg are said to be well managed under strict governmental supervision, to which an enormous number of children are sent from various parts of the Russian empire, very many of which die on the way. The children are, it is said, carefully educated, those of superior promise specially so; and many of them become useful, the females as governesses, teachers, etc., and the males as engineers, doctors, and others. Books are provided for the army and navy are also supplied from these hospitals. Foundling hospitals are numerous in Sweden, where the average of illegitimate births is said to be large, 1 to 11 in the country, and 1 to 2 in Stockholm. Norway has fewer, and is a less propitious country for illegitimate children. The foundling hospital in London was established in 1738 through the efforts of captain Thomas Coram, but not opened fully until 1756, from which time to 1760, 4 years, 14,384 children were received into it, but only 4400 lived to be apprenticed, or 30 per cent. of the total number. One of the duties of the asylum in the matter of admission, and the difficulty of correcting them or adequately providing against their recurrence, Parliament withdrew its grant of public funds, and the institution "ceased to be a receptacle for foundlings," and was made a hospital for poor illegitimate children whose mothers are known, and children of soldiers and sailors killed in the service of their country. One was also established in Dublin in 1730, in which the mortality is said to have been even greater than in London. The average yearly admissions from 1848 to 1856 were about 900; the hospital has been established in Canton, but had not, up to 1859, much influence in preventing infanticide. The most important ones in America are those in the city of Mexico and Rio Janeiro. There are no foundling hospitals in the United States where provision is made for foundlings in connection with any of public or private charity, and the number of such children is comparatively small. Whether such institutions may or may not have proved beneficial under the conditions of ancient or mediaeval society, we cannot at this day determine, but the trials to which they are exposed as parts of the system of the charitable and philanthropic agencies of modern times, either as controlled and supported in whole or part by the state, or as left to the care and direction of private benevolence, presents re
rults, we think, contrary to the expectations of their founders; and the general tendency of opinion, especially in Protestant countries, is against their usefulness as means for the attainment of the desired ends. Granting that they may have some effect in diminishing the frequency of direct Guinean intercourse, which, however, their statistics do not prove, they certainly tend to increase the number of children abandoned by their parents, while the frightful mortality connected with them would seem to demonstrate that there can be no actual saving of human life through such establishments. We believe that vastly more children have prematurely died from causes inseparably connected with their transmission to and treatment in these hospitals than would have been destroyed outright by the parents from the same motives. Statistics seem clearly to show that they tend to foster licentiousness, increase the number of illegitimate births, and relax morals. In reviewing all the facts, the language of the author of the article Medical Jurisprudence, in the Encyclop. Britannica, xiv, 444, 8th ed.), seems hardly too strong: "Foundling hospitals, from the mortality in them, are among the most pestilential institutions of mistaken benevolence."—New Amer. Cyclop. viii, 634-640; Beckmann, History of Inventions, ii, 434-440 (Bohn's ed.); Cassel's Magazine, i, 123-4; Knight, Popular History of Agriculture and Industry of England, vii, 118-119; Chambers, Encyclopaedia, a. v.; Encyclopaedia britannica, a. v.; Guerry, Dictionnaire Morale et Politique de la France; Beenoison de Châteauneuf, Consideration sur les Eaux-fortes trouvées dans les principaux états de l'Europe. (J. W. M.)

Fountain, the rendering in the A. V. of the following Hebrew terms: 1. Properly and usually יָבָא, yàḇāʾ (lit. the eye), so called from flowing (Genesius, Thea. Heb. p. 1017), a natural source of living water. See Eze. 14. 2. likewise יָבָא, yàḇāʾ (from the same root), a well-watered place (Psa. xxvi.xiv, 6, "well"); also a single spring (as rendered in Psa. lxviii, 7; csc, i.e., any of the springs of king xvi, 5, 2; Chron. xxxii, 4; Psa. lxxix, 15; cxxiv, 8; Prov. vi, 16; viii, 24; xx, 26; Cant. iv, 12, 13; Isa. xiii, 18; Hos. xiii, 15; Joel iii, 18); spoken of the tide or influx of the sea (Gen. vii, 11; viii. 2). It is also sometimes so obscurely rendered in the A. V. as "well," as in Exod. xv, 27; in Elim were twelve wells of water; that is, not artificial wells, but natural fountains, as still seen in wady Ghoruneld (Hartlett's Forty Days in the Desert, p. 45). These two words, on the contrary, designating a flowing or bubbling spring, are always used to denote a stream of "living" or constantly-running water, in opposition to standing or stagnant pools, whether it issues immediately from the ground or from the bottom of a well. See Ains. 3. יָבְעָר, yàḇûr (so called from quaking or bubbling forth), a native rill (fig. of the vital flow, Eccl. xii, 6; elsewhere literally a "spring" in general, Isa. xxxv, 7; xlix, 13). 4. יָבָב, yàḇāḇ (so called from having been opened by digging), an artificial source of bowing water, used both literally and figuratively, and mostly in such phrases as "fountain of life" (Prov. xiii, 14), "fountain of wisdom? (xviii, 4), etc.; occasionally rendered "spring," "well," etc. 5. Improperly יָבָב, yàḇāḇ, or יָבָב, yàḇāḇ, baʿīr (Jer. vi, 7), which designates only a pit or standing water. See Well. The idea of a fountain is also implied in the phrase יָבָב, yàḇāḇ, motaḥ maqām, or going forth of waters ("spring," 2 Kings ii, 21; Psa. cvii, 33, 35; Isa. vi, 13; xvii, 11; "course," 2 Chron. xxxii, 30); as likewise in יָבָב, yàḇāḇ (from its rolling down the water), or יָבְעָר, yàḇāḇ, purling stream or overflowing fountain ("spring," Cant. iv, 12; Job. xv, 19; Judg. i, 15). See Topographical Terms.

Among the attractive features presented by the Land of Promise to the nation migrating from Egypt by way of the desert, none would be more striking than the natural gush of waters from the ground. Instead of watering his field or garden, as in Egypt, "with his foot" (Shaw, Travels, p. 408), the Hebrew shepherd was taught to look forward to a land "drinking water of the rain of heaven, a land of brooks of water, of fountains and springs from valleys and hills" (Deut. viii, 7; xi, 11). In the desert of Sinai, "the few living, perhaps perennial springs," by the fact of their rarity, assume an importance hardly to be understood in moist climates, and more than justify a poetical expression of national rejoicing over the discovery of one (Numb. xxii, 17). But the springs of Palestine, though short-lived, are remarkable for their abundance and beauty, especially those which fall into the Jordan and its lakes throughout its whole course (Stiel, Palestine, p. 17; Watters, Burckhardt, Syria, p. 844). The spring or fountain of living water, the "eye" of the landscape (see No. 1), is distinguished in all Oriental languages from the artificially sunk and enclosed well (Stanley, p. 605). Its importance is implied by the number of topographical names compounded with En or (Arab.) Āṭa: En-gedi, Āṭā-iṣdī, "spring of the gazelle," may serve as a striking instance (1 Sam. xxiii, 29; see Reland, p. 763; Robinson, i, 504; Stanley, App. § 50). Fountains are much more rare on the eastern side of the Jordan than on the western. There are a few among the mountains of Gilead; but in the great plateaus of Moab on the south, and Bashan on the north, they are almost unknown. This arises in part from the physical structure of the country, and in part from the dryness of the climate. Huge cisterns and tanks were constructed to supply the want of fountains. See Cistern. Some of the fountains of Palestine are of great size. All the perennial rivers and streams in the country have their sources in fountains, and draw comparatively little strength from surface water. Such are the fountains of the Jordan at Dan and Banias; of the Abaran at Ephel and Zalmanah; of the Leontes at Balci and Balibek; of the Orontes at Ain and Lebeh; of the Adonis at Afka, etc. Palestine is a country of mountains and hills, and it abounds in fountains of lesser note. The murmur of their waters is heard in every dell, and the luxuriant foliage which surrounds them is seen on every plain. For a good classification of these natural springs, see Robinson's Physic. Geog. of Palestine, p. 238 sq.; and for descriptions of many of them, see Tristram's Land of Israel, and Sepp's Hege Land.

Advantage was taken of these fountains to supply some of the great cities of Palestine with water. Hence, in Oriental cities generally, public fountains are frequent (Poole, Eng. Bible. in E. i, 180). Perhaps the most remarkable works of this kind are at Tyre, where
several copious springs were surrounded with massive walls, so as to raise the water to a sufficient height. Aqueducts, supported on arches, then conveyed it to the city (Porter, *Handbook for Syria and Pal.* 2, p. 142, 555, 380). One of the most extensive conveyed a abundant sup-
ply to Damascus from the great fountain at Fijeh. Hence no Eastern city is so well supplied with water as Damascus (Early Trav. p. 294). At Beyrut there is an ancient aqueduct that brings water from a source at least twenty miles distant, and two thousand feet above the level of the sea (Thomson, *Land and Book*, i, 48). An aqueduct some ten miles in length brought water to Jerusalem from a fountain near Solomon's Pools by subterranean channels. In these may perhaps be found the "sealed fountain" of Cant. iv, 12 (Hasselaquist, p. 145; Maundrell, *Early Trav.* p. 457). Traces of fountains at Jerusalem may probably be found in the names En-Rogel (2 Sam. xvii, 17), the "Dragon-well" or fountain, and the "gate of the fountain" (Neh. ii, 18, 14). But Jerusalem, though mainly dependent for its supply of water upon its rain-
water cisterns, appears from recent inquiries to have possessed either more than one perennial spring, or one issuing by more than one outlet (see Robinson, i, 343, 945; Williams, *Holy City*, ii, 436, 468; comp. Ezek. xxviii, i, 12). With this agrees the "fonsennis aqua" of Tactius (Hist. v, 12), and the ἄρεως ἀποθητήριος of Aristea (Josephus, ii, 112, edit. Havercamp; compare Raumer, p. 258; Kittel, *Physical Geog.* p. 412, 416). See JERUSALEM. In the towers built by Herod, Josephus says there were cisterns with ἀποθήτηριαι through which water was poured forth (War, v, 4, 4): these may have been statues or figures containing spouts for water after Roman models (Plin. *Hist. nat.* xxvi, 15, 121). The fountain of Nazareth bears a traditional antiquity, to which it has probably good derivative, if not actual claim (Rob-
erta, *Visits in Palestine*, i, 21, 29, 38; Fisher, *Visits in Syria*, i, 81; iii, 44). See NAZARETH.

The volcanic agency which has operated so power-
fully in Palestine has from very early times given tokens of its working in the warm springs which are found near the Sea of Galilee and the Dead Sea. These have been famous from time immemorial for their medicinal properties (Pliny, *Hist. nat.* x, 15; Lightfoot, *Opp. ii*, 224). They are confined to the vol-
canic valley of the Jordan, and all are strongly impreg-
nated with sulphur. The temperature of that of Tibe-
rias is 244 °Fahr. (Porter, *Handbook for Syr. and Pal.* 2, p. 421, 423). One of the most celebrated of these was Callirhoe, mentioned by Josephus as a place to be-
sorted to by Herod in his last illness (War, i, 33, 5; Kittel, *Phys. Geogr. of Pal.* p. 120, 121; Stanley, p. 285). His son Philip built the town, which he named Tibe-
rrias (the Hanh of Josh. xix, 35), at the sulphureous
hot springs on the south of the Sea of Galilee (Joseph.
*Antiqu.* xviii, 2, 3; Hasselaquist, *Travel. App.* p. 288; Kit-
to, p. 114; Burchhardt, *Syria*, p. 328, 380). Other hot
springs are found at seven miles' distance from Tibe-
rrias, and at Omkia on the coast, near Gaash, mentioned by
Ptolemy (v, 775; Burchhardt, p. 276, 277; Kitto, p. 116, 118). See CALLIRHOE.

From the value of such supplies of water in arid
countries, fountains figure much in the poetry of
the East as the natural images of perennial bless-
ings of various kinds. In the Scriptures foun-
tains are made the symbols of refreshment to the
weary, and also denote the perpetuity and inex-
haustible nature of the spiritual comfort which
God imparts to his people, whether by the influ-
ences of the Spirit, or through the ordinations of pub-
lie worship. There are also various texts in which
children, or an extended posterity, are, by a beauti-
fully apt image, described as a fountain, and the father
or progenitor as the source or spring from which
that fountain flows (Deut. xxxii, 28; *Ps. cxlii, 26; Prov.
v, 16, 18; xiii, 14, etc.). See WATER.

The FOUNTAIN-GATE (ןַּחַל by, קָה' עָשְׂרֶים, Sept. τὸν τόιον Α' λίου οὖν αὐτοίς, Vulg. porta fontis; A. V. "gate of the fountain") at Jerusalem was in the first or old wall, along the Valley of Hinnom, south of the Dung-gate, and adjoining the Pool of Siloam (from which it was probably derived in the name), on the
south of the Tyropoeon (Strong's *Harm. and Expos.* Append. p. 11). See JERUSALEM.

POQUEURÉ, Jean Antoine-Michel, a learned Ben-
edictory of the Congregation of St. Maur, was born at Châtesauroux in 1641, and died at Meaux Nov. 3, 1709.
He was made teacher of rhetoric in the mona-
stry of St. Pierre de Maur, where he acquired the reputation
of being an excellent professor, especially of Greek.
In 1678 he was appointed superior of his convent, and
filled the post for fifteen years, after which he retired
to the abbey of St. Faron at Meaux, where he died.
His works are, (1) a Latin translation of a work of
Dionysius, patriarch of Constantinople, on points of
controversy between the Calvinists and Roman Cathol-
ics, published, together with original text, under the
title of *Dionysia patriarchae Constantinopolitani super Calvinitarum errores et ac redacta imprimis prosenecia Re-
gionum*; and with the preceding, (2) a Latin transla-
tion of the acts of the council held at Jerusalem A.D.
1672, under the title of *Synodus Belletromicae pro redacta
prosera anno 1672 celebrata, grecce et lat. (Paris, 1678, 8vo).* (By the advice of François Combeffs and A. Ar-
naud, these translations were revised and corrected, and
a new edition published in 1678, the latter under the
title of *Synodus Hierosolimitanae pro redacta prosenecia*.
(3) Under the pseudonym of Tamagninus, *Historia
Monothelitarum atque Honori controversione scrutata
octo comprehensione* (Paris, 1678, 8vo), a work which
excited a good deal of interest.—*Houter, Nouv. Dic-
Générale*, xvii, 800-100.

POQUEURÉ, Jean-François, a French Jesuit, was
sent as a missionary to Central Asia in the early part
of the 18th century. He made himself acquainted with
the language, idioms, and the theogony of the Cen-
tral Empire, and was struck with their points of resem-
bances not only to Christian doctrine, but especially to
the primitive religions then dominant in the border.
According to him, the Chou-King (sacred book of Confucius) is only a paraphrase of Genesis, and the
praises addressed to Wen-wang and to Tchou-oung in
the Chi-King are only hymns in honor of the Mes-
thiah. One can only hope with this information that
poqueuré would aid in proselytizing the Chinese, who thus
had only to change the names of their deities to claim
priority in holding the doctrines of revelation over
Christians themselves. Strict theologians attacked
his opinions and censured his means of conversion;
neithertheless, on his return to Rome in 1739, pope Clement XI made him bishop of Eleutheropolis. He was recommended by the Academy of Inscriptions as the only person capable of criticizing Fourmont's Chinese Grammar. His Tabula Chronologica historiarum Sinicorum, 1729 (on 3 sheets), contains a list of the Chinese monarchs, with the dates of the chief events of the Chinese history and a complete series of the Nan-hao, or names of years (new edition by Seutter, Augsburg, 1746). He wrote also a letter to the duke de La Force, and inserted in tom. v of Lettres édifiantes, which furnishes curious details in regard to the Chinese army and the bonzes.—Hoefler, Nouv. Biog. Générale, xviii, 352.

Fourier, François Charles Marie, a philosopher, was born at Beauconisse, 1772. His father designed him for trade, but he never took to it willingly. In 1796 he entered the French army, and in 1798 he left it and entered a mercantile house at Marseilles. His mind seems to have been turned about this time to social questions by the scarcity of food and the terrible sufferings of the poor. The relations of capital to labor, and similar social problems, occupied his mind intensely for several years, and in 1806 he issued his first book, entitled Théorie des Quatre Mouvements et des Destinées Générales. "It is the strangest, most mystical, and most startling of all his works, though merely given as a general announcement of his theory. Surprise and wonder were the only effects it produced on those who read it, and the few public writers who reviewed it." In 1821 he removed to Paris, in order to publish his writings, and lived there, with some interruptions, to his death, Oct. 10, 1837. His principal works are: Théorie des Quatre Mouvements et des Destinées Générales (1806, 8vo);—Traité de l'Association Domestique Agricole (1822, 2 vols. 8vo);—Le Nouveau Monde, Industriel et Sociétaire (1829);—a Livre d'annonces (1830);—Pieges et Chevaux socialistes, dans les deux séries des Mers et Oceans (1831);—La Fausse Industrie, morcelée, repugnante, nuisible, et l'Antidote, l'Industrie naturelle, combinée, attrayante. His Oeuvres complètes were published at Paris in 6 vols. (1840-46). The Positions of the Human Soul, translated by Morell, was published in London in 1840. With his philosophical speculations, he divided himself into science and praxis, or his psychological and ontological theory and its application in his social system. The first comprises what he styles passionale attraction, the last its application to society in industrial association. His psychology is confined to an analysis of the affections, from which he infers that the Newtonian principle of attraction is equally applicable to the social and mental worlds, and that society should be moulded in accordance with the diversity and intensity of individual attractions. Unity in diversity and harmony in contrast is what he professes to achieve in his new social system. This principle of passionale attraction is regarded by Fourier as his grand discovery, which had been culpably neglected and overlooked by past philosophers (Tennemann, Hist. Philos. § 485). Among the followers of Fourier are counted Considérant, Pompery, Lemoyn, Hennequin, Jules Lechevalier, and Trannen. Several periodicals, mostly short-lived, have been established for the defence of Fourierism, as Le Nouveau Monde, Le Phalanisnire, La Phalanxerie, La Démocratie Pacifique. Several attempts to carry out the view of Fourier were made in France and in the United States, but all failed. See Gamond, Fourier and his System (London, 1842, 8vo); Doherty, False Association, with Memoir of Fourier (London, 1841, 8vo); Christian Examiner, xxxix, 57; Methodist Quarterly Rev. v, 545. See COMMUNISM.

Fourier, Pierre, of Matalincourt, a Roman Catholic, was born at Matalincourt, Nov. 30, 1655, and died at Gray Dec. 9, 1669. He reformed the regular canons of the congregation of St. Sauveur de Lorraine, and established the religious of the congregation of Notre Dame for the instruction of girls. He died in the odor of sanctity, and his name was placed on the list of the beatified at Rome Jan. 29, 1780. See lives of him by Bedel (Paris, 1846, 8vo) and Frantz (Nancy, 1746, 12mo).—Hoefler, Nouv. Biog. Générale, xviii, 544-5.

Fourmont, Étienne (Stephen), a French Orientalist, known as Fourmont the elder, to distinguish him from his more famous son, the abbé Fourmont, was born at Herbelay, near Paris, June 29, 1685, and died Dec. 19, 1746. He was an earnest and indefatigable student, and, being endowed with an unusually quick and retentive memory, stored his mind with a vast amount of information in regard to the classic and Oriental languages and their literature. On the death of the abbé Galland in 1718, Fourmont succeeded him as professor of Arabic in the College of France and as member of the Academy of Inscriptions, and subsequently became a member of the learned societies of Paris, Berlin, and London. Fréret describes him as being of a gentle and cheerful disposition, wholly absorbed in his labors, and possessed of little knowledge of men, but offensively vain of his knowledge. For a list of Fourmont's numerous writings, published or in manuscript, see his life by De Guignes and Des Hautes-Pyées (Vie d'Étienne Fourmont et Catalogue de ses Oeuvres) of 1751. An edition of his Critique des Manuscrits sur l'Antiquité et la vie des scribes of 1722, and his Notes on Ancient History, and Catalogue des Ouvrages de M. Fourmont (Amst. 1781), is said, however, to contain some works only projected and never completed. Besides his famous commentary on the Psalms and Hebrew poetry, we mention here only Méditations Simicamica, complectens artem legendi linguis Sinicam Characteres (Paris, 1737, fol.), which is the preliminary portion of the following, published separately: Linguae Sinicarum mandarinicae hieroglyphicae grammatica duplex, katale et cum characteribus Sinarum (Paris, 1742, fol.);—Religions sur l'Origine de l'histoire et la succession des anciens peuples, Childiens, Hébreus, Phéniciens, Égyptiens, Greece jusqu'au temps de Cyrus (Paris 1735 and 1747, 2 vols. 4to).—Hoefler, Nouv. Biog. Générale, xviii, 564-565; Rose, New General Biog. Dict. vii, 427; Quérard, La France littéraire. (J. W. M.)

Fowl is the rendering of the following Heb. words in the Bible: 1. Usually שָׁעִיר (shā‘ir, פָּעִית, any winged animal, a generic term for the feathered race, frequently with the addition of the heavens, "of the heavens." 2. שְׁבָעָה (shē‘āh, so called from rushing on its prey; compare Jer. xii. 9, where it is spoken of a beast), 3. שְׁבָעָה (shē‘ēm, so called from the warlike king (Isa. xlii. 11), collect. for birds of prey (Gen. xvi. 11; Isa. xvi. 8; Ezek. xxxix. 4), like בִּשְׁמוֹ (besom, as a vulture (Rev. xvii. 2; xix. 17, 21); translated fowl in Gen. xv. 11; Job xxxvi. 7; Isa. xvii. 6, 8; נְפָשָׁת (nipash), so called from its twittering; Chald. נְפָשָׁת. Dan. iv. 9, 11, 18, 30), a small bird, spec. a sparrow (Psa. lxxxiv. 4; cii; Prov. xxxvi. xxvii. 3; Job xii. 29; Eccles. xii. 6), or similar small birds. 4. שָׁעִיר (shā‘ir, civ. xvi. 17; Prov. vi. 5, vii. 28; Amos iii. 5, etc.) also collect. birds of any kind, Gen. xv. 10; Lev. xiv. 4-53; Dent. iv. 17; Psa. viii. 9; cxliv. 10, etc.; and even a bird of prey, Ezek. xxxix. 4), occas. rendered by strange spellings, as shē‘ir. In Neb. v. 18, the word seems to have the special sense which "fowl" has with us, as it is enumerated among the viands provided for Nehemiah's table. 4. פָּעִית (pa‘ith), בְּרָיָם (barayim), "fatted fowls," 1 Kings iv. 28, as provided for the table of Solomon, where Kimchi understands apexana, but Gesenius, with the Jeraus, Targum, and other rabbis, understands תַּלְמָדוֹת (telmadot), the Governamental plumes of the ancient Egyptians had spacious poultry-yards, set apart for keeping geeze and other
wild-fowl, which they fattened for the table; and their poulterers bestowed especial care upon the geese (Wilkinson, ii, 218; iii, 174, abridgm.). See FATTED FOWL.

The Hebrew word translated "fowl is most frequently rd שֵׁרטִים, which comprehends all kinds of birds (including rosen, Luke xii, 24); but in Lev. xix, 17-21, where the context shows that birds of prey are meant, the Greek is ρυχαῖα. The same distinction is observed in the apocryphal writings: comp. Judges xi, 7; Eccles. xvii, 4; xili, 14, with 2 Macc. xv, 33. See Cock; SPARROW.

The following statements cover the remaining details.

Clean birds (םַגָּהְּכֵּנָהָיֶהוֹנָא, Deut. xiv, 11, 20), i. e. all not named in Lev. xi, 13-19; Deut. xiv, 12-18, were (as well as their eggs, לְכֹלָהָיֶהוֹנָא) used for food (Luke xii, 12), e. g. quails (q. v.), chickens, doves, also wild-fowl; hence bird-catching was very common (Psalms, 77; Amos iii, 5; Hos. v, 1; vi, 12, etc.), for which purpose nets, traps, and stool-birds (Jer. v, 27; Eccles. xi, 31 [97]) were used (see Gesenius, Thee, p. 695). See FOWLERS. In robbing a nest of its eggs or young, however, the mother-bird must be allowed to escape (Deut. xxiii, 6 sq.; see Michaelis, Synag. Comm. ii, 89 sq.; Mose Recht, iii, 181 sq.), a prescription founded not only on motives of humanity (comp. Lev. xii, 28), yet see Heumann, Das legis die. temum, Gött. 1748; also in his Novus Syllaba Dissert., p. 299 sq.); although the Talmudists (Mishna, Chohin, xii, 2) refer this only to clean birds, and make many nice distinctions in the matter, with various penalties attached (Maccaboth, iii, 4). Birds were not regularly offered in sacrifice, except in communion for some nastier victim (Lev. i, 15-17; compare Mishna, Kissim, v, 11). See Doves.

The bird was first brought to the altar, where the priest (with his nail) nipped off the head, or rather cracked (נָשָׁף) the neck, so that it still hung to the bird (Lev. v, 6); he then squeezed out the blood (sufficient, at least, in quantity for sprinkling), and finally threw the body into the fire, but without the crop, which (with its contents and the offal) was separately (נָשָׁף) thrown into the ash-heap under the altar. Before the flesh was committed to the flames, however, a folding back or breaking of the wings (נָשָׁף פָּרָר) is prescribed, a symbol of which the meaning is not clear (see Dassow, De ave urogynsecta, Viteb, 1697; Es ...)
Birds of various kinds abound, and no doubt abounded in ancient times, in Palestine. Stanley speaks of "countless birds of all kinds, aquatic fowls by the lake side, partridges and pigeons hovering, as on the Nile bank, over the rich plains of Gennesaret" (Stanley and Palestine, p. 427). The capture of these for the table or other uses would we might expect, form the employment of many persons, and lead to the adoption of various methods to effect it. See PALESTINE.

We read of the "snare," שַׁלְּשָׁ, pack (Psa. xxi, 3; xxiv, 7; Hos. ix, 8), and of the "net," רַעְשָׁ, re shedh (Prov. i, 17; Hos. vii, 11), "of the fowler," אֵבָהוֹ or אֵבָהוֹ = sower. In Hos. vi, 1, both net and snares are mentioned together. The mawkת (מָשַׁקָּה) is used synonymously with the pack in Amos iii, 5. This was employed for taking either beasts or birds. It was a trap set in the path (Prov. vii, 28; xxii, 6), or hidden

FOWLER 635

Fowler, Edward, bishop of Gloucester, was born in 1682 at Westerleigh, in Gloucestershire, where his father was minister. He was educated at Corpus Christi College, but, removing to Cambridge, he took his master's degree as a member of Trinity College, and, returning to Oxford, was incorporated in the same degree July 5, 1656. About the same time he became chaplain to Arabella, countess dowager of Kent, who presented him to the rectory of Northill, in Bedfordshire. As he had been brought up among the Puritans, he at first objected to conformity with the Church of England, but became afterwards one of its greatest ornaments. In 1681 he was made vicar of

FOWLER

... on or in the ground (Psa. cxl, 6; cxlii, 4). The form of this springs, or trap net, appears from two passages (Amos iii, 5, and Psa. lxxix, 25). It was in two parts, which, when set, were spread out upon the ground, and slightly fastened with a stick (trap-stick), so that, as soon as a bird or beast touched the stick, the parts flew up and inclosed the bird in the net, or caught the foot of the animal. See SNARE.

By a humane as well as wise regulation, Moses forbade any one finding a bird's nest to take also the dam with the eggs or young (Deut. xxvii, 6, 7), lest the species should become exterminated (Kitto, Pictorial Bible, ad loc.). See Bird.

Fowler, Christopher, an eminent Puritan divine, was born at Marlborough in 1611, and died in 1676. He was educated at Oxford, and took orders first in the English Church, but became a Presbyterian in 1641, and signalized his zeal by the earnestness of his preaching. He was made vicar of St. Mary's, Reading, but lost the post at the Restoration. Wood's prejudices doubtless influenced his view of Fowler, whom he calls "a conceited and fantastical Presbyterian." He wrote, 1. Demoniwm Meridikwm (1655, pt. i, 4to; 1656, pt. ii, 4to);—2. Anti-Christian Blas-
FOWLER 636

FOX

size of an English cur fox, and similarly formed; but the ears are wider and longer, the fur in general ochry-rufous above, and whitish beneath: there is a faint black ring towards the tip of the tail, and the back of the ears are sooty, with bright fulvous edges. The species burrows, is silent and solitary, extends eastward into Southern Persia, and is said to be found in Natalia. The Syrian Tašleb is reputed to be very destructive in the vineyards, or, rather, a plunderer of ripe grapes; but he is certainly less so than the jackal, whose ravages are carried on in troops, and with less fear of man. Ehrenberg's two species of Tašleb (one of which he takes to be the Araðis of ancient Egypt, and Geoffroy's Canis Niloticus, the Abu Bossein of the Arabs) are nearly allied to, or varieties of the race, but residing in Egypt, and further to the south, where it seems they do not burrow. The Egyptian Vulpes Niloticus, and doubtless the common

Egyptian Dog-Fox.

FOX (V. vulpes), are Palestine species. There is also the so-called Turkish fox (Cynalgus Turcicus) of Asia Minor, not unknown to the south as far as the Orentes, and therefore likely to be an occasional visitor at least of the woods of Libanus. This animal is one of an oc culent group, with the general character of vulpes, but having the pupils of the eyes less contractile in a vertical direction, and a gland on the base of the tail marked by a dark spot. There is, besides, one of a third group, namely, Thコンテンツしますが、contextを理解するためのプログラミングが必要です。現在のテキストを手動で処理することはできません。
which is sufficiently common along the coast, is eminently gregarious, offensive in smell; bowls intolerably in complete concert with all others within hearing; burrows; is crassipalatus and nocturnal, impudent, thievish; penetrates into outhouses; ravages poultry-yard by night. Then, if they chance on game, lizards, locusts, insects, garbage, grapes; and leaves not even the graves of man himself undisturbed. It is probable that *Canis Sylvius* is but a chryseseus, or wild dog, belonging to the group of *Dholeus*, well known in India, and, though closely allied to, different from, the jackal, *Canis*; and that if four species of *Canis* at Aleppo, Empirich and Ehrenberg of four in Libanus, not identical with each other; nor are any of these clearly included in the thirteen species which the last-named writers recognize in Egypt. They still omit, or are not cognizable of, wild dogs [see Doc.] and jackals, [see Juc.], and have been gradually extinguished by local circumstances, such as the destruction of the forests of or the inhabitants, and the consequent reduction of the means of subsistence; or, finally, they may have been extirpated since the introduction of gunpowder. Hasselquist [see E. v., 184] says foxes are common in the stony country about Bethlehem, and near the Convent of St. John, where, about vintage time, they destroy all the vines unless they are strictly watched. Thomson started up and chased one when passing over that part of the plain which Timnath is believed to have been situated. Land and Book, ii, 340. That jackals and foxes were formerly very common in some parts of Palestine is evident from the names of places derived from these animals, as Hazar-Shual [Josh. xv, 28], Shael-bim (Judg. i, 35). See JACAL.

The fox is proverbially fond of grapes (Aristoph. Egen. 1976 sq.; Theocr. v. 112 sq.; Nicand. Alexiph. 165; Phaedr. iv. 2; Galen. Alim. Facult. iii, 2), and a very destructive visitor to vineyards (Cant. ii, 15). The proverbially cunning character of the fox is alluded to in Ezek. xliii, 4, where the prophets of Israel are said to be like foxes in the desert, and in Luke xxi, 32, where our Saviour calls Herod "that fox." The fox's habit of burrowing among ruins is referred to in Neh. iv, 8, and Lam. v, 18 (see also Matt. viii, 20). (On Pas. lxxiii, 11, see Pausan. iv, 18, 4.) The Rabbinical writers make frequent mention of the fox and his habits. In the Talmud it is declared, "The r. Gerson does not die from being under the earth; he is used to it, and it does not hurt him." And again, "He has gained as much as a fox in a ploughed field," i.e. nothing. Another proverb relating to him is this:

"If the fox be at the rudder, speak him fairly. My dear brother."

Foxes are figured in hunting-scenes on the Egyptian monuments (Wilkinson, Anc. Egypt., i, 224, abridgment). See CHASE.

None of the usual explanations of the controverted passage in Judg. xv, 5, relative to the foxes, jackals, or other canines which Samson employed to set fire to the corn of the Philistines is altogether satisfactory. First, taking Dr. Kennicott's proposed explanation of the case (Remarks on Select Passages in the O. T., Oct. 1877, p. 100), on the authority of seven Heb. MSS., by changing וְלִשֵׁגֵר to וְלִשֵּגֵר, thus reading amautus (comp. the Sept. at 1 Kings xx, 10), i.e. "sheaves" instead of "foxes," and translating כּוֹסֵה instead of "tail," the meaning then would be, that Samson merely connected three hundred shocks of corn, already reaped, by hands or ends, and thus burned the whole. We admit that this, at first view, appears a rational explanation (see Hopkins, Plumb-line Papers, Auburn, 1862, p. 20 sq.); but it should be observed that three hundred shocks of corn would not make two stacks, and therefore the result would be quite inadequate, considered as a punishment or act of vengeance upon the Philistine population, then predominant over the isles. This latter is a species of fox, found in France, used to mean corn-stacks, then it may be asked how, and for what object, were three hundred corn-stacks brought together in one place from so large a surface of country. The task, in that hilly region, would have occupied all the cattle and vehicles for several months; and then to this would not be added the undertaking of making the whole population travel repeatedly, in order finally to reload the grain and take it to their threshing-floors. Nor will the verb מִּקְשָׁת ("caught") bear the rendering thus required, for it properly means to ensnare, to take captive, and is specially applied to the act of catching animals (e. g. Amos iii, 5). (See, also, what an anonymous French author has written under the title of Rénardes de Samarc, and his arguments refuted in a treatise, De Vulpibus Simonesca;" by Gebhard, in Thea. Nov. Theol. Phil. i, 558 sq.; and comp. Gasser, Comment. ad loc. [Hal. 1751]; Pfaff, Von dem Fuchsemusam [Tub. 1736]; Schröder, De vulpibus Simonesca; [Tub. 1715]; and Tzagi, De ranae usam [Paris 1717].) The proposed reading of Ken- nicott has deservedly found little favor with commentators. Not to mention the authority of the important old versions which are opposed to this view, it is pretty certain that מִּקְשָׁת cannot mean "sheaves." The word, which occurs only three times, denotes in Isa. xi, 12, "the hollow of the hand," and in 1 Kings xx, 10; Ezek. xiii, 19, "handfuls." Reverting, therefore, to the interpretation of foxes burning the harvest by means of firebrands attached to their tails, the case is borne out by Ovid (Fast. iv, 661):

"Oor igniter missae jumbita ardentia telis
ducta foras vulpes".

In allusion to the fact that the Romans, at the feast in honor of Ceres, the goddess of corn, to whom they offered animals injurious to cornfields, were accustomed to turn into the circuit foxes with torches so fastened to them as to burn them to death, in retaliation of the injuries done to the corn by foxes so furnished. Again, in the fable of Aphonius, quoted by Merrick; but not, as is alleged, by the brick with a bass-relief representing a man driving two foxes with fire fastened to their tails, which was found twenty-eight feet below the present surface of London (Leland, Collectanea); because tiles of similar character and execution have been found in other parts of England. The r. de Cange is representing the history of Susanna and the elders, and others the four Evangelists, and therefore all derived from Biblical, not pagan sources. Commentators, following the rendering of the Sept. (eisipon, Vulg. condi), have, with common consent, adopted the interpretation that two foxes were tied together by their tails with a firebrand between them. Now this does not appear to have been the practice of the Romans, nor does it occur in the fable of Aphonius. Hence some have understood the text to mean that each fox had a separate brand; for it must be questioned whether two united would run in the same direction. They would be apt to pull counter to each other, and perhaps fight most fiercely; whereas there can be no doubt that every canine would run, with fire attached to its tail, not from choice, but necessity, through standing corn, if the fire was to have effect in the direction of the animal. For foxes and jackals, when chased, run direct to their holes, and sportsmen well know the necessity of stopping up those of the fox while the animal is abroad, or there is no chance of a chase. But this explanation requires that by the words rendered "tail to tail" we should understand this kind of the firebrand attached to the extremity of the tail, i.e. one apiece; this would be using the word in a double sense in the same pas-
sage, an equivocate not in accordance with the direct style of the narrative. It is also probable that after a few fruitless efforts at trying to pursue each of his own course, the animals would soon agree sufficiently to give themselves up to the butcher, and many of them, being free from all sense of anything as to the length of the cord which attached the animals, a consideration which is obviously of much importance in the question at issue, for, as jackals are gregarious, the couples would naturally run together if we allow a length of cord of two or three yards, especially when we recollect that the terrified animals would endeavor to escape as far as possible out of the reach of their captor, and make the best of their way out of his sight. Finally, as the operation of tying 150 brands to so many fierce and irascible animals could not be effected in one day by a single man, nor produce the result intended if done in one place, it seems more probable that the name of Samson, as the chief director of the act, is employed to represent the whole party who effected his intentions in different places at the same time, and thereby insured that general conflagration of the harvest which was the signal of open resistance on the part of Israel to the long-endured oppression of the Philistine people. (See Clarke's Comment. ad loc.; Kitto's Daily Bible Illustrations, ad loc.; Thomson, Land and Book, ii, 341). See Samson.

FOX, Edward, one of the English Reformers, was born in Gloucestershire (date not known precisely). He was educated at Exon, and at the University of Cambridge, of which he became provost in 1528. He held this post during his life. Wolesey sent him on an embassy to Rome, with Gardiner, to promote a bull from Clement VII authorizing the divorce of the king from Catherine of Aragon. It was in conversation with Fox and Gardiner, in 1528, that Cranmer first saw the method of settling the question of the king's divorce, by taking the opinion of the most learned men and universities in Christendom; and he it was who made it known to the king as Cranmer's suggestion, when Gardiner would have taken the credit of it to himself. In the prosecution of this plan he was sent with Stephen Gardiner, in 1530, to obtain the determination of the University of Cambridge. The heads of the university, the vice-chancellor, and the afterwards notorious Bunner, were on the king's side, but the university itself was divided. It was honorable to the University of Cambridge that so strong a resistance was offered to the will of the king. The royal authority being at this time on the side of reform, the commissioners, Fox and Gardiner, the latter being afterwards the great opponent of the Reformation, at length, though with difficulty, did it on their point, and it was thought then that 'the king's marriage was contrary to the law of God.' In 1531 he became archdeacon of Leicester, and in 1538 archdeacon of Dorset. In 1535 he was appointed bishop of Hereford. Shortly after his consecration he was sent ambassador to the Protestant princes in Germany assembled at Smalkald, whom he exhorted to unite, in point of doctrine, with the Church of England. He spent the winter at Wittenberg, and held several conferences with some of the German divines, endeavoring to conclude a treaty with them upon many articles of religion, though nothing was effected. Bishop Burnet gives a particular account of this negotiation in his History of the Reformation (pt. iii). He returned to England in 1538, and died at London May 8, 1538. He published a book, De Vera differentia Regni Pontificis et Ecclesiae Divinitatis, et quae sit iure veritas et virtus utriusque. (London, 1534 and 1538), which was translated into English by Henry Lord Stafford.—Burnet, History of the Reformation, vols. i, ii; Hook, Eccles. Biography, v, 166; Collier, Eccles. History of England, iv, 312 sq.

Fox, George, founder of the Society of Friends, was born at Drayton, Leicestershire, England, in July, 1624. His parents were pious members of the Church of England, and brought him up carefully. His mother, Mary Lago, was of the martyr stock, and had inherited their intense feelings and religious enthusiasm. To her he probably owed his education and many of the habits he formed. From his father, he was indebted for the incorruptible integrity and tenderly scrupulous regard for truth by which he was characterized. As a child, he was singularly quiet, docile, observant, and meditative. He sat among his elders silently, watching their frivolity, untruthfulness, and dishonesty, until he came to reflect seriously and deeply, resolving, 'If ever I come to be a man, surely I shall not do so, nor be so wanton.' Some of his relatives would have had the thoughtful lad trained for a clergyman, but others objecting, he was apprenticed to a person who, as the manner then was, combined a number of trades—shoemaking, wool-stapling, cattle-dealing, and so on. George proved a valuable assistant to him. The fear of God rested mightily upon him, and he was anxiously watchful in all things to maintain strict integrity. 'Verily' was a favorite word of his, and he was in the custom of saying among those who knew him, 'If George says "Verily" there is no altering him' (Christian Times). His early religious experience was very deep; and, after the termination of his apprenticeship, he felt himself impelled by a divine monition (1645) to leave his home and friends, seek the "light." For economic reasons, however, in these travels he wore a leathern doublet. In 1647, after, as he says, "forsoaking the priests and the separate preachers also, and those esteemed the most experienced people," none of whom could "speak to his condition," he "heard a voice" calling him to Christ, and his "heart leaped for joy." This was in 1647, in which year he began the ministry, which lasted during his life. When he began his work the mind of England was in a state of ferment, and he found many willing auditors. His personal peculiarities of dress and manner attracted the attention and personation of the lord. Then the Lord sent me forth into the world, he forbade me to put off my hat to any, high or low, and I was required to 'thee' and 'thou' all men and women, without any respect to rich or poor, great or small; and as I traveled up and down, I was not to bid people 'good-morrow' or 'good-evening', but neither more nor less, I should gape with my leg to any one; and this made the sects and professions to rage' (Journ. 1648). He taught (Journ. 1649, p. 25) that "it is not the Scriptures, but the Holy Spirit, by which opinions and religions are to be tried." Of course these novel and earnest views excited great opposition: Fox was imprisoned for some time as a "disturber of the peace." He continued, however, to travel up and down England, preaching, and exhorting, and leaving permanent traces behind him almost everywhere. His followers were first called "Quakers" at Derby, in 1656, by Justice Bennet, as Fox says, for 'Quaker' out of some reference to the Lord, and in 1655 he was brought before Cromwell, who pronounced favorably upon both his doctrines and character. Nevertheless, he was frequently imprisoned by country magistrates. In 1669 he married the widow of Judge Fell. He was again sent to America, where he spent two years in propagating his views with much success. On his return to England in 1673, he was imprisoned for some time in Worcester jail, under the charge of having held a meeting from all parts of the nation for terrifying the king's subjects. On the land hisHolliwell devoted himself to the advancement of learning in Germany, and was always endeavoring to persuade men to listen to the voice of Christ within them. He died in London, January 13, 1691 (Chambers, Cyclopædia, s. v.). The person and character of George Fox was, in many respects, a lofty one. In self-sacrifice, earnestness, and purity, he was a model. His intellectual powers were not of a very high order. His doctrine of the "inner light" was elaborated by Robert Barclay. (q.)
ely, he was brought to the notice of the earl of Rich-
mund, who, when he became king (Henry VII), made
Fox a privy councillor, a bishop of Exeter, and send
him on several embassies, then transferred him to
the see of Durham, and finally to that of Winchester.
Fox evinced his appreciation of learning by founding
Corpus Christi College, Oxford, with two lectures for
its benefactors, and by establishing several free
schools. He died in 1559, and was buried in Win-
chester Cathedral. He wrote The Contemplation
of Synners (Lond. 1499, 4to)—Letter to Cardinal Wolsey.

FOX, William Johnson, an English Unitarian
minister, and also a politician, was born at Ugleyhall
Farm, near Wrentham, Suffolk, in 1786, the son of
a small farmer. In youth he gave promise of talent,
and was dedicated to the Christian ministry, and
studied at Homerton College, then under the direction
of Dr. Prys Smith. He soon abandoned the orthodox
independent, and became first a Unitarian, and later
a deistical heresiarch, who preached more on politics
than on religion. His chapel at Finsbury Square
was filled by auditors attracted by his eloquence and
his spirit of philanthropy. Politics at last became
more attractive to him than preaching, and in 1847 he
entered Parliament, in which he held a seat for Old-
ham until 1862, when falling health compelled him to
resign. He died June 3, 1864. He was a man of liter-
tary tastes, and was a frequent contributor to the
Westminster Review, and to the Retrospective Review.
His peculiar theological views are set forth in his Re-
ligious Ideas (Lond. 1849). He also published Lectures
on Morality (1836, 8vo). These, with other writings
of his, are collected in Memorial Edition of the Works
of W. J. Fox (Lond. 1865, 2 vols. 8vo).

FRANCHET, GERARD DE, a monkish ecclesiastical
historian, was born at Châlons (Limousin), in France,
about the beginning of the 18th century, and died at
Limoges Oct. 4, 1721. He entered the Dominican or-
der in 1722, and filled in succession the posts of prior
of the convent of Limoges (1733-45), then of that of
Marseilles, provincial of Provence (1751-9), and (1786)
was chosen assistant (de한설) provincial by the
chapter of Limoges. He wrote (according to Layard),
by the order of the chapter general which as-
sembled at Paris in 1786, Vitae Fratrum ordinis Prudi-
catorum (Douay, 1619, and Valence, 1657); Chronicon
ab Iniusto; and left, besides, some manuscripts.

FRAGMENTS OF WOLVENBUTTLE. See WOLVEN-
BUTTLE FRAGMENTS.

Frame is the rendering in the A. V. of ρέιτορ, 
πρεστον, form (usually spoken figuratively of imagin-
ation), e. g. the bodily formation (Psa. cii. 14; "thing
framed," Isa. xxiii, 16); and מים, mibôch, building,
e. g. of a city (Exek. xl, 2).

FRANCE, a country of Europe, having an area of
201,092 square miles, and in 1886 a population of
38,218,408 inhabitants.

I. CHRISTIAN HISTORY.—(1.) From the first establish-
ment of Christianity until the 11th Century.—France
as it was formerly called, Gaul, was among the first
of the European countries in which Christian
Churches were founded. Roman Catholic writers
tell us that the apostle Peter ordained bishops for Limoges, Tou-
loise, Bordeaux, Montpellier, Arles, Sens, Aix, Mâcon, Vienne,
Chalon, Bourg, Clermont, Avignon, and Saintes is not historical;
it but is certain that Christianity
was planted in many parts of Gaul at least as early as the 2d century.
The first Christians in
Gaul doubtless came from Asia Minor. We may as-
sume as certain that the first Churches were
ready tolerably large at the time of Ireneus (q. v.).
who in 196 presided at three provincial synods, and seems to have established a school of catechists at Lyons. At the beginning of the 4th century there was no province in Gaul as to which we have not accounts of bishops, or at least of Christian churches. Of the nation with which the Belgic kingdom in Gaul in the 5th century, the Burgundians were already Christians when they left the southern districts of Germany, and settled between the rivers Saone and Rhone and the Alps, before the year 417. Among the Franks, king Clovis (q. v.) overtook Christian, under whose avaricious, and with more than 8000 soldiers, after the battle of Tolbiacum, in 496. In the mean time Christianity became so generally extended in all parts of the country, in the north as well as in the south, that Church provinces began to be formed everywhere, the capital of each political province generally became also the seat of the metropolitan. The Franks, embracing the Catholic faith while a considerable part of Europe was still under the rule of the Arians, began soon to be regarded as the chief Catholic nation of Europe. Through the establishment of the empire of Charlemagne, France seems of for a time to become only a part of the union of all the German nations, but soon after the division of the empire in 843 it recommenced its development as an independent state. King Lothaire I. was obliged to humble himself before the pope, as the hostile power. In the year 900, the Franks were the papal threats, and the Frankish bishops did not object to have the spurious decretales used for the first time against Hincmar (q. v.) of Rheims, for they thought it better to obey a distant pope than a threatening metropolitan at home. But when, after the death of Lothaire I. (898), Charles the Bald compelled the king to summon bishops to acknowledge Ansegisus, archbishop of Sens, as the primate and papal vicar for Gaul and Germany; but, under the counsel of Hincmar, they persisted in obeying the holy father only as far as was consistent with the respect of all the metropolitans and with the laws of the Church. In general, the bishops of France, as well as the kings, resisted more energetically that any other nation the ever-growing claims of the popes, and their unceasing efforts to establish an absolute sway over all bishops, synods, and kings. The 6th century, with the downfall of the Merovingian kings, was the prominent defender of national and episcopal rights against papal usurpations. Urban II., at the Council of Clermont (1095), excommunicated King Philip for his adulterous connection with the countess Bertrade, and, aided by the sympathy of the people, compelled him to give up his paramour. Louis IX. (q. v.), though so firmly attached to the doctrines and usages of his Church that, after his death, he was declared a saint, confirmed the rights of the nation by the Pragmatic Sanction in 1268, the great palladium of the freedom of the Church. In 1249, of the position to pope Boniface VIII., who declared every one a heretic who did not believe that the king in temporal as well as in spiritual matters was subject to the pope, the three estates of France, convened in a General Diet (1802), were unanimous in maintaining the independence of the kingdom, and the king in 1670 pronounced an interdict upon the whole of France, but popular opinion effectually opposed against all attempts to bend the spiritual with the secular authority. In 1803, the king of France even succeeded in having a pope elected who took up his residence at Avignon, whichroud the kingdom in 1670, but that pope proclaimed an interdict upon the whole of France, but popular opinion effectually protested against all attempts to bend the spiritual with the secular authority. In 1803, the king of France even succeeded in having a pope elected who took up his residence at Avignon, whichroud the kingdom in 1670, but that pope proclaimed an interdict upon the whole of France, but popular opinion effectually protested against all attempts to bend the spiritual with the secular authority. FRANCE

were taken possession of by the French (1808), and when the pope declared every one who laid his hand upon the patrimony of St. Peter excommunicated, Napoleon had the pope arrested and brought to France. An attempt to render, by means of a synod convoked at Paris (1811), the French Church independent of the Vatican, failed, and the Concordat, by which it was definitively restored, in de novo, concordant, some important concessions from the imperial pope; and when the pope revoked all he had done, Napoleon published the concordat as the law of the empire on the very next day (March 25). After the overthrow of Napoleon (1815), the Concordat of 1801 recognized the Roman Church as the religion of the state, though granting religious toleration to every form of public worship. Powerful efforts were made to re-establish among the French the belief in the doctrines of the Roman Church, and the leaders in this contest—Lamennais (q. v.), de Morny (q. v.), and the "savoir du Mission" (q. v.)—attached themselves more closely to the papal than to the Gallican school. Gallicanism, at least in its ancient form, began to die out. The Apostolic Congregation, though in opposition to the inclinations of the prudent king, obtained a concession by which the concordat of 1801 was revoked, and that of 1516 substituted for it. So decided, however, was the opposition of public opinion that it was never laid before the Chamber of Deputies. Without the consent of the Chambers, the government of Louis XVIII hesitated to make the concordat of 1816 effective. Yet Louis Philippe made as great concessions to the Church as the origin of his own authority would allow. Lamennais, Lacordaire, Montalembert, and others anticipated great results from a union between ultramontanism and democracy, but the condemnation of their "reconciliation" by the pope, which was in their power, although to appease public excitement, a royal ordinance (June 16, 1829) had to close the schools of the Jesuits. The revolution of 1830 was connected with some outbursts of popular indignation against the Church, which lost the prerogative of being the religion of the state. Yet Louis Philippe made as great concessions to the Church as the origin of his own authority would allow. which was strengthened by the cruel rigor with which the princes generally persecuted it. This element was developed the more strongly as the general spirit of those times was democratic, and as Calvin himself, the father of the Reformed Church, inclined to theocratic principles. In 1559 the French Reformed church was established in Paris. All the chief towns followed this example. The first synod of the French Protestant Church assembled privately in Paris, May 25, 1559. Owing to the danger of the enterprise only thirteen churches sent deputies. But the spirit of the whole protestant party was active; superintendents were then and there laid. A complete system of ecclesiastical polity was speedily adopted, for the members of the synod had too vivid a sense of the dangers to which they were exposed to waste time in unprofitable discussions among themselves. The form of government was established thoroughly Presbyterian in its character. It seems to have corresponded very closely to that of the Church of Scotland. The Consistory may be viewed as representing the Kirk Session, the Colloquy the Presbytery, while the French Synods and the General Synod correspond to the General Assembly. The Consistory was elected at first by the whole congregation over which it was to rule, but vacancies occurring afterwards were filled up by the Colloquy. The ministers were elected by the Colloquy. A minister who had served for several years was before the congregation on three consecutive Sabathays; whereafter, if no objection was made, the congregation was considered as acquiescing in the appointment. If there was any objection, the matter was referred to the Provincial Synod, whose decision was final. These provincial synods have been generally sixteen in number. The National Synod has met but seldom, owing to the severe persecutions to which the Church has been exposed, and the increasing restrictions which have been imposed upon her. The Confession of Faith adopted at the first synod consisted of forty articles. Its doctrines were strictly Calvinistic. Though the Church was much harassed by persecution during the reign of Henry II, still it greatly increased; so much so that we are told that Beza, who died in 1605, could count 2150 churches in connection with the Protestant Church. The ministers and superintendents in the one province of Normandy, and in Provence there were 60' (Eadie, s. v.). The cruel persecution to which the Calvinists were subjected after the death of Henry II, under the reign of Francis II, led them to organize the Conspiracy of Amboine, in which some discontented members of the Roman Catholic Church also took part, though the majority of the conspirators were Calvinists. Its aim was the overthrow of the proud duke of Guise and his brother, the cardinal of Lorraine, who were the uncles of the king, and the chief instigators of the persecution of the Protestants. But the conspiracy was betrayed, and many of the participants lost their lives. Calvin and Beza had been notified of the enterprise, but discouraged it, though they did not feel themselves bound to betray it. The weak king of Navarre, and still more his brother, the prince of Conde, who had been implicated in the plot, was required, but the death of the king saved their lives. The Calvinists henceforth received the name Huguenots, a name whose etymology is not quite certain. See Huguenots. During the regency of Catharine of Medicis the Huguenots suffered innumerable persecutions, and the great party, which feared that their extinction was not possible without exposing France to the terrors of civil war, was inclined to grant them religious toleration.

The dukes of Guise saw the necessity of enlarging and consolidating the Catholic party. They prevailed on the aged and vainglorious constable of Montmorency to form with them a triumvirate, which was soon also joined by the king of Navarre, who was induced by Monsieur de la Faisle to establish friendly relations with the Huguenots. The cardinal of Lorraine even followed his inclination to the Confession of Augsburg, and, contrary to the wishes of his own party, brought about a religious conference with the Calvinists at Polesey (1561), at which Beza brilliantly defended the Reformation against the attacks of the representatives of strength of others. A mixed committee, consisting of five members of each party, was appointed to conciliate the views of the two churches concerning the doctrine of the Lord's Supper. It succeeded in drawing up a formula which was accepted by the Calvinists, as well as by the queen-mother and the cardinal. But the Sertonne declared it to be heretical, and it was soon generally abandoned. The celebrated edict of January, 1562, granted to the Huguenots provisionally the right to assemble for religious worship outside of the towns, until further provision should be made by an ecclesiastical council. Beza and the Huguenots accepted this trilling concession with gratitude, but a number of parliaments, especially that of Paris, raised against it the strongest remonstrances. The duke of Guise threatened to cut it with the edge of his sword, and commenced hostilities in the persons of the Huguenots. In one place, where a number of the Huguenots were massacred. A bloody civil war ensued, in which the Huguenots suffered heavy losses, and which was ended by the Peace of St. Germain (1570), in which the government gave to the Huguenots four fortified towns as security for the future. The Huguenots conceived new hopes; their chief defender, Henry of Navarre, was married to the king's sister; but when all their chief men were assembled at Paris to celebrate the nuptials, the queen-mother gave treacherously the sign for that general and bloody massacre known in history as the Night of St. Bartholomew, in which from 20,000 to 100,000 Protestants perished, and among them the great Coligny (q. v.). The Protestants again rose in despair, and received new concessions in the Edict of Poitiers (1577), but the Holy League, which had been organized by the pope and the Catholic princes of France, reappeared, and, after the death of Henry II, was allowed to the Protestants, yet, to overcome the hostility of the Roman Catholic party, he believed it necessary to join the Roman Church (1598). He gave, however, to his former coreligionists, by the Edict of Nantes (1598), which he declared irrevocable, freedom of faith and of public worship (with only a few restrictions), their rights as citizens, and great privileges as an organized political corporation. They were declared eligible for all positions of honor and dignity, and for appointments in the public service, and received an annual grant of 1000 crowns. The remonstrances of several magistrates and provinces against this decree were in vain. Thus brighter days seemed to approach. During the twenty-six years which elapsed between the massacre and the publication of this document, there was in the country a great improvement in both the Church and the state. After the assassination of Henry IV (1610) the Protestants were again forced by persecution to take up arms in defense of their rights; but they were disarmed as
FRANCE

a political party by cardinal Richelieu, though, by an
act of amnesty at Niames (1629), be secured to them
their former ecclesiastical privileges. About this time
their number had been reduced to only about half of
what it was before the massacre of St. Bartholomew.
Louis XIV regarded it as his special mission to break
the power of the Protestants in the kingdom. The Protes-
tants were deprived of a great many churches and
schools; the utmost efforts were made to convert all
who were accessible to fear, promises, or persuasion;
children were taken from their parents; "booted mis-
sions of dragoons" were sent in every direction (after
1650), and the Press Edit of Niamey was destroyed and
subsequently punished in 1685. See NANTES, EDIT OF.
One mountain tribe [see CAMBRIERS] in the Cevennes took
up arms against the king, but his prophets and heroes ei-
ther perished on the battle-field, or gained only the privi-
lege of going into exile (1794). It is calculated that
from 80,000 to 40,000 Protestants fled from France at
this time. Nevertheless, two millions of the Reformed
remained, with no congregations except in the wilder-
ness, and in 1744 they again held their first National
Synod. "In the closing years of the reign of Louis
XIV, the influence of the Church was strong enough to
keep the Protestants within bounds; the great law of the
Protestants was more leniently dealt with. Though
now enjoying external peace, the Church began to ex-
hibit signs of internal declension. The chief causes
producing this effect were the want of trained and edu-
cated men to fill the office of pastor, and the spirit of
fanaticism existing among the Roman Catholics."

The Reformation of Luther found early adherents in
France, some of whom suffered martyrdom for their
faith [see REFORMATION in France], but the influ-
ences of Calvin soon prevailed. In 1648, Alsem, and a
number of other districts and towns in which the Lu-
theran Church was either exclusively or partly estab-
lished, were ceded to France by the Peace of Westphalia.
That peace was regarded by the Lutherans, and again confirmed by the Peace of Nymwegen in 1678. On the same terms France acquired, in 1681, Strasbourg, and in 1796, from Württemberg, Mompel-
gard. The congregations of these districts gradually
decayed, and the number of entire congregations which
have been brought back to the Roman Church is said
to be over sixty.

The National Assembly of 1789 gave to all religious
denominations equal rights, yet the Revolution soon
afterwards raged against the Protestant churches as
much as against the Roman Church. The clergy of the
latter were first restored by the decree of 1802, in which
Napoleon assigned to the clergymen of the French Re-
formed and the French Lutheran churches salaries from
the public treasury, and gave them, of his own authority,
as a new constitution. The principal points of this
constitution were as follows: The lowest ecclesi-
astical board for both denominations is the Consistory,
which consists of the pastors of the consistorial dis-
trict, and from six to twelve laymen. There is to be
one Consistory for every 6000 souls, no matter whether
they belong to one or several congregations (Churches)
of France, showing the diversities of its origin by the
variety of liturgies, hymn-books, catechisms, etc., which
are still in use. The free exercise of their worship has
not, on the whole, been interfered with; yet many roy-
al decrees have favored the Roman Church and prose-
lutism. A member of entire congregations which
have been brought back to the Roman Church is said
to be over sixty.

A great revival in the Protestant churches commenced about 1829. Those who, under the influence of this revival, sought to unite themselves by closer spiritual bonds than the state churches afforded, were generally designated by the name Methodists, although they were not in the sense of the word Methodists. Many of the converts kept themselves aloof from the state churches, and began to lay the foundation of independent congregations. In the state Church a violent contest arose between the Evangelical and the Rationalistic parties. The "Evangelical Association," founded in 1838, was supported as a home missionary society by evangelical Christians both in and out of the state churches. A large number of religious societies sprung up, partly supported by only one of the great parties, but partly also by both. In 1846, Frederick Migne, I. C., with several other men, organized the Evangelical school, succeeded from the Reformed State Church because the synod of the Church refused to demand from all ministers an adhesion to the fundamental articles of the evangelical faith. With the assistance of Count Gasparin and others, he succeeded in having all the dissident churched; itself, into a Diocese des églises évangéliques de France, which held its first General Synod in 1849. The churches belonging to this union are entirely independent of the state, and their General Synods meet biennially. In both the state churches and in some leading men and journals of the Rationalistic party have gone so far as to undignify deistical views, and all attempts to force them out of the Church have failed. On the other hand, when a pastor of the Evangelical school showed an inclination towards Baptist views, the choice was left to him either to resign or to be appointed for life by the government, instead of being elected by the district assemblies. The supreme Church board is called the Supreme Consistory, and the government appoints his president and one member. All the inspectors are also members of this Supreme Consistory, with the liberty of deposing them, and, held district, and one deputy of the theological seminary. The election of these latter two classes is left to the Church. The Directory has the right of appointing all pastors, subject to the approval of the government. Soon after the publication of the decree of March 26, a new division, and an increase of the consistory of the two churches, and of the Inspections of the Lutheran Church, took place. This reorganization of the two churches afforded to both this theoretical advantage, that each department was assigned to a Consistory, so that the archbishops and bishops are formed, in the inspection of their dioceses by vicars-general, whose number ranges from two to fifteen, and by two or three secretaries. The ecclesiastical courts have risen in importance since the re-establishment of the provincial and diocesan synods, and consist of a president, an official, a promoteur, one or several assessors, and one greffier. As the bishops are not elected, but nominated by the government, the chapters have less importance than in other countries. The canons of these chapters, all of whom are appointed by the bishops, form the assemblé general, and are divided into assemblé de chanoines honoraires, and assemblé titulaires. The third class contains the active resident members. The first class contains bishops of other dioceses; the second class (the most numerous), many pastors, vicars, professors of theological faculties, presidents of seminaries, college rectors, and members of religious orders, foreign bishops and archbishops and others, under the names of foreigners. Rural deaneries, other chapters, and the office of archdeacon were swept away by the Revolution, but a new chapter of St. Denis (Dionysi), prominent not so much by influence as by high position, has been founded, near the tomb of the imperial family, by Louis Napoleon, in the hands of the members: first, the bishops who have retired; and, secondly, ten canons, with ten honorary members, these latter including the imperial chaplains. The
lower clergy are divided into curias, dozeatures, and vicariates. There are about 3600 of the first, about 18,000 of the second, and more than 9000 of the third class. Besides, there are a number of aumoniers (chaplains) appointed for the lyceums, colleges, normal schools, hospitals, and jails; also for the army and the navy, each of which has its aumonier en chef. Thus the total number of religious vocations within the Church needs 40,000. In the administration of the secular affairs of the parishes, some members of the laity take part as marguilliers de paroisse (treasurers), or members of the so-called Fabrique (church council).

In the Roman Church, the religious orders and communities of the clergy, and societies and confraternities among the laity, are very numerous. Among the monastic orders the Jesuits (q. v.) occupy a prominent position, both by the number of their establishments and by their influence. Some of their members (e.g. Ravignan and Félix) have shown themselves the greatest pulpits orators of modern France. The Benedictines (q. v.) have re-established a convent at Solesmes, and have resumed the literary labors of their order, but have not been able as yet to obtain many members. The Dominicans, though not very numerous, have gained prestige from the reputation of the cardinal, who re-established the order in France. Nearly all the monastic orders of the Roman Church have now some establishments in France, and a number of new ones (e.g. the Oblates, Marists, and society of Pécoux) have been founded. Many of the religious orders and communities receive with open arms the zeal to the work of foreign missions. At the head of them are the Lazarists (q. v.), whose principal establishment is in Paris. With them vies especially the Seminary of Foreign Missions at Paris, which was founded in 1853, abolished in 1792, and re-established in 1896. It is under the administration of a superior and six directorgs, and sends out every year large numbers of missionaries to Eastern Asia. The Oblates, the Marists, the Pécoux Society, the Jesuits, the Priests of Mercy, the Capuchins, and many other orders and congregations, sent in missions in foreign lands. A new missionary seminary for the missions in Africa was established at Lyons in 1858. The communities of women, who nurse the sick and the aged poor, or devote themselves to teaching and to the reforming of prisoners and wrecked females, are very numerous and prosperous. A great number of these congregations of societies—such as the Sisters of Charity (q. v.), the congregation of the Good Shepherd (q. v.), the Little Sisters of the Poor, etc.—increase with a rapidity which is almost without example in the entire history of the Roman Church. The religious families among the laity also increase in strength and numbers every year. The most important among them are the Society for the Propagation of the Faith, the central missionary society of the Roman Church, to which now nearly all countries of the world contribute. It was founded in France in 1822, has its centers at Paris and Lyons, and its contributions amount to about 5,000,000 francs annually, more than one half of which is contributed by France. The society publishes a bimonthly, Annals of the Propagation of Faith, in various languages. The central children's missionary society of the Church, called the Society of the Holy Childhood, has its central organization in France. Its annual income amounts to about 1,000,000 francs. The St. Vincent Society, for visiting and assisting the poor, has established branch associations in more than 9000 localities, and expenses for the assistance of the poor more than 2,000,000 francs annually. Primary education in France is almost entirely under the control of the bishops. Most of the schools are conducted by religious congregations, such as the Brothers of the Christian Schools, the Brothers of the Christian Doctrine, the Brothers of St. Joseph, Brothers of St. Mary, members of the Society of Mary, Daughters of the Holy Spirit, and many others. The seminaries, in which those who have the priesthood in view are educated from their early boyhood (Grands et Petits Séminaires), are now, as they always have been, under the sole control of the bishops. The relations of the Church to the State colleges were, until the Revolution of 1848, not to the satisfaction of the Church, and in 1850 the college had its establishment terminated by the law of March 15, 1850, which grants the Church the liberty to found free colleges. This permission has called into existence a very considerable number of Roman Catholic colleges and boarding-schools. Of theology exist at Paris (the Sorbonne), at Lyons, Rosel, and Bordeaux, but, as the professors and deans are appointed by the minister of public worship, they do not enjoy the patronage of the bishops, and have but a limited number of students. Moreover, the course of studies at the three last-named is by no means superior to that of the Grandes Sémianires. In order to promote the study of scientific theology, which, on the whole, is cultivated but little, the bishops have organized at Paris an école ecclésiastique des hautes études.

Nominalistically, the immense majority of the population of France is still connected with the Roman Catholic Church. The census of 1851 claimed out of the entire population (35,781,627) 34,931,082 as Roman Catholics. At the last French census the religious denominations were not taken into consideration. In 1866 the Roman Catholic population of the French dominions was estimated at in France, 36,000,000; French possessions in America, 814,000; Algeria, 190,000; other French possessions in Africa, 183,000; possessions in the West and South America (Bolivar), 200,000; possessions in the East Indies, 500,000. A very large portion of these, however, are practically not only without any connection whatever with the Church, but even decided opponents of it. Among the daily journals published at Paris only a few are considered as Roman Catholic papers. The number of religious journals, in proportion both to the Roman population of France and to the religious press of other Roman Catholic countries, is small. The most important among the Roman Catholic papers are the Monde and the Univers, both dailies of Paris, and counted among the most important organs of the ultramontane party in the world. The following table gives the list of ecclesiastical provinces, with number of dioceses, clergy, and religious communities in each, as reported in 1869:

(2) Protestantism. Of the Protestant churches of France, the Reformed and the Lutheran, are recognised as state churches. The French government appropriates a certain sum of money every year for their support. The budget for 1861 gave, as the total sum of this appropriation, 1,462,286 francs—a little less than 800,000 dollars. It was divided as follows: 200,000 francs for the salaries of Reformed pastors, 890,400 francs for the salaries of Lutheran pastors, 415,750 francs; in aid of
FRANCE

theological schools, 82,000 francs. The remainder was devoted to buildings and repairs, to the support of widows, and to incidental expenses. The salaries are allotted by law, according to the population of the communes, or districts. The pastors of Paris receive 6,000 francs per annum. The commune, with a population of over 30,000 souls have 2000 francs; from 30,000 down to 5000 souls, 1800 francs; below 5000 souls, 1500 francs. Thus a pastor in one of the state churches in the poorest village in France, or in a remote country parish, is insured a salary of 300 dollars a year. The state also pays a salary to the bishops of the churches, according to their importance as the religious and political despots of their respective See. The clergy are divided into three classes: the Church, the Academy (where they are able and willing to do so. Some of the parishes, especially in the departments of the Doubs, Bas-Rhin, Haut-Rhin, and Vosges, have funded or real property, the proceeds of which are devoted either to the support of the pastor, or to repairs, church expenses, etc. The salaries for parochial purposes, for the poor, are taken up at the church-doors every Sunday. In general, the parishes have parsonages; where they have not, the communes are bound by law to furnish a subsidy for rent, unless the funds of the parish afford sufficient income for the purpose. A provision in the law is not de geure, but the communes are authorized to provide it (Napoleon's Decree of May 5, 1806). The state also provides for two Protestant theological seminaries—one at Stras- burg, for the Lutheran Church, and the other at Montauban, for the Calvinists. One pastor can be admitted to the ministry before twenty-five years of age. No parish can augment its number of ministers without the consent of the government. No religious service at which more than twenty persons shall assemble can be held except in an authorized place of worship. No preacher is allowed to incur any penalties, directly or indirectly, in his sermons, or to attack the Roman Catholic religion, or any other authorized by the state. The highest Church judicatures are, in part, filled with nominees of the government, and no real autonomy of the churches is allowed. No one can be admitted to the ministry before twenty-five years of age. How vacancies are to be filled was not stated. Its president for 1868 was General Dutheil, of the Engineers; secretary, M. Sayous, sub-director of the non-Catholic cults in the Ministry of Worship. Besides them there were 11 other members. The Council is the organ of communication between the Reformed Church and the government of the state. Its functions are not clearly defined, and its working, on the whole, has been not Infected by animosities. The whole body of the churches, under the Central Council, are the Consistories, Synods, and Presbytery Coun- cils. The whole of France was in 1868 divided, for the Reformed Church, into 104 Consistorial Districts, intended to embrace at least 6000 souls each, though this has not always been the case. The functions of the Consistory is composed of all the ministers of the Consistorial District, and of a body of laymen elected by the Presbytery Councils of towns other than the chief town of the parish. The Presbytery Council of the chief town has the functions of the Consistory. The president is elected by the Consistory, subject to the appointment of the government of the state. The functions of the Consistory are to see that church-worship and discipline are regularly observed; to receive, judge of, and transmit to the government the acts of the Presbytery Council; and to superintend the schools of the district. It has no legislative power whatever, but it superintends the general interests, both religious and civil, of the various churches under its jurisdiction. It nominates to the government pastors for vacant parishes. The Presbytery Council is a body of laymen in each parish, not less than four in number, nor more than seven. They are elected by the parish every three years. The minister of the parish is president. It performs the functions of the council of the Synod, administers the property, order, and discipline of the parish, under the authority of the Consistory. The Synods are essentially ecclesiastical bodies, superintending the spiritual element, as the Consistories do the general administration of the Church. Five consistorial churches constitute a Synodal District, and each sends a secretary to the Synod, a lay deputy to the Synod, which thus consists of ten members. Of these Provincial Synods there are twenty-one in France. No periodical sessions are allowed, nor can any session be called without the permission of the government. The decisions to be treated at the session must be stated beforehand; they cannot be treated at the sessions, which cannot last more than six days. The result of all these restrictions may be readily imagined. The Provincial Synods either do not meet at all, or, if they do, their sessions have no importance for the govern- ment of the Church. No National Synod is provided for, and none is held. Thus the Reformed Church of France lacks the most vital element of presby- terian connectional government—a General Assembly. The feebleness of the Church government is la- mentally manifest in many points. The present con- test about Rationalism brings this weakness out in the strongest light. The old French confession of faith is nominally the standard of doctrine, but a man may preach Unitarianism, Universalism, or even Panthe- ism, and there is no power to call him to an account before any ecclesiastical tribunal constituted to try him and to depose him. The Theological Seminary of the Reformed Church is at Montauban, in the South of France (Tarn et Garonne). No one can be a minister in the Reformed Church of France without a certificate that he has studied at one of the theological schools (of France or Geneva), and the diploma of bachelor in theology. All the regulations of the theological schools must be approved by the government. Ac- cording to Th. de Prat, Annaire Protestant, 1868-1870 (Paris, 1868), the statistics of the Reformed Church in 1868 were as follows: Consistories, 104; parishes, 507, with 957 "assemblies"; temples or oratories, 908; schools, or "salles d'asile", 1885; official pastors, 606; auxil- iary pastors, suffragans, and coundomiers (chaplains), 86. The population reported by the Consistories (eight Consistories which made no report being estimated) amounts to 690,000.

Lutheran Church.—The highest judicatures of the Lutheran Church are the Higher Consistory and the Directory. Under these are Inspections, Consistories, and Presbytery Councils. The Higher Consistory consists of 57 all holding office for life. It is composed of a president and one layman nominated by the government; of 16 laymen chosen by the In- spectors or Inspectorial Assemblies; of one professor from the theological seminary, chosen by the faculty; and of eight pastors, who are at the same time inspectors and members of the Consistory. The re- spect to the inspection at least every other year. The con- sistory is the highest executive body of the church; it must meet at least once a year. It is the final court of appeal, and has the right to be represented official- ly by the Consistory of Paris. The Directory consists of five members, also holding office for life; the pres- ident, appointed by the government (who is also pres-
FRANCE 647

ident of the Higher Consistory); one lay member and one clerical inspector appointed by government; and two deputies named by the Higher Consistory. Its functions are purely administrative, but that means a great deal in France. It nominates to the government all passive inspectors, has full authority over the schools and the theological seminary, not only to name the professors, but to direct the course of instruction. The Inspectors are territorial districts, under the government of Inspectors or Inspectorial Assemblies. Of those that are not elected in France, there are more inspectors than there are schools; the largest Inspection includes nine Consistorial Inspectors. The Inspectorial Assembly includes all the pastors embraced in the district, and an equal number of laymen chosen by the Consistorial Inspectors. They meet only at times fixed by the state. In each Inspection there is an ecclesiastical inspector appointed by the government, who convokes and presides over the Inspectorial Assemblies. These inspectors, under the authority of the Directory, visit each parish at least once in four years; ordain and install ministers; have supervision over the publication of books for schools, and over the religious instruction in the primary schools under Inspectional supervision of the district. The Consistorial Inspectors of the Lutheran Church of France are forty-four in number. They are composed of both lay and clerical members, the laymen holding office for three years. All the pastors of the district, with the members of the Presbytery, constitute the chief city and the equal number of laymen chosen by the more popular parishes, constitute the Consistorial Assembly. The functions and jurisdiction of the Consistorial Inspectors are very much the same as those of the Consistorial Inspectors of the Reformed Church, which have already been described. One of the most important points of difference between them is, that in the Reformed Church the Consistorial Inspectors nominate the pastors, while in the Lutheran this function is discharged by the Directory, as above stated. The powers and duties of the Presbyterial Council are similar to those of the Consistorial Assembly of the Reformed Church. The theological seminary of the Lutheran Church is at Strasburg. The president of the Director is ex-officio director of the seminary. There are six professors, whose salaries are paid by the state. The faculty of theology are also professors in the Seminary of Strasburg, which has 600 members. This, as well as the Directors, is in the hands of the Ministry of Fine Arts. The school is well organized and conducted. According to the Annaire Protestant, the statistics of this Church in 1868 were as follows: 44 Consistorial Inspectors, 233 parishes, 202 amnesties, 886 temples (96 were supplied by government, or joint government and private bodies), 713 schools, 271 official pastors, 46 vicars, auxiliary pastors, and numéros. According to the report furnished by 42 Consistorial Inspectors, and estimates for the two other Consistorial Inspectors, the Lutheran population amounted to 1,056,000.

In Italy, the United Protestant Church (Reformed and Lutheran) has 3 Consistorial Inspectors, 16 parishes (9 Reformed, 7 Lutheran), 66 annexes, 25 temples or oratories, 14 schools, 16 official pastors (7 Reformed, 9 Lutheran).

Independent Churches.—The largest body of independent (i.e., not state) Protestants in France is that which is organized under the name Union des Eglises Evangéliques de France (Union of Evangelical Churches of France). Five churches in Paris, with nine stations, are connected with the Union. The number of provincial churches in France is 86, and each of these is under an inspector, elected by a majority of the clergy of the parish. The total membership is 2,725, an average of 60 to each church. The largest church is that of the Taitbout, in Paris, with 210 members. There are seven independent churches not in connection with the Union, and numerous small stations, and has a chief agent in its administration (General Bodies). In Algiers the Union has six stations. As yet the Union has no theological seminary. Its candidates for the ministry study at Geneva or Lausanne, and aid is furnished by an education society to such students as need it. There is great vitality in this organization; it numbers Pressensé, Borsier, and des Gasparin among its leaders.

The Evangelical Society of France is a powerful auxiliary to the Union of Evangelical Churches. It reported for 1868 the following statistics: Expédition, 5,240; agents aided by its funds, nearly 50, of whom 11 are pastors, 8 evangelists, and 27 teachers.

The Independent Evangelical Church of Lyons (not included in the Union of Churches) has 630, under a presidency, with five pastors and eight evangelists. Number of members, 700, mostly converts from Roman Catholicism; children in Sunday-schools, 250; in day-schools, 300. The Church has eight libraries, an infirmary for the indigent, and a retreat for aged women.

The Baptists have had societies in France for more than twenty years. They are in relation with the American Baptist Missionary Union, from whose funds they derive a part of their support. Their number of members in 1868 was reported as about 800, mostly converts from Romanism; nine churches, ten pastors, and persons preachers in preaching-places.

Though there were Methodists in France before the beginning of the 19th century, they were not organized as a French denomination until 1862. Their Conference embraces also French Switzerland. The theological students attend the lectures of the theological faculty in the American University at Geneva. At the seventeenth Conference, held in Paris in June, 1868, the following statistics were reported: districts, 3; circuits, 16; chapels and preaching-rooms, 184; preachers and probationers, 50; colporteurs and day-school masters, 20; local preachers, 110; men and women, 1,070, on trial, 146; day-schools, 11; Sunday-schools, 57; Sunday-school teachers, 277; scholars, 2,988.

The Annaire Protestant gives five Moravian and four "Anabaptist" churches. It has no statistics of the Darbrites, Irvingites, Hinchists, and other small sects, of which it says there are some churches in France.

The Jews have 10 high rabbis, with salaries of from 3500 to 7000 francs; 66 rabbis, with incomes ranging from 800 to 1500 francs; and 64 preceptors, with allowances of from 500 to 2900 francs. The Jewish population in 1868 was estimated at 165,000 in France, and 35,700 in Algeria.

See Herzog, Real-Encyclopädie, lv, 489 sq., 520 sq.; Gallia Christiana in provincial ecclesiastica distributa opere et studio Dionysii Sammartani [St. Marthe] (Paris, 1715-20), i-iii; de la Grange, Refonction de l'Eglise (Reformed Church), 713 schools, 271 official pastors, 46 vicars, auxillary pastors, and numéros. According to the report furnished by 42 Consistorial Inspectors, and estimates for the two other Consistorial Inspectors, the Lutheran population amounted to 1,056,000.

In Italy, the United Protestant Church (Reformed and Lutheran) has 3 Consistorial Inspectors, 16 parishes (9 Reformed, 7 Lutheran), 66 annexes, 25 temples or oratories, 14 schools, 16 official pastors (7 Reformed, 9 Lutheran).

FRANCIS OF ASSISI

Francis, founder of the Order of Friars, was born in 1182 at Assisi, in Umbria, where his father, Peter Bernardone, was a rich merchant. The son was intended also for business; but, having a taste for military life, he took part in a contest between Assisi and Perugia, and was taken prisoner.

After a year's captivity he was released by a fit of sickness which brought him near the gates of death. He determined to renounce the world. But, on recovering his health, he abandoned his religious life and plunged into gayety. Suddenly conscience-stricken, he vowed to live a life of poverty. The following incident illustrates this time.

"Worshiping in a country church consecrated to St. Damian, he seemed to hear a voice saying, 'Francis, go and prepare my house, which thou seest falling into ruins.' What was the man pledged to poverty to do? He quietly went home, stole a horse from a stable, then went to his father's warehouse, and stole from thence silks and embroideries, with which he loaded the profligate horse, and sold both horse and goods at the neighboring town of Foligno. Romish casuists say that this action was justified by the simplicity of his heart. It is clear that his religious training had not instructed him in the ten commandments. He offered the money to the officiating priest at St. Damian, who cautiously refused to take it. Francis cast the money into the fire, but vowed that the building should be his home until the day when it was filled, and he found himself out, and, though Francis was twenty-five years old, gave him a sound whipping, and put him into prison in his own house. Francis was set at liberty by his mother during his father's absence from home. He returned to St. Damian's, and his father followed him thither, insisting that he should either return home, or renounce before the bishop all his share in his inheritance, and all manner of expectations from his family. The son accepted the latter condition with joy, gave his father whatever he had in his pockets, told him he was ready to undergo blows and chains for the love of Christ, and went with his eight years old father before the bishop of Assisi to make a legal renunciation of his inheritance in form.

By the world, and, it would seem, by his father himself, he was regarded as a madman, but the bishop viewed the enthusiasm of the youth with allowance, and treated him with kindness. He soon after renewed his vow of poverty, imagining himself warned from heaven to do so. He begged for and labored at the restoration of several churches. At this time he pretended to the gifts of prophecy and miracles. He soon attracted followers, and, associating with himself Bernard of Quintavalle and Peter of Catania, on the 16th of August, 1209, laid the first foundation of the Franciscan Order.

The number of his adherents increased rapidly, and he drew up, in twenty chapters, a rule for his order. He carried his rule to Rome, there to obtain the papal confirmation. In 1219, Francis, Innocent III, who regarded Francis as a madman, but saw how well fitted for his purposes such a man and such an order might be, he ordained Francis a deacon in 1210, and gave his verbal approbation to the rule he had brought him up. Among his anemaphs he had to record his conversion of Clara, or St. Clare. See CLARE, St.

Born to rank and fortune, St. Clare had recourse from her early years to ascetic practices. She heard of Francis, was captivated by the luster of his piety, and, assisted by him, she eloped from her friends. "Although a raint, Francis was obviously deficient in the moral sense. They fled to the Portiuncula, a church which the Benedictines had now given to the Franciscans. He spent this time in her nineteenth year. She was welcomed by the monks and sisters, and guided by her spiritual guide, and took sanctuary in the neighboring church of St. Paul until arrangements could be made for her reception in a convent. Francis, regardless of filial duty and parental authority, induced her to return. Agitation and anxiety, notwithstanding the agony of her father, to follow her in her flight, and to partake of her seclusion. The church of St. Damian became the convent of the Order of Poor Sisters thus established. It was at first the design of Francis and his associates to study how they might die to the world, live in poverty and St. Paul, now that he had reached a sum of renown and influence, he imagined that he had a further commission.

He consulted Silvester and Clara, who declared that it was revealed to them that the founder of their order should go forth to preach. And the Franciscans became a preaching order, though the founder was an illiterate man. He persevered in his devotion to poverty, though many of his followers soon showed an inclination to appropriate to themselves some of the comforts of life. He would not permit even his friends to drink for the love of Christ, but he usually put water thither upon it. He spent rigourously eight Lents in the year." (Hook, s. v.)

It is unnecessary to record the miracles he said to have performed. In Roman Catholic phrase, he had a singular devotion to the Virgin Mary, whom he placed for his patroness of his order, and in whose honor he fasted on the feast of St. Peter and St. Paul to that of the Assumption. Roman writers tell us that he was endowed with an extraordinary gift of weeping; his eyes seemed two fountains of tears, which were almost continually falling from them, and which caused his buff coat to be fastened rigidly by his habit. He was continually heard to lament the year he had a "cure" prescribed that, in order to drain off the humor by an issue, he should be burnt with a hot iron, Francis was very well pleased, because it was a painful operation and a wholesome remedy; when the surgeon was about to apply the searing iron, Francis said to his father, who was present, "Burn me gently, that I may be able to endure thee." He was seared very deep from the ear to the eyebrow, but showed no sign of pain!"

At length, finding Europe insufficient for his zeal, he resolved to preach to the Mohammedans. With this view he embarked, in the sixth year after his consecration, for Syria, but a tempest drove him upon the coast of Dalmatia, and he was forced to return to Ancona. In 1214 he set out for Morocco, to preach to the famous Mohammedan king Miramolin, and went on his way, but was shipwrecked, and was taken by the Moors, and by various accidents, so that he could not go into Mauritania. But he brought several pretended miracles in Spain, and found there some converts, after which he returned through Languedoc into Italy.

Ten years after the first institution of the order in 1210, Francis and the other members of the general chapter called the Matte, because it was assembled in booths in the fields. Five thousand friars met on the occasion. The growing ambition of the order showed itself in their praying Francis to obtain from the pope a license to preach everywhere, without the leave of the bishops. His wishes were opposed to them, but employed the more ambitious spirits on foreign missions. He reserved for himself the mission to Syria and Egypt, and the affairs of his order
FRANCIS OF ASSISI

FRANCIS OF PAULA

Drafted him to defer his departure. Innocent III had approved of his order by word of mouth. Honorius III, who succeeded Innocent in 1216, had appointed cardinal Ugolinus to the post of protector of the Minorite brethren, and approved of their missions. Francis set sail with Illuminatus of Reata and other companions from Ancona, and landed at Acro or Polomais in March. He remained there as a crusader for some time before Damiatsea, Francis was taken by the infuld scouts, and brought before the Sultan, who treated him as a madman, and sent him back to the Christian camp. He returned by Jerusalem into Italy, where, he had the consolation that Elia, whom he had left vice-general of his order, had introduced several novelties and mitigations, and worn himself a habit of finer stuff than the rest, with a longer capuche or hood, and longer sleeves. Francis called such innovated bastard children of his order, and despised Elias from his office. Resigning the generalship that year (1220), he caused Peter of Cortona to be chosen minister general, and after his death, in 1221, Elias to be restored. Francis continued always to direct the government of his order personally while he lived. Having revised his rule and presented it to Honorius III in 1224, he advised a second revision by a council summoned by a bull of the Pope on the 24th of November, 1223. In 1215, Count Orlando of Cortona had bestowed on Francis a secluded and agreeable residence in Mount Alberello, a part of the Apennines, and built a church there for the friars. To this solitude Francis was glad to retire, and to pass the remainder of his life there before his death, according to his monkish chronicles, he had a vision of Christ under the form of a seraph. "The vision disappearing, left in his soul a seraphic ardor, and marked his body with a figure conformable to that of the crucified, as if his body, like wax, had received the impress of a seal, for soon the marks of the nails began to appear in his hands and feet, such as he had seen in the image of the God-man crucified. See Stigmata. His hands and feet were pierced with nails in the middle: the hands, round and black, were on the palms of his hands and fore part of the feet. The points of the nails, which were very little long, and which appeared on the other side, were bent backwards on the wound which they made. He also had on his right side a red wound, as if he had been pierced with a lance, which often shed a red blood on his tunic."

Francis is the saint who has received more favors of heaven ever after by covering his hands with his habit, and by wearing shoes and stockings—a modesty which prevented others from seeing, and therefore from bearing witness to the marks, for whose existence we have no evidence. The bishop of Olmutz denounced the practice as superstitious. A papal bull of 1253 vindicated the claims of the miracle. "The Dominicans represented the whole affair as an imposture, the invention of the new order of Franciscans to raise their credit, but it is now generally believed in the Roman Church."

Worn out at last, Francis retired to Assisi. In a year he began to act as an itinerant preacher throughout Umbria, and it was "during this time that a woman of Bagaria brought an infant to him that it might be healed. Francis laid his hands on the child and it recovered: that child grew to be a man, and the man continued (q.v.), who had received his gratitudes by becoming the biographer of Francis, carefully recording all the wonderful circumstances of his life, and working up them into a beautiful fiction."

"In the letter part of his life he had attributed no value to self-mortification, in itself considered, but regarded it solely as a mean to an end, to overcome sensual desires and for promoting purity of heart. Love appeared to him to be the soul of all. Once, when one of the monks, who had carried his fasting to excess, was deprived by it of his sleep, and Francis perceived it, he brought him a portion of his own (q.v.), which he ate to recover."

On the next morning, when he assembled his monks, he told them what he had done, and added, 'Take not the eating, but the love, my brethren, for your example.' Later in life, he did not shrink from preaching before the pope and the cardinals. 'His words,' says Bonaventura, 'penetrated, like glowing fire, to the inmost depths of the heart."

Once, when he was to preach before the Roman court, he had occasion to remember a carefully written discourse, he felt all of a sudden as if he had forgotten the whole, so that he had not a word to say. But after he had openly avowed what had occurred to him, and invoked the grace of the Holy Spirit on him, he began to speak with such power, which produced a wonderful effect on all present. Again, as the ascetic bent admits of being easily converted into a contempt of nature, so we cannot but regard as the more remarkable that love, pushed even to enthusiasm, with which Francis embraced all life, was often tinged with a feeling of relationship with all nature, by virtue of its common derivation from God as Creator, which seems to bear more nearly the impress of the Hindoo than of the Christian religion, leading him to address not only the brutes, but even inanimate creatures, as brothers and sisters, with an affectionate tone, especially such as are employed in the sacred Scriptures as symbols of Christ. This bent of fanatical sympathy with nature furnished perhaps a point of entrance for the pantheistic element which in later times was quite prominent."

(Neandert, Church History, Torrey's transl. 4v, 273 sq.)

Francis died Oct. 4, 1226, and was canonized by Gregory IX in 1230. His order soon rose to great power and splendor. See Franciscans.

His writings (epistles, sermons, sacristy treatises, discourses, poems, etc.), with his life by Bonaventura, were published by H. Haye, general of the Minorites (Par. 1641, fol.).

His life will also be found in Wadding, Annales Minorum, vol. i (Rome, 1781); Voigt, Leben von Franz von Assisi (Tübinz. 1840); Chavir de Malan, L'Ex de St. François (Par. 1811, 8vo); and in Böhringer, Kirche christi in Biographien, vol. ii, pt. ii, p. 496; Hahn, Franz von Assisi, ein Heiligenbild (Lips. 1856).—Hase, Ch. History, p. 255; Mosheim, Ch. Hist. cent. xiii, pt. ii, ch. n, 49; Jortin, Remarks on Ecles. History, vol. v; Hook, Eccl. Biography, v, 296.

Francis of Borgia, a Jesuit and saint of the Roman Catholic Church, was a Spanish nobleman, born in Valencia in 1516. After a careful education he became a Jesuit, and, after the death of Charles V, was turned to a religious life by the solemn circumstances attending the funeral of the empress Isabella, after which he became a disciple of Ignatius Loyola, and was appointed by him to preach the Gospel in Spain and Portugal. On the death of Laines in 1556, he was elected general of the order of Jesuits. He is the author of many ascetic writings, and contributed much to the perfection of the organization of the Jesuits. He would have been made pope on the death of Pius V, had not the state of his health prevented it. Francis of Borgia died at Rome in 1572, and was canonized by Clement IX in 1671. See Vie de St. François de Borgoia, by Verjus, after Ribadeneyra (1727, 4to); Ortínez-Joly, Histoire de la Comp. de Jesu (vols. i, ii). The writings of Francis were translated into Latin by the Jesuit Deux (Brux. 1675, fol.).—Hoefner, Newes. Biog. xxx, 259, 1877.

Francis of Paula, founder of the order of Minims, was born at Paula, in Calabria, in 1416. He was brought up in a Franciscan convent at St. Mark, where he distinguished himself by rigid asceticism. In order to exceed St. Francis himself in austerity of life, he retired to a cell on the desert part of the coast, where he obtained from the Pope a dispensation to eat; and as the monk still shrank from touching it, he set him the example, and ate first. On the next morning—III.—21°
FRANCIS OF SALES 650  FRANCISCANS

named Francis superior general, 1474. He enjoined on his disciples a total abstinence from wine, flesh, and fish; besides which, they were always to go barefoot, and never to sleep on a bed. Alexander VI changed the name of the order to Mission, as better expressing the humility professed by the new monks. Francis died at Nancy, France, on May 3, 1567, and was canonized by Leo X. Francis was in high favor with Louis XI, Charles VIII, and Louis XII of France, and established many houses of his order in that kingdom, where they are called Boms Hommes.—Hoefner, Nouv. Biog. Générale, xviii, Hilianar de Conti, Le Portrait de St. François de Paul (Paris, 1655).

Francis of Sales (Saint) was born near Annecy, Aug. 21, 1567, and was carefully educated at the colleges of La Roche and Annecy. He went to Paris in 1578, and studied with great success at a Jesuit college. He was ordained priest. For some years he was employed in "converting" the Protestants in Savoy, and in 1595 he got the duke of Savoy to expel the Protestant ministers from several districts. He instructed and communicated to the English, and the German Protestants, and abandoned the one or the other ally as the revolutions of feeling, the promptings of policy, or the influence of favorites determined. It is said that he finally died from the effects of a disease which an injured husband found means of communicating to his wife, a Frenchwoman, a traitor of artists and literary men, and his name is justly associated with the Renaissance of literature and art; but he was despotic, devoted to pleasure, and grossly licentious—now inclining to religious toleration, now witnessing himself the torch applied to light the fires of the stake; in 1581 an ally of the Protestant "League of Smalcald," in 1545 permitting a most atrocious persecution of the peaceable Vaudois. His life presents a picture wherein the virtues of the brave chevalier are overlapped and almost hid by vice that darkened the luster of his early fame, and left his traces in the corrupt morals of successive reigns.—Wright, History of France (London, 3 vols. 4to), i, 656-676; Sismondi, Histoire de France (Bruxelles, 1840, 18 vols. 8vo; see Index in vol. xviii); Runke, Histoire de la Papauté (1861, 2 vols. 8vo); Hoefner, Nouv. Biog. Générale, xviii, 510-520. (J. W. M.)

Franciscans, the name of several monastic orders which follow the rule of Francis of Assisi (q. v.). Francis himself founded three orders: an order of friars, called Minorites (Francis Minores), an order of nuns (see Clarisse), and an order of Terziaries (q. v.). These orders split into a large number of divisions, some of which even assumed other names, and became entirely independent of the original Franciscans. See MINORS; CAPUCHINS.

1. Franciscan Friars. —This order was founded in 1210; in that year, at least, Francis gave the rule which united his followers into a monastic community. As, however, their life in common commenced before that period, some historians account the year 1298 or 1296 as the year of foundation. The origin of the Franciscans marks a turning-point in the history of monasticism; because, as far as we know, they were the first and most prominent representa-
FRANCISCANS

atives of the mendicant (q. v.) orders. Francis with some difficulty obtained the papal approval of his order [see FRANCIS or ASSISI] in 1210, and in 1215 he received also the sanction of the Council of Lateran. The growth of the order was astonishingly rapid. At the first General Chapter, held in 1215, more than 5000 friars assembled, and it was resolved to send agents of twenty-three others of Germany, France, Spain, England, Hungary, and Greece. In 1223 the rule of the order was written down, and at the same time the order received extensive privileges from Honorius III. Francis resigned the burden of the generalship in 1225. His first successors, Peter of Corvaro, and John of Paris, assumed, however, only the title of ministers general, regarding Francis, notwithstanding his resignation, as the chief superior. Elias introduced various changes; the monks assumed a less coarse garb, built beautiful churches and convents, and commenced to cultivate science. Francis had severely censured these misgivings, but after his resignation, they soon began to prevail. The advocates of the primitive rigor, at their head Anthony (q. v.) of Padua, succeeded, however, in enlisting the sympathy of pope Gregory IX, by whom Elias was deposed. But a few years later (1228) Elias was re-elected, and returned to his old principles of mitigation. The rigorous party, and especially their leader, Cassarius (q. v.) of Spires (hence their name, Cassarites), were subjected to a cruel persecution, by which Cassarius even lost his life (1230). This, however, caused the second desertion of Elias, and the first two successors favored the strict party. But Crescentius of Jesi, elected in 1244, followed the footsteps of Elias, and the Cassarites were again persecuted until Bonaventura (q. v.) was elected general in 1256. He gradually restored the strict discipline, and raised the order to a degree of prosperity which it had never enjoyed before. The ascendency of the strict party lasted until the generalship of Mathero di Aquas Spartas, who again sided with the other party, which henceforth remained predominant until the whole order permanently split into two parties.

The advocates of the primitive rigor sought to form themselves into independent congregations, such as the Celestines, the Minorites of Narbonne, and the Spirituals [see DISCALCIRI], but they suffered from their opponents an almost uninterrupted persecution. The Celestines (established in 1291) were condemned to a common life as heretics by the Minorites of Narbonne and the Spirituals in 1318. The Minorite Clarenses, founded in 1302 by the ex-Celestial Angelo di Cordona, obtained toleration as an independent congregation and existed as such until 1517, when they united with the Observants. Two other congregations, the Minorites of the Congregation of Philip of Majence, and the Minorites of John of Valesg and Gentile of Spoleto, were of very short duration. In 1388 Pauletto di Foligno founded a new congregation, which followed the unaltered rule of Francis, spread rapidly, was approved by the popes, and thus caused the order of Franciscan friars to split into two main branches, the Conventuals, who followed the mitigated rule, and the Observants, who adhered to the primitive strict rule. The efforts of the Conventuals to suppress their opponents failed, for the latter were confirmed by the Council of Constance in 1415, received the permission to hold General Chapters, and obtained possession of the church of Portinacola, the celebrated birthplace of the order. From both the Observants and Conventuals other congregations branched off. The consequent confusions in the order induced Pope Sixtus II to command by a bull all congregations to unite either with the Observants or Conventuals. The former received also, in 1517, from Leo X, the right to elect the general of the whole order, while the Conventuals could only elect a minister general, whose election had to be ratified by the general. The following independent congregations joined the Observants in consequence of the measures of Julius II and Leo X: the Minorites of Peter of Villarecavas, founded in 1290 upon Mount Celia; the Minorite Coletans, founded by the Clarisse Colette of Corbie, in Savoy; the Minorite Amadistes, founded by the Spaniard Amadeo in 1457. Some congregations became extinct before the sixteenth century; thus the Minorites of Phelip of Berenguel (Minorites of the Little Cow, della Capuciosa) existed only from 1426 to 1434, the Minorites Caporolans from 1475 to 1481, the Minorites of Anthony of Castel St. Jean, who were suppressed soon after their foundation in 1475. The Minorites of Mathias of Tivol, founded in 1485, were united with the Conventuals. The Minorites of Juan de la Puebla, founded in Spain in 1498, joined in 1568, when they counted fourteen convents, the Observants, but continued to remain a separate province with a number of peculiarities. The Minorites of John of Guadaleoupe (a disciple of Juan de la Puebla), also called Discalcerate Minorites of the Cow, or Minorites of the Holy Gospel, were founded in Spain in 1494, and united with the Observants in 1517; but they assumed the name Reformed Observants, and formed two separate provinces, which gradually increased to twelve (in Spain, Portugal, and France, and in Portugal, in 1307, the Minorites of the Province of Portugal). They still held a procurator general at Rome. An Italian congregation of the Strict Observance (Riformati) was founded in 1525, and still exists; a French Congregation, called Recollets, by the Duke of Nevers in 1593. The most rigorous among the congregations of Reformed Observants was that founded by Peter of Alcantara in 1540. It spread especially in Italy and Spain, and was joined by the Puchasites, or Reformed Minorites of St. Paunchasius, and then formed into a province, which was afterwards divided into several. This branch of the Reformed Observants had also in Rome a procurator general. At present it has only a small number of convents. In 1583 some Observants of Westphalia received papal permission to erect convents of this congregation in Germany, but they soon fell out with the bishops, and then also with the pope, and at the request of the bishops the incipient organization was suppressed by the Prussian government. The Franciscan friars have always been, and still are, very numerous. In the eighteenth century they counted more than 180,000 members, in 1900 convents. The Conventuals, by far the less numerous, had in 1789 about 30 provinces, with about 15,000 monks.

"As a literary order, the Franciscans have chiefly been eminent in the theological sciences. The great school of the Scotists takes its name from John Duns Scotus [see SCOTUS], a Franciscan friar, and it has been the pride of this order to maintain his distinctive doctrines both in philosophy and in theology against
the rival school of the Thomists, to which the Dominican order gave its allegiance. See Thomists. In the Nominalist controversy the Thomists were for the most part Conceptualists; the Franciscans adhered to the realist Realism. See Nominalism. In the following question the Franciscans stood: Domini restituit, Domini dedit: 'Give to God what is God's.' In reality, however, the practical mechanician, who in itself has sufficed to make the reputation of his order, had his contemporaries not failed to appreciate his merit. Two centuries later the great cardinal Ximenes was a member of this order. The popes Nicholas IV, Alexander V, Sixtus IV, and Clement XI, also belonged to the institute of St. Francis. In history this order is less distinguished; but its own annalist, Luke Wadding, an Irish Dominican, bears a deservedly high reputation as a historian. In lighter literature, and particularly poetry, he has already named the founder himself as a sacred poet. Jacopone da Todi, a Franciscan, is one of the most characteristic of the medieval hymn-writers; and in later times the celebrated Lope de Vega closed his eventful career as a member of the Third Order of St. Francis. It may add that in the revival of art the Franciscan order bore an active, and, it must be confessed, a liberal and enlightened part.

No order of monks, save the Benedictines, has had so many members as that of the Franciscans. About fifty years after its foundation it reckoned no fewer than 33 'provinces,' the aggregate number of convents in which exceeded 8000, while the members fell little, if at all, short of 200,000. Some ideas, indeed, of the extraordinary extension of this remarkable institute may be formed from the startling fact that, in the first fifty years after its foundation it exceeded the number of the Roman Catholic Church, is vested in an elective general, who resides at Rome. The subordinate superiors are, first, the 'provincial,' who presides over all the brethren in a province; and, secondly, the 'guardian,' who is the head of a single convent or community. These officers are elected only for two years. The provincial alone has power to admit candidates, who are subjected to a probation of two years [see Novitiate], after which they are, if approved, permitted to take the vows of the order. Those of the members who are advanced to the holy orders undergo a preparatory course of study, during which they are styled 'scholars;' and if eventually promoted to the priesthood they are styled 'fathers' of the order, the title of the other members being 'brother' or 'lay brother.'

2. Statistics.—At present the number of Franciscans is much smaller than it was in former times. It exists in Italy, France, Austria, Belgium, England, Ireland, Holland, Switzerland, Prussia, Bavaria, Poland (54 convents in 1848), Russia, Turkey, Ionian Isles, Greece, Mexico (60 convents in 1848), in most of the states of Central and South America, China, India, Egypt, Tripoli, Tunis, Morocco, in Australia, and Polynesia. In the United States of America there are Observants in the dioceses of New York, Buffalo, Philadelphia, Alton, Cincinnati, and Louisville. The principal convent of the Regular Observants is at Coelli; that of the Reformed, St. Francis a Ripes—both at Rome. The Conventuals have convents in Austria, Germany, Switzerland, and the United States of America (in Philadelphia). Their principal convent is at Rome (the Twelve Apostles). The superiors now residing in Rome are a general of the Observants, a minister general of the Observants of the Province of Germany, a procurator general of the Conventuals, and a father provincial of the Conventuals of the Capuchins, and a general of the Geralder (Capitans). Together, all these branches of Franciscans had in 1862 about 3800 houses and 50,000 members.

A. J. S.)

Francisco de Vittoria, a Spanish theologian, was born at Vittoria, and died at Salamanca August 14, 1549. He completed his studies at Paris, entered the order of St. Dominic, and returned to his native country to teach. His Theologiae Prelectiones (of which there have been several editions; last one, Antwerp, 1604, 2 vols. 8vo) embrace divers treatises. He published also Confessioantarum, (Salamanca, 1562, 12mo); Instrucio y Regalio de la Animae (Salamanca, 1552, 8vo); and left in MS. Commentary on the Hierro Summum theologiae et sacrae Salamancae, 18th century (Paris, 1822); P. Karl vom beil, Aloys, Jahrh., Buch der Kirche (Ratisbon, 1862), gives an alphabetical list of all the convents.

Franciscus, August Hermann, an eminently pious divine and philanthropist of Germany, was born at Lubec March 23, 1668, and studied theology and philosophy at the universities of Erfurt, Kiel, and Leipzig; and Heilbronn, with great success, at Hamburgh. In 1685, in connection with Paul Anton, he established at Leipzig the Collegium Philosophiae for the study of the Bible with practical exegesis. It met with great success, but made him many enemies. In 1687 he went to Lüneburg to study exegesis with Sandhagen, and here he imbued a deep spiritual experience. The reforming zeal of his childhood, which made him a Catholic, separated him from the Christian Church; all his labors and studies were consecrated to the glory of God. In 1688 he taught school in Hamburgh, and laid the basis of his subsequent mastery of the art of teaching. After visiting Spener, from whom he derived comfort and strength in the Christian life, he returned to Leipzig in 1699, where he gave expository lectures on St. Paul's epistles. Crowds attended them, and a new impulse was given to the study of the Bible. His instructions developed a new religious spirit among the students. Opposition was soon awakened, and he and his friends were stigmatized as pietists. In 1690 his lectures were arrested by the faculty. He then 'accepted an invitation to preach at Erfurt, where his sermons attracted such numbers (among them many Roman Catholics) that the elector of Meinz, to whose jurisdiction Erfurt then belonged, ordered him to leave the city. Only twenty days afterward, however, he went to Halle (1692) as professor in the new university, at first of the Oriental languages, and afterwards of theology. At the same time he became pastor of Glaucha, a suburb of Halle, the inhabitants of which he found sunk in the deepest ignorance and infidelity; and for whose advancement, and to enable them to devise schemes of usefulness, he first instructed destitute children in his own house, and gave
Francke, Theophil August, son of August Hermann Francke, was born at Halle on 12 December 1762. In 1770 he was made pastor of the House of Correction in Halle, in 1773 adjoint to the faculty of theology, and in 1777 succeeded his father as dean of the inspector and director in the orphan House and pedagogium, and subsequently became archbishop and consistorial court-chancellor, knight of the Order of St. Wenceslaus; he was the editor of various works.

and wrote introductions to Nickamp's Misiones-Ge
schichte and the Caustite Bibe, and published a con
tinuation of the memoirs of Danish missionaries in
572.

Francken, Zégidus, was probably born at Dott, where his father, Rev. Henricus Francken, was settled from 1692 to 1704. The son was called in 1704 to take charge of a church at Rijswort. Having labored here a few years, he accepted a call to Maassluis, where he served as minister till removed by death in 1743. He was warmly attached to the Voetian party in the Reformed Church. He was a zealous advocate of
their views, and was highly esteemed by the party. He insisted much on experimental and practical religion.
He excelled in analyzing the workings of the human heart, and in exposing to view its hidden re
cesses. His writings, though not wholly free from mysticism and asceticism, were productive of great
good. His work on ascetic theology, entitled Heugie Godgelderdeid, published in 1719, was frequently re
printed; this was also the case with his Kern der God
gelderdeid. His Wote Kunresten van Leren deme appeared in 1724. Several other volumes on practical
religion were published by him. Their titles are suf
ficiently quaint, and remind us of Rutherford's mode of expression. His brother Peter was settled at Geer
trudenberg from 1685 to 1726. He was a member of the Godge
erd Nederland, ib. 471 en var. (Te 's Hertogen
bosch, 1801). Geschiedenis der Nederlandische Hervorm
de Kerk door Jepje en Dernont, 111 Deel, ib. 306 en

ekunde in de Protestantische Kerk van Nederland door J.
Hartog, Predikant bij de Doogneweg gemeente te de
Zandam (Amsterdam, 1865). (J. P. W.)

Francken, Christian, a German divine, sur
named the weathercock from the instability of his re
ligious opinions, was born at Gardelegen in 1549, and
died about the close of that century. He was first a Lutheran, then became a Jesuit, after his return
more to the Lutheran faith, then became a Socinian, and finally a Roman Catholic again. The most important of his writings is Colloquium Jenaicum, etc. (Leipzig, 1579 and 1580), a severe satire on the Jesuits.—Hoefer, Nov. Bih. Géneal., xvii., 466-7; Rose, Nov. Bih. Géneal., viii., 439. (J. W. M.)

FRANCO.

FRANCO, See BONIFACE VII.

FRANCOIS, Laurent, a French abbe, was born Nov. 2, 1698, at Arinthod (Francois-Comte), and died at Paris Feb. 24, 1782. He was for some time a chevalier of St. Lazare, but, quitting that society, went to Paris, and engaged in teaching. He there composed several books, defending Christianity against the at
acks of the philosophers, which attracted the atten
tion of Voltaire, who sought to cast ridicule upon their author, but only succeeded in giving him a more prominent position in the list of apologists. His principal works are, Les Preuves de la Religion de Jesus-Christ, contre les averses et déistes (Par. 1751, 4 vols. 12mo):—Les Preuves de la Religion Chrétienne contre les divirices (Paris, 1755, 2 vols. 12mo):—Examen du Catechisme de l'homme homme, etc. (Brussels and Paris, 1764, 12mo):—Reponse aux déistes propres contre la religion Chrétienne par J.-J. Rousseau, etc. (Paris, 1768, 12mo):—Examen des faits qui servent de fonde
erales, viii., 439. (J. W. M.)

FRANCOIS de TOULOUSE, a French theologian
and preacher, lived in the latter half of the 17th cen
try, and was notably zealous in striving to bring the
Protestants of the Cevennes back to the Roman faith.
He belonged to the order of Capuchin monks, of which he became provincial. Of his writings, we name La
Parfait Missionaire (Paris, 1662, 2 vols. 8vo):—Le Mi
sionaire Apologete (Paris, 1664, 8 vols. 8vo):—Ser

FRANCUS, or Franck, Sebastian, a so-called
enthusiast of the times of the Reformation, was born
about 1500 at Donauwurth. He was first a Roman
priest, then a Lutheran minister, afterwards samp
ufacturer and printer, always a thinker and writer. He anticipated the chief ideas of the modern religious
views: e.g. exalting the spirit of Scripture in dis
tinction from the letter; viewing religion in a thor
oughly subjective way; holding that one believes only on the united testimony of one's heart and con
science. Well read in ancient and mystical philo
sophy, he imitated it in a sort of pietistic pantheism.
He held that whenever man passively submits to God, then God becomes incarnate in him. The divines at Smalcald (1640) received Melanchthon to write against him, and signed a severe declaration about his writings: "as the devil's favorite and special blas
phem'er." He was driven out of Strassburg, made an exile, and died at Basle 1584. An account of him may be found in Wald, De Vita Franci (Erlangen, 1739); Ch. K. am Ende, Nachweise zu F. l. Lehren und Schriften (Nurembs, 1756). See also Herzog, Real-Encyclop. iv., 450; Erlangen, 1739, d. Herz. Selten von der Reformation; C. A. Hase, Schr. Franck von Werd, der Schweizerm (Leip. 1868); Hase, Ch. History, § 373; Hayle, Dictionary, s. v.

FRANK, JACOB (Jankele Lewowicz), founder of the Jewish sect of the Frankists, was born in Poland in 1712. While a young man he travelled through the
Countries and neighboring parts of Turkey, where he received the surname of Frank, given to the Turks to Europeans, and which he retained. Having returned to Poland in 1750, he acquired great reputation as a scholar, and settled in Podolia, where he was sorely surrounded by ad\pts, among whom were several rab
cbis. His most zealous followers were among the
Jewish communities of Landskren, Buk, Qairan, Opotechin, and Kirlatitsch. He preached a new doctrine, the fundamental principles of which he had borrowed from that of Suboba-Seri, and which he explained in a book which his disciples looked upon as directed and inspired from God. The chief abuse of Podol
ia, jealous of his influence, caused him all sorts of an
noyances, and had him arrested, but he was liberated
through the influence of the Roman Catholic clergy,
and authorized by the king to profess freely his te
nets. His followers then, under the name of Zohar
ites (from their sacred book Zohar) and Anti-Talmud
ites, opposed their former adversaries in turn, and
even obtained an order from the cardinal of Kamienitz to have all the copies of the Talmud in his diocese
burned. They soon, however, lost their influence, the
papal nuncio at Warsaw declaring against them. Some fled to Moldavia, where they were badly treated,
and most of the others, including Frank, professedly
embraced Christianity; but, as he continued to make
proselytes, he was imprisoned in the fort of Czestochow until the invasion of Poland by the Russians in
1773. His sect had disappeared in the meanwhile, and
he made large collections in Poland and Bohemia.
In 1788 he went to Vienna, and then went to Brunn, in Moravia, where he lived in princely style on the
means furnished him by his followers. Driven again from Vienna, where he had returned, he settled at Offen
bach, in Hesse, where he died of apoplexy (standing his disciples believed him immortal) Dec. 10, 1791.
The sect exists yet, and has its head-quarters in
Warsaw, but the mystery which surrounds it has not
yet been dissipated. Their profession of faith has
Frankenberg, Johann Heinrich, count of Frankenberg, a cardinal of the Roman Cahth. Church, was born at Leobendorf, September 18, 1686. He studied first at Breslau, and afterwards in the German-Hungarian College at Rome. After his return to Germany he became successively coadjutor of the archbishop of Gortz in 1745, archbishop of Mecklenburg in 1758, and soon after member of the Belgian Council of State, and cardinal in 1778. He defended the liberties of the Church and of the episcopal seminaries against the innovations of the emperor, Joseph II, but, being accused of having taken part in some disturbances which occurred in Brabant in 1788, the emperor deposed him from his council afterwards of having opposed the measures taken by the French against the churches of his diocese, he was condemned to deportation, and taken to Brussels. He lived for a while at Emmerich, then in the village of Ahual, in Westphalia, and finally removed to Breda, in Holland, where he died, March 14, 1814. See A. Theumer, Der Cardinal von Frankenberg (Freiburg, 1850); Pietro, Uniearrivali-Lezioni, s. v.

Frankfurt, Concordat of. See Concordat.

Frankfurt, Council of (Concilium Franciordienser), a synod of great importance in Church history, held at Frankfurt-on-the-Main, A.D. 794. Some Roman writers deny the authenticity of the acts of the Council of Frankfurt (e. g. Barruel, Du Rom. Pope, Paris, 1603, ii. 402), but Baronius (Annales, A.D. 794) admits it, and Labbe publishes the canons enacted at it (Concil. viii.), 1057. Mansi publishes but two of the canons (Concil. xii., 916), referring to Capit. Reg. Franc. (ed. Baluz. 1, 263) for the rest. Dupin holds that it was considered in France to be a general council, and that three hundred bishops attended it (Ecles. Hist. cent. viii.). They came from Germany, Gaul, Spain, Italy, and England, and there were two delegates from the pope.

The Council of the council was as follows. After the close of the second Council of Nicæa, A.D. 787, the pope sent a copy of its acts to Charlemagne, seeking the approval of the French bishops, which they declined on the ground that the worship of images, sanctioned at Nicæa, was unauthorized in the Church, and unlawful. The Liber Carolinis (see CAROLINE Books) were composed under the name of Charlemagne, and by his order, to refute the canons of Nicæa. "Nothing can be stronger than the opposition which they offer to every act of appearance of worship as paid to images, even to bowing the head and bending the knees before them; the Gallican bishops, as well as the author of these books, were deceived by a false translation of the acts of the second Council of Nicæa, which, they say, led them to fancy that the council had inscribed the paying-divine homage, and worship to images, and that it was this false notion which induced the bishops to dissolve the council; but this is evidently untrue, since it is an historical fact that authentic copies of the acts of the council were sent into France by the pope, as also that Charlemagne received another copy direct from Constantineople (Palmer, On the Chal. Conc. iv., ch. x., § 4). Roger de Hoveden has the following: "In the year 792, Charles, king of the Franks, sent into Brit- ain [to Offa, king of the Mercians] a "synodal book, sent to him from Constanti nope, in which, alas! were found many things inconvenient, and contrary to the true faith, especially in this, that it was established by unanimous consent of almost all the doctors and bishops of the East, no less than three hundred, that images ought to be worshipped" (imagines adorari deberent... hic in Catholica Graecia... adoratio absumatur)" (exegetarum). "Against which Albinus [Alchimus] "wrote an epistle, fortified with the authority of the holy Scriptures." Matthew of Westminster, anno 796, gives a similar account.

Finally, in France, a dispensation called the Council of Frankfort, A.D. 794, to consider this question, and also that of the Adoptionist heresy (q. v.). Fifty-six canons were passed at the council, of which the following are the most important: Canon 1. Condemning Felix and Elipandus, the propagators of the Adoptionist heresy. 2. Condemning the second Council of Nicæa, and all worship of images. "Alla est in medium quos- tio de nova Gregorum Synodo, quam de adorandia imaginibus Constantino poore concedunt, in qua scriptum habebatur ut qui imaginibus sanctarum, ita ut deificis Trinitatis, servitium aut adorationem non im ponderem, anathema judicaretur. Quis supra sanctissimati patres nostri omnimodi adorationem et servitutem renun tes contemperant atque conscientes condemnavere num."

6. Ordering that bishops shall see justice done to the clergy of their diocese; if the clergy are not satisfied with their judgment, they may appeal to the metropolitan. 11. Ordering all monks to abstain from business and all secular employments. 16. For bidding to take money for the ordination of monks.

See, besides the authorities already cited, Gieseler, Church History, period iii., § 12; Landon, Manual of Councils, s. v.; Inest, History of the English Church, p. i, chap. xii.; Hefele, Concilien geschichte, iii., 635 sq.; Harduin, Concil. iv., 904; Schröck, Kirchengeschichte, xx, 568; and the article Image Worship.

Frankfurter, Moses ben-Simeon, a distinguished printer and Hebraist, lived at Amsterdam between 1700 and 1762. His reputation as a scholar chiefly rests on the "Great Rabbinic Bible" (came פֶּרֶס נִכְנָס, the Congregation of Moses, Amerst. 1724-1727, 4 vols. fol.), which he edited, and to which he gave the greatest part of his life. It is the first Bible and Talmud in which the notes and interpretations constitute in itself a library of Biblical literature and exegesis, and is indispensable to every critical expositor of the O. T. Besides giving the text in Hebrew and Chaldee by Onkelos, it contains the Massora, the commentaries by Rashii, Aben-Ezra, Kimchi, Levi, Ge- shon, Abraham, Samuel b. Levi, Bene Joseph, Duran, Saadis, Chasik, the Sephardim, a number of other rabbis, and by the editor, Frankfurter. Not less noteworthy is his Index Rerum, the different Introductions written either by himself or by distinguished rabbis; his Index to the chapters and sections of the O. T., giving the commencement of the verses; a treatise on the design of the law by Obadiah Sephoron; the Great Massora; the various readings of the Eastern and Western Coed.; a treatise upon the Accents; and last, but not least, the differences in text between Ben- Naphthali and Rashi. The most important of these differences of the Bible, entitled יָדִיעַת אֲנָשִׁים (a small offering); יָדִיעַת אֲנָשִׁים (the great offering) — Kitzo, Cyclopaedia, Bib. Lit., ii., 57; Etheridge, "The evening offerings"— Peri, Tab. Lit. 101; Fürst, Biblioth. Jul. i., 205. See Rabbinical Bibles. (J. H. W.)

Frankincense (_natom, lebomma; whence נַיִּ֣וֹם, nayo), an odorous resin, so called from its whiteness (Phleb. xii., 82); mostly imported from Arabia (Isa.
FRANKINCENSE

656
FRANKINCENSE

ix. 6: Jer. vi. 20; see also Strabo, 16; Virgil, Georg. ii. 117), yet growing also in Palestine (Cant. iv. 14; unless perhaps some odontorhinchus Dioscorides and here refer to), and used for perfume (Cant. iii. 6), but more especially in sacrifices for purification (Lev. ii. 16; v. 11; Isa. xliii. 23; lxvi. 8; Luke i. 9), and it also was one of the ingredients in the perfume which was to be prepared for the sanctuary (Exod. xxx. 34).

I. History of产地

It is also mentioned (Lev. xvi. 18; 15; xxv. 7; 2 Chron. v. 15) arose from its fragrant odor when burnt, in which respect the incense was a symbol of the divine name, and its diffusion an emblem of the publishing abroad of that name (Mal. i. 11; comp. Cant. i. 9); and from this, as prayer to God, the incense became an emblem of prayer (Psa. cxlii. 2; Luke i. 10; Rev. v. 8; viii. 3). In this symbolic representation the frankincense especially set forth holiness as characteristic of the divine attributes, so that the burning of it was a celebration of the holiness of Jehovah (Bähr, Symbolik d. Ms. Cultus, i. 466; ii. 329, etc.). In this respect its name (= schinkens) likewise became significant.

Frankincense was also used in the religious services of the heathen (Herod. i. 183; Ovid, Trist. v. 5, 11; Metam. vi. 164; Arnob. adv. Gentes, vi. 3; vii. 26). On the altar of Mylitta and the Pantheon of Venus only incense was burnt (Münzer, Relig. der Babylonier, p. 55; Der tempel d. himmel. Göttin zu Popko, p. 29; Homer, Od. viii. 368; see Damm, s. v. Τιμία; Tacitus, Hist. ii. 3). The substance itself seems to have been similar to that now known as such, a vegetable resin, balsamic, glistering, and of a bitter taste, obtained by successive incisions in the bark of a tree called the arbor thuris, the first of which yields the purest and whitest kind (10275, άλομον ζώονανθής, or καλαθίς); while the produce of the after incisions is spotted with yellow, and, as it becomes old, loses its whiteness altogether. The Indian oliobum, or frankincense, is imported in chests and cases from Bombay as a regular article of sale. It is chiefly used in the rites of the Greek and Roman churches; and its only medical application at present is as a perfume in sick rooms. The oliobum, or frankincense used by the Jews in the Temple services, is not to be confounded with the frankincense of commerce, which is a spontaneous exudation of the Ficus religiosa, or Norway spruce fir, and resembles in its nature and use the olibanum pitch which is obtained from the same tree. See INCENSE.

The ancients possessed no authentic information respecting the plant from which this resin is procured (Strabo, xvi. 778, 782; Diod. Sic. ii. 40; Pliny, vi. 26, 28, 32; Apuleius, Metam. iii. 96, 97; Oribasius, Alex. vii. 20; Virg. Æn. i. 416; Georg. i. 57, etc.), and modern writers are nearly as much confused in their accounts of it. Even Pliny and Theophrastus, who had never seen it, give merely contradictory statements concerning it. It is described by the latter as attaining the height of about five ells, having many branches, leaves like the pear-tree, and bark like the laurel; but at the same time he mentions another description, according to which it resembles the mastick-tree, its leaves being of a reddish color (Hierocles, Hist. Nat. vi. 14, 42); it is a small tree, resembling the Egyptian hamathorn, with gold-yellow leaves like those of the wood. The difficulty was rather increased than otherwise in the time of Pliny by the importation of some shoots of the tree itself, which seemed to belong to the terebinth (x. 39), resembling the plane. It also resembles with a leaf like that of the mastick: he distinguishes two kinds: the finer, growing on the mountains; the other, dark and of an inferior quality, growing on the plains. Chardin says that the frankincense-tree on the mountains of Carmania resembles a large pear-tree. The Arabian botanist Abúl-Fad'll says it is a vigorous shrub, growing only in Yemen and on the hills, and in respect to its leaves and fruit resembling myrtle; a description which has been repeated by Sprengele, Lillie, and Reid (Bot. i. 12, 257) to apply very well to the frankincense (Forskal, Flor. p. 80), or (Gesch. d. Botan. i. 16) to the Amyris kafjar (Forskal, p. 19), or even to the Junipera thurifera (Martius, Pharmakoym. p. 884). Niebuhr, in his Description of Arabia, ii. 356, says, "We could learn nothing of it from which (Lev. i. 16; ii. 16; vi. 15; xxv. 7; Numb. v. 15) arose from its fragrant odor when burnt, in which respect the incense was a symbol of the divine name, and its diffusion an emblem of the publishing abroad of that name (Mal. i. 11; comp. Cant. i. 9); and from this, as prayer to God, the incense became an emblem of prayer (Psa. cxlii. 2; Luke i. 10; Rev. v. 8; viii. 3). In this symbolic representation the frankincense especially set forth holiness as characteristic of the divine attributes, so that the burning of it was a celebration of the holiness of Jehovah (Bähr, Symbolik d. Ms. Cultus, i. 466; ii. 329, etc.). In this respect its name (= schinkens) likewise became significant.

Frankincense was also used in the religious services of the heathen (Herod. i. 183; Ovid, Trist. v. 5, 11; Metam. vi. 164; Arnob. adv. Gentes, vi. 3; vii. 26). On the altar of Mylitta and the Pantheon of Venus only incense was burnt (Münzer, Relig. der Babylonier, p. 55; Der tempel d. himmel. Göttin zu Popko, p. 29; Homer, Od. viii. 368; see Damm, s. v. Τιμία; Tacitus, Hist. ii. 3). The substance itself seems to have been similar to that now known as such, a vegetable resin, balsamic, glistering, and of a bitter taste, obtained by successive incisions in the bark of a tree called the arbor thuris, the first of which yields the purest and whitest kind (10275, άλομον ζώονανθής, or καλαθίς); while the produce of the after incisions is spotted with yellow, and, as it becomes old, loses its whiteness altogether. The Indian oliobum, or frankincense, is imported in chests and cases from Bombay as a regular article of sale. It is chiefly used in the rites of the Greek and Roman churches; and its only medical application at present is as a perfume in sick rooms. The oliobum, or frankincense used by the Jews in the Temple services, is not to be confounded with the frankincense of commerce, which is a spontaneous exudation of the Ficus religiosa, or Norway spruce fir, and resembles in its nature and use the olibanum pitch which is obtained from the same tree. See INCENSE.

The ancients possessed no authentic information respecting the plant from which this resin is procured (Strabo, xvi. 778, 782; Diod. Sic. ii. 40; Pliny, vi. 26, 28, 32; Apuleius, Metam. iii. 96, 97; Oribasius, Alex. vii. 20; Virg. Æn. i. 416; Georg. i. 57, etc.), and modern writers are nearly as much confused in their accounts of it. Even Pliny and Theophrastus, who had never seen it, give merely contradictory statements concerning it. It is described by the latter as attaining the height of about five ells, having many branches, leaves like the pear-tree, and bark like the laurel; but at the same time he mentions another description, according to which it resembles the mastick-tree, its leaves being of a reddish color (Hierocles, Hist. Nat. vi. 14, 42); it is a small tree, resembling the Egyptian hamathorn, with gold-yellow leaves like those of the wood. The difficulty was rather increased than otherwise in the time of Pliny by the importation of some shoots of the tree itself, which seemed to belong to the terebinth (x. 39), resembling the plane. It also resembles with a leaf like that of the mastick: he distinguishes two kinds: the finer, growing on the mountains; the other, dark and of an inferior quality, growing on the plains. Chardin says that the frankincense-tree on the mountains of Carmania resembles a large pear-tree. The Arabian botanist Abúl-Fad'll says it is a vigorous shrub, growing only in Yemen and on the hills, and in respect to its leaves and fruit resembling myrtle; a description which has been repeated by Sprengele, Lillie, and Reid (Bot. i. 12, 257) to apply very well to the frankincense (Forskal, Flor. p. 80), or (Gesch. d. Botan. i. 16) to the Amyris kafjar (Forskal, p. 19), or even to the Junipera thurifera (Martius, Pharmakoym. p. 884). Niebuhr, in his Description of Arabia, ii. 356, says, "We could learn nothing of it from which
simple axillary racemes. By incisions in the bark a very odorous gum is obtained, which the spice-merchants of London recognised as albotham or frankincense, although it had been sent to England as an entirely different species of perfume (see Oken, Lehrs, u. Botanik, ii, 267 sq.; Gieger, Pharmacc. Botanik, ii, 1294 sq.). The Boswellia serrata grows to a height of forty feet, and is found in Ambonya and the mountaneous districts of India. Another species, the B. papyrifera, occurs on the east coast of Africa, in Abyssinia, about 1000 feet above the sea-level, on bare limestone rocks, to which the base of the stem is attached by a thick mass of vegetable substance, sending roots to a prodigious depth in the rocky crevices (Hogg's Veg. Kingdom, p. 249). Its resin, the olibenum of Africa and Arabia, usually occurs in commerce in brownish masses, and in yellow-tinted drops or "tears," not so large as the Indian variety. The last is still burnt in Hindustan temples under the name of "rubinda" and "liban"—the latter evidently identical with the Hebrew lebanon; and it is exported from Bombay in considerable quantities for the use of Greek and Roman Catholic churches. From Cant. iv, 14 it has been inferred that the frankincense-tree grew in Palestine (compare Athen. iii, 101), and especially on Mount Lebanon. The connection between the names, however, goes for nothing (Lebanon, Lebanon); the word may be used for aromatic plants generally (Gesen. Lex. s. v.); and the rhetorical flourishes of Florus (Epit. iii, 6, "thursis silvis") and Asconius (Mosaici, p. 110) are of little avail against the fact that the tree is not at present found in Palestine. (See Celsius Itiber. i, 231; Bod. a. Stapel, comment. in Theor. p. 976 sq.; Gesenius, Hel. Theurp. p. 741; Penny Cyclop. s. v. Olibanum and Boswellia Thurifera). See AROMATICS.

Franks, Conversion of. See CHLIDWIO; FRANCE.

Frans, or Francis, Wolfgang, a Lutheran theologian, was born at Plauen, 1564. He became professor of history, and afterwards of theology, at Wittenberg, where he died Oct. 26, 1628. Among his voluminous writings are Animalium historia Sacra (best ed. Frankfort, 1712, 4 vols. 4to.) — Proreutica theologica de interpretazione S. S. (Witten. 2d ed. 1708, 4to.) — Schola ecclesiastica patriarchali sacra, asserting the orthodox doctrine of the atonement against the Socinians (Wittenb. 1554, 4to, and often).

Fra Paolo. See SARPI.

Franz, Alexander, D.D., minister of Kirkhill, wrote Key to Prophecies not yet accomplished (Edinburgh, 1735, 8vo), described by Urne (Bibl. Bibl.) as "a work of some merit," containing "rules for the arrangement of the unfulfilled prophecies, observations on their dates, and a general view of the events foretold in them," also the treatise Commentary on Isaiah (1800, 8vo). See FRATU ECLIIS. Scotici, iii, 296.

Fraser, James, D.D., a minister of the Church of Scotland, born about 1690, and died 1763, was the author of The Scripture Doctrine of Sanctionification (Edinburgh, 1774, 12mo), of which several editions have appeared, the last an abridgment (London, Tract Society, 1810, 18mo). This work was edited by Dr. Erskine, and is highly praised by Urne (Bibl. Bibl.). See FRATU ECLIIS. Scotici, ii, 583.

Frassan, Claude, a Franciscan monk, was born in Picardy in 1620. He was doctor of the Sorbonne, theological professor at Paris, and superior of the Franciscan convent there. He wrote Dissertationes Bibliicas (Paris, 1682, 2 vols. 4to)—Cours de Théologie (Paris, 1672, 4 vols. fol.); reprinted, with additions by the author, in Latin, as Scutut Academicae seu universae doctoris subtilis theologicae dogmata (Venice, 12 vols. 4to). He died in Paris, Feb. 26, 1712.

Frater, the Latin word for brother. See BROTHER.

Fraternity (confraternitas, sodalitas), the name of associations in the Roman Catholic Church which pursue special religious and ecclesiastical purposes, observe corresponding statutes and religious exercises, and are endowed with indulgences, and sometimes with other privileges. Among the purposes to which fraternities are devoted are the nursing of the sick, support of the poor, the practice of a special devotion to some part of the Roman Catholic worship, the veneration of a particular saint, etc. In the earlier times of the Christian Church, as all Roman Catholic writers admit, there is no trace of fraternities. The first reference to them is found in an order of bishop Odo of Paris (died 1298), providing for the annual meeting of a Marianic fraternity. In the 13th century the fraternity of Bridge Brethren (q. v.) arose at Avignon. Among the oldest associations of this class belongs also the fraternity of the Gonfalonieri, who were confirmed by pope Clement IV. In the 17th and 18th centuries the "Marianic Congregations" spread widely, especially in Southern Germany, and in connection with the order of Jesuits. Among the other most noted associations were that of the Scapular (q. v.), Roman Dominican, and Corpus Christi. The popes Clement VIII, Paul V, Benedict XIII, and Benedict XIV issued several constitutions and decrees concerning fraternities. All the fraternities of the Church are subject to the jurisdiction of the bishop and his right of visitation. No fraternity can be erected in a diocese without the consent of the bishop, who has the right of examining, sanctioning, and, whenever he chooses, altering their statutes. Among the fraternities of modern origin, none has extended so widely as the "Fraternity of the most Holy and Immaculate Heart of Mary," for the Conversion of Sinners, which was founded in 1837 by the abbe Dufriche Desgenettes in Paris. Among the many religious societies which have been of late established by the High Church school in the Anglican Church are many which assume the name "Brotherhood" or "Confraternity." The "Kak Brun" of the English Church came in 1869, and the "Kak Brun" of 1869 mentions all societies of this kind then in existence in England, among them the "Guild of St. Alban the Martyr," all the branches of which call themselves brotherhood or sisterhood; the "Confraternity of the most Holy Trinity;" the "Confraternity of the Blessed Sacrament of the Body and Blood of Our Lord Jesus Christ;" the "Brotherhood of St. Luke the Physician and Evangelist;" —"Algemeine Real-Encyklopädie, iii, 134 (s. v. Bru
Frater, plural of frater. See BRETHREN.

Fraticelli, Fraticelli, or Fratelli, a low Latin or Italian diminutive, denoting fratres minores, little brothers. The term has been applied to so many different sects that its use in writers of the Middle Ages is not free. It was the first appellation of the Franciscans which arose in Italy about the year 1294. It was used as a term of derision, as the greater number of them were apostate monks; and for this reason it was sometimes given to other sects, as the Catharists, Waldenses, etc. When this name was applied to the followers of St. Francis, the Franciscans were honored. As there were many divisions among the Franciscans (q. v.), Pope Celestine V authorized Pet. de Macerata and Pet. de Sempronio to form a new order, who were called Pauperes etemati Dom. Celestini, and who obtained permission to live in solitude, as heretics and to observe the rule of St. Francis in all its rigor. Many of the more ascetic and extravagant monks joined them, who, living according to their own fancies, and making all perfection consist in poverty, and opposed by the regular Franciscans, were condemned by Eutychius, in 1360, and the inquisition was ordered by John XXII (1318) to proceed against them as heretics, which commission they executed with the utmost barbarity. After this, many of them adopted the views of Peter John Oliva de Serignan, published in his commentary, See Olivia. They held the Roman Church to be Babylon; that the rule of St. Francis was observed by Jesus Christ and his apostles. They foretold the reformation of the Church, and the restoration of the true Gospel of Christ. They affirmed that St. Francis was the angel mentioned in Rev. xiv. 6, that their knapsack was to be abolished in 1259, and to give place to a new Gospel, a book founded under the name of the abbot Jobuchim; that the ministers of this reformation were to be barefooted friars. They were repeatedly condemned; and from authentic records it appears that no fewer than two thousand persons were burnt by the inquisition from 1298 to the time of Innocent VI. These severities were repeated by pope Nicholas V and his successors; nevertheless, they maintained themselves down to the 15th century.

Frauds, Pious, "artifices and falsehoods made use of in propagating what is believed to be useful to the cause of religion. They are the offspring of sincerity and insincerity; of religious zeal combined with a defective morality; of conscientiousness in respect of the end, and unscrupulous dishonesty as to the means. Without the one of these ingredients, there could be no fraud; without the other, it could in no sense be termed a pious fraud. These frauds have been more particularly practised in the Church of Rome. But Prot-estants, in their adherence of the frauds that have been so often employed in support of that corrupt system, are prone to forget, or at least not sufficiently to consider, that it is not the corruptness of the system that makes the frauds detestable, and that their separation from the Church of Rome does not place them in a situation which exempt them from all danger of falling into corruptions; amongst the rest, into the justifi- cation of pious frauds, substantially to those with which that Church is so justly reproached. See Whately, Errors of Romanism." See CASUISTRY: PHIOBASIA.

Fraysseux, Denis, COUNT OF, an eminent prelate of the Gallican Church, bishop of hernoepol, peer of France, commander of the order of the Holy Ghost, etc., was born May 9, 1765, at Currières, in Gascony. His father designed him for the law, but he preferred the Church, and in 1788 he attached himself to the community of Laon, directed by the priests of St. Sul-pice, in Paris. The society was broken up by the Revolution, but after the adoption of Napoleon's concordat in 1801 it was reunited, and Fraysseux became a lecturer on dogmatic theology. In 1809 he instituted a series of "catechetical conferences" in St. Sul-pice, which had great success. Napoleon threatened to break up these conferences unless Fraysseux would make certain political recommendations to his hearers; but this he would not consent, nor was he further disturbed. These meetings were suspended by the Church authorities from 1809 to 1814, then continued till 1822; and his lectures at them were printed under the title Défense du christianisme (Paris, 1823, 3 vols. 8vo), containing a résumé of previous books on the evidences, according to his scientific scrupulousness. It was translated into English, Defense of Christianity, as a Series of Lectures, etc. (London, 1836, 2 vols. 8vo). After the restoration (1814) he became very popular at court, and was made first almoner of Louis XVIII. He refused to accept the bishopric of Nismes, but in 1822 was made bishop of Hermione in parihcure infaldum. In the same year he was made grand master of the University and a member of the Academy, and one of his first acts was to put an end to Guiot's lectures on history "as of dangerous tendency." In 1824 he became peer of France and minister of public instruction and works. He was also minister to the king, successor Charles X, but soon retired and gave his advice, in retirement, against the famous Ordonnances which led to the Revolution of 1830. He followed the fortunes of Charles X, who died in his arms at Goritz. Fraysseux died at St. Germain Dec. 12, 1847. His life was written by Henrion (2 vols. 8vo). Besides the work mentioned above, he wrote Les Vrais Principes de l'Eglise Catholique sur la puissance ecclésiastique, la pa-pauté, etc. (1817, 8vo), a work said by the Ultramontanists to look towards Jansenism, or something worse. According to it, he thought religious liberty only when in harmony with the voice of the entire Church.

Frédégise or Fruidugius, a mediæval monkish writer, is of English origin, and flourished in the 9th century. He was a pupil of Alcuin, who took him to France, where he obtained employment at the court of Charlemagne. He succeeded Alcuin in the abbey of St. Martin, and had also conferred on him those of St. Bertin and Coronery, and was chancellor to Louis le Débonnaire. His Epistola de Niki and tenodris (preserved in the Miscellanea of Baluze, tom. i) is divided into two parts, and the author attempts to show in the first part that nihilism is something in the second that the tenet are a corporeal substance. His work against Agobard is lost, but the description of Coronery in the poems of Alcuin is generally attributed to him. Hoefer, Nouv. Biog. Générale, xxviii, 326.

Frederik, WILLEM, was an enlightened Roman Catholic priest, who contributed much to prepare the way for the Reformation in Holland. In 1572 he enjoyed the friendship of John Wessel and A. Agrippa, and in later years that of Erasmus. He was a man of learning, and also skilled in medicine. He was pastor of St. Martin's church in Groningen. He also frequently served the city in a political capacity. He acquired great influence and was highly esteemed. Erasmus regarded him not only as an enlightened man, but as a model priest. He belonged to a circle in which the spirit of Wessel continued to live. Associated with such men as Everard Jarches, Herman Abrig, Nikolaus Lendorp, Johannes Timmermans, and Gerard Peteris, he was the most widely using the views of Reformers than with those of the Roman hierarchy. The Dominicans attempted to counteract these liberal views.
by offering to defend certain theses. A debate ensued in 1538. In the progress of it became apparent that this circle of friends had deeply imbibed the spirit and sentiments of the Illustrious Wessel. The liberty which they enjoyed in the expression of their views was greatly due to the extraordinary influence of a man named Wessel, who, in full obedience to his calling, was not unwilling to sacrifice his own life on his fatherland's behalf, and his church for the sake of the Reformation. See Schmelzer, "Die protestantische Freunde" (Altenburg, 1840); Haym, "Israel unter der Judenrechtigung" (1857); and "Dokumente der Geschichte der Niederlandischen Reformationszeit" (3d ed., Amsterdam, 1866), "Schem, American Everett. Manoeuvres for 1808 (N. Y. 1868)." (A. J. S.)

**Freedom** (Ὠθελήσια, chryshabos, manumissionem, Lev. xix, 20; entirely different from polity, citizenship, Acts xxii, 28; "commonwealth," i. e. polity, Eph. i, 12). Strangers resident in Palestine had the fullest protection of the law, equally with the native Hebrews (Lev. xxiv, 22; Num. xxv, 12; Deut. i, 10; xxiv, 17); the law of usury was to be strictly enforced, or expiated, or be 20. The advantage the Hebrews could attain over the Gentile was essentially spiritual, in being the members of the ecclesiastical as well as the civil community of Jehovah. But even to this spiritual privilege Gentiles were admitted on condition of circumcision (Deut. x, 19; Jer. vi, 11; Sam. xx, 7; 2 Sam. xi, 13). The Ammonites and Moabites were excluded from the citizenship of the theocracy, and the persons mentioned in Deut. xxii, 1-6. See FOREIGNER. The Mosaic code points out the several cases in which the servants of the Hebrews were to receive their freedom (Exod. xx, 29; Lev. xxv, 39, 41, 47-55; Deut. xv, 12-17). See SLAVE. There were various modes whereby the freedom of Rome could be attained by foreigners, such as by merit or favor, by money (Acts xxii, 28), or by family. The inquisitor or freeman came directly by birth to freedom and to citizenship. The liberato or freeman was a manumitted slave, and his children were denominated liberini, i. e. freedmen or freedmen's sons. See LIBERTINE. Among the Greeks and Romans the freedmen had not equal rights with the freemen or those of free birth. The Roman citizen could not be legally scourged; he could not be confined, or be examined by question or torture, to extort a confession from him. If, in any of the provinces, he deemed himself and his cause to be treated by the president with dishonesty and injustice, he could, by appeal, remove it to Rome, and the determination of the emperor was final (Ant. xvi, 37-39; xxi, 58; xxii, 25; xxi, 11, 12). Christians are represented as inheriting the rights of spiritual citizenship by being members of the commonwealth or community of Jehovah (Eph. ii, 12; Phil. iii, 20). See CITIZENSHIP. The Christian slave is the Lord's freedman, and a partner of all the privileges of the children of God; and the Christian freeman is the servant of Christ (1 Cor. vi, 22; Rom. vi, 20-22). Paul acknowledges that freedom is worthy of being eagerly embraced; but the freedom which he esteemed most important was the freedom which came through our Lord Jesus Christ (1 Cor. vii, 21-23). The Jews, under the Mosaic law, are represented as in a state of servitude, and Christians as in a state of freedom (John viii, 31-36; Gal. iv, 21-31). See SLAVERY.

**Free (or Free-will) Offering** (ὢθελήσια, nedaboth, i. e. voluntary, as often), spoken of a spontaneous gift (Exod. xxxv, 29; Ezra 4, 4; comp. 7), but chiefly of a voluntary sacrifice (Lev. xxi, 25; Ezra iii, 5; Ezek. xxi, 12; plar. 2 Chron. xxxi, 14; Lev. xxiv, 24; 8; Amos iv, 5; fig. Ps. cxxix, 108), as opposed to one in consequence of a vow (vow, 72), or in expiation of some offence. See Thank-offering.

Freeske, William, an English Socinian, born in 1648, wrote a book in the form of questions and answers.
swers, entitled A Dialogue on the Daily, and a Confuta-
tion of the Doctrine of the Trinity, which was publicly
burned; and the author was fined £500 and compelled
to make a recantation in Westminster Hall.—Allibone,
Dict. of Authors, s. v.; Rose, New Bibl. Dict. viii, 448-
9. (J. W. M.)

Freeman (coxalgou, one unawed, a freed-
man, 1 Cor. vii, 22; so Josephus, Ant. vii, 11, 2; 
odochines, lxx, 20; Xenophon, Athen. i, 10), FREEWOM-
an (iswoua, a freely-born female, Gal. iv, 22, 23, 30; 
elsewhere simply "free"). See Freedom.

Freeman, James, the first pastor of a Unitarian
church in New England, was born in Charlestown
and graduated at Harvard in 1777. His theological
studies were carried on with difficulty dur-
ing the war. In 1782 he was invited to officiate as
reader in King's Chapel for six months, and in 1788 he
was chosen pastor of the church, stipulating, however,
for permission to omit the Athanasian Creed from the
service. He soon began to feel doubts as to the do-
trines of the Trinity, and finally preached a series of
sermons to his people renouncing the doctrine.
The church resolved (in 1785) to alter their liturgy and re-
tain their pastor. Thus the first Episcopal church in
New England became the first Unitarian church in
America. Application was made to Bishop Provost in
1787 to ordain Mr. Freeman; but the bishop, of course,
refused, and the pastor was ordained by his own people.
He was a man of fine social qualities, and of excellent
intellectual powers, and was very popular as a pastor and
preacher. He died November 14, 1838. Beside him, 14, 1858. He
contributed to periodical literature and to the Collec-
tions of the Massachusetts Historical Society, he pub-
slished Sermons and Addresses (Boston, 1825).—Ware,
Unitarian Biography, i, 148, 149; Sprague, Annals, viii, 162.

Free Religious Association, the name of an
association established in Boston, United States, in
May, 1867. The Constitution adopted at the first
meeting declared the objects of the association to be
to promote the interests of pure religion, to encourage
the scientific study of theology, and to increase fellow-
ship in the spirit; and to this end all persons interest-
ed in these objects are cordially invited to its mem-
bership. Each member of the association is left indi-
vidually responsible for his own opinions alone, and
affects in no degree his relations to other associations.
A person belonging to co-operating or co-operating
association will be considered a member, with full right to speak
in its meetings, but is required to contribute a small
annual fee as a preliminary to the privilege of voting
on questions of business. The association is to hold
an annual meeting at Boston, one month's notice of
the meeting being previously given. A permanent
organization was effected of officers and committee.
At the first meeting speeches were made by Unitari-
ans, Universalists, Spiritualists, Progressive Friends,
Progressive Jews, and others connected with no par-
ticular religious denomination. At the second meet-
ing, held in 1868, a Baptist clergyman, who had been
censured for close communion practice, and an Epis-
copalian clergyman, who had been tried for an ex-
change of pulpits with a non-Episcopal clergyman,
were among the speakers. (A. J. S.)

Free Spirit, Brethren of the. See Breth-
ren of the Free Spirit.

Free-thinkers, "a name adopted by sectics to
express the liberty which they claim and exercise, to
think (or doubt) as they please upon all subjects, es-
specially those connected with religion. The term
originated in the 18th century, though 'free-thinking'
had earlier appeared in England. In 1718, a weekly
paper, entitled "The Freethinker", was published; and
in France and Germany a corresponding spirit exten-
sively prevailed."—Eden, Churchman's Dict. s. v. See
Infidelitv.

Free will. See Will.

Free-will Baptists. See Baptists.

Freelinghusen, the name of a family eminent in
the history of the American Church.

1. FREELINGHUYSEN, THEODORUS JACOBUS, first
minister of the Reformed Protestant Dutch Church in
Somerset County, N. J. 'He was born at Lingen, in
East Friesland (now in Hanover, Prussia), about 1691, was
educated there, and was ordained in 1717. By the person-
ality of his son, Simon Tjedde, one of the ministers of the
churches of Amsterdam, Holland, he was in-
duced to come to America, where he arrived in Janu-
ary, 1720, and became pastor of the Dutch people
in the vicinity of the present city of New Brunswick,
upon the banks of the Raritan and its tributaries.
Encountering all the difficulties of a newly-settled
country and a sparse population, whose religious spirit
was very formal and relaxed, his faithful and fearless
ministry gave great offence to many, and aroused a
spirit of persecuting opposition. But, with apostolic
zeal, he declared, "I would rather die a thousand
deaths than not preach the truth." A great revival
of religion resulted from his evangelical labors.
The highest testimony to his success has been left on rec-
ord by such men as Rev. Gilbert Tennent, George
Whitefield, and President Edwards; and by Rev. Dr.
A. Moseley in his Historical Review of the Reformation
in the Dutch Church of New Jersey, 1734, and in his paper entitled "The Hollanders
in New Jersey," read before the New Jersey Histori-
cal Society, September, 1850—a valuable document.
A characteristic volume of his sermons, translated
from the Dutch language by Rev. William Demarest,
was issued in 1856 (12mo, pp. 492) by the Board of
Publication of the R. P. D. Church, New York.
His biographer says "his labors continued for more than
a quarter of a century; and although he was often
attacked in the civil courts, before the colonial author-
ities, and in the pulpit by his colleagues, he never suc-
ceeded. He was always unsought by the ecclesiastical
authorities. All his children were believers. His five sons were ordained to the minis-
try, and his two daughters were married to ministers."
His ministry closed about 1747 (see Memoirs of Hon.
Theo. Freelinghysen, by Rev. T. W. Chambers, B.D.,
N. Y., Harper's, 1868). (W. J. R. T.)

2. FREELINGHUYSEN, Rev. THIODORE, eldest son of
the above-named, came to this country in 1745 an or-
dained minister, and was settled over the Reformed
Dutch Church in Albany, N. Y. He is represented
as having been in the Anti-Slavery, and the popula-
tion of spiritual eloquent, tender, and warm-hearted as a preacher; of
spotless life, and of eminent piety—"the apostolic
and much-beloved Freelinghuyse", as the name was for-
merly written. After a ministry of fifteen years in
Albany, he returned to Holland in 1760, partly be-
cause of ministerial discouragements from the exces-
sive worldliness of the city, partly to visit his native
land, and, according to some accounts, to procure
funds for founding a literary and theological institu-
tion. But he never returned, having been lost at sea
on the voyage. It is remarkable that his two broth-
ers, Jacobus and Ferdinandus, both of whom had
been educated and ordained as ministers in Holland,
also died at sea in 1758, of small-pox; and that the
youngest brother, Henricus, pastor of the churches in
Warwaring and Rochester, Ulster County, N. Y., died
of the same disease soon after his settlement in 1756. (W. J. R. T.)

3. FREELINGHUYSEN, John, second son of T. J. Fre-
elinghuyse, was educated and ordained in Holland, and
succeeded his father as pastor at Raritan, N. J., in 1750.
He "was a man of greater suavity than his father, but
had a strong and upholding, simple, and emotional
Christianity. He was distinguished for his gifts in the
pulpit, for his assiduity in the religious training of
the young; and for his zealous endeavors to raise up
worthy candidates for the sacred office." He died, greatly lamented, in 1754, in the twenty-eighth year of his age. His wife, who afterwards married the Rev. Dr. Jacobus Rutea Hardenbergh, and who survived her first husband more than fifty years, is represented to have been "as eminent in her day for intelligent piety as any of the female saints of the Old Testament of the New" (see Chambers, Memoir of Hon. Theo. Frelinghuysen, Harpers, 1863). (W. J. R. T.)

4. FRELINGHUYSEN, THEODORE, an eminent Christian lawyer, statesman, orator, and educator of youth, was great-grandson of the Rev. Theodorus Jacobus Frelinghuysen, and the son of major-general Frederick Frelinghuysen, of the Revolutionary army, member of the Provincial Congress of New Jersey and of the Continental Congress, and senator of the United States from his native state (New Jersey). He was born at Millstone, Somerset County, N. J., March 28, 1787, educated in schools at New Brunswick and at Basking Ridge, and graduated at Princeton, New Jersey, in 1804, with the highest honors of the institution. After studying law in the offices of his brother John at Millstone and of the Hon. Richard Stockton at Princeton, he was admitted to the bar in 1808, at the age of twenty-one. His eminent qualities as a lawyer led to his election as a member of the New Jersey legislature in 1817, and in 1829 he was elected to Congress, where he held his seat until 1832, when he was elected to the Senate of the United States. At the end of his term in the Senate he resumed the profession of the law, but soon accepted the chancellorship of the University of the City of New York. From 1839 to 1850 he occupied this high place, and then became president of Rutgers College at New Brunswick, N. J., where he died, April 12, 1861, after a protracted illness. During his residence in New York he was a candidate for the vice-presidency of the United States, on the ticket of Henry Clay, in 1844. In 1844, Mr. Frelinghuysen's civil, forensic, and political eminence was eclipsed by the loss of his Christian and philanthropic fortunes. His piety was humble, devout, genial, simple, and most carefully cultivated. His religious life was felt with unusual power at the bar, in the Senate, in society, and in the Church. He was a Sunday-school teacher almost until his death. His efforts for the salvation of men—presidents, governors, senators, judges, and others—were most remarkable and blessed. Especially was he in the place of father, pastor, and adviser to the younger men over whom he presided in the university and college. He was one of the foremost Temperance advocates and laborers in his generation. His eloquent tongue was ever ready to plead for every good Christian or humane cause. The American Sunday-school Union, the American Colonization Society, and other benevolent enterprises, often shared in these efforts. At one time, and for years together, he was the president of those three greatest of our Christian voluntary associations—the American Bible Society, the American Tract Society, and the American Board of Commissioners for Foreign Missions. Reckoned he was a Christian patriot of the first order. His eloquent speech in the United States Senate on the Indian Bill, and his course on the Sunday-mail Question, told with electric force upon the whole country. And when the civil war broke out in 1861, he was among the first, the most decided, and the most influential of all the eminent defenders of the Union. The completeness of his elevated character and record is remarkable, and his name will ever be illustrious for its goodness and greatness. A memoir of his life and services by Rev. T. W. Chambers, D.D., was issued by Harper and Brothers, N. Y., 1863, 12mo. (W. J. R. T.)

FRENCH, WILLIAM, D.D., a distinguished divine and mathematician, was educated at Cambridge, and became second wrangler in 1811. Soon after became fellow and tutor of Pembroke College, which he also left in 1817. He was ordained a deacon in 1820, and a priest in 1821. He was successively appointed vice-chancellor in 1821 and 1824, rector of Moor-Monkton, Yorksire, in 1827, and canon of Ely in 1832. He died in 1849. He published A New Translation of the Book of Psalms from the original Hebrew (1821-1824), with Notes by W. French and G. Skinner (Lond. 1831, 3vo).—Darling, Cyclop. Biblolog. s. v.

French Prophets, the name given in England to a sect formed by the Camisards, who came over to England about 1706, and who brought with them the "gift of prophecy," and soon made converts in England. The great subject of their predictions was the speedy establishment of the Kingdom of the Messiah; and (and they were to proclaim it as heralds to every nation under heaven), that the grand jubilee, "the acceptable year of the Lord," the accomplishment of those numerous scriptures concerning the new heavens and the new earth, the kingdom of the Messiah, the marriage of the Lamb, the resurrection of the dead, or the world of the rising in the day of judgment, was now even at the door; that this great operation was to be effected by spiritual arms only, proceeding from the mouths of those who should by inspiration, or the mighty gift of the Spirit, be sent forth in great numbers to labor in the vineyard; that the mission of God's servants should be witnessed to by signs and wonders from heaven, by a deluge of judgments on the wicked universally throughout the world, as famine, pestilence, earthquakes, wars, etc.; that the exterminating angels should cut off the tares, and there shall remain upon earth only good corn; and the works of men being thrown down, there shall be but one Lord, one faith, one heart, and one voice among mankind. And they declared that all the great things they had spoken of would be manifest over the whole earth within the term of the world. They thus prophesied a deluge in the gift of languages, of miracles, of discerning, etc.: discerning the secrets of the heart; the power of conferring the same spirit on others by the laying on of hands, and the gift of healing. To prove they were really inspired by the Holy Ghost, they alleged the complete joy and satisfaction they experienced in the spirit of prayer which was poured forth upon them, and the answer of their prayers by the Most High. These pretensions, however, laid the foundation of their detection and complete overthrow. They went so far as to pretend to raise the dead, and fixed upon one of their own number for the experiment, who was to rise on a particular day. But Dr. Eames did not rise! (Adams, View of all Religions). They obtained, for some time, considerable success in Great Britain, having their admiring followers not only in London, but also in the chief provincial towns. They were even joined by some parties of influence, such as Sir Richard Bulkeley, Lady Jane Forbes, John Lacey, Esq., and others. Mr. Lacey, who was originally a member of Dr. Calamy's congregation, entered, we are told, "into all their absurdities, except that of a community of goods," and was strongly obliged, having an income of £2,000 a year. The influence of the prophets speedily declined; but their proceedings left a stigma for a time upon the reputation of the Huguenot refugees settled in Britain. See Huggison, A Curious Account of the French and English Prophets, in London, 1814.
emitted from the Burning, by Samuel Keimer, who was one of the sect, and afterwards became a Quaker and came to America, professes to give an account of the French prophets "by one of themselves." The claims of the French prophets resemble, in some respects, those of the modern Irvingites (see English Review, ix, 22, 33). 3. VERSIONS OF THE HOLY SCRIPTURES.—I. We may gather from the conciliar edicts prohibiting the use of translations of the sacred books in the vulgar tongue that such existed as early as the beginning of the 13th century (Acta Concil. Toulouse, c. 14, ap. Marcellus, p. 889); these also served at the synod of Tarragona in 1224, and Beziers in 1246, and even as early as 1199, Pope Innocent III had heard that "evangelia, epistolae Pauli, moralia Job, et phræs aliis libros in Gallico sermone," were in use among the Albigenses (Epist. ed. Baluze, i, 482); but we are very much in the dark as to the character of the translations or the source whence they emanated. Writers on the Wal- densian Church assert the existence of translations in the Romance dialect possessed by that church anterior to the 12th century (Monastier, History of the Vandois, p. 73; Henderson, The Vanois, i, 447; The Romance of the Gospel of St. John, etc., Lond. 1849); but the evidence on which this advanced does not stand the test of a thorough scrutiny. In the Novela Legem, which contains the religious belief of that church, there are several citations of Scripture, but there is no evidence that these are made from any ex- tant version; and, at any rate, this work cannot be placed earlier than the end of the 12th or beginning of the 13th century (Hallam, Hist. of Literature, i, 26). Walter de Mage says that, during the pontificate of Alexander III (1159-1181), he was present at a synod at Cividale, where certain Waldensians presented to the pope a book written in the Gallic tongue, "in quo textus et glossa Psalterii plurimumque legis utriusque libros continebatur" (De Scriptu Car. p. 64, Camden Society ed.; Ussher, De Chr. Eccles. Success., in Opp. ed. Elrington, ii, 244); but it is doubtful whether any part of this was in the vernacular except the gloss, which in a translation would be of little use. That Peter Valdo himself possessed a vernacular translation of the Scriptures has been asserted; but, when examined, this tradition resolves itself into the fact that he requested a grammarian, Stephen de las Anas, to help him and had his attention to the curious text of the Gospels and other books of the Bible, "et auctoritates sanctorum;" but whether it was a "textus cum glossa," or "sententias per titulos congregate," the witnesses leave uncertain. From what Reimer says (ap. Ussher, l.c.), "Glossa de sanctis psalmis et psalmorum" by a certain "Testamenti textum docuit ecclesiasticus," the presumption is that no vernacular version existed, but that Valdo in preaching translated for his hearers, i.e., probably gave them the glosses which Stephanus had collected for him. Friehemius, however, expressly says, "Libros sacroscriptorum maximi Novi Testamenti sibi in linguam Gallicam fecit translati" (Ann. Hervigniana, anno 1100, i, 442). The MSS. of the Wal- densian versions preserved at Zürich, Grenoble, Dub- lin, and Paris are not of an earlier date than the 14th century, nor can the version they present claim any higher rank than has been given to it. The best portion of the Old Testament is from the MSS. of the N.T., and portions of the Old, existed among the so-called Sartories of the south of France from an early period does not admit of doubt, but we are not in circum- stances to say anything definite concerning them. Dr. O. C. Patau, in 1838, who had visited the South of France in 1835, was told by the priests of the south of the O.T. (together 7 vols. 8vo), the last portion being issued at Antwerp, in consequence of attempts on the part of the French clergy to prevent its appearance. Tradition ascribes this version to Jacques le Fevre d'Etiapes, who had before this distinguished himself by a Latin translation of Paul's epistles, and by exege- tical works on the Gospels and Epistles; and there is no them (Gisseler, Church Hist. iii, 409). In the north of France also we have some clear traces of vernacular copies of the Scriptures. A translation of the four books of Kings in the dialect of the north of France (langue d'Oïl) has been published (Paris, 1811, 4to) by M. Leroux de Lincy, who attributes it to the 12th century. M. Réau has examined and described in the Revue des deux mondes, i. 93, a Codex preserved in the library of that city, which contains in the same dialect, somewhat varied, the Pentateuch, Joshua, and Judges, with the Glossa ordinaria et interlinearis [see Gloss], and the rest of the historical books of the O. T., written in the dialect of that city, but without the gloss. As respects the translation said to have been made in the year 1250, for Louis IX, that of Du Vignier (cir. 1340), that of De Sy (1350), and that of Vaudecar (1372), we can say nothing more than that tradition asserts that such did once exist. Of translations of parts of Scripture, chiefly the Psalms, into the more modern French, a large number exist in MS., of which a copious list is given by Le Long in his Bibliotheca Sacra. At out the year 1380 a translation was undertaken by command of Charles V of France, by Raoul de Prailles, of which more than one copy has been extant. Le Long gives a specimen of the Codex containing it, with some extracts, by way of specimen, of the language; and there is another MS. of it in the British Museum, of which a full description is given in the Bibliotheca Landowskiana, p. 284 sq. This version in these codices does not go beyond Pro- verbs.

II. Emerging from these obscure regions of in- quiry, we come to those versions which have been printed, and of which it is possible to give a certain account.

I. That of Guiars des Moulines, an ecclesiastic of Picardy. Taking as his basis the Historio Scholastica of Peter Comestor, a digest of the Bible History with glosses, he freely translated this; adding a sketch of the history of Job, the Proverbs, and probably the other books ascribed to Solomon; substituting for Comes- tor's history of the Macabees a translation of this from the Vulgate, and in general conforming the whole more closely to the text of the Vulgate than Comestor had done. The Psalms, Prophets, and Epistles were not in the work as it first issued, and it is uncertain whether the Acts were not also omitted; all these, how- ever, were added in a later translation. The chief merit of this work, the most important of which, is at Jena. An edition of this Bible, as completed by different hands, was issued from the press by order of Charles VIII, about the year 1487, edited by the king's con- ciliars, and published at Lyons, in a quarto folio. Twelve editions of this, some at Paris and some at Lyons, appeared between 1487 and 1545. This is called La Grande Bible, to distinguish it from a work entitled La Bible pour les simples gens, which is a sum- mary of the history of the O. T., and of some of those editions which have been examined. Previous to the edition of 1487, an edition of the N. T., of the same translation as that found in the completed works of Guiars, but not by Guiars himself, was printed at Ly- ons by Barth. Buyer, fol., and edited by two Augustin- ian monks, Julien Macho and Peter Farget: it is un- dated, but is referred to the year 1478, and this seems to be the Edicta Principis of the French Scriptures.

2. In the year 1523 appeared at Paris, from the press of Simon de Colines, an anonymous translation of the N. T., which was often reprinted, and to which, Dr. O. C. Patau, in 1838, was told by the priests of the south of the O.T. (together 7 vols. 8vo), the last portion being issued at Antwerp, in consequence of attempts on the part of the French clergy to prevent its appearance. Tradition ascribes this version to Jacques le Fevre d'Etiapes, who had before this distinguished himself by a Latin translation of Paul's epistles, and by exege- tical works on the Gospels and Epistles; and there is no
reason to question the justice of the ascription. This version is made from the Vulgate, with slight variations in the N.T., where the author follows the Greek. The complete work appeared in one vol. fol., at Antwerp, in 1530, and again from the same types in 1532. It was placed in the papal Index in 1546; but in 1550 it was reissued at Louvain in fol., edited by two priests, Nisius and Jansen. Franz van den Veyt corrected the style, and struck out all that savored of what they deemed heresy. Of this corrected version many editions have been issued.

3. The first French Protestant version was prepared by Pierre Robert Olivieran, a relation of Calvin, and a relation, at that order, near Neuchâtel, in Switzerland, in 1535, fol. Of this edition very few copies remain. It was reprinted at Geneva in 1540, at Lyons in 1541, and, with a few emendations from the pen of Calvin, again at Geneva in 1545. In 1551 a thoroughly revised edition, with the addition of some of the apocryphal books by Beza, and a new translation of the Psalms by Budé, was issued at Geneva. It has often been reprinted since. An edition for the use of the Vaudois, and for which they subscribed 1500 golden crowns, was printed at Neuchâtel in 1556. This translation was on the O. T. in the Latin version of Santes Pagninus, and for the N. T. after the versions of Lefèvre and Erasmus. In its first form it was very imperfect, and even after the revival of Calvin, and the emendations of subsequent editors, it remained behind the requirements of an authorized version.

4. To remedy the defects of Olivetan's version, and to produce one more suited to the wants of the age, the Venerable Company of Pastors at Geneva undertook a thorough revision of the work, with the special aid of Beza, Gouart, Fay, etc., and under the editorial care of Cornelius Bertrand. This appeared in 1559. In this revision, 775,777, all that is in the other Protestant versions is rendered by a word equivalent to Lord, is throughout translated L'Éternel. Revised editions have been issued by the Venerable Company in 1568, 1712, 1726, 1803, and of the N. T. in 1833; the last two very much modernized in style. This claims to be the most elegant of the French versions, but it is far from being an adequate rendering of the original.

5. The Bible of Diodati, Gen. 1614; of Desmarets, Amst. 1609; of Martin, Utr. (N. T.) 1606, (Bible) 1707, 2 vols. fol.; of Roques, Basle, 1744; Osterwald, Amst. 1731, 2 vols. fol.; of Martin, Utr. 1744, are more revisions of Olivetan's text undertaken by individuals. Of these, Osterwald's is the most thorough, and may be viewed as occupying the place in the French Protestant Church of an authorized version, though Martin's is the one most esteemed by the more orthodox of its members, while that of Desmarets is sought by those who attach much value to fine paper and printing. A carefully revised edition of Osterwald's Bible, with parallels by the Rev. W. Mackenzie, has been issued by the French Bible Society, Paris, 1861.

6. Of a number of translations from the original by individuals may be mentioned that of Seb. Castillon (Castallo), 2 vols. fol., Basle, 1555, in which the translator aimed to impart classical elegance to the style, but which was universally regarded as neither conveying the just sense of the original, nor being in accordance with the Church litanies; that of Le Clerc, 2 vols. 4to, Amst. 1703, in the interests of Arminianism; that of Le Cene, published after his death in 2 vols. 4to, Amst. 1741, deeply marked by Socinian leanings; and that of Beausoleil and L'Enfant, 2 vols. 4to, Amst. 1718. This last is by much the best, and has been repeatedly reprinted.

7. Of Roman Catholic versions of the Bible, the first is that of René Bénoliel, a member of the theological faculty at Paris, which appeared in 1566. It was condemned by Pope Gregory XIII in 1573, and involved the author in much trouble because of its supposed Protestant leanings. It is, in fact, only a slightly altered transcript of the Geneva Bible. A revised edition, conformed to the Vulgate, was issued by the divines at Louvain. Four translations of the N. T. had appeared before this, viz. that of Claude Deville, 1618; that of Jacques Corbin, an advocate of Paris, 1643; that of Michel de Maréolles, abbé of Villebon, 1640, who corrected the style, and struck out all that savored of what they deemed heresy. Of this corrected version many editions have been issued.

8. In our own day several versions of the Psalms have appeared in France. A translation of the whole Bible from the Vulgate, by Eugene Geronde, in 28 vols. 8vo, appeared at Paris between 1809 and 1824. This has frequently been reprinted, and has excited much attention. Some of the journals have recommended it, while by others it has been no less severely criticised. The latest appearance in this department is the translation of the Gospels by La Memmio, 1846, the style of which is admirable, but the notes appended to it are in the interest of Socialism. But the most important work of this kind is undoubtedly the translation from the Hebrew of the O. T. by S. Cahen, La Bible: Traduction Nouvelle avec l'Hébreu en regard, etc. Par. 1822-39, 18 vols. 8vo. (Le Long, Bibliotheca Sacra; Simon, Huit. Crit. du N. Test. liv. ii; Brunet, Manuel du Libraire; Horne, Introduction vol. ii, 1825; Reuss, Gesch. des V. T. sec. 466, etc.; and in Herzog's Real-Encyclop. s. v. Romanische Bibelwerke.; Darling, Encyl. Bibl. ii, 99 sq.)

Fréret, Nicholas, a celebrated French scholar, was born at Paris February 15, 1688, and died in the same city March 8, 1749. He at first studied law, but abandoned it, especially for improving the knowledge of the languages, history, and religious systems of ancient and Oriental peoples. At the age of twenty-five he was admitted to the Academy of Inscriptions, and gave as his inaugural a discourse on the origin of the Franks, which, though favorably received by the Academy, and
vindicated in great part by the subsequent progress of historical research, was strongly opposed by the abbé Vertot, and led to Fréret's being sent for a short time to the Bastille. On his release he produced a long series of papers for the Academy of Inscriptions, with the object of throwing the university into disturbance, and engaging it in a bombastic and recherche. In treating mythology, he rejected the theory which traces back religious fables to historical facts [see Ezechiel], assigned to the historical element a secondary place, and thought that the Greeks had borrowed most of their divinities from the Egyptians and Egyptians. In the meantime, the school of the ancient Greek mysteries, which had adhered to the religions of the Celts, the Germans, the Hindus, the Chinese, the Persians, and the Romans, and was one of the first in France to prosecute the study of Chinese. Of his writings we name only those which belong more especially to the subjects contained in this work, viz.: Essai sur la Chronologie de l'Écriture Sainte (Histoire de l'Acad. tom. xxi.);—Observations sur les fêtes religieuses de l'année perse, et en particulier sur celle de Mithra, ainsi que sur les Persians que chez les Romans (Mem. de l'Acad. t. xvi.);—Reflexions générales sur la religion des Grecs, et sur l'existence du dieu dans l'Église (Histoire de l'Acad. tom. xxi.);—Recherches sur le Culte de Bacchus parmi les Grecs (Mem. de l'Acad. t. xii.);—La Nature du Culte rendu à Bacchus en Grèce aux époques, et particulièrement à l'Antiquité (Histoire de l'Acad. tom. xxi.);—Hist. des Cyclopes, des Décylies, des Thraciens, et des Persians (Histoire de l'Acad. tom. xxi.);—Les Fonds historiques de la fable de Bellerophon et de la maimère de l'Éadephe (Histoire de l'Acad. t. vii.);—Observations sur les médaillons par les âmes des morts (Mem. de l'Acad. t. xii.);—Observations sur la religion des Gaulois et sur celle des Germains (Mem. de l'Acad. t. xii.);—Ethologie du mot Druid (Histoire de l'Acad. t. xii.);—La Nature et les dogmes des peuples de Gaule historiquement démontrés (Histoire de l'Acad. t. xii.);—L'Usure des sacrificies humains révélée chez les différentes nations et particulièrement chez les Gaulois (Histoire de l'Acad. t. xii.);—Recherches sur les dieux Herm. Euculémoniaux et sur quelques autres antiquités ibériques (Histoire de l'Acad. t. ii.);—Les Assassins de Parce (Mem. de l'Acad. t. ii.);—Le Clerc de la Usure de la main d'or; and a collection of Fréret's works under the title Œuvres complètes, nouvel. édit. considérablement augmentées de plusieurs ouvrages inédits (Paris, 1766-99, 20 vols. 12mo.), but, despite its title, by no means a complete edition.

Fresco Painting, a method of painting with mineral and earthy colors dissolved in water upon freshly-plastered walls. As only so much can be painted in one day as can be executed while the plaster is wet, and as the colors become lighter on drying, fresco painting is very difficult of execution. As the wall dries, all the color that is applied is carried to the surface, and the artist is forced to work in a great hurry. But little retouching can be done. Fresco painting was carried to great perfection by the ancients. It was revi

Fresco, Johann Philipp, a German Lutheran clergyman, was born Oct. 22, 1705. After finishing his theological studies at the University of Strasl

burg in 1725, he became tutor of the young Rhinegrave of Salm-Gummbach. In 1727 he succeeded his father as pastor of Oberwiesen, and in 1728 became second "Bürgprediger" at Giessen. In the following year he also began to give exegetical and ascetic lectures at the university; and this, in 1730, brought him to see that the influence of the leading men of the day was more than a temporary one. In 1732 he was appointed professor of divinity. Fresenius enjoyed great reputation as a powerful preacher and experienced spiritual guide. From early youth he displayed a great zeal in the defence of Lutheran orthodoxy and of Lutheran preachers, frequently bringing himself into conflict with the leading preachers of the day, and was one of the first to denounce the vices of the clergy. In 1733 he wrote a work, "Amsteloligia", against a scrupulous pamphlet ("Friss Vogel der Steli") against Lutheranism by the Jesuit Weilingher, and produced thereby so great an excitement among Roman Catholics that a plan was made to kidnap him, with the aid of an Austrian army then stationed on the Rhine. He had to flee for safety to Darmstadt. In that city he caused the establishment of an institute for preachers, and became its director and inspector. In 1734 he opposed the efforts of the Reformed congregations to obtain the public exercise of their religion and the institution of a university. In this he was, in particular, a determined and even violent opponent of Count Zinzendorf and the Moravians. Zinzendorf regarded him as the most energetic opponent, and called him an "incarnate devil" ("eingefesselt gefluchten Teufel"). Some of his works are still in common use in the German Lutheran Church. Thus the Historische Betrachtungen über die Sowohl und Fütterungsverhältnisse, which first appeared in 1750, were published in a new edition in 1845 (2d ed. 1854) by Johann Friedrich von Meyer (q. v.), and of his Epitome prelicseni, first published in 1746, the second edition was issued in 1838 by Ledderose. His historical writings against the Moravians number 24 volumes ("Streitschriften gegen die Herrnhuter, Frankfurt, 1748-60").—Stetz in Herzog, Real-Encycl. xix, 501.

Fresen, Du. See Du Cange.

Frey, Jean Louis, a Swiss theologian and philologist, was born at Basel in 1682, and died in the same place in 1768. He is said to have been familiar with Hebrew at ten years of age. He was a pupil of Jean Buxtorf, under whom he studied Hebrew, Aramaic, Greek, Syrian, and Arabic. In 1703 he became a minister, and then travelled through Europe to increase his knowledge. In 1711 he was made professor of history and theology at Berne, and subsequently of Biblical exegesis, which chair he filled till his death. He was distinguished for the extent and variety of his knowledge. He left a considerable sum of money, and his own library of more than 8000 volumes, for the benefit of the library and students of the college at Basle. Together with other works, we have from him Disputatio ex qua moniana de Jean Chriost e societate, Basle (1703):—De Officio Doctoris Christiani dissertationes iv (1711-1715). He edited a corrected and enlarged edition of Suius' Theologiae Ecclesiastici (Amsterdam, 1728, 2 vols. fol.), an edition of J. Grynaeus' Opera, etc., and wrote most of the notes for the edition of the Patres Apostolici, published in Basel in 1742.—Hoefner, Nouv. Biog. Genr. xviii, 841-2.

Frey, Joseph Samuel Christian Frederick, was born in Germany of Jewish parents. At the age of twenty-five he became a Christian, and in 1810 came to the United States. He was then and for some years a Presbyterian minister, and subsequently a Baptist. But he never ceased to be a Jew in feeling, and was an enthusiastic votary of Rabbinical studies,
which influenced him as a Biblical interpreter. He
latter chaffed for the conversion of the Jews, was
agent of "The American Society for Alemorating
the Condition of the Jews" and edited a periodical called
_The Jewish Intelligence_. He died at Pontiac, Michi-
gan, in 1800, in the 79th year of his age. He was
the author of a "Narrative" of his life:—"Joseph and
Ben-
jamin," a comparison of the two branches of the Jews and
Christians;—_Judaah and Israel; or the Restoration of
Christianity_ (1837, 12mo);—_Lectures on Scripture Types_ (1841, 12mo).
He also published an edition of the Hebrew
Bible, a Hebrew Lexicon, Grammar, and Reader,
and _The Hebrew Student's Pocket Companion_. See
Stoddert, A. H. N. 14, 375. (E. S. C.)

_Frêya_, the goddess of the moon and love in the
Scandinavian mythology, was the daughter of Niord
and sister of Freyr, and is regarded by some as origin-
ally the same with Frigg (q. v.), to whom, among the
goddesses, she ranks next in power and honor. She
is described as beautiful, virtuous, gentle, and ever
ready to hear the prayers of men; as fond of music,
flowers, fairies, and the spring, and the source of in-
spiration of the love-songs of the scalds. In the myths,
which represent her, like Fiax, as seeking her absent
spouse (Odin), and as ranking next to Frigg, the
earth mother may have symbolized the relation of
the moon to the earth and the sun, and find an ex-
planation of those resemblances which have led to the
confounding her with Frigg. "She is always de-
scribed as attended by two of her maids" (see pl. 18,
fig. 4, _Mythology and Religious Rites_, in _Icon. Encyclo._).
The name of Friday, the sixth day of the week, is de-

erived from her. _Iconographic Enyclopedie, iv_, 276-90
(N.Y. 1851); Thorpe, _Northern Mythology_. (J. W. M.)

Freylinghausen, Johann Anastasius, an emi-
nent German Pietist theologian, was born at Ganders-
heim Dec. 2, 1670. He studied theology at Jena in
1695, and at Halle in 1692. In the latter place he gain-
ed the friendship of A. G. Francke, whose wife he
married in 1655 at Glauchau, a suburb of Halle. In 1715
he became Francke's son-in-law, his adjunct in the church of
St. Ulrich, and was afterwards made director of the
Waisenhaeuser (orphans house). He died Feb. 12, 1739. His
principal works are, _Grundlegung der Theologie_ (Halle, 1703, often reprinted)—_Predigten an
d. Sow u. Festtagenstelln_ (Halle, 1729)—_Baustreitungen_ (1734)—_he also published Geistliches Gesangbuch_, (Halle, 1704-1714, 2 vols.; last edit. 1741). Forty of his hymns are of his own composition, and some of
the hymns of them are translated in Miss Winkworth's
_University of Leipzig, 1673, and Feb. 7, 1757. He

Freyr, in the Scandinavian mythology, one of the
dynasty of the Vanir, or second class of gods, and
son of Niord, was, together with his father and sister Freya,
given as a hostage to the Asir, or first class of gods, who
adopted them, and bestowed on Freyr for a dwelling
the celestial castle of Afthrin. He was the god of the
sun and fruitfulness, to whom men paid the honoring sea-
s and peace, and was regarded as well disposed to
men. He was a patron of marriage, and the patron
god of Sweden and Iceland. His chief temple was at
Upasala, and sacrifices of men and animals were made to
him. His festival was at the winter solstice, and his processions
were a signal for the opening of the rites. The
mythology relates that Freyr, once mounting the Hlidskialf,
the lofty seat of Odin, whence everything on earth
was visible, beheld in the high north, where dwelt the
giants, the wondrously beautiful Gerda, the brightness
of the earth, who was arrayed in arms filled with air and
sea with light, and was so smitten with love for her that he
could neither eat, drink, or sleep. His parents, by means
of his faithful servant Skyrmir, found out the cause of
his malady, and, after much trouble, succeeded in
obtaining Gerda for his wife. Freyr is represented
 ICON. ENCYCLOP. MYTHOLOGY, and _Religious Rites_, pl. 18, fig. 3) with a halo around his head, and holding in
his right hand ears of wheat, and in his left an urn whence
water flows, with the boar Gullinbursti at his feet, and
riding a horse named Sleipnir (see pl. 11, fig. 6) standing at the left

drinking-horn in his left hand._Iconographic Encyclopedia_, iv, 270 (N. Y. 1851); Thorpe, _Northern Mythology_.
(J. W. M.)

Frier (lat. _Frater_, Fr. _frère_, brother), a term com-
mon to monks of all kinds, founded on the supposition
that there was a brotherhood between the persons of the
same monastery. It is especially applied to members of
the four mendicant orders, viz. 1. _Francis_, Mi-
norites, or Gray Friars; 2. _Augustines_; 3. _Dominicans_,
or Black Friars; 4. _Carmelites_, or White Friars. In
a more restricted sense, the word means a monk who is
not a priest: those in orders are generally denoma-
nated _father._

Frick, Albert, a German theologian, was born at
Ulm Sept. 18, 1714, and died May 30, 1776. He
studied at Leipsic, and was appointed assessor (judge)
at the faculty of theology. In 1748 he became minis-
ter at Jungingen, but, returning to Ulm in 1744, filled
the post of tutor to the professor of medicine. In 1751
he went to Münster as preacher, and in 1768 was
named head librarian. Among his writings are _Hist-
toria traditionum ex monumentis Ecclesiae Christiana_
(Ulm, 1740)—_De Natura et Constitutione THEOLOGIAE_ Catecheticae (Ulm, 1761-64, 4to)._—Hoefer, _Novae_._BIBL._
_Générale_, xvii, 971.

Frick, Elias, a German theologian, was born at
Ulm Nov. 23, 1673, and Feb. 7, 1757. He studied at
the gymnasium of his native city and at the universi-
ties of Leipsic and Jena, and in 1704 was pastor at
Bohringen, in 1708 pastor at Bermaingen, in 1712
preacher in Ulm, in 1729 professor of morals in the
gymnasium of Ulm, and also, in 1739, head librarian.
We have from him _De StuЯe pacis et beneficiorum omnium
ergy omnes_ (1704)—_Dis. i et ii de cura veteris circa
hernes_ (Ulm, 1704 and 1739), followed by his treatise
_Del Catechismatione veteris et recentioriae Ecclesiae:—Holl-
landische Wahrheit der Lehre vom heiligen Abendmahl_,
etc. (Ulm, 1726).—Hoefer, _Novae_._Bibl._ Générale, xvii, 971.

Frick, Johann, a German theologian, brother of the
present Albert, was born at Ulm Dec. 23, 1673, and
died March 2, 1739. After studying at the gymnas-
um of his native city he went to the University of
Leipsic, where he applied himself especially to theo-
logy, and at an early date took part in editing the _Acta
Eruditorum_. In 1698 he was named archdeacon of
Ilmenau, but, owing to bad health, could not perform
the duties. After his recovery he was appointed pas-
tor at Pfuhl. In 1701 he went to Münster as preac-
cher, and in 1712 was called to the chair of theology
there. His principal works are, _Grund der Wahrbir
von dem grossen Hauptunterschieden der evangelischen
and romisch-katholischen Religion_ (1707);—_Staatlich-
rechtu de Lutherean edocta, etc._ (Ulm, 1709, 4to)—_In-
elementia Clementis examinata_, etc. (Ulm, 1714)—_Dis-
bulis Unigentu, oder Clementis XI Constitution, etc._ (1714)—_Discur variolae de culpa schismatiso prot-
ometzias temperi impetuus_, etc. (Ulm, 1717, 4to).—_Zunum
in Clementis XI reditu_, etc. (Ulm, 1719, 4to).—
Nepi roy abyz, sim de Verbo isterno De Filio, ad pro-
emium Evangelii Joannis_ (Ulm, 1725, 4to)—_De Curn
Ecclesiae veteris circa Quoniam S, Scripturae et con-
scriptionem codicis purissimae_ (Ulm, 1729, 4to).—_Hoe-
fer, _Novae_._Bibl._ Générale, xvii, 899-70; _Ersch u.
Gaertner, Allgemeine Enyclopädie_, etc. (J. W. M.)

Friday is a day of fasting in the Greek and Latin
churches in memory of the crucifixion of Christ. It
FRIDEGODE - 666 - FRIEND

Is a fast-day in the Church of England, unless Christ-
mas-day happens to fall on a Friday.

Fridegode was a monk of Dover in the 10th cen-
tury, who was chosen by his patron, Odo, archbishop
of Canterbury, to write in heroic verse a life of St.
Wilfrid, when, in 956, the relics of that saint were
brought from Northumberland. (Vita Eowulfi, in Wharton's Anglia Sacra) says that
Fridegode was Oswald's teacher, and was thought to
excel the men of his time in secular and divine learn-
ing (Ang. Sac. ii, 193). His life of Wilfrid is merely
a poetic version of that by Editha Stephens, and so
abstracted a church history, with a few words that, as
related by William of Malmsbury (De cust. Pont. p. 200), it needed a sibyl
to interpret it. Malloini has published it in the Acta
Sanctorum, etc.; a part from an imperfect MS. at Corv-
el in Sec. iii. pars prima, p. 171-196, and the remain-
der from a MS. in England in Sec. iv. pars prima, p.
722-726. Several other works not now extant have
been attributed to Fridegode.—Wright, Biog. Brjt. Lit.
(Anglo-Saxon Period, p. 433-4). (J. W. M.)

Fridolin, Sr.—The history of Fridolin, written in
the 10th century by Valterus (Walter), a monk of
Säckingen, cannot, according to Rettberg, be consid-
ered as a purely historical source, but as the work of
learned Roman Catholics as an authority. The best
edition is contained in Mone's Quellenzusammenl. d. bät-
dischen Landesgeschichte. All our knowledge of him
is derived from this biography. The exact time of his
life even is unknown, but he is generally considered
as the first missionary of Chlodwig I. (A.D. 481-511).
According to this biography he was a Celt, but left the
British islands to escape the reputation he had gained by his
preaching. In Poitiers he brought back the people
and the clergy to the veneration of their St. Hilary,
whose relics he brought to light, and to whom he
erected a church. He is also said to have been the
first apostle of Germany. While seeking an island
in the Rhine which had been shown him in a vision
by Hilary, he came to Chur, or, according to others,
to Glarus, where he brought a dead man back to life;
in consequence, he is considered the patron of the
Canton, and is still represented on its coat of arms.
He finally found the island he sought between Schaffhau-
sen and Basel, and founded there a church to St. Hilary,
and the nunnerie of Säckingen, when, after the Rhine
had, at his request, moved to another bed (7), he died,
on the 6th of November, on which day he is recommem-
dated. According to Rettberg, this biography is a
legend invented for the purposes of establishing the
right of the convent to the whole island; and his
travels were imagined to give the divers churchers
erected to St. Hilary in different places a renowned
founder.—Herzog, Real-Encyclop. i, 655.

Friedländer, David, a Jewish scholar, was born
at Königsberg (Prussia) Dec. 6, 1749. The Reform
movement at Berlin, under the leadership of Mend-
elsohn (q. v.), attracted him to the Prussian met-
ropolis, and brought him into relations with Men-
delssohn. He devoted himself to educational and oth-
er reforms among the Jews, and at one time went so
far as to propose a union of the Jewish Church with
the Christian. In a Sendrachtbriefe addressed to the
Protestant clergyman Teller, he asked "how it might
be possible for a conscientious Jew to enter into Chris-
tian communion without making a profane confession."
The unfavorable reply which he received to this
inquiry, and the disapprobation with which it was
met from many Jews, caused him to abandon the proj-
et. Friedländer was a constant contributor to the
Bernische Monatschrift, and to the Sammler (a Jew-
isch periodical) published in Königsberg, by subscription, by dis-
ciples of Kant. Besides a number of works of infe-
rior merit, he translated the liturgies, and contributed
to Mendelssohn's great Bible work ("H. P. D. Das Buch
Koheloth", in Original mit d. hebräisch. Commentar
Mendelssohn's u. d. Uebers. David Friedländer's (Ber-
lin, 1772). He died at Berlin, Dec. 26, 1844.—Jost,
Gesch. d. Judenthums u. s. Secten, iii, 516; Biographie
Universelle, lviv. 518; Kitto, Cyclop. of Bib. Litt. ii;
Eutherode, Intro. to Bib. Litt. 477. (J. H. W.)

Friend, a term for one of our friends, with whom we esti-
tem above others, to whom we impart our minds
more familiarly than to others, and that from a con-
didence of his integrity and good will towards us; thus
Jonathan and David were mutually friends. Solon-
us, in his book of Proverbs, gives the qualities of a
true friend (Proverbs xlii, 15), among which is loving
him at all times, and with William of Malmesbury (De cust.
Pont. p. 200). It needed a sibyl to interpret it. Malloini has published it in the Acta
Sanctorum, etc.; a part from an imperfect MS. at Cor-
vel in Sec. iii, pars prima, p. 171-196, and the remain-
der from a MS. in England in Sec. iv, pars prima, p.
722-726. Several other works not now extant have
been attributed to Fridegode.—Wright, Biog. Brjt. Litt.
(Anglo-Saxon Period, p. 433-4). (J. W. M.)

—Ointment and perfume rejoice the heart, so does the sweet-
ness of a man's friend by hearty counsel; by such counsel the heart feels more exal-
ted, and the language of his inward and most serious thoughts.
The company and conversation of a friend is refreshing
and reviving to a person who, when alone, is sad, dull,
and inactive. 'Iron sharpeneth iron, so a man sharpen-
eth the countenance of his friend.' The title, 'the
friend of God,' is particularly given to Abraham, and the
phrase, 'he that is my friend, saith the Lord,' is not
thou our God, who gavest this land to the seed of
Abraham, thy friend, forever? And in Isaiah xii, 8,
'But thou Israel art the seed of Abraham, my friend.'
And the Scripture was fulfilled, which saith, Abraham
beloved God, and it was imputed to him for righteous-
ness; and he was called the friend of God' (James ii,
23). This title was given him, not only because God
frequently appeared to him, conversed familiarly with
him, and revealed his secrets to him, 'Shall I hide from
Abraham that thing which I do? (Gen. xviii, 17),
but also because he entered into a covenant of
perpetual friendship both with him and his seed.
Our Saviour calls his apostles 'friends,' 'But I have call-
ed you friends;' and he adds the reason of it, 'For all
things that I have heard of my Father I have made
known unto you' (John xvi, 15). As men use to com-
municate their counsels and their whole mind to their
friends, especially in things which are of any concern,
or may be of any advantage for them to know and un-
derstand, so I have revealed to you whatever is neces-
sary for your instruction, office, comfort, and salvation.
And this title is not peculiar to the apostles only, but
in common with them is given to those who do not
think it unreasonable to trust a true believer with the
affairs of the bridegroom, who does the honors of the wedding, and leads his friend's spouse to the
nuptial chamber. John the Baptist, with respect to
Christ and his Church, was the friend of the bride-
groom; by his preaching he prepared the people of the
Jews for Christ (John iii, 29). Friend is a word of or-
dinary salutation, whether to a friend or foe; he is
called friend who had not on a wedding garment
(Matt. xxii, 12). And our Saviour calls Judas the	traitor friend. Some are of opinion that this title is
given to this disciple by an irony, or an interrogative,
construing the contrary to what the word importeth; or
that he is called so because he appeared to others to be
Christ's friend, or was so in his own esteem and ac-
tount, though falsely, being a hypocrite. However,
is being spoken in the person of him who meant the
least, it is a title of honor for a usual assurance, and
that Christ, following the like courteous custom of
appellation and friendly greeting, did so salute Ju-
das, which yet left a sting behind it in his conscience,
who knew himself to be the reverse of what he was
called. This name of friend is like a friend to a
neighbor. 'Which of you shall have a friend, and shall
he go to him at midnight, and say, Friend, lend me
FRIENDLY ISLANDS

FRIENDS

Friendly Islands, "as distinguished from the Fiji Islands (q. v.), generally reckoned a part of them, are otherwise styled the Tonga Group. They stretch in S. lat. from 18° to 29°, and in W. long. from 172° to 176°, and consist of about 32 greater and 150 smaller islands, about 30 of which are inhabited. The great majority are of coral formation, but some are volcanic, and in the latter case, small cones arise among the corals. Two volcanoes are active, one on Tongatapu, the other on the island of Tonga, where Christianity had made much less progress than in Habaí and Vavaú, broke out in rebellion. Captain Croker, of the British ship Favourite, who happened to arrive just at this time, united the force under his command to that of king George, but was obliged to retreat to the colony. Twenty-three towns and villages were set on fire, about 5000 inhabitants, and the Ha Ii group, with about 4000. "The Friendly Islands were discovered by Tasman in 1643, but received their collective name from Cook. Both these navigators found the soil closely and highly cultivated, and the people apparently unprovided with arms. The climate is salubrious, but humid; earthquakes and hurricanes are frequent, but the former are not destructive" (Chambers, s. v.).

The first attempt to introduce Christianity was made in 1757, when captain Wilson, of the Duff, left ten missionaries and two houses on Tongataboo, and monastic cloisters, and a capacity of the missionaries. This attempt met with no success. The chief under whose protection they resided was murdered by his own brother, and the island involved in a civil war. Three of the missionaries were murdered by the natives; the others were robbed of all their goods, and in the course of a few months deserted. Even the bishop was murdered. The bishop's wife, and the bishop's son, with another missionary, were killed in the course of a man-of-war to chastise the king. George. The latter, however, succeeded in suppressing the revolt. In November, 1822, a French man-of-war arrived, the commander of which, captain Bolland, had been commissioned by the French governor of Tahiti to inquire into certain complaints lodged against the king by captain of a French whaler, and by the Roman Catholic priests residing in Tonga. The king obeyed the summons of the captain, went on board the man-of-war, and had a five-hour conversation with the captain, who declared himself satisfied with the reports made by the king, and in the name of the French government recognised him as the king of the Friendly Islands, only stipulating that the king should protect the French residents and tolerate the Roman Catholic Church. These conditions were accepted by the king. In 1848, paganism in the Friendly Islands was almost extinct. Great numbers of the Islanders can speak English, and, in addition, have learned writing, arithmetic, and geography, while the females have been taught to sew. The missions are still under the care of the Wesleyan Missionary Society, which in 1850 had in the islands 5 churches, 5 schools, and 8 preaching-places, 19 missionaries and assistant missionaries, 1886 subordinate paid and unpaid agents, 1763 members, 756 on trial for membership, 6017 scholars in schools, and 28,484 attendants on public worship.

Friends, Society of. This body of Christians now subsists in two main divisions, generally known to the public as the Orthodox and the Victorian; but these designations are not used by the bodies themselves. The former body is designated below as No. 1, and the latter as No. 2. The body is usually designated as the "Friends," and the latter body as the "Quakers," and the last is written by Samuel M. Janney, of Lincoln, Indiana, Va.

FRIENDS (No. 1). The organization of the Friends as a distinct society or church was not the result of any deliberate design to form a sect, but must be regarded as a providential ordering, and as a necessity growing out of the degradancy, corruption, and the lines which sects created the churches in the early part of the 17th century. They did not profess to establish a new religion, or claim to have discovered any new truth. Their object was the revival of primitive Christianity, which had been maintained through the centuries of the Christian Church by successive testimony to the truths of their faith. Many of them had no idea of the truth with their
blood, and been counted unto the Lord for a generation. Especially they were led to call the attention of the people to the Holy Spirit as the living and infallible guide, as a precious and glorious reality, essential to the Christian life, and sufficient to lead into true holiness and perfect peace of soul; for the gift of the Holy Spirit as a mere theory, or ignored the great truth that this unpeaksable gift proceeded from the adorable Giver, and was consequent upon the death and victorious sacrifice of him who for our sakes laid down his life upon Calvary. They always regarded the close connection of comfort and effect held in our Lord's words: "Tell you the truth; it is expedient for you that I go away; for if I go not away, the Comforter will not come unto you; but if I depart I will send him unto you." (John xvi, 7.) This truth George Fox began to teach and preach, not as an invention of his own, but as a priceless jewel thrown aside and hidden under the rubbish of dogmas and forms. The Divine Spirit asserted himself almost simultaneously in the hearts of many contemporaries, who were ready to respond to the preaching of Fox: "It is the very truth." Had the eagles, George Fox, the founder of the Society of Friends, pierced their hearts to the spirituality of the Christian religion, and yielded themselves to the Spirit's guidance, the Church would have been reformed, and Fox would have been satisfied. The religious awakening of this period was well described by the pen of Milton: "Thou hast sent out thy good Spirit upon all the earth to this effect, and stirred up their vows as the sound of many waters about thy throne. Every one can say that now certainly thou hast visited this land, and hast not forgotten the uttermost corners of the earth, in a time when men thought that thou was gone up from us to the farthest end of the heavens, and hadst left to do marvellously among the sons of these last ages." Christ the object of faith, the Spirit the transforming power, was the doctrine of the first Friends, as it has ever been that of their true successors. The divinity of our Lord was not called in question by the teachers of that day, whilst the guidance of His Spirit, the light of Christ in the conscience, was denied or ignored; and hence the prominence given to the latter truth, and the comparative silence respecting the other, in the controversial writings of the early Friends. George Fox, the founder of the Society of Friends, was born in 1624, and in 1647, after much deep experience of the blessedness of the Comforter, "even the Spirit of Truth which proceedeth from the Father," he went forth through England, on foot and at his own charges, freely preaching to the people the unspeakable riches which he had received for them, and was ready to give liberally to all who would ask for it, coming unto God by him. To the spiritual standard thus raised many flocked—ministers of various churches, sin-sick members of their flocks who had wandered unsatisfied upon "barren mountains and desolate hills," magistrates, rich men and poor, and "honorable women not a few." Eight years from the date last given, ministers of the new society preached the Gospel in various parts of Europe, in Asia, and Africa, and bore, with heroic endurance, persecutions through all the political upturnings, caused by the dominant Roman power in Rome, Malta, Austria, Hungary, etc. An authentic history of their sufferings was collected by Joseph Besse, and published, London, 1758, in two large folio volumes. The systematic interference by the state in matters of religion and conscience, which was the policy of England, was felt through all the political upheavals, causing shameless oppressions and wrongs to be perpetrated upon this peaceable and God-fearing people, three thousand four hundred of them at one time being incarcerated in filthy and unworthy prisons, where many of them died before the truth of the Spirit seemed to think of purchasing exemption from persecution by yielding, even in appearance, a point of principle.

and, whilst men and women were perishing in jails, even the little boys and girls would meet together at the places appointed, and in the beauty and sweetness of early morning, they worshiped the God of the Spirit in and truth. But not even childhood was sacred from religious intolerance and official interference. These babies in Christ (as truly they might be called) were disturbed at their worship, savagely threatened, and sometimes cruelly beaten. The early history of Friends is closely connected with that of George Fox, and necessarily included in the various biographies of that remarkable man. He commenced his career as a seeker after the truth, and meeting, in Europe and America, with many whose warnings were not similar, they were called Seekers. The epistle of Quakers was given in derision, because they often trembled under an awful sense of the infinite purity and majesty of God, and this name, rather submitted to than accepted by them, has become general as a designation. "To this man will I look," said the Holy Spirit of God, "for there is in him that poors of a contrite spirit, and trembles at my word." To tremble, then, at the presence of the God of the whole earth, and especially when speaking in his name, is not to be regarded as any reproach; but their name, as a body, is "The Religious Society of Friends." The spread of the society in North America, in fact, was the result of the founding of Pennsylvania in 1680 by William Penn, whose career as a wise legislator is prominent in history, and who, as a Christian philanthropist, a statesman, a writer, and a minister of the Gospel of Christ, established a reputation which even the vindictive attacks of Marcian could not undermine. As early as 1672 George Fox found an established settlement of Friends in Peruquins County, N. C., which proved the germ of an independent diocese, or Yearly Meeting, whose members from that time have been exemplary upholders, at the cost of persecution and much loss of sustenance, of the principles of civil and religious liberty, steadily testifying against slavery and war, and maintaining the freeness of the Gospel. During the War of the Rebellion their heroic firmness in refusing to bear arms was proof against cruel tyranny, so simple that the Alabama firing on the Rebels, about seven hundred thousand joined the society from conviction. The membership of that Yearly Meeting, although many times thinned by emigration to free states, is now about three thousand souls. The persecution of Friends in New England was so sanguinary that

"Old Newbury, had her fields a tongue,
And Salem's streets, could tell their story
Of faithful woman dragged along.
Gashed by the whip accursed, and purify,

and four Friends actually suffered martyrdom—a Quaker woman of remarkable refinement and piety, and three other Friends—caused to be hanged on Boston Common. The number of victims was likely to be increased, when proceedings were checked by a royal mandamus. The membership of the society becoming very widely extended, a formal organization by a system of Church meetings was adopted; the three ecclesiastical bodies being thus united, George Fox evinced much sagacity, mental soundness, and spiritual guidance in successful efforts to establish rules for the government of the Church, and meetings for discipline in a harmonious chain of subordination, which was under the highest worship of the Lord in meeting. The Yearly Meetings are. In a sense, diocesan, having each a defined territorial jurisdiction, and independent of each other in their government and law-
The Society of Friends is not at issue with other orthodox churches on the general points of Christian doctrine. Avoiding the use of the word Trinity, they reverently believe in the Holy Three: the Father, the Lord Jesus Christ, the only-begotten of the Father, by whom all things were made; the Holy Spirit, who is the mediator between God and man, and in the Holy Spirit, who proceedeth from the Father and Son—One God, blessed forever. They accept in its fullness the testimony of holy Scripture with regard to the nature and offices of Christ, as the Second Person of the Trinity, Messiah, the Word made flesh, the atonement for sin, the mediator between God and man, and the only mediator of the forgiveness of sins; they have no reliance upon any other name, no hope of salvation that is not based upon his meritorious death on the cross. The charge that they deny Christ to be God William Penn denounced as "most untrue and uncharitable," saying, "We truly and expressly own him to be so, according to the Scripture." As fully do they admit his humanity, and that he was truly man, "in sin only excepted." They so fully believe in the Holy Spirit of Christ, that without the inward revelation thereof they feel that they can do nothing to God's glory. They believe that the Lord Jesus Christ is the only mediator between God and man, and that he is enabled to bring forth fruits unto holiness, and to stand perfect in their present rank. As it was the design of Christ, in going to the Father, to send as a comforter his Spirit to his disciples, so it is with his Spirit that he baptizes and doth them, it being impossible, in the estimation of the Friends, that an outward ablation should wash from the spirit of man the stains of sin. Hence they attach importance only to "the baptism which now saveth," and which John the Baptist predicted should be administered by Christ. And it is by his Spirit, also, that his followers are enabled to partake of the true supper of the Lord: "Behold, I stand at the door and knock: if any man hear my voice and open unto me, I will come in and sup with him, and he shall sup with me." Thus they hold that the coming of the Lord Jesus Christ in the flesh was that of his Spirit, who is the central fact and central truth of the new system, and that types, and shadows, and all ceremonial observances, which had their place before as shadows of good things to come, now that they have been fulfilled in him, are only shadows of those shadows. The type is the property of the real, the reality of the type is the shadow of the reality. Hence the beforeshadowed; "but," says Paul (1 Cor. xiii, 10), "when that which is perfect is come, then that which is in part shall be done away."

Their view respecting the resurrection may be briefly stated in the language of one of the society's documents: "The Society of Friends believes that there will be a resurrection both of the righteous and the wicked; the one to eternal life and blessedness, and the other to everlasting misery and torment, agreeably to Matt. xxv. 31-46; John v. 25-50; 1 Cor. xv. 12-58. That God will judge the world by that man whom he has again raised from the dead, even Christ Jesus the Lord, who will render unto every man according to his works; to them who by patient continuing in well-doing during this life seek for glory and honor, immortality and eternal life; but unto the contentious and disobedient, to them which do not obey the gospel of God: wrath and indignation and tribulation and anguish upon every soul of man that sinneth, for God is no respecter of persons" (Thomas Evans).

They have ever regarded war as inconsistent with Christianity. For this they refer to the teaching of Christ and his apostles, the example of the early Christians, and to the witness for truth in their own con-
whilst there is an attendance of its meetings by non-
members of 8558. There are settlements of Friends
in France, Germany, Norway, and in several parts of
Australasia, which all make annual reports to London
Yearly Meeting, and acknowledge subordination to it.
In all these, there are a hundred or more, in proportion
to their population. There is a limestone in Irela
in Ireland, one in Canada, and nine in the United
States, viz., the Yearly Meetings of New England,
New York, Philadelphia, Baltimore, North Carolina,
Ohio, Indians, Western Indiana, and Iowa. The in-
crease of membership in the United States has been
rapid of late years, and settlements of Friends are
starting up in Kansas, Missouri, etc. The member-
ship of the society may be rated at 80,000.
In all these Yearly Meetings, First-day Schools are
conducted during the day. Many of them have been
in honor of pagan gods, preferring the numerical nomen-
clature adopted in the Scriptures. In dress they aim
at plainness and simplicity, avoiding the tyranny of
an ever-changing fashion. As a natural result, a de-
gree of uniformity of dress prevails among them, bear-
ing much resemblance, and exercising too great an
influence on the rise of the society. This approach to uniformity, which at
first was unintentional, came to be cherished as a hedge of
defence against worldly and ensnaring associations,
and a means by which they recognized each other.
The principles not in the tenets of a garb, but in the simplicity and the avoidance of changes of fash-
on. Were the customary patterns all abandoned to-
day, and the principle of simplicity still consistently
adhered to, the kaleidoscope of fashion would make
frequent changes in the people around them, and
Friends would be less peculiar in their appear-
ance as at present.
Whilst Friends, as good citizens, have cheerfully
paid all legal assessments for the support of public
schools and of the poor, and have contributed abun-
dantly to the various charities and general claims of
benevolence, be they in the nation or the province of
generosity, so their scrupulous care in relieving their own poor,
so that none of their members come upon the public for
maintenance or for gratuitous education.
A dangerous tendency to hold the truth in parts
led a portion of the society, in the early part of the
present century, into the error of inventing too great
upon the precious doctrine of Christ within the hope of
glory, and of denying, or at best holding lightly, a
belief in his true divinity whilst incarnate, and in the
atonement, cleansing, saving efficacy of his blood which
was shed for our sins. Nor were the truths of love, calling, sanctifying, and footing
in the society, to the grief of those who held the
ancient faith, and in 1827 an extensive and much-to-be-
resented secession occurred, in which doctrinal and
personal considerations were mingled; and, in the ex-
citement of the division, it is believed that many failed
to comprehend the true issues, and that not a few who
were essentially one in faith were discovered for life as
regards church fellowship. Thus two entirely distinct
societies now exist, each claiming exclusive right to
the same name, and causing confusion among other
professors as to their identity. In this secession por-
ticipated six of the ten Yearly Meetings then existing by
joined with the body popularly designated by the
name of their leader (though they have never acknowl-
edged the title). In Great Britain and Ireland, and in
two of the American Yearly Meetings then existing,
no schism occurred.
There are thirteen independent Yearly Meetings of
the Religious Society of Friends. The oldest of these
is that of London, the records of which are preserved
from the year 1672. This body is regarded by the
others with respectful affection as the mother of Yearly
Meetings, and its General Epistle of Christian Coun-
sel, which is issued annually, is gladly received, repub-
lished, and circulated by nearly all the co-ordinate
bodies. The number of members in England is 15,458,
In the year 1827 a schism took place in Philadelphia Yearly Meeting, which afterwards extended to most of the other Yearly Meetings in America. The space allotted for this article will not suffice to give an intelligible account of it (see Janney’s List of Friends, vol. iv. The part relating to the separation has been republished in a small volume by T. W. Good Zell, Philadelphia). At the time of the separation, those who took the name of Orthodox Friends were in the Western States the more numerous; but in the Atlantic sea-board States they were less numerous than those who are by some called Hickites, but who persistently refuse to be known as or other name than that of Friends or Quakers. It is of this branch only that we now treat.

11. Doctrines.—We hold the doctrines of the early Friends, as expounded in the writings of Fox, Penn, Pennington, and Barclay. A committee which represents Philadelphia Yearly Meeting has recently so far approved of a “Summary of Christian Doctrines,” from which the following abstract is taken, as to order its purchase for distribution:

The Scriptures.—The Religious Society of Friends, from the beginning of their existence, till the present day, has maintained its belief in the authenticity and divine authority of the Holy Scriptures, referring to them for proof of its principles, and acknowledging them to be the only fit outward test of Christian doctrines. We do not call them the Word of God, because this appellation is suited to the Scriptures that Eternal Jehovah, the Power by which the worlds were made; for “In the beginning was the Word, and the Word was with God, and the Word was God.”

We assign to the Scriptures all the authority they claim for themselves, which is chiefly expressed in the following texts: “Whencever things were written aforetime were written for our learning, that we, through patience and comfort of the Scriptures, might have hope” (Rom. xv, 4). “The holy Scriptures are able to make wise unto salvation, through faith which is in Christ Jesus” (2 Tim. iii, 15-17). “All Scripture given by inspiration of God is profitable for doctrine, for reproof, for correction, for instruction in righteousness, that the man of God may be perfect, thoroughly furnished unto all good works” (Barclay’s Apology, prop. iii, § 5).

In its use, according to our several Yearly Meetings, the Scriptures are very frequently and earnestly recommended to the attention of our members. In the year 1854, Philadelphia Yearly Meeting, after referring to “those sublime truths which are recorded in the Holy Scriptures,” thus continues: “In these invaluables, in the only authoritative record of the early history of our race, the purest strains of devotional poetry, and the sublimi discourses of the Son of God. Their frequent perusal was therefore especially urged upon our younger members, who were encouraged to seek for the guidance of divine grace, by whose alone we realize in our experience the saving truths they contain.”

In the year 1863, the following minutes of Baltimore Yearly Meeting was sent down to its subordinate meetings, viz.: “We have been reminded that this Yearly Meeting has had various times written to its members inviting them to the frequent reading of the Holy Scriptures, the authenticity of which has always been acknowledged by the Society of Friends.

• We believe it is not the part true of wisdom to dwell upon defects, whether real or imaginary, in the sacred records, but rather to use them as they were intended, ‘for reproof, for correction, for instruction in righteousness,’ remembering that it is only through the operation of the Spirit of Truth upon our hearts that they can be made availings to us in the promotion of our sal-

The following extract is taken from the Rules of Discipline of the Yearly Meeting of Friends held in Philadelphia: “If any in membership with us shall blaspheme, or speak profanely of Almighty God, Christ Jesus, or the Holy Spirit, he or she ought early to be tenderly treated with for their understanding, that they may experience repentance and forgiveness; but should any, notwithstanding divine grace, continue in their error, or deny the divinity of our Lord and Saviour Jesus Christ, the immediate revelation of the Holy Spirit, or the authenticity of the Scriptures; as it is manifest they are not one in faith with us, the monthly meeting where the party belongs, having extended them due care, shall, by the help of the Lord, deliver the individual without effect, ought to declare the same, and issue their testimony accordingly.”

Immediate Revolutions.—The highest privilege granted to man is that of entering into communion with the Author of his being. “Ye are the temples of the living God,” writes the apostle Paul; “as God hath said, I will dwell in them, and walk in them, and I will be their God, and they shall be my people” (2 Cor. vi, 16).

“The anointing which ye have received of him;” says the beloved disciple, “abideth in you, and ye need not that any man teach you.” “He that teacheth thee to despise thy own soul, and teacheth thee of all things, and is truth, and is no lie. and even as it hath taught you, ye shall abide in him” (1 John ii, 27).

In the ordering of divine Providence, instrumental means are often employed to convey religious truth, such as the inspiration of the Scriptures that Eternal Jehovah, the Word, and the vicissitudes of life; but in all cases the good effect is from the immediate operations of divine grace upon the heart and conscience. In fact, there can be no saving knowledge of Christ but from immediate revelation. “No man can come to me,” says Jesus, “except the Father which hath sent me draw him.” This drawing of the Father is the operation of His Spirit, for “the manifestation of the Spirit is given to every man to profit withal” (1 Cor. xii, 7). To the wicked he comes as a reprover for sin, a spirit of judgment and a spirit of burning, “but to the praying and sober-minded, a spirit of power and of love and of a sound mind” (2 Tim. i, 7).

The original and present state of man.—It is a scriptural doctrine that neither righteousness nor unrighteousness can be transmitted by inheritance, but every man shall be judged according to his deeds. The language of the prophet Ezekiel is apt on this point. “As I live, saith the Lord God, ye shall not have occasion any more to use this proverb in Israel.”

. . . ”The fathers have eaten sour grapes, and the children’s teeth are set on edge.” . . . “Behold, all souls are mine; as the soul of the father, so also the soul of the son is mine; the iniquity of the father shall be imputed unto the son.”

“The son shall not bear the iniquity of the father, neither shall the father bear the iniquity of the son; the righteousness of the righteous shall be upon him, and the wickedness of the wicked shall be upon him” (Ezek. xviii, 3-20).

Man was created in the image of God; he was pure, benevolent, and blissful, and he enjoyed the privilege of communion with God, that is, to partake of “the tree of life which is in the midst of the paradise of God” (Rev. ii, 7). But, although he was made a free agent, he was debarred to be so independent of God as to know of himself good or evil without divine direction. And when he presumed to set up his own will, and to be governed by it in opposition to the divine will, he became under the Holy Spirit, he ceased to partake of “the tree of life, and the tree of the knowledge of good and evil.” Then he experienced the fulfillment of the divine prediction. “In the day thou eatest thereof thou shalt surely die;” for “to be carnally minded is death, but to be spiritually minded is life and peace.”

Animal propensities may be transmitted from parents to children; but the Scriptures do not teach that we inherit any guilt from Adam, or from any of our
ancestors; nor do we feel any compunction for their sins. The language of our Saviour clearly implies that little children are innocent, for “of such,” he says, “is the kingdom of heaven.”

The Divine Being.—The unity, omnipresence, omnipotence, and omniscience of God, the only fountain of wisdom and goodness, are fully set forth in the Scriptures of both the Old and the New Testament. He declares by the mouth of his prophet, “Thus saith the Lord, The Holy One of Israel, his Maker.” “... I, even I, speak in righteousness, dealing promise to them that hear.” “Thus saith the Lord, your Redeemer, the Holy One of Israel” (Isa. xliii, 11, 14). These declarations are reiterated and confirmed in the New Testament. “Jesus answered, ‘The first of all the commandments is, ‘Hear, O Israel, the Lord our God, the Lord is one; and thou shalt love the Lord thy God with all thy heart, and with all thy soul, and with all thy mind.’” (Mark xii, 29).

That spiritual influence or medium by which the Most High communicates his will to man is called his Word, and the same term is applied to his creative power, by which all things were made. The unity of the Eternal Word, or Logos, with God, may be illustrated by the light which emanates from the sun; for “God is light,” and of Christ it is said, “In him was life, and the life was the light of men.” The connection between the great luminary of the solar system and the light proceeding from him is so perfect that we cannot separate one from the other. So it is with the relation between the Eternal Word, which was in the beginning with God, and was God, it is a manifestation of his wisdom and power, being called in the Old Testament “The angel of his presence” (Isa. lxiii, 9), “The Redeemer of his people;” and in the New Testament, “The Son of God, by whom all things consist.” (Heb. i, 3).

The term Christ was also applied by the apostles to the Spirit of God as manifested in men. For instance, Paul writes of the children of Israel under Moses, “They did all eat the same spiritual meat, and they did all drink the same spiritual drink; for they drank of the spiritual rock that followed them, and that rock was Christ” (1 Cor. x, 4). Peter says that the prophets “prophesied of the grace that should come unto you, searching what, or what manner of time the Spirit of Christ which was in them did signify, when it testified beforehand of the sufferings of Christ and the glory that should follow” (1 Pet. i, 11).

The most full and glorious manifestation of the divine Word, or Logos, was in Jesus Christ, the immaculate Son of God, who was miraculously conceived and born of a virgin. In him the manhood or son of man was united with the divinity or the Son of God, with the flesh, or was manifested in the flesh. “He took not on him the nature of angels, but he took on him the seed of Abraham.” “... Of whom, as concerning the flesh, Christ came, who is over all, God, blessed forever.” Being “in all points tempted like as we are, yet without sin,” he was an example to all succeeding generations, “a man approved of God by miracles, wonders, and signs which God did by him.” The intimate union between Christ and his Church is illustrated in the epistles of Peter and Paul by two simultaneous and mutually having many members, of which Jesus Christ is the head; and only one temple, of which he is the chief corner-stone. The holy manhood of Christ, that is, the soul of him in whom the Holy Spirit dwelt without measure, is new, and always will be, the head, or chief member of that spiritual body, and as such it will be the faithful servants of God of all ages and nations.

“‘There is one God, and one Mediator between God and men, the man Christ Jesus’” (1 Tim. ii, 5). As Moses was a mediator to ordain the legal dispensation, so Jesus Christ was and is the Mediator of the new covenant, first to proclaim and exemplify it in the day of his outward advent; and, secondly, through all time, in the ministration of his Spirit.

“The Spirit itself maketh intercession for us with groanings which cannot be uttered. And he that searcheth the hearts knoweth what is the mind of the Spirit, because he maketh intercession for the saints according to the will of God” (Rom. viii, 26).

When the apostles went forth preaching Christ and his spiritual kingdom, which was attributed to his name or power their wonderful success. Acts ii, 32, 33; iv, 10, 11, 12: “This is the stone,” said Peter to the rulers, “which was set at naught of you builders, which is become the head of the corner. Neither is there salvation in any other: for there is none other name under heaven given among men whereby we must be saved.”

Salvation by Christ.—The great work of the Messiah for the salvation of man is beautifully portrayed in the passage which he read from Isaiah in the synagogue at Nazareth (Mark ii, 23). “The Spirit of the Lord is upon me, because he hath anointed me to preach the Gospel to the poor; he hath sent me to heal the broken-hearted, to preach deliverance to the captives, and recovering of sight to the blind, to set at liberty them that are bruised, to preach the acceptable year of the Lord” (Luke iv, 18, 19). He came to establish a spiritual kingdom of truth and love in the hearts of mankind, and thereby to put an end to the kingdom of evil. A work of reformation was then begun which has not ceased to this day, though often obstructed and retarded. To this work the Lord Jesus came, and the Christian generations have built, and no moral reform of any value or permanency can take place unless it be founded on Christian principles.

Another prophecy of Isaiah is referred to by the evangelist Matthew as having been fulfilled by the miracles of Christ. He says, “When the even was come they brought unto him many that were possessed with devils, and he cast out the spirits with his word, and healed all that were sick;” that it might be fulfilled which was spoken by Esaias the prophet, saying, “Himself took our infirmities and bare our sicknesses” (Matt. eight, 17). As part of the outward relation he took away the infirmities of the people and healed their sicknesses, so in the inward and spiritual relation he heals the maladies of the soul, and raises it from death in sin to a life of righteousness.

The great object of the Messiah’s advent is thus declared by himself: “To this end was I born, and for this cause came I into the world, that I should bear witness unto the truth. Every one that is of the truth heareth my voice” (John xviii, 20). He could not bear witness to the truth among that corrupt and perverted generation without suffering the same fate. The Word took the flesh, that is, was manifested in the flesh. The Word planted the kingdom, and the kingdom grew, so that they would put him to death, and he went forward calmly doing his Father’s will, leading a life of self-sacrifice, wounded for the transgressions of the people, baptized spiritually in suffering for them, and finally enduring on the cross the agony of a lingering death, thus sealing his testimony with his blood. His obedience in drinking the cup of suffering was acceptable to God, for “he hath loved us and hath given himself for us, an offering and a sacrifice to God, for a sweet-smelling savour” (Eph. v, 2).

It was requisite to man to God by removing the enmity from (man’s) heart that Jesus Christ lived, and taught, and suffered, and for this purpose the Spirit of Christ is still manifested as a Redeemer from the bondage of corruption. Hence the apostle says, “God was in Christ reconciling the world unto himself, not imputing their trespasses unto them, and hath committed unto us the word of reconciliation.”... “We pray you, in Christ’s stead, be ye reconciled to God” (2 Cor. v, 19, 20). It is in man that the change must be wrought and the reconciliation effected, for there can be no change in Deity.

“If, when we were in the flesh, we walked [in] the manner of Paul, ‘we were reconciled to God by the death of his Son, much more, being reconciled, we shall be saved by his life’” (Rom. v, 10); for “in him was life, and the life was the light
of men” (John i, 4). It is the life of God, or spirit of truth revealed in the soul, which purifies and saves from sin. This life is sometimes spoken of as the blood, according to the Mosaic law, “the blood is the life.” And when Jesus told the people, “Except ye eat the flesh of the Son of man, and drink his blood, ye have no life in you,” he alluded to the life and power of God which dwelt in him, and spake through him. In the next verse, he said to his disciples, “It is the Spirit that quickeneth; the flesh profiteth nothing; the words that I speak unto you, they are spirit and they are life.”

It is obvious that the sinner cannot come into a state of concord with God until the sinful nature is re- moved; and nothing can remove anything but the baptism of the Holy Spirit. The dealings of the Most High with the children of men are beautifully exemplified in the parable of the prodigal son, who had wandered far from his father’s house, and spent his substance in riotous living. When he came to himself, and determined to go back, confessing his sins, and offering to become as one of the hired servants, his father did not stand off and order him to be punished, neither did he lay his punishment upon the other son who had been faithful; but his compassion was awakened by his penitent repentance. He not only spared him, but also took him upon himself, and “while he was yet a great way off he ran and fell on his neck, and kissed him.” The conduct of the parent, as represented in this parable, answers exactly to the divine character, and corresponds entirely with the character of Jesus Christ, who was filled with the Spirit, and said, “the scripture is not read of me as pertaining to me.” But the doctrine taught by God cannot, or will not forgive sins without a compensation or satisfaction, and that man, not being able to make this satisfaction, it was made by Jesus Christ, who was appointed or given up to be killed for this purpose, is so inconsistent with the divine character, that it cannot be reconciled with the teachings of the Son of God. It appears to deprive the Deity of that infinite love which is his most endearing attribute; and if a human parent were to act upon the same principle towards his children, we could not justify his conduct.

When the sinful nature in man is slain by the power of God being raised into dominion in us, then is divine justice satisfied, for there is nothing vindictive in the character of the Deity. He does not afflict his creatures for any other purpose than their own reformation or purification, and, when that purpose is accomplished, he is ready to pardon and bless the children. The only sure ground of acceptance is the new birth; for, when Christ’s kingdom is established within us, then his righteousness becomes ours; not by imputation, but by our becoming really “partakers of the divine nature” (2 Pet. i, 4). “Not the works of righteousness which we have done, but according to his mercy he saved us,” by the washing of regeneration and renewing of the Holy Ghost, which he shed on us abundantly, through Jesus Christ our Saviour” (Titus iii, 5).

Baptism and the Lord’s Supper.—Friends believe that the “washing of regeneration and renewing of the Holy Ghost” is the only baptismal essential to salvation. “There is one Lord, one faith, one baptism, one God and Father of all, who is above all, through all, and in you all” (Eph. iv, 5, 6). The baptism of Christ was a washing of the body, and as spiritual, as may be shown by the following texts: Matt. iii, 11, 12; Acts i, 5; xviii, 25, 26; 1 Cor. xii, 13; vi, 11; Col. ii, 20, 23; 1 Pet. iii, 21. We have no grounds to believe that “the passover” which Jesus ate with his disciples was intended to be perpetuated in the Christian Church; nor does it appear that he instituted a new ceremony on that occasion. He conformed to the Mosaic law, which was not abrogated until his crucifixion, when he blotted out the handwriting of ordinances, and “took it out of the way, nailing it to his cross” (Col. ii, 14). “Behold, I stand at the door and knock,” says Christ; “if any man hear my voice, and open the door, I will come in to him, and will sup with him, and he with me” (Rev. iii, 20). The Lord’s Supper, in which the new wine of the kingdom and the bread of life are distributed to sustain the soul.

Worship, Discipline, etc.—The author of Christianity has prescribed no set form of worship, enjoining only that it must be in spirit and in truth. Friends have adopted silence as the basis of public worship, believing that it is free from the objections that exist against all prescribed forms; that it gives to each worshipper an opportunity for self-examination and secret prayer, with the benefit that results from the sympathy of other minds present; and that it affords the best preparation for the exercise of spiritual gifts in preaching or praying.

The Christian ministry can be rightly exercised by those only who have received a call and qualification from the Head of the Church, and the prophecy of Joel, quoted by Peter, is fulfilled under the Gospel: “It shall come to pass in the last days, saith God, I will pour out of my Spirit upon all flesh, and your sons and your daughters shall prophesy.” As it was in the primitive Church, so it is now in the Society of Friends, women as well as men are permitted to preach the Gospel. No salary or pecuniary compensation is allowed to them; but those who travel in the service of the Gospel may partake of the needful hospitality or assistance of their friends.

Testimonies.—The testimonies of Friends against war, slavery, oaths, lotteries, and the use, as a beverage, of intoxicating drinks, as also against vain fashions, corrupting amusements, and flattering titles, are founded on Christian principles, and have been found salutary in practice.

Discipline.—The system of Church government existing in this society is in accordance with the doctrine, “One is your Master, even Christ, and all ye are brethren.” There is no distinction like that of clergy and laity, but all the members of both sexes have a right to participate in the deliberations and decisions of the body. In meetings for discipline the men and women meet in separate apartments, and are co-ordinate branches of the body, each transacting the business pertaining to its own sex; but, in some cases, when needful, they act in concert, by the appointment of joint committees of men and women. The co-operation of women in the administration of discipline has been found salutary in many respects, but especially in promoting among them self-reliance and dignity of character.

Statistics.—We have six Yearly Meetings, connected by epistolary correspondence, but independent of each other in regard to discipline. The aggregate membership of these is about 35,000.

Large numbers of persons not members, but who affiliate with us in religious profession, regularly attend our meetings and public worship.

We have, in the cities of New York, Philadelphia, Baltimore, and Richmond, Indiana, extensive and well-sustained schools, adapted to a high standard of useful and practical education. There are also numerous schools of varied character throughout the Yearly Meetings.

Swarthmore College, situated about eight miles south-west from Philadelphia, on the line of the Western Railroad, is designed for three hundred pupils of both sexes. Here our children, and those instructed to our charge, may receive both a thorough collegiate education, under the guarded care of members of our religious society. (S. M. J.)

FRIENDS, PROGRESSIVE. A religious society organized in 1858, in Chester County, Pa., as a result, in part, of a division in Kennett Monthly Meeting of Friends ("Hickites"). The division was caused by differences of opinion upon questions of reform and
progress; the official members of the Society of Friends generally discouraging activity in temperance, anti-slavery, and other social organizations, which a large proportion—in many localities a majority—of the laity were warmly in favor of co-operating with them. After years of contention, the two parties in Kennett Monthly Meeting fell asunder, and finally, in 1868, an association was organized under the name of "Pennsylvania Yearly Meeting of Friends." The new society opened its doors to all who recognized the equal brotherhood of the human family, without regard to sex, color, or condition, and who acknowledged the duty of defining and illustrating their faith in God, not by assent to a creed, but by lives of personal holiness and unselfishness. It disavowed any intention or expectation of binding its members together by agreement as to theological opinions, and declared that it would seek its bond of union in the identity of object, oneness of spirit in respect to the practical duties of life, the communion of soul with soul in a common love of the beautiful and true, and a common aspiration after moral excellence."

It disclaimed all disciplinary authority, whether over individual members or local associations; it set forth no forms or ceremonies, and made no provisions for the solution of questions of discipline as distinguished from the laity; it set its face against every form of ecclesiasticism, and denounced as the scum of superstitious imposture the claim of churches to hold an organic relation to God and to speak by his authority, maintaining that such bodies are purely human, the repositories of false creeds, and the distinguishing marks by which the members of the religious society are distinguished from the laity; and, during a large portion of every year, maintains a First-day School for children. This local body has never employed a religious teacher, though there is nothing in the principles of the organization to forbid such a step whenever its members may think it necessary or expedient.

The Uniformity of practice in this respect is neither expected nor desired, it being held that the arrangements for meetings should be in every case adapted to the peculiar needs and tastes of the communities in which they are held. The division in the Society of Friends was not confined to Kennett Monthly Meeting, but spread to other Yearly Meetings of that denomination.

As early as 1849, that division led to the organization, at Green Plain, Ohio, of a society exactly similar to that of the Progressive Friends, but under a different name. This society is now extinct. At June, near Watertown, N. Y., in the same year, a society called "Congregational Friends" was formed. This society afterwards took the name of "Progressive Friends," and, at a later day, that of "Friends of Human Progress," by which it is still known. In Salem, Columbiana County, Ohio, in 1852, a society called "Progressive Friends" was organized, which had but a brief existence. In North Collins, Erie County, N. Y., there is a society bearing the name of "Friends of Human Progress," which, in its principles, is very similar to the "Progressive Friends." (O. J.)

Friends of God. In the 14th century a spirit of mysticism, or spirituality of life, began to manifest itself in the Low Countries to the very borders of Italy. It brought under its influence all ranks and classes, and led ultimately to the formation of an extensive but unorganized brotherhood, the so-called Friends of God. A Yearly Meeting ofProgressive Friends was organized, which had but a brief existence. In North Collins, Erie County, N. Y., there is a society bearing the name of "Friends of Human Progress," which, in its principles, is very similar to the "Progressive Friends." (O. J.)
the gulf of pantheistic self-delusion." And that this gave rise to "the wild, fanatic, pantheistic mysticism, which was for getting beyond Christ, beyond all positive calm reflection, "was unequaled in the divine, amok, see it exemplified particularly among a portion of the so-called Beghards (q. v.) . . . and the so-called Brothers and Sisters of the Free Spirit (q. v.). Among those of the Friends of God who by unwise speculation, and by an intoxication of self-forgetting love discarding all calm reflection, "were unconfessedly rayed into effusions and expressions upon which that wild, fanat- cal pantheism afterwards seized and fastened itself," is reckoned Master Eckhart (q. v.), from whose writings and sermons twenty-six propositions connected with a pantheistic mode of thinking — the divine vapors in such a mode of thinking, had been drawn, were formally condemned. But he promptly retracted all those propositions which were found to be heretical or scandalous, » and in general submitted himself to be corrected by the pope and the Church. These "pan- theistic and theistic views and spiritual opposition by Ruybroek (q. v.) and by Tauler. The former especially secured himself against the danger of pantheism by the prominence he gives to the will, "which he describes as the main-spring on which all development of the higher life depends." Another of the leading preachers of the divine life was the Italian monk Heinrich Suso (q. v.), of Swabia, who, like Tauler, gave "proclamations to the medication of Christ as necessary to the attaining to true communion with God, and was thus distinguished from those pantheistic mystics who, notwithstanding the mediation, were for sinking directly into the depths of the divine essence." Many of the leaders of the Friends of God were put to death by order of the Inquisition on the charge of being Beg- hards. Among those were Nicholas of Basel and two of his associates, Martin of Reichenau, and a Benedictine, Master Adam von Thurning. Milman (History of Christianity, p. 486) says that the influence of the doctrines taught by the Friends of God, especially of Tauler and his followers, were "seen in the earnest demand for re- formation by the councils; the sudden estrangement, notwithstanding the reunion to the sacramental yoke, during the Reformation; the dispensing from the spiritual life, and reformation by the councils seemed hopeless;" and that it is especially "seen in the remarkable book German Theology, attributed by Luther to Tauler himself, but doubtless of a later period." — Neander, Church History, v. 390; Herzog, Real-Encyclopädie, 2, 139; Schrock, Geschicht des Zehn Jahrhunderts (Jena, 1865); Pfeiffer, Deutsche Mystiker des 14 und 15 Jahrh.; Mil- man, Latin Christianity, vili, 800; Kurtz, Church Hist. i, 484; Bennet, in Methodist Quart. Rev. Jan. 1869, p. 45 sq.; Theologia Germannca, edit. by Dr. Pfeiffer and transl. by Susanna Winkworth. (J. H. W.)

Friends of Light. See Free Congregations.

Fries, Jacob Friederich, an eminent German, philosopher, was born at Barby August 28, 1773. He was at first private tutor in Switzerland, became professor of philosophy in 1804, then successively professor of mathematics at Heidelberg in 1806, and of the theoretical philosophy at Jena in 1816. In 1819 he was deposed for political reasons, but restored in 1824 as professor of natural philosophy and mathematics, and died there August 10th, 1848. The personal religious life and its influence have left a Heritage in his writings, not a heritage of his father. He was a Moravian, but died when the son was only five years old. The school education to which he was subjected seems to have estranged him from Christianity when quite young. While yet a young man, he wrote: "The essence of God's imagination and supposi- tion have changed my religious sentiments. All the religious system in which I was bred has been over- thrown; but this causes me no un easiness. It was easy for me to throw the atonement overboard; I have never had any dread of God; the thought of the Holy One has always been to me a thought of peace." In 1793, when his mother died, he wrote: "The belief in a reunion I leave to others; I am not plantastic enough to hold by it since 1806 we are still a Moravian brother: "My peace cannot compare with yours; the deserted Penates will probably punish me for a long time yet." A sketch of his life has recently appeared, by E. L. D. Henke, J. F. Fries aus seinem mutterschlichen Nachlass dargestellt (Leipzig, 1867, 5vo).

The profound aim of Fries in philosophy was to give a firmer basis to Kant's system than that philosopher himself had laid down. "He found two faults with Kant: 1st. The vicious logical arrangement of his doc- trines, which makes its metaphysics vapid. 2nd. His propositions depend on transcendental proofs, and that of his ideas on moral proofs, instead of rising, without any proof, to the immediate knowledge of reason. On this point Fries approaches the views of Jacobi. 2d. The con- founding of psychological ideas with philosophy, prop- erly so called, and not properly distinguishing the aids that psychology furnish to metaphysics from metaphys- ics themselves. He regarded the life and independence of Kant's practical philosophy as the most beautiful part of his system. Fries maintains that he has rem- oved the errors of Kant, and that he has placed the system on a different plane. In fact he supposes that the doctrines of Kant are based on a false final conviction, on a solid basis. And he asserts that he has effected this by means of researches carried on in the spirit of Kant himself. Fries, as well as Kant, makes the limits of science his starting-point; hence he arrives at some faith of reason that is not a philosophical, a faith that is strengthened by presentment (Anhäng). Knowledge, or science, is only concerned with sensuous phenomena; the true essence of things is the ob- ject of faith; we are led by feeling to anticipate, even amidst appearances, the value of belief, which is the offspring of a faith in the immanent in the understanding, that faith is the key to the ideas of reality. Fries, again, in placing feeling and presentment (Anhäng) above science, Fries approaches the doctrine of Jacobi. His labors in connection with philosophical anthropology, which he regards as the fundamental science of all philosophy, are of great interest. They contain particular truths and spiritual life, and are placed on the three fundamental faculties of the mind—cognition, feeling (Gemüt, the faculty of being interested), and the faculty of action, which is supposed to precede the two former. Afterwards follow theories on the three degrees of development—sensation, understanding (as the development of the mind); on the degrees of thought, qualitative and quantitative abstractions of the imagination, mathematical intu- ition, attention, the difference between the understand- ing and the reason, etc. His anthropological logic con- tains also some excellent views on the subject of reason- ing, method, and system. He regards practical philosophy as the theory of the value and end of human life and of the world, or the theory of human wis- dom. It is there that you find the last goal of all philosophical research; it is divided into a moral theore- try and a religious theory (theory of the final goal of the universe). The former may be also subdivided into general ethics, or theory of the value and end of human actions, theory of virtue, and theory of the state" (Tennemann, Manual Hist. Philos., revised by Morell, § 422).

Fries applied his system 'Philosophical Anthropology,' since he made all further philosophical knowl- edge dependent on man's self-knowledge. He distin- guished three grades of Erkenntniss; we know (wissen) the phenomena of our subjective thinking; this is the realm of philosophers, it is the knowledge (Wissen) we are appearance—Erscheinung—theout of the mind that all is not a mere subjective creation. We have a feel- ing, a presentiment (ahnem), that there is a reality, a substance behind these appearances; here Fries places all that pertains to God, the existence of the soul and
Fries was a minister of the German Reformed Church, was born in Westphalia, Germany, April 24, 1777, and came to America in 1803. He laid aside his parsonage, and became a "Re- 
demptioner," and served a farmer in York County, Pa., three years. Being free, he studied theology with Rev. Daniel Wagner, in Frederick, Md. He was licensed in 1810, and not long afterwards ordained. For two years he served eight congregations in York County, Pa., and in 1812 he removed to Buffalo Valley, in Union County, Pa., where he continued the remainder of his life, doing a pioneer work, his labors extending over several counties. He died October 9, 1835. He was noted for his extraordinary memory, his eclecticism of principles, his great love of American institutions, his fondness for politics, his active life in the ministry, and his great success in laying the foundation of numerous now flourishing German Reformed congregations in the beautiful valleys of the Susquehanna. He preached only in German. (II. II.)

Fries, or Fries, or Friesius, Martin, a Jutland theologian, was born at Riepen in 1686, and studied theology at the University of Copenhagen under Wanda- 
lin, Masius, and the ex-rabbi Steenbuck. In 1712 he was appointed instructor in philosophy, and in 1717 preacher and confessor to the household of a nobleman. In 1719 he was called to the university at Kiel as third professor of theology. Here he lectured especially upon Exposition of the New Testament part of New Testament po- 
lemical works. After a visit to the libraries at Nurem- 
berg and Wolfenbüttel, he was, on his return in 1725, 
promoted to the second professorship, and at nearly 
the same time was elected Prokonzel, which position he held up to the time of his death, August 15, 1750. His works are: Disertatio de pictorum contra historiam sacrum (Copen. 1708-5, 4to); —Scholiasmata de carminio tois isocratis tov eunipos- 
avn ad Matt. x, 14 (Copen. 1706, 4to); —Disertatio de 
documento e hortatoribus fransis, ad unum nem inter Eocene 
proposed: Demonstratio e geologiae ephemeris (Copen. 1722 and 1723); —Fundamenta Theologiae theistic, selec-

Friesland, Friesian. Friesland, in the wider sense of the word, was formerly the name of the whole north-western coast of Germany and the coast of Hol- 

land, embracing the country from the mouth of the 
Weser to the central mouth of the Rhine. It was di- 
vided by the Zuyder Zee and the Zuyder Zee into East Friesland and East Friesland. The latter was subse- 
sequently again divided into two parts, the country be- 
tween the Zuyder Zee and the Ems, now forming the 
Dutch provinces of Friesland and Groningen, and the 
Fly, and thus opened a wider field to the Christian 
missionaries, constituting the modern East Friesland, which was until 1744 a separate principality, was then united with Prussia, 
falling in 1815 to Hanover, with the whole of which it was in 1866 again annexed to Prussia. A branch of the 
Friesians, the North Friesians, inhabited the western 
coast of the Schleswig and the islands of Heligoland, 
Föhr and Syd. The first Christian missionary among the Friesians was bishop Amundus, who entered the country in the train of the conquering Franks. He met with but little success, but established two convents at Ghent, 
Hemiksem, and Blandenburg, and was at one time sent by the king of the Franks, built the first Christian church of Fries- 
land at Utrecht, at that time called Wiltenburg; and 
St. Eligius (q. v.), bishop of Noyon, made great efforts to 
gain a footing for Christianity among the people, 

but he had likewise but little success. About 675, 
Adalhod II, brother of the great Pippin, who was 
not conquered by the Franks, gave permission to the 
English bishop Wilfrid to preach. The defeat of 
his successor Radbod by Pepin of Herstal extended 
the territory of the Franks up to the Yssel and the 
Fly, and thus opened a wider field to the Christian 
missionary. The English monk Wilfrid was conse-
crated by pope Sergius I archbishop of the Friesians, 
and took up his residence at Wiltenburg. After the 
death of Pepin in 714, Radbod made an attempt to 
shake off the yoke of the Franks, and to expel Christi- 
anity from his country, but he was again defeated by 
Charles Martel in 717, and had to become a Christian 
himself. He died, however, a pagan in 719. Poppe, 
the guardian of Radbod's minor son, Adilhod II, was 
apparently friendly to Christianity, which found now 
a very zealous missionary in Winfrid (St. Boniface, 
q. v.), but when a favourable opportunity offered 
he risked a new war against the Franks, in which, 
in 734, he lost his life. Adilhod II, who received 
the title of king, but was a vassal of the Franks, openly 
professed Christianity, but the resistance of the people 
to the new doctrine continued. Adilhod II was suc- 
ceeded by his two sons: first Gundobald, and, later, 
Radbod II, the latter of whom was a violent opponent 
of Christianity, and was expelled from the country by 
Charlemagne, who embodied the whole of Friesland 
with his empire. Christianity at this time was firmly 
established in the southern part of the country, the 
successor of Wilfrid as bishop of Utrecht, Gregory, 
established in his episcopal city a theological school, 
in which many missionaries for Friesland and North- 
western Germany were educated. Among his as-
sistants, Leubin and Willhelm, ornaments of the church. The 
latter was almost entirely.charismatic by Charlemagne, 
bishop of Bremen, and in that position he zealously 
worked for the conversion of the Frisians. With him 
laboring for seven years S. Liudger (q. v.), a native of 
Friesland, and pupil of the school of Utrecht, when the 
rising of the Saxons under Wintfrid, was followed 
by a general revolt of the Frisians. The defeat of
this revolt terminated the resistance of the Frisians to the Franks and Christianity. Frisland was now regarded as a Christian country, but remnants of paganism maintained themselves until late in the Middle Ages.

At the time of the Reformation, West Friseland was a part of the Netherlands. Into East Frisland, which was ruled by a count, and a part of the German empire, the Reformation was introduced by count Edzard I, probably as early as 1519, became acquainted with the writings of Luther, and favored the Reformation, without, however, using any coercive measures against those who preferred to remain in the Church of Rome. Among those who successfully labored in behalf of the Reformation was master Jörgen von der Ditr (Magister Apocalyptus), who had been educated at Zwolle by the Brethren of the Common Life. After the death of Edzard, in February, 1528, his son Enno began to despise the churches, suppress the convents, and introduce the Reformation by force. In 1529, Bingenhausen, at the request of count Enno, sent two Lutheran preachers from France, to organize the new administration of the churches. But already a number of the Protestant ministers and laity had come under the influences of the Anabaptists and Reformed Zuinglean views. Count Enno expelled Carstain, and ordered all the Anabaptists out of the country; but the clergy, in 1530, could not be prevailed upon to adopt the whole of the Lutheran Church discipline which was laid before them. Several other attempts to introduce Lutheranism by force failed, and the Reformed system of Zuingle maintained the ascendency. In 1543, the widow of Enno, countess Anna, who, during the minority of her son, acted as regent, called a distinguished Reformed theologian, Johann A. Lascot [see Lascot], to Friesland. He was appointed superintendent general, and under his administration the Reformed Church of Friesland attained a high degree of prosperity and reputation. As a refuge of many Protestant exiles from France, the Netherlands, and Great Britain, it received the name "Refuge of the oppressed and exiled Church of God."—Hertzog, Real-Encyk. iv, 607; Onno Klopp, Geschichte Ostfrieslands (Hanover, 1854-55, 2 vols.). (A. J. S.)

Friesen, in classical architecture, the middle division of an entablature, lying between the architrave and the cornice or modillion. In the Doric it is divided by three raised flutes, called triglyphs, into spaces called metopes, which are usually filled with sculpture. In the Ionic it is sometimes ornamented with sculpture; sometimes the metopes swell out in the middle. In the Corinthian and Composite it is ornamented in various ways, but usually either with flowers or figures. Any horizontal band that is occupied with sculpture is called a frieze by some writers.

Frigga, the wife of Odin, and supreme goddess of the race of the Asir (or Aesir), the celestial gods of the Scandinavian mythology, was a daughter of the giant Fjorgyn, presided over marriages and in the assemblies of the goddesses, which were always held in her palace, was prescient of, but never revealed, the fate of men, knew the language of plants and animals, and through her great wisdom aided Odin by her counsels. Her abode was said to be "the magnificent mansion of Fævir (the marshy halls), which denotes the deep, moist earth," and from her relation to Odin, the sun in this mythology, she may be regarded as typifying the earth, which, drawing from him the generative principles of light and warmth, gives growth and fruitfulness to living things. She is closely related to, and frequently confounded with Freya (q. v.), and is generally represented (see pl. 12, fig. 1, Mythology and Religious Rites in Iron. Encyclop.) seated in a golden chariot drawn by two white cats, her tresses and veil floating in the wind, with two attendants, with veils and tresses likewise floating, flying near her. —English Cyclopedia, s. v.; Icon. Encyclop. iv, 277-8 (N. Y. 1831); Thorpe, Northern Mythology. (J. W. M.)

Fringe (ge'dil), twisted thread, i. e. a tassel, Deut. xxii, 12; a "wreath" or festoon for a column, 1 Kings vii, 17; 12²x², taisith, a flower-like projection, i. e., a tassel, Numb. xv, 38, 39; the "fore-lock," Ezek. viii, 9, an ornament worn by the Israelites upon the edges, and especially at the corners of their robes, as an affectation of piety (comp. Matt. xxi, 5). These terms must have denoted pedicles in the shape of bows or flowing threads. Fringed garments, elaborately wrought, were very common among both the ancient Egyptians and Babylonians. See Embroidery. Such fringes, however, as appear upon the tunics and outer robes of figures delineated on the Assyrian and Egyptian monuments probably did not entirely correspond with those in use among the Jews, although it may be presumed that there was a general resemblance between those worn for general purposes, i. e. as ornamental appendages. Moreover, it may be doubted whether fringes of that description were intended by the Jewish legislator, since they were in such common use that they could form no proper mark of distinction between an Israelite and a Gentile; and, besides, they seem appropriate to state-dresses rather than to ordi-
nary attire, while it is plainly the latter which is con-
templated in the prescription of Moses, and this es-
pecially with a religious reference. See Phylac-
tery.

The Mosaic law respecting these ornaments is con-
tained in Num. xv, 38-41; Deut. xxiii, 12, where the
children of Israel are enjoined to append fringes or
tassels (נֵצֶעַ, נִצְעָתִים), consisting of several threads,
to the four corners (נֵצֶעַה, נִצְעָת) of their outer gar-
ment (נִציָה, נִציָה), to put one distinguishing thread
(נֵצֶעַה, נִצְעָת), not "ribbon," as the A.V. of deep blue in
each of these fringes, and constantly to look at them,
in order to be put in mind thereby of God's command-
ments to keep them. What number of threads each of
these symbolic fringes is to have besides the said
blue one, of what material, or how they are to be
made, the injunction does not say. Like most of the
Mosaic laws, it leaves the particulars to be determined
by the executive powers according to the peculiar cir-
cumstances of the time. The following account of
them relates chiefly to Rabbinical usages.

Guided by the fact that they are symbolical, tradit-
ion, in determining the manner in which these fringes
are to be made, endeavored to act in harmony with
their spiritual import, and hence fixed that each of
these four fringes or tassels for the four corners of
the garment should consist of eight threads of white
wool, the emblem of purity and holiness (Isa. i, 18);
that one of these threads is to be wound round the
others, first seven times, and then a double knot to be
made; then eight times, and a double knot (15 = 77);
then eleven times (מ–מ), and a double knot; and fin-
ally thirteen times (מ–מ), and a double knot, so as
to obtain, from the collective number of times which this
thread is wound round, the words נֶצֶע נֶצֶע (Jeb-
ovah is one), constituting the creed which was the dis-
inguishing mark of the Hebrew nation, and which
was inscribed on their banners, whilst the five knots
represent the five books of the law. As the law, how-
ever, is said to contain 613 commandments [see
Schoo], and as the design of these fringes is to re-
mind the Jews of all these commandments, tradition
has so arranged it that the word נֶצֶע נֶצֶע, which is nu-
merically 600, with the 8 threads and 5 knots, should
exactly comprise this number, and thus constitute a
perfect symbol of the law.

Originally, as we have seen, this fringed or tasseled
garment was the outer one. It was more like a large oblong
piece of cloth, with a hole in the centre through which the
head was put, thrust into the two halves, one covering
the front, and the other the back of the body, like a
tunic.

But when the Hebrews be-
gan to mix with other na-
tions, and especially when
they were dispersed and be-
came a by-word and a hissing, this ancient badge of
distinction which God conferred upon them became the
signal of persecution, inasmuch as it indicated that the
weaver of it was a Jew, on whom Christians thought
they ought to avenge the blood of Christ. Hence the
Israelites found it necessary to discard the fringed gar-
ment as an outer dress, and to wear it in a smaller size,
and a somewhat altered form, as an under garment, in
order to conceal it from their persecutors. This under
fringed garment is called נִציָה נִציָת, the four-cor-
nered dress, or simply נִציָת, fringes or tassels, and is
worn by every orthodox Jew to the present day.

Yet, though the Jews have been
compelled to relinquish the large out-
er fringed garment as a permanent
article of apparel, they continue to
wear it in a somewhat modified form at their morning prayers,
and call it נֶצֶע, נֶצֶע, i. e. cover or
scraper. This נֶצֶע, or fringed
wrapper, is generally made of a
white woolen ma-
terial; the wool
must be spun
by Jews for this ex-
Moabit Form of
purpose. It is said that the fringed
Garment has three or more
blue stripes running in parallel
lines across the whole garment, at
the right and left side. In some
cases, however, the נֶצֶע is also
made of silk. Every married Jew
must wear it at morning prayer;
a single man can do what he likes.

When putting it on, the following prayer is offered: "Blessed art
thou, O Lord, King of the universe, who hast sanctified us with a
word of commandments, and enjoined us to array ourselves with fringes." The
Jews attach the utmost importance to the fringed gar-
ment. Thus it is related in the Talmud that "R. Jo-
seph asked of R. Joseph ben Joseph, who is
your father admonished you to observe more than
any other? He replied, The law about the fringes.
Once when my father, on descending a ladder, stepped
on one of the threads and tore it off, he would not
move from the place till it was repaired" (Sabbath, 118,
4).

Some of the Rabbis go so far as to say that the
law respecting the fringes is as important as all the
other laws put together (see Rashi on Num. xv, 41).
It was for this reason that the woman with the issue of
blood (Matt. ix, 20), and the inhabitants of Gennes-
aret (Matt. xiv, 36), were so anxious to touch a fringe of
their garments (ἐπαρίχεται ὁ ἐμφύλωτος). This superstitious reverence for the external symbol,
with little care for the things it symbolized, led the
Pharisees to enlarge their fringes, believing that the
larger they made the tassels, the better they did God
service. The Rabbis in their sayings, "Whoso dis-
gently keeps this law of fringes is made worthy, and
shall see the face of the majesty of God"—Baal Hatu-
rim on Num. xv, 3; "When a man is clothed with
the fringe, and goes out therewith to the door of his
habitation, he is safe and God rejoiceth, and the angel
[of death] departeth from thence, and the man shall
be delivered from all hurt," etc.—R. Menachem on
do; and this it was that our Saviour rebuked (Matt.
xxiii, 5). See Maimonides, i, 100, etc.; Orach Chay-
aim, § 7; the Hebrew Prayer-book, called דֵּת פְּנֵיה (Vien, 1869), p. 21, a, etc. See REM.

Print, Jaco, a Roman Catholic bishop of Austria,
was born in 1756 at Bömsich-Kamnitz, in Austria. He
was for several years professor of theology at the Uni-
versity of Vienna, and caused the establishment of a
higher theological institution for secular priests, of
which he himself became the first director. He was
appointed in 1827 bishop of St. Poelten, and died in
1834. He is the author of numerous theological works,
as Handbuch der Religionswissenschaften (Vienna, 1816:
4, 6 vols.);—Das alte und das neue Christentum, od.
Krit. Bearbeitung der Stunden der Andacht (Vien,
1822-24, 4 numbers)—Geist des Christenthums (Vie-
nia, 1868, 2 vols.). From 1818 to 1826 he was the ed-
itor of a journal for scientific theology, which was con-
tinued by Plötz and Sebeck. (A. J. S.)
FRISBIE, Levi, professor in Harvard College, was born at Ipswich, Mass., in 1784. He entered Harvard College in 1774, and during the last year of his graduation in 1792, he supported himself by labor as a clerk in a tucking shop. He commenced the study of law, but was compelled to desist by an affection of the eyes, which hindered his progress through life. In 1805 he was made Latin tutor at Harvard, and in 1811 professor of Latin, which post he held until 1817, when he was transferred to the chair of moral philosophy, for which he had peculiar qualifications. His lectures on ethics, government, etc., were considered very able; they were chiefly delivered extemporaneously, but some of them have been published (see below). He died July 9, 1840, and was buried in the American Reviewer, and to other periodicals; and a "Collection of the Writings of Professor Frisbie," edited by Andrews Norton, appeared in 1823, containing portions of his lectures, as well as of his periodical contributions.

Frischmuth, Johann, a German theologian and Orientalist, was born at Wertheim in 1819, and died at Jena in 1867, in which city he was professor of Hebrew. He was also acquainted with Arabic. Besides other works, he wrote 60 dissertations on philological, Biblical, and theological subjects, of which the most important is "De Pontificio sacro:—De Sacrificiis:—De Pontifici Mois contra Nixius:—De: Graviss XL Interpret, versione:—De Mutilatione Mortis et Memoriae:—Quorundarn in sacra et litteraria Virorum."—Hoefler, Nuovo Biog. Generale, xvii, 888.

Frisian. See Friesland.

Firth or Fryth, John, an English reformer and missionary, was born at Severn Woks, in England, where his father kept an inn, and was educated at King's College, Cambridge, where he so greatly distinguished himself that, when Wesley formed his new college at Oxford, he was appointed one of its first members. About 1754 he became acquainted with Tyndale, and by his influence was won over to the principles of the Reformation. With others, he found it necessary to retire to the Continent in 1758. On his return to England in 1780 he was put into the stocks at Reading as a vagabond, but was taken out of them by the schoolmaster of the town, to whom he made his case known in so elegant Latin and Latin verse, that a friend of his, who was a scholar of the college, went to London, and there engaged in controversy with Sir Thomas More, publishing a tract on Puritans against Sir Thomas. His zeal led to his apprehension. While in the Tower he was examined, by the king's command, before the bishops; Brandt, Cranmer, Soffolk; Boleyn, earl of Wiltshire; Stokesley, bishop of London; Gardner, bishop of Winchester, and the chancellor Audley. The prisoner maintained that the dogma of transubstantiation was not de fade; at the same time, he did not condemn those who held the doctrine of a corporeal presence; he only reproved the prevalent notions respecting propitiatory masses and the worshiping of the sacramental elements. He denied also the doctrine of purgatory. At length he was brought before an episcopal commission at St. Paul's, where many efforts were made to induce him to recant, but in vain. At last the bishop of London pronounced sentence upon him as an obstinate heretic, and he was delivered to the secular power. A writ was issued for his execution, and he was burnt at Smithfield on the 4th of July, 1533, "maintaining his fortitude to the last, and cheerfully extending his time till to his digested pope priest, who endeavored to persuade the people that they ought no more to pray for him than for a dog." Firth was an excellent scholar. He wrote Treatise of Purgatory:—Antithesis between Christ and the Pope:—Mirror, or Glass to know thyself, written in the Tower, 1535:—Articles (for which he died) written in Newgate Prison, June 28, 1538:—Answer to Sir Thomas More's Dialogues concerning heresies:—Answer to John Parker, Bishop of London, etc. All of these treatises were reprinted at London (1767, fol.), with the works of Tyndale and Barnes. They may be found also in Russell, Works of the Reformers, vol. iii (Lond. 1838, 3 vols. 8vo). See Hook, Eccl. Biog., 235; Burnet, Hist. of the English Reformation, i, 283-277.

Fristathoel or Freestatool, literally the seat of peace; a seat or chair, usually made of stone, placed near the altar in some churches, and intended as the last and most sacred seat for those that claimed the privilege of the sanctuary. The violation of the freestatool was attended by the most severe punishment. According to Spelman, that all the seats had this inscription: 'Hece sedes lapidea freestatool dictur i.e. pacis cathedra, ad quam reus fugiendo perennius omniummodum habet securitatem.' Freistatools still exist in the church at Hexham and Beverley Minster, both in the north aisle of the chan- cels; the former of these has the seat hollowed out in a semicircle, and is slightly ornamented with patterns of Norman character, that at Beverley is very rude and plain.

Frittigl, a queen of the Marcomans in the 4th century. She was converted to Christianity, and applied to Ambrose for further religious instruction. She sent him a catechism composed expressly for the purpose. Through her influence the Marcomans were converted as a people, and remained at peace with Rome during the incessant wars of the time.

Fritz, Samuel, a German Jesuit and missionary, was born in 1650, and died in 1730. He was sent as missionary to South America, and established mission settlements between the Napo and Rio Negro, into which nearly 40,000 natives were gathered. The Portuguese from Brazil attacked and broke up these settlements, carrying many of the Indians to Para. Fritz, after vainly striving to obtain redress, retired to the village of Xeborno in Peru, where he died. His map of the Amazon, though superseded by the fuller and exacter works of more recent explorers, procured for him a long time a just renown as a geographer.—Hoefler, Nuovo Biog. Generale, xvii, 893-7.

Fritzsche, the name of a German family distinguished for learning. 1. Christian Friedrich, a theologian, was born at Nauendorf Aug. 17, 1776. He studied at the Orphan School of Halle, and afterwards theology at Leipzig. He became successively pastor of Steinbach in 1799, superintendent at Dobrilugk in 1809, professor of theology at Halle in 1809, and was in 1838 appointed censor for theological works. Besides a number of occasional articles, pamphlets, etc., collected in the Fritschiorum Opera Academica (Lpz. 1838), published by himself and two of his sons, he wrote Vorlesungen u. d. Abendmahl, etc.—De Annae mariae Jesu Christi (Halle, 1837-38).—In Revelationis Notiones biblica (Lpz. 1889).—Frier, Universal-Lexikon, vi, 754.

2. Karl Friedrich August, eldest son of Christian Fritzsche, also a distinguished theologian, was born at Steinbach December 16, 1801. After receiving his first instruction from his father, he entered his studies at the University of Leipzig, where he became professor extraordinary of theology in 1825. The year following he went to Rostock as ordinary professor, and in 1841 to Giessen, where he died Dec. 6, 1846. Besides some important exegetical essays published in the Fritschiorum Opera Academica, he

Fritzlar (properly from Fricti lare = domus pacis) is a city of Prussia, situated on the shores of the Eder, and one of the oldest seats of the Church in Central Germany. Here Boniface founded in 732 a church dedicated to St. Peter, and a small convent, with a school chiefly intended for the accommodation of clerical students. He first directed it himself, but afterwards gave up the charge to his countryman Wibert, who thus became the first regular abbot of the institution († 747). The second abbott was Tatian; the third, Wibert II. The school soon gained a great reputation. Storm, abbot of Fulda, and Megingoz, bishop of Wurzburg, were among its first scholars. The institution remained for centuries at the head of both clerical and secular education. Under Charlemagne, Fritzlar was in 744 burned down by the heathen Saxons, and the church alone escaped. As it stands at present, it is in the Roman style of the 12th century. Fritzlar was for a time a bishopric (in 786), but was soon joined to that of Mayence. See S. Schimanski, D. antiquitat. Fritzlarium, diss. (Marburg, 1715, 4to.).— Herzog, Real-Encyc. iv, 612.

Fritzlar, Hermann of. See Hermann.

Frog (27) "Ex. terpardo'a, a marsh-lepger [Geen- nius, Theb. 189, p. 1184], Bárpoa — Exod. viii, 2 et sq.; Psa. Ixxviii, 45; cv. 89; Rev. xvi, 13), the animal selected by God as an instrument for humiliating the pride of Pharaoh (Exod. viii, 2-14; Psa. Ixxviii, 45; cv. 30; Wad. xix, 10). Frogs came in prodigious numbers from the canals, the rivers, and the marshes; they filled the houses, and even entered the ovens and kneading-troughs; when, at the command of Moses, the frogs died, the people gathered them in heaps, and "the land stank" from the corruption of the bodies. There can be no doubt that the whole transaction was miraculous; frogs, it is true, if allowed to increase, can cause considerable damage; but these animals are considered to be injurious precisely because they are associated with the plagues of Egypt in the Bible. The appearance of frogs, therefore, was a clear indication of God's intervention in the events leading up to the Exodus from Egypt. The reference to the plagues of frogs is described in detail in the Bible, and is a significant event in the account of the Israelites' deliverance from bondage in Egypt. The plagues of frogs are also referred to in the New Testament, where they are associated with the coming of Jesus Christ and the end of the world. The reference to the plagues of frogs in the Bible is significant because it provides a clear example of how the Bible uses natural phenomena to convey religious messages and insights.
transverse bands, and is said to change its color when alarmed. It is lively, but no strong swimmer, the webs on the hinder toes extending only half their length: hence, perhaps, it is more a terrestrial animal than the common green frog, and, like the brown species, is well adapted to resist drought in moist weather. (See *Penny Cyclopedia*, s. v.)

Although it is very hazardous, in transactions of an absolutely miraculous nature, to attempt to point out the instruments that may have served to work out the phenomena, we may be sure that, in the plague of frogs, a species, the one perhaps we have just mentioned, was selected for its activity on land, and that, although the fact is not expressly mentioned, the awful visitation was rendered still more ominous by the presence of dark and rainy weather—an atmospheric condition not of very long duration on the coast of Egypt, and gradually more and more rare up the course of the river. Travellers have witnessed, during a storm of rain, frogs crowding into their cabins, in the low lands of Guiana, till they were packed up in the corners of the apartment, and eventually falling back in their attempts to ascend above their follow back; and the door could not be opened without others entering more rapidly than those within could be expelled (see Roberts, *Oriental Illustrations*, in loc.). Now, as the temples, palaces, and cities of Egypt stood, in general, above the level of the main current, and always above the level of the highest inundations, to be there visited by a continuation of immense number of frogs was assuredly a most distressing calamity; and as this phenomenon, in its ordinary occurrence within the tropics, is always accompanied by the storms of the monsoon or of the setting in of the rainy season, the dismay it must have caused may be judged of when we reflect that the plague occurred where rain seldom or never falls, where none of the houses are fitted to lead off the water, and that the animals appeared in large numbers, where they had never before been found, and where, at all other times, the ebbing sun would have destroyed them in a few moments. Nor was the selection of the frog as an instrument of God's displeasure without portentous meaning in the minds of the idolatrous Egyptians, who considered that animal a type of Pharaoh, their creative power (Wilkinson, *Anc. Eg.:* 851 sq.), as well as an indication of man in embryo. The magicians, indeed, appeared to make frogs come up out of the waters (Exod. viii, 7), but we must not understand that to them was given also the power of producing the animals. The effect which they claimed and which was a simple result of the propagation of the prodigy effected by Moses and Aaron; for that they had no real power is evident not only from their inability to stop the present plague, the control which even Pharaoh discovered to be solely in the hands of Moses, but also the utter failure of their enchantments in that of lice, where their artifices were incompetent to impose upon the king and his people. (See Kitto's *Daily Bible Illustrations*, in loc.) See *Plague* (of Egypt).

Frossard de Broissia. CHARLES, a French Jesuit missionary, died Oct. 10, 1794, near Pekin, in China, where he was laboring in the missionary work of his order. In the bitter controversy between the Dominicans and Jesuits, (1) whether the Chinese terms *Tien* and *Chang-ti* meant the material heavens or the God of heaven, and (2) whether the ceremonial honors paid to ancestors and to Confucius were religious or only civil and political customs, he took an active part, and, in agreement with his colleagues, resolved these questions in the way most favorable to secure apparent success. The Jesuits, adopting the view that these terms meant the God of heaven, and that these ceremonies were simply commendable customs, not repugnant to the Catholic faith, employed *Tien* and *Chang-ti* to designate God in the Christian sense, and, following the doctrine of Escobar (q. v.), that intention gives character to the deed, allowed their converts to continue their ceremonial practices, provided they received baptism, took the name of Christians, and recognised the supremacy of their missionary teachers. The number of nominal conversions was, as might be expected, great. The doctrine of the exclusive rule of Christianity among the educated Chinese, was referred, on the one hand, to the Chinese emperor Kiang-hi, who decided in favor of the Jesuits, and, on the other, to pope Clement XI, who decided in favor of the Dominican as the orthodox view. Frossard left only some fragment of translations of important Chinese works.—Hoefler, *New Biogr. Génér.*, xviii, 920-21.

Fromage, PIERRE, a French Jesuit missionary and Orientalist, was born at Lyon May 12, 1678, and died in Syria Dec. 10 or 23, 1740. He went on his mission-work first to Egypt, where he remained some years, and then to Syria, where he passed the remainder of his life, mostly at Aleppo. He became superior of his order, and, in despite of great difficulties, established at the monastery of St. John the Baptist, near Antura, a printing-press, and published, mostly in the Arabic language, a great number of translations and imitations of religious and theological works. Fromage was present and made an opening discourse at the great synod of the Maronites, held Oct. 15, 1736, near Tripoli, in Syria.—Hoefler, *New Biogr. Génér.*, xviii, 393-2; Rose, *New Gen. Biogr. Dictionary*, vii, 456. (J. W. K.)

Froment. See *Froment*.

Froment, ANTOINE, one of the French and Swiss Reformers, was born near Grenoble in 1510. Of his early life little is known. A disciple of Farel, he passed with him into Switzerland, and labored especially in Neuchâtel and Vaud. When Farel was obliged to leave Geneva in 1532 (see *Farel*), he sent for Froment, who reached Geneva November 25 and began to task a fearful one. He began his work as a schoolmaster, promising to teach "reading and writing in a month" to all comers, and to charge nothing in case of failure. Many flocked to the school, and were taught not only reading and writing, but also the principles of the Reformation. On New Year's day, 1533, Froment preached in the fish-market against Romanism; a crowd of Roman Catholics broke up the meeting, and Froment was obliged to leave Geneva. He returned in 1534. A Dominican named Furtitz, preaching in the cathedral in favor of transubstantiation, challenged the Protestant minister to answer his propositions. Froment, who was in the audience, at once began to speak. A tumult arose, and again Froment was compelled to depart from the city. He went to Bern, accompanied by one of the burgesses of Geneva, and obtained the protection of the Bernese government, under which both Froment and Farel returned to Geneva. From 1537 to 1555 Froment was pastor of the quarter of St. Gervais. In 1552 he was deposed from the ministry on account of certain misconduct on the part of his wife, the rigid discipline of Geneva not allowing the husband to take such a wife as to remain a pastor. He became a notary, and in 1559 was made one of the council of Two Hundred. His own life becoming disorderly, he was banished in 1562, and was only allowed to return in 1572. He died in 1585. He wrote a history of the reform in Geneva, which has recently been edited and published; see the article *Les Actes et les Gesta merveilleux de la cité de Genève, faits du temps de la Réformation*, etc. (Geneva, 1854).—Ruchat, *Réformation en Suisse*, t. iii; Haas, *La France Protestante*, s. v.; Polenz, *Französ. Colonnement*, t. 814 q. v. H. *Biogr. Génér.*, xviii, 998; *London Quarterly Review*, Oct. 1857, 190 sq.

Fromond (Fromondus), a theologian of Liège, was born at Haccourt in 1587. He taught philosophy and theology at Louvain, and was, in 1638, appointed dean of the chapter of St. Peter, in that city. He appears
to have possessed some scientific knowledge, besides a pretty extensive acquaintance with theology and philology. Des Cartes was one of his friends. Fromm, however, defended Polien's system (of the immobility of the moon) in a discussion with the French philosopher, Philippe Lansberg. He was an intimate friend of Jansenius, and was one of the two theologians to whom the latter confided, when dying, his renowned Augma-
tinus. He died at Louvain in 1653. The best work of Fromond is a Commentario de Acta Apôteros (Paris, 1653, 8vo, fol.)—B. A. R. See Anti-Aristot-
elici eindes, contra Jacobum Lansbergiwm et Copernicanos (Antw. 1638, 4to) — Brevis Anatomia Hominum (Louv-
ain, 1654, 4to).—Hoefer, Nouv. Bioir. Génér. xviii, 918.

Front or Façade. In ancient descriptions of churches, the front of the church is spoken of as the east or altar end. In modern writings, when churches are "oriental" or located with reference to the points of the compass, the principal front or façade is the west end, the end away from the altar.

Frontier (περιοχή, katekh, end, as often rendered, comp. Jer. ii, 31; Isa. xvi, 11), the extremity or border of a country (Ezek. xxv, 9).

Frontlet (only in the plur. ροδέληδα, totemphth, prop. fillets, from an obsolete root ροδελεῖν, to bind about [Genesius, Theb. Heb. p. 548]; Sept. ασταλετών [v. r. άσταλέτων], apparently pointing ροδέληδα, i. e. incom-
moveable; Vulg. vagely appendix quid, movelantur, and collocat) occurs only in three passages (Exod. xiii, 16; Deut. vi, 8; xi, 18), and each time in the form of a proverbial similitude, "as frontlets between your eyes," and also so expressed with another (but similar) expression, "as a sign or (token) upon your hand" (comp. Exod. xiii, 9, "as a memorial between your eyes"), in connection with a command to observe the Mosaic law. In Exodus the expression is used more immediately with reference to the ordinance respecting the consec-
ration of the first-born and the Passover solemnity; but in the two passages of Deuteronomy it relates to the precepts and statutes of the old covenant generally.

The meaning in charging the Israelites to "bind them for a sign upon their hand, and have them as frontlets between your eyes," evidently is, that they should keep the law distinctly in view, and as carefully at-
tend to them, as if they had them legibly written on a tablet between their eyes, and bound in open char-
acters upon their hands; so that, wherever they looked, and whatever they did, they could not fail to have the statutes of the Lord before their eyes, and that actual and written memorial was intended to be enjoined upon the Israelites is clear from the nature of the case, since no writing to be worn either between the eyes or upon the hand could by possibility have served the purpose of legibly expressing all the statutes and ordinances of the law. It is clear, also, from the alternative phrases with which those in question are associated, such as, "That the Lord's law may be in thy mouth" (Exod. xiii, 9); "That these words shall be in thine heart;" "That ye shall lay up these my words in your heart and in your soul" (Deut. vi, 6; xi, 18), as well as from the parallel sayings of a later day (Prov. vi, 21; comp. iii, 8; iv, 21). But the Jews, some time after their return from Babylon (it is not known exactly when), gave the direction about having the precepts of the law as frontlets a literal turn, and had portions of it written out and worn as badges upon their per-
son. These are called by the modern Jews tephillim, תפילין (a word signifying prayers, but not found in the Bible; Buxtorf, Lex. Talm. col. 1478). These were strips of parchment, on which were written four pas-
ages of Scripture (Exod. xiii, 2-10, 11-17; Deut. vi, 4-9, 13-22) in an ink prepared for the purpose. They

were then rolled up in a case of black calfskin, which was attached to a stiff piece of leather, having a thong one finger broad, and fastened again to the half cubits long. Those worn on the forehead were written on four strips of parchment (which might not be of any hide except cow's hide)—Nark, Baram, Ramah, and Rabla, p. 211, comp. Hesych. s. v. Σταυρίτις (προτοιαία), and put into four little cells within a square case, on which the letter ז was written; the three points of the ז being "an emblem of the heavenly Fathers, Jehovah our Lord Jehovah" (Zohar, fol. 64, col. 2). The square had two thongs (יָּרֶש), on which Hebrew letters were inscribed; these were passed round the head, and after making a loop, presented the shape of a "pass over the breast." This was called "the tehillah on the head," and was worn in the cen-
tre of the forehead (Leo of Modena, Ceremonies of the Jews, i, 11, n. 4; Calmet, s. v. Phylacteries; Otho, Lex. Rabbin. p. 656). The Karaites, on the contrary, ex-
declared Deut. vi, 8; Exod. xiii, 9, etc., as a figurative command, and the Hebrew law (Rabbin, ad loc., p. 182), in as similar passages (Prov. iii, 8; vi, 21; vii, 3; Cant. viii, 6, etc.), and appealing to the fact that in Exod. xiii, 9 the word is not יָּרֶש, but יָּרֶשׁ, "a memo-
rial" (Gerhardus on Deut. vi, 8; Edzardus on Ezech-
ch. i, 209; Heidelanus, De Orig. Erroris, vili, 6; Schöttgen, Hor. Hebr. i, 198; Rosenmüller, ad loc.; Hengstenberg, Gesch. v. d. abendländ. l. p. 458). Considering, too, the na-	ure of the passages inscribed on the phylacteries (1 Cor. vii, 10), no means the most important in the Pentateuch—for the fathers are mistaken in saying that the Decalogue was used in this way, Jer. l. c. Chrysost. l. c. Theo-
phys. ad Matt. xxiii, 6), and the fact that we have no trace whatever of their use before the Exile (during which time the Jews probably learnt the practice of wearing them from the Babylonians), they were justi-
filed in claiming that the object of the precepts (Deut. vi, 8; Exod. xii, 9) was to impress on the minds of the people the necessity of remembering the law. But the figurative language in which this duty was urged upon the Jews was mistaken by the Talmudists for a literal command. An additional argument against the literal interpretation of the direction is the dangerous abuse to which it was immediately liable. Indeed, such an observance, as the Talmudists supposed the intended intention of it, by substituting an outward ceremony for an inward remembrance. Accordingly, these badges were turned into instruments of religious vanity and display, and abused for selfish purposes by those who sought, by a great procession of legal ritualism, to hide their defici-
cency of inward principle. They even came eventually to be employed as charms or amulets, having a divine virtue in them to preserve the wearer from sin or from damascenial agency; hence such sayings as those concerning them in the Talmudical writings:

"Whosoever has a tephillim upon his head ... is fortified against sin;" "They are a bandage for cutting off," i. e. from various kinds of danger or hostility (Spencer, iv, c. 5). Jerome (on Matt. xxiii, 5) speaks of them generally as worn by the Jews for guardianship and safety (ob custodiâm et muni-
mentum). The Talmudists considered that they were to be borne in the heart, not on the body. See PHYLAC-
TERY.

On the analogous practice alluded to in Rev. xiii, 16; xiv, 1, see FOREHEAD.

Fronton le Duc, or Fronto Ducensus. See Duc, Fronton de.

Frontisp., Justus Friedrich, a learned Oriental-
FRUIT

(properly "ānu, peri, "spōnicus"); an extensive term, denoting produce in general, whether vegetable or animal, and also used in a figurative sense (see Genesius's Heb. Lex. and Robinson's Greek Lex.). The Hebrews have three generic terms designating the three great classes of the fruits of the land, closely corresponding to what may be expressed in English as, 1. Corn-fruit, or field produce; 2. Vintage-fruit; 3. Orchard-fruit. The term "ānu, peri's, "summer-fruits," appears to denote those less important species of fruit which were adapted only to immediate consumption, and when conveniently brought in a state fit for winter use (Jer. xii. 10, 12). The three terms spoken of as being so frequently associated in the Scriptures, and expressive of a most comprehensive triad of blessings, are the following:

1. "ānu, dogn, "fruit of the field," or agricultural produce. Under this term the Hebrews classed almost every species of culture (see Alex. Bard, Mem. xiv. 186). Jahn says, "The word is of general signification, and comprehends in itself different kinds of grain and pulse, such as wheat, millet, spelt, wall-barley, barley, beans, lentils, meadow-cumin, pepper-wort, fax, cotton, various species of the cucumber, and perhaps rice" (Bib. Archæol., § 88). There is no now doubt among scholars that dogn comprehends the largest and most valuable species of vegetable produce, and therefore it will be allowed that the rendering of the word in the common version by "corn," and sometimes by "sheort," instead of "fruit," is a species of "corn" or field produce, tends to limit our conceptions of the divine bounty, as well as to impair the beauty of the passages where it occurs. See CORN.

2. "śamru, tirosh, "the fruit of the vine" in its natural or its solid state, comprehending grapes, moist or dried, and the fruit in general, whether in the early cluster or the mature and ripened condition (Isa. lxv. 8, which is rendered by Boriov, grape, in the Sept., refers to the young grape; while Judg. ix. 13, where "the wine said, Shall I leave my tirosh [fruit], which cheereth God and man?" as evidently refers to the ripened produce which was placed on the altar as a first-fruit offering in grateful acknowledgment of the divine goodness). Sometimes, says Jahn, "the grapes were dried in the sun, and preserved in masses, which were called, šamru, or, šamru, ushišim, and ushišim, teimukim" (1 Sam. xxv. 18; 1 Sam. xvi. 1; 1 Chron. xii. 40; Hos. iii. 1)" (Bib. Archæol. § 69). It is also distinctly referred to as the sīcher of wine, and therefore was not wine itself, but the raw material from which it was expressed or prepared, as is evident from its distinctive contrast with wine in Amos vi. 15, last clause. See WINE.

3. "yśkār, yśkār, "orchard-fruits," especially winter or keeping-fruits, as dates, figs, olives, pomegranates, citrons, nuts, etc. As we distinguish dognam from...
FRUIT

FRUIT-TREE

FRUIT, the product of the earth, as trees, plants, etc. 1. 'Blessed shall be the fruit of thy ground and cattle.' The fruit of the body signifies children: 'Blessed shall be the fruit of thy body.' By fruit is sometimes meant reward: 'They shall eat of the fruit of their own ways' (Prov. i, 31); they shall receive the reward of their bad conduct, and punishment answerable to their sins. The fruit of the lips is the sacrifice of praise and prayer (Heb. xii, 25). The fruit of the righteous—that is, the counsel, example, instruction, and reproof of the righteous—is a tree of life, is a means of much good, both temporal and eternal, and that not only to himself, but to others also (Prov. xi, 30). Solomon says, in Prov. xii, 14, 'A man shall be satisfied with the fruit of his mouth.' That he shall receive abundant blessings from God as the reward of that good he has done by his pious and profitable discourses. 'Fruits meet for repentance' (Matt. iii, 8) is such a conduct as befits the profession of penitence.

2. The fruits of the Spirit are those gracious habits which the Holy Spirit of God produces in those in whom he dwelleth and worketh, with those acts which flow from them, as naturally as the tree produces its fruit. The apostle enumerates these fruits in Galatians v, 22, 25. The same apostle, in Eph. v, 8, comprehends the fruits of the sanctifying Spirit in these three things, namely, goodness, righteousness, and truth. The fruits of righteousness are such good works and holy actions as spring from a gracious frame of heart: 'Being filled with the fruits of righteousness,' Phil. ii, 11.

It is for a charitable contribution, which is the fruit or effect of faith in love: 'When I have sealed unto them this fruit,' Rom. xv, 28; when I have safely delivered this contribution. When fruit is spoken of good men, then it is to be understood of the fruits or works of holiness and righteousness; but when on evil men, then they are meant the fruits of sin, immorality, and wickedness. This is our Saviour's doctrine, Matt. vii, 16-18.
FRUMENTIUS, Sr., called the apostle of Christianity in Ethiopia, was born in Tyre towards the beginning of the 3rd century. He was put to death by the uncle Meropius, whom he accompanied with his relative (Edesius) on a voyage of scientific discovery. They landed on the coast of Abyssinia or Ethiopia to procure water, but the natives murdered all on board except the two boys, whom they found sitting under a tree and reading. Edesius became cap-bearer and Frumentius private secretary to the prince. After the death of the prince, Frumentius was appointed tutor to the young prince Ezianes, and obtained great influence in state affairs. He succeeded in founding a church, and in 326 went to Alexandria, where Athanasius (recently made bishop of Alexandria) consecrated him bishop of Axum (Auxuma), the chief city of the Abyssinians, and an important mart of trade. His labors were rewarded by extraordinary success. He is supposed to have translated the Bible into Ethiopian. Through him Arabia visited “repaired” to the principal town, Axumia (Axum). Theophilus being an Arian, and Frumentius, the friend of Athanasius, professing in all probability the doctrines of the Council of Nice, it is possible a dispute may have arisen in their announcement here of their respective doctrines, which would necessarily be attended with unfavorable effects on the nascent church; but perhaps, too, Frumentius, who had not received a theological education, did not enter so deeply into theological questions. Still the emperor Constantius considered it necessary to persecute the disciples of the hated Athanasius even in these remote regions. After Athanasius had been banished from Alexandria, in the year 358, Constantius required the princes of the Abyssinian people to send Frumentius to Alexandria, in order that the Arian bishop Georgius, who had been set up in place of Athanasius, might establish orthodoxy, and into the regularity of his ordination’ (Nender, Church Hist. ii. 120). The princes refused, and Frumentius continued at work until his death, the date of which is uncertain (perhaps A.D. 380). He is called the ‘first bishop by the Latinists by the 27th, by the Greeks on November 30, and by the Abyssinians on December 18—Socrates, Hist. Eccl. i. 19; Theodoret, i. 22; Ludolf, Histor. Aethiop. iii, 7; Butler, Lives of Saints, Oct. 27.

FRUYTIER, Jacobus, a Dutch divine, was born June 5, 1599, at Middelburg. He was descended from Jan Frytier, a courtier of William, prince of Orange, and a zealous advocate of the Reformation. Jacobus was educated at Utrecht. His first settlement was at Aardenburg, where he remained seven years. In 1688 he accepted a call to Dirksland, in 1691 removed to Vlissingen (Flushing), and in 1695 to Middelburg. In 1700 he was called to Rotterdam. Here he was installed April 25, 1700, and labored zealously in the ministry till his death, May 28, 1718. He was one of the favorite preachers in that city. Frytier was a zealous Voetian, and became deeply involved in the controversy which at that time raged in the Reformed Church respecting the general resurrection of the dead. His first efforts were those of a pacificator. The violent attack on the Cocmejans made by Pierre de Joucourt, minister of the Walloon church at the Hague, was ably answered by Brauinus, Van Til, and D’Outrein. Frytier was so much pleased with the replies of the two former that the latter wrote him a letter expressing his gratitude, and designed to effect a reconciliation. The effort was premature and fruitless. D’Outrein replied, showing that things were not yet ripe for such a result, and declaring that Frytier himself was not prepared to make sufficient concessions to the opposing party. Frytier replied, but to this rejoinder D’Outrein made no public response. This is thought to have had an exasperating effect on Frytier, who is said to have been a man of choleric temperament. In 1718 he issued a work that included him in serious difficulties. Its title is, Sion’s vorstellingen, of historische Zaken, over de verschijenende en zeer bittere weder- waarde, etc. of Christus Kerke (Zion’s Struggles, or Historical Confessions respecting the various and very bitter conflicts of the Church of Christ’s Church). The work was especially directed against the Cocmejan Ceccisians, and such as were regarded as rationalistic, but it assailed also the Biblical Cocmejans and Ceccisians himself. Three speakers are introduced—Trut, Petry, and Naaktmane. The Ceccisians are accused of open or secret enemies to the truth. The charges brought against them by Trut are briefly the following: such a misinterpretation of the Scriptures as was intolerable to those who cordially loved the truth; such an undermining, on the part of others, of the principles of Christianity that they seemed to be designed to restate heathenism, or enthrone the blasphemies of Socinus; the vital truths of the Bible were misunderstood by some, not believed by others, and openly ridiculed by still another class in their writings, while they were excessively pleased with imaginary errors of truth; and, finally, all these things were palliated and defended by others. The following are the charges made by Petry: an attempt to introduce a heathenish morality as a substitute for spiritual religion; as a consequence of this, that worldly and natural men began to ridicule religion and to entertain atheistic views; and, finally, the power of religion was no longer visible in the lives of many who professed to love the truth, but who, under the pretext of Christian liberty, had become conformed to the world. Naaktmane is introduced as an unsuccessful apologist for the Ceccisians. The gravity of the charges and the acrimonious spirit pervading the work gave just offence, and the Classis of Schieland refused their approbation. Notwithstanding this, it was sent forth to the world with the stamp of Church authority affixed to its title-page. This rendered the Classis indignant, and some of the members of the Classis determined to deprive him of his seat in the Classis, until he should retract and submit. After persisting for seven years in his refusal, he finally, in the year 1754, confessed his fault and testified his sorrow. He was immediately restored. It is conceded that Frytier may have been actuated by zeal for what he regarded as truth in the publication of his work; but his piety, which is admitted to have been deep and fervent, was not free from the admixture of fanaticism, nor was his devoted attachment to the truth, as he viewed it, free from bigotry. A new edition of Sion’s Vorstellingen has just (1869) been issued at Utrecht. His controversy and, moreover, that Frytier himself was not the Son, and the procession of the Holy Spirit from the Father and the Son, may be reserved for the article on Lampe. His ministry was long and laborious, and he seems to have been influenced by a sincere desire to serve the people of God. He is still represented and honored by a respectable posterity. See Ypee and Dermot, Geschiedenis der Nederlandsche Hervormde Kerck, iii Deel, blz. 181, 187-191, 202-204; en Aanteekeningen (Breda 1824); Glins, Godgeleerd Nederland, i Deel, blz. 475 en verv. (J. P. W.)

FRY, Elizabeth, an eminent female philanthropist,
was the daughter of John Gurney, a rich banker near Norwich, and a member of the Society of Friends. She was born May 21, 1780, at Bramerton. "The benevolence of her disposition displayed itself by her habit, while yet a girl, of visiting the poor on her father's property, and forming a school for the education of their children. After her marriage to Joseph Savery, an American Friend, she was brought to the knowledge and love of the truth. Her character from that day was entirely changed, and she became a genuine and consistent Christian. In 1800 she was married to Joseph Frye, Esq., of London, and consequently settled in England. The future of the institution is in the habit of visiting the poor; and although she became the mother of a large family, who were most tenderly loved and assiduously trained, she yet found leisure, by a rigid economy of time and arrangement of domestic duties, to render her beneficent offices to her poor and suffering fellow-creatures. In 1810 she became a preacher among the Friends. Every day was she found visiting charity-schools, in the houses and lanes of the poor, and in the wards of sick hospitals, till at length, by a providential train of circumstances, she was once more enabled to visit the inmates of a prison and a lunatic asylum (1813). The accents of Christian love found entrance into the hearts of those wretched outcasts, and she became the honored instrument of remodeling the discipline and improving the state of our national prisons. At the commencement of her career there was no distinction of any sort, no separation between male and female prisoners; all criminals, parents and children, men and women, those who were comparatively innocent with the inextremely depraved, were indiscriminately hedged together, and in those circumstances many left the prison far more familiar with crime than when they entered it. It required no small resolution and faith to enter such a den of iniquity as a British jail at that period was, but Mrs. Frye attempted it and was successful. Her dignity, and at the same time her feminine gentleness, subdued their ferocity and won their attention. She told them that vice was the cause of all their misery; that if they would return to virtuous habits they might again be happy, and she proposed rules for their observance, of which they unanimously expressed their approval. Repeating her visit after a short interval, finding that attention to tractable and submissive, she proceeded with her contemplated measures. She appointed a teacher to those children who had been committed for petty offences, and many of whom were under seven years of age. Even their profligate mothers took an interest in this infant institution, and by paying the employment for the women, by teaching them to sew, and supplying them with work. For the accomplishment of this arduous undertaking she formed a ladies' committee (1817), some of whom made it a sacred duty to attend in the prison daily, so that there was not a moment when the females were not under the superintendence of some proper and efficient guide. A matron was at length appointed to live in the prison, and take the oversight of the female prisoners. But the ladies' committee still continued their attendance, one giving instruction in needlework, another in reading and writing, while a third read some good religious book, and spoke to them about the guilt and the wages of sin, duty and the superior happiness of a sober, chaste, and religious life. In a few weeks the most astonishing moral revolution was effected within the walls of the prison; not only the language of blasphemy, obscenity, and profanity, and fiendish discord entirely disappeared, but women of the most abandoned characters were reclaimed to established habits of sobriety, industry, and piety. The public interest was greatly excited by the intelligence. Various ladies of highest official rank visited the schools, and the most undoubted testimonies were borne to the excellent principles and efficient working of these benevolent schemes. Mrs. Frye, while she continued her inspection of the prisons, extended her benevolent regards to other classes, such as making provision for female convicts both during their voyage out and at their allotted stations. She also visited all the principal jails in Scotland and Ireland, and Demerara, Demerara. A last scheme of philanthropy was begun with a view to benefit British seamen, particularly to alleviate the miserable state of the coast guard; forming libraries and adopting means for circulating books and tracts in men-of-war ships. These anxious and multiform labors made her a deserving object of this excellent lady. After trying the waters of Bath in the spring of 1845, she returned home no way improved, and gradually sank till she expired at Ramsgate, October 12. Her death was lamented throughout Europe as a loss to humanity. She was, as she has often been called, 'the female Howard,' and, like her prototype, her benevolent exertions were the fruit of a lively and established faith in the Gospel of Christ."—Rich, *Cyclopedia of Biography; Memoirs of Elizabeth Frye,* by her daughters (London, 1848, 2 vols.; New York, 1850, 2 vols. 8vo); *Cordon, Mr. of Mrs. Frye (London, 1859); Methodist Quart. Review, April, 1851, art. ii; North Brit. Rev. ix, 136; Princeton Review, xx, 81.

**Frye, Joseph,** a Methodist Episcopal minister of the Baltimore Conference, was born in Winchester, Frederick Co., Va., in 1786, of Lutheran parents; was converted under Methodist preaching, and began to exhort while young, and entered the itineracy in 1809. He retired from the ministry in 1836, and died in Baltimore May 1845. Mr. Frye had remarkable powers as a preacher. Hundreds were converted through his preaching. The Rev. Alfred Griffith relates that on one occasion General Jackson (then President of the United States) heard Mr. Frye preach. "The tears ran down the President's face like a river; and, indeed, in this respect, he only showed himself like almost everybody around him. When the service was closed, he moved up towards the altar with his usual air of dignity and earnestness, and requested an introduction to the preacher. Mr. Frye stepped down to receive the hand of the illustrious chief magistrate; but the general, instead of merely giving him his hand, threw his arms around his neck, and, in no measured terms of gratitude and admiration, thanked him for his excellent discourse" (Sprague, *Annals, vii, 478*).—Minutes of Conference, iv, 9.

**Frying-pan** (ןַחָרָה, *marché s[t*]heth, prop. a boiler*), a pot for boiling meat, etc. (Lev. ii. 7; vi. 9). See POT. Jarchi says it was a deep vessel, so that the oil could not become ignited upon the fire. The Rabbins distinguish it from the רַחָרָה, *machakath*, iron *pan*, flat plate, or slice (Lev. ii. 5; Ezek. iv. 8), and say that the former was concave and deep, though both were used for the same purpose. The Bedouins, and some other Arab tribes, use a shallow earthen vessel, somewhat resembling a frying-pan, and which is employed both for frying and baking one sort of bread. See BEAK.

There is also used in Western Asia some modification of this pan, resembling the Eastern oven, which Jerome describes as a round vessel of copper, blackened and heated the sides by the surrounding fire which heats it. This baking-pan is also common enough in England and elsewhere, where the villagers bake large loaves of bread under inverted round iron pots, with embers and slow burning fuel heaped upon them. Sometimes it looks like a deep concave pan may be seen in the paintings of the tombs of Egypt, in their representations of the various processes of cookery [see COOK], which no doubt bears a resemblance to the one used by the Hebrews on this occasion. See PAN.

**Fryth, John.** See FARRH.

**FUEL** (גֶּפֶל, oklah, and פֶּלֶס, *mabek* leth, both...
general terms for anything consumed, whether by eating or combustion. From the extreme scarcity of wood in many places, the Orientals are forced to use almost every kind of combustible matter for fuel; even the withered stalks of herbs and flowers (Matt. vi, 28, 30), thorns (Ps. lxv. 9; Eccl. vii. 6), and animal excrement and dung (Ezek. iv. 3, 4; 2 Kings xxv. 15; Isa. lv. 13, 15). Prof. Hackett speaks of the inhabitants of Lebanon picking up died grass, roots and all, for fuel, and says that it even becomes an article of trade (Illustr. of Scripture, p. 131). The inhabitants of Baku, a port of the Caspian, are supplied with scarcely white coal, which they obtain by the agency of a man named Gorev, who works the soil and petroleum with which the neighboring country is highly impregnated. The Arabs in Egypt draw no considerable portion of their fuel, with which they cook their victuals, from the exhaustless mummy-pits so often described by travellers. Wood or charcoal is still, as it was anciently, chiefly employed in the towns of Egypt and Syria. The roots of the rotheum, a species of the broom-plant (called in the English Bible "juniper"), which abounds in the deserts, are regarded by the Arabs as yielding the best charcoal (Job xxx. 4; Psa. xxx. 5). Although the coal of the ancients was that obtained from syenite or felsite coal from Lurgia and Elis was occasionally used by smiths, Theophrastus, Frag. ii, 61, edit. Schneider; yet the inhabitants of Palestine now to some extent use anthracite coal, which crops out in some parts of Lower Lower Egypt (Ezek. vi. 67). Wood, however, is their chief article of fuel, especially at Jerusalem, and it is largely brought from the region of Hebron (Tobler, Denkblatter aus Jerusalem, p. 180). See Wood. As chimneyys are but little known in the East, apartments are warmed in cold weather by means of braziers, made of various kinds, and either of metal or earthen-ware, which are set in the middle of the room after the fire of wood which it contains has been allowed to burn for some time in the open air, till the flame and smoke have passed away. Charcoal is also extensively employed for the same purpose (Jer. xxvi. 21). Grates are not known even where chimneys are found, but the fuel is burnt on the hearth, or against the back of the chimney. In cottages, a fire of wood or animal dung is frequently burnt upon the floor, either in the middle of the room or against one of the walls, with an opening above for the escape of the smoke. It is also common to have a fire in a pit sunk in the floor, and covered with a mat or carpet, so as not to be distinguished from any other portion of the floor. In all cases where wood is scarce, animal dung is used for fuel. Combining wood is considered much preferable to any other, but all animal dung is considered valuable (Ezek. iv. 15). When collected it is made into thin cakes, which are stuck against the sunny side of the houses, giving them a curious and rather unsightly appearance. When it is quite dry and falls off, it is stored away in basins for future use. It is much used for baking, being considered preferable to any other fuel for that purpose. See Fire.

Fugitive is the rendering in the A. V. of the following Heb. terms: נָשִּׁיאֵה (na [wandering]), a roarer (Gen. iv. 12, 14; elsewhere "wander," etc.); בֵּשָׁל (beshal) (one that has escaped, as often rendered), a refugee (Judg. xii. 4); סְפָּחֵל (sophel) (falling, as usually rendered, i. e. away to the enemy), a deserter (2 Kings xxv. 11); פָּרָשָׁה (parashah), a breakaway, (i. e. flight), fugitives (only in the plural. and Ezek. xvii. 21); פָּרָשָׁה (parashah) (from the same root as the last, prop. a bolt, as often rendered, hence a prince; but here perhaps simply a breakaway, a fugitive (Isa. xv. 5).

Fuh-ho, sometimes spelled Foh, is not frequently confounded with Fo, the Chinese Buddha, from whom, however, he was separated by centuries, and with whose religious teachings those of Fuh-ho had nothing in common. Fuh-ho is the reputed founder of Chinese civilisation, having "established social order, instituted marriage, and taught the use of writing" among that people. He is alleged to have been born in the province of Shensi, and to have reigned B.C. 2932. It is not probable, however, that nature of the doctrine he ersoned his authority with were of anything but tolerable accuracy. According to Chinese tradition, the first man who was created was Pwan-ko, or Animated Chaos, who was "succeeded by three sovereigns, styled Heaven Emperor, Earth Emperor, and Man Emperor, or Heavenly, Earthly, and Human Napoleon. Hence in the napoleonic war against the Great Extreme, and the triplification of the Great Extreme, or Supreme Unit." This first creation was destroyed by a deluge. When this had subsided, the first man who reappeared was Fuh-ho. He issued with his wife and six children from the "sacred circle." "Fuh-ho," says the Chinese text, "is the first who appears at each opening and spreading out" [of the universe]. Thus Fuh-ho is but the reappearing of Pwan-ko, and, as he escaped from the deluge, he has many of the characteristics of Noah.

His Writings.—The Chinese were originally worshipers of the heavenly bodies. Fuh-ho reduced their worship to a higher form of religion, substituting a philosophy of natural phenomena. He is claimed by the author of the most ancient of the Chinese canonical books, called Yaj King, "The Book of Changes," an expanded form of ancient and recondite speculations on the nature of the universe in general, the harmonic and cosmological elements of creation." It is based on some eight peculiar diagrams called Kueh. In the hands of the commentators this "cosmological essay" became a "standard treatise on ethical philosophy." The following summary of the Yaj King, or Y King, is given by Faber, Origins of Pagan Idolatry, 1, 246; "Yaj King, or Y Y received its name from the mystery of which it treats, the mystery being hieroglyphically represented by a figure resembling the Greek Θ or Roman Y. It teaches that the heaven and the earth had a beginning, and therefore the human race; that of the heaven and earth all material things were formed, man male and female, then husband and wife. The Great Term (as they call it) is the Great Unity and the Great Y. Y has neither body nor figure, and all that has body and figure was made by which has neither body nor figure. The Great Term, or the Great Unity, contains two side walls, and thus the Two and the Three One. Tao is life. The first has produced the second, and the two have produced the third, and the three have produced all things. Whom the spirit perceiveth, and whom the eye cannot see, is called Y."—Morrison, Chinese Classical Literature, 209. Yaj King is also connected, especially by the Père de Chine; Journal de l'Association Sociale (1860), xiv, 403, 404; Faber, Origin of Pagan Idolatry, 1, 246; Hardwick, Christ and other Masters, ii, 17, 18; Legge, Life and Teachings of Confucius (Philadelphia); Gutzlaff, Chinese History, i, 110. (J. T. G.)

Fulbert, bishop of Chartres, one of the most eminent and learned prelates of the 11th century. The place of his birth is unknown. He was probably born about A.D. 900, in Italy, but educated in France about A.D. 990 he commenced a school at Chartres, where he continued his instructions for some time, and with such success that his fame for learning spread to the most distant parts of the kingdom. Many of the best scholars of those times were Fulbert's pupils, and he contributed largely to the revival of literature. Berengar of Tours was one of his pupils, and king Robert was his intimate friend. His pupils always spoke of him with affection and veneration. He was not "satisfied with imparting to his scholars all possible knowledge, but he regarded it of the greatest moment to take care for the welfare of their souls. One of Berengar's fellow-students at that time was Abbot Adam, in a letter written at a later period, of which letter we shall have occasion to speak on a future page.
reminded him of those hearty conversations which they had at eventide, while walking solitarily with their preceptor in the garden, how he spoke to them of their heavenly country, and how sometimes, unmanned by his feelings, interrupting their song in thus tears, he ad- jured them by those tears to strive with all earnestness to reach that heavenly home, and for the sake of this to beware, above all things, of that which might lead them from the way of truth handed down from the fathers" (Neander, Church Hist., Torrey's transl., iii, 606, where the original quotation is cited). After 1847 he ordained bishop of Chartres, and died in 1029. It is said that he was the first who introduced the celebration of the festival of the Virgin's Nativity in France: it is certain that he was a zealous upholder of her honor, since he built the church of Chartres to her praise. His writings consist of 104 Epistles:--Tractatus contra Judaeos:--Sermones:--Carmina, etc. According to bishop Cosin, his doctrine on the Eucharist was alto- gether conformable to that of the primitive Church; but his first epistle (the fifth in Migne) to Adeodatus teaches transubstantiation. Yet his language on the Eucharist is sufficiently indefinite to have probably led his pupil Berengar (q.v.) to his more scriptural and spiritual views of that sacrament. His works were edited by Masson (Paris, 1856), by Villiers ("in bad faith," Mosheim, Par. 1808, 8vo), and in the Bib. Marc. Parisii, 1819, 8vo. There are many versions in Migne, PatroL Latina, t. 141, where also several biographies of Fulbert are collected. See Oudin, Script. Eccl. ii, 519; Cellier, Ant. Sacris (Paris, 1865), xxii, 78; Dupin, Eccl. Writs, i, 1 sq.; Mosheim, Church Hist. cent. xii. pt. ii, ch. ii, § 81, n. 65; Neander, Ch. Hist. iii, 470, 502; Clarke, Succession of Sacred Literature.

Fulcherius, CAROLESCHIS (Foucher de Chartres), a medieval French priest and historian, was born at Chartres in 1059, and died in 1127 at Jerusalem, whilst he had gone on the first Crusade (1096) as chaplain to Baldwin, whom he followed in all his expedi- tions. His Histoire de Jerusalem, continued to the year of his death, embraces the greater part of the events of the Crusade from the council at Clermont (1095), and is especially important as being a record of such facts only as himself or other eye-witnesses could verify. It was published by Bongars in Recueil des Histoires de la Croisade, and in a fuller and cor- rected form by Duchesne in Histoires de France (vol. iv), and in the Histoires des Croisades published by the Academy of Inscriptions and Belles-Lettres.-- Hoefer, Nouv. Biog. Générale, xviii, 282-3; Histoire Litéraire de la France, t. xi. (J. W. M.)

Fulco (FOULQES, FULC) OF NEUILLY, one of the most popular preachers of the Middle Ages, was born in the second half of the 12th century. "He was one of the ordinary, ignorant, worldly-minded ecclesiastics, the priest and parson of a country town not far from Paris. Afterwards he experienced a change; and as he had before neglected his flock, and injured them by his bad example, so now he sought to build them up by his wise counsels, and held the flock with his lack of education for the ministry," he went on week-days to Paris, and attended the lectures of Peter Can- tor, a theologian distinguished for his peculiar scriptu- ral bent and his tendency to practical reform; and of the knowledge here acquired he availed himself by eloquent sermons in most churches on Sun- days to his flock. These sermons were not so much distinguished for profoundness of thought as for their adaptation to the common understanding and to the occasions of practical life. At first neighboring cler- gymen heard him, and later in larger congrega- tions. Next he was called to Paris, and he preached not only in churches, but also in the public places. Professors, students, people of all ranks and classes, flocked to hear him. In a coarse cowl, girt about with a thong of leather, he itinerated as a preacher of repentance through France, and fearless denounced the reigning vices of learned and unlearned, high and low. His words often wrought such deep compunc- tion on those he reproved that they fell on their knees, and sobbed on the ground before him, confessed their sins before all, and declared themselves ready to do anything he might direct in order to reform their lives, and to redress the wrongs which they had done. Users restored back the interest they had taken; those who had committed murder or theft, who, in this impious luxury, had wasted their substance, bought large quanti- ties of grain to sell again at a greatly advanced price, threw open their granaries. In such times he fre- quently exclaimed, 'Give food to him who is perishing with hunger, or else thou perishest thyself.' He an- nounced to the corn-dealers that before the coming harvest they would be forced to sell their store-up grain, and cheap it soon became in consequence of his own announcement. Multitudes of abandoned women, who lived on the wages of sin, were converted by him. For some he obtained husbands; for others he secured a means of life. He expected the impure a share of the clergy; and the latter, seeing the finger of ev- ery man pointed against them, were obliged to sepa- rate from their conculcines. A curse that fell from his lips spread alarm like a thunderbolt. People whom he so addressed were seen to fall like eulipses, and the women died of fear and shame. Such appearances promoted the faith in the supernat- ural power of his words. Sick persons were brought to him from all quarters, who expected to be healed by his touch—by his blessing; and wonderful stories were told of the miracles thus wrought. . . . The per- sonal influence of this man, who stood, renowned nei- ther by his talents nor his official station, gave birth to a new life of the clergy, a greater zeal in discharging the duties of the predicatorial office and of the care of souls, both in France and in England. Young men, who for many years had been studying a dialectic that the University of Paris, had forgotten the obligation to care for the salvation of souls, were touched by the discourses of this unlearned itinerant, and trained by his instrumentality into zealous preachers. He for- merly left him behind a peculiar school; he sent his disciples over to England, and his example and stimulating effect even on such as had never come into personal contact with him. 'Many,' says Jacob of Vitry, 'inflamed with the fire of love, and incited by his example, began to teach and to preach, and to lead not a few to repentance, and to snatch the souls of sin- ners from destruction.' (Neander, Church Hist. Tor- rey's transl., iv, 209). When Innocent III proclaimed the fourth Crusade, A.D. 1198, Fulco devoted himself wholly to preaching in its favor, and among all the "orators who blew the sacred trumpet" he was the most successful. "Richard of England was satiated with the glory and misfortunes of his first adventure, and he presumed to deride the exhortations of Fulco, who was not alarmed in the presence of kings. 'You advise me,' said Plantagenet, 'to dismiss my three daughters, pride, avarice, and incontinence. But I beleaue thenceforth that the soul succeeding him must, as the Knights Templars, my avance to the monks of Cis- teaux, and my incontinence to the prelates. ' But the preacher was heard and obeyed by the great vassals" (Gibson, Decline and Fall, Harper's edition, vi, 60). Fulco did not live to see the results of the Crusade; he died at the age of A.D. 1201. -- Villehardouin, Histoire de la Conquête de Constantinople (transl. by T. Smith. Lon- don, 1829, 8vo); Hoefer, Nouv. Biog. Générale, xviii, 308; Milman, Latin Christianity, bk. ix, ch. vii; Gieseler, Ch. History, per. iii, § 80; Hurter, Geschichte Pobal In- nocenti III (Hamburg, 1884), vol. i; Herzog, Real-En- cyclopad. xix, 808.

Fulda, MONASTERY OF, a celebrated convent, es- tablished in 744 by Boniface, and one of his pupils named Sturm. The latter, a young man of good fam-
FULDA MANUSCRIPT

FULTIUS

ily, having decided on becoming a hermit, was sent by Boniface to search out a spot in the forest of Buchina, secure from the inroads of the Saxons. Sturm set out with two companions, and finally selected a plot of land on the banks of the Fulda, which was given them by duke Karlmann. In January, 744, Sturm and seven companions took possession, and immediately commenced building a church. The convent was organized on the plan of Monte Cassino, after the rule of St. Benedict, and Sturm became its first abbot. In Nov. 4, 751, pope Zachariah exempted it from episcopal jurisdiction. The convent prospered rapidly, its inmates numbered 250 in 775; its prosperity still increased under Sturm’s successor, Bangulf. Both Pepin the Short and Charlemagne were very liberal towards this convent, which in its turn did great good in disseminating the knowledge of agriculture as well as literature throughout the surrounding country. Its celebrated theological school was particularly prosperous under Rabanus Maurus, who afterwards became abbot of Fulda. There were twelve seniors or sub-instructors, and the scholars were instructed in grammar, rhetoric, dialectics, theology, and the German language. Nor were either faculty, nor any other service, inferior to that of these scholars, which produced both clever artists and talented artisans. Under the abbots Werner (968 to 982), Fulda became the first among the abbeys of Germany and France. Otto I named its abbots arch-chancellors of the empire. When John of Trier led the citizens of Fulda to assault the convent, but the assailants were overpowered and their leaders put to death. The Reformation at first made an Impressio in the convent, but abbot Balthinus succeeded in 1573 in checking the progress of evangelical doctrines within its walls. In 1631 Fulda was subjected to Sweden, and an attempt was made to introduce Protestantism into the district, but, after the defeat of Nördlingen, the Roman Catholic abbots resumed their sway. In 1809, Fulda, which six years before had become a principality of the prince of Orange, was by Napoleon I annexed to the grand-duchy of Frankfurt, but Pius VII finally joined it in 1815 to the electorate of Hesse-Cassel, of which it remained a part until the incorporation of that country, in 1866, with Prussia. See Brower, Antiq. Fulda. lib. iv (Antwerp, 16); Dronke, Traditions et True de l’Église Catholique (Fulda, 1942); Neron, Zeit. f. hist. Theol. (1846); Herzog, Real-Encyklop. iv, 624; McLeay, Christian Missions in the Middle Ages, p. 214.

Fulda Manuscript (CODEC Fuldenensis), one of the finest copies of the early Latin version, containing the whole N. T., written by order of Victor, bishop of Capua, A.D. 546, and now in the Abbey of Fulda, in Hesse-Cassel. The Gospels are arranged in a kind of harmony. It was described by Schaunat (Vindemiae Literariae Collectio, 1723 p. 216), collated by Lachmann and Buttman in 1839 for the Latin portion of the N. T., and has been edited by Voss. Banke (Mab. 1867, 2d ed. 1875; Brunner, Intro. p. 264; Trutnew, in Horae introd. iv, 254). See Latin Versions.

Fulle (usually τοῦ, mięś, νηροῦ, to fill up), generally used with reference to the accomplishment of prophecy. It is used in the O. T. with respect to various kinds of prophecies, such as are imminent (e. g. the death of Jeroboam’s child, 1 Kings 14, 17), or distant (e. g. that referring to the rebuilding of Jericho, 1 Kings 15, 15). Those words were delivered in a near as well as in a remote event [see Daniel 9, 25; 11, 33, 36], those that relate to some similar typical occurrence, class, or character [see Type], proverbial expressions [see Proverb], and especially predictions relating to the Messiah. Several distinguished scholars consider that the form of the N. T. contains no allusion to the O. T. and introduced by the formula, “All this was done that it might be fulfilled which was spoken of the Lord by the prophet (Matt. i. 22; ii. 15); “For thus is written by the prophet” (Matt. ii. 5); “Then was fulfilled that which was spoken” (Matt. ii. 17), may be mere allusions, without its being intended to declare that the literal fulfilment took place on the occasion described. Even if those passages could not be applied to certain events, otherwise than by accomodation of the language of the prophet, the event was necessarily intended to be ever so plain; and the reader will easily bend to that explanation; for it may be shown, by examples from the Rabbins and from the earliest Syriac writers, that in the East similar modes of speech have always been in use. See ACCOMMODATION. DATION. For the form of the N. T. see the formula "that it might be fulfilled," "then was fulfilled," etc., when used with reference to the fulfilment of prophecy in the New Testament, the events are not to be understood as happening merely for the purpose of making good the predictions, but rather that in or by this event was fulfilled the prophecy. The very ambiguity in the understanding of the first of these formulas arises from what are technically called the teile and the ecalatic uses of the Greek particle τον. It is also to be noted that the individuals or nations actually engaged in fulfilling prophecy often had no such intention, or, if they did, the event was conceived as fulfilling the formula "that it might be fulfilled," "then was fulfilled," and similar expressions in both the Heb. and Gr. Scriptures, always designate an intentional and definite fulfilment of an express prediction (Meth. Quart. Rev. April, 1867, p. 194). See Prophecy.

Fulentius, St., Fabius Claudius Gordianus, bishop of Rome, one of the 6th century, was born at Telepta (Leptis), in the province of Byzacena, North Africa, A.D. 468. His father dying in his childhood, the care of his education fell on his mother, who had him carefully instructed in the Greek language. It is said that when a boy he could repeat the whole of Homer. In early manhood he was made procurator of his native place, but, disgusted with the world, he threw up his office and devoted himself to the monastic life, against his mother’s will. He first entered a monastery at Byzacena, but in the disorders of his times he was compelled to abandon it, and retired to Africa, where he was seized by the Arians. Afterwards he resolved to go into Egypt, but was dissuaded by Eulalius, bishop of Syracuse, because the monks of the East had separated from the Catholic Church. He went from Sicily to Rome about A.D. 505, where he returned to Africa and founded a new monastery. The see of Ruspe becoming vacant, he was ordained bishop, much against his will, in the year 504. “Though become a bishop, he did not change either his habit or manner of living, but used the same austerities and abstinence as before. He defended his faith at once boldly and respectfully against his Arian sovereign. He speaks thus to the king in an apologetic treatise which the monarch himself had called for (Lib. iii ad Trajanum): ‘If I freely defend my faith, as far as God enabes me, no reproach of obstinacy should be made against me, since I am forgetful of my own life, and to a smallness, that is, and to the dignity; and I know well that I am to fear God and honor the king, according to Rom. xiii, 7; 1 Pet. ii. 17. He certainly pays you true honor who answers your questions as the true faith requires.[1][2][3] Having attained to the highest rank of a monarch of a yet uncivilized people, showed so much zeal for the knowledge of scriptural truth, he says: ‘You know well that he who seeks to know the truth strives for far higher good than he who seeks to extend the limits of a temporal kingdom.’ He was banished twice to Sardinia. There he was the spiritual guide of many other exiles, who united themselves to

FILLER

him. From hence he invited counsel, comfort, and confidence into the faith to his forlorn Christian friends in Africa, and to those from other countries who sought his advice in spiritual things and in perplexities of the heart'" (Neander, Light in Dark Places, N.Y. 1885, 31 sq.). After the death of Thraimund, he and all the other expelled bishops were recalled by Hilary in 364, and the latter, according to them, is most important are, against Arianism and Pelagianism. The most important are, against Arianism: Libri iii ad Thraimundum. De Trinitate Liber: Contra Sermonem Paschali Sermones; against Pelagianism: Libri Tris ad Monumenum. De Veritate Presbyteratissimo et gratia Dei. Liber de Presbyteratissimo et Gratia. Fugentius was led to write against Pelagianism by the writings of Faustus of Rhegium (q. v.), which were laid before him for his judgment. He explained "the system of Augustinie with logical consistency, but in doing this he carefully avoided the harsh points of the Presbyteratissimo view of the church, that severely condemned those who tasted of a presbyteratissimo to sin. He spoke, indeed, of a two-fold presbyteratissimo (presbyteratissimus duplex), but by this he understood either the election to eternal happiness of those who were good by the grace of God, or the presbyteratissimo of those who were simply "in their own choice to deserved punishment" (Neander, Ch. Hist. ii, 650. See also Hagenbach, History of Doctrines, § 114). Editions of his writings: Basel, 1565, 1566, 1567, 1574, Antwerp, 1574; Cologne, 1614; Lyons, 1638, 1652, 1671; best, that of Paris, 1864, 4to; reprinted at Venice, 1742, fol., and in Migne, Patrologia Latina, t. ixv. See Herzog, Real-Enzyklop. iv, 627; Wetzer u. Welte, Kirchen-Lex. iv, 249; Ceillier, Autres Secrèts (Paris, 1682), xi, 1 sq.; Dupin, Eccles. Writers, v, 18 sq.; Fleury, Hist. Eccles. lib. XXX, XXXI.

FUGENTIUS, FERRANDUS, a friend and pupil of Fugentius of Rupse, who with him partook of exile in Sardinia. On his return to Carthage he became a deacon, A.D. 528. He died A.D. 561. He was one of the first to declare against the condemnation of the Three Chapters. He also took part in the controversy at that time agitating the Church whether it was orthodox to say, "One person of the Trinity has suffered. Fugentius defended this expression, but recommended a change in the form by which he had "used". Of his writings, we have a Brevario Canonicum (An Abridgment of the Ecclesiastical Canons), containing 222 canons of the councils of Anchry, Laodicea, Nice, Antioch, Gangra, and Sardica, the canons of which last council, he most probably, took from Dionysius Exiguus. It was published by the Jesuit Chifflet at Dijon (1649, 4to). He left also a number of Epistles, which, with the Canons, may be found in Bib. Max. Patr. ix, 475, and in Migne, Patrologia Latina, vols. ixxv, ixxvii, ixxviii. A work against the Arians and other heretics was first published by him. Mgr. Durand, sons of Fugentius, Real-Enzyklop. iv, 626; Wetzer u. Welte, Kirchen-Lex. iv, 250; Cave, Hist. Liter.; Clarke, Succession of Sac. Lit.

FULCO, WILLIAM, D.D., a famous Puritan divine, was born in London, and went in 1556 to St. John's College, Cambridge, of which he became fellow in 1564. He spent six years at Clifford's Inn, studying law, but preferred letters, and especially theology. He was the style of a young man; but, being suspected of his intention, as he was the intimate friend of Cartwright, then professor of divinity, he was expelled from college. The earl of Leicester presented him in 1571 to the living of Warley, in Essex, and two years after to Kedington, in Suffolk. He afterwards took his degree of D.D. at Cambridge, and, as chaplain, accompanied the earl of Lincoln when he went as ambassador to France, and on his return he was made master of Pembroke Hall, and Margaret professor. He died in 1589. "It force of argument and criticism he was one of the ablest divines of his time, and one of the principal opponents of the Roman Church" (Darling). His writings, which were very numerous, both in Latin and English, were directed chiefly against Popery. The most important were, against the arguments of the New Testament, and the authorized English Version, with the Arguments of the Proofs, Chapters, and Annotations of the Rhemians, and Dr. Fuller's Conflation of all such Arguments, Glosse, and Annotationes (first edition, 1580; often reprinted; 8vo). A. Cam-bridge, 1848, 8vo; New York, 1843, 8vo) - Defense of the sincere and true Translation of the Scriptures, against Gregory Martin (new edit. by Parker Society, Camb., 1848, 8vo) - Answers to Stopford, Martialis, and Sanders (on the controversy with Rome, reprinted by the Parker Society, Cambridge, 1848, 8vo).

FUGENTIUS, BERNARDUS, was born in 1602. He pursued his collegiate course at the University of Frencnc. He devoted himself specially to the study of the Hebrew and mathematics. His proficiency in both studies was great. When only twenty-seven he was appointed to fill the chair made vacant by the death of an established Orientalist, Sixtus Ammianus. He accepted the appointment, and in 1630 he entered upon the discharge of its duties. For seven years he filled the office with fidelity and acceptance. The professorship of mathematics was then tendered to him, and the celebrated Cocceius appointed him his successor in the department of Oriental literature. He was one of the committee appointed by the Synod of Dort to revise the new translation of the New Testament. An edition of J. Drusius Commentaria ad librum Codicis Salomonis et Jobis was brought out under his editorial supervision, and with prefaces prepared by him. See Glavius, Godegeerter Nederland, i Decel, blz. 479; G. Brandt, Historie der Reformatie, etc., ii Decel, blz. 56 (Rotterdam, 1704). (J. P. W.)

Fuller (C22, kobet', from כֹּבֶץ, to tread [comp. Gesenius, Monum. Phoen. p. 181]; γαφετίς). The art of the fuller is beyond doubt of great antiquity, and seems to have reached at an early period a comparatively high degree of perfection. Very scanty materials, however, exist for tracing its progress, or for ascertaining exactly, in any particular age or country (see Pliny, vii, 57), what substances were employed in the art, and what methods were resorted to for the purpose of making them effectual. At the transfiguration our Saviour's question was, "Doth man have to be washed with so much water on fuller on earth could white them?" (Mark ix, 3). Elsewhere we read of "fullers' soap" (Mal. iii, 2), and of "the fullers' field" (2 Kings xviii, 17). Of the processes followed in the art of cleaning cloth and the various kinds of stuff among the Jews we have no direct knowledge. In an early part of the operation they seem to have trod the cloths with their feet (Gesenius, Thes. p. 1261), as the Hebrew Hiv-nogel, or En-nogel, literally Foot-fountain, has been rendered, on Rabbinical authority, Fullers' fountain," on the ground that the fullers trod the cloths there with their feet (comp. Hôst, Marabou, p. 116). They were also rubbed with the knockels, as in modern washing (Synes. Ep. 44; compare Euseb. Hist. Eccli. i, 2). A subsequent operation was probably that of rubbing the cloth on an inclined plane, in a mode which is figured in the Egyptian drawing of the time (G. Maspero, ii, 106, fig. 1), and still preserved in the East. It seems from the above notices that the trade of the fullers, as causing offensive smells, and also as requiring space for drying clothes, was carried on at Jerusalem outside the city (comp. Marial, vi, 93; Plut. Arab. v, 5, 3), and Aldermaston, a town (officina fultonis) is mentioned in the Talmudic writers (Midrash, Kokel. xcii, 2) by the name of הלקות ינדיב, "house of maceration." So far as it is

mentioned in Scripture, fulling appears to have consisted chiefly in cleansing garments and whitening them (compare šăli'ān, Var. Hist., v. 5). The use of white garments, and also the feeling respecting their use for festal and religious purposes, may be gathered from various passages: Exod. ix. 8.; Dan. vii. 9.; Isa. xiv. 6.; Zech. iii. 5.; 2 Sam. vi. 14.; 1 Chron. xvii. 27.; Mark ix. 5.; Rev. iv. 4.; vi. 11.; vii. 9.; compare Mishna, Tammūt, iv. 8.; see also Statius, Silv. i. 2. 287.; Ovid, Fast. i. 79.; Claudian, De Bello, Sil. iii. 289.

This branch of the trade was perhaps exercised by other persons than those who carded the wool and smoothed the cloth when woven (Mishna, Babba Kama, i. x. 10). Applying the marks used to distinguish cloths sent to be cleaned, fullers were desired to be careful to avoid the mixtures forbidden by the law (Lev. xix. 29.; Deut. xxii. 11.; Mishna, Moed, Kilaim, ix. 10.). Colored cloth was likewise fullied (Mishna, Shabb. xix. 1.). See Schöttgen, Tricres et fuliones (2d edition, Lips. 1763). See Handicrafts.

FULLER’S SOAP (בְּרֶסֶת בְּרָס, bōrith mekabbeshinim), alluvial of those treading cloth, i. e. washers' potsail; Sept. υποφόροι τῆς ψιλοκυνής, some alkaline or saponaceous substance mixed with the water in the tubs used for stamping or beating cloth. Two substances of the nature are mentioned in Scripture: "neither nitre (αύριον, nitrum, Prov. xxv, 20; Jer. ii. 22.), and רְבִית, rabith, soap (voie, herba fulillum, herba borith, Mal. iii. 2.)." Nitre is found in Egypt and in Syria, and vegetable alkalai was also obtained there from the ashes of certain plants, probably Sahoukal kaii (Gesenius, Thesaur. Heb. p. 266: Pliny, xxxvi. 10. 46; Hassenheister, p. 278) among others. The juice also of some saponaceous plant, perhaps Gymnosphaera struthium, or Saponaria officinalis, was sometimes mixed with the water for the like purpose, and may thus be regarded as representing the soap of Scripture. Other substances also are mentioned as being employed in cleansing, which, together with alkali, seem to identify the Jewish with the Roman process (Pliny, xxxvi. 57.), as urine and chalk (creta cinolia), and bean-water, i. e. bean-meal mixed with water (Mishna, Shabb. ix. 5; Niddah, x. 6.). Urine, both of men and of animals, was regularly collected at Rome for cleansing cloths (Plin. xxxvi. 26., 48; Athen. xii. p. 484; Mart. ix. 93; Plautus, Aeschin. v. 2, 57.), and it seems not improbable that its use in the fullers' trade at Jerusalem may have suggested the coarse taunt of Rabshakeh during his interview with the deputies of Hezekiah in the brayway of the fuller's field (2 Kings xviii. 27); but Schöttgen thinks it doubtful whether the Jews made use of it in fulling (Antiq. full. § 9.). The process of whitening garments was performed by rubbing them into chalk or earth of some kind (דְּשָׁן). Creta cinolia (ciniolite) was probably the earth most frequently used ("creta fulillum," Pliny, xvii. 4.; compare Theophrastus, Charact. 11.). The whitest sort of earth for this purpose is a white pot-

FULNESS

the Church of the Holy Sepulchre, leading to Sille (Nely Samwel) and Gibson, and also the Serb of Arabian writers (Edrisi, about A.D. 1150, ed Jaubert, i, 814; "History of Jerusalem," in the Fundgr. des Orient, ii, 129). It seems to have derived its name from leading to the Fuller's Field (Isa. vii, 5).

FULLEN'S MONUMENT (μνημα το γερατος), a conspicuous object mentioned by Josephus in his account of the course of the third or outer wall of Jerusalem (War, v, 4, 2), as situated near "the tower of the corner," where the wall bent, after passing the sepulchres of the kings, to the valley of the Kidron; evidently, therefore, at the north-east angle of the ancient city (Strong's Harm, and Expos. of the Gospel, Append, p. 25). It does not follow, as Dr. Barclay supposes (City of the Great King, p. 22), that the monument in question was situated at the Fuller's Field. See Jerusalem.

Fuller, Andrew, perhaps the most eminent and influential of Baptist theologians, was born Feb. 6, 1754, at Wicken, Cambridgeshire, England. His opportunities for education were scanty, and his subsequent attainments and success to a great degree resulted from the activity of mind naturally vigorous working earnestly on no very ample materials. He was baptized in 1770, began preaching in 1774, and in 1775 became pastor of a church in Soham. His doctrinal system at this time was unsettled. The prevailing type of opinion then prevalent was the Baptist and moderate Calvinism, verging to an Antinomian and fatalistic extreme. It was deemed necessary to a consistent orthodoxy for a preacher to avoid offering freely to all men the invitation of the Gospel. Dr. Gill (q. v.) was the standard of doctrinal soundness. Fuller states that Gill and Bigney were authors to whom he was much indebted. He gradually found that they did not agree, and still more was he impressed with the practical difference between the accepted teaching and the New Testament. In 1776 he became acquainted with Mears, Ryland and Sutcliffe, names to be afterwards honorably associated with his in the foreign missionary work. The works of the New England theologians, particularly Edwards and Bellamy, confirmed him in the views to which his mind had been tending. The change in the spirit of his preaching awakened violent opposition. His congregation, however, increased, and the effects of his doctrine confirmed his faith in it. In 1782 he removed to Kettering, which was the scene of his labors to the close of life. Here, in 1784, he gave deliberate expression to his views in the tracts, The Gospel worthy of all Acceptation. In the same year he was associated with Sutcliffe in a meeting for united prayer for the revival of religion and the conversion of the world—the origin of the "Monthly Concert." Out of these counsels grew the missionary movement under the leadership of Carey (q. v.), in which, as secretary of the Baptist Missionary Society, Fuller bore a laborious and responsible part. In 1793 he appeared his celebrated treatise, The Calvinistic and Socinian Systems compared. Princeton College in 1795, and Yale in 1805, conferred upon him the degree of D.D., which he moanently declined. He died July 7, 1815. His other works are: The Gospel's own Witness (1800);—4. Dialogues, Essays, and Letters:—5. Exposition of Genesis.—6. The Great Question answered (1806);—7. Structurae de Sonderamannium (1809);—8. Sermones on various Subjects.—9. Exposition of the Revelation.—10. Letters on Communion (1815). His writings are marked by the force of argument, plainness and simplicity of statement, and an ingenuous candor. In reference to his unaffected style, he has been called "the Franklin of theology." Without the opportunity to become a critical student of the Scripture, and with a better biblical theology in many whose scholarship he could not aspire to. For his theological position, see the article CALVINISM.—Works, with Life prefixed, 5 vols. London, 1831; also 1858, imp. 8vo; more complete edition, edited by Belcher, 3 vols. Philadel. (L. E. S.)

Fulcher, Thomas, divine, historian, genius, and wit, was a son of the Rev. T. Fuller, minister of Aldwinkle, in Northamptonshire, at which place he was born in June, 1608. He was educated at Queen's College, Cambridge, and removed to Sidney College, of which he became fellow in 1611. In 1623 he was appointed minister of St. Bennet's parish, Cambridge, and acquired great popularity as a pulpit orator. He obtained, in the same year, the prebend of Salisbury, and afterwards the rectory of Broad Windsor, of both of which he was deprived during the Civil War, in consequence of his activity on the side of the Parliament. Between 1640 and 1656 he published nearly the whole of his works. In 1648 he obtained the living of Waltham, in Essex, in which he resided for that of Cranford, in Middlesex. At the Restoration he recovered the prebend of Salisbury, was made D.D. and king's chaplain, and was looking forward to a mitre, when his prospects were closed by death, August 15, 1661. Fuller possessed a remarkably tenacious memory. He had also a large share of wit and quaint humor, which he sometimes allowed to run riot in his writings. Among his chief works are: History of the Holy War (Camb. 1640, 2d edit. fol.):—The Church History of Britain (new edit. edited by Nichols, Lond. 1837, 8 vols. 8vo):—The History of the University of Cambridge (new edit. Lond. 1840, 8 vols. 8vo):—Francis Jennings, of Palay's History of the Old and New Test. (Lond. 1662, fol.). Coleridge says that "Fulcher was incomparably the most sensible, the least prejudiced great man of an age that boasted a galaxy of great men. He is a very voluminous writer, and yet, in all his numerous volumes on so many different subjects, it is scarcely too much to say that you will hardly find a page in which some one sentence out of every three does not deserve to be quoted for itself as a motto or as a maxim." See Russell, Memorials of the Life and Works of Fuller (Lond. 1844, 4 vols. 8vo); Huggins, Fuller's Life and Writings (Edinb. Rec. lxxiv, 326).

Fullerton, Hugh Stewart, a Presbyterian minister, was born near Green castle, Penn., Feb. 6, 1805. Not long after, his parents removed to Orange Co., N. Y., and in 1815 to Fayette Co., Ohio. He studied one year at the Ohio University, and was licensed to preach in 1830. In 1831 he accepted a call to the Presbyterian Church at Chillicothe, where he labored four years, and then resigned from ill health. In 1837 he removed to Salem, Ohio, where he remained until his death, Aug. 15, 1862.

—Wilson, Presbyterian Hist. Almanac, 1864.

Fulness, a term variously used in Scripture. (1.) "The fulness of time" is the time when the Messiah appeared, which was appointed by God, promised to the fathers, foretold by the prophets, and expected by the Jews themselves, and earnestly longed for by all the faithful: "When the fulness of the time was come, God sent his Son," Gal. iv. 4. (2.) The fulness of Christ is the superabundance of grace with which he was filled: "Of his fulness have we all received," John i, 16. And whereas men are said to be filled with the Holy Ghost, as John the Baptist, Luke 1, 15; and Stephen, Acts vi, 5; this differs from the fulness of Christ in these three respects: (a) Grace in others is by participation, as the moon hath her light from the sun; but the grace of God is an incommunicable fulness in Christ all that perfection and influence which we include in that term is originally, naturally, and of himself. (b) The Spirit is in Christ infinitely and above measure, John iii, 34; but in the saints by measure according to the gift of God, Eph. iv. 16. (c) The saints can only communicate their graces to one another, whereas the gifts of the Spirit are in Christ as a head.
and fountain, to impart them to his members. "We have received of his fulness," John i. 16. (8.) It is said that "the fulness of the Godhead dwells in Christ bodily," Col. ii. 9; that is, the whole nature and attributes of God are in Christ, and that really, essentially, or substantially; and also personally, by nearest union; as the soul dwells in the body, so that the same person who is man is God also. (4.) The Church is called the fulness of Christ, Eph. i. 23. It is the Church which makes him a complete and perfect head; for, though he has a natural and personal fulness as God, as Mediator he is not full and complete without his mystical body (as a king is not complete without his subjects), but receives an outward, relative, and mystical fulness from his members (Watson, Dictionary, s. v.). (5.) It is probable that the expression fulness of the Godhead, as applied to Christ (Col. i. 19; ii. 9), contains an allusion to the theories of some speculators, who taught that there were "certain distinct beings" (seems as they called them), "who were successive emanations from the Supreme Being himself," to whom they gave the title of the "Fulness." They pretended that one of these had assumed human nature in Jesus Christ, and was afterwards exalted to a place of exaltation above the Church. This pretence was in some respects not inconsistent with the Christian system, and others as comparatively nonessential. See Bengter, Dict. de Theologie, s. v. Fundamentalæ; Felt. Theol. Encyclop. art. 66; Dodd, On Parables, i. 14; Chillingworth, Religion of Protestants, pt. i, ch. iii; Hasting, Works, vol. i; Stillinger, Works, iv. 66. Turrellus, De articulis Fundamentali, 1719. Waterland treats the subject largely in his Discourse on Fundamentals (Works, Oxf. 1685, 6 vols., vol. v. p. 78 sq.). He remarks that when we apply "the epithet fundamental either to religion in general or to Christianity in particular, we are supposed to mean something essential to religion or Christianity, so necessary to its being, or at least, to its well-being, that it could not subsist, or maintain itself, without it." He holds that Scripture indicates this distinction of things more or less weighty: e. g. Paul, with regard to certain ordinances, distinguishes betwixt that to which he attributed something essential to religion, and that which was of less importance. (J. W. M.)

Fundiaries, "persons who are appointed to discharge any office. Thus the clergy are 'functionaries' in the particular church of which they are members, to fulfill an 'office' and administration in the 'name,' in that capacity deriving their station and power from Christ, by virtue of the sanction given by him to Christian communities. Thus the authority of the church comes directly from the superintendence so constituted, in whose name and behalf they act as its representatives, just to that extent to which it has empowered and directed them to act. In conformity with these views, each person about to be ordained as priest in the Church of England is asked whether he thinks he is 'truly called' both 'according to the will of Christ and the order of this Church of England.'"

Fundamentals. A distinction has been drawn, both in the Roman Catholic and Protestant Churches, between fundamental and non-fundamental articles of faith.

I. Roman theologians understand by articulis fundamentaliæ those doctrines which every Christian is obliged to know, to believe, and to profess, on pain of damnation; and by articulis non-fundamentaliæ such doctrines as, however much they may be required of the ignorant of, without losing the name of Christian and the hope of salvation, it being taken for granted that he would believe them if made known to him by the Church. Substantially the Roman doctrine is that whatever the Church teaches is true.

II. In the Lutheran Church the distinction between fundamental and non-fundamental doctrines was introduced by Hinni, and after him was further developed by Quenstedt. See Hinni, De fundamentaliæ disserunt doctrinæ Lutherimæ et Calviniæam (1628). According to this doctrine the Church is given in the Word of God as the seed of truth, etc. The latter theology has abandoned this distinction, so far as its scientific use is concerned. Practically, however, all Christians agree in regarding certain articles of faith as essential to the Christian system, and others as comparatively nonessential. See Bengter, Dict. de Theologie, s. v. Fundamentaliæ; Felt. Theol. Encyclop. art. 66; Dodd, On Parables, i. 14; Chillingworth, Religion of Protestants, pt. i, ch. iii; Hasting, Works, vol. i; Stillinger, Works, iv. 66. Turrellus, De articulis Fundamentalibus, 1719. Waterland treats the subject largely in his Discourse on Fundamentals (Works, Oxf. 1685, 6 vols., vol. v. p. 78 sq.). He remarks that when we apply "the epithet fundamental either to religion in general or to Christianity in particular, we are supposed to mean something essential to religion or Christianity, so necessary to its being, or at least, to its well-being, that it could not subsist, or maintain itself, without it." He holds that Scripture indicates this distinction of things more or less weighty: e. g. Paul, with regard to certain ordinances, distinguishes betwixt that to which he attributed something essential to religion, and that which was of less importance. (J. W. M.)

Functionaries, 'persons who are appointed to discharge any office. Thus the clergy are 'functionaries' in the particular church of which they are members, to fulfill an 'office' and administration in the 'name,' in that capacity deriving their station and power from Christ, by virtue of the sanction given by him to Christian communities. Thus the authority of the church comes directly from the superintendence so constituted, in whose name and behalf they act as its representatives, just to that extent to which it has empowered and directed them to act. In conformity with these views, each person about to be ordained as priest in the Church of England is asked whether he thinks he is 'truly called' both 'according to the will of Christ and the order of this Church of England.'"
modes of circumstances of living, different articles are, and have been, fundamental to different men. This is very plain from the different degrees of knowledge before and since the coming of Christ, for before his coming in the Spirit, truth, and knowledge of the necessity and death of Christ, and of that true nature of his kingdom; whereas he who now does not acknowledge, or perhaps denies, the necessity of Christ's death, is by all means to be considered as in a fundamental error. Therefore, as a man hath received of God greater or less natural abilities, so let the number of articles to which he shall give his assent be greater or smaller; and as revelation hath been made, or information hath been given, to a man more clearly or obscurely, in the same proportion is more or less required of him. Therefore, in our own case, we ought to be cautious of even the smallest errors, and to aim at the highest degree of knowledge in divine truths. In the case of others we ought to judge concerning them with the greatest prudence, mildness, and benevolence. Hence we see that a certain precise number of articles which shall be irremovable and fundamental to every man cannot be determined." (Edward, Works, N. Y. ed., 4 vols., vol. iii, p. 545).

After Cromwell came into power in England in 1668, a committee of divines was appointed by Parliament to draw up a catalogue of "fundamentals" to be presented to the House. "Archbishop Usher was nominated, but he declining, Mr. Baxter was appointed in his room; the rest who acted were Dr. Owen, Dr. Goodwin, Dr. Cheynel, Mr. Marshall, Mr. Reymen, Mr. Nye, Mr. Sydrach Simpson, Mr. Vines, Mr. Manton, Mr. Jacobs. Mr. Baxter desired to offer the Apostles' Creed, the Lord's Prayer, and the Ten Commandments alone, as containing the fundamentals of religion; but it was objected that this would include Socinians and papists. Mr. Baxter replied that it was so much fitter for a centre of unity or concord, because it was impossible, in his opinion, to devise a form of words which heretics would not subscribe, when they had perverted them to their own sense. These arguments not prevailing, the following articles were presented to the House, under the title of 'The Principles of Faith, presented by Mr. Thomas Goodwin, Mr. Nye, Mr. Sydrach Simpson, Mr. Vines and Mr. Manton, to the Committee of Parliament for Religion, by way of Explanation to the Proposals for propagating the Gospel.' 1. That the Holy Scripture is that rule of knowing God and living unto him, which whoso does not believe cannot be saved. 2. That there is a God, who is the creator, governor, and judge of the world, which is to be received by faith, and every other way of the knowledge of him is insufficient. 3. That this God, who is the creator, is eternally distinct from all creatures in his being and blessedness. 4. That this God is one in three persons or subsistences. 5. That Jesus Christ is the only mediator between God and man, without the knowledge of whom there is no salvation. 6. That this Jesus Christ is also true man. 7. That this Jesus Christ is also true man. 8. That this Jesus Christ is God and man in one person. 9. That this Jesus Christ is our Redeemer, who, by paying a ransom and bearing our sins, has made satisfaction for them. 10. That this same Lord Jesus Christ is he that was crucified at Jerusalem, and rose again, and ascended into heaven. 11. That this same Jesus being the only God and man in one person, remains forever a distinct person from all saints and angels, notwithstanding their union and communion with him. 12. That all men by nature are dead in sins and trespasses; and no man can be saved unless he be born again, repent, and believe. 13. That we are justified and saved by grace and faith in Jesus Christ, and not by works. 14. That to continue in any known sin, upon what pretence or principle soever, is damnable. 15. That God is to be worshipped according to his own will; and whatsoever shall forsake and despise all the duties of his worship, cannot be saved. 16. That the soul shall rise; and that there is a day of judgment, wherein all shall appear, some to go into everlasting life, and some into everlasting condemnation. Mr. Baxter (Life, p. 209) says Dr. Owen worded these articles; that Dr. Goodwin, Mr. Nye, and Mr. Simpson were his assistants; that Dr. Cheynel was scribe; and that Mr. Marshall, a sober, worthy man, did something; but that the rest were little better than passive. It appears by these articles that these divines intended to exclude not only Deists, Socinians, and papists, but Arians, Antinomians, Quakers, and others" (Neal, History of the Puritans, Harper's ed., i, 131).

Funeral. Burying was (as generally, Cicero, Leg. ii, 22; Pliny, vii, 55) the oldest, as in all antiquity the customary, and among the Israelites the only mode of disposing of corpses (Gen. xxiii, 19; xxxv, 9; xxxvi, 9, 10; Judg. ii, 19, 21; Sam. xxi, 1, etc.; John xi, 17; Matt. xxvii, 60, etc.). So likewise among the Egyptians, Babylonians, and Persians (Lucian, Suet. 21; Curtius, iii, 12, 11 and 13), of which people ruins of necropolis and tombs still remain. Of burning (which among the Greeks was a well-known custom—although in no age altogether prevalent, see Becker, Charicles, ii, 181 sq.), the first trace occurs in 1 Sam. xxxi, 12, and even then as an extraordinary case (ver. 10). The practice has also been inferred from Amos vi, 10, where the term מְאָשָׁר, metasperho', "he that burneth him" (i.e. the nearest relative, who kindled the pyre; compare (Gen. xxxv, 9; xxxvi, 29; Judg. xxi, 31), occurs; but De Rossi, with several MSS., reads (so Hitzig, ad loc., although Rosenmüller, ad loc., otherwise explains) מְאָשָׁר, alluding to the different custom of burning—not the body itself, but—sweet spices at the funeral, as in Chron. xvi, 14; xxi, 19; Jer. xxxix, 5 (comp. Deut. xii, 31), as confirmed by Josephus (War, i, 53, 9; see Geier, De legatis, vi, 2 sq.; Kirchmann, De funeribus, p. 264 sq.; vgl. Censorius, H. a. d. ecle. i, 196 sq.). After the exile the burning of dead bodies was still less an Israelitarian custom, and the Talmud classes it with heathenish practices; hence even Tacitus (Hist. v, 5, 4) mentions burial as an altogether Jewish usage. The same conclusion is confirmed by the fact that combustion of the person is affected by the Mosaic law (Lev. xx, 14; xxii, 9) as a special penalty for certain crimes (see Michaelis who,
however, reaches a false result). De combustionine et humatione mortuorum ap. Hebraeos, in his Synagoga comm. i, 225 sq.). See Gravys. To leave the dead unburied was to the Hebrews a most dreadful thought (1 Kings xii, 22; xiv, 11; xvi, 4; xxii, 24; Jer. vii, 38; viii, 2; ix, 25; xiv, 16; xvi, 4; xxx, 83; Ezek. xxix, 5; Psal. lxxxix, 8), and was regarded by the ancients universally as one of the grossest insults (Sophocles, Ajax, 1166; Herod. viii, 5, 24; iii, 12, 25; Flutarch, Virt. mar. p. 226, ed. Tauchn.; Isocr. Panath. p. 638; see Massgrave, ad Soph. Antiq. 28); hence to inter the remains of the departed was a special work of affection (Tobit ii, 21; li, 8), and was an imperative duty of sons toward their parents (Gen. xxv, 9; xxxv, 29; 1 Macc. ii, 70; Tobit vi, 18; Matt. viii, 21; compare Demosth. Aristoi. p. 496; Val. Max. v, 4, ext. 5; see Kyros, Obscr. i, 65), and next devolved upon relatives and friends (Tobit xiv, 16). If the corpse remained uninhumed, it became a prey to the raving, hungry dogs and ravenous birds (1 Kings xiv, 11; xvi, 4; xxii, 24; Jer. vii, 38; 2 Sam. xxii, 10 [2 Kings ix, 85 sq.]; compare Homer, I. xxii, 41 sq.; Eurip. Herod. 1040). Nevertheless, that fate of the dead among the Israelites, except in consequence of the atrocities of war, since Deut. xxii, 29 (Josephus, War, vi, 27) was held to entitle even criminals to interment (Josephus, War, iv, 5, 2; comp. Matt. xxvii, 55); yet it was otherwise in Egypt (Gen. xli, 139). According to the Talmud (Lightfoot, Hor. Heb. p. 499) there were two especial burial-places at Jerusalem for executed persons. See Tomb.

What form or ceremonies of obsequies was observed by the ancient Hebrews is almost altogether unknown, except that in the earlier and simpler age the act of interment was performed by the relations (sons, brothers) with their own hands (Gen. xxxv, 9, xxxvi, 29; Judg. xvi, 31; the later passages, 1 Macc. ii, 70; Tobit xiv, 16, only indicate the attendance of the kindred at the rites; so also Matt. viii, 22). In later times the Jews left this to others, and in Amos v, 16 it is spoken of as something shocking that kinsmen should be obliged to carry the corpse to the grave (this pious care, however, was due from friends, e. g. from pupils towards their teacher, 1 Kings iii, 50; Mark vi, 20). Closing the eyes and giving the last kiss (Thilo, Apocr. i, 44) are mentioned (Gen. xvi, 17; Tobit xiv, 18) as natural expressions of farewell (the Talmud has a prescription concerning them, Shabb. xxiii, 5) from early antiquity (Homer, Il. xi, 452; Odys. xi, 425 sq.; xxvii, 226; Pindar. Hymn. ix, 487; Ovid. Fast. ii, 3, 43; iv, 3, 43 sq.; Val. Max. ii, 6, 5; Pliny, ii, 35; Euseb. Hist. Eccl. vii, 22). Immediately after death (the sooner the better) the body was washed (Acts ii, 37), then wrapped in a large cloth (παντοκρατορ, Matt. xxvii, 59; Mark xv, 46; Luke xxiii, 56), or all its limbs wound with bands (ἐκμακρύνεται, see John xiii, 44; compare Chifflet, De lindeis sepulcral. Christi, Antr. 1624, 1668), between the folds of which, in the case of a person of distinction, aromatics were laid or sprinkled (John xix, 39 sq.; compare John xii, 7; the custom of anointing the corpse with spiced unguents was very prevalent amongly, Pliny, xiii, 1; Homer, Odys. xxiv, 45; 1 Eus. Hist. Eccl. vii, 22). Among the most ancient is the practice of giving the deceased a grave without a stone covering (Acts xix, 5; Luke v, 25, 47; Lucian, Lact. 11). See Dougat, Anaal. ii, 64 sq. At public funerals of princes sumptuous shrouds were usual, and there was a prodigious expense of odor (Josephus, Ant. xv, 8, 4; xvii, 8, 3; War, i, 83, 9). The speedy burial customary with the later Jews (Acts v, 6, 10; as a rule on the same day, before sundown) had its origin in the Levitical edictment (Numb. xix, 11 sq.); in earlier times it did not prevail (Gen. xxiii, 2 sq.; comp. Chardin, vi, 485). The removal (ἐκφορά) to the grave was done in a coffin (σάρια, Luke vii, 14; λόφον, Josephus, Ant. xv, 8, 2), which probably was usually open (7 Luke vii, 14; comp. Schulz, Leseimg. iv, 182; but see Josephus, Ant. xv, 1, 2); and on a bier (τρύγος).

Mohammedan Dier, for the Body of a Female or Boy (Lane).

2 Sam. iii, 31; Κλείσα, Josephus, Life, 62; Ant. xvii, 8, 8; of costly materials in the case of royal personages, even adorned with precious stones, Josephus, Ant. xiii, 16, 1; xvii, 8, 3; War, i, 38, 3), borne by men (Luke vii, 14; Acts v, 6, 10), with a retinue of the relatives and friends (2 Sam. iii, 31; Luke vii, 12; the Talmud speaks of funeral processions with horns (Parah, xii, 9; on royal funeral processions, see Josephus, Ant. xiii, 16, 1; xvii, 8, 3; War, i, 38, 3.), in a long train (Josh xxiii, 35), with loud weeping and wailing (2 Sam. iii, 32; compare Baruch vi, 31). Even in the house of grief, before the funeral, lamentation was kept up with accompaniment of mourning pipes (Matt. ix, 23; Mark v, 38; compare Jer. ix, 17; 2 Chron. xxxv, 25; Ovid, Fast. i, 650; see Hilliger, De tribus in Funer. addid. Vitub. 1717; Kirchmann, Fun. Roman. ii, 6); Female mourners, especially (Jer. i, 17), were hired for the purpose (Mishna, Mord Katon, iii, 8), who prolonged the lamentation several days (Wellsted, i, 150; Proskocie, Erinner. i, 98, 102, 130). After the burial a funeral meal was given (2 Sam. iii, 35; Jer. xvi, 5, 7; Hos. ix, 4; Ezek. xxvii, 24; Tobit iv, 18; Epist. Jer. 30; compare Homer, Il. xxiii, 28; xvii, 402; Lucian, Lact. 24; see Geiger, De lectu Eror. ch. vii; Hebenstreit, in the Miscell. Lips. ii, 730 sq.; vi, 83 sq.; Gar mann, in Iken's Theiscer. i, 1048 sq.;) and among the later Jews, in families of distinction, invitations were extended to the honorable as well as to the people, so that these entertainments eventually became scenes
FUNERAL

of luxurious display (Josephus, War, ii, 1, 1). Warriors were buried with their arms (Ezek. xxxii, 27; 1 Macc. xxi, 29; comp. Homer, Odyssey, xi, 74; xii, 18; Virgil, Aen. vii, 239; Dios. Sic. xxiii, 26; Curtius, x, 1, 51; see Tavernier, i. 294), and persons of rank or royalty with jewels and valuables (Josephus, Ant. xv, 8, 4; xvi, 7, 1). In later times, when the belief in the resurrection became generally distinct, a funeral sacrifice was made (2 Macc. xii, 45). See generally Weber, Oberrodt, sacr. circe funera populi orient. (Antent. 1767); Monbroton, Essai sur la litterature des Hébreux (Par. 1819), 111, i. 1, 253 sq.; also Meursius, De funere lib. sing., in his Opp. v. For the funeral customs of the ancient Egyptians, see Wilkinson, chap. x (abridgm.); for those of the modern Egyptians, see Lane, chap. xxviii. See Burial.

Modern Egyptian Funeral Procession (Lane).

Monographs on funerals in general have been written by Fuderic (Cen. 1755), Ingler [in Germ.] (Lube. 1757), Pompe (L. 1659); on burial in general, by Heidgger (Heidel. 1670), Nettelbladt (1729), Lunge (Holm. 1679); on ancient modes of burial, by Gyraldus (Heimat. 1670), Quenstedt (Vitell. 1660), Struick (Vitell. 1660), Cellarius (Heimat. 1683), Flortius (Aboe. 1689); among the Greeks, by Norberg (Opuscula, ii, 507—526); on the right and duty of sepulture, by Brückner (Jena, 1708), Böhmer (Halle, 1717), Burchard (Lips. 1700), Hofmann (Vitell. 1726), Horer (Vitell. 1661), Scheele (Regiom. 1710), Saulmann (Bremer 1737), Schlegel (Lips. 1769); in time of war, by Prisla (Vitell. 1660); in temples, by Allegreantia (Medico. 1779), Plattner (Lips. 1728), Winkler (Lips. 1784), Woken (Vitell. 1752), Lampe (Argent. 1776), Gundling (Obs. select. i, 137 sq.); on sepulchres, by Eckhard (Jena, 1726); on cenotaphs, by Bidermann (Frib. 1756); and cemeteries, by Bachon (Gott. 1725), Berger (Rost. 1689), Böhmer (Hal. 1716, 1726), Fuhrmann [in Germ.] (Hal. 1801), Spondanus (Par. 1638); and their sanctity, by Lederer (Vitell. 1661), Lichtwehr (Vitell. 1747), Niespen (L. B. 1723), Plaz (Lips. 1725), Schöpfcr (Bremer, 1747), Junius (Lips. 1747); on the catacombs, by Cyprian (Heimat. 1699); Fehm (Lips. 1710); on mourning, by Aëminia (Gyph. 1751), Nicolai (Marb. 1739), Geier (Lips. 1666), Kirchmann (Hamb. 1665, Lubeck, 1625), Sopranus (Lond. 1645); on funeral dresses, by Mayer (Hamb. 1665); on the expense of funerals, by Philipp (Lips. 1684); on placing money in the mouth of the corpse, by Seyffert (Lips. 1709); on lamps at the grave, by Ferrari (Patavium, 1764), Schützleich (Vitell. 1710), Willesch (Alt. 1710); and flowers, by Flügge (Hafn. 1704); on funeral feasts, by Janichen [in Germ.] (Lips. 1741), Schmidt (Lips. 1689), Tropanger (Vitell. 1710); on funeral sermons, by Brömel (Jen. 1687); on funeral orations, by Böhmer (Heimat. 1713, 1715), Mayer (Lips. 1670), Rosenberg (Badia. 1689), Senf (Lips. 1680), Wildvogel (Jen. 1701), Witte (1691); and as a Roman custom, by Fortlage (Osnb. 1729); on monuments, by Behnrauer [in Germ.] (Frib. 1755), Herforder (Hafn. 1722), Hottinger (Heidel. 1659); on cuttings for the dead, by Michaelis (F. ad V. 1794); on Christian burial, by Behnrauer (Budia, 1725), Greta (Ingolstadt, 1811), Joch (Jen. 1726), Kiesling (Vitell. 1730), Fransen (Lips. 1718), Larro- quanus (Advers. sacr. L. B. 1688, p. 187 sq.), Panvitus (Lond. 1672, Rom. 1681, Lips. 1717), Rosenberg (Budia, 1650), Samellius (Taurin. 1678), Schützleich (Canastr. 1687), the plague burial of the dead by Carpzov (Dissert. i. 1670 sq.), Semler (Halle, 1706), Zeilrich (Vitell. 1742); on Asa’s funeral, by Müller (Vitell. 1716); on the burial of animals, by Dassen (Vitell. 1607), Lange (Altorf. 1706), Casteaux [at Jer. xxii, 19] (Lips. 1716). See Graves; Cemetery; Dead, etc.

Funeral Discourses, (1) addresses delivered either at the house of mourning or the grave; (2) funeral sermons or panegyrics. I. We see, in Acts viii, 2, that certain ceremonies were observed in the early Church on the occasion of funerals. The apostolical constitution prescribed certain services in cases of Christian burial (bk. viii, cap. 41, 42, Celébretur dies tertius in psalmis, lectio nuncius et praecipua, o eum, qui tertius dies resurrectet; item dies nonus, eter.). But these services did not all take place at the time of the funeral, since the dead were not put to their place for three days in the East before burial. Of addresses delivered at funerals there is no mention made until after Basil, the two Gregorys, and Chrysostom had introduced Greek rhetoric into the Christian Church. The funeral addresses of that age are mostly panegyrics delivered on the persons of distinguished persons, such as martyrs, bishops, princes, etc. In the Middle Ages, funeral services were chiefly masses and prayers for the dead. The Reformation, while abolishing masses for the dead, instituted in its stead the practice of proclaiming the word of God by the side of the open grave. The objects of this practice were stated, as early as 1536, in the Church Discipline of Württemberg, to be (1) a public recognition of the Christian’s hope of resurrection; (2) a public testimony of Christian affection; (3) an earnest memoro mori. Since the introduction of Rationalism, the last has been lost much of their general religious character in Germany, and have become, to a certain extent, panegyrics of the deceased. In other Protestant countries usages vary: sometimes there is simply a liturgical service at the house or at the grave; sometimes simply the reading of the Scripture books and prayers; sometimes an address of consolation or warning is added. This latter is generally the usage of the churches which do not make use of forms of prayer.

11. Funeral Sermons.—These are generally delivered from the pulpit. The forms which they assume are the simple funeral address, inasmuch as instead of being, as the former originally was, a mere exhortation, or, as it afterwards became, a personal panegyric, it is a regular sermon, preached from a text, which, however adapted to the circumstances, reminds the officiating minister, as does also the place from whence it is delivered, that he addresses a congregation, not a mere circle of family or friendship, and that his whole discourse should consequently be more objective than personal. The funeral sermon proper, as contrasted with orations and panegyrics, may be considered as having originated with Protestantism, in the place of the Roman Catholic ceremonial, which was necessarily rejected with the doctrine of purgatory (see Klieforth, liturgische Abhandlungen (vol. i, p. 278 sq.). The earliest Protestant discipline made the principal part of the funeral ceremony the Word of God, either as a simple lesson, or as a regular sermon (see Balische Kirchenordnung, a.D. 1526; Richter, i, 47). “At the following church-service after the burial of the party he shall be remembered and his death announced; his friends shall be comforted by the Word of God, and others reminded to hold themselves in readiness, with strong faith and hope, to obey God’s call at any time and in any way.” The reformatio ecclesiasticarum Hassiae, 1526 (ib. p. 61), says: “Laudandum autem, si in funere habeatur aut incerta prodiectus verbis Dei, aut saltem Justus ipsum brevis admonitum.” In those days liturgy and homiletics were
FURLONG 697

not so distinct from each other as they have become
since. In some places texts were prescribed for funeral
sermons, and even sermons were given as models for
similar productions. Luther himself gives two such in
his Hauppostelle. The sermon was gradually made
more like the panegyric. Hunnias says, in the pref-
ace of his twenty-seven funeral sermons: "Men are
no longer simply buried with the customary Christian
ceremonies, but by request of the survivors there are
sermons preached on the Word of God, and testimony
rendered of the life and especially of the end of the
dead, in what faith and hope they ended their life."
Added to these, comparison with similar persons, refer-
ence to other members of the family, etc., furnished
much material for discourses as acceptable to the hear-
er as to the preacher. From the middle of the 16th
century to the beginning of the 18th, funeral sermons
were either mere eulogies, or utterly objective and
speculative discourses. A. H. Francke gave in 1702 a
funeral sermon of 40 pages fol., with a long appendix.
In the Roman Church some of the most brilliant ser-
mons of the 16th and 17th centuries were funeral dis-
courses; e.g. the orationes funebres of Bossuet and oth-
er French orators. In modern Protestant churches
(England and America) funeral sermons are generally
preached in the presence of the dead, or in the dis-
scharge of some person distinguished
ed for piety or position. Still, in some parts of the
United States they are in more frequent use; some-
times they are even preached with regard to the de-
crease of children. See Herzog, Real-Encyklop. s. v.
Grabreden. See BURIAL; HOMILETICS.

Furlong (στρατός or στάδιον, a stadium), a Greek
measure of distance, equal to 606 feet 9 inches (Luke
xxiv, 19; John vi, 19; xi, 18; [1 Cor. ix, 24, "race," i.e. a course or list for running]; Rev. xiv, 20; xx, 16).
See Smith's Dict. of Class. Antiq. s. v. Stadium.
See MEASURE; STADE.

Furman, Richard, D.D., a leading Baptist minister
in the Southern States, was born at Essexo, N. Y., in
1755. While he was a child, his father removed to
South Carolina. His education was carefully attended-
to by his father, who instructed him in English stud-
ies and in mathematics, and particularly in the Scrip-
tures. He began at the early age of eighteen to preach
in destitute places, and soon gained a wide influence.
Many churches were formed by his agency. During
the Revolutionary War he was an ardent supporter of
the cause of Independence, and his eloquence and pa-
triotsm attracted the attention of Patrick Henry and
other leading statesmen. In 1787 he became pastor
of a church in Charleston. He sat in the Convention
for ratifying the Constitution of the United States.
He received the degree of D.D. from Brown University
in 1801. He was elected in 1814 the first president of
the Baptist General Convention for missionary pur-
poses. He died Aug., 1825. He was a solemn and impres-
sive preacher, an able presiding officer in deliberative
assemblies, and in every relation an object of reverence
and affection. He published, 1. Rewards of Grace, a
Sermon on the Death of Rev. Oliver Hart (1792)—2.
An Oration at the Charleston Hospital (1796)—3. Ser-
mon Commemorative of General Washington (1800)—4.
A Sermon on the Death of the Rev. Edmund Botsford—
Sprague, Amusa, vii, 101. (L. E. S.)

Furnace is the rendering in the Eng. Vers. of the
following words. See BURNING.

1. ꜃SNS, oltus (a Chald. term, of uncertain, prob-
ably foreign derivation; Sept. σταθερον), a large furnace,
with a wide opening at the top to cast in the materials
(Dan. iii, 22, 23), and a door at the ground by which
the metal might be extracted (ver. 26). It was prob-
able built like the Roman kiln for burning pottery-ware
(Smith, Dict. of Class. Antiq. s. v. Fornax). The Per-
sians were in the habit of using the furnace as a means
of inflicting capital punishment (Dan. iii.; comp. Jer.
xxix, 22; 2 Macc. vii, 6; Hos. v, 7; see Hoffmann, De
flamma fumei Babylonici, 1668). A parallel case
is mentioned by Chardin (Voyage en Perse, ii, 276), two
lovers having been kept ready heated for a whole
month to throw in any bakers who took advantage of
the death. See PUNISHMENT.

2. ꜃S=g, ūškan (so called from subhājan the stone
or ore), a smelting or calcining furnace (Gen. xix, 28),
perhaps also a brick-kiln (Exod. ix, 8, 10; xix, 18),
but especially a lime-kiln, the use of which was evi-
dently well known to the Hebrews (Isa. xxxiii, 12; Amos
i, 1). See BRICK; LIME.

3. ꜃S=g, kūr (so called from its bulling up), a refining
furnace (Prov. xvii, 3; xxvii, 21; Ezek. xxii, 18 sq.),
metaphorically applied to a state of trial (Deut. iv, 20;
1 Kings viii, 51; Isa. xlvi, 10; Jer. xi, 4). The form
of it was probably similar to the one used in Egypt
(Whiston, E.G. ii, 187, abridg.). The Jeweller
appears to have had a little portable furnace and blow-
pipe, which he carried about with him, as is still
the case in India. See METALLURGY.

xxix, 22; 2 Macc. vii, 6; Hos. v, 7; see Hoffmann, De
flamma fumei Babylonici, 1668). A parallel case
is mentioned by Chardin (Voyage en Perse, ii, 276), two
lovers having been kept ready heated for a whole
month to throw in any bakers who took advantage of
the death. See PUNISHMENT.

2. ꜃S=g, ūškan (so called from subhājan the stone
or ore), a smelting or calcining furnace (Gen. xix, 28),
perhaps also a brick-kiln (Exod. ix, 8, 10; xix, 18),
but especially a lime-kiln, the use of which was evi-
dently well known to the Hebrews (Isa. xxxiii, 12; Amos
i, 1). See BRICK; LIME.

3. ꜃S=g, kūr (so called from its bulling up), a refining
furnace (Prov. xvii, 3; xxvii, 21; Ezek. xxii, 18 sq.),
metaphorically applied to a state of trial (Deut. iv, 20;
1 Kings viii, 51; Isa. xlvi, 10; Jer. xi, 4). The form
of it was probably similar to the one used in Egypt
(Whiston, E.G. ii, 187, abridg.). The Jeweller
appears to have had a little portable furnace and blow-
pipe, which he carried about with him, as is still
the case in India. See METALLURGY.
making them cramp-irons: a specimen of these may be seen in the British Museum. In modern Palestine the plan is to fix nails or pins of wood in the walls, while they are still soft, in order to suspend such domestic articles as are required; since, consisting altogether of clay, they are too frail to admit of the operation of the hammer. To this custom there is an allusion in Ezek. xix, 10. 

On these, seven and chairs of state, or thrones with footstools (Exod. xxvii, 26, 27; Deut. xxiv, 12). The opulent had (as those in the East still have) fine carpets, couches, or divans and sofas, on which they sat, lay, and slept (2 Sam. xviii, 2; 2 Kings iv, 10). They have also a great variety of pillows and bolster, with which they surround themselves when they wish to take their ease, and there is an allusion to these in Ezek. xiii, 18. In later times these couches were splendid, and the frames inlaid with ivory (Amos vi, 4), which is plentiful in the East; they were also richly carved and perfumed (Prov. vii, 16, 17; 1 Kings vii, 17). On these sofas and chairs of state, in the later ages of the Jewish state, for before the time of Moses it appears to have been the custom to sit at table (Gen. xiii, 38), they universally reclined when taking their meals (Amos vi, 4; Luke vii, 36-38). See ACCOMMODATION.

FURNACE, an oven used by the Persian sovereigns and the palaces of the Eastern monarchs, embroidered with needle-work, and ample draperies were suspended over the openings in the sides of the apartments, for the twofold purpose of affording air, and of shielding them from the sun. Of this description were the costly hangings of the Persian sovereigns mentioned in Ezek. i, 6, which passage is confirmed by the statements of Quintus Curtius relating to their superb palace at Persepolis. See EMBROIDERY. In the more ancient periods other articles of necessary furniture were both few and simple. Among these were a hand-mill, a kneading-trough, and an oven. See BREAD. Besides kneading-troughs and ovens they must have had various kinds of earthen-ware vessels, especially pots to hold water for their several ablutions. In later times baskets formed an indispensable article of furniture to the Jews. See BASKET. The most ornate of these were the so-called "bazaar," which probably lay in that vicinity (Josephus, War i, 1, 1), as similar shrines still do (Barclay, City of the Great King, p. 484). See JERUSALEM.

FURNEOX, PHILIP, D.D., an English Nonconformist minister, was born at Totnes in 1726, and died in 1783. He was first an assistant to a dissenting congregation in Southwark, then lecturer at Salters' Hall, and in 1758 succeeded Moses Lowman (q.v.) at Clapham, in Surrey, where he remained twenty-three years. He died at the last six years of his life he was totally deranged. He published Sermons (1758-69), and Letters to Justice Blackstone on his Exposition of the Act of Toleration (1783, 8vo), which, it is said, induced that learned commentator to change some of his positions in the subsequent editions of his work. — Rose, New Gen. Br. Dict., vii, 492; Allibone, Dictionary of Authors, s. v. (J. W. M.)

Furniture is the rendering in the Auth. Ver. in one passage of καρ, καρ, a camel's litter or canopied saddle, in which females are accustomed to travel in the East, Gen. xxxi, 34, elsewhere a lamb, etc.; also in a few passages of ἄλθεσις, κηθόν, a general term for vessels, utensils, or implements of any sort. The manufacture of all kinds of furniture is represented on the Egyptian monuments with great minuteness. The recent excavations among the Assyrian mounds have also disclosed a high degree of refinement among the people of that age. See Wilkinson's Anc. Egypt., Rossellini's Illustra., and Layard and Botta's works on ancient Nineveh and Babylon; also the various articles of household furniture in their alphabetical order. See CARPENTRY.

It appears that the furniture of Oriental dwellings, in the earliest ages, was generally very simple; that of the poorer classes consisted of but few articles, and those such only as were absolutely necessary. See HOUSE. The interior of the more common and useful apartments was furnished with sets of large nails with square heads, like dice, and bent at the head, so as to
rows likewise thereof complain," observes that similar proverbs are common among the Hindus. See Agriculture.

In Hose xi, 10, the text has יִשְׁרִי, i.e. יִשְׁרִי, their [seer] eyes, which the A. V. seems to have pointed יִשְׁרִי, and even thus it will hardly bear their rendering, "these [two] furies" (as if from צָאִיר, to ill, the same root as in the second Heb. word above); but the margin, with all the versions (Davidson's Hebrew Text, p. 120), has יִשְׁרִי, their [two] liquities, referring to the golden calves at Dan and Bethel (Henderson, Comment. ad loc.). See CALF, GOLDEN.

Furitor, a missionary and abbot in the British Isles, and the founder of the convent of Lagny, near Paris, was born in Ireland, where he founded also a convent, to which he gave very strict rules. He then went to West Anglia, and erected the abbey of Knobbersburg, which he afterwards resigned to his brother Follian, in order to withdraw into solitude. During the persecution of the Christians by Penda, king of the Mercians, he fled to France, where, under the protection of Chlodwig II, he founded the convent of Lagny. He is supposed to have died in 650-654. He had obtained particular consideration by his visions, in which he pretended to see and hear angels; they are related in Bollandus, vita S. Furiei ad 16 Jan. See Maubillon, Acta SS. Ord. S. B. I. ad 6, 469; Annual. Mag. Bolland. I. general, p. 731; Bela, Hist. gent. Angl. ecc., ii, 19-23; Herzog, Real-Encyclop. iv, 629.

Fury (וניה, charon), both signifying intense anger) is attributed to God like anger, metaphorically, or speaking after the manner of men, that is, God's providential actions are such as would be performed by a man in a state of anger; so that when he is said to pour out his fury on a person or on a people, it is a figurative expression for dispensing affirmative judgments (Lev. xxvi, 28; Job xx, 23; Isa. xlix, 8; Jer. iv, 4; Ezek. v, 13; Dan. ix, 18; Zech. viii, 2, et c.). See Anthropomorphism.

Future Life. See Eternal Life; Immortality; Intermediate State.

Future Punishment. See Punishment.

Fynse, Faschier de, was born Jan. 31, 1588, at Leyden. He was inducted into the ministerial office somewhat irregularly. His first charge was that of Jaarmeld. He was zealously attached to the cause of the Reformation. In consequence of his refusal to subscribe the Canons ofthe Synod of Dort, he was suspended from the ministry. This did not deter him from avowing his intention to exercise his gift as the opportunity should be afforded him. Refusing to subscribe the act, which imposed silence upon him, he was sentenced to be banished. Notwithstanding this sentence, he still persisted in preaching from place to place, and was successful in evading his persecutors. After enduring many hardships and privations in his itinerant ministry, he was in 1658 settled over a church in Haarlem. Here he was at first permitted to exercise his ministry without further annoyance. He labored here till his death, which took place in 1661. He was a man of natural shrewdness, of great impartiality, and full of zeal as a minister of the Gospel. The asperity of his language towards his opponents finds an apology in the treatment he received at their hands. His account of the Rijnburgeren is regarded as valuable, being the testimony of one personally acquainted with the facts. It is entitled Kort en waarschijnlijk verhaal van het eerste begin en opkomsten van de nieuwe secte der profeten van Rijnburgeren. See Brandt's Historie der Reformatie, etc., i, iv 4, Deelen, on verschiedene plaatsen; De Remonstrantsche Broederschap, etc., door J. Tideman, Phil. Theor. Mag. Lit. Hum. Dr., Predikant te Rotterdam, 1847; Glaser, Godegesch Nederlant, blz. 479 en verv. (J. P. W.)

Gaab, Johann Friedrich, a German theologian, was born at Göppingen, in Württemberg, Oct. 10, 1761. In 1792 he became professor extraordinary, in 1798 professor ordinarius of philosophy at Tübingen; in 1814, librarian of the university; in 1822, general superintendent, in which office he remained till his death, March 2, 1832. He was a voluminous writer, chiefly in Biblical literature. Among his works are Observations ad histioriam Judaicam (Tub., 1787, 8vo); — Beitraege z. Erkliirung des 1, 2, 3. Buchen Mose (Tub., 1778, 8vo); — Das Buch Izaak (Tub., 1809, 8vo); — Erklirung schweber Stelien Jeremiaus (Tub., 1824, 8vo); — Handbuch zum philologischen Verzeichnir der Apocryphen Schriften des A. T. (1816-18, 5 parts); — Doogmengeschichte der all, griesch. Kirche (Jena, 1790, 8vo); — Programma de Judeo Marmoreo (Tub. 1815). — Migne, Bibl. Christ., n. v.

G'aal (Heb. id. גאל, looting; Sept. Γαλα, Josephus Παραγον), son of Ebed (Judg. ii, 26 sq.). He went to Shechem with his brothers when the inhabitants became discontented with Abimelech, and so engaged their confidence that they placed him at their head. He does not seem to have been a native of Shechem, nor specially interested in the revolution, but rather one of a class of condottieri, who at such a period of anarchy would be willing to sell their services to the highest bidder (compare Josephus, Ant. v, 7, 3 and 4). At the festival at which the Shechemites offered the first-fruits of their vintage in the temple of Baal, Gaal, by apparently drunken bravery, roused the valor of the people, and strove with them to avenge the absent Abimelech. It would seem as if the natives had been in some way intimately connected with, or descended from, the original inhabitants for Gaal endeavored to awaken their attachment to the ancient family of Hamor, the father of Shechem, which ruled the place in the time of Abraham (Gen. xxiv, 6, 6), and which seems to have been at this time represented by Gaal and his brothers. This appeal to ancient Israelitish traditions (Judg. ix, 28), together with the re-establishment of idolatry at Shechem, shows that the movement in which he took part was a reactionary one, and proceeded upon the principle of a combination of the aborigines with the idolatrous Israelites against the Shechemites. See Brann's Gesta Historiae de Israelitimonialibus, etc., i, iv 4, Deelen, on verschiedene plaatsen; — De Remonstrantsche Broederschap, etc., door J. Tideman, Phil. Theor. Mag. Lit. Hum. Dr., Predikant te Rotterdam, 1847; Glaser, Godegesch Nederlant, blz. 479 en verv. (J. P. W.)

Dr., Predikant te Rotterdam, 1847; Glaser, Godegesch Nederlant, blz. 479 en verv. (J. P. W.)
on the north side of which Joshua was buried (Josh. xxiv, 30; Sept. Παλαιον; Judg. ii, 9). Hence "the brooks of Gaash," i.e. the valleys or watercourses (משנה, וַאָדוֹ, Sept. נָאָרָה או נָאָרָה) around the mountain, which were the native place of Hildai or Hural, one of David's warriors (2 Sam. xxiii, 30). The modern name seems to have been preserved by the inhabitants of the village which lay near the site of Joshua's tomb, and which was visited by Edward Robinson (Leter Bib. Res. p. 96 sq.).

Gabbatha (גָּבַבָּתָה), one of the summits of king Xerxes, the residence of whose plots by which the Mount of Olives led to their execution (Esth. xii. 1, Apoc.), evidently the Bighorn (q. v.) of the Heb. text (Esth. ii. 21).

Gabatha (גָּבַבָּתָה), a village ( afterEach) mentioned only by Eusebius and Jerome (Joseph. s. v. Γαβαθάι, Σαβαθι) as lying on the eastern part of the great plain Daroma (Ερασιδείον), near Diosmarea; a position compatible with that of the modern village Jebouth, north of the Kishon (Ritter, Erdk. xvi. 748), but not visited by Robinson (Researches, iii. 201). Euseb. and Jerome elsewhere (Θ. s. v. Γαβαθάι, Σαβαθι) mention a place of the same name as being twelve miles from Eleutheropolis, and containing the tomb of the prophet Hahakuk (a statement which Reland, Palest. p. 772, reconciles with their location of the same prophet's tomb at Keilah); but this seems to have been the Benjamite Gibeah (q. v.). For the Gabatha (Γαβάθα) of Joseph (Ant. xiii. 1, 4; comp. Reland, Palest. p. 772), see the Nadabatha (Νάδαβα) of the Acts (Acts xxv. 11). See also Gabaa.

Gabba (גָּבַבָּתָה), a chief of the tribe of Benjamin, who settled in Jerusalem after the captivity (Neh. xi. 8). B.C. ante 536.

Gabathath (גָּבַבָּתָה, in some MSS. גָּבַבָּתָה), occurs John xix, 13, where the evangelist states that Pontius Pilate, alarmed at last in his attempts to save Jesus by the artful insinuation of the Jews, "If thou let this man go thou art not Caesar's friend," went into the praetorium again, and brought Jesus cut to them, and sat down once more upon the βηθύμ, or tribunal, in a place called Αἰθίστροφον, but in the Heb. Gabatha. The Greek word, signifying literally stoned, is an adjective, and is generally used as such by the Greek writers; but they also sometimes use it substantively for a stone pavement, when ἡβαστος may be understood. In the Sept. it answers to גֶּבָּתָו (2 Chron. vi. 1: 3: Esth. i. 6). Jerome reads, "Sedit pro tribunali in loco qui dicitur Lithostrotos." The Greek word, as well as the Latin, is frequently used to denote a pavement formed of ornamental stones of various colors, commonly called a tessellated or mosaic pavement. The partiality of the Romans for this kind of pavement is well known. It is stated by Pliny (Hist. Nat. xxxvi. 64) that, after the time of Sylla, the Romans decorated their houses with such pavements. They also introduced them into the provinces. Suetonius relates (Cæsar, 46) that Julius Caesar, in his military expeditions, took with him the materials of tessellated pavements, ready prepared, that wherever he encamped they might be laid down in the praetorium (Casabon, ad Sext. p. 58, etc., edition 1603). From these facts it has been inferred by many eminent writers that the word of the text should be rendered a tessellated or mosaic pavement, but this is not generally admitted. Some, indeed, have supposed that the text at this point is the result of a scribal error, and that the word of the text is the result of a scribal error, and that the word of the text is "outside" the praetorium; for Pilate is said to have "come out" to the Jews, who, for ceremonial reasons, did not go into it, on this as well as on other occasions (John xviii, 28, 29, 88; xix, 4, 15). Besides, the Roman governors, although they tried to serve the comfort of the people (Acts xxv. 12) within the praetorium, always pronounced sentence in the open air. May not then, this tessellated pavement, on which the tribunal was now placed, have been laid in on some part of the terrace.
etc., running along one side of the praetorium, and overlooking the area where the Jews were assembled, or upon a landing-place of the stairs, immediately before the grand entrance?

It has been conjectured that the pavement in question was no other than the one referred to in 2 Chron. vii, 3, and by Josephus (War, vi, 1, 9), as in the outer court of the temple, though it is not stated that Pilate sometimes sat upon his tribunal in different places, as in fact, in the open market-place (War, ii, 9, 3), yet the supposition that he would on this occasion, when the Jews were pressing for a speedy judgment, and when he was overawed with the crowd, and considering the whispers, the crying, and the clamoring of rulers of every grade, as well as the populace, to any other place, is very unlikely; and the supposition that such place was any part of the temple is encumbered with additional difficulties. It is suggested by Lightfoot (Exerc. on John, ad loc.) that the word is derived from 25, a surface, in which case Gabatha would be a mere translation of Aigion. There was a room in the temple in which the Sanhedrim sat, and which was called the place because it was paved with smooth and square flags; and Lightfoot conjectures that Pilate may have on this occasion have delivered his judgment in that room. But this is not consistent with the practice of John, who in other instances gives the Hebrew name, as properly belonging to the place, not as a mere translation of a Greek one (compare John xix, 17). Besides, Pilate evidently spoke from the bema—the regular seat of justice—and this, in an important place like Jerusalem, would be in a fixed spot. Nor in any case could the praetorium, a Roman residence with the various ornamental embellishments, have been within the temple. Yet it may be said that the names  and  are synonymous; and if the word Gabatha be derived, as is usual, from  , "to be high or elevated," it may refer chiefly to the terrace, or uppermost landing of the stairs, etc., which might have been inlaid with a tessellated pavement. Schleusner understands an elevated mosaic pavement, on which the  was placed, before the praetorium. The most natural inference from John's statement is that the word Gabatha is "Hebrew:" but it has been contended that the writers of the New Testament used this word by way of accommodation to denote the language of the Jews, or Syro-Chaldaic, (as it is said) which was commonly spoken in Judaea in their time, and that when John says  he means in the Syro-Chaldaic, but into the extensive controversy respecting the vernacular language of the Jews at Jerusalem in the time of our Saviour, this is not the place to enter. It may suffice for the present purpose to remark that the ancient Syriac version, instead of Gabatha, reads  .

Gab'ees (Ga/ba/ja; Vulg. Coeba), a man whose descendants (or rather a place whose natives) returned from the captivity (1 Esdr. v. 20); evidently the Gaba (v. q.) of the Heb. text (Ezra ii, 28).

Gab'bi (Ga/bji), a considerable place  mentioned by Eusebius and Jerome (Onomast. s. v. Ga/bi,a,b,Gab enlist); Gabalton) as lying 16 miles from Carmel, in the range of the plain of Esdraelon; thought by Robinson to be the modern Jeba (i.e. Gilba), a large village on the slope of the range of hills N. of Nahal, containing an ancient town (Researches, iii, 151). It can hardly have been of sufficient importance to be commemorated by the coins found with the inscription of the Gabians (Gabian, Ireland, Paton, p. 799).

Gab'nius (Ga/bnius), Aulus, of un-
Gabriel, Heb. Gamaliel, champion of God; Sept. and N. T. Gamael, a word which is not in itself distinctive, but merely a description of the angelic office, used as a proper name or title to designate the heavenly messenger who was sent to Daniel to explain the vision of the ram and the he-goat (Dan. vii), and to communicate the prediction of the Seventy Weeks (Dan. ix, 21-27). Under the new dispensation he was employed to announce the birth of John the Baptist to his father Zechariah (Luke i, 13), and that of the Messiah to the Virgin Mary (Luke i, 26). See ANNUCLEATION. (It is also added in the Targum, as a gloss on some other passages of the O. T.). In the ordinary traditions, Jewish and Christian, Gabriel is spoken of as one of the archangels (q. v.). In Scripture he is set forth only as the representative of the angelic nature, not in its dignity or power of contending against the powers of darkness (Revelations xii), but in its manifestation of comfort and sympathy to man. His prominent character, therefore, is that of a "follower-servant" of the saints on earth; and there is a corresponding simplicity, and absence of all terror and mystery, in his communications to men; his own words, "I am Gabriel, that stand in the presence of God" (Luke i, 19), are rather in favor of the notion of his superior dignity. See Angel.

In the Book of Enoch, "the four great archangels, Michael, Raphael, Gabriel, and Uriel, are described as representing the corrupt state of mankind to the Creator, and as having rescued several fallen angels. To Gabriel he says, "Go, Gabriel, against the giants, the sanguineous ones, the sons of fornication, and destroy the sons of the watchers from among the sons of men" (Greek Fragment of the Book of Enoch, preserved by Syriac and Arabic manuscripts, in Hebrew literature (Paris, 1616, 4to).—Hefner, Nouv. Biog. Gén., xii, 106.

Gabriel, St., Congregation of the name of two monastic congregations in the Roman Catholic Church. 1. The first Congregation of St. Gabriel was established at Bologna by Cesar Bianchetti, a senator of Bologna, who was born May 8, 1585, and after the death of his wife in 1608, devoted himself with great zeal to giving religious instruction to the youth and the ignorant. In order to obtain aid in his work he established a congregation of lay gentlemen, who, without living in common, pledged themselves to promote the cause of Christian instruction, and assembled on certain days for devotional exercises and for deliberation on their work. Subsequently a second congregation was organized of such laymen as preferred to live in common, and to devote their whole lives to the cause. The latter were called Convintici, the former Convini. The founder died in 1655. The congregation does not appear to have spread beyond Bologna. Members can be received from the eighteenth to the fiftieth year of age. The novitate lasts three years, after which the novices may be received into the congregation by a two-thirds vote. They have to wait three years more before they have the right to vote. They are elected annually. See Delprat, "Vita del Venerab. Servo di Dio Cesare Bianchetti" (Bologna, 1704). Helyot, Dictionnaire des Ordres Religieux, s. v. 2. Another "Congregation of the Brothers of St. Gabriel" has been established in the present century by Abbé Deshayes in France. The object of the congregation is to instruct the children, especially those of the country, in the Christian doctrine. Abbé Deshayes at first extended his congregation to several places, with Abbé Jean Marie Robert de Lamennais (q. v.), but subsequently they separated, Lamennais organizing the congregation of the "Brothers of the Christian Instruction" (q. v.). The congregation of which Deshayes

Gabriel de Chicon, a French Roman Catholic missionary, was born towards the beginning of the 17th century. He became a Capuchin, and was sent as missionary to Persia about 1640. He settled at Isphah, in the heart of the Oriental languages, which enabled him to make a great number of proselytes. The favor he enjoyed at the court of Shah Abbas II excited the envy of the Armenian priests, who caused him great annoyance. Gabriel withdrew about 1660 to Tabriz (Taurus or Tehran, the capital of the province of Azerbaijan, in North Persia), where he founded a convent of Capuchins, and established missions in Kurdistan and at Tiflis. About 1670 he went on a mission to Malabar, where he died (at Tellicherry) June 27, 1670. He wrote observations on the countries he had resided in, which were afterwards published by Moréri, with a life of Gabriel, under the title Relations nouvelles du Levant, ou traité de la religion, du gouvernement, et des coutumes des Perses, des Arméniens et des Gueures (Lyons, 1671, 12mo). They contain some curious details on Persian customs and manners, but the greater part of the work is taken up with details concerning religious questions, Gabriel's order, and himself. See Niceron, Mémoires pour servir a l'histoire des hommes illustres, xxvii, 811; Hefner, Nouv. Biog. Générale, xix, 109.

Gabriel Sionita, a learned Maronite, was born at Eddin, on Mount Libanus, 1574. He came to Rome when seven years old, and studied at the Maronite College there. He was made professor of Oriental languages at Rome. In 1614 he accompanied the French ambassador (at Rome) to Paris, and was made professor of Arabic at the College of France. In 1620 he became doctor of theology. In 1630 he began to work on Le Jee's Polyglot Bible, for which he furnished the Syriac and Arabic versions. He died at Paris in 1648. Of his writings, we name Liber Psalmorum ex Arab. in Lat. translatus (Rome, 1614, 4to);—pm (see Grammaticum, in libera divina (Paris, 1616, 4to).—Hefner, Nouv. Biog. Gén., xii, 106.

Brother of St. Gabriel.
remained the superior assumed in 1835 the name of "Congregation of Brothers of St. Gabriel," after the patron saint of the founder. Abbé Deshayes died in 1841. In 1858 the congregations had 73 establishments and about 400 members. Every fifth year the congregation elects a superior general, who may be re-elected after the lapse of that term. The head establishment of the congregation is at St. Laurent de Sèvre. See Migeon, Dict. des Ordres Relig. vol. iv, s. v.

GABRIELITES. See Anabaptists.

Gaches, Raymond, a French Protestant divine, was born at Castres towards 1615. In 1649 he was appointed a native of his native city, and he soon became distinguished as a preacher. In 1654 he was called to Paris to supply the Protestant church of Charenton. He died at Paris in December, 1658. During his sojourn at Castres he contributed to the formation of an academy, which did not last long, but counted among its members many distinguished men. He published a number of separate sermons, sixteen of which have been collected under the title Œuvres, 4°. See Hug, La France Protestante, s. v.; Hoefer, Nouv. Œuv. Gen. xviii. 390; Vinet, Histoire de la Préfiguration (Paris, 1659, 8vo, § 7, p. 296–302).

Gad (Heb. גד, „fortune, Gen. xxx, 11, although another signification is allied to Gen. xxl, 19; Sept. and N.T. Τιτάν, the name of two men, and of the descendants of one of them; also of a heathen deity and of a plant. See also Baal-Gad; Migdal-Gad.

3. (Josephus Ιωάννης). Jacob's seventh son, the first-born of Zilpah, Leah's maid, and whole-brother to Asher (Gen. xxvii, 11–13; xlvii, 16), born autumn B.C. 1915. The following is a copious account of him and his posterity. See Jacob.

1. As to the name, there are several interpretations: (a) The passage in which the bestowal of the name of Gad is preserved—like the others, an exclamation on his birth—is more than usually obscure: "And Leah said, 'In fortune (be-gad, גָּד), and she called his name Gad'" (Gen. xxx, 11). Such is supposed to be the meaning of the old text of the passage (the Kethib); so it stood at the time of the Sept., which renders the key-word by ν χαίρεται, in which it is followed by Jerome in the Vulg. : Palmer. In his Quaest. in Genesis, Jerome has drifoura. ; Josephus (Ant. i, 18, 9) gives it still another different form—vayangados: fortuitous. But in the marginal emendations of the Masoretes (the Keri) the word is given ḡ ḡ, "Gad has come." This construction is adopted by the ancient versions of Onkelos, Aquila, (ξυρά χαίρετα), and Symmachus (ξυρά Τιτάν). (b) In the blessing of Jacob, however, we find the name played upon in a different manner: "Gad" is here taken as meaning a pastoral or troop (the term constantly used for which is g-dud, גַּדְדָּא), and the al- lusion—the turns of which is it impossible adequately to convey in English—would seem to lie to the irregular life of predatory war which should be pursued by the settlement on the borders of the Promised Land. "Gad, a pastoral troop (g-dud), shall plunder him (ye-gad-en-su), but he will plunder (ya-gad) [at the heel]" (Gen. xlix, 19). Jerome (De Benedict. Jacob) interprets this of the revenge taken by the warriors of the tribe on their return from the conquest of Western Palestine for the incursions of the desert tribes during their absence. (c) The force here lent to the name has been by some partially transferred to the narrative of Gen. xxx, e. g. the Samaritan version, the Veneto-Greek, and our own A.V. (uniting this with the preceding)—"a troop (of children) cometh." But if this be the explanation, it is not so clearly the word g-dud—by which it is here sought to interpret the g-dad of Gen. xxx, 11—possessed its own special signification of turbulence and fierceness, which makes it hardly applicable to children in the sense of a number or crowd, the image suggested by the A.V. Exactly as the turns of Jacob's language apply to the characteristics of the tribe, it does not appear that there is any connection between his allusions and those in the exclamation of Leah. The key to the latter is probably lost. To suppose that Leah was inspired by some ancient divinity, the god Fortune, who is conjectured to be once alluded to—and once only—in the latter part of the book of Isaiah, under the title of Gad (Isa. lxi, 11; A.V. "that troop;" Gesenius, "dem Glück"), is surely a poor explanation.

2. Of the childhood and life of the individual Gad nothing is preserved. At the time of the descent into Egypt seven sons are ascribed to him, remarkable from the fact that a majority of their names have plural terminations, as if those of families rather than persons (Gen. xlvii, 16). The list, with a slight variation, is again given on the occasion of the census in the wilderness of Sinai (Num. xxvi, 15–18). See Arad; Ezor; Öeni.

Tribe of Gad. The position of Gad during the march on the march and was the territory of the tabernacle (Num. i, 14). The leader of the tribe at the time of the start from Sinai was Elissaph, son of Reuel or Deuel (ii, 14; x, 20). Gad is regularly named in the various enumerations of the tribes through the wanderings—at the dispatching of the spies (xili, 13), in the division in the plains of Moab (xxvi, 18), —but the only inference we can draw is an indication of a commencing alliance with the tribe which was subsequently to be his next neighbor. He has left the more closely-related tribe of Asher to take up his position next to Reuben. These two tribes also preserve a near equality in their numbers, not suffering from the fluctuations which were endured by the others. At the first census Gad had 45,650, and Reuben 46,500; at the last Gad had 40,650, and Reuben 43,350. This alliance was doubtless induced by the similarity of their pursuits. Of all the sons of Jacob, these two tribes were the first to return to the land which their forefathers had left five hundred years before with their occupations unchanged. "The trade of thy slaves hath been about cattle from our youth even till now"—"we are shepherds, both we and our fathers" (Gen. xlvii, 34; xlvii, 4) —such was the account which the patriarchs gave of themselves to Pharaoh. The civilization and the persecutions of Egypt had worked a change in the habits of most of the tribes, but Reuben and Gad remained faithful to the pastoral pursuits of Abraham, Isaac, and Jacob; and at the halt on the east of Jordan we find them marching forward to Moses with a sentiment that they "have cattle"—"a great multitude of cattle," and the land where they now are is a "place for cattle." What should they do in the close precincts of the country west of Jordan with all their flocks and herds? Wherethrough let this land, they pray, be given them for a possession, and let them not be overthrown over Jordan (Num. xxxii, 1–5). They did not, however, attempt to evade taking their proper share of the difficulties of subduing the land of Canaan, and after that task had been effected, and the appoin- tment of Shechem (Gilgal) as the nigher place of assembly, "at the doorway of the tabernacle of the congregation in Shiloh, before Jehovah," they were dismissed by Joshua "to their tents," to their "wives, their little ones, and their cattle," which they had left behind their in Gilgal. To their tents went—they to the danger and to the To the danger and to the danger and to the danger and to the danger. The tribe of Joseph had elected to remain, and in which—a few partial glimpses excepted—the later history allows them to remain hidden from view.

The country allotted to Gad appears, speaking roughly, to lie in the middle of the territory of the land east of Jordan. The south of that district—from the Arnon (wady Mojel), about half way down the Dead Sea, to Heshbon, nearly due east of Jerusalem—
was occupied by Reuben, and at or about Hasbon the possessions of Gad commenced. They embraced half Gilead, as the oldest record specially states (Deut. iii, 12), or half the land of the children of Ammon (Josh. xiii, 25), probably the mountaneous district which is intersected by the torrent Jabbock—if the wady Zarka be the Jabbock—including as its most northern town the ancient sanctuary of Mahanaim. On the east the furthest landmark given is "Aser, that faces Rabab," the present Amman (Josh. xiii, 27). The Arabian desert thus appears to have been the eastern boundary. West was the Jordan (Josh. xiii, 27). The northern boundary is somewhat more difficult to define. Gad possessed the whole Jordan valley as far as the Sea of Galilee (xiii, 27), but among the mountains eastward the territory extended no farther north than the river Jabbock. The border seems to have run diagonally from that point across the mountains by Mahanaim to the southern extremity of the Sea of Galilee (Josh. xii, 1-6; xiii, 26, 30, 31; Deut. iii, 12, 13; see Porter's Damascus, ii, 292). The territory thus consisted of two comparatively separate and independent parts, (1) the high land on the general level of the country east of Jordan, and (2) the sunk valley of the Jordan itself; the former diminishing at the Jabbock, the latter occupying the whole of the great valley on the east side of the river, and extending up to the very Sea of Cinnereth or Gennesaret itself.

Of the structure and character of the land which thus belonged to the tribe—"the land of Gad and Gilead"—we have only vague information. From the western part of Palestine its aspect is that of a wall of purple mountain, with a singularly horizontal outline; here and there the surface is seamed by the ravines, through which the torrents find their way to the Jordan, but this does not much affect the vertical wall-like look of the range. But on a nearer approach in the Jordan valley, the horizontal outline becomes broken, and when the summits are attained a new scene is said to burst on the view. "A wide table-land appears, tossed about in wild confusion of undulating downs, clothed with rich grass throughout; in the southern part trees are thinly scattered here and there, aged trees covered with lichen, as if the relics of a primaeval forest long since cleared away; the northern parts still abound in magnificent woods of sycamore, beech, terebinth, ilex, and enormous fig-trees. These downs are broken by three deep defiles, through which the three main rivers of the East flow, the Jabbock, and the Arnon fall into the valley of the Jordan and the Dead Sea. On the east they melt away into the vast red plain, which by a gradual descent joins the level of the plain of the Hauran, and of the Assyrian desert" (Stanley, Pales. p. 290). It is a very picturesque country, it has not the "flat, open country" with "smooth and even turf" of the country round Hasbon (Irby, p. 142), the sheep-walks of Reuben and of the Moabites, but "most beautifully varied with hanging woods, mostly of the valonia oak, laurus, cedar, arbutus, arbutus andrachne, etc. At times the country had an appearance of a noble park" (ibid. p. 147), "graceful hills, rich vales, luxuriant herbage" (Porter, Handb. p. 310). See Gilead.

Such was the territory allotted to the Gadites; but there is no doubt that they soon extended themselves beyond these limits. The official records of the reign of Josiah of Judah (1 Chron. v, 11, 16) show them to have been at that time established over the whole of Gilead, and in possession of Bashan as far as Salcah—the modern Sukh, a town at the eastern extremity of the noble plain of the Hauran—and very far both to the north and the east of the border given them originally, while the Manassites were pushed still further northwards to Mount Hermon (1 Chron. v, 22). They soon became identified with Gilead, that name so memorable in the earliest history of the nation; and in many of the earlier records it superseded the name of Gad, as we have already remarked it did that of Bashan. In the song of Deborah, "Gilead" is said to have "abode beyond Jordan" (Judg. v, 17). Jephthah appears to have been a Gadite, a native of Mizpeh (Judg. xi, 64; compare 81, and Josh. xiii, 26), and yet he is always designated "the Gileadite," and so also with Barzillai of Mahanaim (2 Sam. xvii, 27; Ezra ii, 61; comp. Josh. xiii, 26).

The following is a list of all the Biblical localities in this tribe, with their probable identifications:

| Abel-keram. | Town. | [Merj-Ekkels] |
| Abel-nititim. | do. | [On Wady B'inj] |
| Arar | do. | Atrak. |
| Ataroth-shaphan. | do. | [X. of Merj-Ekkels] |

The character of the tribe is throughout strongly marked by war and warlike men of war for the battle, that could handle shield and buckler, their faces the faces of lions, and like roes upon the mountains for swiftness." Such is the graphic description given of those eleven heroes of Gad—"the least of them more than a man and the greatest two a thousand"—who joined their fortunes to David at the time of his greatest dis- credit and embarrassment (1 Chron. xii. 8), undeterred by the natural difficulties of "flood and field" which stood in their way. Surrounded as they were by Ammonites, Midianites, Hagarites, and tribes of the heathen with all the other countless tribes, animated by a common hostility to the strangers whose coming had dispossessed them of their fairest districts, the warlike propensities of the tribe must have had many opportunities of exercise. One of its greatest engagements is related in 1 Chron. xv. 19-22. Here their opponents were the wandering Ishmaelitish tribes ofjetur, Nephe- shid, and Nobad (comp. Gen. xxv. 15), nomad people, possessed of an enormous wealth in camels, sheep, and asses, to this day the characteristic possessions of their Bedouin successors. This immense host came into the hands of the conqueror, who seem to have entered with it on the former mode of life of their victims: probably pushed their way further into the Eastern wilderness in the "steada" of these Hagarites. Another of these encounters is contained in the history of Jephthah, but this latter story develops elements of a differing nature and a higher order than the mere fierceness necessary to repel the attacks of the plunderers of the desert. In the behavior of Jephthah throughout that affecting history there are traces of a spirit which we may almost call chivalerosque: the high tone taken with the elders of Gilead, the noble but fruitless expostulation with the king of Ammon before the attack, the hasty vow, the overwhelming grief, and yet the persistent devotion of purpose, surely in all these there are marks of a great nobility of disposition, which must have been more or less characteristic of the Gadites in general. If to this we add the loyalty, the generosity, and the delicacy of Bar- zillai (2 Sam. xix. 32-39), we obtain a very high idea of the tribe at whose head such men as these. Nor must we, while enumerating the worthies of Gad, forget that in all probability Elijah the Tabbite, "who was of the inhabitants of Gilead," was one of them.

But, while exhibiting these high personal qualities, Gad appears to have been wanting in the powers necessary to enable him to take any active or leading part in the confederacy of the nation. The warriors, who rendered such signal service to the national honor, were all of them either from the tribe of Reuben or from the tribe of Simeon, and, when Jabez set up his court at Mahanaim as king of Israel, have done much towards affirmining his rights. Ilad Abner made choice of Schechem or Shiloah instead of Mahanaim—the quick, explosive Ephraim instead of the unready Gad—who could doubt that the troops of David's reign would have been immensely increased, perhaps the establishment of the northern kingdom anticipated by nearly a century? David's presence at the same city during his flight from Absa- lon produced no effect on the tribe, and they are not mentioned as having taken any part in the quarrels between David and Absalom.

Cut off as Gad was by position and circumstances from its brethren on the west of Jordan, it still retained some connection with them. We may infer that it was considered as belonging to the northern kingdom —"Know ye not," says Ahab in Samaria, "know ye not that the Gilead is ours, and we take it not out of the hand of the king of Syria?" (1 Kings xxii. 8). The territory of Gad was the battle- field on which the long and fierce struggles of Syria and Israel were fought out, and, as an agricultural pastoral country, it must have suffered severely in consequence (see 2 Kings, ch. xxii.).

Gad was carried into captivity by Tiglath Pileser (1 Chron. v. 26), and in the time of Jeremiah the cities of the tribe seem to have been inhabited by the Amo- nomites. "Hath Israel no sons? hath he no heir? why doth Malcham (i.e. Moloch) inherit Gad, and his people have his cities?" (xlix. 1). See Idolatry, Pa- lent., p. 162 sq.; Burchhardt, Trans. in Syria, p. 347 sq.

2. (Josephus Flade. Ant. vii. 18, 4.) "The seer (היהוה), or the king's seer," i.e. David's—such appears to have been his official title (1 Chron. xxix., 29; 2 Chron. xxix., 25; 2 Sam. xxiv., 11; 1 Chron. xxix., 9)—was a "prophet" (נביא), who appears to have joined David when in "the hold," and at whose advice he quitted it for the forest of Hareth (1 Sam. xxii., 5), B.C. 1061. Whether he remained with David during his wanderings is not to be ascertained: we do not again encounter him till late in the life of the king, when he reappears in connection with the punishment inflicted for the numbering of the people (2 Sam. xxiv., 11-19; 1 Chron. xxix., 9-19), B.C. cir. 1016. But he was evidently attached to the royal establishment, for he is mentioned in a book (see Chronicles, Book of) of the Acts of David (1 Chron. xxix., 29), and also assisted in settling the arrangements for the musical service of the "house of God," by which his name was handed down to times long after his own (2 Chron. xxxii., 25). In the abruptness of his introduction Gad has been compared with Elijah (Jerome, Qu. Hebr. on 1 Sam. xxix., 5), with whom he may have been of the same tribe, if his name can be taken as denoting his parentage, but this is unsupported by any evidence. Nor is there any apparent ground for Gregory's surmise (l.c. 118) that he was of the school of Samuel. If this could be made out, it would afford a natural reason for his joining David. See David.

3. The name Gad (with the art. הָגָד) Sept. ḥoμיו- νος v. t. ὥριον, or, according to the reading of Je- rome and some MSS., ἡγών is mentioned in Isa. xlv. 11 (A.V., "troop"). The word, by a combination with the Arabic, may be legitimately taken to denote fortune (see Pococke, Spec. Hist. Arab. p. 140). So Ge- senius, Hiitzig, and Ewald have taken Gad in their respective versions of Isaiah, rendering the clause, "who spread a tale to fortune."

In the general case, makes fortune in this passage to be an object of idolatrous worship. There is great dis- agreement, however, as to the power of nature which this name was intended to denote, and, from the scanty data, there is little else than mere opinion on the sub- ject. The majority, among whom are Pittoni, are the chief rabbinical commentators (see Buxtorf, Lex. Talm. col. 1094), as well as Gesenius, Münter, and Ewald, consider Gad to be the form under which the planet Ju- piter was worshipped as the greater star of good fortune (see especially Gesenius, Comm. über den sterne, ad loc.)."
have been the planet Venus (De Phénomènes, i, 650). See Bel. On the other hand, if God be derived from תִּלֵּל in the sense of to press, to crowd, it may mean a troop, a host (to which sense there is an allusion in Gen. xlix, 19); and Hobeisl, as cited in Rosenmüller's Scholia, ad loc., as well as Deyting, in his Oberwacht. Matthew 24:27 each attempted a mode by which the passage might be explained; if Gam and Meni were taken in the sense of troop and number (see further Dadv. Mill's diss. ad loc. in his Diss. Selecta, p. 81-123). See Meni.

Some have supposed that a trace of the Syrian worshipping God is to be found in the exclamation of Leah, when Zilphah bore a son (Gen. xxx, 11), 'בג-גא, ba-gad, or, as the Keri has it, 'בג-ןא, 'Bog, or good fortune cometh.' The Targum of Pseudo-Jonathan and the Jerusalem Targum both give 'gad' as 'their planet cometh,' but it is most probable that this is an ethnologists which grew out of the astrological beliefs of a later time, and we can infer nothing from it with respect to the idolatry of the inhabitants of Padan Aram in the age of Jacob. The tale in belief in a deity Fortune existed, and are many things mentioned by Ezera (Lex. Talai, s. v.) says that anciently it was a custom for each man to have in his house a splendid couch, which was not used, but was set apart for 'the prince of the house,' for 'the children of the house,' for 'the star or constellation Fortune, to render to it more portentous. This couch was called the couch of God, or good-luck (Talm. Bibl. Samked. f. 20 a; Nedarrim, f. 86 a). Again, in Bereshith Rabba, § 65, the words יָשָׁר בַּל, in Gen. xxvii, 81, are explained as an invocation to God or Fortune. Rabbi Moses the Priest, quoted by Aben-Ezra (on Gen. xxx, 11), says '"bog (Isa. lxv, 11) signifies the star of luck, which points to everything that is good, for thus the language of Kedar (Arabic); but he says that גא in Gen. xxx, 11 is not used in the same sense.' Illustrations of the ancient custom of placing a banquetting table in honor of gods will be found in the table spread for the sum among the Egyptians (Herod. iii, 17, 18), and in the feast made by the Babylonians for their god Bel, which is described in the apochryphal history of Bel and the Dragon (comp. also Herod. l, 181, 182), and in the temple of Belus is described by Diodorus Siculus (19. 29. 2). A beaten gold, 40 feet long, 15 wide, and weighing 500 talents. On it were placed two drinking-cups (κοίτατα) weighing 80 talents, two censers of 80 talents each, and three golden chalices, that of Jupiter or Bel weighing 1200 Babylonian talents. On this table of the god in the temple of Zeus Tryphonius at Paphos, in the island of Paphos, are mentioned by Diodorus (v. 46; comp. also Virgil, Æn., ii. 685). In addition to the opinions which have been referred to above, may be quoted that of Stephen le Moyné (Var. Sacror. p. 583), who says that God is the god of Mendes, worshipped by the Egyptians as an emblem of the sun; and of Le Clerc (Comm. in Isa.) and Lamkemacher (Obs. Phil., iv, 18, etc.), who identify God with Hecate. Macrobius (Sat. i, 15) tells us that in the later Egyptian mythology Τριγνωσθησία was worshipped as one of the greatest deities who presided over the moon. This will perhaps throw some light upon the rendering of the Sept. as given by Jerome. Traces of the worship of God remain in the proper names Baal Gad and Gid-derah (Deod. Num. iii, 6), the latter of which Gesenius (Mum. Phen., p. 407) renders בִּנְיָה יִתְבָּרָה, "favoring fortune" (comp. Wirth, De Gas et Mene Judaeorum habemorum dias, Altore, 1726). See Baal.

For the plant gad, see CORIANDER.

Gadara (躇 גָּדָרָה in Josephus, prob. from מַגְז, a well [see GENESIS]; only in N. T. in the Gentile חֲגָדָר, a strong city [Josephus, Ant. xiii, 18, 8], situated near the river Hermes [Flint, H. N. v, 16], east of the Sea of Galilee, over against Scythopolis and Tiberias (Eusebius, Onomasticon, s. v.), and 16 Roman miles distant from each of those places (Him. Ant. ed. Wess. p. 129, 198; Tab. Peut.), or 60 stadia from the latter (Joseph. Life, § 60). It stood on the top of a hill, at the foot of which, upon the banks of the Hirmomax, three miles distant, were warm springs and baths called Amathia (Onom. s. v. Etham and Gadara; Him. Ant. xxii, 8). Josephus calls it the capital of Persa (War, iv, 9), and Polybius says it was one of the most strongly fortified cities in the country (vii, 21, 3). A large district was attached to it, called by Josephus Gadarita (Γαδαρίτα, War, iii, 10, 10); Strabo also informs us that the warm healing springs were "in the environs of Gadara" (iv γ Ῥάδαριτα, Geog. xvi). They were termed Thermes Heli, and were reckoned inferior only to those of Baal (Euseb. Onomast.). According to Epiphanius ( Aph. Hist., 326), a yearly festival was held at these baths (Reid, p. 775). The caverns in the rocks are also mentioned by Epiphanius (I. c.) in terms which seem to show that they were in one of his days for dwellings as well as for tombs. Gadara itself is not mentioned in the Bible, but it is evidently identical with the "country of the Gadarenenses" (Ἰουσίων εἰς την Ἰερουσαλημ, Mark v, 1; Luke viii, 26, 87).

Gadara seems to have been founded and chiefly inhabited by Gemites, for Josephus says of it, in conjunction with Gaza and Hippos, that it was more proper for Gemites to settle there than for Greeks (i.e., for Hellenes) (Ant., xvii, 11, 4). The first historical notice of Gadara is its capture, along with Pella and other cities, by Antiochus the Great, in the year B.C. 218 (Joseph. Ant. xxii, 8, 8). About twenty years afterwards it was taken from the Syrians by Alex. Jannaeus, after a siege of ten months (Ant. xiii, 18, 8; War, i, 4, 2). The Jews retained possession of it for some time; but the place having been destroyed during their civil war, it was rebuilt by Pompey to gratify his freedman Demetrius, who was a Gadarene (War, i, 7, 7). When Gabinus, the proc Fuse of Syria, changed the government of Judae by dividing the country into five districts, and placing each under the authority of a council, Gadara was made the capital of one of these districts (War, i, 8, 5). The territory of Gadara, with the adjoining towns, was added by Augustus to the kingdom of Herod the Great (Ant., xxv, 7, 5), from which, on the death of the latter, it was succeeded, and joined to the province of Syria (Joseph. War, ii, 6, 8). According to the present text of the Jewish historian, Gadara was captured by Vespasian on the first outbreak of the war, the Jews, all its inhabitants massacred, and the town itself, with the surrounding villages, reduced to ashes (Joseph. War, iii, 7, 1); but there is good reason to believe (see Robinson, Later Bib. Res. p. 87, note) that the place there referred to is GABARA (q. v.). However that may have been, Gadara was at this time one of the most important cities east of the Jordan (Joseph. War, iv, 8, 8). Stephen of Byzantium (p. 254) reckoned it a part of Coele-Syria, and Pliny (Hist. Nat. v, 16) a part of the Decapolis (comp. William of Tyre, xvii, 13). At a later period it was the seat of an episcopal see in Palestina Secunda, whose bishops are named in the councils of Nice and Ephesus (Reland, Palust., p. 176, 215, 223, 295). Gadara is also mentioned in the Talmud (Reland, p. 775; Ritter, Erdk. xxvii, 318). For coins, see Eckhel (Doctr. Num. iii, 348). It fell to ruins soon after the Mohammedan conquest, and has now been deserted for centuries,
GADARA

with the exception of a few families of shepherds, who occasionally find a home in its rock-hewn tombs. Most modern authorities (Raumer, in his Palästina, Burckhardt, Seetzen) find Gadarah in the present village of Um-keis. Buckingham, however, identifies this with Qemala (Trav. ii, 202 sq.); though it may be added that his facts, if not his reasoning, lead to a conclusion in favor of the general opinion. On a partially isolated hill at the north-western extremity of the mountains of Gilead, about sixteen miles from Bethlehem and the ravine and terracible ruins of Um-Keis. Three miles northward, at the foot of the hill, is the deep bed of the Shariat el Mandhir, the ancient Hieromax; and here are still the warm springs of Amatha (see Irby and Mangles, p. 236; Lindsay, ii, 97, 98). On the west is the Jordan valley; and on the south is wady el Arab, running parallel to the Mandhir. Um-Keis occupies the crest of the ridge between the two latter wadys; and as this crest declines in elevation towards the east as well as the west, the situation is strong and commanding. The city formed nearly a square. The upper part of it stood on a level spot approximately in the middle of the city, the entire area of the city, and the acclivities of the hill being on all sides exceedingly steep. The eastern gate of entrance has its portals still remaining. The prevalent orders of architecture are the Ionic and the Corinthian. The whole space occupied by the ruins is about two miles in circumference, and the remains of columns are traces of two of the principal streets round, though now almost completely prostrate. These ruins bear testimony to the splendor of ancient Gadarah. On the northern side of the hill is a theatre, and not far from it are the remains of one of the city gates. At the eastern street, the most commodious of all, the principal theatre of the city, was laid down; and here and there the traces of the chariot-wheels are visible on the stones, reminding one of the thoroughfares of Pompeii. Buckingham speaks of several grottos, which formed the necropolis of the city, on the east all round the hill. The first two examined by him were plain chambers hewn down so as to present a perpendicular front. The third tomb had a stone door, as perfect as on the day of its being first hung. The last was an excavated chamber, twelve feet in height, twenty-five feet long, and ten broad; within it was a smaller room. Other tombs were discovered by Buckingham as he ascended the hill. He entered one in which were ten sepulchres, ranged along the inner wall of the chamber in a line, being pierced inward for their greatest length, and divided by a thin partition left in the rock, in each of which was cut a small niche for a lamp. Still more tombs were found, some containing sarcophagi, some without them; all, however, displaying more or less of architectural ornament. One of the ancient tombs was, when our traveller saw it, used as a carpenter's shop, the occupants of being employed in constructing a rude plough. A perfect sarcophagus remained within, in which was used by the family as a provision-chest. See Burckhardt, Syria, p. 270 sq.; Porter, in Journal of Sac. Lit., vi, 281 sq.; Hackett, Illust. of Script. p. 190; Traill's Journeys, 145.

Gadara derives its greatest interest from having been the scene of our Lord's miracle in healing the demoniacs (Matt. viii, 28-34; Mark v, 1-21; Luke viii, 26-40). "They were no clothes, neither abode in any house, but in the tombs." (Christ came across the lake from Capernaum, and landed on the shore of the city, and having set the demoniacs free, he went up the hill on the east, and at the time of the eastern plateau breaks down into the plain of the Jordan. The demoniacs met him a short distance from the shore; on the side of the adjoining declivity the "great herd of swine" were feeding; when the demons went among them the whole herd rushed down that "steep place" into the lake and perished; the keepers ran up to the city and told the news, and the excited populace came out in haste, and "besought Jesus that he would depart out of their coasts." The whole circumstances of the narrative are thus strikingly illustrated by the features of the country. Another thing is worthy of notice. The most interesting remains of Gadara are its tombs, which dot the cliffs for a considerable distance round the city, chiefly on the north-east declivity, but many beautifully-sculptured sarcophagi are scattered over the surrounding heights. They are excavated in the limestone rock, and consist of chambers of various dimensions, some more than 20 feet square, with recesses in the sides for bodies. The doors are slabs of stone, a few being ornamented with panels; some of them still remain in their places (Porter, Damascus, ii, 54). The present inhabitants of Um-Keis are all turbodysts, "dwelling in tombs," like the poor manics of old, and occasionally they are almost as dangerous to the unprotected traveller. In the above account, in the Gospel of Matt. (viii, 28), we have the word Gerasenes (Gerysenv, instead of Gargarom), which seems to be the same as the Hebrew גָּֽרֶאשָׁה (Sept. Πηγεσεᾶς) in Gen. xv. 21, and Deut. vii. 1 — the name of an old Canaanitish tribe [see Gergash-terræ], which Jerome (in Comm. ad Gen. xv) locates on the shore of the Sea of Tiberias. Origen also says (Opera, iv. 14) that a city called Gergesa anciently stood on the eastern side of the lake. Even these were true, still the other Gospels would be strictly accurate. Gadarah was a large city, and its district would include Gerasa. But it must be remembered that the most ancient MSS, give the word Gerasem, while others have Gargarom—the former reading is adopted by Griesbach and Lachmann, while Schultz prefers the latter; and either one or other of these seems preferable to Gerasem. See GADARA.

Gadaraænus (Gerasi'mus), an inhabitant of Gadarah (q. v.), occurring only in the account of the demoniacs cured by Christ (Mark v, 1; Luke viii, 26, 37), and perhaps to be read in the third Evangelist (Matt. viii, 28) instead of Geresene (q. v.).

Gaddah. See HAZAR-GADDAH.

Gaddi (Heb. Gaggi, yah, fortunatus; Sept. ἀγαθός), son of Sulis, of the tribe of Manasseh, sent by Moses as the representative of that tribe among the twelve 'spies,' on the exploring tour through Canaan (Num. xiii. 11), B.C. 1357.

Gaddiel (Heb. Gadiel, Gadiel, yah, fortunate [i.e. sent] of God; Sept. Γαδίης v. τ. Γαργάης), son of Sodi, of the tribe of Zebulon. He represented that tribe among the twelve 'spies' sent by Moses to explore Canaan (Num. xiii. 10), B.C. 1357.

Gader. See BETH-GADER.

Ga'eb (Heb. Ga'eb, yah, a Gadiite; Sept. ἀγαθός v. τ. Γαργάης and ἀγαθός, the father of the usurer Menahem, who slew Shalumm, king of Israel (2 Kings xv, 14, 17), B.C. ante 769.

Gad'te (Heb. Gad'te, mostly collect. and with the art.; Sept. ὁ τε, ἀγαθός, etc., the descendent of Gad (q. v.), son of Jacob (Num. xxxix, 14; Deut. iii, 12, 18; iv, 43; xxxii, 8; Josh. I, 12; XII, 6; xiii, 8; xxii, 1; 2 Sam. xxiii, 36; 2 Kings x, 33; 1 Chron. vii, 18, 26; vii, 8, 37; xxvi, 32).

Gadsdem, CHRISTOPHER EDWARDS, D.D., Protestant Episcopal bishop of South Carolina, was born in 1765 in Charleston, South Carolina. He was educated partly Episcopal and partly Congregational. In 1840 he passed A.B. of Yale College, where he formed a lasting friendship with John C. Calhoun. He was ordained deacon
in 1807, and priest in 1810. In 1808 he took charge of St. John's, Berkley, and soon after became assistant minister of St. Philip's, Charleston, of which he became rector in 1814, and in connection with which he spent the residue of his life. In 1810 he founded the Presbyterian Baptist Sunday School in South Carolina, which has proved an important auxiliary to clerical education and missionary effort. In 1814 he became rector of St. Philip's, Charleston, and the following year was made D.D. by the College of S. C. He was elected bishop in 1840, and in the ensuing discharge of his duties gave particular attention to the spiritual interests of the colored people. He was distinguished for thorough learning and deep piety. He died in Charleston June 24, 1852. He published The Prayer-book; as it is; three charges to his clergy, entitled The Times morally considered, The Times ecclesiastically considered, and The Times theologically considered; and some Sermons.—Sprague, Annals, v, 510.

Gaëtanus. See CAJETAN.

Gaffarel, Jacques, a French mystic, was born at Mânes, in Provence, in 1601, and studied at Valence. He showed special aptitude for Oriental and cabalistic studies, and was made librarian at Paris to Cardinal Richelieu. In 1625 he published Histoire des cabalisimtes de la nature (4to); and got into trouble by Curiosites iconiques sur la sculpture talismanique des Persans (Paris, 1629-30, also 1631, 1637, and in Latin, Curiositates Insignium [Hamburg, 1706, 8vo]), which was condemned by the Sorbonne. In 1632 he went to Rome, and in 1634 he became a Jesuit. He travelled in Italy, Greece, and Asia; and on his return to Paris received several valuable church prebends. He devoted himself to reclaiming Protestants, but was himself charged with preaching against purgatory. Bayle hints that he did this by order, in order to seduce Protestants. He died in 1681. Among his writings, other than those mentioned, are Dialogi, sive de fine mundi, etc. (Paris, 1629, 12mo)—Index Codicum cabalisticiorum quibus usus est Joannes Miranda/us (Paris, 1651)—Histoire universelle du monde sottisin (1666, fol.).—Bayle, Dictionary, s. v.; Hoeffer, Nouv. Dict. Générale, xix, 116.

Gage, Thomas, an English divine, noted especially for his conversion from Roman Catholicism, was born in Haling, in Surrey, about 1597. He entered into the Dominican order in Spain, after which he was sent as a missionary to the Philippine Islands; but instead of going thither, he went to Mexico, and then to Guatamala, where he remained several years in the labour of the Indians. He returned to England in 1637, after an absence of twenty-four years, during which he had forgotten his native language. On examining into his domestic affairs, he found himself unnoticed in his father's will, forgotten by some of his relatives, and with difficulty acknowledged by others. While abroad he had imbibed doubts of Romanism, and now he resolved to take another journey to Italy, to "try what better satisfaction he could find for his conscience at Rome in that religion." At Loreto his conversion from Catholicism was completed by his discovery of the false miracles attributed to the picture of the Virgin there, and on his return home he preached a recantation sermon at St. Paul's, by order of the bishop of London. He continued above a year in London, but soon received from the parliamentary party the living of Deal, in Kent. His accounts of the West Indies and Spanish America gave rise to the expedition of admiral Penn against Jamaica in 1655. Page accompanied the fleet, and died of dysentery at Jamaica (1655). He published his Recantation Sermon (1642); a piece entitled A Duel fought between a Jesuit and a Dominican (4to); and Survey of the West Indies (1648, and again in 1655, fol.). This work was greatly admired, and was soon translated into most European languages. See Hook, Ecclis. Biogr. v, 243; Eichard, Script. Ord. Preisdctorum, vol. ii; Hoeffer, Nouv. Biog. Générale, xix, 151.

Gage, William, a Presbyterian minister, was born in Salem, Mass., Nov. 16, 1797. He graduated at Amherst College in 1826, then entered Andover Theological Seminary, where he graduated in 1831. He was licensed to preach in the same year, and was ordained in 1832 pastor over the churches of Concord and Piscataqua, Ohio, where he remained until his death. He early espoused the anti-slavery views for which the presbytery of Chillicothe has been so long distinguished. Upon one occasion his house was pelted with eggs and stones, and he himself was threatened with tar and feathers if he would not desist from preaching and praying on the subject. He kept on in his course, however. He died July 9, 1863.—Wilson, 1st Presbyterian Almanac, vi, 150.

Gagelin, François Imodore, a French missionary and martyr, was born at Mont-Faucon (Doubs), May 5, 1799, and educated at Besançon, and at the seminary of Foreign Missions at Paris. Having been appointed subdeacon, he embarked at Bordeaux in Dec., 1820, for Cochín China, and in 1822 was consecrated priest by bishop Labartho. The Christian religion had been tolerated in Cochín China since April 9, 1774, but the example of Tonquin, where it was strictly prohibited, was not without influence. In 1820 Mijn-Meln ascended the throne, and soon gave evidences of his dislike towards the new religion, yet did not begin persecuting the Christians until 1836. At this time the zones and mandarins addressed a petition to the emperor, asking for the expulsion of the missionaries. The Jesuits, becoming alarmed, fled; but Gagelin, less fortunate than his colleagues, was arrested and brought back to Hue-Pho. He was, however, permitted to continue his missionary efforts, and in 1836 was allowed to settle in the province of Dong Nai; but a Strife between the different sects led to a general edict against the Christians, Jan. 6, 1838. Gagelin was again taken to Hue, and hanged, Oct. 11, 1838.—François Pérénnes, Vie de l'abbé Gagelin (Besançon, 1856, 12mo); Hoeffer, Nouv. Biog. Générale, xix, 154 sq. (G. N. P.)

Gagnier, Jean, a French divine and Orientalist, was born in Paris about 1670. He was bred a Roman Catholic, entered into holy orders, and became a canon in the abbey of St. Genevieve, but became a Protestant and settled in England. He was patronized by archbishop Sharp and other eminent persons, and received the degrees of bachelor, master, and doctor of civil and canon law. He obtained the Arabic professorship at Oxford in 1715, and died in 1740. He published an edition of Ben Gorion's History of the Jews, in Hebrew, with a Latin translation and notes (Oxford, 1706, 4to);—Vindiciae Avicennae (Oxford, 1718, fol.);—L'islam Romaine continué d'idéologie (La Haye, 1766, 8vo);—Vie de Maomet, traduite et compiée de l'Arabe (Amst., 1782, 2 vols.).—Hoeffer, Nouv. Biog. Générale, xix, 166.

Gaham (Heb. Gach'ah, גְּכַּא), מִשָּׁעָה, "in pause" Ga'cham, מִשָּׁעָה; perhaps, having flaming eyes; otherwise, swarthy; Sept. Geapha v. v. Taaph, one of the sons of Nahor by his concubine Reumah (Gen. xxii, 24), B.C. cir. 2200.

Gahar (Heb. Ga'har, גָּחַר, "in pause" Ga'kar, מִשָּׁעָה; a lurking-place; Sept. Geapha), one of the chief Nethinitheh whose descendants returned with Zerubbabel from the captivity to Jerusalem (Ezra ii, 47; Neh. vii, 49), B.C. cir. 530.

Gaianitze. A Monophysite sect of the 6th century, which derived its name from Gaianus, bishop of Alexandria, who denied that Jesus Christ, after the hypothetical union, was subject to any of the infirmities of human nature. See ECTYCHIANISM.

Galler of Kaisersburg. See GRIEZ.

Galliard, Jacques, a French Protestant theolo-
Gaisford, Thomas D.D., an English divine and eminent classical scholar, was born in Wiltshire, Dec. 22, 1779. He was educated at Winchester school, where he was noted for his proficiency in Greek. He was elected a student in 1800 by the unanimous suffrage of the college. He proceeded B.A. June 8, 1801, and M.A. April 11, 1804. He acted for several years as tutor in his college. His edition of the Eschilidion of Hippocras, published in 1806, established his reputation as an accurate and profound scholar. In 1811 he was made regius professor of Greek, and, after a number of valuable preferments, in 1831 he was made dean of Christ Church, which office he filled most ably till his death, June 2, 1855. So high was his reputation as a classical scholar that he was elected a member of the Institute of France and of the Royal Academy of Munich. In private life he "did justly, loved mercy, and walked humbly before God." The list of his classical publications is too great to be published here; among them were editions, in whole or in part, of Euripides, Plato, Aristotle, Herodotus, Sophocles. In theological literature he edited, besides other works, the following: "Chorobact Dictates in Theodosii Casonu, neum Epier uncomfortable in Paedagog (3 vols. 1842); "Eusebius Ecloga Prosfeas (1842); "Eusebius Preparato Evangelica (1848); Pharsaloi Averadischen (3 vols. 1848); "Hymnolog Cumchur (fol. 1841); "Vetus Testamentum et Versione LXX Interp. (3 vols. 12mo, 1848); "Stobaeus Ecloga Physico et Ethic (2 vols. 1850); "Eusebius contra Hieroclem et Marcellum (1832); "Eusebius Demonstratio Evangelicae (2 vols. 1852); "Theodoret Historia Antiquissima (1854); "Hardwick, Annual Biog. (Lond. 1859), 12mo.

Galactus, Dr. See Caius.

Gal, Saint. See Gall.

Galæad (Γαλαα, 1 Macc. v, 9, 55; Jud. i, 8; xv, 5) and the country of Galæad (Παλαατερις, Galæadites, 1 Macc. v, 17, 20, 25, 27, 36, 45; xiii, 22), a Geometricized form of the word Gilead (q. v.).

Galæa (Heb. Galæah, גָּלַאָה, perhaps weighty; Sept. Γαλάα, Γαλάα, Γαλαά), the name of two Levites after the exile.

1. A descendant of Jeduthun, and father of Shemai- ah or Shammua (1 Chron. ix, 16; Neh. xii, 17, B.C. 536). 2. One of those who dwelt in the villages of the Nethinathites and served at Jerusalem (1 Chron. ix, 15), A.D. 536.

Galanos, Demetrios, a Greek scholar, was born in Athens in 1760. He studied at Missolonghi, and subsequently at Patmos, where he remained six years perfecting himself in Greek learning. At the end of this time he was sent for by his uncle, one of the bishops of Cassodoris, who required him to enter the priesthood. But Demetrios was resolved to devote himself to letters, and went to Calcutta as tutor in the family of a wealthy Greek in 1786. "After remaining six years in Calcutta, pursuing the study of the English, and of the Sanscrit, Persian, and other Oriental languages, in addition to his duties as an instructor, he resolved to devote himself henceforth wholly to philosophy. Investing the property which he had acquired while there in a commercial establishment, he removed to Benares. Here he assumed the character of a Brahmin, and lived in retirement as a Grecian priest for forty years, respected alike by the native population and by European residents. He undertook the task of translating the most important portions of the Brahminical literature relating to philosophy into Greek. When he was seventy years old he began to think of returning to his native land, but he died with this wish unfulfilled, May 8, 1833. He bequeathed to the University of Oto, at Athens, all his library, consisting of Sanscrit books and MS. translations from them into Greek. Six or eight volumes of these translations have been published by the librarian of the university, and are found in the collection of modern Greek literature in the library of Harvard University. In this selection are included translations of the Vagavata Purana, the Gita, the Dourga, and a portion, or, rather, an epitome of the Mahabharata, the most extensive and the most celebrated of the Indian literatures."—Watchman and Reflector, Nov. 7, 1861.

Galante, Abraham ben-Mordecai, a Cabal- list and Jewish commentator of the 16th century. He was a disciple of the new-school Cabalist, Moses Cordovero, and is best known by his mystical commentary on the Lamentations (שָׁנָה לַעֲבָדִים, published, with additions, by Ibn-Shabir under the title לְעַבָּדִים (Venice, 1589; 2d ed. Prague, 1621). Galante wrote also a commentary on the Sohar (or Zohar), entitled מַעֲשֶׂה שָׁמָיִם, extended over the Pentateuch, but of which only the first part, on Genesis, was printed under the title לְעַבָּדִים (Venice, 1555). The MS. of the unpublished parts of this work remain unedited in the Oppenheim Library. Jost (p. 237) says that the name of Galante's father was originally Mordecai Anelo, but that he, on account of his beauty, was called Galante, or, rather, Galantemon, in Rome, where he lived, and whose sons, Abraham and Mos- sea, afterwards emigrated to Palestine, they retained the new name of their father.—Jost, Gesch. d. Juden- thums u. s. Sektien, iii, 150; Etheridge, Intro. to Hebr. Lit. p. 360, 418; Fürst, Bibl. Jud. i, 313. (J. H. W.)

Galante, Moses ben-Mordecai, brother of Abraham (see above), was president of the celebrated Jewish college for rabbis at Safed. His Panegyria, Index to Sohar (Zohar) (Venice, 1613; 2d ed. Frankfurt a. M. 1681), explains all the passages of the O.T., and the meaning of the Zohar (q. v.). This book exhibits the manner in which the Messianic passages of the Old Testament are treated in the Talmud and Cabala- ha. We have also from him a commentary on Eccle-
GALATIA

710

GALATIA

Galatia is the "Gallia" of the East. Roman writers call its inhabitants Gauli, just as Greek writers call the inhabitants of ancient France Gaulia (see Pritchard, Nat. Hist. of Man, iii, 95). From the intermixture of Gauls and Greeks (Pausan. i, 4), Galatia was also called Gallo-Grecia (Galagogrecia, Strabo, xii, 5), and its inhabitants Gallo-Graeci. But even in Jerome's time they had not lost their native language (Proc. Cant. Comment., in Eccl. xiv, 20; De Wette, Leben Jerom., 231). In 2 Tim. iv, 10, some commentators suppose Western Gaul to be meant, and several MSS. have Galatia instead of Galleria. In 1 Mac. vii, 2, where Judas Maccabaeus is boasting the story of the prowess of the Romans in conquering the Galatians, it is put that the Romans conquered the Eastern or Western Gauls; for the subjugation of Spain by the Romans, and the defeat of Antiocbus, king of Asia, are mentioned in the same context. Again, Galleria is the same word with Galatia; and the Galatians were in their origin a stream of that great Celtic torrent (apparently Kyrrhen, and not Gaits) which poured into Macedonia about B.C. 280 (Strabo, iv, 187; xii, 566; Livy, xxxviii, 16; Flor. ii, 11; Justin, xxxv, 2; Apian, Sgr. xxxii, 42). Some of these invaders moved on into Thrace, and appeared on the shores of the Hallespont and Bosporus, when Nicomedes I, king of Bithynia, being then engaged in a civil war, invited them across into Asia Minor to assist him against his brother, Zyzbeutas (Menonon, ap. Phot. Cod. 224, p. 574), B.C. cir. 270. Having accomplished this object, they were unwilling to retrace their steps; and, strengthened by the accession of fresh hordes from Europe, they overran Bithynia and the neighboring countries, and supported themselves by predatory excursions, or by impost taxes extracted from the native chiefs. Antiocbus I, king of Syria, took the title of Soter in consequence of his victory over them. After the death of Antiocbus I, the Galatians also, Antiocbus II, succeeded in checking their nomadic habits, and confined them to a fixed territory within the general geographical limits, to which the name of Galatia was permanently given. The Galatians still found vent for their restlessness and love of war by hiring themselves out as mercenaries soldiers. This is doubled by the explanation of 2 Mac. viii, 20, which refers to some struggle of the Seleucid princes in which both Jews and Galatians were engaged. In Josephus (War, i, 20, 5) we find some of the latter, who had been in Cappadocia, and who had then become the personal character for Herod the Great. Meanwhile the wars had been taking place which brought all the countries round the east of the Mediterranean within the range of the Roman power. The Galatians fought on the side of Antiocbus at Magnesia. In the Mithridatic war they fought on both sides. Of the three principal Galatian tribes (Strabo, xii, 429), the Troadom (Troagom) settled in the eastern part of Galatia, near the banks of the Halys; the Tectosages (aetopoigoi) in the country round An- crya; and the Tolstobogni (Tolstorignoi) in the south-eastern parts near Pessinus. They retained their independence till the year B.C. 189, when they were brought under the power of Rome by the pro-

The Roman province of Galatia may be roughly described as the central region of the peninsula of Asia Minor, with the provinces of Asia on the west, Cappadocia on the east, Pamphylia and Cilicia on the south, and Bithynia and Pontus on the north. The province stretches from the sea to the Sangarius and the Halys, the Galatians were still settled in their three tribes, the Tectosages, the Tolstobogi, and the Troagom, the first of which is identical in name with a tribe familiar to us in the history of Gaul, as distributed over the Cevennes near Toulouse (Cesar, Bell. Gall. iv, 24; comp. Jablonsky, De Lingua Lucumica, p. 25 sq.). The three capita were respectively Tavium, Pessinus, and An- spygia. Hence the Galatians were called Gallo-greci (Manlius in Livy, xxxvii, 27). The inscriptions found at Ancrya are Greek, and Paul wrote his epistle in Greek. (See Penny Cyclopaedia, s. v. Celtz, Gal- tia; Manner's Geographie der Griechen und Römer, vi, 3, ch. 4; Merleker's Lehrbuch der Historiochrono- graphie, iv, 1, p. 284.).

It is difficult at first sight, to determine in what sense the word Galatia is used by the writers of the N.T., or whether always in the same sense. In the Acts of the Apostles the journeys of Paul through the district are mentioned in very general terms. We are simply told (Acts xvi, 6) that on his second missionary circuit he went with Silas and Timothy through Phrygia and the region of Galatia (idōn τοῦ Φρυγίαν καὶ τούτου τοῦ).
GALATIAN

Γαλατιανῶν χώρων). From the Epistle, indeed, we have this supplementary information, that an attack of sickness prevented Paul from going to Galatia, although his mind was among the Galatians, and gave him the opportunity of preaching the Gospel to them, and also that he was received by them with extraordinary fervor (ib. 14, 15); but this does not inform us of the route which he took. So on the third circuit he is described (Acts xviii, 25) as "going to all the cities of Galatia and Phrygia in order" (διερχόμενος καθεύδες τῆς Γαλατείας καὶ Φρυγίας). We know from the first Epistle to the Corinthians that on this journey Paul was occupied with the collection for the poor Christians of Judæa, and that he received testimonies in Galatia on the subject (συμβολάσα ταῖς τοις Γαλατισίως, 1 Cor. xvi. 1): but here again we are in doubt as to the places which he had visited. We observe that the "churches" of Galatia are mentioned here in the plural, as in the opening of the Epistle to the Galatians themselves (Gal. i. 2). From this we should be inclined to infer that he visited several parts of the district, instead of residing a long time in one place, so as to form a great central church, as at Ephesus and Corinth. This is in harmony with the phrase ἐκ Γαλατείας χώρων, used in both instances. Since Phrygia is mentioned first in one instance, and in the second is supposed that the order of the journey was different on the two occasions. Phrygia also being not the name of a Roman province, but simply an ethnographical term, it is natural to conclude that Galatia is used here by Luke in a geographical way. A disconnection of his view, it is worth while to notice that in Acts ii. 9, 10, where the enumeration is ethnographical rather than political, Phrygia is mentioned, and not Galatia, while the exact contrary is the case in 1 Pet. i. 1, 2, where each geographical term is the name of a province that is narrated, and Howson, Life and Epistles of St. Paul, i. 245.

The Epistle to the Galatians was probably written very soon after Paul's second visit to them. Its abruptness and severity, and the sadness of its tone, are caused by their sudden perversion from the doctrine which the apostle had taught them, and which at first they had received so willingly. It is no fancy if we see in this sickness a specimen of that "inopportune, mobile, imperious spirit" which Thiersy marks as characteristic of the Gaulish race (Hist. des Gaules, Introd. iv. v.). From Josephus (Ant. vii. 6, 2) we know that mair Jews were settled in Galatia in the time of Augustus, and if Gal. iv. 8 would lead us to suppose that Paul's converts were mostly Gentiles. The view advocated by Böttger (Schausplata der Wirkamkeit des Apostels Paulus, p. 28-30, and the third of his Belfrage, p. 1-5) is that the Galatia of the Epistle is entirely limited to the district of Derbe and Colossae, i.e., the extreme southern frontier of the Roman province. On this view the visit alluded to by the apostle took place on his first missionary circuit, and the διαβίβασις of Gal. iv. 13 is identified with the effects of the storing at Lystra (Acts xiv. 19). Geographically this is not impossible, though it seems unlikely that regions called Pisidia and Lycaonia in one place should be called Galatia in another. Böttger's geography, however, is connected with a theory concerning the date of the Epistle (see Rückert, in his Megas. f. Erzec. i. 98 sq.), and for the determination of this point I must refer to the article on the GALATIANS, THE EPISTLE TO THE. (See Schmidt, De Galat. [Ufled. 1748, 1784]; Myntser, Kleine theol. Schrift. p. 60 sqq.; Cellarri Notit. ii. 173 sqq.; Forbiger, Allc Geog. ii. 561 sq.; Hofmann, De Galatia Antiqua [Lipa. 1792]; Wackernagel, Die romische Geschichte [Norimb. 1748]; Hamilton, Asia Minor, i. 579.)

Galat'ian (Γαλατικός), the patriotic designation (1 Macc. viii. 2; 2 Macc. viii. 20; Gal. iii. 1) of an inhabitant of Galatia (q. v.).

GALATIANS, EPISTLE TO THE, the fourth in order of the Pauline epistles of the N. T., entitled simply, according to the best MSS., (see Tischendorf, N. T. ad loc.) Galat. (See the Mercersburg Synopsis, Jan. 1861.)

I. Authorship.—With regard to the genuineness and authenticity of this epistle, no writer of any credit or respectability has expressed any doubts. Its Pauline origin is attested not only by the superscription which it bears (i. 1), if this be genuine, but also by the absence of allusions in the course of it to the great apostle of the Gentiles (comp. i. 13-28; ii. 1-14). It is corroborated also by the style, tone, and contents of the epistle, which are perfectly in keeping with those of the apostolic letters of Paul. The testimony of the Church on this subject is most decided and unanimous (see Lardner, Works, vol. ii.). Besides express references to the epistle (Irenæus, Her. iii. 7, 2; v. 21, 1; Tertullian, De Præser. ch. 60, al.), we have one or two direct citations found as early as the time of the apostolic fathers (Polyc. ad Phil. ch. 8), and several apparent allusions (see Davidson, Introd. ii. 318 sq.). The attempt of Bruno Bauer (Kritik der Paulin. Briefe. Berlin, 1850) to demonstrate that this epistle is a compilation of later times, and from those to the Romans and to the Corinthians, has been treated by Heyer with a contemptuous severity (Vindici, vii. 27) on which, it does not seem too much to say, are completely deserved.

II. Occasion, etc.—The parties to whom this characteristic letter was addressed are described in the epistle itself (Gal. i 1, 2, 3; iv. 21, 25), and the occasion on which Paul wrote it was the dispute among the Galatians about circumcision (Acts xvii. 11), who believed that they could be converted to Christ without the observance of the Jewish law (Gal. iv. 3, 26). The appeal was justified by the apostle in a manner which is productive of deep interest. (Strabo, l. c. Paustriana, iv. 5), could date an occupancy, though not an independence, extending to more than three hundred years; the first subject of Galatia to the Romans having taken place in B.C. 189 (Livy, xxxvii. 16 sq.), and its formal reduction (with territorial additions) to a regular Roman province in A.D. 26. See GALATIA. Into this district the Gospel was first introduced by Paul himself (Acts xvi. 6; Gal. i. 8; iv. 12, 17). Churches were then also probably formed, for on revisiting this district some time after his first visit he found that the churches were "forsaken, turned from the discipline' (Acts xxvii. 29). These churches seem to have been composed principally of converts directly from heathenism (ch. iv. 8), but partly also, of Jewish converts, both pure Jews and proselytes. Unhappily, the latter, not thoroughly emancipated from early prejudices, and conscious of the distrust of the Jewish teachers who had visited these churches, had been seized with a zealous desire to incorporate the rites and ceremonies of Judaism (especially circumcision, ch. v. 2, 12; vi. 12 sq.) with the spiritual truths and simple ordinances of Christianity. (See Cruse, De secta Galaterarum, etc. Hafn. 1722.) So active had this party been in disseminating their views on this head through the churches of Galatia, that the majority at least of the members had been seduced to adopt them (i, 6; iii. 1, etc.). To this result it is probable that the previous religious conceptions of the Galatians contributed; for, accustomed to the worship of Cybele, which they had learned from their neighbors the Phrygians, and to theosophic doctrines with which that worship was associated, they would be the more readily induced to believe that the fulness of Christianity could alone be developed through the symbolic adorations of an elaborate ceremonial (Nousner, Apostolisches Zeitalter, 2d ed. p. 400). It would seem clear from that on his last visit to this region, Paul found the heathen of Judaism beginning to work in the churches of Galatia, and that he then warned them against it in language of the most decided character (comp. i.
GALATIANS

9: v. 5). From some passages in this epistle (e.g., 1, 11-24; ii, 1-21) it would appear also that institutions had been divinely enjoined. See also Acts xvii, 1-12, the church, may be ascribed to the effect that Paul was not a divinely-commissioned apostle, but only a messenger of the church at Jerusalem; that Peter and he were at variance upon the subject of the relation of the Jewish rites to Christianity. The "word of grace" was to spread, and the church was strenuously opposed to those rites as he had chosen to be among the Galatians. Of this state of things intelligency having been conveyed to the apostle, he wrote this epistle for the purpose of vindicating his own pretensions and conduct, of countering the influence of the false teachers, and recalling the Galatians to the simplicity of the Gospel which they had received. The importance of the case was probably the reason why the apostle put himself to the great labor of writing this epistle with his own hand (vi, 11).

11. Time and Place of Writing. - On the date of this epistle great diversity of opinion prevails. (See Fische, De tempore quo op. ad G. scripta fuerit, Longae, 1608; Keil, De tempore, etc., in his Opusc. acad. p. 551 sq.; also Ueb. d. Zeit., etc., in Tischbein's Analecten, iii, 2, 55 sq.; Niemeyer, De tempore, etc., Göttingen, 1827; Ulrich, Ueber die Zeit, etc., in the Theol. Zeitschr., u. Kreis, 1856, p. 448 sq.). Marciol held this to be the earliest of Paul's letters (Epiphanius, adv. Haeres. xiii, 9); and Tertullian is generally supposed to favor the same opinion, from his speaking of Paul's zeal against Judaism displayed in this epistle as characteristic of his being of his times. (See iv, 8, in the Theol. Lexicon, u. Kreis, 1856, p. 448 sq.). Marciol held this to be the earliest of Paul's letters (Epiphanius, adv. Haeres. xiii, 9); and Tertullian is generally supposed to favor the same opinion, from his speaking of Paul's zeal against Judaism displayed in this epistle as characteristic of his being of his times. (See iv, 8, in the Theol. Lexicon, u. Kreis, 1856, p. 448 sq.). Marciol held this to be the earliest of Paul's letters (Epiphanius, adv. Haeres. xiii, 9); and Tertullian is generally supposed to favor the same opinion, from his speaking of Paul's zeal against Judaism displayed in this epistle as characteristic of his being of his times. (See iv, 8, in the Theol. Lexicon, u. Kreis, 1856, p. 448 sq.).

On these grounds it is probable that the apostle wrote and dispatched this epistle not long after he had left Galatia for the second time, and perhaps whilst he was residing at Ephesus (comp. Acts xviii, 23; xix, 1 sq.), in the A.D. 51. The apostle would in that city have been easily able to receive tidings of his Galatian converts; the dangers of Judaism, against which he personally warned them, would have been fresh in his thoughts; and when he found that these warnings were proving unavailing, and that even his apostolic authority was becoming undermined by a fresh arrival of Judaizing teachers, it is then that he would have written, as it were on the spur of the moment, in those terms of earnest and almost impassioned warning that so noticeably mark this epistle. The reasons which Michaelis urges for an earlier date are of no weight. He appears to base the first place in honour on his own conjecture, as the only evidence for the supposition whether Paul would have used the vague expression, "all the brethren," without naming them, had it not been that the parties in question were those by whom he had been accompanied on his first visit to Galatia, viz. Silas and Timothy, and, "perhaps, some others." The answer of the obvious question, that Paul would usually have used a name or names, reduced in this expression to these individuals, who were known to the Galatians, he was much more likely, on that very account, to have named them than otherwise; and besides, the expression "all the brethren that are with me" is much more naturally understood of a considerable number of persons, such as the elders of the church at Ephesus, than of two persons, and "perhaps some others." Again, he urges the fact that, about the time of Paul's first visit to Galatia, Asia Minor was full of zealots for the law, and that consequently it is easier to account for the presence of the apostle among the Galatians at this period than at a later. But the passage to which Michaelis refers in support of this assertion (Acts xv, 1) simply informs us that certain Judaizing teachers visited Antioch, and gives us no information whatever as to the time when such zealots entered Asia Minor. In fine, he lays great stress on the circumstance that Paul, in recapitulating the history of his own life in the first and second chapters, brings the narrative down only to the period of the conference at Jerusalem, the reason of which is to be found, he thinks, in the fact that this epistle was written so soon after that event that nothing of moment had sub-
sequently occurred in the apostle's history. But, even
admitting that the period referred to in this second
chapter was that of the conference mentioned Acts xv
(though this is much doubted by many writers of note),
the apostle's life was from the first he had claimed
the narrative of his life no further than this cannot be
admitted; for it overlooks the design of the apostle in
furnishing that narrative, which was certainly not to
deliver himself of a piece of mere autobiographical de-
tail, but to show from certain leading incidents in his
early apostolic life how from the first he had claimed
and exercised an independent apostolic authority, and
how his rights in this respect had been admitted by the
pillars of the Church, Peter, James, and John.
For this purpose it was not necessary that the narra-
tive should be brought down to a later date than the
period when Paul went forth as the apostle of the
Gentiles, formally recognised as such by the other
apostles of Christ.

Some of the advocates of a date earlier than A.D. 50
suppose that the persons addressed under the name of
Galatians were not the same as those whom Paul wrote
to in the Epistle to the Galatians proper, but of Lystra
and Derbe (Acts xiv, 6), since among the seven districts into which Asia Minor was divided by the
Romans the name of Lycaonia does not occur; the
latter therefore, with its cities of Derbe and Lys-
tra, must have been included in the province of Gal-
tia. In the former nothing is written in Acts xii, 12
thereof. (See Schmidt, De Galatia, etc., Hefeld. 1748.)
It is urged, in addition, that, whilecopious details are
given in Acts xiv respecting the founding of the Ly-
caonian churches, the first mention of Galatia (Acts
xvi, 6) is merely to the effect that Paul passed through
thereby.
On these grounds Paul, particularly if (Stud.
und Krit., 1836), Böttger, and others hold that under the
term ρηματοσφαλος, "the region round about" (Acts
xvi, 4), Galatia must be included; and therefore they
put back the composition of the epistle to a date ante-
terior to that at which the council of the apostles
(Acts xvi, 3) was held. However, that Luke did not
follow the Roman divi-
sion into provinces (which, moreover, was frequently
changed), because he specially mentions Lycaonia, which was no province, and distinguishes it from Ga-
latia. As to the latter point, no valid inferences can
be drawn from the common inscription of the letter,
history upon the details of Paul's labors in particular
places, provided his presence there is clearly record-
ed, although in brief terms. There seems, therefore,
no reason to depart from the common opinion that the
apostle's first visit is recorded in Acts xvi, 5; and con-
sequently the epistle must have been sent subse-
quently to the council (Acts xv).
With this, too, the
references in the epistle itself best agree. The visit to
Jerusalem alluded to in chap. ii, 1-10, is, on the
best grounds, supposed to be identical with that of Acts xv
(A.D. 42); and the apostle speaks of it as a thing of
the past. See Part.

IV. Contents.—The epistle consists of three parts.
In the first part (i, ii), which is apologistic, Paul vindi-
cates his own apostolic authority and independence as
a directly-commissioned ambassador of Christ to men,
and especially to the Gentile portion of the race. After
an address and salutation, in which his direct appoint-
ment by heaven is distinctly asserted (i, 1), and a brief
doxology (i, 5), the apostle expresses his astonishment
at the speedy lapse of his converts, and reminds them
how he had forewarned them that even if an angel
should preach from heaven (ii, 16, 17), he would be
another Jesus (ii, 18). The gospel he preached was not of
men, as his former course of life (i, 11-14), and as his actual
history subsequent to his conversion (i, 15-24), con-
vincingly proved. When he went up to Jerusalem it
was not so instructed by the v, for he speaks of going in a
special mission, which resulted in his being formally ac-
credited by them (ii, 1-10); nay, more, when Peter
dissembled in his communion with Gentiles, he re-
buffed him, and demonstrated the danger of such in-
consistency (ii, 11-21). In the second part (iii, iv),
which is polemical, having been led to refer to his zeal
for the great doctrine of salvation by the grace of God
through faith in Christ, the apostle now enters at large
upon the subject, and brings in a carrying of the
truth of Christianity.
He appeals to the former experience of the
Galatians, and urges specially the doctrine of
justification, as evinced by the gift of the Spirit (iii,
1-5), the case of Abraham (iii, 6-9), the fact of the law
involving a curse, from which Christ has freed us (iii,
10-14); the condemnation of the law (iii, 15-18), and
that preparatory character of the law (iii, 19-24) which ceased when faith in Christ and baptism into
him had fully come (iii, 22-29).
All this the apostle illustrates by a comparison of the
nonage of an heir with that of bondage under the
children of the flesh, they are now sons and inheritors
(iv, 1-7); why, then, were they now turning back to
bondage (iv, 8-11)? They once treated the apostle very differently (iv, 12-16); now they pay court to others, and awaken feelings of
serious mistrust (iv, 17-20); and yet, with all their ap-
proval of the law, they show that they do not under-
stand its deeper and more allegorical meanings (iv,
21-31).
In the third part (v, vi), which is hortatory and
ampulatory, the Galatians are exhorted to stand fast
in their freedom, and beware that they make not their
union with Christ (v, 6-8); their perverters, at any
cost (v, 9), but particularly in readiness (v, 10) to
work the law of love (v, 13-14): the works of the Spirit
are what no law condemns, the works of the flesh are
what exclude from the kingdom of God (v, 16-26).
The apostle further exhorts the spiritual to be forbear-
(vi, 1-5), the taught to be liberal to their teach-
ers, and to remember that as they sowed so would they
reap (vi, 6-10). Then, after a noticeable recapitula-
tion, and a contrast between his own conduct and
that of the false teachers (vi, 11-16), and an affecting
entreaty that they would trouble him no more (vi, 17),
the apostle concludes with his usual benediction (vi,
18).

V. Commentaries.—The following are special exe-
genetical helps on the whole of this epistle, the most
important being designated by an asterisk [*].

Victorinus, Commentarius (in Mai, Script. Pat., ii, 1);
Jerome, Commentarius (in Opp. vii, 367, 369); Augustine, Expositio (in Opp. iv, 1248);
Chrysostom, Commentarius (in Opp. x, 779; also Erasmi
Opp. viii, 267, 267, in Lib. de Fadere, Ox. 1840, vol. vi,
8vo); Crumen, Comm. (in Opp. x, 109, 140; also by
Augustine, Expositio (in Opp. iv, 1248); Chry-
sostom, Commentarius (in Opp. x, 779; also Erasmi
Opp. viii, 267, 267, in Lib. de Fadere, Ox. 1840, vol. vi,
8vo); Cramer, Catena (vol. vi); Claudianus Taur., Com-
mentarius (in Biblioth. Patr. xiv, 129); Aquinas, Sum-
ma (in Opp. iv, 1248); and S Basedow (Lips. 1519,
4to, and often since; also in Opp. iii, 1, etc.: tr.
London, 1807, 1835, 8vo); also his fuller Commentarius
(Vitember, and Hagi, 1835, 8vo, and later; both works
also in Germ. often); Bugenhagen, Annotationes (Bas.
1525, 8vo); Megender, Commentarius (Tigur, 1528,
8vo); Serpizandus, Commentarius (in his work on Ro-
mans, Lugd. 1541, 8vo; also separately, Antw. 1565,
8vo, and later); Calvin, Commentarius et Sermones
(both in Opp.: the former ed. Edinb. 1634, 8vo; the
latter, Lond. 1574, 4to; Meyer, Adnotationes (Benzien,
1526, Hannover, 1602, 8vo); also by Basedow (Lips.
1519, 4to, and often since; also in Opp. iii, 1, etc.: tr.
London, 1807, 1835, 8vo); also his fuller Commentarius
(Vitember, and Hagi, 1835, 8vo, and later; both works
also in Germ. often); Musculus, Commentarius (Basil. 1561,
1569, fol.); Cogeletus, Solutionis (Vitember. 1564, 8vo;
Clymara, Exsurrro (France, 1509, 8vo); Heshusius, Com-
madrid (Lips. 1578, 8vo); Scaliger, Commentarius
(Vitember. 1580; Lips. 1564, 8vo); Grynaeus, Analysis
(Basil. 1583, 8vo, 8vo); Cornus, Commentarius [after Luth.
(Heidelb. 1583, 8vo); Prime, Exposition (Oxford,
1587, 8vo); Heilbrunner, Commentarius (Leining. 1591,
8vo); Nurse, Commentarius (Lond. 1600, 8vo); Rollock, Analytis (London, 1602, Geneva, 1603, 8vo),
Hoe, Commentarius (Lips. 1605, 8vo); Winnkellmann,
Commentarius (Gieisa. 1688, 8vo); Sondarin, Expositio
III.—28*
was called by the natives Khasruk, and bore a very close resemblance to the Farsa _trudescena_, but belonging neither to the genus Galbanum nor to Opodes. It is believed that the Persian galbanum and that brought from the Levant are the produce of different plants. See AROMATICS.

Galbanum is in the present day imported into Europe both from the Levant and from India. That from the Levant is the most aromatic, having long ago been imported thither, probably from the Persian Gulf. It is therefore probable that it may be produced in the countries at the head of that gulf, that, in the northern parts of Arabia, or in Persia (portions of which, as is well known, were included in the Syrian province of Damascus), which region, which nearly corresponds with ancient Assyria. Galbanum, then, is either a natural exudation, or obtained by incisions from some umbelliferous plant. It occurs in commerce in the form either of tears or masses, commonly called lamp galbanum. The latter is of the consistence of wax, tenacious, of a brownish or brownish-yellow color, with white spots in the interior, which are the agglutinated tears. Its odor is strong and balsamic, but disagreeable, and its taste warm and bitter. It is composed of 66 per cent. of resin and 6 of volatile oil, with gum, etc., and impurities. It was formerly used as a medicine, and is still employed as such, and for external application to discuss indolent tumors. The ancients believed that when burnt the smoke of it was efficacious in driving away serpents and gnats (Pliny, Hist. Nat., xxi, 13; Virg. Geog. iii, 415; Calpurn. v, 99; Lucan, ix, 916). Galbanum was also employed in adulterating the opobalsamum, or gum of the balsam plant (Pliny, xii, 54). It is still more to our purpose that we learn from Dioscorides that, in preparing a fragrant ointment, galbanum was mixed with other aromatic substances (compare Pliny, xii, 5). The effect of such mixture must depend upon the proportion in which it or any other strong-smelling substance is intermixed, more than upon what is its peculiar odor when in a concentrated state. We need not, therefore, inquire into the reasons which have been assigned to account, for galbanum being intermixed with stacte and onycha as sweet spices (see Kallasch, ad loc.). We see that the same practice existed among the Greeks and Egyptians (Virgil, Georg. iv, 284; Colum. ix, 15, etc.). See Penny Cyclopaedia, s. v. "Balsam," and Smith, Dict. of Suppl., iii, 738 sq.; Miller, "Hiropht.," p. 450. See ANOINTING OIL.

Gale, John, a Baptist divine and learned controvertist, was born at London in 1680. He studied at the University of Leyden, and at the age of nineteen graduated M.A., and doctor of philosophy. He studied also at Amsterdam under Limborch, and was intimate with Le Clore. The University of Leyden in 1708 offered him the degree of doctor of divinity if he would assent to the articles of the Synod of Dort. He became, in 1718, minister of the chapel in St. Paul's Al-ley, Baricin. But his ministrations was of short duration. He died in 1721, at the age of 41. In 1711 he published his "Reflections on Wall's Defence of Infant Baptism," and in 1719 held a dispute with the author. He was also the author of _Sermons on several Occasions_ (2d ed. 1726, 4 vols.). He was an able preacher, highly appreciated by the respectable congregation to which he ministered, and brought to the discussion of matters in controversy large, exact, and well-digested learning, with no small dialectical skill. (L. E. S.).

Gale, Theophilus, a learned nonconformist divine, was born in 1629, at King's Teignton, in Devonshire. He entered Magdalen College, Oxford, in 1647, and became fellow in 1650. In 1652 he passed A.M., and soon became an eminent tutor and a distinguished preacher in the university. In 1657 he was invited to Winchester, and became a stated preacher there, in which station he continued for several years. Having imbibed the principles of the nonconformists, on the re-establishment of episcopacy, at the restoration of Charles the Second, he refused to comply with the Act of Uniformity which passed in 1661. Deprived of his fellowship at Oxford, he was taken into the family of Philip, lord Wharton, in the capacity of tutor to his two sons. He was a diligent and multifarious student, and in 1669 he published the first part of his "Use of the Gentiles; or, a Discourse touching the Original of Human Literature, both Philosophy and Philology, from the Scriptures and Jewish Church" (Oxford and London, 5 vols. 4to). It was received with great applause, and was reprinted in 1672-1683. In the first part of this learned work, Mr. Gale endeavored to prove, that all languages have their origin and rise from the Hebrew. To this he adds a deduction, importing that the pagan theology, physical, political, poetry, history, rhetoric, are deduced from sacred names, persons, rites, and records; and showing, withal, how the Jewish traditions came to be corrupted and mistaken by papists. In the second part he tries to prove that philosophy also has its origin from the Jewish Church. In the third part, the vanity of pagan philosophy is demonstrated from its causes, parts, properties, and effects; namely, pagan idolatry, Judaic apostasy, Gnostic infusions, errors among the Greek fathers, especially Origenism, Arianism, Pelagianism, and the whole system of popery, or anti-Christianism, distributed into three parts, mystic, scholastic, and canonic theology. In the fourth part he treats of reformed philosophy, wherein Plato's, Aristotle's, and Polybius's ideas are compared or illustrated to useful forms or methods. He divides this, which is larger than any of the former parts, into three books, discoursing in the first of moral philosophy; in the second, of metaphysics; and in the third, of divine pre-determination. In 1671 he was chosen to succeed Mr. S. Rouse as master of the school. In 1676 he sides the "Court of the Gentiles," published in Latin an abridgment of it for the use of students, under the title of _Philosophia Generalis_, etc. (London, 1675, 8vo):—_Thespii_; or, a Discourse of the Saints' Unity with God in Christ (London, 1671, 8vo):—_The true Idea of Jansenism, both revealed and naturalistic_ (1669, 8vo):—_The Anatomy of Infidelity_ (1667, 8vo):—_A Discourse on the coming of Christ_ (1673, 8vo):—_An Idea Theologica_, etc. (12mo):—_And the Life and Death of Thomas Turquet_ (1671, 8vo).—_Jones, Christ._ Blog: _Sheed, Hist. of Dict., 1:205._

Gale, Thomas, D.D., a learned English divine and antiquarian, was born in 1636 at Scranton, in Yorkshire. He became fellow of Trinity, and was elected regius professor of Greek in 1666; was made prebendary of St. Paul's in 1676, and dean of York in 1697. He died April 8, 1702. He published _Oeconomia Mythologiae_, etc., Gr. and Lat. (Cumb. 1671, 8vo); _Historiae Petræi et multiscriptorum Graecarum et Latinæ._—_Herodotus Holocardamassinis Historiarii_, lib. ix:—_Historia Britannicae, Saxonicae, Anglo-Danicae, Scriptores, ex vestig. cod. MS. (Oxon. 1601, fol.). This work contains nearly all the original writers of English history.

Galeed (Hebr. Galeed, מָגְלֵד, vitamin), the sheep of the wise.
Galen or Galenus, MATTHEW VAN, D.D., was born about the year 1526, at West-Kapelle, on the island of Walcheren. As his parents were not in such circumstances as would enable them to give their son a liberal education, the expenses of his preparatory course at Ghent were born by two benevolent gentlemen of his native place. From Ghent he went to Louvain, where he studied philosophy and theology. After taking his bachelor's degree, he gave instructions in this institution in sacred eloquence. Being licensed, he was, on the recommendation of the noted Ruard Tapper, called to the professorship of theology in the recently founded university of Dillingen. This position he held from 1559 to 1563. Its duties were performed in such a way as to secure him high reputation. From Dillingen he was called to occupy the chair of theology at Douay. Here, in 1564, he received his degree of D.D. With zeal and fidelity he labored at this post till his death, which occurred in 1578. He was a man of eminent learning, possessing for his time a fund of knowledge which he lived an unassuming life. His familiarity with the Latin, Greek, and Hebrew languages. He was a member of the Council of Trent and of the Synod of Cambray. He numbered among his friends some of the principal men of his time. Though a man of great learning, he is said to have been deficient in critical taste. As a writer he produced various works in Latin on practical and polemic theology. The substance of his lectures on pulpit eloquence was given to the public under the title of Paradigmena. He also wrote a Commentarius in Epistolam D. Pauli ad Hebreos et Syro Sermone in Latinam versionem (Ducat, 1578; Lovan, 1599). An Explication in Exeolam is still preserved in manuscript in the University library at Leyden. His greatest merit consists in the service rendered to Church history by original contributions in this department, and by the publication of medieval writings and documents. In his direction of these works and of others, S. Tho. de la lebrori, Frisorum apostoli — Oratio in exitum S. Georgii martyr — Areopagica seu oppuscula quaedam suarum kactens recus ab Chliduochi et Hilduochi de rebus geatc ac etyble B. Macucii Josiach Dioniem Areopagice (Coloniis; 1653, Paris, 1656).—Academia Rhetorica ad Caulem Epistulam D. Pauli (Ducat, 1568).—De origine rituum universorum in Missa sacra sacrificiorum — De sacerdotum et de primis Christianis Monarchiae origine commentarius (Dilling, 1564). See B. Glassius, Godgeaer Nederland, D. I, b. 485 in ver.; also J. N. Paquot, Memoire pour servir à l'histoire liturgique des diocèses de la France, Paris, 1725; P. Lacug, Acta et clementie Romanae et de principalitatis die Liège et de quelques contrées voisines (Louvain, 1783-1787, 18 vols, ser. iii, p. 301 suiv. (J. P. W.)

Galenists, a branch split off, in 1664, from the Waterlanderites, who were Mennonites, or Anabaptists. The founder of the Galenists was called Galen Abraham Wierix, who was a doctor of physic, and pastor of a Mennonite congregation at Amsterdam. He was celebrated as a man of great penetration and eloquence, and is supposed to have inclined to Socinian views. Assuming that the Christian system laid much more stress on practice than on faith, he was disposed to receive into the Mennonite Church all who acknowledged the divine origin of the books of the Old and New Testaments and led holy and virtuous lives. Such, in his judgment, were true Christians, and had an undoubted right to all the privileges that belong to that character. — Mosheim, Ch. Hist. cent. xvii, sec. ii, pt. ii, ch. v, § 7. See Apostollic; Mennonites.

Galenis, HANS. See Galenists.

Galerius, VALENIUS MAXIMIANUS, Roman emperor, son of a shepherd, was born near Sardica, in Dacia, educated in the imperial army, and served in the wars of Aurelius and Probus. Diocletian (A.D. 292) conferred on him, along with Constantius Chlorus, the title of Caesar, and gave him his daughter Valeria to wife. On the abdication of Diocletian (A.D. 305), he and Constantius became co-emperors, or joint rulers of the Roman empire. On the death of Constantius (A.D. 306), the troops in Britain and Gaul immediately declared their allegiance to his son, Constantine (afterwards Constantine the Great), much to the chagrin of Galerius, who expected the entire sovereignty of Rome to fall into his hands. He died A.D. 311. Galerius hated the Christians bitterly, and is believed to have been the real author of Diocletian's persecutions. See Diocletian. "Brought to reflection by a terrible disease, he put an end to the slaughter shortly before his death by a remarkable edict of toleration, which he issued from Nicomedia in 311, in conjunction with Constantine and Licinius. In that document he declared that the purpose of reclaiming the Christians from their wildif innovation and the multitude of their sects to the laws and discipline of the Roman state was not accomplished, and that he would now grant them permission to hold religious assemblies; but that if they disturbed not the order of the state. To this he added, in conclusion, the remarkable instruction that the Christians, 'after this manifestation of grace, should pray to their God for the welfare of the emperors, of the state, and of themselves, that the state might prosper in every respect, and that they might live quietly in their homes.' This edict brought the period of persecution in the Roman empire to a close."—Schaaf, History of the Christian Church, vol. i, § 57.

Galfred, Gaffridus. See Geoffrey of Monmouth.

Gall'gala (Gá'gala; Vulg. Gagala), the ordinary equivalent in the Sept. for Galgala. In the A.V. it is named only in 1 Sam. i, 2, as designating the direction of the road taken by the army of Demetrius, when they attacked Masaloth in Arbel—"the way to Galgala" (וֹתֶגוֹ תּוֹ וֹאֶכוֹ). The army, as we learn from the statements of Josephus (Ant. xii, 11), was on its way from Antioch, and there is no reason to doubt that this is the meaning of the name of that name in Galilee now surviving as Iribid. Its ultimate destination was Jerusalem (1 Macc. ix, 8), and Galgala may therefore be either the upper Galgal, near Bethel (Robinson, Researches, iii, 8), as Ewald thinks (Jes. Greek, III, 1, 870, n.), or the lower one near Jericho, as Eusebius places it, and others, as the more probable route between the two points. The lower (the preferable) that through the Ghor, is chosen. Josephus omits the name in his version of the passage. It is a gratuitous supposition of Ewald's that the Galilee which Josephus introduces is a corruption of Galgala—a view, however, which is favored by the ending in the margin of the above text, and which is adopted by Michaelis. See Galgala 3.

Galicho or Gallico, ELISHA BEN-GABRIEL, a Jewish commentator, was born about the middle of the 16th century (15527). He was president of the Rabbinic college at Safed, over which Moses Galante (q. v.) at one time presided, and, like all the Safed men, was eminently pious. He wrote a work on Ecclesiastes (כְֹּלַל בִּנְֵאָנָה, Venice, 1578), which he divided into 27 sections, according to the number of letters in the Hebrew alphabet, including the final. Ginsburg, in his Historical and Critical Commentary on Ecclesiastes (London, 1861, p. 67, etc.), gives an analysis and specimen of this work. The most cabalistic work of Galicho is his commentary on the Song of Songs (כְֹּלַל בִּנְֵאָנָה, Venice, 1593). He wrote also a commentary on the "Song of Songs" (כְֹּלַל בִּנְֵאָנָה, Venice, 1593).
a special locality, it is first mentioned by Joshua, who describes Kedesah as "in Galilee in Mount Naphtali" (xx, 7). Its limited extent is indicated in 2 Kings xv. 29, where the historian, detailing the conquests of Tiglath-pileser, states that "he took Ijon, and Abel-beth- Maschach, and Riblah, and Izion, and Hazor and Gilead, and Galilee, all the land of Naphtali." Galilee, therefore, did not extend beyond the bounds of Naphtali; and a comparison with other passages shows that it embraced only the northern section of that tribe. At least the name of the district was first confined to that district (Josh. xx. 7; xxii. 52; Josephus, Ant. v. 1, 18). The region thus lay on the summit of a broad mountain ridge. Here were situated the towns which Solomon offered to Hiram as payment for his services in procuring timber and stones for the Temple. Not until the time of Josiah was there great progress in the cultivation of this part of the district, which was famous for his island city, and who doubtless expected a portion of some of the rich plains of central Palestine, could not conceal his disappointment when he saw the mountain towns and their rugged environs, and declined them as useless (1 Kings ix. 11, and 2 Chron. viii. 2). See CANA. At this period, Galilee, though within the allotted territory of Naphtali, does not appear to have been occupied by the Israelites. It was only after Hiram had declined the towns that Solomon rebuilt and colonized them (2 Chron. l. c.). Hazor, the greatest and most powerful city of the Gentiles, the capital of that portion of the territory of Naphtali, was a name, lay within or near Galilee; and, though Joshua had captured and burned it (Josh. xii. 17), yet during the rule of the judges it was possessed by a king, Jabin, whose general, Sisera, dwelt in the neighboring Harosheth of the Gentiles (Judg. iv.) and the presence of these powerful and warlike tribes, and the natural strength of the country, sufficiently account for the continued occupation of the old Gentile inhabitants. David subdued, but did not expel them. Solomon, as it has been seen, took some of their towns; but they remained among these rugged mountains in such numbers that the name of Isaiah the Deuteronomist is intimately known by the name of "Galilee of the Gentiles" (מגדיר הגליל, Isa. xi. 1; in Matt. iv. 15, Γαλαταί γεωργικοί; in 1 Macc. v. 15, Γαλαταί ἀλλοφόροι). It is probable that the strangers increased in number, and became during the captivity the great body of the inhabitants; extending themselves also over the surrounding country, they gave to their new territories the old name, until at length Galilee became one of the largest, if not the largest, of the countries of Palestine. In 2 Macc. xxiv. 14, Macabees, Galilee contained only a few Jews living in the midst of a large heathen population (1 Macc. v. 20-28); Strabo states that in his day it was chiefly inhabited by Syrians, Phenicians, and Arabs (xvi. p. 760); and Josephus says the Greeks also dwelt in its cities (Lives, 19). The name also occurs in Tobit i. 2; Judith xi. 5, etc.

In the time of our Lord, all Palestine was divided into three provinces, Judaea, Samaria, and Galilee (Acts x. 31; Luke xvii. 11; Josephus, War, iii. 5). The latter included the whole northern section of the country, comprising the ancient territory of Isreal, and Zebulun, Asier, and Naphtali. Josephus defines its boundaries, and gives a tolerably full description of its scenery, products, and population. He says the soil is rich and well cultivated; fruit and forest trees of all kinds abound; numerous large cities and populous villages, amounting in all to no less than two hundred and forty, thickly stud the whole face of the country; the inhabitants are industrious and warlike, being trained to arms from their infancy (War, iii. 8, 8; Life, 45). On the west it was bounded by the territory of Poelmas, which probably included the whole plain of the valley of Carmel. The southern boundary ran along the base of Carmel and of the hills of Samaria to Mount Gilboa, and then descended to the valley of Jezreel by Scythopolis to the Jordan. (Tid
Talmud, Gitin, vii, 7, gives a place called נָבִי מְרָה (Nabi Marra) as the southern limit. The River Jordan, the Sea of Galilee, and the Upper Jordan to the fountain at Dan, formed the eastern border (Bialostock, p. 161); and the border from Dan westward across the mountain ridge till it touched the territory of the Phoenicians (Josephus, War, iii, 8, 1; compare Lake viii, 26). See Palestine.

Galilee was divided into two sections (Cyril, c. Jul. ii, 20; Josephus, Ant. 19, 6; Ant. v, 1, 29). The Talmud has a threefold division, with reference to the Sabattical year (Shebi'ah, ix, 2; Upper Galilee [בניא עַבְרָי]), embraces all above Capharannanias, and does not produce sycamores; Lower [לְמָשַׁמֶּשׁ], all below C., and bears sycamores; the valley is the territory of Tiberias [בְּנֵי הָעָר]. A single glance at the country shows that the division was natural. Lower Galilee included the great plain of Esdrael, with its plain of Abnae, which runs down to the Jordan and the Lake of Tiberias; and the whole of the hill-country adjoining it on the north to the foot of the mountain range. The words of Josephus are clear and important (War, iii, 2, 1): "It extends from Tiberias to Zebulun, adjacent to the latter; and from Zebulun is Porter's well, which is believed to be the birthplace of the Messiah. It stretches from a village called Xaloth, lying in the Great Plain, to Bersabe." "The village of Xaloth" is evidently the Chesulloth of Josh. xix, 12, now called Iksal, and situated at the base of Mount Tabor, on the northern border of the Great Plain (Porter, Handbook, p. 450). But a comparison of Josephus, Ant. xx, 6, 4, with War, iii, 2, 4, proves that Lower Galilee extended as far as the village of Ginea, the modern Jenin, on the extreme southern side of the plain. The site of the northern border town, Bersabe, is not known. It was evidently that of the Abana and Jotapata were in Lower Galilee (Josephus, Life, 87; War, ii, 20, 6); and as the former was situated near the north-west angle of the Lake of Tiberias, and the latter about eight miles north of Nazareth (Porter, Handbook, p. 482, 577), we conclude that Lower Galilee included the whole range of extension from the plain of Akka, on the west, to the shores of the sea on the east. It was thus one of the richest and most beautiful sections of Palestine. The plain of Esdraelon presents an unbroken surface of fertile soil—soil so good that to enjoy it the tribe of Issachar descended to a second place in the division of the country, its "fruitfulness," its "abundance," its "abundance," its "fruitfulness," its "abundance," its "fruitfulness," its "abundance," its "fruitfulness," its "abundance," its "fruitfulness," its "abundance," its "fruitfulness," its "abundance," its "fruitfulness," its "abundance," its "fruitfulness," its "abundance., its "fruitfulness," its "abundance., its "fruitfulness., its "abundance., its "fruitfulness., its "abundance., its "fruitfulness.."

The blessings promised by Jacob and Moses to Zebulun and Asher seem to be here inscribed on the features of the country. Zebulun, nesting amid these hills, "offers sacrifices of righteousness" of the abundant rocks nourished by their rich pastures; he rejoices "in his going out" along the fertile plain of Esdraelon; "he sucks the abundance of the seas," his possessions skirting the Bay of Haifa at the base of Carmel; and he "sucks of treasures hid in the sand," possibly in allusion to the gulf which was first made won on the shores of the River Belus (Deut. xxxiii, 18; 19; Pliny, v, 19; Tacitus, Hist. v). Asher, dwelling amid the hills on the north-west of Zebulun, on the borders of Phoenicia, "dips his feet in oil," the produce of luxuriant olive groves, such as still distinguish this region; "his bread," the produce of the plain of Phoenicia, "is fat;" the fertile upland valleys "is fat;" the " yields royal dainties;" oil and wine from his olives and vineyards, and milk and butter from his pastures (Gen. xliv, 20; Deut, xxxii, 24, 25). The chief towns of Lower Galilee were Tiberias, Tarichaeia, at the southern end of the Sea of Galilee, and Sepphoris (Josephus, Life, 9, 28, 29, 37). The latter played an important part in the last days of the kingdom (Josephus, Ant. xil, 6, 3, 17; iv, 11, 12). It is now called Seferieh, and is situated about three miles north of Nazareth (Porter, Handbook, p. 358). There were, besides, two strong fortresses, Jotapata, now called Jefiat, and Mount Tabor (Josephus, War, iii, 7, 8 sqq. iv, 1, 0). The towns most celebrated in N.T. history are Tiberias, Cana, and Tiberias (Luke i, 26; John ii, 1; vi, 1).

Upper Galilee, according to Josephus, extended from Bersabe on the south to the village of Baca, on the borders of the territory of Tyre, and from Meloth on the west to Thellsa, a city near the Jordan (War, iii, 2, 1). None of these places are now known, but it is no difficulty in ascertaining the position and approximate extent of the province. It embraced the whole mountain range lying between the upper Jordan and Phoenicia. Its southern border ran along the foot of the Safed range from the north-west angle of the Sea of Galilee to the plain of Akka. To this region the name "Galilee of the Gentiles" is given in the O. and N. T. (Isa. ix, 1; Matt. iv, 15). So Eusebius states (Onom. s. v. Παλαια). The town of Capernaum, on the north shore of the lake, was in Upper Galilee (Onom. s. v. Capharnaum). The great part of this district is now included in the province how far the province extended southward, and as proving that it, as well as Lower Galilee, touched the lake. The mountain range of Upper Galilee is a southern prolongation of Lebanon, from which it is separated by the deep ravine of the Leontes. See Lebanon. The site of the summit of the range is tableland, part of which is beautifully wooded with dwarf oak, intermixed with tangled shrubbery of hawthorn and arbutus. The whole is varied by fertile upland plains, green forest glades, and wild picturesque glens breaking down to the east and south. The villages and inns are still scattered over the country, consisting chiefly of Metwilihe, a sect of Mohammedans. Safed is the principal town, and contains about 4000 souls, one third of whom are Jews. It is one of the four holy Jewish cities of Palestine, and has for centuries or more been celebrated for the sacredness of its tombs and the learning of its rabbinists. Safed seems to be the centre of an extensive volcanic district. Shocks of earthquake are felt every few years. One occurred in 1837 which killed about 5000 persons (Porter, Handbook, p. 438). On the table-land of Upper Galilee lie the ruins of Kedesh-Naphthali (Josh. xx, 7), a city now called Kedriss, and still holy to the Jews and to the Samaritans (Josephus, War, iii, 20, 6), and celebrated as the last place in Galilee that held out against the Romans (War, ii, 22, 6; iv, 1, 1; 2, 1-5).

Galilee was the scene of the greater part of our Lord's public life and public acts (see Mission of Jesus, De Galilæis, Viteb, 1711; Budeus, De Galilæis rebus gentis Christi clara, Jen. 1718 [Miscell. Sacri, cr. 1156 sqq.]; Less, De Gal. Serrat. mirac. theatr. Gott. 1775 [Opp. 1781, ii, 869 sqq.]). His early years were spent at Nazareth, and when he entered on his great work he made Capernaum his home (Matt. iv, 15; ix, 1). It is a remarkable fact that the first three Gospels are chiefly taken up with our Lord's ministrations in this province, while the Gospel of John dwells more upon those upon Judea (see Miller, De ordine rerum Christi in Galilœa gestarum, Hal. 1770). The nature of our Lord's parables and public acts, as known from our Gospels, is influenced by the peculiar features and products of the country. The vineyard, the fig-tree, the shepherd, and the desert in the parable of the Good Samaritan, were all appropriate in Judæa; while the corn-fields (Mark iv, 28), the fisheries (Matt. xiii, 47), the merchants (Matt. xxi, 46), and the flowers (Matt. vi, 26), are no less appropriate in Galilee. The apostles were all either Galileans by birth or residence (Acts i, 11), and as such they were despised, as their master had been, by the proud Jews (John i, 46; vii, 22; Acts ii, 7). It appears, also, that the pronunciation of those
GALILEE

Jews who resided in Galilee had become peculiar, probably from their contact with their Gentile neighbors (Matt. xxv. 78; Mark xiv. 70; see Lightfoot, Opp. ii, 77). On the death of Herod the Great the province of Galilee was given by Caesar to his son Antipas (Joseph. War, ii, 6, 3). After the destruction of Jerusalem Galilee became the chief seat of Jewish schools of learning, and the residence of their most celebrated rabbins. The National Council or Sanhedrim was taken for a time to Jabneh in Philistia, but was soon removed to Sepphoris, and afterwards to Tiberias (Lightfoot, Opp. ii, p. 141). The Mishna was here compiled by Rabbi Judah Hakkodesh (cir. A.D. 109-220), and a few years afterwards the Gemara was added (Buxtorf, Tiberiu, p. 19). Remains of splendid synagogues still exist in many of the old towns and villages, showing that from the 2d to the 7th century the Jews were as prosperous as they were numerous (Porter, Handbook, p. 427, 440). See Galilee.

GALILEE, SEA OF (ἡ Ἡλεία τῆς Γαλιλαίας, Matt. iv. 18; xv, 29; Mark i, 16; vii. 31; John vi, 1), called also the SEA OF TIBERIAS (John vi, 1; xxii. 1; hence its modern name Bahr el-Tiberiye), the Lake (Nepher) of Gennesaret (Luke vi. 1), or emphatically for water (ἡ Ἡλεία simpliciter, Matt. iv. 15); in the O. T.

mer says, "The Jordan discharges itself into a lake, by many writers known as Genesara, 15 miles long and 6 wide, which is skirted by the pleasant towns Julias and Hippo on the east, of Tarichaeum on the south (a name which is by many persons given to the lake itself), and of Tiberias on the west" (v. 15). Josephus refers to other features. "The Lake of Genesaret derives its appellation from the adjacent Julian and Hippo furlongs (five Roman miles) broad, by 140 (174 miles) long. Its waters are sweet, and extremely pleasant to drink, as they flow in a clearer stream than the muddy collections of marshes, and they can be drawn free from impurities, being throughout confined by abrupt and sandy shores. They are of a moderate temperature, milder than those of the river or the fountain, yet uniformly colder than might be expected from the expanse of the lake. . . . The kinds of fish found here differ from those elsewhere met with" (War, iii, 10, 7). Both these are so near the truth that they could scarcely have been more accurate. Its extreme length is 12½ geographical miles, and its breadth 6; equal to about 16 by 7¼ Roman miles. It is of an oval shape, or rather the form of an egg, with the large end to the north. The Sea of Galilee has none of those time-famed memories that have attached the Euphrates of Italy and Switzerland are justly celebrated; it has not even the stern grandeur of the Dead Sea. The shores are singularly uniform. There are no bold cliffs jutting far out into deep water; there are no winding bays running away into the open sea inland. The bed of the sea is like a huge basin. Along its eastern and western sides the banks rise steep, bare, and rugged, to the height of nearly 2000 feet; and their tops, especially those on the east, are as level as a wall. At the narrowest part, where the Jordan enters and passes out, there are wide openings, through which views are gained up and down the valley. Yet nature has not left this scene altogether destitute of ornament. The scenery is not quite so dreary, nor are the hues of the landscape so dead and sombre as Dr. Trall would have us imagine (Traill's Josephus, ii, p. cvii).

True, when the sun is high and the sky cloudless, and when the picturesque outline, from down from the top of the mountains, there is a dreariness in the landscape, and a uniformity of cold gray color, which wearsies the eye; but let him go down to the shore and wait till the sun declines, and he will be enchanted with the deep ethereal blue of the smooth water, and the tints, "rose-colored, pearl-gray, and purple, blended together," and thrown in soft shades over the sides of the encircling hills. The pale blue cone of Hermion, with its glittering crown of snow, forms a glorious background (Van de Velde, ii, 888; Robinson, ii, 880 sq.; Stanley, Palestine, p. 362; Porter, Handbook, p. 418). Round the whole shore, with only one or two short interlusions, there is a broad strand of white pebbles, mixed with little shells. The Jordan enters at the extreme northern end of the lake, and leaves again at the southern. In fact, the bed of the lake is just a lower section of the great Jordan valley. The utter loneliness and absolute stillness of the scene are exceedingly impressive. It seems as if all nature had gone to rest, languishing under that scorching heat. How different it was in the days of our Lord! Then all was life and bustle along the shores; the cities and villages that thickly stubbed
them resounded with the hum of a busy population, while from hill-side and cornfield come the cheerful cry of shepherd and ploughman. The lake, too, was dotted with dark fishing-boats, and spangled with white sails. Now, a mournful and solitary silence reigns alike over sea and shore. The cities are in ruins. Greek cities, Chios, Samos, Rhodes, and the two Ionian Islands, Ithaca, and Corcyra, are deserted. Tiberias and Madgala are the only inhabited spots; and for several miles inland in every direction the country looks waste and desolate. The inhabitants—merchants, fishermen, and peasant—were nearly all gone. The few who remain in the shatterd hamlets of Tiberias, and the mud hovels of Madgala, and the black tents of the wandering Bedouin, seem worn and wasted by poverty and sickness. In 1858 the Sea of Galilee could just boast of one small boat, and it was so rotten and leaky that it was not worth keeping. The fish, as are as abundant as ever; for though only little hand-nets are used, a considerable sum is paid to the government for the privilege of fishing (Burckhardt, Travels in Syria, p. 382; Robinson, ii, 386). It was observed by Hasekistiat that some of the same species of fish found in the Sea of Galilee were also found in the Nile (Travels, p. 158): the same fact had been noted by Josephus (War, iii, 10, 8). The kinds referred to are Cyprianus Donni, Silurus, Mormyris, etc. (See Wilson’s Land of the Bible, ii, 113; Robinson, ii, 386). Two modes are now employed to catch the fish. One is a large fish-trap made of branches, in which the fish go and die. (Landscapes, in xxi, 7), stalks along the shore, and, watching his opportunity, throws it round the game with a jerk. The other mode is still more curious. Bread-crumbs are mixed up with bichlorid of mercury, and sown over the water; the fish swallow them up, and all the bodies float, are picked up, and taken to the market of Tiberias! (Porter, Hand-book, p. 432.) The water of the lake is sweet, cool, and transparent; and as the beach is everywhere pebbly, it has a beautiful sparkling look. This fact is somewhat strange, when we consider that it is exposed to the powerful rays of the sun, that many warm and briskish springs flow into it, and that it is supplied by the Jordan which rushes into its northern end, a turbid, muddy torrent. The most remarkable fact in the physical geography of the Sea of Galilee is its great depression. The surface of the sea is 645 feet below the level of the Mediterranean, below the level of the Jordan, and below the level of the Dead Sea by 28 feet. The lake stretches between the heights of 28 and 46 feet, but according to the trigonometrical survey of Liet. Symonds, R.E., in 1841, its depression is only 228 feet. In this Van de Velde thinks there must have been some mistake, and he adheres to the figures of Liet. Lynch, which give 66 feet, and refered to the Inquisition for defending and developing the Copernican system. The Inquisition found the views of Copernicus and Galileo irreconcilable with the letter of the Scripture. Galileo went himself to Rome to defend himself, but without effect. His astronomical views were examined by the theological qualifers, and declared to be absurd, false in philosophy, and contrary to the Holy Scriptures. In 1616 and 1620, decrees were issued allowing to set up the system of Copernicus as a hypothesis, but forbidding it to be defended as a theory. Galileo paid no attention to this demand, but six years later he published his "Dialogue on the two greatest cosmic systems, that of Ptolemy and that of Copernicus," in which the two systems are compared, and, to satisfy the Inquisition, the victory is awarded to the champion of the system of Ptolemy; but, in fact, the arguments used in its behalf are so well adapted to manifestly inferior to those adduced in favor of the Copernican system, as to leave no doubt as to the real opinions of Galileo. His enemies found it easy to cause new measures to be taken against him by the Inquisition. Galileo was in 1633 again summoned to the Inquisition. On 18th of May, 1633, the famous sentence of "A large stone, and the king of the Medici; subsequently he was some time detained as a prisoner in the buildings of the Inquisition; finally he
was sent back to the Villa Medici. The result of the investigation was that Galilee was found guilty of having adhered to and of having supported heretical opinions; and he had to abjure his errors in a kneeling posture, and to sign the minutes of the proceedings against him. He was condemned to be imprisoned at the Inquisition during pleasure, and to recite once a week for three years the avowal of his poisonous plant. Gala-
lee submitted to the judgment, and, kneeling and in sackcloth, swore upon the Gospels never again to teach the earth's motion and the sun's stability.

When rising from the ground, he is reported to have said: “I only recite, and it does not remove, for all that”); but the authenticity of this report is doubted. After four days' confinement, he was allowed to remove to the residence of the Tuscan ambas-
dassador, but he was kept under surveillance during the whole remainder of his life. In 1534 he asked permission to visit Florence for medical assistance, but the permission was not granted until 1638. The severity of the Inquisition was somewhat relaxed in 1637, when he became almost totally blind. During the latter years of his life he seems to have paid less attention to astronomy, but the works of this period of most attention show that his genius was as great as

ever. He died January 8, 1612. The city of Pisie erected a statue in his honor. The complete list of works of Galileo is Le Opere di Galileo Galilei (Florence, 1634-46, 15 vols.). The most important of his later works is a daughter's testament (Lay-
den, 1638). Biographies of Galileo were written by B. Ghislandi, Viviani (1650), F. Livorno, 1757), Jagen-
mann (Weimar, 1788), Nuell (Lausanne, 1789), Venturi (Milan, 1818-21), Libri (Milan, 1841), Brewer (Lon-
don, 1841), Cattaro (Milan, 1840), Caspar (Stuttgart, 1834), Charles (Paris, 1861). On the trial of Galileo by the Inquisition, there are special works and essays by Marini (Galilei e l'Inquisizione, Rome, 1850); Mad-
en (Galilei e l'Inquisizione, London, 1868); Vossen (G. und die Röm. Verurteilung des copernicanischen Systems, Frankf. 1885); The Catholic World (Jan. and Feb. 1869) (A. J. S.)

Galatin. See GALATIA.

Gall, the representative of the A.V. in two Hebrew words and one Greek.

1. Merorah or merorah (מֶרְוָרָה or מֶרְוָרָה; Sept. γολο, κακό, διαρρού; Vulg. fel, amaritudo, visco mors) denotes etymologically bitterness: see Job xii, 26, "Thou writest bitter things against me." Hence the term is applied to the "bile" or "gall" from its in-
tent (Job xii, 13). The metaphors in this verse are taken from the practice of the ancients and of the Hebrew men, who first surround the beast, then shoot it, and next take out the entrails. The term also stands for the gall-bladder or vitals (Job xx, 25). It is also used of the "poison" of serpents (Job xx, 14), which the ancients erroneously believed was their gall: see Plien, III. N. xi, 87, "No one should be astonished that it is the gall which constitutes the poison of serpents" (comp. Heb. xii, 15, "root of bitterness"). See LIVER.

2. Rosh (רָשָׁה or under:; Sept. χολή, περίκρατος) Vulg. fel, amaritudo, caput), generally translated "gall" by the A.V., but in Hos. x, 4 rendered "hem-
ble" (περίκρατος, Gen. xxvi, 15), and Job xx, 12, it denotes the "poison" or "venom" of serpents. From Deut. xxix, 18, "a root that beareth rosh" (margin "a poisonous herb") and Lam. iii, 19, "the wormwood and the rosh," compared with Hos. v, 4, "judgment springeth up as rosh," it is evident that the Heb. term denotes some bitter, and possibly poisonous plant, though it may also be used, as in Psa. lxix, 21, in the general sense of "something very bitter." Celsus (Hierob.
li, 46-52) thinks "hemlock," (Conium maculatum) is in-
tended, and quotes Jerome on Hosea in support of his opinion, though it seems that this commentator had in view the cough-grass (Triscium repens) rather than the henshock." Rosenmüller (Bib. Bot. p. 118) is in-
clined to think that the Loliurn temulentum least agrees with the passage in Hosea where the rosh is said to crown "in the furrows of the field." Other writers have supposed, and with some reason (from Deut. xxxii, 62, "their grapes are grapes of rosh"), that some berry-bearing plant must be intended: "prickly" (Thes. p. 189). Michaelis (Gall. Lex. Heb. p. 2290) is of opinion that rosh may be either the Loliurn temulentum or the Solarum ("nightshade"). Oedmann (Verm. Samml. pt. iv, c. 10) argues in favor of the Coleogyph. The most probable conjecture, for proof there is a whole chapter of Galatians (Galatians, xii, 18). Pliny refers to the use of the same substance for dis-
cases of the eye (Nat. Hist. XXVII, 10); also speak-
ing of the fish callimopsis, he says it has a similar cu-
rative virtue (xxvii, 4, 7). Galen and other writers praise the use of the liver of the silurus in cases of dim-
ness of sight. See also Bitterness.

The passages in the Gospels which relate the circum-
stance of the Roman soldiers offering our Lord, just before his crucifixion, "vaccine mingled with gall," according to Matthew (xxvii, 34), and "wine mingled with gall," according to Mark (xv, 23), require some consideration. The first-named evangelist uses χολή, which is the Sept. rendering of the Heb. rosh in the Psalm (xix, 21) that foretells the Lord's sufferings. Mark explains the bitter ingredient in the sour vinegar to be "myrrh" (οἴνος εὐ-
νυχῆριον), for we cannot regard the transactions as different. "Matthew, in his usual way," as Hengsten-
berg (Comment. in Psa. xxix, 21) remarks, "designates the drink theologically: always keeping his eye on the prophecies of the O.T., he speaks of gall and vinegar for the purpose of rendering the fulfillment of the Psalmic prophecy complete." Mark again states it and fol-
lowing to his way, looks rather at the outward quality of the drink." Bengel takes quite a different view; he thinks both myrrh and gall were added to the sour wine (Gnom. Nov. Text. Matt. I. c.). Hengstenberg's view is still more "gall" (χολή) to be un-
derstood in any other sense than as expressing the bit-
ter nature of the draught. So as to the intent of the proffered drink, it is generally supposed that it was for the purpose of deadening pain. It was customary to give criminals just before their execution a cup of wine with frankincense in it, to which reference is made, it is believed, by the ωἶνος σκαρφῆριος of Psa.

ix, 8, see also Prov. xxxii, 6. This the Talmud states was given in order to alleviate the pain. See Buxtorf (Lex. Talm. col. 2103), who quotes from the Talmud that "wine effec-
tively very bitter." Rosenmüller (Bib. Bot. p. 168) is of opinion that the myrrh was added to our Lord, not for the purpose of alleviating his suffer-
ings, but in order that he might be sustained until the punishment was completed. He quotes from Apuleius (Metamorph. viii), who relates that a certain priest "dis-
figured himself with a multitude of blows, having pre-
iously strengthened himself by taking myrrh." How far the frankincense in the cup, as mentioned in the Talmud, was supposed to possess soporific properties, or in any way to induce an alleviation of pain, it is difficult to determine. The same must be said of the ωἶνος περικρατοῦς of Mark, for it is quite certain
that neither of these two drugs in question, both of which are the produce of the same natural order of plants (Apocynaceae), is ranked among the hypotonic
tonic, blenchoptic drugs. It is true that Dioscorides (i, 77) ascribes a soporific property to myrrh, but it does not seem to have been so regarded by any other author. Notwithstanding, therefore, the almost concurrent opinion of ancient and modern commentators, that the "wine mingled with myrrh" was offered to our Lord at the Last Supper, we cannot, in the light of the same conclusion. Had the soldiers intended a mit-
ification of suffering, they would doubtless have offered a draught drugged with some substance having narcotic properties. The drink in question was probably a mead or a customary beverage of the Romans, who were in the habit of seasoning their various wines which, as they contained little alcohol, soon turned sour, with various spices, drugs, and perfumes, such as myrrh, cassia, myrtle, pepper, etc. (Smith, Dict. of Class. Ant. s. v. Vinum). See MYRRH.

Gall, Nikolaus. See Gallus.

Gall, St., monastery of, one of the most celebrated monasteries of Europe, at St. Gall, in Switzerland. It was founded in the 7th century. Its wealth and reput-
ation became very great under Otthmar, its first abbott (729–760), who founded a hospital for lepers in connec-
tion, and the improvement in the 8th century which it be-
came distinguished for learning, especially under ab-
bot Gosbert (815–837). "The abbey of St. Gall gradu-
ally became one of the masterpieces of medieval ar-
chitecture; and the genius and skill which were lav-
ished on its construction, and on the decoration of its 
halls and cloisters, had a large share in developing, 
the Christian art of the period. The monks of St. 
Gall, too, may be reckoned among the best friends and 

preservers of ancient literature. They were indefatig-
able in the collection and transcription of MSS.—Biblical, patristic, sacred and profane history, classical, liturgical, and legendary. Several of the classics, especially Quintilian, Silius Italicus, and Ammianus Marcellinus, have been preserved solely through the MSS. of St. Gall. For a time the abbey was sub-
ject to the bishop of Constance, and an ani-
mated dispute was for a long time main-
tained between that prelate and the monks as to the 
right of electing the abbot. It ended, however, in the 
reconquest of the right of free election; and 
ultimately, from the growth of the monastic pos-
ses-
sions, and the importance which the abbots held, the monastic domain, which comprised a great part of northern Switzerland, became a distinct juris-
diction, within which the abbot, like many of his brethren in the great Benedictine monasteries, exercised all the rights of a suzerain. For several centuries the abbey of St. Gall held one of the highest places in 
the order. Its schools enjoyed wide reputation. Its members held a distinguished place among the scholars of mediæval Germany; and many of them, as, for example, Nozer, are known to have cultivated not only the ordinary learning of the schools, but also 

physic, mathematics, and astronomy. The school of St. Gall, too, was one of the most eminent for the cul-
tivation of music, and its MSS., preserved in its libra-

ry, have been extensively made use of by the restorers of ancient ecclesiastical music. A town of considera-

ble importance grew up around the monastery, and was called by the same name; and as the wealth and influence which attached to the dignity of the abbot began to make it an object of ambition to rich and powerful families, we find the succession of abbots, in the 12th and 13th centuries, sank down below that of their plios and learned predecessors in the office. A stringent reform was enforced about the time of the Council of Constance; but the burghefs of St. Gall had grown dissatisfied under this rule, and on the out-

break of the Reformation in 1525 they throw off their 
subjedtion, and embraced the new doctrines. At 
the close, however, of the religious war in 1532, the Catho-
lic religion was not reinstated, though with diminished authority, in his house of dignity. At the French Revolution, the abbey of St. 
Gall was secularized (1798), and its revenues were so 
soon afterwards sequestrated (1805). By a later ecle-

siastical arrangement, the abbey of St. Gall was 
raised to the dignity of a bishopric, which in 1823 
was united to that of Chur. They were afterwards, 
however, separated, and in 1847 St. Gall was erected 
to an archbishopric, with a distinct jurisdiction."—Cham-
bers, Encyclopaedia, s. v.; Herzog, Real-Encylopädie, iv, 468.

Gall, St. Manuscript (Codex Sangallensis), usually designated as Δ of the Gospels, one of the most important of the later uncial MSS., containing the four Gospels (with only a single hiatus, John xix, 17–55) and an interlined Latin version, rudely written on coarse vellum in a very peculiar character. It comprises 197 leaves, 40 to 40 inches by 8 in size, with 20 to 26 (usually 21) lines of text on each page. 

Before Matthew are placed prologues, Latin verses, the Eusebian canons in Roman letters, tables of the κεφα-
λαια in Greek and Lat., etc. The text is divided into regular σειρας. There are also πισεθαι, and the Ammo-
niatic section which has so much value, but the Codex Boernerianus (G of Paul's epistles), as to show that they both once belonged together. See Boerner 
MANUSCRIPT. The Gospel of Mark seems to represent a text different from that of the other evangelists. It agrees in general with the older MSS. There are scarcely any breathings or accents; the words are often 

wrongly divided, with dots at the end of almost every Greek word, and marks >> inserted to fill up vacant spaces.

This MS. is preserved in the monastery of St. Gall, 
Switzerland, where it was probably transcribed original-
ly. It was first inspected by Gerbert in 1773, was named by him (in his N. 7. 1830), and has been pub-
lished in a full Latin facsimile edition by Retting (Zürich, 1836), with Prolegomena. It seems to have been written by Latin (perhaps Irish) monks in the 9th century.—Schulz, Einleitung, p. 122 sqq.: Tri-
gelles in Horne's Introduction, iv, 156 sq. See MANU-
SCHRIFTEN, BIBLICAL.

Galland, Andrea, or Gallandus, Andreas, an 
Italian priest and abbot of the Oratorian congregation, 
was born at Venice Dec. 6, 1720, and died in the same 
city Jan. 12, 1779. He rendered great service to lit-
erature by his edition of the fathers, entitled Bibliotheca 
Vetorum Patrum, antiquorum que scriptorum et. — 
et. Lat. (Venet. 1765–1781, 14 vols. fol.). It comprises 
in all 980 writers, and is considered to be one of the most accurate and useful of all the libraries of the fa-
thers. He left in MSS. Theologiae antiquissimae Ecclesi-

Gallas ("invaders"), a race inhabiting the south 
and east of Asia Minor. "The general name by which the tribes designate themselves is Oroma (orina, men). Although this is to be understood literally, it can be secondary not purely negroes, but form with the Fulahs, Mandingoos, and Nebas, as it were, the transition to the Shemitic variety, and seem to belong to that great family inhabiting the east of Africa, from the frontiers
of the Cape land to Abyssinia, and usually denomi-
nated the Kaffirs. They are a vigorous, well-formed
people, of a dark-brown color, with hair frizzled,
but not quite woolly, round faces, and small, sharp eyes,
and are distinguished not less by their energy and
warlike spirit than by their mental capacities. They
first appear to the notice of the 16th century as a bar-
barous people, extending their conquests from the in-
terior of Africa, lying waste, by constant incursions,
the countries of Eastern Africa to the mountains of
Abyssinia, gradually subduing or expelling the orig-
inal inhabitants (hence their name), occupying great
part of Abyssinia, and in time taking an active part
in the contest for the right to the Red Sea and the Gulf
of Aden. It is only of late years that their power in
Abyssinia, and their incursions into that country,
have been partially checked, chiefly by the vigorous
government of the king of Shoa, who has subdued
some of the Gallas tribes, and induced them to
profess such Christianity as exists in Abyssinia.
They still, however, occupy many districts of Ab-
byssinia, and extend their power to an indefinite extent
over the countries situated south and south-west of it.
Politically, the Gallas do not form a single nation.
but are divided into numerous tribes forming separ-
ate kingdoms and states, which are frequently at
war with each other. Most of the Gallas follow pas-
toral avocations. Some, however, through intercourse
with the semi-Christian, semi-civilized Abyssinquins,
have become tillers of the soil. The wandering
Gallas are the only inhabitants in the slave
trade. The larger number of the Gallas are still hea-
thens, though Mohammedanism has lately made great
progress among them. Their religion bears a resem-
bance to that of the Kaffirs. Compare Jamaal, No-
tices sur la Gailie (Paris, 1859); Beke, On the Origin
of the Gallas (London, 1847); Howland, Abyssinia and
the Galla Country (London, 1868). Behm (Geograph.
Jahrbuch, vol. i., Gotha, 1864) assigns to the Gallas a
territory of about 280,000 sq. miles and 7,000,000
people. The Roman Catholic Church has a mission
among the Gallas, which in 1841 was erected into a
vicariate apostolic. The letters of the vicariate
apostolic, Massaia, in the Annales de la Proposat, de Fo,
are among the chief sources of our information on
the Gallas. Massaia was the founder of the mission, and
was in 1869 still at its head. (A. J. S.)

Gallaudet, Thomas Hopkins, L.L.D., an emi-
nent Congregational minister and philanthropist, was
born Dec. 10, 1787, in Philadelphia. He graduated at
Yale College in 1805, and was chosen tutor in 1806,
which office he held two years, after which he was en-
gaged in mercantile business until 1811, when he en-
tered upon the study of theology and law. In 1816,
he received his license, and became pastor at Portsmouth.
Here he became interested in a little deaf and dumb girl,
Alice Cogswell, and instructed her with success. Her
father, Dr. Cogswell, became the founder of an associ-
ation for the aid of deaf mutes; and funds being pro-
vided, Mr. Gallaudet resigned his ministry, and went
to Europe in 1815 to study the existing deaf and dumb
institutions. At the London Deaf and Dumb Asyl-
um he was refused admission except as Junior assist-
ent. He then went to Edinburgh, but there the teach-
er had learnt his system from the Mesmer, Braidwood,
and had been compelled to sign an engagement not to
impart the method to any other person intending to
become a teacher. He then betook himself to Paris,
and was warmly received by the abbe Sicard. Every-
things was laid freely open to him. He was able to
return to America before the close of 1816. And Sicard
allowed Laurent le Clerc, a deaf-mute, who was one of
the best teachers of the institution, to accompany him
to America. During his absence in Europe the
society had been incorporated; Mr. Gallaudet was then
appoointed its principal, le Clerc being his head assist-
ant, and on the 15th of April, 1817, The American
Asylum for the Deaf and Dumb, at Hartford, Conn., was
formally opened. Mr. Gallaudet remained head of the
asylum until 1830, when he resigned from failing
health. The system which he established was found-
ed on that of Sicard, with modifications. "It is known
as the American system. The main principle with
Mr. Gallaudet was to call out the intelligence of the
pupils as far as possible, and to treat them as in de-
scribing things for himself, and to discard the mere
learning by rote; and the result was to stimulate the
mind of the teacher, as well as of the pupil, in no ordi-
nary degree. Mr. Gallaudet's exertions were by no
means confined to the deaf and dumb asylum. His
vigorous and active mind induced him to improve,
and extension of common schools, and in the raising
up of a superior body of teachers, and wrote several
pamphlets on the subject. He also zealously advoca-
ted the adoption of means of imparting moral and
religious training to prisoners, and was an earnest pro-
moter of the movement for improving the manage-
ment of the insane. So strongly did he feel on this
matter, that, though in but feeble health, he accepted
in 1858 the office of chaplain of the state Retreat for
the Insane at Hartford, where, it is stated, 'the expe-
rience of each successive year furnished accumulating
evidence of the uselessness of his labors, and the effica-
cy of kind moral treatment and a wise religious
influence in the melioration and care of the insane.'"
He died Sept. 10, 1851. Besides a number of tracts and
essays on the education of the deaf and dumb, and on
the treatment of the insane, he wrote "Various Points of
Christian Faith and Practice" (London, 1818, 8vo); — Mrs. Teachers' Seminaries" (1826); —
The Child's Book on the Soul (1830, often reprinted,
and translated into most European languages); —Scripture
Biography (5 vols. 1834-44). See Humphrey,
Life and Labors of Gallaudet (N. Y. 1857, 12mo); Eng-
ish Cyclopedia; Sprague, Annales, ii, 609.

Gallure, an architectural term describing the por-
ticoes or verandahs which are not uncommon in
Eastern houses. See House. It is doubtful, however,
whether two of the three Hebrew words so translated
have any reference to such an object. See Archi-
tecture.

1. פְּרָטֵף, artik' (Ezek. xii, 15 [where the text has פְּרָטֵף, akath]); 16; Sept. פְּרָטֲאָה; xiii, 3, 5, Sept.
πετριδος; according to Gesenius, from פְּרָט', to cut
off; according to Fürst, from an obsolete פְּרִט, to set
off); by some thought to mean (as in xlii, 6) pillar
or columns (so (Villalpandus, Coecus); by others a de-
crement of פְּרַט (so Gesenius. Fürst. Häckel. Ha-
zig), as the context requires (Böttcher, Proben, p. 350).
See Temple. The ancient interpreters are wholly at
fault; the Sept. renders ambiguously, the Talmud
"corners," the Syr. "abal stature," and the Jewish in-
terpreter "lacks their ignorance" (Kimchi, Jarchi).

2. פְּרָטַח, račhît' (Cant. i. 17; either, with Fürst,
from an obsolete root פְּרַט, to trim, or, with Gesenius,
for פְּרַח, rachy, as in the margin, prob. "panelwork or
freted ceiling (so Sept. פְּרַטָהּ, Vulg., laquea-
In the case of the var. read in the Masoretic text
(q. d. ambulatoire or place of exercise), this term haseen confounded with

3. פְּרָטָה, raht' (from פְּרָטַח, to flow down; spoken
of watering-troughs, Gen. x. 43; Exod. xi, 16);
curled locks or rings of a maiden (Cant. vii. 6; Sept.

Gallure, originally a languishing hall. The word is
now applied, in ecclesiastical architecture, to any
floor elevated above the floor of a main audience room
of a church, and built to contain hearers. Galleries
of this kind date from the time of the Reformation,
though somewhat similar galleries existed in the By-
zantine churches. Narrow covered passage-ways,
within or without a church, especially in Romanesque churches, are also termed galleries. (G. F. C.)

Galley is the rendering in the A. V. in one passage (Isa. xxxiii, 21) of "\text{yn} out", a ship or fleet, elsewhere rendered "navy." See Ship.

Ancient Assyrian Galley.

Gallican Church, a name often given to the Roman Catholic Church of France. The peculiar spirit of that Church, especially with regard to its relations to Rome, is called Gallicanism. The term is especially used with reference to the principles of the French Church, in opposition to Ultramontanism (the extreme papal view of Church polity), as embodied in the four articles of 1682 (see below). But it is historically certain that from a very early period the national Church of France had a character and spirit of freedom peculiar to itself, and that the roots of the so-called modern Gallicanism are to be traced far back into antiquity (see Bossuet's sermon at the opening of the Assembly of 1682, and his \textit{Défense des Déclarations,} and our article \textit{France}).

The Frankish Church, in the time of Charlemagne, assumed a form and gave evidence of a spirit marked by the national temper, and obviously different from the Italian ideal of the Church as organized under the pope. In almost every century thereafter the monarchs and bishops of France resisted what they held to be unauthorized claims on the part of Rome. Nevertheless, the Gallican spirit often yielded, and not unfrequently the French bishops were themselves, in part at least, ultramontane. The French Parlements were generally on the side, naturally, of the Gallican spirit. Hinmar, bishop of Rheims (†882), morally obeyed his king, Charles the Bald, when pope Adrian II attempted to drive him from the throne. Charles himself, in an epistle to Adrian, "argues respecting the distinction between the temporal and the spiritual power, and also alleges the peculiar supremacy of the kings of France. To prove these and similar points, he refers not only to the archives of the Roman Church, but to the writings of St. Gelasius, St. Leo, St. Gregory, and even St. Augustine himself. (See \textit{Hist. Littéraire de la France}, Flère, i, iii, x, 28, 82.) Hinmar wrote many of that king's letters, and may probably have been the author of this." (Waddington, \textit{History of the Church}, chap. xiv.) But no formal attempt to fix the position of the Church in France on a basis of independence was made by any of the monarchs of the country before Louis IX (St. Louis, †1270). His "Pragmatic Sanction" (A.D. 1268) was directed chiefly against the penitential claims and extortions of Rome. It is comprised in six articles: (1) The churches, the prelates, the patrons, and the ordinary collators of benefices, shall enjoy their rights to their full extent, and each shall be sustained in his jurisdiction. (2) The cathedral and other churches shall possess the liberties of elections, which shall be carried into complete effect. (3) We will that simony, the pest of the Church, be wholly banished from our kingdom. (4) Promotions, collations, provisions and dispensions of prelacies, dignities, and other ecclesiastical benefices and offices, whatsoever they may be, shall be made according to the institutions of common law, of the councils, and of our ancient fathers. (5) We renew and approve of the liberties and franchises, privileges, and privileges granted by the kings of our predecessors, and by ourselves, to churches, monasteries, and other places of piety, as well as to ecclesiastical persons. (6) We prohibit any one from in any manner levying and collecting the pecuniary exactions and heavy charges which the bishopric of Rome has as imposed, or may hereafter impose, upon the Church of our kingdom, and by which it has been miserably impoverished—unless it be for a reasonable and very urgent cause, or by inevitable necessity, and with the free and express consent of the king and of the Church. See \textit{Ordinations des Roys de France de la troisième race recueillies par M. de Lournier} (Paris, 1728, folio), i, 97. In the Latin text, "the chief points are: statutum et ordinam primus ut ecclesiastici regni nostri prelati, patroni, et beneficiorum collatores ordinarii jus sumum planarius in ea, ut pons inequinuque su jus in domino restituetur. II. Item ecclesiam cathedralis et alia regni nostri libera eleciones et carum effectum integraliter habeant.—V. Item exactiones et onera gravissima pecuniarum per Curiam Romanam ecclesiastici regni nostri impoionas vel impoisonas, quibus regnum nostrum miserabiliter atque impudentius extinxerit, vel impoisonas, vel uniponenda, levari aut colligi nullatenus volumus, nisi duxat pro rationali, pia et urgentissimae causa, et inevitabili necessitate, ac de spontaneo et expresso consento nostro et ipsius ecclesiae regni nostri. The Gallican spirit is again tenore universi justitiae, officiis et subditis nostris—mandamus, quatuor coniunx et singular praecipua diligentie et atente servent—utque servarent—inaviolabilitatem faciant: nec aliquid in contrarium quovis modo faciant vel attentent, seu fieri vel attinenti permittant: transgressores aut contra facientes—ut salus pleniora, quæ cedat in exemplum. The genuineness of this document, which is questioned chiefly by P. Daniel, is shown by E. Richer, \textit{Hist. concil. general}, ii, iii, p. 189; \textit{Liberté de Légales Gallicane}, edit. ann. 1771, t. iii, p. 638, 667; \textit{Vellay, Hist. de France}, t. iii, p. 239" (Gieseler, \textit{Chur Urkunden}, et iii, § 62).

The "liberties" of the Gallican Church, according to Bossuet, were substantially set forth in these ordinances. The Gallican spirit was also strongly shown in the disputes between Philip Le Bel and Boniface VIII from the twelfth to the thirteenth century, which disputes culminated in the bull \textit{Unam sanctam} of Boniface VIII, and the abduction and death of the pope, A.D. 1303. See BONIFACE VIII. The questions involved in these disputes were vital ones: the authority of the pope in temporalities, the royal prerogative, and the power of the episcopacy as related to the supremacy of the pope. The Gallican writers vindicated the rights of the Church and the supremacy of councils over the pope with brilliant talents and solid learning. The Roman writers nevertheless maintained the papal claims unwaveringly, but with little success, in France. In 1455 the bishop of Nantes undertook to appeal from a royal ordinance to the pope, but the Parliament of Paris decided that he had violated the privileges of the French Church, as well as the fundamental laws of the kingdom. The Pragmatic Sanction of Bourges, called the "great bulwark of the Gallican Church against Rome," was adopted at the Synod of Bourges in 1438, and confirmed by the Parliament July 13, 1439. It involved two great principles: 1. That the pope has no authority in the kingdom of France over anything concerning temporalities. 2. That, though the pope is authorized as the sovereign lord in spirituals, his power even in these is restricted and controlled by the canons and regulations of the ancient councils of the Church received in the kingdom. (For details, see Bourges, Pragmatic Sanction.
or. Louis XI himself strongly repressed all ultramontane reaction against the decisions of the French assembly, or against the immunities of the national church. The ultramontanists obtained a temporary success in the revocation of the Pragmatic Sanction of Bourges in 1512 by the Council of Lateran, with the renunciation of it by Francis I (1516), with the understanding that it was to be confirmed by a council but in substantially the same terms. This act was instigated by private aims of the king's, and by the hope of his chancellor, Duprat, obtaining the dignity of cardinal. But this revocation gave rise to a long resistance by the Parliament and the Sorbonne, and even by turbulent spirits among the French people. The effects of the revocation were practically insignificant, and Gallicanism only showed itself the more energetic and active afterwards. The Pragmatic Sanction of Bourges was, it is true, abrogated, but the fundamental principles established at the councils of Pisa, Constance, and Basil, which secured that sanction, remained intact as a guide for the opinions of the nation and of the clergy, while the antipathy of the Parlements against ultramontanism became still more deeply rooted. The decrees of the Council of Trent (1545-1563) were, indeed, intended to support those of the Sorbonne, but from among them France admitted only such as agreed with her own policy, with the privileges of the king, and with the customs and usages of her Church. Gallicanism was greatly advanced, in fact, by the issue of the bull Exsurge, and by papal bulls and the concordats to which they gave rise. The numerous writings of Pitton (q. v.; † 1596) on the canon law gave true scientific and ecclesiastical expression to the tenets of Gallicanism. What Pitton advances in behalf of the Gallican Church in his Corpus Juris Canonicorum, in his Codex Conciliorum, and in his Gallican Doctrina in scholasticam status, were by him collected in eighty-three articles, in 1594, in the Libertatis eglise gallicane (1633, 2 vols. fol.), by the aid of which it became easy both for the Lity and the clergy to see how far the questions involved were questions of order and organization, and how little they applied to religion or dogmas. Without himself condemned the eighty-three articles into two: (1.) That the pope has no right of interference with the king's prerogative in temporal; (2.) That he cannot enforce a decision in spirituals in contradiction with those of the council, or in contradiction with the decisions of Ultramontanism, however, continued to assert its claims with the usual persistence of Rome. Cardinal Duperon, and the two preceding cardinals and prime ministers of Louis XIII and Louis XIV, Richelieu and Mazarin, maintained the Concordat. But, in spite of the concordat, the Sorbonne presented the six celebrated Declarations following to the king, May 8, 1663: 1. The pope has no authority over the king's temporal power. 2. In temporals the king has no superior but God. 3. The subjects of the king cannot be released from their fealty and obedience under any pretexas whatsoever. 4. It is inconsistent with the king's prerogative, and with the freedom of the Gallican Church, that the pope should depose bishops contrary to the decrees of councils. 5. It is not the doctrine of the Church that the pope is superior to general councils. 6. It is a matter of dogma that the pope is infallible, apart from the concurrence of the general council. As Pitton was the legal pillar of Gallicanism, so Bossuet became its ecclesiastical champion. Under his guidance, the Assemblee du clerge of 1692 assented the Gallican liberties, in the celebrated Declaration du clerge et de la nation françoise, which was up and by all the state authorities. It runs as follows: "I. St. Peter and his successors, vicars of Jesus Christ, and the whole Church itself, have received power from God only over things spiritual, and which concern salvation, and not over things temporal and civil; Jesus Christ teaching us himself that his kingdom is not of this world; and in another place, that we must render to Caesar the things of Caesar, and to God the things of God; and thus that papal power is nothing befaltered or overthrown. Let every person be subject to the higher powers, for there is no power but comes from God, and it is he who ordains those that are on the earth. He, then, who opposes himself to the power of God, that is to say, to the king, obeys not the word of God, and is absolved from the oath of fidelity; and that this doctrine, necessary for the public peace, and not less advantageous to the Church than the state, ought to be inviolably followed, as conformable to the word of God, the tradition of the holy fathers, and the examples of the saints. II. The plenitude of power which the holy apostolic see and the successors of St. Peter, vicars of Jesus Christ, have over spiritual is such, that nevertheless the decrees of the holy General Council of Constance, contained in the fourth and fifth sessions, approved by the holy apostolic see, confirmed by the practice of the Church, and observed and religiously observed at all times by the Gallican Church, remain in all their force and virtue; and that the Church of France does not approve the opinion of those who attack these decrees, or who enfeebles them by any law or by any authority, and by just decisions to which they are not approved, or that they are in force only in time of schism. III. That thus the use of the apostolic power must be regulated in following the canons made by the Spirit of God, and consecrated by the general respect of all the world, that the rules, the manners, and the customs established in the said kingdom and in the Gallican Church ought to be maintained, and the usages of our fathers remain unassailable; and that the greatness of the holy apostolic see itself requires that the laws and customs established with the consent of that respectable see and the churches remain in force. IV. Although the pope has the chief poet in the questions of faith, and his decrees regard all the churches, and each church in particular, yet his judgment is still not unalterable, until the consent of the Church intervene. We have reason to reject all the contrary. V. Ultramontanism, the bishops who preside in them by the authority of the Holy Ghost, these maxims which we have received from our fathers, in order that we may all say the same thing, and that we may all be in the same mind, and that we may all follow the same doctrine." The Declaration du clerge de France en 1692, was sent to the pope, with an address from Bossuet. Alexander VIII annulled the declaration, but the clergy maintained their ground, although Louis XIV himself descendened to a step which was by some considered as a retraction. In consequence of this difficulty with Rome, the French Church found itself in 1621 with this five bishops vacant; the king allowed the twelve signers of the declaration, whom he had nominated as bishops, but whom the pope had for ten years refused to recognize as such, to retract all which had displeased the pontiff. The king himself stated that he was driven orders so as to make an edict of March 22, 1628, which had been promulgated in view of the then existing circumstances, should no longer have effect. But that he did not abandon the Gallican maxims is proved in his letter of July 7, 1718, directed to cardinal La Tremouille, that he, in the name of the king, had enforced the recognition, as bishop of Beauvais, of the abbot of St. Aignan, who had defended the four propositions in a thesis in 1705. The position of the question was still more clearly defined by the decision of the Conseil de Régence of 1718, that the bishops could dispense with the papal inauguration bull as, "the Sc-
Gallienus, a Roman emperor, became sole sovereign A.D. 260, and was assassinated at Milan in 268. His reign is memorable in Church History, as he gave the Christians by an edict in which he recognised the Church as a civil corporation. —Eusebius, Hist. Eccl. vii, 13; Hase, Ch. Hist. § 48.

Gall‘im (Heb. Gallim, גַּלְאִים, 7, 77; Arabic, gaba, or perhaps festuana), a place which is twice mentioned in the Bible: (1.) As the native place of the man to whom Michael, David’s wife, was given—“Phalti, the son of Laish, who was from Gallim” (Gen. 35, 22; 1 Sam. xxv, 44; Sept. Pseudo-Josephus 3, Ant. vi, 38, 8); but there is no clue to the situation of the place. In 2 Sam. iii, 15, 16, when Michal returned to David at Hebron, her husband is represented as following her as far as Bahurim, i.e. on the road between the Mount of Olives and Jericho (comp. 2 Sam. xvi, 1). But even this does not necessarily point to the direction of Gallim, because Phalti may have been at the time with Ishboseth at Mahanaim, the road from which would naturally lead past Bahurim. (2.) The name occurs...
again in the catalogue of places terrified at the approach of Sennacherib (Isa. x. 30; Sept. Γαλλοίς): "Lift up thy voice, O daughter of J e h o v a h !" The other towns in this passage—Alaith, Michmash, Ramah, Gibea of Saul—are all, like Alathoth, in the tribe of Benjamin. They are in the north of Jerusalem. It would not be overlooked that in both these passages the names Laish and Gallim are mentioned in connection. Possibly the Ben-Lasi in the former implies that Phalti was a native of Laish, that being dependent on Gallim. Its site was probably in Eusebius and Josephus (Ant., i. 9; Gallim, v. Γαλλίς, Gallin), although from hearsay (ἡγεμόν) they place a village of a similar name (Γαλλαία) near Accaron (Ekron). Schwarz (Palest. p. 131) reports a Beit-Djallim between Ramleh and Joppa, but by other explorers the name is given as Beit-Djas. Porter suggests the little village of Himach as a suitable locality (Handb. for Syria, p. 214); but there are no ruins there, as at Khirbet el-Ma’ayek (Ruins of the Serpents), on a low tell, a little farther N.E., containing the remains of an ordinary village, with a cistern in the middle (Robinson, Later Researches, p. 298).

Among the names of towns added by the Sept. to those of Judah in Josh. xv, 59, Gallim (Γαλλίς v. Γαλλίς) occurs between Karem and Thebcr. In Isa. xv, 8, the Vulgate has Gallim for Ephgim, among the towns of Moab.

Gal'lio (Greeked Γάλλιος), a son of the rhetorician M. Annus Seneca, and elder brother of Seneca the orator. His name was originally M. Annus Novus, but changed to Junius Annus (or Annicus) Gallio, in consequence of his adoption by L. Junius Gallio the rhetorician (Pliny, Hist. Nat. xiii, 38; Tacitus, Annal. xvi, 17; Quintilian, Inst. Orat. iii, 21, 4, 2, 91). Seneca dedicated to him his treatise De Vita Beata, in the preface to the fourth book of his Naturalis Questions describes him as a man universally beloved (comp. Stat. Silv. i, 7, 82); and who, while exempt from all other vices, especially abhorred flattery. Dion Cassius (ix, 53) mentions a witty but bitter joke which he made in reference to the persons put to death by Claudia. According to Eusebius, he committed suicide before the death of Seneca (Tacit. Tempor. p. 161, Amstel. 1638), but Tacitus speaks of him as alive after that event (Annal. xv, 73), and Dion Cassius states that he was put to death by order of Nero (see Antonil Bühl, Is. 131 sq.). Another writer (Gelpe, De familiari. Pauli c. Senec. Lips. 1813, p. 18) thinks that Seneca was converted through the instrumentality of Paul. He was Proconsul (ἀρχηγός, a. rec. ἀρχηγός, ἀρχηγός, Tischendorf) of Athens (Acts xxviii, 12) under the emperor Claudius, when Paul first visited Corinth, and no less refused to abet the persecution raised by the Jews against the apostle (see Dunnahuer, De Galliismone, Argent. 1664; also in his Disp. theolog. p. 175 sqq.), A.D. 49. See Achaia. Dr. Lainer has noticed the strict accuracy of Luke in giving him this designation, which is obscured in the Auth. Ver. by the use of the term deput (Credibility, pt. i, uk, i, ch. i; Works, iii, 84). See Proconsul. He is said to have resigned the government of Achaia on account of the climate not agreeing with his health (see Seneca, Ep. 101). See Paul.

Gal'litze, or Gal'itzin, Dmitri Augustin, son of the Russian princess Amalie of Gallitzin, was born at the Hague Dec. 22, 1770. His mother was an enthusiastic Roman Catholic convert, and under her influence he joined the Roman Church at seventeen. He entered the Austrian army, and served with it in the American Revolution. He followed the army, for a journey in America, and on the voyage was led by the counsels of a missionary named Broxius to turn his mind to the priesthood. He was ordained March 18, 1795, and devoted his life to missionary labors. In 1799 he selected a spot among the Alleghenies as the seat of a Roman Catholic town, and founded Loretto, now a town of several thousand inhabitants, with Roman Catholic schools for boys and girls in the neighborhood. Father Smith's zeal in the wild region of the Alleghenies, and left enduring marks of his energy, faith, and devotion throughout that country. His death at Loretto May 6, 1840. He published a Defense of Catholic Principles (Pittsburg, 1816; new ed. Dublin, 1867).—Appeal to the Protestant Public (Pittsburg, 1819), and other small works.

Gallows (γαλλόσ, éta, a tree or wood), a post or gibbet, rendered in Esth. 6, 4, 6 "gallows," but in Gen. xl, 19, and Deut. xxi, 22, "tree." Hanging appears to have been a punishment practised among the Egyptians and other ancient nations, as well as among the Hebrews. See Punishment.

Gal'uppi, Pascale, an Italian philosopher, was born at Tropes, in Calabria, in Italy, April 2, 1770, and died at Naples in November, 1846. The groundwork of his education was laid at Tropes under the instructions of J. A. Ruffs, and he afterwards completed his studies at the University of Naples, in which institution he subsequently became professor of philosophy. In his L'elusato he carried the philosophical doctrines in vogue in the 18th century, and strove to reestablish Italian philosophy on its old bases, recognizing in man's nature a double element, the spiritual and material, in accord with the philosophy of the Church fathers. His first work, a pamphlet, dated 1807, on Analysis and Synthesis, sets forth his philosophical method. Shortly after it he published his Essay on Knowledge, in four books, treating (1) of knowledge, (2) of the analysis of the faculties of the human mind, (3) of the analysis of ideas, and (4) of the legitimate reasons of our judgments and our errors. His Stagio Fisico sulla critica della conoscenza (Naples, 1819, 6 vols. 8vo) contains an examination of the principal doctrines of ideology, Kantianism, and the transcendental philosophy. His Elements of Philosophy (Elementi di Filosofia, Messina, 1832) treats successively of pure logic, metaphysics, mathematics, morals, and has been often reprinted. In 1827 Galuppi published twelve Letters on Philosophy (Lettere filosofiche sulla Vicenda della Filosofia, etc.), of which a 2d edition appeared in 1828, and a French translation by Poise in 1844. His other works are, Filosofia della Volontà (Naples, 1818), and Milan, 1841; and Milan, 1842; and Milan, 1841, 5 vols. ;—Storia della Filosofia (Naples, 1842):—Elementi di Teologia Naturale (Naples, 1844, 4 vols.).—Hoefer, Nouv. diction. générale, x, 284-5. (J. W. M.)

Gallus, Caestius (Greeked Κιστίος Γάλλος), son of Cestius Gallus Camerinus, a Roman senator of consular rank, was president ("legatus"), Suetonius, Vesp. 4) of Syria, A.D. 64, 65, at the time of the final Jewish war (Tacitus, Hist. v. 10). Maddened by the tyrannies of Cassius Flosus (q. v.), the Jews applied to Galus for protection; but, though he sent Nepotianus, one of his officers, to investigate the case, and received from him a report favorable to the Jews, he took no effectual steps either to redress their injuries, or to prepare for any outbreak into which their discontent might drive them. When at last he found it necessary to act, he marched from Antioch, and, having taken Ptolemais and Lydda, advanced on Jerusalem. There he drove the Jews into the upper part of the city and the precincts of the Temple, and he might, according to Josephus, have, in this second instance, had he not been dissuaded by some of his officers from pressing his advantage. Soon after he unaccountably drew off his forces (leaving an interval of which the
GALLUS

Christians availed themselves to escape, according to our Saviour’s direction, Luke xxi, 21, 22, and was much harassed by the Jews, who took from him a quantity of spices, among which was thyme, of Achaea, and Galatian messengers to him to give an account of his affairs, and to represent them as favorably as possible for himself. The emperor, much exasperated, commissioned Vespasian to conduct the war; and the words of Tacitus (*ab sup.) seem to imply that Gallus died in the battle, and the steep and successively high seats of the fortress then being probably hastened by vexation (Josephs, *It. 43; War, ii, 14, 3; 16, 1, 2; 18, 9, 10, 19, 1-9; 20, 1; iii, 1).—Smith, *Dict. of Oss. Biog. s. v. See Governor.

Gallus, C. Vibia Trebonianus, Roman emperor (early history unknown), was elected to the throne A.D. 251. His reign was disgraced by concessions of the Christians. See Persecution. He was assassinated A.D. 253 or 254.

Gallus, St. Gal, St. Gillian, or St. Gall, was a native of Ireland, born about 560, and a disciple of Columban (q. v.). He founded the celebrated abbey of St. Gall (q. v.), in Switzerland, of which he was made A.D. 545. He died in 646, Oct. 16, which is his day in the Roman Calendar. There is no writing of his except a sermon in Cassianus, *Lectiones Antiqu. i, 781, in Galland, *Bib. Patr. xii, 721, and in Migne, *Patrologia Latina, vol. lxxviii.

Gallus (or Gallo), Thomas, a French theologian, who died Dec. 5, 1244, was a member of the regular Augustines, canon of the congregation of St. Victor of Paris. In 1225 this position was appointed to by St. Andrew of Vercelli, by which latter title he is frequently exclusively designated. The name Gallus is regarded by some as only the Latinized form of his real name, Coq; by others as indicating his nationality; while others suppose that he was of Italian origin. Gallus taught at the university of Paris, was a favorite Augustinian exponent, and, when abbot of Vercelli, drew around him the best professors of Northern Italy, achieving for himself and his monastery a European reputation in theology and ecclesiastical learning. J. Gerson (q. v.), in the preface to his Commentary on the Canticles, praises highly Gallus’s *Explanations of the Canticles des Comptes (published, with commentary, by Halgrin, Paris, 1521, and Lyons, 1571, fol.). This work was published at Rome in 1666 under the care of J. Magloire, together with a decree of the Congregation of the Index forbidding its publication. The preface of the book of Scota, showing that he had been attributed to the celebrated Irish philosopher.

Another work of Gallus’s (*Traduction paraphrase des livres sur la hierarchie et la theologique mystique attribu du St. Denis l’Arpoigny) is found in the *Theologia Mystica of J. Eckhust (Ingolstadt, 1919), and in the *Commentarius in St. Dionysii Areopagiti Opera of Dionysius of Carthage (Cologne, 1856). Léon Alaczi (*Apot urbano) erroneously attributes to Gallus some sermons (*Speeches) which belong to John, abbot of Vincelles.—Hoefer, *Novae Biblioth. Generale, xix, 849; Oudin, *Comment. de scriptingis ecclesiasticis, iii, 9. (J. W. M. M. T.)

Gamin* (Gama* v. r. Gama*), given (1 Esdr. viii, 29) as the name of one of the chief Levites who returned from the captivity, instead of the *Daniel (q. v.) of the Heb. text ( Ezra viii, 2).

Gamel. See CAMEL; GEMALI.

Gamelis (red Gaman), so called from its situation on a ridge like a camel’s hump, Josephus, War, iv, 1, 1., a town of trans-Jordanian Palestine, in the district of Gamalitis (Josephus, War, iii, 3, 5; or Lower Galantia (ib. iv, 1, 1.)), first mentioned as a fortress reduced by Alexander Jannaeus (ib. i, 4, 8); it retained its allegiance to Rome on the first outbreak of the final hostilities (Josephus, *It. 11), but afterwards revolted, and was so strongly fortified by Josephus (ib. 37), as to be only taken after a siege of seven months by a desperate assault (War, iv, 1, 2). It was situated on the Lake of Tiberias, opposite Tarichee (ib. iv, 1, 1). Schwartz is inclined, from a notice in the Talmud and certain hints in the Midrash, to place it between Harius and Kedesh in Naphtali ( *Palest., p. 190); and Pliny speaks of a Galillean town of the same name (*Hist. Nat. v, 13); but this position is not to be thought of (see *Palest., p. 794). Lord Lindsay found the site in a small area of waste south of the steep and successful fortress, between the village of Fik and the shore, “having extensive ruins of buildings, walls, and columns on its top” (Burckhardt, *Syria*, p. 278). This identification is confirmed by Thomson, who gives a detailed description of the site ( *Lands and Book, ii, 47 sq.;); though Ridley Robinson, on account of Josephus’s mention of a large place back of the fortress, we should rather locate it at Khan el-Akabab, as described by Seetzen ( *Erkundige, xv, 360). See Caphar-Gamala.

Gamaliel (Heb. Gamaliel), *2 Macc. 5, 23, reward of God; Sept. and N. T. *Gama* (i.e., the name of two men in Scripture.

1. Son of Pedahzur, and chief (9002) of the tribe of Manasseh at the census at Sinai (Numm. i, 10; ii, 20; vii, 54, 59), and at starting on the march through the wilderness (x, 28). B.C. 1657.

2. A Pharisee and celebrated doctor of the law, who gave prudent and humane advice in the Sanhedrin respecting the treatment of the followers of Jesus of Nazareth (Acts 4, 24 sq.), A.D. 29. We read of Acts xxiii, 3 that he was the preceptor of the apostle Paul. He is generally identified with the very celebrated Jewish doctor Gamaliel, who is known by the title of “the glory of the law,” and was the first to whom the title “Rabbi,” “our master,” was given. The time agrees, and there is every reason to suppose the assumption to be correct. He bears in the Talmud the surname of *Titi, “the elder” (to distinguish him from a later rabbin of the same name), and is represented as the son of Rabbi Simeon, and grandson of the famous Hillel: he is said to have occupied a seat, if not the presidency, in the Sanhedrin during the reigns of Tiberius, Caligula, and Claudius, and had died eighteen years after the destruction of Jerusalem (see Lightfoot, *Commentaria hebraica Talmudicae praemissia, ch. xxv). But, as this statement would give him an extreme old age, it may perhaps refer to the former and later Gamaliel, showing that he had been attributed to the celebrated Irish philosopher.

Another work of Gallus’s (*Traduction paraphrase des livres sur la hierarchie et la theologique mystique attribu du St. Denis l’Arpoigny) is found in the *Theologia Mystica of J. Eckhust (Ingolstadt, 1919), and in the *Commentarius in St. Dionysii Areopagiti Opera of Dionysius of Carthage (Cologne, 1856). Léon Alaczi (*Apot urbano) erroneously attributes to Gallus some sermons (*Speeches) which belong to John, abbot of Vincelles.—Hoefer, *Novae Biblioth. Generale, xix, 849; Oudin, *Comment. de scriptingis ecclesiasticis, iii, 9. (J. W. M. M. T.)

Gamin* (Gama* v. r. Gama*), given (1 Esdr. viii, 29) as the name of one of the chief Levites who returned from the captivity, instead of the *Daniel (q. v.) of the Heb. text ( Ezra viii, 2).

Gamel. See CAMEL; GEMALI.

Gamelis (red Gaman), so called from its situation on a ridge like a camel’s hump, Josephus, War, iv, 1, 1., a town of trans-Jordanian Palestine, in the district of Gamalitis (Josephus, War, iii, 3, 5; or Lower Galantia (ib. iv, 1, 1.)), first mentioned as a fortress reduced by Alexander Jannaeus (ib. i, 4, 8); it retained its allegiance to Rome on the first outbreak of the final hostilities (Josephus, *It. 11), but afterwards revolted, and was so strongly fortified by Josephus (ib. 37), as

Games

Gambold, John, a pious bishop of the Moravians, was born April 10, 1771, at Puncheonst, South Wales, and was educated at Christ Church, Oxford. In 1798 he became chaplain to Stonington Harcourt, in Oxfordshire; but in 1742 he joined the Moravians, and was consecrated bishop in 1754. 'And certainly few, in any age of the Church, ever possessed, in a higher degree, the spiritual qualifications which the apostle specified as distinguishing a good bishop—fervor of devotion, humility of mind, disinterestedness of spirit, a disposition to universal benevolence, and a willingness to undertake any labor, or submit to any privation, in order to promote the glory of God and the spiritual welfare of men. From the time of his consecration, he resided for ten years, performing all the duties of a primitive bishop over a small congregation; in his episcopacy, he was a zealot for the simplicity of the faith, and at the same time maintaining an active oversight by correspondence with all the ministers of his communion throughout England.' He died Sept. 18, 1771. Among his writings are A Memoir of Count Zinzendorf; and Discipline and Discipline of the United Brethren—Historie of the Greenland Mission of the United Brethren—Memo (1748);—Summary of Christian Doctrine (1767, 12mo). His Works were edited, with an introductory essay, by Thos. Erskine, Esq. (Glasg. 1822, 12mo). See Tyerman, Oxf. Methodists, p. 155-200.

Games are so natural to man, especially in the period of childhood, that no nation has been or can be entirely without them. (1.) Accordingly, a few traces are found in the early Hebrew history of at least private and childish diversions. The heat of the climate in Syria would indispose the mature to more bodily exertion than the duties of life imposed, while the gravity which is characteristic of the Oriental character might easily be compromised by any gaming as sports. Dignified ease, therefore, corresponds with the idea which we form of Oriental recreation. The father of the family sits at the door of his tent, or reclines on the house-top, or appears at the city gate, and there tranquilly enjoys repose, broken by conversation, under the shade and amidst the warm sunlight of the bright and breezy heavens, in the cool of the retiring day, or before the sun has assumed his burning ardors (Deut. vi, 14; Lam. v, 14). Of the three classes into which games may be arranged, juvenile, manly, and public, the first two alone belong to the Hebrew life; the latter, as noticed in the Bible, being either foreign introductions into Palestine, or the customs of other countries.

1. With regard to juvenile games, the notices are very few. It must not, however, be inferred from this that the games of the Hebrew were without an adaptation of their toys and sports of childhood claim a remote antiquity; and if the children of the ancient Egyptians had their dolls of ingenious construction, and played at ball (Wilkinson, Anc. Egypt. abridgm., i, 157), and if the children of the Romans among whom much of those of modern days (Horace, Sat. iii, 247), we may imagine the Hebrew children doing the same, as they played in the streets of Jerusalem (Zech. viii, 5; comp. Jer. xxxix, 19). The only recorded sports, however, are keeping tame birds (Job xii, 5; comp. Cattal. 3, 170) and the proceedings of marriage or feasts (Matt. 21).
16. Commenting on Zech. xii, 3, Jerome mentions an amusement of the young which is seen practised in more than one part of the north of England. "It is customary," he says, "in the cities of Palestine, and has been so from ancient times, to place up and down large stones to serve for exercise for the young, who, according in each case to their degree of strength, lift these stones, some as high as their knees, others to their middle, others above their heads, the hands being kept horizontal and joined under the stone." A similar mode of exercise prevailed in ancient Egypt (Wilkinson, i, 207). See CHILDREN.

Music, song, and dancing were recreations reserved mostly for the young or for festive occasions. From Lam. v, 16, "the crown is fallen from our head" (see the entire passage on the subject of games), it might be inferred that, as among the Greeks and Latins, chaplets of flowers were sometimes worn during festivity. To the amusements just mentioned frequent allusions are found in holy writ, among which may be given Ps. xxx, 11; Jer. xxxi, 13; Luke xv, 25. In Isa. xxx, 29, a passage is found which serves to show how much of festivity and mirth was mingled with religious observances; the journey on festival occasions up to Jerusalem was enlivened by music, if not by dancing. Some of the chief objects aimed at in the Greek and other games were gained among the Hebrews by their three great national festivals—the Passover, the Feast of Weeks, and the Feast of Tabernacles. At the recurrence of these festivals the nation was brought together in honor of the true God; and in times of religious feeling these great meetings were looked forward to and were celebrated with perhaps not less joy, though joy of a somewhat different kind, from that with which the Greeks looked forward to and celebrated their Olympic, Isthmian, and Nemean games. The public games of the Hebrews seem to have been exclusively connected with military sports and exercises, and even of these the notices are few and brief. It was probably in this way that the Jewish youth were instructed in the use of the bow and of the sling (1 Sam. xx, 20, 30-35; Jude xx, 16; 1 Chron. xii, 2). Allusion to what would seem to have been a kind of variance, such as we read of in different countries, seems to be made in 2 Sam. ii, 14, where Abner proposes that the young men should arise and "play" before the two armies. The Hebrew נֵקַע (nakah), for "play," is frequently used for dancing (2 Sam. vi, 21; Jer. xxxii, 4); and Abner seems here to refer to a sport of this kind, not now to be used as an amusement, but turned into stern real-
GAMES

31

GAMES

In their favorite sport appears to have been the more世俗 game of draughts, which even royalty did not disdain to share (Wilkinson, i, 189 sq.). See PLAY.

3. Public games were also, together foreign to the spirit of Hebrew institutions; the great religious festivals supplied the pleasurable excitement and the feelings of national union which rendered the games of Greece so popular, and at the same time inspired the persuasion that such amusements should be exclusively connected with religious duties. Accordingly, the erection of a gymnasion by Jason, in which the discus was chiefly practised, was looked upon as a heathenish proceeding (1 Macc. i, 14; 2 Macc. iv, 12-14), and the subsequent erection by Herod of a theatre and amphitheatre at Jerusalem, Josephus, Ant. xv, 8, 1), as well as at Cesarea (Ant. xvi, 9, 6; War, i, 21, 8) and at Berytos (Ant. xix, 7, 5), in each of which a quinquennial festival in honor of Caesar was celebrated with the usual contests in gymnastics, chariot-races, music, and with wild beasts—which was viewed with the deepest aversion by the general body of the Jews (Ant. xvi, 9, 1). In the Old Testament two passages contain a clear reference to games: Psa. xix, 5, "Rejoice as a strong man to run a race;" Eccl. ix, 11, "I said that the race is not to the swift." The entire absence of verbal or historical mention to this subject, however, in the Gospels shows how little it entered into the life of the Jews. Some of the foreign Jews, indeed, imbibed a taste for theatrical representations; Josephus (J.J. 3) speaks of one Alluritas, an actor of farces (μοσαικος), who was in high favor with Nero. (See Eichh. de Jud. m. re scens., in the Comment. Grec.)

(II.) Among the Greeks, on the other hand, and subsequently among the Romans likewise, the rage for theatrical exhibitions was such that every city of any size possessed its theatre and stadium. At Ephesus an annual contest (διαινοικες διαινοικες) was held in honor of Diana, which was superintended by officers named Αμφιδιας (Acts xix, 81; A.V. "chief of Asia"). See ASIARCH. It is possible that Paul was present when these games were proceeding, as they were celebrated in the month of May (see the general body of the Jews (Ant. xvi, 9, 1); but this hardly agrees with the notes of time in Acts xx, 1-3, 16.

1. Roman Beast-fights and Gladiatorial Shows.—(1.) A direct reference to the exhibitions that took place on such occasions is made in the phrase ορκομακαρία, "I fought with beasts" (1 Cor. xv, 32). The θυγατία or beast-fight (venatio in Latin) constituted among the Romans a part of the amusements of the circus or amphitheatre. It consisted in the combat of human beings with animals. The persons destined to this barbarous kind of amusement were termed θυγατία, bestiarii. They were generally of two classes; 1. Voluntary, that is, persons who fought either for amusement or for pay: they were clothed and provided with offensive and defensive weapons. 2. Condemned persons, who were mostly exposed to the fury of the animals unclothed, unarmed, and sometimes bound (Cicero, Pro Sest. 64; Ep. ad Quint. Frat. ii, 6; Seneca, De Benef. ii, 19; Tertull. Apol. 9). Political offenders especially were so treated, and Josephus (War, vii, 9, 1) records that no less than 5000 Jews were destroyed in the theatre at Cesarea by this and similar methods. The expression as used by Paul is usually taken in a metaphorical, both on the qualifying word κατ' αρχήν, "after the manner of a man," the absence of all reference to the occurrence in the Acts, and the rights of citizenship which he enjoyed: none of these arguments can be held to be absolutely conclusive, while, on the other hand, the absence of any specification in the apostolic epistles (Ignatius, ad Eph. 1; ad Trall. 10; Mart. Polyc. 3; comp. Euseb. E.H. ii, 15), and, where metaphorically used (Ignatius, ad Rom. 5), an explanation is added which implies that it would otherwise have been taken literally. Certainly Paul was exposed to some extraordinary suffering at Ephesus, which he describes in language borrowed from, if not descriptive of, a real case of θυγατία for he speaks of himself as a criminal condemned to death (διακαταλαμβάνομαι; 1 Cor. iv, 9; ἄξονα τοῦ θανάτου ἐν ζωήν; 2 Cor. i, 9), exhibited previously to the execution of the sentence (dichaidy; 1 Cor. iv. c.), reserved to the conclusion of the games (ἐξεκατερον), as was usual with the theriomachia ("novissimos elegit, velut bestiariis," Tertull. De Pass. 14), and thus made a spectacle (σκηνών ισγυρισθησαν). Lightfoot (Exercit. 1 Cor. iv, 18; 2 Cor. i, 42; 1 Tim. i, 12), 10,000 lions, which were butchered by beings wearing the human shape. Pompey caused the destruction in this way of 600 lions. On the same occasion there perished nearly twenty elephants. These numbers, however, are small compared with the butchery which took place in later periods. Under Titus, 5000 wild and 4000 tame animals, and in the reign of Trajan, 11,000 animals, are said to have been destroyed. See Smith, Dict. of Class. Ant. s. v. Bestiarii.

(2.) The fights of the gladiators with one another was also a common practice at Rome. It began B.C. 264, and increased to such a fearful extent that on a single occasion, in honor of the triumph of the emperor Trajan over the Deciani, 10,000 gladiators fought for the amusement of the people. They were at first composed of captives or
condemned malefactors, but afterwards, as the passion for blood grew stronger, free-born citizens, men of noble birth, and even women, fought after this fashion. The spectators betted on their favorite gladiators with much the same feelings as they betted on the favorite horses which ran before them in the circus. See Smith, Dict. of Class. Ant. s. v. Gladiators.

The games and theatrical exhibitions of the heathen were regarded by the early Christians with strong disapprobation as they were by the Jews generally, and for better reasons (Neander's Church Hist. i, 265, § iii). National antagonism to everything foreign as such had much effect in producing Jewish opposition to the games. It was as ministering in themselves and by their attendant circumstances to the lusts of the flesh and of the eye, as producing almost of necessity a cruel temper in the beholders, and running counter to the moral feeling, modesty, and sobriety of the Christian character, that the public spectacles and games of the heathen were ranked among those pomps and vanities which the Christians were obliged to renounce by their baptismal vow. Even the better-minded among the heathen condemned games with disapproval. Pliny the consul speaks with approval of Junius Mauricius, who expressed an earnest wish that they could be abolished at Rome (Pliny's Letters, iv, 22); nor does Tacitus appear to treat them with much greater respect (Hist. iii, 85). Rome added to the Greek examples features of cruelty which were unknown in the original Grecian games; and there was one feature of difference between the Grecian and Roman games which rendered the former a much more fitting illustration of the Christian life than the latter were, namely, that in the Grecian games the most eminent men in the land came forward and contested personally for victory, while in Rome the most eminent men were merely spectators of the contests of their inferiors (Gibbon, Decline and Fall, chap. xi, p. 11). Diomede and Menelaus, Antilochus and Ajax, and Ulysses, the kings, great warriors, and wise men of the Grecian states, deemed it an honor to contend for victory in their countries' games, and even old Nestor, the Homerite type of perfection in the qualities of mind and body, regretted that his years prevented him from joining in the glorious strife (Iliad, xxiii, 654) but "a senator, or even a citizen, conscious of his dignity, would have blushed to expose his person or his horses in the circus of Rome." See Smith's Dict. of Class. Ant. s. v. Ludi.

2. Grecian Prize or Gymnastic Contests. — The scriptural allusions (Gal. ii, 2; v, 7; Phil. ii, 16; iii, 14; 1 Tim. vi, 12; 2 Tim. ii, 5; Heb. xii, 1, 4, 12) are the more appropriate, because the Grecian games were in their origin and in their best days intimately connected with religion. Games in Greece were very numerous. They are traceable by tradition back to the earliest periods of Grecian civilization. Indeed, much of the obscenity which rests on their origin is a consequence and a sign of their high and even mythic antiquity. See Smith, Dict. of Class. Ant. s. v. Athlete.

(1.) Four of these games stood far above the rest, bearing the appellation of Iepis, "sacred," and deriving their support from the great Hellenic family at large, though each one had special honor in its own locality: these four were the Olympic, Pythian, Nemean, and Isthmian. The first were held in the highest honor. The victors at the Olympic games were accounted the noblest and happiest of mortals, and every means was taken that could show the respect in which they were held. These games were celebrated every five years at Olympia, in Elis, on the west side of the Peloponnesus. Hence the epoch called the Olympiad.

The gymnastic exercises were laid down in a well-planned systematic series, beginning with the easier (korga), and proceeding on to the more difficult (kopia). Some of these were specially fitted to give strength, others agility; some educated the hands, others the feet. Among the lighter exercises was reckoned running (piroue), leaping (duma), quoiting (zipa), hurling the javelin (korevos). When skill had been obtained in these, and the consequent strength, then followed a severer course of discipline. This was twofold — simple; compound. The simple consisted of wrestling (kallin), boxing (kypus); the compound...
GAMES

Besides the athletic games above described, there were others, consisting of racing in chariots, on horseback, or with torches; and still others, in which the parties strove to excel one another in skill in playing upon various instruments. See RACE.

At the Olympic games the prize was simply a chaplet made of olive. The crown was later put on a tripod, and placed in the middle of the course, so as to be seen by all. On the same table there were also exposed to view palm-branches, one of which was given into the hand of each conqueror at the same time with the chaplet. The victors, having been summoned by proclamation, were presented with the ensigns of victory, and conducted along the stadium, preceded by a herald, who proclaimed their honors, and announced their name, parentage, and country. The real reward, however, was in the fame which ensued. A chaplet won in the chariot-races at Olympia was the highest of earthly honors. What congratulations from friends; how was the public eye directed to the fortunate conqueror; what honor had he conferred on his native city, and for what office was such a one not fit! With what intense and deep delight must his bosom have been filled when the full acclamation of assembled Greece fell upon his ear, coming in loud salutations and applause from every part of the crowded course? Then came the more private attentions of individual friends. One brought a chaplet of flowers; another bound his head with ribbons. Afterwards came the triumphal sacrifice before the temple-gods, and next day sumptuous feasting. The poet now began his office, gaining in some cases, both for himself and the happy victor, an unexpected immortality. Music also lent her aid, and his name was sung wherever the noble accents of the Greek tongue asserted their supremacy. In order to perpetuate the memory of these great men, their names and achievements were entered into a public register, which was under the care of suitable officers. A no less privilege was that of having a statue of themselves placed, either at the expense of their country or their friends, in the sacred grove of Jupiter. A perhaps still greater honor awaited the victor on his return home. The conquerors at the Isthmian games were wont to be received in their chariots, superbly attired, amid thronging and jubilant multitudes. One or two other privileges belonged to these victors, such as immunity from public offices, and a certain yearly stipend. At the Isthmian games the prize was ivy during the mythic periods. In later ages the victor was usually crowned with a chaplet of pine-leaves. If the conqueror had come off victorious in the three great divisions—music, gymnastics, and racing—he was invested, in a way, as well as in the other sacred games, presented also with a palm-branch. See Smith's Dict. of Class. Antiq. s. v. Isthmian, Olympian, Nemean, Pythian Games severally. See CROWN.

Corinthian Coin of Antoninus, with Isthmian Crowns.

(2.) Paul's epistles (as above) abound with allusions to the Greek contests, borrowed probably from the Isthmian games, at which he may well have been present during his first visit to Corinth (1 Cor. 15:47; 1 Thess. 4:13). These contests (σάμπον—word of general import, applied by Paul, not to the sight, as in the A.V., but in the race. 1 Tim. 6:12) are minutely illustrated by his references, in which they are used as a figure of the Christian's
GAMES
734
GAMMADIM

course of duty and struggle with opposing influences.

The competitors (οἱ αγωνιζόμενοι, 1 Cor. ix. 25; ἦν ἄῤῥητος 3 Tim. ii. 5) required a long and severe course of previous training (καὶ σωματικὸς γυμνασία, 1 Cor. ix. 30), their joy at the performance of an act enforced (ἡ παρέμεινα, 1 Cor. ix. 25, 27).

In the Olympic contests these preparatory exercises (προγυμνασία) extended over a period of ten years, during which most of the competitors were conducted under the supervision of appointed officers. The contests took place in a stadium which was surrounded by a circle of spectators (περιμενῶν γυμνός μαρτυρεῖ, Hebl. xii. 1), the competitors being the spectacle (ὁδηγός = παρα, 1 Cor. iv. 9; θεοβόλος, Hebl. x, 33).

The games were opened by the proclamation of a herald (εὐσήμενος, 1 Cor. ix. 27), whose office it was to proclaim the name and country of each candidate, and especially to announce the name of the victor before the assembled multitude, as well as to signify the other crises of the game. Certain conditions and rules were laid down for the different contests, as that no bribe be offered to a competitor; that in both the combats the combatants should not lay hold of one another; etc.; any infringement of these rules (αἱ μὲν νομίμως ἀθώους, 2 Tim. ii. 5) involved a loss of the prize, the competitor being pronounced disqualified (ἀδικομένος, 1 Cor. ix. 27; "cast away," a term that seems to picture the condition of one so disqualified and to be excluded from the lists or rejected after the game was over). The judge was selected for his spotless integrity (οἱ δίκαιοι κρίτες, 2 Tim. iv. 8); his office was to decide any disputes (ῥήματα, Col. iii. 13; A.V. "rule") and to give the prize (τὸ βραβείον, 1 Cor. iv. 24; Phil. iii. 14), consisting of a crown (διάκεφαλος, 1 Tim. ii. 5); it was made of leaves of wild olive at the Olympic games, and of pine, or, at one period, i.e., at the Athenian games. These crowns, though perishable (βραχεῖς, 1 Cor. ix. 25; comp. 1 Pet. v. 4), were always regarded as a source of unfailing exultation (Phil. iv. 19; 2 Cor. xi. 15-16). Prizes were also placed in the hands of the victors (Rev. vii. 9). Paul alludes to two only out of five contests, boxing and running, most frequently to the latter. In boxing (πυγμῆ; compare πυγμαῖος, 1 Cor. ix. 26), the hands and arms were bound with the cinctus, a band of leather, so studied with nails, which very much increased the severity of the blow, and rendered a bruise inevitable (ὑπόπηρεξα, 1 Cor. l. c.; ὑπέτακτα = ὑπὸ τῶν ὁμάδων τῶν σπάγων Ἰερου, Polliux, Onom. ii, 4, 52). The skill of the combatant was shown in avoiding the blows of his adversary, so that some of this leather was worn away (玙 χαλκοῦ, 1 Cor. l. c.), or the phrase may allude to the preludial trials of competitive strength (comp. Statius, Theb. vi, 487; Virgil, Aeneid, iv, 870). The foot-race (αγόμος, 2 Tim. iv. 7, i word peculiar to Paul; comp. Acts xxii, 50; xx, 24) was run in the stadium (ἐν σταδίῳ; A.V. "race," 1 Cor. ix. 24), an oblong area, open at one end and rounded in a semicircular form at the other, along the sides of which were the raised tiers of seats on which the spectators sat. The race was either from one end of the stadium to the other, or, in the διάδρομος, to be the starting-point. There may be a latent reference to the διάδρομος in the expression ἄρχων καὶ τελευταίων (Hebl. xii, 2). Jesus being, as it were, the starting-point and the goal, the locus a quo and the locus ad quem of the Christian's course. The judge was stationed by the goal (ἐν σταδίῳ; comp. Acts xxii, 14), which was made at one end of the stadium to the other, so that the runner could make straight for it (οὐ σὲ ἄῤῥητος, 1 Cor. ix, 26). Paul brings vividly before our minds the earnestness of the competitor, having cast off every encumbrance (σφαίρα ἀπολογίμων παρεyears), and setting his affections on any distant goal (αἵματες, ἀετίλαμφος, Hebl. xii, 2; x, 25), unmindful of the space already past (πατὲ ἄνω κυνηγανόμοι, Phil. i, c.), and stretching forward with bent body (τοῖς δὲ ἐμφραγμένοις κινητοὺς), his perseverance (ἐκ νυμφών, Hebl. xii, 12), his joy at the part (περιστεράω, Λουκ. xvi. 24), his exaltation as he not only received (ταῦτα, Phil. iii, 12), but actually grasps (καταβαίνω, not "apprehend," as A.V. Phil.; ἀνοιγόμενοι, 1 Tim. vi. 12, 13) the crown which had been set apart (ἀπονέατον, 2 Tim. iv. 8) for the victor. The lengths of the bounds (κατάμαχος) are left for the profession of the office of the apostle in the trial, and serve to illustrate the meaning of the apostle when he speaks of running with patience the race set before him (ὑπόμονα, sustained effort). Indeed, one Ladas, a victor of the Olympic games, in the διάδρομος, or race set before him, so exhausted was his efforts that, immediately on gaining the honor and being crowned, he yielded up his breath: a fact which also serves to throw light on scriptural language, as showing with what intense eagerness these aspirants (ἐνδυρομένοι, long-runners) strive for perishing chalices (ποτήριον ἐκείνου). See Run-

On the subject here treated of, see West's Odes of Pindar, 2d ed.; Potter's Antiquities of Greece, bk. ii, ch. xx-xvi; and Adam's Roman Antiquities, p. 224-234. By far the best work, however, is Krause's Die Gym-
nenkunst und das Wettkampfleben in Griechenland und Römern (Leipzig, 1897). See also Nagel, Die Pythionen, Nemeien and Isthmien (Leipzig, 1841).

Gamm'dim (Heb. גַּמְדִּים, Gāmdīm; Sept. φίλαικας, Vulg. Pugmæri, A.V. "Gammadim") is the name of a class of men mentioned in Ezek. xxvii, 11, as defenders of the towers of Tyre in connection with the mercenaries from Arad. See Tyre. A variety of explanations of the term have been offered.

(1.) Some (e.g. Forster, Dict. Ebr. Nos. s. v.) suppose a connection with צִדְקָה, go'med, a cubit, q. d. cubi-
hig mens, whence the Vulg. has pignemies (so Rahil, Kim-
chi, and others). Michaelis (Supplement, p. 326) thinks that the apparent height alone is referred to, with the intention of conveying an idea of the great height of the towers (Hebr. הַצִּדְקָה, Ezk. xxvii, 17, 19). He, in De Lecce, explains it as small images of the tutelar gods, like the Lares of the Romans (see also his Dei agr. de Gammadim, in Ugolini Theaurus, xxiii, 18). This view seems to be refuted by Antingth, Disserat. de subiecta τῶν τιμίων per Fumano interpretatione (Vitenum, 1710).

(2.) Others (e.g. Pfeiffer, Bib. Zeits. p. 768; Ludolf, Comment. hist. Theb. p. 273, 274) treat it as a geographical or local term; Grotius holds Gam'dim to be a He-
braized form (בִּינְמוֹ for δίαν) of the name Anemos, a Phoenician town; the Chaldean paraphrase has Cappa-
docianae, as though reading בָּנָם (Fuller, Miscellaneous, p. 688) identifies them as the inhabitants of Gamdo (Plin. v, 14); and again the word has been broken up into בָּנָם = also the Medes. Rosenmüller (Schol. ad loc.) thinks it is the name of some obscure Phoenician town, not elsewhere mentioned. But these etymologies are equally without foundation (see Harduin, ad loc.; Reland, Polyaes, p. 794).

(3.) Most later interpreters give a more general military sense to the word. Gesenius (Theaurus, p. 299) connects it with בָּנָם, a bough, whence the sense of brave warriors. Lee renders short-swordsmen, from the same Arabic root. Havernick (ad loc.) understands
It is considered sacred by many Hindus, and is a site of pilgrimage. The river is also significant in Buddhist and Jain traditions. Its banks are adorned with temples and shrines, and the river itself is revered in various ways. The Ganges flows through the states of Uttarakhand, Bihar, West Bengal, and Jharkhand, before emptying into the Bay of Bengal.

The Ganges is also a crucial source of water for agriculture in the region, supporting a large number of farming communities. The river is also important for fishing, and many species of fish can be found in its waters.

The Ganges is not only a river of water and life but also a river of rituals, beliefs, and practices. Its banks are dotted with ghats, where people perform various rituals and ceremonies. The river is also significant in the Hindu calendar, with several festivals and events celebrated along its banks.

In conclusion, the Ganges is a river that is as significant in its physical manifestation as it is in the spiritual and cultural life of the people who live along its banks. Its presence is a source of life, prosperity, and devotion, and it continues to inspire and revered by many generations.
after a hundred years' severe austerities, Bhrigu, the saint, became favorable to his wishes, and granted him posterity. Kesini bore him a son, who was named Asanmanja, and Sumati brought forth a gourd, whose sprouts were born, who in time became as many heroes as the stars. Asanmanja, however, in growing up, was addicted to cruel practices, and was therefore banished by his father from the kingdom. His son was Anasumata, who thus became heir to the throne of Ayodya. Now it happened that Sagara resolved to perform a great and glorious sacrifice; and, in accordance with the sacred law, chose for this purpose a beautiful horse, which he confided to the care of Anasumata. But while the latter was engaged in the initiatory rites of the sacrifice, a huge serpent emerged from the soil, and carried off sixty thousand of the sacred horses. The省级 regions of Sagaras's empire were alarmed, and sent word to the king that the sacrifice was in danger. Anasumata, being informed of the obstruction which had fallen upon his undertaking, ordered his sixty thousand sacrificial horses to return the horse from the subterranean robber. These then set to work, digging the earth, and striking terror into all creation. Having explored, for many years, the infernal regions, they at last found his lost horse, the sacred horse grazing, and watched by a fiery saint, in whom they recognised the serpent, the cause of their troubles. Enraged, they attacked him; but the saint, who was no other being than Vishnu, at once reduced them to ashes. Waiting in vain for the return of his sixty thousand horses, the king of Sumati, in search of them and the sacred horse, Anasumata went, and soon ascertained the fate of his relatives; but when—mindful of his duties—he wished to sprinkle consecrated water on their ashes, so as to enable their souls to ascend to the realms of heaven, the sacrifice of the sixty thousand horses was performed, and the sacred sacrifice being achieved, Sagara strove to cause the descent of the Gangâ, but all his devices remained fruitless; and, after thirty thousand years, he went to heaven. Nor was Anasumata more successful in his attempt with the austerities he performed for the same purpose, nor his son Dwijip, who, obeying the law of time, after thirty thousand years, went to the heaven of Indra. Dwijip had obtained a son, named Bhagiratha. He, too, was eager to obtain the descent of the Gangâ; and having completed a course of severe austerities, he obtained the favor of Brahman, who told him he must yield to his father. At this answer, Bhagiratha provided that Siva consented to receive the sacred river on his head, as the earth would be too feeble to bear its fall when coming from heaven. And now Bhagiratha recommended his penance, until Siva consented, and told the Gangâ to descend from heaven. The river obeyed; but, enraged at his command, he assumed a form of immense size, and increased his celerity, thinking thus to carry him off to the infernal regions. Yet the god, becoming aware of her intentions, caught and entangled her in his matted hair, out of which she could find no means of extricating herself, though lingering there for many years. Nor would she have been released had not Bhagiratha, by his renewed penance, appeased the god, who then allowed her to descend from his head in seven streams—Hâdin, Pîlvin, and Nalini, which went eastwards; and Sêth, Suchakshu, and Sindsu, which went westwards, which were four. Bhagiratha then followed Bhishma wherever he proceeded. But it so happened that the king, on his journey, passed by the hermitage of an irascible saint, whose name was Jahnâ. The latter, seeing the Gangâ foaming in her arrogance the precursors of his sacrifice, was enraged by this, and, seeing her destined to descend, became impatient, and drank up all her waters; thereupon all the gods became terrified, and promised him that, in future, the Gangâ would pay him filial respect, and become his daughter, if he would restore her again to existence. Quieted by this promise, Jahnâ then allowed her to flow out from his ear, and therefore she is still called Jahnâvi, or the daughter of Jahnâ. But, because Bhagiratha, by dint of his exertions, enabled his ancestor who now sported the name of Gangâ to ascend to heaven, Brahman allowed him to consider her as his daughter, whence she is called Bâhirâ. And she also is called the river of 'the three paths,' because her waters flow in heaven, on earth, and pestilence plagues the infernal regions. Such is the account of the Râmâyana, and its substance is repeated by the Mahâbhârata and several of the Purânas, though they differ in the names of the streams formed in her descent by the Gangâ, some (for instance, the Vishnû and Vayu-Pûrânas) restricting their number from seven to four, called the Vishnû, Siva Sîkâ, Alakanandâ, Chakshu, and Bhadrâ. A further deviation may be seen in that, while in the Râmâyana the Gangâ springs from the Himavat (Himalaya), whose daughter she is, the Vishnû-Pûrânas assign her source to the naiì of the great toe of Vishnu's left foot, and allow Siva to have merely to receive her thereon. The following passage from this Purânâ will show the ideas on the history and the properties of this river: From that third region of the atmosphere, or seat of Vishnu, proceed the streams that wash away all sin, the river Gangâ, embrowned with the unguents of the nymphs of the naiî of heaven, which, having first received her source in the naiî of the great toe of Vishnu's left foot, Dhrûva (Siva) reverses her, and sustains her day and night devoutly on his head, and thence the seven Vishnu practices the exercises of austerity in her waters, and having often washed in his naked body, the orb of the moon, encompassed by her accumulated current, derives augmented lustre from her contact. This applies to the heavenly Gangâs. Falling from on high, as she issues from the moon she alights on the summit of Meru, and thence flows to the four quarters of the earth, and is purifying with her movement the Sagaras, the Vahusâla, and Bhadrâ, are four branches of but one river, divided according to the regions towards which it proceeds. The branch that is known as Alakanandâ was born affectionately by Siva upon his head for more than a hundred years, and was the river which raised to heaven the sinful Sêth, by his desire to receive the river. The offences of any man who bathes in this river are immediately expiated, and unprecedented virtue is engendered. Its waters, offered by sons to their ancestors in faith for three years, yield to the latter rarely attainable wealth and decoration. As respects the orders, who offer sacrifice in this river to the lord of sacrifice, Punnottama, obtain whatever they desire, either here or in heaven. Saints who are purified from all evil by bathing in its waters, and whose minds are intent on Kesava (Vishnu), acquire thereby final liberation. This sacred stream, heard of, desired, ten, touched, bathed in, or hymned day by day, sanctifies all beings; and those who, even at a distance of a hundred leagues, exclaim "Gangâ, Gangâ," atone for the sins committed during three previous lives' (Chambers, e. v.).

The Ceremonies. — The following is taken from Ward's Hinduism: "Crowds of people assemble from the different towns and villages near the river, especially at the most sacred places of the river, bringing their offerings of fruit, rice, flowers, cloth, sweetmeats, etc., and hang bundles of rushes to the branches of the river, even where it is very wide. After the people have bathed, the officiating Brahman ascends the banks of the river with them; and, after repeating religious texts, places before him a jar of water, and, sitting with his face to the north or east, performs the various rites in that order. After this, the Brahman performs other ceremonies; then the worship of the five gods, of the nine planets, of the regions of the ten quarters, etc. To this succeeds meditation. The priest next presents the offerings, which may be
teaching the Hindus almost universally throw into the river the bodies of those who had died at some distance from its banks, and by the first of these there is no burnt. Some part of the body, generally the part surrounding the navel, is thrown into the river. Those who are too poor to burn their dead bodies are sprinkled with the ashes of the funeral fire, and the sick and dying is as follows. When the patient seems to be beyond recovery, the relatives make preparations to ‘give him to Gangā.’ This is a stronger duty than seeking his recovery. ‘Life and death are in the hands of God, but the carrying of the sick to the river of its own free will is our duty.’ A coffin is procured, called the khal, for the dead, a number of torches if it be night, and notice is given throughout the neighborhood. On the way the attendants repeat loudly the names of the gods and goddesses. At the ghāt they lay him close to the water, and cause him to say that he has come to see the Mother Gangā. He is laid in a miserably hut, amid dirt and nuisance, and multitudes of dying sickness, whose shrieks and groans fill the air. A few minutes before his death he is again brought down on the bank of the river, hailed, and the corpse is set up in domestic temples and worshipped, and the next day thrown into the river. In some places clay images of this goddess are preserved in clay temples, and worshipped daily. Persons escaping dangers on water present offerings to Gangā, as well as to Varoṇa, the god of the waves, and also invoke the benevolence of the gods who protect the dangers of the sea, used to offer a sacrifice to Venus. On the thirteenth of the decrease of the moon in Chōtra, the people descend into the water, and, with their hands joined, immerse themselves, after which the officiating Brahman reads a portion of the Shastras, describing the benefits arising from this act of bathing. The people repeat after the priest certain significant words, as the day of the month, the name of Vishnu, etc., and then immerse themselves again. Gifts of rice, fruits, and money are offered to the poor, the Brahman, and the priests. On this occasion groups of ten or twelve persons stand in the water in one spot, for whom one Brahman reads the formulas. These groups are to be seen extending themselves very far along the river. At the moment of the conjunction of the moon (on the thirteenth of its decrease) with the sun, the river bursts into its banks and overflows the banks and Va- roṇa. The merit arising from bathing at this lucky moment is supposed to be very great. The people fast till the bathing is over. When there is a conjunction as above, and the day falls on Saturday, the fast is called the Great Vasara. The exposure of sick and dying on the banks of the Gangā is of uncertain date. The following summary is from the Cālcuttā Review, No. xx, vol. x, 1848: ‘The Karma Purāṇa says, ‘Those that consciously die on the banks of the Gangā shall be absorbed into the essence of Brahmā; and those who die unconsciously shall surely go to heaven of Brahmā.’ The Agni Purāṇa says, ‘Those who die when half their body is immersed in Gangā water, shall be happy thousands of ages, and resemble Brahmā.’ In the Śvetāśvatā Purāṇa, Shiva says, ‘To him who dies in Gangā I give him the sky.’ There are many traditionary stories concerning Gangā believed by the majority of Hindus. The following is a specimen:

‘On the banks of the Bhagirathi there grew a stately banana-tree, in whose ample folds a paddy-bird has constantly nested. One day the tree was torn up by the roots by the violence of a storm. The bird was destroyed, and its bones buried in the deep channel of the Gangā. The paddy-bird, in the next transmigration, was taken up into heaven simply because her bones had accidentally been deposited in the river. After that she became one of Indra’s queens in his heaven.’ In consequence of this sort of
Gap (gap), pe'ret, a breach, as elsewhere rendered, a rent or opening in a wall (Exek. xxii. 3; comp. Amos iv, 3). The Jewish false prophets did not stand in the gap (Exek. xxiii. 30); they did nothing upon the course of wickedness which opened a door for the vengeance of God to break in upon their nation. See PEREZ.

Gar (GER, Vulg. Sura), a man whose "sons" are named in the Apocalypse among the "sons of the servants of Solomon" (1 Esdr. v, 84). They are not in the lists of Ezra and Nehemiah any names corresponding to the two preceding and the six succeeding this name.

Garasse, FRANÇOIS, a French Jesuit, was born at Angoulême in 1556. In 1600 he entered the society, and after teaching for a while took the vows in 1618. He subsequently wrote books of controversy (mostly under false names, and of which he repeatedly denied being the author). Their sarcastic tone, violent outburst of passion, and wholesale abuse of all whom he considered as enemies of his order, provoked the censure of Roman Catholics themselves. The expressions foul, cot, ass, etc., abound in his writings against the Protestants. The expressions Modernes, effectuantes, tumultuantes, supra modum amabilis, applied to him by the historian of his order, will always appear to any one acquainted with his works as a bitter jest rather than a compliment. When the plague broke out at Poitiers, where he had been exiled by his superiors for writing a Somme theologique (1625, fol.), which was condemned by the Sorbonne, he asked permission to devote himself to the care of the sick, and fell a victim to his devotion June 14, 1631. Among his other works we notice Exercice Colossalius (1615, 4to), under the name of Andrew Scipolius:—Oraison funèbre d'André de Némond (1666)—Le Rabelais réformé par les ministres (1619, 2mo), a violent attack against Protestant ministers and society. The place of the Recherches d'Etienne Pasquier (1652, 8vo), the full title of which assures a good example of Garasse's style: "Inscribed to Etienne Pasquier, wherever he may be; for never having been able to recognise your religion, I do not know the way and route you have taken on leaving this life, and therefore I am obliged to write you to hazard, and to address this bundle, wherever you may be . . . . " etc. See Niceron, Mém. moires, vol. xxxii; Bayle, Dictionnaire; Alemagne, Bib. th. Scritor. Soc. Jesu; Hoefer, Nouv. Bk. Générale, xiii, 426; Mém. du Père Garasse, de la Société de Jésus, publ. by C. Niesse, Paris, 1841, 1860, etc.

Garcia, D. Francisco, a Portuguese Jesuit, joined the order at the age of eighteen, and went to the East Indies with fifty-eight other Jesuit missionaries. He resided successively at Goa and Cochin, and was appointed coadjutor of the archbishop of the mountain region inhabited by the Christians of St. Thomas (q. v.). The archbishop dying in 1641, Garcia succeeded him, and exerted great influence over the people by his knowledge of the native dialects. He had many disputes with the Christians of St. Thomas. He died Sept. 3, 1655. He left a MS. entitled Recit dos sectarios da India, in which he relates the subjects written in the language of the Christians de Serra, which is said to contain valuable information on the tribes of the East.—Hoefer, Nouv. Biog. Général, xiii, 461.

Garcia or Garzia, Gregorio, a Spanish missionary, was born at Cazor, Andalusia, about the latter half of the 16th century. He died in 1634. He was the first of his name to attain to the title of the Indians of the New World. He published many theological works in Portuguese, Spanish, Italian, and Latin, and died in 1634. He was the first of his name to obtain the title of the Indians of the New World. He published many theological works in Portuguese, Spanish, Italian, and Latin, and died in 1634.
work contains a great deal of information which has been made use of by subsequent historians. The author's theory is that America was successively settled by emigration from diverse races coming from other parts of the world. He thus attempts to uphold the text of Scripture, which gives but three sons to Noah, one of whom populated Europe, the second Asia, and the third Africa; and argues in favor of this opinion on the ground that, before the arrival of the Spaniards, the Mexicans possessed the tradition of the creation of the world, the flood, the confusion of tongues, and the dispersal of nations, as is proved by some sculptures he saw which represented these various events in a symbolic manner. He also wrote Predicaciones del Evangelio en el Nuevo Mundo viviendo los Apóstoles (Baeza, 1625, 8vo.), in which he attempts to prove that it is impossible that any of the immediate disciples of Christ ever went to preach the Christian faith to America.—Hoefer, Neue. Biog. Generale, xix, 406 sq.; see also Echard, Scriptores Ordinis Praedicatorum, ii, 437; Nicolas Antonio, Bibliotheca Nova Hispanica, i, 544.

Garden (γαρδήν, γαρδῆν, γαρδόν, αμπαράδεστος, N. T. εἰρήνος.) See FIELD; ORCHARD, etc.

1. Several gardens are mentioned in the Scriptures as the garden of Eden (Gen. ii, 8, 9, 10, 15), Ahab's garden of herbs (1 Kings xxv. 2), the royal garden near the fortress of Zion (2 Kings xxvii, 18; xxxv. 4), the royal garden of the Persian kings at Susa (Esther i. 5; vii. 7, 8), the garden of Joseph of Arimathea (John xix. 41), and the garden of Gethsemane (John xviii. 1). It is clear, from Josh. v. 2, and Lam. ii. 6, that gardens were generally hedged or walled, as indeed Josephus expressly states respecting the gardens near Jerusalem (War, v. 7). In Neh. ii. 5, and John xxv. 15, gardeners and keepers of gardens by occupation are indicated. See GARDENER.

The traditional gardens and pools of Solomon, supposed to be alluded to in Eccl. ii. 5, 6, are shown in the wady Urtas (i.e. Hortus), about an hour and a quarter to the south of Bethlehem (compare Josephus, Ant. viii. 7, 8). The Arabs perpetuate the tradition in the name of a neighboring hill, which they call "Jabel-el-Fureidis," or "Mountain of the Paradise" (Stanley, Sin. and Pal. p. 160). Maundrell is sceptical on the subject of the gardens (Early Trav. in Pal. p. 457), but they find a champion in Van de Velde, who asserts that they were not confined to the wady Urtas; the hill-slopes to the left and right also, with their heights and hollows, must have been covered with trees and plants, as is shown by the names they still bear, as peach-hill, 'nut-vale,' 'fig-vale,' etc. (Syria and Pal. ii, 27).

See Solomon's Pool.

The "king's garden," mentioned in 2 Kings xxv. 4; Neh. iii. 15; Jer. xxxix. 4; iii. 7, was near the Pool of Siloam, at the mouth of the Tyropoeon, north of Sir Eyub, and was formed by the meeting of the valleys of Jehoshaphat and Ben-Hinnom (Wilson, Lands of the Bible, i, 498). Josephus places the scene of the feast of Adonijah at Enrogel, "beside the fountain that is in the royal paradise" (Ant. vii. 14, 4; comp. also ix, 10, 4). See KING'S DANE.

Strabo (xvi, 763), alluding to one of the rose-gardens near Jericho, calls ἤ τον βασιλείου παραδρέα. The rose-garden in Jerusalem, mentioned in the Mishna (Maaseroth, ii, 5), and said to have been situated westward of the Temple mount, is remarkable as having been one of the few gardens which, from the time of the prophets, existed within the city walls (Lightfoot, Hor. Hebr. on Matt. xxvi. 56). They were usually planted without the gates, according to the gloss quoted by Lightfoot, on account of the sweet smell arising from the weeds thrown out from them, or from the manure employed in their cultivation. See ROSE.

The gate Gennath, mentioned by Josephus (War, v, 4, 2), is supposed to have derived its name from the rose-garden already mentioned, or from the fact of its leading to the gardens without the city. It was near the garden-ground by the Gate of the Women that Titus...
was surprised by the Jews while reconnoitering the city. The trench by which it was surrounded cut off his retreat (Joseph. War, v, 2). See GEMATH.

But of all the gardens of Palestine none is possessed of associations more sacred and imperishable than the garden of Gethsemane, beside the oil-presses on the slopes of Olivet. Eight aged olive-trees mark the site which tradition has connected with that memorable garden, and their gnarled stems and almost leafless branches attest an antiquity as venerable as that which is claimed for them. See GETHSEMANE.

The orange, lemon, and mulberry groves which lie around and behind Jaffa supply, perhaps, the most striking peculiarities of Oriental gardens—gardens which Maundrell describes as being "a confused miscellany of trees jumbled together, without either posts, walks, arbors, or anything of art or design, so that they seem like thickets rather than gardens" (Early Trav., to Pal. p. 416). The Persian wheels, which are kept ever working, day and night, by mules, to supply the gardens with water, leave upon the traveller's ear a most enduring impression (Lynch, Exp. to Jordan, p. 441; Siddon's Memoir, 187). The gardens near Shechem, containing orange and citron trees (Schubert, Reise, ii, 116), are described by Dr. Olies (Travels in, 350). See FOREST.

2. Gardens are frequently represented in the tombs of Thebes and other parts of Egypt, many of which are remarkable for their extent. The one here introduced is shown to have been surrounded by an embattled wall, with a canal of water passing in front of it, connected with the river. Between the canal and the wall, and parallel with them both, was a shady avenue of various trees; and about the centre was the entrance, through a lofty door, whose lintel and jambs were decorated with hieroglyphic inscriptions, containing the name of the owner of the grounds, who, in this instance, was the king himself. In the gateway were rooms for the porter, and other persons employed about the garden, and probably the receiving-room for visitors, with the dom and other trees along the whole length of the exterior wall; four tanks of water, bordered by a grass-plot, where geese were kept, and the delicate flower of the lotus was encouraged to grow, served for the irrigation of the grounds; and small knolls or summer-houses, shaded with trees, stood near the water, and overLooked beds of flowers. The spaces containing the tanks, and the adjoining portions of the garden, were each inclosed by their respective walls, and a small subdivision on either side, between the large and small tanks, seems to have been reserved for the growth of particular trees, which either required peculiar care, or bore fruit of superior quality (Wilkinson, Anc. Eg. i, 38-40, abridg.).

One interesting but much defaced representation of a similar kind has been found on the Assyrian sculptures. Gardens and orchards, with various kinds of trees, appeared to be watered with canals similar to those which once spread fertility over the plains of Babylonia, and of which the choked-up beds still remain. A man, suspended by a rope, was being lowered into the water. Upon the corner of a slab, almost destroyed, was a hanging garden, supported upon columns, whose capitals were not unlike those of the Corinthian order (Layard, Nineveh and Babylon, p. 198 sq.).

Ancient Assyrian Gardens.

8. Gardens in the East, as the Hebrew word indicates, are inclosures on the outskirts of towns, planted with various trees and shrubs. From the allusions in the Bible we learn that they were surrounded by hedges of thorn (Isa. v, 5) or walls of stone (Prov. xxi, 31). For further protection, lodges (Isa. i, 8; Lam. ii, 6) or watch-towers (Mark xii, 1) were built in them, in which sat the keeper (I Sam. xxvii, 18), to drive away the wild beasts and robbers, as is the case to this day. Layard (Nineveh and Babylon, p. 360) gives the following description of a scene which he witnessed: "The broad silver river wound through the plain, the
great ruin cast its dark shadows in the moonlight, the lights of "the lodges in the gardens of cucumbers" flickered at our feet, and the deep silence was only broken by the sharp report of a rifle fired by the watchful guards to frighten away the wild beasts that lurked in the moon-light. The scarceow also was an invention not unknown (προβασαίνον, Var. vi, 70). See LODGE.

In a climate like that of Palestine the neighborhood of water was an important consideration in selecting the site of a garden. The nomenclature of the country based this fact in the following jargon—"the fountain of gardens"—the modern Jesus (comp. Cant. iv, 15). To the old Hebrew poets a "well-watered garden," or "a tree planted by the waters," was an emblem of luxuriant fertility and material prosperity (Isa. viii, 11; Jer. xvi, 6; xxii, 12); there was no figure more graphically conveyed the idea of dreary barrenness or misery than "a garden that hath no water" (Isa. i, 30).

From a neighboring stream or cistern were supplied the channels or conduits by which the gardens were irrigated, and the water was thus conveyed to all parts (Ps. i, 5; Eccl. ii, 6; Ecclus. xiv, xvi, xx). It is a matter of doubt what is the exact meaning of the expression "to water with the foot" in Deut. xi, 10. Nebuhru (Descr. de l'Aрабie, p. 138) describes a wheel which is employed for irrigating gardens where the water is not deep, and which is worked by the men who, after the mill has been operated by these, pull the upper part towards them with their hands, and pushing with their feet upon the lower part" (Robinson, ii, 226). This mode of irrigation might be described as "watering with the foot." But the method practised by the agriculturists in Oman, as described by Wallis (Trav. in Arabia, 381), may answer to this description, and serves to illustrate Prov. xxii, 1: "After ploughing, they form the ground with a spade into small squares with ledges on either side, along which the water is conducted. . . . When one of the hollows is filled, the peasant stops the supply by turning up the earth with his foot, and thus opens a channel into another." See IRRIGATION.

4. Gardens were dedicated to various uses among the Hebrews, such as we still find prevailing in the East. One most essential difference between them and our own is that they are not attached to or in any way connected with the house, but are situated in the suburbs, sometimes from half a mile to a mile distant from the houses of the persons to whom they belong. It is manifest that all the gardens mentioned in Scripture were outside the several towns. This is to be understood of gardens, for shrubs and flowers were often planted in the open courts of the dwelling-houses. People repair to their suburban gardens to take the air, to walk, and to refresh and solace themselves in various ways. For their use there is mostly in each garden a kind of summer-house or pavilion, fitted up with much neatness, gayly painted, and furnished with seats, where the visitants may sit and enjoy themselves. Here sometimes banquets were and are still given, attended by singing and music (Isa. ii, 3; Ecclus. v, 3). See GARDEN-HOUSE.

The kings and nobles had their country houses surrounded by gardens (1 Kings v. xi, 1; 2 Kings ix, 27), and these were used on festivals (Cant. v, 13). So intimately, indeed, were gardens associated with festivity, that horticulture and conviviality are, in the Talmud, denoted by the same term (Buxtorf, Lex. Talm. s. v. בָּהֵרָה). It is possible, however, that this may be a merely accidental coincidence. The garden of Ahasuerus was in a court of the palace (Esth. i, 5), adjoining that of the king, which was the vast expanse of the court of the city, which is in Josephus, the gardens and orchards were inclosed by the city walls (Layard, Nis. ii, 246). Attached to the house of Joash was a garden or orchard (S. 4)—"a garden inclosed" (Cant. iv, 12)—provided with baths and other appliances of luxury (S. 15; comp. 2 Sam. xi, 2). See PALACE.

It would seem that the Jews were much in the habit of performing their devotions in gardens, on account of their love of flowers, fruits, and flowers. Ilan (Jews, iv, 36; xxvi, 36; John ii, 48; xvii, 1, 2). This interesting practice, however, was idly miraculous; and the worship of idols in these study seclusions was not of frequent occurrence, and is often mentioned in Scripture (1 Kings xiv, 23; 2 Kings xiv, 4; xvii, 10; 2 Chron. xv, 17; xxix, 3; iv, 22; Matt. xxiii, 25; John vii, 14; Jer. ii, 20; iil, 6; Ezek. xx, 28). See GROVE.

The custom of burying the dead in gardens is indicated in Gen. xxiii, 19, 20; 2 Kings xi, 21, 22; 1 Sam. xxv., 11; Mark xv, 46; John xix, 41, and still occurs in Egypt in the East, but is not very prevalent. We find it also among the Greeks (Hellenodorus, Ethip. t. 2, p. 55), and the Romans (Suétionius, Gaius, 20). See GRAVE.

5. Gardens were planted not only with fragrant and beautiful plants (Cant. vi, 2; iv, 16), but with various fruits and berries and other greens (Gen. ii, 5; Exod. xxii, 11; Jer. xxix, 5; Amos ix, 14). Thus we find mention of nut-gardens (Cant. vi, 11, 14), pomegranate-gardens (Cant. iv, 13), olive-gardens (Deut. viii, 8; 1 Chron. xxvii, 28), vine-gardens (Cant. iv, 2; viii, 8). Here, however, we are not to suppose that these were ever cultivated for these fruits, but that they were severally predominant in the gardens to which they gave the name. The distinction, for instance, between a vine-garden and a vineyard would be that, in the latter, the vine was cultivated solely for use, whereas in the former it was planted for ornamental, to cover walls, and to be trained in arbors and on trellises. The quince, medlar, citrus, almond, and service trees are among those enumerated in the Mishna as cultivated in Palestine (Kilaim, i, 4). Gardens of herbs, or kitchen-gardens, are mentioned in Deut. xi, 8; 2 Kings xxix, 23; 2 Chronicles xxxvi, 1 (Isa. i, 8; 8, 17; Dan. vi, 9), and probably also melons, leeks, onions, and garlic, which are spoken of (Num. xi, 5) as the productions of a neighboring country. In addition to these, the lettuce, mustard-plant (Luke xiii, 19), coriander, endive, one of the bitter herbs eaten with the paschal lamb, and rue, are particularly in the precepts of the Mishna, though it is not certain that they were all, strictly speaking, cultivated in the gardens of Palestine (Kilaim, i, 8). It is well known that, in the time of the Romans, the art of gardening was carried to great perfection in Syria, Egypt, and Syria, and was practised pell-mell elaborately, and again (xii, 54) he describes the balsam plant as growing in Judaea alone, and there only in two royal gardens. It is evident that the gardens of the Hebrews were in a very considerable degree devoted to the culture of medicinal herbs, the preparation of which in various ways was a matter of much solicitude with them (Jer. viii, 22). This is still the case in the East, where vegetable simples are employed in medicine. See MEDICINE. In addition to the ordinary productions of the country, we are tempted to infer from Isa. xlix, 10, that in some gardens some use was bestowed in the rearing of exotics. To this conclusion the description of the gardens of Solomon in the Targum on Eccl. ii, 5, 6 seems to point. "I made me well-watered gardens and paradies, and sowed there all kinds of plants, some for use of eating, and some for use of oil, and for use of spices of medicine; all kinds of plants of spices. I planted in them trees of emptiness (i. e. not fruit-bearing), and all trees of spices which the spectres and demons brought me from India, and every tree which produces fruit; and its borders was from Babylon, the waters of Siloah. I chose reservoirs of water, which, behold! are for watering the trees and the plants, and I made me fish-ponds of water, some of them also for the plantation which rears the trees to water it." In
large gardens the orchard ( WATER, καρποθείον) was probably, as in Egypt, the inclosure set apart for the cultivation of date and sycamore trees, and trees of various kinds (Cant. iv. 13; Eccles. ii. 5). Schroeder, in the preface to his Thesaurus Linguæ Armenicæ, asserts that the word 'parde' is of Armenian origin, and denotes a garden near a house, planted with herbs, trees, and flowers. It is applied by Diodorus Siculus (ii, 10) and Berosus (quoted by Josephus, Ant. x, 2, 1) to the famous hanging gardens of Babylon. Xenophon (Anab. i, 3, 7) describes the "parde" at Seleucia in Phrygia, where Cyrus had a palace, as a large preserve full of wild beasts; and Aulus Gellius (ii, 20) gives "perioche" as the equivalent of καρποθείον (comp. Philostratus, Vit. Apol. Temn. i. 88). The officer in charge of such a domain was called "the keeper of the paradise" (Neh. ii. 8). See PARADISE.

The law against the propagation of mixed species (Lev. xix, 19; Deut. xxii, 9, 11) gave rise to numerous enactments in the Mishna to insure its observance. The portions of the field or garden, in which the various plants were sown, were separated by light fences of reed, ten palms in height, the distance between the reeds being not more than three palms, so that a kid could not enter (Kia'it, iv, 3, 4). See DIVANAH.

See Schröder, De Hortis Hierosol. (Marburg, 1729); Bradley, Descript. acconum. et hortic. vett. (Lond. 1725); Van Goens, De cyprisq. (Utr. 1783). See AGRICULTURE.

GARDENER (γυναικός), a class of women alluded to in Job xxi, 18, and mentioned in John xx. 15; but how far the art of gardening was carried among the Hebrews we have few means of ascertaining. That they were acquainted with the process of grafting is evident from Rom. xi, 17, 24, as well as from the minute prohibitions of the Mishna; and the method of propagating plants by layers or cuttings was not unknown (Isa. xlii, 10). Buxtorf says that לארין, artin (Mishna, Bikkurim, i, 9) or, rather, לארין לבר, were gardeners who tended and looked after gardens on consideration of receiving some portion of the fruit (Lez. Talm. s. v.); but that gardening was a special means of livelihood is clear from a proverb which contains a warning against rash speculations: "Who hires a garden eats the birds; who hires gardens, him the birds eat" (Dukes, Robin. Blumenl. p. 141). See GARDEN.

GARDEN-HOUSE is the rendering of the A. V. at 2 Kings ix, 27, of הים יבש; where, however, a place is rather denoted. See BETHT-HAGAN.

GARDNER are usual in the East, especially among the guns of kings and wealthy persons. In Cant. iv. 16, the bride, looking out from her boudoir into the gayly-planted court-yard, acknowledges the taste and affection of her beloved as she spies the summer-house, all shaded with verdure, and containing the dicas (இத்து), that invited to the luxurious repose of which Orientals are so fond. See GARDEN.

Gardiner, James, Colonel, son of captain Patrick Gardiner, of the British service, was born at Car- riden, Lintilboghshire, Scotland, Jan. 11, 1688, and at fourteen became ensign in a Scotch regiment in the Dutch service. In 1702 he obtained a commission in the English army, and was severely wounded at the battle of Ramilies in 1706. In several other battles he gave distinguished proofs of capacity and courage. His last campaign was one of his most successful adventures in gallantry, gained for him among his disolute companions the distinction of the "happy rake." But he was not happy. Passages of the Bible which were still imprinted on his memory, and the thought of his mother's pious character and early instructions, often were of little moment to him in war; and at one time, while entertaining a party of profi- gate young men by his licentious wit, he felt so degraded in his own estimation, and so inwardly wretched that a dog lying at his feet, the wish involuntarily rose in his breast, "Would I were as happy as that dog!"

1771 he became the subject of profound religious impressions. The circumstances, as narrated by Dr. Doddridge, contain much that is marvellous, if not supernatural. "Doddridge himself hints at the possibility of the whole being a dream instead of a visible representation of the Lord Jesus Christ upon the cross, surrounded on all sides with a glory," etc. He also mentions that Gardiner "did not seem very confident" whether the voice which came to him was really an audible voice, or only a strong impression on his mind equally striking. Considerable doubt has recently been cast on the whole story by the publica- tion of the Autobiography of Dr. Alexander Carlyle, edited by John Hill Burton (Edinb., Blackwood and Sons, 1869), in which Carlyle denies altogether the truth of Doddridge's version of the story, at least of the supernatural portion of it. The attendant circum- stances, however, are of little moment in one or another; the great fact is the conversion of the brave but wicked soldier into a pious and excellent Christian, and regarding this there has never been any doubt. In 1724 Gardiner was raised to the rank of major, and in 1726 he married lady Frances Erskine, daughter of the fourth earl of Buchan, by whom he had thirteen children, only five of whom survived him. "On his becoming the head of a family he commenced the practice of domestic worship—the presence of no guest, the intervention of no engagement, was ever allowed to interfere with its daily performance. He was also regular in attendance on public worship on the Sabbath, and established a system according to which all the servants accompanied him to church. In 1730 he became lieutenant-colonel of dragoons, and in 1748 colonel of a new regiment of dragoons. He was killed at the battle of Preston Pans in 1745. Chambers, Encyclopedia, s. v.; Doddridge, Life of Col. Gardiner; Jamieson, Religious Biography, s. v.

Gardiner, Stephen, bishop of Winchester, was born at Bury St. Edmund's, Suffolk, in 1488. He was the illegitimate son of Dr. Woodville, bishop of Salisbury, the brother of Elizabeth, queen of Edward IV. He was educated at Trinity Hall, Cambridge; and in 1520 took the degree of LL.D. Having thoroughly studied the civil and canon law, he became Wolsely's secretary, and rose to the highest posts under Henry VIII, whom he served diligently in the matter of the divorce. At first he sided with the Reformers, but, being unwilling to be second to Cranmer, he took the
Roman Catholic side during Henry's lifetime. Gardiner drew up articles accusing Henry VIII's last queen, Catharine Parr, of heresy; but the queen avoided the storm, and he fell into disgrace. At Henry's death Gardiner experienced a still greater reverse. The young king began to stress religious changes, to which Gardiner set himself in opposition. The council appointed him to the fleet. "Here he was confined until the act of general amnesty, which passed in the December after the accession of Edward, released him. As soon as he was free he went down to London, where he remained un molested; but on his return to London, on account of a certain sermon which he preached on St. Peter's day, he was seized and committed to the Tower (1546). Various conferences were held with him, and his release was promised him on condition that he express his contrition for the past, promise obedience for the future, subscribe the new settlement in religion, acknowledge the royal supremacy, and the abrogation of the six articles. With the first of these conditions alone did he absolutely refuse to comply. The terms of liberation were at last after a long and tedious delay, more difficult. The number of articles that he was called upon to subscribe was considerably increased. On his refusal to sign them his bishopric was sequestered, and he was soon afterwards deprived. For more than five years he suffered close imprisonment, and it was not until the beginning of the reign of Mary that his liberty was restored (1553). If his fall from power at the conclusion of Henry's reign had been sudden, still more sudden was the rapidity of his reinstatement. A Roman Catholic queen was on the throne, and he who had been ever the foremost of his parti and must necessarily be raised to be one of her first advisers. The chancellorship was conferred upon him. His bishopric was restored, and the conduct of affairs placed in his hands. The management of the queen's marriage-treaty was intrusted to him. He was chosen to officiate at her marriage, as he had also done at her coronation, and became her most confidential adviser. No matters, whatever they might be, could be proceeded in without his privity and concurrence; and he had his full share in the persecutions of this reign. The horrors which were not committed by his actual orders were, at all events, his work. In October, Gardiner may be said in a few words. He was a man of great ability; his general knowledge was more remarkable than his learning as a divine. He was ambitious and revengeful, and wholly unscrupulous. His first object was his own preservation and advancement, and his next the promotion of his party interest. He saw deep into the characters of those with whom he dealt, dealt with them with remarkable tact, and had an accurate foresight of affairs." (English Cyclopedia, s. v.). See Burnet, Hist. of English Reformation, passim; Hook, Eccles. Biography, v. 256; Collier, Eccles. History of Great Britain, v. 125.

Gar' coyle (Hob. Garb'), گَراَکویل, scabbly; Sept. Παπαί essay. (G) 1. A thrite (q. v.), i.e. descendant of Jethro or Jether, and one of David's thirty heroes (2 Sam. xxiii, 38; 1 Chron. x, 40). B.C. 1046. See DAVID.

2. A hill (گَراَکویل) near Jerusalem, apparently on the north-west (Jer. xxxi, 39). See Jerusalem. According to Dr. Barclay, it is "the ridge running from the north to the city in the lowest valley of West Bank, the گَراَکویل (City of the Great King, p. 76). See GATH. He thinks it may have been so called because Garb the thrite once owned it, or because it contained quarries for the seclusion of the lepers.

Gargoyles, a projecting spout, used in Gothic architecture to throw water from the gutter of a building, so as not to drop down the wall. Gargoyles have been carved into the resemblance of the human figure or of grotesque animals, real or imaginary. They are placed on cornices and on buttresses, and form salient features in many buildings of the early English and decorated styles of the Gothic architecture. (G. F. C.)

Garissaole, Antoine, a French Protestant minister, was born at Montauban in 1587. He was ordained and appointed pastor at Puylaurens in 1610. In 1620 he was sent to Montauban. In 1627, he was made professor of theology at that place. In 1645 he presided at the Synod of Charenton, and distinguished himself by his firmness in resisting demands made by the government which would have destroyed the Protestant liberties. He attacked at this synod the theory of mediate imputation as held by Placeus (q. v.). When the Protestant schools were disorganized, owing to the irregularity with which they received their subsidies, he remanied at his post, with no hope of remuneration, and by teaching all branches of theology supplied the places of his absent colleagues as well as his own. He died at Montauban July, 1651. Among his works are La voie du Salut, exposée en huit sermons (Montauban, 1637; 8vo): —Descrip. synodici Carentonensiae de imputatione primi peccati Adae explicatio et defensio (Montauban, 1648, 8vo): —Theses theologicae de religionem et cultu sine obviis (Montauban, 1648, 4to): —Dignitates elenchico ex capitis uel inter reformatos et pontificios controversiarum in acad. Montalb., habita sub praesidio Ani Garissiole et Ioanne Verderisi (Montauban, 1650, 8vo): —Cittaschea ecclesiastica in Gallia et aliis reformatis explicatio, opus a F. Cardo Coreto thomaeus et. Ab. Ant. Garissiole continuato et abutum (Genève, 1655, 4to):

Gar'sim (گِرّصیم v. r. گِرّصیم), a Grimelized form (2 Macce. v. 23; vi. 5) of Mount Gerizim (q. v.).

Garland (گَراَنل), Acts xiv, 13. See WREATH. It was customary in heathen sacrifices to adorn victims with fillets and garlands; but commentators are not agreed as to the purpose to which the "garlands" mentioned in the above passage are to be applied. As the idolaters used to put garlands on the head of their idol before they offered sacrifices, it has been thought by others that they were intended to be set on the heads of the apostles. They were generally composed of such trees or plants as were esteemed most agreeable to the god who was the immediate object of worship (see Kulnul and others, in loc.). See Rose, De στέφανοι (Jena, 1659); Schmid, De Coromio (Ips. 1701); Gerhard, id. (Jen. 1646); Schmeitzel, ed. (ib.
GARLANDS

1718) Paschallis, id. (L. B., 1671); Grece, De coronis equitum (Lips. 1670). See CROWN; WEDDING.

Garlands in the marriage service. It was usual in the early Church to crown persons contracted in marriage with garlands (Chrysostom, Hom. xx in 1 Tim.). This practice was derived from the heathen ceremonies; but, as it was deemed innocent, the Christians made no scruple to adopt it. It is still practised in the Greek Church. At funerals, however, the custom of crowning the corpse and the coffin was rejected as a vestige of idolatry (Tertullian, De Corona Militis, c. x). It was usual to strewe flowers on the grave.—Riddle, Christian Antiquities, bk. vii, ch. iii.

Garlic (גָּרָל, akum, so called from its odor; Sept. αὐκόρον, Vulg. alium, A.V. "garlick") occurs only once in Scripture, and that in the plural, Numb. xi, 5, where the Israelites are described as murmuring, among other things, for the leeks, the onions, and the garlic of Egypt. There can be no doubt of its being correctly so translated, as the same Arabic word (أَكَم) still signifies a species of garlic which is cultivated and esteemed throughout Eastern countries (Celsius Hierobot. ii, 58). Ancient authors mention that garlic was cultivated in Egypt (Pliny, xix, 82). Herodotus (ii, 125) enumerates it as one of the substances upon which a large sum (1600 talents) was spent for feeding laborers employed in building the Pyramids, although Hasselequart expresses a doubt whether it was cultivated in that country (Prosp. p. 582). The species considered to have been thus referred to is Allium Ascalonicum, which is the most common in Eastern countries, and obtains its specific name from having been brought into Europe from Ascalon (see Jac. de Vitriaco, in the Gest. Francor. iii, 1142). It is now usually known in the kitchen garden by the name of "eschalot" or "shallot." Its ranker congener is the common garlic (Allium sativum). See the Penny Cyclopaedia, s. v. Allium. Rosellini, however, thinks he has discovered it upon a painting in Beni Hassan. The Talmudists frequently mention the use of this plant among the Jews, and their fondness of it (Kidd. i, 8; vi, 10; Massek. v, 8; Terum. vii, 7; Ned. vii, 6, etc.). It formed a favorite viand with the common people among the Greeks and Romans (Pliny, xx, 28; Plutus, Mostell. i, i, 38; Horace, Ep. iii, 38; Suetonius, Vesp. 8). See BOTANY.

Garment (represented by several Heb. and Greek words) [see APPAREL; CLOTHING; DRESS; RAIMENT, VESTURE, etc.]. For a list of these garments, see Thomson, Land and Book, i, 167 sq. In 2 Kings xi, 13, it is said, "Then they hasted and took every man his garment, and put it under him on the top of the stairs, and blew with trumpets, saying, Jehu is king." Here they laid down their garments in stead of carpets. The use of carpets was common in the East in the remoter ages. The kings of Persia always walked upon carpets in their palaces. Xenophon reproaches the degenerate Persians of his time that they placed their carpets upon carpets to reduce more at their ease. The spreading of garments in the street before persons to whom it was intended to show particular honor was an ancient and very general custom. Thus the people spread their garments in the way before a dwelling (Matt. xxii, 8), when some also strewwed branches. In the Agamemnon of Aeschylus, the hypocritical Clytemnestra commands the maids to spread out carpets before her returning husband, that, on descending from his chariot, he may place his foot "on a purple-covered path." We also find this custom adopted by the Romans. When Cato of Utica left the Macedonian army, where he had become legiminary tribune, the soldiers spread their clothes in the way. The hanging out of carpets, and strewning of flowers and branches in modern times, are remnants of ancient custom. See RENDING; SEWING.

A number of sumptuous and magnificent habits was, in ancient times, regarded as an indispensable part of the treasures of a rich man. Thus the patriarch Job, speaking of the riches of the wicked, says, "Though he heap up silver as the dust, and prepare raiment as the clay" (Job xxii, 24). Joseph prided himself on these changes of raiment, but to Benjamin he gave "three hundred pieces of silver, and five changes of raiment" (Gen. xlv, 22). Naaman carried for a present to the prophet Elisha ten changes of raiment (2 Kings v, 6). In allusion to this custom, our Lord, when describing the short duration and perishing nature of earthly treasures, represents them as subject to the depredations of the moth, from which the inhabitants of the East find it exceedingly difficult to preserve their stores of garments: "Lay not up for yourselves treasures on earth, where moth and rust doth corrupt" (Matt. vi, 19). Paul, when appealing to the integrity and fidelity with which he had discharged his sacred office, mentions apparel with other treasures: he says, "I have coveted no man's gold, or silver, or apparel" (Acts xx, 23). The apostle James likewise (as do the Greek and Roman writers, when they particularize the opulence of those times) specifies gold, silver, and garments as the constituents of riches: "Go to now, ye rich men; weep and howl for your miseries that shall come upon you. Your riches are corrupted, and your garments moth-eaten" (James v, 2, 3). We find that the custom of wearing splendid dresses still exists in Palestine and the East. It appears that even Solo- mon received raiment as presents (2 Chron. ix, 24). Asiatic princes and grandees keep changes of raiment ready made, for presents to persons of distinction whom they wish particularly to honor. The simple and uniform shape of the clothes makes this custom practic- able, and accounts also for the change of one person's dress for another's, which is mentioned in sacred history. This will, perhaps, apply to the parable of the wedding garment, and to the behavior of the king, who expected to have found all his guests clad in robes of honor (Gen. xxvii, 15; Deut. xxii, 5; 1 Sam. xviii, 4; 2 Kings v, 5; 22; Matt. xxii, 11; Luke xv, 22). The "changeable suit of apparel" in Isa. iii, 22, should be properly "embroidered robes." See BANQUET, etc.

Women were forbidden to wear male garments, and the reverse derived from the garments upon carpets, to reverence the wives of patriarchs (after the Targum, ad loc.) as a proper name: the form

Allium Ascalonicum.
GARNER

like that of the associated soubrickites is pastoral, as if from a town, Gereses; but no such place is elsewhere mentioned, unless it be the Beth-Garem (ܒܝܬܓܪܐ) of the Talmud (Erbolin, fol. 19, a), and the Manual De Genere of Astori, east of Gaza, referred to by Schwarz (Palæst. p. 118) as now unknown.

Garnet is the rendering in the Auth. Vers. of the following words: סיזן, olar, a treasure, as it is usually rendered, a store or stock of goods laid up, hence the place where they are deposited (Joel i. 17; "treasury," 2 Chron. xxvii. 29; xxi. 21; Prov. xxiv. 28, see note); סזונין, a respository, a cell or store-room (Psa. xlix. 13; Proclus, a respository, a place for storing away anything, especially a granary (Matt. iii. 12; Luke iii. 17; elsewhere "barn"). See BARN.

Cisterns (q. v.) are often used for this purpose in the East (Thomson, Land and Book, ii. 262 sq.). The structures of the ancient Egyptians for the storage of grain were above ground, and of great importance in so eminently a grain-growing country. See AGRICULTURE.

Ancient Egyptians Storing Grain.

This cut shows the section of a granary, in which the grain is in the act of being transferred after it has been threshed. The clerk, seated on the heap, written down the number of the measure of corn sent to the granary, seemingly from the oral report of the man who stands on the ground with raised hands.

Garnet. See SARDUCUS.

Garnet, Henry, an English Jesuit, was born in Nottingham in 1555. He was educated as a Protestant at Winchester College; but, having turned Romanist, he travelled in Spain, and afterwards studied at Rome, and gained distinction for his skill in mathematics. He was made provincial of the Jesuits in England in 1586, and served with great astuteness and fidelity the Roman Church in that country. He was tried in 1606 for complicity in the Gunpowder Plot (q. v.), and was executed May 3. A good account of him is given in Riba, Celebrated Jesuits—Munich, Church History, book iv, cent. xvii, sec. ii, pt. i, chap. i, § 10; Hume, History of England, ch. xlv.

Garnett, John, D.D., an English divine, was born in 1677. He became fellow of Sidney College, Cambridge, and afterwards Lady Margaret's preacher. He was made bishop of Ferns in 1712, and bishop of Clonfert in 1716. He died in 1729. His principal work is A Dissertation on the Book of Job, its Nature, Argument, Age, and Author, wherein the celebrated Text, xxxiv, 25, is occasionally considered and discussed; to which are added four Sermons (London, 1749, 4to). He contends "that the book of Job is an allegorical drama, designed to represent the fall and restoration of a captive Jew, and with a view to recommend the virtue of patience. The author he supposes to have been Ezekiel, and the period of its production subsequent to the Babylonish captivity."—Orme, Bibliotheca Biblica, p. 209; Kitto, Cyclopaedia, s. v.

Garnier, Jean, a French Jesuit, was born at Paris in 1612. He joined the order in 1628, and soon displayed great talent and aptness for study and teaching. As usual, this gift was fostered by the society, and for forty years Garnier held different professorships of theology and literature. He died at Bologna, on his way to Rome, Oct. 16, 1661. His most important works are on the Pelagian controversy, his editions of Juliana Egid, episcopi libellus, notis illustrat, 1668, and also of Marci Mercatoris opera cum notis, etc. (1678, fol.). The dissertations appended to this edition are still valuable to the history of Pelagianism. In 1675 he published the Brevarium sive historia controversiarum Notioriae et Euthychiae of the archdeacon Liberatus. After his death, father Hardouin published his Supplement to the Works of Thoerichus, at the beginning of which he gives a eulogy of Garnier's labors and talents.—Feller, Dict. Biog.; Hoefler, Noua Biog. Generale, xix, 510.

Garnier, Julien, de Coenfere, an eminent Benedictine of St. Maurit, was born about 1670, and died at Paris June 9, 1725. He enjoyed great reputation for learning, and was highly esteemed both as a man and a priest. His superiors intrusted him with the preparation of a new edition of St. Basil, and the result of his labors was one of the best ever produced at St. Maurit: Sci. Patris nostri Basilii Opera (Paris, Coignard). The preface is a remarkable production. Garnier, however, was able to complete but two volumes. Marin, who continued the work after the death of Garnier, brought out the third and last in 1730. See Histoire littér. de la Congrégation de Saint-Maur, p. 470; Herzog, Real-Encyclop. iv, 662.

Garnish: עַנּוּר, ushparah", in Piel, to overlay (as usually rendered), e. g. with stones, 2 Chron. iii. 6; in a similar sense, coulours, to adorn, Rev. xxvi, 19, which is used of deckin garlands, Matt. xxi. 29, or of a furnished apartment, Matt. xii. 44; Luke xi. 23. In Job xiii. 16, the term is peculiar, עַנּוּר, ushparah", which Gesenius regards as a noun denoting brightness, with which the heavens are clothed; although Fürst, with many others, pointing ענור, regards it as a Piel form of עניר, in the sense of arch, referring to the vaulted form of the sky. See ASTRONOMY.

Garrettson, Freeborn, a distinguished pioneer preacher of the Methodist Episcopal Church, was born in Maryland August 15, 1752, was converted in 1778, and entered the Conference in the same year. In December, 1784, he was ordained elder by Dr. Coke, and volunteered as missionary to Nova Scotia. In 1788, with twelve young ministers, he opened the work of evangelizing Eastern New York and Western New England. From 1818 to his death, Sept. 26, 1827, he mostly had the relation of Conference missionary. Mr. Garrettson was a very widely-useful minister. "He was among the earliest Methodist preachers of American birth, and, being active and zealous from the commencement of his ministerial career, his life and labors are intimately connected with the rise and progress of Methodism in this country." He preached in almost all the Eastern States, from Nova Scotia to the Gulf of Mexico, and on all his appointments many souls were converted and many churches built up. Although not a man of great learning, Mr. Garrettson was a man of vigorous mind and power of speech. He was imbued with fervor and zeal; and during fifty-two years he was one of the most laborious and efficient evangelists of the age. He died greatly honored III.—24④
Country in the Light of History, delivered before the alumni of Pennsylvania College, 1861; and The Suld- den Death of Henry J. McMillan, pronounced in the Luth- eran Church, Greensburg, 1894. (M. L. S.)

Gary, George, a Methodist Episcopal minister and missionary to the Indians, was born at Middlefield, Osage Co., N. Y., Dec. 8, 1738; entered the New England Conference in 1809; in 1818 was transferred to Gen- esee Conference; in 1818 was made presiding elder; in 1825 was Conference missionary; in 1834, mission- ary to the Oneida Indians; in 1836 was transferred to Black River Conference; and in 1844 was appointed missionary superintendent of Oregon, where he re- mained four years. After his return he labored on until 1851, when his health entirely failed. He died March 28, 1855. Mr. Gary was an eminently holy and useful minister. He was six times delegate to the General Conference, and was deeply engaged in all the ecclesiastical, religious, and educational interests of the Church. He was a wise and safe counsellor, and his influence in his Conference was very great. As a preacher he was widely known for "true, persua- sive, and sanctified eloquence," which "mightily moved his hearers."—Minutes of Conferences, v. 560; Peck, Early Methodists (N. York, 1860, 12mo), p. 452; Sprague, Annals, vii, 478. (G. L. T.)

Gash'mu (Hebrew Gashe'mu), גָּשָׁמְעָה; Sept. omits, Vulg. Gassem, prob. a prolonged form (Neh. vi. 6) of the name Geziem (q. v.).

Gassendi or Gassend, Pierre, an eminent French philosopher and scholar, was born of humble parentage Dec. 24, 1586, at Champagnier, a village near Digne, in Provence. He died at Paris Oct. 24, 1655. From his earliest years he was noted for sweetness of disposition, quickness of apprehension, keenness of obser- vation, and precocity of genius. As a child he would wander in the fields on clear nights to admire the beauty of the sky, and once, on the street of a town, he would thus excite the anxieties of his family, till his habits and occupations became familiar to them. At four years of age he made sermons for the entertain- ment of his childish companions, at ten he delivered a Latin address to the bishop of his diocese, and at sixteen he had already adopted the motto of his life—aspera aude—dare to be wise. He was early sent to school, and, fortunately, fell at Digne into the hands of a teacher able to appreciate and develop his won- derful powers. His father was with difficulty induced to permit him to return to the University of Aix, along with the sons of a relative, and at that relative's expense. He was required to return after a two-years' course. At Aix he was under the care of Fesaye, a learned Minorite, who introduced him into the thorny labyrinths of philosophy. At the expiration of the appointed time Gassendi returned to the plough, but left it to teach rhetoric at the age of sixteen in the academy of Digne. At nineteen he was appointed, on the death of Fesaye, to give instructions in philosophy at the University of Aix; but he devoted himself chiefly to the study of theology, as he had se- lected that as the career for his life. In 1610, when he was simultaneously elected to the chairs of theology and philosophy, and he accepted the latter. The au- thority of Aristotle had been long declining among the learned, and, in common with many of his precur- sors and contemporaries, Gassendi regarded himself in the confutation of the peripatetic dogmas. The controversial views thus promulgated were systematized in his Exercitationum Paradoxicarum adversus Aristoteles liber septem. Before publishing the work he submitted it to the judgment of Nicholas Peiresc and the prior of Aletas. Gassendi persuaded himself to complete his design of entering the Church; and, after receiving his doctorate of divinity, was through their influence presented to a canonry at Digne. A portion of the Paradoxa was published in 1624, but the
GASSENDI

Last five books were withheld by the advice of his friends, and his labors in this direction were arrested by the discovery that the subject had been sufficiently discussed by Francesco Patrizii. These writings, petulant in character, and full of youthful cavils and supercilious objections, provoked opposition, which was not mitigated by Gassendi's manifest predilection for the opinions of Epicurus. The young philosopher had long been held to measure of the religious views of France, and had entered upon life amid the turmoil and strife of the regency of Anne of Austria, during a period when many speculative minds sought relief from controversy, and from the agitation of religious and political disturbances, in the contemplation of nature. The sect of atomic materialism had been rendered attractive by Montaigne. Ecclesiastical duties having summoned him to Paris, he profited by the occasion to augment his multifarious learning, and to form the acquaintance of the learned in the capital. It was probably at this time that he was brought into intimacy with Des Cartes, an intimacy which was interrupted and shaken by his observations on the philosophical Meditations, and by the disingenuous conduct of Des Cartes in regard to them. Gassendi was induced to accept in 1643 the professorship of mathematics in the University of France for the purpose of lecturing, in conjunction with his other studious avocations, undermind his health, and compelled him to seek its restoration by a return to his native air. During this period he gave to the world the treatise De Vapori et Specie Epicuri (Lugduni, 1647), and his edition of the Tenth Book of De Dies Lentis at Ecaterinburg (1649), with copious annotations, in which he collected and arranged the abundant literary materials which he had gathered for the illustration of the philosophy and the philosopher of the Garden. In 1653 Gassendi returned to Paris, and, after publishing the lives of Tycho Brahe, Copernicus, Purbach, Regiomontanus, and Poi- rescus, devoted himself assiduously to the completion and perfection of his scheme of speculation, though these last results of his labors did not appear till after his death in the Symmagonia Philosophica Epicurea. His health finally gave way in 1654, and, after much suffering from pulmonary disease, he died, having survived his illustrious rival Des Cartes five years.

The complete works of Gassendi were collected and published in 1658, in 6 vols. fol., by his friends Louis de Mortemart and Francois Henry, with a biography by Sorbiere preceded. The most important of these works have been already mentioned, but they were accompanied by numerous essays on various topics of mathematics, astronomy, natural history, etc. These it is unnecessary to notice, though all branches of contemporary science are treated, and this is especially the case, and happiness is identified with pleasure when pleasure ceases to be identical with happiness. Pleasure, in its vulgar sense, thus becomes at once the aim of life and the means of securing that aim; and pleasure is the goal of all human desires. No conception of happiness, of desire with duty, is totally forgotten or ignored. Thus all the vices of the Epicurean style are introduced. But it is as unscientific as it is uncharacteristic to stigmatize the philosopher instead of the philosophy for the perverseness or the perversity tendency of his doctrine. In the most defeated Epicureanism there is assuredly an intricate confusion which eventsuate in grievous error. Violence is habitually done to words, and a greater violence is done to thoughts. There is a continual paranoia and perversion—

Philosophy of Gassendi.—Neither the desire nor the design of founding a sect was entertained by Gassendi. He left no school, though he made his mark on the scientific and speculative development of Europe. He was distinguished by quickness of intellect and by an insatiable curiosity, by remarkable penetration and discrimination, by various research, and manifold accomplishment. He was enthusiastic in the discovery of new facts, eager in the discovery of new facts, eager in the discovery of new facts, eager in the discovery of new facts, eager in the discovery of new facts, eager in the exposure of erroneous error, but he had no taste for systemmongering, and was free from the weaknesses of personal ambition. He aimed rather at rejuvenating ancient knowledge than at inaugurating new fancies. The cardinal principle of Epicurus was accepted and expounded by Gassendi in such a manner as to harmonize with the simplicity, temperance, and purity of his life. The great end of human action, the crown of human aspirations; but this pleasure is the pleasure of the good man; the perfect state of the pagan; the present and eternal bliss of the Christian. It is neither to be attained nor sought by personal indulgences, nor by concession to appetite; but only by the punctilious discharge of every duty, in expectation of that serenity of a conscience at ease, which is the most abiding and the most assuring reward of virtue. Such a theory is liable to great abuses, and is certain to be ultimately abused. An easy conscience safely mistake for a conscience of ease, and happiness is identified with pleasure when pleasure ceases to be identical with happiness. Pleasure, in its vulgar sense, thus becomes at once the aim of life and the means of securing that aim; and pleasure is the goal of all human desires. No conception of happiness, of desire with duty, is totally forgotten or ignored. Thus all the vices of the Epicurean style are introduced. But it is as unscientific as it is uncharacteristic to stigmatize the philosopher instead of the philosophy for the perverseness or the perversity tendency of his doctrine. In the most defeated Epicureanism there is assuredly an intricate confusion which eventsuate in grievous error. Violence is habitually done to words, and a greater violence is done to thoughts. There is a continual paranoia and perversion— a play upon terms and upon concepts which dazzles, bewilders, and misleads; but the peripatetic thesis may be held in conjunction with the purest intentions and the most rigorous observance of moral rectitude. So it was held by Gassendi. It must be admitted that the Heclican theory is not more incompatible with a Christian philosophy. It is an elaborate subject; some of the elaborate essays, in which he repudiated and refuted the infidel tenets ascribed to Epicurus. This late defence, however consonant with the whole tenor of his own life, was inadequate to prevent unfavorable suspicions, particularly on the part of those predisposed to welcome them. Nor was his intimate association with Hobbes, La Mothe le Vayer, and other notable scien- tists of the time, calculated to inspire confidence in his orthodoxy or sincerity. The secret of Gassendi was less sincere than it was habitual, or that he ever questioned the validity of the religion which he professed. It was an age of paradox, and of promiscuous and vague, but earnest, inquiry. His early resistance to the Aristotelians may have at least his intellectual and moral, and physical scheme which was most strongly contrasted with the positions of the peripatetic school. The temper of the period, too, after long theological controversy and a century of religious war, desired the conciliation or the relegation of polemical aspersities, and the cherished dogma of mortality which had been rendered attractive by Montaigne. Gassendi was contemplated by Gassendi in their original innocence and purity, divested of the corruptions which vitiated them in their later and more familiar applications, and adorned with that chaste simplicity which won the earnest and repeated commendations of the Stoic Seneca.

...
Gassendi, Johann Joseph, a Roman Catholic priest, was born at Brans, near Pludenz, August 20, 1727, studied theology at Innsbruck and Prague, was ordained priest in 1730, and in 1758 was settled as pastor at Klosterle. After filling that station for some fifteen years he was driven from it by the cruelty and casuistical character of the phenomena commented on. There was a similar inconsequence in the physical system of Gassendi. He received from Epicurus, or, rather, from Lucretius, the doctrine of atoms, of a vacuum, and of the regular operation of natural forces; but he did not admit the indissolubility and casual insubstantiality of the primary particles, nor did he exclude the divine will and the divine intelligence from the order of creation. In his separate tenets as in his general intellectual habit, he presented a strong contrast to his more magnificent and more aims were chiefly scientific, Descartes. Positions apparently materialistic were maintained by him in conjunction with a faithful adherence to both natural and revealed religion; and he offered the strange spectacle of a sincere and preposterous Epicurean who was equally sincere as a Christian and as a natural philosopher. In one case he was on the other hand, with principles essentially idealistic, combined the postulates of the infinite tenuity and divisibility of matter, of a plement, and of the vertiginous evolution of the universe, with practical but unavowed Pyrrhonism. There was point, but there was also a perplexing contradiction in the speculations of Gassendi, and Baumer was himself possessed by the devil. Although an official person kept a continued record of his cures, in which the most extraordinary things were testified, yet it was found only too soon that Gassendi very often made persons in health play the part of those in sickness, and that the cures of real sufferers were successful only so long as their imagination remained heated by the persuasions of the conjuror" (Chambers, from Conversations, s. v.). Finally, the emperor, Joseph II, forbade his exorcism, and the archbishops Anton Peter of Prague and Hieronymus of Salzburg declared themselves against him (see Acta Eruditorum, xcvii, 331). Pope Pius VI expressed his disapprobation both of Gassendi's deeds and writings. He died in retirement April 4, 1779. Lavater (q. v.) believed in the reality of many of the cures ascribed to Gassendi, and regarded them as the result of some extraordinary power of faith. Among his works, the most remarkable are Weise, von sind und grund zu leben, und richtig und gut zu studien, etc. (Kempten, 1774; Augsburg, 1775, 8d ed.), and J. J. Gassendi's Artikel auf d. Ammerungen oder seine Gründe u. Weise u. exorcismen (Augsburg, 1774).—Harvey, P. N. (1658) and J. N. D. B. P. (19th cent.), Nouveaux Biographes, xix, 595; Storzinger, Die aufgelesenen Gassenschen Wunderkurven (1775); Sammlung von Briefen u. Aufsitzen über die Gassensche Geister-beschwörung (Halle, 1776).

Gaston, see Anthony, St., Orders of (vol. i, p. 202).

Gastrell, Francis, bishop of Chester, was born at Stapleton, near Tewkesbury, about 1689, and was educated at Westminster School and at Christ Church College, Oxford. He became preacher at Lincoln's Inn, and Boyle lecturer. In 1700 he took the degree of D.D., and in 1702 he was appointed canon of Christ Church, Oxford. In 1711 he was made chaplain to the queen, and in 1714 bishop of Chester, with permission to retain his canonry, but he resigned his prebendal at Lincoln's Inn. Though not friendly to bishop Atterbury's politics, he stood by him in Parliament when the Bill of Pains and Penalties was brought in against him, and voted against his bill. He survived that event but a few years. The great put an end to his life, Nov. 24, 1725. His most important writings are, The Certainty of Religion in General, Boyle lecture (Lond. 1697, 8vo):—The Certainty of the Christian Revelation (Lond. 1689, 8vo):—The Christian Institutions (Lond. 1717, 32mo, 8d ed.):—La Institutiones Christianae (1717, 24mo):—De Deis (Lond. 1722, 8vo):—Remarks on Clarke's Doctrine of the Trinity (Lond. 1714, 8vo,—Hook, Biog. Eccles. vol. v: Chalmers, Biog. Dictionary, s. v.7. Gataker, Charles, son of Thomas Gataker (see...
GATCH, PHILIP, a Methodist Episcopal minister, was born in Maryland March 2, 1751; was converted in 1772; entered the Philadelphia Conference as a travelling preacher in 1774; labored in New Jersey, Pennsylvania, and Maryland for some years, and in Virginia for about twenty years. He then emigrated to the Northwestern Territory in 1796, and settled near the village of Cincinnati, where, after a useful career as a citizen and minister in that new country, he died, December 28, 1835. See McLean, Sketch of Philip Gatch (Cincinnati, 1854); Minutes of Conferences, ii, 405; Sprague, Annals, vii, 60.

Gate (prop. גַּגְ, vāšār, πύλη; which are also used [spec. the Heb. word] for door [q. v.], although this latter is more properly designated by בַּֽעַ, yāqḥ, or thūch, an opening, of which בַּֽעַ, lešār, was the easier, Gr. θύρα; there also occur ἡ σύνεθες, 1 Chron. ix. 19, 21, a residue or "threshold," as usually elsewhere rendered; and the Chald. בַּֽעַ, tērā, an entrance, only in Ezra and Dan.), the entrance of the high grounds, buildings, dwelling-houses, towns, etc. (see Thomson, Land and Book, i, 29 sq.). Thus we find mentioned—

1. Gates of Cities, as of Jerusalem, its sheep-gate, fish-gate, etc. (Jer. xxxiii. 13; Neh. iii. 3; iv. 8; v. 3; of Sodom (Gen. xix. 1); of Gaza (Judges xvi. 3).

2. Gates of royal palaces (Neh. iii. 36; 8 Gates of the Temple. The temple of Ezekiel had two gates, one towards the north, the other towards the east; the latter closed (Ezek. xlv. 1, 2), the other must have been open. The gates of Solomon's Temple were very massive and costly, being overlaid with gold and silver; in the outer courts of Herod's temple, nine were covered with gold and silver, as well as the posts and lintels; but the middle one, the Beautiful Gate (Acts iii. 2), was made entirely of Corinthian brass, and was considered to surpass the others far in costliness (Joseph. War, v, 5, 3). This gate, which was so heavy as to require twenty men to close it, was unexpectedly found open on one occasion shortly before the close of the Jewish war. Joseph. War, vi, 5, 3; Ap. ii, 9).

4. Gates of prisons. In Acts xii, 10, mention is made of the iron gate of Peter's prison (xvi, 27).

7. Gates of camps (Exod. xxxi, 12; see Heb. xii, 12). The camps of the Romans generally had four gates, of which the first was called porta praetoria, the second decumanus, the third principala, the fourth quinta (Rosin, Antiq. Rom. x, 12). The camp of the Trojans is also described as having had gates (Virgil, Æn. ix, 724). The camp of the Israelites in the desert appears to have been closed by gates (Exod. xxxii, 27). We do not know of what materials the incloures and gates of the temporary camps of the Hebrews were formed. In Egyptian monuments such incloures are indicated by lines of indefinite length, with gates apparently of wicker, defended by a strong guard. In later Egyptian times, the gates of the temples seem to have

Ancient Egyptian Camp gate guarded.
been intended as places of defence, if not the principal fortifications (Wilkinson, Anc. Eg., i, 409, abridg.).

The gateways of Assyrian cities were arched or square-headed entrances in the wall, sometimes flanked by towers (Layard, Nineveh, ii, 288, 293; Nin. and Babil., p. 231; Mon. of Nin., pt. ii, pl. 49; see also Assyrian bas-reliefs in Brit. Mus. Nos. 49, 25, 26). The entrances to their own royal mansions were a simple passage between two colossal human-headed bulls or lions. See Palace.

As the gates of towns served the ancients as places of security [see Fourieration], a durable material was required for them, and accordingly we find mentioned—1. Gates of iron and brass (Psa. xlv, 16; Isa. xlv, 2; Acts xii, 10). It is probable that gates thus described were, in fact, only sheeted with plates of copper or iron (Faber, Archæol., p. 297), and it is probably in this sense that we are to interpret the hundred brazen gates ascribed to the ancient Babylon. There were described (Voyage, p. 268) describes the six gates of Jerusalem as covered with iron, which is probably still the case with the four gates now open. Other iron-cover-
ed gates are mentioned by travelers, such as some of the town gates of Algiers (Pitt's Letter, viii, 10), and of the towers of the so-called iron bridge at Antioch (Foscoche, vol. ii, pt. i., p. 172). Gates of iron are also mentioned by Heriod (Thucyd., 722), by Virgil (Æneid, i, 482; vii, 690), and by Ovid (Metamorphoses, vii, 126).

2. Gates of stone, and of pearls, are mentioned in Isa. liv, 12, and Rev. xxi, 12, which, it has justly been supposed, refer to such doors, cut out of a single slab, as are occasionally discovered in ancient countries (Shaw, p. 210; Burchhardt, Syria, p. 58, 74; Porter, Damascus, ii, 22, 192; Ray, Coll. of Trop. ii, 429). At Esmaw (Syene), in Upper Egypt, there is a granite gateway bearing the name of Alexander, the son of Alexander the Great (Wilkinson, iii, 405). The doors leading to the several chambers of the so-called "Tombs of the Kings," near Jerusalem, were each formed of a single stone seven inches thick, sculptured so as to resemble four panels: the stiles, muntins, and other parts were cut with great art, and exactly resembled those of a door made by a carpenter at the present day—the whole being completely smooth and polished, and most accurate in its proportions. The doors turned on pivots, of the same stone of which the rest of them were composed, which were inserted in corresponding sockets above and below, the lower tenon being of course short. This is one of the methods in which heavy doors of wood are now hung in the East. One of these doors was still hanging in Maundrell's time, and "did not touch its lightel by at least three inches." But all these doors are now thrown down and broken (Monceyns, p. 386; Thevenot, p. 201; Foscoche, ii, 21; Maundrell, and Mar. 29; Wilde, ii, 299; Robinson, i, 530). Similar doors are described by Dr. Clarke (Transact., pt. ii, vol. i, p. 252) in the remarkable excavated sepulchres at Telmeasus, on the southern coast of Asia Minor; and others were noticed by Irby and Mangles (Transact., p. 592) in the sepulchres near Byzas (Bithynia). These are stone doors to the houses in the Haun, beyond the Jordan (Burchhardt, p. 58); and in the north of Persia the street doors of superior houses are often composed of a single slab of a kind of slate. In the ancient sepulchre recently discovered, as described by Dr. Whitle (Narratives, iii, 343), the outer door is formed by a single slab, and moves on horizontal pivots that run into sockets cut in the pilasters at the top, in the manner of a swinging hinge. 3. Gates of wood. Of this kind were probably the gates of Gaza (Judg. xvi, 8). They had generally two valves, which, according to Faber's description (Archæol., p. 300), had sometimes smaller doors, or wickets, to afford a passage when the principal gate was closed—a fact which he applies to the illustration of Matt. vii, 13. The parts of the doorway were the threshold (υς, Judg. xix, 27; Sept. πρόπον, Vulg. limen), the side-posts (στήθος; στήθος πάντων), and the lintel (υγινός). It was on the lintel and side-posts that the blood of the Pasover lamb was sprinkled (Exod. xii, 7). It was on the lintel and side-posts that the blood of the Pasover lamb was sprinkled (Exod. xii, 7, 22). A trace of some similar practice in Assyrian worship seems to have been discovered at Nineveh (Layard, Nin., ii, 256). Gates were generally protected by some works against the surprizes of enemies (1 Chr. xxix, 4). Sometimes two gates were constructed—one behind the other, and outer one, or there were turrets on both sides (2 Sam. xlviii, 24, 33; see Faber's Archæology, p. 801). The gates of the ancients were generally secured with
strong, heavy bolts and locks of brass or iron (Deut. iii. 5; 1 Sam. xxiii. 7; 1 Kings iv. 13; 2 Chron. viii. 5; Jer. xlv. 2; xlix. 31; Psa. cxlvii. 18). This was probably done with a view to the safety of the town, and to prevent hostile inroads (Harmer's Observations, i., 188). The keys of gates, as well as of doors, were generally of wood; and there were clauses in the covenants which might be opened even with the finger put into the keyhole—from which Harmer elucidates the passage in the Song of Solomon, v. 4. The doors themselves of the larger gates mentioned in Scripture were two-leaved, plated with metal (Judg. xvi. 5; Neh. iii. 15; Psa. cxxvii. 16; Isa. xlv. 1, 2). Gates not defended by iron were of course liable to be set on fire by an enemy (Judg. ix. 52).

The gates of towns were kept open or shut according to circumstances: in time of war they were closed against the enemy (Judg. ii. 5), but they were opened when the enemy had been conquered. On festive occasions they were also thrown wide open, to which Psa. xxiv. 7 alludes. This opening of the gates, as well as closing them, was done by means of keys. That near the gates towers were often constructed, serving for defence against attacks by the enemy, may be inferred from Deut. iii. 5; 2 Sam. xviii. 24; Judg. ix. 55, comp. with 52. So Juvenal (Sat. vi. 290) puts the towers of the gates for the gates themselves. Virgil (Aen. vi. 550) represents the infernal gate as having a tower. Enemies, therefore, in seeking to enter by these gates, or to place the key in the lock, were subjected to the power of death, and to death alone. The keys of the gates were thus made as quick as possible (Deut. xviii. 52; Judg. ix. 40; 2 Sam. x. 8; xi. 33; 1 Kings viii. 57; Job vi. 4; Isa. xxvi. 7; xxviii. 6); and generally the town was conquered when its gates were occupied by the invading troops (Deut. xxviii. 57; Judg. v. 3). This observation is made also by several Greek and Roman authors (Herodian, Histori. i., 12, § 14; Virgil, Aen. ii, 802 sqq.). In or near the gates, therefore, they placed watchmen, and a sufficiently strong guard, to keep an eye on the movements of the enemy, and to defend them against attacks by the enemy. They contained chambers over the gateway, and probably also chambers or recesses at the sides for the various purposes to which they were applied (2 Sam. xviii. 24; Layard, Asia and Bab., p. 57, and note). In the Temple, Levites, and in houses of wealthier classes, and in palaces, persons were especially appointed to keep the gates (Jer. xxxiv. 4; 2 Kings xi. 9; xxvii. 18; 1 Chron. ix. 18, 19; Esth. ii. 21; אֵלַיָּהוּ, הַמִּצְלָיָהוּ; Sept., διάκονος, το χώρον του.; Vulg. portarius, junctores). In the A. V. these are frequently called "porters," a word which has now acquired a different meaning. The chief steward of the household in the palace of the shah of Persia was called chief of the guardians of the gate (Chardin, vii, 369).

We read that some portions of the law were to be written on the gates of towns, as well as on the doors of houses (Deut. vi. 9; xi. 20); and if this is to be literally understood (comp. Isa. liv. 12; Rev. xxi. 21), it receives illustration from the practice of the Moslems in painting passages of the Koran on their public and private gates (Maunder, E. T. p. 488; Lane, Mod. Eg. i. 29; Rauwolf, Travels, pt. iii., chap. 10; Ray, ii, 378). Various artificial figures and inscriptions were engraved on their gates by the Romans (Virgili, Georg. iii. 26.).

Gates are often mentioned in Scripture as places at which were held courts of justice, to administer the law and determine points in dispute: hence judges in the gate are spoken of (Deut. xvi. 18; xviii. 6; xx. 19; xxvi. 6; Josh. xx. 4; Ruth iv. 1; 2 Sam. xv. 2; xix. 4; 1 Kings xxii. 10; Job xxix. 7; Prov. xiii. 25; xxiv. 7; Lam. v. 14; Amos v. 12; Zech. viii. 16). The reason of this custom is apparent; for the gates being places of great concourse and resort, the courts held at them were of easy access to all the people; witnesses and suits to all transactions were secured (a matter of much importance in the absence or scanty use of written documents); and confidence in the integrity of the magistrate was insured by the publicity of the proceedings (comp. Polyb. xv. 31). There was within the gate a particular place, where the judges sat on chairs. The word "judge" is understood as referred to when we read that courts were held under the gates, as may be proved from 1 Kings xxii. 10; 2 Chron. xvii. 9. Apart from the holding of courts of justice, the gate served for reading the law, and for proclaiming ordinances, etc. (2 Chron. xxxii. 6; Neh. vi. 16). See We see from Prov. xxii. 28; Lam. v. 14, that the inferior magistrates held a court in the gates, as well as the superior judges (Jer. xxxvi. 10); and even kings, at least occasionally, did the same (1 Kings xxii. 10, comp. with Psa. xcvii. 5). The gates at Jerusalem served the same purpose; but for the great number of its inhabitants, many places of justice were required. Thus we find that Nehemiah (iii. 32) calls a particular gate of this city the counsel-gate, or justice-gate, which seems to have had a preference, though not exclusive, since courts must have been held in the other gates also. At the erection of the second Temple, the celebrated great Sanhedrim, indeed, assembled in the so-called concilium caesareum of the Temple; but we find that one of the Synedria of Jerusalem, consisting of twenty-three members, assembled in the east gate, leading to the court of Israel, the other in the gate leading to the Temple Mount. The same custom prevails to the present day among other Oriental nations, as in the kingdom of Morocco, where courts of justice are held in the gate of the capital town (Djoper, Theatrum penennarium, p. 9 sq.). Hence came the usage of the word "Porto" in speaking of the governor of Constantinople (Early Trac. p. 349). Respecting the Abyssinians and inhabitants of Hindostan, we are likewise assured that they employed their gates for courts of justice. Homer (Il. 1, 198 sq.) states of the Trojans that their elders assembled in the gates of the town to determine causes, and Virgil (Aen. i. 569 sq.) says the same. From Juvenal (Satir. iii. 11) it appears that with the Romans the porta Capena was used for this purpose (Graevii Thesaurus antiquit. Roman. x. 179). We may refer to J. D. Jacob's Dissert. de foro in porta, Leipzig, 1714, where the custom of holding courts in the gates of towns is explained at large. See Trial. The
Egyptian and Assyrian monuments represent the king as giving an audience, especially to prisoners, at his tent-door. In Palestinian gates were, moreover, the places where, sometimes at least, the priests delivered their sacred addresses and discourses to the people; and we find that the prophets often proclaimed their warnings and prophecies in the gates (Prov. i. 21; viii. 8; Isa. xxii. 21; Jer. xvii. 19, 20; xxvi. 10; xxxvi. 10).

Gates were also used with sacrifices, which were offered in their immediate vicinity; in which respect the hills near the gate are mentioned (2 Kings xxiii. 8). In Acts xiv. 13, the gates of Lystra are referred to, near which sacrifice was offered; in which passage Camerarius, Dodden, and Heinsohn take warning to mean the temple. The principal gate of the royal palace at Ithabban was in Chardin's time held sacred, and served as a sanctuary for criminals (Chardin, vii. 388, and petitions were presented to the sovereign at the gate. See Esth. iv. 2, and Herod. iii. 120, 140).

The gate was, further, a public place of meeting and conversation, where the people assembled in large numbers to learn the news of the day, and by various talk to while away the too tedious hours (Psa. lxxxix. 18). It was probably with this view that Lot sat under the gate of Sodom (Gen. xvii. 1). There was a higher probability than the Jewish notion that he sat there as one of the judges of the city (comp. Gen. xxv. 10, 18; xxxiv. 20; 1 Sam. iv. 18; 2 Sam. xviii. 24; see Shaw, Trav., p. 267).

Under the gates they sold various merchandise, provisions, victuals, e. g. at Samaria (2 Kings vii. 1); and for this purpose there were generally recesses in the space under them (see Herodian, vii. 6, § 6). The same is stated by Aristophanes (Egyp., 1244, ed. Dind. of the gates of the Greeks. But the commerce in the gates are almost exclusively country produce, animal or vegetable, for the supply of the city, and not manufactured goods, which are invariably sold in the bazaars in the heart of the town. The gate-markets also are only held for a few hours early in the morning. See BAZAR.

On an uproot having broken out at Jerusalem, the heads of the people met under the New-gate (Jer. xxix. 26), where they were sure to find insurgents. The town-gates were to the ancient Orientals what the coffee-houses, exchanges, markets, and courts of law are in our large towns; and such is still the case in a great measure, though the introduction of coffee-houses has in this, and other respects, caused some alteration of Eastern manners. In capital towns the quinodines occasionally sat with the same views near the gate of the royal palace, where also the officers and messengers of the palace lounged about; and where persons having suits to offer, favors to beg, or wishing to recommend themselves to favorable notice, would wait day after day, in the hope of attracting the notice of the prince or great man at his entrance or coming forth (Esth. ii. 19; civ. ii. 2).

Criminals were punished without the gates (1 Kings xxi. 12, 13; Acts vii. 59), which explains the passage in Heb. xii. 12. The same custom existed among the Romans (see Plaut. Mili. Glorios. act ii, sc. iv. 6, 7). At Rome executions took place without the Porta Metia or Esquilina. As to the gate through which Christ was crucified, it is not decided; which is more, his crucifixion opinions differ; some taking it to have been the Dung-gate (Lamy, Apparat. Geograph. ch. xiii. § 3, p. 821); others, following Hottinger (Cenn. Hebr. p. 10) and Godwyn, understand it of the Gate of Judgment. But for all that concerns the gates of Jerusalem, we must refer to the article JERUSALEM.

Gates are put figuratively for public places of towns and palaces. The gates of a town are also put instead of the town itself (Gen. xxv. 17; xxiv. 60; Judg. v. 8; Ruth iv. 10; Deut. xil. 12; Psa. lxxxvii. 2; cxvii. 2). By gates of righteousness (Psa. cxviii. 19) those of the Temple are no doubt meant. The gates of death and of hell occur in Job xxxviii. 17; Psa. ix. 14; Mic. ii. 13. Doors and gates of hell are especially introduced, Rev. xiv. 10; xvi. 18; Matt. xxv. 19; and the Jews go so far in their writings as to ascribe real gates to hell (Wagenseil, Sota, p. 220). Virgil (Aen. vi, 126) also speaks of infernal gates. The origin of this metaphorical expression is not difficult to explain; for it was very common to use the word gate as an image of large empires (Psa. xxiv. 7); and in pagan authors the abode of departed souls is represented as the residence of Pluto (see Virgil, Aen. vi, 417 sq.). In the passage, then, Matt. xvi. 19, by "gates of hell" must be understood all aggressions by the infernal empire upon the Christian Church. See CERR.

Gath (Heb. id. R,' a wine-cist, as in Isa. lixii. 2, etc. Sept. usually ΙΙΙ; Josephus ΙΙΙ' or ΙV, i., one of the five royal cities of the Philistines (Josh. xiii. 8). It was one of the cities upon which the ark is said to have brought calamity (1 Sam. vi. 9, 9), and which offered in connection therewith a treasurses-offering, each one a golden emerald (1 Sam. vi. 17). Goliath, the champion of the family of Gath (Josh. x. 12, 22), of which some fragments may be found mentioned in Scripture (1 Chron. xxii. 5-8; 2 Sam. xxi. 19-22), has rendered Gath a word familiar from our childhood; but it is not certain whether Goliath was a native or merely a resident of Gath (1 Sam. xviii. 4). To Achish, king of Gath, Saul was twice addressed for fear of David (1 Sam. xxi. 10; xxvii. 2-7; Psa. lxi.). At his own entrance David received from Achish the city of Ziklag. David dwelt in the country of the Philistines "a full year and four months." David's connection with Gath throws light on the feelings which dictated the words (2 Sam. i. 20). "Tell it the death of 'Saul and (as 'than his son') not in Gath." Micah also (i. 10) says, "Declare it (the wound come unto Judah, ver. 9) not at Gath." It was conquered by David, and fortified both by him and by Rehoboam (2 Sam. vii. 1; 1 Chron. viii. 1; 2 Chron. i. 8). From 2 Sam. xv. 18, it appears that David had a band (600 men) of Gittites in his service at the time of the rebellion of Ahab. Their devotion to him under Itai their leader forms a beautiful episode in the history of David's varied fortune (2 Sam. xv. 19 sq.). Shimhi's visit to Gath and its fate is referred to himself and his companions (1 Kin. ii. 46). In the reign of Solomon mention is made of a king of Gath (1 Kings iv. 21), who was doubtless a tributary prince, but powerful enough to cause apprehension to Solomon, as appears from the punishment he inflicted on Shime. Under Jehoshaph, Hazael, king of Syria, took Gath (2 Kings xi. 17); and from his successor, Benhadad, the place was recovered (2 Kings xiii. 24). It must, however, have soon re- volted; for Uzziah (2 Chron. xxvi. 6), finding it necessary to war against the Philistines, "broke down the wall of Gath." Presumably the conquest was not of long duration. This constant withstanding the power of Jerusalem shows that Gath was a place of great resources and high eminence—a conclusion which is confirmed by the language employed by the prophets (Amos vi. 2; Micah i. 10). The ravages of war to which Gath was subjected it is more than probable that Gath was destroyed it at a comparatively early period, as it is not mentioned among the other royal cities by the later prophets (Zeph. ii. 4; Zech. ix. 5, 6).

Gath occupied a strong position (2 Chron. xi. 6) on the border of Judah and Philistia (1 Sam. xi. 10, 1, 2 Chron. xvi. 4). It was near Shocho and Adullam (2 Chron. xii. 8), and it appears to have stood on the way leading from the former to Ekron; for when the Philistines fled on the death of Goliath, they went "by the way of Shaaraim, even unto Gath and unto Ekron" (1 Sam. xvi. 1, 52). Yet, with all these indications,
there has been great uncertainty as to the site (Nolanda, Palest. p. 788 sqq.). Josephus places it in the tribe of Dan (Ant. v. i, 32; in Ant. viii, 10, 1, he calls it Ispan, E'irav, by an error of the copyist, Reland, p. 747). The accounts of Eusebius and Jerome are confused. In the Onomast. (s. v. Ισπάν) they both say, "Gath, from which the Anakim and Philistines were not exterminated, was long seen by some traces come from Eleutheropolis to Diospolis, at about the fifth milestone." Yet in the same connection Eusebius mentions another Gath (or Ισπάν), a large village between Antipatris and Jamnia, which he considered to be that to which the ark was carried (1 Sam. v. 9); but such a Crusader-identified Gath with Jamnia (Geeta Deri, p. 886). On the other hand, Jerome says (on Micah, i), "Gath is one of the five Philistine cities lying near the confines of Judah, on the road from Eleutheropolis to Gaza; now it is a very large village." On der xxv, the same authority declares that Gath was not far from Azotus. Yet in his preface to Jonah he says that Gath, in Ophir, the native place of the prophet, is to be distinguished. Bonfôre suggests (in the Onomast. s. v.) that there were several places of the same name, and this may account for the discrepancies. Dr. Robinson sought in vain for some traces come from site (Researches, ii, 421); yet Schwarz (Palest. p. 121) says it still remains in "a village by the name of Gatha, three English miles south of Jaffa, on the shore of the Mediterranean"—a statement confirmed by no other traveler. Thomson and the Asiatic Researches and Biblical and Oriental Book, ii (1860) contends for Beth-Tibbath or Eleutheropolis as the true site; but Mr. Porter, who made a special visit to Philistia in 1857 for the purpose of discovering the spot, argues for its identification with the conspicuous hill now called Tell es-Sifka. This hill stands upon the side of the plain of Philistia, at the foot of the mountains of Judah, ten miles east of Ashdod, and about the same distance south by east of Ekron. It is irregular in form, and about 200 feet high. On the top are the foundations of an old castle; and great numbers of hewn stones are built up in the walls of the terraces that run along the declivities. On the north-east is a projecting shoulder, whose sides appear to have been scarped. Here, too, are traces of ancient buildings; and here stands the modern village, extending along the whole northern face of the hill. In the northern part of the manouchehres, and at its western extremity two columns still remain on their pedestals. Round the sides of the hill, especially on the south, are large cisterns excavated in the rock (Hand-book for Syria and Pal. p. 292). See Mizpah.

The inhabitants are called Gittites (Poss, Sept. Γιττιοι). See also Gath-Hepher; Gath-Rimmon; Morehsheth-Gath.

Gath-hepher (Heb. with the art. Gath ha-Hepher, גת היהר, wine-press of the west; Sept. Γαθηερ, Vulg. Geth gua est in Ophir), a town in Galilee, the birthplace of the prophet Jonah (2 Kings xiv, 25). It is stated by Eusebius and Jerome to have been in the tribe of Zebulun (Onomast. s. v. Γαθηερ, Gathheher). The latter (Pref. ad Jon.) speaks of it as a small place two miles from Sephoris, on the way to Tiberias, and says that the sepulchre of Jonah was shown in his day. Benjamin of Tudela, in the 12th century, says that the tomb of Jonah was still shown on a hill near Sephoris (Itinerary in Pal. p. 89). It was doubtless the same as Gittites-Hepher, situated in the east of Zebulun (Josh. xix, 13). The position corresponds well to that of el-Moshah, a village on the top of a rocky hill, in which is still shown a Muslim tomb of the prophet Jonah (Robinson, Researches, iii, 292, note; De Saulcy, Notices, ii, 818; Thomas, Land and Sea ii, 129; Schwarz, Palest. p. 89; Van de Velde, Memoir, p. 312). See Gefta.

Gath-rimmon (Heb. Gath-Rimmon, גתידרמון, press of the pomegranates; Sept. Γαθηερομών, Vulg. Gath Rhammon), a town in the tribe of Dan (Josh. xii, 45), and a Levitical city (Josh. xxi, 24; 1 Chron. vi, 69). In the time of Eusebius and Jerome it was a very large village, "twelve miles from Diospolis as you go hence to Eleutheropolis" (Onomast. s. v. Γαθηερομών; Gath Rhammon); but the same distance is towards Diospolis (s. v. Γαθ, Geth). Dr. Robinson thinks them to be one place, and that the site is found in Deir Dabbin, where are some remarkable excavations (Researches, ii, 421). In that case, however, it could not stand behind the temple, since the south wall of Gath passed at a point between the two positions. The first-mentioned distance would correspond to that of the modern site Rafa', containing wide-spread ruins (Robinson, Researches, iii, 20).

The Gath-rimmon mentioned in Josh. xxii, 35 as being in the tribe of Manasseh, Baaner (Palestina, p. 175) supposes to be another Levitical city; but Winer (Rasselworterbuch, s. v. Gath) ascribes its origin to a mistake of the transcriber, who repeated the word from the preceding verse. The Sept. has Ισπάν (v. r. Baaov), probably intended for the Israel (q. v.) of Josh. vii, 21.

Gaubil, Antoine, a Roman Catholic missionary, was born at Gaillac (Languedoc) July 14, 1689. He joined the Jesuits in 1704, and was sent to China as a missionary in 1728. He arrived in China just after the accession of the emperor Young-Tsing, who was bent on banishing the Jesuits, but the skilful management of Gaubil, most of the members of the order kept their positions. When the son of Young-Tsing, Kiang-Luong, ascended the throne in 1736, Gaubil, who had become thoroughly acquainted with the Chinese and Manchouch languages, was appointed chief director of the imperial college, as where the children of the nobility were educated. He thus managed to remain in high standing at the Chinese court until his death, which took place at Pekin July 24, 1759. He was a correspondent of the Academy of Sciences of Paris, and a member of that of St. Petersburg. He wrote Le Chou-King, trad. du Chinois (Paris, 1771, 4to; the oldest and most important historical book of the Chinese, compiled by Confucius, and giving the basis of the Chinese government and law):—Histoire de Genéchichan et de toute la dynastie des Manouches, ses successeurs, conquis du Morin, la Chine (Paris, 1790, 4to);—Traité de Chronologie chinoise (publ. by De Sacy, Paris, 1814, 4to);—Traité historique et critique de l'Astronomie chinoise;—Traité de Chronologie chinoise (Mémoires concernant les Chinois, vol. xv);—Histoire de la Dynastie des Tang (Mémoires concernant les Chinois, tols. xv and xvi);—Journées de la Voyage de Canton à Pekin (Prévost, Hist. des voyages, vol. v);—Notices et description sur la Chine, le Thibet, etc. (in Lettres édifiantes). Abel de Rémuat considers him also as the author of the Description de la ville de Pekin (Paris, 1788, 4to), published under the names of Delisle and Pingre. Abel de Rémuat, Nouvelles Mémoriges Asiatiques.—Hoefler, Nouvelle Biog. Générale, xix, 636.

Gauden, John, D.D., bishop of Worcester, was born at Mayfield, Essex, in 1605. He studied at St. John's College, Cambridge, and subsequently obtained the rectorship of Brightwell, Berkshire, and the deanery of Bocking. In 1660 he became bishop of Exeter, and was translated to Worcester in 1662, "much disappointed at missing the lucrative see of Winchester." He died in the same year. He was a man of great talents; but ambitious and avaricious. He was the publisher of king Charles I's Eikon Basilike, of which some have considered him as the
GAUDENTIUS

**GAUDENTIUS**, bishop of Breccia, succeeded Philippus in the see of Breccia in the 4th century. He was chosen while away upon his travels, and extraordinary means were used that he might be induced to assume the office. He was ordained by St. Ambrose about 367. He does not appear to have interfered in the disturbances of the times except in being one of the deputies sent to Constantinople in 404 or 405 by the bishops of the West for the reinstatement of St. Chrysostom in his see of Constantinople. When he died is unknown; some fix the date at 410, others at 427. His name is mentioned among the sermons of his are still extant, given by a preface to Benevolus, which may be found in Ebd. Muz. Patrol. vol. v.; in Migne’s *Œuvres tres complètes des ecrits des cœlus. du vi siècle* (Paris, 1849, 4to); and in Migne, *Patrologiae Latinae, vol. xx.* — Clarke, *Succ. Suec. Lit. vol. i.; Cave, Hist. Lit. i., 189; Ceillier, *Antiquit. S. Pauli, 1867, viii., 54.*

**Gaul.** See FRANCE.

**Gaulois.** See GOLAN.

Gaultier or Gautier, FRANÇOIS DE, of St. Blan- card, a Protestant writer and divine, was born in the first half of the 17th century at Gallargues, in the department of Gard, and died at Berlin in 1703. He was minister at Montpellier, and presided over the last synod of Bas-Languedoc, held at Uzes in 1681; but, having compromised his safety through his zeal for Protestant interests, he withdrew to Switzerland with his family in 1688, and afterwards to Holland. The prince of Orange esteemed him highly, and employed him in several important affairs; among others, on a confidential mission to the elector of Brandenburg, who retained Gaultier at his court, and named him his chaplain. We have from his pen a *Histoire de la rive droite* (1688), etc. (on Bossuet’s Exposition of the Catholic Doctrine, Berlin, 1685, 12mo). — *Histoire Apologetique ou defense des Églises des États reformés de France* (Amst. 1688, 2 vols. 12mo). — *Sermons* (Berlin, 1896, 8vo). — *Hoeven Nouveau* (Paris, 1694, 8vo). — *La France Protestante, s. v.* (J. W. M.)

**Guame, Jean**, a Roman Catholic theologian of France. He was a prolific writer of the strictest ultramontane school, and in 1852, while vicar general of the diocese of Nevers, kindled a great literary controversy by his pamphlet *Ver Rongeur*, in which he commended the study of the Latin and Greek classics, and advocated the substitution for them of the Church fathers in the course of classical education. The leading organ of the ultramontane party in France, the *Univers*, and several bishops, sided with Gaume; but many others declared against his views, and his own diocesan, the bishop of Nevers, censured him for the publication of the pamphlet. In consequence of this censure, Gaume resigned at the close of the year 1852. He died in 1869. Among his other numerous writings are, *Du Catilinisme dans l'éducation* (1836). — *Minuel des écrivains catholiques modernes* (5th ed. 1849). — *Le Dictionnaire des Personnages* (1838). — *Tableau de l'histoire de la religion*; *Histoire de la Société domestique* (1844). — *Credo ou refuge du Chrétiens dans les temps actuels* (Paris, 1867). (A. J. S.)

**Gaume, supposed descendants of the Parsees, still subsisting in different parts of the East. See PARSEES.**

**Gauze**, Étienne, a French Protestant theologian, was born at Nimes in the early part of the 17th century, and died at Saumur in 1675. In 1651 he was made professor of philosophy in the Protestant Academy of Saumur, and in 1655 succeeded Jouas de la Place in the chair of theology. He was really a disciple of Place that the study of philosophy was useful to the theologian, and strongly urged it upon his pupils. His works are marked by vigor and depth of thought, and enjoyed for a long time a high reputation in the Protestant Seminaries of France and Germany. The titles are, *Theses inaugurales de Verbo Dei* (Saumur, 1655); *De Consensu Gravitum cum Nature* (ib. 1659, 4to); *De Ratio Studii Theologiae*; *De Ratione Conventionis*; *De Utilitate Philosophiae ad theologiam, quibus accedunt breves scripturum de recto usu Christiani regni agrostomastica* (ib. 1670, 4to); this collection, regarded by Bayle as the best guide for the study of the theology of the time, has passed through numerous editions; — *Theses theologica, altera de natura theologica, altera de die inveni Scripturae Sacrae* (ib. 1768, 4to). — *Hoefner, Noue. Bog. Générale*, xix, 690, 691; *Haag, La France Protestant, s. v.* (J. W. M.)

**Gauze, Louis**, a Swiss divine, was born in Geneva August 17, 1816, because of his family’s loyalty to Saui- tigny, near Geneva. Here he came under the influence of pastor Cellier, who had retained his Christian fidelity and simple faith amid the general falling away of the Swiss clergy. The revival of religion in Switzerland about that time, due largely to the labors of the brothers Hanvill (q. v.), was odious to the majority of the Geneva clergy, and the *Vénérable Compagnie des Pasteurs* passed some ordinances infringing strongly upon Christian liberty. Gauze and Cellier protested against the proceeding by republishing the *Helvetic Confession of Faith*, with a preface addressing the need and utility of confessions of faith. Gauze continued to labor faithfully in Sauginy for twelve years, and his name became known throughout Switzerland as an earnest upholder of evangelical Christianity. His aim was not to divide the national Church, but to rekindle the spirit of Christian life. His energy and orthodoxy were alike displeasing to the Rationalists, and he was involved in long disputes with the *Vénérable Compagnie*. They ordered him to use the emasculated and Rationalistic Catechism which had been substituted in Geneva for Calvin’s; he refused, and was cashiered from the *lettres de Pasteur*. — *La Vénérable Compagnie et Senon au Vénérable Compagnie, etc.* (1831); and, on the other side, *Exposé des accusations entre la Compagnie et M. Gauze*, 1831. He kept on his way, and, in union with Merle (d’Aubigné) and Galland, formed the "Evangelical Society" for the distribution of Bibles, tracts, etc. The Consistory at last succeeded him, so low had orthodox Christianity sunk in Geneva, the home of Calvin. In 1846 he took the chair of theology in the newly-founded evangelical school of Geneva, where he taught a strictly orthodox doctrine, perhaps without sufficient knowledge of the condition of modern thought. In his *Théogénaisie* (1840; translated in England and America) he maintained, in its strongest form, the verbal inspiration of the Scriptures. In 1860 he published his *Canon des Écritures Saintes* (translated, *Canon of Holy Scripture*, 1862), in which he vindicated his theory of inerrancy against the attacks of Scherer and others. His *Logos sur Daniel* contained the substance of his lectures and catechetical lessons on Daniel. He died June 18, 1883.

We have translations of several of his writings besides those already mentioned, those among them being *Geneva and Rome, a d'acourse* (1844). — *It is written, Scripture proved to be from God* (1856). — *Leonna for the Young on the six Days of Creation* (1860). — *Herszog, Real-Encyklop. xix, 588.*
Gautama. See Gotama.

Gautbert, also called Astbert or Gauthbert, one of the earliest missionaries of Sweden. He was a nephew of archbishop Ebbo (q. v.), and was appointed bishop of Sweden by St. Ansgar. Accompanied by his nephew Nithard and several other priests, he set out in 884 for Sweden, and at once began to preach the Gospel. He was the first Christian church of Sweden at Birka. A large number of pagans were soon converted, and the prospects of the mission appeared to be brilliant, but the pagan priests raised a tumult against the missionaries, in which Nithard was killed, while Gautbert had a narrow escape, being chained and imprisoned with his companions across the frontier. All of them repaired to the monastery of Welenu (now Münsterdorf, in Holstein), in order to await there a favorable occasion for returning to Sweden. As, however, no new opening seemed to present itself, he accepted, in 845, the see of Osnabruick, which he administered until April 11, 880, when he resigned. He died three or four years afterwards. (A. J. S.)

Gavant, Bartolome, an Italian ecclesiastic, was born at Monza in 1569, and died in Milan in 1658. He was consultant of the Congregation of Rites and general of the Barnabites (q. v.). His most important work, Thesaurus, is the most important work on the rubrics of the Missal and the Roman Breviary, more learned than critical. The best edition of this is the one that contains the observations of Murat (Turin, 1786-90, 4 vols. fol.; another, in 2 vols. fol., was published at Venice in 1762. Gavant wrote also a destroys of the Gregorian Breviary, and a calendar of the Masses (Rome, 1629, 4to), and Musaeale Episcoporum (Paris, 1647, 4to).—Hoefcr, Now. Bicy. Gén. et Modr., x1, 735.

Gay, Ernest, a Unitarian clergyman, was born in Dedham, Mass., Aug. 15, 1846. He graduated at Harvard College in 1874, was admitted into the ministry in 1878, and installed as pastor of the church in Hingham, which position he held till his death. While quite a young man he gained a high reputation for scholarship, and he received many testimonials of public respect, both in his earlier and later days. He was opposed to all creeds and confessions of faith considered as binding, and is often mentioned as the father of American Unitarianism. He had no sympathy with the 'great revival' of 1740. His name is signed to a paper entitled 'The Sentiments and Resolutions of an Association of Ministers, convened at Westminster January 15, 1745,' in which they bear testimony against Whitefield's 'enthusiastic spirit.' In 1871 he delivered a sermon on his eighty-fifth birthday, which was published under the title of 'The Old Man's Calendar.' It has passed through several editions in this country, been reprinted in England, and translated into the Dutch language and published in Holland. He died March 8, 1877. He printed a number of occasional sermons.—Sprague, Annals, v1, 11.

Gay de Vernon, Léonard, a French priest and politician, was born at St. Léonard (Limousin) in 1748. When the French Revolution broke out he was curate of a parish near Limoges, and took part at once with the people, he was the first to place the Domine salvum fac gemen before the Domine salvum fac regem, and, in consequence, was appointed constitutional bishop of Haute-Vienne, March 13, 1791. Sent as deputy to the Legislature, he sided with Torné, metropolitan of Cler, in demanding that the clergy should be permitted to lay aside their peculiar dress. Having been re-elected to the Convention, he joined the extreme Republicans, and from the midst of "La Montagne" cast his vote for the death of Louis XVI, and caused the arrest of some of the Girondists. In the Council of Five Hundred, of which he was a member, he maintained the same opinions. The Directory, to get rid of him, appointed him, June 9, 1798, on a commercial mission to Tripoli, in Syria. He afterwards became general secretary of the Roman republic at Rome, but was deposed by Barras, and even forbidden to enter France. He nevertheless secretly came back, and remained hidden in the department of Doubs until June 18, 1799, when a change of government enabled him to obtain the repeal of the sentence of exile. About 1802 he founded a school in Paris, in connection with several other learned men, but was again exiled in consequence of the law of Jan. 12, 1816. In 1819 he finally obtained leave to return, and died at Vernon, near Ligny-le-Sec, Oct. 9, 1822. See Mabre, Annaler historique (1822, p. 99); Thiess, Hist. de la Révolution.—Hoefcr, Now. Bicy. Gén. et Modr., x1, 766.

Gayley, Samuel Maxwell, a Presbyterian minister, was born in Co. Tyrone, Ireland, June 4, 1802. He came to this country in 1828, studied in Philadelphia, and was licensed to preach in 1828. In 1832 he was installed pastor in Wilmington, Del., where he also established the Wilmington Classical School, which he conducted with great success until July 4, 1854, when his house was burnt to the ground. In Oct., 1854, he removed to Media, Pa., and established the Media Classical Institute, which he conducted successfully until his death, Dec. 13, 1862. As an educator of youth Mr. Gayley did a great work. He was most thorough and conscientious in his instructions, aiming to make solid thinkers rather than conceited coxcombs. He had more than one hundred youths under his care. They were from twenty different states, and from Canada, Cuba, Ireland, England, Mexico, Poland, Barbadoes, India.—Wilson, Presbyterian Historical Almanac, 1884.

Gaza (Heb. Azzah, 1775, strong, q. d. fortress or Valencia, or fem. of gaza, Sept. and other Greek writers Iza, sometimes confounded with Gazara [q. v.]; "Azzah" in Deut. ii, 23), a city remarkable for its early importance and continuous existence, lying along the Mediterranean sea-coast, in latitude 31° 22′, longitudinal 24° 29′ (Robinson), on the great thoroughfare between the head of the Persian Gulf and Hebron, as well as between Egypt and Palestine, of which it was indeed the frontier town (Arrian, Exp. Alex. ii, 26). It is chiefly noted as having been one of the cities of the Philistine pentarchy (Josh. xvi, 47). It is mentioned in Gen. xix, 19 as one of the border-cities of the Canaanites. Its earliest inhabitants of whom we find any mention, though probably not the aborigines, are the Arim, who appear to have lived in a semi-nomadic state, roving over the neighboring plain and desert. They were attacked and driven out by "the Caphtorim, who came forth out of Caphtor, and they dwelt in their stead" (Deut. ii, 23, with Josh. xiii, 2, 8; see Keil's note on the latter passage). The Caphtorim and Philistines were identical, or at least different families of the same tribe who afterwards amalgamated and formed the powerful nation of whom we read so much in the Bible (comp. Deut. ii, 23; Amos ix, 7; Gen. x, 14; Jer. xliv. 4). See CAPHTORIM; PHILISTINES. The time of the conquest of Gaza by the Philistines is not known. It must have been long before the time of David, as there was a city of that name already well established in the country, and possessed of great power (Gen. xxii, 32). Gaza was from the first their principal stronghold. Joshua smote the Canaanites as far as Gaza (Josh. x, 41), but spared the Anakim (giants) that dwelt there (Josh. xii, 21, 22). In the division of the land they fell to the lot of Judah (Josh. xvi, 47), and was taken by them with the coast thereof (Judg. i, 18), but its inhabitants ("Gazites," Judg. xvi, 2); "Gazathites," Josh. xiii, 8) were not exterminated (Judg. iii, 3). Gaza was one of the five Philistine cities which gathered each a golden ephod, and delivered the Lord (Sam. vi, 17). Gaza is celebrated for the exploit recorded of Samson (Judg. xvi, 1-18), who "took the doors of the gate of the city,
and the two posts, and went away with them, bar and all, and put them on his shoulders, and carried them up to the top of a hill that is before Hebron." The Philistines afterwards took Samson, and put out his eyes, and brought him to Gaza, and bound him with fetters of brass, and he was in the prison house: but he, however, pulled down the temple of Dagon, god of the Philistines, and slew, together with himself, "all the lords of the Philistines," besides men and women (Judg. xvi. 21-30). Solomon's kingdom extends as far as Gaza in Kings iv. 30. But the place always appears as a Philistine city in Scripture (Judg. iii. 8; xvi. 1; 1 Sam. vi. 17; 2 Kings xviii. 8). Hezekiah smote the Philistines as far as Gaza (2 Kings xviii. 8). Gaza fell into the hands of the Egyptians, probably Pharaoh-Necho, as a diversion of Necho's forces of 605 B.C. (2 Chron. xxxv. 20). After Necho's withdrawal from Gaza, it became Tyre it sustained a siege of two (Quint. Curt. iv. 6, 7, says five) months against Alexander the Great (Josephus, Ant. xi, 8, 4), a fact that illustrates the propriety of its name and its military importance. As Van de Velde says (p. 187), it was the key of the country. So vigorous, it was defending the eastern side of the command of the eunuch Batis, and of such massive strength were its walls, that the engineers of Alexander's army found themselves completely baffled in their attempts to effect a breach. They were obliged to erect an enormous mound 450 feet in height, and about a quarter of a mile in width, on the south side of the town; and even with this advantage, and the use also of the engines that had been employed at the siege of Tyre, thebesigers were frequently repulsed, and Alexander himself sustained no slight bodily injury. It was at last carried by escalade, and the garrison gave out to the sword. The town itself was not destroyed, but most of the inhabitants that remained were sold into slavery, and a fresh Arab population settled in their stead (Arrian, ii, 27). What had happened in the times of the Pharaohs (Jer. xviii. 1) and Cambyses (2 Kings v. 19) had now been repeated in the struggles between the Ptolemies and the Seleucide (Polybius, v. 68; xvi. 40). Jonathan Maccabaeus (1 Macc. xi, 61) destroyed its suburbs; Simon Maccabaeus (1 Macc. xiii, 43) took the city itself, though not without extraordinary efforts. Alexander Janneus spent a year (B.C. cir. 96) in besieging it and punishing its inhabitants (Josephus, Ant. xiii, 15, 3). The place was rebuilt by Gabinius (Josephus, Ant. xiv, 5, 8), and it was among the cities given by Augustus to Herodes (Josephus, Ant. xiv, 7, 5), after whose death it was given to the emperor Tiberius (Josephus, Ant. xvii, 11, 4). It was near Gaza—on the road from Jerusalem to that place—that Philip baptized the eunuch "of great authority under Candace, queen of the Ethiopians" (Acts viii, 26 sq.). As Gaza lay some distance from the sea (Arrian, ii, 28), it had a port on the sea. (7 Poit. v. 10, 'Ey Coro). The city was on the sea; called also Mojanm (Μομανγας), which Constantine called Comacantia, from the name of his son, giving it, at the same time, municipal rights. Julian took away this name, and ordered it to be called the port of Gaza. Subsequent emperors restored the name and the port to the place. It was afterwards called the sea-coast of Gaza. Further particulars may be read in Reland (Palestina, p. 792 sq.), where mention is made, from Pausanias, of something like a parallel to the feast of Samson; and where, as well as in Kuinoel (in loc.) and in Winer (Realebrörbuch in voc.), explanatory circumstances may be found of the words in Acts viii, 26—"Gaza, which is desert," an expansion that appears to refer rather to the road ("from Jerusalem," Acts viii, 26) than to Gaza itself (see Robinson, Researches, ii, 640). Besides the ordinary road from Jerusalem by Ramele to Gaza, there was another, more favorable for carriages (Acts viii, 26), further to the south, through Hebron, and thence through a district compatiaratively without towns, and much exposed to the incursions of people from the desert. The matter is discussed by Robinson in one of his Beiträge, incorporated in the last edition of his Palästina ; also by Robinson in the Appendix to his second volume. The latter writer suggests a very probable place for the baptism, viz. at the water in the wady el-Hang, between Eleutheropolis and Gaza, not far from the old sites of Lachish and Eglon. The legendary scene of the baptism is at Beel-sir, between Jerusalem and Hebron; the tradition having arisen apparently from the opinion that Philip himself was travelling southwards from Jerusalem. But there is no need to suppose that he went to Jerusalem at all. Lange (Apost. Zeitalt, ii, 108) gives a spiritual sense to the word ignac. About A.D. 63 Gaza was laid in ruins by the Jews, in revenge for the murder of John, the son of Zedouara (Josephus, War, ii, 18, 1). It soon recovered again; and it was one of the chief cities of Syria during the reigns of Titus and Adrian (see Smith's Dict. of Class. Geogr. s. v.). Though Christianity was early intro-

Roman Imperial Coin of Gaza.
the sand and the hills the ground is very fertile, and resembles the town with abundance of orchards and vegetables. The climate of the place is almost tropical, but it has deep wells of excellent water.

There are a few palm-trees in the town, and its fruit-orchards are very productive. But the chief feature of the neighborhood is the wide-spread olive-grove to the north, and E. and S. of it is often mentioned in the authentic manuscripts of soap, which Ghuzzes export in large quantities. It has also an active trade in corn. For a full account of nearly all that has been written concerning the topographical and historical relations of Gaza, see Bitter's * Erdkunde*, xvi, 46-90. Among the travellers who have described the place we may mention especially Robinson (Biblical Researches, ii, 575 sq.) and Van de Velde (*Syria* and *Palestine*, ii, 179-188); also Thomson (Land and Book, ii, 381 sq.). The last writer speaks of the great extent of corn-land near Gaza, and of the sound of mill-stones in the city. Even now its bazaars are better than those of Jerusalem. "Those travelling towards Egypt naturally lay in here a stock of provisions and necessary for the desert, while those coming from Egypt arrive at Gaza exhausted, and must of course supply themselves anew." (Robinson, *Israel*, 1839, p. 568."

Gaza may be identified with the modern village Youur, 34 miles E. of Joppa; though as a coast town and a place of strength in the time of the Maccabees it is unlikely that it should have so entirely lost its importance as *Palestine*, i, 605 n.). It must be remembered, however, that names sometimes linger in the neighborhood of sites.

Gaza, a town of Dalmatia. They were particularly distinguished by this tenet—that no human government had any right to sentence men to death for any crime whatever. See PAULICIANs.

Gaz'athite [usually *Ga'shit*] (Heb. with the article *ha-*Azuzi), q.v. (see *Gaza*).

Gazelle (Antilope dorcas), an animal of the genus *Antilope*, probably designated by the Gr. term *kopias* (comp. Acts i, 86) and the Heb. *’ez* tseb. (*reph* in 2 Sam. ii, 18; 1 Chron. xxi, 8; Prov. vi, 5; Cant. ii, 7, 17; iii, 5; viii, 14; Isa. xiii, 14; and *rebeck* in Deut. xii, 15, 22; xiv, 1; 1 Kings iv, 28), or in the feminine form *’izzik, tsebathah* (*"roe* in Cant. iv, 5; viii, 8); both terms, however, being applicable to the whole genus; Timotheus, being a handsome animal of dainty nature and not measuring more than two feet in height at the shoulder, and the least, the corinna, not more than about twenty inches. They are graceful and elegant in form, with limbs exceedingly slender, and have large and soft eyes, lyrated horns, black, wrinkled, and striped—most robust in *subgutturosa* and *kettellii*, most slender in *corinna*, and smallest in *tunica*. Their livery is more or less buff and dun, white beneath, with small tufts of hair or brushes on the fore-knees; they have all a dark streak passing from each ear through the thick, curling, tufts of hair on the sides of the face, the elbow of the fore-leg along the sides to the flank, excepting the corinna, whose markings are more rufous and general colors lighter. Most, if not all, have a feeble bleating voice, seldom uttered, are unsurpassable in graceful timidity, gregarious in habit, and reside on the open deserts, where they are, not peculiarly watchful, and prepared to flee with such speed that greyhounds are liable to be killed by over-exertion in the chase. They roam over the plains of Syria sometimes in herds of a thousand (Russell, Apell. pr. i, 14). Their flesh is lean, but highly prized (Prov. xvi, 45, 47). They are often
made the symbol of female beauty (Cant. ii, 9; 17; viii, 14) by Orientalists (Seth, ad ben Zohair, p. 98 sq.; Döpke, Comment. in Hesych. p. 97; Rosenmüller, Morgenl. iv, 129). See Thomson, Land and Book, i, 251 sq.; Kelly's Syria, p. 88 sq. See ANTELOPE; DEER.

Arile (Gazella Arabica).

Gazer (2 Sam. v, 25; 1 Chron. xiv, 16). See Gaza.

Gaze'ra, the name of a place and also of a man in the Apocrypha.

1. (ר ו ג ז ר רו ג ז ר רו ג ז ר רו ג ז ר רו ג ז ר רו ג ז ר רו ג ז ר רו ג ז ר רו ג ז ר רו ג ז ר רו ג ז ר רו ג ז ר רו ג ז ר רו ג ז ר רו ג ז ר רו Gaza, town of Palestine (1 Mac. iv, 18; vii, 45), elsewhere called Gazzæa (q. v.).

2. (א ג ז ר רו Gaza, town of Palestine). One of the Temple-servants whose "sons" returned from Babylon (1 Esdr. v, 81); evidently the Gazzæa (q. v.) of the Heb. text (Ezra ii, 48).

Gazet (Latinized Gazeus), Guillaume, a French ecclesiastical historian and theologian, was born at Arras in 1554, and died in the same city Aug. 25, 1611. He was for a time professor of belles-lettres at Louvain, quitting that position about 1580. He was also canon of the collegiate Church of St. Peter of Aire, and subsequently curé of the parish of St. Marie Madeleine of Arras. Gazez was an ardent student, especially of hagiography, and his works are by some regarded as credulous and inexact in giving the results of his investigations, though the Flemish historians and litterateurs, who have treated of his epoch, bestow high praise upon him. His most noted work, the Ecclesiastical History of the Low Countries, published after his death under the care of his nephew, G. Montecarre, contains much of the material found in his other writings bearing on the subject, only recast to suit it. Among his works are, Histoire de la vie, mort, passion et miracles des Saints domestiques de l'Eglise catholique fait et mémoire, etc. (i. A. Arras, 1684, 12mo; t. ii, Rouen, 1600, less carefully printed than the i.; a 2d ed. Rouen, 1619, 4to) — Magdeiæ, tragodia Sacra (Douay, 1589, 8vo) — La Somme des Péchés et le remède d'iceurs, etc. (ibid. 1592, 8vo) — Hymnorum Lóri septem in Christi Jésu etc. gloriam (ib. 1592, sm. 4to) — the poems of Robert Obrius, with epistolary dedication and laudatory verses) — L’Ordre et Suite des Erasures et Archevèques de Cambrai, etc. (ibid. 1597, 12mo) — Theoræm. Precum et Lytianar. Script. Sacrae, etc. (ibid. 1602, 18mo) — Idiota de Vita et Mirabili Religiosorum, etc. (ibid. 1606, 18mo) — Tabellæ terræ de la Graue Belgœ (ibid. 1610, 8vo, of which the Bibliothe. Sacriæ forms the second part) — Briœ cœt. de la sacrée Manne, et de la scène Chambelle, etc. (ibid. 1612, 16mo; new editions 1625, 1682, 1710, 1738, Arras, 12mo) — and the following posthumous works: Les Vies des Saints, avec des exhortations Morales (Iheims, 1618, 2 vols. 8vo) — Histoire ecclesiastique des Pays-Bas, etc. (Arras and Valenciennes, 1614, 4to) — Le Consulatour des Ams Scrupuleuses, etc.

Arras, 1617, 18mo) — Les Règles et Constitutions des Ordres reformés, etc. (ibid. 1629, 18mo). Gazez wrote also Le Sacré Bouquet: — Exercices spirituâlits, avec Litanies pour toute la semaine, and some ascetic tracts, for the consolation and instruction of the people Christian. — Hoefner, Nouv. Bûlog. Généralis, x, 781-784.

Gaz'ees (Heb. Gázzë, Hâzzer; Sept. Γαζης), the name of two men, supposed by some to have been identical.

2. A grandson of the same Caleb, through another of his sons Haran (1 Chron. ii, 46). B.C. post 1856.

Gâ'zite (Heb. in the pl. with the art. xa-Asçâzitham, Παζίτης; Sept. Παζίτων, Vulg. Philippikus A. V. "the Gazites"), the designation (Judg. xvii, 2) of the inhabitants of Gazzæa (q. v.); elsewhere rendered "Gazathites" (q. v.).

Gaz'sam (Heb. Gázzam', Παζί, demoung [comp. LOCUST], or [Pyrrh.] הוגהגר); Sept. Παζίμου and Παζίζων, Vulg. Gazum and Gazem), the progenitor of one of the families of Nethinim that returned from the captivity with Zerubbabel (Ezra ii, 48; Neh. vii, 51). B.C. ante 536.

Geb. See LOCUST.

Ge'bah, the name of at least two places in Central Palestine.

1. (Heb. Ge'ba, Γάβα, often with the art. l. e. the hill, in pause "Gaba"); Josh. xviii, 24; Ezra ii, 26; Neh. vii, 80; yet this form is also Anglicized as "Geba" in 2 Sam. v, 25; 2 Kings xxii, 3; Neh. xi, 31), a city of Benjamin with "villages" (Josh. xviii, 24; on its settlement, see 1 Chron. viii, 6), hence more fully "Geba of Benjamin" (1 Kings xv, 22; 1 Sam. xiii, 16 Josephus Gisba, Fl. i, vi, 6, n.; for which, perhaps, compare 1 Chron. vii, 29; ix, 20), situated on the northern border of the kingdom of Judah (2 Kings xxii, 8; Zech. xiv, 10), near to Gibeah, apparently towards the east or north-east (Isa. x. 29; Josh. xvi, 24, 28). It is often asserted that Geba and Gibeão were names of the same place; the A. V. in at least 1 Sam. xiii, 15, 16, confounds them; the Sept. and Vulg. render both indifferently ly Gaiwsa and Gaba; and in two passages (Judg. xx, 10, 33) the same error has crept into the original. Schwartz's identification of these places (Phys. Descrip. of Palestine, p. 162) is full of errors in locality. The two names are indeed only masculine and feminine forms of the same word, signifying "hill;" but that they were two different places is evident from Josh. xviii, 24, compare 28; 1 Sam. xiii, 2, compare 8; Isa. x. 29. In 2 Sam. xx, 8, the name "Geba" stands erroneously for Gideon (compare 1 Chron. xiv, 16). Geba, with its "suburbs," was assigned to the priests (Josh. xxi, 17; 1 Chron. vi, 60). The Philistines were smitten from Geba unto Gazer by David (2 Sam. v, 25). As it lay on the frontiers of Judah and Israel, Ass rebuilt Geba and Mizpah with the stones of Ramah (1 Kings xv, 22; 2 Chron. xvi, 6). "From Geba (in the north) to Beersheba" (in the south) the two cities (2 Kings xxi, 8) expressed the whole extent of the separate kingdom of Judah, just as "from Dan to Beersheba" expressed the whole length of Palestine. It would seem, from the manner in which Geba (Geba, and Remon) is coupled in Neh. vii, 30, that they were very near each other. Reeland (Palest., p. 239) thinks it the Gerbat (Γεραβᾶ) or Gibatohn (Γεβαθων) mentioned by Talmudical writers in connection with Antipatris (comp. 2 Sam. v, 25). During the wars of the earlier part of the reign of Saul, Geba was held as a garrison by the Philistines (1 Sam. xiii, 3), but they were ejected by Jonathan with ease. It is far from his renown, exasperated them to a more overwhelming invasion. Later in the same campaign we find it re-
ferred to in defining the position of the two rocks which stood in the ravine below the garden of Michmash, in terms which fix Geba on the south and Michmash on the north of the ravine (1 Sam. xiv. 5; the A.V. has here Gilbeah). Exactly in accordance with this is the position of the modern village of Jaba, which stands picturesquely on the top of its steep terraced hill, on the north-western slope of the great wady Suweinit, looking northwards to the opposite village, which also retains its old name of Makkamas. (See Stanley, *Palæst.,* p. 210, 489; Porter, *Hand-book for Syrii,* p. 215.) The names, and the agreement of the situation with th: requirements of the story of Jonathan, make it impossible to suppose that the two were not both mentioned by the same Hebrews of Benjamin towns visited by the Assyrian army on their road through the country southward to Jerusalem, which we have in *Isa.* x. 28-32, where the minute details—the stoppage of the heavy baggage (A.V. "carriages"), which could not be got across the broken ground of the wady at Michmash; then the passage of the ravine by the lighter portion of the army, and the subsequent bivouac ("lodging," מְבָשָׂר for the night) on Geba on the opposite side—are in exact accordance with the nature of the spot. Standing as it does on the south bank of this important watercourse, one of the most striking and most noticeable features of this part of the country—the mountain of Geba as the northern boundary of the lower kingdom is very significant. Thus commanding the pass, its fortifications by Asa (1 Kings xv, 22; 2 Chron. xvi. 6) is also quite intelligible. It continues to be named with Michmash to the very last (Neh. xi. 31). Geba is probably intended by the "Gilbeah-in-the-field" of Judg. xx. 31, to which its position is very applicable. The "fields" are mentioned again as late as Neh. xii. 29. The town was occupied by the Benjamites after the captivity (Ezra ii. 26). It appears to have been unknown to Eusebius (Hier., *Onom.* s. v. *Palaia, Gobal,* comp. Welles, *Palæst.,* p. 786), the village of Geba beside, in which the people are generally distinguished from their Gibeons. By the end of the first century B.C. the town was called Gebal by the Arabs, thus reviving the old Biblical name. It is seated on a rising ground near the sea, at the foot of Lebanon, which here approaches close to the coast. It is walled on the three sides towards the land, and open on the west towards the sea. It is about half a mile in circuit. Within the wall, which seems to be of the age of the Crusades, the chief building is an old castle, which has received modern repairs, and is now used as the abode of the sheik or commander. There are three or four open and lofty buildings belonging to the chief people of the place, a mosque with a low minaret, and an old Maronite church of good masonry; but the houses generally are of poor construction, and nearly half the space within the walls is occupied with the gardens of the inhabitants. The population is estimated at 1,000, mostly Maronites. (Maundrell, *Early Travellers in Palestine,* ed. Wight, p. 135; Byblis, *Dizionario di Geografia,* p. 45; Burckhardt's *Syria,* p. 180; *Bucharest's Arab Tribes,* p. 455; *Fouquet, Travels,* ii. 98; Wilson, *Lands of the Bible,* ii. 40). Its antiquity is attested by multitudes of granite columns which are built into the walls and castles, chosen from the small harbor, and scattered over the fields. The substratum of the old castle are of bevelled masonry, and some of the stones are nearly twenty feet long. Beautiful sarcophagi are frequently dug out of the ruins. The columns are, like those of the other cities of ancient Phoenicia (*Bibliotheca Sacra,* 1848, p. 7.) See Byblis.

2. (Heb. Gebal, גֶּבָֽל, pl. גֶּבָּל, Gebal; Vulg. Gebal, Gess. lxxxiii, 7), a district, or perhaps sovereignty, south of Judea, in the land of Edom. Gebal signifies a mountain, apparently belongs not to the most ancient times, as it does not occur when the Israelites were actually in this quarter, but is first found in Ps. lxxxiii, which was probably written in the time of Jehoshaphat. That king had, in the beginning of his reign, subdued the Philistines and Arabians (2 Chron. xvii, 9, 10), and still more recently had assisted Ahab against the Syrians (ib. ch. xvii). Now, according to the prophet Elisha, the Psalmist, the Prophet, the 'symptoms of a general rising against him: on the south, besides these Gebalites, the other Edomites, the Ishmaelites, and the Hagarenes; on the south-east, Moab and Ammon; along the whole line of the south-west coast (and, with Jehoshaphat's maritime projects, this
would naturally disturb him most; see 2 Chron. xx. 86, the Amalekites, Philistines, and Phoenicians, or inhabitants of Tyre; with the aid and comfort even of Assur, i. e. the Syrians, or Assyrians, from the more distant north. The country south of the Dead Sea, and the east of the shallow and salt lake of the Jordan valley, bears the same name (ジェビル) at the present time (Burckhardt, p. 401 sq.), and is doubtless the same as the Jebel of Scripture, the Gebalite (or, rather, Gebu-
litite) of Josephus (Ἰουδαία, Ant. ii. 2; iii. 2, 1; Γαβαλωοκλέαρ, Ant. ix. 9, 1) and the Gebalite of the Ro-
mans (Euseb. and Steph. Byz. have ᾿Ιουδαία, ᾿Λακώ-νη, ᾿Γαβαλωοκλέαρ, ᾿Γαβάλη). Josephus says, indeed, that the sons of Eliphaz, son of Esau, settled in that part of Idumaea which was called Gebalitite, and that denominated from Amalek Amalekitis: "For Idumaea," he adds, "was the name of a large country, which in its sev-
eral parts retained the names of its peculiar inhabit-
ants" (Ant. ii. 2, 1). We may therefore take Gebal as the name of the northernmost portion of Idumaea, which was nearest to Palestine. In Judith iii, 1, Lat-
vers, and also in the writing of the Crusaders, it is
called Syria Sobel (q. v.). The Jerusalem Targums generally read Mount Gebal (גבעה ים תיכא) instead of Mount Seir; so also the Samar. in Deut. xxxii, 2.
Seir, however, was the ancient name of Edom, where-
as Gebal was only a part of it. (See Reland, Palaest.
p. 84; Michalowski, Supplement, i. 281 sq.; Robinson, Re-
sources, iii. 522.) See Iдумaea.

Gebal. See Gebal, 2.

Gebat. See Gebal, 1.

Geber (Heb. id. יִבֶּר, a valiant man; often: Sept. וְיִבֶּר, Josephus וְיִבֶּרֶנ, Ant. viii, 2, 8), the son of Uvi, and one of Solomon's purveyors, hav-
ing sole (i. e. supreme) jurisdiction (בּיִבֶּר) over Gilead (1 Kings iv. 19); from which fact he appears to have been the same as בּנֵי-גּבֶּר ("son of Geber") mentioned in ver. 18 as having charge of the same region, unless, indeed, the latter were a deputy or assistant to his father. B.C. 1018. See also Ezion-
Gebzer.

Gebelin. See Court, Antoine.

Gebeb, Trechessa, archbishop of Cologne, was
born at Waldenburg Nov. 10, 1547; was made prebendary of Augsburg in 1569, of Strasburg in 1567, of Col-
ogne in 1570, and in 1577 elected archbishop and archbishop of Cologne. In 1582 he became a Protestant, and in the following year he married the princess Charlotte von Manfeld. He proclaimed unrestricted religious li-
iberty, and intended to convert his spiritual into a tem-
poral electorate. His plan was highly approved by the people and the nobility, but the cathedral chapter opposed it, and killed it in the air. The pope humiliated him against him, and the emperor, Rudolph II, declared him deposed. The Protestant princes ultimately de-
serted him, and the newly-elected archbishop, duke Er-
nest of Bavaria, overcame him by force of arms (1584).
He fled to Holland, but not receiving any help there, he
returned to Germany, where he only solicited the as-
sistance of the Protestant princes, as well as peti-
tioned queen Elizabeth of England for aid in regaining his bishopric; he finally retired to Strasburg, where he officiated as dean of the cathedral, and died May 21, 1601. See Köhler, De Nota et Vita Gebelardi (Altd. 1729); Barthold, in Beitraege zur Geschichte des Tuschenduch (1860); Pierer, Univer-IetLexicon, s. v.

Ge'bam (Heb. גְּבָם, גכמ, cisterns [as in Jer.
xiv. 8, "pit"]; or locusts [as in Isa. xxxiii, 4]; Sept. יִגְּבָּם, Vulg. Gabim), a small place a short distance north of Jerusalem, mentioned between Madmenah and Nob, Isa. x. 31, where its inhabitants are prophetically described as fleeing at the approach of the invading Assyrian army. Eusebius and Jerome (Onomast. s. v.
Ὑγμόνα, Gabim) identify it with "Geba, a village five miles from Guphas towards Neapolis;" and Schwarz
(Palest. p. 123) identifies it with the Geb of 2 Sam. xxii, 18; but both these are at variance with the order of the places named by the prophet. The associated lo-
calities require a position corresponding to that of the
present El-Yehud" (a little village in a valley near the road leading N.E. from Jerusalem (Robinson, Re-
sources, ii, 168). See Non. It probably derived its Hebr. name from the vicinity of excavations (הַעֲקָלִים = the ditches; comp. 2 Kings iii, 16).

Gedal'iah (Heb. גֵּדַלְיָּה, גְּדַלְיָּה, made great by Jeho-
vah, Extra x, 18; Jer. xli, 5, 8; xili, 16; Zeph. i, 1; elsewhere in the prolonged or full form Gedal'ya'h, גֵּדַלְיָּה; Sept. usually גּוֹזָדִיָּה, Vulgate Godalia), the name of five men.

1. The son and second assistant of Jeduthun in the Levitical choir of the Temple in the time of David (1 Chron. xxv. 9).
2. The son of Amariah and father of Cushli of the
father of the prophet Zephaniah (Zeph. i, 1). B.C.
ante 685.
3. Son of Pashur, and one of the Jewish nobles
who conspired against and imprisoned Jeremiah (Jer. xxxviii, 1). B.C. 589.
4. The son of Ahikam (Jeremiah's protector, Jer.
xxvi, 24), and grandson of Shaphan, the secretary of
king Josiah. After the destruction of the Temple, B.C. 588, Nebuchadnezzar deserted from Judah, leav-
ing Gedaliah with the Chaldean guards (Onomast.
Onomast. 38) of Mizpah, a strong (1 Kings xv, 22) town, six miles north of Jerusalem, to govern, as tributary (Josephus, Ant. x, 9, 1) of the king of Babylon, the vine-dressers and husbandmen (Jr. iii, 16) who were exempted from captivity. He was probably the number of those who left the city, as well as the instance of the prophet, justly de-
spairing of the successful defence of a place which God had abandoned. Gedaliah had inherited his father's respect for Jeremiah (Jer. xi, 5 sq.), and was, more-
ever, enjoined by Nebuzaradan to look to his safety and welfare. Gedaliah was in every way worthy of the difficult mission that had been confided to him, and he adopted, as the principle of his conduct, that submission to existing circumstances which was requisite in one who be-
lieved that Judah had, according to the declared will of God, been justly doomed and punished for her in-
solences, and who yet believed that his loving kindness had not utterly departed from her. He established the seat of his melancholy government at Mizpah, in the
tribe of Benjamin; and there the inhabitants, who had fled at the advance of the Chaldean armies, or when the troops of Zedekiah were dispersed in the plains of
Jericho, quietly engaged in their trades, began to gather around him. Gedaliah wisely counselled them to submission and quietness; and he promised, on that condition, to
insure them the undisturbed enjoyment of their pos-
sessions, and of the produce of the ground. In this
hope the labors of the field were resumed, and the ex-
traordinary returns of that season secured as if special-
lly given to repair the recent injuries of war. Jer-
icah joined Gedaliah; and Mizpah became the resort
of Jews from various quarters (Jer. xi, 11, 11), many
of whom, as might be expected at the end of a long
war, were in a destitute state, unrestrained by relig-
ion, patriotism, or prudence. The gentle and popular char-
acter of Gedaliah (Joseph. Ant. x, 9, 1 and 8), his he-
reditary piety (Rosenmüller on Jer. xxxvi, 24), the pro-
spersity of his brief rule (Jer. xi, 12), the reverence
which revived and was fostered under him for the ruined Temple (2 Kings, i, 5), fancied of the Chaldaean conquer-
or, whose officer he was—all proved insufficient to se-
cure Gedaliah from the foreign jealousy of Baalis, king
of Ammon, and the domestic ambition of Ishmael, a
member of the royal family of Judah (Joseph. Ant. x,
9, 5). This man came to Mizpah with a secret pur-
pose to destroy Gedaliah. Gedaliah, generously re-
fusing to believe a friendly warning which he received of the intended treachery, was murdered, with his
GEBOIRL 761  GEDER

Jewish and Chaldæan followers, two months after his appointment. After his death, which is still commemo-
rated in the Jewish Calendar (Prăduex, Convocac, anno 588, and Zech. vii, 19) as a national calamity, the Jews, in their native land, anticipating the resentment of the Persians, gave way to despondency. Many of them, out of fear, solicited Jeremiah to accompany them, fled to Egypt under Johanan. By this series of tragic events the utter ruin of Judea was consummated (2 Kings xxv, 22-26; Jer. xxxix., 14; xii, 18). See JER-

5. A descendant of Jeshua, and one of the priests who divorced their heathen wives after the return from the Babylonian captivity (Ezra x, 18). B.C. 485.

GEDDES, Alexander, a Roman Catholic divine, was born in 1597, at Arradawl, Banffshire, Scotland. He studied theology at the Scotch College in Paris, and, after his return to Scotland, he officiated at various chapels till 1729, when he retired from the clerical functions. For many years he was engaged on a new translation of the Old and New Testament, and Lord Petre allowed him a pension of £200 a year to enable him to carry it into effect. "The prospectus, which contained an account of his plan, was published in 1704; this was soon followed by the bishop of London, containing Queries, doubts, and diffi-
culties relative to a vernacular version of the Holy Scriptures, by a specimen of the work, and by a General Answer to the queries, consults, and criticisms" which his prospectus and specimen had excited. It was not, however, till 1759 that the first volume of the translation was published under the title of 'The Holy Bible, or the Books accredited Sacred by the Jews and Christians, otherwise called the Books of the Old and New Covenants, faithfully translated from corrected texts of the originals, with various readings, explanatory notes, and critical remarks.' The second, which contained the translation to the end of the historical books, appeared in 1738; and the third, which contained his critical remarks upon the Pentateuch, in 1800. The remainder of the work was never finished; he was employed, at the time of his death, on a translation of the Psalms, which he had finished as far as the 118th Psalm, and which was published in 1807. In 1800 he published Critical Remarks on the Hebrew Scriptures (Lond., 4to). He died Feb. 25, 1802. A Memoir of his Life and Writings, by Dr. R. M'Cray, was published in 1803 (London, 8vo). See Graves, On the Penta-
teach; British Critic, vols. iv. xix. xx; English Cyclop.; Cotton, Rheims and Douay, Oxford, 1864.

GEDDES, Janet, 'known in Scottish ecclesiastical history as 'Jenny Geddes,' has had her name transmitted as the person who took a prominent part in re-
sisting the introduction of the Liturgy, or Service-book, into the Church of Scotland in 1637. The circum-
stances were these. Sunday, 23d July, 1637, was the day fixed for this innovation, so obnoxious to the Scott-
ish Presbyterians, and an immense crowd filled the High Church of St. Giles's, Edinburgh, on the occa-
sion. In the dean of Edinburgh beginning to read, his voice was lost in a tumultuous shout, and an old
woman, said to have been one Jenny Geddes, who kept a green-stall in the High Street, bawling out, 'Villain! don't thou say mass at my lug' (that is, ear), launched her stool at the dean's head. 'Universal confusion ensued, and the dean, throwing off his surplice, fled, to save his life. The bishop of Edinburgh, on attempting to appease the storm, was assaulted by a volley of sticks, stones, and other missiles, accompanied by cries and threats that effectually silenced him. This tumult proved the death-blow of the liturgy in Scotland. It has been observed, however, if there was such a person as Jenny Geddes. In 1756, a citizen of Edin-

native city, published a tract called The Cross Removed, Prelaty and Patronage Disproved, etc., in which he claims the exploit of Jenny G. for his great-grand-
mother, 'the worthy Barbara Hamilton, spouse to John Mein, merchant and postmaster in Edinburgh, who, in the year 1654, was openly in the church at Edin-
burgh against archbishop Laud's new Service-book, at its first reading there, which stopped their proceed-
ings, and dismissed their meeting, so that it never obtained in our Church to this day.' In the obituary no-

tice of Robert Mein, in Weekly Magazine, vols. iv. v. and Scoa Magazine, vol. xxxvi. (1776), this Barbara Ham-
ilton is said to have been descended from the Hamiltons of Bardowie, 'but was better known in our his-
tory by the name of Jenny Geddes, though called so erroneously.' Jenny Geddes's famous stoil is said to have been burned by herself in the bonfires at the cross of Edinburgh at the Restoration, and what has been called hers in the Museum of the Society of Anti-

questions in Edinburgh has no claim to that name be-

beyond gratuitous conjecture. See Proceedings of So-

ciety of Antiquaries of Scotland, vol. iii. pt. ii., p. 179, 180.'

GEDDES, Michael, a divine of the Church of Eng-

land, was born in Scotland, and in 1678 was appoint-
ed chaplain to the English factory at Lisbon. In 1686 he was summoned to appear before the court of the In-

quisition. The judges received him at first with great affec-
tion, and with the most mark of courtesy, desirous of keeping him down and to be covered before they proceeded to ex-

amine him. After this ceremony was over, they stern-
ly asked him how he dared to preach or exercise his function in that city? He answered that he enjoyed that liberty by virtue of an article in the treaty be-

between the English Factory and Portugal. In the capacity of chaplain, as many others had done before him. To these declarations he falsely replied that they were entirely ignorant till lately that any such liberty had been assumed, and that if they had known it they would never have suffered it. They strictly forbade him to minister any more to his con-

gregation; and, after threatening him with vengeance if he should disobey, dismissed him. It is said that they were encouraged to take this step by the Romanist party in England. Upon this interdict, letters of complaint were addressed by the factory to the bish-

op of London; but as they did not reach England before the suspension of his liorship, all hopes of speedy redress were vain. Geddes was returned to his native coun-

try in the beginning of 1688. He was soon made LL.D. by the University of Oxford, and was made chancellor of Sarum by bishop Burnet. He wrote a History of the Church of Malabar (Lond. 1684, 8vo).—The Church History of Ethiopia (Lond. 1686, 8vo).—Miscellaneous Treatises against Popery (Lond. 1728, 3 vols. 8vo); and the Council of Trent, or Free Assembly. He died in 1715.——Birch, Life of Tillooten; Hook, Eccles. Biog. v, 308.

Géddur (Yélédin), one of the 'Temple servants' or Nethinim, whose 'sons' are stated to have returned

from the exiles (2 Esdr. v. 80); evidence of which is found in the psalm (q.v.) of the Heb. texts (Ex. lii. 47; Ne. viii. 49).

Gédon (Yélédin), the Crucified form of Gidon, the name of two men.

1. The judge Gédon (q.v.), thus Anglicized in the N.T. (Heb. xi. 32).

2. The son of Rehaim and father of Anamias, among the sons of Judith (Judg. viii. 1; where, however, many copies have 'Gideon').

Géder (Heb. id. '3b, Sept. Pádo), a name signi-

fying a wall (e.g. of a court, garden, sheepfold, etc.,

Prov. xxiv. 31; Ezek. xliii. 10), hence an inclosed or fortified place, and thus the basis of several names of
GEDERAH; 762
GEFFCKEN

castellated towns (e. g. Gederah, Gedor, Gadara, Gederoth, etc.); used once only (Josh. xii, 13) in this simple form as that of one of the thirty-one ancient royal towns of the Canaanites. It was defeated by Josiah. It is mentioned between Debir and Hormah; but, as the localities in that list are not strictly in geographical order, it may be identified with the Gador (q. v.) in the mountains of Judah (Josh. xv, 58), and with the Bith-edog (q. v.) of I Chron. i, 61. The notices of Schwartz (Palest. p. 86, 104) are quite confused.

Gederah (Heb. with the article hay-gederah, הַגְּדֶרַח, the fortress or sharp-cote [see Gederah]; Sept. Γάδερα, a town in the Shephelah or plain of Judah (Josh. xv, 86, where it is mentioned between Adithaim and Gederothaim [q. v.])]. According to Eusebius and Jerome (Onomast. s. v. Ζαδέα, Gaddara), it was still a village (Πασκα, Gudara) near Jerusalem “around the Terelith,” an expression which Rammur (Pilast. p. 183) interprets of the valley of Elah or the terelithin (1 Sam. xvii, 1); although Kell (on Joshua, ad loc.) shows that it means the wood of Mamre, near Hebron, and Relan had pointed out that this was in the mountains and not the lowlands of Judah (Palest. p. 900). Van de Velde has identified the site with that of "Getheron or Gederah, a village on the south banks of wady Surat, near the high road from Ramleh to Gazzeh" (Memor. p. 518; a position exactly agreeing with that of the Cedus (Kibboc, Jerome Gederus), described by Eusebius (Onomast. s. v. Ζαδέα, Gaddara) as a very large village ten miles from Diospolis (Lydda) towards Eleutheropolis (Beit-Jibrin). The inhabitants seem to be those designated as Gederites (q. v.) in I Chron. xxvii, 28 (comp. iv, 28, "hedges").

Gederathite (Heb. only with the art. hay-Gederathit, הַגְּדֶרַחִית, as if from Gederah; Sept. at Γαδεραθίτης, Vulg. Gaderathitis), an epithet of Josiah (1 Chron. xvi, 19), the line of David's overseers of olive and sycamore groves in the lowland of Judah (1 Chron. xxvii, 28); hence probably so called as being native of Gederah (q. v.) in that region (Josh. xxv, 56).

Gederoth (Heb. Gederoth, גְּדוֹר, ᾶ ὑπερβαλλοντος, for sharp-cote [see Gederah]; in Chron. with the art.; Sept. Γαδερωθ, v. r. Γαδερωθίος, Vulg. Gaderothem), a town in the "valley" of Judah (Josh. xv, 41, where it is mentioned between Kithlah and Beth-dagon); one of those captured by the Philistines from Ashdod (1 Chron. xxviii, 18). It cannot be identical with the Gederah or Gederothaim (q. v.) of Judah (which lay in a different group), nor yet with either Geder or Gedor (which were in the mountains). The associated names require a position "in the actual plain from north to south by the hill region and territory of Gaza" (Kell, on Joshua loc.); perhaps at the modern Beit-Tima, marked on Van de Velde's Map as 6 miles east of Ascalon.

Gederotha'im (Heb. Gederotha'aim, גְּדוֹרָה'אֵים, two folds [see Gederah]; Sept. omita, but some copies translate αἱ εἰρικαὶ αἱ ἱρικαὶ, Violet Gadderethaim), the name of a town in the plain of Judah (Josh. xv, 86), mentioned in connection with Gerdah (q. v.). v; when used as 1 of the 15 districts of the Philistine coast (Kell, on Joshua loc.); perhaps at the modern Beit-Tima, marked on Van de Velde's Map as 6 miles east of Ascalon.

GEDI. See GOAT; EN-GEDI.

GEDIYAH. See GOAT.

Ge'dor (Heb. Gedor, גְּדוֹר, or [in 1 Chron. iv, 4, 18] הַגְּדוֹר, a wood [see Gederah]); Sept. Γάδος, but 1 Chron. vii, 31 Γάδος, and 1 Chron. xii, 7 Πιπαπα; Vulg. Gedor), the name of one or two places, and also of a man.

1. An ancient city in the mountains of Judah (Josh. xv, 58), some of whose inhabitants joined David at Ziklag (1 Chron. xii, 7). It was probably this town to which "Josabah the Gederuthite" (q. v.) belonged (1 Chron. xlii, 4); as also "Jerobam of Gedor," whose sons Joelah and Zedebiah were among the mighty men that joined David in his difficulties at Ziklag (1 Chron. xii, 7); for it does not appear that all in that list were "Saul's brethren of Benjamin" (compare the terms "Haruphit," "Korhite," following). See ZERAHI. The name has the definite article to it in this latter passage (יְדָרוֹן). The place was probably the same as the Gedor (q. v.) of the ancient Canaanites (Josh. xii, 13), rebuilt as Bith-Gedor (q. v.) by Hezrohp (1 Chron. ii, 61), in conjunction with Penuel (1 Chron. iv, 8); or by David (1 Chron. iv, 16). See MAHOR. It is doubtful the Gidara of the Onomasticon, between Jerusalem and Hebron. See GIDERAH. It is very doubtful (see below) whether this be the same Gedor in whose fertile valley the Simeonites found good pasture for their flocks (1 Chron. iv, 90), yet Relan regards them both as the same (Palest. p. 988). Dr. Robinson, travelling from Jerusalem to Gaza, came in sight of a place called Jedur, with ruins, on the brow of a mountain ridge, which he identifies with Gedor (Researches, ii, 458; also new ed. ii, 988). It was also recognised by M. D. Sauley (Nordestreit, ii, 453); comp. Schwartz (Palest. p. 86) and Wilson (Lands of the Bible, p. 386).

2. The above-named place (1 Chron. iv, 89) was originally inhabited by Hamites, and its fertility induced a predatory incursion and forcible occupation by a party of Simeonites. From this it would seem to have adjoined the territory of Simeon on the south; and a writer in the Journal of Sacred Literature (July, 1860, p. 218) suggests the solution that these aborigines were Philistines, the place itself being no other than Gerar (by the slight and frequent error in transcription of יָד for יִדָּר, which latter the Sept. appears to have actually read). Ewald had already adopted this emendation. Stieck (ii, 389, note) accepted the term (בָּדֶר, scly) elsewhere applied to Gerar (q. v.) is different from that here used (יָדוֹר, the valley).

3. A chief of the Benjamites (apparently of the house of Gideon) resident at Jerusalem (1 Chron. viii, 31; ix, 37). B.C. 586 or ante.

Gea, Joshua, a Congregational minister, was born at Boston in the year 1698. He graduated at Harvard in 1717, and was early regarded as a young man of promise. He accepted an invitation to settle as colleague of Cotton Mather, and was ordained December 18, 1728, Cotton Mather giving the charge. In this relation he continued till the close of his life. Mr. Gee distinguished himself by a vigorous and earnest defence of the great Whitfieldian revival. He cordially welcomed Whitfield to Boston, adopted in his own church the measures which Whitfield recommended, and opposed the action of a convention of Congregational ministers in 1743 which protested against his doings. Mr. Gee was an invalid during the latter part of his life, and was obliged to have an assistant. He died July 17, 1748. He published A Sermon on the Death of Cotton Mather (1728);—Two Sermons on Luke xiii, 24 (1729);—Letter to the Rev. Nathaniell Eells, Moderator of the last Convocation of Pastors at Boston (1743).—Sprague, Annals, i, 812.

Geffcken, Johannes, a Lutheran clergyman of Germany, was born in 1603 at Hamburgh. He became
in 1829 pastor of St. Michael's church, in his native
city, and retained this position until his death, Oct. 2.
1865. He wrote a history of Semipelagianism (Gesch.
der Semipelagianismus (Hamb. 1826); on the division
of the church into the two parties (Gesch. der
Streitigkeiten des Desaklosianus, Hamb. 1838); on the picture catherine
of the 15th century (Ueber d. Bilderkatechismus, des 15th
Jahrhunderts, Leipz. 1855), and several other works.—

Gehazi, Timothetus, a leader of the Pau-
lincans about A.D. 700. About this time " the sect was
divided into two parties out of the
antagonism between a Catholick and a Protestant prin-
ciple. Gehazi held that spiritual gifts were
communicated by tradition, and connected with the regu-
larity of succession. But his younger brother, Theo-
dore, refused to acknowledge any such principle, main-
taining that any such outward mediation was unessen-
tial, and that he had received the Spirit immediately
from the same divine source with his father. Under
the reign of Leo the Isaurian, new complaints were
lodged against the Paulicians at Constantinople, and
the emperor ordered Gehazi to appear at the court
and undergo a trial. The emperor was con-
uenta to the patriarch, before whom Gehazi con-
trived to answer all the questions proposed to him re-
specting his orthodoxy in a satisfactory manner; at-
taching, however, quite a different sense from the true
one to the ceremonies of Church worship. The pa-
triarch asked him why he had left the Catholic Church?
Gehazi replied that he had never entertained the
remotest wish of forsaking the Catholic Church, within
which alone salvation was to be found. But by the Catholic Church he meant only the Paulician com-
nunities, called, as they believed, to restore the Church of
Christ to its primitive purity. The patriarch de-
manded why he refused to give the mother of God the
reverence which was due to her? Gehazi here pro-
nounced the anathema on all who refused re-
veneration to the mother of God—so her into whom Christ entered, and from whom he came—the mother
of us all. But he meant the invisible, heavenly city of
God, the celestial Jerusalem, mother of the divine
life, for admission of the redeemed into which Christ had prepared the way by first entering it himself as
their forerunner. He was asked why he did not pay
homage to the cross? Gehazi here pronounced the
anathema on all who refused to venerate the cross;
but by this he understood Christ himself, called by that
symbolical name. Furthermore, he was asked why he
denied the holy water. The reply to this also was satis-
factory; but by the holy water he was accustomed to understand the doc-
tines of Christ, in which he communicated himself.
So also he answered the question respecting baptism;
but by baptism he understood Christ himself, the liv-
ing water, the water of life. This trial having been
reported to the emperor, Gehazi received from his sover-
ign a letter of protection securing him against all
further complaints and persecutions."—Neander,
Church History (Torrey's transl.), iii, 249. See PAU-
LICIANS.

Gehazi (Heb. Gechaza), "111713, as if for
v77, valley of vision; but, according to Furst, denser,

2 Kings iv. 31; v. 25; vili, 4, 5; Sept. Deu-
2 Kings iv. 31; v. 25; vili, 4, 5; Sept. Do-
the servant of Elisha, whose entire confidence be at first enjoyed. He personally appears first in reminding
his master of the best mode of rewarding the kindness of the Shunammite (2 Kings iv. 14). B.C. 886. He
was present at the interview in which the Shunammite
FIG. 260. The servant of Elisha, from the distances of the formulæ, church orthodoxy was re-
and was sent forward to lay Elisha's staff on the child's
face, which he did without effect (2 Kings iv. 31).
B.C. 887. The most remarkable incident in his
career is that which caused his ruin. When Elisha,
with a noble disinterestedness, declined the rich gifts
pressed upon him by the illustrious leper whom he had
healed, Gehazi felt distressed that so favorable an
opportunity of profiting by the gratitude of Naaman
had been thus thrown away. He therefore ran
after the retiring chariot, and requested, in his mas-
ter's name, a portion of the gifts which had before
been refused, on the ground that visitors had just ar-
ived for whom he was unable to provide. He asked
a talent of silver and two dresses; and the grateful
Syrian parted with two talents in a day of time.
Having deposited this spoil in a place of safety, he
again appeared before Elisha, whose honor he had so
carelessly compromised. His master asked him where
he had been, and on his answering, "Thy servant
went no whither," the prophet put on the severities
of a judge, and pronounced his crime, piled upon him
the terrible doom that the leprosy of which
Naaman had been cured should cleave to him and his
forever. "And he went forth from his presence a leper as white as snow" (2 Kings v. 20-27). B.C.
868. See c. He became now a somewhat parallel with that of
Ananias (q.v.) and Sapphira (Acts v). The rebuke
inflicted on Gehazi, though severe, cannot justly be
reckoned too hard for the occasion. He ought to have
understood, from the determined rejection of Naaman's
offers by Elisha, that there were important principles
involved in such a matter, which he should not
have been careful on no account, or by any movement on his
part, to bring into suspicion. There was a great com-
plication of wickedness in his conduct. He first arro-
ged to himself a superior discernment to that of the
Lord's prophet; then he falsely employed the name of
that prophet to take a purpose which the prophet him-
self had expressly and most emphatically repudiated;
father, an excuse for aiming at such a purpose, he
invented a plea of charity, which had no existence but
in his own imagination; and, finally, on being interro-
gated by Elisha after his return whither he had gone,
he endeavored to dignify his procedure by a lie, which
was no sooner uttered than it was detected by the
prophet. Such accumulated guilt obviously deserved
some palpable token of the divine displeasure; the
more so, as it tended to give a covenanted aspect to the
lord's service when the very principles of which the
regulations were out of course, and when the true worshippers
of God were called to sit loose to all earthly possessions.
This, indeed, is the thought that is most distinctly
brought out in the prophet's denunciation of Gehazi's
conduct (ver. 26)—the false impression it was fitted to
give of the religious and character of the servant
of God. We afterwards find Gehazi recounting to king Jo-
ram the great deeds of Elisha, and, in the providence of
God, it so happened that when he was relating the
restoration to life of the Shunammite's son, the very
woman with her son appeared before the king to claim
her house and lands, which she had been usurped while
she had been absent abroad during the recent famine.
Struck by the coincidence, the king immediately
granted her application (2 Kings viii, 1-6). B.C. 876.
Lepers were compelled to live apart outside the towns,
and were not allowed to come too near to uninfect ed
persons. See LEPROY. Hence some difficulty has
arisen with respect to Gehazi's interview with the
king. Several answers occur. The interview may
have taken place outside the town, in a garden or gar-
den-house; and the king may have kept Gehazi at a
distance from the usual processions which were ordinarily
initiated. Some even suppose that the incident is mis-
placed, and actually occurred before Gehazi was sms-
itten with leprosy. Others hasten to the opposite con-
clusion, and allure the probability that the leper had
then repaired to the prophet's house, and that Gehazi was
sent for to stay to the child's disease, which was of
health by his master, a view which is somewhat cor-
raborated by the fact that he is there still called "the
servant of the man of God," from which it is supposed
that the relationship between him and Elisha contin-
GEHENNA 764 GEILER VON KAISERBERG

ned to subsist, or bad in some unexplained manner been renewed. See ELISHA.

Gehe nna (Tivnva, A. V. invariably "hell"), the Greek representative of הֶגֶּנֶּן, which is widespread in the Psalms (see 2, 8; Neh. 1, 30 (rendered by the Sept. Tniyya, Josh. xviii, 16); more fully, הֶגֶּנֶּנּבָ, or מֶגֶּנֶּנּי (2 Kings xxii, 10; 2 Chron. xxviii, 8; xxxiii, 6; Jer. xix, 2, the "valley of Hinnom," or "of the son" or "children of Hinnom," a deep narrow gash a few miles from the south of Jerusalem, where, after the introduction of the worship of the fire-gods by Ahaz, the idolatrous Jews offered their children to Moloch (2 Chron. xxviii, 3; xxxiii, 6; Jer. vii, 31; xix, 2-5). In consequence of these abominations, the valley was polluted by Josiah (2 Kings xxiii, 10), who succeeded the common lay-stall of the city, where the dead bodies of criminals, and the carcasses of animals, and every other kind of filth was cast, and, according to late and somewhat questionable authorities, the combustible portion consumed with fire. From the depth and narrowness of the gorge, and, perhaps, its ever-burning fires, as well as from its being the receptacle of all sorts of purifying matter, and all that defiled the holy city, it became in later times the image of the place of everlasting punishment, "where their worm dieth not, and the fire is not quenched," (Matt. xxv, 41; cf. also Mark xvi, 4; and James, 3, v. 6. See HINNOM, VALLEY OF; CHA- PIKH; HELL.

Geibel, Johann, a clergyman of the Reformed Church of Germany, was born April 1, 1776, at Hanau. After finishing his theological studies at the University of Marburg, he was for a short time tutor in a family at Copenhagen. In 1797 he was appointed vicar of the aged pastor of the Reformed church at Lubeck, and, when the latter died in 1798, Geibel became his successor. In his theological views Geibel had been influenced at first by Daub, Jacob, and Schleiermacher, subsequently by the mysticism of Kerner and the peculiar tenets of the Dantyes; but gradually he confirmed himself more fully to the Reformed Church, in which he had been reared and to which he had been attached from his youth. Geibel died at Lubeck in 1885, at the age of 67. He was a man of great learning and research, and wrote many books on various subjects. Among his works are: "Die Kirche in der Christlichen Lehre," 1821, and "Introduction into the Christian Doctrine" (Einleitung in die christliche Lehre, 1821), and two "Guides to the Instruction in the Christian Doctrine" (Leitfaden bei dem Unterrichte in der christlichen Erlaubniss, 1822; and Kurzer Leitfaden, etc., 1825). He also wrote several pamphlets in defence of his son, pastor Karl Geibel, of Brunswick, who by his orthodox zeal had offended many of the rationalistic majority of his own congregation, and was censured by the Reformed Synod of Lower Saxony. Geibel declined several calls to other more lucrative positions, and remained in Lubeck until April 11, 1847, when he resigned. He died on the 29th of July, 1858. He is the father of the celebrated Ger- man poet Geibel. — Herzog, Real-Encyklopädie, xix, 546.

Geiler, Martin, D. D., a German theologian, was born at Leipsic in 1614, became court-preacher at Dresden in 1636, professor of theology at Leipsic in 1661, and in 1680 at Freiburg. As the principal writings are commentaries on the Psalms, Proverbs, and Ecclesiastes, which, as some valuable theological treatises, are collected in his Opera omnia quà Latina edita sive (Amst., 1636, 2 vols. fol.). His commentary on the Psalms has been often published separately, and is still esteemed.

Geiger, Frans Tibrutius, a Roman Catholic theologian, was born at Hertingen, Württemberg, in 1755. He studied at first under the Jesuits, then jogged the Franciscans at Lucerne in 1772, and after 1778 applied himself to the study of philosophy at Ratisbon, and of theology at Würzburg. He subsequently became professor of Hebrew at Ratisbon, of rhetoric at Offenburg, of philosophy at Freiburg, and afterwards in the Franciscan school of Solothurn, and finally, in 1792, professor of theology at Lucerne, whence he became a leader of ultramontanism through Switzerland and Germany. This, however, made him many enemies, and in 1819 he was obliged to resign his position, and died May 8, 1848. A collection of his works has been published (Lucerne, 8 vols.).—Pierer, Universal-Lexikon, s. v.

Geiger, Jacob, a minister of the German Reformed Church, was born at Allentown, Lehigh County, Pa., Oct. 17, 1738. He began his studies with the Rev. Dr. J. C. Becker in Northampton County, Pa., in 1814, and subsequently completed them with the Rev. Dr. C. L. Becker in Baltimore, Md. He was licensed and ordained in 1816, and in 1817 took charge of congregations in and around Manchester, Md., and not far from Baltimore, in which he labored up to the time of his death, Oct. 19, 1848. He was a very successful minister, having baptized 3,714 and confirmed 1,668 during a ministry of thirty-one years. His charge at the time of his death numbered 1,200 members. He preached only in the German language. (H. H.)

Geiler von Kaiserberg, an eminent preacher, was born March 16, 1445, at Schaffhausen, and was educated at the University of Freiburg, where he became bachelor in 1462, master in 1463, member of the faculty of philosophy in 1465, and dean in 1469. In 1470 he went to Basel, where he studied theology for five years, and was received as doctor in 1475. The following year he accepted the professorship of theology in Freiburg, and became also rector; but the best of his genius led him to abandon his ecclesiastical sitings, and he became himself to the pulpit. He was preacher of the cathedral of Strasbourg until 1488, when he removed to Augsburg, but returned to Strasbourg, where he remained until his death, March 19, 1510. As an earnest, powerful, and popular preacher, he had few rivals in that age. His sermons, usually composed in Latin and delivered in German, are marked by great eloquence and earnestness; nor do they disdain the aids of wit, sarcasm, and ridicule. Vivid pictures of life, warmth of feeling, and a bold, even rough morality, are their leading characteristics. In fact, Geiler's ethical zeal often urged him to a pungency of satire hardly in keeping with modern views of the dignity of the pulpit, but quite congruous with the taste of his own age. His style is vigorous, free, and lively, and in many respects he may be regarded as a sort of predecessor of Abrahast the 'Quaker' (p.). Geiler's work of his published during his lifetime was the Ora- tua habita in symbo Aruminae (1482); he also edited the first collection of Gerson's Works (Strab. 1488, 3 vols.). From his MSS. a large number of sermons were compiled and published after his death. Of these, the best known are his Articula sive spectrum fictio-
GELASIANUS

Gelasianus I, a Pope and saint of the Roman Church, succeeded Felix III March 1, 492. He is one of the popes who contributed most to the extension of the temporal power of the see of Rome. He was the first to claim for the Papacy a complete independence of the emperors in matters of faith. See his Letter to Faustus (Mansi, Sacrorum Conciliorum nova et ampliss. collection, viii, 19), in which he argued that the Pope has not only a right to decide all ecclesiastical questions, but that an appeal from such decision to any other tribunal is insubordinate to the first rank (præsidii) in the Church, and councils derive their authority from his countenance and co-operation (pro suo scilicet principatu).

There are two powers," he wrote to the emperor, "who have sovereign rule over the world: the spiritual and the temporal authority; the sacred authority of the bishops is so much the greater, as on the day of judgment they must render an account of the actions of kings. You know, magnanimous emperor, that your dignity surpasses that of other princes of the earth; nevertheless, you are obliged to submit to the power of the bishops in matters of faith. It is to them you address yourself to know what are the sources of your safety, and the rules which you ought to follow in receiving the sacraments, and in disposing of religious things. The bishops persuade the people that God has given you a sovereign power over temporal things, and to them you submit your laws. In return, you should obey, with entire submission, those who are destined to distribute to you the holy sacraments. If the faithful ought blindingly to follow the orders of bishops who acquit themselves worthwhile in their functions, so much the more ought they to receive the decree of the pope. The bishops, whose God has established as the first of his bishops, and whom the Church has always recognised as its supreme chief." The schism of the Eastern Church, which had already taken place, continued during his administration, notwithstanding the efforts he made; and the Synod of Rome, 495, to heal breaches. He wrote on this controversy his De duabus in Christo natura adversus Eutychem et Nestoriam. He is said to have written also the so-called Decretum Gelasii de libris recipiendis et non recipiendis, which is a list of the scriptural books, etc., considered authoritative and rejected. This book, which he held at Rome in 496, but this work was probably compiled in the 6th century. Among the minor works ascribed to Gelasianus are a Liber sacramentorum, published by Jonas Maria Thomasius (Rome, 1690), and a number of letters. He died in Rome Nov. 19, 496. See Schöckel, Kirchenurk. (xxvii, 181 sq.), Schott, De canonibus Apostolorum et codice Eccles. hiagiou Dia. (Vratisl. 1829).—Herzog, Real-Encyclop. iv, 761; Bower, History of the Popes, ii, 216 sq.

Gelasianus II, Pope (John of Gaeta), studied theology at Monte Casino, ascended gradually to the higher degrees of the Roman hierarchy, and was finally elected pope in 1118, as successor of Paschal II. The emperor Henry V, dissatisfied with this election, took upon himself to appoint another pope, under the name of Gregory VIII; and one of his generals took Gelasianus prisoner, but was obliged to release him. Gelasianus then went to Gaeta, where he was ordained to the priesthood, and was called a council, and communicated both to Gregory VIII and Henry V. He finally retired to France, where he died in the convent of Cluny, Jan. 29, 1119. See Muratori, Scriptores Rom. Italicorum, iii, 397; Mansi, xvi, 161.—Hoefner, Nouv. DB. Gen. ix, 819; Bower, Hist. of the Popes, vi, 1.
GELDENHAUR

GELDERT, GERARD (Gerhardus Nortonianus, Gerardus de Nimegen), an eminent German writer, was born in 1452 at Nim fascism, and educated at Louvain and at Deventer, where he had for his instructor Alex- ander Hugus, the preceptor of Erasmus. In 1517 his skill in Latin versification obtained for him the laurel crown from the emperor Maximilian I. He after- wards became secretary to the chancellor of Phillip of Burgundy, bishop of Utrecht. He was sent to Witten- berg in 1526 to visit the schools and Church, and found that he "could not oppose a doctrine so consonant with that of the prophets and apostles" as that of Luther. He denounced popery, and retired towards the Upper Rhine, where, as at Wurzburg, he married, and became a school-master. Afterwards he was called to Augsburg, and eventually became professor, first of history, and then of theology, at Marburg. Erasmus, who at one time was his friend, attacked him violently on his success- ion Lutherananism. Gelderhaus died of the plague in 1542. He wrote "Historia Botanica:" "Historia suæ Asiae," iii, vii; "De Institutione Batavorum;" "Catalogus Episcoporum Ultraterritorum;" "Epistolae Zelandiae;" "De Viris Illustribus Inferioris Germaniae," and sev- eral controversial pieces. - Hook, Echtes. Leg. v, 288; Bayle, Dictionary (London, 1783), iii, 146.

GEL'їloth (Heb. גלילות, גלט), circuits [see below]; Sept. פֶלַסָלָה, Vulg. facilitating, the name of a place on the boundary of Judah, between En-Shemesh and the ascent to Adiramin (Josh. xviii, 17); apparently another form of the Gilo (q. v.) of the parallel passage (Josh. xv, 7).

The word is distinctly used (see Stanley, Bibl. Ueber Tischend. App. § 23) five times in the original; twice to refer to the preference to the Philippe- tan heptarchy ("borders of the Phileistines," Josh. xii, 2; "coasts of Palestine," Joel iii [iv], 4); twice to the circle [see CICCAR] of the Jordan ("borders," Josh. xxii, 10, 11); and once (in the sing.) to the district sloping easterly towards the Dead Sea ("country," Exod. xviii, 8). Its derivation (from גל, to roll) connects it with that of גלולה (q. v.), with which the versions sometimes confound it. See TOPOGRAPHICAL TERMS.

Gell, Robert, D.D., an English divine, who was rector of St. Mary Aldermaston, London, and chap- lain to the archbishop of Canterbury. His "Remains contain much ingenious and solid criticism." They are commemorated by John Wesley, and also by Charles Wesley, who took from them much for hymns. He died in 1656. We have from him "Sermons" (Lon- don, 1650, 4to) — "Sermons (1654, 4to) — Essay towards the Amendment of the English Trans. of the Bible (1659, fol)." - "Remains, or select Script. of the New Test. (1676, 2 vols. fol.)" — Darling, Cycloped. Bibliographica, i, 1829; Allibone, Dictionary of Authors, i, 658; Wes- ley, Words (N. Y. ed.), vii, 601.

Gellatly, Alexander, a minister of the Associa- te Church, was born in Perth, Scotland, in 1720. In 1752 he became a student of theology in connection with the Antiburgher Synod of Scotland. By that synod he was sent out in 1758 as a missionary to the inhabitants of the eastern counties of Pennsylvania, who were in Newsmgen and educated at at land. He was accompanied by the Rev. Andrew Ar- not, and together they formed themselves into a Presby- tery, under the name of the Associate Presbytery of Pennsylvania. They soon became obnoxious to the church chlorin and secretary to the groundwre (rcht) against them, and who issued a series of publications against them, which were answered by Mr. Gellatly and oth- ers. Mr. Gellatly was settled first at Middle Octoro- ra, Lancaster County, and then at Oxford, Chester County, Pa., where he labored with great diligence during the remainder of his life. He died March 15, 1781. He was a man of vigorous intellect, and an earnest, faithful minister of the Gospel. — Sprague, Annales of Am. Pulpit, ii (Associate), 1.

Gellert, Christian Gottfried, a German poet and hymn writer, was born July 4, 1715, in Hain- nichen, Saxony, and studied philosophy and theology at Leipzig. In 1744 he was made priester docent, and in 1761 professor extraordinary of philosophy in the University of Rostock, and professor ordinaria- ry in 1761, and died Dec. 13, 1769, after gaining the high esteem of Frederick the Great. His fables have never been surpassed in German literature, and his narrations and moral essays occupy a creditable place in German literature, while his comedies are forgotten. He also wrote some fine work for the stage, which give him a more enduring reputation than all his other writings. A translation of his hymn Jesus lebt, mit ihm auch Ich, is given in Schaff's Christ in Song, p. 275. "In order to understand Gellert's position as spiritual song-writer, we must consider him with reference to his age. The spirit which was the basis of the old songs of Germany had altogether departed. Gellert's songs were so fully the expression of his pious inner nature that they found a hearty response in the breasts of many kindred natures. 'Never did he attempt a spiritual song for his biographer, Cramer, informs u, 'without carefully preparing himself, he took a long time with all his soul to experience previously the truth of his utterances. He then chose his most ecstatic mo- ments for composition, and as soon as his ardent cooled he laid aside his pen until the golden moments came again. . . . Among Roman Catholic Germans Gellert's songs found a warm reception. A country priest in the mountains of Bohemia had been so im- pressed by them that he wrote to Gellert and urged him to join the Catholic Church, since this Church could much better reward his good works than the Protestants were able to. Also in Milan, Vienna, and other great Catholic cities, Gellert found many warm admirers. There can be more purely Christian songs than Gellert's; songs that would be the evi- dences of recent improvement in our language and liter- ature, and might partake of more of the old fire of reformatory times, or bear the romantic coloring of mystician or recent orthodoxy; but all these perfec- tions could not supply the place of the simple, glowing language of a Gellert, which was his expression of inner, self-experienced truth. Gellert will long remain the poet of the people. By the agency of his friends and lib- erals he will long continue to plant the seeds of virtue in the hearts of tender youth; and where the later tendencies have not obliterated the old German meth- od of domestic training, he will continue to save many a young man from the ways of sin. He will still con- solate the broken-hearted. And though but few of his songs have been reserved for use in our churches, even these few—for instance, the Easter song, Jesus lebt, and I lie with him—will continue to elevate our Christian congregations, and help them to gain the victory over the world. Gellert has not only influenced one generation by his songs, but has deeply affected succeeding ones. That humble man wished no higher honor than the salvation of any one whom he met, 'You have saved my soul!—you!' But in the coming world of bliss there will be thousands met by him who, like Gellert, would have done what the普- riasen sergeant did, walk five miles to prey the hand of the man who had saved his soul!" (Hagen- bach, Recen Church History, translated by J. F. Hurst). Among his works are, Pabelln and Erziehungen (Lpz. 1745) — Church History (Lpz. 1767) — Deutsche Vorkenner (Schlegel and Hoyer, Lpz. 1770) — Sämmtliche Schriften (Lpz. 1789-74, 10 vols.; 1840-41, 6 vols.; and 1858, 6 vols.). See J. C. Cramer, Lebensbeschreibung (Lpz. 1774); Döring, Lebensbeschreibung (Greitz, 1638, 2 vols.) — Eck, Gellert's Empfehlung (Lpz. 1770); F. Neumann, Gellerthaus (Dresden, 1864); Fierer, Unit. Lex. s. v.
GELMON

Gem (γέμος, γεμ, γειμ, usually "precious stone")
The Hebrews, among whom, as among all Asiatic nations (see especially Heeren, Ideen, i, i, 118 sq.), gems constituted an essential and highly-prized ornament.
(Dox. xxvii, 18) of the high-priest (Exod. xxvii, 17), and of distinguished persons generally (Judith, x, 21; xx, 15), especially when set in rings (Cant. v, 10), derived them chiefly from Arabia (see Ezek. xxvii, 22; i Kings x, 2) and India, by the overland as well as maritime traffic of the Phenicians (3 Sam. x, 30; Exod. xxi, 18), in the time of Solomon, they procured themselves directly from Ophir (1 Kings x, 10 sq.). The art of cutting (engraving letters) and setting them was a highly respectable vocation (Exod. xxxiv, 38).
In the Bible (especially Exod. xxxiv, 17 sq.; xxxix, 10 sq.; Ezek. xxviii, 18; Rev. xxii, 19 sq.) the following names and kinds of gems chiefly occur (comp. Josephus, Ant. iii, 7, 6; War, v, 5, 7; Epiph. Opp. ii, 255; see Hiller, Syntagmata hermetica, p. 83 sq.; De Dieu, on Exod. xxviii; Braun, De secret. sacrorum. Hebr. ii, vii, p. 497 sq.; Hartmann, Hebräer- und Christenken, i, 276 sq.; iii, 37 sq.; Bellemann, Urim und Thummim, in loc.; Eichhorn, De gemmis sculptis Hebr., in der Comment. Sac. Gotting. rec. ii; Rosenmüller, Alterth. iv, i, 28 sq.; Wetstein, N. T. ii, 844 sq.). See ENGRAVING.

1. O'dom, 'Ηδωμ (Exod. xxviii, 17; xxxix, 10, according to the Sept. and Vulg., the Sardius (compare Rev. xxii, 20), i.e. carnelian, a well-known, mostly flesh-colored, semi-transparent gem, akin to the chalcedon, valued for its hardness, which, however, did not render it incapable of being cut. The most beautiful specimens come from Arabia (Niebuhr, Beobhr. p. 142). Josephus (War, v, 5, 7) assigns the above meaning to the word; but elsewhere (Ant. i, 1, 7) he calls it sar- dinius. (For other significations, see Gesenius, Thes. Hebr. ii, 66.) See SARDIUS.

2. Pitdak, πετδκ (Exod. l, c.; Ezek. xxviii, 13; Job xxviii, 19), according to most of the versions, the Topaz, ῥωτασθενία (Josephus ῥωτασθενία), described by the Greeks as a gold-yellow stone (Strabo, vii, 770; Diodorus Siculus, iii, 20), although Pliny (xxvii, 28) assigns it as a green color. Hence moderns have regarded the topaz of the ancients as our chrysolite. The passage in Job describes the mineral in question as coming from Cush, and Pliny (vi, 94) mentions a topaz-land in the Red Sea (comp. Diod. Sicil. l, c.). The topaz now so called is a yellow, chryso-wine-colored or citron-yellow stone of the siliceous species (Hoffmann, Mineral. i, 557 sq.; comp. Pareau, Comment. ad Job xxviii, p. 333 sq.). See TOFAZ.

3. Bareketh, בְּרֶכֶת (Exod. xxviii, 17; xxxix, 10; Ezek. xxviii, 18), according to the Sept., Vulg., and Josephus, the Emerald (Rev. xxvii, 20; Tobit xiii, 21, etc.), green, very hard, transparent, with double refraction (Pliny, xxxvii, 16 sq.). The Hebrews obtained this stone almost entirely from Egypt (Pliny, l, c.; comp. Braun, Vestit. p. 517 sq.; yet see Theophr. Lapid. xxiv.). See CARMUNCLE.

4. Nophes, נופס (Exod. xxxix, 11; Ezek. xxvii, 16; xxviii, 18), according to the Sept. and Josephus, the Chrysostome, i.e. Carmuncle. By this name the ancients (Theophr. Lapid. xvii sq.; Pliny, xxxvii, 22) mostly designate red (like glowing coal) brilliant stones ("a simulitidium ignium appellet," Pliny, l, c.), as rubies and garnets. But their most valued caruncules appear to have been the Oriental or Indian rubies. They were of the same kind as the lapiz lazuli (comp. Eichhorn, ut sup. p. 12), which is also the case with the ruby, although they had a degree of hardness—not greater, however, than the sapphire, which was likewise engraved. See EMERALD.

5. Sapphiros, σάπφηρος (Exod. xxiv, 10; xxviii, 18; xxxix, 11; Ezek. xxviii, 10), σάρπθηρος. Our Sapphiros is sky-blue (comp. Ezek. i, 26; Exod. xxix, 10), transparent, and harder than the ruby. What the ancients so named must, according to the description (Pliny, xxxvii, 25; Theophr. Lapid. xvii, xxxvi) be the lapiz lazulí, azure-stone (Beckmann, Erdk. ii, 137 sq.). This is opaque, often shining into dark blue (violet), and sometimes has gold-colored quartzose spots (Hoffmann, Mineral. ii, 276 sq.; comp. i, 348). But as this stone is not so costly as to be justly estimated, as in Job xxviii, 16, nor possessed of sufficient hardness ("inutile sculpitur," Pliny, l, c.) to correspond with its use in Exod. xxviii, it is probable that the Heb. term denotes the true sapphire, which occurs in notices of ancient gems. See SAPPHIRE.

6. Yakalon, יָכָלון (Exod. xxxix, 11; Ezek. xxviii, 13), by which most of the ancient versions and Josephus appear (if we can trace the order of the gems enumerated, see Bellemann, ut sup. p. 47) to understand the Onyx (Luther, with some of the Rabbins, the Diammond, a kind of chalcedon, in resembling the human nail with the flesh showing through. The simply so-called onyx (of the ancients) has milk-white or brown streaks, and is not transparent, but takes a polished, a mirror-like lustre (Pliny, xxxvi, 12; xxviii, 24). Eichhorn understands the Beryl. See DIAMOND.

7. Le'akhem, לְאָכֶה (Exod. xxix, 19; xxxix, 12), Sept., Josephus, Vulg. λειχαυον (ligurio) or λειχαυον, i.e. Jacinth (as in Rev. xx, 20), a transparent, hard, usually hyacinthine stone, but sometimes shading into yellow, almost like gold-dust. In the fire it loses its color. Many ancient cut specimens are still extant. See LIGURIO.

8. Shèbo, שֶבֹ (Exod. xxviii, 19; xxxix, 12), Sept., Vulg. and Josephus Agape (αχαγη), a mixed sort of stone, consisting of quartz, chalcedony, carnelian, flint, Jasper, and so forth, that two kinds are usually compounded; hence agates have all possible ground-colors, with various inclusions of spots, and even figures. The oriental are finer than the European. In high antiquity they were very valuable, but later their value sank considerably (see Pliny, xxxvi, 54; Hoffmann, Mineral. ii, 129 sq.). See AGATE.

9. Achshalmū, אֶכְשַלְמַע (Exod. xxviii, 19, Sept., Vulg., Amethystos (αμέθυστος; comp. Rev. xx, 20), a transparent, mostly violet-blue stone, usually found in a stone-like form, but sometimes octahedron shaped. The ancients prized it highly, especially the specimens from India. But Arabia and Syria also afforded amethysts (Pliny, xxxviii, 40). As the Greek name points to a superstitious attribute of the stone (suppelling intoxication; see Harduin, d'Antiquités, ii, 739), so the Heb. designation refers to another property, d. "dream-stone;" see Simonis, Lex. p. 331). See AMETHYST.

10. Tarshish, צָרֵשִׁי (Exod. xxviii, 20; xxxix, 13; Ezek. i, 16; Dan. x, 6, etc.), according to the Sept. (in the Pentateuch) and Josephus (comp. Rev. xx, 20), the Chrysolite (χρυσολίθος). The stone so now called is generally found crystallized, and is of a pale green color, wholly transparent, with double refraction. According to Pliny (xxxvii, 42), the ancients appear to have had a yellow stone called the chrysolite, which would seem to have been our topaz (but compare Bellemann, ut sup. p. 62). Bredow (Histor. Unterwurst. p. 206) would take the tarshish of the Ezekiel prophecy, as the name probably came from the place so called [see TARSHISH], whence the Phoenicians imported it; a notion altogether unlikely view, inasmuch as electrum was well known in earliest antiquity, was highly prized, and bore an exalted point of estimation (Exod. xxvii, 21). The authority of the ancient versions must here prevail; and when our attention is once directed by the name to Spain, the statement of Pliny (xxxvii, 48) makes it clear that the chrysolite was also produced there. See BERYL.

11. Sko'kam, סְקָרָם (Gen. ii, 12; Exod. xxviii, 9;...
GEMALI 788

GENEALOGY

1. The son of Shaphan, one of the nobles of Judah, and a scribe of the Temple in the time of Jehoiakim. B.C. 605. Baruch read aloud the prophecies of Jeremiah to the people at the official chamber of Gemariah at Jerusalem (Jer. xxxvi, 10; comp. 2 Kings xv, 26). Gemariah’s son may have been the one mentioned in the Psalms (Pliny, xxxvi, 20; see Hoffmann, Mineral., i, 604 sq.). The chrysoprassos (χρυσοπράσας), which the Sept. has in the passage in Gen. for skohem, may be the beryl. Many versions (with Braun, Michaelis, Fichhorn, Pareau, Ewald, and others) understand the skene (Herod. iii. 11). Roland (following the Sept. in Exod. xxxvi, 9, 20) holds it to be emerald, on the ground that Huhah (q.v.) was a part of Scythia, whence emeralds were obtained (Pliny, xxxvi, 16 and 17). See ONYX.

2. A son of Hilkiah, who, with Elazah, son of Shaphan, was sent to Babylon by king Zedekiah in his tribute-money for Nebuchadnezzar. He also took charge of a letter from Jeremiah to the Jewish captives at Babylon, warning them against the false prophets who deluded them by promises of a speedy return to their own land (Jer. xxix, 3, 4). B.C. 694. See JEREMIAH.

GEMIN. See Gem.

GEMNA. See Gem.

Genealogy (Γενεαλογία), literally the act or art of the genealogy, i.e. of him who treats of birth and family, and reckons descents and generations. Hence, by an easy transition, it is often (like istorios) used of the document itself in which such series of generations is set down. In Hebrew the term for a genealogy or pedigree is יֵשָּׁמֵר (yeshmar), "the book of the generations;" and because the oldest histories were usually drawn up on a genealogical basis, the expression is often extended to the whole history, as in the case of the Gospel of Matthew, where "the book of the generation of Jesus Christ" includes the whole history contained in that gospel. So Gen. ii, 4, "These are the generations of the heaven and of the earth," seems to be the title of the history which follows. Gen. vi, 1; vi, 9; x, 10, 27; xxv, 12, 19; xxxvi, 1, 9; xxxvii, 2, are other examples of the same usage, and these passages seem to mark the existence of separate histories from the book of Genesis which is now lost. Nor is this genealogical form of history peculiar to the Hebrews or the Semitic races. The earliest Greek histories were also genealogies. Thus the histories of Acusilus of Argos and of Hecateus of Miletos were entitled Γενεαλογίαν, and the fragments remaining of Xanthus, of Aristocles, and of Lycophron are strongly tinged with the same genealogical element (comp. Josephus, Antip. i, 8), which is not lost even in the pages of Herodotus. The frequent use of the patronymic in Greek, the stories of particular races, as Herulids, Alcaonide, etc., the lists of priests, and kings, and conquests at the gates, preserved at Elis, Sparta, Olympia, and elsewhere; the hereditary monarchical and priestly offices, as of the Branchidae, Euomoids, etc., in so many cities in Greece and Greek Asia; the division, as old as Homer, into tribes, fratrie, and phratries, and the existence of the tribe, the gens, and the families among the Romans; the Celtic clans, the Saxon families using a common patronym, and their royal genealogies running back to the Teutonic gods, these are among the many instances that may be cited to prove the strong family and genealogical instinct of the ancient world. Coming nearer to the Mediterranean, it will be enough to allude to the hereditary principle, and the vast genealogical records of the Egyptians, as regards their kings and priests, and to the passion for genealogies among the Arabs, mentioned by Layard and others, in which the attention paid by the Jews to genealogies is in entire accordance with the manners and tendencies of their contemporaries.

again, conatr. Apion, i, 7, he states that the priests were obliged to verify the descent of their intended wives by reference to the archives kept at Jerusalem; adding that it was the duty of the priests, after every war (and he specifies the wars of Antiochus Epiphan., Pompey, and Q. Varus), to make new genealogical tables from the old ones, and to ascertain what women among the priests were to be permitted to marry their sons instead of grandsons (Gen. xlviii, 5) of Jerusalem. Afterwards the names of persons belonging to different generations would often stand side by side as heads of families or houses, and be called the sons of their common ancestor. For example, Gen. xlvii, 21 contains genealogies of the sons of Juda and the sons of his son; and in Exodus vi, 24 probably enumerates the son and grandson of Asa as heads, with their father, of the families of the Korhites; and in innumerable other instances. If any one family or house became extinct, some other would succeed to its place, called after its own chief father. Hence, of course, a census of any tribe drawn up at a later period would exhibit different divisions from one drawn up at an earlier. Compare, e.g., the list of courses of priests in Zerubbabel's time (Neh. xii) with that of those in David's time (1 Chron. xxiv).

The same facts would be derived from the narrative of any particular genealogy. The sequence of generations may represent the succession to such or such an inheritance or headship of tribe or family rather than the relationship of father and son. Again, where a pedigree was abbreviated, it would naturally specify only such genealogical details as were necessary; e.g., in all cases by Africanus for reconciling the two genealogies of Christ. But there can be little doubt that the registers of the Jewish tribes and families perished at the destruction of Jerusalem, and not before. Some partial records may, however, have survived that event, as it is probable, and indeed seems to be implied in Josephus's statement, that at least the priestly families of the dispersion had records of their own genealogy. We learn, too, from Benjamin of Tudela, that in his day the princes of the captivity professed to trace their descent to David, and he also names others, e.g. R. Ca-

lakme, "a descendant of the house of David, as proved by his pedigree" (Itin. ed. Asher, i, 52), and R. Eleazar ben-Teemseh, "who possesses a pedigree of his descent from the prophet Samuel, and knows the melodies which were sung in the Temple during its ex-

istence. He also mentions the genealogies of the merchant families of the tribe of Levi. The patriarchs of Jerusalem, so called from the Hebrew יְּהֵי רֵעָה, claimed descent from Hillel, the Babylonian, of whom it is said that a genealogy, found at Jerusalem, declared his descent from David and Abital. Others, however, traced his descent from Benjamin, and from David only through a daughter of Shephatiah (WOLF, B. H. iv, 380). But, however tradition may have preserved for a while true genealogies, or imagination and pride have coined fictitious ones after the destruction of Jerusalem, it may be safely affirmed that the Jewish genealogical system then came to an end. Essentially connected as it was with the tenure of the land on the one hand, and with the peculiar privileges of the houses of David and Levi on the other, it naturally failed when the land was taken away from the Jewish race, and when the promise to David was fulfilled, and the priesthood of Aaron superseded by the exaltation of Christ to the right hand of God. The remains of the genealogical spirit among the later Jews (which might, of course, be much more fully illustrated from Rabbinical literature) has only been glanced at to show how deeply it had penetr-

ated into the Jewish national mind. It remains to be said that just notions of the nature of the Jewish genealogies have a great deal in common with a right view to the right interpretation of Scripture. Let it only be remembered that these records have respect to political and territorial divisions, as much as to strictiy genealogical descent, and it will at once be seen how erroneous a conclusion it may be, that all who are cal-

led sons of such a patriarch or chief father, must necessarily be his very children. Just as in the very first division into tribes Manasseh and Ephraim were numerically their descendants, as their sons and grandsons instead of grandsons (Gen. xlviii, 5) of Joseph; afterwards the names of persons belonging to different generations would often stand side by side as heads of families or houses, and be called the sons of their common ancestor. For example, Gen. xlvii, 21 contains genealogies of the sons of Juda and the sons of his son; and in Exodus vi, 24 probably enumerates the son and grandson of Asa as heads, with their father, of the families of the Korhites; and in innumerable other instances. If any one family or house became extinct, some other would succeed to its place, called after its own chief father. Hence, of course, a census of any tribe drawn up at a later period would exhibit different divisions from one drawn up at an earlier. Compare, e.g., the list of courses of priests in Zerubbabel's time (Neh. xii) with that of those in David's time (1 Chron. xxiv). The same facts would be derived from the narrative of any particular genealogy. The sequence of generations may represent the succession to such or such an inheritance or headship of tribe or family rather than the relationship of father and son. Again, where a pedigree was abbreviated, it would naturally specify only such genealogical details as were necessary; e.g., in all cases by Africanus for reconciling the two genealogies of Christ. But there can be little doubt that the registers of the Jewish tribes and families perished at the destruction of Jerusalem, and not before. Some partial records may, however, have survived that event, as it is probable, and indeed seems to be implied in Josephus's statement, that at least the priestly families of the dispersion had records of their own genealogy. We learn, too, from Benjamin of Tudela, that in his day the princes of the captivity professed to trace their descent to David, and he also names others, e.g. R. Calakme, "a descendant of the house of David, as proved by his pedigree" (Itin. ed. Asher, i, 52), and R. Eleazar ben-Teemseh, "who possesses a pedigree of his descent from the prophet Samuel, and knows the melodies which were sung in the Temple during its existence. He also mentions the genealogies of the merchant families of the tribe of Levi. The patriarchs of Jerusalem, so called from the Hebrew יְּהֵי רֵעָה, claimed descent from Hillel, the Babylonian, of whom it is said that a genealogy, found at Jerusalem, declared his descent from David and Abital. Others, however, traced his descent from Benjamin, and from David only through a daughter of Shephatiah (WOLF, B. H. iv, 380). But, however tradition may have preserved for a while true genealogies, or imagination and pride have coined fictitious ones after the destruction of Jerusalem, it may be safely affirmed that the Jewish genealogical system then came to an end. Essentially connected as it was with the tenure of the land on the one hand, and with the peculiar privileges of the houses of David and Levi on the other, it naturally failed when the land was taken away from the Jewish race, and when the promise to David was fulfilled, and the priesthood of Aaron superseded by the exaltation of Christ to the right hand of God. The remains of the genealogical spirit among the later Jews (which might, of course, be much more fully illustrated from Rabbinical literature) has only been glanced at to show how deeply it had penetrated into the Jewish national mind. It remains to be said that just notions of the nature of the Jewish genealogies have a great deal in common with a right view to the right interpretation of Scripture. Let it only be remembered that these records have respect to
GENEALOGY

seen in Ruth iv, 18-22, or 1 Chron. iii. Of the ascending,
1 Chron. vi, 33-43; Ezra vii, 1-5. The descending
form is expressed by the formula A begat B, and
B begat C, etc.; or, the sons of A, B his son, C his son,
etc.; or, the sons of A, B, C, D; and the sons of B, C,
D, E; and the sons of C, D, E, etc. The ascending
is inverted in the same way. Of the two, it is
obvious that the descending scale is the one in which
we are most likely to find collateral descents, inasmuch
as it implies that the object is to enumerate the heirs
of the person at the head of the stem; and if direct
heirs failed at any point, collateral ones would have to
be found. It is thus that in London, where the
descendants of the Lord's protection were preserved, when the direct line failed, the
heir would naturally place his own name next to his
predecessor, though that predecessor was not his father,
but only his kinsman; whereas in the ascending scale
there can be no failure in the natural order of things. But
neither form is in itself more or less fit than the other
to express either proper or imputed filiation.

Females are named in genealogies when there is
anything remarkable about them, or when any right
or property is transmitted through them. See Gen.
xxxvi, 1-10; xxxvii, 1-25; xxxix, 1-27; Exod. vi, 28; 2
Numb. xxvi, 58; 1 Chron. ii, 4, 19, 55, 50, etc.
The genealogical lists of names are peculiarly liable
to corruptions of the text, and there are many such in
the books of Chronicles, Ezra, etc. Jerome says of
corruptions of the Hebrew text that the list of names is
more likely to suffer than the more material,
the lists of high-priests in Josephus are so corrupt,
that the names are scarcely recognisable. This
must be borne in mind in dealing with the genealogies.
The Bible genealogies give an unbroken descent of the
house of David from the creation to the time of
Christ. The genealogies in books of the New Testament
must both have supplied
the same to the priestly and many other families.
They also inform us of the origin of most
of the nations of the earth, and carry the genealogy of the
Edomitic sovereigns down to about the time of Saul.
Viewed as a whole, it is a genealogical collection of
surpassing interest and accuracy (Rawlinson, Herodot.
vol. i, ch. ii; Burmington, General Tables of the Old
and New Testaments, London, 1836; Selden's Works,
passim).

GENEALOGY OF JESUS CHRIST, the only one

1. Object of this Genealogical Record.—From the foregoing
article it is evident that no nation was more
careful to frame and preserve its genealogical
records than Israel. Their sacred writings contain geneal-
ogical lists that go back through a period of about 3500
years, from the creation of Adam to the capableness
of Judah. Indeed, we find from the books of Ezra and
Nehemiah that the same carefulness in this matter was
observed after the captivity; for in Ezra ii, 62 it is
expressly stated that some who had come up from Babylon
had sought their register among those that were reck-
oned by genealogy, but were not found; therefore they
were, as polluted, removed from the priesthood.
The division of the whole Hebrew nation into tribes, and
the allotment to each tribe of a specified portion of the
land of Canaan as an inalienable possession, rendered it
indispensable that they should keep genealogical tables.
God had, however, a still higher object that of
giving stability to property in Israel in leading succes-
sive generations of his people thus to keep an accu-
curate list of their ancestry. That they should do this
was enjoined, 23-29, and required from them, 22-24, and the
voice of prophecy declared that the promised Messiah
should be of the seed of Abraham, of the posterity of Isaac,
of the sons of Jacob, of the tribe of Judah, and of the fam-
ily of David.

The Rabbis affirm that after the Captivity the Jews
were most careful in keeping their pedigrees (Yalk. 1.
Gemara, Glos. fol. xiv. 2). Since, however, the period
of their destruction as a nation by the Romans, all their

tables of descent seem to be lost, and now they are
utterly unable to trace the pedigree of any one Israelite
who might lay claim to be their promised and still ex-
pected Messiah. Hence Christians assert, with a force
that no reasonable and candid Jew can resist, that Shi-
lok must have come.

The popular belief of Aaron having ceased, the posses-
sion of the land of Canaan being transferred to the
Gentiles, there being under the N.T. dispensation no
difference between circumcision and uncircumcision,
Barbarian and Scythian, bond and free, there is but one
who genealogy it concerns us as Christians to be ac-
quainted with, that is the Lord Jesus Christ. The
prophets announced as the seed of Abraham, and the
son of David, and the angels declared that to him
should be given the throne of his father David, that
he might reign over the house of Jacob forever. His
descendants from David and Abraham being therefore
an essential part of his Messiahship, it was right that
his genealogy should be given as a portion of gospel
truth. Considering, further, that to the Jews first he
was manifested and preached, and that his descent
from David and Abraham was a matter of special in-
terest to them, it seems likely that the Gentile
descent would be one especially adapted to convince
them; in other words, that it would be drawn from
documents which they deemed authentic. Such were
the genealogical records preserved at Jerusalem. See
GENEALOGY. Now when to the above consideration we
add that it was only from this list that the messianic
prophecies had been absolutely made out from authentic records for the purpose of
the civil census ordered by Augustus, it becomes mor-
ally certain that the genealogy of Jesus Christ was ex-
tracted from the public registers. Another considera-
tion adds yet further conviction. It has often excited
surprise among Jews and Gentiles that the genealogy of Christ should both
be traced through Joseph, and not Mary. But if
these genealogies were those contained in the public
registers, it could not be otherwise. In them Jesus, the
son of Mary, the espoused wife of Joseph, could only
appear as Joseph's son, and not as Mary's. It is
transcending the pages of the gospels, the evangelists
only added the qualifying expression "as was sup-
posed" (Luke iii, 23, and its equivalent, Matt. i, 16).

We find other traces of the existence of the public
tables of descent in the New Testament: the taxation
spoken of by Luke iv, 1, 2, 3, would clearly show this,
for how could each one be able to go to his own city
unless he knew the specific tribe to which he belonged?
Hence it was, we think, that Paul was able with confidence to appeal to the Hebrews concerning the
lineage of appeal, "for it is as it was in the

life of our Lord in the days of the Maccabees" (Heb. vii, 14; 2 Tim.
ii, 8). To evince this beyond reasonable doubt, it
pleased God to give us, by his inspired servants Matthew and Luke, these genealogies.

II. Statement of the Subject.—The following is a
tabular view of these records, with which it will be
convenient to compare the parallel lists as found in the
Hebrew copies of the Old Testament.

III. Solution of Difficulties.—We do not find that there was any objection made to these genealogies, either by Jew or Gentile, during the 1st century. Had any difficulty on this head existed, we may reasonably suppose that the Jews, of all others, would have been both too ready and too bold to detect and expose it. We may, therefore, fairly conclude that, whatever difficulty meets us now in harmonizing our Lord’s pedigree as given by the two evangelists, it could have had no place in the first age of the Christian Church. In subsequent ages, however, objections were and are made to the genealogies of Matthew and Luke.

A preliminary difficulty, which applies, however, equally to the O.T. lists, lies in the small number of names between Judah and David, being only nine for a period of 433 years, making the incredible average of nearly a century for each generation. Hence arises the presumption that some names have been omitted (see Browne, Ordo Seculorum, p. 283), and at least three—more probably nine—must be supplied, in order to reduce this average to the ordinary age of paternity; three, Judah, Boaz, and Jesse, are known to have been advanced in life at the birth of their youngest sons, and Salmon was considerably so. The synchronism of Nahshon with the Exode, and Boaz with the earlier judges, requires the insertion of these omitted

2. Issac. 2. Reboam.
3. Jacob. 3. Abijah.
5. Phares. 5. Jehoshaphat.
10. Salmon. 10. Zedekiah.

(2.) It is objected that Matthew omits three kings, viz. Abasihah, Joash, and Amsiah (comp. 1 Chron. iii, and 2 Kings viii), from his second series. In reference to this objection, it might suffice to say that Matthew, finding fourteen generations from Abraham to David inclusively, contracted, most likely in order to assist memory and give uniformity, the second and possibly the last series. If we compare Exra vii, 1-5 with 1 Chron. vi, 3-15, it will be seen that Exra, in detailing, with apparent particularity, His own lineage, descends from Aaron, calls Asariah, who was high-priest at the dedication of the first Temple, the son, not of Johanan his father, but of Meraioth, his ancestor at the distance of six generations. Doubtless the desire of abridgment led him to omit names with which there were connected no very remarkable prophetic anticipations. Some of the early fathers, however, give a different solution of this difficulty. Hilary (in Matthew, cap. i) says: “Three generations are designedly passed

over by Matthew, for Jara is said to have begun Oza, when, in fact, he was the fourth from him, i.e. Jara begat Oza from the Gentle family of Ahab, whose wife was Jezebel." That the omission of the three kings was a punishment inflicted upon the house of guilty Joram to the fourth generation is the view yet Mathew; the fact that the three from Luke in Matthew's genealogy, and Melchi, the third in Luke's list, married successively the same woman, by whom the former begat Jacob, and the latter Heli. Heli dying without issue, his maternal brother took his widow to wife, by whom he had Joseph, who, according to the manner in which Luke is written, is said as the son of Heli, though naturally the son of Jacob, as Matthew records him. This is the explanation which was generally admitted by Eusebius, Nazianzen, the writer of Ad orthodoxos, and others, for ages.

(3.) Matthew terms Zoroabel the son of Salathiel, whereas in 1 Chron. iii. 19, he is called the son of Pedaias. How is this? We answer that the Sept. version of 1 Chron. iii agrees with Matthew in using, and ording this is the manner in which Luke is written; Zoroabel is designated in Ezra, Nehemiah, and Haggai. Josephus also calls him the son of Salathiel. Were he not the immediate son of Salathiel, but of Pedaias, yet is it suitable to the language of the Jewish nation to count the grandson the son of the grandfather. Thus Laban is called the son of Nahor (Gen. xxix, 5), as being the son of Bethuel, who was, in fact, the son of Nahor (xxxiv, 47). If, according to another manner of rendering ver. 17 and 18, Salathiel and Pedaias were brothers, Zoroabel might have been, by the Jewish law, the natural son of the one and the legal son of the other. See PEDAIAS.

(4.) It is again asked, if it be, as Matthew states, that Salmon, son of Naomi, prince of Israel, had married so remarkable a person as Rahab, how then comes it that such a circumference is not noticed in the book of Judges, nor yet in thepentateuch. Indeed, it is possible that if we remember that this book, full as it is in describing the partition of Canaan among the several tribes, is yet very silent concerning the exploits, and even names, of the subordinate leaders of Israel. There is nothing, therefore, depending in the circumference that it should pass over in total silence Salmon's marriage with Rahab. Had the matter in question been the exposal of Rahab by Joshua himself, the presumption against its truth would be very different. Indeed Kimchi, in his Commentary on the Book of Joshua, adresses a tradition to this effect, taken of the Babylonian Talmud. Every consideration, moreover, of a chronological character is in favor of the circumstance of the son of Naomi, born to him in the wilderness, being married to Rahab. See RAHAB.

(5.) But a far graver objection than that which is alleged is urged upon the reader for having omitted names is brought against Luke for having inserted that of Cain as son of Arphaxad—a name neither to be found in the Hebrew nor Samaritian text, nor yet in any of the targums or versions, save the Sept. We may infer, then, that either Philo d'Ephraim, or another who in other respects followed this version, receive this name as genuine, that it was not found in the earlier copies of the Sept.; it was, no doubt, borrowed from the corrupted Sept. which has come down to us, containing the name in question, but which cannot, with any propriety, be raised to a level of authority with the Heb. text. It is clear, moreover, that Irenaeus, Africanus, Eusebius, and Jerome reject it as an interpolation. (See, on this subject, Whitby's Preface to Reader, and Lightfoot's Hymm; also Usher's Dissertation on Cainam, and Kiddler's Demonstr. of Measiam.) See CAIN.

2. We are now to compare the evangelists as to the points on which they agree and differ. It does not appear that Celsus attacked the genealogies on the score of any inconsistency with each other. Not so the emperor Theodosius; he makes his remarks on the specific ground of attack. Jerome (in Matt.) observes, "Julianus Augustus in this place attacks the evangelists on the ground of discrepancy: Matthew calls Joseph the son of Jacob, whereas Luke calls him the son of Heli! Had Julian been better acquainted with the modes of speech of the Hebrews, he would have seen that one evangelist gives the natural and the other the legal pedigree of Joseph."
also, on both hypotheses, Lightfoot’s \textit{Harmony Ex.}; South’s \textit{Sermon on Rev. xii}, 16, vol. iii; Wetstein, \textit{ad Mathen}, i, 17; Bishop Kidder’s \textit{Demonst. of Messiah}, part. ii to ch. xiii; Hale’s \textit{Analysis of Chronology}, vol. iii.

In constructing their genealogical tables, it is well known that the Jews reckoned wholly by males, rejecting, where the blood of the grandfather passed to the grandson through a daughter, the name of the daughter herself, and counting that daughter’s husband the son of the paternal grandfather (Num. xxvil. 38; xxvii. 4–7). On this principle Joseph, begotten by Jacob, marries Mary, the daughter of Hel, and in the genealogical register of his wife’s family is counted for Hel’s son. Salaheth, begotten by Jeconiah, marries the daughter of Ner, and, in like manner, is accounted his son: in Zorobel, the offspring of Salaheth and Ner’s daughter, the lines of Solomon and David and Nathan coalesce; Joseph and Mary are of the same tribe and family; they are both descendants of David in the line of Solomon; they have in them both the blood of Nathan, David’s son. Joseph deduces his descent from Abjud (Matt. i, 13), Mary from Rhesa (Luke iii, 27), sons of Zorobel. The genealogies of Matthew and Luke are parts of one perfect whole, and each of them is essential to the explanation of the other. By Matthew’s table we prove the descent of Mary, as in Joseph, from Solomon; by Luke’s we see the descent of Joseph, as well as Mary, from Nathan. But still it is asked how know we that Mary was the daughter of Ner?

[1.] Because the angel Gabriel, at the Annunciation, told the Virgin that God would give her divine son the throne of his father David (Luke i, 32), and thus it was necessary to prove this by her genealogy afterwards.

[2.] Mary is called by the Jews הָיָה לִתְבּוּן, “the daughter of Hel,” and by the early Christian writers “the daughter of Joakim and Anna” (Lightfoot, on Luke iii, 25). But Joakim and Eliakim (as different names in Hebrew for God) are sometimes interchanged (2 Chron. xxxvi. 4): Eli or Hel, then, is the abridgment of Eliakim.

[3.] The evangelist Luke has critically distinguished the real from the legal genealogy by a parenthetical remark, Ἰωάννης δὲ Ἰωάννης Ἰακώβου ἰδιός Ἰακώβου (Luke i, 31), “Jesus being (as was assumed) the son of Joseph (but in reality), the son of Hel,” or his grandson by the mother’s side, for so the eclips is to be supplied. Moreover, on comparing the two tables, we find that from Abraham to David they agree with each other because genealogies in accordance with genealogies of Genesis, Ruth, and 1 Chron. iii; but from David to Joseph they are evidently distinct lines of pedigree, agreeing only in two persons, viz. Salaheth and Zorobel.

Again, it is objected that there are now in Luke’s genealogy seventy-two names; whereas Irenaeus, Africanus, and other early fathers, acknowledge but seventy-two. But if we omit the names Math, Mathathias, Mele, Mainam, and Casim, as being interpolations, then the number will be reduced to seventy-two.

It is said that Abjud and Rhesa are called by the evangelists the sons of Zorobel, though in 1 Chron. iii, 19 we have no mention of them among his sons. We remark that it was a custom with the Jews to call the same person by different names, and that this custom was prevailingly observed at the time of the captivity (Dan. i, 6, 7; also comp. 2 Sam. iii, 3 with 1 Chron. iii, 1).

Lastly, it is inquired whether the evangelists had their genealogies from Zorobel to Christ, there being nothing of them to be found in Scripture. We answer, from those authentic public tables kept by the Jews, of which, as before noticed, Josephus speaks; and regarding which also Eusebius (\textit{Hist. Eccles. i}, 1) says, \textit{Omnis Hebraorum generationes descriptas in archiia Templi secretioribus habebantur}. It was doubtless from this source that they had the above-named parts of our Lord’s legal and natural pedigree; for, otherwise, they would have exposed themselves to the censure of the Jews; nor could the apostles have appealed, as they did, with confidence, to Christ’s pedigree, as answering all the requirements of prophecy.

Jacob's heir was Joseph
Jesus, called Christ.

The violent character of these suppositions is sufficiently obvious. (See each name in its place.)

(3.) Others, like Alford (Comment. ad loc.), content themselves with saying that solution is impossible without further knowledge than we possess. But this is a view in which, with the actual documents before us, few will be disposed to acquiesce.

Genebrard, Gilbert, a celebrated Benedictine, was born at Rioni, in Auvergne, in 1537. Having entered into the Benedictine order at the abbey of Maussac, he studied at Paris, where he learned Greek under Ternebius. In 1569 he was made professor of Hebrew at the Royal College of Navarre. In 1592 he was made archbishop of Aix by Gregory XIV. He had, in the same year, published a "Treatise of Elections" (De Sacrarum Electorum Jure et necessitate, ad Ecclesiam Gallicam Redintegrationem), in which he maintained that the elections of bishops belonged of right to the clergy and people, and argued acutely against the nominations of kings and princes. The Parliament of Aix in 1566 decreed that his book should be burnt by the hands of the common executioner, and, after depriving the author of his see, condemned him to banishment from the kingdom, prohibiting his return to it on pain of death. He was afterwards permitted to return to his priory at Semur, where he died on the 24th of July, 1567. Genebrard was one of the most learned men of his time. He wrote in Latin, besides the work above mentioned, and others of which a list is given in Dupin, A

Sacred Chronology (5vo).—Notes upon the Scripture:—A Commentary upon the Psalms (5vo), in which he particularly applies himself to reconcile the Hebrew text with the vulgar Latin, and defends the Septuagint version; the best edition is that of Paris (1868, fol.).—A Translation of the Psalms of David (2 vols. 8vo).—Dupin, Exe. Writ. cent. xvi.; Hoefer, Nouv. Biog. Gen. xix. 688; Hook, Exe. Biog. v. 307.

General (of religious order), "in the Roman Catholic Church, the superior head, under the pope, of the aggregated communities throughout Christendom belonging to a religious order. The governing authorities of the monastic orders in the Roman Catholic Church may be arranged in three classes: (1.) The superiors of individual convents or communities, called in different orders by various names, and having no authority over the whole of the order, but possessing considerable privileges and rights; (2.) The provincial or major superiors; (3.) The general or major superiors, who have authority over the whole of the order, being immediately responsible to the pope, and possessing, under the pope's authority, the right to examine and suppress irregularities in the order."

General Assembly. See ASSEMBLY, GENERAL.

General Councils. See COUNCILS.

General Vicar. See VICAR-GENERAL.

Generation (γενεά, γενεσία, the act; γενεσία, the result: γένος, γένος, a period). Considerable obscurity attends the use of this word in the English version, which arises from the translators having merged the various meanings of the original word, and even of several different words, in one common term, "generation." The remark, too, is just, that in the literal translations of the Scriptures, the word "generation" generally occurs wherever the Latin has generatio, and the Greek γενεά or γενεσία (Rees's Encyclopaedia, article Generation). The following instances seem to require the original words to be understood in some one of their derivative senses: Gen. ii, 4, "These are the generations" (γενεανίου, Sept. ἡ γενεάντος γενεσίας; Vulg. generationis), rather "history," or "the genealogy of," rather than "the generation of the," as in the Greek words, Matt. i, 1, are rendered "genealogy," etc., by recent translators: Campbell has "lineage." Gen. v, 1, "The book of the generations" (γενεανίου, Βιβλίο τῆς γενεανίου; Sept. as before; Vulg. librum generationis) is properly a family register, a history
of Adam. The same words, Gen. xxxvii, 2, mean a history of Jacob and his descendants; so also Gen. vi, 9; Ex. 1, and elsewhere. Gen. vii, 1, "In this generation" (טֹּבָה יְוָּעָב, Sept. יְוָּעָב תֹּבָהי, Vulg. in generationem) is identical in this sense. Gen. xxv, 6, "In the fourth generation" (טֹּבָה יְוָּעָב, Sept. יְוָּעָב תֹּבָהי, Vulg. generatio) is an instance of the word in the sense of a certain assigned period. Ps. xlix, 19, "The generation of his fathers" (טֹּבָה יְוָּעָב, Sept. יְוָּעָב תֹּבָהי יֲבָּרוֹע, Genusius renders "the dwelling of his fathers," i.e., the grave, and adduces Isa. xxxviii, 12. Ps. lxii, 22, "The generation of thy children" (טֹּבָה יְוָּעָב, Sept. יְוָּעָב תֹּבָהי וְאֵּבֵן סֹא), is "class," "order," "description," as in Prov. xxx, 11, 12, 13, 14. Is. lii, 8, "Who shall declare his generation?" (טֹּבָה יְוָּעָב יְוָּעָב תֹּבָהי יְנֵגָּמֶר וּלָלֶמֶר, Vulg. generalis) Lowth renders "manner of life," in translation and note, but adduces no precedent. Consider it equivalent to עָרָי, ver. 10: יְנֵגֶר (Sept.) answers to עָרָי, Esth. ix, 28. Josephus uses πόλιν γενεας, *Ant.* i, 10, 3 (Hengstenberg, *Christology of the Old Testament*, vol. i, Washington, 1860-61; Pauly, Analect. Hebr. p. 162, Oxford, 1880). Michaelis renders it, "Where was the providence that cared for his life?" Genesis, "Where was the providence of the temporalities reflected?" Sellier, "Who can describe his length of life?" In the New Testament (Matt. i, 17), γενεας is a series of persons, a succession from the same stock; so used by Josephus (*Ant.* i, 1, 2; Philo (Vit. Moa. i, 653); Matt. iii, 7, γενεας εξεδρας, is well rendered "race" or "tribe" by the Revised Version. Matt. xxiv, 34, ἡ γενεας αὐτῆς means the generation or persons then living contemporary with Christ (see Macknight's *Harmony* for an illustration of this sense). Luke xvi, 8, τὸν γενεας τῶν Ἰουδαίων, "in their generation," etc., wiser in regard to their dealings with the men of their generation; Rosenmüller gives the rendering (ς. αὐτῶν, see). 1 Pet. ii, 8, γενεας ἰδιωτων, is a "chosen people," quoted from Sept. of Ver. of xxxii, 20. The ancient Greeks, and, if we may credit Herodotus and Diodorus Siculus, the Egyptians also, assigned a certain period to a generation. The Greeks reckoned three generations for every hundred years, i.e. 334 years to each; Herod. ii, 142, γενεας τρις ἀνδρῶν ἵκετων ἐνα ιστώ, "Three generations of men make one hundred years." This is nearly the present computation. To the same effect Clem. Alexandria speaks (*Strom.* i, 2); so also Philo, *De oculo,* first mentioning the age of Moses. Homer speaks of the age of the heroes (Il. i, 290), ἡ δ' ἐκεῖν ἡδο τίνι γενεας, "two generations," says it means ὑπερβασι τὰ ἐκεῖνα ἐγρή, "he was above sixty years old." The Greeks, however, assigned different periods to a γενεας at different times (*Perizonius, Orig. Aegypt. p. 175 sqq.; Josiah, Fercul. Literar. p. 6*). The ancient Hebrews also reckoned by the generation, and assigned different spaces of time to it at different periods of their history. In the time of Abraham it was one hundred years (comp. Gen. xx, 16, "In the fourth generation they shall come hither"). This is explained in ver. 15, and in Exod. xiii, 40, for four hundred years. Caleb was fourth in descent from Judah, and Moses and Aaron were fourth from Levi. In Deut. i, 35; ii, 14, Moses uses the term for thirty-eight years. In later times (Baruch vi, in the Epistle of Jeremiah, ver. 2) γενεας clearly means ten years. The seventh in this age. Gen. xvii, 7, "In these generations living in the same sense (Il. i, 250); also Herodotus (i, 5). (See Genesiuss's and Robinson's Lexicon, under the above Heb. and Gr. words.) Kitto, s. v. *See Genealogy.*

Generation, Eternal, of the Son of God. 

See Christology; Sonship of Christ.

Genesis (Sept. Pisanis, generation), the first book of the Law or the Pentateuch, is in Hebrew called בְּרֵאשִׁית, from the word with which it begins. See Law.

1. General Character.—The book of Genesis has an interest and an importance to which no other document of antiquity can be compared. If, negatively, it is the oldest book in the world, it is the oldest which lays any claim to being a trustworthy history. There may be some papyrus-rolls in our museums which were written in Egypt about the same time that the genealogies of the Semiitic race were so carefully collected in the tents of the patriarchs. But these rolls are better than the registers of little service to the historian. It is said that there are fragments of Chinese literature which, in their present form, date back as far as 2200 years B.C., and even more (Gfrörer, *Oripathie*, i, 215); but they are either calendars containing astronomical calculations, or records of merely local and temporary interest. Genesis, on the contrary, is rich in details respecting other races besides the race to which it more immediately belongs; and the Jewish pedigrees there so studiously preserved are but the scaffolding whereon is reared a temple of universal history.

If the religious books of other nations make any pretensions to vie with it in antiquity, in all other respects they are immeasurably inferior. The Mantras, the oldest portions of the Vedas, are, it would seem, as old as the 4th century B.C. (see *Cyclopaedia* vii, 283, 284); and from Wilson's preface to his translation of the *Rig-Veda*). The Zendavesta, in the opinion of competent scholars, is of very much more modern date. Of the Chinese sacred books, the oldest, the Yihking, is undoubtedly of a venerable antiquity; but it is not certain that it was a religious book at all, while the writings attributed to Confucius are certainly not earlier than the 6th century B.C. (Gfrörer, i, 270).

But Genesis is neither like the Vedas, a collection of hymns more or less sublime; nor like the Zendavesta, a philosophic speculation on the origin of all things; nor like the Yihking, an unintelligible jumble whose expositors could twist it from a cosmological essay into a standard treatise on ethical philosophy (Hardwick, *Christ and other Masters*, iii, i, 16). It is a history, and it is a religious history. The earlier portion of the book, as far as the end of the eleventh chapter, may properly be termed a history of the world; the latter is a history of the fathers of the Jewish race. But from first to last it is a religious history: it begins with the creation of the world and of man; it tells of the early happiness of a paradise in which God spake with them; it tells of man's falling from grace; it tells of the promise of redemption; of the gigantic growth of sin, and the judgment of the Flood; of a new earth, and a new covenant with man, its unchangeableness typified by the bow in the heavens; of the dispensation of the human race over the world. It then passes to the story of redemption; to the promise given to Abraham, and renewed to Isaac and to Jacob, and to all that chain of circumstances which paved the way for the great symbolic act of redemption, when with a mighty hand and a stretched out arm Jehovah brought his people out of Egypt.

It is very important to bear in mind this religious aspect of the history if we would put ourselves in a position rightly to understand it. Of course the facts must be treated like any other historical facts, sifted in the same way, and subjected to the same laws of evidence. Moses can put on record all that was done; but we must not forget the evident aim of the writer. It is only in this way we can understand, for instance, why the history of the Fall is given with so much minuteness of detail, whereas of whole generations of men we have nothing but a bare catalogue. Only in this way can we account for the fact that far the greater portion of the book is occupied, not with the fortunes of nations, but with the biographies of the three patriarchs. For it was to Abraham, to Isaac, and to Jacob that God revealed himself. It was to
them that the promise was given, which was to be the hope of Israel till "the fulness of the time" should come. Hence to these wandering sheiks attaches a grandeur, an interest, other than that of the Is-Beals and Nimrods of the world. The minutest circumstances of their lives are worthier to be chronicled than the rise and fall of empires. This is not merely from the patriotic feeling of the writer as a Jew, but from his recognition of the chosen race. He lived in the land given to the fathers; he looked for the seed promised to the fathers, in whom himself and all the families of the earth should be blessed. See ABRAHAM.

II. Unity of Design. — This venerable monument, with all the sacred literature of the Hebrews commences, and which forms its real basis, is divided into two main parts; one universal, and one special. The most ancient history of the whole human race is contained in chapters i.-xi., and the history of Israel's ancestors, the patriarchs, in chapters xii.-l. These two parts are, however, the Jewish nation was confected with each other that it would be erroneous to ascribe to the first merely the aim of furnishing a universal history. That a distinct plan and method characterize the work is now generally admitted. This is acknowledged, in fact, not only by those who contend for, but by those who deny the existence of different documents in the book. Ewald and Tuch are no less decided advocates of the unity of Genesis, as far as its plan is concerned, than Ranke or Hengstenberg. Ewald, indeed (in his Composition der Genesis), was the first who established the identity, and clearly pointed out the principle on which it rests. What, then, is the plan of the writer? First, we must bear in mind that Genesis is, after all, but a portion of a larger work. The five books of the Pentateuch form a consecutive whole: they are not merely a collection of ancient and儒家, and the history of Abraham, Isaac, and Jacob. In a word, creation and redemption are eternally linked together. This is the idea which, in effect, gives its shape to the history, although its distinct enumeration is reserved for the N. T. There we learn that all things were created by God (Col. i. 16, 17); and that by the Church is made known unto principalities and powers the manifold wisdom of God. It would be impossible, therefore, for a book which tells us of the beginning of the Church, not to tell us also of the beginning of the world. The history of Genesis has thus a character at once special and universal. It embraces the world; it speaks of God as the God of the whole human race. But, as the introduction to Jewish history, it makes the universal interest subordinate to the national. Its design is to show how God revealed himself to the first fathers of the human race, and how he might be shown to himself a nation who should be his witness in the midst of the earth. This is the inner principle of unity which pervades the book. Its external framework we are now to examine. Five principal persons are the pillars, so to speak, on which the whole structure of the world is erected; Abraham, Isaac, and Jacob.

(1.) Adam. — The creation of the world, and the earliest history of mankind (ch. i.-iii.). As yet, no divergence of the different families of man.

(11.) Noah. — The history of Adam's descendants to the death of Noah (ch. iv.-v.). In this book we have the line of Cain branching off while the history follows the fortunes of Seth, whose descendants are traced in genealogical succession, and in an unbroken line as far as Noah, and (3) the history of Noah himself (ch. vii., viii.), continued to his death.

(III.) Abraham. — Noah's posterity till the death of Abraham (x-xxyv., 18). Here we have (1) the peopling of the whole earth by the descendants of Noah's three sons (xi, 1-9). The history of two of these is then dropped, and (2) the line of Shem only pursued (x, 10-22) as far as Terah and Abraham, where the genealogical table breaks off. (3) Abraham is now the prominent figure (xii-xxyv., 18). But as Terah had two other sons, Nahor and Haran (xi, 27), some notices respecting their families are added. Lot's migration with Abraham into the land of Canaan is mentioned, as well as the fact that he married Ammon (xix, 38, 36), nations whose later history was intimately connected with that of the posterity of Abraham. Nahor remained in Mesopotamia, but his family is briefly enumerated (xxii, 20-24), chiefly, no doubt, for Rebekah's sake, who was afterwards the wife of Isaac. Of Abraham's own children, there branches off first the line of Ishmael (xxi, 9, etc.), and next the children by Keturah; and the genealogical notices of these two branches of his posterity are apparently brought together (xxv, 1-6, and xxv, 12-18), in order that, being here severally dismissed at the end of Abra-
ham's life, the main stream of the narrative may flow in the channel of Isaac's fortunes.

(IV.) Isaac.—Isaac's life (xxvi, 19-35), a life in itself retiring and uneventful. But in his sons the final separation takes place, leaving the field clear for the great story of the chosen seed. Even when Na
dor's family comes out of Egypt (xxviii), the two sons of Jacob who then drops out of the narrative in order that (2) the history of the patriarchs may be carried on without interruption to the death of Joseph (ch. xxxvii-1).

Thus it will be seen that a specific plan is preserved throughout. The main purpose is never forgotten. God's relations with Israel holds the book, as in the writer's mind. It is this which it is his object to convey. The history of that chosen seed who were the heirs of the promise, and the guardians of the divine oracles, is the only history which interprets man's relation to God. By its light all others shine, and may be traced back to it. It is connected with the history of different families drop off here and there from the principal stock, their course is briefly indicated. A hint is given of their parentage and their migrations; and then the narrative returns to its regular channel. Thus the whole book is connected as a whole, while a certain amount of detail remains, as the various families of Israel are traced, supplying details at those points where the form is abrupt and deficient, etc. These two documents are said to have been subsequently combined by the hand of an editor, so ably as often to render their separation difficult, if not altogether impossible. But Banke, Hengstenberg, Droysel, Havercorn, Baumgarten, Keil, and others, maintain that Genesis is a book closely connected in all its parts, and composed by one author, while the use of the two different names of God is not owing to two different sources on which Genesis is founded, but solely to the different significations of these two names. The weight of probability lies on the side of those who argue for the existence of distinct documents, but only as sources to some extent which, together with original materials, were brought by the author into one homogeneous whole.

1. It is impossible to renew the previous assumption that Genesis is founded on written sources, but also to determine more closely the character of those sources, has gained more lasting approval among the learned. Which different names of God are prevalent in different portions of Genesis is a question much discussed by early theologians and rabbinists. Astruc, a Belgian physician, in his Conjectures sur les Memoires originaires, etc. (Bruxelles, 1758-8), was the first to apply the two Hebrew names of God, Jehovah and Elohim, to the subject at issue. Astruc assumed that there had originally existed a number of isolated documents, some of which, he thought, were attributed to different authors, and that at a later period these documents were united into the present form of Genesis. Eichhorn's critical genius procured for this hypothesis a favorable reception almost throughout the whole of Germany. See Astruc. Eichhorn pruned away its earlier branches, and fixed his own view to the assumption of only two different documents, respectively characterized by the two different names of Jehovah and Elohim. Other critics, such as Ilgen (Urkunden des Jerusalem Tempel-Archives, 1788), Grumbach (Adumbratio libri Genesee secundum fontes, 1808), and others, went still farther, and presupposed four different documents in Genesis. Vater went much beyond Eichhorn. He fancied himself able to combat the authenticity of the Pentateuch by producing an hypothesis, which substituted for Eichhorn's "document-hypothesis" his own "fragment-hypothesis," which obtained great authority, especially on account of its being adopted by De Wette.

According to this opinion, Genesis, as well as the greater part of the Pentateuch, consists of a great number of very small detached hypostases, usually unconnected with each other, but transcribed seriatim, although originating in very different times, and from different authors. This "fragment-hypothesis" has now been almost universally given up. Even its most tenacious defenders, not excepting De Wette himself, have relinquished it. In its place the former "document-hypothesis" has been resumed by some critics, simplified, however, and supported by new and better arguments. There is at present a great variety of opinion among divines concerning this hypothesis. The leading features of this theory are comprised in the following summary. According to the view of Stahelin, De Wette, Ewald, Von Bohlen, Tuch, Knobel, Delitzsch, and others, Genesis is founded on two principal original documents. That of Elohim is closest connected in its parts, and forms a whole, while that of Jehovah is more incomplete. Smooth, in its form, supplying details at those points where the form is abrupt and deficient. These two documents are said to have been subsequently combined by the hand of an editor, so ably as often to render their separation difficult, if not altogether impossible. But Banke, Hengstenberg, Droysel, Havercorn, Baumgarten, Keil, and others, maintain that Genesis is a book closely connected in all its parts, and composed by one author, while the use of the two different names of God is not owing to two different sources on which Genesis is founded, but solely to the different significations of these two names. The weight of probability lies on the side of those who argue for the existence of distinct documents, but only as sources to some extent which, together with original materials, were brought by the author into one homogeneous whole.

3. The resumptive form of some of the narratives, e.g. the repetition of the account of the creation of man in chap. ii, with additional particulars, is evidence of the same character. We may even hazard the conjecture that the pure cosmogony of chap. i. may have been one of the mysteries of the Egyptian theosophy while the more distinct accounts of the subsequent chapters may have been derived from the traditions of the Hebrews and cognate nations. See Moses, "The last distinct use of the divine names, Jehovah in some sections, and Elohim in others, is characteristic of two different writers; and other peculiarities of diction it has been observed fall in with this usage, and go far to show both the theory. As it is in harmony with what we might have expected a priori, viz., that if Moses or any later writer were the author
of the book, he would have availed himself of existing traditions, either oral or written. That they might have been written is now established beyond all doubt, the art of writing having been proved to be much earlier than Moses. That they were written we infer from the book itself. Yet these peculiarities are not so absolute as to show that the same writer did not employ all into one composition, for they are sometimes found blended in the same piece.

The evidence alluded to is strong; and nothing can be more natural than that an honest historian should seek to make his work more valuable by embodying in it the most ancient records of his race; the higher the text supposed to be, the more anxious would he be to preserve them in their original form. Those particularly in the earlier portion of the work were perhaps simply transcribed. In one instance we have what looks like an omission (ii, 4), when the inscription seems to promise a larger case of money. Here and there throughout the book we meet with a later remark, intended to explain or supplement the earlier monument. In some instances there seems to have been so complete a fusion of the two principal documents, the Elohist and the Jehovist, that no longer possibility to distinguish them. The later writer, the Jehovist, instead of transcribing the Elohistic account, thought fit to blend and intermingle with it his own remarks. We have an instance of this, according to Hupfeld (Die Quellen der Genesis), in chap. vii.; vers. 1-10 are usually supposed to be the Jehovist; but when he admits this, he detects a large admixture of Elohistic phraseology and coloring in the narrative. But this sort of criticism, it must be admitted, is very doubtfult. Other many instances might be mentioned where there is the same difficulty in assigning their own to the several authors. These sections generally recognized as Jehovistic, chaps. xii., xiii., here, there and there a sentence or a phrase occurs which seems to betray a different origin, as xii., 5; xiii., 6; xiv., 29. These anomalies, however, though it may be difficult to account for them, can hardly be considered of sufficient force entirely to overthrow the theory of independent documents which has so much, on other grounds, to recommend it. Certainly when Keil, Hengstener, and others, who reject this theory, attempt to account for the use of the divine names on the hypothesis that the writer (or his compiler) employed the one or other name according to the subject of which he was treating, their explanations are often of the most arbitrary kind. As a whole, the documentary character of Genesis is so remarkable when we compare it with the later books of the Pentateuch, and is so exactly what we might expect of a Mosaic authorship of the whole, that whilst contending against the theory of different documents in the later portions, we feel convinced that this theory is the only tenable one in Genesis.

Of the two principal documents, the Elohist is the earlier. So far as we can detach its integral portions, they still present the appearance of something like a connected work. This has been very well argued by Tuch (Die Genesis, Allgem. Einl. II-lxv), as well as by Hupfeld (Die Quellen der Genesis), Knobel, and Delitzsch. This whole theory of a double origin of the book, however, is powerfully opposed by Tiele in the Stud. u. Krit. 1895, i.

Hupfeld, however, whose analysis is very careful, thinks that he can discover traces of three original records, an earlier Elohist, a Jehovist, and a later Elohist. That this is no longer possible, according to him, subsequently united and arranged by a fourth person, who acted as editor of the whole. His argument is ingenious and worthy of consideration, though it is at times too elaborate to be convincing.

The following table of the use of the divine names in Genesis will enable the reader to form his own judgment as to the relative probability of the hypotheses above mentioned. Much as commentators differ concerning some portions of the book, one pronouncing passages to be Elohistic which another, with equal confidence, assigns to the Jehovist, the fact is certain that whole sections are characterized by a separate use of the divine names. (See Quary, Genesis, p. 400 sq.)

(1) Sections in which Elohim is found exclusively, or nearly so: chap. i., 5 (creation of heaven and earth); chaps. xii., 5, 17 (Jacob's dream); xxiii., 7 (Jacob's marriage); xxiv., 62 (Jacob's dream at Bethel); xxxii., 24 (birth and naming of the eleven sons of Jacob which Jehovah occurs; vi, 9-22 (generations of Noah); vii, 9-24 (the entering into the ark), but Jehovah in ver. 16; viii, 1-19 (end of the flood); ix, 1-17 (covenant with Noah); xvii (covenant of circumcision), where, however, the Hebrew text occurs in it, it is always associated with Elohim seven times; xix, 29-38 (conclusion of Lot's history); xx (Abraham's sojourn at Gerar), where again we have Jehovah once and Elohim four times, and Ha-shelohim twice; xxi, 1-21 (Isaac's birth and Ishmael's dismissal), only xxxi, 1, Jehovah; xxi, 29-34 (Abraham's covenant with Abimelech), where Jehovah is found once; xxxv, 1-18 (sons of Keturah, Abraham's death, and the generations of Ishmael), Elohim once; xxvii, 46-xxviii, 9 (Jacob goes to Haran, Esau's marriage), Elohim once, and El Shaddai once; xxxi, 1-46 (Jacob's departure from Laban), where Jehovah occurs twice; xxxii, xxxiii (Jacob's reconciliation with Esau, Dinah and the Shechemites, Jacob at Bethel, Esau's family, Joseph sold into Egypt). It should be observed, however, that in large portions of this section the divine name does not occur at all. (See below.) xi-l (history of Joseph in Egypt); here we have Jehovah once only (xli, 18). (Exod. i, ii (Israel's oppression in Egypt, and birth of Moses as deliverer).)

(2) Sections in which Jehovah occurs exclusively, or in preference to Elohim: iv (Cain and Abel, and Cain's posterity), where Jehovah ten times and Elohim once; vii, 1-8 (the sons of Noah and the daughters of men, etc.); vii, 1-9 (the entering into the ark), but Elohim once, ver. 9; viii, 20-22 (Noah's altar and Jehovah's blessing); ix, 18-27 (Noah and his sons); x (the families of mankind as descended from Noah); xi, 1-9 (the confusion of tongues); xii, 1-20 (Abram's journey from Haran to Canaan, and then into Egypt); xiii, Abram's separation from Lot); xv (Abram's faith, sacrifice, and covenant); xvi (Hagar and Ishmael), where xvi 2>xxii once; xvi-xviii, 28 (visit of the three angels to Abram, Lot, destruction of Sodom and Gomorrah); xxi, 24 (betrothal of Rebekah and Isaac's marriage); xxv, 19-xxvi, 35 (Isaac's sons, his visit to Beer-sheba); xxvii, 5-36 (Esau's wiles); xxx, 40 (Jacob obtains the blessing), but in ver. 28 Ha-shelohim, xxx, 25-43 (Jacob's bargain with Laban), where, however, Jehovah only once; xxxviii (Judah's incest); xxxix (Jehovah with Joseph in Potiphar's house and in the prison). (Exod. iv, 18-21 (Moses' return to Egypt); xvi (Pharaoh's treatment of the messengers of Jehovah).)

(3) The section Gen. ii, 4-iii, 24 (the account of Paradise and the Fall) is generally regarded as Jehovahistic, but it is clearly quite distinct. The divine name as there found is not Jehovah, but Jehovah Elohim (in which form it only occurs once beside in the Pentateuch, Exod. ix, 38), and it occurs twenty times; the name Elohim being found three times in the same section, once in the mouth of the woman, and twice in that of the serpent.

(4) In Gen. xiv. the prevailing name is El-Elyon (Lord of Heaven, the most high God'), and only once, in Abram's mouth, "Jehovah, the most high God," which is quite intelligible.

(5) Some few sections are found in which the names Jehovah and Elohim seem to be used promiscuously. This is the case in xxiii, 1-10 (the offering up of Isaac); xxvii, 19-22 (Jacob's dream at Bethel); xxviii, 31-xxx, 24 (birth and naming of the eleven sons of Jacob).
GENESIS

780

(cob); and xiii (Jacob’s wrestling with the angel). [Exod. iii, 1-19 (the call of Moses).] (6.) It is worthy of notice that of the other divine names Adonai is always found in connection with Jehovah, except Gen. xx. 4; whereas El, El-Shaddai, etc., occur most frequently in the Elohist sections. (7.) An examination of the Hebrew and other versions shows that the divine names occur: Gen. xi. 10-32; xii. 20-24; xiii.; xiv., 23-34; xvii. 40-45; xxix. 1-80; xxxiv.; xxxvii.; xli. [Exod. iii, 1-22].

IV. The historical character of the contents of Genesis forms a more comprehensive subject of theological discussion. It is, however, a matter of general admission that the opinion regarding it must be principally influenced by the dogmatical views and principles of the respective critics themselves. Hence the great variety of opinion that still prevails on that subject. Some, as Vatke, Von Bohlen, and others, see in Genesis a history. To others, the contents of Genesis are unhistorical. Such and others consider Genesis to be interwoven with mythical elements, but that the rich historical elements, especially in the account of the patriarchs, can be clearly discerned. Some, again, limit the mythical part to the first two chapters only; that the others are purely mythological; and hold that a consistent and truly historical impress. The field of controversy is here so extensive, and the arguments on both sides are so numerous, that we must content ourselves in this article with a very few remarks on the subject.

(v.) The plot is divided into two contrasting parts: the first introduces us into the greatest problems of the human mind, such as the creation and the fall of man; and the second into the quiet solitude of a small, defined circle of families. In the former, the most sublime and wonderful events are described with childish simplicity; in the latter, the most simple and common occurrences are interwoven with the sublimest thoughts and reflections, rendering the small family circle a whole world in history, and the principal actors in it prototypes for a whole nation and for all times. Not the least trace of mythology appears in it. Genesis plainly shows how very far remote the Hebrew mode of thinking was from mythical poetry, which might have found ample opportunity of being brought into play when the writer began to sketch the early times of the Creation, or when he attempted to illustrate the manifold deeds of God, are the very subject of Genesis. None of these wonders, however, bear a fantastic impress, and there is no useless prodigality of them. They are all penetrated and connected by one common leading idea, and all are related to the counsel of God for the good of men. But yet this cannot be accounted for by the luminous beams through the whole of Genesis; therefore the wonders therein related are as little to be ascribed to the invention and imagination of man as the whole plan of God for human salvation. The foundation of the divine theocratic institution throws a strong light upon the early patriarchal times; the realisation of the one proves the reality of the other, as described in Genesis.

Luther used to say, “Nihil pulchrior Genesi, nihil utilius.” But hard critics have tried all they could to make it a beast and to detract from its utility. In fact, the bitterness of the attacks on a document so venerable, so full of unifying interest, hallowed by the love of many generations, makes one almost suspect that a secret malevolence must have been the mainspring of hostile criticism. Certain it is that no book has stood with more determination and unpBarasing assailants. To enumerate and to reply to all objections would be impossible. We will only refer to some of the most important.

1. The story of Creation, as given in the first chapter, has been assailed in two ways: first, by placing it on the same level with other cosmogonies which are to be found in the sacred writings of all nations; and next, by asserting that its statements are directly contradicted by the discoveries of modern science. (a.) Now when we compare the Biblical with all other known cosmogonies, we are immediately struck with the great moral superiority of the former. There is no confusion here between the divine Creator and the things he makes; there is conformity between all things; this is the sublime assertion of the Hebrew writer. On the contrary, all the cosmogonies of the heathen world are in one of two directions: either they are dualistic, that is, they regard God and matter as two eternal co-existent principles; or they are pantheistic, that is, they consider God and matter as identical or identical in the material universe a kind of emanation from the great Spirit which informs the mass. Both these theories, with their various modifications, whether in the more subtle philosophies of the Indian races, or in the rougher and simpler forms, such as the Cabalists and Babyloni ans, are alike exclusive of the idea of creation. Without attempting to discuss in anything like detail the points of resemblance and difference between the Biblical record of creation and the myths and legends of other nations, it may suffice to mention certain particulars.

Fourthly, there is the fact of a relation between the personal Creator and the work of his fingers, and that relation is a relation of love; for God looks upon his creation at every stage of its progress, and pronounces it very good.

Fifthly, there is throughout a sublime simplicity which and itself is characteristic of a history, not of a myth or of a philosophical speculation. See Creation. (b.) It would occupy too large a space to discuss at any length the objections which have been urged from the results of modern discovery against the literal truth of this chapter. One or two remarks of a general kind must suffice. It is an axiom of science that a thing which could not have existed before the sun, or, at any rate, not that kind of light which would be necessary for the support of vegetable life; whereas the Mosaic narrative makes light created on the first day, trees and plants on the third, and the sun on the fourth. To this we may add that it would not be proper to make an argument upon our ignorance. We do not know that the existing laws of creation were in operation when the creative fiat was first put forth. The very act of creation must have been the introducing of laws; but when the work was finished, those laws must have suffered some modification. Men are not now created in the full stature of manhood, but are born and grow. Similarly, the lower ranks of being might have been influenced by certain necessary conditions during the first stages of their existence, which conditions were afterwards removed to disturb their natural functions. Again, it is not certain that the language of Genesis can only mean that the sun was created on the fourth day. It may mean that then only did that luminary become visible to our planet.

With regard to the six days, many have thought that they ought to be interpreted to mean about twenty-four hours only. On the contrary, the divine Sabbath still continues. There has been no creation since the creation of man. This is what Genesis teaches, and this geology confirms. But God, as we have seen, has a series of periods of creative activity, entered into that
Sebahth in which his work has been, not a work of creation, but of redemption (John v, 17). No attempt, however, which has as yet been made to identify these six periods with corresponding geological epochs can be pronounced satisfactory. See GEOLOGY. On the other hand, it seems rash and premature to assert that no such periods do exist, for the true, that no reconfiguration of the facts which we have presented is possible. It is certain that the author of the first chapter of Genesis, whether Moses or some one else, knew nothing of geology or astronomy. It is certain that he made use of physiologic concerning physical facts in accordance with the information which he possessed. It is also certain that the Bible was never intended to reveal to us knowledge of which our own faculties, rightly used, could put us in possession. We have no business, therefore, to expect anything but popular language in the description of physical phenomena. Thus, for instance, when it is said that by means of the firmament God divided the waters which were above from those which were beneath, we admit the fact without admitting the implied explanation. The Hebrew supposed that there existed vast reservoirs of water corresponding to the waters under the earth. We know that by certain natural processes the rain descends from the clouds. But the fact remains the same that there are waters above as well as below. Further investigation may perhaps throw more light on these interesting questions. Meanwhile it is certain that modern writers who aspire to put on the story of the confusion of tongues, and the subsequent dispersion of mankind, there is no good ground for setting it aside. Indeed, if the reading of a cylinder recently discovered at Birs Nimrud may be trusted, there is independent evidence corroborative of the Bible. It is not written in a language unknown to the biblical peoples, and in no way opposed to the great outlines of the Mosaic cosmogony. That the world was created in six stages, that creation was by a law of gradual advance, beginning with inorganic matter, and then advancing from the lowest organisms to the highest, that something like a succession of man upon the earth, no new species has come into being; these are statements not only not disproved, but the two last of them at least amply confirmed by geological research.

8. To the description of Paradise, and the history of the Fall and of the Deluge, very similar remarks apply. All nations have their own version of these facts, colored by local circumstances, and embellished according to the poetic or philosophic spirit of the tribes among whom the tradition has taken root. But if there be any one original source of these traditions, and if we cannot doubt where to look for it. The earliest record of these momentous facts is that preserved in the Bible. We cannot doubt this, because the simplicity of the narrative is greater than that of any other work with which we are acquainted. This simplicity is a preservative at once in favor of the antiquity, and also of the greater truthfulness of the story. It is hardly possible to suppose that traditions so widely spread over the surface of the earth as are the traditions of the Creation, the Fall, and the Deluge, should have no foundation whatever in fact. It is quite as impossible to suppose that that version of these facts, which in its moral and religious aspect is the purest, is not also, to take the lowest ground, the most likely to be true.

(1.) Opinions have differed whether we ought to take the story of the Fall in Gen. iii to be a literal statement of facts, or whether, with many expositors, since the time of Philo, we should regard it as an allegory, framed in child-like words as befitted the childhood of the world, but conveying to us a deeper spiritual truth. But in the latter case we ought not to deny that this truth. Neither should we overlook the very important bearing which this narrative has on the whole of the subsequent history of the world and of Israel. Delitzsch well says, "The story of the Fall, like that of the Creation, has wandered over the whole. Heathen nations have transplanted and mixed it up with their own mythology, their history, their ethnology, although it has never so completely changed form, and color, and spirit that you cannot recognise it. Here, however, in the Law, it preserves the character of a universal, human, world-wide fact; and the grounds of Creation, the Redemption that is in Christ Jesus, and the heart of every man, conspire in their testimony to the most literal truth of the narrative." See FALL or MAN.

(2.) The universality of the Deluge, it may be proved, is quite at variance with the most certain facts of geology. But then we are not bound to contend for a universal deluge. The Biblical writer himself, it is true, supposed it to be universal, but that was only because it could not be otherwise. It is the woman who is responsible for the serious doubt that it did extend to all that part of the world which was then inhabited; and this is enough, on the one hand, to satisfy the terms of the narrative, while, on the other, the geological difficulty, as well as other difficulties concerning the ark, and the number of animals, disappears with this interpretation. See DELUGE.

(3.) When we come down to a later period in the narrative, where we have the opportunity of testing the accuracy of the historian, we find it in many of the most important particulars abundantly corroborated.

9. The mythological history of the fall of man is, as has been shown, largely connected with the story of the Ark. The Hebrews believed that the Ark was to be preserved as a token of the deliverance of the Israelites from the Flood. The Ark was to be a symbol of salvation, a type of the Messiah. The Ark was to be a reminder of the power and mercy of God. The Ark was to be a sign of the covenant between God and man. The Ark was to be a symbol of the Church. The Ark was to be a type of the New Testament Church. The Ark was to be a symbol of the salvation which is to come. The Ark was to be a sign of the coming of the Messiah. The Ark was to be a type of the Church. The Ark was to be a symbol of the salvation which is to come.

(4.) On the other hand, the Hebrews believed that the Ark was to be preserved as a token of the deliverance of the Israelites from the Flood. The Ark was to be a symbol of salvation, a type of the Messiah. The Ark was to be a reminder of the power and mercy of God. The Ark was to be a sign of the covenant between God and man. The Ark was to be a symbol of the Church. The Ark was to be a type of the New Testament Church. The Ark was to be a symbol of the salvation which is to come. The Ark was to be a sign of the coming of the Messiah. The Ark was to be a type of the Church. The Ark was to be a symbol of the salvation which is to come.

10. The Ark was to be a token of the deliverance of the Israelites from the Flood. The Ark was to be a symbol of salvation, a type of the Messiah. The Ark was to be a reminder of the power and mercy of God. The Ark was to be a sign of the covenant between God and man. The Ark was to be a symbol of the Church. The Ark was to be a type of the New Testament Church. The Ark was to be a symbol of the salvation which is to come. The Ark was to be a sign of the coming of the Messiah. The Ark was to be a type of the Church. The Ark was to be a symbol of the salvation which is to come.
Of the minute accuracy of this table we have abundant proof: for instance (Gen. x, 4), Tarshish is called the son of Javan. This indicates that the ancient inhabitants of Tarshish or Tartessus in Spain were erroneously considered to be a Phoenician colony like those of Cyprus and Crete. The existence of such a colony is attested by the presence of Greek coins in Spain, and by the use of wine by the kings (Wilkinson, ii, 142-146); the fact that even at that early time a settled trade existed between Egypt and other countries, are all confirmed by the monuments or by later writers. So again Joseph's priestly dress of fine linen, the chain of gold round of his neck, the chryselephantine shrine of the king, the rites of burial (though mentioned only incidentally), are spoken of with a minute accuracy which can leave no doubt on the matter to the credibility of the historian. In particular, the account of his genealogy in which the Pharaohs became proprietors of all the lands, with the exception of those belonging to the priests, is confirmed by Herodotus (ii, 109), and by Diodorus Siculus (i, 73). The manner of embalming described in Gen. I entirely agrees with the description of Herodotus, ii, 84, of the procedure in which the mummy is packed in the hero-casket. Hence the portion in which the Pharaohs became proprietors of all the lands, with the exception of those belonging to the priests, is confirmed by Herodotus (ii, 109), and by Diodorus Siculus (i, 73). The manner of embalming described in Gen. I entirely agrees with the description of Herodotus, ii, 84, of the procedure in which the mummy is packed in the hero-casket. Hence the portion in which the Pharaohs became proprietors of all the lands, with the exception of those belonging to the priests, is confirmed by Herodotus (ii, 109), and by Diodorus Siculus (i, 73). The manner of embalming described in Gen. I entirely agrees with the description of Herodotus, ii, 84, of the procedure in which the mummy is packed in the hero-casket. Hence the portion in which the Pharaohs became proprietors of all the lands, with the exception of those belonging to the priests, is confirmed by Herodotus (ii, 109), and by Diodorus Siculus (i, 73). The manner of embalming described in Gen. I entirely agrees with the description of Herodotus, ii, 84, of the procedure in which the mummy is packed in the hero-casket.
GENESIS  783

writer, because of difficulties such as these. The positive evidence is overwhelming in favor of his credibility. The patriarchal tent beneath the shade of some spreading tree, the wealth of flocks and herds, the free and generous hospitality to strangers, the stride for the well, the purchase of the cave of Machpelah for a burial-place—we feel at once that these are no inventions of the compiler of the civilizing, patriarchal period. So again, what can be more life-like, more touchingly beautiful, than the picture of Hagar and Ishmael, the meeting of Abraham's servant with Rebekah, or of Jacob with Rachel at the well of Haran? There is a fidelity in the minutest incident which cannot be overlooked; reading it, we are not false. Or can anything more completely transport us into patriarchal times than the battle of the kings and the interview between Abraham and Melchizedek? The very opening of the story, "In the days of Amraphel, etc., reads like the work of some old chronicler who lived not far from the time of which he speaks. The archaic forms of names of places, Bela for Zoar; Chataban Tamar for En-gedi; Emek Shaveh for the King's Vale; the Vale of Siddim, as descriptive of the spot which was afterwards the Dead Sea; the expression "Abram the Hebrew;" and the later name, as descriptive of the nation, are evidences of the narrative. So also are the names of the different tribes who at that early period inhabited Canaan; the Re- phaim, for instance, of whom we find in the time of Joshua but a weak remnant left (Josh. xii, 12), and the Zuzim, Ezon, Chorim, who are mentioned be- tween the Pentateuch (Deut. ii. 10, 12). Quite in keeping with the rest of the picture is Abraham's "arming his trained servants" (xiv, 14)—a phrase which occurs nowhere else—and, above all, the character and position of Melchizedek: "Simple, calm, great, he comes and goes the priest king of the divine history." The representations of the Greek poets, says Creuzer (Symb. iv, 378), fall very far short of this; and, as Havernick justly remarks, such a person could be no theocratic invention, for the union of the kingly and priestly offices in the same person was no part of the theocracy. Lamech, the name by which he is known, the "most high God, possessor of heaven and earth," occurs also in the Phoenician religions, but not amongst the Jews, and is again one of those slight but accurate touches which at once distinguishes the historian from the compiler; see the Personages.

V. Author and Date of Composition.—It will be seen from what has been said above, that the book of Gen- nis, though containing different documents, owes its existing form to the labor of a single author, who has digested and incorporated the materials he found ready to his hand. The question of the writer is important in itself; besides, the successes of the exposition which he has gained, give some argument in favor of his view of the passage. The question "the Canaanites were then in the land" (xlii, 6; xii, 7), is thought to imply that the Canaanites were still in possession of Palestine, and so could not have been written till after their expulsion. But such a time is impossible not only for the same reason as the Canaanites were not expelled, but for the investigation they had made of the country and the book was written in the days of David, Solomon, and the united monarchy. The document of this time is called the "canaanitish" or "canaanitish." Literally taken, however, the remark is inapplicable to any period, since the kingdom of the Jews at no period of their history extended so far. That promise must, therefore, be taken in a rhetorical sense, describing the central houses of the chosen people, in the country situated between the two rivers. The remark, "Before there reigned any king over the children of Israel" (xxxvi, 31), could not have been made, it is maintained, until the establishment of the Hebrew monarchy—an assumption which overlooks the relation of the "sons of Eber" to the promises of a royal posterity to the patriarchs, and especially that in an immediately preceding passage
It stands in a relation similar to Deut. xvii, 14, where the erection of a kingdom is viewed as a necessary step in Israel's development. This explanation will of course satisfy the book that in a simple historical style, a statement having such prophetic reference "is not only preposturous, but impossible" (Kalisch, Genesis, p. 601); but against rationalistic prepossessions of this kind there is no arguing.

VI. Commentarians. - The following are expressly on the whole of this book, the most important being designated by an asterisk (*): prefixed: Origens, Commentaria (in Opp. ii. 1); also Homiliae (ib. ii. 52); Chrysostom, Homilia (in Opp. iv. 3; also [Sporia] sb. vi. 61); and Sermones (sb. iv. 746, 790); Jerome, Questiones (in Opp. iii. 903); Eusebius, Commentaria (in Nal. Man. Patr. vi); Iodone, Commentaria (in Opp. p. 283); Damianus, Expositio (in Opp. iii. 889); Bede, Expositio (in Opp. iv. 19); also Questiones (ib. vii. 78); Alcuin, Interrogations (Hagenau, 1529, 8vo); also in Opp. i. ii. 805); Angelomus, Commentarium (in Faex. Thren. iv. 1); Ebrard, Commentarius (Lips. 1564, 8vo). Hugo, Annotationes (in Opp. i. 8); Rupert, Commentarius (in Opp. i. 1); Aquinas, Expositio (Antwerp, 1572, Lugd. 1578, 8vo; Paris, 1614, fol.); Écolampadis, Adnotationes (Basil. 1523, 1586, 8vo); Zwingle, Adnotationes (Tigur. 1527; also in Opp. iii. 4); Zeigler, Commentaria (in Opp. ii. 376); also Libri, Commentaria (Rom. 1564, 4to); *Luther, Emserationes (by different eds. part i, Vittemb. 1544, fol.; part ii, Norbu. 1550; after, Francof. 1545-50, 8vo, and later; also in Op. Exeg. ii.; in English, London, 1855, 8vo); Melanchthon, Commentarius (in Opp. ii. 377); Musculus, Commentarius (Basil. 1554, 1566, 1600, fol.); Honsela, Commentarius (Complut. 1555, fol.); Chytrium, Commentarius (Vittemb. 1587, 1588, 1600, 8vo); *Marloratus, Expositio (Par. 1562; Morg. 1568, 1580, 1584, fol.; Genev. 1580, 8vo); *Calvin, In Genesis (in Opp. i.; also tr. Lond. 1578, 8vo, 2 vols. 8vo); Strigel, Auslegung (Lips. 1566, 1754, 8vo); Solnecker, Commentarius (Lips. 1599, fol.); Martyr, Commentarius (Tigur. 1572, 1579, 1596; Heidelberg, 1606, fol.); Brentius, Commentarius (in Opp. i.); Brocard, Interpretatio [mystical] (L. B. 1560, 8vo; ib. 1884, 4to; Bremen, 1568, 1608, 4to); Fabricius, Commentarius (Lips. 1584, 1622, 8vo; Egenolff, 1601, 4to, Argent. 1854, 4to); *Peregrus Romainian, Commentarius (Rom. 1589-1598, 4 vols. fol.; Colon. 1601, 1606, Ven. 1607, fol.; Lugd. 1616, 4 vols. 8vo; and later); Museus, Auslegung (Magdeburg, 1596, 8vo); Martinengius, Glossa (Patav. 1577, 2 vols. fol.); Dassab, Predigten (Lips. 1597, 8vo); Mercier, Commentarius (Genev. 1598, 8vo); Kaefer, Expositio (Lips. 1620, a fol.); Hunsenmann, Adnotationes (Lips. 1560, fol.); Stella, Commentarius (Rom. 1601, fol.); Schmuck, Auslegung (Lpz. 1603-9, in 8 pts. 4to); Geisser, Disputationes (Vittemb. 1604, 1618, 1629, 4to); Lyser, Commentarius (in 6 pts. Lpz. 1604 sq., 4to); *Willet, Expositorium (London, 1605, 8vo); Delrio, Commentarius (Lugd. 1608); Remigius, Praxis (Paris 1616, 8vo); Parez, Commentarius (Francof. 1609, 1614, 4to); Ge- dick, Auslegung (Lpz. 1611, 1622, fol.); De Petigijan, Commentarius (Ven. 1616, 4to); Ferduziz, Commentationes (Lugd. 1618-19, 3 vols. fol.); Babington, Notes (in Works, 1); Mersennus, Questions [polemical] (Par. 1622, 4to); Gersius, Disputationes (Comarbur. 1624, 4to); Böhme, Erklärung [mystical] (s. l. 1624; also in his other works); Rivetus, Exercitationes (L. B. 1638, 4to); Gerhard, Commentarius (Jen. 1637, 1654, 1693, 4to); De la Haye, Commentarius (Lugd. 1638, Par. 1651, 1663, 2 vols. fol.); Syrius, Commentarius (Uscu, 1639, 8vo); Lipsius, Commentarius (Lond. 1639, 4to); also in Bohemian, ib. 1639, lii. 820); and Annotationes (ib. x. 392); and Guandion, Conten- tia (Pisa, 1644, 4to); Carvagh, Adnotationes (from Targums) (Lond. 1648, 8vo; also in Critici Sacri, 4to); Rives, Exercitationes (in Opp. i. 1); Terner, Adnotationes (Upsal. 1657, fol.); Chemitz, Disputationes (Jen. 1665, Lips. 1711; Vittemb. 1710, 4to); Calov, Commentarius (Vittemb. 1671, 4to); Hughes, Exposition (Lond. 1672, fol.); Cocceius, Commentarius (in Opp. i. 1); also Cruwys. Commen- taries (Lond. 1692); *Persius, Commentarius (Jen. 1696, 8vo); *Kern, Exposition (Paris 1697, 4to); also in Bohemian, ib. 1706, lii. 892); and Annotationes (ib. x. 392); and Gaundion, Conten- tia (Pisa, 1644, 4to); Cartwright, Adnotationes [from Targums] (Lond. 1648, 8vo; also in Critici Sacri, 4to); Rives, Exercitationes (in Opp. i. 1); Terner, Adnotationes (Upsal. 1657, fol.); Chemitz, Disputationes (Jen. 1665, Lips. 1711; Vittemb. 1710, 4to); Calov, Commentarius (Vittemb. 1671, 4to); Hughes, Exposition (Lond. 1672, fol.); Cocceius, Commentarius (in Opp. i. 1); also *Cruwys. Commentaries (Lond. 1692).
assigned for his death: Tillemont and Ruinart fix it at A.D. 296; Baronius and Fleury at A.D. 308. His day in the Roman Catholic calendar is Aug. 25. Rotrou has made this apocryphal history the subject of a tragedy. See Acta Sanctorum, August, vol. v.; Ruinart, Acta Sincera, p. 269; Butler, Lives of the Saints, Aug. 25.

Genev. FRANÇOIS, a French prelate, was born at Avignon Oct. 16, 1640. He became canon and theologian of the cathedral of Avignon, and in 1668 bishop of Vaison. Implicated in the affair of the Daughters of Childhood of Toulouse, whom he had received in his diocese, and who were held to be Janissaries, he was arrested in 1688, and imprisoned for fifteen months. The pope finally persuaded Louis XI. to restore Genevèse to his diocese in 1702, while on his way from Avignon to Vaison. He is the author of Théologie Morale, which was disapproved by the bishops, and condemned by the University of Louvain, March 10, 1703. The best edition is that of 1715 (8 vols. 12mo); it was reprinted at Rosen in 1749—Hoefer, Nouv. Biog. Générale, xix. 673.

Genethliaci, astrologers, who pretended to calculate men's nativities by erecting schemes and horoscopes, to know what position the stars were in at their birth, and thence to foretell their good or bad fortune. "And because some of these pretended to determine positively of the lives and deaths of kings, which was repugnant to a dangerous piece of treason, therefore the laws of the state were more severe against them even under the heathen emperors, as Gothofred shows out of the ancient lawyers, Ulpian and Paulus; and that was another reason why the Church thought it proper to unlavish upon these with the utmost severity of ecclesiastical censures, as thinking that what the heathen laws had punished as a capital crime ought not to pass unregarded in the discipline of the Christian Church. It was this crime that expelled Aquila from the Church. For Epiphanius says (De Menæris et Panderibus) he was once a Christian, but, being incorrigibly bent upon the practice of astrology, the Church cast him out, and then he became a Jew, and in revenge set upon a new translation of the Bible, to corrupt those texts which had any relation to the coming of Christ."—Bingham, Orig. Ecc. lxi. ch. v. See DIVINATION.

Geneva (French Genève), capital of the Swiss canton of the same name, celebrated for its historical and religious associations, and in particular as the seat of the reformational labors of Calvin. The canton had, in 1860, 82,876 inhabitants, of whom 40,069 were Protestants, 42,991 Roman Catholics, 381 Dissidents, 377 Jews. During the French revolution Geneva was the seat of dispute between the bishop of Geneva, who was an immediate feudatory of the German empire, and the count of Genevois, who ruled the adjoining province of Savoy. After the extinction of the line of the counts of Genevois, the dukes of Savoy were appointed their successors by the German emperor Sigismund (1432). Hence the claim of Savoy upon Geneva, from which the Genevans could only free themselves by alliances with the Swiss cantons of Fribourg (1519) and Berne (1526), and by the aid of the Reformation. The latter was introduced into Geneva by Farel, from France, and others, about 1552, and in 1556 was officially established. Being put under the ban by the bishop, the city declared the episcopal see vacant, and declared itself a republic. Calvin first came to Geneva in 1536, and after an absence of a few years returned in 1541, when he settled down in making himself temporal as well as the spiritual ruler of the town. Thus Geneva became the metropolis of Calvinism, and, as such, exercised a great influence upon all the Calvinistic churches. From 1798 to 1814 Geneva was united with France; in 1814, its territory having been enlarged by the annexation of the Savoyard and Frencum communities; it joined the Swiss Confederation as the 23rd canton. The Reformed State Church, which in 1688 had 16 congregations and 3 ministers, has for some time been under the influence of Rationalism, and a part of the orthodox members have therefore organized a Free Evangelical Church, which has a celebrated theological school, several of whose professors, as Merle d'Aubigné and Gaussens, have established a great theological reputation throughout the Protestant world. —Thouret, Histoire de Genève (Geneva, 1863); Cherbuliez, Genève et les Genevois (Geneva, 1888). Geneva Bible. See ENGLISH VERSIONS.

Geneviève, St., the patron saint of Paris, was, according to tradition, born at Nanterre, near Paris, about 423. By the advice of St. Germain, bishop of Auxerre, she took the vow of chastity, and when afterwards accused of hypocrisy and superstition, she was warmly defended by the bishop. When the inhabitants of Paris, frightened at the approach of Attila, contemplated leaving their city, Geneviève dissuaded them, saying that Paris would be spared; and as the prediction proved true, she became the object of general veneration. She also advised the building of a church to St. Peter and St. Paul, in which she was afterwards buried, and which bears her name. She died in 512. Her reputation for sanctity became so great that Siméon Stylites inquired about her from all persons coming from Gaul. Miracles were said to take place at her tomb. There exists a life of her in Latin, claiming to have been written eighteen years after the death of Clovis. The life of St. Germain by the priest Constance, said to have been written during her lifetime, relates her consecration by that bishop. See the Belgians, Acta Sanctor. July 31; Charpentier, Vie de St. Geneviève (1867); Butler, Lives of the Saints, Jan. 3.

Geneviève, St., Canons of, called also canons regular of the Congregation of France, a congregation of canons regular (q. v.) established in 1614 by Charles Faure, a member of the abbey of St. Vincent of Senlis, who effected a reformation of the French canons which was soon adopted by several other abbeys. Cardinal de La Rochefoucauld, who in 1619 had been made abbot of the abbey of St. Geneviève du Mont at Paris, being desirous to reform his abbey, sent, in 1624, for twelve members of St. Vincent of Senlis, and made Faure its spiritual superior. In 1634 the pope confirmed the new congregation. Soon after its first chapter general was held, which was attended by the superiors of fifteen houses, and elected Faure coadjutor of the abbots of St. Geneviève and general of the congregation. The king had previously given up his right of nominating the abbots of St. Geneviève, and consented that he be elected every third year. Helyot, in his History of Religious Orders, states that at his time the congregations had in France 67 abbots, 28 priors, 2 provosts,
GENEVIÉVE 786  GENGATH

and 8 hospitals, besides, in the Netherlands, 8 abbeys and 3 priors. A large number of parishes were served by its members. It was customary to elect one of the chancellors of the University of Paris from this congregation. Helyot, Dict. des Ordres Relig., art. Genévétains. (A. S. J.)

Geneviève, St. Daughters of (more commonly called Mariliana), a monastic order in the Roman Catholic Church, founded, in 1368, at Paris, by Françoise de Blosset, for the purpose of nursing the sick and instructing girls. In 1665 it was united by Marie Bonneau de Rubelle Beaumanois de Miramion with a similar order which she had founded in 1661, under the name of the Holy Family. The order obtained considerable reputation, and extended widely. Its members took no vows, but only promised a faithful observation of the rule and the statutes of the society as long as they might belong to it.—Helyot, Dict. des Ordres Relig., art. Miramione.

Genius, Attendant. See Guardian Angel.

Gennadius, patriarch of Constantinople, succeeded Anastolius in that dignity A.D. 458. He was a man of quick parts, and composed Homilies; a Commentary on Paul's Epistles; and a Commentary on Daniel. He died A.D. 471. His writings are lost, except an Epistle preserved by Gregory, and other fragments, all of which are given by Migne in Patrologia Graeca, tom. lxxv. Evagrius, Hist. Eccl. ii. 11; Dupin, Eccl. Hist. iv. 156; Cellarius, Annals Sacris (Paris, 1861), xi. 845.

Gennadius, patriarch of Constantinople (whose proper name was George Scholarios), was one of the most original and prolific writers in the Greek Church of the 15th century. He was secretary to the emperor John Paleologus, and attended the Council of Florence in 1438, while yet a layman. He became an ecumenical council in 1449 or 1450, and entered a monastery, taking the name of Gennadius. At Florence he had declared himself strongly on the side of union with the Latin Church, in three orations to be found in Har- douin, Concilia, i. 446 (supposed to be much interpolated). After becoming a monk he changed his views, and wrote against the Council of Ferrara-Florence. In 1458 he was made patriarch by the sultan, but retired in 1458, and died about 1460. Some have disputed the identity of Scholarios with Gennadius, but Renaudot puts it beyond doubt. A list of his writings will be found in Renaudot, who edited his homilies De Eucharia (Paris, 1794), and, in a larger edit., with Meletius and others (Paris, 1798, 4to). His literary work was composed when he was bishop, and afterwards edited by Liborius (Prague, 1678, 8vo). Migne, in Patrologia Graeca, tom. clix, gives Renaudot's dissertation on the life and writings of Gennadius, with his writings as follows: Concessio Fidelis (ii. i); Homiliae: Orations in Synodo Florent., De Redominatone: De Deo in Trinitate uno: Epistola; and other writings. Fabricius, Bibliotheca Graecae (ed. Harles), xi. 349 sq., gives Renaudot's list of the writings of Gennadius, seventy-six in number, and adds twenty-four more. See also a list of his writings and their various editions, in Hoffmann, Bibliographia Lectur., i. 159 sq. Of the writings attributed to him, perhaps the most important are the two Confessiones made for the sultan, (1) Ομαλία (or ομαλογία) μηθεια περί της θρής και αμώμων πιστών των Χριστιανών; and (2) a dialogue περί της ιδιού της πατρίως των αδελφών, both given in Migne (C. ix. 382) and in the Brevis edition. In addition, we have the Concilia, and in Gass, Gennadius et Plentho (see below). These confessions have been critically studied by Dr. Otto, who gives the text of the dialogue, a literary history of the two confessions, and an investigation of the genuineness of the dialogue, in Ztschrif für hist. Theol., xx. 389 sq.; xxxiv, 111 sq.; and separately, from additional sources, Des Patriarch Gennasiades Confession (Wien, 1864). Otto decides that the dialogue was not written by Gennadius, but is probably a recension of the ομαλία των ισόποντων (falsely ascribed to Athanasius), made by some Greek, in the interest of the Church of Rome, to favor the union of the Greek and Latin churches. The sultan also gave the procession of the Holy Ghost from the Father and the Son (Migne, tom. cit., p. 822 D), the Latin and Latinizing Greeks have made much use of it in the Fideique controversy. —Mosheim, Church History, cent. xiv, pt. ii, chap. ii, § 28; Dupin, Eccl. Writers, v. 110; Fabricius, Biblioth. Graec. l. c.; Hoefer, Real-Encyclop. 5th Ed., xii. 913; Gass, Gennadius et Plentho (Breslau, 1844).

Gennadius, Marsilius, a presbyter of Marselles, a Gaul (end of 5th century). Although some modern writers assert that he was a bishop, some say of Marselles, others of Toledo, he was only a presbyter. He was versed in Greek and Latin, and a laborious student of the Scriptures and the fathers. He wrote a number of books, of which only two have come down to us: (1) De Viris illustribus, or De Scripturis Ecclesiasticis (Catalogue of Ecclesiastical Writers), a continuation of that of Jerome, to which it is usually joined. It begins where Jerome's ends, A.D. 392, and ends 493, and has been better read than many editions of the Gospels. Of the sides that which is inserted in the works of St. Jerome; the best is that of Fabricius, in his Bibliotheca Ecclesiastica (Hamb. 1718, fol.). (2) De Ecclesiasticis Dogmatibus (Hamb. 1594 and 1614, 4to). Gennadius advocates doctrines on free-will and predestination similar to those of Faustus of Rhegium. In his tract De Dogmatibus Ecclesiasticis, he says, God first of all warns man, and invites him to salvation; it is in the power of man to follow him. In his work De Viris illustribus, cap. 58, he speaks of Augustine with commendation, yet does not hesitate to add, that by writing so much he fell into the error of which Solomon says in the 10th chapter of Proverbs, 'In the multitude of words there wanteth not sin.' He makes mention of an error which had arisen from much speaking, and evidently refers to the doctrine of absolute predestination. This arose from carrying things to an extreme, but for all this Augustine had not fallen into heresy" (Neander, History of Dogmas, Ryland's transl. p. 888).—Dupin, Eccl. Writers, iv. 185; Mosheim, Ch. Hist. ii. 341; Neander, Ch. Hist. ii. 647; Hook, Eccles. Dogm. v. 285; Cave, Hist. Lit. (Geney. 1720, fol.), i. 299.

Gennius (Γεννιος, i. e. high-born, but v. τι-νος, apparently given (2 Mac. xii, 2) as the name of the Syrian priest Appolonia (q. v.); but perhaps it is a mere epithet.

Gennath (Γενναθ, apparently for the Chald. ܓܢܢܐ, or נַכִּהל, q. d. "garden-gate," perhaps [as Schwartz suggests, Palest. p. 254] from the "rose-garden, סירנה גן, mentioned in the Talmud (Moerer, ii. 5) as lying west of the Temple mount), the name, according to Josephus (War, v. 4, 2), of one of the gates of Jerusalem, important as mainly determining the course of the second wall, which has been greatly disputed. See Talm. His account is as follows: "But the second (wall), while it had its beginning from that gate which they called 'Gennath,' which belonged to the first wall, yet encircling only the northern slope [or quarter], reached as far as Antonia" (To διά του πόλου την μιν ἄρχη ἐκ τῆς Ατονίας, τοῦ δὲ πόλου της γενναθ, διήκονε την πρὸς την Ατονίαν ἄρχην). From which, together with the context, the following conclusions are certain: (1) The gate in question formed part of the first wall that skirted the northern brow of Mount Zion, for the second wall must have started from this gate, and run along and lay between the first and the second wall on the same side of the city. (2) It was situated at some point east of the tower Hippicus, which formed the common
GENNESAR

The Water of (γεννασάρ Γεννασάρ), a place where Jonathan Maccabaeus encamped on his way to attack the forces of Demetrius at Kadesh (1 Macc. xi. 67); doubtless the Lake GENNESARET (q.v.).

GENNESARET [y pron. hard] (Γεννασάρ), the Greek form of the lake (Luke vi. 1) and plain (Matt. xiv. 34; Mark vi. 53). Invariable found in the N. T. in place of the GENNESAR (Γεννασάρ) of the Apocrypha (1 Macc. xi. 67), and usually also of Josephus (War. iii. 10, 7). In the Talmudical writings and Targums we always find the latter form Hebraized נַנָּר נַ נָּר, as an equivalent of גְּנַ נָּר, קִ נָ נַ נָּר or קִ נָ נַ נָּר. In the Lightfoot, Works. ii. 222, from which it was usually taken, it is written נַ נָּר, by an interchange of כ over ת, and the insertion of ד; although others derive it from נַ נָּר, a valley, and נַ נָּר, a shoot or flower, as if q. “the vale of flowers” (Jerome, Opp. vi. 136, ed. Migne); or from גְּ נַ נָּר, a garden, and נַ נָּר, a prince, as if q. “the prince’s garden” (Lightfoot, i. 489), or even from Sharon, a fertile vale not far distant (Reland, Palest. p. 198, 259).

1. The town. This is variously named in the O. T. as Cinnereth or “Chinnereth,” “Chinneroth,” “Sinaieth,” “Sinaieth,” and “Thineath.” As to the form “Chinnereth,” this is assigned to Naphthali. In later times it was called Genesaret (1 Macc. xiv. 34, Moffitt, o. a.). In the Talmudic period one Jonathan ben-Chara was buried there (Tosephat Kelim, s. f.). At the time of Farchi (beginning of the 14th century) it was still in existence; doubtless the ruins Genesaret, still found at the present day one hour north-west of Tiberiyyah, according to Fürst (Heb. Lex. p. 678, a), although no modern map lays it down. See CINNERRIT.

2. The district (N. T. γαία, γαία), named from its be-

sin-like form (like the body of a πώλε, or lyre). This was a small region of Galilee, on the western shore of this lake, visited by Christ on his way (southward along the lake) to Capernaum (Matt. xiv. 35, 86). It is described by Josephus (War. iii. 10, 8) as about four miles in length and three in breadth, and distinguished for its fertility and beauty. The Talmud also (Berak. 44) describes the luxuriant growth of this low-

lying district (נַ נָּר צַ נָּר) under the same name (נַ נָּר צַ נָּר). Dr. Robinson thus describes it (Bib. Rez. iii. 289 sq.): “The plain is a little below the main land. It is first called Aral el-Medjel, but further on takes the name of el-Choueir. ‘Little Ghor,’ which strictly, perhaps, includes the whole. It is exceedingly fertile and well watered; the soil, on the southern part at least, is a rich black mould, which in the vicinity of Medjel is a marl. Its fertility can hardly be exceeded; all kinds of grain and vegetables are produced in abundance, including rice in the moist-

er parts, while the natural productions, as at Tiberias and Jericho, are those of a more southern latitude. Indeed, in beauty, fertility, the landscape will answer well enough to the glowing though exaggerates description of Josephus. Among other pro-

ductions, he speaks here also of walnut-trees, but we did not note whether any now exist.” It is a crescent-shaped plain, about three miles long and two broad, shut in by steep, rugged hills. Only a few patches of it are cultivated, its melons and cucumbers being the first and best in market, owing to its deep depression. The rest is covered with tangled thickets of lotus-trees, oleanders, dwarf palms, and gigantic thistles and brambles. (See also Wilck, Josh. of the Bible, ii. 156 sq.; Tholen, Land and Leute. i. 589; Stanley, Palestine, p. 808.) In this identification of the plain of Genesaret with the one in question, Mr. De Saulcy coincides (Narrative, ii., 856-8; see also Hackett’s Illustr. p. 820). See CAPEMENAR.

3. The lake (γεννασάρ, N. T. and Josephus), or water (Clapp, i. 487; Bruno, Vita Joseph. Ant. xix. 3, 7), or sea (22, 0. T.). Josephus calls it Genesaret (Γεννασάρ, Αντ. xix. 2, 1), and this seems to have been its common name at the commencement of our era (Strab. v. 750; Plin. v. 16; Ptol. v. 15). At its north-western angle was a beautiful and fertile plain (Matt. xiv. 84), from which the name of the lake was taken (Josephus, War. iii. 10, 7). The lake is also called in the N. T. of Galilee which bordered on its western side (Matt. iv. 18; Mark vi. 81; John vi. 1); and “Sea of Tibe-

rias” from the celebrated city (John vi. 1; so also Barhebr. Chron. p. 400; the Talmud, Midrash Kolal. fol. 102, 1; Pausanias, ξυέμας Τηερίτις, v. 7, 3; Eusebius, ξυέμας Τηερίτις, Onom. s. v. Θερίθις; see also Cyr. ad Ise. i. 5). It is a curious fact that all the numerous names given to this lake were taken from places on its western side. Its modern name is likewise Bakter Tiberi-

yah. In Josh. i. 2, “the plains south of Chinnereth” are mentioned. It is the sea and not the city that is here referred to (comp. Deut. iii. 17; Josh. xii. 8), and the “plains” are those along the banks of the Jordan. Most of our Lord’s public life was spent in the environs of the Sea of Genesaret. On its shores stood Caperna-

um, “his own city” (Matt. iv. 13); on its shore he called his first disciples from their occupation as fisher-

men (Luke v. 1-11); and near its shores he spoke many of his parables and performed many of his mir-

acles. This region was then the most densely peopled in all Palestine. It was then not only the chief resort of the very shores of the lake, while numerous large villages dotted the plains and hill-sides around (Porter, Hand-

A mournful and solitary silence now reigns along the shores of the Sea of Genesaret, which in former ages rolled with the sounds of cities, and resounded with the din of an active and industrious people. Seven out of the nine cities above referred to are now unin-
habited ruins; one, Magdala, is occupied by half a doz-

en mud hovels; and Tiberias alone retains a wretched remnant of its former prosperity. See GALLIUS, SEA OF.

Gennesaret; Genesaret. See Gennesa-

ret.
GENEUS. See GENEOUS.

Genoese, Antoine Eugène de, a French priest and publicist, was born in 1792 at Montalbort. After the first expedition of Napoleon he entered the service of Louis XVIII, and became adjutant of the prince de Polignac. In 1820 he established the journal Le Directeur, the motto of which, "Vive l'empereur," xi. xxiii, 30, idolatrous, uncircumcised, and unclean (Isa. li, 1; Jer. ix, 26). Thus age after age the word became more invidious, and acquired a significance even more contemptuous than that of the Greek διόδος, the "door of the town," which, on numerous occasions to imitate the strange sound of foreign tongues, is paralleled by the Hebrew חֵּלָה, חֵלָה, a stammerer, applied to foreigners in Prov. xxiv, 10; Isa. xxviii, 11; xxxii, 19. The word חֵלָה gains its last tinge of hatred as applied to Jews by all Christians. Other expressions, intended to point out the same distinction, are used with a shade less of scorn; such, for instance, as יֵּילְשֵׁס (see Buxtorf, Lex. col. 728), or ולוא, those without, which is Hebraistically used in the N. T. (1 Tim. iii, 8). See Otho, Lex. Rob. p. 111; Schöttgen, loc. cit. in 1 Cor. xv, 12. In Mark iv, 11 it is applied to the incredulous Jews themselves); and בְּנֵי מִשְׁרְקָת, kingdom (1 Chron. xxiii, 50). The Jews applied the terms יֶנְסָרֹים, and, according to some Rabbis, בְּנֵי אַרְשָׂן, region of the sea, to all countries except Palestine, just as the Greeks distinguished between Hellas and η βα derbyos (2 Chron. xiii, 9; xvii, 10; Ezra ix, 1; Luke xii, 80; Lightfoot, Crit. Chorogr. i, ad init.). Although the Jews thus separated between themselves and other nations, they hesitated as little as the Romans did to include themselves in the Greek term βα derbyos (Josephus, Ant. xi, 7, 1; comp. Justin Mar. Apol. i, 46). See BARBARIAN.

In the N. T. θερι (although sometimes used in the singular of the Jewish nation. Acts x, 22; Luke vii, 5) is applied in this general sense to the inhabitants of any one of the countries of the east; and it is used of the people (Luke ii, 82). But the term most frequently thus rendered is (not θερι, but) Ἠλληνες, which is distinguished from Ἠλληνισται (Acts vi, 1), and, although literally meaning Greeks (as in Acts xv, 1, 5; xvi, 17, Rom. i, 14), yet usually denotes any non-Jews, because of the general prevalence of the Greek language (Rom. i, 16, and passim); 1 Cor. xii, 22; Gal. iii, 28, etc.). Thus Timothy, who was of Lystra, is called Ἠλλην (Acts vi, 1, 8), and a Syrophoenician woman Ἠλληνιστι σ (Mark vii, 26), and the Jews of the Dispersion, ἡ ἴδια Ἑλλάς (Acts xvi, 4).—Protoporia (Naples, 1787), and even found in the apocryphal writings, where Ἠλλη νίς is made a synonym to ἀληθινον (2 Macc. i, 13), and ἱδια τιν Ἠλλα προς πάντα Ἠλλα τοις ἰδια φίλοις (Schleusner, Lex. N. T. ii, 759). See GREEK.

It was perhaps impossible for the Jews, absorbed as they were in the contemplation of their own especial mission, to see or hear any true or profound record of the common brotherhood of all nations. Hedged round by a multitude of special institutions, and taught to regard the non-observance of these customs as a condition of uncleanness, imbued, too, with a blind and intense national pride—they often seem to regard the heathen amongst their existing at all for the purpose of punishing the apostacy of Judaea (Deut. xxviii, 49; 1 Kings viii, 38, etc.), or of undergoing vengeance for their enmity towards her (Isa. lxxiii, 6). The arrogant, unreasoning hatred towards other nations, generated by too exclusive an adherence upon this or that petty narrow conception, made the Jews the most unpopular nation of all antiquity (Tacitus, Hist. v, 2; "gens te tertima," ib. v, 8; Juvenal, Sat. iv, 103; Quint. Just. iii, 21; Pliny, xiii, 9; Dio Sis. Eccl. 84; Dio Cass.
GENTILIS

GENTILLET

ixviii, 33; Philostr. Apolol. v, 33; Ammian. Marcell. xxil, 5, "Sotienes Judei," etc., "contrary to all men," 2 Thess. ii, 15). Socially, he did not respect the laws of nature. As such, he lived in an environment where the Early Christians, who were generally considered as an unclean group, were not جميعه with the Jews, and eventually, the Jews themselves were also considered unclean by the Gentiles.

The life of Gentilus is a case study of the consequences of ignoring religious and moral laws. He was known to be a man of great wealth and influence, but his actions were seen as a threat to the religious and moral fabric of the community. His actions and beliefs were condemned by the Jewish community, and he was eventually excommunicated from the community.

The story of Gentilus is a warning to all who choose to ignore the laws and teachings of their community. His actions and beliefs are a reminder to us all to respect the laws and teachings of our community, and to live in a way that is consistent with the values and beliefs of our community.

The story of Gentilus is also a reminder of the importance of community and the need for unity. The community of Gentilus was divided and in conflict, and this division ultimately led to his downfall. The story of Gentilus is a reminder to us all of the importance of unity and the need to work together to build a strong and healthy community.
GENTILY 790

GEOGRAPHY

Council of Trent, wherein the said council is proved in many points to be contrary to the ancient councils and canons, and to the king's authority." He died about 1605. See Bayle, Dict. s. v.; Haag, La France Protestant, vol. iv; Hoefier, Nouv. Bih. Générale, xix, 949.

Gentily, COUNCIL OF (Concilium Gentilicense), held on Christmas day, A.D. 767. Six legates from Rome, ambassadors from the emperor Constantine Copronymus, several Greek bishops, and most of the bishops of Gaul and Germany, were present, together with King Pepin and many of his nobles. The question of the procession of the Holy Spirit was discussed, with regard to the litany made by the emperor, and the words "filioque" to the creed. There was also a discussion concerning the use of images.—Landon, Manual of Councils, s. v.; Gieseler, Ch. History, vol. iii, § 12.

Genoots. See HINDOOS; INDIA.

Genubath (many Genubath) (Heb., Genubath', Genubat'; Pss., Sept., Genubas), the son of Hadad, of the Edom- itish royal family, by the sister of Tahpenes, the queen of Egypt (in the time of David), reared in Pharaoh's household (1 Kings xi, 90), to save him from the extermination by Joab (ver. 16). He was born (B.C. cir. 1086) in the palace of Pharaoh, and weaned by the queen herself; after which he became a member of the royal establishment, on the same footing as one of the sons of Pharaoh. Some connect the name with the Heb. ש.fillStyle, may mean treasure, and suppose the name either to be his, the product of a foreign amour (Clericus), or to his existence being owing to his father's having stolen away from the destructive fury of the Israelites (Thenius); others, with greater probability, find in it an allusion to the Egyptian deity Ἀινήφ and Cynphis.

See HADAD.

Genuflectores, genukneerders, kneesers, a class of penitents in the ancient Church; also called prostrati; prostraters, because they were allowed to stay after the hearers were dismissed, and to join in certain prayers particularly offered for them while they knelt. Forms of prayer, prepared for such occasions, are to be found in the Apostolical Constitutions (lib. viii, cap. viii); also in Chrysostom (Hom. 18 in 2 Cor.). The station of this class was within the nave or body of the church, near the ambo or reading-desk, where they received the bishop's benediction, and imposition of hands. Some canons call these the penitentes, by way of distinction from the others, but many hold that because they were most noted, and the greatest number of penitential acts were performed by them whilst they were in this station.—Bingham, Orig. Ecc. bk. x, ch. i, § 4, and xvii, ch. i, § 5.

Genuflection, the act of bending the knee, or kneeling in prayer. Baronius says that the early Christians carried the practice of genuflection so far, that some of them had worn cavities in the floor where they prayed; and Jerome relates of St. James, that he had, by this practice, contracted a hardness on his knees equal to that of camels. The Church of England gives many directions for the rubrics as to the proper time of kneeling in prayer; but warns all worshippers, in the last rubric on the communion service, that by the posture prescribed for receiving the symbols, "no adoration is intended, or ought to be done, either unto the sacramental bread and wine there bodily received, or unto any corporal presence of Christ's natural flesh and blood."—Farrar, Ecc. Dictionary, s. v.; Buck, Theol. Dictionary, s. v. See KNEELING.

Geoffrey (Geoffroi) of Auvergne, a French theologian, was born at Auvergne about 1120. He studied under M. de Marci and was aeton of Paris when St. Bernard came there to preach on the conversion of the clergy (de conversione ad clericos). Deeply impressed by Bernard's preaching, he entered the convent of Clairvaux in 1140. For thirteen years he was principal secretary and travelling companion of St. Bernard. In 1161 or 1162 he was elected abbot of Clairvaux, but the monks, dissatisfied with the severity of his rule, petitioned Alexander III to depose him. Geoffrey voluntarily resigned, and withdrew to Clifflles, where he died. The monks of Citeaux sent a seer of the relics of St. Bernhard to attempt a reconciliation between the pope and emperor Frederick, but he did not succeed. The following year he endeavored to make peace between the archbishop of Canterbury and Henry II of England, who invited him to remain in his kingdom. Geoffrey became a consecrated abbot in 1170, and of Haute-Come in 1176. We have no information concerning him after 1188, though Oudin claims that he lived until 1215. He compiled the letters of St. Bernard, and his own writings have been inserted in the works of that saint. A number of his letters, together with a life of St. Bernard, and a tract against Gilbert de la Porre, will be found in Bernardi Opera, vol. ii. He is considered as the author of the Compendium Caesarii de corpore Christi et sacramento Exteriarum, a manuscript tract against Ablard. See Oudin, De Script. Æ. S. B., vol. ii; Bih. litér. de la France, xiv, 480; Hoefier, Nouv. Bih. Générale, xx, 27 sq.

Geoffrey of Monmouth (Geofruidus, Galiisidus, Gaufrieus) was first abedarch of Monmouth, afterwards bishop of St. Asaph. He died in 1154. He wrote a Chronicum seu Historia Brittonum in two books, supposed by some to be a translation from the Welsh. It is one of the sources for the legendary history of Britain. The first edition is that of Paris, 1568, 4to; the latest, that of J. A. Giles (London, 1844, 8vo). Translated, The British History, from the Latin by A. Thompson, Esq. (Lond. 1719, 8vo; new ed. revised by J. A. Giles, Lond. 1842, 8vo); also in Bohin's Annales, lib. iii, p. 402, Bih. Brittan. Libr., Anglo-Norman Period, p. 143-149.

Geogony. See COSMOGONY.

Geography, considered as a systematic description of the earth, took its rise at a much later period than other sciences, probably because it is of less essential necessity to man; yet the elements of the knowledge out of which scientific geography is constructed must have existed as soon as men turned their attention to the earth on which they lived, and found it necessary to journey from one part of its surface to another. See COSMOLOGY.

1. In the absence of positive statements, we have to gather the views of the Hebrews as to the form of the earth from their allusions, and the use of particular images or words in the poetical books, where it is difficult to decide how far the language is to be regarded as literal, and how far as metaphorical. There seem to be traces of the same ideas as prevailed among the Greeks, that the world was a disk (Isa. xi, 22; the word כSerializable, a circle, is applied exclusively to the circle of the horizon, whether bounded by earth, sea, or sky), bordered by the ocean (Deut. xxx. 13; Job xxxv. 10; Ps. cxxix. 9; Prov. viii. 27), with Jerusalem as its centre (Ezek. v. 5), which was thus regarded, like Delphi, as the navel (š622; Judg. ix, 87; Ezek. xxxviii, 12), or, according to another view (Genilus, Thesaurus, s. v.), the highest point of the world. The parages quoted in support of this view admit of a different interpretation: Jerusalem might be regarded as the centre of the world, not only as the seat of religious light and truth, but to a certain extent in a geographical sense; for Palestine was situated between the important empires of Assyria and Egypt: and not only between them, but above them, its elevation above the plains on either side contributing to the appearance of its centrality. A different view has been gathered from the expression "four corners" (כTt2, generally applied to the skirts of a garment), as though implying
the quadrangular shape of a garment stretched out, according to Eratosthenes's comparison; but the term "corners" may be applied in a metaphorical sense for the extreme ends of the world (Job xxxvii, 8; xxxviii, 13; Isa. xi, 12; xxiv, 16; Ezek. vii, 2). Finally, it is suggested by Bähr (Symbolik, i, 170) that these two views may have been held together, the former as the actual and the latter as the symbolical representation of the earth's form. See Earth.

In the account of creation mention is made of a spot called Eden, out of which a river, after watering Paradise, ran, and "from thence it was parted, and became into four heads" (fountains), which sent forth as many rivers—Pison, Gihon, Hiddekel, Phrat or Euphrates. See Exod. Josephus, on this point, says (Ant. i, 2), "The garden was watered by one river which ran round about the whole earth and was parted into four parts." The idea here presented is that of a vast circular plain (the earth), with water, a river, or the sea (seevion in Homer, II. xxi, 196) encircling it, from which encircling body of water ran the said four rivers. Such, whether derived from the Hebrew Scriptures or not, was the earliest conception entertained of the earth. That some such idea was entertained among the Hebrews, even at a later period, appears from the words found in Ps. xxiv, 2: "He hath founded it (the earth) upon the seas, and established it upon the floods" (see also Prov. viii, 27); though Job xxvi, 7, "He stretcheth out the north over the empty place, and hangeth the earth upon nothing" (compare Job xxxviii, 4, 6), would seem to intimate that the writer of that book entertained superior notions on the
point. That, however, the general idea was that the earth formed an immense disk ("the circle of the earth"), above which were the substantial and firmly fixed heavens, the abode of God, while the earth beneath was his footstool, appears from the general phraseology employed in the sacred books, and may be found specially exhibited or implied in the following passages: Isa. xi. 1 sq.; Job xxxvii, 18; Psa. cii. 25. See Astronomy.

As to the size of the earth, the Hebrews had but a very indefinite notion; in many passages the "earth," or "whole earth," is used as co-extensive with the Babylonian (Isa. xiii, 5; xiv, 7 sq.; xxiv, 17), or Assyrian empire (Isa. x. 14; xiv, 28; xxxvii, 18), just as at a later period the Roman empire was styled orbis terrarum; the "ends of the earth" (גְּפֹנָתָם) in the language of prophecy was applied to the nations on the border of these kingdoms, especially the Medes (Isa. v. 26; xiii, 5) in the east, and the islands and coasts of the Mediterranean in the west (Isa. xlii, 5, 9); but occasionally the boundary was contracted in this latter direction to the eastern shores of the Mediterranean (Isa. xxiv, 16; Zech. ix. 10; Psa. lxxii, 8). Without unduly pressing the language of prophecy, it may be said that the views of the Hebrews as to the size of the earth extended but little beyond the nations with which they came in contact; its solidity is frequently noticed, its dimensions but seldom (Job xxxviii, 18; Isa. xiii, 5). The world in this sense was sometimes described by the poetical term tevel (תְּפָלֶל), corresponding to the Greek orbis mundi (Isa. xiv, 21).

The earth was divided into four quarters or regions corresponding to the four points of the compass; these were described in various ways, sometimes according to their positions relatively to a person facing the east, before (מִזְמַעְתָּם), behind (מעֶה), the right hand (ימין), and the left hand (שמאל), representing respectively E., W., S., and N. (Job xxiii, 8, 9); sometimes relatively to the sun’s course, the rising (מִצְנָעַתָם), the setting (מִצְנָעְתָם), the brilliant quarter (בָּפָר), Ezek. xi, 24), and the dark quarter (מִצְנָעַתָם), Exod. xxi, 20; comp. the Greek Ζώρας, Hom. Il. xii, 240); sometimes as the seat of the four winds (Ezek. xxxvii, 9); and sometimes according to the physical characteristics, the sea (ים) for the W. (Gen. xxviii, 14), the porch (פָּרָח) for the S. (Exod. xxvii, 9), and the mountains (מִזְמַעֲתָם) for the N. (Isa. xiii, 4). The north appears to have been regarded as the highest part of the earth’s surface, in consequence, perhaps, of the mountain ranges which existed there, and thus the highest part of the earth (Job xxxvi, 7). The north was also the quarter in which the Hebrew El-Dorado lay, the land of gold mines (Job xxxvii, 22, margin; comp. Herod. iii, 116).

These terms are very indistinctly used when applied to special localities; for we find the north assigned as the quarter of Assyria (Jer. iii, 18), Babylonia (Jer. vi, 22), and the Euphrates (Jer. xvi, 10), and more frequently Media (Jer. i, 3; comp. ii, 11), while the south is especially represented by Egypt (Isa. xxx, 6; Dan. xi. 5). The Hebrews were not more exact in the use of terms descriptive of the physical features of the earth’s surface: for instance, the same term (ים) is applied to the sea (Mediterranean), to the lakes of Palestine, and to great rivers, such as the Nile (Isa. xviii, 2), and perhaps the Euphrates (Isa. xxvii, 1); mountain (עלה) signifies not only high ranges, such as Sinai or Ararat, but an elevated region (Jobh. xi, 16): river (ירדן) is occasionally applied to the sea (Jonah ii, 3; Psa. xxiv, 2) and to canals fed by rivers (Isa. xxxiv, 27). Their vocabulary, however, was ample for describing the special features of the lands with which they were acquainted, the terms for the different sorts of valleys, mountains, rivers, and springs being very numerous and expressive. We cannot fail to be

The Countries known to the Patriarchs.
struck with the adequate ideas of descriptive geography expressed in the directions given to the spies (Num. xiii. 17-20) and in the closing address of Moses (Deut. viii. 7-9); nor less, with the extreme accuracy and the variety of almost technical terms with which they described the scenes and the features of the land of Promise. They had acquired the art of surveying from the Egyptians (Jahn, i, 6, § 104). See Topographical Terms.

2. We proceed to give a brief sketch of the geographical knowledge of the Hebrews down to the period when their distinct names and ideas were superseded by those of classical writers. Like most other sciences, geography owes its elementary cultivation as a science to the Hellenic race, who, from the mythic period of their history down to the destruction of the Vandal empire (A.D. 476), continued to protract the study with more or less system, and to more or less definite results; yet it must be added that it is only in a qualified sense that the ancients may be said to have known or advanced scientific geography.

The highlands of Armenia would appear to have been described by the Phoenicians, that the Descendants from these, some may have gone eastward, others westward.

The latter alone are spoken of in Scripture. Coming south and west, the progenitors of the world first became acquainted with the countries lying between the Euphrates and the Tigris, roughly termed Media. From this they marched south and west into Aram or Syria, Arabia, Canaan, and Egypt. These are the chief countries with which the ancient Hebrews seem to have possessed an acquaintance; yet if the national geographical table found in Gen. x. is to be referred to the early period which its position in the Bible gives it, it would appear that the geographical knowledge of the Hebrews was, even before the flood, far more extensive, embracing even the "isles of the Gentiles." See Ethnology. Other parts of Scripture by no means warrant us in ascribing to the Hebrews, before the Babylonian captivity, a wider range of knowledge than we have indicated above. This national calamity had the effect of enlarging the circle of their knowledge of the earth, or at least of making their knowledge of Assyria, Media, and Babylonia more minute and definite. It was to their neighbors, the Phoenicians, that the Descendants, following from these, some may have gone eastward, others westward. According to Clemens Alexandrinus (Strom. vi. 4, 36), the Egyptians had in circulation writings on geography. Their king Sesousri may have had maps (Schol. ad Apoll. Rhod. iv. 292; Goelet, Orig. des Libr. ii. 227), though probably the first attempt to form a map (that is, a written and printed description of places, with their relative positions and distances roughly guessed) is to be ascribed to the men whom Joshua (Josh. xviii) sent with orders to "go through the land and describe it;" and the men "went and passed through the land," and described it by cities into seven parts in a book.

At a later period, it is unquestionable that the Hebrews possessed a knowledge of the north-west, and a wider knowledge of the east, and even of the north of Asia (Ezek. xxvii; Isa. ii. 17). From the period of the Maccabees the Jews entered into relations of a more decided character, and they acquired a knowledge of the earth, and made them better acquainted with Asia Minor, Greece, and Italy. In the time embraced by the New Testament history they must have been widely acquainted with the then known world, since colonies and individuals of their nation were spread over nearly the entire surface covered by ancient civilization, and identified with the Roman empire. The occasional, if not periodical, return of Jews to the land of their ancestors probably increased the relations which they would sustain with their mother country, must have greatly widened, and made less inaccurate, the knowledge entertained in Palestine of other parts of the world.

Accordingly we read (Acts ii. 5 sq.) that, at the effusion of the Holy Spirit on the day of Pentecost, the "tongues of fire, as it were, divided and came and stood at Jerusalem Jews out of every nation under heaven."

3. The Hebrews do not seem to have devoted any attention to geography as a science, though they were widely scattered at the commencement of our era, and occupied a disjunctive place in literature. The Greeks probably led the way in systematic geography. The first map is said to have been constructed by Anaximander, about B.C. 600. Nearly a century later, Heceateus of Miletus wrote a geographical work entitled Ἴπαθικω Στράτος (Ubert, Geographiae des Hecat. und Domitian i. 37). Following this went Ptolemy, who made the first really scientific map of the world. The Phoenicians and Egyptians were likewise distinguished as geographers. Ptolemy acknowledges that his great work was based on a treatise written by Marinus of Tyre (Heeren, Commentatio de Ptolemaio Geographae Libri), etc.). Pliny, the only Roman writer who gives any account of the geographical science in the first century a. d., makes it a mere compiler. As a geography his book is of little value (see Ubert, Geographie d. Griech. u. Römer; Mannert, Geographie), etc.). Sacred geography was not reduced to a system until a comparatively recent time.

The Commentaries of Ptolemaio and some is an alphabetic list of places, with brief descriptions. The tract of Carduus, written in the 18th century, is little more than an itinerary. To Samuel Bochart, a French Protestant minister (born 1599), belongs the honor of writing the first systematic work on Biblical geography. His Geographiae Sacrae is a storehouse of learning from which all subsequent writers have drawn freely. Wells wrote his Historical Geography of the O. and N. T. in the beginning of last century. Reisch's Palestinena, published in 1714, remains to this day the standard classic work. Dr. Robinson's Researches opened a new era in Biblical geography. It is neither complete nor systematic; it is only a book of travels, with most important historical and geographical illustrations. Ritter's Palastina und Syria aims at system and completeness, but it is too diffuse. It gives use of the land, though there is little upon the Bible lands. A systematic and thorough treatment on Biblical geography is still a great desideratum in literature. See Archæology, Biblical.

Among the profane writers, Herodotus mentions Palestine, and probably Jerusalem, which he names Cadya (Herod. i. 163; ii. 106, 157, 159; iii. 5, 62, 64, 91; iv. 39). Strabo (in the time of Augustus) treats of Palestine in the second chapter of his sixteenth book on Geography, mingling together much truth and much error. Ptolemy, who died A.D. 161, treated of Palestine and the neighboring countries in chapter, xvii-xvii of his Geography. His Geographia Sacra (published in 1757) contains the conquest of Palestine by Pompey (xxvii., 15-17), the siege of Jerusalem by Titus (ix. 4-7), the restoration of the Temple by Hadrian, and the insurrection of the Jews under the same emperor (ix. 12-14). Of the Roman writers, the most useful is Tacitus (v., 18-19), treaties of Syria, including Palestine, and supplies much useful information. Tacitus's History, from the first to the thirteenth chapter of the fifth book, also relates to our subject. He hated both Jews and Christians (Annal. xi. 44), and in consequence gave such a false and paltry conception of what he knew or supposed to the Jews (Hist. ii. 8, 4; ii. 79; Annal. ii. 42; xii. 28). Some information may also be found in Justin (xxxvii. 2), in Suetonius (Augustus, 28; Claudius, 29, 28; Vespasian,
GEOGRAPHY

4, 5; Titus, 4, 5), in Pomponius Mela (1, 5), and in Ammianus Marcellinus (xiv, 8; xvi, 1).

Among the fathers of the Church much serviceable knowledge on the subject of Biblical geography may be found in the John writings of Lector and Jerome. The most important work, however, is the Onomasticon urbium et locorum sacra Scripturae (ed. J. Bonfrere, 1707). Living as they did for a long time in Palestine, the writings both of Eusebius and Jerome possess peculiar value, however, because they are given less as the times of which they speak recede from their

Some Arabian writers are not without value. We have Edrisi, Geographia Nubiensis (Paris, 1815); also Abulfeda Tabula Syria, and his Annales Musulmici, Schultens, in his Inser Geographicus in Visam Saladinii (Lucignani Batar, 1792), has collected many observations of Arabian authors on Palestine. See also Rosenmüller, Icones. 1, 34; Ritter, Erdkunde, ii, 478.

Modern works of travel in Bice countries have contributed much original information on this subject. They are too numerous, especially those on Palestine (q. v.), to be enumerated here in detail. Some of them may be seen in Durling's Cyclopaedia, col. 1819 sq; and most of them are referred to under each country in this work. The following lists embrace the most important in the several classes, including the above, as far as the space will permit.

a. Ancient and Medieval Writers: In this class are included the following works:

1. The chief text-book is of course the Bible. Next to this are (1.) Jumeinn—The Apostrophos; Josephus, Opera (ed. Hudson, 1729, 2 vols., fol.); Trall's translation of the W. London, 1838, 4 vols.; Strabo, Geographia (ed. Cassanbo, Geneve, 1867); Pliny, Historia Naturalis (ed. Sillig, Geneve, 1864-60, 6 vols.). Dio Cassius (Hamburgh, 1792) gives some account of the East. His work is a matter of great value in Tacitus and Livy are of little value. (2. Christian—Eusebius, Socrates, Sozomen, and Theodoret, in Histories Eccles. Scriptores, Grecor, 1859, 4 vols.; Jerome, Opera (ed. Migne, 9 vols. fol.). Theodoret, Opera (ed. Migne, 8 vols.); In the exegetical writings of Jerome and Theodoret are some useful notes on places they both resided in Palestine. William of Tyre, Historia Belli Sacri; James de Vitry, Historia Orientalis, etc. (these two works, with several others, are contained in Bonner's Gesta Dei per Francos, fol. 1611); Chronicles of the Crusades (ed. Monastier, 2 vols.); Edward of Devizes, Geoffrey de Vinsauf, and De Joinville.

2. Geographical Works and Itineraries:—The best are Geographia (vol. 1535); Tabula Peutingeriana, a rude chart of the Roman empire, made in the 3rd century. Reland gives the part including Palestine. Eusebius and Jerome, Onomasticon Urbium et Locorum Sacra Scripturae (ed. Clerico, fol. 1707; last edit. by Larow and Parthey, 1863); Vetara Romanorum Itineraria (ed. Wesselingius, 1730), containing the important itineraries of the Bordeaux pilgrimage, and of Antonine, with Synecdoces of Hierocles; Edrisi, Geographia Universali (in Rosenmüller's Analecta Arabica, 1829); Topographical Index in Bokhadi Vias et Resta Kota Saladin (ed. Schulz, folio, 1732); Brocardus, Locorum Terrae San. Description (ed. Clerico, appended to the Onomasticon, folio, 1707); Abulfeda, Tabula Syriaca (1735); Busching, Geographia Universa (1730); Leuschner, Itinerarium Byzantium (1712, 3 vols. fol.); Sanson, Geographia Sacra (ed. Clerico, folio, 1714); Carolis A. S. Paulus, Geographia Sacra (ed. Holsten, folio, 1704); Cellarius, Notitia Orbis Antiqui (1701-5, 2 vols. fol.). Wells, Historical Geography of the C. and N. T. (1819, 2 vols.); Reland, Palestinae Scripta (1718, 2 vols. fol.); G. de Bobois, Jerusalem, 2 vols. fol.; Busching, Erdreisabriefe, Pallatina, Arabien, etc. (1785); Rosenmüller, Bib. Geogr. of Central Asia (by Morren, 1836, 2 vols.); Rauner, Paltina (1850); Forster, Historical Geography of Arabia (1844, 2 vols.); Brör, Historico-Geographica, Account of Palestine (1843); Ritter, Die Sinai-Hilbien, Paltina und Syrien (1848-55, 4 vols. in six parts; an English transl. has appeared, Lond. 1868, 2 vols.); Kitto, Physical Geography of Palestine (1841, 2 vols.); Conybeare and Howson, Life of St. Paul (1855, 2 vols. fol.); Smith, Voyage and Shrewde, of St. Paul (2d ed. 1855); Porter, Island-hand book for Syria and Palestine (1858, 2 vols.); Van de Velde, Map of Palestine (1858); Robinson, Phys. Geog. of the Holy Land (2d ed. 1855).

b. Books of Travel:—Wright's Early Travels in Palestine (1848, containing, among others, Arculf, Sewulf, Benjamin of Tudela, Maundeville, and Maundrell); Cotovicius, Itinerarium Hierosolymitanum (1913); Quarnemont, Historia Theolochica et Moralis Terrae Sanctae (1841); Elchelide, Travels in Syria and Egypt (1841, 2 vols.); D'Arriuex, Travels in Arabia the Desert (1782); Shaw, Travels in Barbary and the Levant (1808, 2 vols.); Pococke, Description of the East (1743-45, 4 vols. fol.); Hasselquist, Travels in the Levant (1766); Niebuhr, Travels through Arabia (1728, 2 vols.); Volney, Voyage en Syrie, etc. (Paris, 1807, 2 vols. fol.); Collectanea and Observations touching notes and illustrations. (2) Heathen—Herodotus, especially Rawlinson's translation (Lond. and N. York, 1858-60, 4 vols.); Strabo, Geographia (ed. Cassanbo, Geneve, 1867); Pliney, Historia Naturalis (ed. Sillig, Geneve, 1864-60, 6 vols.). Dio Cassius (Hamburgh, 1792) gives some account of the East. His work is of great value in Tacitus and Livy are of little value. (3.) Christian—Eusebius, Socrates, Sozomen, and Theodoret, in Histories Eccles. Scriptores, Grecor, 1859, 3 vols. fol.; Jerome, Opera (ed. Migne, 9 vols. fol.); Theodoret, Opera (ed. Migne, 8 vols.); In the exegetical writings of Jerome and Theodoret are some useful notes on places they both resided in Palestine. William of Tyre, Historia Belli Sacri; James de Vitry, Historia Orientalis, etc. (these two works, with several others, are contained in Bonner's Gesta Dei per Francos, fol. 1611); Chronicles of the Crusades (ed. Monastier, 2 vols.); Edward of Devizes, Geoffrey de Vinsauf, and de Joinville.

b. Geographical Works and Itineraries:—The Polomy, Geographia (vol. 1535); Tabula Peutingeriana, a rude chart of the Roman empire, made in the 3rd century. Reland gives the part including Palestine. Eusebius and Jerome, Onomasticon Urbium et Locorum Sacra Scripturae (ed. Clerico, folio, 1707; last edit. by Larow and Parthey, 1862); Vetera Romanorum Itineraria (ed. Wesselingius, 1730), containing the important itineraries of the Bordeaux pilgrimage, and of Antonine, with Synecdoces of Hierocles; Edrisi, Geographia Universali (in Rosenmüller's Analecta Arabica, 1829); Topographical Index in Bokhadi Vias et Resta Kota Saladin (ed. Schulz, folio, 1732); Brocardus, Locorum Terrae San. Description (ed. Clerico, appended to the Onomasticon, folio, 1707); Abulfeda, Tabula Syriaca (1735); Busching, Geographia Universa (1730); Leuschner, Itinerarium Byzantium (1712, 3 vols. fol.); Sanson, Geographia Sacra (ed. Clerico, folio, 1714); Carolis A. S. Paulus, Geographia Sacra (ed. Holsten, folio, 1704); Cellarius, Notitia Orbis Antiqui (1701-5, 2 vols. fol.). Wells, Historical Geography of the C. and N. T. (1819, 2 vols.); Reland, Palestinae Scripta (1718, 2 vols. fol.); G. de Bobois, Jerusalem, 2 vols. fol.; Busching, Erdreisabriefe, Pallatina, Arabien, etc. (1785); Rosenmüller, Bib. Geogr. of Central Asia (by Morren, 1836, 2 vols.); Rauner, Paltina (1850); Forster, Historical Geography of Arabia (1844, 2 vols.);

I. History of the Inquiry.—(Comp. the treatise of Paxton, The Earth and the World, Lond. 1858, p. 129–189.) The prevalent opinion among the learned for upwards of two centuries after the revival of letters was that organic remains were mere mineral concretions which had been invented to account for their production in methods quite worthy of the school of subtle philosophy whence they issued. This was maintained, not by obscure monks, but by really accomplished persons, the lights of natural history in their day, such as Fallopio, Mercati, and Olivi in Italy, Plot and Lister in England, and Agricola in Germany.

The excavations made for repairing the city of Verona in 1517 brought to light a number of fossil remains, the appearance of which exercised the wits of that time; and, among others, Fracastoro boldly expounded their true meaning and relations. He declared that they had not originated in any such "plastic force" as was pretended, nor could they have been the results of the waters of the deluge. After having been rescued from the mineral kingdom, they were easily and naturally attributed to the deluge. Fabio Colonno, in 1600, and the whole of the Italian writers of this period, considered that all petrifications were the remains of the Noahian deluge.

In 1639, Steno, a Dane, attached to the court of Tuscany, exposed the true theory of organic fossils, which he deduced from the examination of the sedimentary rocks by selecting strata which appeared to him to be unmosaiferous, and treating them as having been created before the existence of animals and plants. In 1676, Quirini contended that the diluvial waters could not have effecte all the operations attributed to them, and maintained that the universality of the Mosaic deluge was not to be insisted on. In 1688, Robert Hook, in his posthumous treatise on earthquakes, assigns to organic remains their true character, and supposes that some species may have been lost. In his diluvial theory he attempted to crowd the time between the creation and the deluge, and into the latter, all the visible phenomena of upheaval or dislocation.

In 1690, Dr. Thomas Burnet, in his Sacred Theory of the Earth, describes the earth at the beginning as a fluid mass composed of all kinds of materials. The heaviest descended to the bottom and formed a solid kernel, around which the waters, and afterwards the atmosphere, united; but between the water and atmosphere there was formed an oily stratum, which received, little by little, all the earthly constituents with which the gists, or similar charges, were mixed. Of this, he supposed to be the bed, marshy, thin, uniform, level, without mountains, without valleys, without either seas or rivers, lived the antediluvian generations. At this epoch the marshy crust, dried up by the heat of the sun, split, and fell down in the great abyss of waters. From thence came the universal deluge, the disarrangement of the axis of the globe, and the changing of climates. The earth, thus drowned, had still some cavities into which this water and other materials were returned to their subterranean reservoir. Thus the ocean is a part of the great abyss, the islands are the fragments, the continents are the great residuary masses of the old world. To the confusion brought about by the breaking up of the waters are owing the mountains and other unequal parts of the earth. This is a specimen of a large class of writings which passed for the effusions of learning and piety in the Augustan age of English literature.

In 1656, Whitson, the great astronomer, published his Discourse of the Deluge of the earth. He conceived of the earth as still having in its midst a solid and burning kernel, retaining the heat which it received from the sun when it was only the nucleus of the comet, and continually spreading it towards its circumference. This nucleus is itself surrounded by a great abyss, which is composed of two rings, of which the lower is a heavy fluid, and the upper water; it is this layer of water which constitutes the foundation of our earth. The deluge was occasioned by another comet striking the earth, and was the parent of all the disturbances now manifest in its crust.

About the same time, great Leibnitz wrote of the earth as an extinct sun vitrified. According to him, its greater portion was the subject of a violent fire, at the time when Moses tells us that the light was separated from the darkness. The fusion of the globe produced a vitrified crust; when the crust was cold, the humid parts, which had risen in vapour, fell again, and formed the ocean. The sea then deposited calcareous rocks. It at first enveloped all the surface of the globe, and surrounded the higher parts which at present form the continents and isles. Thus the shells and other rubbish of marine animals that one finds everywhere prove that the sea has covered all the land; and the great quantity of fixed salts, of sand, and other matters, fused and calcined in the earth, testify to the universal fire, and that it preceded the existence of the sea.

In 1696, Dr. Woodward, in his Discourse on the Natural History of the Earth, most ably vindicates the proper nature of organic remains, and disposes of the views of those who attribute them to casual inundations, or to the wash of the sea when the land was first made; but he is equally unsuccessful in the formation of a hypothesis of a hypothetical origin. He holds that at the deluge the solid strata of the earth were dissolved in the water; the remains of animals sank down and became imbedded according to their relative gravity.

In Italy, Vallierani, finding by his own careful observations that the facts were not in accordance with the theories then in vogue, which were affirmed to be founded in the interpretation of Scripture, attacked the interpreters, and demonstrated that they were in error. He wisely contented himself with recording his own observations; and would not attempt the construction of a theory.

In 1740, Moro, on the other hand, with much that is valuable in his onslaught upon other cosmogoniasts, fell into the error of becoming one of their number. His theory, however, is much more consistent, as well as reverential to the truth, than that of any of his predecessors.

In 1749, Buffon published, like his fellow philosophers, a theory of the earth, which is now found in the first part of his collected works. It is a free and easy way of world-making. Of course one begins with a comet, volcanic and aqueous forces at pleasure. The Sorbonne required him to recant so much of his work
as expressed the sentiment that the waters of the sea had produced the land, and then left it dry, and that the land was again, by wear and tear, gradually merging into the sea. The recantation is published with his consent, while his sons, as author forty years' thought, and enjoyed uncommon reputation. Even now their decision of tone and eloquence of statement command an interest.

In 1756, Lehmann, the German mineralogist, confined the action of the flood to the production of a few only of the rocks, and assigned the inoffensive strata to the original creation, and the conglomerates to an intermediate revolution.

In 1760, Michell, who held for eight years the Woodwardian professorship at Cambridge, showed himself to be the true predecessor of modern geology. Neglecting cosmogony altogether, and applying himself to the description of the strata as they appeared under his own observation, he discovered the true sequence of the beds, and indicated a direction in which the geologist might pursue his labors without infringing on theology.

After Michell, the visions of the cosmogonists were again reproduced by various English writers. Sound geology, however, began to take precedence of world-making; the actual wonders of the subterranean world were preferred to the fancy creations of the world-makers. Hutton, Wilson, and William Smith, the latter comprising Cuvier and Brogniart, kept the republic of letters well employed in acquiring the grammar of the new science, which was created by physical researches into the strata and their contents. Henceforward cosmogony assumes a second-rate position.

De Luc, in 1799, wrote the chronology of Moses, as only commencing with the creation of man; and of the days of creation as being not natural days, but indefinite periods. A long line of illustrous men, many of whom are now living, diverted attention from the vain attempts of the early philosophers, and occupied themselves exclusively with descriptive geology. A classification of opinions — taking only the views of the leading men—will serve to show, in a general way, what has been said and done for the last fifty years in this department of knowledge. The following are the principal hypotheses:

1. That the days of creation are indefinite periods, during which all the phenomena of geology occurred; that the deluge is now marked by the drift and gravel remains of the post-tertiary age (Cuvier, Parkinson, Jameson, and others).

2. That the first sentence of Genesis has no connection with the subsequent verses. The phenomena of geology have place between the first and second verses. The chaos was universal, and ushered in the present creation (Chalmers, 1864. See also The Earth's Antiquity in Harmony with the Mosaic Account of Creation, by James Gray, M.A., 1849).

3. That the earth that now is was the bed of the antediluvian sea. That all the phenomena now visible resulted from operations in the interval between the creation and the end of the deluge. That, save this, the rocks were created as they now exist (Granville Penn, Young).

4. That we cannot rely on an interpretation of the Hebrew records, and therefore we may set them aside when apparently at variance with geological facts (Babbage).

5. That the records are poetical representations, and not historical (Baden Powell).

6. That the first verse is a detached account of the original creation. The chaos, the six days' creation, and the flood were local phenomena, and refer to what was actually in the province occupied by man only (Dr. Pye Smith).

7. That the "days" were great natural periods. The Paleozoic system, pre-eminently that of plants, is the work of the third day; the secondary, pre-eminently the epoch of sea-monsters and creeping things, is the work of the fifth day; and the tertiary, the time of mammalian creatures, is the work of the sixth day" (Hugh Miller).

8. That the Mosaic narrative is a revelation made in visions to the mind of the prophet; the days are therefore spoken of not in connection with the events, but the duration of the vision. The events occurred in extremely lengthened periods. The deluge was partial (Lime, Mosaic Record in harmony with Geology, 1864; Preachers, Genesis of the Earth and Man, 1867).

9. That all creation took place consecutively, according to the literal reading of Gen. i. All things, fossil and recent, form part of one whole system of life, and were created at once on the successive days of creation. That the fossil species have been geologically extinct, and their remains buried by disturbances occurring from the first (L'Abbe Soignet, Cosmogonie de la Bible, Paris, 1854).

10. P. H. Gosse (Omphaklos, Lond., 1857). The theory of this writer is a reproduction of Granville Penn, with a dash of the old, and a streak of rational and anti-geologic notion of the creation of the rocks, with fossils complete as they are. He affirms a principle which he calls the law of "prochronism," in virtue of which the strata of the surface of the earth, with their fossil flora and fauna, may possibly belong to a "prochronic" (i.e. to an unreal, fantastic, or typical) development of the mighty plan of the life history of the world.

The preceding account, though it is only a very general view of the principal hypotheses on this subject, yet sufficiently shows how the minds of the framers have been fixed. The form of the sacred writings. They have done homage, unconsciously in many instances, to divine truth, by acknowledging the necessity of accordance with it, however widely they have diverged from its plain teaching. It is a notable instance of the commanding power of the Scriptures that thus far, in ages of skepticism and of enlightenment, they should still have been the polestar, guiding all voyagers in their pathless track towards the unknown.

11. We have reserved until last, as being, on the whole, the most comprehensive and satisfactory, the conclusions of Old Testament writers, which have now for some years been before the world (originally sketched in Kitts's Journal, Jan. 1850), and have not been refuted by any philologist. He affirms that, apart from geological considerations, and judging from analogy with Scripture alone, the Interpretation of the sacred volume renders the following ten propositions credible:

(1.) That the absolute age of our earth is not defined in the sacred volume.

(2.) That there may have been a long interval in duration between the creation of "the heaven and the earth" mentioned in the first verse of the first chapter of Genesis and the continuation of the earth's history in the second verse.

(3.) That the term "the earth" does not apply necessarily, in every instance, to the whole of our planet, but sometimes only to a part of it.

(4.) That the state of the earth, described in the second verse as "without form and void," does not necessarily mean matter never reduced to form and order, but may signify matter reduced to disorder, after previous organization and arrangement.

(5.) That the "darkness" "upon the face of the deep," also mentioned in the second verse, is not negative of the present existence of light, but may have been only a temporary one.

(6.) That the commencement of the account of the first six days' creation dates from the beginning of the third day; and God said, Let there be light.

(7.) That the act of "the first day" does not necessarily signify the creation of light, but may have been only the calling of it into operation upon the scene of "darkness" described in the second verse.
GEOLoGY

(8.) That the calling of "the light Day" and "the
darkness Night," with the declaration that "the even-
ing and the morning were the first day," does not nec-
essarily imply that this was the first day, absolutely
speaking.

(9.) That the work of "the second day," mentioned
in the sixth, seventh, and eighth verses, may have been
only an operation performed upon the atmosphere of
our earth.

(10.) That the work of "the fourth day," described
from the fourteenth to the eighteenth verses, does not
necessarily imply that the sun, moon, and stars were
then first created or formed, for the first time, from
pre-existent matter; but may only have been that
which was first in the geological history of the presen
time, made visible to it, and ordained to their offices with
respect to the coming hu-
man creation (Genesis and Geology, Lond. 1832; Phila.
1853).

11. Controversy between Geologists and Theologians.—
"The kindred sciences of geology and palaeogoggy
cannot yet be said to have been in existence more than
eighty years. But they had scarcely begun to assume
the form and lineaments of sciences when that jeal-
ousy, which has never since the days of Galileo ceased
to exist to some extent between the theologian and the
gleologist, in the sense in which the word was used by
the theologian was alarmed by rumors that the rocks, un-
der the searching eye of the geologist, disclosed a state
of facts which was wholly at variance with the Mosaic
detail of the manner and order of the creation; and
that which the creationist had been taught, was to be
condemned and denounced, in no very measured
terms, as destructive of the doctrine of the divine in-
spiration of the Scriptures, and as infidel in their
inception and tendency. On the other hand, the man
of science was not slow in retorting that, if the record
of Moses was the Divine origin, it had nothing to rup-
ture the development of facts; and that, if it
might not be the test of physical truth, it must give
way, even though it stood on the threshold of the
treasury of inspiration; for that, in such a crisis, the
memory of the senses with which man has been end-
dowed for his guidance must prevail against unsure
matters of faith. In argument the man of science
had the advantage, but in practice he erred by too fre-
quently assuming geological facts and Scripture inter-
pretation without sufficient inquiry, and so contribu-
ting to the present absurdity which is so generally ex-
posed. The theory of the universal waters and the
word and the works of God, which, by the decrees of
Omni-science, must ever be joined together.

"The contest, in its early stages, was carried on by
those theologians who contended the Mosaic days of
the creation to have been six successive natural days
of twenty-four hours each, measured by the revolution
of our globe on its axis; and the objection of the ge-
ologist was founded on the obvious impossibility or
absurdity that the world could have been stocked
with the various animal and vegetable organisms, whose
remains have been found in the crust of the earth, in
the brief period of the six natural days that preceded the
birth of Adam. The evidence was incontrovertible
that for untold ages before that event generation upon
generation of extinct animals had lived and died upon
the earth.

1. To meet this difficulty, which threatened to bloc
out the first page of the Scriptures from inspired rev-
olution, and which was obviously subversive of the
authenticity and inspiration of all Scripture, a host of
champions arose, who, instead of examining with pa-
tience and testing with care the alleged facts of geol-
yogy, recklessly denied their existence, or sought to
explain and account for them on wholly inadequate,
and in many instances on false and absurd principles
and grounds. Some ascribed the existence of fossil
remains to the flood in the days of Noah; others to
what was termed a plastic power that existed as one
of the natural laws of matter; and others, again, in-
sisted that the various systems of rocks were created
by the flat of the Almighty with the fossil remains of
animals that never lived, and of plants that had never
grown, imbedded in them. These were the rea-
sonings of Granville Penn, Fairholm, Kirby, Sharon
Turner, Gisborne, Taylor, dean Cockburn, etc.; and
of them it is unnecessary to say more than that the
progress of science discoveries has extinguished their
arguments, not only without injury to the cause of
Scripture truth, but with the effect of establishing it
on a surer basis.

2. Another class of inquirers sought to solve the
difficulty by conceding the well-established facts of
geology, and the deductions from those facts, but sug-
uggesting that the imperfection of our knowledge of
the original Hebrew at the present day was such as to
preclude all certainty of a right interpretation of its
meaning. This was the position of Babbage; while
Baden Powell insisted that the narrative of the crea-
tion is couched in the simple language of the choice
mythical poetry, and was not intended to be a historical
detail of natural occurrences. It is satisfactory to know
that the ne-
cessity for arguments so injurious in their tendencies
are the cause of the truth and integrity of the Bible no
longer exists; for the precision of the Mosaic phrase-
ology was never so well defended by the theologian as
it had been taken in the development of the truths of
geology.

3. At an early period of this controversy, Dr. Cal-
mers, whose sagacious mind and prudent foresight
comprehended the importance of this issue between
the facts of geology and the sacred Scriptures,
proposed the proposition that 'the writings of Moses
do not fix the antiquity of the globe'—that after the
creation of the heavens and the earth, which
could have comprehended any interval of time and
any extent of animal and vegetable life, a chaotic period
of darkness and separation held its place upon our
globe, and the earth became, in Scripture language,
'without form and void,' and all that had previously
existed was, by some catastrophe, blotted out, and a
new world of light and life produced, by fits of the
Daity, in a period of six natural days, closing with
the birth of Adam: and thus the whole of the earth
now exists was cut off from that which preceded it by a
period of black, chaotic disorder. The geologist had
thus ample room for the existence of all the organisms
whose remains are found in the rocks that compose
the crust of the earth, and there was no specific in-
vestigation of the nature and order of geological events
without endangering the truth of the Mosaic record of
the creation.'

Against this view Dr. Conant urges several ob-
jections (Revised Version of Genesis, p. xx), the force of
which, however, may, in a great measure be readily
parried. 1. The sacred writer himself gives no inti-
mation of such an interval. Of course not, since its
mention forms no part of his plan. An argumentum a
silentio is wholly invalid. It is sufficient if a space
can be found in point of fact. 2. It assumes that Mo-
ses has given us an account of only one part of the crea-
tive work. But no one claims that he has given all
the details of creation, or even a complete outline of
it. His object was merely to state so much as stands
connected with human history; and on the view in
question, this is more perfectly done to evince the
other interpretation, since it was the last creative stage
by which the earth was specially fitted for man's abode.

8. Science shows no such convulsion in the period pre-
ceding man's introduction on the earth. On the con-
trary, an innumerable series of such cataclysms are
revealed, by the very nature and character of the var-
ious strata of the earth's crust, and there is special evidence of some general
ice-wave almost immediately preceding the historic
period, in the phenomena of drift, bowlders, and strata-
ned rocks, all of which are everywhere strewn upon
the present surface of the globe. 4. Six extended cre-

Digitized by Google
ative periods allow time for the operation of second causes, such as those which were common for long ages in the formation of the earth, whereas six mere days would be no more called for than a single instant, such as that in which the Almighty first evoked the primitive matter into being. But we are not competent to prescribe what would be a worthy process for the formation of the heavens and earth and their astonishing significance of these week-days as compared with the Sabbath. Besides, the theory in question affords equal scope with any other for the cycles of geogyology, geology, and zoology, while it brings the inspired narrative closer to man's present condition with his animal and vegetable companions. For example, on the opposite view, little propriety could be made out of the historical statement, Gen. ii, 19, 20: "Now Jehovah God had formed from the ground every living [thing] of the field, and every bird of the heavens, and brought [each] to the man to see what he would call it; so that whatever the man might call it [as] a living creature, that [was] its name; accordingly, the man called names to all the cattle, and to the bird of the heavens, and to every living [thing] of the field; but for the man [one] did not find a helper as his counter-part, and Jehovah God formed from Adam's body's dust a woman. Forth with in the field in six days Jehovah God reviewed the fossil forms of long-extinct species from the bowels of the earth; and yet he must have done so if the animated tribes just spoken of, which are obviously the same with those of the sixth demiological day, were those of the geological ages. The advocates of a literal sense through intemperance, say, the first six day are at liberty to apply the above-quoted language to an inspection of merely the surrounding creatures, or those inhabiting the garden of Eden along with Adam, as specimens of the various races roaming the earth—as in the case of the animals assembled in his own neighborhood by Noah into the ark [see Deluge]; for their interpretation gradually narrows down the scope of the Mosaic cosmogony to man's special accommodation; but this symbolical theory, being throughout of cosmopolitan extent, requires all its text to be taken in their most usual application. Indeed, in order to be consistent, it should not be content with the creation of a single human pair, and their location in a particular spot; but it really favors the modern skeptical demand for an aboriginally widespread humanity in various independent centers of origination. See Am."

The objections of Kalisch (Commentary on Genesis, p. 46 sq.), who concludes that, "with regard to astrology and geology, the Biblical records are, in many essential points, utterly and irreconcilably at variance with the established results of modern researches" (p. 52), are as follows: (1) That the connecting ένεργόν, of ver. 2, "expresses immediate sequence." So little force is there in this as an absolute or universal remark, that the connection in question occasionally appears at the beginning of a book (Exod. i, 1; 1 Kings i, 1; Ezra i, 1) or even an isolated epistle (2 Kings v, 6; x, 2). See Gesenius, Theaurus, p. 355, b. (2. Exod. xx. 2). For in six days Jehovah God made the heavens and the earth," etc., so far from being "in direct opposition" to this view, is in exact agreement with it, since that expression, which is a mere repetition of the summary statement in Gen. ii, 1, contains not one syllable concerning the creation (it is N.Σ.Σ. there, not N.Σ.Σ. as in Gen. i, 1) of matter. The formula "heavens and earth" in Gen. i, 1 denotes the universe in its present state of animal life is specified. (3) Abraham appropriately compares "heavens and earth," although expressive of the universe, does not mean the celestial and terrestrial worlds as such, or as now extant, but merely their elementary state or materials. This will be disputed by few if any interpreters. But thus, under any theory, a long interval must have elapsed between this primordial state of matter, and its organization or crystallization which refutes itself. (4) "The earth could not have been termed 'dreary and empty' if it had [badly] teemed with life and vegetation long before." Certainly it could if this life and vegetation had been destroyed, as we suppose. (5) For the same reason, the argument cited by the same author (p. 45) from Hugh Miller (Transactions of the Geologists, p. 121, 122) is inappropriate here, that "for this origin moral and religious, it is led into being not a of [the species of] his humble contemporaries of the fields and woods enjoyed life in their present haunts, and that for thousands of years previous to their appearance many of the existing species of animals were inanimate and in the air. Species may very readily have been recreated, on the theory we are now advocating, even if they had been exterminates just before the period of man—which, however, does not necessarily follow, for their germs may have survived the cataclysm suppose."

The objections which Dr. Taylor Lewis urges against this "chasm theory," as he styles it, and which he regards as "the most difficult as well as the most unsatisfactory" of all the proposed solutions, are still less forcible (Lange's Commentary on Genesis, p. 157): 1. The incongruity between the spoken and the events of verse 1, after the words of the becoming are repeated, and after these words there is no direct connection. 2. Want of natural or moral reasons for the alleged catastrophes. But no catastrophe is stated in the narrative; it is only an inference of modern times. The theory is evidently brought in geologically as a difficulty or objection to the interpretation against it, for all the modern explanations are but ingenious devices to meet some speculative view, except the bale one that holds to the literal creation of the universe in six periods of twenty-four hours each. On the other hand, the interpretation under consideration simply allows Moses to say nothing about matters with which he had nothing to do. We protest against making him wise in all the modern scientific ratiocinations. 4. It makes the "heavens" of ver. 1 different from those of ver. 8. This is true only as to the extension of the term, which the different character of the two contexts requires us to vary. Does any reasonable interpreter suppose the mere sky alone to be meant in ver. 1, as in ver. 8? 5. The connecting "and," does not admit "so sharp and remote a severance" in the history. We may reply that there was no wide gap in the imagination of the writer; it exists only in the mind of the modern savant. But, supposing that Moses did know all about the period thus ignored by him, every Bible reader is aware how often in the Bible the silence is silently bridged by the conjunction in question, which might almost be described as a "disjunctive" rather than a copulative. The erudite objector himself candidly admits (p. 180) that such minute grammatical points as the sense of the verb T.M. in, "was," instead of T.M., as well as the question whether the first day is exclusive or inclusive of the "beginning," are inconclusive.

On the other hand, the sacred text itself discloses several positive indications of such a hiatus as we have supposed between verse 1 and 2 of Gen. i. (1) The term "beginning" implies a sequel or later stage of creation, especially as it stands in so emphatic a position and a different form. (2. Act here designated by the word "created" is not a general one, of which the details follow, but one totally distinct in kind from them, namely, the abomination of matter itself; hence it is not used again until the bringing into existence of that which is specified. (3) If the sequence is thus precise "heavens and earth," although expressive of the universe, does not mean the celestial and terrestrial worlds as such, or as now extant, but merely their elementary state or materials. This will be disputed by few if any interpreters. But thus, under any theory, a long interval must have elapsed between this primordial state of matter, and its organization or crystallization.
GEOLGY

zation into the most rudimentary forms to which it is possible to apply the statements of the succeeding verse. (4) For 'the earth' is there spoken of separately as a distinct globe, and special prominence is given to it by its emphatic position in the sentence, as well as by the strong disjunctive accent placed upon it by the Masoretes, whereas the reduction of the heavenly bodies to their present order is not spoken of till a much later point—a fact utterly irreconcilable with the view that makes the latter phenomena coincide with their astronomical production.

(5) The force of the substantive verb הָבָשָׂה, "was," which, as being expressed in ver. 2, is not the simple copula, adds intensity to this distinction of the terrane from the aerial sphere, and shows that the writer has descended from the universal creation to our own planet as the immediate abode of man. Now, although the verb in question ought not perhaps, with some, be rendered became, remained, etc., yet as the equivalent of וַיִּשָּׂא, in distinction from וַיְסֹreleased, it certainly serves to point out a particular condition of the earth at a definite stage of its history as an actual exist in contrast with its later and prior state; q. d., "The earth, however, still existed as," etc. (6) The peculiar phrase employed to describe the condition in question is even more conclusive of this interpretation; for not only is this not an adjective, which would have expressed simple quality, but the nouns יִתְנָה and יִתְנָה, literally usitateness and desolation, or emptiness and vacancy (for both these ideas are implied, and the two terms are synonymous), by way of reiterated asseveration, are both expressive of a positive rather than a negative fact, the result of an active cause, and not a mere continuance of disorder or the absence of organic principles, q. d. "wreck and ruin" (compare Isa. xxxiv, 11, "He shall stretch out the heavens as a curtain, and spread the earth over as a tent")—the deception [see of emptiness [םָּא], "speaking of the complete demolition of a city]."

(7) The same picture of devastation is contained in the parallel terms רָעָה, abys, and יָסַדְתָּה, surface of the water; by which the face of the globe (not its interior) is represented as a vast and billowy sea, just such as an arctic deluge or a suddenly hidden more de place would exhibit. (8) Finally, the brooking (דְּנַתַּה) of the divine Spirit over this dark and turbid nest (not chaotic world-egg) does not express the idea of active or restorative effort, but rather implies the already fecundated germ or organized embryo, which only needed incubation to bring it to perfection and manifestation. The semina terrae survived the extinction of the parent races, and a fresh brood was to repopulate the globe. Or perhaps the figure may still better be interpreted of the budding earth, chilled and stunned by the recent catastrophe, nestling for warmth and protection beneath the genial wings of its Creator, to gather new vigor for the final essay at independent life and action.

Dr. Pyle Smith, in his Geology and Scripture, suggested that the chaotic period was confined and limited to one particular portion of the earth's surface, viz. that part which God was adapting for the dwelling-place of man and the animals connected with him. This section of the earth he designates as 'a part of Aria lying between the Caucasian range, the Caspian Sea, and Tartary on the north, the Persian and Indian seas on the south, and the mountain ridges which run, at considerable distances, on the eastern and western flanks;' and he suggests that this region was brought by atmospheric and geological causes into a condition of superfluous ruin, or some kind of general disorder. This theory left to the geologist the unbroken series of plants and animals in all parts of the world, with the exception of this particular locality. But the explanation was never received with favor, and was obviously inconsistent with the language of Scripture, inasmuch as the term 'the earth,' in the first verse of the first chapter of Genesis, embraces the whole of the terrestrial globe, and 'the earth' that is, in the next verse, 'the earth is void,' cannot be more restricted in its meaning and extent." This theory, however, is maintained by one of the latest expositors of this portion of Scripture (Murphy, Commentary on Genesis, ad loc.).

5. Another scheme of reconciliation of Scripture and geology has for its foundation the assumption that the Mosaic days designate periods of vast and undefined extent—that the six days of creation portray six long periods of time, which commenced with 'the beginning,' and have succeeded each other from thence through the inexplicable spaces depicted by Moses, up to and inclusive of the creation of man; and that the seventh day, on which God rested from his work of creation, is still current. Against such a construction of the word 'day' in the Mosaic record, Dr. Buckland, who was one of the advocates for the natural-day interpretation, stated that 'there is no sound critical or theological objection;' an admission, however, which there is abundant reason to dispute. See DAY.

'Long before the question had assumed the importance and interest which the discoveries of geology have given to it, many well-informed philologists advocated the view that the Mosaic days were periods of long duration. Among the Jews, Josephus and Philo, and of Christians, Whiston, Des Cartes, and De Luc, have so expressed themselves; while of those who have written with full knowledge of geological facts, we have Conybeare, Philippi, and Hugh Miller—all of them holding the opinion that the Mosaic days of creation were successive periods of long duration." Nevertheless, in a hermeneutical point of view, this theory is open to the gravest objections. See COSMOGONY, MOSAIC.
question, they altogether fail to tally. However in-
definite an extension, therefore, we may give to the 
whole subject the treatment it richly merits. It is but 
simply so long as the successive events themselves so 
widely differ from those of the scientific system. More-
over, the creations of the geological world overlap 
each other, and vary in their relative position in dif-
ferent places. , whereas those of the biblical cosmog-
ony are strictly consecutive and universal.

Similar objections apply to an ingenious theory of 
Prof. S. D. Hillman (in the Meth. Quart. Rev. Oct. 1868), 
that, while admirably defending the "nublar hypo-
thesis," proposes to identify the days of creation with 
temporal events. , whereas those of the biblical cosmo-
gony are strictly consecutive and universal.

"The consistency or harmony of these two records of 
the creation—that of Moses and that of the geologist 
—has, in conformity with the foregoing interpretation 
of the word "day," been attempted to be traced and 
vindicating by the late Hugh Miller in a lecture deliv-
ered by him to the 'Young Men's Christian Associa-
tion' in the year 1855, and afterwards republished in 
The Testimony of the Rocks, and also by Dr. M'Caus-
land in his Sermons in Stones. The former sought to 
show, at least, that the "world was a clay, and the 
evens recorded by Moses as having occurred on the 
third, fifth, and sixth days or periods of creation, 

The Lazarine habitation of Central 
and Southern Europe; 2. 'K" 1; -m"d"d"d' or "Ki-
then refuges of the coasts of Denmark and Norway, 
and the Atlantic coast of North America; 3. Deltas, 
as those of the Nile, Po, Ganges, and Mississippi; 4. Care 
exists in various parts of Europe; 5. Remains [of 
human bones and other objects] found in the peat, 
and in the beds of clay, and in the deeps and lower 
parts of the world."

He then sums up the proper 
scientific conclusions from these geological data 
thus:

(1.) Man and the mammoth in some parts of the globe were 
contemporary.

(2.) Instead of carrying man back to the period assigned 
to the mammoth and other great extinct pachyderms, we are 
required to bring the mammoth down to the period of man.

(3.) We may safely say that the sands named do not 
exist in any parts of the Mesolithic epoch; the sands 
and clays of that age may have been formed within the six thousand years of 
historical chronology, but that in all probability such was the 
temporal order of these events.

(4.) The knowledge we yet have of the dynamical geology 
of the various superficial formations from the "paleocene" 
upward, is not sufficient to enable us to reach trustworthy con-
clusions with regard to past time.

(5.) Geological changes have taken place in the past with a 
rudimentary skill if ever witnessed at present.

6. In view of all the difficulties, some interpreters in 
despair abandon all attempt at reconciliation between the 
Mosaic record and scientific findings, e.g. Kallash, 
as above, and in general the whole Rationalistic school.

Even Quarré (Genesis and its Authorship, Lond. 1866 
chap. I), by a combination of the conclusions that the 
tenableness of the adjustments proposed in favor of 
the geological schemes, is not content with pronounc-
ing the effort premature, in view of the unsettled state 
of the sciences involved, but proceeds to lay down the 
axiom that we must "give up looking for physical 
proofs and to admit the truth when the "natural" interpre-
tion of the text is concordant with the laws of nature." 
Surely this is not simply a case where the phenomenal 
theory of interpretation is competent to explain the 
whole discrepancy—applicable as that principle was 
seen to be to much of the phraseology of the Mosaic 
account as early as the time of Gregory of Nyssa 
(Hecatomeron, in Opp. Greg. Nysa., where the optical 
explanation is advocated); for as Moses is expressly 
writing on the subject of creation, a just exegesis 
mands that his statements—so far as they are parallel 
—must tally with all later discoveries and conclusions.

See HAMMOND.

Mr. Quarré (Genesis, p. 17 sqq.) adds the follow-
ing alleged discrepancies as evidence of the non-his-
torical character of the narrative in Gen. 1, ii: (1.) 
The apparently simultaneous creation of both "the 
heavens and the earth" in the beginning, whereas the 
firmaments were not completed and the earth was not 
completely formed as being formed in detail at a later 
day. But if, as we hold, the first verse merely declares the calling into 
existence of the primordial material or elements, not only does all repetition vanish, but the distinction inherent 
in the nature of the case between creation proper and 
progressive development is duly observed. Our ex-
GEOLOGY

plation likewise dissipates his objection to the use of the term "days" before the creation of the sun. (2.)

He alleges that the numeral וּדָעָה, one, being here anarchous, cannot properly be rendered "first" in connec-
tion with the opening eye-morn of creation, in the sense of the order of time. But certainly it can have no other meaning when followed in the same series by the other undoubted ordinals "second," "third," etc. That the sixth day alone has the article is due to its eminence as the concluding day of the working week.

(3.) The correlation between the two triads of weeks—

"the luminaries of the fourth day corresponding to the light of the first, the fishes and birds of the fifth to the waters and the firmament of the second, and the ter-
restrial animals of the sixth to the dry land of the third"—constitutes no valid argument against the matter-of-fact character of the representation; for these are merely signs of the progress and harmony observ-
able in all God's plans, and a special coincidence aris-
ing in this case from the necessarily gradual prepara-
tion of the globe for its varied classes of tenants. The
assumptions that birds are impliedly represented as
being produced from the air, that the creatures were
all brought before Adam immediately upon their cre-
atation, and that the woman was formed on a different
day from the man, are all gratuitous and erroneous, as
is likely the supposition that vegetation in cap. ii, 5 was absolute and universal, in-
stead of referring to a mere spontaneous growth, and
that in Eden simply.

III. Geological Formations.—"The crust of the earth
is composed of rocks, which have been formed, some
by the action of fire, such as granite, basalt, porphyry,
and rhyolite, which are termed igneous rocks, and
some by sedimentary deposit at the bottom of water,
such as sandstone, limestone, shale, etc., which are
known as aqueous or stratified rocks. Igneous rocks
were first formed; and on these, from time to time,
through the long ages of our planet's existence, were
deposited the many successive layers of sedimentary
stratified rocks, in which are found the fossil remains
of the animals and plants that were in existence
during the several periods of deposition. These lay-
ers of rocks have been frequently and extensively,
throughout these areas of their formation, broken up
and distorted by volcanic action, and the protrusion
of igneous rocks from beneath, upwards, and through
them; and by these the mountain ranges, in all parts
of the earth, have been elevated, and those diversities
of land and sea which the face of our planet presents,
have been produced." We shall consider, in accordance
with the prevalent theory, to characterize the basis
rocks, i.e. granite, and its unstratified congeners, as
igneous, although recent investigations tend to the con-
clusion that they, as well as the superincumbent anima-
ted series, are the result of the disintegations, decom-
positions, and fresh combinations of aqueous agency.

"The first aspect of the globe which the investiga-
tions of the cosmoquonist have enabled us to realize,
present to view a viscid igneous ball revolving on its
axis, and-wheeling its annual course around the sun,
its centre of attraction. Its present obliterate sphero-
idical shape, and as the poles are elevated at the equat-
or, is the exact form that a liquid sphere of the
size and weight of the earth, revolving on its axis in
twenty-four hours, would assume; and the still pre-
valing central heat, which is indicated by the gradual
increase of temperature as we ascend in mines from
the surface to a depth of one or two miles beneath the
centre, reveals the igneous origin of the mass. The
gradual cooling down of this fiery sphere, by radiation into
space, would result in the formation of a crust of gran-
ite or some other igneous rock on the surface; and as the
fountains of the seas were fed by the rains of a tem-

mental heat, and which are kept ardent by intense
heat, would naturally combine, and thus the crust, in
process of time, would be covered with an ocean. Thus
we have all the elements requisite for the production
of the first series of sedimentary rocks, which were
formed out of the disturbed particles or detritus of the
igneous crust at the bottom of the waters which encir-
cled the globe. The lowest of our sedimentary rocks,
gneiss and mica schist, which rest on the primordial
granite, are probably the result of the decomposi-
tion, on inspection, to be composed of the débris or broken
particles of granite, and so far the foregoing theory of
their origin is confirmed. This series of rocks has
been styled ' metamorphic,' from the great change that
has been undergone in their structure by the action of
the intense heat to which, at the time of their forma-
tion, they must have been exposed, and by which they
have been partially crystallized, and their lines of
stratification obliterated. They form a portion of that
vast pile of the bottom rocks which have been termed
'the Cambrian,' and which have been calculated to be
25,000 feet, or nearly five miles, in depth or thickness.

"Throughout the long ages occupied by the deposi-
tion of the mass of sediment of which these bottom
rocks are composed, the temperature of the globe must
have been very high, though gradually becoming more
cool. There is no trace of animal life in these rocks;
and it is extremely rare and difficult to detect and iden-
tify. The scanty fossil remains which have been discovered by
the industry and research of the geologist, reveal no
type of animal life of a higher order than the zoophytes
(a creeping animal, and partly a vegetable in nature),
annelids, or sea-lice, and bivalve mollusks, and
all of them marine creatures devoid of the sense of
sight and hearing; and with them have been found traces of
fungus and sea-woods, but no land vegetation. In
fact, all that has been discovered of organic matter in
these rocks is a beginning of life at the time of their
formation, and a beginning of life in the low-
est and most humble of its forms.

"The long era of the Cambrian formation was suc-
ceded by another as extensive, during which the rocks
which have been denominated ' the Silurian ' were form-
ed, by sedimentary deposition, to the depth (as some
estimate) of 50,000 feet. The fossil remains of animals
throughout this formation are abundant, and disclose
the zoology of the era to have been confined to sub-
marine invertebrates, zoophytes, mollusks, and crust-
acea; and no vertebrate animal appears until the close
of the era, when the remains of fishes are found in
the beds which immediately are the top of the
Silurian formation. Light to some extent must have
pervaded the earth during this period; for many of
the mollusks, and all of the crustacea, were furnished
with eyes, as well as the others, so as in the interval of
a tri-
lobiote, of a peculiarly elaborate and perfect structure.
It appears to be a law of nature, that animals whose
entire existence is passed in darkness are either wholly
devoid of the organs of sight, or, if rudimentary eyes
are discoverable, they are useless for the purposes
of vision, as exemplified by the animals of all orders, from
the mollusk to the mammals, which have been discov-
ered in the caverns of Illiria, in the caverns of South
America, mentioned by Humboldt, in the Mammoth
Cave of Kentucky, in deep wells, and in depths of the
sea where no ray of light can penetrate. The system that
succeeded the Silurian was that in which the Devonian
or Old-Red-Sandstone rocks were formed; and all geologists concur in stating that the
position in which these rocks are found indicates
that the era was ushered in by violent commotions,
which disturbed the principal mountain ranges of the
world were thrown up. The fossil remains of
this era, during which sedimentary rocks, calculated
to be about 10,000 feet in thickness, were formed, pre-
sent to our view, in addition to the previous existing
type of life, to the class of animals the coral, and
Genoid species. These have been graphically de-
scribed by Hugh Miller, in The Old Red Sandstone, as

The above distribution of the successive layers consist merely of the titles and systems adopted by different authors. Some of the strata are found only in certain localities of limited extent, and there are modifications peculiar to other places. The "rocks" (a general term in geology for all strata, of whatever character) are represented in the cut as filled up by an adjacent mountain. Several such changes of level, and not seldom even by depression, are sometimes exhibited as having successively taken place. The layers are frequently corrugated or otherwise disturbed, either singly or throughout the whole or various parts of the series. Any one of them may appear at the surface, in consequence of denudation or the absence of those properly belonging above it. Seldom or never are they all found together as here. They exist in endless variety of combination, both chemical and mechanical, and are sometimes thrown into almost promiscuous confusion by volcanic and other causes; but when present and in their natural state, they observe the arrangement indicated in the diagram.

Section of the Earth's Crust, showing the Relative Position of its Strata.

N.B.—The above distribution of the successive layers consist merely of the titles and systems adopted by different authors. Some of the strata are found only in certain localities of limited extent, and there are modifications peculiar to other places. The "rocks" (a general term in geology for all strata, of whatever character) are represented in the cut as filled up by an adjacent mountain. Several such changes of level, and not seldom even by depression, are sometimes exhibited as having successively taken place. The layers are frequently corrugated or otherwise disturbed, either singly or throughout the whole or various parts of the series. Any one of them may appear at the surface, in consequence of denudation or the absence of those properly belonging above it. Seldom or never are they all found together as here. They exist in endless variety of combination, both chemical and mechanical, and are sometimes thrown into almost promiscuous confusion by volcanic and other causes; but when present and in their natural state, they observe the arrangement indicated in the diagram.

The system that succeeded the Devonian is the Carboniferous, which is one of importance and interest to mankind, as having been the period of the formation of coal, iron, and the mountain limestone—a combination of products that have contributed so largely in these latter days to the comfort and convenience of the human race. The coal-measures, it is well ascertained, are the product of profuse and extensive vegetation, and the nature of the plants of which it has been formed is easily discoverable by a close examination of the mineral itself, which, on inspection, discloses them to have been almost entirely of the cryptogamic order, and such as would be produced in abundance in positions of shade, heat, and humidity. Ferns, calamites, and equisetaceous plants preponderate, and wood of hard and ligneous tissue, which is, in a great measure, dependant on the unshaded light of the sunbeam, is of rare occurrence in this formation, while season rings, which result from the impact of the direct rays of sunlight on the tree, are not found at all in the fossil woods of this or the previous formation, though they appear in those of the succeeding systems.

In confirmation of these views, it is remarkable
that other geological phenomena, besides that of the absence of the season rings in the trees, indicate that there was no variation of seasons on our earth before the close of the carboniferous era. Temperature appears, up to that period, to have been tropical and uniform in all latitudes; for the fossil remains testify that the animal life that lived and grew in the carboniferous and preceding eras at the equator were of the same species as those that lived and grew at the same period in the arctic regions—and the coal-measures are as abundant in the high latitudes as in the temperate and equatorial zones. The geological phenomena of the period cannot only be accounted for by the continued prevalence of the central heat, and the consequent neutralization of the effect of the sun's rays, the influence of which now operates to produce the variety of seasons. The climatic condition of the earth in those ages must have been similar to those of a modern humid bothushade, from the direct radiance of the sun, and which would be eminently conducive to the production of a prolific vegetation, such as that which has been stored up in our extensive coal-measures.

The zoology of the age furnishes us with the first undertaking of the terrestrial animal life, in the form of insects of the beetle and cockroach tribes, scorpions, and reptiles of the lizards and snakes—creatures which were adapted by nature to live in the dull, dusty, tepid atmosphere that pervaded our planet at that time.

The earliest traces of the carboniferous period have disappeared, during which the system of rocks, which has been denominated 'the Permian' system, was formed, the fossil remains of which indicate that great changes must have taken place in the physical constitution and aspect of the earth. The exuberant vegetation which had supplied the material of the coal-measures of the preceding formation had died away, and a vegetation of a higher order succeeded. The animals, too, which inhabited the Permian earth disclose an advance in organic life. The Saurian, or true reptile, here made its first appearance; and the earliest traces of birds were found in the New Red Sandstone of the Dinorwig district, a member of this system. The foot-tracks of these birds, of immense magnitude, which stalked on the Permian sands and mud, are found impressed on the now hardened slabs of sandstone and shales of that formation both in Scotland and in America. The Permian was succeeded by the systems of the Trias and Oolite, whose fossil remains attest an advance in animal as well as vegetable organization. Trees of the palm, pine, and cypress species were mingled with the diminished ferns, calamities, and coniferous trees, and with this varied vegetation, a higher order of insects appears to have come into existence to feed on and enjoy the increasing bounties of Providence. But the peculiar and most striking feature of the age was the extraordinary increase, in number and magnitude, of the Saurian reptiles which then peopled the earth. The Saurians were divisible into three distinct classes—the terrestrial, or Dinosaurians; the marine, or Elasmosaurians; and the aerial, or Pterosaurians. They were all of them air-breathing creatures—anomalous, and more or less aquatic in their nature and way of life; and, together with the birds whose tracks have appeared in these same systems. The fossil remains of the reptilian inhabitants of earth, ocean, and air of the Oolite world, more especially of the Liais member of it, have revealed them to have then swarmed out in such amazing numbers among the animals and plants that lived and grew in the vast dimenison of the earth, that we have always dwelt on the scene which the earth of those days must have presented with astonishment and wonder, and have named that era 'the age of the reptiles.'

The Chalk or Cretaceous system succeeded that of the Oolite, and presents little, if any evidence of advance in creation. There is, however, a manifest decrease of the Saurian reptiles, which reigned in such abundance in the preceding formation, and some traces of the true mammals have, it is said, been found in this system. At all events, in the next formation, the Tertiary, we have distinct evidence of the existence of the mammal race of animals, including the quadruped mammifers, resembling those now extant.

No traces of human races, or of any work of art, have been found below the superficial deposits, or outside coating of the globe; yet there is no evidence of the introduction on the earth of any species of animal whose prototype was not in being before the human race became inhabitants of the earth. The human pedigree is of less antiquity that that of any other known creature, though, geologically and physically, he is at the top of the ascending orders or scale of created beings; for it is admitted by the most eminent and best-informed geologists that the well-attested facts of their science demonstrate that this species has not reached the top of a system, or of any known measure of time. We can only look at the vast piles of the sedimentary rocks which have been laid down at the bottom of the waters in that period, to the depth of fifteen miles at the lowest calculation, and ask how long was the space of time occupied in the formation of those masses by the slow process of depositing grain after grain of the particles of the matter of which they have been formed, and yet that is but a brief portion of duration when compared with that which must have been occupied by the cooling down of the globe, so as to admit of the existence of life upon its surface. The Scriptures do not fix the age of the earth, or supply any means by which we could calculate the length of time that had elapsed between 'the beginning' and the first appearance of the creation, including that of Adam; and the Biblical records have unfolded to us that nearly six thousand years have passed away since he became an inhabitant of the earth. Facts, however, have recently come to light on which it has been argued that, though the extent of the human era must have been short indeed when compared with the vastness of the geological series, yet that it is the human era that is the earth at a time long anterior to that assigned by the Bible records to have been the date of Adam's birth. Mr. Leonard Horner's experimental researches in Egypt, instituted with a view to ascertain the depths of the sedimentary deposits in the valley of the Nile, have brought to light relics of works of art and specimens of man's handwork, such as pieces of pottery and sculpture, that tend to prove the existence of intelligent manufacturers at a period of time that could not be less than eleven or twelve thousand years; but the periods from which the evidence that has been deduced are too uncertain and fallible to warrant such an extension of the commonly received age of man. The rate of secretion of sedimentary deposits of a river like the Nile is subject to so many varying external influences, that, as a measure of time, it may be most misleading. Many of the most reliable geologists believe the Nile has always dwelt on the scene which the earth of those days must have presented with astonishment and wonder, and have named that era 'the age of the reptiles.'
are found in the diluvium formed by the last great geological revolution. If these implements are of artificial origin, they afford strong evidence that the races of men by whom they were manufactured were the contemporaries of animals which geologists affirm could not have existed within the Scripture term of human life. Nor is it at all improbable that the original implements with these animals, and affirm that mere juxtaposition is no evidence of contemporaneity, when no remains of the human frame are to be found in the same place. The few instances in which such remains have been found together are all resolvable into cases of animals of comparatively recent extinction (Bibliotheca Sacra, July, 1867, p. 457 sqq.).

The age of the diluvium also in which these remains have been discovered, uncertain as it was before, has not been determined by the presence of human relics, relies in its, so that the Scripture chronology of the human era has not been displaced.

IV. Proposed Identification of these Geological Periods with the Mosaic "Days."—Most geologists have frankly avowed the utter incompatibility of these rocky revolutions with the Scriptures, if these can be regarded as the result of the same events; while those who have believed them to be reconcilable have usually contended themselves with vaguely referring to the progress and order evidenced in both by a proof of their general agreement, without attempting anything like a minute comparison—doubtless for the reason that any distribution of the geological strata into precise portions, such as those of Moses, whether six or any other number, must be highly arbitrary and fanciful. A few, however, following out the suggestion of Jameson, have of late ventured upon such a collation in detail, e.g., Hugh Miller and Dr. Macaulay (see above).

1. The most ingenious of these schemes makes the first Mosaic "day" correspond to the age of the lower, metamorphic, or Cambrian rocks, in which the eyerocks zoophytic life is compared with the vivifying influence of the Spirit brooding over the abyss as yet in darkness; the second "day," on which the firmament was formed, would answer to the Silurian series, containing only submarine invertebrata, evincing the presence of light; the third "day," when the dry land brought forth vegetation, would be equivalent to the Old Red Sandstone period, containing also vertebrated fish and traces of land vegetation; the fourth "day," which witnessed the development of the celestial luminaries, would agree with the Carboniferous era, which indicates the lifting up of the veil of vapor that had before enshrouded the globe, thus giving rise to the more solid form of woody fibre; the fifth "day," when birds and reptiles were produced, would be denoted by the period of the Permian, New Red Sandstone, Trias, and Oolite systems, with their gigantic sauropods and birds; and finally, the sixth "day," which saw the creation of land animals, would fall in the Cretaceous or rather the Tertiary epoch, which presents the most perfect fossil mammals. Unfortunately, however, there exist several important discrepancies in this effort at identification, which go to show that it is altogether insufficient. Nevertheless, many of these contradictions are not exactly six of these strata of rocks, but some ten or a dozen; indeed, geologists are not agreed among themselves as to their proper number and classification, some making them out to be a score or more. Each epoch is well defined in itself, and most of them contain their own peculiar fossil formations; yet even they are evidently in general but progressive developments of the same organic types, and not totally fresh orders of being, such as the successive stages of the Mosaic creation exhibit. Nor are they uniformly distributed over the earth's surface, but here and there, although preserving almost invariably the same relative order; so that it is doubtful whether in all cases they mark regularly consecutive epochs, or the earth's history in the whole, whether long. Neither are they equal in extent or thickness, so as to lead us to conclude that they occupied fixed portions of time, such as the Mosaic days of co-ordinate length. In the second place, they do not Lillie in their productions with the Mosaic days of the Genesis. Trees are not set in groups as in the sixth day; while geology does not discover vegetation (unless inchoately) till the junction of the Silurian with the Old Red Sandstone, and it does not become characteristic till we reach the Carboniferus era. In like manner, Moses makes the creation of earth simultaneous with that of fishes, whereas fish appear in the strata of the period prior to that of the bird-tracks—indeed, anterior to plants themselves. Moreover, reptiles, which figure so conspicuously in the geological animals, are passed over with little, if any distinction in the Mosaic record, if any story is recorded at all, as the other hand, to which Moses says death did not come till the sixth day, begins in the geological series as early as the Carboniferous age. In a word, the animal and vegetable kingdoms, which the sacred narrator places at a decided interval, go on in parallel progressions through the successive cycles; and yet the relative order of appearance is, if anything, rather the reverse of that given by Moses, while little coincidence appears in the order of land and water products. In the third place, not only is this theory opposed to the obviously literal meaning of the word "day" in the Mosaic record, but it is hampered by the difficulties in advance point in its details (such as the application of the Spirit's formative "haverning," ver. 2, upon the dark chaos, to the evolution of zoophytes; the segregation of the firmament," to the deposition of the Silurian rocks; the emergence of "dry land," to the formation of the Old Red Sandstone; the bursting form of the heart's "lights," to the production of the coal-measures; the formation of marine "creatures and fowl," to a motley stratification that chances to contain huge lizards and nondescrip rocks; and the creation of animat nature in general to the uplift of the earth, and the deposit of alluvial soil)—aside from these formidable difficulties, the whole interpretation of Moses's simple language as adumbrating the vast and complicated systems of geological changes is preposterous in the highest degree. We conclude, therefore, that a hypothesis, which, while it outruns every just and natural principle of hermeneutics, at the same time so utterly breaks down the moment it is actually brought to the test of scientific comparison, is wholly unworthy our acceptance. Moses is clearly relating a historic narration of the present races of animal and vegetable life, and the analogies between the present and the progress of his days and those of the geological cycles are merely such resemblances as the successive restorations from a chaotic state would naturally present, although on a vastly different scale in point of duration.

2. Prof. Dana, in his Manual of Geology (Phila. 1862), gives (p. 712), as the latest conclusion of science on the relation between the Mosaic and the geological cosmogonies, the following, which he has condensed from the lectures of Prof. Guyot (see Bibliotheca Sacra, Apr. 1855, p. 224 sq.), and which we here place in parallel columns with the statements of the first chapter of Genesis:
1. The beginning of activity in nature. In such a beginning from matter in the state of a gross fluid the activity would be intense, and it would show itself at once by manifestation of light, since light is a resultant of molecular activity. A flash of light through the universe would therefore be the first announcement of the work begun.

2. The development of the earth. A dividing and subdividing of the original fluid going on would have evolved systems of vast as grades, and ultimately the orbs of space, among these the earth, the igneous sphere enveloped in vapors.

3. The production of the earth's physical features by the subdivision into the continents and oceans. The condensable vapors would have gradually settled upon the earth, cooling progressively.

4. The introduction of life under its simplest forms, as in the lowest of plants, and perhaps also, in animals. The systems of structure characterizing the two kingdoms of nature, the animal and vegetable, and the Podostoma, mollusks, articulate, and pelecypoda, are brought out from the tree seed of the vegetable kingdom, and the earth, and the gathering together of the waters of the sea; and God saw that it was good. And God said, Let there be firmament, and there was a firmament above the firmament, and the waters under the heaven were gathered together into one place, and the dry land appeared; and it was good. And God called the dry land Earth; and the gathering together of the waters under the heavens he called Sea; and God saw that it was good. And God said, Let there be lights in the firmament of the heaven, to divide the day from the night; and it was so. And God made two great lights; the greater light to rule the day, and the lesser light to rule the night; he made the stars also. And God set them in the firmament of the heaven, to give light upon the earth, and to rule over the day and over the night, and to divide the light from the darkness; and God saw that it was good. And the evening and the morning were the third day. And God said, Let there be lights in the firmament of the heaven, to divide the day from the night; and let them be for signs and for seasons, and for days and years; and let them be for lights in the firmament of the heaven, to give light upon the earth, and it was so. And God made two great lights; the greater light to rule the day, and the lesser light to rule the night; he made the stars also. And God set them in the firmament of the heaven, to give light upon the earth, and to rule over the day and over the night, and to divide the light from the darkness; and God saw that it was good. And the evening and the morning were the fourth day. And God said, Let the waters bring forth abundantly the moving creatures that hath life, and fowl that may fly above the earth in the open firmament of heaven. And God created great whales, and every living creature that moveth, which the waters brought forth abundantly after their kind, and every winged fowl after his kind; and God saw that it was good. And God blessed them, saying, Be fruitful and multiply, and fill the waters in the seas, and let fowl multiply in the earth. And the evening and the morning were the fifth day. And God said, Let the earth bring forth the living creatures after their kind, and the fowl of the air after their kind, and every thing that creepeth creeping thing, and beast of the earth after his kind; and it is; which is eyelid above all was so. And God made the other vertebrata for a qualitative of the earth after his kind, and cattle after their kind, and every thing that creepeth upon the earth after his kind; and God saw that it was good. And God said, Let us make men in our image, after our image, and after our likeness; and let them have dominion over the fish of the sea, and over the fowl of the air, and over the cattle, and over all the earth, and over every creeping thing that creepeth upon the earth. So God created man in his own image, in the image of God created he him; male and female created he them. And God saw everything that he had made, and, behold, it was very good. And the evening and the morning were the sixth day. Ver. 26-31.

Now, however probable these stages of creative progress may be as an exposition of science, yet we find the following (among other) discrepancies in them when compared with the Biblical text, which to our mind shows their utter incompatibility.

5. The display of the system in the kingdoms of life. The exhibition of the four grand types under the animal kingdom, being the predominant theme in this phase of progress.

6. The introduction of the highest class of vertebrata—that of the mammals (the class to which which Man belongs), viviparous species, earth after his kind; and it is; which is eyelid above all was so. And God made the other vertebrata for a qualitative of the earth after his kind, and cattle after their kind, and every thing that creepeth upon the earth after his kind; and God saw that it was good. And God said, Let us make men in our image, after our image, and after our likeness; and let them have dominion over the fish of the sea, and over the fowl of the air, and over the cattle, and over all the earth, and over every creeping thing that creepeth upon the earth. So God created man in his own image, in the image of God created he him; male and female created he them. And God saw everything that he had made, and, behold, it was very good. And the evening and the morning were the sixth day. Ver. 26-31.

Now, however probable these stages of creative progress may be as an exposition of science, yet we find the following (among other) discrepancies in them when compared with the Biblical text, which to our mind shows their utter incompatibility.

1. It is not clear how light would necessarily be the first characteristic of an active in a material in which the mass, we should suppose, would have already been in an incandescent state. Nor would such "comical light" (whatever that phrase may mean) have been subject to the ebb and flow constituting the alternations of "day and night," or "darkness." Indeed, the phraseology of Moses reveals to us at the outset a turbulent surface rather than a homogenous but quiescent mass of igneous vapor as the primeval chaos.

2. "Water" is certainly a very inappropriate term for the nebular substances in whatever stage of fluidity; and the division of the supras from the infra-firmamental liquid is a strange description of the disintegration of melted spheres from each other, whether still vaporized or cooled to semi-solidity.

3. The picture of the chaotic floods retiring to their proper places is similar to the crystallization of the azotic rocks, or the hardening of the metamorphic basis of the earth's crust, but it is slightly more to the condensation of steam and other volatile matter by a radiation of heat. Besides, as geology itself shows, the present linguistic and mountain chains, river and desert, has been the effect of innumerable changes, elevations, and subsidences at vastly different periods scattered throughout the pre-Adamic history of the globe.

4. On the third day life was not merely "introduced under its simplest forms," but there were created, besides "grass" and "herb yielding seed," also the fully developed "fruit-tree, whose seed is in itself," whereas geology, instead of exhibiting in the lowest stratified rocks any of these higher forms of vegetation, leaves but the bare presumption (for the author is only able to state that "in the day of God's creation the sea-weeds or algae are the earliest of the globe, probably preceding animal life") of the existence of any plants whatever in that age. The fourth day, which was devoted to the production or manifestation of the heavenly luminaries, has, it will be observed, nothing corresponding to it in the geological cycles. A notable chasm!

5. The "four grand types of the animal kingdom (radiate, mollusk, articulate, and vertebrate)," however, are not to be found in the Mosaic statement, which refers only to marine creatures and (aquatic) birds as belonging to the earlier stages (day), for the reason obviously that the soil was still too humid for land animals, such as geology, never-
GEOLOGY

The geological order laps over into the other, instead of being sharply defined as in the scriptural statement; it is the "plants" of the fourth geological "day," rather than those of the third, that correspond with the vegetable productions of the scriptural progression; the marine creatures of the fifth Scripture day are only to be recognised in the "amphibians" and "fishes" of the fourth geological cycle; indeed, the fourth of the Scripture days, which is occupied only with the formation of the heaviest of the marine species, is most active of the geological periods in the production of every form of animated existence, beginning with trilobites and running up to complete vegetation.

But, most of all, we object to the general view under which this is set forth as an interpretation of the Biblical passage in question, namely, that it is a "pictorial" description, or "symbol," or "vision," "retrospectively prophetic." - whereas it seems to us a plain literal history, utterly destitute of the least semblance of imagery or seer-like import beyond the mere use of a few anthropomorphisms familiar to the Hebrews. If such liberties, like all others, are made in hermeneutics, that is the end of all meaning in words. For instance, when the successive scenes in the Mosaic narrative are compared (Meth. Quart. Rev. April, 1868, p. 298) with the regularly numbered emblems of the Apocalypse (the seven seals, trumpets, and vials), it would be an important fact overlooked that the latter are as joyously set forth as symbolical representations of ecclesiastical import, while the former are unaccompanied by any intimation of an ulterior significance. Indeed, this comparison is suicidal to the interpretation which it is put forth to support; for the visions of John in the Revelation could only have authority as premonitions of the future on the concession of their actual occurrence in the manner related by himself, so the description of Moses in the opening chapters of Genesis must be accepted as literal statements of real phenomena, in the most obvious and house-like sense, before they can be made the basis of a symbolical application. See Cosmog., p. 528.

This much only may, however, be granted as true in the hypothesis upon which these and similar explanations are based: that the geological and the Mosaic creation were two acts in a gigantic scheme, virtually typical of each other, insomuch as they proceed upon a uniformity in the divine plan—the development of an archetypal idea—were in their great outlines, of course, similar, and hence may, to a considerable extent, be judged, compared, and, as it were, portrayed in the same general terms; but on this very account interpreters of the Bible ought to be the more careful not to confound the two, and especially not to substitute the distant and more dimly shuddled event for the one directly in the mind of the sacred writer. See Double Sense (of Scripture). In the present instance, moreover, there is an eminently a natural ground of necessity for the coincidences above discernible: although no amount of ingenuity has been able to dramatize the facts of geology into precisely six acts, yet the aboriginal creation of matter is of course the first scene in each case; light is a prerequisite of vegetation, and this, again, must be the antecedent food for the animal tribes, while man forms the fit outcome of the entire plot; the incidental details of the two schemes might be expected to vary, as, in fact, they are found to do.

V. Scriptural Allusions to Geological Facts.—(Concluded from Patent, at unp. 105-108.) The sacred writers make frequent references to the physical phenomena of the earth beneath. Are such references in accordance with the facts established by subsequent researches and the observations of the sacred writers? The latter convict the former of ignorance and error? The question is the more important as the materials of the earth are not treated conventionally in the Scriptures, but naturally. In speaking of the sand on the sea-
shore, one writer alludes to it as a barrier placed by God against the encroachments of ocean, another as an illustration of the countless host of the Philistines, a third as representative of the multitude of God's people. Far different and more adapted to universal use is this than the employment of one object always to express the same idea, as the same symbolic picture-writing of the Egyptians and Assyrians, and as is the usage in much of the literature of the East. Freedom of language, if not of thought, is unknown where every object is used as a conventional sign, always appropriated to one fixed sentiment. We shall find incidents, then, in the scenes of our Rocky Sinai, the hills of Judas, the rivers and lakes, the mountain chains, and the Great Sea, would all fall into their proper places on his ideal map.

So the allusions to "the dust of the earth" will carry a fulness of meaning to persons living in a land where, during a large portion of the year, the whole surface is reduced to dust by the influence of heated winds. God's power in creating man out of such incoherent matter, and man's humble bodily origin and end in this life, are forcibly represented by the frequent employment of this illustration, so familiar to the inhabitant of the East.

In like manner, the references to the inundation of the Nile (Amos ix. 5; Job xxvii. 11), to earthquakes (Isa. ii. 19; Job ix. 6; xxxiv. 20), to mines, metals, precious stones, flints, and other mineral substances, and all have accurately to be in accordance with the actual physical phenomena.

The references to clay in the Scriptures are frequent, and accord with its uses and localities at the present day. See Clay.

VI. Geology of the Bible Lands.—(Compare Patterson, op. cit. p. 111-116.) The geology of the countries mentioned in holy Scripture is as yet but imperfectly known to us, but quite sufficient has been ascertained to test the accuracy of the incidental allusions made by the writers of the Bible.

1. The framework of Syria is composed of two mountainous ranges, running in a parallel strike with the coast of the Mediterranean, much broken by transverse clefts, extended by irregular spurs on either side, with detached minor masses, having the same north and south bearing. Between the two ridges runs the upper valley of the Jordan, occupying a deep depression, terminating in the Dead Sea.

The body of the country is a mass of Jurassic (oolitic) rocks, overlaid unconformably by a spread of cretaceous deposits (chalk and green sandstones), both much disturbed by outbursts of trappean matter (greenstone and quartzite), and separated into almost unmerous lines of ancient fracture. The oolite was eroded before the deposition of the chalk, and the latter has been washed and worn away prior to the deposition of the third system, namely, the eocene tertiary, which is found in patches, and abounds along the lands of medium height on the shores of the Great Sea. There are a few reconsolidated rocks and gravels of a more recent period, but the bulk of the whole region is a highly contorted, inclined, and broken mass of secondary, metamorphic, and igneous rocks.

2. The Jordan is an axis of Jurassic rock, with some thin beds of oolitic coal, surmounted by chalk, and flanked towards the coast by the great tertiary nummulitic limestone so universal along this parallel of the earth. The chalk contains fossils similar to that of the south of France. The tertiaries are often found laced after the fashion prevalent in other countries. In some places conglomerates of the later Jurassic age occur, containing pebbles and fossils of the lower oolites.

Towards the sources of the Jordan we find igneous rocks rising, with some concentration of metallic minerals, highly-colored landscapes, abundant springs, and verdant pastures. Hermon (the highest
above its present waters, both due to its former condition, first as an arm of the Red Sea, and then as a lake.

The Mount of Olives and the other eminences around Jerusalem are composed of chalk with flints; the older limestones appear in the bottom of the deep valleys. This is the substratum of the Holy City and its vicinity. Bethlehem is surrounded by coarse yellow cretaceous lime.

The Dead Sea is bounded on the west principally by tall cliffs of stratified limestone, with much rubble of an ancient date; towards the south, tertiary marls and clays prevail, the whole abounding with traces of volcanic agencies. The upper portion of the long mound at the south of the lake is gypsum, overlying rock salt, which is furrowed into knolls and pillars. The south-eastern shore is colored by the bright red of the sandstone; on the east are heavy limestones and chalk, altered by the igneous masses forming the mountains of Moab. The north-eastern angle is formed of basaltic rocks, with volcanic slag and pumice.

The whole Jordan valley was undoubtedly a vale in tertiary periods; but the Dead Sea appears to have received the remarkable features which now characterize it subsequently to the deposition of the tertiary beds.

2. Extending our survey eastward from Palestine, we may embrace a wide area, extending from Arrast to the head of the Persian Gulf, the general features of which are now well known. Many of the groups of secondary sedimentary strata familiar to us in Western Europe also occur here, upheaved, together with their overlying tertiary deposits, by igneous rocks, in like manner.

Along the margin of the present river-courses are alluvial deposits now in process of formation. Next, marine alluvium, following the direction of the existing great valleys, opening out into the sea, and still increasing at the outlet. Colonel Rawlinson and Mr. Ainsworth represent the marine alluvium as increasing at the head of the Persian Gulf at the rate of a mile in thirty years (Quarterly Journal, 2, 465). There are occasional fresh-water deposits, showing the former existence of small lakes; somewhat of earlier date are extensive formations of gravel, proving the occurrence here, as in the West, of a period of turbulence at the commencement of the post-tertiary epoch.

The highest tertiary deposits form a system of red sandstone and marls underlying the valleys of the
Mesopotamian rivers. This newest red sandstone territo-rially is much developed in Asia Minor, and thence eastward. It has subordinate beds of gypsum, with occasional naphthites and bitumen springs. Underneath the Witternig, and beginning to extend southward, is a sandstone 3000 feet thick. This has been much disturbed by elevation, has thrown it into domes and waves, constituting much of the peculiar scenery of the Turkish eastern frontier. Below this occurs the cretaceous series in the form of blue marls, white limestones, and bituminous shales. A few of the Palaes of Palæozoic rocks are brought to the surface: the whole is sustained by the granitic axis of the Caucasian chain, and occasionally metamorphosed by ancient volcanic contact.

There are two common to the cretaceous series and the beds above, though both are marine deposits, nor are there any common to the two great tertiary divisions, the nummulitic and the red.

8. On turning westward towards the head of the Red Sea we encounter the remarkable peninsula of Sinai, formed of red sandstone, borne up and rifted by one of the most forcible exhibitions of igneous rocks to be found in the world. On approaching the spurs of the Sinaiic range, bolders of red granite and metamorphic rock give indications of the disturbed district.

4. The well-known narrow plain of Egypt is a valley bordered by nummulitic rocks of oocene age, interspersed with sandstones. As the plain narrows, the scenery becomes diversified by frowning precipices of granite, basalt, and porphyry, which confine the foaming river at the cataracts, and expand into the mountains of Nubla. The sands, which stretch away towards the peninsula, cover tertiary strata, with silicified forests of the same age.

Geometrical Style. See Gothic Architecture.

Ge'on (Γεών), a Greek word (comp. Gen. ii, 18, Sept. Geô) of the name Geon (q. v.), one of the rivers of Paradise, mentioned (Eccles. xxiv, 27) along with the Jordan, Euphrates, etc., in a description of wisdom ("as Geon in the time of vintage," meaning apparently the Nisus at its period of annual overflow.) Fritzsch, ed loc.

George, David. See Joris.

George, duke of Saxony, celebrated for his antagonism to Luther and to the Reformation, was born Aug. 4, 1471. He began to govern his province in 1500, and immediately showed a persecuting spirit against those who inclined to the Reformation. In 1519 he proclaimed the four-days' controversy between Eck and Carlstadt at Leipzig, and afterwards that of Eck and Luther, from the 4th to the 14th of July. Discussions followed between the duke and Luther, which were afterwards continued alternately in Dresden and Leipzig. In several times accused Luther to his uncle, the elector of Saxony, and sought to prejudice him against the reformer. Family misfor- tunes, such as the death of his brother Frederick in 1510, of his daughter Margaret in 1524, and of his wife in 1525, also contributed to embitter his disposition. He died April 17, 1539, but his religious views had some time before undergone a change; and under his successor and brother, Henry, the Reformation made great progress in Saxony. There is a MS. life of George of Saxony by George Spalatinus in the library of Gothic.—Hertzog, ReaI-Encyklop. v, 29; Schultz, Geschichte der Lutheraniz. ('84).

George, elector of Brandenburg-Ansbach, one of the first German princes who embraced the doctrines of the Reformation, and who was therefore surnamed the Confessor, or the Pious, was born at Onolitz March 4, 1484. In 1515 he became, conjointly with his brother Casimir, regent of the province, in consequence of the infirmities of his father, Frederick. Both his father and his brother having died, he assumed the govern-ment in his own name in 1527. In 1524 he had become acquainted with Luther, and adopted his views. In 1529 he declared for the Diet of Spire, where he signed, on the 19th of April, the celebrated protestation against the "Majority Decision" of the German princes. The next year he went to the Diet of Augsburg, where he indorsed the Evangelical Confederation on the 26th of June, on which occasion he proudly said he knew no emperor that "he would rather lose his head than renounce his religious convictions," following out the plans of ecclesiastical reform of his brother Casimir, he framed in 1538 the Church organization of Brandenburg-Boutemberg, as also the liturgy which accompanied it, and which has been recently revived. He died at Onolitz Dec. 17, 1548. See Pauli, Allgemein Preuss. Staatsarch., iii, 476, 476; Buchholz, Gesch. d. Kurmark Brandenburg, iii, 217, 296, 305; Mosheim, Ch. Hist., iii, 42; Herzog, Real-Encyklop. v, 28.

George, Enoch, bishop of the Methodist Episco- pal Church, was born in Lancaster Co., Virginia, in 1767 or 1768; was converted at about eighteen; entered the itineracy in 1790; was made presiding elder in 1796; 1801 and 1802 located; in 1808 re-entered the travelling ministry; was elected bishop in 1816; and died at Trila, Va., August 28, 1826. He was the son of a planter in moderate circumstances of religious profession. His mother died while he was young, and he acquired in youth the gay and dissolute morals of the district where he lived. He was, however, at this period deeply convinced of sin under the preaching of that man, the Rev. D. Jarratt (q. v.), of the English Church. But the subsequent re-moval of his father to North Carolina for a time left him to grow more wicked than before, until at length, with his father, he was converted by the instrumental-ity of the Rev. John Easter. Although young, and exceedingly confident, he was thrust out by his own and his own inward convictions into public serv-ice, and for two or three years was very useful as an exhorter, local preacher, and assistant on circuits with Philip Cox and Daniel Asbury. In 1790 he entered the itinerancy, and from that time he bore for many years the hardships and trials of a pioneer Methodist preacher. His usefulness and influence continually increased, and in 1786 he was made presiding elder on a district which included Charleston, S. C., and his labors there resulted in a great revival of religion. In 1799 he was elected bishop, and he became "increas-ingly used." In 1800 he re-entered the itineracy, but in 1801 his health failed again, and he located and opened a school at Winchester, Virginia, and soon after married. In 1805 he re-entered the Conference. In 1816 he waslegate to the General Conference at Baltimore. In the same year his wife died. Bishop McKendree's health had now nearly failed, and when the Conference met it was decided to elect more bishops, and the choice fell upon R. R. Roberts and Enoch George. From this time he labored with untiring zeal and universal acceptability in supervision, visitation, and in preaching the word with mighty power, until he was taken from labor to reward. His funeral sermon was preached by bishop McKendree at the General Conference of 1832. Bishop George was a man of large information, and of great activity and force of mind. His gifts were original; the effect of his teaching was very great. Dr. Samuel Luckey gives the fol-lowing account of a sermon by bishop George at John Street Church, New York, in June, 1816. "The sub-ject of the discourse was the conquest which Christ achieved by the cross of his death. His words were: 'When he ascended up on high, he led captivity captive;' and, from the moment he uttered it, had com-plete command of his audience. The picture he drew of sin, and the desolations it has wrought, was truly terrific. Like a mighty cataract, he rushed on with
constantly increasing impetuosity, till every nerve that had braced itself to resist was unstrung, and his hearers seemed passively to resign themselves to an influence which was too strong for them. At a felicitous moment, when the feelings of his auditors were at their height, to turn bear to be turned into a different channel, he exclaimed, in the language of holy triumph, and in a manner peculiar to himself, 'But redemption smiled, and smiled a cure!' His train of thought was now changed, but the power of his eloquence was not at all diminished. Sin had been once, could not be the tyrant more, to declare that he, from the shadowy and the earth, was the sinner and the conqueror of death. He came to destroy the works of the devil, and to deliver those who, through fear of death, were all their lifetime subject to bondage. The risen and ascended Saviour was represented as coming up from the empire of death, having seized the tyrant upon his throne, and then as triumphantly passing the portals of heaven amid the acclamations of heaven's shining hosts. The description was so vivid as to be almost overwhelming. The audience, which had just before seemed like a terror-stricken multitude, almost within the very grasp of the destroyer, now exhibited countenances returned with returning smiles. The whole assembly, actually in a common ecstacy (Augustine, Aen. sacra, vii, 193). — Minutes of Conferences, ii, 35; Wakely, Heroes of Methodism, p. 187; Fry, Life of Ep. George (1810); Stevens, Hist. of the Methodist Episc. Church, vols. i, iv.

George of Laodicea, one of the Semi-Arian leaders in the theological controversies of the 4th century. He was born at Alexandria, and was presbyter of the church of the Virgin, where, on learning his Arian opinions caused him to be deposed. He then removed to Syria, where he became bishop of Laodicea. He attended the Council of Antioch in 329 or 380, and the Council of Tyre in 385. He failed to be present at the Council of Sardica in 347 (his enemies said through fear), and, while absent, was deposed and excommunicated, but the sentence was never carried into effect. He was in great favor during the reign of Constantius II, and took part in many matters of importance; among others, in the elevation of Flavian to the episcopate of Antioch (q. v.) and George of Laodicea were the heads of the so-called Semi-Arians, who adopted the Eusebian doctrine that the Son is of similar essence with the Father. They published, in conjunction with other bishops assembled in a synod at Ancyræ, A.D. 386, a long and copious work against the Arians, of a doctrinal and polemic nature, in which the doctrines of this party concerning the resemblance of essence, as well as opposition to the Nicene as to the Eunomian articles, were fully unfolded; at the same time that the Church was warned against the artifices of those who, by expunging the term oioia, were seeking to suppress the doctrine of the resemblance of essence itself. It was here very clearly shown that true resemblance in all other things presupposed resemblance of essence, and that without this the notion of a Son of God, essentially different from the Father, in his very existence, could not be entertained. (Neander, Ch. History, ii, 406). This creed was adopted by the emperor Constantius and by the Synod of Sirmium, A.D. 386. We know nothing of him after the death of Constantius. His works are: Letters to Alexander, bishop of Alexandria. — Eucaristos ev Eon. bov rων Ευκαρίστος; — A work against the Manichæans, now lost. — Hoefer, Nouv. Biog. Générale, xx, 116; Neander, Church History, Torey's transl., ii, 406; Faur, Trinitaristen, i, 471; Herzog, Real-Encyclop. v, 30; Lardner, Works, iii, 596.

George of Polenz, the first regular Roman Catholic bishop who embraced the Reformation, was born at Meissen in 1478. He studied theology in Italy, was licensed there, and, having gone to Rome, became private secretary to pope Julius II. Having been admitted to the order of Teutonic Knights, he went to Prussia, where, in 1516, he was elected bishop of Brandenburg, appointed him bishop of Sambia. His diocese was the first in which the Reformation strongly established itself. Briseman, a pupil of Luther, who had previously been a Franciscan, came to Königsburg, and the bishop invited him to preach the first evangelical sermons in the cathedral, Sept. 24, 1520. The bishop himself soon openly adopted the Reformed doctrines. In January, 1524, he ordered that all sermons and baptisms should take place in the vernacular throughout Prussia, and at the same time recommended Luther's Bible and writings. Luther went to Spalatin (Feb. 1, 1524), Episcopus tandem versus Christi nomen dedit et evangeliæ in Prussia, nempe Sambiana, and in the following year, 1525, he dedicated to Dr. Georgio a Polenzia, vere episcopo Sambiensis ecclesi, his Latin commentary on Deuteronomy. In 1526 bishop George resigned all secular government. He then retired to the palace of Balga, and died April 28, 1550. — Herzog, Real-Encyclop. v, 26.

George of Trebizond was really a native of Crete, but as that island has a bad name, especially unfit for a priest, he took that of Trebizond, where his ancestors had come. In 1430 he came to Italy—first to Venice, afterwards to Rome, where he lectured on rhetoric and philosophy. He was an intrepid defender of Nicholas V, but lost the favor of the pope by his fierce advocacy of Aristotle against Bessarion, Pethio, and other learned Greeks. Alphonsus, king of Naples, received him at his court and gave him a pension. He died at Rome in 1486, aged 91. He was undoubtedly a man of talent and power, but partially some and vain. He translated some of Plato's writings, and Eusebius's, but inaccurately. He published also a treatise De Rhetorica (Venice, 1523, fol.); controversial pieces against the Greek Church, to be found in Allatius, Graecia Orthodoxa (Rome, 1602, vol. i); Comparatio Aristotelis et Platonis (Ven. 1523, 8vo). See Brucker, Hist. Phil. iv, 65; Herzog, Real-Encyclop. v, 23; Cave, Hist. Lit. ii, App. p. 49; Fabricius, Bibl. Greec. iii, 102; Niceront, Mem. pour Servire, etc., tom. xix; Hoefer, Nouv. Biog. Générale, xx, 127.

George, prince of Anhalt and bishop of Merseburg, was born at Dessau Aug. 13, 1507, and educated at Leipzig. In 1525 he was made subdeacon, and in 1526 cathedral chaplain and magister. In 1528, in the second year of age his attainments were such that he was chosen by Albert, elector of Meissen, to be one of his council, and gained his highest confidence. About this time the Reformation attracted the attention of all men, and Luther's writings concerning the difference between the law and gospel, etc., were dispersed and read everywhere. Prince George was no idle spectator. At first he diligently opposed the so-called "novelties," and devoted himself specially to the study of Church history and to the Scriptures, the better to defend the "Old Church." He began all his investigations with prayer. The result was that he openly embraced the doctrines of the Reformation, and renounced all connection with popery. He put down superstition and set up semiaries of learning—the surest way, under God, of exterminating the errors which in 1517 had, once more, been introduced. When ever, was done with Christian mildness, and multitudes were soon brought by divine grace to rejoice experimentally in the light of the Gospel. By 1534 Anhalt may be said to have become Lutheran. In 1545, by his influence, his cousin, he consented to give himself to the work of the ministry, and was made bishop of Merseburg—an office full of danger and difficulty, which no worldly man would covet. He was ordained by Luther, Melancthon, and other divines.
GEORGE

August 2, 1545, in the cathedral at Merseburg. His whole time was thenceforward devoted to this holy work. Above all love ambition and revenge himself, he endeavored to remove them from others. He was a peacekeeper among princes. Insults he bore with Christian magnanimity. He lived with God in his heart, and for God in his intercourse with men. Luther and Zwinglius, and others were his most intimate friends. As in life, so in death; he was full of resignation, faith, and love; dwelling most sweetly on the promises, especially John iii. 16; x. 27, 28, and Matt. xvi. 28. He died Oct. 17, 1555, aged forty-six. His symodal addressation. He is commonly figured on horseback, in full armor, with the dragon writhing at his feet. It is difficult to separate the mythical from the historical in the accounts of St. George. Calvin and the Magdeburg curators deny that there ever was such a person. But it is certain that he was honored, and churches named after him, at a very early period, in the Eastern Church, especially in Georgia. Gregory of Tours mentions the honors paid him in France in the 6th century; and Gregory the Great ordered the renewal of an ancient church of St. George that was falling to ruin. His relics are said to be still preserved in the church of St. Germain des Prés at Paris. The Crusaders held St. George in special devotion; the English Council held at Oxford, 1222, made St. George's day a festival for all England; in 1347 Edward III instituted the Order of the Garter under his protection. Some writers identify St. George with the Arian of Cappadocia (so Gibbon, Decline and Fall, Harpers' edit., ii. 454). Mr. John Hogg, secretary of the Royal Society of Literature, published a pamphlet in 1862, entitled Supplementary Notes on St. George the Martyr, in which he proves that the story of the ancient church at Eza, in Syria, in which George is styled Martyr, and the date of his death fixed before A.D. 346, while George the Arian, of Cappadocia, was yet living. See Heylyn, Historie of St. George (Lond. 1631, 4to); Gibbon, Decl. and Fall, chap. xxiii.; Acta Sanctorum, i. iii.; Milner, Historical and Critical Inquiry into the History and Character of St. George; Lowick, Life and Martyrdom of St. George; Methodist Quarterly Review, 1862, p. 499.

GEORGE THE ARIAN, or GEORGE THE FULLER, of Cappadocia, was called by the name from the occupation of his father, and the second became an inhabitant of that province. Few men have been more corrupt and more despicable. He began life as a parasite. Afterwards he was provided with a subaltern office in the chimmariat department of the army, and he there embezzled the money of the public, and was, from this sin, to fly. He then became a vagabond. To so many bad qualities he added profound ignorance; he had no knowledge of letters, and still less of the holy Scriptures and theology. Notwithstanding these disadvantages, this man appeared to the Arians a fit instrument to work their will. They taught the emperor to converse into their views; they was a pantomaker of their and their support. At Antioch, in the year 356, there was an assembly of thirty Arian bishops, and in this assembly George was ordained, and received the mission to go and govern the Church of Athensius. George entered Alexandria accompanied, by the order of Constans, by soldiers under the command of Sebastian, duke of Egypt, and a Manichaeans. In the search for Athensius, they violated the most sacred places, and committed every kind of crime. The Alexandrians rose against him and obliged him to fly; but, supported by Constans, he returned more powerful than ever. But a pagan, whose temple George had pillaged after dinner, rose in revolt, threw themselves upon George, and overwhelmed him with abuse and with blows. The next day they paraded him through the town upon a camel, and, having lighted a pile, they threw him and the animal on which he was mounted upon it, after Sergius, but nothing further to the ashes to the winds, and plundered his house and his treasures (A.D. 361). Julian, on learning this outrage, was much irritated, or pretended to be so; he wrote a severe letter to the insurrects, but pursued them no further. As a lover of books, he endeavored to recover the library of George, but the work was very numerous. It is hard to reconcile the accounts of George's extreme ignorance with the accounts given of this library. — Socrates, Hist. Eccl. li. ii., ch. xiv. 28; lii. iii.; ch. ii.; Neander, Ch. Hist. li. 60; Hook, Eccles. Hist. Eccl. ii. 250; Sozomen, Hist. Eccl. iii. 5; iv. 10; Hoefer, Nouv. Biog. Générale, xx. 117.

GEORGE THE PHILIAN (Georgios Filios or Pisdos) flourished about the middle of the 7th century. (This account is taken substantially from Smith, Dictionary of Biography, s. v.) George is described, in the manuscripts of his writings, as deacon and xerophylax, "record-keeper," or xerophylos, "keeper of the sacred vessels" of the Great Church (that of St. Sophia) at Constantinople. He appears to have accompanied the emperor Heraclius in his first expedition against the Persians, and to have enjoyed the favor both of that emperor and of Sergius, but nothing further is known of him. Among his writings are Eic twn xarwv Psev overlay "Eucaristiasin nhrkoukoukis to basileos xarwov tro, De Exegetike Heraclii Imperatoris contra Persas Libri tres. This work is mentioned by Suidas, and is probably the earliest of the extant works of this writer. The three books are written in trilingual iambics, and contain 1098 verses. They describe the first expedition of Heraclius, whose valor and piety are in moderately praised, against the Persians, A.D. 622, when he attacked the frontier of Persia in the neighborhood of the city of Ecbatana. "Agape" on Africa, an argument of the first book of 541 trimeter iambic verses, describing the attack of the Persians on Byzantium, and their repulse and retreat (A.D. 626); Eic twn xarwv nhrkoukoukis to basileos xarwov tro, in Symeon Sin Kastri, De Nostri, Resurrectio, consisting of 129 trimeter iambic verses, in which George exults Flavius Constantine, the son of Heraclius, to emulate the example of his father; probably written about A.D. 627. Eic twn xarwv nhrkoukoukis, Opus Deorum seu Mundus Opificium, a poem of 1210 iambic verses in the edition of Great Britain and restored to the lines omitted by previous editors. It has been supposed that this work has come down to us in a mutilated condition, for Suidas speaks of it as consisting of 3000 verses. But it is possible that the text of Suidas is corrupt, and that we should read Eic twn xarwv nhrkoukoukis. The poem has a resemblance of incompleteness. The xerophylos contains a prayer as if by the patriarch Sergius for Heraclius and his children. The poem was probably written about A.D. 629. Eic twn xarwv proswos, De Vinite Vitae, 248 iambic verses; Kerd Xanxos, 68 verses; Kerd Xanxos tou Symioutou, 76 verses; Kerd Xanxos tou Symioutou, Contra impium Securum Antiochiae. This poem consists of 738 iambic verses. A passage of Nicephorus Callisti
The ancient history of Georgia is altogether fabulous. It submitted to Alexander the Great, but after his death was made an independent kingdom. In this condition it remained for about twenty-one centuries. Christianity spread in Georgia about the close of the 4th century and dislodged the ancient religion, which was probably kindled from the Mithraic service of the ancient Persians. In consequence of the profession of the Christian faith, Georgia became allied to the Byzantine empire, conjointly with which it resisted the attacks of the Sassanides. More successful than the inroads of the Sassanides were those of the Arabs, and under the dynasty of the Bagratis, a branch of the Armenian dynasty of that name (since 614), Georgia became a province of the empire of the Arabian caliphs, and only the mountainous districts in which the kings of Georgia found a refuge preserved a kind of independence. In the 9th century, during the decline of the caliphate, the Georgians recovered their independence for a short period, but in the 10th century they became tributary to the Mohammedan dynasties in Persia. Toward the end of the 10th century they again achieved independence, and it was from this period that the two great and brilliant eras in Georgian history: from this period to the 15th century, when they were conquered by the Mongols, Georgia was governed by a series of able sovereigns, who increased its extent and raised it to great prosperity. Toward the end of the 14th century the country was conquered by Timour, who was driven from it in the beginning of the following century by George VII. Alexander I, the successor of George VII, divided the kingdom between his three sons. Each of these states was again divided, and at one time 26 different princes reigned in Georgia. The general history of Georgia now divides into two parts: the state of Kachet and Kachet; and that of the western states, including Imereth, Mingrelia, and Guria. From the 16th to the 18th century the eastern states were heavily oppressed by Persia, and in 1795, Gregory XI, after many attempts to establish their independence, resigned the states in favor of the 10th emir-caliph, and in 1802 the emperor Alexander proclaimed the territory a Russian province. Of the three states forming Western Georgia, Guria fell into the hands of Russia in 1801, and formally surrendered itself to that empire by the Treaty of 1801. Mingrelia was virtually added to Russia in 1808, and fully incorporated with it in 1868, and the state of Imereth toward the close of the 18th century. Thus the whole of Georgia has been brought under the dominion of Russia, and has been united, along with the other Transcaucasian possessions of that country, into a general government, the head of which unites in his own person the military, civil, and ecclesiastical powers, and exercises military supremacy over the whole of the Caucasus. The Georgians were represented in the synods convened by the Armenian patriarch in the 5th and 6th centuries, and embraced the Monophysite faith, and they also withdrew from the communion of the patriarch of Constantinople. In the latter part of the 6th cen-

GEORGIAN VERSION

tury they resumed their former ecclesiastical connexion, and they have since been considered as a part of the Greek Church. When Georgia passed into the hands of Russia it lost the independence of its national Church. The differences between the Russian and the Georgian forms of religion being very small, the latter was suppressed by the Russian authority. The authority of the Georgian Catholicos was also transferred, and a Russian archbishop sent to occupy the see of Georgia. Convents and nunneries are abundant, and the inamles are all mendicants. Most of the bishops are rich, but the majority of the priests are both very poor and ignorant. The best and fullest information about Georgia is contained in the work of Brosset, *Histoire ancienne de la Géorgie* (Peterburg, 1849, 2 vols.; Additions, 1861), and *Histoire Moderne de la Géorgie* (Peters, 1854-57, 8 vols.).—Brockhaus, *Concisa. Lex.*; Farrar; *Halyot, Ordres des Relig.* (ed. Migne), r. v. Melchizedek. (A. J. S.)

Georgian Language. The Georgian language, which is also spoken by the Mingrelians, Lazians, and the Svanet, belongs to the Isberian family. The chief characteristics of it are as follows. Its alphabet consists of thirty-five letters; it has no articles; the substantives have eight cases and no genders; the adjectives, when associated with nouns, are indeclinable, but when they stand by themselves are declined; the comparative is formed by the prefix у and the suffix ai, and cardinals are obtained by prefixing м to the ordinals. It possesses eight conjugations with several minor subdivisions, and the different persons are indicated by terminations and prepositions; it has several forms for the preterite and the future tenses, and only one form for the present tense; three modes, viz. indicative, imperative, and the participle, and supplies the place of the infinitive by a verbal noun; it has postpositions governing different cases, in addition to the prepositions, and can multiply the verbs to any extent by the terminations елос and оло, form abstracts from adjectives by the terminations ооло and ооло, as well as active personal nouns, adjectives—both active and passive—and diminutives, by various terminations and prefixes, and its construction allows many liberties. From the venerable old Georgian language a dialect developed itself, in the course of time, by the introduction into it of many Armenian, Greek, Turkish, and other foreign words, and by the vitiation of the pronunciation and spelling of many words. The two dialects have distinct alphabets: the alphabet in which the old Georgian is written is called хуар, я. i. the sacred, and consists of the letters invented by Mriosb; and the alphabet of the modern Georgian is called кесути, and is supposed to have been invented by the Georgians themselves in the 14th century. The old language is the ecclesiastic or literary, and is employed in all sacred and literary writings, while the modern is the civil dialect, or the dialect of common life. Compare Eisele and Gruber's *Encyclopædia*, s. v. Georgians, p. 122; Eichhorn, *Algemeine Bibliothek der biblischen Literature*, i. 156 sq.

Georgian Version. This is one of the oldest versions of the Bible in the east. 1. Name, Date, and Source of this Version. —The Georgians call their Bible by different names—1. *Biblia*, i. e. the Bible; 2. *Zminda Zerilii*, the holy Scripture; 3. *Samtso Zerilii*, the divine Scriptures; 4. *Zigbo m Zabauda de akabide ogilizna*, the books of the O. and N. T.; 5. *Biblia*, the books of the Bible. The version is supposed to have been made about A.D. 570, when the Georgians, stimulated by the example of the Armenians [see ARMENIAN VERSION], sent young men of talent to Greece to study the Holy Scriptures, and translated the Scriptures and liturgic books of the Greek Church. The translation of the O. T. is made from the Sept., and of the N. T. from Greek MSS. of the Constantinopolitan family, and is composed in the ecclesiastical or ancient dialect. See GEORGIAN LANGUAGE.

II. Text and Editions of the Version.—This venerable version has shared in all the troubles to which Georgia has been subject. The entire books of Macabees and Esthers are missing; the descriptions of the country, passages disappeared from different parts of the volume, and the whole text got into a state of confusion. It was only in the beginning of the 17th century that prince Vakhtang published at Tiflis the Psalms, the Prophets, and the New Testament. In 1758, a full version was printed at Tiflis, with the notes of the text. Shortly after, prince Arcili, uncle of prince Vakhtang, who fled from Kartel to Russia, undertook a revision of this version, making it conformable to the Russian translation as it then was, and divided it only into chapters, because the Russian translation was divided into chapters only. But this prince only lived to carry through the revision from Geneva to the Prophets, and to translate from the Russian Bible the lost books of Macabees and Ecclesiastical. His son, prince Vaknet, was, however, induced by the solicitation of a bishop, prince Khakuli, and a Georgian clergy resident in Russia, to continue the work of revision. He made the text conform still more to the Russian translation, newly revised according to the command of Peter the Great, supplied from this translation all the passages which were wanting in his version, made also the additions which his father had published conformable to this translation, and divided the whole into chapters and verses. He had Georgian types cast at Moscow, and at once began printing in that city; the correction of the press he committed to four native Georgians, and the first edition of the entire Bible was lost in 1740. In 1760, fol., prince Bachar, brother of the editor, defraying the entire expense. From this edition the Moscow Bible Society reprinted the N. T. in 1816, 4to, under the superintendence of the Georgian metropolitan Ion and of archbishop Pafnuti, with types cast from the very matrices which had been used for the former edition, and which had escaped the conflagration of the city at the time of Napoleon's invasion. Another edition was published in 1818, in the chief character, 4to. It is said that there have appeared more recent editions of various portions of this version both at St. Petersburg and in Russia, but there is no particular account of them.

III. Critical Value of the Version.—The value of this version, in a critical point of view, has been greatly impaired by the corruptions which it has suffered during the centuries of political changes which the country has undergone, and especially by the disfavor of its editors to make it conform to the Russian translation. It must not, however, be supposed that its value is entirely gone. Both Tischendorf (N. T. Graec. 2d ed. pref. p. lxxvii) and Mr. Malan regard it as a good auxiliary to the criticism of the Greek text. Indeed, Mr. Malan, who has published an English translation of the Georgian version of John’s Gospel, goes so far as to say that “it differs from the Slavonic in many places in which it might be expected to agree, it has a character of its own, is a faithful version, and is a true criterion.” The same comment is applicable to St. John, translated from the eleven old Versions, etc., by the Rev. S. C. Malan, M.A., Lond. 1862, p. ix, note 3).

IV. Literature.—A very interesting treatise on this version, containing a brief account of its history and publication, from the preface of prince Vakhtang, was communicated by professor Adler, of Copenhagen, to Eichhorn, who published it in his *Algemeine Bibliothek der biblischen Literature*, i. 158 sq., and afterwards reprinted it in his *Einleitung d. Alten Testament*, vol. i., sec. i. He has also published a part of the translation of the Old Testament, and both Georgia and Russia, could do no more in his Biblical Researches and Travels in Russia (London, 1826, p.
GEORGIIUS SYNCELLUS

518, etc.) than to give a literal translation of this account. A valuable book has also been published by Franz Carl Alber, entitled Uber Georgisacische Literatur (Wien, 1796), in which is given an extensive collection of the various readings from both the O. and N. T.

Georgeus Syncellus, termed also "Abbas and Monachus," lived in the latter part of the 8th and beginning of the 9th century. He obtained his distinguishing epithet from having been syncellus or personal attendant of Tarasius, patriarch of Constantinople, who died A.D. 806. Theophanes, who was his friend, describes him as a man of talent and learning, especially well versed in chronographical and historical subjects, which he had studied very deeply. He died in "the orthodox faith," without completing his principal (and, indeed, only known) work, the completion of which he strongly urged, as his dying request, upon his friend Theophanes. He is the author of a chronography or chronicle, the title of which in full is as follows: Εὐχέλα Χρονογραφίας συγγεγεντιδινύκτω Νεωτέρων Μανάγοι Συγκέλλου γεγονότοι Ταρασιών Πατριάρχων Κωνσταντινουπόλεως από ἅλα μήνα Δεκεμβρίου ὧν θεωρεύεται αὐτόν ἁπάντως Κοινήν Μουσαλλος, Συνταγμάτων Ρημάτων Συνετάς, Πατριάρχων Κωνσταντινοπόλεως, ἀπό Αδάμ ἄπειται. The author states that he intended to bring his work down to A.D. 800; but, as already stated, he was cut off by death, and the work only comes down to the accession of Dioscorides, A.D. 1234. This work is included in the various editions of the Byzantine writers. Gour, the Parisian editor, contended that we have the work of Syncellus in a complete form, but the contrary opinion seems to be the better founded. Possessing, Vasilius, and others have lately been Syncellus with Georgius Harsmartolus; but Allatius has shown that this identification is erroneous. Syncellus has transcribed verbatim a considerable part of the Chronicon of Eusebius, so that his work has been employed to restore or complete the Greek text of the Chronicon. The Chronography of Theophanes, which extends from A.D. 265 to A.D. 583, may be regarded as a continuation of that of Syncellus, and completes the author's original design. The Bonn edition of Syncellus is edited by W. Dindorf, and, with the brief Chronography of Nicephorus of Constantinople, occupies 2 vols. 8vo, 1829. (Theophanes, A selection of chapters, by George Compend. sub. init.; Allatius, Ibid. p. 24; Fabricius, Bibl. Gr. vii, 457; Cave, Hist. Lit. i, 641.)—Smith, Dictionary of Gr. and Rom. Biography, ii, 254. See Syncler.

Gopher. See VINE.

Gephyrus (Γεφύρος, prob. a Greekised form of the Heb. נַמְפֶל, a village; see CAPARH), a town mentioned by Polybius (v. 70, 12) as captured by Antiochus along with Pallus and Camus (Camon), and therefore situated in the same vicinities east of the Jordan (Reland, Palest. p. 804); perhaps the present Arab-Aswe, a short distance N.E. of Kefr-Ablid (Robinson, Later Researches, p. 318).

Ge'ra (Heb. גֵּרַע), N'2, a grain [see GERAH]; Sept. Γεραίος, the name of at least three Benjaminites. 1. The son of Bela and grandson of Benjamin (1 Chron. viii, 8); probably the same with the one mentioned (with some confusion) in verses 6, 7, unless one of these be identical with No. 2 below. In Gen. xvi, 21, he is given as if directly the son of Benjamin; and he there appears among the descendants of Jacob, at the time of that patriarch's removal to Egypt. B.C. 1674. See JACOB. * Gera is not mentioned in the list of Benjaminite families in Numb. xxvi, 38-40, of which a distinct instance is given here; and at this time he was not the head of a separate family, but was included among the Belaites; it being a matter of necessity that some of Bela's sons should be so included, otherwise there could be no family of Belaites at all.

To the remarks made under Becher should be added that the great destruction of the Benjamites recorded in Judg. xx may account for the introduction of so many new names in the later Benjaminite lists of 1 Chron. vii, 10, the whole of which are probably names of women's names ("Smith"). See BENJAMIN. In 1 Chron. vii, 7, Uzziel occupies the same position as Gera elsewhere in the genealogy. See BELA.

2. The (father or ancestor) of Ebud the judge (Judg. iii, 15); compare 1 Chron. viii, 5, 7; possibly identical with No. 1 above. B.C. ante 1560. See EBUD.

3. The father of the eschatological son of Shimeon, which latter so grossly abused David (2 Sam. xvi, 5; xix, 16, 18; 1 Kings ii, 8); thought by some to be identical with both the foregoing. B.C. ante 1028. See SHIMMIEL.

Gerah (גֵרַע, "Gerah"; a berry or granule [compare English "barley-corn" and "grain" as measure and weight]; Sept. ἀράχ, Vulgate obodius), the smallest weight, and likewise the smallest piece of money among the Hebrews, equivalent to the twentieth part of a shekel (Exod. xxx, 13; Lev. xxvii, 25; Numb. iii, 47; xviii, 16; Ezek. xiv, 12). It would therefore weigh 1313, Paris grains, and be worth about 3 cents. The same Hebrew word also signifies 20c, as being a round mass. It has been supposed by many that the gerah was so called from the fact that some kernels, as of pepper or some other, or perhaps the seeds of the vetch tree (sepainting) may have been originally used for this weight, but it would be equal in weight to 4 or 5 beans of the carob, and, according to the Rabbins, it weighed as much as 16 grains of barley. See Metricology.

Gerando, Joseph Marie, Baron De, a French statesman and philosophical writer, was born at Lyons February 29, 1772, and was educated for the priesthood. During the Revolution he served in the French army, and, under Napoleon, he filled various high civil offices. He was made a French peer in 1857, and died at Paris November 10, 1842. He is mentioned here for his philosophical and ethical writings. He sent an article to the French Academy in 1799, which received a prize, he enlarged it into a treatise entitled Des Signes et de l'art de penser (1800, 4 vols. 8vo). This was followed by De la Generation des connaissances humaines (1802, 8vo), which was crowned by the Berlin Academy. His most important work is his De l'éducation pour le complet d'un essai de l'éducation des enfants (1802, 3 vols.; ed. 1847-8, 4 vols. 8vo);—Du perfectionnement moral de l'éducation de soi-même (1834; 1832, 2 vols.), which received the Montyon prize from the French Academy, and translated into English as "Self-Education," No. 1, 1833. De Gerando wrote many works on economical and political science.—Hoefer, Nouv. Biogr. Générale, xx, 149.

Ge'rar (Heb. גֶּרָאר), "Gerar," according to Simon's lodging-place, according to others from the Arabic "Garar," but more prob. with Fürst, a region, as being the centre of a distinct Philistine kingdom; Sept. and Josephus "Galilee" (Galailee), a very ancient town and district on the southernmost borders of Palestine, in the country of the Philistines, and not far from Gaza. It was visited by Abraham after the destruction of Sodom (Gen. xxxi, 1) and Isaac when there was a dearth in that country (Gen. xxvi, 1). The intercourse, differences, and alliances of the Hebrew fathers with the king and people of Gerar form a very curious and interesting portion of patriarchal history (Thomson, Land and Book, ii, 380). See ISAAC. In Genesis xxvi and xxvii, which are written by a Philistine; but their habits appear, in that early stage, more pronounced than they subsequently were. Yet they are even then warlike, since Abimelech had a "captain of the host," who appears from his fixed title, "Phichol," like that
GERARD

815

GERASA

to the kingdom, "Abimelech," to be a permanent officer
(comp. Gen. xxi, 82; xxvi, 26; and Psa. xxxiv, title). See
Abimelech. The local description, xxii, 1, "between Kadesh and Shur," is probably meant to
indicate the limits of the Philistines, whose chief seat was then Gerar, ranged, although it
would by no means follow that their territory embr
aced all the interval between those cities. It must
have trenchcd on the "south" or "south country" of later
Palestine. From a comparison of xxi, 52 with xxv
it would seem that the Israelites would soon be on
the verge of this territory, and perhaps to be its limit
towards the N.E. For its southern boundary, though
very uncertain, none is more probable than the wady
El-Arish ("River of Egypt") and El-Ain; south of
which the neighboring "wilderness of Paran" (xx, 15;
xxi, 16) is probably situated. Isaac was most
probably born in Gerar. The great crops
which he subsequently raised attest the fertility of the
soil, which, lying in the maritime plain, still contains
some of the best ground in Palestine (xxii, 2; xxvi,
12). It was still an important place in later times, as
we may gather from 1 Chron. xxxi, 14, 15. According to
the ancient accounts, Gerar lay in or near a valley
(\\"the valley of Gerar,\") Gen. xxxvi, 17; comp. 1 Sam.
xx, 5, which appears to be not other than the great
wady Shrikk (or one of the branches of it) that comes
down from the south; besides, we know that it was
in the land of the Philistines, and that it was not far
from Beerseba when Isaac resided there (Gen. xxxvi,
1, 10, 28; 28-38; comp. xx, 1). The name continued to
exist (perhaps as a matter of tradition) for several
centuries after the Christian era. Eusebius and Je-
ronimo of Jerusalem (s. v. Gerar) place it on the south
side of the Roman miles southward from Eleutheropolis
and Soszo-
men (Hist. Eccles. vi, 82; ix, 17) reports that a large
and celebrated monastery stood there, a winter
torrent. The abbot Silvanus resided there towards
the end of the 5th century, and the name of Marcion,
bishop of Cagliar (s. v. Gerar) appears among the signatures of the
Council of Chalcedon in A.D. 451. In the Talmudical
writings the district is termed Gerariki (Schwarz, Pal-
etina, p. 109). The name seems to have been after-
wards lost, and Dr. Robinson (Researches, i, 270 ; ii,
387) was unable to discover any traces of it later in the
locality: but he unnecessarily disregarded the claims of
wady El-Je'erur, which runs into the wady El-Arish
at Jebel el-Halal, to be regarded as a southernmost
trase of the ancient kingdom (Journ. Soc. Lit. July,
1845, p 239). It is well mentioned by him as lying in the shallow wady
El-Kusaimeh, in the same neighborhood (i, 280), may
represent those digged by Abraham and reopened by
Isaac (Gen. xxvi, 18-22). J. Rowlonds, in travelling from
Gaza to Khulasah, came after 3 hours' march to a
broad, deep wady, Jafc el-Gerur, a little below its
junction with a branch valley from wady Sherib.
Near this junction are ruins called Khurbet el-Gerar
(Williams, Holy City, 1845, App. p. 488-492), which he
identifies with Gerar. This account Van de Velde
heard confirmed by the people of Gaza, with a slight
name variation, i.e., (183); but the no ruins
yet standing, but scattered stones which appear to have
been once used in buildings: and in the absence of old
wells, it would seem as if the ancient city had been
supplied from some spring. Stuart's suggestion of
the ruins of El-Abdek (Time and Khan, p. 207) is not
out of the question. See Van de Velde, Memoir, p. (184).
In 1 Chron. iv, 39, the Sept. substitutes Gerar (Girappa) for
Gedor (q. v.).

Gerard, Alexander, an eminent Scotch divine,
was born Feb. 22, 1720, at Garloch, in Aberdeenhire,
and graduated at Marischal College and the Uni-
versity of Edinburgh. In 1750 he succeeded Pordyce
as professor of moral philosophy at Marischal College,
and in 1760 was appointed divinity professor. In 1771
he obtained the theological professorship at King's
College, Aberdeen. He died in 1795. He wrote (1.)
An Essay on Taste (1759, 8vo; enlarged edition, 1780).
This work obtained the prize of a gold medal offered
by the Philosophical Society of Edinburgh. (2.) An
Essay on the Use of Moral Discourse (1769, 8vo). Hermene
(London, 1790, 1782, 2 vols. 8vo); — (4.) Disser-
tations on the Genius and Evidence of Christianity (London, 1776, 8vo); — (5.) The Pastoral Care, edited by his son (London, 1799,
8vo).

Gerard, Gilbert, D.D., son of Alexander Gerard,
was born and educated at Aberdeen. He was for
some time pastor of the English church at Amsterdam,
and afterwards professor of Greek in King's College,
Aberdeen, and in 1775 of divinity. He died in 1815.
His "Institutes" are valuable for the numerous refer-
ce to authorities which they contain, and are very
careful. The greater part of the first edition was lost
at sea. His writings are, Institutes of Biblical Criti-
icism (Edinb. 1808, 3d edit. 8vo) — Compendious View of
the Evidence of natural and revealed Religion (London,
1829, 8vo).—Darling.

Gerard, Thom, Tun, Tuno, or Tenque, found-
er and first grand master of the order of St. John of Jeru-
usalem, was born about 1046, on the isle of Martigues,
on the Mediterranean. While Jerusalem was in the
hands of the Saracens, some merchants of Amalfi ob-
tained permission from the sultan of Egypt and Syria,
in 1000, to erect a Benedictine monastery near the
holy sepulchre, for the convenience of the pilgrims.
It was called Santa Marie la Latine. Among others, Ger-
ard arrived to pay his devotions, and he acquired a
high character for his piety and prudence. The
number of pilgrims increased every year, enriching the
treasury of the monastery. In 1080 the abbot built a
hospital for the reception of poor and sick pilgrims, the
management of which he gave to Gerard. The master of
that hospital was consecrated to St. John, because of a
tradition among the inhabitants of Jerusalem that
Zacharias, the father of St. John, had lived on the spot
where it was built. After the conquest of Jerusalem
by Godfrey of Bouillon, Gerard projected a new reli-
gious order, in which the ecclesiastical and military
characters were to be blended. This design he began
to carry out in the year 1100, when numbers associa-
ted with him under the denomination of "Hospital-
iers of St. John of Jerusalem," who, besides the three
vows of chastity, poverty, and obedience, took a par-
ticular vow to devote themselves to the relief of all
Christians in distress. This order, and the rules drawn
up for its government, were approved and confirmed by
pope Paschal II, who, by a bull which he issued,
granted it various considerable privileges, and recog-
nised it as the first grand master. Gerard died in
the year 1120. Such was the commencement of that
order which in succeeding times became so cele-
brated in history, when its members were commonly
known by the name of knights of Rhodes, and after-
wards by that of knights of Malta. — Hook, Eccles.

Gerard or Gerhard Groot. See Groot, Ger-
ard.

Gerßas (Gerasa, prob. of Heb. origin), a cele-
bated city on the eastern borders of Peraea (Josephus,
War, iii, 8, 3), placed by some in the province of Coele-
Syria and region of Decapolis (Steph. s. v.), by oth-
It is doublet of the Gerasa (Geras) of Ptolemaic
(68° 15' 15' 45") (Reland, Palaest., p. 450), who distin-
guishes it from the Gerassene (Gerasa) of Arabia Pe-
traea (66° 46') (Smith, Dict. Geog. s. v.). It is not men
tioned in the O. T.
nor in the New, unless in the reading Gerasene (q. v.) at Matt. vii, 28. It is not known when or by whom Gerasa was founded. Its inhabitants were mostly heathen (Josephus, War, iii, 5, 5; comp. iv, 5, 1; ii, 18, 5; Ant. xii, 18, 6). Before the revolt at Qarqar (Ant. xxv, 5). Before the capture of the city, it was included among the number of those cities which were burnt by the enraged Jews in their vengeance on the Syrians, and on the Roman power generally, for the massacre of a number of their nation at Cassarea (Josephus, War, ii, 18, 1). A terrible retribution was taken by other cities, but Gerasa is honorably excepted (War, ii, 18, 5). It had scarcely recovered from this calamity when the emperor Vespasian dispatched Annius, his general, to capture it. Annius, having carried the city at the first assault, put to the sword one thousand of the youth who had not effected their escape, enslaved their families, and plundered and fired their dwellings. It appears to have been nearly a century subsequent to this period that Gerasa attained its greatest prosperity, and was adorned with those monuments which gives it a place among the proudest cities of Syria. History tells us nothing of this, but the fragments of inscriptions found among its ruined palaces and temples show that it is indebted for its architectural splendor to the age and genius of the Antonines (A.D. 138-80). It subsequently became the seat of a bishopric. Baldwin II of Jerusalem destroyed its castle in the year 1122 (Will. Tyr. p. 922; Hist. Hieroool. p. 615). This was the native place of Nicaemachus Gerasenus. Coins of Gerasa may be seen in Eckhel (Vem. Vet. iii, 360). There is no evidence that the city was ever occupied by the Saracens. There are no traces of their architecture—no mosques, no inscriptions, no reconstruction of old edifices, such as are found in most other great cities in Syria. All here is Roman, or at least anti-Islamic; every structure remains as the hand of the destroyer or the earth-quake shock left it, ruinous and deserted. It is now called Jerash. Its ruins were first discovered by Sceatzen (1, 388 sq.), and have been subsequently visited. They are by far the most beautiful and extensive east of the Jordan. They are situated on both sides of a shallow valley that runs from north to south through a high undulating plain, and falls into the Zerka (the ancient Jabbeh) at the distance of about five miles. A little rivulet, thickly fringed with oleander, winds through the valley, giving life and beauty to the deserted city. The first view of the ruins is very striking, and such as have enjoyed it will not soon forget the impression made upon the mind. The long colonnade running through the centre of the city, terminating at one end in the graceful circle of the forum; the groups of columns clustered here and there round the crumbling walls of the temple; the heavy masses of masonry that distinguish the positions of the great theatres; and the vast field of shapeless ruins rising gradually from the green banks of the rivulet to the battlemented heights on both sides—all combine in forming a picture so real as is rarely equalled. The form of the city is an irregular square, each side measuring nearly a mile. It was surrounded by a strong wall, a large portion of which, with its flanking towers at intervals, is in a good state of preservation. Three gateways are still nearly perfect, and within the city a hundred and thirty columns remain on their pedestals. A description of them may be found in Burckhardt's Syria, p. 232-64; also in those of Lord Lindsay and others, which are well condensed in Kelley's Syria, p. 448 sq. See also Buckingham's Palmyra, p. 403; Keith, Evidence of Prophecy (3rd ed.).

Gerasána (Γερασανή), an inhabitant of Gerasa (q. v.). Several MSS. read Γερασίνων instead of Γερασών, in Matt. vii, 28; but the city of Gerasa lay too far from the Sea of Tiberias to admit the possibility of the miracles having been wrought in the reading Πετρονίαν be the true one, the γερασάνων, "district," must then have been very large, including Gadará and its environs; and Matthew thus uses a broader appellation, where Mark and Luke use a more specific one. This is not impossible, as Jerome (of Ecd., ed. 1) states that Gilead was in his day called Jer- rass, and Origen affirms that Πετρονίαν was the ancient reading (Opp. iv, 140). See GADARA. The nature of Origen's argument makes this statement very doubtful. It looks like a bold hypothesis to get over a difficulty (see Alford, ad loc.). The rival Gerasa, however, is also mentioned by Eusebius, and the title given to the city, the Latin name, makes it certain that Gerasa was on the bank of wady Semal, east of the lake. He describes it as "within a few rods of the shore, and an immense mountain rises directly above it, in which are ancient tombs... The lake is so near the base of the mountain, that the swine rushing madly down it could not stop, but would be buried on into the water and drowned." (Rud. Book, ii, 84-86.) It is uncertain which reading has the highest authority, and consequently these conjectures are very doubtful (see, however, Elliott's Lectures on the Life of our Lord, p. 188, note; Van de Velde, Memoir, p. 311; Rendel, p. 502, 507). See Gerasa.

GERAUD, Henry, a French priest of evil name in the 13th cent., first mentioned as chaplain of pope Clement V. He afterwards became arch-deacon of En, in the diocese of Rouen. Clement V finally appointed him bishop of Cahors, in consideration, it is said, of a large sum of money. He soon, however, took advantage of his position to despise the inhabitants of his diocese, and pope John XXII appointed the bishops of Riez and Arras to investigate the charges against Géraud. Accused of simony, of ingratitude towards the see of Rome, of cruelty to those who appealed from his decisions, of spoliation, and of criminal con-
section with women, he was condemned to prison for life. An author of that period, Bernard Guidoin, says that Gérauld, after being stripped of the insignia of his office, was condemned to be dragged on the public highway, flayed in some places, and finally burned alive.

Gerbelin, Jean François, a French Jesuit missionary to China, was born at Verdun Jan. 11, 1868. He studied at Nancy under the Jesuits, and was, with five other Jesuits, sent to missionary work in China, where he arrived March 25, 1866. The missionaries at once sought an audience from the emperor, who refused to admit the new religion, on the ground that as the sects of Fo, Tao-se, the Lamas, and the Han-changs taught men to do good and avoid evil, there was no need of a new one. He conducted several doctrinal disputes. Yet, by special edict, he retained at his court the missionaries Gerbillon, Pereira, and Bouvet, with permission to practice the religion, but not to teach it. He commanded them to learn the Chinese and other dialects, and sent them on several diplomatic missions. In 1869 Christian works were finally permitted in China; but Gerbillon's attempts to introduce the Roman Catholic religion, and to open the country to European commerce, failed through the jealousy of the divers other orders of Roman missionaries, in the Christian Church; and the Jesuits were ordered to leave. They were formally expelled in 1867. They were finally expelled in 1870. He wrote Elements of Geometry in Chinese and Tartar (Pekin):—Theoretical and Practical Geometry, in the same language, and published also at Pekin:—Observations historiques sur la grande Tartarie (in Du Halde's Description de la Chine, t. xxxiii); La Voyages en Tartarie (in Du Halde). He is also considered by some as the author of the Elementa Linguae Tartaricae, which others attribute to the missionaries Couplet and Bouvet. See Lettres écrites, tom. xviii; Hist. géner. des Voyages, t. vii and viii. Hoefer, Nouv. Biog. Générale, xxx, 203 sq.

Gerdes, Daniel, a learned German divine, and member of the Berlin Academy, was born at Bremen April 19, 1698. He took his doctor's degree at Utrecht, after which (1726) he became professor of theology and ecclesiastical history at Durlaburg. He removed to Grogingen in 1735, and died Feb. 11, 1776. His works are accurate, and of great utility for the history of the Reformation. Among them are Historia Reformata, sive Introductio in historiam evangeli secundo evi passum per Europam renovati, etc. (Gron. 1744-52, 4 vols. 4to); Florilégium historicorum librorum veterum sive notarum et historiarum (Gron. 1750, 4to); Molematina Sacra (Gron. 1759, 4to); Specimen Italiae Reformatae (L. Batz. 1755, 4to); Doctrina gratiae sive comprehensio theologorum dogmatum (Duibus. 1784, 4to). Hoefer, Nouv. Biog. Générale, xx, 206; Herzog, Real-Encyklop. v. 34.

Gerdi, Hyacinthe Sigermond, a Roman Catholic theologian, and cardinal of the Congregation of St. Paul, was born at Sannois, in Savoy, June 23, 1718. In 1782 he entered the order of the Barnabites, and studied at Bologna, where his talents attracted the notice of the cardinal archbishop Lambertini, who secured his aid in the preparation of his great work on Canonism. He was subsequently made professor of philosophy and theology, first at Macerata (1737) and afterwards at Turin (1749). In 1777 pope Pius VI made him cardinal, with the title of St. Cecilia, and afterwards prefect of the Propaganda. He would probably have been elected pope on the death of Pius VI but for his great age. He died August 12, 1802. Gerdi was undoubtedly a man of considerable intellect and of large acquisitions. His writings on metaphysical subjects, especially against Locke's philosophy, have secured the admiration of many Protestants as well as of Roman Catholics. He also wrote largely upon the subjects of Christology and the Encyclopedists. Editions of his works have been published by P. Tosielli (Bologna, 1781-1794, 6 vols.), and by Fontana and Grandi (Rome, 1806 sq., 20 vols.). In

Gerem. See GARMITE.

Gerês, Gerês. See GERÄNNE; GAĐARA; GERÄEVE.

Gerêsene (Γερεσενος), a reading (Γερεσεονος), found in the Received Text (with many fragmentary uncial and other MSS.) in the account of the expulsion of the swine by our Lord (Matt. viii., 28). Instead of Γεκαρεσον (Toασανων, as Tischendorf; with several of the earliest and many later MSS.), some readings (Γεσαρεσον, Γεστερινεσον, Γεστερινεσον, or even Казаре (Toασανων, as the Codex Sinaiticus). In the parallel passages (Mark v., 1; Luke viii., 26) the readings are different, but equally disputed (B. T. Toασανων, with By far the greatest weight of the older authorities, Gerêsene, with X [in Mark only, in Luke Γερεσεονων, B. etc.]. It is evident that the evangelists did not write the same name; and we may therefore suppose that the exact spot was one on the immediate lake shore, within the bounds of the region indifferent- ly known by either of the general names Гадара or Γεραια; or if Gerêsene be retained, it may refer to the ancient territory of the Gerontes (q. v.), in the same neighborhood. See Geräsenne.

Ger'gesite (only in the plur. Γεργεσιονα), a Graecized form (Judith v., 15) of the ancient Girogsseite (q. v.).

Gerhard, Johann, an eminent theologian of the Lutheran Church of Germany, was born in Quedlin- burg October 17, 1582. In 1609 he went to the Univer- sity of Wittenberg, and studied medicine for a time. He left Wittenberg for Jena, where he studied Hebrew, the Scriptures, and the fathers. After passing A.M., he began to give private lectures in those branches and in theology. Thence he went to Marburg, where the teachings of Winckelmann and Muentzer deeply impressed him. After lecturing on theology at Jena, he accepted the superintendency of Heldburg, offered him by Casimir, duke of Coburg, in 1606. Declining two calls to Jena in 1610 and 1611, and one to Wittenberg in 1613, he finally accepted the senorate of the faculty of Jena, at the command of George I, elector of Saxony, in 1615. Here he devoted his great talents industriously to his duties to the university, the Church, and the state. He held the first place in the ecclesiastical conferences at Jena, 1621; Leipsic, 1624 and 1630; and was consulted by princes both in ecclesiastical and secular matters. He died Aug. 20, 1657. Gerhard's great points of excellence as a dogmatic writer are comprehensiveness of plan, thoroughness of the treatment of topics, and per- spicuity of style. The Loci Communes Theologicis has not only been a standard of Lutheran theology for two centuries, but has also been greatly valued by Roman Catholic and Reformed theologians.

The exegetical writings of Gerhard are also of great value, the most important being Comment. in Harmonius Am. evang. de Pasione et Resurrectione Christi (1617, 4to), a continuation of the commentaries of Chenu and Lyra, and written with them (Hamburg, 1582, 8 vols. fol.). It is specially valuable for its patristic learning. Posthumously appeared his Comm. in Genesin (1637, 4to); Comm. in Deuteronomium (1638, 4to); in 1 and 2 Tim. (1648); in 1 and 2 Peter (1641); ad Coloss. (1640, 4to); ad Ephesios (1668, 4to). He also pub- lished De Sacra Script. Interpretatione (1610, 4to); Methodus stud. theol. (1620)—still valuable as a methodological work. In the sphere of doctrinal theology Gerhard has made his name immortal by two great works: the first is Doctrina catholica et evangelica, quam ecclesiam Augustana confessionis adiuvibus profectur ex Romanu-catholicorum scriptorum subreptis confirmita (1684, 3 vols.), a work which many theologians consider the best of Gerhard's writings. The other great work is Loci Theologicis, cum pro addenda variis, tum pro detractis quorumvis contributio summis illestitut, which he began in Heldburg when only twenty-seven years of age, and of which he celebrated the comple- tion (nineth volume) at Jena in 1629 (first edit. Jena, 1629-1630, vol. frequently reprinted). One of the best editions is that by Cotta, Tub., 1762-1768, 22 vols. 4to, the two last volumes containing index by G. H. Muller. A new edition was begun by Dr. Preusse, Ber- lin, 1867 sq.). That part of the Locci which treats of God and of the person of Christ was developed more particularly in his book published in 1629, De Exegesi seu superiori explicationi articulorum, et cetera. The value of the Loci Theologici in comparison with the predecessors of Gerhard in the Lutheran Church, especially with Hutter and with his successors, especially with Calov and Queesstedt, is abundantly testified by George in his Geschichte der protest. Dogmatik, 1, 261.

The practical writings of Gerhard are full of the spirit of Christian love and devotion. He was, indeed, charged by the cold dogmatists of the time with the spirit and mysticism. Among them are Medicina Sacra ad incohendum ex doctrinam medicinalem (Jena, 1619.);—Schola Pietatis, d. i. christl. Unterrichtung a. Gottliebin- keiti (Jena, 1622-23, 12 vols.);—52 Heilige Betrachtungen. These have been frequently reprinted; the Medicinae has passed through scores of editions, and has been translated into English and often reprinted (last- est, Lond., 1623, 12mo). For a list of all his writings see Fischer, Vita Joannis Gerhardi (Lips. 1728); see also Herzog, Real-Encyklopadie, v, 40; Gisseler, Church History (ed. Smith), iv, 574.

Gerhard, Johann Ernst, (1.) a theologian, was born at Jena December 15, 1621. He studied at the universities of Jena, Altdorf, Helmstadt, Leipzig, and Wittenberg, devoting himself to Oriental literature and theology. He visited successively the libraries of Holland, Switzerland, and France, and in his journey became acquainted with some of the most eminent literary men of that period. After his return to Jena he became professor of history, afterwards of theology, in the university, and died in that city Feb. 24, 1689. He wrote Harmonia lingvarum orientalium:—Consensus et Dissensus religionum proforum Judaeism, Sor- maristismus, Muhamedam et paganism.—Ezech und Gruber, Allg. Encycl.; Jocher, Allg. Gel.-Lex.; Hoefler, Nowe. Biogr. Generale, xx, 213.

Gerhard, Johann Ernst, (2.) son of Johann Ernst (1.), was born at Jena Feb. 13, 1669. He studied theology at Jena and Altdorf, became a member of the Societas Discipulorum, and contributed a number of Memoirs to the Acta Eruditorum of Leipzig. He was afterwards appointed church and school inspector of Gotha; was called to Glessen in 1696 as professor of theology, and became preacher in the same city in 1698. He wrote some controversial works little sought after now; the most remarkable of them is entitled Der lutherischen und reformirten Religion Einigkeit.—Ezech u. Gruber, Allg. Encycl.; Fischer, Vita Gerhardi; Hoefler, Nowe. Biogr. Generale, xx, 313.

Gerhard, St., was born at Staves, diocese of Na- mur, in 890. In his youth he was under Beversage, count of Namur. Being once at a hunt, he left his companions and retired to pray in a chapel built on a high cliff near the village of St. Gerhard. Having fallen asleep there, he had a dream in which he thought that he saw the apostles, and that Peter, taking him by the hand, took him around the chapel, afterwards telling him that it was to be enlarged in honor of St. Peter and the martyr Eugene, and that the bones of the latter were to be brought there. Gerhard fulfilled this dream, and in 918 built there a church and also a
GERHARDT  819  GERIZIM

convent. Some time after he was sent by Berengar
on a mission to count Robert of Paris, after fulfilling
which he entered the abbey of St. Denis, near Paris.
The relics of St. Eugenius and of several other saints
were given him by the abbey of St. Denis, which was
said to have been a gift of the pope, in order that he
might supply France with the miracles of the pope.
The fame of the miracles wrought by the relics of St.
Eugenius was soon spread abroad, and drew crowds of
visitors, obliging Gerhard to live in a cell near the
church in order to obtain some quiet. After spending
twenty-two years in the reformation of convents, he
died a few days before the jubilee of 1120. He was
instructed by the papal legate. See Mabillon, Acta
s. ordin. s. Benedict., 248 sq.; Hes-
zeroz, Real-Encyklop. v. 38.
Gerhardt, Paul, the "prince of German hymn-
nists," was born at Grafenhausen, in the electorate
of Saxony, in 1561 or 1567. He received his first
appointment as music director at Mir at Gerhardt's,
in 1587, he was called to the church of St. Nicholas, in
Berlin. In 1688 he became archdeacon at Lübben,
in Saxony, where he died in 1676. As a theologian,
he is noted particularly in the controversies be-
tween the Lutherans and the Reformed. As a poet,
his hymns abound in the rich, deep, and spiritual feel-
ing and suggestive thought. They are the expres-
sion of his own feelings and experience, and charac-
terized generally by their subjective tone. Among
his 1205 hymns, there are no less than 16 commencing
with the word "I." 60 others are addressed to God and
the individual heart; yet their popular, element dis-
tinguishes his productions from the poets of the Refor-
mation and those of the later rationalistic period.
"His hymns happily combine simplicity with depth
and force. They are the heart-utterances of one who
had a simple but sublime faith in God, and who recog-
nised his fatherly presence in the operations of nature
and the superintendence of Providence, and the daily
bestowment of the surpassing gifts of redemption."
He never published a complete edition of his hymns,
but after 1640 they found their way into Protestant hym-
books. J. E. Helling, music director at Martin's
church, had them published in 1667, with music of his
own composition. There have been many editions
since; among the latest are those of Wackernagel
(Stuttgart, 1848; new ed. 1849), Schultz (Berlin, 1842).
Becker (Lpz., 1851), and Laisbecker, Leben und Leiden
Gerhardts (Berlin, 1864). Many of his hymns have
been translated into English; the fullest collection is
Paul Gerhardt's Spiritual Songs, translated by John
Kelly (London, 1867), a well-meant but unsuccessful effort. His noble hymn, O Haupt voll Blut und Wunden (based on Bernhard von Clairvaux's Sursum corda), has been
rendered; the best version is that of Dr. J. W. Alex-
ander (O sacred heart now wounded), given in Schaff's
Christ in Song, p. 178. His Bekehr du deiner Wege
is admirably translated by John Wesley in the hymn,
Commit thou all thy griefs (775 of Methodist Episcopal
Hymn-book), and Glee to the winds (780 of the same
collection). His O Jesu Christ mein schones Licht is also translated by John Wesley (Jesus, thy
boundless love to me, Hymn 838, Methodist Hymn-
bok). Dr. Schaff also gives versions of his Wir singen
dir, Immanuel, We sing to thee, Immanuel (Christ in
Song, p. 86); Prickel und schießt Herzflammen. All my
heart this night rejoices (Christ in Song, p. 88, C.
Winkworth's version); O Welt, sich hier deines Lebens,
O world, behold upon the tree (Christ in Song, p. 174,
C. Winkworth's version). Some of these, and also
verses from the hymns of Gerhardt's hymns, are given
by C. Winkworth, Lyra Germanica (London; reprinted
in New York). See, besides the works already cited,
Herszog, Real-Encyklopädie, v. 45; Hoefer, Neue.
Bibl. (Gign., xx, 214; Miller, Our Hymns, their Authors
and Origins (London, 1866, 1Sth ed., 1868); Weir, London Life (Lond.
tenburg, 1728); Roh, G. nach seinem Leben u. Wirken
(Leips.) 1839; Schulz, Paul G. u. der grosse Kurfurst
(Berl., 1840); Wildenbahn, Paul G., ein kirchen-gesch.
Lebenbild (Leips., 1845; 2d edit. 1850).
Gerboch or Gerchoch, a Roman Catholic priest
of Germany, was born in 1589 at Polling, in Bavaria.
Soon after completing his theological studies he took
an active part in the conflict between the pope and the
emperor. The possession by the emperor of the city of
Augsburg made him a canon and scholasticus of the
cathedral school; but he soon left this position, as the
bishop, who sided with the emperor, appeared to him
to be a schismatic. He withdrew to the Augustinian
monastery of Rottenbuch (now Rotenburg), where
he remained until 1129, where he was for some time having peace with the king. He was made a canon
between the pope and the emperor, the bishop of Augs-
burg recalled him. In 1123 he accompanied the bishop
to Rome, to reconcile him with the pope. After his
return from Rome he was again for a time Magister
und Doctor Jurium at Augsburg, but, being disgusted
with the want of ecclesiastical discipline which pre-
valled there, he left the city again for Rottenbuch.
But there also his reformatory efforts were unsuccess-
ful, although they were supported by the pope. In
1126, bishop Kuno, of Ratibon, made him his secretary;
soon after he received his priesthood, and gave him the
priestly of Châlons to establish there a house of canons;
but the opponents of a rigid discipline again thwarted
the whole plan. After the death of bishop Kuno, Gerboch found a new patron in archbishop Conrad
I of Salzburg, who, in 1128, made him provost of the monastic church of Reichenau, which he had
obtained until his death in 1129. Gerboch was a zeal-
ous defender of a rigid orthodoxy and of all the claims
of the pope, and a violent and quarrelsome opponent
of the rights claimed by the emperors in Church af-
fairs, of simony, and of the marriage of priests. He
devoted himself throughout his life to an especial attention to the reformation of the clergy, and was a steadfast adher-
ent of the theological method of his earlier fathers in
opposition to the rising scholasticism. He even went
so far as to charge the Magister Sententiatorum with her-
esy. His eagerness in combating Adoptionism and
Nationalism carried him off into the other extreme,
and he used many expressions on the person of Christ
which seem to be Eutychian. Of his writings, a com-
mentary on the 63th Psalm, in which he treats of the
corrupt condition of the Church, is best known. He
wrote, however, two other commentaries, one on the
Commentary on the Psalms, which has been pub-
lshed by Pes as the fifth volume of his Theosvora
Accedendorus, in 1728. Some of these works have not
yet been found. Those that are known are given
in Migne, Patrologia Latina, vol. cxxii, cxxvi. See
Herszog, Real-Encyklopädie, v. 49; Neander, Church His-
tory (Terrey's transl., vol. iv). (A. J. S.)
Gerizim always with the prefix מ"ר יז, Har
Gerizim", Mount of the Gerizim [from יז", Gerizim],
dwellers in a shorn (i.e. desert) land, from יז", ג"ש
, to cut off; possibly the tribe subded by David,
1 Sam. xxvii, 8; Sept. Φασίς, Josephus Flav. 10,621 et
ce) and Ebal were two mountains of Samaria, forming
the opposite sides of the valley which contained the
ancient town of Shechem, the present Nablous. From
this connection it is best to notice them together. The
valley which these mountains enclose is about 200 or
800 paces wide, by about three miles in length; and
Mount Ebal rises on the right hand and Gerizim on the
left hand of the valley (which extends west-north-
west) as a person approaches Shechem from Jerusa-
lem (see Ritter, Flav. xxxvi, 641 sq.). These two moun-
tains were the scene of a grand ceremony—perhaps
the most grand in the history of nations—duely
performed by Josue as soon as he gained possession
of the Promised Land (Deut. xxxvii; Josh. viii, 30-80).
These scenes are well described by Josue, Gera-
phus as being similarly situated on either side of She-
chem (Ant. iv, 8, 44). He also refers to the temple
GERIZIM built upon one of them by the Samaritans after the exile as the seat of their national worship (Am. xi, 7, 2, 8, 2-6), as related in the Apocrypha (2 Macc. vi, 2). See below. In order to justify their traditions in this respect, they have corrupted the reading of their text of the Pentateuch in Ex. xxvi, 24, so as to read "Gerizim" instead of "Ebal." It was from this top of this mountain that Jotham uttered the famous parable of the trees to the Shechemite insurrectionists under Abimelech, gathered in the plain below (Judg. ix, 7), a position from which he could easily be heard (see Hackett's Illustra. of Script. p. 198). The ascent of the hill is so difficult that, ere any of the followers of Abimelech could climb it, Jotham would be far away among the defiles of the neighboring mountains. See JOTHAM.

Mount Gerizim has been fully described by several travellers who have ascended it. The latest and most complete account of the objects of interest at it may be found in M. Saucy's Narratives, chap. vii, where also its history is given in detail. See also Robinson's Bibl. Researches, III, 98 sq.; Olm's Præces, II, 340 even. Dr. Robinson says, "Mount Gerizim and Ebal rise in steep, rocky precipices immediately from the valley on each side, apparently some 800 feet in height. The sides of both these mountains are as here seen (i.e. from Nablus) were, to our eyes, equally naked and sterile. The side of the northern mountain, Ebal, a fall of 950 feet, is full of the Mount of Ascension and its devoted sepulchres. The southern mountain is now called by the inhabitants Jebel et-Tur, though the name Gerizim is known at least to the Samaritans. The modern appellation of Ebal we did not learn." Dr. Olm states that the summit of Gerizim is some 100 feet higher than that of Ebal. The top of Gerizim affords a commanding view of a considerable region, chiefly occupied with mountains of inferior elevation, but also embracing several fruitful valleys, especially those of Nablus and of wady Sahil, through which lies the road to Jerusalem. A great number of villages are seen all along its north-eastern side, upon high and apparently precipitous spurs of the mountain which push out into the valley from (wady Sahil) the main ridge. Cultivation is carried quite to the top of the mountains, which are adorned with plantations of fruit-trees, while every level spot and a "mount number of small fields, supported by terraces, are sown in wheat. A considerable portion of the table-land on the summit of Gerizim itself exhibits marks of recent tillage. Mount Ebal, as viewed from Gerizim, spreads out, like the table-land, but it is more rocky, and more broken, and less susceptible of cultivation. Mount Gerizim is ascended by two well-worn tracks, one leading from the town of Nablus at its western extremity, the other from the valley on its northern side, near one of the two spots pointed out as Joseph's tomb. It is on the eastern extremity of the ridge that the holy places of the Samaritans are collected. First, there occurs the small hole in the rocky ground where the lamb is roasted on the evening of the Passover; next, the large stone structure occupying the site of the ancient temple. In one of the towers of this edifice, on the northeast angle, is the tomb of a Mussulman saint, Shiek Ghranam. Under the southern wall of this castle or temple is a line of rocky slabs, called the "ten stones," in commemoration of the ten (or twelve) stones brought by Joshua, or of the ten tribes of the northern kingdom; they have several appearance of a large rocky pile divided by twelve distinctly marked natural fissures. Beyond this platform, still further to the east, is a smooth surface of rock, sloping down to a hole on its south side; the scene, according to Samaritan tradition, which some ancient stela in lower Ebal have endeavored to vindicate, of Abraham's sacrifice (Midrash, Gen. xxiv.), of his meeting with Melchizedek (Gen. xiv.; see Theodotus in Eusebius, Prosp. Ev. ix, 22), and several other sacred events. (See Stanley's Sinaiti and Past., p. 245.) Mr. Bartlett also ascended Mount Ebal, but he says he "could discover no trace of by-gone generations, though the view, like that from Gerizim, is splendid and extensive" (Footsteps of Our Lord, p. 186). The remains of the temple on Mount Gerizim are fully described by Thomson (Land and Book, ii, 213 sq.). See SHECHEM.

2. The leading historical incidents connected with Mount Gerizim are of a highly interesting character, and some of them (as above intimated) have been the subjects of controversy.

(1) High places had a peculiar charm attached to them in those days of external observance. The law was delivered from Sinai: the blessings and curses affixed to the performance or neglect of it were directed to be pronounced upon Gerizim and Ebal. (See Michaelis, De montibus Ebal et Gerizim, Argent. 1773; Steibratz, Pindarica rei 52° contra Henicottum, Hal. 1767; Zefell, id. ib. 1768; Verhui, De lectione Samar. ad loc., France, 1767.) Six of the tribes—Simeon, Levi (but Joseph being represented by two tribes, Levi's actual place probably was as assigned below), Judah, Issachar, Joseph, and Benjamin, were to take their stand upon the former to bless; and six, namely, Reuben, Gad, Asher, Zabulon, Dan, and Naphtali, upon the latter to curse (Deut. xxvii, 12-18). Apparently, the ark halted midway between the two mountains, encompassed by the priests and Levites, thus divided by it into two bands, with Joshua for their archon. He read the blessings and curvings successively (Josh. viii, 58, 84), to be re-echoed by the Levites on either side of him, and responded to by the tribes in their double array with a loud Amen (Deut. xxvii, 14). Curiously enough, only the formula for the curses is given (ibid. v., 14-26); and it was upon Ebal, and not Gerizim, that the altar of the whole unwrought stone was to be built, and the huge plastered stones, with the words of the law (Josh. viii, 32; Josephus, Am. iv, 8, 44, limits them to the blessings and curses just pronounced) written upon them, were to be set up (Deut. xxvii, 4-6)—a significant omen for a people entering joyously upon their new inheritance, and yet the song of Moses abounds with forebodings still more ominous and plain-spoken (Deut. xxvii, 5, 6, and 15-26). See JOSUA.

(2) The next question is, Has Moses defined the localities of Ebal and Gerizim? Standing on the eastern
side of the Jordan, in the land of Moab (Deut. i, 5), he asks: "Are they not on the other side Jordan, by the way where the sun goeth down (i.e., at some distance to the W.), in the land of the Canaanites, which dwell in the campaign over against Gilgil (i.e., whose territory—not those mountains—commenced over against Gilgil); see Josh. ii. 17)." In Deut. xi, 30, besides the plains of Moreh?"... These closing words would seem to mark their site with unusual precision; for in Gen. xii, 6 "the plain (Sept. "okā"") of Moreh" is expressly connected with "the place of Sichem or Shechem" (N.T. Synec. or Syr. "Sicirem," for which last form is thought to be of Canaanite origin). See Reidel, Deut. i, 42. In the Iger, Thes. p. dcoxxv; in Josephus the form is Sicirem), and accordinglyJudg. i, 7, 9, Josh. has made it to address his celebrated parable to the men of Shechem from "the top of Mount Gerizim." The "hill of Moreh," mention ed in the covenant of God with his father Abraham in his 18th year, had been a mountain overlooking the same plain, but certainly could not have been farther south (comp. vi, 83, and vii, 1). Was it therefore prejudice, or neglect of the true import of these passages, that made Eusebius and Epiphanius, both natives of Palestine, concur in placing Ebal and Gerizim near Jerusalem in the former case? In charging the Samaritans with grave error for affirming them to be near Neapolis (Reiland, Deserrt., as above, p. dcoxxv). Of one thing we may be assured, namely, that their scriptural site must have been, in the fourth century, lost to all but the Samaritans; otherwise, it would have been a very different question. It is true that they consider the Samaritan hypothesis irreconcilable with Deut. xi, 9, which it has already shown not to be. A more formidable objection would have been that Joshua could not have marched from the Jordan down to the Mediterranean, through a hostile country, to perform the above solemnity, and retraced his steps so soon afterwards to Gilgal, as to have been found there by the Gibeonites (Josh. ix, 6; comp. viii, 30-33). Yet the distance between Ai and Shechem is not so long (under two days' journey). Neither can the interval implied in the context of the former passage have been so short as even to warrant the modern supposition that the latter passage has been misplaced. The remaining objection, namely, "the wide interval between the two mountains at Shechem" (Stanley, S. and P. p. 256, note), is still more easily disposed of, if we consider Ebal and Gerizim near Jericho, the former pronounced by the Levites, standing in the midst of the valley—thus abridging the distance by one half—and not by the six tribes on either hill, who only responded. How indeed could 60,000 men and upwards, besides women and children (comp. Num. vii. 22 with Judg. vi. 31), find room on the hill, even if the hill were somewhat smaller? Besides, in those days of assemblies "sub dio," the sense of hearing must have been necessarily more acute, just as, before the aids of writing and printing, memories were much more retentive. We may conclude, therefore, that there is no room for doubting the scriptural position of Ebal and Gerizim to have been—where they are now placed—in the territory of the tribe of Ephraim; the latter of them overlooking the city of Shechem or Sichem, as Josephus, following the scriptural narrative, asserts. Even Eusebius, in another work of his (Prop. Evangel. iv, 29), quotes some lines from Theodotus, in which the true position of Ebal and Gerizim is described with great force and accuracy; and St. Jerome, while following Eusebius in the Oecumenica, in his ordinary correspondence does not hesitate to connect Sichem or Nephelae, the well of Jacob, and Mount Gerizim (Ep. civ. v., c. 13, ed. Migne). Procopius of Gaza does nothing more than follow Eusebius, and that clumsily (Reland, Palest. ii, 18, p. 505); but his more accurate nameakes of Caesarea expressly asserts that Gerizim rises over Nephele (see Euseb. Ev. i. 10—Deut. xi, 30), besides forming part of the mountain of Shechem (see Quaevar. Excels. T. S. lib. vii, p. 1, c. 8), but a distinct mountain to the north of it, and separated from it by the valley in which Shechem stood, we are not called upon here to prove; nor again, that Ebal was entirely barren, which it can scarcely be called now; while Gerizim was the same proverb for verdure and grasing rills formerly that it is now, at least where it descends towards Nablus. See Ebal, Balaam, Mount Gerizim, Mountain of the Samaritans, believe, Gerizim was the mountain on which Abraham was directed to offer his son Isaac (Gen. xxii, 2, and sq.). It has been observed that it is not the mountain, but the district which is there called Moriah (of the same root with Moreh: see Corn. i. 28), and Lapid. (Lapid. i. 6) and Thes. of Asia, as the occurrence which took place "upone of the mountains" in its vicinity—a consideration which of itself would naturally point to the locality, already known to Abraham, as the plain or plains of Moreh, "the land of vision," "the high land," and therefore consistently "the land of adoration," or "religious worship," as it is variously explained. That all these interpretations are incomparably more applicable to the natural features of Gerizim and its neighborhood than to the hilltop (in comparison) upon which Solomon built his temple, (see 1 Kings, vii, 5), is plain. Jerusalem unquestionably stands upon high ground; but owing to the hills "round about it," cannot be seen on any side from any great distance; nor, for the same reason, could it ever have been a land of vision or extensive views. Even from Mount Olives, which must have been the promontory on which the scene of the divided waters of Jordan (Gen. xvi, 5) occurred, the view cannot be named in the same breath with that from Gerizim, which is one of the finest in Palestine, commanding, as it does, from an elevation of nearly 2500 feet (Arrow smith, Geogr. Dict. of the M. S. p. 148), "the Mediterranean Sea on the west, the snowy height of Hermon on the north, on the east the wall of the trans-Jordanic mountains, and by the deep-crest of the Jabok" (Stanley, S. and P. p. 256), and the lovely and tortuous expanse of plain (the Mokhna) stretched as a carpet beneath its feet. Neither is the appearance which it would "present to a traveller advancing up the Philistine plain" (ibid. p 252)—the direction from which Abraham came—to be overlooked. On the other hand, it is clear that the "land of Moriah" was only thus designated as containing the notable mountain of the mountain (the hill) where Abraham had himself sacrificed Isaac. Jerusalem is apparently about 3000 geographical miles, to the crow flies, which, in such a country, will give 90 of actual travel. Abraham's servants were on foot, carrying wood; Isaac was also on foot, and Abraham rode an ass. It is not, indeed, absolutely necessary, as Mr. Porter thinks (Hand-book of S. and F. i. 859), that he should have started from Beersheba when he received the command (comp. Gen. xxi, 38, and xxii, 1-3, 19). It appears from the narrative that on the third day he reached the place, offered the sacrifice, and before the stock of wood was eaten by the servants. The distance from Beersheba to Gerizim is about 70 geographical miles, to the crow flies, which, in such a country, will give 90 of actual travel. Abraham's servants were on foot, carrying wood; Isaac was also on foot, and Abraham rode an ass. It is not, indeed, absolutely necessary, as Mr. Porter thinks (Hand-book of S. and F. i. 859), that he should have started from Beersheba when he received the command (comp. Gen. xxi, 38, and xxii, 1-3, 19). But had he set out, even from so southern a spot, "on the morning of the third day, when you would not have heard the voice of the Lord, exactly where the massive height of Gerizim is visible afar off" (Stanley, p. 248), and from thence, with the mount always in view, he would proceed to the exact place which God had told him of" in all solemnity—for again, it is not necessary that he should have arrived on the actual spot during the third day. All that is said in the narrative is that, from the time that he hove in sight, he and Isaac parted from the young men, and went on together alone. Still this interpretation is not the natural and obvious one, and is not supposed to be the sense of the circumstances. The Samaritans, therefore, through whom the tradition of the site of Gerizim has been preserved,
are probably wrong when they point out still— as they have done from time immemorial— Gerizim as the hill upon which Abraham's "faith was made perfect;" a natural result of their desire to magnify their national seat of worship. It is, moreover, strange that a place once called by the "Father of the faithful" Jehovah, should have been renamed Mount Moab, and ever afterwards, in a general name so different from it in sense and origin as Gerizim. Josephus, in one more place, asserts that where Abraham offered, there the Temple was afterwards built (Ant. i, 13, 2: vii, 18, 9). St. Jerome follows (Pauli antiquit. in Gen. xxii, 5, ed. Migne.), and the Rabbinical traditions respecting Mount Moriah are strongly in the same direction (Cunneus, De Republ. Heb., ii, 12). The Christian tradition, which makes the site of Abraham's sacrifice to have been on Calvary, is merely a monkish transference from the Jewish vicinity, Memori.

(4.) Another tradition of the Samaritans is still less trustworthy, viz., that Mount Gerizim was the spot where Melchizedek, met Abraham— though there certainly was a Salem or Shalem in that neighborhood (Gen. xxxii, 18; Stanley, S. and P. p. 347, and sq.). The nearest parallel to this tradition is that of the Jordan valley and the first appearance of Jehovah in him in it, as the plain of Moreh, near Sichem (Gen. xii, 6); but the mountain overhanging that city had not in any case, as yet, been hallowed to him by any decisive occurrence. The city of Moreh, in eternal spring, would be more likely to have deviated from his road so far, which lay through the plain of the Jordan; nor again is it likely that he would have found the king of Sodom so far away from his own territory (Gen. xiv, 17, and sq.). See SHAVEN, VALLEY OF. Lastly, the altar which Jacob built was not on Gerizim, as the Samaritans contend, though probably about its base, at the head of the plain between it and Ebal, "in the parcel of a field" which that patriarch purchased from the children of Hittim, and where he spread his tent (Gen. xxxiii, 18-20). Here was likewise his well (John iv, 6), and the tomb of his son Joseph (John xxiv, 39), both of which are still shown, the former surmounted by the remains of a vaulted chamber, and with the ruins of a church hard by (Robinson, Bibl. Res. ii, 283) the latter with "a fruitful vine" trailing over its whitewashed columns, and before it two dwarf pillars hollowed out at the top to receive lamps, which are lighted every Friday or Mohammedan Sabbath. There is, however, another Mohammedan monument claiming to be the said tomb (Stanley, S. and P. p. 241 note). The tradition (Robinson, ii, 286 note) that the twelve patriarchs were buried in Salem, and that Solomon had the hill of Tameth (without Joseph, or thirteen including his two sons) is probably an erroneous inference from Acts xvi, 16 (where αὐτὸς is not to be included in the subject of μετίκον; see Hackett, ad loc.). See MELCHEZED.

(5.) We now enter upon the second phase in the history of Gerizim. According to Josephus, a marriage contracted between Manaaseh, brother of Jaudus, the then high-priest, and the daughter of Sanballat the Cuthian (comp. 2 Kings xviii, 24), having created a great stir and commotion, two of the strictest laws (who were strictly forbidden to contract alien marriages; Ezra ix, 2; Neh. xiii, 28)—Sanballat, in order to reconcile his son-in-law to this unpopular affinity, obtained leave from Alexander the Great to build a temple upon Mount Gerizim, and to inaugurate there a priesthood and altar, that should have been merged in Moses, and that, for the harmonizing of the names and date, Pridaux, Connect. i, 386, and sq., Mc'Caull's edit. "Samaria thenceforth," says Pridaux, "became the common refuge and asylum of the refractory Jews" (ibid. ; see also Joseph. Ant. xi, 5, 7), as for a while, and their temple seems to have been called by the name of a Greek deity (Ant. xii, 5, 5). Hence one of the first acts of Hecurans, when the death of Antiochus Sidetes had set his hands free, was to seize Shechem, and destroy the temple upon Gerizim, after it had stood there 200 years (Ant. xiii, 9, 1). But the destruction of their temple by no means crushed the rancor of the Samaritans. The road from Galilee to Judaea lay through Shechem, so that the spirit of Gerizim (John iv, 1) here was a constant occasion for religious controversy and for outrage. How is it that thou, being a Jew, askest of drink to me, which am a woman of Samaria?" said the female to our Lord at the well of Jacob—where both parties would always be sure to meet, men passing from Mount Carmel to the mountain, and ye say that in Jerusalem is the place where men ought to worship? . . . Subsequently we read of the depredations committed on that road upon a party of Galileans (Ant. xx, 6, 1). The liberal attitude, first of the Saviour, and then of his disciples (Acts viii, 14), was thrown away upon all those who would not abandon their creed. Gerizim thus continued to be the focus of outbreaks through successive centuries. One, under Pilate, while it led to their severe chastisement, procured the disgrace of that ill-starred magistrate who had been crucified with Christ, and the nation (with impurity (Ant. xviii, 4, 1). Another hostile gathering on the same spot caused a slaughter of 10,600 of them under Vespasian. It is remarkable that, in this instance, want of water is said to have made them easy victims; so that the delicious streams in the valley of spring are said to have been so narrowed that they must have failed before so great a multitude (War, iii, 7, 2). At length their aggressions were directed against the Christians inhabiting Neapolis—now powerful, and under a bishop— in the reign of Zeno. Terribilinus at once carried the news of this outrage to Byzantium; the Samaritans were forcibly ejected from Gerizim, which was handed over to the Christians, and adorned with a church in honor of the Virgin; to some extent fortified, and even guarded. This not proving sufficient to repel the foe, Justinian built a second wall round the church, which his historian says defied all attacks (Procop. De Aedif. v, 7). It is probably the ruins of these buildings which meet the eye of the modern traveller (Porter, Handb. of S. and P. ii, 339).

Previously to this time the Samaritans had been a numerous and important sect—sufficiently so, indeed, to be carefully distinguished from the Jews and Gallicanists in the Theodosian Code. This last outrage led to their comparative disappearance from history. Travellers of the 12th, 14th, and 17th centuries take notice of their existence, but extreme paucity (Early Travelers, by Wright, p. 81, 381, and 439), and the numbers now, as in those days, is said to be 200 (Josephson, Bibl. Res. ii, 282, 2d ed.). We are confined by our subject to Gerizim, and therefore can only touch upon the Samaritans, or their city Neapolis, so far as their history connects directly with that of the mountain. We may observe, however, that as it was undoubtedly this mountain of which our Lord said, "Woman, believe me, the hour cometh, when ye shall neither in this mountain, nor yet at Jerusalem, (i.e. exclusively), worship the Father" (John iv, 21)—so likewise it is a singular historical fact, that the Samaritans have continued to exist as a self-conscious community, with the briefest interruptions, to worship according to their ancient custom ever since to the present day. While the Jews—expelled from Jerusalem, and therefore no longer able to offer up bloody sacrifices according to the law of Moses—have been obliged to adopt and perpetuate the cult in the most wretched of destines; here the Paschal Lamb has been offered up in all ages of the Christian era by a small but united nationality (the spot is accurately marked out by Dr. K., Bibl. Res. ii, 277). Their copy of the law, probably the work of Joshua and their temple called the 2d and 3d centuries (Pridaux, Connection, i, 600; and Robinson, ii, 237-301), was, in the 17th, vindicated from oblivion by Scaliger, Usher, Morinus, and others.
and no traveller now visits Palestine without making a sight of it one of his prime objects. Gerizim is likewise still to the Samaritans what Jerusalem is to the Jews, and Mecca to the Mohammedans. Their proscriptions are directed towards it, wherever they are; its holiest spot in their estimation being the traditional site of the tabernacle, near that on which they believe Abraham to have pitched his tent. The ancient stone in the sanctuary is on the summit; and near them is still to be seen a mound of ashes, similar to the larger and more celebrated one north of Jerusalem; collected, it is said, from the sacrifices of each successive age (Dr. R., Bibl. R.; above)." Evidently Gerizim is a name derived from Gerizim. Into their more legendary traditions respecting Gerizim, and the story of their alleged worship of a dove—due to the Jews, their enemies (Reland, Diam. op. Ugolii, Thesaur. vel. p. dcox xix—xxii)—it is needless to enter. See Samaritans.

Gerizite. See Gezirite.

Gerich, Otto von, a German theologian, was born in 1801 at Berlin, and studied first law and then theology at the university there. In 1828 he became prior docent in theology; in 1834, pastor of the Elizabet-Kirche; in 1847, court preacher; in 1849, professor ordinarius of theology. He was a man of earnest piety, and labored zealously as pastor and in fostering missions at home and abroad. In this respect he has been called 'the Wesley of the Church'. The translation of Wesley's sermon on "Awake, thou that sleepest!" was his first literary work. He translated Baxter's Saint's Rest into German. His reputation was largely extended by his Commentar z. N. T. (Berlin, 1841; 8 ed. 1884, 2 vols. 8vo; new ed. 1888). The O. T. was also added, the whole under the title Die heilige Schrift nach Luther's Uebersetzung mit Einleitungen u. erläuternden Anmerkungen (1847-58, 6 vols.). He also published a new edition of select writings of Luther (Berlin, 1840-48, 24 vols.).—Rein, Zustand der Angli. Kirche (Potsdam, 1845).—Kirchliche Anekdoten (trans. from Chalmers, 1847). The last two works were the fruit of a tour in England and Scotland, undertaken by Gerich in 1842 at the command of the king, to investigate the workings of British Christianity. Gerich died at Berlin, greatly lamented, Oct. 24, 1849. —Methodist Quarterly (N. Y.), April, 1845, p. 226; Herzog, Real-Encyklop. v. 88.

Gerle, Christophe-Antoine, a French religious enthusiast, was born A.D. 1740, in Auvergne, and died about 1805. When quite a young man he entered the order of Carthusian monks, and soon afterwards was made prior of Pont-Sainte-Marie. In 1789 he was chosen deputy for the Comtat Venaissin of the clergy of Riom, and was one of the first representatives of the clergy who supported the policy of the Tiers État. In the famous Tennis-Court session of the National Assembly (Séance du Jeu de Paume) he exhibited so much earnestness and patriotic fervor that David assigned him a conspicuous place in his painting (Sermont du Jeu de Paume) (Tennis-Court Oath) representing the most imposing scene in that meeting. Having become a member of the Constitutional Assembly, Gerle proposed, Dec. 12, 1789, that all monks who wished to do so might be allowed to retire to the monasteries of their order and live according to their particular rules, provided they conformed to the general laws, and, April 12, 1790, urged in vain the issuing a proclamation declaring the Roman Catholic faith to be the only one accepted by the French nation. In June following he was chosen as one of the Commissaries of the procures of Susanne de Bouze, of Perigord, made eleven years before, in regard to an impending general revolution, and the reforms consequent thereon. In 1792 he was chosen one of the electors of Paris. There was no higher degree of philosophical and superstition in his nature, as was evinced by his support of the Phœnicia, or follower of Catharine Théob or Théob, an old woman who styled herself the mother of God, and announced the near advent of a regenerating Messias, and in whose following a number of silly, superstitious, or intriguing characters were gathered. Gerle thought that both himself and the French Revolution were clearly indicated in the prophecies of Isaiah. As these visionaries were politically friendly to Robespierre, Gerle, in his 'Note sur le Supplice de Robespierre', denounced Robespierre's enemies sought to increase the odium against him by a public exposure of their absurdities, and accordingly Vadier, the organ of the Committee of General Safety, made a report to the National Convention demanding the prosecution of Théob, Gerle, and others as guilty of plotting a fanatical conspiracy, which was adopted, and on May 16, 1794, these persons were arrested and imprisoned on the orders of the committee. In the excitement and confusion following the fall of Robespierre they seemed to have been forgotten. Théob died in prison, and Dom Gerle remained there until the advent of the Directory. He was for some time one of the editors of the Meunier du Soir, and afterwards employed in the bureau of the minister of the interior, Benezech. A memoir written by him in regard to his arrest appears in the Revue Retrospective, No. xi, 269, 309, 1800. —Hofner, Notes, Bibl. Générale, xx, 283-286; Alison, History of Europe, iii, 92 (9th ed. Edinburgh, cr. 8vo.). (J. W. M.)

German, St. See Germanus.

German, St., en Laye, a place near Paris, noted for a treaty of peace concluded between the king of France and the Huguenots, Aug. 8, 1570, in which it was provided that the Protestants should thereafter be unmolested on account of their religion. This treaty was only made to be broken, as the massacre of St. Bartholomew, only two years later (Aug. 24, 1572), terribly demonstrated. See Meoisheim, Church Hist., iii, 173; Smedley, Reformed Religion in France, i, 322.

German, St., Manuscripts (Codices Sans-Germanenses), the name of two very ancient Latin MSS. of the N. T. (usually designated as g' and g''), so called from having formerly been in the library of the Benedictine monastery of St. Germanus des Prés at Paris, partially examined by Marteneay (whose citations were repeated by Bianchini), in his works throughout by Sabatier.—Tregelles, in Horne's Introd. iv, 288; Scrivener, Introd. p. 257. See Manuscripts, Biblical.

German Baptists. See Dunkers, and Mennoitis.

German Catholics, the name of a sect in Germany which sprung up in 1844 in consequence of the Augsburg Confession. This proceeding called forth a vigorous protest from Johannes Ronge, a priest in Siliesia, who, having been suspended from his office, was living in retirement. Ronge addressed a public letter to bishop Arnoldi, of Treves, Oct. 1, 1844, in which he characterized the exhibition of the cost as abolition. Even before the publication of this letter, another priest, J. Cersak, at Schnekmelth, in the Prussian province of Posen, had formally seceded from the Roman Catholic Church, and was about to form a congregation of "Christian Apostolic Catholics". Cersak and Ronge were naturally drawn into confederacy, though their views on doctrine radically differed; the former sympathizing with evangelical Protestantism, and the latter being an ultra Rationalist. Ronge addressed an appeal to the lower orders of the priesthood, calling upon them to assist in the dissemination of the principles of the sect and everywhere to break the power of the court of Rome, and priestcraft in general throughout Germany; to set up a national German Church independent of Rome, and governed by councils and synods; to abolish all clerical confessions, the Latin mass, and the celibacy of the priests; and to establish the Confession of Faith, order, and perfect freedom for the religious education of child-

GERMAN REF. CH. IN AMERICA

dren. Czerski, on the other hand, drew up a confession of faith differing but little from that of the Roman Catholic Church, though it declared the Holy Scriptures and the Nicene Creed as the only standards of Christian faith. The next sect quickly increased. At the beginning of 1845 more than a hundred congregations were in existence, each adopting its own confession of faith, some agreeing with that of Czerski, and the majority adopting the rationalistic views of Ronge. In the confession of faith adopted by the Congregation of Montreal, the word of God and the Holy Spirit were regarded as the only source of religious knowledge. The essentials of belief were limited to the Four Monuments of the faith: belief in God as the Creator and Governor of the world, and the Father of all men; in Christ as the Saviour, in the Holy Spirit, the holy Christian Church, the forgiveness of sins, and eternal life. Baptism and the Lord’s Supper were held to be the only sacraments. Confirmation was retained, but most of the rites and practices peculiar to the Roman Catholic Church were given up. The first council of German Catholics was held at Leipzig, March 22, 1845, and attended by deputies from many of the leading congregations. The many views again in favor of other religious opinions expressed in the rationalistic Brezlaus confessions. The interpretation of Scripture, the only source of Christian belief, was left to the free exercise of reason, and actuated by the “Christian idea.” Forms of worship were adapted to the requirements of time and place. With regard to church government, the council declared in favor of the presbyterian and synodal constitution. The congregations were to have the free election of their clergy and eldership. The increase of the sect continued to be so rapid that by the end of 1845 it numbered nearly 500 congregations, many prominent Roman Catholics joined it, and even a number of Protestant rationalistic clergymen went over to it. Distinguished historians like Gervinus looked upon the movement as a momentous event in the history of Germany. It even exercised a considerable influence upon the Protestant Church of Germany, by causing the organization of the Free Congregations (q. v.), a similar rationalistic sect, chiefly consisting of seceders from the Protestant state churches. Several state governments, as those of Saxony, Prussia, Baden, Bavaria, and Austria, took very serious and active steps to suppress them, or at least to try to put as great obstacles as possible in their way. The internal disagreements between the orthodox and the rationalistic sections also discouraged the spread of the movement, which, at first successful, failed in 1847, after the revolution of 1848 had come to an end. The revolution of 1848 gave the German Catholics full liberty, and, consequently, some additions were made to the number of their congregations, especially in Austria. But the further advance which the majority of the German Catholics now made in their opposition to evangelical Christianity, and the profession of some of their prominent men, that on their part the religious movement had been merely a cloak for covering their revolutionary tendencies in politics, estranged many of their friends. After the political reaction set in, in 1848, strong influence against them was exerted by almost all of the state governments, and in Austria they were again wholly suppressed. In 1850 delegates of the German Catholic congregations attended the council of the Free Congregations, and a union of the two organizations was agreed upon. This union was consolidated at the council held in Gotha in 1857, when the united body assumed the name of “Rund frieheri- ler Gemeinden.” For their further history, see Free Congregations. (A. J. S.)

German Methodists. See United Brethren.

German Reformed Church in America. The German Reformed Church is the historical continuation in America of the Reformed branch of the Protestant Reformation of Germany. The great movement of the 16th century in the bosom of the Roman Catholic Church was at first known as simply the Reformation, or Reformed Church, the term Reformed being used in a general sense as designating the whole group of protestants as distinct from the errors and corruptions of Rome. Two distinct tendencies, embracing theology and practical life, were, however, at work from the beginning. The one received its type and character primarily from the genius, faith, and spirit of Martin Luther, and prevailed chiefly among religious persons. The other was not so definitely related to the peculiar spirit of one man. Its character was brought out rather by a succession of ministers and theologians in Switzerland, France, the Netherlands, and the German provinces bordering on the Rhine, among whom also the Helvetic Catechism, from the University of Heidelberg, in which Ursinus and Olevianus, the authors of the work, were professors of theology. Palatinate was the name formerly borne by two provinces of Germany, distinguishing Upper and Lower, and having along the Rhine, on the north (Oberpfalz) bordered on Bohemia and Bavaria; the other (Unterpfalz) was situated on both sides of the Rhine, touching on different sides Mayence, Wurttemberg, Baden, Alsace, and Lorraine. The Palatinate did not yield to the power of the Reformation movement until 1546, when it embraced the Lutheran faith. It was moulded, however, rather by the gentle spirit of Melachthon than by the stern spirit of Luther. Under Frederick III, summoned the Plow, who acceded to power in 1550, those German provinces passed over from the Palatinate to the Empire of Germany. The theological controversies which preceded and accompanied this transition gave rise to the formation of a catechism, the design of which was to reconcile opposing Lutheran and Reformed elements on a new basis. The principle and the scope of this new confession is what the Reformed, not the Luther, people called the Palatines’ Creed as its animating and form-giving principle, it rises above extreme antagonisms, and aims at resolving into one consistent whole the divergent tendencies of faith characterizing the two original branches of the preevolutionary church. The Synod of the Palatinate, convened for the purpose Jan. 19, 1563, was followed by the preparation of an order of worship answerable to it, and by a complete religious and educational organization of the two provinces; the great design of Frederick III being to establish and perpetuate the Reformed faith in this German electorate. Thus arose the Reformed Church of Germany, or the German Reformed Church, in distinction from the Reformed Church of Switzerland, of France, Holland, Scotland, and other states and countries. Religious persecution at home, civil opposition, and the offer of land in Pennsylvania by William Penn, led to the emigration of a large number of Palatines to America in the beginning of the last century. From year to year their numbers increased. To these were added hundreds and thousands coming from different parts of Germany, including the Reformed faith. They settled in New York, along the Hudson, in New Jersey, Maryland, Virginia, and even extended into the Carolinas; but the greater number located in Pennsylvania, east of the Susquehanna. The first minister was the Rev. George Michael Willig; he settled on his way from his native city of Amsterdam, emigrated from the Palatinate in company with about 400 Palatines in the year 1727. They settled along the Skippack, Montgomery County, Pa.
Here a congregation was organized, and a wooden church immediately built. This, so far as known, was the first German Reformed Church in America.

Until the year 1747 the religious condition of these people was very sad. They had no ministers; no Church organization; no school-teachers; no books, except a few Bibles, a Catechism, and Hymn-books, which they brought with them from the fatherland; and no pecuniary resources, for the majority were extremely poor. Besides, they were separated by national customs and by language from the large English population of the country. So helpless and destitute were they to enjoy any graces of grace, that they were exposed to the danger of being misled into all sorts of errors by irresponsible teachers. But they were distinguished for morality, industry, and thrift. In the course of time they began to accumulate property, and acquire a reputation for honesty and integrity. With this came respect, influence, and general prosperity.

Yet this chaotic state of the Reformed Church grew worse rather than better. Emigration continued. This, added to the natural increase of population, extended the religious and institutional, and multiplied their moral and spiritual dangers; for from the first settlement of Palatines in America, throughout this entire period, there were at no time more than three or four ordained ministers of the Reformed Confession among them.

The arrival in 1746 of the Rev. Michael Schletter, a Reformed minister from St. Gall, Switzerland, who was commissioned and supported by the synods of North and South Holland, introduces the formative period in the history of the Church. A man of great energy, strong faith, burning zeal, and indomitable perseverance, he visited all the German settlements in Virginia, Maryland, New Jersey, Pennsylvania, and some in New York; gathered the people; preached the Gospel; administered the sacraments; organized churches; located pastors; established schools; and on Sept. 29, 1747, in the city of Philadelphia, succeeded in effecting the organization of the first synod, or the Coetus, as it was called, of the German Reformed Church. Subsequently it was visited Europe for the purpose of representing the extreme destitution of the Germans in America. He traveled through Holland, Sweden, and England, and everywhere he awakened profound interest. He succeeded in creating a large fund, the yearly interest of which was devoted to the support of ministers and school-teachers in America, and to the purchase of Bibles for gratuitous distribution among the people. He also induced a number of ministers and other worthy persons to emigrate to the New World, of whom five came with him on his return to America.

The first Coetus consisted of thirty-one members—five ministers and twenty-six elders—and represented forty-six churches and a population then estimated at thirty thousand. Organized by direction of the Synod of Holland, the Coetus stood under the jurisdiction of that body. Its proceedings were sent annually for review and confirmation to the Classis of Amsterdam, that Classis having been charged by the Synod of Holland with the superintendence of the affairs of the German Church in America. No minutes were then or ever to be obtained to the office of the ministry without its consent.

This subordinate relation to the Church of Holland continued until 1759, a period of forty-six years. Emigration increased. From time to time, ministers and school-teachers from the Palatinate and other Reformerspeared provinces of Europe arrived. But the increase of ministers was not in proportion to the increase of the population. Though the Church grew, yet the spiritual desultitudes multiplied, so that at the end of this period there were at least one hundred and fifty churches, but no more than about twenty-two ordained ministers.

In 1758 the Coetus resolved no longer to transmit its acts and proceedings for revision to the Classis of Amsterdam, and assumed the right to govern itself, and to have the care of the churches in America, independently of foreign oversight and control. A constitution was adopted, entitled "Symbool-Ordinaat des Hoch-deutsch-Deutsch-rumerschen, . . ." and "Bund der gemeenen Gemeinden in den Vereinigten Staaten von Nord-America." By this act the Coetus became the Synod, and the Reformed Kirche, or Reformed Church, became the Hoch-deutsche Reformierte Kirche, or High-German Reformed Church, in order to distinguish it from the Dutch, the German, or Low-Dutch Church.

This event introduces a period of thirty-two years, extending to the establishment of a theological seminary in 1752, a period which is not easy to characterize. In one respect there was progress. The people increased in numbers and wealth. They had also large accessions to the population by immigration. Congregations multiplied. Many Germans migrated westward, and churches were organized in Ohio. There was also proportionally a larger accession to the ranks of the clerics, the number of ordained ministers rising from sixty-two to eighty-two. But in another respect there was retrogression. So long as the Church stood directly under the supervision of Holland, the great majority of ministers were men who had been thoroughly educated in the gymnasiums and universities of Europe. But now the number of these men of thorough education, who came from Europe, the larger number came from the membership of the American Church. As the Synod had no theological seminary, no college, and no academy, candidates for the office could acquire only a superficial or partial knowledge of Latin and Greek, of science and theology. They pursued their studies under the tuition of pastors who had charge of from two to eight churches. As a natural consequence, the standard of ministerial qualifications had to be lowered; and with the loss of broad culture, departed also, in great measure, the sense of its value. Some of the leading ministers saw the evil, that the Church was exposed from this tendency, and endeavored to resist it manfully, but without avail.

With the depression of the ministry came ecclesiastical disorders, the fruit of tendencies at work from the beginning. In the attacks on the decisions of the synod; some ministers, also, were disorderly. They were disposed to ordain men to the holy office on their own judgment and authority as individuals. The Church, moreover, felt the enervating influence of German rationalism and megalomania, and of the demoralization of the second decade of the present century, worse than anything though struggling earnestly against these downward forces, could offer but a feeble resistance; for, taking the faith of the Reformation as the standard of judgment, they themselves occupied a false theological attitude. The rationalistic habit of thought of the 18th century, taking hold of them, gave an underrate to their preaching and ecclesiastical life, which, though they cherished firm faith in the truth of supernatural revelation, nevertheless nourished comparative indifference to the original faith of the Reformed Church as embodied in the Palatinate Catechism, and even exerted an influence in direct opposition to it.

Though separated by the ocean, the Church in America was always in close sympathy with the Church of Germany. The profound reaction against Rationalism, which began to reveal its presence there during the middle of the 18th century, was almost simultaneous with a revival of a better faith in the bosom of the American Church. The first decided indications appear in the records of 1815, and from that time onward with gradually increasing clearness. In that year we meet the first recognition of the Heidelberg Catechism. In all the records preceding this time, we find no reference to any confession of faith.
In 1820, the synod enjoin's on all ministers to use no other book but the Heidelberg Catechism in the instruction of youth preparatory to confirmation. The want of literary and theological institutions seems to be felt only in feeble forms, and persevering efforts are made to establish a theological seminary. In 1819 the constitution is revised and amended. The territory is subdivided into classes; a class corresponding to a presbytery in the Presbyterian Church. As the synod, instead of being a general congregation of ministers and elders of each parish, as it had been since 1747, becomes a delegated body composed of ministers and elders chosen by the classes.

The revival of faith and activity resulted finally, after a struggle against much opposition extending through seven years, in the creation of a theological seminary by the Synod of Bedford, Pa., in 1824. The Rev. Lewis Mayer, D.D., was chosen professor of theology. The seminary opened at Carlisle, Pa., the following spring. Removed to York in 1829, the institution continued to meet and to prosper, and it is still at the same place where it still remains. With the seminary was removed also to Mercersburg the high-school opened in York in 1830. This school, under a charter granted by the Legislature of the state, became Marshall College in 1836. The opening of the theological seminary constitutes the most important epoch in the history of the Church in America. Followed soon after by the creation of a classical institution of a high order, it was the means of quickening the historical faith and dormant energies of the Church. Though several decades of years were necessary in order to understand and mould the power of these institutions in the sphere of philosophy, theology, and practical life, yet a new impulse was at once given to thought and life. The standard of qualification for the ministry was elevated. A much larger number of candidates were engaged in preparing for or receiving the call of God to preach the Gospel. The ministry increased rapidly. Religious periodicals were established: first, one in English, 1828; and several years later, one in German, 1836. A board of domestic missions and a board of beneficiary education were created. The board of the college was organized, and its labors manifested itself for the extension of the Church. About this time, also, some men were admitted to the ministry who could preach acceptably in English, and were thus prepared to meet the wants of the younger membership in the cities and larger towns; wants arising from the growing prevalence of that language among the German people; for, until 1820, with perhaps but two or three exceptions, all the pastors conducted public worship exclusively in the mother tongue; in consequence of which, scores of families, who preferred the English language, had, during the previous fifteen or twenty years, in particular localities, passed over to other denominations. The translation, though generally gradual, caused no little dissen- sion and confusion in nearly every congregation where the change was felt to be necessary, owing to the firmness with which the older people clung to German worship. At present this difficulty has been surmounted throughout nearly all portions of the Church west of the Susquehanna and south of the Potomac, where the English language is now generally used either exclusively or in conjunction with the German; but east of the Susquehanna, and the Pennsylvania line, the use of the German language has been perpetuated among not less than fifty thousand of her people, and where the great majority of ministers conduct public worship in the mother tongue, the problem still awaits solution.

Theology and general literature and the use of the German language in the Church and the introduction of the English language both meet a great want and proved to be a great good, yet the Church was thereby exposed to new and serious dangers. This spiritual awakening united positive and negative elements. It was the assertion and development of the old faith, and, at the same time, a reaction against what was defective and wrong in her American history. This reaction, modified by contact with the Presbyterian, Methodist, and other sects, and from a sense of confounding what was true and good in the past with what was false and evil, and was disposed, with the abuse of catechisation, confirmation, the observance of the great festivals of the Church year and other customs, to set aside these customs themselves, and thus ignore the historic and traditional character from each particular Church. The false tendency prevailed most generally among the congregations that had introduced the use of the English language. The German sections of the Church enjoyed a large measure of protection. As the prevalence of the German language deprived them of the advantage of fellowship with the English denominations, so it shielded them also measurably against the transforming influence of a foreign spirit.

But even where this spirit, foreign to the genius of the Church, had acquired the most commanding influence, the Church is not yet extinct. The conditions of a strong counter reaction were always present. It was only necessary that some one assert clearly and forcibly the latent faith of the Church. This was done with great power by the Rev. John W. Nevin, D.D., several years after he had become the professor of didactic theology in the seminary at Mercersburg.

For nearly twenty years the tendency to surrender her distinctive faith and customs had been gaining strength in the German Reformed Church, slowly indeed, but steadily, and the process of assimilation to a foreign form of Christian life was silently going forward. A powerful countering element, however, was developed as early as 1866 in the profound Anglo-German philosophy taught by the Rev. Frederick Augustus Rauch, D.P., the first president of Marshall College, and the foreign influences of a scientific, organic and objective thinking which has ever since characterized the leading educational institutions of the Church. There was accordingly at hand both a general and special preparation for the great Church movement of the last twenty-five years, of which Dr. Nevin has been the principal organizer and the slumbering spirit of the Heidelberg Catechism, which, living in the hearts of ministers and people, perpetuated a sense of dissatisfaction with a foreign religious habit, and constituted a general qualification to support, as by intuition, the protest against error, and the affirmation of the distinctive elements of a great leader; and special, in the genetic method of thought which, in full sympathy with the spirit of the Catechism, had, through the teaching of Dr. Rauch, given character to the college, and moulded the philosophical thinking of the first ministers of the Church, who received a full literary and theological training in her own institutions.

This profound and comprehensive movement constitutes the leading characteristic of the Church in the last period of her American history. The bold criticisms of Protestantism, and the uncritical assertion of the Catholic truth contained in the Protestant confessions of the 16th century by Dr. Nevin, and the publication of the Principle of Protestantism by the Rev. Philip Schaff, D.D., in German and English, called forth earnest and sometimes very violent rejoinders from the adherents of the pure and orthodox view; provoked a series of controversies concerning the new measure system, the Lord's Supper, tradition and the rule of faith, the nature of the Church, the present attitude of Protestantism and its relation to Roman Catholicism in the present life and organization of the Church, the necessity of the Church, and, in the course of time, holy baptism and liturgical worship, with many other cogent fundamental doctrines; controversies which have been prosecuted vigorously, with short intervals of repose, down
to the present time, and have not only involved some of the principal denominations in this country, but of late have also extended to Germany.

The main positions, both negative and positive, affirmed by Dr. Nevis and his coadjuvants, have from time to time been sustained by the Eastern Synod and by the General Synod, though not in a formal or public action, but generally in an indirect way, since the main questions have only occasionally been at issue before the judicatories in a formal manner. Indeed, instead of being merely the innovation of a party, the great movement has been only a life movement of the German Reformed Church herself, the men prominent in the controversies being rather the exponents and organs than leaders. Yet a portion of the Church has all along been opposing the prevailing theological views. The opposition has generally been conducted with moderation and sobriety; but sometimes it has been violent and disorderly, and has even included an inclination towards schism. Another effect of the controversies and of the theological attitude of the Church has been to provoke a large measure of opposition from some of the principal Protestant denominations, which shows that the German Reformed Church is no longer true to her origin and history as a branch of the Protestant Church.

Soon after the controversies began the Mercersburg Resolution was issued in order to seek a medium for the development, defense, and progress of what came to be known among opponents as Mercersburg Philosophy and Theology. It was issued regularly from 1849 until 1863 inclusive. Suspended during the progress of the Civil War, it was resumed in January, 1867.

In 1829 the ministers and churches in Ohio organized themselves by the authority of synod into a classis, called the Classis of Ohio; but it stood in organic relation to synod only during the short period of four years. In 1824 it became an independent body, and assumed the title of the Synod of Ohio, having 11 ministers, 80 congregations, and 4,000 members. In 1887 the Synod of Ohio became the Synod of Ohio and Adjoining States. In 1842 this synod subdivided its territory into six classes. Thus came to exist two mutually independent synods, having the same organization, holding the same faith, governed by the same constitution, having the same usages and customs, and each possessing supreme and final authority within its own bounds. The two bodies exchanged delegates annually, the delegate being admitted as a full member of the other, which was the most generous and liberal arrangement in theology. A sense of dissatisfaction with this incomplete and anomalous organization began to prevail, and a strong desire became general, both East and West, to effect a more perfect organization by creating a higher body that should have jurisdiction over the whole Church. The constitution was accordingly so changed by a vote of two thirds of all the classes of each synod as to make room for the organization of a triennial General Synod. This body, composed of delegates, ministers and elders, chosen by all the classes, represents the whole Church. It is the highest judicatory, and "the last resort in all cases respecting the government of the Church not finally adjudicated by the synod." The General Synod held its first session in Pittsburgh in November, 1863.

During the same year the Church celebrated the three hundredth anniversary of the formation and adoption of the Heidelberg Catechism. This celebration was originally suggested by the Rev. Dr. Harbaugh, and the preparatory arrangements made by a committee of which he was chairman. Ministers, elders, and members from all parts of the Church met in Conventions, in the German Reformed church, Race Street, Philadelphia, Jan. 17, 1863, and continued in session six days. Twenty essays and discourses on the origin, history, doctrines, confessionall relations, and the fortunes of the Heidelberg Catechism, prepared by distinguished theologians of Europe and America, were read and discussed. The Jubilee was formally closed by a similar convention held at Reading May 31, 1864. Though occurring during the darkest times of the war of the Rebellion, yet the celebration was in all respects a success. Profound and general interest was awakened in the origin, history, faith, and relations of the German Reformed Church among ministers and the laity. The Church came to a better apprehension of her historical character as an original branch of the Protestant Reformation, and acquired a clearer consciousness of her present relative position and vocation, and of her future mission. A new impulse was at the same time given to all her practical operations.

As the fruit of this celebration, a volume containing approximately one hundred and four thousand words possessing permanent historical value were published: the Triplici Catechism and the Tercentenary Monument. The first is a critical edition of the Catechism in the original German, in Latin, modern German, and in English, printed in parallel columns, and accompanied with an introductory essay. The second is a new translation of the Monument consists of the discourses and essays delivered at the Convention held in Philadelphia, and was published in English and German.

This tercentenary jubilee constitutes a most important epoch in the history of the Church, and may be regarded as the relative conclusion of the ethical forces at work for the present twenty or thirty years.

The second General Synod, held at Dayton, 1856, authorized the organization of two additional synods: the one, consisting of the classes of St. Joseph, Indiana, Sheboygan, Heidelberg, and Erie, to be called the North-western Synod; and the other, consisting of the classes of Clarion, St. Paul's, West New York, and Westmoreland. The first was organized at Fort Wayne, Ind., May 28, 1867. The organization of the other has been delayed, probably to be accomplished during the coming year (1870).

For the last ten years measures have been in progress to restore the original title Reformed Church by dropping the American prefix German. The change has finally been secured by a vote of two thirds of the classes, and awaits the formal decision of the General Synod.

The Heidelberg Catechism is the symbol of faith, and the only standard of doctrine. The book may be said to embody two theological tendencies; the one being that of Melanchthon himself, the other that of Zwingli, which antedates and precedes him. The Zwinglian tendency dominates the Heidelberg Catechism, and if the book is to be interpreted correctly, perhaps, by saying that the one tendency, proceeding from faith in the divine-human Saviour, a concrete fact, as the fundamental principle, is christological, sacramental, churchly, and conservative; while the other, presupposing the sovereign will of God as the determining principle of Christianity, is in sympathy with intellectualistic, unsacramental, and unchurchly views, and renders the book susceptible of a construction which is apparently in full harmony with all the logical deductions which flow from the supralapsarian theory.

The German Reformed Church was never opened to the supralapsarian element as a ruling principle. We mean the German, in distinction from the English, French, Dutch, Scotch, and other branches of the Reformed Church. In the German branch the
Melanthonian element has been predominant rather than the Calvinistic, though many of her theologians and ministers, and even Ursinus, one of the authors, interpret the Catechism in accordance with the Calvinist view.

The leading characteristic of the Catechism is the peculiar position which the Apostles' Creed occupies. The Creed is principal. It is not an element co-ordinate with the Decalogue and the Lord's Prayer, but the Decalogue and Lord's Prayer hold a place respectively independent and subordinate to the idea of the Creed. The Creed underlies and pervades the Catechism like a plastic power, and determines, prevails, generally, the nature and substance of what is received as the true faith.

It determines the ruling theory of Christianity as being a new creation rather than a system of revealed doctrines; as being an objective and concrete order of life rather than subjective experience and abstract theory. It determines the relation in which the believer is to his new creation as being immediate, and, as it were, the natural eye, so do supernatural objects stand before the eye of the spirit as a reality —a reality which is the possession of the believer.

The Creed also determines the order in which the facts of supernatural revelation are developed. As the natural order, the physical, it presents, in the first part, holiness and misery of man, and, on the other, involves and implies holy living as a necessary consequence of the new life, whilst it embraces only those facts which belong to the positive side of revelation, the Catechism, answering to this order, places the creation and fall of man, sin, and depravity, in the first part; conversion, good works, and prayer, as the necessary fruit of the new life, in the third part, under the general head of thanksgiving, taking the Decalogue as the law of good works, and the Lord's Prayer as the model of devotion; whilst the second part gives the positive objective substance of redemption, and consists in setting forth the facts of revelation in the order in which the Creed affirms them; and, in immediate connection therewith, expounds the sacraments and the office of the keys; the sacraments as the means of grace, by which, through faith, the partakers in the one sacrifice of Christ on the cross, and are fed and nourished unto everlasting life; and the office of the keys as embracing the preaching of the Gospel and Christian discipline, by which two things the kingdom of heaven is opened to believers and shut against unbelievers. Huldrych Zwinglius, the Heidelberg, Catechism, projects its peculiar structure, and breathe its animating spirit into the form of instruction. Not that the Catechism realizes the idea of the Creed perfectly at all points; but it acknowledges the original authority of the Creed, and realizes its fundamental characteristics. The Creed thus also holds the Catechism in organic connection with the undoubted faith of the one whole Catholic Church in all the ages of her history up to the apostolic period.

Though the peculiar organizing force of the Creed may not, at all times since the Reformation, or even at the time of its first publication, have been clearly or consciously apprehended, yet this principal element has always been felt, and has always had a correspondent moulding influence whenever and wherever the Catechism has been received, and has, without all prejudice and obstruction, been allowed freely to exert its educational power. Whatever is distinctive in the original character, or subsequent history, or the present attitude, as regards doctrine and worship, of the German as compared with other Reformed branches of the Protestant Church, is owing primarily and mainly to this fundamental and distinguishing element of her confession.

It is the peculiar genius of the Heidelberg Catechism which has given impulse to the profound and comprehensive theological movement by which the Church is now apprehended, and has sustained it with increasing power; a movement that is progressively eliminating two of the most obvious deviations of doctrinal view: the low logically from the Calvinistic theory of the divine sovereignty, and those which proceed from the Arminian conception of human freedom. Neither the sovereign will of God on the one hand, nor the free will of man on the other, is the principle of salvation; neither the God of the covenant, nor the God of the man. According to the general idea of the Catechism, this principle is founded in a concrete fact, the person of the Redeemer, who, being true God and true man, unites in himself mysteriously the freedom of the human with the sovereignty of the divine will. Being by true faith a member of Christ through the power of the Holy Ghost, a Christian determines himself freely, and is at the same time determined by God, when he lives according to the will of God, actualized in the person and work of Christ.

The most important result, theologically, of the tercentenary celebration, 1868, was the advancing and maturing of a consciousness of this principal element of the Catechism, namely, the organic relation which the Creed bears to its structure and doctrines. For the first time in her American history did the Church undertake a full and formal examination of the Creed, and its place in the church's life, from the theological and the historical point of view, in the tercentenary jubilee. The report of this tercentenary convention held in Reading, May, 1864, appointed a committee to submit to the (Eastern) synod for adoption certain topics having reference to the theological and religious bearings of the tercentenary jubilee. The report of this committee was presented to the Synod of Lancaster in October of the same year. It sums up the theological and religious results in the following theses:

1. "Our tercentenary jubilee has served a wholesome purpose for renewing our ecclesiastical consciousness of the organic relation of the Creed to its structure and doctrines. For the first time in her American history did the Church undertake a full and formal examination of the Creed, and its place in the church's life, from the theological and the historical point of view, in the tercentenary jubilee. The report of this tercentenary convention held in Reading, May, 1864, appointed a committee to submit to the (Eastern) synod for adoption certain topics having reference to the theological and religious bearings of the tercentenary jubilee. The report of this committee was presented to the Synod of Lancaster in October of the same year. It sums up the theological and religious results in the following theses:

2. It is an argument of sound and right historical feeling in this case, that the facts of our Christian life are referred, not simply to the epoch and crisis of the Reformation, but through that also to the original form of Christianity as it existed in the first ages.

3. The true genius and spirit of our Church in this respect is shown by the place which is assigned to the Apostles' Creed in the Heidelberg. The fact that it is plainly assumed that the Creed, in its proper historical sense, is to be considered of fundamental authority for the Reformed faith.

4. It is a matter of congratulation that our growing sympathy with the Apostles' Creed is attended with a growing power of appreciation among us also for that christological way of looking at the doctrines of Christianity which has come to characterize all the evangelical theology of Germany in our time, and by which only, it would seem, the objective and subjective (in other words, the churchly and experimental) sides of the Gospel can be brought into true harmony with each other."

These theses were adopted without dissent. They show with what unanimity the mother synod stands, in doctrinal apprehension, upon an historical and doxological basis, as against both archaic and rationalistic tendencies of Protestantism, and against the errors and corruptions of the Roman and Greek churches.

Taking as a general principle the idea enunciated in these theses, that the Church refers her life not only to the epoch of the Reformation, but also to the or the original form of Christianity as it existed in the first ages, and that the Apostles' Creed is to be considered of fundamental authority for the Reformed faith,
we proceed to state in few words some of the principal doctrinal views which the Palatinate Catechism, thus interpreted, teaches and involves:

1. Adam, created in the image of God, was endowed with capacity to resist temptation and abide in his original state of life-communion with God; but he transgressed the command of God by a free act of his own, and the seal of his perdition will through the instigation of the devil, the head of the kingdom of darkness.

2. The fall of Adam was not that of an individual only, but the fall of the human race.

3. All men are born with the fallen nature of Adam, and with the power of evil, and with all the results of darkness, inclined to all evil, and apt to no good; and are subject to the wrath of God, who is terribly displeased with their inborn as well as actual sins, and will punish them in just judgment in time and in eternity.

4. The eternal Son of God, incarnate by the Holy Ghost of the Virgin Mary, true God and true man in one person, is the principle and substance of the new creation.

5. In the mystery of the Word made flesh, the human nature of the Son of God assumed into organic and eternal union with himself is the most perfect form of supernatural revelation, and the only medium of divine grace.

6. All the acts of Christ are not those of God or of man separately taken, but the acts of the God-man.

7. His suffering, death, and resurrection, his miracles and his word; his agony, passion, and death; his descent into Hades; his resurrection from the dead, ascension to heaven, and session at the right hand of God; the coming of the Holy Ghost, and his second advent, all derive their significance and saving virtue from the sacrificial constitution of his person of redemption and bliss in the glorious resurrection of the last day.

8. The atonement for the sin of man is the reconciliation of God and fallen humanity in the person and work of Jesus Christ. It is not simply the offering of himself on the cross, but the whole process of resuming human nature into life-communion with God, and includes both perfect satisfaction to the law by suffering the penalty and all the consequences of sin, and complete victory over the devil. The full benefit of the atonement inures to the believer, because by faith he is a member of Christ and a partaker of his anointing, and this was before God in the life and righteousness of Christ.

9. The Church constituted by the coming of the Holy Ghost is the mystical body of Christ, a new, real, and objective order of existence, and is both supernatural, divine, and human, heavenly and earthly, the fulness of him that filleth all in all; in whom communion alone there is redemption from sin and all its consequences, fellowship with God in Christ, and the hope of complete victory over death and hell, and of eternal glory. The relation which the new, regenerated humanity, his mystical body, bears to Christ the head, the second Adam, is analogous to the organic relation which the old, fallen, accursed humanity bears to the first Adam.

10. The sacraments are visible, holy signs and seals, wherein God, by an objective transaction, confirms to sinners the promise of the Gospel. They are the means whereby men, through the power of the Holy Ghost, are made partakers of the substance of divine grace, that is, of Christ and all his benefits.

11. Holy baptism is a divine transaction, wherein the subject is washed with the blood and spirit of Christ from all the pollution of his sins, as certainly as he is washed outwardly with water; that is, he is renewed by the Holy Ghost, and sanctified to be a member of Christ, so that he may more and more die unto sin, and lead a holy and unblamable life.

12. Justification does not attend the resurrection of the dead and eternal life in virtue simply of holy baptism, but only on the condition that, improving the grace of baptism, they believe from the heart on Christ, die unto sin daily, and lead a holy life, and thus realize the full virtue of the incarnation and atonement.

13. The sacrament of the holy supper is the abiding memorial of the sacrifice of our blessed Saviour Jesus Christ, the fruit of his crucifixion, and the seal of his perpetual presence in the Church by the Holy Ghost; the mystical exhibition of his one offering of himself made once, but of force always to put away sin; the pledge of his unlying love to his people, and the bond of his living union and fellowship with them to the end of time. This holy sacrament, in which the communicants do not only commemorate his precious death as the one all-sufficient vicarious sacrifice for their sins, but Christ himself also, with his crucified body and shed blood, feeds and nourishes their souls to everlasting life; that is, by this visible sign and pledge he assures them that they are really partakers of his true body and blood, through the working of the Holy Ghost, as they receive by the mouth of the body these holy tokens in remembrance of him.

14. The bread and wine of the holy supper and not transmuted into the very body and very blood of Christ, but continue to be natural bread and wine; nor is the body and blood of Christ consubstantial, that is, in, with, and under the natural bread and wine; but the sacramental transaction is a holy mystery, in which the whole life-giving and saving virtue of Christ, his mediatorial death and resurrection, is communicated by the supernatural power of the Holy Ghost, and communicated to those who, by true faith, eat and drink worthily, discerning the Lord's body.

15. At death the righteous pass into a state of joy and felicity, and abide in rest and peace until they reach for ever the consummated communion of bliss in the glorious resurrection of the last day.

16. The second advent of Christ to judge the world in righteousness will complete the objective order of redemption, and also the subjective process of life and salvation in his body, the Church; when the last enemy, which is death, shall be destroyed; when the saints shall come forth from the dead in the full image of their risen Lord, and with him pass into heaven, the state of perfect blessedness; and the wicked shall rise to the resurrection of eternal damnation.

We can give a summary of doctrinal truths not directly included in the foregoing formal statements.

The German Reformed Church desires that the will of God or the will of man is the principle of theology; that Christianity is merely a system of doctrine or a rule of moral conduct; that the covenant is only a compounding of God with man; that God in the Father and the Son; that there is a twofold eternal decree, electing some unto salvation and others unto damnation; that the election of God unto eternal life in Christ becomes effectual outside of the economy of grace; that the humanity of Christ, or the incarnation, is an expedient in order to make an atonement for sin; that the Church is an association of converted individuals; that the Bible is the foundation of the Church; that the relation of the contents of the Bible to the individual is immediate; that the authority of the Church is subordinate to the private judgment of the individual Christian; that the unconverted and ungodly may observe the holy communion; that justification consists in a forensic act of God imputing the righteousness of Christ to extra, or that it is realized by an act of faith in the imputed righteousness of Christ; that the faithful use of the ordinary means of grace is inadequate to the wants of the Church and the world; that the Church of Rome is a total apostasy; and that Protestantism has its ground immediately in the sacred Scriptures.

On the nature of persons, the Church affirms that the person of Christ is the true principle of sound theology; that Christianity is a new life; that the humanity of Christ
is an essential constituent of Christianity; that the Christian Church is an organic continuation in time and space of the life-powers of the new creation in Christ Jesus; that the covenant is an order or institution of the Church, in which the presence of God is real; that the liturgy was written by members of the Church under plenary inspiration of the Holy Ghost; that private judgment is subordinate to the general judgment of the Church as expressed particularly in the ecumenical creeds; that the word of God is the only norm of faith and practice; and that the Church, which is the individual comes to a right apprehension of the contents of the Bible through the teaching of the Church; that the election of grace unto life is effective in and by the established economy of grace; that justification is by an act of faith in the person and work of Christ, and consists both in the imputation and impartation of Christ and his righteousness; that holy baptism is the sacrament of regeneration, regeneration being the transition from the state of nature to the state of grace, as natural birth is the transition to the new birth; that exhortation, assurance, held by the conversion and sanctification, completes itself in the resurrection from the dead, inasmuch as regeneration and salvation pertain to the entire man, the body no less than the soul; that believers only hold communion with Christ in the Lord’s Supper; that the ordinance is a spiritual, visible document of the means of grace, addressed to all the needs of the Church and the world, and, if faithfully used, do not fail to promote a steady and vigorous growth of the Church; that, although the Church of Rome holds many articles of faith, and approves and perpetuates many customs which are not warranted by the Scriptures and are wrong, she is nevertheless a part of the Church of Christ; and that Protestantism is an historical continuation of the Church Catholic, in a new and better form of faith, organization, and practice.

The Reformed minority, located chiefly in the West, who dissent from many of the doctrines as given in this statement; a few even resist the whole system of thought as being subversive of the true Reformed faith. Some of them adopt the theory of salvation taught by the Methodist Church, and observe some of the forms of worship that are not in keeping with the Calvinistic theory of decree, and their teaching conforms to the Presbyterian or Puritan type of religion. But the prevailing faith, as held by the Eastern Synod, is gradually overcoming opposition, and extending; and from year to year the number of ministers and churches continues to increase. Both in the West and East, that stand firmly on the historical, churchly, and sacramental basis of the Palatinate Catechism.

As regards worship, the Church is in a state of transition. During the present century extemporaneous prayer has prevailed in the regular services of the Lord’s day; but this is a departure from the original custom. Originally the worship was liturgical. The Palatinate Liturgy was issued one year after the Palatinate Catechism. It did not, however, like the Catechism, acquire an ecumenical character. Every state or province in Europe where the Reformed Church was established had its own liturgy. In Switzerland there were as many liturgies as Reformed cantons. In Scotland they were in use also for at least a century after the Reformation.

These liturgies contain offices for the regular service of the Lord’s Supper, the communion of the sacraments; for the ordination of ministers, elders, and deacons; for the solemnization of marriage, burial of the dead, etc.; and contain the creed, the Lord’s prayer, confession and absolution, the Gloria in Excelsis, Te Deum, and Exultet, and responsorial psalms. In one book unites all these elements. They are all a hand-book for the minister rather than an order of worship for the people.

The first ministers in America brought with them the liturgies of those sections of Germany or Switzerland from which they emigrated. These continued in common use, particularly in the German congregations, though preference was generally given to the Palatinate liturgy until the book prepared at the direction of the synod by the Rev. Dr. Mayer, and adopted in 1840. This work had no historical basis, and never took root.

General dissatisfaction prevailed with this state of things. The great christological movement deepened the sense of an essential difference between the German and the American Churches, and the liturgical movement for a liturgy answerable in spirit and character to the churchly and sacramental ideas which had been revived in the Church. A liturgical committee was accordingly appointed in 1841. Specific instructions were given in 1852. The book known as the Provisional Liturgy was reported to synod in 1857, and submitted to the churches for trial. This liturgy excited a controversy which continued until 1864, when the Eastern Synod, in compliance with an order of the General Synod of Pittsburgh, referred the work for revision to a committee consisting of Rev. J. Nevin, Wolff, Zacharias, Bomberger, Harbaugh, Porter, Fisher, Gerhart, and Apple; and Messrs. John Rodemayer, George Shafer, George C. Welker, and Louis H. Steiner, M.D. This committee reported a book entitled An Order of Worship for the Reformed churches in the United States. After an animated discussion, a resolution was passed by a vote of 58 to 14, authorizing the optional use of the “Order of Worship” within the limits of the Eastern Synod, and referring the book for action to the General Synod, which convened at Dayton, Ohio, Nov. 28, the same year.

The General Synod devoted three days to a calm and full discussion of the questions relating to doctrine and cultus, when certain resolutions disapproving the book were lost by a vote of 55 to 66. Thereupon the book was approved “as an order of worship proper to be used in the congregations and families of the Reformed Church” by a vote of 64 to 57. The opposition arose chiefly from ministers and churches in the West. Of the ministers and churches East a very large majority supported the “Order of Worship.”

This liturgy is not simply a hand-book for the minister, or a pulpit liturgy, but it is an order in which the people take part with the minister in the worship of God. Less complicated and shorter in many of its offices than the Book of Common Prayer, it unites all the historic elements of liturgical worship on the basis of the apostolic church order of all the churches East, and to a large extent also of the churches in the West.

The government is Presbyterian. Every congregation is governed by a consistory, which is composed of the pastor, elders, and deacons; no congregation is without either elders or deacons. They are chosen by the commonwealth and authorized for a term of two, three, or four years, generally only two years, and ordained by the laying on of hands, and installed. When the term expires, the administrative power ceases, but not the office. If re-elected, installation is repeated, but not consecration. The consistory is subject to the synod, which consists of the ministers and an elder from each parish within a given district. The classes are subject to the synod. The synod is a delegated body, and consists of a given number of ministers and elders,
GERMANUS

chosen by four or more adjacent classes. The synods subject to the General Synod. This body consists of ministers and elders chosen by all the classes of the Church. It is the highest judicatory, and the last resort in all cases respecting government not finally adjudicated by the synods. Every judicatory has legislative authority within its own sphere; every minister and member possesses the right of appeal from a lower to a higher court.

All the children and youth are carefully catechized by the pastor once in two weeks, or once or twice a week, for a period of from three to nine months in the year. The classes are terminated by an examination in the presence of the pastor. Some pastors, particularly those located in cities and larger towns, have each but one church; but the majority have parishes consisting of from two to four churches, and not a few of from five to eight. Catechumenous possessing the requisite qualifications are, after examination in presence of the elders, received into the full communion of the Church by the rite of confirmation. The holy communion is commonly administered twice a year, and in many of the churches four times. The communicants receive the sacred elements in both kinds. The church services are in German.

In many of the churches it is still customary to administer the communion to the sexes separately; first the men come to the altar, and afterwards the women. But this old German custom is going into disuse. In the English churches men and women approach the altar together, as in some of the German churches. Services preparatory to the celebration of the holy communion are held on the Saturday or Friday previous.

The baptism of infants is faithfully and universally observed. Children are presented by their parents. Sponsors are allowed, but the parents themselves must also be present. Baptism may be administered at any time and in any suitable place, but an occasion of public worship in the church is held to be most appropriate.

The principal festivals, Christmas, Good Friday, Easter, and Whit-Sunday, are held in high honor, and observed with much solemnity. The liturgy has revived the idea of the church year. In many congregations, the pulpit teaching and the worship observes the concrete historic movement of revelation from Advent to Trinity Sunday, and from Trinity Sunday to Advent, which is called the liturgical year, and is still observed around the world.

As the liturgy becomes known and is appreciated, so does the observance of the church year gain favor. Acquiring greater practical power from month to month, it is gradually receiving more general confidence, and being observed in all its parts.

The two main connected with the General Synod are:

1. The Synod of the German Reformed Church in the United States, with 16 classes, 290 ministers, 718 congregations, and 86,605 members; 2. The Synod of Ohio and adjacent States, with 8 classes, 130 ministers, 308 congregations, and 20,069 members; 3. The North-western Synod, with 7 classes, 92 ministers, 166 congregations, and 9811 members; 4. The Pittsburgh Synod (in process of formation), which will have about 44 ministers, 126 congregations, and 9240 members. Its statistics are included in synod No. 2 (northern third). Total, 31 classes, 512 ministers, 1192 congregations, 118,485 members. Received by confirmation and certificate during the year, 11,837. Aggregate membership, including those who are baptized, but not confirmed, 192,000.

Two theological seminaries. One at Lancaster, Pa., founded in 1895: 4 professors, 80 students. Seminary at Tiffin, Ohio; founded at Canton, Ohio, 1888; suspended from the fall of 1893 to 1896; reopened at Columbus, Ohio, Oct., 1896; removed and permanently located at Tiffin, Ohio, 1898. Total, 32 students. Mission-house, Franklin, Wisc., 3 professors, 6 students; Freeland, Pa., 4 professors, 10 students. Two fully-organized colleges. (1.) Franklin and Marshall, at Lancaster, Pa. Franklin College, founded at Lancaster in 1787; and Marshall College, at Mercersburg, in 1836; Franklin and Marshall consolidated at Lancaster in 1853: 9 professors, 88 students, 442 alumni. (2.) Heidelberg College, founded at Tiffin, O., in 1850: 11 professors and 124 students. Two female seminaries; one at Allentown, Pa., the other at Tyrconnell, Md.

Periodicals.—Two reviews, four weekly papers, and one semi-monthly; one monthly magazine, and three Sunday-school papers.

There are two printing-establishments; one at Philadelphia, Pa., and one at Cleveland, O.

These statistics represent the condition of the German Reformed Church in the United States, 1896-97.

GERMAN THEOLOGY. See THEOLOGY, GERMAN.

GERMANUS, the name of three patriarchs of Constantinople. (1.) The first was transferred from the see of Cyzicus to that of Constantinople in 715, and was a zealous defender of image-worship, for which he was degraded, in a council held at Constantinople in 730. He died in 740, and was anathematized by a council at Constantinople, fourteen years afterwards (754). A treatise of his, σπυρίδων θεοῦ ἐνδοξισμόν ποιούσος, etc., may be found in H. Justel's Bibliotheca Canonica, and in Le Moyne, Varia Sacra: there also remains some letters and homilies of his (Bib. Max. Patr. xvii, xx.). His remains are all given in Migne, Patrologiae Graecæ, tom. 98. See also Fabricius, Biblio-
theca Graeca, ed. Harles, xi, 155; CELLIER, Antwurpta Sacri (Paris, 1862), xi, 86 sq.

(II.) Germanus the younger, a monk of the Propon-
tis, who became patriarch in 1222; but as Constantin-
ople was then in the hands of the Latins, he resided at
Nicæa, in Bithynia. He corresponded with pope Greg-
ory IX, in hope of bringing about a union between the
Eastern and Roman churches, but in vain. He was
deposed in 1240, restored again to his see in 1254,
and died in 1255. His Episipes and Homilies are given
in Migne's Patrologia Graeca, tom. 98.

(III.) Germanus, bishop of Adrianople, became pa-
triarch of Constantinople in 1267. He accepted the
honor with great reluctance, and resigned it in a few months, to retire to a monastery.—Neander, Ch. Hist. iii, 203; Fabricius, Bibl. Graeca, vii. 10; viii. 84; xi. 162; Cave, Hist. Lit. I. 1, 621; ii. 289; Hoefner, Nowe Bibg. i. 442; Germainus of Auxerre, St., one of the most striking figures in the period of the fall of the Roman empire, was born in Auxerre, in Roman Gaul, of illustrious parents, about A.D. 880. He was placed in the best schools of Gaul, and having finished his early education, he went to Rome to be formed for a life of clerical eloquence. His merit, and his marriage with a lady of high rank, brought him into notice at the court of the emperor Honorius, and procured for him, besides the government of Auxerre, the office of duke or general of the troops of several provinces. Although a Christian, he was a naturalizer, and was in the habit of hanging on a large tree, in one of the public squares, the heads of the animals he had killed. This custom bearing some resemblance to pagan superstitions, St. Amatorius, bishop of Auxerre, one day, when the duke was about to extort the tree present its return, and the vanity of his monument to be removed. Germainus suffered this correction with impatience, and threatened to be revenged, but God ordered it otherwise. Amatorius was advanced in years, and discerning in Germainus such qualities as were calculated to make a great bishop by the clergy and people. From that time he was completely changed. He practised his episcopal duties to their fullest extent. The Christians of Great Britain, frightened at the progress of Pelagianism in their island, had applied to pope Celestine and the bishop of Gaul to obtain aid, and they, in an assembly held in 428, set up a bishop and established the See. They invited the bishop of Auxerre, St. Lupus, bishop of Troyes. Both set off instantly. This mission had great success at the time, but Pelagianism reappeared seventeen or eighteen years afterwards, and Germainus went again with Severus, bishop of Troyes, to extinguish the heresy. In 433, he was consecrated a bishop by St. Endellicher and H. Hoffmann, 1834, and by J. F. Massmann, 1841, from a codex in the library at Vienna; the dialect in this version is very rude, and, if not provincial, would seem to point to an earlier date than the 9th century. Versions of the Psalter seem to have been executed in considerable numbers in the 10th century; one of these, by Nokker Leabo, aobt of St. Gall, is given by Schiller (Thee. vol. i), and others anonymous are to be found in Graff's Deutsche Interlinear versionen der Psalmen (Quad. 1889). A paraphrase of the Song of Songs, in Latin verse and German prose, had appeared in the 14th century. A new edition of this work, printed by Schütte (Hamb. 1779). Several works of a similar kind, in which the Biblical narratives are set forth, sometimes with apocryphal additions, were produced about this time; of these, one, which exists in various dialects and in numerous codices, is a version of the historical parts of Scripture in prose, composed partly from the poetical versions already extant, partly translated from the Vulgate (Massmann, D. Kaiserchronik, ii. 54). Formal translations from the Vulgate began now to be multiplied; of these MSS. exist, though the names of the authors here for the most part perished (Relase, D. Versa, Germ. autol Lutheram. 1697; Schöberl, Bericht von allen Deutschen geschriebenen Bibles, 1763; Rosenmüller, Hist. Interpr. v. 174, etc.). Out of these, though by what process we are unable to describe, came the complete version of the Bible in German, which was produced in a session of the Diet, on the invention of printing, and of which copies were multiplied to a great extent as soon as that art came into operation. Before 1477 five undated editions, the four earlier at Mayence and Strasburg, as is believed, the fifth at Augsburg, as the book itself attests, had been printed; and between 1472 and 1478, seven at Augsburg, one at Nüremberg, and one at Strasburg, were issued. Several editions of the Psalter also appeared, and one of the Gospels, with the
GERMAN VERSIONS

833

PERGAMON FROM THE EPISTLES. Collectors talk also of a translation by Büchsenstern, 1526; of Malachi by Hetzer, 1526; of Hosea by Capito, 1527; and other similar attempts (Riederer, Nachrichten II, 8vo. sq.).—An important place must be also assigned to the translation of the N. T. into Danish by Hans Mikkelsen (Leips. 1524); which, though awfully "ret after latiterac is" in the history of the independence of the Vulgate, and of being made directly from the Greek (Henderson, Dissertation on Hans Mikkelsen's N. T., Copenh. 1818). Of translations into Low German, one was printed at Cologne, 1490; another at Lié- ger, 1518; and a third at Halberstadt, 1519.

2. Luther's Version. The appearance of this constitutes an epoch, not only in the history of the church, but also in that of German literature and of the German people. Luther's version is a permanent monument of the author's ability and indomitable perseverance. Luther had few helpers in his arduous work. His exegetical aids were limited to the Septuagint, the Vulgate, a few Latin fathers, the N. T. of Erasmus, and such Hebrew as could be learned from the imperfect elementary books then extant. He had, however, valuable coadjutors in Melanchthon, Bugenhagen, Jonas, Amsbeck, and others, whose help was of the utmost service to him and to the work itself, especially when any difficulty occurred. He had access also to the Rabbinical expositions through some learned Jews. But the main burden of the work rested with himself, and it was to his own resources he had chiefly to trust for success. Of the patient toil he bestowed upon the work many biographers have written, and he himself says of his labors on the book of Job: "On Job, M. Phillip, Aurorall, and I, worked so that sometimes in four days we had hardly succeeded in accomplishing three lines. With what anxious care he sought to perfect his work without any book before him, or some written by others, is the account of the third part of his translation, containing Job, Psalms, and the writings of Solomon, still preserved in the Royal Library at Berlin, written in his own hand, and exhibiting the corrections which he made in the style and expression before sending it to press. Not unfrequently as many as three in his author's expression, and sometimes more, occur, between which he hesitated before finally fixing on the one which he would print. He spent on the work in all twelve years. The N. T., completed by him in the Wartburg, appeared in 1534 in the four books of Moses (Das Alte Testament, Deutsch, th.) in 1522; the other four in 1534, as far as Esther (Das A. T. Deutsch, th.) II in the close of the same year; Job, Psalms, and the Solomonic writings (Das A. T., th.) in 1524; between 1526 and 1531 several of the prophetical writings were issued, and in 1531 the collective Collected Books of the Prophets as th. iv of Das A. T. Deutsch. The Book of Wisdom was issued in 1529, and the rest of the apocryphal books in 1533 and 1534. The whole Bible was thus completed, and appeared under the title "Bible: d. k. die gesamte schrift. D. Martin Luther, Wittenberg gedruckt durch Hans Laet, 1534," fol. (Pischon, Die hohe wichtigkeit der ubersetzer, der H. S. durch Dr. M. Luther, Berl. 1894). Of this work thirty-eight editions were printed in Germany before 1580, besides seventy-two of the N. T., and innumerable reprints of other smaller portions (Panzer, p. 205).

3. Zurich Bible.—This is a combination of Luther's translation of the other books with a new translation of the prophetic writings by Con. Pellican, Leoo Jodua, Theod. Bibblnder, etc. It appeared in 1524, and was reprinted in 1527, and twice in 1530. In 1531 another edition appeared, with a new set of poetical books (Panzer, p. 260). The Worms Bible, 1529, is a work of the same kind as the Zurich Bible.

4. Versions from Luther's Bible in the other Teutonic Dialects.—1. Low German, by J. Holderinus, 1538 and often; 2. Danish, N. T., 1524, Bible, 1535: this is found also in Hunter's Polyglot, S. C. Gneoak, N. T., 1558, by Laurentius Andrek, Bible, 1541, by Laurent and Olaus Petri; 4. Icelandic, N. T. 1540, Bible 1584, by Gudh, Thorlaksson, bishop of Holms; 5. Dutch, N. T. 1526, Antw., printed by Lievelt, whence this is called the Lievelt N. T.; the whole Bible was translated anew after Luther into Dutch by Ad. Vischer in 1648, and this is the existing authorized version for the Dutch Lutherans; 6. Pomeranian, 1548.

5. Versions of the Reformed Church. Of these the first was the production of David Pareus, and appeared in 1579. It was superseded by that of F. Piscator in 1602, of which many editions have appeared. A translation of the N. T., by Amandus Polanus, appeared in 1608. In 1650 a new translation for the churches of the Swiss confederacy appeared at Zurich, the authors of which were Hottinger, Suerer, Fueslin, and others. In Holland various attempts were made to produce versions direct from the original. In 1586 J. Uthen- hoven issued the N. T., and in 1582 the whole Bible; and in 1647 appeared the Dutch Bible translated by J. Hackius, which chiefly follows the Geneva (French) Bible.

6. Authorized Versions.—In the year 1618 the Synod of Dort appointed a commission of 22 members to prepare a new version; this appeared in 1637, and received the authorization of the States General. This version (the Dutch version of which the present author is the author) was completed in 1607 by P. J. Reesen, and in 1647 appeared with the royal sanction, after it had been carefully revised by Hans Svanin, archbishop of Zealand. The Icelandic version received its permanent form in 1644 from Thorlak Skulesen, the grandson of Thorlak. Baher (1600). The authorized Swedish version was completed under the auspices of Gustavus III.; it consists of a revised edition of the work of Andræ and Petri, and appeared in 1618.

7. Roman Catholic Versions.—The earliest of these is the N. T. 1586, with the work of the N. T. Dietenberger, bewerten Texts" etc., sine loc. 1592, fol., Leips. 1592, 8vo, and often since. In 1584 the Bible of Dieten- berger (q. v.) appeared at Mayence; and in 1597, that of Eck (q. v.) at Ingolstadt. Previous to these, Casper Ulenberg had translated the Bible in accordance with the Sixtine text of the Vulgate, and this translation, revised by the Jesuits at Mayence in 1616, appeared as Diet Catholische Bibel. Revised editions were issued by Ehrhard in 1722, and by Cartier in 1751; and it has been often reprinted both with and without the Latin text. More recent versions by Roman Catholic clergymen are the Vienna version (1699) of Wittola (Vien. 1775), Weitenauer (Aug. 1777), Fleisch- chutz (Fuld. 1778), Rosalinio (Vien. 1781), Fischer (Prag 1784), Braun (Vienna, 1786), Lauber (1786), Mutschelle (Munich, 1789), Weyl (May, 1795), Krach (Aug., 1795), Bremel: Diet der christlichen Welt (1799- 1818), Bonn, 1799, 1800, 1815; Voss (1807), Schnappsteg (1807), Widemann (1809), Kistemaker (1825), Scholals (1829), Allioli (1838), Loch and Reischl (1857). Of these, the majority are confined to the N. T. The translations of Voss, Scholals, and Allioli have been repeatedly issued. Casper: pastor of the Bohemian Church in Berlin, published a translation of the N. T. from the Greek in 1815, which has often been reprinted.

8. Other Versions.—In 1630 J. Crell issued a German translation of the Bible in the interests of Socinianism; and in 1660 another, in the interests of Arminianism, was published by J. Fischer. Petri, of a Danish version party in Holland published a translation in Dutch, made by Chr. Hartsacker, in 1660. In 1666 a Jewish translation of the O. T. into German was published by Joseph Athias; this, along with the versions of Luther, Piscator, Caspar Ulenberg, the Dutch Author, and the version of the N. T. by J. J. Reitsen, printed in the parallel columns, was published under the title of Biblia Penta- topia (8 vols. 4to. Hamb. 1711). Of German versions of more recent date there are many. Those of Triller (1708), Reiz (1712), Junkerhoros (1732), Heinemann (1749), Senget (1756), Schmitz (1769-83), Stig- lig (1776), Seller (1783), Stolz (1790), the Berkeling...
GERMANY

Bible (1728), belong to the Lutheran Church; those of Glykas (3 vols. 8vo, Basle, 1776), and Voegelin (Zürich, 1781) to the Reformed. Belonging to the present century are the translations of Preuss (1811), Schäffer (1816), Meyer (1829), [Richter and Fleischer] (1833), Zschietzsch man (1835), and of these the last (1839), chiefly of the N. T. only. But all these yield in importance to the work of De Wette, prepared originally in conjunction with Augusti (6 vols., Heidelberg, 1809-14), subsequently wholly by himself (3 vols., 1831-38, 4th ed. 1858). The Jewish version by Arnim, Fürst, and Schwarz, and the Greek of this scholar of the 18th century is also deserving of notice. Finally we notice the careful translations in Philippeon's *Israelitische Bibel* (1858) and Bunsen's *Bibelwerk* (1858 sq.).—Kitto, s. v.

Germany. 1. *Ancient Religion of.*—The information concerning the religion of the tribes of *Germania Magna*, such as the Alamans, Saxons, Franks, etc., is very incomplete and disconnect ed. The Greek and Latin authors mention the names of but a few deities, who seem to have been to some extent similar in their attributes to their own gods. Thus in the *Iliad* the three main deities, Zeus, Athena, and Hestia, were called *Deus* by the Gauls (Wurtz, 1809), and the last of these is also necessary for their purpose, and their views are naturally colored with their own opinions. The Scandinavian mythology must originally have been very closely connected with that of Germany; but we can get no light from that quarter, as we do not know the name of the chief deity of this tribe at an early period. About the same time the *Taurian* was mixed in the Alle man and the Frank, while among the northern tribes, the Slavonic, Lithuanic, and Finnic myths were introduced; while a tendency towards the Greek worship is perceptible in the religious ceremonies. To the southern Germans, Caesar states that they worshipped only such as visibly exerted a decided influence over events: he particularly mentions three: the Sun, Vulcan, and the Moon. The domestic deities were: *F연구* (Wooden), the supreme god, and his wife *Frìa*, the goddess of the house; *Teris*, or the god of the fields; *War*, the god of war; *Фро*, who watched over the crops, and his wife *Frowa*; afterwards came *Phol or F穿越* (the Balder of the north), *Finne*, and *Thurnar* (Donor), god of the clouds and storms. The progenitor of the human race was *Tuao*, who combined the attributes of the Greek Uranus and the German *Ober der Schüle* (the chief of the mountains), with the subsequent *Irmin*, or the German Hercules. Among the special deities of different tribes were: *Nerthus* (commonly *Hermila*), goddess of fertility and the chase; the *Alos*, two brothers (a sort of Castor and Pollux); *Cater*, in Saxony, etc. Other goddesses appear to have been the *Helias* of the Germans, *Butus Hidana* and *Eira* were identical with Freia, etc. Among the inferior deities (demons) were the *Riesen* (gi ants), physically resembling men, who were supposed to belong to a former period of creation, and dwell in the mountains, where they erected gigantic fortifications, and defended themselves against intruders with stones and rocks. In direct contrast from these were the *Zverge* (pigmies), who appeared among men on special occasions, sometimes to impart gifts and blessings to them, at other times to do them evil and frustrate their plans. There were also the *Dracones* (the mountains), called also *Elbe* or *Elfen* (elves); *Waldegeist* (spirits of the forests), especially the Wild Hunter, Schratz; *Wassergeist* (spirits of the waters), or Nixen. There were also a quantity of lares, or favorable household gods of an inferior degree, while trophies of the gods and heroes haunted the houses of the neighborhood at night, disturbing slumberers and throwing stones at passers-by. Horses and bulls were considered sacred, and bears, wolves, and foxes were objects of respectuous awe. The gods and goddesses offered sacrifices of horses, arms, and weapons, and eagles, raven, and woodpecker were regarded with the highest veneration. The cuckoo was supposed to possess the gift of prophecy. Serpents also were worshipped, and the fear they inspired gave rise to the fable of the dragon. The cosmogony of Germany seems to have greatly varied with the times and in the different tribes; the general belief was that the gods originated out of chaos, created the world, and governed it in its complicated existence. It was shown by the idea of the great city of the dead, Wallalka. The mode of worship was very simple, if compared with that of the Greeks and Romans, or even of the Celta. The temples were not generally structures made by men, but often trees or groves where the deity was supposed to live. Heathenism was healing himself in the rustling of the leaves. Some of the gods dwelt in the mountains, caves, or streams. Yet there were also regular temples, of which vestiges are yet found, and which contained images of the gods; for, although the simple people, for their part, there is oft mention made in the early times of Christianity of the destruction of idols in Germany [see [MENSMUL]], and images of the sun and the moon have been found (though these may also have belonged to Celtic or Slavonic tribes). The holy places were mountains or woods, or the holy isles; Deid mout tains between Silesia and Bohemia, etc. The woods and trees, especially the oak, beech, and linden-tree, were objects of particular veneration. Unbelievers were not allowed to touch them, or to enter the groves. The worship consisted in prayer to the gods; the sacri fices were usually performed by the priests, and the priest also took place before consulting the omens, going to war, blessing a king, or any other special occasion. These sacrifices consisted generally in horses, bulls, goats, etc., and even human beings. The color of the sacrificial animal was generally white. Besides this, on all festive occasions, the sacrifice of the feast was offered to the household gods, and laid before their shrine. No mention is made of the general feasts of the Germans in the earlier times, yet it is considered likely that they had at least as principal ones the *Juel*, *Easter*, and the *Summer Feast*. The priests took part in legislation and the wars as well as in worship, and in war they carried the sacred images or symbols against the enemy. In the household the head of the family could act as its priest. Chosen women, called *Alrunes*, consecrated the horses, and prophesied by consulting the omens at the sacrifice. *Eid Schiede* (the sacred mountain) of Germany (Amst. 1648): G. II. History of Christianity in Germany.—As some of the German tribes were the most barbarous at the birth of the Christian era, Christianity became known to the Germans at a very early date. Some of the epicopal sees, as Cologne, even claim to have had disciples of the apostles as their first bishops. Peter is said (Baron. ad ann. 46) to have ordained the bishops of the city in the early times of the German. In 314, when the Council of Arles was held, we have trustworthy information of a bishopric in Cologne. In the south of Germany, on the other hand,
we find the first Christians at Augusta Vindelicorum (Augsburg), in Rheotia, into which Christianity was introduced by the bishop Narcissus, in the time of Diocletian (284-305). In the following centuries the number of bishoprics in Western Germany gradually increased, and at the beginning of the 6th century we find subject to the jurisdiction of the metropolitan of Trier; and hence it appears that all other bishoprics, Worms, Speyer, besides a number of others whose sees now belong to France or Switzerland. Next to south-western Germany, it was the south-east in which Christianity made the greatest progress. At the beginning of the 7th century, there were, in the two Bavarian provinces of upper and lower Bavaria, proportionately almost as many Christian churches as in the other countries of the ancient Western empire, and Bavaria, in particular, became an entirely Christian state. Even before this time many of the German tribes which had invaded and conquered the western provinces of the Roman empire had either become Christian or were inclined to be so. The Goths received the first announcement of Christianity from prisoners taken in war, and a Gothic metropolitan had a seat in the Synod of Nicaea. Among the West Gothic princes, Fritigern was favorable towards the Arianism of Athalarich; and it was he who protected it. When the Western Goths, conquered by the Huns, had to seek refuge in the Roman empire, they had to consent to be baptized. The form of Christianity which they then received from the emperor Valens was that of the Arian Church. Other East German tribes, the Goths and the Vandals, likewise became Christians of the Arian faith, which was carried by the German conquerors into Spain, Italy, and Northern Africa. To an Arian bishop of the West Goths, Ultibas, Germany is indebted for the first German version of the Bible. The conversion of Clovis, the king of the Franks, to the Catholic Church, gave to the German tribes who had left the fatherland the first orthodox king; and the success of the Franks in their wars with the Arian kings, in which they were aided not a little by the Catholic subjects of the latter, soon led to the destruction of Arianism as a national religion in the Germanic world. Under the influence of the Franks, in the beginning of the 8th century, the Catholic Church pressed forward as far as the Saale and the Elbe, but it was not under any ecclesiastical regulations, and was much corrupted by Arianism. British monks, the Goths, and as far as the Main, and among the Alemanni, but they had no connection with Rome. See COLUMBANS; GALL. Winfred, the Anglo-Saxon monk, better known under the name of Boniface (q. v.), was sent from Rome to undertake the conversion of Germany, and finally became the apostle of the German Church and the founder of the German Church. He made the German Church dependent upon Rome, and, in consequence of the plenary powers given him by the Roman see, was looked upon as the general bishop of Germany. The last serious struggle in defence of German paganism was made by the Clovis; but, finally acknowledging their inability to resist Charlemagne, they resolved to adopt the religion of the conquerors, and become one nation with the Franks. The Christianization of Eastern Germany, which at that time was chiefly inhabited by Slavic tribes, was not completed until the 13th century.

When the Roman empire had been revived in the German nation by the Othos, the emperor was regarded as the political head of Christendom in the West, and the holy empire as a divine institution. The old legal principle that God had divided all power on earth between the emperor and the pope was frequently construed in Germany so as to mean that the emperor carried the secular sword as a feudal investiture from the pope. The efforts of medieval popes to enlarge the personal authority of the church, on the material, and even to establish the absolute superiority of the pope over all secular power and the whole world, led to continual wars between the emperors and the popes. The popes entirely failed to carry through their theocratic idea, but the authority of the emperors of Germany, as the first among the Christian rulers, likewise steadily declined.

In the 16th century Germany was the birthplace of the great reformation of the Church, which substituted the Lutheran and Reformed Churches in many countries not only in a large portion of Germany, but in a number of other European countries. It seemed at one time probable that the whole of the German empire might be gained for the Reformation; but, after many wars, or rather, two wars, one against the Turk, one of the fiercest and longest religious wars on record, the activity of the Jesuits and the courts of Austria and Bavaria saved a large portion of Germany, especially in South Germany, for the old Church.

The old German empire was dissolved in 1806. In 1815 the German Confederation was established as a league of independent states. Another great change in the constitution of the German nation was effected by the war of 1866, which united most of the German states into the North-German Confederation, under the leadership of Prussia, while Austria was wholly excluded from the empire. Austria, Wurttemberg, Baden, and part of Hess-Darmstadt were recognised as independent South-German states. The Grand-duchy of Luxemburg was also released from all connection with Germany, and remained a semi-independent state, under the influence of France. In 1866 the little principality of Lichtenstein, in South Germany, was totally ignored at this reconstruction of Germany, and likewise formed henceforth an independent state. Our Cyclopaedia devotes a special article to Austria, Prussia, and each of the smaller German states, in which a full statement of their Church history and ecclesiastical statistics is given.

In 1885, the number of Protestants, Roman Catholics, and Jews in the North-German Confederation and the South-German states was about as follows:

Gericulus, Johannes, a clergyman of the Reformed Church of Holland, was born at Utrecht. He was settled successively at Delft, Emden, Vlissingen, Ghent, Harlingen, Deventer, Harderwyk, and Utrecht. He died at Utrecht Feb. 14, 1606. He translated into Latin the East Friesland Catechism, and also wrote a defence of the Heidelberg Catechism against Dirk Vollertsz. Coornhert, a translation of Beza's Paraphrase of the Psalms, Advice to the Sick, and an Account of the Reformed Church in Utrecht. (J. F. W.)

Geroch. See GERHOCH.

Gerold, a place mentioned in the Antonine Tables, possibly the modern Jerud, a large village on the great caravan road from Damascus to Palmyra (Porter, Damascus, i, 371).—Van de Velde, Memoir, p. 314.

Gereth'zian (only in the plural, Gerethizen v r). Yorupoi, a term denoting the designation of the inhabitants of a town, which is named in 2 Macc. xii, 24 only as one limit (iuscū turbī) of the district committed by Antiochus Epiphanes to the governor of Judas Maccabaeus, the other limit being Ptolemæis (Acheoi). To judge by the similar expression, this must signify the extent of Simon’s government in 1 Macc. xi, 59, the specification has reference to the sea-coast
of Palestine, and, from the nature of the case, the Ger- 
shenians, wherever they were, must have been south 
of Ptolemais. Grotius seems to have been the first to 
suggest that the town Geresh or Gerara (Γερας, 
Ptolemy, iv, 6, 108 ; Garve, Flinny, Nat. Hist. vi, 29 ; 
Vieillot, Hist. des Peuples, p. 764 ; G. F. Smith in the 
Expositor, viii, 19) was intended, which lay between Pelusium 
and Rhinocolura (wash el-Arish). It has been point- 
• ed out by Ewald (Geschichte, iv, 365, note) that the 
coast as far north as the latter place was at that 
time in possession of Egypt, and he thereon conjectures 
that the inhabitants of the ancient city of Gerarah, south- 
east of Gaza, the residence of Abraham and Isaac, are 
meant. In support of this, Grimm (Uebrig. und Hdb. 
ad loc.) mentions that at least one M. reads Герар, 
which would without difficulty be corrupted to Герар- 
съ. The Syriac version (early, and entitled to much 
respect) has Γεζαρ, by which may be intended either 
(o) the ancient Гезар, which was near the sea—some- 
where about Joppa; or (b) Gaza, which appears 
sometimes to take that form in these books. But 
these are evidently conjectural emendations of the 
text: and the allusion of Ewald is sufficiently met 
by observing that the place in question was not 
included in the Maccabean province of Judas, any 
more than Egypt of the parallel passages (1 Mac- 
xii, 59 ; Josephus, Ant. xiii, 5, 4). See MACCABEES, 
JUDAS.

Gerash'om (Heb. Gerash'om, ג'רָשָׁם [in Chron. usu- 
ally גֵּרָשְׁמ], expulsion [see GERSHOM], an etymology 
alluded to in Exod. ii, 22, where there is a play upon 
the word, as if written גֵּרָש ל, or Gerash, q. d. a 
sojourner there; in which passage the Sept. preserves 
the form Γερασίη [comp. Josephus, Гερασίη = Δελατος, 
Ant. ii, 18, 1], but elsewhere Gerases (Гερασίς or Гер- 
ασίς), the name of three or four Levites.

1. The eldest of son of Levi (1 Chron. vi, 16, 17, 20, 43 
in [the Heb.], 62, 71; xv, 7), elsewhere distinctively 
written Gerash or (q. v.).

2. The elder of the two sons (the second being Elei- 
zer) who were born to Moses in the land of Midian by 
Zipporah (Exod. ii, 22; xviii, 4). B.C. 1698. These 
sons of the great lawgiver held no other rank than that 
of simple Levites, while the sons of their uncle Aa-zai, 
who lived in the prouder neighborhood (1 Chron. 
xxiii, 1, 5, 16; xxvi, 24), a proof of the rare 
disinterestedness of Moses. Shebuel, one of his dec- 
cendants, was appointed ruler (ותיה) of the treasury 
under David (1 Chron. xxvi, 24–28).

3. The son of one Manasseh (according to the text) 
and father of Jonathan, which last acted as priest to 
the tribe of Elah (Judg. xii, 4); but, according to a 
more correct reading, he is not different from 
the son of Moses. See JONATHAN. The Tal- 
mud explains the substitution of "Manasseh" for "Moses" 
in the text by asserting that Jonathan did 
the works of Manasseh, and was therefore reckoned 
in his family (Tosefta, b. 109, b). See MAN- 
NASEH.

A descendant of Phinehas, and chief of his house, 
who returned from Babylon with Ezra (Ezra vii, 2). 
B.C. 459.

Ger'sh'on (Heb. Gerash'im, גֵּרָשְׁמ, expulsion, from 
גֶּרֶשׁ ל, to drive out; Sept. in Gen. Гερασίη, elsewhere [and 
usually there also in the Cod. Alex.] Гερασίη; Joseph. 
Герасимъ; Ant. ii, 5, 4), the eldest of the three sons of 
Levi, apparently born before the migration of Jacob's 
family into Egypt (Gen. xlvii, 11; Exod. vi, 16). B.C. 
cir. 1895. But though the eldest born, the families of 
Gershon were outranked in fame by their younger 
brathers of Kohath, from whom sprang Moses and 
the priestly line of Aaron (see 1 Chron. vi, 2–16). Ger- 
shon's sons were Libni and Shimri (Exod. vi, 17; Num. 
iii, 18, 21; 1 Chron. vi, 17), and their families were 
duly recognised in the reign of David, when the per- 

manent arrangements for the service of Jehovah were 
made (1 Chron. xxiii, 7–11). At this time Gershon 
was represented by the famous Asaph "the seer," 
whose genealogy is given in 1 Chron. vi, 49–43; and, 
also in, part, 20, 21. The family is mentioned once 
again as in the days of David (2 Chron. xxix, 12, where 
it should be observed that the sons of Asaph are reckoned 
as distinct from the Gershonites). At the census in 
the wilderness of Sinai the whole number of the males of the Bene-Ger- 
shon was 7500 (Numb. iii, 22), midway between the 
Kohathites, 6600, and the Leviites, 2850. At the same date the 
efficient men were 2690 (iv, 40). On the occasion of 
the second census the numbers of the Levites are given 
only in gross (Num. xxvi, 63). The sons of Gershon 
had charge of the fabrics of the tabernacle—the cover- 
ings, curtains, hangings, and cords (Numb. iii, 29, 30; 
vii, 25, 26); for the transport of those they had two 
covered wagons and four oxen (vii, 8, 7). In the en- 
campment their station was behind (תפילה) the taber- 
nacle, on the west side (Numb. iii, 23). When on the 
• march they went with the Merarites in the rear of the 
first body of three tribes—Judah, Issachar, Zebulun— 
with Reuben behind them. In the apportionment of 
The Levitical cities, thirteen fell to the lot of the Ger- 
shonites. These were in the northern tribes—two in 
Manassesh beyond Jordan, four in Issachar, four in 
Asher, and three in Naphtali. All of these are said 
to have possessed "suburbs," and two were cities of 
refuge (Josh. xiv, 27–33; 1 Chron. vi, 41–43). It is not 
easy to see what special duties fell to the lot of 
the Gershonites in the service of the tabernacle after 
its erection at Jerusalem, or in the Temple. The sons 
of Jeduthun "prophesied with a harp," and the sons 
of Heman "lifted up the horn," but for the sons of 
Asaph no instrument is mentioned (1 Chron. xxv, 1– 
5). They were appointed to "prophesy" (that is, 
probably, to utter, or sing, inspired words, נַשָּׁרָי, 
perhaps after the special prompting of David himself 
(xxv, 2). Others of the Gershonites, sons of Laadan, 
had charge of the "treasures of the house of God, and 
over the treasures of the holy things" (xxvi, 20–22), 
among which precious stones are specially named 
(xxix, 8).

In Chronicles the name is, with two exceptions (1 
Chron. vi, 1, 11; xxiii, 6), given in the slightly different 
form of "Gershon." See GERSHONITE.

Ger'shôni (Heb. Gerashamin, גֵּרָשְׁמָנִי, Sept. Ger- 
ashini, but often simply like Gershon, and so A. V. often 
"son of Gershon"), a designation, usually in the plur., 
of the descendants of Gershon, one of the sons of 
Zur and the Merarites (1 Chron. xxii, 11; Numb. 
iii, 21; iv, 24, 27; Josh. xxx, 28; 1 Chron. 
xxiii, 7; 2 Chron. xxix, 12). Their office, during 
the marches in the wilderness, was to carry the vails and 
curtains belonging to the tabernacle, on the western 
side of which they encamped (Numb. iii, 25–26; 
xxvi, 57). In the singular the term is applied to Laadan 
(1 Chron. xxvi, 21) and Jehiel (1 Chron. xxix, 8).

Ger'son (Герсон), the Greek form (1 Esdr. viii, 
29) of the name GERSHOM (q. v.).

Gers'on, Jean Charles (Doctor Christianissimus), 
one of the greatest names in the history of France and 
of the Gallician Church. He was named Gerson from 
a village in the diocese of Rheims, where he was born, 
Dec. 14, 1885. He entered the college of Navarre in 
1877, and passed through some of the most instructive 
that studied theology seven years under the grand master 
Pierre d'Ailly. He then was succeeded as chancellor of 
the university and prebendary of Notre Dame in 1896. 
Here he strenuously devoted himself to improving the 
course of theological study, on which his views may 
be seen in his work De reformatione Theologiae (Opera, vol. i). But the diffi- 
culties of his position were very great. The uni- 
versity was in disorder; the state was torn by contending
factions; the Church was divided by the great papal schism which began in 1409, when Urban VI was elected pope at Rome, and Clement VII at Avignon. Gerson found so much opposition in his efforts to reform theology, and to bring peace to the Church, that he decided to retire from Paris to the quiet charge of the cathedral at Bruges, a premonastery given to him by Philip the Good. For a last time he got together the council, and gave up, with it, the tranquillity of his whole life. Gerson was more than once deputed to the popes during the schism. In a memoir, De unitate ecclesiastica, he defended the Council of Pisa (q. v.), and conducted himself in a firm though prudent manner when the papal claims were taken up in Germany by the Emperor Sigismund and the Council of Constance, and to elect Alexander V. It was during the sitting of this council that he published his famous treatise De auctoritate Papa, to prove that there are cases in which the assembled Church may command two rivals to desert from their strife, and has a right to depose them if they refuse, for the sake of peace and unity. The Council of Constance (q. v.) opened a new field for his talent; he took a place there as ambassador from King Charles VI, from the Church of France, and from the University of Paris, and he directed all the business that were adopted during the pontificate of John XXIII, who had succeeded Alexander V, and whose licentious conduct had tended rather to increase than to allay the schism. In this council Gerson and D'Ailly were the chief leaders in the so-called reforming party. The discourses which Gerson on various occasions delivered at the council, and the conciliations which he published, were intended principally to show that the Church may reform itself, as well in its governors as in its members; and that it has the power of assembling, without the consent of the pope, when he refuses to convoke it; to prove the necessity of holding councils, as well general as special; to present the payment of first-fruits, and to extirpate simony, which had become very common. He had established, as the basis of the decrees of the council, the doctrine of the supremacy of the Church in all which concerns faith and morals, and on this subject a discourse on the Immaculate Conception has been ascribed to him, but which was, in fact, pronounced at the Council of Basle after his death. It was principally through his efforts that the council "declared itself independent of all popes, and superior to them." The piety of Gerson, though sometimes disastrous, was never actuated by envy or celerdous; he denounced, in his treatise Contra sectam Flagellantum, the abuse made of flagellation, of which Vincent Ferrier was the advocate. He also composed a book, De probatione spiriduum, in which he gave rules for distinguishing false revelations from true ones. The pretended visions of St. Bridget, which would have been condemned at his instigation had they not found an apologist in the cardinal Torquemada; and though his theology was professedly mystical as opposed to scholasticism, he opposed the theories of John Ruysbroeck, of the passive union of the soul in the Deity, which is similar to the pure love of the Quietists. He also wrote against D'Ailly on judicial astrology, which was then in high repute among the princes of Europe, and which he combated with great success, even in his old age, against the physicians of Lyons and Montpellier. At the same time, his treatise De astrologia reformata, had procured for him the praise of the learned bishop of Cambrai. In another treatise, De erroribus circa aetem magico, he attacks the superstitious errors of magic and the prejudices of the time. With regard to toleration, Gerson was involved in all the errors of his times. At the trial of John Huss (q. v.), his writings and speeches contributed greatly to the condemnation of that eminent reformer, who was burnt by order of the Council of Constance, July 6, 1415. He took a similar share in the persecution of Jerome of Prague (execrated May 50, 1415). "Cut off," he said, in a letter to the arch-
tending abstractions and syllogism, and the uncertainty and the agonizing doubts which often accompany them. Gerson's is a mild form of mysticism, based on the nicest analysis: it does not lead to the absorption of the personality into the bosom of the Infinite Being, nor exclude the normal exercise of the intellect and volition. Gerson was a determined enemy of scholasticism. He signalized, as the origin of all the evils of theology, that vain curiosity which leads to the disregard of the most reliable authorities, the dangerous taste for novelty in things and in words, the false love of novelty, and the mixing of the different sciences. Revelation, with him, is the limit of theology, and to endeavor to carry it farther by human reasonings is to lead it astray. "If the Scriptures are insufficient as a means of arriving at God, where shall we find anything to lead us higher? Let us then guard against anything which is not founded in the ceremonies and other sciences, and against introducing into it the exercises of the schools." As to practical religion, as we have already said, Gerson was of the moderate mystical school. In his view all the moral and intellectual exercises were to be carried on in conformity with, and directed to, God; but sin destroyed this harmony, and it is the object of mystic theology to restore it. But, in order to effect this, it must first know the nature of the powers of the mind, and the manner of acting upon them. Following Richard de St. Victor (Quesne de St. Victor), Gerson distinguishes the operations of the two orders of faculties three different degrees: in the via cognitiva, 1. the cogitatio, involuntary tendency of the soul to moral consideration; 2. the meditatio, voluntary effort to learn the truth; 3. contemplatio, the voluntary inquiry into spiritual, and especially divine, objects; in the via affectiva, 1. the desire, libido; 2. joy, delectio; 3. loving aspirations, affectio eucharistica, and anagogica, inseparably connected with the contemplatio: these are only separately or theoretically considered. In this union of love with contemplation resides the true essence of the mystic theology of Gerson, and essentially a theology by an admixture of other sciences. Gerson designated it as theologia affectiva, in contradistinction from scholastic theology, which he called theologia speculativa. Love consists only in an "experimentalis Dei perceptio," from which, however, Gerson abstracts all that is material or corporeal. In the definition of it, he says: "By love is the eternal Word born in the soul, and the unity with God achieved." That wonderful book, De Insitutione Christi, is attributed by many of the best critics to Gerson. On this question, see KRAMPS.

There are several editions of Gerson's collected works, but the most complete is Opera Omnia J. Gersonii, op. et et al. L. Eilices de Pin (Antwerp, 1706, 5 vols. fol.). Vol. I contains a life of Gerson, an essay on the authorship of the Insitution of Christ, a critical catalogue of his writings, together with his dogmatical works. Vol. III contains his treatises on ecclesiastical polity, etc.; vol. IV, his writings on moral theology; vol. IV, exegetical writings; vol. V, controversial writings, sermons, etc. Some works are included in this edition which do not belong to Gerson. See Richer, Vie de Gerson; L'Essai de l'Institution de Constance; Lecuy, Essai sur Gerson (Paris, 1832, 2 vols. 8vo); Schmidt, Essai sur Gerson (Strasb. 1880); Thomasmay, Jean Gerson (Paris, 1849, 16mo); Faugère, Rhéo de Gerson (Paris, 1887); Engelhardt, de Gersonii Mysticae (Erlang, 1843, 4to); Illigens Zeitschrift fur d. Kritik der Religionsgeschichte, cent. xiv; Hoefer, Nouv. Biog., T. xxi; Journain, Doctrina Gersonii de theolog. myst. (Paris, 1838, 8vo); Michelet, Hist. de France, vol. iv; BonnaEoseheo, Reformateurs arrive la Riforme, I, 160; Neander, Ch. Hist. vol. v; Neander, History of Christian Dogmas, 1814, 12; Moebius, Ch. Hist. v, 448; Dupin, Hist. de l'Ecclesiastique, 1842, 2 vols. 8vo; Bossard, Ch. Hist. xx, 283 sq.; Hase, Hist. Ch. 250, 251; Hook, Eccles. Biog., v, 806; Schwab, J. Gerson, eine Monographie (Würzburg, 1858, 8vo); Herzog, Real-Encyclopädie, v, 89 sq.

Gertrude, St., born in 826, was the daughter of Pepin of Landen, majordomo of the king of Austrasia, France. She was religiously brought up, and finally entered the nunnery of Nivelles, nine miles from Brussels, of which she was abbesse at the early age of twenty. She died there March 17, 659, and that day has since been kept in commemoration of her throughout Brabant. Acta Sanctorum, March 17.

Gertrude, St., was born at Eisleben, Germany, and became in 1294 abbesse of a congregation of Benedictine nuns at Dornburg. She was thoroughly versed in Latin and the holy Scriptures, but is particularly known for the visionary mysticism of her priety. A series of editions of her Issinuonum divina pietas exercitatio appeared during the 16th and 17th centuries. Meges published an edition in 1684, and in 1676 translated it, together with her biography, into French. She died in 1684. Her saint's day is Nov. 15. —Herzog, Real-Encyclop., v, 100.

Geruhima (Moses), the name of a mountain not very far from Jerusalem, mentioned in the Talmud (Rosh hash-Shanah, ii, fol. 22, b) as the third summit distant, on which signal-fires were lighted; held by Schwartz at the most prominent peak near mount Gerizim; the Abayot of a mountain-chain called "Avagum, about three Eng. miles south of Kailet el-Raba, or Ramoth Gilead" (Pfeiff., p. 82); but we find no corresponding name in any other modern authority.

Gervaise, François-Armand, a Trappist monk, was born at Paris in 1796. Having studied under the Jesuits, he then entered among the brethren of Cîteaux and was a prominent abbot of La Trappe in 1806. He was appointed abbot of La Trappe on the death of Abbot Simunis Fisel in 1806. The abbot, however, soon repented of his choice, for the new abbot began, by his austerity and intriguing spirit, to foment divisions among the monks, and to undo all that the abbot had done. He soon resigned, and in leaving La Trappe he drew up a long Apology. When his Histoire générale de Cîteaux (Avignon, 1746, 4to) appeared, the Bernardines, who were violently attacked in it, obtained an order from the court against him, and he was arrested at Paris and conveyed to the abbey of Notre Dame des Reclus, where he died in 1745. He is the author of La vie de St. Cyripère (Paris, 1717, 4to) — La Vie d'Abailard et d'Héloïse (Paris, 1720, 2 vols. 12mo) — La Vie de St. Irenée (Paris, 1728, 2 vols. 12mo) — La Vie de l'Apôtre St. Paul (Paris, 1734, 3 vols. 12mo) — La Vie de St. Epiphane (Paris, 1738, 4to) — L'honneur de l'église défendu contre P. Le Creuxay (1742, 2 vols. 12mo). See Richer, Bibliothèque Sacré; Hook, Eccles. Biog., v; Hoefer, Nouv. Biog. Générale, xx, 330.

Gervase andProtais (Gervasieri et Protasius), two saints always named together in the Roman martyrology. Ambrose gives an account of them, and calls them the "first martyrs of Milan." They appear to have suffered martyrdom in the time of Diocletian. Many stories are told of the miracles wrought by their "relics." Their commemoration day is June 19. See Butler, Lives of the Saints, June 19.

Gertrude of Canterbury, a medieval English chronicler, was born about 1150, and died in the early part of the 12th century. We know little of his history. It appears that he was a monk of the priory of Christ's Church, Canterbury, and held the office of sacristan, was present at the burning in 1174 of Canterbury Cathedral, and watched the erection of the new cathedral, until the election of Baldwin as archbishop in 1176. He wrote an account of the construction and rebuilding thereof, entitled Tractatus de combustione Dorobornensis ecclesie. Another work,
Imaginatio de discordia inter monachos Continuatiorem et archiepiscopum Balduinum, written, perhaps, after Hubert became archbishop in 1193, gives a full account of the dissensions between Baldwin and his monks. His next work, Vita Dorotheorum archiepiscoporum, contains lives of the archbishops of Canterbury, ending soon after Hubert's accession. His most valuable work, however, is the Regesta or, in modern English, Histories of England, written in Latin. In 1198, he wrote the Historia novella de rebus gestis, the most valuable of all the chroniclers of this time. His last work, the Historia postrema, is a continuation of his earlier works, and it contains a full account of the reign of King John, who was probably never written. In the library of the University of Cambridge, there is a manuscript of the Historia novella, now known as the Magna Mundi, part 1, which gives a topographical description of England by counties, with lists of the bishops' sees and monasteries in each, and the second part lists of the archbishops of the whole world and their suffragans, and added thereto a chronicle of England from the fabulous times to the death of Richard I. Bishop Nicholson (Eng. Hist. Library) characterizes Gervase as a diligent and judicious historian; and Wright (Brit. Br. Lit.) says his writings show great care in collecting information, and discriminating in the text. In 1891, he published his chronicle of the reigns of Stephen, Henry, and Richard, as one of the most valuable of the historical memorials of the 12th century. His works, except the Magna Mundi, were published in Twysdon's Historia Anglica Scriptores (London, 1664-67, 3 vols. 12mo.), and an English translation of his Tractatus de Camblia, etc., is given in the Report of the Proceedings of the British Archæological Association, at the first General Meeting, held at Canterbury in the month of September, 1844, ed. by Alfred John Dunkin (Lond. 1844, 8vo.).

Genuine. See GARDITE.

Ge'sem (Vieyu), a Grecized form (Judith i, 9) of the name of the land of Goshen.

Gessin, Friedrich Helnrich Wilhelm, a distinguished Oriental scholar, was born at Nordhausen February 3, 1785. After finishing his education at the universities of Helmstedt and Göttingen, he became a private tutor at the seminary at Helmstedt. In 1806 he became private docent at the University of Göttingen, and in 1809 professor of ancient literature at the college of Heiligenstäd. In 1810 he became extraordinary, and in 1811 ordinary professor of Oriental literature. In 1825 he received the degree of doctor of divinity; and in 1829 he made a scientific journey to Paris and Oxford, where he chiefly collected material for his projected Hebrew dictionary. He died Oct. 23, 1842. Gessin was an outstanding adherent of the Rationalistic school. In the study of Oriental languages, his works, which had an almost unprecedented circulation, began a new era. The most important among them are: Hebräisches und Chaldäisches Handwörterbuch (Lpz. 1810-1812, 2 vols.; 7th ed. 1868; Latin ed. 1833; 2 ed. by Hoffmann, 1847; Eng. transl. by C. Leo, Cambridge, 1829; by J. W. Gibbes, Andover, 1824, and by Robinson, Boston, 1830); Hebräische Grammatik (Halle, 1818; 20th ed. by Dr. Rödiger, 1866; English transl. by M. Stuart, Andover, 1826, and by Conant, Boston, 1838; also an French transl.); Hebräisches Lexicon (Halle, 1814; 7th ed. by Heidrich, 1868); Hebrew and English Dictionary (2 vols.; 2nd ed. by Dr. Heidrich, 1868); Anti-Semitische Sammlungen (Leips. 1815; 2nd ed. 1827); De Pentateuchi Samalrandio origine inole et motocitar (Halle, 1815); Grammatik-Krit. Lehrbüchlein der hebr. Sprache (2 vols.; Leips., 1817).—Uebersicht des Propheten Jer. mit einem nebst. Krit. u. Krit. Commentarii (3 vols., Leips. 1819-1821; 2nd ed. 1829).
Ibrahim Pasha, flushed with victory, and maddened by the obstinacy of a handful of Druses, attempted to follow them into this stronghold; but scarcely a soldier who entered returned. Every nook concealed an enemy... The Lejah has for ages been a sanctuary for outlaws, and not unfrequently a refuge for the oppressed (Hammouda Pasha, p. 605). See ACRE.

Geshur is first associated with Aram or Syria as among the conquests of Jair, the son of Manasseh. After stating that he had three and twenty cities in the land of Gilead, it is said, Jair took "Geshur and Aram, the towns of the east land, from Hazor to Ke-nath, and the towns thereof, three-score cities" (1 Chron. ii, 23). While these places were taken, they were held only as subject territories, still to a great extent occupied by their original inhabitants. See HAVOTH-JAIR. According to the boundaries of the Holy Land, as defined by Moses, Geshur would have formed part of it; but in Josh. xiii, 2, 13, it is stated that the Israelites had expelled neither the Geshurites nor the Maachathites, but dwelt together with them. That the Hebrews did not afterwards permanently subdue Geshur appears from the circumstance that, in David's time, the king of Geshur had his residence in Tamar, daughter of David, who was one of the wives of David (2 Sam. iii, 8; 1 Chron. iii, 2). She was probably a person of superior beauty, as she became the mother of the two handsomest of David's children, Amnon and Tamar. He should have thought of getting a wife from such a quarter, or what prior link of connection between him and the king of Geshur might have led to such a result, is left unnoticed in the history. But possibly the Geshurites, who are mentioned among the tribes against whom David made incursions while he dwelt in Ziklag (1 Sam. xxvii, 8), and who, from the name being once found in connection with the Philistines (Josh. xiii, 5), are generally supposed to have been a different tribe from the other, may, after all, have been the same. See GESHER. The Geshurites, very probably, from the geographical details of the Bible, in which it is closely connected with Argob. Their chief argument is that Geshur signifies "a bridge," and there is a bridge on the upper Jordan. Porter, after a careful survey of the whole country, was led to the conclusion that Ge- shur embraced the northern section of the wild and rocky provinces now called Jezrulam, and formerly Trachonitis and Argob. It probably also took in the neighboring plain to the north as far as the banks of the Pharpar, on which there are several important bridges; but on the approach of the Israelites, the people may have concentrated themselves in their rugged stronghold, where the Israelites deemed it prudent to leave them than to attempt to expel them. The wild tribes that now occupy that region hold a somewhat similar position, being really independent, but nominally subject to the Porte (see Journ. of Sac. Lit., July, 1854, p. 300; Porteus Demoussos, vol. i, pp. 70, 82). The same reasoning applies to the Aramaeans, who have also held the same position.

2. A people who dwelt on the south-western border of Palestine, adjoining the Philistines (Josh. xiii, 2). They appear to have been nomads, and to have roamed over the neighboring desert, though occupying for a time at least a portion of Philistia. "David went up and invaded the Geshurites, and the Gezrites, and the Amalekites; for those nations were of old the inhabitants of the land as thou goest to Shur, even unto the land of Egypt." (1 Chron. xxi, 16). These, however, appear to have been but a branch of the foregoing tribe, settled more or less permanently on the maritime outskirts of Judah. Schwartz finds the latter "in the modern village Adakor, one mile from their Dibon, called the Land of the Nofites (1 Chron. xxi, 16). These, however, appear to have been but a branch of the foregoing tribe, settled more or less permanently on the maritime outskirts of Judah. Schwartz finds the latter "in the modern village Adakor, one mile from their Dibon, called the Land of the Nofites (1 Chron. xxi, 16). These, however, appear to have been but a branch of the foregoing tribe, settled more or less permanently on the maritime outskirts of Judah. Schwartz finds the latter "in the modern village Adakor, one mile from their Dibon, called the Land of the Nofites (1 Chron. xxi, 16). These, however, appear to have been but a branch of the foregoing tribe, settled more or less permanently on the maritime outskirts of Judah. Schwartz finds the latter "in the modern village Adakor, one mile from their Dibon, called the Land of the Nofites (1 Chron. xxi, 16). These, however, appear to have been but a branch of the foregoing tribe, settled more or less permanently on the maritime outskirts of Judah. Schwartz finds the latter "in the modern village Adakor, one mile from their Dibon, called the Land of the Nofites (1 Chron. xxi, 16). These, however, appear to have been but a branch of the foregoing tribe, settled more or less permanently on the maritime outskirts of Judah. Schwartz finds the latter "in the modern village Adakor, one mile from their Dibon, called the Land of the Nofites (1 Chron. xxi, 16). These, however, appear to have been but a branch of the foregoing tribe, settled more or less permanently on the maritime outskirts of Judah. Schwartz finds the latter "in the modern village Adakor, one mile from their Dibon, called the Land of the Nofites (1 Chron. xxi, 16). These, however, appear to have been but a branch of the foregoing tribe, settled more or less permanently on the maritime outskirts of Judah. Schwartz finds the latter "in the modern village Adakor, one mile from their Dibon, called the Land of the Nofites (1 Chron. xxi, 16). These, however, appear to have been but a branch of the foregoing tribe, settled more or less permanently on the maritime outskirts of Judah. Schwartz finds the latter "in the modern village Adakor, one mile from their Dibon, called the Land of the Nofites (1 Chron. xxi, 16). These, however, appear to have been but a branch of the foregoing tribe, settled more or less permanently on the maritime outskirts of Judah. Schwartz finds the latter "in the modern village Adakor, one mile from their Dibon, called the Land of the Nofites (1 Chron. xxi, 16). These, however, appear to have been but a branch of the foregoing tribe, settled more or less permanently on the maritime outskirts of Judah. Schwartz finds the latt
Gessius, TIMAN, M.D., was born at Amersfoot near the close of the 16th century. His father, Cornelius Gessius, was rector of the Latin school at that place, but lost his situation in consequence of refusing to subscribe the canons of the Synod of Dort. His son Timan, associate rector, holding his father’s sentiments upon the same and losing his situation as a doctor of medicine, established himself first at Nymegen, and subsequently at Utrecht as a practising physician. He deserves mention here chiefly on account of his labors in Church history. His principal works are: Historia sive et ecclesiastica ordinis chronologica et r e rationem temporum, etc. (Traj. 1630); Historia temporum memoriae in orbe gestorum ab anno mundi usque ad annum Christi 1625 (Traj. 1681). See Gessius, Godgeleerd Nederland, 1 D. blz. 517 en verv. (J. P. W.)

Gesner, SALOMON, D.D., a Lutheran divine, was born in Silesia in 1559, appointed professor of theology at Wittenberg in 1582, and died in 1606. He wrote Commentationes in Psalmo Davidis (Wittenb. 1592, fol.—Darling, Cyclopi, Bibliographica, s. v.; Melchior Adam, Vita Theologorum, etc., i, 352.

Ge(ther) (Heb. id. "כִּחֵר", signif. unknown; Sept. Γαρπ v. r. Γαρσιά), the name of the third of the sons of Aram (Gen. x, 23). B. C. post. 2513. Josephus (Ant. i, 6, 4) makes him the ancestor of the Buctrians (but see Michaels, Speilieg, l. c. 138); and in the traditional legends of the Arabs one Ghathir appears as the source of the Tamudites in Irakj and the Jadi-sites in Jenama (Abulf. Hist. Antiqu., p. 16). The Arab. vern. of the Polyglot has the Geramzahi, a tribe which in the time of Mohammed must have inhabited the district of Mounl. See ARABA. Jerome (ad loc.) confuses the Ghathir or Gethur (l. c. 103), and it is doubtful whether the river Centrites, mentioned by Xenophon (Anab. iv, 8, 1) and Diodorus Sic. (xiv, 27), and which lay between the Carduchians and Armenians, may not have derived its name from Gether; and Le Clerc finds a trace of the name in Cuthara (Κυθήρα), a town on the Tigris (Ptol. v, 18). Kalsch (Commentary, ad loc.) thinks it may be but an Aramean form of Geshar, an identification already proposed by Thomson (Land and Book, i, 386). (See Schulteiss, Parad. p. 282.) See ARAM.

Gethsemane (גֵּתְשֶּמָּן v. r. גְּתְשֶּמָּני, prob. for Aramean גִּתְשֶּמֹא, Oil-press, such being doubtless in the vicinity), the name of a small field (מעְתק, πλατ. A. V. "place," Matt. xxvi, 36) or olive-press (τὸ Μαγνῦν, John of Jerusalem, vii, 35), over the brook Kadron, and at the foot of the Mount of Olives, to which Jesus, as often before (comp. Luke xxii, 39), retired with his disciples on the night of his betrayal (Mark xiv, 32), and which was the scene of his agony (q. v.). The Kasron runs in the bottom of a deep ginn, parallel with the eastern wall of Jerusalem, and about 200 yards distant. Immediately beyond it rises the steep side of Olivet, now, as formerly, cultivated in rude terraces. Somewhere on the slope of this mount Gethsemane must have been situated (see Nitzach, De kerto Gethsemane, Viteb. 1756). According to Josephus, the suburbs of Jerusalem abounded with gardens and pleasure-grounds (μαματιας, War, vi, 1, 1; compare v, 3, 2), now, with the exception of those belonging to the Greek and Latin convents, hardly the vestige of a garden is to be seen. There is, indeed, a favorite paddock or close, half a mile or more to the north, on the same side of the continuation of the valley of the Kasron, the property of a wealthy Turk, where the Mohammedan ladies pass the day with their families, their bright, flowing costumes forming a picturesque contrast to the stiff, sombre foliage of the olive-groves beneath the clusters. But Gethsemane has not come down to us as a scene of mirth; its inextinguishable associations are the offspring of a single event—the agony of the Son of God on the evening preceding his passion. Here emphatically, as Isaiah had foretold, and as the name imports, were fulfilled those dark words, "I have trodden the wine-press alone" (ixii, 3; compare Rev. xiv, 20, "the wine-press ... without the city"). "The period of the war," remarks Mr. Gresswell (Letters, etc. viii, 124), "was the vernal equinox; the day of the month about two days before the full of the moon—in which case the moon would not be now very far past her meridian, and the night would be enlightened until a late hour towards the morning;" the day of the week Thursday, or rather, according to the Jews, Friday, for the sun had set. The time, according to Mr. Gresswell, would be the last watch of the night, between our 11 and 12 o'clock. Any recapitulation of the circumstances of that ineffable event would be unnecessary, any comment upon it useless. Outward and eternal garden, in which are eight venerable olive-trees, and a grotto to the north, detached from it, and in closer connection with the Church of the Sepulchre of the Virgin—in fact, with the road to the summit of the mountain running between them, as it did also in the days of the Crusaders (Saniuti, Secret. Pictol. Orih. lib. iii, p. xiv, c. 9)—both securely enclosed, and under lock and key, are pointed out as making up the true Gethsemane. These may be the spots which Eusebius (Onomast. v. r. Γεθσημανι, "where the faithful still resort for prayer," St. Jerome (Lib. de Sth et Nomina, l. c. 277) has mentioned, and from the 4th century downwards some such localities are spoken of as known, frequented, and even built upon. This spot was probably fixed upon at the wish of Helena, the mother of Constantine, in A.D. 326. The pilgrims of antiquity say nothing about these times, the howled olives-trees, whose sage the poetical minds of Lamartine and Stanley shrink from criticizing—they were doubtless not so imposing in the 6th century; still, had they been noticed, they would have afforded undying testimony to the locality—while, on the other hand, few modern travellers would inquire for and adore, with Antonius, the three precise spots where our Lord is said to have fallen upon his face. Against the contemporary antiquity of the olive-trees, it has been urged that Titus cut down all the trees round about Jerusalem; and certainly this is more than Josephus states in express terms (see particularly War, vi, 1, 1, a passage which must have escaped Mr. Williams, Holy City, ii, 437, 2d edit., who only cites v, 3, 2, and vi, 8, 1). Besides, the tenth legion, arriving from Jericho, were posted about the Mount of Olives (v, 2, 3; and comp. vi, 2, 8), and in the course of the siege a carriage was brought along the valley of the Kemron to the fountain of Siloam (v, 10, 2). The probability, therefore, would seem to be that they were planted by Christian hands to mark the spot; unless, like the sacred olive of the Acropolis (Bahr, ad Horod. viii, 55), they may have reproduced themselves as scions from the old roots, a supposition which their shape and position render not unlikely (Alton, Land of the Messiah, p. 204). Maundrell (Early Tract in Palestine,

Garden of Gethsemane as seen from the North.
by Wright, p. 471) and Quaresmasia (Elucid. T. S. lib. iv, ver. c. 7) appear to have been the first to notice them, not more than three centuries ago; the former arguing against and the latter in favor of their reputed antiquity, but nobody reading their accounts would imagine that there were then no more than eight, the locality of Gethsemane being supposed the same. Parallel claims, to be sure, are not wanting in the cedars of Lebanon, which are still visited with as much enthusiasm; in the terebinth, or oak of Mamre, which was standing in the days of Constantine the Great, and even worshiped (Vales. in Euseb. iii, 58); and the fig-tree (Jesus elation) near Nerbudda, in India, which native historians assert to be 2400 years old (Patterson's Journal of a Tour in Egypt, p. 202, note). Still more appositely, there were olive-trees near Lernaea 2500 years old, according to Pliny, in his time, which were a sight of nudely-cut steps... The middle of the 16th century (Nov. Dict. de Hist. Nat. Paris, 1846, xxix, 61). Can there, indeed, be no certainty as to the precise age of the trees; but it is admitted by all travellers that the eight which still stand upon the spot in question bear the marks of a venerable age, and are planted by the same hand, and probably at about the same time. Several young trees have been planted to supply the place of those which have disappeared (Ollin's Travels, ii, 110). Some years ago the plot of ground was bought by the Latin Church; and, having been enclosed in a wall, the interior is left a wild walk and flower-beds after the fashion of a modern European garden: the guardian padre, however, still points out to pilgrims not only "the grotto of the agony," but also the spot where Judas betrayed Jesus, and that where the three disciples slept (Germain, Pilgrimage to Palestine, i, 132). The Armenian or Greek Church, however, still maintains its own site, and has fixed upon another as the proper one, at some little distance to the north of it. But both sites have been deemed by many writers as too public for the privacy of prayer (Thomson, Land and Book, ii, 284). The Latins, however, have not been left out of the question, and the Latin church, which is strongly commented upon by Bartlett (Walks along Zion, p. 98). Dr. Robinson remarks that there is nothing particular in the traditonal plot to mark it as the garden of Gethsemane, for adjacent to it are many similar enclosures, and many olive-trees equally old (Researches, i, 246). He admits, however, that the probability is that the site which Eusebius and Jerome had in view, and as no other site is suggested as entitled to superior credit, we may be content to receive the traditional indication (Tischendorf, Reise in dem Osten, i, 812). It has been visited and described by nearly every modern traveller in Palestine. Some have even heard the ancient name given in connection with this spot, but this was probably borrowed by the Arabs from the Christian traditions. See Jerusalem.

Gezel (Ghreel, elevation of God; Sept. Mount of God), son of Machi of the tribe of Gad, and one of the commissioners sent by Moses to explore Canaan (Num. xxiii, 15). B.C. 1557.

Geulain, Arnold, a Belgian philosopher, born about 1620 at Antwerp, died about 1686 as professor of philosophy at Leyden. He first taught the classics and the Cartesian philosophy at Louvain, but subsequently went to Leyden, where he abducted Catholicism, and finally obtained the chair of philosophy, which he retained until his death. He was the most remarkable disciple of Descartes prior to Spinosa and Malebranche, and his writings contain the germs of some of the doctrines of these later philosophers. He also developed the hypothesis of occasional causes. He wrote Ethica (Amsterdam, 1666); Logica (Amsterdam, 1663); Metaphysica (Amsterdam, 1681). (A. J. S.)

Gezer. See Locust.

Gezer ( Heb. Gzr, prob. a precipice, from m, to cut off; Sept. Gzer, but in Chron. vi, 67 and xx, 4 Gzer, in 1 Chron. xiv, 16 Gzer; in pause Gzrez, which Ewald, Int. Gesch. ii, 427, note, deems the original form), an ancient city of Canaan, whose king, Horm, or Senn, prominent part in the later struggles of Jerusalem, was defeated and probably killed, with all his people, by Joshua (Josh. x, 38; xii, 12). The town, however, is not said to have been destroyed; it formed one of the landmarks on the southern boundary of Ephraim, not far from the lower Beth-horon, towards the Medes. Mount Gedor, on the western slope of the same mountain (Chron. vii, 28). It was allotted, with its suburbs, to the Kohathite Levites (Josh. xxii, 21; 1 Chron. vi, 67), but the original inhabitants were not dispossessed (Judg. i, 29); so that in the time of David the Philistine territory seems to have included it (2 Sam. x, 20; 1 Chron. xi, 4). It descended to the Canaanites (or, according to the Sept. addition to Josh. xvi, 10, the Canaanites and Perizzites) were still dwelling there, and paying tribute to Israel (1 Kings ix, 16). At this time it must, in fact, have been independent of Israelite rule, for Pharaoh had on some occasion burnt it to the ground and killed its inhabitants, and then presented the site to his daughter, Solomon's queen. But it was immediately rebuilt by the latter king (1 Kings ix, 15-21); and, though not heard of again till after the captivity, yet it played a somewhat prominent part in the later struggles of the nation, being the Gastra (Gzara, 1 Mach. vi, 15; vii, 45), or Gasaara (Gzara, 1 Mach. xxvi, 29, 35; xiii, 58; 2 Mach. x, 82), of the Apocrypha and Josephus (Gzara, 2 Macc. xiii, 9, 2), who once calls it Gadara (Gadoura, 2 Macc. viii, 2; 3 Macc. vi, 280), somewhat arbitrarily, takes Gezer and Gebur to be the same, and sees in the destruction of the former by Pharaoh, and the simultaneous expedition of Solomon to Hamath-zobah, in the neighborhood of the seat of Gebur, a strong indication of the fidelity of whom the Geshurites formed the most powerful remnant, and whose attempt against the new monarch was thus frustrated. In one place Gez is given as identical with Gezer (1 Chron. xx, 4; comp. 2 Sam. xxiii, 18). Gezer was perhaps the original seat of the Gerarites (q. v.) whom David attacked (1 Sam. xxvii, 8), in the vicinity of the Amealekites; and as they are mentioned in connection with the Geshurites, they may have lived a considerable distance north of Philistia. Finally, Mount Gerizim (q. v.) appears to have derived its name from the vicinity of this tribe (compare the name Ar-gerizim, by Tischendorf, in Eusebius, Prepr. Evang. ix, 27).

Gezer must have been between the lower Beth-horon and the sea (Josh. xvi, 3; 1 Kings ix, 17), therefore on the edge of the great maritime plain which lies beneath the hills of which Beth-lahim is the last outpost, and forms the regular coast road of communication with Egypt (1 Kings ix, 16). It is therefore appropriately named as the last point to which David's pursuit of the Philistines extended (2 Sam. xvi, 25; 1 Chron. xiv, 16), and as the scene of at least one sharp encounter (1 Chron. xx, 16, xx, 22), this plain being a peculiar territory (comp. Josephus, Ant., viii, 6, 1, Gdora tiven, τὴν γῆν Παλαιστίνην ὄψας ὑπάρχουσαν); and

GHOST, an old English word of Saxon origin (Gern, get), equivalent to soul or spirit, occurs as the translation of the Heb. נ舍不得, נشهد, and the Greek πνεῦμα, both signifying breath, life, spirit, or living principle, by which and similar terms they are elsewhere rendered (Job xii, 20; Jer. xv, 9; Matt. xxvii, 50; John xix, 30). It frequently occurs in the N. T. in the meaning of spirit or Holy Spirit. See SPIRIT. Many cases in which it occurs are those rendered to give up the ghost, etc., all simply signifying to die, e. g. 27:2, to expire (Lam. i, 19; Gen. xxv, 47; xxxv, 39; xlix, 38; Job iii, 17; xii, 18; xliii, 19; xiv, 10); iex nuxin, to breathe out, etc., one’s life (Mark xxv, 37, 38; Luke xxiii, 46); iex φύσις, to breathe out one’s last (Acts v, 5; xii, 20). Many commentators suppose, from the original terms used in the Gospels (πνεῦμα τοῦ πνεῦμα, Matt. xxvii, 50; πνεῦμα τοῦ πνεῦμα, John xix, 30), something preternatural in Christ’s death, as being the effect of his solution. But there is nothing in the words of Scripture to countenance such an opinion, though our Saviour’s volition is supposed to accompany in his offering himself for the sins of the world. The Greek words rendered yielded up, and gave up, are no other than such as is frequently used, both in the Septuagint (Gen. xxxv, 18; comp. Psa. xxx, 5; Eccles. xii, 7) and the classical writers, of expiration, either with the spirit or the soul (Josephus, Ant. x, v, 2, 8; vii, 18, 9; Elian, H. A. ii, 1; Herod. iv, 100. See Spectres.

Ghostly (v. e. spiritual) occurs in the expressions “ghostly enemy” and “ghostly counsel,” found in the Catechism and in the Communion-service of the Church of England, signifying the one our spiritual enemy Satan; the other, spiritual advice preparatory to partaking of the Eucharist (Eden, a. v.). See Spirit, Holy.

Gî'â'eb (Heb. גי'אך, 'יך, a breaking forth sc. of a fountain; Sept. Πυει ται ται, Vulg. simply voluens), a place (probably marked by a spring) opposite the hill Ammah, on the road to the “wilderness (east?) of Gibeon,” where Joshua and Abishai ceased at sun-down from the pursuit of Abner after the death of Asahel (1 Sam. ii, 24). It is perhaps identical with the “pool” mentioned in ver. 13, although in that case the parties must have become far separated in the rout, since they would thus have returned to the spot where the battle began. See GINZON.

Giant, the names of these beings of unusual height are found in the early history of all nations, sometimes of a purely human origin, but more frequently supposed to have partaken also, in some way, of the supernatural and the divine. The scriptural history is not without its giants, and the numerous theories and disputes which have either in consequence render it necessary to give a brief view of some of the main opinions and curious inferences to which the mention of them leads. The English word has several representations in the original Hebrew.

1. In Gen. vi, 4, we have the first mention of giants (תתית), "Naamah, the height of the peaks of the mountains," but better by אינ in full, אינ, e. vio- lent; Sept. γαέσσα, Vulg. gigantes; but more discriminatingly Aquil. אינ, Symm. Βασάνος—"There were giants in the earth in those days; and also after that, when the sons of God came in unto the daughters of men, and they bare children to them, the same became mighty men, which were of old men of renown. And the Lord said, I will destroy man, which is become mighty in the image of God; and the son of man, and the daughter of man, shall hearken unto the mention of the second verse of the same chapter—"The sons of God saw the daughters of men that they were fair, and they took them wives of all which they chose" (see Joesue, Lit. Oct. 1867). Wellbeloved (ad loc.) and others translate and interpret the passage so as to make it speak merely of "men of violence; men who beat down, oppressed, and plundered the weak and defenceless." The same this is an agreement in the meaning of the original word (which occurs also in Numb. xxxii, 33, in connection with the Anakim). But these giants, as in other cases, would naturally be designated by a descriptive name, and great strength is generally accompanied by violence and oppression. In our judgment, the bearing of the passage, obviously favours the common notion of giants, and that the rather because their origin is traced to some unexplained connection with "the sons of God," that is, with beings of high endowments, if not of a superior nature. We have here given, in all probability, the true basis of all those mythological heroisms with which the history of ancient nations is found to begin, such as Hercules and others of a like stamp. It is also especially worthy of note that these are ascribed to a similar parentage, half human, half celestial. Their famous deeds have been immortalized by their dedication in every pro- fane system of religion. This appears to us a more substantial interpretation of the Greek and Roman, and even of the Indian and Scandinavian systems of mythology, than the subtle resolution of these semi-fabulous characters into symbols of the various powers of nature, the well-known theory of common writers. It is simply the traditions of these cases of antediluvian prowess and fame that the early poets of each nation have wrought up into the divine personages of their heroic age. We merely add, that, by the "sons of God" and the "daughters of men" in the above passages, we are doubtless to understand the descendants of Seth and Cain respectively (see Genesis, Heb. Thesaurus, p. 96); yet Kitto inclines to regard the former as angelic beings (Daily Illust. ad loc.). See Nephilim.

2. In Gen. xiv, 5, we meet with a race termed Rephaim (רפאים), as settled on the other side of the Jordan, in Ashteroth-Karnaim, whom Chedorlaomer defeated. Of this race was Og, king of Bashan, who alone remained, in the days of Moses (Deut. iii, 10), of the remnant of the Rephaim. A passage, which is obviously from a later hand, goes on to say, "Behold, his bedstead (רפאים, canop, others coffin; see Michaelis, Dathe, Rosenmüller) was a coffin of iron; is it not in Bashan? For the children of Ammon have four cubits its length and four cubits its breadth, according to the cubit of a man," or the natural length of the cubit. See CURT. It does not appear to us to be obvious to say that Og was "no doubt a man of unusual stature, but we cannot decide with accuracy what his stature was from the length of the iron coffin of state or coffin in which he was placed" (Wellbeloved, ad loc.). Whatever theory of explanation may be adopted, the writer of the passage clearly intended to speak of Og as a giant, and one of a race of giants (compare Josh. xii, 4; xiii, 12). See OOG. This race gave their name to a valley near Jerusalem, known by the Sept. γαέσσα υπ’ τίνων. See Rephaim.

The repikim (A. V. "dead") of Job xxvii, 5; Prov. ii, 8, etc., are doubtless the shades of the departed. See DEAD.

3. The Anakim (אַנָּקִים, אַנָּקִים, sons of Anak), in Numb. xiii, the spies sent by Moses before his army tosurvey or reconnoitre the promised land, reported among other things, "The people be strong that dwell in the land; and, moreover, we saw the children of Anak" (verse 29). This indirect mention of the children of Anak shows that they were a well-known gigantic race. In the 32d and 33d verses the monument is enhanced. It is a land that setteth up the inhabitants, the very people that we saw in it are men of great stature. And there we saw the giants, the sons of Anak which
GIAN

came of the giants; and we were in our own sight as
grasshoppers, and so we were in their sight." However
ever much of exaggeration fear may have been given
the description, the passage seems beyond a doubt to show
the current belief in a race of giants (Deut. ix. 2).

From Deut. ii, 10, it appears that the size of the Ana-

kim was not unusual, and was usual; a standard

with which to compare others. In the time of Moses they
dwelt in the environs of Hebron (Josh. xi. 22).

They consisted of three branches or clans—"Abiman,
Sheshal, and Talmal—the children of Anak." (Numb.
xxii, 23). They were destroyed by Joshua (Josh. xi.
21) from the mountains of Hebron, from Sihor, from

Aban, and from all the mountains of Judah, and from
all the mountains of Israel; Joshua destroyed them
utterly with their cities. There was none of the Ana-
kim left in the land of the children of Israel: only in
Gaza, in Gath, and in Ashdod, there remained them
(Judg. i. 20; Josh. xiv. 19). See ANAKIM.

From this remnant of the Anakim thus left in Gath
in the Philistines proceeded the famous Goliath (גָּלִּ֔ית),
1 Sam. xvii. 4. This giant is said to have been in

height six cubits and a span. He challenged the army
of Israel, and put the soldiers in great alarm. The

army of the Philistines and that of Israel were, how-
ever, on the point of engaging, when David, the young-

est son of Jesse, came near, bringing, at the command
of his father, the supply of provisions of three eldest

brothers, who had followed Saul to the battle; and,

becoming aware of the defiance which had been again

hurled at the armies of the living God," he at once
went and presented himself as a champion to the king;

was offered, but refused, a cost of mail; and, arming
himself solely with a sling, smeared the Philistine in
his forefront, so that he fell upon his face to the earth,
and was decapitated by David with his own sword. A
general victory ensued. This achievement is ascribed
to the divine aid (xvii, 46, 47). In 2 Sam. xxvi, 19,
"Goliath the giant, the staff of whose spear was like a
weaver's beam," is said to have been slain by Elha-
nan, a chief in David's army. This apparent contra-
diction the common version tries to get over by in-
serting words to make this Goliath the brother of him
whom David put to death. Some suppose that the
former was a descendant of the latter, bearing the
same, perhaps a family name. See, however, the par-
allel passage in 1 Chron. xxvii, 5. Other giants of the
Philistines are mentioned in the passage before cited,
2 Sam. xxii, 16 sq., namely: 1. "Jehish-benoch, which
was as great as a giant, the weight of whose spear
weighed three hundred shekels of brass being gird-
ed with a new sword, thought to have slain David;
but Abishai, the son of Zeruiah, succored him, and
smote the Philistine and killed him." 2. Saph, who
was of the sons of the giant, and was slain by Sibbe-
chaim. 3. A man of great stature, that had on every
hand six fingers and on every foot six toes, four and
twenty in number, and he also was born to the giant;
and when he defied Israel, Jonathan, the son of Shim-
cab, the brother of David, slew him." These four
were sons of the giant in Gath, that is, probably, of the
Giant of Gath whom Sisera a molar tooth (Gen. xix.
8; 2 Sam. xx, 22; 1 Sam. xvii, 4). See each of these
names in their alphabetical order.

4. Another race is mentioned in Deut. ii, 10, the
Emim (ם"ש), who dwelt in the country of the Moab-
ites. They are described as a people "great and
many, and tall as the Anakims, which were also ac-
counted giants." (Gen. xiv, 8). See EMIM.

5. The Zamzummim also (ם"שילש), (Deut. xxii, 20),
whose home was in the land of Ammon—"That also
was accounted a land of giants: giants dwelt therein
of old time, and the Ammonites called them Zamzum-
imms, a people great and many, and tall as the Ana-
kims; but the Lord destroyed them before them, and
they (the Israelites) succeeded them, and dwelt in
their stead." See ZAMZUMMIM.

6. The only other passage where the term "giant"
occurs (except as a rendering of yiqaq in Judith xvi,
6; Wisd. xiv, 7; Ecclus. xvi, 7; xlvi, 4; Bar. iii, 26;
1 Mac. iii, 8) is Job xvi, 14, where the original is
"23, elsewhere "a mighty man," i.e. champion, or
hero. See GIBBON.

All nations have had a dim fancy that the aborigines
who preceded them, and the earliest men generally,
were of immense stature. Berossus says that the ten
entombed ancestors of the Chaldeans were giants, and we
find in all monkish historians a similar statement about
the earliest possessors of Britain (comp. Homer,
Od. x, 119 Augustin, De Civ. Del. xv, 9; Pliny, vii,
16; Varro, ap. Aur. Gelidia, iii, 10; Jerome on Matt.
height; and in the latter descriptive Deluge (2 Esdr.
v, 62-65). That we are dwarfs compared to our ancestors was a common belief among the Latin and Greek poets (H. v, 802 sq.; Lucret. ii, 1151; Virg. AEn. xii, 900; Juv. xv, 69). On the origin of the mistaken supposition there are curious passages in Natales Correr in Mytholog. vi, 21) and Mac Crias (Na-
turn. i, 20). See NIMROD. At an early period and
under favorable circumstances, individuals, and even
tribes, may have reached an unusual height and been
of extraordinary strength. This was in great part, no
doubt, owing to the slight age at which the hardest
work was usually permitted in early times. But many
things concur to show that the size of the race did not
differ materially from what it is at present. This is
seen in the remains of human beings found in tombs,
especially among the mummies of Egypt. To the
same effect is the size of ancient architectural monuments, and the measures of length which have been received from antiquity. Ancient
writers who are free from the influence of fable are
found to give a concurrent testimony. "Homer,
when speaking of a fine man, gives him four cubits in
height, and in a base description, Vitruvius fix the usual

standard of a man at six Roman feet; Aristotle's ad-
measurement of beds was six feet" (Millingen's Curios-
istica of Medical Experience, p. 14). No one has yet
proved by experience the possibility of giant races,
matterly exceeding in size the average height of man.
We have no great variation in our standard. The most
stunted tribes of Esquimaux are at least four feet high,
and the tallest races of America (e.g. the Guayasquilas and people of Paraguay) do not exceed six feet and a half. It was long thought that the Patagonians were men of enormous stature, and further in the voyages of the old voyagers their opinion was positive. For instance, Pigafetta (Voyage round the World, Pinkerton, xi, 314) mentions an individual Patagonian so tall that they "hardly reached to his
waist." Similar exaggerations are found in the voy-
ages of Byron, Wallace, Carteret, Cook, and Forster;
but it is a matter ofcertainty, from the recent vis-
to Patagonia (by Winter, captain Snow, etc.),
that there is nothing at all extraordinary in their size.
The general belief (until very recent times) in the
existence of fabulously enormous men arose from fancied
giants gravestone (See de la Ville's Tragedy 1 Pericles, ii, 89), and, above all, from the discovery of huge bones,
which were taken for those of men, in days when
comparative anatomy was unknown. Even the an-
cient Jews were thus misled (Josephus, Ant. v, 2, 3).
Augustine appeals triumphantly to this argument, and
mentions a tooth which he had seen at Utica a hun-
da times longer than ordinary teeth (De Civ. Del.
, 9). No doubt it once belonged to an elephant.
Vives, in his commentary on the place, mentions a
tooth as big as a fist which was shown at St. Christo-
fer's. In this case it was a tooth recently very
recently been dispelled (Martin's West. Indians, in Pin-
kerton, ii, 681). Most bones which have been exhibi-
lised have turned out to belong to whales or elephants, as was the case with the vertebrae of a supposed giant examined by Sir Hans Sloane in Oxfrodshire. On the other hand, isolated instances of monstrosity are sufficiently attested to prove that beings like Goliah and the behemoth are not mere fables. (R. iii, § 2) mentions Navius Pollio as one, and Pliny says that in the time of Claudius Caesar there was an Arab named Gabbaras nearly ten feet high, and that even he was not so tall as Pusio and Secundilla in the reign of Augustus, whose bodies were preserved (vii, 16). Josephus tells us that, among other boastments, his ancestor, Artabanus sent to Tiberius a certain Eleazar, a Jew, surmounted "the Giant," seven cubits in height (Ant. xviii, 4, 5). Porus, the Indian king, was five cubits in height (Arrian, Ep. Al. v, 19). Nor are we well-authenticated instances wanting in modern times. Delrio says he saw in 1572 a man from Piedmont whose height exceeded nine feet (Not. ad Senec. Ed. p. 30. O'Brien, whose skeleton is preserved in the Museum of the College of Surgeons, must have been eight feet high, but his unnatural height made him weakly. On the other hand, the blacksmith Parsons, in Charles II's reign, was only seven feet two inches high, and also remarkable for his strength (Fuller's Worthies, Staffordshire). The tallest person of whom we have a trustworthy record did not, according to Haller, exceed nine feet. Schreber, who has collected the description of the giant of Lichtenstein in modern times, says he was seven feet and a half, although he mentions a Swedish peasant of eight feet Swedish measure; and one of the guards of the Duke of Brunswick as eight feet six inches Dutch. Such well-known instances as those of Daniel Lambert and others in modern museums probably come fully up to any of the measures of the Biblical giants. See art. Giant in the Encyclopaedia Metropolitana: Whiston, "On the old Giants," Auth. Records, ii, 872-906; Prichard, Researches into the Physical History of Mankind, i, 358 (1836).

Glib, Adam, one of the founders of the anti-burgher secession in Scotland, was born in Perthshire in 1713, and educated in Edinburgh. He was a bitter opponent of private church patronage, and in 1733 was dismissed from his pastoral charge. He was made pastor of a secession church in Edinburgh in 1741, and when the Church began the declension of the oaths of burgesses, Mr. Gib was considered the ablest advocate of the anti-burgher party. He died in 1738. He published A Display of the Secession Testimony (1744, 2 vols. 8vo):—Sacred Contempurations, with an essay appended on Liberty and Necessity in reply to Lord Kinghorn (1746).—Allibone, Dictionary of Authors, i, 660:—Rose, New General Biographical Dictionary, viii, 18.

Gib'bar (Chalda. Gibbar,' גִּבֹּר, for Heb. גִּבּ, a hero, as inDan. lii, 20; Sept. Φαλις, Vulgate Gебbar), given as the name of a man whose descendants to the number of 59 returned with Zerubbabel from Babylon (Ezra ii, 20), probably an error for the remnants of the natives of Gireon ( Nah. vii, 20).

Gibb'ethon (Hebrew Gibbethon,' גִּבְעַתָּן, a height; Sept. Γίμαθων v. r. Γίμαθων, Γιμαθών, Γιμαθών, and Βυζαντόν, a city of the Philistines, which was included in the territories of the tribe of Dan (Josh. xix, 44), and was assigned, with its " suburbs," to the Kohathite Levites (Josh. xxv, 28). It was still in the hands of the Philistines in the time of David, who subdued it, and who knew it, and acquainted his sons with the necessity of pursuing the usurper Zimri (1 Kings xvii, 15). B.C. 926. It is said by Eusebius and Jerome (apparently even to their time) to be inhabited by Gentiles (τὸν Ἀλλοτρόφων Γαβαζών), but they expressly distinguish this from the Danite town, and they seem uncertain whether to identify it with a village (παλίγγισ) called Gaba (Γαβά), about 10 r. m. south of Cesaarea, near the great plain of Lagis, or with one of the two or three other places named Gaba (Γαβά, Γαβάθων, s. v. Γαβαζών, Gabathoen). Josephus (Ant. viii, 12, 5) calls it Gabathone (Γαβαθόνη). The signification of the name and the great strength of the place seem to fix it upon the hills west of Gibeah of Benjamin (with which M. D. Saulcy confounds its locality, Narratur, i, 96). It is only the modern Gib'ath, a little less than a short distance beyond the well S. E. of Ramleh (Robinson, Researches, iii, 21). Van de Velde calls it also Shelh Musa (Muson, p. 114).

Gibbites, The, a small fanatical sect in Scotland about 1861, named from their leader, John Gibb, a sailor. They never exceeded thirty persons. Their doctrines were a compound of Quaker ideas, with some of the extreme speculative views of the strict Covenanters. They were seized as a body, put into the House of Correction, and soon ceased to exist as a sect. —Hetherington, Church of Scotland, ii, 114. See Sweet Singers.

Gibbon, Edward, historian, was born at Putney, in Surrey, April 27, 1737. He was sent to Oxford too young, and did not learn much there. At sixteen he embraced Romanism. He was immediately placed under the care of a Jesuit priest; but after a few months the Jesuits' instructions led him in a few months back to Protestantism. "The five years he spent at Lausanne, closing in 1768, when he was just of age, formed the real commencement of his education; and at their close, he was not only a ripe scholar in French and Latin, but possessed of an amount of learning, as well as of good sense, and other information. He found leisure, however, for falling in love, unsuccessfully, with a young lady, who afterwards became the wife of M. Necker, and the mother of Madame de Stael. For several years after Gibbon's return to England he lived chiefly at his father's house in Hampshire, and, failing in attempts to obtain diplomatic employment, he accepted a military commission, attended zealously to his duties, and rose to be lieutenant-colonel. But the studious habits and literary ambition which he had acquired never flagged. In 1761 he published, in French, a short essay on The Study of Literature. He extended his acquaintance with English authors, and, beginning to learn Greek thoroughly, pursued the study zealously, when, in 1763, he was allowed again to visit the Continent. In Rome, next year, he conceived the design of his great historical work. Returning home in 1765, he passed some years unsatisfactorily to himself, but not without much improvement both in knowledge and in skill of writing. In 1774 he entered the House of Commons, in which he sat for eight sessions; and he was rewarded for his silent votes in favor of Lord North's administration by holding for three years a seat at the Board of Trade. In 1770 he published, in answer to Warburton, his spirited Dissertation on the Sixth Book of the Aeneid. In the same year, the death of his father placed him in possession of a fortune, which, though he was embarrassed, he was able to extricate so far that it afforded him a handsome competence, and enabled him to devote himself exclusively to study and composition. In 1776 he published the first volume of The History of the Decline and Fall of the Roman Empire, the first edition of which was sold in a few days, and was rapidly followed by other places. The 20 volumes, appearing in 1781, brought down the narrative to the fall of the Western Empire; and for a while the author hesitated whether he should not here allow the work to drop' (Rich, Biog. s. v.). He resumed the design, however, and many years after he had fixed his decision to pursue the same, and prepared the remaining volumes, the last of which appeared in 1788. He died January 16, 1794, during his last visit to England. His posthumous
works were published by his friend Lord Sheffield. The best editions of the "Decline and Fall" are that of Milman (Lond., 1846, 6 vols., 8vo, 2d edit.), and that by Dr. Wm. Smith (1855, 8 vols., 8vo). In a literary point of view, the merits of this history are very great; its style has a harmony in it nearly or remotely touched on. Its skepticism leads him into manifold displays of unfaithfulness and even into inaccuracies, which are corrected in Milman's notes. Dr. J. M. Macdonald wrote an able article in the Bibliotheca Sacra (July, 1868), defending Gibbon from the charge of infidelity, and seeking to account for the opposite opinion about his so generally adopted. The attempt is very ingenious, but will not shake the established opinion.—Milman, Life of E. Gibbon (Lond. 1839, 8vo); Quarterly Review, xxi., 375; ixii., 196; Literary and Theol. Review, ii., 38; Christian Review, xiii., 94; National Review, Jan. 1868.

Gibbon, Thomas, D.D., a pious and eminent English historian, was born at Reay, near Caithness, Dec. 5, 1737, and died at St. Alban's, Dec. 17, 1794. He was a member of a Congregational church at Olney, in Bucks, gave him the best education his circumstances would permit. In 1742 he became acquainted with Dr. Isaac Watts; and by showing him a volume of poems in manuscript, an intimate friendship was formed between them, which continued unabated to the close of Dr. Watts's life. In 1748 Dr. Gibbon was called to the pastoral charge of the Independent church meeting in Haberdashers' hall, Cheapside, which he held till his death, Feb. 27, 1786. He wrote Memoirs of Dr. Watts (1780, 8vo); Poems, on several Occasions (1784); Egotistic; or, a View of its principal Tropes and Figures, in their Origin and Power (1767, 8vo); Hypena (1769): Hypena, second series, entirely original (1784); Lives and Memoirs of eminent Pioua Women (1777, 2 vols. 8vo). After Dr. Gibbon's death, three volumes of sermons by him were published in 8vo by subscription. Some of his hymns are still used, and will continue to hold their place in Christian song.—Jones, Christian Biography, p. 177; Darlington, Cyclop. Bibliography, 1. 244.

Gibbonism, plur. of "Gibbon," a warrior ( Isa. iii, 2; Ezek. xxxix, 20); especially spoken of David's noted braves or "mighty men" (2 Sam. xxiii, 8; 1 Chron. xvi, 24; xxv, 24). See Chaldea, in the marines of the U.S. Navy, as specified in Gen. vi, 1-4, are called "Gibbonism" (דֵּנֶּבָרָה, from וּדֵנֶּב, to be strong), a general name meaning powerful (יִשֶׁבֶת) and powerful (יִשָּׁב בַּּהֲלֹה) in a twofold power or strong and powerful (יִשָּׁב בַּּהֲלֹה), Philo, De Orig., p. 270; comp. Isa. xlix, 21; Ezek. xxvi, 21). They were not necessarily giants in our sense of the word (Theodoret, Quart. 49). Yet, as was natural, these powerful chiefs were almost universally represented as men of extraordinary stature. The Sept. renders the word γίγαντες, and call Nimrod a γίγας ουρηρακόα (1 Chron. 1, 10): Augustine calls them Satan's companions (Civ. Dei, xvi, 4): Chrysostom ὡσαμὲν ὁμομοῦ, Theodoret ἐκμιμέχας (comp. Bar. iii, 25, ἐκμιμέχας, ἐκτασιναίον πρόκλυμα). These beings are chiefly interesting as connected with the question, Who were their parents, "the sons of God" (טַנְנִי עָשָׂרָה)? The opinions respecting the import of this latter title are various: (1) Mem of power (τῶν ἐναρκτών), Symm., Jerome, Quest. Hebr. ad loc. (יוֹדַע וְיִפְּנָהו, Onk. יְפִיוּנֵהו וְבַּד, Samar. יַפְנָהו וְבַּד, Hosea, 2, 10), (comp. Psa. li, 7; 1xxii, 6; 1xxxix, 27; Mic. v, 6). The expression will then exactly resemble Homer's Διονυσίων θεοί, and the Chinese Tián-tiēu, "son of heaven," as a title of the emperor (Geussius, s. v. 33). But why should the union of the high-born and the low-born produce offspring unusual for their size and strength? (2) Mem with great gifts, "in the image of God" (Ritter, Schumann); (3) Cainites arrogantly assuming the title (Paulus); or (4) the pious Sethites (comp. Gen. iv, 20; Maimon. De Nativ. Lib. i, 14; Suid. s. v. πανταξένης καὶ μυστήρια; Clemen. Hist. Comp. 10; Augustinus, De Civ. Dei, xv, 28; Chrysost. Hom. 29, in Gen.; Theol. in Gen. Quatt. 47; Cyril, c. Jul. ix, etc.). A host of modern commentators catch at this explanation, but Gen. iv, 26 has probably no connection with the subject. So the word was quoted in the favor of the view are Deut. xiv, 1, 2; Psa. lxix, 15; Prov. xv, 26; Hos. i, 10; Rom. viii, 14, etc. Still the mere antithesis in the verse, as well as other considerations, tend strongly against this gloss, which indeed is built on a foregone conclusion. Compare, however, the Indian notion of the two races of men Surs and Asturas (children of the son of the moon, Nork, Brann. und Robb. p. 204 sq.), and the Persian belief in the marriage of Jamshed with a sister of a der, whence sprang black and impious men (Kalisch, Gen. p. 175). 5. Worshipers of false gods (ποιήματα τῶν θεῶν, Chrysostom, Hom. 29, De Civ. Dei, xvi, 4, Prov. xiv, 26; Deod. xxvi, 11; Deut. iv, 28, etc.). This view is only supported by Poole in Genesis of Earth and Man, p. 59 sq. (6). Devils, such as the Incubi and Succubi. Such was the belief of the Cabbalists (Valenius, De S. Philo. cap. 8). These beings can have intercourse with women of pure heart Augustus declares it to be folly to doubt, and it was the universal belief in the East. Mohammed is the one of the ancestors of Belkis, queen of Sheba, a demon, and Damir says he had heard a Mohammedan doctor openly boast of having married in succession four demon wives (Bochart, Hieros. l. p. 474). Indeed, the belief still exists (Lane's Mod. Aram. Lexicon, p. 17 1). (7) Closely allied to this is the oldest opinion, that they were angels (Sept. δυνάμει τῶν θεῶν, for such was the old reading, not vic.), and perhaps was手续费的 (De Civ. Dei, xv, 28; so too Josephus, Ant. i, 5, 1: Philo, De Veg. 2, 346; Clem. Alex. Strom. iii, 7, 99; Sulp. Sever. Hist. script. in Orat. 1, i, etc.; compare Job i, 6; i, 11; Psa. xxix, 1, Job iv, 16). The rare expression "sons of God" certainly means angels in Job xxxviii, 7: i, 6; ii, 1; and that such is the meaning in Gen. vi, 4 also, was the most prevalent opinion both in the Jewish and early Christian Church. It seems, however, to be directly negatived by Matt. xxii, 30. Seethe. 39, 40 sqq., 14, 15 sqq.

It was probably this very ancient view which gave rise to the spurious book of Enoch, and the notion quoted from it by Jude (6), and alluded to by Peter (2 Pet. ii, 4; compare 1 Cor. xi, 10; Tertul. De Virg. Vel. 7). According to this book, certain angels, sent by God to guard the earth (Gen. vi, 1-4), were perverted by the beauty of women, "went after strange flesh," took sorcery, finery (lumina lapilliarum, circulos ex aure, Tertullian, etc.), and, being banished from heaven, had sons 3000 cubits high, thus originating a celestial and terrestrial race of demons." Undoubtedly the valli subventrum corporis multa" (Commendoni Instr. III, Cultus Daemonum, i. e. they are still the source of epilepsy, etc. Various names were given at a later time to these monsters. Their chief was Leuizas, and of their number were Machaela, Aza, Shemchzazai, and (the word is given in them) in great-like angels (Gen. i, 13, 14, 22, 40). And Azazel, Lev. xvi, 8; and for the very curious questions connected with this name, see Bochart, Hieros. l. 652 sqq.; Rab. Eliezer, cap. 23, Bereshith Rab. ad gen. vi, 2; Sennett, De Gigantibus, iii. See Asmodoeus. Against this notion (which Havericks calls "the slightest whim of the Alexandria, historic and literal history), De Pormpaeus, p. 845) Heidegger (Hier. Patr. 1, c. 6) quotes Matt. xxii, 30; Luke xxiv, 39, and similar testimonia. Philastro (Anas, Hares.)
GIBBS

BIBLICAL CHALDEE; 1828; 2d edit. enlarged, New Haven, 1882, 8vo.
In 1824 he was called to be lecturer of sacred literature in the theological school of Yale College.
In 1826 a professorship in that branch was founded, to which Mr. Gibbs was called. He remained in this post until his death, March 25, 1861, at New Haven.
Professor Gibbs was a constant contributor to periodicals,
Bib'ele (Heb. Gbha', גֵּבֵה, hill; Sept. Taphad à
r. Taphādā, a place built or occupied in connection
with Machach, son of Caleb's grandson Machach (1 Chron. ii. 49); hence probably the same with Gibeáh (q. v.) of (Judg. xix. 57).
Gib'ēth (Heb. Gbēhə, גִּבְּהָ, a hill; as the word is sometimes rendered; likewise the Sept., which usually has Gbēsa', but in Josh. xviii Gbēsa'ēz; Josephus Gbēsa'ēz, Ant. vi. 4, 6), the name of three cities, all doubtless situated on hills. The term is derived, according to Gesenius (Thes. p. 269, 260), from a root, גֵּב, signifying to be round or humped (compare the Latin gibbus, Eng. gibbous; the Arabic jabūb, a mountain; and the German gipfel). It is employed in the Heb. Bible to denote a "hill," that is, an eminence of less considerable height and extent than a "mountain," the term for which is גֵּרָה, kar. For the distinction between the two terms, see Psalms xi; Prov. viii, 29; Isa. ii, 1; xl, 4, etc. In the historical books gibesah is commonly applied to the bald, rounded hills of Central Palestine, especially in the neighborhood of Jerusalem (Stanley, Palest. App. p. 25). There is no lack of the corresponding name among the villages of Central Palestine. Several of these are merely mentioned as appellatives: 1. (Lev. vii, 31; Jer. 19, 3; 121, 2; etc.) the "hill of the forebears" (Josh. v, 3), between the Jordan and the Jezreel; it derives its name from the circumcission which took place there, and the vicinity seems afterwards to have received the name of Gilgal (q. v.).
2. ("The" hill of Kerith-jearim, a place in which the ark remained from the time of its return from the Philistines till its removal by David (2 Sam. vi, 3, 4; comp. 1 Sam. vii, 1, 2). See Kerith-jearim. 3. The place of the routes in the desert of Sharu, which is so difficult to travel in. In Judges i. 10 and 13 it is called "the hill," and in Judges x. 40, 41, it is called "the great high place." See El-ohim. 4. The hill of Hachilah (1 Sam. xxiii, 19; xxvi, 1). See Hachilah. 5. The hill of Ammah (2 Sam. ii, 24). See Ammah. 6. The hill of Gareb (Jer. xxxi, 38). See Gareb. 7. The hill of Geb (Jer. xxxi, 39). See Gereb.

—Smith, s. v.

I. Gibeah of Benjamin is historically the most important of the places bearing this name. It is called 1. "Gibeah of Benjamin" (1 Sam. xiii, 15; 2 Sam. xxii, 29) and "Gibeah of Saul" (1 Sam. xiv, 19; lóphiρ Σαλάου, Josephus, War, v, 2, 1); also "Gibeath of God," rendered hill of God (1 Sam. x, 5); and Gibeath (Josh. xviii, 28, where it is enumerated
GEIBEH 849

GEIBON

among the last town of the groups of Benjamin, next to Jerusalem). This last name (גִּיבְיָה, which frequently appears elsewhere in the original), being the form of Geibe in the construct state, has been joined by some to the following name, i. e., Geibe of Kirjath-jearim (Schwarz, Phys. Descrip. of Palestine, p. 132); but these two cities are evidently counted separately in the text. Others regard “Geibe” here as a mere appellation denoting one or more houses near Kirjath-jearim (compare 1 Sam. vii. 1, 2). This city is often mentioned in Scripture (Hos. v. 8; ix. 9; x. 9; 1 Sam. x. 26). It was the scene of the atrocious crime which involved in its consequences almost the entire extirpation of the tribe of Benjamin (Judg. xix. 12-30; xx. 1-48). It was never recovered from that time. It was a place of songs and sack. It was the birth-place of Saul, and continued to be his residence after he became king (1 Sam. x. 26; xi. 4; xv. 8; xxiii. 19; xxvi. 1); and it was doubtless on account of this its intimate connection with Saul that the Gibeonites hanged up here seven descendants (2 Sam. xxvi. 6). An erroneous transla-
tion of the name has led to the misapprehension that this was the scene of Jonathan’s romantic exploits against the Philistines (1 Sam. xiv). See Geba. Like Bethel, it seems to have been reckoned among the an-
cient five cities of Judah (Jos. i. 18; Josh. xiv. 19; xx. 24; xxiii. 19; xxvi. 1; 2 Sam. xxii. 6-10). The inhab-
tants were called Geibonites (1 Chron. xii. 8). Jos-
ephus locates it twenty-two miles (Av. v. 2, 8) or thirty (War. v. 2, 1, גִּבְיָה) south of Jerusalem. Je-
ron was twenty-four miles to the west of Geibe and had a hill called Bethel, which Josephus places near the ground (Jos. xv. 10, ad Euseb.). See also on Gibeon.

Dr. Robinson at first identified it with Jeba, a half-ruined place about five miles north of east of Jerusalem (Researches, ii. 114); but he afterwards re-
tracted this position as being that of Bethel (Bibl. Sacra, 1844, p. 598), and he has finally fixed upon Tell el-Ful, about four miles north by west of Jerusalem, as the site of Gibeon of Saul (new ed. of Research-

ces, ii. 260). Tell el-Ful (“hill of the bean”) is a high knoll, with a curiously knobbed and double top, having a large heap of stones on it. Originally there had been here a square tower, fifty-six feet by forty-eight, built of large unhewn stones, and apparently ancient; this has been thrown down, and the stones and rubbish, filling outside, have assumed the form of a pyramidal mound. Some of our foundations is to be seen. The spot is sightly, and commands a very extensive view of the country in all directions, especially towards the east. There are no other remains around the hill itself; but a few roads further west, directly upon the great road as it en-
ters the city, there is a pair of ruined columns, and a number of ancient substructions, consisting of large unhewn stones in low massive walls. Probably the ancient city extended down from the hill on this side and included this spot (Robinson, in Researches and Biblioth. Sacra, at sup.; Stanley’s Pal. i. 114, p. 210). The ancient road from Jerusalem to Bethel and Shechem passes close along its western base, and Ramah is in full view on another hill two miles further north (Hand-
book of S. and P. p. 925). The narrative of the Levite’s journey is thus made remarkably graphic. He left Bethel in the afternoon to go home to Mount Ephraim. Two hours’ travel (six miles) brought him alongside Jerusalem. Evening was now approaching. His servant advised him to lodge in Jebus, but he de-
clined to stop with strangers, and said he would pass on to Gibeah or Ramah. The “sun went down upon them when they were by Gibeah,” and they resolved to pass the night there (Jud. xiv. 1). The site of Gibe-
ah was well adapted to form the capital of Israel dur-
ing the troubled times of Saul, when the whole country was overrun by the hostile bands of the Philis-
tines. It was naturally strong, it was on the very crest of the mountain range, and it commanded a wide

view, so that Saul’s watchmen could give timely noti-
ces of the approach of the enemy.

2. GEIBEH OF JUDAH, situated in the mountains of that tribe (Josh. xv. 57, where it is named with Maon and the southern Carmel; compare 1 Chron. ii. 49), which, under the name of Geba (גֵּבָא), Eusebius and Jerome (in their Roman miles) made it part of Gal-

apolis, and state that the grave of the prophet Habak-
kuk was there to be seen (Onomasticon, s. v. גֵּבָא, Gebaath; although they there confound it with the Gibeath of Phinehas in Ephraim, and elsewhere [s. v. קְרָח, Cella] state that Habakkuk’s tomb was shown in Keil (in the roomed by him). Probably, one of the “nebaim, by the Jewish name” (לֵבַע, the Nebiim, or Nebiim proper, for Nebiim, the Nabim, or Nabim)), was the prophet Nahum, whose proper name was Nebiim (1 Sam. xxiv. 33, where the name is rendered “hill of Phinehas”). Eusebius and Jerome (Onomasticon, s. v. גֵּבָא, Gebin) probably mention this place by the name of Geba (although they incorrectly identify it with Gibeath of Artas and the Gebim of Isa. x. 26 in Ephraim, where “Gebim”), five Roman miles from Gophna, on the road to Neapolis (Shechem), which was itself fifteen Roman miles north of Jerusalem. Josephus appears also to allude to it (1 Sam. v. 1, 20). Dr. Robinson (Researches, iii. 90, note) finds it in a narrow valley called wady el-Musawir, the bed of Mannat (Geba), just midway on the road between Jerusalem and Shechem; the indication of direction in the Onomasticon agrees with the position of the village Gbe (located on that wady), west of the Natilus road, half way between Bethel and Shiloah (Van de Velde, Memoir, p. 215), but the distance still better suited that of the Moslem-

ruined village Jibeh, west of this (Robinson, Researches, iii. Append. p. 123; Van de Velde, Map).

Gib’eith (Jos. xvii. 28). See GIBEON I.

Gib’skhitha (Heb. with the article ha-Gib’skhitha, כְּפַסְקִית, Sept. אֶפֶּר גִּבְּשְׁקִית v. גַּבְּשְׁקִית, גִּבְּשְׁקִית, the designation of a native of Gibeon, Chris. xvii. 3); in this case, Shemaiah, or “the Shemaiah,” father of two Benjamites, “Saul’s brethren,” who joined David. See GIBEON I.

Gib’eon (Heb. Gib‘on, גִּבְיָן, hilly city; Sept. Go-

baou, Josephus Gebaou, one of the four cities of the Hivites, the others being Beeroth (omitted by Josephus, Av. v. 2, 16), Chephirah, and Kirjath-jearim (Josh. ix. 17). See CANAANITE. Its inhabitants made a league with Joshua (x. 2-15), and thus escaped the fate of Jericho and Ai (comp. xix. 19). See GIBEONITE. It appears, as might be inferred from its tak-
ing the initiative in this matter, to have been the largest of the four—“a great city, like one of the royal cities”—larger than Ai (x. 2). Its men, too, were all practiced warriors (Josh. v. 22), and they yielded within the territory of Benjamin (xxxv. 23), and with its "suburbs" was allotted to the priests (xxxvi. 17), of whom it afterwards became a principal station, where the tabernacle was set up for many years under David and Solomon (1 Chron. xxxvi. 39; xxxv. 2; 2 Chron. i. 3), the ark being at the same time at Jerusalem (2 Chron. i. 4). See also other notices in Works and Books of Scripture, see below. From Jer. xii. 16, we may infer that after the destruction of Jerusalem by Nebuchadnezzar, Gibeon again became the seat of government. It produced prophets in the days of Jeremiah (Jer. xxviii. 1). After the captivity we find
the "men of Gibeon" returning with Zerubbabel (Neh. vii. 25: in the list of Ezra the name is altered to Gib-
bar), and assisting Nehemiah in the repair of the wall of Jerusalem. Here too the spring, called the "pool of 
great waters" (or the many waters, יָם רָאשִׁים), of Gibeon (both here and in 1 Kings iii. 4, Josephus substitutes 
Hebron for Gibeon, Ant. x. 9, 5; viii. 2, 1), at which Jo-
hanan, the son of Kareth, found the traitor Ihaamal (Jer. xii. 12). Round this water also, according to 
the notice of Josephus (qui enim juxta res sacras, אֶּרֶץ הָעָרָו), the five kings of the Amorites were 
encamped when Joshua set them on fire from Gilgal. The "wilderness of Gibeon" (2 Sam. ii. 24)—the Mid-
bar, i.e. rather the waste pasture-grounds—must have 
been to the east, beyond the suburb of cultivated fields, 
and towards the neighboring swells, which bear the 
terms of the Arabs for the Neathah. Such is the descri-
bution of Gibeon, fulfilling in position every require-
ment of the notices of the Bible, Josephus, Eusebius, 
and Jerome. Its distance from Jerusalem by the main 
road is as nearly as possible 65 miles; but there is 
more direct road reducing it to 3 miles (Robinson, Res. ii. 127, 135; Mem. ii. 249; Porter, H. B. F. S., p. 
225).

Scriptural Incidents.—Several of these are of such 
deepest interest as to call for a detailed notice.

(1.) The name of Gibeon is most familiar to us in 
connection with the story of the five kings. The in-
habitants obtained their safety at the hands of Joshua, 
and with the memorable battle which ultimately resulted 
therefrom. (See Kitto's "Daily Bible Illustr. at loc.) 
This is the first mention of the place in Scripture, and 
the story of Joshua as the battle is considered "one of the 
most important passages in the history of the world." By 
Stanley, whose graphic de-
scription (Jewish Church, 1266 sq.) we condense, slight-
ly modified and illustrated.

The kings of Palestine, each in his little fastness, 
were roused by the tidings that the approaches to their 
territory in the Jordan valleys were blocked by the 
troops of Joshua. The point of at-
tack, however, was not the invading army, but the 
trials at home. Gibeon, the recreant city, was 
beseiged. The continuance or the raising of the siege 
became the turning question of the war. The sum-
mons of the Gibeonites to Joshua was as urgent as 
words could express, and gives the key to the whole 
movement (Josh. x. 6). Not a moment was to be 
lost. On the former occasion of Joshua's visit to 
Gibeon (Josh. ix. 16, 17), it had been a three-days' jour-
ney from Gilgal, as according to the slow pace of easter-
ners armies and caravans it might well be. But, 
now, by a forced march, "Joshua came unto them suddenly, 
and went up from Gilgal all night." When the sun 
rose behind him, he was already in the open ground at 
the foot of the heights of Gibeon, where the kings were 
encamped (according to Josephus, Ant. v. 1, 17) by a 
spring in the neighborhood, which bears the name of 
That foot of which Gibeon lay, rose before them on the west. 
The besieged and the besiegers alike were taken by 
surprise (in the Samaritan version of Joshua, the war-
cry is given, "God is mighty in battle," ch. xx, xxii).

As often before and after, so now "not a man could 
stand before them", the Hebrews being in a panic of 
terror at the mere mention of that terrible shout. The 
Cananites fled down the western pass, and "the Lord discomfited them before 
Israel, and slew them with a great slaughter at Gib-

eon, and chased them along the way that goeth up to 
Beth-horon." This was the first stage of the flight. It 
is a long, rocky ascent, sinking and rising more than 
one before the summit is gained. From the summit, 
which is crowned by the village of Upper Beth-horon,
a wide view opens over the valley of Ajalon, which runs in from the plain of Sharon.

"And it came to pass, as they fled before Israel, and were in the going down to Beth-horon, that the Lord cast down great stones from heaven upon them unto Azekah." This was the second stage of the fight. The fugitives had outstripped the pursuers; they had crossed the high ridge of Beth-horon the Upper; they were in full flight to Beth-horon the Nether. It is a rough, rocky road, sometimes over the upturned edges of the limestone strata, sometimes over sheets of smooth rock, sometimes over loose rectangular stones, sometimes over steps cut in the rock. It was as they fled down this slippery descent that a fearful tempest, "thunder, lightning, and a deluge of hail" (Josephus, Ant. v. 1, 17), broke over the disordered ranks; and "they were more which died of the hailstones than they whom the children of Israel slew with the sword." Then follows the poetic version of the story, taken from the ancient legendary "Book of Jasher." On the summit of the pass, where is now the hamlet of the Upper Beth-horon, looking far down the deep descent of the western valleys, with the green vale of Ajalon stretched out in the distance, and the wide expanse of the Mediterranean Sea beyond, stood, as is intimated, the Israelitish chief. Below him was rushing down, in wild confusion, the Amoritishe host. Around him were "all his people of war, and all his mighty men of valor." Behind him were the hills which hid the now rescued Gibeon from his sight. But the sun stood high above those hills, "in the midst of heaven" (it was the middle of the forenoon, or at most midday), for the day had now far advanced since he had emerged from his night-march through the passes of Ai; and in his front, over the western vale of Ajalon, may have been the faint crescent of the waning moon, visible above the hail-storm driving up from the sea in the black distance. Was the enemy to escape in safety, or was the speed with which Joshua had "come quickly, and saved and helped" his defenseless allies, to be rewarded, before the close of that day, by a signal victory? It is doubtful so standing on that lofty eminence, with outstretched hand and spear, that the hero appears in the ancient record: "Then might Joshua [he heard to] speak to Jehovah in the day of Jehovah's giving [up] the Amorites before the sons of Israel, when he said in the eyes of Israel:

"Sun, in Gibeon stand still;
And moon, in Ajalon's vale!"

So the sun stood still, and moon stayed until a people should take vengeance [upon] its enemies. [Is] not this written on [the] Book of the Upright?

A wide view opens over the valley of Ajalon, which runs in from the plain of Sharon.

"And it came to pass, as they fled before Israel, and were in the going down to Beth-horon, that the Lord cast down great stones from heaven upon them unto Azekah." This was the second stage of the fight. The fugitives had outstripped the pursuers; they had crossed the high ridge of Beth-horon the Upper; they were in full flight to Beth-horon the Nether. It is a rough, rocky road, sometimes over the upturned edges of the limestone strata, sometimes over sheets of smooth rock, sometimes over loose rectangular stones, sometimes over steps cut in the rock. It was as they fled down this slippery descent that a fearful tempest, "thunder, lightning, and a deluge of hail" (Josephus, Ant. v. 1, 17), broke over the disordered ranks; and "they were more which died of the hailstones than they whom the children of Israel slew with the sword." Then follows the poetic version of the story, taken from the ancient legendary "Book of Jasher." On the summit of the pass, where is now the hamlet of the Upper Beth-horon, looking far down the deep descent of the western valleys, with the green vale of Ajalon stretched out in the distance, and the wide expanse of the Mediterranean Sea beyond, stood, as is intimated, the Israelitish chief. Below him was rushing down, in wild confusion, the Amoritishe host. Around him were "all his people of war, and all his mighty men of valor." Behind him were the hills which hid the now rescued Gibeon from his sight. But the sun stood high above those hills, "in the midst of heaven" (it was the middle of the forenoon, or at most midday), for the day had now far advanced since he had emerged from his night-march through the passes of Ai; and in his front, over the western vale of Ajalon, may have been the faint crescent of the waning moon, visible above the hail-storm driving up from the sea in the black distance. Was the enemy to escape in safety, or was the speed with which Joshua had "come quickly, and saved and helped" his defenseless allies, to be rewarded, before the close of that day, by a signal victory? It is doubtful so standing on that lofty eminence, with outstretched hand and spear, that the hero appears in the ancient record: "Then might Joshua [he heard to] speak to Jehovah in the day of Jehovah's giving [up] the Amorites before the sons of Israel, when he said in the eyes of Israel:

"Sun, in Gibeon stand still;
And moon, in Ajalon's vale!"

So the sun stood still, and moon stayed until a people should take vengeance [upon] its enemies. [Is] not this written on [the] Book of the Upright?

So Joshua returned, and all Israel with him, to the camp at Gilgal." (Josh. x, 12-15). See Joshua.

(2.) We next hear of Gibeon at the encounter between the men of David and of Ishbosheth, under their respective leaders Joab and Abner (2 Sam. ii, 12-17). The meeting has all the air of having been premeditated by both parties, and we suppose that Joab had heard of the intention of the Benjamites to revisit from the distant Mahanaim their native villages, and had seized the opportunity to try his strength with Abner. See Abner. The place where the struggle began received a name from the circumstance, and seems to have been long afterwards known as the "field of the strong men." See Helkath-Hazzurim.

(3.) We again meet with Gibeon in connection with Joab; this time as the scene of the cruel and revolting death of Amasa by his hand (2 Sam. xxi, 5-10). Joab was in pursuit of the rebellious Sheba, the son of Bichri, and his being so far out of the direct north road as Gibeon may be accounted for by supposing that he was making a search for this Benjamite among the towns of his tribe. The two rivals met at "the great stone which is in Gibeon"—some old landmark now no longer recognisable, at least not recognised—and then Joab repeated the treachery by which he had murdered Abner, but with circumstances of a still more revolting character. See Amasa.

It is remarkable that the retribution for this crowning act of perfidy should have overtaken Joab close to the very spot on which it had been committed. For it was to the tabernacle at Gibeon (1 Kings ii, 28, 29; comp. 1 Chron. xvi, 39) that Joab fled for sanctuary when his death was pronounced by Solomon, and it was while clinging to the horns of the brazen altar there that he received his death-blow from Beniah, the son of Jehoiada (1 Kings ii, 28, 30, 34). See Joab.

(4.) Familiar as these events in connection with the history of Gibeon are to us, its reputation in Israel was due to a very different circumstance—the fact that the tabernacle of the congregation and the brazen altar of burnt-offering were for some time located on the "high place" attached to or near the town. We are not informed whether this "high place" had any fame for sanctity before the tabernacle came there; but if not, it would probably have been erected elsewhere. We only hear of it in connection with the tabernacle; nor is there any indication of its situation in regard to
the town. Stanley has suggested (Sinai and Pal. p. 212) that it was the remarkable hill of neby Samwil, the most prominent and individual eminence in that part of the country, and to which the special appellation of “the great high-place” (1 Kings iii, 4; 4, 7-15) would perfectly apply. Concerning the “great” is uncertain whether as resembling in height or size, there is no other hill which can so justly claim the distinction. But the word has not always that meaning, and may equally imply eminence in other respects, e.g. superior sanctity to the numerous other high places—Bethel, Ramah, Mizpeh, Gibeon—which surrounded it on every side. The main objection to identification is the distance of neby Samwil from Gibeon—more than a mile—and the absence of any closer connection thither with any other of the neighboring places. The most natural position for the high place of Gibeon is the twin mound immediately south of El-Jilli—so close as to be all but a part of the town, and yet quite separate and distinct. The testimony of Epiphanius, by which Stanley supports his conjecture, viz. that the “Mount of Gabaon” was the highest point of Jerusalem (Adv. hæres. i, 584), should be received with caution, seeing that it does not alone, and in any case, to an age which, though early, was marked by ignorance, and by the most improbable conclusions.

To this high place, wherever situated, the “tabernacle of the congregation”—the sacred tent which had accommodated the children of Israel throughout the whole of their wanderings—and had been transferred from its last station at Nob. The exact date of the transfer is left in uncertainty. It was either before or at the time when David brought up the ark from Kirjath-jearim to the new tent which he had pitched for it on Mount Zion, that the original tent was superseded for the last time at Gibeon. The expression in 2 Chron. i, 5, “the brazen altar be put before the tabernacle of Jehovah,” at first sight appears to refer to David. But the text of the passage is disputed, and the authorities are divided between OnChange_2, “he put,” andOnChange_3, “was there.” Whether king David transferred the tabernacle to Gibeon or not, he certainly appointed the staff of priests to offer the daily sacrifices there on the brazen altar of Moses, and to fulfill the other requirements of the law (1 Chron. xxvi, 40), with no less a person at their head than Zadok the priest (ver. 35), assisted by the famous musicians Heman and Jeduthun (ver. 41).

One of the earliest acts of Solomon’s reign—it must has been while the remembrance of the execution of Joab was still fresh—was to visit Gibeon. The ceremony was truly magnificent: he went up with all the congregation, the great officers of the state—the captains of hundreds and thousands, the judges, the governors, and the chief of the fathers—and the sacrifice consisted of a thousand burnt-offerings (1 Kings iii, 4). This glimpse of Gibeon in all the splendor of its greatest prosperity—the smoke of the thousand animals rising from the venerable altar on the commanding height of “the great high place”—the clang of “trumpets, and cymbals, and musical instruments of God” (1 Chron. xvi, 42) resounding through the valleys far and near—is virtually the last we have of it. In a few years the Temple at Jerusalem was completed, and then the tabernacle was once more taken down and removed. Again “all the men of Israel assembled themselves” to king Solomon, with the “elders of Israel,” and the priests and the Levites brought up both the tabernacle and the ark, and “all the holy vessels that were in the tabernacle” (1 Kings viii, 3, Joseph. Ant. viii, 4, 1), and placed the venerable relics in their appropriate places; there to remain until the plunder of the city by Nebuchadnezzar. The introduction of the name of Gideon in 1 Chron. ix, 35, which seems so abrupt, is probably due to the fact that the preceding verses of the chapter contain, as they appear to do, a list of the staff attached to the “tabernacle of the congregation” which was erected there; or if these persons should prove to be the attendants on the “new tent” which David had pitched for the ark on its arrival in the city of David, the transition to the place where the old tent was still standing is both natural and easy.

It would be very satisfactory to believe, with Thomson (Land and the Book, i, 547), that the present wadi Suleiman, i.e. “Solomon’s valley,” which is the most prominent of the rills of Gibeon, and leads down to the Plain of Sharon, derived its name from this visit. But the modern names of places in Palestine often spring from very modern persons or circumstances, and, without confirmation or investigation, this cannot be received with certainty.—Smith, s. v.

Gibonite (Heb. Gibonî, גיבון; Sept. Γαβῶνας, Gavonas), the designation of the people of the Canaanitish city Gibeon (q. v.), and perhaps also of the three cities associated with Gibeon (Josh. ix, 17)—Hibites; who, on the discovery of the stratagem by which they had obtained the protection of the Israelites, were condemned to be perpetual bondmen, hewers of wood and drawers of water for the congregation, and for the house of the Lord at Jerusalem (Deut. xxviii, 6-9). The compact, although the punishment of fraud, was faithfully observed on both sides (see Benzel, Symtgem. dissertation. iii, 122 sqq.). Saul, however, appears to have broken this covenant, and in a fit of enthusiasm or patriotism to have killed some, and devised a general massacre of the rest (2 Sam. ii, 4). This was expiated many years after by David, at the suggestion of the priestly oracle, giving up seven men of Saul’s descendants to the Gibeonites, who hanged them or crucified them “before Jehovah”—as a kind of sacrifice—in Gibeon, Saul’s own town (4, 6, 8). At this time, or, at any rate, at the time of the composition of the narrative, the Gibeonites were so identified with Israel that the historian is obliged to insert a note explaining their origin and their non-Israelite extraction (xxi, 2). The actual name “Gibeonites” appears only in this passage of 2 Sam. There is no authentic evidence for the allegation which has been sometimes made against David, that he purposely contrived or greedily fell in with this device, in order to weaken the house of Saul and place it under a darker stigma. On the contrary, David’s conduct throughout to that house was in the highest degree generous and noble; and at the very time when this fresh public calamity befell it, he took occasion to have the bones of Saul and Jonathan, along with the bones of the seven now publicly hanged, gathered together and honorably buried in the sepulchre of Kish. See David. From this time there is no mention of the Gibeonites as a distinct people; but most writers suppose they were included among the Nethinim, who were appointed for the service of the Temple (1 Chron. ix, 2). Those of the Canaanites who were afterwards subdued and had their lives spared were probably added to the Gibeonites. We see in Ezra viii, 20; ii, 68; 1 Kings ix, 20, 21, that David, Solomon, and the princes of Judah gave many such to the Lord; these Nethinim being carried into captivity with Judah and the Levites, many of them returned with Ezra, Zerubbabel, and Nehemiah. Nehemiah continued, as before, the work of the Temple, under the priests and Levites. (See De Platen, De religione Giboniarum, Rost. 1708; Fecht, ad. ib. 1781.) See Nethinim.

Individual Gibeonites named are (1) Issaiah, one of the Benjamites who joined David in his difficulties (1 Chron. xii, 4); (2) Melatiah, one of those who assisted Nehemiah in repairing the wall of Jerusalem (Neh. iii, 7); (3) Hamaniah, the son of Azur, a false prophet from Gideon, who opposed Jeremiah, and shortly afterwards died (Jer. xxviii, 1, 10, 13, 17).
Gibb’lite (Heb. with the art. in the sing. hag-Gidí’th, ḫāḏīṯ, Josh. xiii, 5; Sept. ḫaḏīṯ [v. r. ḫaḏūṯ] ḫaḏāḏāṯ, Vulg. merely confusio; plural, ḫaḏīṯim, ḫaḏīṯim], 1 Kings v, 18; Sept. Alex. of ḫaḏīṯ, other MSS. omit; Vulg. ḫaḏīṯ, ḫaḏīṯ], a word used in the Bible to denote a place which people’s land is crossed with “all Lebanon,” as together belonging to the territory of the Israelites on the northern side, in the enumeration of the portions of the Promised Land remaining to be conquered by Joshua (Josh. xiii, 5). The ancient versions give no help here, but there is no reason to think that the allusion is to the inhabitants of the city Geβāl (q. v.), which was on the sea-coast at the foot of the northern slopes of Lebanon, and from which the name is a regular derivative (see Genesius, Theoœras. p. 258 b). The whole passage is instructive, as showing how very far the limits of the country designed for the Israelites exceeded those which they actually occupied. The people in question, who plainly belonged to the Phoenician territory, are understood to have been the people of Byblos, a city of the Phoenicians between Tripoli and Beirut. The inhabitants of Geβal are mentioned in the cuneiform inscriptions (q. v.). The Giblites are again named (in the Heb.) in 1 Kings v, 18 as assisting Solomon’s builders and Hiram’s builders to prepare the trees and the stones for building the Temple. That they were clever artisans is evident from this passage, and from the connection between the manufacture and merchandize of Tyre, the prophet Ezekiel mentions “the ancients of Geβal” as furnishing carvers, or perhaps generally ship-carpenters (Ezek. xxvii, 9). The Giblites are not mentioned in immediate connection with the affairs of Israel, if they did come into direct contact with these, it must have been for evil, and not for good; for Byblos was the seat of the worship of the Syrian Tammuz or Adonis, a worship which certainly found its way, among other corruptions, into the later idolatries of the Jewish people (Ezek. viii, 14), but which was directly from Byblos, or from other parts of Phœnicia, we have no means of ascertaining. See Phœnicia.

Gibson, Edmund, D.D., bishop of London, was born at Bampton in 1669, and was educated at Queen’s College, Oxford. He early devoted himself to the study of the languages of North Britain and of British antiquities. At twenty-two he prepared an edition of The Saxon Chronicle, with Latin translation and Indexes (Oxford, 1632, 4to). In 1634 he became M.A., and soon after was ordained, and made fellow of his college. In 1639 he published an English translation of Camden’s Britannia (2 vols. fol.). In 1646 he was appointed a prebend in Ripon, archbishop of Canterbury; and in 1697 he was appointed morning preacher at Lambeth church. In the same year he published Vitæ Thomaæ Bodleii, together with Historia Bibliothecæ Bodleianæ, both prefixed to the Catalogi Librorum Manuscriptorum, in Anglicæ et Hibernalæ in usum collecti (2 vols. fol.). In 1658 he published Successiones Angliae, in quibus situ historici praebent, and in 1718 he published Successiones Angliae, with the life of the author (fol.). He was now made domestic chaplain to the archbishop, through whose means he obtained, about the same time, the lectureship of St. Martin’s-in-the-Fields, and in 1718 a pension was presented to the rectory of Stisted, in Essex, a rectory still the seat of learning. In 1703 he was made rector of Lambeth, and residential of the cathedral of Chichester. He was soon after appointed master of the hospital of St. Mary, and in 1710 he was promoted to the archdeaconry of Surrey. While he was chaplain to archbishop Tenison he engaged in the controversy with the Quakers in the houses of Convocation, See Atterbury. Gibson enlisted on the side of the upper house, and published ten pamphlets on the subject in three years, to which he added another in 1707. And to the interest he took in this controversy we may trace the origin of his great work, Codex Juris Ecclesiasticæ Anglicæ, or the Statutes, Constitution, Canons, Rubrics, and Articles of the Church of England, etc. (1715, 2 vols. reprinted at Oxford in 1761). In 1716 he succeeded to the deanery of Lincoln, and in 1728 he was translated to the see of London. He subsequently became chief adviser of Sir Robert Walpole in ecclesiastical affairs, and foolishly disappointed his former Whig friends by his intolerance of the Nonconformist opposition to the Test Act, and also the measures adopted against the Quakers. His better qualities appeared in his opposition to the demoralising masquerades of the time, by which he lost the favor of George II. Towards the close of his life he made a collection of the best treatises that were written against Popery during the reign of James II, and published them with a preface in 1788 (3 vols. fol.); recently republished under the title of A Preservation against Popery, etc., edited by Dr. Cumming (London, 1849–9, 18 vols. 8vo); there is also a Supplement (London, 1849, 8 vols. 8vo). He died at Bath in 1745.—Hook, Eccld. Biog. v, 314; Darling, Cyclop. Bibliographiciæ, 1, 1250.

Gibson, Robert, a minister of the Reformed Presbyterian Church, was born at Ballymena, Ireland, Oct. 1, 1793. His parents migrated to the United States in 1797, and his father, the Rev. William Gibson, settled as pastor of the Reformed Presbyterian Church in Philadelphia, Oct. 6, 1797. He received his classical and theological training at the Reformed Presbyterian Theological Seminary, Philadelphia, and was licensed to preach in 1818. On Sept. 6, 1819, he was ordained and installed as pastor of the church at Beaver Dam, where he labored with great success for twelve years. In 1831 he became pastor of the Second Reformed Presbyterian church in the city of New York, and occupied that position till his death. In this new and extensive field he labored with great diligence, and his influence grew rapidly. He bore a prominent part in the controversy which resulted in the disruption of the Church in 1837, and published three pamphlets vindicating the character of the Synod. In 1838 he showed symptoms of declining health. All efforts to arrest his disease were unavailing, and he died in the midst of his people, Dec. 22, 1837. We have from him only the three pamphlets above mentioned.—Sprague, Annals (Ref. Presb.), ix, 71.

Gibson, Tobias, a Methodist Episcopal minister, was born in Liberty County, S. C., Nov. 10, 1771, entered the itinerant ministry in 1792, and died at Natchez, Miss., April 5, 1804. He traveled and preached in the most important appointments of the Carolinas until the year 1806, and then went to Natchez as a missionary of the Methodist Episcopal church, in the Louisiana Conference, and died there in almost a wilderness. After penetrating the forest for six hundred miles to the Cumberland River, Mr. Gibson took a canoe, and alone navigated that stream to the Ohio, and thence down the Mississippi in a boat. He made four trips through the wilderness to the Cumberland while missionary at Natchez, and laid the foundations of Methodism in that vast and now so important region. His fellow-laborers in Carolina testify that "he did for many years preach, profess, possess, and practise Christian perfection; and that those who were acquainted with him must be impressed with his depth of piety; and "that infidelity itself would stagger before the life of so holy, loving, and devoted a man of God."—Minutes of Conferences, 1, 125.

Gibson, William, a Reformed Presbyterian minister, was born near Knockbracken, County Down, Ireland, in 1735. He studied at Glasgow, and was licensed as a minister of the two presbyteries of Derry and Down in 1769. In the political ferment of Ireland towards the end of the century he joined the United Irishmen, and on the failure of the rebellion he fled to America, where he arrived in 1779. Finding a number of his own people there, he formed a congregation; and the Reformed Presbyterian Church to North America was constituted
In 1798. In 1799 he became pastor at Raygata, Vt., and remained there till 1817, when he accepted a call to Canonsburg, Pa. In 1830 his infirmities compelled him to resign his charge. His latter years were spent in Philadelphia, where he died, Oct. 16, 1838.—Wilson, Proph. Hist. Almanac, 1832, p. 274; Sprague, Annals, (Rev. ed. 1838), p. 329; (N. T. P. 1869, p. 335). Gichtel, Johann Georg, a German mystic, was born at Ratisbon in 1688. He studied theology and law at the University of Strasburg, and was afterwards distinguished as a lawyer. He became a follower of Jacob Böhme, and prepared for publication the first edition of his works (Amsterdam, 1682). He finally resolved to cast himself to the propaganda of his speculative and ascetic views. Gichtel considered his own announcements of divine commands as superior to the Scriptures in authority. He was imprisoned as a dangerous visionary, struck off the list of barristers, and finally exiled. He retired in 1667 to Holland, where he died poor in 1710. His opinions have found occasional adherents to this day at Amsterdam, Leyden, and even in Germany. They were called Gichtellians, or Brothers of the Angels (Engelbrüder), and believed themselves equal to the inhabitants of heaven on account of their celibacy, peculiar exaltation of life, etc. One of the most zealous adherents of Gichtel was professor Alandt de Raadt, who, however, subsequently fell out with him, when a merchant, by the name of Ueberfeldt, became intimate with Gichtel. Bands of adherents were found in Berlin, Halle, Magdeburg, Altona, where Glätting (died 1798) was at their head, and other places, and partly maintained themselves to the 19th century. Gichtel's 'Letters were published by Gottfried Arnold (1701, 2 vols.; 1708, 8 vols.;) and finally a complete collection of his writings, under the title Proctische Theosophie (Leyden, 1725, 2 vols.). See Reinbeck, Gichtel's 'Leben und Lehren' (Berlin, 1739). Harless, Gichtel's Leben u. Irrthümte, in Evangel. Kirch. Zeit. 1831, No. 77; Hoefer, Nouv. Biog. Générale, xx., 454; Herzog, Real-Encyclop. v. 145.

Giddal'ti (Heb. id. גידלתי, whom I [Jehovah] have made great; Sept. Γεδουαλαίας, and Γεδουλίας; Vulg. Gedideli and Gediditi), the ninth named of the fourteen musical sons of Samson, and head of the twenty-second course of Levitical musicians in the tabernacle under David (1 Chron. xxxv. 4, 29). B.C. 1018. The office of these brothers of Samson was to sound the horn in the Levitical orchestra (ver. 5, 7). First (who reduces the sons of Heman to five) suggests (Heb. Lex. s. v.) that the appended "names probably formed together ( hãngר הגר יא" גידלתי, have deus, the victorious and victorious, or delightful in vain; in finisbajet) an old protracted saying with which an oracle began, whose words were applied to the five [as soubriquet]; the tone itself [as a name it would regularly be Giddal'ti] pointing to this explanation:"

See Heman.

Giddel (Heb. Giddel, גידל, perhaps giant; Sept. Τιθήνα, Γεδιθήν, Σωδεία, the name of two men whose descendants are related (Gissid Gode) and accounted for in the captivity with Zerubbabel; perhaps Gideonites (Q. V.).

1. One of the Nethinim (Ezra ii, 47; Neh. vii, 49).

B.C. ante 588.

2. One of Solomon's servants," i. e. perhaps of the Canaanitish tribes enslaved by Solomon (Ezra ii, 56; Neh. vii, 58; compare 1 Kings ii, 21). B.C. ante 588.

See Solomon.

Giddings, Rockwood, a Baptist minister, was born in Plymouth, N. H., Aug. 8, 1812, graduated at Waterville College in 1838, and then went to Victoria, where he commenced the study of medicine. He was about 1839 called as a physician in Missouri when he felt called to preach the Gospel. He was shortly afterwards ordained, and in 1835 became pastor of the Baptist church in Shellyville, Ky., where his ministries were very successful. In 1838 he was appointed president of the Baptist College of Georgetown, then in a most destitute condition. He accepted the nomination, and in less than eight months secured more than eighty thousand dollars towards an endowment. But the work which he had imposed on himself undermined his health, and he died Oct. 29, 1839.—Sprague, Annals, vi., 318.

G'id'on (Heb. Gideon, ג'דנ, tree-feller, i. e. warrior, comp. Isa. x. 88; Sept. and N. T. P. Diodor.), a Manassite, youngest son of Joash of the Abiezrites, an undistinguished family, who lived at Ophrah, a town probably on the western side of Jordan (Judg. vii. 15). He was the fifth judge recorded of Israel, and for many reasons the greatest of them all, being the first of them whose history is circumstantially narrated (Judg. viii-viii). B.C. 1382-1822.

1. When we first hear of him he was grown up and had sons (Judg. vi. 11; vii. 20), and from the apostrophe of the angel (vi. 12) we may conclude that he had already distinguished himself in war against the roving bandits of the Amalekites and other nomadic tribes, who had infested the land of Israel for seven years, and whose countless multitudes (compared to locusts from their terrible devastations, vi. 5) annually destroyed all the produce of Canaan, except such as could be concealed in mountain-fastnesses (Deut. ii. 20). Gideon was a man of the Midianites, in conjunction with the Amalekites and other nomadic tribes, invaded the country every year, at the season of produce, in great numbers, with their flocks and herds, robbing in the country after the manner which the Bedouin Arabs practise at this day. It was probably during this disastrous period that the emigration of Elimelech took place (Ruth i. 1, 2; Jahn's Hebr. Comm. § 2x). Some have identified the angel who appeared to Gideon (פָּעַרְגָּעַ נַעַרְיָו מְזוּרְיָו, Josephus, Ant. v. 6, with the mention in vi. 5, which will remind the reader of the legends about Malachi in Origen and other commentators. Paulus (Escr. Com. ii, 190 sq.) endeavors to give the narrative a subjective coloring, but rationalism is of little value in accounts like this. When the angel appeared, Gideon was threshing wheat with a flail (Sept.ὶ ἔκωρος) in the wine-press, to conceal it from the predatory tyrants. Such was the position and such the employment in which he was found by the angel of the Lord, who appeared to him and said, "Jehovah is with thee, thou mighty man of valor." It was a startling address, and one that seemed rather like a bitter irony, when viewed in connection with the existing state of affairs, with the words of soberness and truth. Therefore Gideon replied, "Oh! my Lord, if Jehovah be with us, why then is all this befallen us? and where be all the miracles which our fathers told us of, saying, Did not Jehovah bring us up from Egypt? But now Jehovah hath forsaken us, and delivered us into the hands of the Midianites." The desponding tone of the reply was not unnatural in the circumstances, and what followed was designed to reassure his mind, and brace him with energy and fortitude for the occasion. Jehovah comforted him, for instead of the angel of the Lord appearing to him as formerly, it is now Jehovah himself—"Jehovah looked upon him, and said, Go in this thy might, and thou shalt save Israel from the hand of the Midianites; have not I sent thee?" Gideon still expressed his fear of the result, mentioning his own comparative insignificance and that of his father's family. He again met with a word of encouragement, "Surely I will be with thee, and thou shalt smite the Midianites as one man." Gideon's heart now began to take courage; but to make him sure that it really was a divine messenger he was dealing with, and that the Lord had not committed to Belshazzar, who had requested a sign from heaven, and it was given him in connection with an offering, which he was allowed to
present, of a kid and some unleavened cakes. These and the parched wheat were the tip of the staff, and the fire burned out of the rock and consumed them. Immediately the angel himself disappeared, though not till he had by a word of peace quieted the mind of Gideon, which had become agitated by the thought of seeing the face of the Lord (comp. Exod. xx. 19; Judg. vi. 11-17).

The family of Josiah had fallen into the prevalent idolatry of the times, which was characterized by backsliding from the true worship of the Lord; and it was the first task of Gideon as a reformer to rebuke this irreligion, and his first sphere was at home. In a dream the same night he was ordered to the north and cut the wood down before the altar of Asherah (A. V., "grove") upon it [see ASHERAH], which his father had caused, or at least suffered, to be erected on the family grounds; and with the wood of this he was to offer in sacrifice his father's "second bullock of seven years of age," an expression in which some see an allusion to the seven years of servitude (v. 18, 1). Perhaps that particular bullock was specified because it had been reserved by his father to sacrifice to Baal (Ro- senmüller, Schol. ad loc.), for Josiah seems to have been a priest of that worship. Bertheau can hardly be right in supposing that Gideon was not able to offer two bullocks (Rieck, p. 115). At any rate, the minute touch is valuable as an indication of truth in the story (compare Ewald, Gesch. ii, 498, and not). Gideon, assisted by ten faithful servants, obeyed the vision. He deemed it prudent, however, to do this under cover of the darkness. The same night, apparently, he built on the spot desecrated by the idolatrous shrine the altar of Jehovah-shalom (q. v.), which existed when the book of Judges was written (v. 24). As soon as the act was discovered, and the perpetrator suspected and identified, which was immediately on the following morning, he was ordered to put the risk of being stoned; but Josiah appealed the popular indignation by using the common argument that Baal was capable of defending his own majesty (compare 1 Kings xvii. 27). This circumstance gave to Gideon the surname of Jerubbaal (קְרֵבְעָבָא, "Let Baal plead," v. 22; Sept. Ἰεροβαλ), a standing instance of national irony, expressive of Baal's impotence. Winckler thinks that this irony was increased by the fact that קְרֵבְעָבָא was a name of the Phoenician Hercules (comp. Movers, Phön. i, 454). We have similar cases of contempt in the names Nychar, Baal-zebul, etc. (Lightfoot, Hor. Heb. ad Matt. xii. 24). In consequence of this name, some have identified Gideon with a certain priest, Jerubbaal (דַּרְבָּעָל), mentioned in Exod. iii. 18; Exod. iv. 10) as having given much more accurate information to Saxonianthe the Berytian (Bochart, Phæg. p. 776; Huetius, Dem. Exag. p. 84, etc.), but this opinion cannot be maintained (Ewald, Gesch. ii. 498). We also find the name in the form Jerubbaal (2 Sam. x. 21); probably indicative of contempt for the heathen deity (comp. Eshbaal, 1 Chron. viii. 33, with Ishboobath, 2 Sam. ii sq.). The mind of Josiah, at all events, was confirmed by this bold act of his son, and he seems resolved to leave the solution of the controversy to divine Providence.

2. Gideon soon found occasion to act upon his high commission. The allied invaders were encamped in the great plain of Jezreel or Edraelon, when, "clothed by the Spirit of God (Judg. vi. 34; comp. 1 Chron. xii. 18; Luke xxiv. 49), he blew a trumpet, and thus gathered together a daily increasing host, the summons to arms which it is supposed Gideon was authorized by the tents of Midian. Mount Gilboa, indeed, is named in the movement of Gideon against Midian, but probably only as the first place of rendezvous for his army (Judg. vii. 8). For the sake of security, he might be obliged to assemble the people on the mountainous lands to the north of Jordan. Stanley in his Life of Ewald (p. 342), after Le Clerc, without any authority from MSS., would substitute Gilboa for Gilead in the passage referred to. This is otherwise objectionable, as one does not see how thousands from Asher, Naphtali, about and beyond Esdraelon, could have been able to march to the Midianite camp with the Midianites, with whom they had no connection. Ewald is perhaps right in regarding the name as a sort of war-cry and general designation of the Mnsamites. (See, too, Gesenius, Thes. p. 804, n.)

The inquietude connected with great enterprises is more sensibly felt some days before than at the moment of action; and hence the two miraculous signs which, on the two nights preceding the march, were required and given as tokens of victory. The first night a fleece was laid out in the middle of an open threshing-floor, and in the morning it was quite wet, while the ground all around was dry; and the wonder was reversed, the soil being wet and the fleece perfectly dry. Strengthened by this double sign from God (to which Ewald gives a strange figurative meaning, Gesch. ii. 500), Gideon advanced to the brook Harod, in the valley of Jezreel. See Harod. Note on Harod. At the head of 30,000 the least large a host should assume the glory of the coming deliverance, which of right belonged to God only, two operations, remarkable both in motive and procedure, reduced this large host to a mere handful of men. First, by divine direction, the usual proclamation (Deut. xx. 9; compare the order of Joshua) that all the faint-hearted might withdraw; and no fewer than 22,000 availed themselves of the indulgence. The remaining 10,000 were still declared too numerous: they were therefore all taken down to the brook, when only those who lapped the water from their hands, like the men in haste, were reserved for the enterprise, while all those who lay down leisurely to drink were excluded. The former numbered no more than 300, and these were the appointed vanquishers of the huge host which covered the great plain. This marked circumstance, however, not only enforces the difference between them and the others, but still it indicated a specific quality; they were the persons that took the more expeditious method of quenching their thirst, and thereby gave proof of a nimbleness and alacrity which bespoke a fitness for executing quick movements in attacking or pursuing an enemy. This affords a perfectly sufficient and natural explanation, and there is no need for resorting, as many do, to peculiar usages in the East, and no one who knows anything of the manners of people in rural and highland districts can need to be told how common it is for them, when wishing to get a hasty refreshment at a running stream, to lift the water to their mouths in the palm of their hand, instead of leisurely bending down, or laying themselves along to get a fuller draught. Josaphus, however, explains these men to have been the most cowardly in the army (Ant. v. 6, 9).

Finally, being encouraged by words fortuitously overheard (what the later Jews termed the Bat-Kol) (compare 1 Sam. xiv. 9, 10; Lightfoot, Hor. Heb. ad Matt. iii. 14), in the relation of a significant dream, Gideon framed his plans, which were admirably adapted to strike a panic into the huge and undisciplined nomad host (Judg. viii. 15-18). We know from history that large and irregular Oriental armies are especially liable to sudden outbursts of uncontrollable terror; and when the stillness and darkness of the night were suddenly disturbed in three different directions by the flash of torches and by the reverberating
eche of which the trumpets and the shouting wok among the hills, we cannot be astonished at the complete rout into which the enemy were thrown. It must be remembered, too, that the sound of 800 trumpets would make them suppose that a corresponding number of lances and pincers were attacking them; and it is curious to find "lamps and pincers" in use for a similar purpose at this very day in the streets of Cairo. The Zabi or Agba of the police carries with him at night "a torch which soon after it is lighted, without a flame, excepting what is is waved through the air, when it suddenly blazes forth; it is used under the same purpose as our dark lantern. The burning end is sometimes concealed in a small pot or jar, or covered with something else, when not required to give light" (Lamb's Mod. Egy. 1, ch. iv.). For specimens of similar sort that we read not in ii. 37; Frontinus, ii, 4; Ballast, Judg. 99; Niebuhr, Desc. of the Arabie, p. 804; Journal As. 1841, ii, 516. The custom of dividing an army into three seems to have been common (1 Sam. xi, 11; Gen. xiv, 15), and Gideon's war-cry is not unlike that adopted by Cyrus (Xen. Anab. vii, 10). It adds also the war-cry, as suited both to inspire confidence in his followers and strike terror in the enemy. His stratagem was eminently successful, and the Midianites, breaking into their wild peculiar cries, fled headlong "down the descent to the Jordan," "to the Ausa," "to the head-bow of the dance" (Abel-melahob), but were intercepted by the Ephraimites (to whom notice had been sent, Judg. vii, 24) at the fords of Beth-barah, where, after a second fight, the princes of Oreb and Zeeb ("the Raven" and "the Wolf") were detected and slain—the former at a rock, and the latter concealed in a wine-press, to which their names were afterwards given. The Ephraimites took their heads over to Gideon, which amounted to an acknowledgment of his leadership; but still the always haughty and jealous Ephraimites were greatly annoyed by this. The first Philistines, sent up, was summoned to the field; and serious consequences might have followed but for the tact of Gideon in speaking in a lowly spirit of his own doings in comparison with theirs. Gideon's "soft answer," which pacified the Ephraimite warriors, became a proverb (Judg. viii, 3), and he himself, in the 12th chapter, 9: the Hebrews, in the victory, and the Levites, in the service, were summoned to the field; and serious consequences might have followed for the tact of Gideon in speaking in a lowly spirit of his own doings in comparison with theirs. Gideon's "soft answer," which pacified the Ephraimite warriors, became a proverb (Judg. viii, 3). He addressed his, Zebah and Zalmunna, had already escaped," and Gideon resolved to pursue them into eastern Manasseh, and burst upon them among the tents of their Bedouin countrymen. On that side the river, however, his victory was not believed or understood, and the people still trembled as much as before. The two warriors, Zebah and Zalmunna, could obtain no succor from the places which he passed, and town after town refused to supply even victuals to his fatigued and hungry, but still stout-hearted troop. He denounced vengeance upon them, but postponed its execution until his return. Continuing his pursuit of the Midianites southward, he learned that they had encamped with the remnant of their army in fancied security at Karkor, just without the limits of Palestine; he therefore resolved to surprise them by a rapid detour through the edge of the nomadic region of the Haranites and the Abiezrites, who had accomplished so successfully that, falling suddenly upon them from the east by night, he utterly routed them, and by sunrise was on his way to the Jordan. In this his third victory he avenged on the Midianites the massacre of his kingly brethren whom they had slain at Minot. In these days of captivity taken in war were almost invariably slain. Zebah and Zalmunna had made up their minds to this fate; and yet it was Gideon's humane intention to spare them till he learned that they had put to death his own brothers under the same circumstances; and when they were shades of their blood, he slew the captives with his own hand. In these three battles only 15,000 out of 120,000 Midianites escaped alive. It is indeed stated in Judg., viii, 10, that 120,000 Midianites had already "fallen;" but here, as elsewhere, it may merely be intended that such was the original number of the routed host. During his triumphal return Gideon took signal and appropriate vengeance on the coward and apostate towns of Succoth and Peniel. The memory of the summer's deliverance took deep root in the national traditions (1 Sam. xii, 11; Psal. lixxii, 11; Isa. ix, 4; x, 26; Heb. xi, 32). After this there was a peace of 40 years, and we see Gideon in peaceful pursuits, and of his well-earned honors, as set down by the dignity of a numerous household (viii, 29-81). It is not improbable that, like Saul, he had owed a part of his popularity to his princely appearance (Judg. viii, 18). In this stage of his life occur alike his most noble and his most questionable acts. Gideon magnanimously rejected, on theocratic principles, the proffer of hereditary royalty which the rulers in the warmth of their gratitude made him. He would only accept the golden ear-rings (q. v.) which the victors had taken from the ears of their slaughtered foes, and with these he made an ephod, and put it in his city Ophrah (Judg. viii, 22-27). But whether Gideon intended it as a commemorative trophy, or had a Levitical priest in his house, as Micah on Mount Ephraim, and the Danites at Laish, it is difficult to determine (Judg. xvii, 5-15; xviii, 15-31). The probability is that the worship rendered there was that of the Phoenicians (Judg. viii, 23), and the Hebrews in the vicinity, who, thus having an ephod and worship in their own country, would not so readily give over to the talismans at Shiloh, and consequently fell into idolatry by worshiping the gods of the Phoenicians (Judg. viii, 33). Genius and others (Thea. p. 135; Bertheau, p. 138 sq.) follow the Peshitto, in making the word ephod here mean an idol, chiefly on account of the vast amount of gold (1700 shekels) and other rich material appropriated to it. But it is simpler to understand it as a significant symbol of an unauthorized worship. (See Crit. Sac. Theo. i, 425.) See EPHOD. The evil consequences of this false step in religion were realized in the miserable sequel of Gideon's family. After his death his numerous sons were destroyed by Abimelech—the brother, who afterwards reigned at Shechem (Judges viii, 35), 3; (See Evans, Script. Bibl. ii, 55; Kitto, Daily Bible Illustrations, ad loc.; Stanley, Jewish Church, i, 874; Duncan, Gideon, Son of Jodge, London, 1860.) See ABIMELECH. Gideou (Heb. Gidod), "5704 or 5707, another form of Gideon; Sept. Sacedon), the father of Ailina, which suggests a prominent man of the tribe of Benjamin at the Exodus (Num. i, 11; ii, 22; vii, 60; 15; x, 24). B.C. 1657. Gidad. See Hor-Hagidadd. Gil'dom (Heb. Gidon), 5707, a falling; Sept. Ga'dor, a place east of Gibeath, towards the wilderness (of Bethel), where the routed Benjaminites turned to escape to the rock Rimmon (Judg. xx, 45); hence probably in the plain lying north-east of Michmash, and perhaps so called from being a clearing in the woods that anciently covered this tract (2 Kings ii, 24; 1 Sam. xiv, 25). See MEMRAH. Gier-eagle [1. e. vulture-eagle] (כָּנָה, rock-ans, Lev. xi, 18, and [with עב paragoge] račkam, כָּנָה, Deut. xiv, 17, prob. so called from its tenderness to your young; Sept. ĕkōn and πορφυρίας, Vulg. porphyria), probably a smaller species of vulture, the Vultur percnopterus of Siam (Bochart, Hieros, iii, 56). It is about the size of crows, has an almost round head, with a wrinkled head, a strong pointed beak, black at the tip, large eyes and ears, the latter entirely on the outside, and long feet. The male is white, with black wings; the female has a brown body. It lives entirely upon
Egyptian Vulture (Pernebatus Neophron).

The bird of the question, Gesner had already figured (De Aquila quem Pernebatus vocant, p. 193) the Barbary variety, and pointed out the rackam of Scripture as the identical species; but Bruce first clearly established the fact of its agreement with the Egyptian variety, popularly called "Pharaoh's chicken." The rackama of the former writer is apparently the Ab-Bokha ("white father") of the Turks, and forms one of a small group of vultures, sub-universally distinguished by the name of Pernebatus and Neophron, differing from the other vultures in the bill being longer, straight, more attenuated, and then uncinated, and in the back of the head and neck being furnished with longish, narrow, sub-recteile feathers, but, like true vultures, having the pouch on the breast exposed, and the sides of the head and throat bars and livid. The great wing-covers are partly, and the quill-feathers entirely, of a black and blackish ash-color; those of the head, nape, smaller wing-covers, body, and tail, in general white, with tinges of buff and rufous; the legs are flesh-color, and rather long; and the toes are armed with sharp claws. The females are brownish. In size the species is little bulkier than a raven, but it stands high on the legs. Always soiled with blood and garbage, offensive to the eye and nose, it yet is protected in Egypt both by law and public opinion, for the services it renders in clearing the soil of dead carcasses putrefying in the sun, and the cultivated fields of innumerous rats, mice, and other vermin. Pious Moslems at Cairo and other places bestow a daily portion of food upon them, and upon their associates the kites, who are seen hovering conjointly in great numbers about the city. The rackam extends to Palestina in the summer season, but becomes scarce towards the north, where it is not specially protected; and it accompanies caravans, feasting on their leavings and on dead camels, etc. Mr. Tristram says it breeds in great numbers in the valley of the Kedron (Jbiv, i. 29). Naturalists have referred this vulture to the πτερυγοντες or ψυκτεριοι of Aristotle (Hist. An. ii. 22, 2, ed. Scholrii.). The species indicated in the Scriptures is now generally admitted to be the white carrion vulture of Egypt, Pernebatus Neophron Egyptianus, which differs but slightly from the above description. With respect to the original imposition of the name Rackam, as connected with any unusual affection for its young, there is no modern ornithologist who assigns such a quality to pernepoerti more than to other birds, although it is likely that as the pelican emplaces its bag of fish, so this bird may void the crop to feed her brood. For the Arabian fables of the bird rackam, see Bochart, Hieroc, iii. 56. The Pernepoerti is somewhat what shrewd and unscrupulous, both in Egypt and in Syria, being infested with this disgusting but useful bird (Haselquist, True, p. 193). See EAGLE. As to the identity of this species, it is clear that it is the Pernepoerti of the French naturalists, and was formerly with the name of Vultur, the turkey-buzzard or carrion-crow of America, and even the ants, have been found abstaining from its carrion in Egypt to dry up in the sun, and to swarm around and give it a smell of every other animal substance. See VULTURE. The Rev. G. E. Post, M. D., of Tripoli, Syria, suggests (Am. ed. of Smith's Dictionary of the Bible, a. v.) that the Rackam of Moses may rather be a kind of pelican (Neocolis onocrotalus). For the great numbers in Egypt it is chiefly to be found near the lake Huleh, and which he says is likewise called by the Arabs rackam; but this needs confirmation. See PELICAN.

Giesel, Johann Karl Ludwig, one of the greatest of modern Church historians, was born at Wurzbiach, near Minden, March 3, 1795. His father and grandfather, from both of whom he received instruction in childhood, were Lutheran ministers, somewhat of the Pietistic school. In 1808 he went to study at the Latin school of the Orphan House at Halie, and was made over to the care of the master of the school, who entered the "liberating" army as a volunteer; at the peace in 1815 he returned to his mastership; in 1817 he became co-rector of the gymnasmium at Minden; in 1818 rector of that in Cleve; and in 1819 professor ordinarius of theology in the newly-founded University of Lubeck. For this he was soon regarded as indolent to his Historisch-kritischer Versuch über die Entstehung und die frühesten Schicksale der schriftlichen Evangelien (Historico-critical Essay on the Origin and earliest History of the written Gospels). In 1824 he began the publication of his Lehrbuch der Kirchengeschichte (Text-book of Church History), a further account of which is given below; and his studies were thenceforward almost wholly devoted to this science. In 1831 he accepted a call to the University of Göttingen, where he spent the remainder of his life. The university repeatedly conferred on him the honor of professor, and he was almost unceasingly a member of one or more of the academical boards. He was devoted to the interests of the Göttingen Orphan House, of which he was curator, and which he visited almost daily. He also gave much time and labor to a masonic history, in which he was a member of the various offices his high administrative talent found full play. He died July 8, 1854. His Church History is the chief work on which his reputation rests. The 4th ed. of vol. i appeared in 1844 and 1845; the 4th ed. of vol. ii, carrying the history down to A.D. 1468, appeared 1846-49; vol. iii, reaching to 1648, appeared in two parts in 1840 and 1853. The 1vth vol. (1648-1814), the vth (1814 to the present time), and the vth, containing Dogmengeschichte (History of Doctrines), were issued posthumously, 1856-1857. The history, as a whole, and beyond question, the most learned, faithful, and impartial compendium of Church History that has ever appeared. Its most marked features are the judicious arrangement of the periods of history; the close, compact narrative in the text; and, most of all, the abundant sources of information given in the notes. In the main, the work resembles it; it does not merely give references, but on all difficult or controverted points the quotations bearing on the subject are given at length, thus enabling the reader who has not at command the treasures of a vast library, to consult, in no slight degree, the original sources for himself. It is a treatise, but Gieseler moves through the field of Church History "with critical acumen and cold intellect" (Schaff), and not, like Neander, in the spirit of faith and devotion. The rationalism of the age in which he was educated leaves its traces, if not in his pages, at least between the lines. But his biographer, Redepenning,
denies that he ever was a Rationalist in the ordinary sense of the term, and affirms that from the beginning to the end of his career he held fast the fundamental Christian doctrine of justification by faith alone. A translation of the first three volumes of the Church Dogmatics (Blackie, Edinburgh, 1848; 2nd ed., 1851; 3rd ed., 1859) was made from the earlier editions, and has been superseded by a new one from the fourth edition by Davidson (Edinburgh, 1848-56), of which five volumes have appeared. A better edition still is the American one, edited by Dr. H. B. Smith, of which four volumes have appeared (N. Y., Harper & Brothers, 1860). Of his other works, we mention those on the disturbances in the Dutch Reformed Church between 1838 and 1839 (Unuren in de misd-erf. Kirche, etc., Hamb., 1840); on the Lehren (v. 9.') prophecy (Uebcr d. Lehmnische Weiatsagen, Gottingen, 1840); and Die Lehmnische Weiatsagung als ein Gedicht des Abts von Huybrock nachge- wiesen, Elberfeld, 1849); on the difficulty between the archbishop of Cologne and the Prussian government (Uebcr die kln. Altebegnede, Leips., 1888). He was also one of the assistant editors of the Studien und Kritiken, one of the best theological journals of Germany.—Redepenning, in vol. v. of the Church History, translated in the Journal of Sacred Literature, Jan., 1856; Herzog, Real-Encyklop., v. 152 sq.

Gift, David Flud Van, was born at Sneek. He belonged to an honorable family. Following the bent of his own mind, though in opposition to the wishes of his relatives, he devoted himself to the study of theology, which he pursued at the University of Harderwyk. In 1674 he became pastor of the Reformed church at Wykell. He fully embraced the views of Cocceius. The sentiments which he held he boldly proclaimed. He did not, however, blend the Cartesian philosophy with his Cocceian sentiments, but gave a practical direction and tendency to his interpretation of the Scriptures, and even to those of the prophecies, to whose elucidation he devoted special attention. To him, and his followers and successors of the same school, was applied the epithet serious, in distinction from those who were denounced by Leyden Cocceians. His Cocceianism excited the prejudice and opposition of many to his preaching during the early part of his ministry, and involved him in unpleasant ecclesiastical proceedings. Finally, all further ecclesiastical and civil proceedings against him were stayed by the multitudes who supported him, to which he had appealed. He died in 1701. An edition of his works was given to the public by professor A. Vogt in 1735, under the title Versamling van alle de Wreken, nagezet en uitgegeven van den hoogvoerden en god- erwaardigen bee Dr. David Flud van Giffen (Groningen, 1736).

Gift, the rendering of seven Heb. and four Greek terms (with their variations from the same root) in the A. V., besides being the importer of others differently rendered. Several of these have a distinct and special meaning, indicative of the relation of giver and receiver, or of the motive and object of the presentation. They are as follows.:

1. Properly and simply mutam, a gratuity (Prov. xiv. 6), to secure favor (Prov. xvii. 16; xx. 14), in religious thankfulness (Num. xviii. 11), or in dowry (Gen. iv. 12). From the same root in the widest sense are also: mutam, a present, e. g. a divine bestowal (Psa. lxv. 21), in eternity (Isa. xxv. 4), in religious consecration (Exod. xxviii. 38; Lev. xxviii. 32; Num. xxviii. 6, 7, 29; Deut. xvi. 17; Ezek. xx. 26, 31, 89), in inheritance (Gen. xxxv. 6; 2 Chron. xxii. 2; Ezek. xliv. 16, 17), or as a bribe (Prov. xv. 27; Eccles. vi. 7), with its corresponding Chald. mut'am, mut' am, e. g. a royal bounty (Dan. ii. 6, 48; v. 17); and the synonymous mut't hak, e. g. a reward (Exod. xxviii. 37), or fee (Exod. xxviii. 14), or simple conferment (Eccles. iii. 13, v. 19) or contribution (Ezek. xi. 6, 11). From the same root likewise the Nethinim (see notes, i. e. consecrated, Num. viii. 19).

2. From the root nii', mazeth, to ruin, in the "Fiel" sense of giving, by a gift, come nii', mazeth, pah, pah, pah, pah, pah, pah, in v. in various altered significations, and with different renderings; and nii', mazeth, a present in token of respect (2 Sam. xiv. 42). Perhaps the inherent idea of these terms, however, is rather that of obligation to a superior, i. e. honorary gift; hence the former is also used of a dish of honor sent to special guests ("mess," xili, 34; 2 Sam. xi. 6), and of a tax or fixed contribution towards the sanctuary ("collection," 2 Chron. xxiv. 6), or voluntary first-fruits offered ("oblation." Ezek. xx. 40); like the cognate nii', mazeth ("tribute," 2 Chron. xvii. 11).

3. More distinctly in the sense of a votive offering is nii', minshah, an offering or propitiatory gift (2 Sam. viii. 26, 6; 1 Chron. xvii. 6, 2; 2 Chron. xvii. 8, xxi. 23, 28; Psa. xlv. 12, "present," Gen. xxx. xiv. 18, 20, 21, xxvii, 10; xili, 11, 10, 25, 26; Judg. iii. 15, 17, 18, viii. 18; 1 Sam. xvi. 7; 1 Kings iv. 21, 2 Kings vii. 8, 9; 2 Chron. ix. 24, xvii. 6, 11; Psa. lxxix. 10, in several of which passages the word has the accessory idea of tribute; elsewhere usually rendered offering). Kindred in meaning with the last, but from an entirely different root (sli, shur, to travel about with a commodity offered for sale), is nii', serek, a consolatory present, e. g. to a seer (Isa. ii. 7). Different still is nii', serumak (from nii', tim, to be high), an oblation (Psa. xxix. 4), especially a peace-offering (as usually rendered). The word nii', blessing, is sometimes used of a present (Gen. xxxii. 11; 1 Sam. xv. 27; 2 Kings v. 15), munificence (Psa. xxvi. 25), or benefaction (Gen. xlix. 25; Isa. xix. 24).

4. Mercenary in character are the following: nii', shoch, a bribe, especially given to a judge to obtain a favorable verdict (Exod. xxiii. 8; Deut. xvii. 19; 2 Chron. xiv. 7; Prov. vi. 30; xvii. 18, 23; Isa. i. 28; 2 Kings xxi. 18), rendered bribe, or reward, present, e. g. to a seer (Psa. lxxix. 10; 1 Kings iv. 21, 2 Kings xvii. 15). Also nii', alilchum (literally sending away), dotal presents (1 Kings ix. 16) [see Dowry]; but nii', ne deb (lit. liberally), signifies the profligate wages of a harlot (Ezek. xvi. 30).

5. In Greek the usual terms are some derivative from dudou, to give, namely dudoun, a gift, simply, i. e. the thing given (Matt. vii. 11; Luke xi. 13; Eph. iv. 8; Phil. iv. 17), dudou, the act of giving (James i. 17), dudoun, a present, in toto, in toto (Matt. ii. 7; Eph. ii. 8; Rev. xi. 10), or sacrificial (Matt. v. 23, 24; iv. 8, xiii. 18, 19; Heb. v. 1; viii. 4, ix. 9, xi. 4), or merely eleemosynary (Luke xx. 11) or in consecration (Matt. xv. 5; Mark vii. 11) [see Corban]; whereas dudoun, a gift (John iv. 10; Acts ii. 38; iii. 19, 20; xx. 46; xi. 17; Rom. v. 16, 17; 3 Cor. ix. 8; Eph. iv. 7; iii. 17; Heb. vi. 4), and dudoun, endowment (Rom. v. 16; James i. 17), refer to spiritual bestowments, i. e. grace. These significations are distributed in diudou, a votive offering (Luke xx. 5) as being liling aum and eudou, a present, e. g. to a 1 Cor. xv. 3, benefit. 2 Cor. i. 15, grace (as elsewhere usually rendered), and its cognate auidou, an impartation which is spoken of spiritual and unmerited
The refusal of a present was regarded as a high indignity, and this constituted the aggrieved insult noticed in Matt. xxii, 11, the marriage robe having been offered and refused (Trench, Parables). No less an insult was it not to bring a present when the parties demanded it (1 Sam. x, 27). Compare Present.

Gift of Tongues. See Tongues, Gift of.

Gifts, Spiritual (γαυνήματα, charisma). On this subject we make the following extract, by permission, from Schaff, History of the Apostolic Church, § 116: "By the expression spiritual gift or charismata, μεταφράσας, χάρισματα, the apostle means 'a revelation of the Spirit for the common good' (Φανεροῦ τοῦ πνεύματος πρὸς τῷ σωμάτων, 1 Cor. xii, 7; τὸς τὴν οἰκονομίαν τῆς ἐκκλησίας, xiv, 12; compare Eph. iv, 12); that is, not faith in general, which constitutes the essence to which the whole Christian is disposed, but a particular energy and utterance of the believer's life, prompted and guided by the Holy Ghost, for the edification of the Church; the predominant religious qualification, the peculiar divine talent of the individual, by which he is to perform his function, as an organ of divine communication in the vital functions of the whole Church, and promote its growth. It is, therefore, as the name itself implies, something supernaturally wrought, and bestowed by free grace (comp. 1 Cor. xii, 11); yet it forms itself, like Christianity in general, upon the natural basis prepared for it in the intuitive intellectual and moral capacities of the man, which are in fact themselves gifts of God. These natural gifts it baptizes with the Holy Ghost and with fire, and roves them to higher and freer activity. The charisms are many, corresponding to the various faculties of the soul and the needs of the body of Christ; they are vocal and nervous and divine and human gifts, and they reveal the riches of divine grace (σωματικά χάρισμα, 1 Pet. iv, 10). As, however, they all flow from the same source, are wrought by the Holy Ghost, and are gifts of free grace, so they all subserve the same end, the edification of the body of Christ. Hence the apostle applies to them the beautiful simile of the bodily organism, the harmonious co-operation of different members (Rom. xii, 4-6; 1 Cor. xii, 12 sq.). To this practical design the term administration or ministry (diakonia, 1 Cor. xii, 5; comp. Eph. iv, 12; 1 Pet. iv, 10) no doubt refers. Everyone has 'his proper gift,' which bears expression to his natural peculiarity and is indispensable for his sphere of activity (1 Cor. vii, 7; xii; Rom. xvi, 6; 1 Pet. iv, 10). But several charisms may also be united in one individual. This was the case particularly with the apostles, whose office in the Church abundantly included all the others. Some of their offices and their functions, even to the deaconate (comp. Acts iv, 35, 37; vi, 2). It is true they all had not these gifts in equal measure. John seems to have possessed especially the charisms of love, profound knowledge, and prophecy; Peter, those of Church government and discipline, miracles, and discernment of spirits (comp. Acts v, 1 sq.); James, those of the faithful episcopal superintendence of a congregation, and silent, patient service at the altar. Most variously endowed in this respect was St. Paul, eminent alike in knowing and in setting forth divine mysteries, both for the labor of the preacher, and for preserving and confirming established order; at home among visions and revelations; exalting all the Corinthians in the gift of tongues (1 Cor. xiv, 18); and accredited among them by signs and wonders (2 Cor. xii, 12). The greatest measure of this appears in the history of the Church. They pass from individuals uncommonly gifted, in whom the scattered mental energies of their age are harmoniously concentrated. Of course, however, the number or strength of the charisms establish no merit or preference as to the attainment of salvation. For this, living faith in Christ is sufficient. The charisms are free gifts of grace; and the man is responsible, not for
the possession, but for the use of them. Every spiritual gift is liable to abuse. Spiritual knowledge may puff up (1 Cor. viii. 1). The gift of tongues may foster vanity and the disposition to monopolize the benefit of worship in self-exalting rapture (xiv. 2 sq.). And every gift is attended with heavy responsibility. Is the gift to be used for the comfort of others, or to satisfy love of praise, which alone would prevent such abuse of other gifts, and make their exercise pleasing to God. The value of the gifts varied; not depending, however, as many of the Corinthians thought, on their splendor and outward effect, but on their practical utility for building up the body of Christ (1 Cor. xii. 6). This extraordinary operation of the Spirit showed itself first in the apostles on the day of Pentecost, the birthday of the Church. Some of these gifts, as those of prophecy and miracles, meet us, indeed, even in the Old Testament; and before the resurrection of Christ we find the disciples healing the sick and casting out devils (Matt. xi. 8; Mark xvi. 18). But the permanent possession of the Holy Ghost as the Spirit of Christ was attached to his glorification and exaltation to the right hand of the Father (John vii. 39). Thence it follows that the days of the Spirit are a holy time, a high energy, awakening in every susceptible soul a depth of knowledge, a power of will, and a jubilee of heavenly joy, which formed a glowing contrast with the surrounding paganism. For the Lord had promised (Mark xvi. 17, 18) that the gifts of speaking with tongues would pass away. And the apostles, while they must be not confined to a few, but bestowed on the mass of believers. This blooming glory of the infant Church unfolded itself most luxuriantly among the intellectual, excitable, gifted Greeks, especially in the Corinthian Church. But there, too, the dangers and abuses attended the gift most frequently appeared. The medium of communicating spiritual gifts was the laying on of the apostles’ hands (Acts viii. 17; xix. 6; 1 Tim. iv. 14); yet on Cornelius and his company the Holy Ghost fell immediately after the simple preaching of the Gospel, and they began to speak with tongues and prophesy. But Christ in his brother, before Peter had baptized them (Acts x, 44, 46).

"It is the prevailing view that the charisms, some of them at least, as those of miracles and tongues, became essentially the heritage of the Church, but were merely a temporary adventitious efflorescence of the apostolic period, an ornamental appendage, like the wedding-dress of a youthful bride, and afterwards disappeared from history, giving place to the regular and normal kind of moral and religious activity. So, among modern compare, for example, Glaubemann (Comment. iii. 253), who makes the charismatic form of the Spirit’s operation cease with the third century. With special distinctness, this view is expressed by Trummann as follows (Die Apostol. Kirche, 1848, p. 809) : ‘As, in the case of marriage, the festivity of the wedding-day cannot always last, any more than the inspiration of the first love when the seriousness and steady activity of the common pilgrimage just begun comes on; as, according to the universal order of nature, the blossom must fall away if the fruit is to thrive—though, on the other hand, the fruit does not appear without the blossoming—so that gush of heavenly powers on the day of Pentecost could not, must not continue in the Church. It could not—because the earthly human nature is not able constantly to bear the bliss of ecstasy and such mighty streams of power from above, as is shown by the example of the three chosen disciples on the Mount of Transfiguration. It must not—because the continuance of the blossom would have hindered the development of the fruit. The splendor of these higher powers would unavoidably have fixed the eye and the heart too much on externals, and the proper object and work of faith, the inward conquest of the world, would have been neglected.’ The Irvingites, on the contrary, in the second century, look upon these apostolic gifts and offices as the necessary conditions of a healthy state of the Church at any time; make their disappearance the fault of Christianity; and hold it impossible to remedy the defects of the Church without a revival of the charisms and the spiritual gifts. They appear as the Holy Spirit (1 Cor. xii. 27-31; Eph. iv. 11-18, where under emphasis is laid on ‘till’; and to 1 Thess. v. 19, 20; 1 Cor. xii. 31; xiv, 1, where the apostle not only warns Christians against quenching the holy fire of the Spirit, but also positively requires them to strive earnestly after his miraculous gifts. So this, with the only scientific theologian of the Irvingite community, in his Vorlesungen über Katholizismus und Protestantismus, § 50 (2d ed.); compare my article on ‘Irvingism and the Church Question in the Deutsche Kirch. Briefe, vol. ii. Nos. 2, 5, 6, 6, particularly p. 225 sq. The Irvingites, too, look upon the Church of Jesus Christ as the ‘Church of the Day Saints,’ whose rise (April 6, 1830) was almost simultaneous with the appearance of Irvingism in England, notwithstanding their radical difference in spirit and conduct, likewise claim to possess all the offices and spiritual gifts of the apostles. They believe not to be confined to a few, but bestowed on the mass of believers. This blooming glory of the infant Church unfolded itself most luxuriantly among the intellectual, excitable, gifted Greeks, especially in the Corinthian Church. But there, too, the dangers and abuses attended the gift most frequently appeared. The medium of communicating spiritual gifts was the laying on of the apostles’ hands (Acts viii. 17; xix. 6; 1 Tim. iv. 14); yet on Cornelius and his company the Holy Ghost fell immediately after the simple preaching of the Gospel, and they began to speak with tongues and prophesy. But Christ in his brother, before Peter had baptized them (Acts x, 44, 46).
them, moreover, particularly of the mass of legends of the Roman Church, which still lays claim to the perpetual possession of the gift of miracles, we must proceed with the greatest caution and critical discrimination. In view of the over-valuation of charisms by the apologists, and the responsible writers of the age, we must never forget that Paul puts those which most shun free inspection, and most rarely appear, as the gift of tongues, far beneath the others, which pertain to the regular vital action of the Church, and are at times present in larger or smaller measure, as the gifts of wisdom, of knowledge, of teaching, of the giving of government, and, above all, of love, that greatest, most valuable, most useful, and most enduring of all the fruits of the Spirit (1 Cor. xiii).

"Finally, as to the classification of the charisms. They have often been divided into extraordinary or supernatural, according to whether they are due to the direct operation of an angel, or to the special grace of soul, and of the Spirit (1 Cor. xiii).

(See by Neander; also by Conybeare and Howson, Salt and Light of Christ.)

The Life and Epistles of St. Paul [London, 1838. I. 459.] But this is improper, for, on the one hand, they are all present as natural, on the other, these same charisms, which are supernatural, are an essential part of the Church, and on the other hand, they are all present as natural. St. Paul derives them all from one and the same Spirit, and it is only their supernatural, divine element, that makes them charisms. Nor, according to what has been already said, can the division into permanent and transient, or which belongs to the Church at all times, and transitory, or such as are confined to the apostolic period, be strictly carried out. We therefore propose a psychological classification, on the basis of the three primary faculties of the soul; all being capable and in need of sanctification, and the Holy Ghost, in fact, leaving none of them untouched, but turning them all to the edification of the Church. With this corresponds also the classification according to the different branches of the Church-life, in which the activity of one or other of these faculties thus supernaturally elevated predominates. This would give us three classes of charisms, and one which relates specially to feeling and worship.

1. Those which relate to knowledge and theology. 2. Those which relate to will and Church government. To the gift of feeling belong speaking with tongues, interpretation of tongues, and inspired prophetic discourse; to the theoretical class, or gifts of intellect, belong the charisms of wisdom and of knowledge, of teaching and of discerning spirits; to the practical class, or gifts of will, the charisms of ministration, of government, and of miracles. Faith lies back of all, as the motive power, taking up the whole man, and making all his faculties into contact with the divine Spirit, and under his influence and control.

On the special gifts, see further in Schaff, Hist. of the Apost. Church, § 117—120. On the gift of tongues, See Tongues, Gift of. See also Jorin, Remark on Ecclesiastical History; Doddridge, Lectures on Theology; Neander, Placing and Training, ch. 1; Delitzsch, Biblical Psychology, part 2; Martensen, Christian Dogmatik, § 238—239; Herzog, Real-Encyclop. iv. 735 sq.; and the art. Catholic Apostolic Church; Pliny, xviii. 95.

Giffthell, Leodio Friedrich, a native of Suebia, made himself a name in the 17th century by his fanatical denunciations of the State Church and its ministers. The date of his birth is not known, but he began to write during the Thirty Years' War. Giffthell not only opposed the religious institutions of his day, but he himself civilized himself to turn the government against war and bloodshed. For this reason he wrote to the king of England, in 1643—1644, Zweine Briefe, gerichtet auf die Mächte in England, etc.; then, in 1647, Eine neue Declaration aus Orient, etc. He continued his warnings also to Cromwell, and, amongst other things, called the protector "field-marshall of the devil, highwayman, thief, and murder." After wandering over more than half of Europe, he died at Amsterdam in 1611. See Arnold, Kirchen- u. Ketzertist. iii, 10; Böhme, 8 Bücher v. d. Reformations der Kirche in England (Altona, 1734, p. 941 sqq.); Herzog, Real-Encyclop. v. 155. (J. N. F.)

Giger, George M. (1830—1914), an eminent divine and scholar in the Presbyterian Church, was born in Philadelphia, Pa. He graduated with the highest honors at Nassau Hall in 1841, and studied divinity in the Theological Seminary at Princeton in 1844. "Soon after finishing his college course he was chosen tutor in New Jersey College. This position he held till 1846, when he was elected adjunct professor of mathematics. In the following year he was also elected adjunct professor of Greek, and in 1854 professor of the Latin language and literature. He held this chair till 1865, when failing health obliged him to resign. He died in Philadelphia Oct. 11, 1865. Dr. Giger was heartily attached to the interests of the college with which he was so long connected. He bequeathed to its library, and it is also a residuary legatee to the extent of thirty thousand dollars." He also left legacies to "Clio Hall," one of the college societies, and to the order of Masons.—Wilson, Presbyterian Historical Almanac, ix, 146.

Gihon (Heb. Gihôôn), הַגִּהְוָן, in 1 Kings 7, 19, a stream, as breaking forth from a fountain; Sept. in 1 Chron. iii. 18; 1 Macc. v. 13; 2 Chron. xxxii, 30; Ecclus. undistinguishable in 2 Chron. xxxiii, 14; Vulg. Gihon), the name of two water-courses. Gessenius compares Job xli, 23, and the Arabic jaghnum and jaghnum, spoken of several larger Asiatic streams, as the Ganges, Araxes, etc. 1. The second source of the river Gihon, said to flow around the land of Cuza or Ethiopia (1 Gen. ii, 15). What river is actually denoted here is matter of great dispute and uncertainty; perhaps the face of the country in question has been so greatly changed since that time (although the present tense is used by Moses in the description) as to efface the distinctive marks given. See Paradise. We may here remark, however, that the usual interpretation, and the one adopted by Gessenius, is that of Josephus (I. Antiq. i, 8), which identifies the Gihon with the Nile; so also the Sept., which in Jer. ii, 19, for Sion or the Nile, has γηνανην and in Ecclus. xxiv, 27, puts γηνανην (A. V. "Geon") for the Nile. The Mohammedans likewise reckon the Nile as one of the rivers of Paradise (Fund. der. des Ortes, i, 304). Others regard the Oxus as meant (Rosenmüller, Aetheria, i, 1, p. 384; Bitter, Erdk. ii, 490; Hengstenberg, i, 221), designating it as the Ganges (Ewald, Jer. Gesch., i, 833).—Winer, 1, 428.

The second river of Paradise presents difficulties not less insurmountable than the first, or Pison. Those who maintained that the Pison is the Ganges held also that the Gihon was the Nile. One great objection to this theory, that although in the books of the Old Testament frequent allusion is made to this river, it nowhere appears to have been known to the Hebrews by the name Gihon. The idea seems to have originated with the Sept. rendering of יָנֹּ֣שׁ by פִּנֹּ֣שׁ in Jer. ii, 18; but it is clear, from the manner in which the translators have given the latter clause of the same passage, that they had no conception of the true meaning. Among modern writers, Berthelot (quoted by Delitzsch, Genesis) and Kalisch (Genesis) have not hesitated to support this interpretation, in accordance with the principle they adopt, that the description of the garden of Eden is to be explained according to the most ancient conceptions of the earth's surface, without reference to the advances made in later times in geographical knowledge. If this hypothesis be adopted, it certainly explains some features of the narrative, but, so far from removing the difficulty, it introduces another equally great. It has yet to be proved that the opinions of the Hebrews on these points were as
contradictory to the now well-known relations of land and water as the recorded impressions of other nations at a much later period. At present we have no categorical assertion. Pausanias (ii, 5), indeed, records a legend that the Euphrates, after disappearing in a marsh south of the Pyramus, again appeared, flowing through Egypt as the Nile. Arrian (Hist. Alex. vi, 1) relates that Alexander, on finding crocodiles in the Indus, and beans like those of Egypt on the banks of the Acesines, imagined he had discovered the sources of the Nile; but he adds, what those who make use of this passage do not find convenient to notice, that on receiving more accurate information Alexander abandoned his theory, and cancelled the letter he had written to his mother Olympias on the subject. It is but fair to say that there was at one time a theory afloat that the Nile rose in a mountain of Lower Mauretania (Pline, H. N. v, 10).

The etymology of Gibon (?3, to burst forth) seems to indicate that it was a swiftly-flowing, impetuous stream. According to Golius (Lex. Arab.), Ichimön is the name given to the Oxus, which has, on this account, been assumed by Rosenmüller, Hartmann, and Michaelis to be the Gibon of Scripture. But the Araxes is the name given to a lake near the Girgara, inhabited by people belonging to a Semitic race, and from this circumstance it has been adopted by Roland, Calmet, and colonel Chesney as the modern representative of the Gibon. It is clear, therefore, that the question is not to be decided by etymology alone, as the evidence of the ancients is highly meagre. That the Gibon should be one of the channels by which the united stream of the Tigris and Euphrates falls into the Persian Gulf, was essential to the theory which places the garden of Eden on the Shat el-Abab. Bochart and Huet contended that it was the easternmost of these channels, while Calvin considered it to be the most westerly. Hopkinson and Junius, conceiving that Eden was to be found in the region of Auranitis (Auranitis, quae Edeinita), on the Euphrates, were compelled to make the Gibon coincide with the Nahrarar, the Marshes of Amm. Marc. (xxiii, 6, § 25). That it should be the Orontes (Leclerc), the Ganges (Buttmann und Ewald), the Kur, or Cyrus, which rises from the side of the Saghanlo mountain, a few miles northward of the sources of the Araxes (Link), necessarily followed from the exigencies of the several theories. Reclus (Notes on the Geographical Arrangement of the Ancients (Herod, i, 183)), now called the Diyâlah, one of the tributaries of the Tigris. Abram Petoel (Ugolino, vol. vii) was of opinion that the garden of Eden was situated in the region of the Mountains of the Moon. Identifying the Pison with the Nile, and the Tigris with the Orontes, on which the Euphrates is explained to be the Niger, he avoids the difficulty which is presented by the fact that the Hiddeskel and P̲r̲añ̲ are rivers of Asia, by conceiving it possible that these rivers actually take their rise in the Mountains of the Moon, and then run under ground till they make their appearance in Assyria. Equally unsatisfactory is the explanation of Ephraim Syrus that the four rivers have their source in Paradise, which is situated in a very lofty place, but are swallowed up by the surrounding districts, and, after passing underneath the sea, come to light again in different quarters of the globe. Inasmuch as the sacred narrative makes it evident that all the rivers in question took their origin from the head waters of the Euphrates and the Tigris, we must look to Gibon to one of the streams of the same region, namely, that of the lake system of Central Armenia, in the vicinity of Lake Van. As the Euphrates and Tigris flow southerly, so we may naturally conclude that by the Pison and Gibon are intended rivers flowing northerly, probably one towards the Caspian, and the other towards the Caspian Sea. No representative of the Gibon can be found in this region than the Araxes (Apodizi) of antiquity, which, as we have seen, to this day bears the same name among the Arabs. This is a large river in Armenia Major, which takes its rise from a number of sources in Mount Abus (the present Bin-Gol), nearly in the centre of the space between the east and west branches of the Euphrates (Strabo, p. 828, § 1, 10, 1, 11, 2, 6, 9). The general course may be described as east, then south-east, and, after flowing in a north-easterly direction, it resumes its south-east course, and, after its junction with the Cyrus (Kur), it discharges itself into the Caspian Sea (Col. Monsteith, in the London Geogr. f. 495). It is the modern Aras (Smith, Dict. of Class. Geo., s. v.). See EDK.

2. A fountain near Jerusalem, to which the young Solomon was taken to be anointed king (1 Kings i, 33, 38), out of sight, but within hearing of En-rogel, with the city between (ver. 2, 41), but its direction is not indicated. Subsequently Hezekiah stopped the upper water-course (or upper outflow of the waters) of Gibon, and brought it straight down to the west side of the city of David" (2 Chron. xxxii, 30; xxxiii, 14). This was, perhaps, on occasion of the approach of the Assyrian army under Sennacherib, when, to prevent the besiegers from finding water, great numbers of the inhabitants were hurried on in a direction which carried them into the midst of the water of the fountains without the city, and in particular of the "brook that ran through the midst of the land" (2 Chron. xxxii, 3, 4). The author of the book of Sirach (xiv, 17) also states that Hezekiah "brought water to the city by the hand of the Lord, he ironed into the rock, and built fountains for the waters." The fountain of Gibon is also mentioned by Josephus as lying outside the city (War, Ant. vii, 14, 5). From a comparison of these passages, the editor of the Septuagint Bible (on 2 Chron. xxxii) arrived at the conclusion, since confirmed by Dr. Robinson (Researches, i, 313), that there existed anciently a fountain of Gibon on the west side of the city, which was "stopped" or covered over by Hezekiah, and its waters brought by subterranean channels into the city. Before that time it would naturally have flowed down through the valley of the Gibon, and probably formed the brook which was stopped at the same time. "The fountain may have been stopped, and its waters thus secured very easily by digging deep and erecting over it one or more vaulted subterranean chambers. Something of the very same kind is still seen in the fountain near Solomon's Pools beyond Bethlehem, where the water rises in subterranean chambers, to which there is no access except down a narrow shaft like a well. In this way the waters of Gibon would be withdrawn from the enemy and preserved in the city, in which they would not have been of use, as from the plains to the Niger, he avoids the difficulty which is presented by the fact that the Hiddeskel and P̲r̲añ̲ are rivers of Asia, by conceiving it possible that these rivers actually take their rise in the Mountains of the Moon, and then run under ground till they make their appearance in Assyria.

Inasmuch as the sacred narrative makes it evident that all the rivers in question took their origin from the head waters of the Euphrates and the Tigris, we must look to Gibon to one of the streams of the same region, namely, that of the lake system of Central Armenia, in the vicinity of Lake Van. As the Euphrates and Tigris flow southerly, so we may naturally conclude that by the Pison and Gibon are intended rivers flowing northerly, probably one towards the Caspian, and the other towards the Caspian Sea. No representative of the Gibon can be found in this region than the Araxes (Apodizi) of antiquity, which, as we have seen,
Gihon, a new bore to the Pool of Siloam, which Mr. Williams thinks was the Lower Pool of Isai, xxxi, 9, 11. Schwarz (Palest. p. 266) likewise confounds the lower spring of Gihon with Siloam. This latter, he says, has the same peculiar qualities as the water of a cistern found between the castle of David and the Temple Mount, showing the course of the now closed upper pool Gihon. From the terms of the first passage in which Gihon is mentioned (1 Kings i, 38, 39, 45), it is evident it was at a lower level than the city—"Bring him down (מָשַׁבֶּהוּ) upon (מַעְתָּה) Gihon"—"They are come up (עָלָה) from thence." With this agrees a later mention (2 Chron. xxxiii, 14), where it is called "Gihon-in-the-valley," the word rendered valley being σακαί (σακαί). In this latter place Gihon is named to designate the direction of the wall built by Manasseh—outside the city of David, on the west of (rather to) Gihon-in-the-valley to the entrance of the fish-gate. It is not stated in any of the above passages that Gihon was a spring; but the only remaining place in which it is mentioned suggests that idea, or at least that it had given its name to some water—Hezekiah also stopped the upper source or issue (מָשַׁבֶּהוּ, from מַעְתָּה), to rush forth; incorrectly ‘water-course’ in A.V. of the waters of Gihon" (2 Chron. xxxiii, 80). If this place of Solomon was brought down on the king's mule was Gihon-in-the-valley—and from the terms above noticed it seems probable that it was—then the "upper source" would be some distance away, and at a higher level. Josephus also speaks of water brought to the tower of Hippicus (War, v, 7, 8), which could only have come from the west. The following are therefore the views propounded as to its real import and locality: (1) Some affirm that Gihon was the ancient name of the valley of Jeboshaphat, and that it is compounded of the words נֶבֶן, "a valley," and יִתְּנָה, "beauty." The fountain of the Virgin, which rises at the bottom of the valley, had originally flowed into the brook Kidron, but was artificially carried by a conduit across the ridge of Zion (?) to the Pool of Siloam. This was the lower water-course of Gihon. More to the north was anciently another spring, called the upper water-course of Gihon, which was stopped or sealed in the time of Hezekiah, and conveyed to the west side of the city of David (Lewin, Jerusalem, p. 11 sq.). It will be seen that in this theory the "city of David" is identified with Moriah. (2) Others think that Gihon was the old name of the Tyropean valley; that the Pool of Siloam was the "lower Gihon;" and that the "upper outflow" was at the head of that valley west of the city (Robinson, B. E. i, 446). (3) An English engineer, recently sent out to survey the waters of Jerusalem, has reported that there is not, and from the position of the city and the character of the strata there could not be, any perennial fountain in or around Jerusalem. The so-called Fountain of the Virgin, he says, is a concretion by the pressure of the water seeping through the west cisterns under the Temple area; and the peculiar taste of its water is occasioned by stagnation and filth (MS. Report). If this be so, then Gihon could neither be a fountain nor a perennial stream. The results of this examination of authorities may be thus stated. The upper pool of Gihon was in the head of the valley of Hinnom, and a stream from it ran down through that valley. The fountain was covered by Hezekiah, and the water brought into the city of David by a concealed channel, partly hidden in the rock. There was an "upper" and a "lower" pool in this valley. A close examination of the place tends to confirm these views. No fountain has yet been discovered, nor could it be without extensive excavations; but a section of an old aqueduct was laid bare when sinking the foundations of the new church on the northern summit of Zion. It was twenty feet beneath the surface, in places excavated in the rock, and its direction was from west to east (Bartlett, Walks about Jerusalem, p. 94). This may be a portion of Hezekiah's aqueduct. One of the channels ran from the Temple area as well as to Zion. In the valley of Hinnom are still two great "pools," one at the head, called Birket el-Malumia; another west of the present Sion gate in the bottom of the glen, called Birket el-Azizi. The fountain or rivulet in question is doubtless a part of the aqueduct of the city of Jeru- sam, all of it probably traceable to the supply from the pools of Solomon at Bethlem. See Jeau- salm.

Gil, Juan, commonly called Dr. Egidius, was one of the early converts to the Reformation in Spain. He was born at Oliena, in Aragon, and was eclec- tated at the University of Alcalá, where he devoted himself especially to the Scholastic theology. After his ordination he became canon-preacher at the cathedral of Seville, and professor of theology at Sigüenza. Under the influence of Rodrigo de Valer (q. v.) he was led into the study of the Bible, and the effect appeared in the life and power of his preaching, which was soon noised abroad. He united with Vargas (q. v.) and Ponce de la Fuente in a plan for dif- fusing practical religious life. In 1550 he was nominated by the emperor to the bishopric of Tortosa, and this preference excited the anger of his enemies. He was seized and imprisoned by the Inquisition on a charge of heresy. The emperor and the chapter of Seville interfered in his behalf: but, after a singular trial (for details, see M'Crie), he was condemned to imprisonment (1551), from which he was released in 1555. He died soon after. His remains were taken from the grave by order of the Inquisition, and burned, as those of a Lutheran heretic.—M'Crie, Reformation in Spain, ch. iv.

Gih'alai (Heb. גִּהלָי, "אֱלַי, perhaps dānug [Ge- senius], or ze'shapy [Furst]; Sept. Γελάω), one of the priests appointed by Nehemiah to aid Zechariah in the musical services under Ezra at the dedication of the walls of Jerusalem (Neh. xii, 36). B. C. 446.

Gilbert de la Porree (Gidebertus Porretanus), a Scholastic theologian and follower of Abelard, was born at Poitiers in 1070. He studied philosophy under Bernard of Chartres, and theology under Anselm and Radulfo of Laon. He began to lecture at Chartres, and became a well-known and eminent teacher as a profound logician and an original teacher. In 1142 he was made bishop of Poitiers, but did not give up his metaphysical pursuits. He treated theology more as a metaphysician than as a divine, making more use of Aristotle than of Scripture, or at the fa- thers. His style was very obscure. He was a thor- ough Realist in philosophy. For his theories with re- gard to the divine nature he was accused at the Coun- cill of Rheims in 1148, where Bernard of Clairvaux headed the prosecution against him. The charges were founded on the following propositions: 1. That the divine nature, the substance of God, is not God. 2. The properties of the divine persons are not the persons themselves; and the persons of the Trinity are one only in virtue of their divinity. 3. It was not the divine nature, but only the person of the Word, that became incarnate. 4. There is no more possible but the merit of Christ. Gilbert was condemned, though some of the cardinals voted with him. He submitted to the decision of the council, and remained afterwards unmolested in his diocese. He died in 1154. Gilbert wrote several works of which are yet in MS. Among those printed are Commentarius in quatuor libros de Trinitate of Boethius, published in
Gilbert, Ephraim Wheeler, D.D., a Presbyterian minister, and president of Delaware College, was born at Lebanon, Columbia Co., N. Y., Dec. 19, 1793, and graduated at Union College in 1818. After completing his theological course at Princeton, he was licensed in 1817, and in 1818 he went on a mission to the West, and on his return was elected pastor of the Second Presbyterian Church in Wilmington, Del. He was frequently engaged in missionary labors; and, on being released from his charge at Wilmington in 1824, he became agent for the American Educational Society, but resigned on being chosen president of Delaware College. In 1835 he returned to Wilmington, where he remained till 1841, when he was recalled to the presidency of Delaware College. After a second resignation of this office in 1847, he was installed pastor of the Western Presbyterian Church, Philadelphia, and died July 31, 1858. He published The Letters of Paul and Amos; two tracts, viz., Regeneration and Perseverance; three articles in the Prob. Review, viz., Geology, The Apocalypses, and Millenarianism.—Sprague, Annales, iv, 586.

Gilbert, Gad Smith, a minister of the Methodist Episcopal Church, was born in New Haven, Connecticut, September 22, 1814. He studied at Wesleyan University with a view to the ministry, but for several years he turned his attention to secular pursuits. In 1842 he joined the New York Conference, and was stationed at New Milford, Connecticut. Subsequently he was stationed at Woodbury and Wolcottville. In 1847 he located, and removed to Louisiana on account of the sickness of his wife, who died during the same year. While at the South, however, he had charge of the Methodist Church at Opelousas, La. In 1848 he re-entered the New York East Conference, and was stationed at Greenport, L. I. After that he was stationed at Southport, Conn., First Place, Brooklyn, and Rye, N. Y. In 1855 he was agent for the Wesleyan University. In 1856 he was stationed at Port Chester, N. Y., and afterwards at Second Avenue, New York City, Sag Harbor, L. I., De Kalb Avenue, Brooklyn, Tompkins Avenue, Brooklyn, which society he organized. His last appointment was Southport, Conn. He died in New Haven, August 1, 1866. Shortly before his death he prayed God, saying, "This house is as that of Odell-Eodum, where the ark of the Lord rested; it is the gate of heaven; heaven has come down to earth; the angels are here. This disease is drawing my body down to earth, but Jesus is drawing my soul up to heaven; I shall soon be there." And just before he ceased to live on earth he said, "Is this dying? It is a felicity! O how precious Jesus is! Glory, hallelujah!"—Minutes of Conferences, 1866, p. 77.

Gilbert, Joseph, an English Independent minister, was born in 1714, and was for many years pastor at Nottingham; died in 1852. He wrote The Christian Atonement (Cong. Lecture, London, 1836, 8vo: 2d edit. 1802). See Brit. Critic, xxii, 450; Life of Gilbert, by his widow (Lond. 1833, 12mo); Darwin, Cyclopaedia Bibliographicæ, i, 1254; Allibone, Dictionary of Authors, i, 668.

Gilbert of Sempringham (Gilbert), St., founder of the order of Gilbertines, was the son of Josselein, lord of Sempringham and Tringtong, and was born in 1085. After completing his studies at Paris, he was ordained priest at the bishopric of Lincoln, and for many years pastor. He then founded a house for seven poor maidens who had resolved to lead a life of chastity, and who made vows of absolute seclusion. They were attended only by a few servants, from whom they received all they required through a window. The property with which he had endowed this institution was attended to by poor laborers, whom he also subjected to certain rules and observances. As similar institutions were soon erected in other places, Gilbert requested pope Eugene III to incorporate his foundation with the Cistercians. Eugene not complying with the request, he was obliged to provide in some other way for the guidance of his congregations, and in that view attached a convent of canons to each nunery, framing at the same time very strict rules to keep them each separate; he placed the nuns under the rule of St. Benedict, and the canons under that of St. Augustine. The institution counted some 2200 men and several thousand women among its members, and hospitals for the poor, the sick, widows, and orphans were connected with their regular establishments. Gilbert died in 1189, aged 106 years. The strictness of his life had not protected him from calumny. He was, however, canonized by pope Innocent III in 1202. At the time of the Reformation the order possessed 21 houses, and 11 double convents inhabited by both nuns and monks, but they were so strictly divided that the nuns received even communion through a window, and the canons administered the extreme unction to dying nuns without seeing them. Whenever it became absolutely necessary that a nun and monk should hold communication with each other, a witness was obliged to attend; hence a body of ten canons was appointed, together with a number of lay brethren, subjects to the rule of Citeaux. The order was never propagated outside of England. The rule of the order is given in full by Holstenius (tom. ii). See Hurter, Innocens III us. Zügengemessn, iv, 230; Herzog, Real-Encyclop. v, 413 sq.; Hoefer, Nouv. Biog. Gen. xx, 488.

Gilbertines. See Gilbert of Sempringham.

Gilboa. [many Gilboa] (Heb. Gilbo’a, מְגַבּוֹא, Gáb; 2 Sam. vii, 17-20, bolling spring, prob. from a neighboring fountain; Sept. and Joseph. Am. vi, 14, 2, also Euclid. Onom. Γίλβοα), usually called Mount Gilboa (בָּאֶר בַּיְתָא, Gāḇār biṯā’), a mountain near Hebron which (according to some) Gideon pitched the eves of his overthrow with the Midianites (Judg. vii, 1 [see GLIEAD, 2]), but especially memorable for the defeat of Saul by the Philistines, where his three sons were slain, and where he himself died by his own hand (1 Sam. xxviii, 4; xxxi, 1-8; 2 Sam. i, 6-21; xxii, 12; 1 Chron. x, 8). When the tidings were carried to received from his father the stewardship of two estates, He then founded a house for seven poor maidens who had resolved to lead a life of chastity, and who made vows of absolute seclusion. They were attended only by a few servants, from whom they received all they required through a window. The property with which he had endowed this institution was attended to by poor laborers, whom he also subjected to certain rules and observances. As similar institutions were soon erected in other places, Gilbert requested pope Eugene III to incorporate his foundation with the Cistercians. Eugene not complying with the request, he was obliged to provide in some other way for the guidance of his congregations, and in that view attached a convent of canons to each nunery, framing at the same time very strict rules to keep them each separate; he placed the nuns under the rule of St. Benedict, and the canons under that of St. Augustine. The institution counted some 2200 men and several thousand women among its members, and hospitals for the poor, the sick, widows, and orphans were connected with their regular establishments. Gilbert died in 1189, aged 106 years. The strictness of his life had not protected him from calumny. He was, however, canonized by pope Innocent III in 1202. At the time of the Reformation the order possessed 21 houses, and 11 double convents inhabited by both nuns and monks, but they were so strictly divided that the nuns received even communion through a window, and the canons administered the extreme unction to dying nuns without seeing them. Whenever it became absolutely necessary that a nun and monk should hold communication with each other, a witness was obliged to attend; hence a body of ten canons was appointed, together with a number of lay brethren, subjects to the rule of Citeaux. The order was never propagated outside of England. The rule of the order is given in full by Holstenius (tom. ii). See Hurter, Innocens III us. Zügengemessn, iv, 230; Herzog, Real-Encyclop. v, 413 sq.; Hoefer, Nouv. Biog. Gen. xx, 488.
direct our attention to the mountains which bound the
great plain of Edraelen on the south-east, and are
interposed between it and the Jordan valley. (See Stan-
ley’s Sinai and Palestine, p. 337.) Here there are a
number of ridges, with a general direction from north-
west to south-east, separated by valleys running in the
same direction. The largest of these valleys is the
southernmost: it is a broad, deep plain, about two
miles and a half wide, and leading direct into the Jor-
dan valley. This is supposed to be distinctively (for
the plain of Edraelen is sometimes so called) the Val-
ley of Jezreel. The higher mountains which bound
it on the south undeniably form Mount Gilboa. Eu-
sebos mentions the mountains of Gilboa as lying six
miles from Scythopolis, with a large village upon them
called Gilon (γιλον). There is still, indeed, an in-
habited village, in whose name is Jobemos of that of Gilboa
may be recognised (Robinson’s Researches, iii, 157, 170).
The fountain implied in the name Gilboa may be that
mentioned by William of Tyre (xxii, 26) under the
title of Tabula (טבולה), being the large fountain
still found at the north-eastern base, half a mile from
the ruins, which he says was the “Wall of Ha-
rud” (Judg. vii, 1) and “the fountain of Jezreel” (1
Sam. xxix, 1), and now called Ain-Jalud. See Ha-
rud.
A knowledge of the topography of this region gives
great vividness to several of the Scripture narratives,
but especially to that of the fatal battle in which Saul
fell. The range about six miles north of Gilboa, and
of nearly equal elevation and length, was anciently
called the “hill of Moreh” (Judg. vii, 1), but now
Jebo ed-Dahy (and by travellers “Little Hermon”).
The intervening valley, named from the city of Jez-
reel at the western extremity of Gilboa, has its east-
ern end, overlooking the Jordan, the mound and ruins
of Bethshean. On the other side of the valley, and
near the base of Moreh, stands Shunem; and away
behind the latter hill, hidden from view, is the village
of Endor. The Philistines encamped on the north side
of the valley at Shunem; and Saul took up a position
by the fountain of Jezreel, at the base of Gilboa (1
Sam. xxi, 4; xxix, 1). From the brow of the hill
above the camp Saul had a full view of the enemy,
and he was struck with terror at their numbers (xxvii,
6). The position he had chosen was that of one. There
is a gradual descent in the valley from Shunem to the
base of Gilboa at the fountain, while immediately be-
hind it the hill rises steep and rocky. The Philistines
had all the advantage of the gentle descent for their
attack, and both front and flanks of the Israelites were
exposed to a sort of almost impossible pressure at the
steep hill side. On the night before the battle Saul went
to Endor.
The battle seems to have begun early in the
morning, when the king was wearied and dispirited
(xxviii, 19). The Israelites were broken on the
by the fierce onset of the enemy, and the slaughter
was terrible as they attempted to flee up the sides of Gil-
boa. While the terror-stricken masses were clamber-
ing up the rugged slopes, they were completely
exposed to the arrows of the Philistine archers. “They
fell down slain in Mount Gilboa” (xxxi, 1); “The
Philistines pursued hard upon Saul and upon his sons,
probably when they tried to rally their discomfited
forces. The three sons fell beside their father; “and
the battle went sore against Saul, and the archers hit him; and
was he sore wounded of the archers” (ver. 9). David
caught the peculiarity of the position in his ode:
“The plain of Jezreel is slain from wall to wall; and
Jonathan, thou wast slain upon the high places” (2
Sam. i, 19, 25). The stripping and mutilating of the slain is characteristic of the Arab tribes
to this day, and Porter witnessed some fearful instances
of it in 1858, as described in this same spot (Hand-book for S. and
P. p. 325). The Philistines seized the lower end of Saul
and fastened it to the wall of the neighboring fortress of Bethshean, from whence it was snatched by a few
brave men from Jabesh-Gilead, on the opposite side of the
mountain (Judson, J ewish Chrest., ii, 30 sq.). See Saul.
The ridge of Gilboa is bleak and bare (Wilson, Lands of
Bible, ii, 83; Furst derives from this fact the name of the
mountain, q. d. bare land, from מַעַר, Heb. Lxx. a. v. ). The soil is scanty, and the gray limestone
rocks crop out in jagged cliffs and naked crowns, giv-
ing the whole a look of painful barrenness. One
would almost think, on looking at it, that David’s
words were prophetic (Van de Velde, Narrations, ii, 889).
The highest point of Gilboa is said to have an eleva-
tion of 1,100 feet above the sea, and 1,200 above the
valley of Jezreel (Van de Velde, Advancement, ii. 184).
The range of Gilboa extends in length some ten miles
from W. to E. The modern local name is Jebel Fakhaba,
and the highest point is crowned by a village and wely
Gildas the Wise, the first British historian, was
born in the year 511 (according to Bede, 493), became
scholar at Iona, and spent the last 27 years of his life in
Monmouth, and was made abbot of Bangor. The time of his death is
uncertain. The legendary accounts of him suffer so
much that Bale and Usher suppose there were two of
the same name, while others doubt the existence of
any such person. “In truth, as Mr. Stevenson ob-
serves, his introduction to the Latin text of Gildas de
Excidio Britanniae: ‘We are unable to speak with
certainty as to the parentage of Gildas, his country, or
even his name, when he lived, or the works of which
he was the author.’ Mr. T. Wright attempts to show
that Gildas was a fabulous person, and his his-
tory the forgery of ‘some Anglo-Saxon priest of the
7th century’ (Biog. Brit. Lit. Anglo-Saxon
period, p. 115-118). But Stevenson, Lappenberg,
and others, while admitting the fabulous character of
the common accounts, are inclined to believe that Gil-
das really existed somewhere near the time usually
stated” (English Cyclop. a. v.). The writings which
pass under his name are valuable for their antiquity,
and as containing the only information we have of the
times in which he wrote; although Gibbon describes
him as “a monk who, in the profound ignorance of hu-
man life, has presumed to exercise the office of histori-
an, and strangely disfigures the state of Britain at the
time of its separation from the Roman empire.” They
are, (1) Liber Quernus de excidio Britanniae, etc.,
a picture of the evils of the times of and the previous
ages of British history.—(2) Cantigas Ordin. Eccles. (Reprinted
in the Clergy, a sad account of abomina-
tions and vices imputed to the clergy. They are given
in Gale’s Hist. Brit., etc., Scriptores xe (Xon. 1691,
fol.), and in the Works of Gildas and Nemesius,
translated by J. A. Giles (Lond. 1841, 8vo); also in Gale, Re-
rum Angl. Script. Veteres (1636-87, 8 vols. fol.), but the
best edition is that published in 1888 by the Historical
Society, and edited by Mr. Joseph Stevenson. There
are three English translations of it: one by Habling-
ton (Lond. 1636, 8vo); another, entitled A Description of the State of Great Britain, written eleven hundred
years since the Conquest, 1659, 12mo); and a verse trans-
ation by Mr. Giles, but based on that of Hablington, and published
in Bohn’s Antiquarian Library (1848). See Wright,

Clarke, Sac. of Sacred Literature, vol. 1.
Gilder, William H., a minister of the Methodist
Episcopal Church, was born in Philadelphia Sept. 17,
1812, and was educated at the Wesleyan University.
He entered the Philadelphia Conference in 1845, and
after three years preaching was compelled by ill health
to retire from active service. About 1840 he estab-
lished at Philadelphia the Pearl and Repository, an
independent Methodist paper. For some years he was
principal of the Female Institute at Flemington, N. J.
He afterwards became president of Franklin College,
at St. Thomas’s Hall, Fluelling, L.I. While

III.—28
at Bordentown he established the Literary Register, which he edited for several years. In 1862 he became chaplain of the 40th New-York Regiment, and shared in all its campaigns, following his charge into every battle. In 1863 he was taken with typhoid fever, which greatly impaired his strength. He returned to his post before he was in fit physical condition to do so, and, while attending to his duties in the regimental hospital, he contracted small-pox, of which he died at Culpepper, Va., April 13, 1864. No chaplain in the army had a stronger hold upon the affection and confidence of the men than Mr. Gilder. Shortly before his death he said to his son, "I am in the hands of one whom I can trust; I feel that I am perfectly safe;" and when he could no longer speak, he intimated by signs that all was well. — Minstes of Conferences, 1866. p. 81.

Gilead (Heb. Gil'ād, גילה, generally with the article prefixed, when applied to the region or mountain; properly a stony district, hence, according to Gen. xxxi, 41, heaph or hill of testimony; Sept. Γάλα¬κτος), the name of several men, also of a region and mountain, and perhaps a city. The name Gilead, as usual, is derived from the physical aspect of the country. It signifies "a hard, rocky region;" and it may be regarded as standing in contrast with Bashan, the other great trans-Jordanic province, which is, as the name implies, a "level, fertile tract." The statement of Gen. xxxi, 48, is not confirmed by this etymology. The old name of the district was גילה (Gil'ēd), but, by a slight change in the pronunciation, the radical letters being retained, the meaning was made beautifully applicable to the "heap of stones." Jacob and Laban had built up— and Laban said, this heap (גילה) is a witness (תוא) between me and thee this day. Therefore was the name of it called Gilead (גילה, "the heap of witness"). Those acquainted with the modern Arabs and their literature will see how intensely such a play upon the word would be appreciated by them. This Gilead could not have been far from Mahanaim, and was doubtless one of those round edifices to the northward which overlook the broad plateau of Bashan (Gen. xxxi, 23; xxxii, 1, 3). See GALKH.

A mountainous region east of the Jordan; bounded on the north by Bashan, on the east by the Arabian plateau, and on the south by Moab and Ammon (Gen. xxxi, 21; Deut. iii, 12-17), properly extending from the parallel of Rabbath-Ammon on the south to the river Hieromax on the north. The same name, however, was given by the Arabs extending from these parallels. With the exception of the narrow strip of plain along the bank of the Jordan, the mountains, in fact, cover the whole region; hence it is sometimes called "Mount Gilead" (Gen. xxxi, 25, לבה עדון, "the mountain of Gilead") (comp. Deut. iii, 12; Jer. 1, 19), sometimes "the land of Gilead" (Num. xxxi, 1, לבה עדון; compare Deut. xxxiv, 1; Numb. xxxiv, 29; Zech. x, 10), and sometimes simply "Gilead" (Ps. ix, 7; Gen. xxxvii, 25; Num. xxxiv, 19; Josh. xxii, 1; Amos viii, 14); but a comparison of the several passages shows that they all mean the same thing. There is no evidence, in fact, that any particular mountain was meant by Mount Gilead more than by Mount Lebanon (Judg. ii, 5)—they both comprehend the whole range, and the range of Gilead embraced the whole province, or group of mountains vaguely stated by Eusebius (Onomat. s. v. Γαλαδί) to be connected with Lebanon by means of Mount Hermon. It begins not far from the latter, and extends southward to the sources of the brooks Jabok and Arnon, which divide the western part of the land beyond the Jordan (Gen. xxxi, 21; Cant. iv, 1). According to Michaelis (Mose Recht, i, 86), this mountain, which gave its name to the country so called, must even be situated beyond the region sketched in our maps, and somewhere about the Euphrates. But this is fanciful. Strictly, the name comprehends the mountainous region south of the river Jabok, where is the highest part of the mountains on the east of the Jordan. The name גילה, when applied to the region of the Jordan, or גילה, from the ruined towns so called upon it (Burckhardt, Travels in Syria, p. 345; Robinson's Researches, ii, 243, 806; App. p. 167). The inhabitants were called Gileadites (Judg. x, 3; 2 Kings xv, 23).

1. Division of the Territory.—(a.) Gilead is usually, the name of a large district beyond the Jordan, continually mentioned in the Scriptures in contradistinction to, or apart from, Bashan (Deut. iii, 13; Josh. xii, 5; xiii, 11; xvii, 1; 2 Kings x, 33; 1 Chron. xvi, 16; Micah vii, 14); though, to judge from its geographical position (as given Numb. xxxii, 26; Deut. iii, 12), it must have comprised the entire possessions of the two tribes of Gad and Reuben, and even the southern part of Manasseh (Deut. iii, 13; Numb. xxxii, 40; Josh. xvii, 2-9); corresponding to the region now called el-Beka and Jedel-Ajam. Sometimes it is put for the territory of Gad and Reuben alone (Psa. lx, 9; xvi, 10); at others for the tribe of Gad only (Judg. v, 17; comp. v, 16), although this usage is not constant, and in 1 Sam. xii, 7, the land of Gad and Gilead are joined. The cities Ramoth, Jabelah, and Jazer are usually joined as lying in Gilead.

There is a special descriptive term, which may at least be regarded as a proper name, used to denote the great plateau which borders Gilead on the south and east. The refuge-city Bezer is said to be "in the country of the Mishor" (Deut. iv, 49); and Jeremiah (xxvii, 21) says "the Mishor is come upon the mountain of Bashan." (see also Josh. xiii, 9, 16, 17, 21; xx, 5). Mishor (מישור, מישור) signifies a "level plain" or "table-land;" and no word could be more applicable. This is one among many examples of the minute accuracy of Bible topography. See Mission.

The extent of Gilead in this general sense we can ascertain with tolerable exactness from incidental notices in the Holy Scriptures. The Jordan was its western border (1 Sam. xii, 7; 2 Kings viii, 30). A comparison of a number of passages shows that the river Hieromax, the modern Sheriat el-Mandehur, separated it from Bashan on the north. "Half Gilead" is said to have been possessed by the Edomites, king of the Edomites, and the other half by Og, king of Bashan; and the river Jabok was the division between the two kingdoms (Deut. iii, 12; Josh. xii, 1-5). The half of Gilead possessed by Og must therefore have been north of the Jabok. It is also stated that the territory of the tribe of Gad extended along the Jordan valley to the sea of Galilee (Josh. xiii, 27); and yet "all Bashan" was given to Manasseh (ver 20). We therefore conclude that the deep glen of the Hieromax, which runs eastward, on the parallel of the south end of the Sea of Galilee, was the dividing line between Bashan and Gilead. North of that glen stretches out a flat, fertile plateau, such as the name Bashan (בשון, like the Arabic muskhah, signifies "soft and level soil") would suggest; while on the south we have the rough and rugged, yet picturesque hill country, for which Gilead is the fit name. (See Porter, in Journal of Soc. Lat. July, 1834, p. 284 sq.; compare 18. 16. 1832, p. 364.)

On the east the mountain country is separated from the high plateau of Arabia. The boundary of Gilead is here not so clearly defined, but it may be regarded as running along the foot of the range. The southern boundary is less certain. The tribe of Reuben occupied the country as far south as the river Arnon, which forms the western boundary of Moab (Deut. ii, 86; iii, 12). It seems, however, that the southern section of their territory was not included in Gilead. In Josh. xiii, 9-11, it is intimated that the "plain of Medeba" ("the Mishor" it is called, north of the Arnon, is not
GILEAD

in Gilead; and when speaking of the cities of refuge.

Moses describes Bezer, which was given out of the tribe of Reuben, as being "in the wilderness, in the plain country" (i.e. "in the country of the Midianites"), whereas Ramoth is said to be in Gilead (Deut. iv, 45). This southern plateau was also called "the land of Jazer" (Num. xxxi, 1; 2 Sam. xxiv, 5; comp. also Josh. xiii, 16-25). The valley of Heshbon may therefore, in all probability, be the southern boundary of Gilead. Gilead thus extended from the parallel of the south end of the Sea of Galilee to that of the north end of the Dead Sea—about 60 miles; and its average breadth scarcely exceeded 20.

(b.) While such were the usual limits of Gilead, the northern boundary is wider seen in two or the parts of Scripture. Moses, for example, is said to have seen, from the top of Pisgah, "all the land of Gilead unto Dan" (Deut. xxxiv, 1); and in Judg. xx, 1, and Josh. xxi, 9, the name seems to comprehend the whole territory of the Israelites beyond the Jordan. A little attention shows that this is only a vague way of speaking, in common use everywhere.

(c.) The district corresponding to Gilead is now divided into two provinces, separated by the Jabbock. The section lying between the Jabbock and the Hieromax is now called Jebel Ajlun; while that to the south of the Jabbock is the modern province of Beika. One of the most conspicuous peaks in the mountain range still retains the ancient name, being called Jebel Jittad, "Mount Gilead." It is about seven miles south of the Jabbock, and commands a magnificent view over the whole Jordan valley and the mountains of Judah and Ephraim. It is probably the site of Ramath-Mizpeh of Josh. xiii, 26; and the "Mischeph of Gilead," from which Jephthah "passed over unto the children of Ammon" (Judg. xii, 29). The spot is admirably adapted for a gathering-place in time of invasion or war. The neighboring village of es-Salt occupies the site of the old "city of refuge" in Gad, Ramoth-Gilead (q. v.).

II. History.—The first notice we have of Gilead is in connection with the history of Jacob (Gen. xxxii, 21 sq.). That patriarch, having passed the Ephraimites, "set his face toward Gilead," he struck across the desert by the great fountain at Palmyra; then traversed the eastern part of the plain of Damascus, and the plateau of Bashan, and entered Gilead from the north-east. "In the Mount Gilead Alan overtook his baggage, and went down by the border of the whole district; for when they separated again, Jacob went on his way and arrived at Mahanaim, which must have been considerably north of the river Jabbock (Gen. xxxii, i, 2, 22). See JACOB.

Gilead is not mentioned again in the patriarchal history; but it is possibly this same region which is referred to under the name Ham (q. v.); and was inhabited by the gigantian Zuzim. The kings of the East who came to punish the rebellious "cities of the plain," first attacked the Rephaim in Ashteroth Karkain—I. e. in the country now called Haurân; then they advanced southwards against the "Zuzims in Ham;" and next against the Emim in Shaveh-Kiriatim, which was subsequently possessed by the Moabites (Gen. xiv, 5; Deut. ii, 9-19). See EMM; REPHAIM.

We hear nothing more of Gilead till the invasion of the country by the Israelites. One half of it was then in the hands of Sihon, king of the Amorites, who had a short time previously driven out the Moabites. One, king of Bashan, had the other section north of the Jabbok. The Israelites defeated the former at Jahaz, and the latter at Edrei, and took possession of Gilead and Bashan (Num. xxii, 28 sq.). The rich pasture-land of Gilead, with its shady forests and copious streams, attracted the attention of Reuben and Gad, who "had a very great multitude of cattle," and was allotted to them. The future history and habits of the tribes that occupied Gilead were greatly affected by the character of the country. Rich in flocks and herds, and now the lords of a fitting region, they retained, most unchanged, the nomad pastoral habits of their patriarchal ancestors. Like all Bedawin, they lived in a constant state of warfare, just as Jacob had predicted of Gad—"a troop shall plunder him, but he shall plunder at the last" (Gen. xlix, 19). The sons of Ishmael were subdued and incorporated in the time of Salim (1 Chron. v, 9 sq.), and the children of Ammon in the days of Jephthah and David (Judg. xi, 52 sq.; 2 Sam. x, 12 sq.). Their wandering tent life, and their almost inaccessible country, made them in ancient times what the Bedawin tribes are now—the protectors of the refugee and the outcast. The sons of Salim and the sons of Gad dwelt together while they vainly attempted to re-establish the authority of their house (2 Sam. ii, 8 sq.). Here, too, David found a sanctuary during the unnatural rebellion of a beloved son; and the surrounding tribes, with a characteristic hospitality, presented the best token to the fallen monarch (3 Sam. xvii, 22 sq.). Blishh the Tishbite was a Gileadite (1 Kings xvii, 1); and in his simple garb, wild aspect, abrupt address, wonderfully active habits, and movements so rapid as to evade the search of his watchful and bitter foes, we see the characteristics of the genuineness of the Bedawin, ennobled by a high prophetical mission. See GAD.

Gilead was a frontier land, exposed to the first attacks of the Syrian and Assyrian invaders, and to the unconquering raids of the desert tribes. But Machir, the first-born of Manasseh, was a man of war; therefore he and the Gadites and the Gileadites (Josh. xxii, 1 sq.) became the wild and wayward Jephthah, Misipeh of Gilead became the gathering-place of the trans-Jordanic tribes (Judg. xi, 29); and in subsequent times the neighboring stronghold of Ramoth-Gilead appears to have been considered the key of Palestine on the east (1 Kings xxi, 28; 12, 1). Under the Roman dominion the country became more settled and civilized; and the great cities of Gadara, Pella, and Gerasa, with Philadelphia on its south-eastern border, speedily rose to opulence and splendor. In one of these (Pella) the Christians of Jerusalem found a sanctuary when the armies of Titus gathered against the city (Eusebius's Ecclesiastical History, V, 5). Under Mohammedan rule the country has again lapsed into semi-babarianism. Some scattered villages amid the fastnesses of Jebel Ajlun, and a few fierce wandering tribes, constitute the whole population of Gilead. They are nominally subject to the Porte, but their allegiance is lightly upon them. The inhabitants, like the old Gadites, are semi-nomads, whose wealth consists in flocks and herds. Like them, too, they are harassed by the desert tribes; they are inured to arms, and they are noted for their hospitality. The capital of the whole country is es-Salt (Burchard, Trav. in Syria, p. 276; Buckerbach, A. C. Trav. in Tribes, p. 21 sq.; Lord Lindsay's Travels, i, 108 sq.).

III. Description of modern Country.—The great body of the range of Gilead is Jura limestone, but there are occasional veins of sandstone. The oak and the terebinth flourish on the former, and the pine on the latter. The mountains of Gilead have a real elevation of from two to three thousand feet, but their apparent elevation on the western side is much greater, owing to the depression of the Jordan valley, which averages about 1000 feet. Their outline is singularly uniform, resembling a massive wall running along the horizon. From the distance, to the south, close to the border, on the side they meet the plateau of Arabia, 2000 feet or more in height. Though the range appears bleak from the distance, yet, on ascending it, we find the scenery rich, picturesque, and in places even grand. The summit is broad, almost like table-land "tossed into wild
GILEAD

confusion of undulating downs" (Stanley, Sinaï and Pal. p. 314). It is everywhere covered with luxuriant herbage. In the extreme north and south there are no trees, as we advance towards the centres they soon begin to appear, at first singly, then in groups, and in length, each side of the valley, in forests, chasms, thickly prickly oak and terebinth. The rich pasture-land of Gilead presents a striking contrast to the nakedness of Western Palestine. Except among the hills of Galilee and along the heights of Carmel, there is nothing to be compared with it as a place for pasture (Neh. xxxii. 1) "The hills passing through the country, one can hardly get over the impression that he is roaming through an English park. The graceful hills, the rich vales, the luxuriant herbage, the bright wild flowers, the plantations of evergreen oak, pine, and arbutus; now a tangled thicket, and now a grove scattered over the gentle slope, as if intended to reveal its beauty; the little rivulets fringed with oleander, at one place running lazily between al- luvial banks, at another dashed madly down rocky ravines. Such are the features of the mountains of Gilead. Here, too, we have the cooing of the wood-pigeon, the trilling call of the passerine, the pleasant hum of myriads of insects, and the cheerful chirp of grasshoppers to give life to the scene. Add to all the crumbling ruins of town, village, and fortress, clinging to the mountain-side or crowning its summit, and you have a picture too rich for the imagination. No doubt it was the poet's true effect when he described the abode of Gerasa" (Porter, Handbook for S. and P. p. 310). Such a picture, too, illustrates at once the fertility ascribed to it by Jeremiah (xxii. 6; i. 19), and the judgments pronounced against it by Amos (i. 8, 13).

Gilead anciently abounded in spices and aromatic gums, which were exported to Egypt (Gen. xxxvii. 25; Jer. viii. 22; xli. 11). The balm of Gilead seems to have been valued for its medicinal properties from the earliest times. The Midianish merchants to whom Joseph was sold were passing through the valley of Jerseel on their way from Gilead to Egypt (Gen. xxxvi. 17). Josephus often mentions, as if balm, or balsam, but generally as the product of the rich plain of Jericho, for example (Ant. xiv. 4): "When Pompey had pitched his camp at Jericho (where the palm-tree grows, and that balsam which is an ointment of all the most precious, which upon any incision bares the wood of the partridge, as it were an ambrosic substance, as if with a knife, he marched in the morning to Jerusalem." Dr. Thomson found in the plain of Jericho some thorn-bushes called the saxum, "which is like the crab apple-tree, and bears a small nut, from which a kind of liquid balsam is made, and sold by the monks as a sort of oil, so famous in ancient times, and it is supposed that the balm which Jacob sent to Joseph (Gen. xlvii, 11), and that which Jeremiah (viii. 22) refers to in his medicinal qualities, were the same which the trading Ishmaelites were transporting to Egypt, and that it was some resinous extract from the forest trees of Gilead" (v. in and Book, ii, 192, 194). See below.

GILEAD, BALM OF. Our English word balm, and its French equivalent baume, are the contracted forms of balasam, a word (βαλασάμων) which the Greeks have adopted from the Hebrew words בַּלַש-ם and תַלְשׁ, lord or chief of oils. In ordinary language the word is used very loosely, but here we are only concerned with the substance to which the English translation of the Bible has given this name. As early as the days of Jacob the district of Gilead yielded aromatic substances which were in great request. After casting Joseph into a pit, we are told that his brothers espied a caravan on its way from Gilead to Egypt, "with their camels bearing spicery, and balm, and myrrh" (Gen. xxxvii. 25). Afterwards, when Jacob dispatched his embassy into Egypt, it is said they brought him "the balasam" (Gen. xlii. 11); and at an interval of more than 1000 years later we find that the same region was celebrated for the same production, for we find Jeremiah asking, "Is there no balm in Gilead? or from an expression in the prophet Ezekiel we find still later that balm was one of the precious stones which the merchants carried to the market of Tyre (Ezek. xxv. 17). In all these passages the original word is צְרִי, tosr. During the interval, however, between Jacob and Jeremiah, we are told by Josephus that the queen of Shaba brought "the root of the balasam" as a present to Solomon (Ant. vii. 6, 6); and there can be no doubt that, in the later days of Jewish history, the neighborhood of Jericho was the only place in the country where true balsam grew, and even there its culture was confined to two gardens, the one twenty acres in extent, the other much smaller (Theophrastus).

Many attempts have been made by different writers to identify the tosr, not one of which, however, can be considered altogether conclusive. The Syrian version in Jer. viii. 22, and the Samaritan in Gen. xxxvii, 25, suppose cera, "wax," to be meant; others, as the Arabic version in the passages cited in Genesis, conjecture theriac, a medical compound of great supposed virtue in serpent bites. Of the same opinion is Castell (Lex. Hier. s. v. **22). Luther and the Swedish version have "salve," or "ointment," in the passages in Genesis, but in Ezekiel, as also in Jeremiah, they make it "mastic." The Jewish Rabbinus, Junius and Tremellius, Deodatus, etc., have "balm" or "balasam," as the A. V.; Celsius (Hier. ii. 180) identifies the tosr with the mastic-tree (Pistacia lentiscus). Rosenmüller (Bibl. Bot. p. 160) believes that the pressed juice of the fruit of the saum-tree (Elonacus cyprius folius; Lin. [??], or narrow-leaved oleaster, is the substance denoted; but the same author, in another place (Schoel. in Gen. xxxvii. 25), mentions the balsam of Mecca (Amyris obolesi zamam, Lin.), referred to by Strabo (xvi. p. 778) and Dioscorides Sicilus (ii. 132) as being probably the tosr (see Kitiyo, Phys. Hist. lib. Pal. p. 373; Hasselquist, Travels, p. 293).

Hasselquist has given a description of the true balasam-tree of Mecca. He says that the exudation from the plant "is of a yellow color, and may be said to have a most fragrant smell, which is resiny, balsamic, and very agreeable. It is very tenacious or glutinous, sticking to the fingers, and may be drawn into long threads. I have seen it at a Turkish surgeon's, who had it immediately from Mecca, described it, and was informed of its virtues; which are, first, that it is the best stomachic we know of; if taken in moderate doses, it strengthens a weak stomach; secondly, that it is a most excellent and capital remedy for curing wounds, for if a few drops are applied to the fresh wound it cures it in a very short time" (Travels, p. 293).

The trees which certainly appear to have the best claim for representing the scriptural tosr—supposing, that is, that any one particular tree is denoted by the term—are the Pistacia lentiscus (mastic) and the Amyris obolesi zamam, Linneus, the Balsamodendron obolesi zamam, or Gileadense of modern botanists (Balm of Gilead). One argument in favor of the first-named tree rests upon the fact that its name in Arabic (diarrac, đarrâ) is identical with the Hebrew; and the Arabian naturalists have attributed great medicinal virtues to the resin afforded by this tree (Diocides, i, 90, 91; Pliny, xxiv, 7; Avicenna, ed. Arab. p. 204 and 277, in Celsius). The Pistacia lentiscus has been recorded to occur at Joppa, both by Psalms and Josephus (Strand. Flor. Palmt. No. 561). The derivation of the word from a root, "to flow forth," is opposed to the theory which identifies the pressed oil of the saum with the tosr, although this oil is in very high esteem among the Arabs, who even prefer it to the balm of Mecca, as well as to that of the tosr (see Marrit, ii, 353, ed. London). Maundrell (Journey.
GILEAD

from Alep. to Jerusa. p. 86), when near the Dead Sea, saw the zizam-tree. He says it is a thorny bush with small leaves, and that "the fruit, both in shape and color, resembles a small unripe walnut. The kernels of this fruit the Arabs bury in a mortar, and then, putting the pulp into scalding water, they skim off the oil which rises to the top: this oil they take invari-ably for bruises, and apply it outwardly to lessen wounds. . . . I procured a bottle of it, and have found it upon some small trials a very healing medicine." "This," says Dr. Robinson (Bib. Rel. ii, 291), "is the modern balsam or oil of Jericho." From Maundrell's description of the amber Dr. Hooker unhesitatingly identifies it with Aeginaerargyritis, which he found abund-antly at Jericho (Kew Garden Misc. i, 257).

In the region of Gilead, the only production now which has any affinity to balm or balsam is a species of Elaeagnus, from the kernels of which a balsamic oil is extracted (Journal of Deputation of Malta Protestant College, p. 400); and even the balsam gardens of Jericho have perished and left no trace. There is little reason, however, to doubt that the plants with which they were stocked were the Amyris Gilodensis, or A. opobalsamum, which was found by Bruce in Abyssinia, the fragrant resin of which is known in commerce as the "balsam of Mecca." Like most plants yielding gum or gum-resin, the amyris requires a high tempera-ture to elaborate its peculiar principle in perfection; and in the deeply depressed and sultry valley of the Jordan it would find a climate almost as congenial as that of Yemen, where we find it now. Nor is it impossible that there may have existed in Gilead at an early period a plantation of the same amyris; but, yielding to the superior qualities of the queen of Sheba's newly-imported specimens, the growth of Gilead may have become obsolete, and bequeathed its name and honors to its more favored rival. The Amyris Gilodensis is an evergreen shrub or tree, belonging to the natural order Amyridaceae. Its height is about fourteen feet, with a trunk eight or ten inches in di-ameter. The wood is light and open, and the small ter standing some time, it becomes pellucid, and deepens to an almost golden color. With its pleasant appearance, its aromatic odor, and its great rarity—being worth twice its weight in silver—it has always been highly valued in the East as a remedy. It is consid-ered very efficacious in the cure of wounds, and the Egyptians esteem it as a preventive of the plague. As a valuable incense, it is, indeed, mentioned in the 25th chapter of Jeremiah (ch. viii. 22); and, could it be procured as easily as the balsams of Peru and Tolu, it is likely that it would find a place in European pharmacy. In de-scribing Palestine, Tacitus says that in all its produc-tions it equals Italy; besides possessing the palm and the balsam (Hist. v. 6); and the famed tree excised the cupididity of successive invaders. By Pompey it was exhibited in the streets of Rome as one of the spoils of the newly-conquered province, B.C. 66; and one of the wonderful trees graced the triumph of Ves-pasian, A.D. 79. During the invasion of Titus, two battles took place at the balsam groves of Jericho, the last being to prevent the Jews in their despairing frenzy from destroying the trees. They then be-came public property, and were placed under the protec-tion of an imperial guard; but history does not record how long the two plantations survived. See BALM.

2. Possibly the name of a mountain west of the Jor-dan, near Jerseel (Judg. vii. 3). Michaeilis and others are inclined to agree with the suggestion of Clericus (ad loc.), that the true reading in this place should be "Gilead, the mountain of Gilead," and that the "mountain of Gilead" was encamped at the "spring of Harod," which is at the base of Mount Gilboa. Gesenius, however, thinks (Theaesaur. Hebr. p. 804) that the passage merely implies that all those who should not feel inclined to prosecute the war against the Midianites farther than the mountain from which the latter had emerged, were at liberty to return home ("גניב, "per montem"). A better solution, how-ever, is that suggested by Schwarz (Pulvel. p. 164, note), that the northernmost spur of Mt. Gilboa was also call-ed Gilead; and this is confirmed by the actual exis-tence of the name Jaldob to this day in this spot. See Harod.

3. A city of this name is apparently mentioned Hos. vi. 8 (comp. Sept. Judg. xii. 7); so, at least, it is given in most of the ancient and modern versions, though the meaning may only be that Gilead is (like) a city full of iniquity, i.e. a union of iniquitous people. This city (if one be meant) is perhaps the same with Ramoth-Gilead.

4. The son of Machir (apparently by Maachah), and grandson of Manasseh; his descendants bore his name as a patronymic (Num. xxxvi. 29, 30). B.C. prob. be-tween 1874 and 1658.

5. The father of Jephthah the judge, a descendant of the above (Judg. xi. 2). B.C. ante 1236. It is not clear, however (comp. ver. 7, 8), whether this Gil-ead was an individual, or a personification of the community.

Gileadite (Hebrew prop. Gilodite, "Gilead,", Sept. גלדאי or גלדנָי; but often the same as Gilead simply), a descendant of one of the men, or an inhabi-tant of the region called Gilead (Num. xxxvi. 29; Judg. x. 3; xi. 10; xii. 7; 2 Sam. xvii. 27; xix. 31; 1 Kings ii. 7; 2 Kings xv. 25; Ezra ii. 51; Neh. vii. 68), or perhaps of the tribe of Manas-sheh, descended from Gilead. There appears to have been an old standing feud between them and the Ephraimites, who taunted them with being deserters. See Judg. xii. 4, which may be rendered, "And the men of Gilead smote Ephraim, because they said, On-sagites of the west are ye (Gilead is between Ephraim and Manasseh)."

"Balm of Gilead" (Amyris Gilodensis), with enlarged view of the Flower and Fruits, and section of the latter.

and scanty leaves resemble rice. After the dog-days, when the circulation of the sap is most vigorous, incisions are made into the bark, and the balsam is re-ceived in small earthen bottles. The supply is very scanty. Three or four drops exude in a day through a single orifice, and the entire amount yielded by the gardens of Jericho did not exceed six or seven gallons a year.

and the balsam is of a whitish tinge, inclining to yellow, and somewhat turbid, and its odor is almost as pungent as volatile salts; but, af-
Gilgal, Sr. (Lat. Auglia; Fr. Gilles; Span. Gil), patron saint of woodlands, also of Edinburgh. The Roman Catholic Church has set apart Sept. 1 for the commemoration of a saint of this name, though it is doubtful whether such a person ever lived. The hagiographers describe two such persons; the first an Athenian of the 6th century, who wrought various miracles, and finally took up his abode in a cave near the mouth of the Rhone, living upon the milk of a hind, and upon herbs and fruits. The king's hunters once wounded the hind, and the arrow also passed through the hand of St. Gilles (who, as an attribute, in legendary art, is a wounded hind). He died in his cave, and the noble monastery of St. Gilles was erected near the spot. The other claimant to the name of St. Gilles was abbot of a monastery near Arles in the 6th century. The first legend, as the more striking and poetical one, is naturally the most popular. St. Gilles has been especially venerated in England and Scotland. In spite of the Reformation, the name of this legendary saint is still retained in the English calendar.—A. Butler, Lives of Saints, Sept. 1; Mrs. Jamieson, Legends of the Monastic Orders, p. 26.

Gil'gal (Heb. Gilgâl), הִלְגַּל, a wheel, as in Isa. xxviii, 26; according to Josh. v, 9, a rolling away; with the article a prop. name, Sept. רֵוי פַּלַיָּה, but Tókây v. r. Pokây (in Deut. xi, 30 and Josh. xiv, 5), the name of at least two places in Palestine.

1. The site of the first camp of the Israelites on the west of the Jordan, the place at which they passed the first night after crossing the river, and where the twelve stones were set up which had been taken from the bed of the stream (Josh. iv, 19, 30; comp. 8) [see Stone].

2. Where also they kept their first passover in the land of Canaan (v, 10). It was in the "end of the east of Jericho" (בַּנֵי יְרוּשָׁלָיָם; A. V. "in the east border of Jericho"), apparently on a hilltop or rising ground (v, 8; compare 9) in the Arboth-Jericho (A. V. "the plains"), that is, the hot, depressed district of the Ghôr which lay between the town and the Jordan (v, 10). Here the Israelites who had been born on the march through the wilderness were circumcised, an occurrence from which the sacred historian derives the name: "This day I have rolled away (גִּלַּל) the reproach of Egypt from off you." The present of the place is called Gilgal to this day.

The meaning does not seem to be that a new name was given, but rather that a new meaning and significance were attached to the old name. The word Gilgal means a "circle," and also a "rolling away." A similar play upon a word was noticed in the case of Gilgal: and Bethel is an example of an old name having attached to it a new significance (Gen. xxviii, 19; xxxi, 15). By Josephus (Ant. v, 1, 11) it is said to signify "freedom" (ἄλεθινος). It would appear that Gilgal was the name of the place before the Exodus, for Moses describes the Canaanites as dwelling "over against Gilgal" (Deut. xi, 30). The difficulties connected with this passage have already been explained under EMAL.

Kell supposes that this Gilgal was near Shechem (Comm. on Josh. p. 219, 223). The camp thus established at Gilgal remained there during the early part of the conquest (Josh. ix, 6; x, 6, 7, 9, 15, 43); and we may probably infer from one narrative that Joshua retired thither at the conclusion of his labours (xix, 6; comp. x, 10). Some fifteen years later, from the highlands by the Philistines, collected his feeble force at the site of the old camp (1 Sam. xiii, 4, 7). The tabernacle appears to have remained there at least until its removal to Shiloh (Judg. xviii, 1). It was one of the places to which Samuel regularly resorted, where he administered justice (1 Sam. vii, 17), and where burn-offerings and peace-offerings were accustomed to be offered "before Jehovah" (x, 8; xi, 15; xiii, 8, 9-12; xv, 21); and on one occasion a sacrifice of a more terrible description than either (xv, 33). The air of the site is arid; through all ages the conclusion that at the time of these occurrences it was the chief sanctuary of the central portion of the nation (see x, 8; xi, 14; xv, 12, 21). But there is no sign of its being a town; no mention of building, or of its being allotted to the priests or Levites, as was the case with other not in towns, Bethel, Shechem, etc.

In the history of David's return to Jerusalem (2 Sam. xix), the men of Judah came down to Gilgal to meet the king to conduct him over Jordan, as if it were close to the river (xix, 10), and David arrived there immediately on crossing the stream after his parting with Barzillai the Gileadite (xix, 14, 40). After the foundation of the Temple, Gilgal appears to have been utterly neglected. Perhaps, when Jericho was rebuilt, the traditional sanctity of Gilgal was transferred to it, and there a school of the prophets was established and remained until a later period (2 Kings ii, 3). See Jerusalem.

How Gilgal became appropriated to a false worship we are not told, but certainly, as far as the obscure allusions of Hosea and Amos can be understood (provided they refer to this Gilgal), it was so appropriated by the kingdom of Israel in the middle period of its history (Hos. i, 15; ix, 15, 9; x, 5). These idolatrous practices are specially mentioned by Eiphanius and others (Reland, Palæst. p. 732 sq.).

The utter desolation of its site, and the whole surrounding region, shows how fearfully the prophecies have been fulfilled.

The place is not mentioned in the Apocalypse nor the N. T. Later authorities are more precise, but unfortunately discordant among themselves. By Josephus (Ant. vi, 1, 4) the encampment is given as fifty stadia, rather under six miles, from the river, and ten from Jericho. In the time of Jerome the site of the camp and the twelve memorial stones was still sufficiently distinguishable, if we are to take literally the expression of the Epist. Pauli (§ 12). The distance from Jericho was then two miles. According to Eusebius, the spot (Γαλαγῶν) was left uncultivated, but regarded with great veneration by the residents (Onomast. s. v. Γαλαγῶν).

When Arcul was there at the end of the 7th century, the place was shown at five miles from Jericho. A large church covered the site, in which the twelve stones were ranged (Early Travels in Pal. p. 7). It is probable, however, that the ecclesiastical architects had not been very particular about their sites (Robinson, Research, ii, 257). The church and stones were seen by Willibald thirty years later, but he gives the distance as five miles from the Jordan, which again he states correctly as seven from Jericho. The stones are mentioned also by Thietmar, A.D. 1217 (according to whom John the Baptist was born here, in 1796); and he said that God was "able of these stones to raise up children unto Abraham" (Peregr. 81); and, lastly, by Ludolf de Suchem a century later. These specifications show that Gilgal must have been near the site of the modern village of Riha (Porter, Handbook for Sinai and Palestine, p. 190). See Framlingham, a spot named Alcorah, a little south-east of er-Riha, is marked as probable. Schwartzes...
(Physical Description of Palestine, p. 128) asserts that there is at present found near the Jordan in this vicinity a hill, which appears like a heap of stones, and is called Gilead; but this last confirmation is probably this Gilgal that is called Gilead. In Joshua, xviii. 17, where, as well as in the parallel passage, xvi. 7, the position is given with more minuteness than elsewhere.

2. A royal city of the Gileadites, whose sovereign ("king of the nations of Gilgal") or, rather, perhaps the "king of Gilgal-at-Gilgal," is mentioned in the catalogue of the chiefs overthrown by Joshua (Josh. xii. 23), appears to have been situated on the western plain, as it is connected with the "region of Dor" (verse 22). Eusebius and Jerome (Onomast. s. v. Γαλγαλι) say that it was in their time that Elisha reconstituted the temple (2 Kings, iv, 5), about six Roman miles north of Antipatris (Keft Saba); and this is probably the present ruined village Nijjilich of the same neighborhood (Robinson, Researches, iii, 47; Schwartz, Palest. p. 92), although this is only two miles from Keft Saba, and east-south-east (E. Smith, in the Bibliotheca Sacra, 1843, p. 492), rather than the Kiltich, about two miles east of Keft Saba (Robinson, Later Researches, p. 136, 138).

The Gilah, or original inhabitants of this place, evidently were in some distinctive sense heathen (q. v.). By that word (Judg. iv. 2) or the name Galgal (Gen. xiv. 1, etc.) it is generally rendered in the A. V.; and as in the well-known phrase, "Galilee of the nations" (Isa. i, 1; comp. Matt. iv. 15). Possibly they were a tribe of the early inhabitants of the country, who, like the Gerizites, the Avim, the Zemarites, and others, have left only a faint, casual trace of their existence there (Smith, s. v.). See GALILEE.

3. A town, evidently in the mountainous interior, wherein Eliphaz and Elisha are said to have gone down to Bethel (2 Kings ii, 2), which is itself 3000 feet above the Gilgal in the Jordan valley. It was perhaps here that Jericho was passed (2 Kings, iv, 38); he may even have resided here (2 Kings ii, 1; iv, 8). It lay in the vicinity of Baal-sheanah (2 Kings iv, 42). This is probably the Beth-Gilgal (A. V., "house of Gilgal") mentioned (Neh. xii, 29) as occupied by the Levitical singers after the exile; and it is evidently also the Galala (Γαλαλιας) on the route of the victorious Bacchides (1 Macc. ix, 3). See GALALA.

Kell (Comment. on Josh. p. 219, 292) and Van de Velde (Memoir, p. 315), after Winer (s. v.), unnecessarily identify this with the Gilgal of Joshua's camp, etc. It is doubtless the Galala (Γαλαλιας) stated by Eusebius and Jerome (Onomast. s. v.) to be located near Bethel; and is the large village Nijjilich, one hour west of Sinijil, on the road from Jerusalem to Nablis, situated so high on the brow of the central mountain tract as to afford an extensive view of the great lower plain and the sea, and even a view of Mount Hermon (Robinson, Researches, iii, 81).

Gill, Alexander, an English philologist and theologian, was born in Lincolnshire Feb. 27, 1564. He studied and graduated in Corpus Christi College, Oxford. In 1588 he became principal of St. Paul's school, which post he filled until his death, Nov. 17, 1685. He gained much reputation as a philologist and theological critic by his Treatise concerning the Trinity (1601, 8vo); Logomarion Anglice (1621, 4to); Sacred Philosophy of Holy Scripture, or a Commentary on the Creed (1630, 8vo). See Wood, Athene Oxoniensis, vol. i (London, 1621, 2 vols. fol.); Hoeffer, Nouv. Biog. Générale, xii, 521; Bright, Life of Cotet; Allibone, Dict. of Auth., i, 671.

Gill, John D., an eminent Biblical scholar, was born at Kettering, England, Nov. 29, 1697. He received his education at the grammar-school in his native town. But the tuition of the school was only one of the means of education that he availed himself of. "As sure as that John Gill is in the bookseller's shop, became a proverbial expression. He left school and began preaching at the age of nineteen, and was called to the pastorate successively in Leominster, Hightown, Fellers and Kettering. In 1719 he was settled at Horsleydown, Southwark, where he ministered for fifty-one years. He died Oct. 14, 1771. Short as was his term of preparatory study, he must have laid a good foundation, and have been diligent in his subsequent studies. He made himself a competent Latin and Greek scholar, and a learned Orientalist. His Rabbinical studies were extensive and profound. The fruits of his learning are chiefly deposited in his commentary, a work valuable to consult, but so heavy and prolix in style as to repel any but very courageous readers. He was a voluminous author. For a time he exerted a commanding influence in his own denomination, and enjoyed high consideration with the religious public generally. In theology he was a Calvinist of the Supralapsarian type, and his peculiar doctrine concerning the relation of Christians to the law of God occasioned, though it scarcely justified, the charge of Antinomianism. His principal writings are, 1. Exposition of the Song of Solomon; 2. Specimens respecting the Messian fulfilled in Jesus; 3. The Cause of God and Truth, being an examination of the several passages of Scripture made use of by the Arminians (4 vols. 8vo, London, 1733); 4. The Exposition of the Old Testament (8 vols.); 5. Exposition of the Old Testament (8 vols.); 6. Dissertation on the Antiquity of the Hebrew Language, Letters, Vowel Points, and Accents; 7. A Body of Doctrinal and Practical Divinity; 8. Sermons and Tracts. He also wrote several tracts on Baptism, one of which, entitled Infant Baptism a Part and Pillar of Popery, has been republished in America. His Body of Divinity has also had some circulation in this country, and has been abridged. He received the degree of Doctor of divinity from the University of Glasgow (c. E. S.).

Gill, William, one of the early Methodist ministers in America, was born in Delaware, Nov. 28, 1697. He entered the itinerant ministry in 1777, filled a number of important stations successfully, and died Oct. 14, 1789. He was a man "of very quick and solid parts," and, although he had not enjoyed great advantages of early education, he became so skilled in theology that Dr. Rush, of Philadelphia, pronounced him "the greatest divine he ever heard." Minutes of Conference, i, 33; Wakeley, Heroes of Methodism, p. 199.

Gilles (Colonna). See EODIUS, vol. i, p. 89.

Gilles de Vitribo. See EUGANDO ANTONTI.

Gilles, Pierre, a pastor of the Vaudois Church at La Tour, was born in one of the valleys of Piedmont in 1571. He was appointed to collect and arrange all the documents he could find on the origin, history, beliefs, and religious customs of the Vaudois. He devoted his entire life to this work, which he published at the age of seventy-two. The title is Histoire ecclésiastique des églises reformées recueillies en quelques vallées du Piémont et circonscriptions, autrefois appellees églises Vaudoises (Genève, 1644, 4to). - Hoeffer, Nouv. Biog. Générale, xx, 544.

Gillespie, George, minister at Edinburgh, was born January 21, 1613. He was one of the four sent as commissioners from the Church of Scotland to the Westminster Assembly in 1648. He died Dec. 17, 1648. He wrote (1) Aaron's Red blooming, or the divine Ordinance of Church Government vindicated (London, 1616, 4to); (2) The Ark of the Testament opened; a Treatise of the Church of Scotland (London, 1611, 57 vols. 4to); besides other smaller treatises. A new edition of his entire works, edited by Hetherington, was published at Edinburgh in 1846 (2 vols. 8vo), with a memoir of his life. - Darling, Cyclopa. Bibl., i, 1288; Allibone, Dict. of Authors, i, 671.
Gillies, John, a Scotch divine, was born in 1712, ordained minister of the Calv. Church in Glasgow in 1742, and continued to labour there until his death in 1796. His works are, *Historical Collections relating to remarkable Periods of the Success of the Gospel,* etc. (Glasg. 1754, 2 vols. 8vo.);—*The N. T., with devotional Reflectors* (London, new ed. 1810, 2 vols. 8vo.);—*Hints to Ministers* (2nd and 3rd editions republished);—*Essay on the Messianic Prophecies* (London, 1778, 8vo.).

Two supplements to the *Historical Collections* appeared in 1761 and 1796; and a new edition of the original work, with the two supplements and an additional one by El. Bonar, appeared at Kelso, 1845, 6vo. —Darling, Cyclop. Bibl. i. 1290; Allibone, Dict. of Authors, i. 672.

Gillies, John, LL.D., was born at Brechin, Scotland, Jan. 18, 1747, and was educated at the University of Glasgow. In 1778 he became historiographer royal for Scotland; in 1808 he removed to Clapham, near London, where he died, Feb. 13, 1806. He wrote several historical works, now of little value, and translated several Greek authors, among them Aristotle (Ethics, Politics, Rhetoric), very badly.

Gilly, David, a Protestant divine who became a Roman Catholic, was born at Niamas in 1648. He studied at Niamas, Montauban, and Saumur, and was appointed tutor at Baugs. His life was quiet and studious until the revocation of the Edict of Nantes, when, to save himself from the dragonades, he abjured his faith, and allied himself with the Roman Catholics. The Protestants ordered public fasts to avert the wrath of God on account of this apostasy, but the king gave Gilly a pension of 1000 livres, which was increased by the clergy 400 livres more. He was sent to Langue- doc by the court to preach against his old faith, and afterwards was brought to Paris to confirm the newly converted in their faith. He died at Angers Dec. 27, 1711.—Hoefler, Nouv. Biog. Générale, xx. 557.

Gilly, William Stephen, D.D., a pious and exemplary English clergyman, and patron of the Vaudois Christians. He was born in 1789, and educated at Cambridge, where he passed A. B. in 1812, A. M. in 1817, and D. D. in 1833. In 1817 he became rector of North Farmbridge, Essex. In 1825 he became a canon of Durham and rector of St. Margaret's in that city. He died Sept. 10, 1855. In the year 1829 Dr. Gilly paid his first visit to the Vaudois Christians, which has been attended with such important results, not only to himself, but likewise to that interesting people, who for so many centuries have maintained their independence against all the power and persecution of papal Rome. The following year he published a vol. 8vo. entitled *A Narrative of an Excursion to the Mountains of Piedmont in the Year 1828, and Researches among the Vaudois, or Waldenses, Protestant Inhabitants of the Cottian Alps.* This work attracted great attention, and the interest it produced was shown by its reaching a fourth edition in less than three years. A fund of over £7000 was raised, and devoted, in part to the maintenance of a college and library at La Tour, in Piedmont. Dr. Gilly ceased his labors on behalf of the Vaudois only with his life. See Va- dois. His works are, among others, published the *Spirit of the Gospel,* or the *Four Evangelists elucidated* (Lond. 1818, 8vo.):—Horsa Catachetica, or an *Exposition of the Duty and Advantages of Public Cathexis in the Church* (Lond. 1828, 8vo.):—Waldensian Researches, a *second Visit to the Vaudois* (Lond. 1831, 8vo.):—*A Monograph on the Life of Friz. Nфф.* (Lond. 1832, 8vo.);—*Travels and of his Labors among the French Protestants of Dauphine* (Lond. 1832, 8vo.):—*Our Protestant Forfathers* (London, 1885, 12mo: twelve editions before 1844):—*Vigilantissima et His Times* (London, 1844, 8vo.):—*Gentleman's Magazine* Oct. 1830: Quar. Rev. xxiii. 194.

Gilman, Samuel, D.D., an eminent Unitarian minister, was born in Gloucester, Mass., Feb. 16, 1791, and graduated at Harvard College in 1811. From 1817 to 1819 he was connected with Dartmouth College as tutor. In the year last named he accepted an invitation of the Unitarian church at Charleston, S. C., and was soon afterwards ordained. He continued to serve that church with great popularity up to the year of his death, which took place Feb. 9, 1868. He was a frequent contributor to the *New Englander,* of which he was a founder; and his papers showed a wide range of scholarship, as well as great skill in execution. A number of his essays, etc., are collected in his *Contributions to Literature* (Boston, 1856, 12mo). See *Monthly Religious Magazine* (Boston, 1856): Allibone, *Dictionary of Authors,* i. 674; *New American Cyclopedia,* viii. 395.

G'loh (Heb. *Gilo*), 575a, *exile* [Gesenius] or *circle* [*Farrar*]; Sept. in Josh. *Gile* v. r. *Gilem* and *Gilem,* in Sam. *Gile* v. r. *Gilo,* the last named (after Goshen and Holon) in the first group of eleven cities in the south-western part (Kell, Josh. p. 384) of the hill-country of the tribe of Judah (Josh. xv. 51); and afterwards the native place or residence of Ahihophel (hence called "the Gilonite" [q. v.], 2 Sam. xv. 12, xxiii. 8), whence Absalom, on his way from Jerusa- lem to Hebron, summoned him (perhaps from a temporary banishment or disgrace at court) to join his rebellious standard (2 Sam. xv. 12), and whither he returned to commit suicide on the failure of his colleagues to adopt his seditious counsels (2 Sam. xvii. 20). Josephus calls it Gilion (Γηλώνιον, Ant. B.C. 170, 2, 10). De Saucley (*Dead Sea,* 1, 463) and Schwartz (*Palet.* p. 105) both make it to be the modern Beit-Jala, near Bethlehem; but this is rather the ancient Zelah or Zezah (q. v.), and the scriptural notices require a different position, perhaps at Beth, a village with extensive ruins one hour twenty minutes south of Hebron (Van de Velde, *Memoir,* p. 252).

G'lonite (Heb. with the art. *ang-Giloom,* 8477, 8478; Sept. *Gileumoc,* 2 Sam. xv. 12, or 8477, Sept. *Gileumoc,* 2 Sam. xxiii. 84), an epitaph of the traitor Ahihophel (q. v.), doubtless from his city Gilon (q. v.).

Glipin, Bernard, called the apostle of the North, an eminent English reformer and itinerant preacher, was born at Kentmire, in Westmoreland, in 1517. At sixteen he was sent to Queen's College, Oxford, where he stimulated the works of Erasmus and the beginings of the Scriptures in Hebrew and Greek his chief study. In 1541 he became M.A., and about the same time was elected fellow of his college, and ordained. His reputation for learning soon after led to his being solicited by cardinal Wolsey's agent, to accept an establishment in his household, but Dr. Chipman's father, who authorized him to return, he removed from Queen's College. The university was divided between those who asserted the necessity of a reformation and those who resisted it. Gilpin was for some time opposed to the reformers, maintaining the Romish side in a dispute with Hooper, afterwards bishop of Worcester. But his mind was open to conversion, and in preparing himself for this dispute, he began to suspect that the peculiarities of Ro- manism were not supported by Scripture or by the fathers. This truth was still further forced upon him when, on the accession of Edward VI, Peter Martyr was sent to Oxford, and Bernard Gilpin was selected as one of the champions on the Romish side to oppose him. The result was that he embraced the Reforma- tion. In 1532 he was made vicar of Norton, and in the same year obtained from Edward VI a license as "general scholar," which authorized him to preach in any diocese. He resigned his living soon after, and went to Louvain, where the priests sought in vain to reclaim him to Romanism. He returned to England in 1556, and found the Church oppressed and persecu- ted by queen Mary with blood and fire. His uncle, bishop Townall, gave him the living of Easington, and
pin, was born at Carlisle, 1744. He became master of the school at Chasem, in Surrey; afterwards vicar of Bolder, and prebendary of Salisbury. He died at Bolder, April 5, 1804. Among his numerous publications are, An Exposition of the N. T. intended as an Introduction to the reading of the Scriptures (Lond. 1811, 2 vols. 8vo); Sermon on the Day of the Rectory (Lond. 1809, 2 vols. 8vo); —Sermone a Country Congregation (Lond. 1802-5, 4 vols. 8vo); —Life of Bernard Gipdin (Glasg. 1824, 12mo, new ed.).- Lectures on the Church Catechism (Lond. 1779, 2 vols. 8vo); —Observations on Picturesque Beauties (1790, 2 vols. 8vo); —Moral Contrasts (Lond. 1798, 2 vols. 8vo); —Desips. Bibliogr. s. v.; Rose, New Gen. Biol. Dic. viii., 30.

Gills, Antonius Van, D.D., was born July 29, 1758, at Tilburg. His parents were Roman Catholics. He graduated at Louvain with high honors. In 1788 he received spiritual consecration at Antwerp. After this he was appointed to give instructions in theology, and in 1795 he received his licentiate in theology. Not approving the changes made in the University of Louvain by order of the emperor Joseph II, he resigned his position there, and in 1786 was made chaplain at Eindhoven. From December, 1786, to April, 1790, he labored zealously among the Reformed Church at Houtenbeek. He returned to Louvain in 1790 to Louvain, where he was made president of the College of Maider and canon of St. Peter. In November of the same year he was taken prisoner by the Austrian troops, and conveyed to Mechlin. Released from confinement, he defended the liberty of the city before the French, and took the lead in the regulation of Belgian affairs. In 1791 he was appointed professor, and in 1794 was promoted to the degree of doctor of theology. The French, making themselves masters of Louvain soon after, conveyed him and other professors to prison. On his return to Louvain he composed the reply to the magistrates of the city, declining, on the part of himself and his colleagues, to attend the opening of the temple of reason. From 1795 to 1813 he experienced various fortunes, being sometimes imprisoned, and for most of the time an exile. After the overthrow of Napoleon he again stood at the head of the University of Louvain. He died at the university June 10, 1884. His principal works are, De twee coëns: Eenzame ammurenpreken over de religiënkaam van destem tijd (Leu. 1796, 12mo); —Mouf de concéense die emphëts de ministrés de culte (1794); —Provolat de frater cathólicos de ferbra le déclaration ençs par la lou de 7 Vend. om. IV (Leu. 1797; this was also translated into Flemish): —De gronden van het Christen-cath. geloof, tegemener de gronden der philosophie (s’ Hertogenb. 1800); —Analyse épistolarii B. Pauli apostoli ad uram seminarii Syden-Ducenas (Louv. 1815, 3 vols. 12mo); —See Glaubis, Godsdienst Nederl. Nederl. 4, 677 et seq.; and also F. V. Gotha, Lectures relatives à l’histoire des sciences, des arts, des mœurs, et de la politique en Bel- gique, etc., ii. 298 suiv. (J. P. W.)

Gimzo (Heb. Gimzo), הִימֹז, a place fertile in oye- amores; Sept. Γύμνους v. Γύμναμου, a city in the plain of the kingdom of Judah, mentioned in connection with Timnah, and taken, with its dependent villages (Heb. doughs), by the Philistines in the time of Ahaz (2 Chron. xxviii., 18); now Jimsa, a common and rather large village, on an eminence, on the south side of the road, about an hour south-east of Ludd (Lydda or Ramleh); with many threshing-floors and ancient cisterns used as magazines for grain (Robinson’s Residences, iii. 56). It is mentioned in the Tal- mud (Schwarz, Palest., p. 186).

Gin, an old English word for trop, stands as the rendering of two Hebrew words in certain passages: פֶּן-מַרְחָק, a noise or “maré” (as elsewhere rendered), Psa. cxix. 5; cxix. 9; Amos iii. 5; and מִיתָכָה, lit. a plate or thin layer, hence a net or trop, Sept.
GINA • GIOBERTI

GIOBERTI (Nello), a brook or winter-stream (Nellus-mentioned in the Talmud as being not far from En Gammim (q. v.) (Schwarz, Palest. p. 52).

G'нат (Heb. Hà'נת), ג"נת, a garden (Genesis) or protection (Purim); Sept. Γάνα v. r. Γάνάνα, the father of Tobi (q. v.), king of the northern tribes of Israel (1 Kings xxvi, 21, 22). B.C. ante 926.

Gin'netho (Heb. Gīn netḥo, יגננת, Sept. Γίνέον, Vulg. Genovum), a corrupt reading (Neh. xii, 4) for the name Ginnetехал (q. v.)

Gin'netho (Heb. Gīn netḥo, יגננת, garden or garden land; Sept. Γίνεον, Vulg. Genovum), one of the "chief" priests that returned from the captivity with Zerubbabel (Neh. iv, 4, where the reading is "Ginnetho"), and subscribed the covenant with Nehemiah (x, 6); his son Meshullam is mentioned as contemporary with the high-priest Joiakim (xii, 16). B.C. 536-410.

Gioberti, Vincenzo, a distinguished Italian philosopher and statesman, was born at Turin, April 5, 1801. He studied theology in the university of his native city, was received doctor in 1823, and in 1825 was ordained priest and appointed professor of theology in the university. He acquired great reputation, and was soon after (1831) called to the see of Genua. He was implicated in a republican conspiracy (said to have been instigated by the Jesuits, in order to destroy the liberal sympathies of the king), was thrown into prison, and then exiled without trial. He went first to Paris, thence to Brussels, where he remained until 1848, in the humble position of tutor in a private school. Some time after he declined a professorship of philosophy offered him by cardinal Waleham, preferring to devote all his time to his literary labors. His first publication was the Teoria del Sovranatole (Capolago, 1839). In 1842 he published his Introduzione allo studio della Filosofia. This remarkable work was followed in 1841 by his Del Bili, in which the author analyzes Christian eoppe, and especially Dante's Divina Commedia. Gioberti next employed himself against the modern German philosophers and the French encyclopedists, whose ideas outlined the Evoluition. He wrote successively the Lettres polemiques contre La Menami (Paris, 1840); Del Buono, and Errore filosofici di Antonio Rosmini (Capolago, 1842). In opposing the pantheistic tendencies of La Menaschi and Rosmini, Gioberti evinces great argumentative talent, and his argumentation is as clear and as homogeneous as a jeer thrown off the yoke of foreign doctrines, with the ultimate view of enabling her subsequently to expel foreign political interference. He was careful always to profess orthodox opinions, so as not to give either the Italian princes or the pope any hold against him. His new catholic system found many adherents. In order to raise the clergy in the popular esteem, he advocated such reforms as the spirit of the times required, and advised the priests to lead the social movement and to disseminate instruction among the people. He also called on the laity in Italy, inviting them to regain their former ascendancy by uniting faith with science and art. In this view he wrote his II Primo civile e morale dell'Italia (Paris, 1845). This remarkable work, which proposed the plan of a Roman confederacy headed by the pope, and which has had great influence on the recent constitutional tendencies in Italy, was the more remarkable with public opinion. The substance of the book is as follows: "Italy has been twice at the head of European civilization; once in antiquity, and again in the Middle Ages. In the latter period Italy owed its supremacy to the popes, who were then the natural authors of the national ambitions and aspirations of the nations. The downfall of Italy is due to the downfall of the papacy. The problem now is to restore the papal power, as a moral dominion based on religion and public opinion." Gioberti aims at "restoring the papal arbitration between the sovereign and the people; he wishes to lead it back to the time of Gregory VII and of Alexander III, and in this restoration of the past finds the best means of re-establishing funds for the papacy by the unaided efforts of Italy alone. As for the form of government, he inclines to a constitutional monarchy, and, like Aliferi, considers Piedmont as the most compact, best organized, and most vital state of Italy; calls it to closer union with the other provinces, and by showing the unification of Italy the perspective of a united Italy invites it to become the champion of national independence." The work was published under the most unfavorable circumstances, during the last years of the pontificate of Gregory XVI. The Jesuits, despite a few compliments to their order, which the author had skilfully introduced, signed an appeal against it, and condemned its tendencies. Gioberti, however, answered their objections in I Progressi (1846); II Genuina moderna (Capolago, 1847, 8 vols.; German transl. by Cornet, Lpz. 1849, 8 vols.). This work, written ab initio, had an immense echo, and on its arrival was expropriated and countermounted, and from all the other states of Peninsular Italy. After the events of 1848 Gioberti was recalled from exile, and his return was a triumph. He went to Milan, started the project of union between Lombardy and Piedmont, and traversed central Italy, inviting all parties to make common cause for the rights of the Italian nation. He declined the office of senator which was offered him by Charles Albert, but was elected to the House of Representatives by the inhabitants of Turin, and at once chosen for its president. In 1848 he was minister of public instruction, and president of the so-called Democratic council. Austrian intrigue defeated Gioberti's plans, and he was obliged to withdraw from the cabinet. He then advocated his views in a newspaper entitled II Sogno (1851). The misfortunes of Italy and the abdication of Charles Albert rendered it necessary for him to take again an active part in state affairs. Victor Emmanuel appointed him in the Delavay-Pennelli cabinet, without any special department; yet the conservative party managed soon after to have him appointed ambassador to Paris, as a means of getting rid of him. He understood it so, went in his resignment, and on the arrival of his successor Count Gallina, returned to private life. He afterwards published his Del Rinnovamento civile dell'Italia (Paris and Turin, 1851, 2 vols.). In this work he examines with great impartiality into the causes of the present position of Italy. Among the chief obstacles to its independence, he attributes, on the one hand, the exaltation of the principles of municipal and ecclesiastical power, and on the other, the dangerous influence of Mazzinism. Sympathizing with the liberty and liberalism of Victor Emmanuel, he, so to say, traces out for him the line to be followed to arrive at the regeneration of Italy. Gioberti was preparing a philosophical work, entitled Protologia, when he died suddenly at Paris, Oct. 25, 1851. His most important work is the Introduzioni, which has been translated into French under the title Introduction à l'étude de la Philosophie (Paris, 1847, 3 vols.). The Remembrancer (July, 1855, art. 1) remarks upon it as follows: "With regard to the Introduction to Philosophy, it is extremely difficult to express an opinion, because (speaking with the utmost seriousness) we have a great difficulty in deciding, upon internal evidence, whether or not it was written in the author's mind. The excitement visible throughout; the lofty tone in which he passes judgment upon others, and pours forth his own utterances; the virulence with which he treats some who differ from him, combined with the obscurity and dreaminess of the opinions expressed; the extraordinary virtual domination of the mind he assumes, and his dogmatism, not the less arrogant from his entire unconsciousness—all these things on
GIOBERTI

he one hand, and, on the other, his acuteness, depth, information, and power of argument, leave us as much at a loss for what is the original meaning and sense of his several words as when he declares himself, 'I am that I am;' and the mind beholds him, and has him made known to it internally, through the reason, independently of all external sensations. God being the only being, all other things are only existences; and man learns of these existences or things from the God himself, and the heavenly beings which he gives it is 'I, Ideas,' or Thought. This divine thought is communicated to man in proportion as he is capable of receiving it; and it is the light which enlighteneth every man that cometh into the world. Man receives it by means of his reason, which is a kind of receptivity of the divine thought, and not by corporeal sensibility or holding (or intuition) of the 'Ideas' is the origin and first cause of all the knowledge of natural things which the mind of man possesses. It is innate, inasmuch as it rises to the mind at the same moment as the thought which apprehends it; but it does not arise within the mind, but enters it from without. It is the principle of knowledge to the human mind, from the very first exercise of its powers as a thinking being. The similarity of this view to that of Plato, revived and modified by Malebranche and Leibnitz, is sufficiently evident. The intuition of the 'Ideas' is the origin of the mind, or at least it is the cause of the mind; and the intuitions of the 'Ideas' are distinct and separable. By the reason, although the origin of all thoughts in the soul, is by itself but insipid and imperfect. In order to render it available, it requires that this intuition should be reflected on; and this can be done only by means of language, for man cannot reflect on and (so to speak) repeat in his mind the original intuitions except by means of language, which renders determinate what was before imperfect. For this purpose language was given to man, and by means of language God originally reveals to man that which he has caused him to behold by internal and direct intuition; and by means of language this same revelation is repeated and carried on from generation to generation; and by the same medium, employed analogously, the knowledge of the divine thought is more and more revealed. Yet language is not the cause of human knowledge, nor is it, in the case of ordinary knowledge, the medium of the exhibition of the divine thought to the mind (for that abides immediately upon the mind), but it is the occasion of its being completely revealed. For the purposes of ordinary and natural knowledge this combination of intuition with language is the method ordained by God. In the case of divine knowledge, however, it is only by means of language; and divine truths are not seen by intuition, but believed. Yet all knowledge of every kind has its source in the divine thought, and consists of such views of it as the individual is capable of. The word 'thought' is capable of conveying the meaning of all knowledge, but the divine thought, man has likewise internal and spiritual feelings or emotions, which are modifications of the mind, and preserved by feeling; and, in addition, he possesses material and external feelings, having reference to the properties of bodies, and perceived by sensation and the outward senses. The ordinary range of modern metaphysics is confined to these internal and external feelings; and it is a common error to substitute the internal feeling as a first principle, instead of that which is apprehended by the reason through direct intuition, and revealed to the soul by language, through the word. It is likewise an equally common error to substitute reflection on these internal and external feelings for reason, as the initiatory instrument of that knowledge which is the basis of philosophy. (Here he is evidently alluding to Locke and his followers.) But it is by the view or intuition of the 'Ideas' that meaning is given to these various feelings, external and internal, and to the various sensible objects by which they are surrounded. The basis of all knowledge is the knowledge of being; yet not of an abstract idea, but of the concrete personal Being, God himself, acting as a cause and producing existences, which is, in fact, the only being, because he alone has being in himself. The knowledge of this being is gained by intimation, by means of the word, which he declares himself, 'I am that I am;' and the mind beholds him, and has him made known to it internally, through the reason, independently of all external sensations. God being the only being, all other things are only existences; and man learns of these existences or things from the God himself, and the heavenly beings which he gives it is 'I, Ideas,' or Thought. This divine thought is communicated to man in proportion as he is capable of receiving it; and it is the light which enlighteneth every man that cometh into the world. Man receives it by means of his reason, which is a kind of receptivity of the divine thought, and not by corporeal sensibility or holding (or intuition) of the 'Ideas' is the origin and first cause of all the knowledge of natural things which the mind of man possesses. It is innate, inasmuch as it rises to the mind at the same moment as the thought which apprehends it; but it does not arise within the mind, but enters it from without. It is the principle of knowledge to the human mind, from the very first exercise of its powers as a thinking being. The similarity of this view to that of Plato, revived and modified by Malebranche and Leibnitz, is sufficiently evident. The intuition of the 'Ideas' is the origin of the mind, or at least it is the cause of the mind; and the intuitions of the 'Ideas' are distinct and separable. By the reason, although the origin of all thoughts in the soul, is by itself but insipid and imperfect. In order to render it available, it requires that this intuition should be reflected on; and this can be done only by means of language, for man cannot reflect on and (so to speak) repeat in his mind the original intuitions except by means of language, which renders determinate what was before imperfect. For this purpose language was given to man, and by means of language God originally reveals to man that which he has caused him to behold by internal and direct intuition; and by means of language this same revelation is repeated and carried on from generation to generation; and by the same medium, employed analogously, the knowledge of the divine thought is more and more revealed. Yet language is not the cause of human knowledge, nor is it, in the case of ordinary knowledge, the medium of the exhibition of the divine thought to the mind (for that abides immediately upon the mind), but it is the occasion of its being completely revealed. For the purposes of ordinary and natural knowledge this combination of intuition with language is the method ordained by God. In the case of divine knowledge, however, it is only by means of language; and divine truths are not seen by intuition, but believed. Yet all knowledge of every kind has its source in the divine thought, and consists of such views of it as the individual is capable of. The word 'thought' is capable of conveying the meaning of all knowledge, but the divine thought, man has likewise internal and spiritual feelings or emotions, which are modifications of the mind, and preserved by feeling; and, in addition, he possesses material and external feelings, having reference to the properties of bodies, and perceived by sensation and the outward senses. The ordinary range of modern metaphysics is confined to these internal and external feelings; and it is a common error to substitute the internal feeling as a first principle, instead of that which is apprehended by the reason through direct intuition, and revealed to the soul by language, through the word. It is likewise an equally common error to substitute reflection on these internal and external feelings for reason, as the initiatory instrument of that knowledge which is the basis of philosophy. GIRDLE

came court preacher of Henry II. He accompanied Henry's son John as adviser in the expedition against Ireland, and in 1188 accompanied archbishop Baldwin of Canterbury on a tour through Wales, for the purpose of conserving a crusade. Richard III appointed him legate of Wales, but at the fall of the latter he returned to his studies. He was again elected bishop of St. David's, but failed again to be recognised as such. He "passed the last seventeen years of his life in study, revising his former literary works and composing others, of which he bequeathed a most copious indication." In the midst of these occupations he received once more an offer of the bishopric of St. David's, and would have met with no opposition from the court; but, from the dishonorable terms on which it was offered, he refused the ecclesiastical dignity which had so long been the object of his earnest labors. He died at St. David's in the seventy-fourth year of his age, and was buried in the cathedral church, where his effigy still remains upon an altar-tomb beneath an ornamental arch. Giralus appears to have been an upright and able man. As an ecclesiastic he was zealous, active, and in maintaining the rights and dignities of his Church; but he was, at the same time, honest and disinterested. As a scholar he was learned, and as a collector of historical materials diligent, far beyond the measure of his age. As a historian, however, he was full of credulity, and as a man, as a poet, one of the vainest upon record. Giralus has himself given a catalogue of his works, as well as a long history of his actions, both printed by Wharton. Other lists will be found in Fabricius, Bibliotheca Med. et Inf. Latinitatis (edit. Patav. 4to, 1714), iii, 52, and in the notes to his life in the Biog. Brit. (1779), i. 648; 642, 644. Sir Richard Colt Hoare has given a full account of such MSS. of his works as exist in the several libraries in the British Museum, in the Archi-episcopal Library at Lambeth, at Bene's (Corpus Christi) College, in the public library at Cambridge, and in the Bodleian Library. Those printed in the Cambridge (Lond. 1668, 8vo), and in Camden's Anglia Norm., &c., script. (Francof. 1602, fol.), p. 818-878: Topographia Hiberniae (Camden, ut sup.), p. 629-754: Exemplaria Hiberniae (ibidem), p. 755-815: Descrip. Cambri. (ibid.), p. 879-892. Several short pieces by Giralus are printed in the second volume of Wharton's Anglia Sacra. The Gemma Ecclesiastica, published at Mentz in 1649, without the author's name, under the title of Gemma Animac, is ascribed to Giralus. Sir Richard Colt Hoare, in 1808, published the Itinerary of Arch- bishop Baldwin through Wales, translated into English, and illustrated with views, annotations, and a life of Giralus (2 vols. 4to). A new edition, Giralum Cambrensis Opera, is now publishing, under the direction of the master of the rolls, edited by J. F. Dimock; 5 vols. were issued up to 1868. See Wharton, Anglia Sacra, ii. 457-518; Fabricius, Bibliotheca Med. et Inf. Latinitatis; Engl. Cyclopedia, s. v. Barri; Biog. Britan- nica, s. v. Barri; Herzog, Real-Encyklopädie, v. 164; Wright, Biog. Brit. Literatnr, Anglo-Norman Period, p. 880-897.

Girdle, an essential article of dress in the East, and worn both by men and women. The corresponding Hebrew and Greek words are: 1. נַּשַּח, nashch, or נַשָּח, (fem.), neshchah, girdle (Prov. xxxi. 24; Ezek. xxiii, 15; Gen. iii. 7; 2 Sam. xviii, 11; Isa. xxxii, 11), which is the general term for a girdle of any kind, whether worn by soldiers (1 Sam. xviii, 4; 2 Sam. xx, 8; 1 Kings ii, 5; 2 Kings iii, 21), or by women (Isa. iii, 24). 2. יַּסָּר, yassar, something bound (Isa. xi, 5), especially used of the girdles worn by men; whether by prophets (2 Kings i, 8; Jer. xiii, 1), soldiers (Isa. vi, 27; Ezek. xxiii, 15), or kings in their military capacity (Job xlii, 18). 3. מִּשָּׁח, mishch, or מִּשָּחַ, mishch, a band ("strength," Job xii, 21), used of the girdle worn by men alone (Psa. cix, 19; Isa. xxiii, 10), 4. Those, as well as the general term נַּשַּח, a ñash, Matt. iii, 4; x, 9; Mark i, 6; vi, 8; Acts xxii, 11; Rev. i, 18; xv, 6, require no special elucidation. Besides these were the following peculiar terms: 5. מַשְׁמָל, mishmol, used by the ancients, as in the Sanscrit भक्ष, a ñam, the girdle of sacerdotal and state officers (Exod. xviii, 4, 39, 40; xxix, 9, xxxix, 29; Lev. vii, 13; xvi, 4; Isa. xxii, 21). See Priest. It was especially worn by the priests about the close-fitting tunic (Exod. xxviii, 39, xxxix, 29), and is described by Josephus (Ant. iii, 7, 2) as made of linen so fine of texture as to look like the slough of a snake, and embossed with flowers of scarlet, purple, blue, and fine linen. It was of about four fingers' breadth, and was wrapped several times round the priest's body, the ends hanging down to the feet. When engaged in sacrifice, the priest threw the ends over his left shoulder. According to Maimonides (De Yas. Sacrt. c. 8), the girdle was worn both by the high-priest and the common priests was of white linen embroidered with wool; but that worn by the high-priest on the day of atonement was entirely of white linen. The length of it was thirty-two cubits, and the breadth about three fingers. It was worn just below the arm-pits to avoid perspiration (comp. Ezek. xlii, 18). Jerome (Ep. ad Fabiolum, de vest. Sac.) follows Josephus. With regard to the manner in which the girdle was embroidered, the "needlework" (נַּשָּׁחַ הָסָּרִים, Exod. xxviii, 39) is distinguished in the Mishna from the "cutting-work" (נַּשָּׁחַ חָסָרִים, Exod. xxxvi, 31) as being worked by the needle with figures on one side only, whereas the latter was woven work with figures on both sides (Cod. Yoma, c. 8). So also Maimo- nides (De Yas. Sacrt. viii, 15). But Jarchi, on Exod. xxxvi, 31, 36, explains the difference as consisting in this, that in the former case the figures on the two sides are the same, whereas in the latter they are different. See Ezek. xlii. This ñam may be consid- ered as fairly represented by those girdles which we observe on such persons in the Egyptian paintings.

Ancient Egyptian Sacred Girdles.

In all passages, except Isa. xxii, 21, מַשְׁמָל is used of the girdle of the priests only, but in that instance it appears to have been worn by Sheba, the treasurer, as part of the insignia of his office; unless it be sup- posed that he was of priestly rank, and wore it in his priestly capacity. He is called "high-priest" in the
GIRDL

In consequence of the costly materials of which girdles were made, they were frequently given as presents (1 Sam. xviii, 4; 2 Sam. xviii, 11) in token of honor (Rev. i, 15), as it is still the custom in Persia (comp. Morier, p. 93). Villages were given to the queens of Persia to supply them with girdles (Xenoph. Anab. i, 4, 9; Plato, Alc. i, 125).

GIRGASHITE

They were used as pockets, as among the Arabs still (Niebuhr, Desp. p. 56), and as purses, one end of the girdle being folded back for the purpose (Matt. x, 9; Mark vi, 8). Hence “zonam perdere,” “to lose one’s purse” (Jer. Epist. ii, 40; compare xiv, 29). Ink horns were also carried in the girdle (Ezek. ix, 2).

“Girdle” is often used figuratively in the Scriptures (see Ps. cix, 19; compare I Sam. ii, 4; Ps. xxxi, 11; lxv, 12; Eph. vi, 14). The girdle was a symbol of strength, activity, and power (Job xii, 18, xxxi, 11; Isa. xiii, 10; xlv, 15; xi, 5; xxii, 21; 1 Kings xx, 11). The perfect adherence of the people of God to his service is figuratively illustrated by the “cleaving of the girdle to a man’s loins” (Jer. xili, 11). In the same view, “righteousness and faithfulness are called the girdle of the Messiah (Isa. xi, 5). See ARTINE.

Girgašite (Hebrew invariably in the sing. and with the art. kag-Girgašiti, (נְגֶדֶּר), in a collective sense; dwelling in a valley or flat; Sept. Γυργάσιον and Τυγγασαίων, Vulg. Gergeseni and Gergaesus; A. V., “Girgasite” in 1 Chron. i, 14, “Girgasite” in Gen. x, 16; elsewhere “Girgasites”), a designation of one of the nations who were in the land of Canaan before the entrance thither of the children of Israel. In Gen. x, 16, they are mentioned as the descendants of the fifth son of Canaan; in other passages the tribe is merely referred to, and that but occasionally, in the formula expressing the doomed country (Gen. xvi, 21; Deut. vii, 1 [and xx, 17 in Samarit. and Sept.]; Josh. iii, 10; xxxv, 11; 1 Chron. i, 14; Neb. ix, 8). The Girgasites are conjectured to have been a part of the large family of the Hitites, as they are omitted in nine out of ten places in which the nations or families of Canaan are mentioned, while in the tenth they are mentioned, and the Hitites omitted. Josephus states that nothing but the name of the Girgasites (Ὑγγασαίων) remained in his time (Ant. i, 6, 2). In the Jewish commentators of R. Nahman and elsewhere, the Girgasites are described as having retired into Africa, fearing the power of God; and Procopius, in his His- tory of the Vandals, mentions an ancient but doubtful inscription in Mauritanit Tingitana, stating that the inhabitants had fled thither from the face of Joshua, the son of Nun. A city Girga (גירגה) existed among the Phoenician tribes in Northern Africa at the Syrtes Minor (Pâris, Reb. Lesc. p. 298). The notion that the Girgasites did migrate seems to have been based on the circumstance that, although they are included in the list of the seven devoted nations either to be
drives out or destroyed by the Israelites (Gen. xv, 20, 21; Deut. vii, 1, Josh. iii, 10, xxiv, 11; Neh. ix, 8), yet they are omitted in the list of those to be utterly destroyed (Deut. xx, 17), and are mentioned among those with whom, contrary to the divine decree, the Israelites lived and intermarried (Judg. iii, 1-6). See CANANA. The expression in Judges xxxiv, 22 seems to indicate that the district of the Girgasites was on the west of Jordan. By most writers, however, they are supposed to have been settled in that part of the country which lay to the east of the lake of Gennesaret (Journ. Soc. Lit. Dec. 1851, p. 167). This conclusion is supported by the identity of the word ʿ̲γ̲ας̲ατ̲ος̲, which the Septuagint gives for Girgasites, and by which Matthew (vii, 28) indicates the land of the Gergesenes (ʿγ̲ε̲ρ̲γ̲ε̲ς̲α̲ν̲ο̲ς̲). But as this last reading rests on a conjecture of Origen, on which little reliance is now placed, the conclusion drawn from it has no great weight, although the fact is peculiar on other grounds, especially the probability that some actual city of this name must have been the focus of the reading in question. Indeed, the older reading, "Gerasenes," has sufficient resemblance to direct the attention to the country beyond the Jordan; and this also (Nom., s. v. Gerasa) affirms that the Girgasites dwelt. See GERASA.

Girgasite (Gen. x, 16). See Girgasite.

Girl (גֵּלָּתָא, "gulah"). Fam. of טִנָּה, "a boy," lit. one born, i.e., a female child (Joel iii, 3; Zech. xiii, 5), spoken of a marriageable "damsel" (Gen. xxiv, 4). See Child.

Girzite. See GEZIRITE.

Gisborne, Thomas, A.M., prebendary of Durham, a distinguished divine and author, was born at Derby in 1738, entered at Harrow School in 1753, and at St. John's College, Cambridge, in 1758; was made perpetual curate of Barton-under-Needwood, Staffordshire, in 1758, and removed in the same year to Yoxall Lodge, near Barton, where he ever after resided. He obtained the prebend of Durham in 1758, and died in 1846. His works were written in a clear and nervous style; his sermons have been recommended as models for young students in divinity. He strongly opposed Paley's Ethics, of which he published an Examination (2d edit. 1790). Among his works are, A Familiar Survey of the Christian Religion as Connected with the Introduction of Morality (London, 1758, 2d ed. 1790); The Principles of Moral Philosophy investigated and applied to the Constitution of civil Society (London, 1798, 4th ed. 1809); The Testimony of Natural Theology to Christianity (London, 1818, 12mo); An Inquiry respecting Love as one of the divine Attributes (London, 1798, 9vols.); Sermon (London, 1808, 1809, and 1810, 3 vols. 8vo); A Familiar Exposition of Colossians, in eight Sermons (London, 1816, 12mo).—Darling, Cyclopaedia Bibliographica, i, 1267; Allibone, Dict. of Authors, i, 675; Whewell, History of Moral Philosophy in England, lect. xi; Gent. Magazine, June, 1846.

Gischala (גִּשְׁכַל), a small city (גִּשְׁכַל), often mentioned by Josephus in his account of the last struggle of the Jews with the Romans, especially as being the scene of the operations of the famous "John (q. v.) of Gischala" (War, iv, 1, 3). It was situated in Galilee (6, ii, 1); and, after having been destroyed by the Jewish zealots, it was rebuilt by John (4, 10), and further fortified by the advice of Josephus himself (War, ii, 20, 6), and was the last stronghold of Galilee captured by Titus (6, iv, 2). It is doubtless the גַּחַל Chalab (גַּחַל) of the Talmud (Maasch. viii, 3), famed for its oil (Erach. ix, 6), named in connection with Meron and Capernaum (Gemara, Pa. xxviii, 7, 2, and also by Pseudo-Philo (De cresc. Hierosol. p. 68). Jerome, on several occasions, states a tradition that the parents of the apostle Paul emigrated thence to Tarsus (Reland, Pal eat. p. 818).

The same Hebrew name likewise occurs in Hottines (Uppers Herodici, p. 56) and in Benjamin of Tudela (p. 106). Schwarz erroneously identifies it (Palaest. p. 198) with the Ahal (q. v.) of the tribe of Asher (Judg. i, 31). Dr. Robinson found the site in the modern El-Jisr, on a hill about two hours north-west of Safed; and had there been totally destroyed by an earthquake, but was then partly rebuilt (Researches, iii, 586 sqq.).

Gislebert. See GILBERT.

Gislebertus Forretanus. See GILBERT.

Gis'pa (Heb. גִּשְׁפָּא, Gispa, flatterly or heartening; Sept. Ἰσπασί, Vulg. Gospa), one of the two overseers of the Nethinim in Opel at Jerusalem, after the captivity (Neh. xi, 21); but whether he was himself also of that class is not stated, although this is probable from the fact that his associate Ziba was (Ezra ii, 43). B.C. 446.

Gitta (רַדְוּרְר), a town of Samaria, mentioned by Justin Martyr (Apol. ii), Eusebius (Hist. Eccl. i, 13), Zonaras (from Justin, xi, p. 567), Theodoret (Compend. heort. fab. i), and i Epiphanius (Adv. Haer. p. 55) and Athanasius (Hist. Eccl. p. 15), as the birthplace of Simon Magnus; thought by some to be the Gath (q. v.) of Scripture (Reland, Palaest. p. 818, 814), but discovered by Robinson (Researches, iii, 144) in the modern Kerjat-Uil, a village rather more than two hours west of Nahlia (comp. Schwartz, Palaest. p. 184).

Another Gitta (רַדְוּר) is mentioned by Josephus (Wars, i, 17, 2) as a fortress at Machaerus (q. v.).

Giti'ah-he'pher (Heb. גַּתִּיעַ-בּהֵפֶר, Ὀηηήα, Sept. Γίτταςπα, Vulg. Gethsifer), a prolonged form (Josh. xix, 18) of the name GATH-HEPHKER (q. v.).

Giti'ah-in (Heb. גַּתִּיעַ-י, Νιάον, two wine-presences, Sept. Γιτιασα and Gi3a(i), a place incidentally mentioned in 2 Sam. iv, 3, where the meaning appears to be that the inhabitants of Beeroth, which was allotted to Benjamin, had been compelled to fly from that place, and had taken refuge at Gittaim. Beeroth was one of the towns of the Gibeonites (Josh. ix, 17); and the cause of the flight of its people may have been Saul's persecution of the Gibeonites allowed to 2 Sam. xxii, 2; although the above text seems to intimate that the flight was through consternation at the death of Abner, and fear of vengeance for the murder of Ishboeth. See BEER. The inhabitants, doubtless, soon returned.

Gittaim is again mentioned in the list of places inhabited by the Benjamites after their return from the captivity, with Ramah, Neballat, Lod, and other known towns of Benjamin to the north-west of Jerusalem (Neh. xi, 38). Schwartz (Phys. Descr. of Palaest. p. 194) identifies Gittaim with Ramelek (Arm. Mathikia) on the strength of certain Jewish traditions; which is not impossible, since Lydda was occupied by the Benjamites, and other associated cities seem to have been located in this neighborhood. See LOD; HADAD.

"Gittaim occurs in the Sept. version of 1 Sam. xiv, 23—'Out of Getthaim roll me a great stone.' But this is not supported by any other of the ancient versions, which unanimously adhere to the Hebrew text, and probably proceeds from a mistake or corruption of the Heb. word צַלָּעָה; A. V. 'ye have transgressed.' It further occurs in the Sept. in Gen. xxxvi, 35, and 1 Chron. i, 41; which represents the native of Avra, a change not so intelligible as the other, and equally unsupported by the other old versions."

Gittin. See TALMUD.

Gittit'he (Heb. גִּיתִיתֶה, "Gittoth; Sept. Πέλατος"); an inhabitant or native property of the Philitine city Gath (Josh. xiii, 8). Obad-Edom, in whose house the ark was for a time placed (2 Sam. vi, 10), and who afterwards served in Jerusalem (1 Chron. xvi, 88), although
Githit (Heb. Githith), גיתית, prob. for גיתת, and so kindled with נקינת, a stringed instrument of music (Ps. viii. i.; xxxi. 1; xxxxi. 1; xxxii. 1). The term seems to be derived (with the Targums) from the city גית, nor (with the Sept. אשת גת) from a vessel (as a sangle-ring, Michael, Sped. p. 382); nor from the root גת, to strike (Redehol. De praecorpo Mus., etc., Lips. 1831, p. 24), Gesenius, Theor. Hebr. p. 849. On the other hand, Flütsch (Concord. p. 256) derives it from גית, to de pen, and calls it "a musical instrument curved and hollow (syn. בצל)," whereas in his Heb. Lex. p. 304, he says it is the name of "a musical body of Levites who had their chief seat in the Levitical city of Gath-rimmon, the words in the title of Psalms not being capable of an interpretation referring to instruments or airs." See Psalms.

Gisoh. See GIZONIT.

Gisont (Hib. with the art. Ap-Gizoni, גיסונית; Sept. εἰς θυρεύς τ. Τούρι, Vulg. Gismonita), an inhabitant of GISON (Heb. גיסון, perhaps grapy); a place unknown except as the residence of Hashek, the ancestor of two of the sons of David's warriors (1 Chron. xi. 34). As these are called Hararites (i.e. "mountaineers") in this as well as the parallel passage (2 Sam. xxiii. 22, 34), we may perhaps infer that the city in question was situated somewhere in the mountains of Judah. The conclusion of Kennicott, who examines the passage at length, is that the name should be Gison, a proper name, and not an appellative (Disert. p. 199-200). See GUMI.

Giżrast. See GEZIRTA.

Glagolita, Glagolitsa, Glagolitcs (derived from the Slavonic Glagol, a word), "an ancient Slavonic alphabet, principally used in several Roman Catholic dioceses of Istria and Dalmatia, in the psalms, liturgies, and offices of the Church. The use of this liturgy was confirmed to the priesthood by a bull of pope Innocent IV, 1248. Of the antiquity of this alphabet the savans have maintained a great variety of opinions. Dobrovolsky laid the foundation of a critical investigation of the subject, and has been followed by Bobo, Grab Graham, Lek, Ivan Preis, Schafarik, etc. In former times the invention was sometimes ascribed to St. Jerome; while the Orientals, according to Neale, consider it as a mere corruption and Latinization of the Cyrillic alphabet. According to the recent researches of Schafarik, it was invented by Cyril, and is, language and form no less as an instrument of the Cyrillic alphabet (Kyrillizer), the author of which was bishop Clement of Weltiza (died 916). Grimm found in some Glagolitic letters Runic characters. The Glagolitic literature embraces all South Slavic works which are written in the Glagolitic alphabet. According to language and form no less as an instrument of the Cyrillic alphabet (Kyrillizer), the author of which was bishop Clement of Weltiza (died 916). Grimm found in some Glagolitic letters Runic characters. The Glagolitic literature embraces all South Slavic works which are written in the Glagolitic alphabet. According to language and form no less as an instrument of the Cyrillic alphabet (Kyrillizer), the author of which was bishop Clement of Weltiza (died 916). GLYPHYRA

Bayle, General Dict. v. 455; Lecky, History of Ration-
ali.sm, i. 121 sq.

GLYPHYRA (Γλυφύρα, elegant), daughter of Arche-
laus, king of Cappadocia; married to Alexander, son of
Herod the Great (Josephus, Ant. xvi. 1, 2). She
quarreled with his half-brother Herod, because of Herod's
jealousy against Alexander (War, i. 24, 2, 3), which eventuated in the death of the latter. See ALEXANDER 9. She remained faithful to her hus-
band (Ant. xvi. 10, 7), and after his execution she re-
turned to her father (17, 1), although her two sons by
Alexander were brought up by Herod (23, 19). She af-
terwards married Juba, king of Lydia, and at his death again returned to her father, but subsequently mar-
rried Herod Archelaus, who divorced for her sake her
future wife Marianne, but she soon died in, accord-
pance with a dream in which her first husband re-
proached her for her repeated inconstancy (xvii. 13, 4).

GLAESINUS, Heinrich Loritt, was born at Mol-
ia, in the canton of Glarus (hence his name), in Swit-
erland, June, 1488; studied philosophy, belles-lettres,
and theology at Rottweil and Cologne, and in 1513 became poet laureate of the emperor Maximil-
ian I. He took part in the controversies between
Beuclin and the old-school systems; went to Basel in 1514, to Italy in 1515, and in 1517 visited Paris, where he gave private instruction in the classics; returning afterwards to Basel, he opened a school there. He
showed himself at first favorably disposed of the
Reformation, but abandoned them afterwards; and when Protestantism gained Basel, he retired with Exa-
mus to Freiburg, where he became professor of litera-
ture and history. He gave up this situation in 1560,
and died March 27, 1563. Glaesinus was a very learn-
ed man, and especially in the theory and history of
music. His Dodereckordon (Basel, 1547) is valuable
as a picture of the state of music in his age.—H. Schrei-
ber, Lebensbeschreibung (Freib. 1887); Pfliger, Univer-
sal-Lexikon, s. v.; Herzog, Real-Encyklopaedie, v. 163.
(J. N. F.)

GLASS OR GLASS. John, founder of the sect of Glas-
sites, was born at Archiernymy, Sept. 21, 1898. He
was educated at St. Andrew's, and in 1719 became minister
of Teaching. In 1727 he published a book to prove that
Church establishments are inconsistent with the Gosp-
el, for which he was deposed by the General Assem-
bly. He imbibed a number of other peculiar opinions
and gathered followers, who were called by his name in
England and America; they were denominated Sandemansians. Glass died at Dunce in
1772. His works were published at Edinburgh in 4
vols. 8vo, and in a second edition at Perth (1782, 6
vols. 8vo). Among the most celebrated members of
the sect was Michael Faraday. For the peculiar opin-
ions of the sect, see SANDEMAN.

GLASS (the material is perhaps denoted by מַכָּר, ἡ καραβί, rock "crystal," Job xxxvii. 17; יַלוֹאכ, κρυ-
tal, "glass," Rev. xxii. 18, 21; and hence the adj.
יאָכָר, κρυταλίνη, "of glass," Rev. iv. 6; xv. 2
[see CRYSTAL]; the instrument or looking-glass by יַלְוָא, γιλαών, a tablet, "roll," Is. viii. 1; "glass," 1.
κρυταλίς, κρυταλίνη, a mirror, Is. iii. 23; יָלֹא, יָלֶה, "vision," as usually rendered; "looking-glass," Exod. xix. 8; יָלְוָא, a mirror, "glass," I Cor. xiii. 12; Is. i.
33 [see MIRRORS]), according to Plien (Hist. Nat. xxvi.
26), was discovered by what is termed accident. Some
merchants kindled a fire on that part of the coast of
Phoenicia which lies near Ptolemais, between the foot of
Carmel and Tyre, at a spot where the river B LSU
casts the fine sand which it brings down; but, as they
were without the usual means of suspending their
cooking vessels, they employed for that purpose logs
of nitre, their vessel being laden with that substance: the
fire fusing the nitre and the sand produced glass.

He proceeds to state that the Sidonians, in whose vi-
cinity the discovery was made, took it up, and, having
in process of time carried the art to a high degree of
excellence, gained thereby both wealth and fame; other nations followed their pupils; the glassmakers espe-
cially attained to very high skill in the art of fashion-
ing, blowing, and coloring glass; finally, even glass
mirrors were invented by the Sidonians. This account of
Pliny is in substance corroborated by Strabo (xvi.
15) and by Josephus (War, ii. 9). But this account
is less likely than the supposition that vitreous matter
first attracted observation from the custom of lighting
fires on the sand "in a country producing natron or
subcarbonate of soda" (Rawlinson's Herod. ii. 82). It
has been pointed out that Pliny's story may have orig-
ninated in the fact that the sand of the Syrian river
Belus, at the mouth of which the incident is supposed
to have occurred, "was esteemed particularly suitable
for glass-making, and exported in great quantities to
the workshops of Sidon and Alexandria, long the most
famous in the ancient world" (Smith, Dict. of Class.
Ant. s. v. Vitrum, where everything relevant to the il-
lustration of the classical allusions to glass may be
found). Some find a remarkable reference to this lit-
tle river (respecting which, see Pliny, Hist. Nat. v. 17;
xxxvi. 63; Josephus, War, ii. 10, 2; Tacitus, Hist. v.
1) in the blessing to the tribe of Zebulun, "they shall
suck of the sources of the sea, and of the springs in
the sand" (Deut. xxxiii. 19). Both the name Belus
(Reland, Pustest. p. 267) and the Hebrew word בּשׁ, "sand," have been suggested as derivations for the Greek ιάλος, which is, however, in all probability,
from an Egyptian root. See BElUs. Some suppose that
the proper name בּשׁיָה־יַלְוָא ("burnings by the
waters") contains an allusion to Sidonian glass-facto-
ries (Meier on Jos. xi. 8; xiii. 6), but it is much more
 probable that it was so called from the privilege of the
Egyptian chariots at that place (Lord A. Hervey, On the
Genealogies, p. 228), or from hot springs. See MISCH-
PHOES-MAIM.

Yet, notwithstanding the above explicit statement,
it was long denied that the ancients were acquainted
with glass properly so called; nor did the denial en-
tirely disappear even when Pompeii offered evidences
of its want of foundation. Our knowledge of Egypt
has, however, set the matter at rest. Wilkinson, in his
Ancient Egyptians (iii. 88 sq.), has adduced the
fullest evidence that glass was known to and made by
that ingenious people, at least a thousand years prior to
their national existence. Upwards of 3500 years
before the reign of the first Osirites, they appear to have
practised the art of blowing glass. The process is rep-
resented in the paintings of Beni-Hassan, executed in
the reign of that monarch. In the same age images of
glazed pottery were common. Ornaments of glass
were made by them about 1500 years B.C.; for a bead
of that date has been found, being of the same specific
gravity as that of our crown glass. Many glass bot-
tles, etc., have been met with in the tombs, some of
very remote antiquity. Glass vases were used for
holding water, these being early as the Exodus. The
Israelites had the advantage not only of an earlier application to the art, but also of a peculiar earth, which appears to
have been necessary to the production of some of the
more valuable and brilliant kinds of glass (Beckman,
History of Inventions, ii. 543, Eng. transl.; a ii. 398 sq.; iv. 54). Yet the primary clear and transparent glass was considered the most valuable (Pliny, xxxvi. 26).
Indeed, a great part of the glass-ware used at Rome about the Christian era
and subsequently came from Alexandria; and the em-
peror Hadrian was presented by an Egyptian priest
with some vases which were reckoned so fine that they
were produced only on grand occasions (Strabo, i.
17vii; Vopiscus in Vita Saturnini, c. 8). Wilkinson
states respecting the Egyptians, "Such was their skill
in the manufacture of glass, and in the mode of staining it of various hues, that they counterfeited with success the amethyst and other precious stones, and even arrived at an excellence in the art which their successors have been unable to retain, and which our European workmen, in spite of their improvements in other branches of this manufacture, are still unable to imitate. For not only do the colors of some Egyptian opaque glass offer the most varied devices on the exterior, distributed with the regularity of a studied design, but the same hue and the same devices pass in right lines directly through the substance; so that in whatever part it is broken, or wherever a section may chance to be made of it, the same appearance, the same colors, and the same device present themselves, without being found ever to deviate from the direction of a straight line, from the external surface to the interior (Ancient Egypt, iii, 198). Winckelmann is of opinion that glass was employed more frequently in ancient than in modern times. It was sometimes used by the Egyptians even for coffins, and in wainscoting ("vitrice camera," Hist. Nat. xxxvi, 64; Stat. Sylv. i, 1).

The art of manufacturing glass was also known to the ancient Assyrians (Layard, Ninev., ii, 49), and a glass bottle was found in the north-west palace of Nimrud which has on it the name of Sargon, and is therefore probably older than B.C. 702 (ib. Ninev. and Bab., p. 167). This is the earliest known specimen of transparent glass. Opaque colored glass was manufactured by the Assyrians at a much earlier period, and some specimens exist of the 15th century B.C. The Sargon vase had been blown in one piece, and turned and hollowed out afterwards. In the mounds of Babylon were likewise found small glass bottles, some colored, others ribbed and otherwise ornamented, and vases of earthen-ware of various forms and sizes, sometimes glazed with a rich blue color (ib. p. 429).

Other glass vessels of the Roman period were elsewhere discovered (ib. p. 504). With the glass bowls was discovered a rock-crystal lens, which must have been used as a magnifying or burning-glass (ib. p. 167). In later times glass was abundant for similar purposes among the Romans, as is evident from the specimens disinterred from the ruins of Pompeii. See Bottle.

That glass was known to the Hebrews appears beyond a doubt; but whether they brought a knowledge of its manufacture with them out of Egypt, or learned it from their Sidonian neighbors, is uncertain. Whether they used it for mirrors is doubtful. In Job xxviii, 17, מטול is believed to mean glass, though it is ren-
Glass Vases from Pompeii.

ded "crystal" in the English version. It comes from τραχύς (to be pure), and, according to the best authorities, means a kind of glass which in ancient days was held in high esteem (A. D. Michaelis, Hist. Vitr. apud Hebr.; and Hamberger, Hist. Vitr. ex antiquitate eruta, quoted by Gesenius, s. v.). Symmachus renders it κρύσταλλος, but that is rather intended by ἴαυλος (Job xxxviii, 18, A. V. "pearls," Sept. γάνθος, a word which also means "ice;" comp. Pliney, H. N. xxxvii, 2) and πέντε (Ezek. i, 22). It seems, then, that Job xxxviii, 17 contains the only allusion to glass found in the O. T., and even this reference is disputed. Besides in symmachus, others also render it δαμάς ἴαυλος (Schleusner, Thesaur. s. v. ἴαυλος), and it is argued that the word ἴαυλος frequently means crystal. Thus the Schol. on Aristoph. Nub. 764, defines ἴαυλος (when it occurs in old writers) as δαμάς ἴαυλος, and Hesychius gives as its equivalent λίθος ἱδρυμα. In Herodotus (ii, 24) it is clear that ἴαυλος must mean crystal, for he says, η διά σφαλλυ καὶ τεσσαρος ἱδρυκατον, and Achilles Tatius speaks of crystal as τοῖς ἵαυλοις ἄριστον, (ii, 3; Bähr, On Herod. ii, 44; Heerem, Ideen, i, i, 388). Others consider πεντεντούομιν to be amber, or electrom, or alabaster (Bochart, Hieros. ii, vi, 672). In the New Testament the word employed is ἱδρυς, compare Aristoph. Nubae, 768). In Rev. xxii, 9, 18 we read, "The city was pure gold, like unto clear glass." ver. 21, "as it was transparent glass" (compares iv, 6). Mention is made in Rev. iv, 6, and xv, 2, of a sea of glass like unto crystal, concerning the meaning of which interpreters vary; but it is probably an allusion to the brazen sea spoken of in 1 Kings vii, 23, and elsewhere, containing water for the priests to wash with, that they might not minister before God under any pollution. "Molten looking-glass" also occurs in Job xxxviii, 18; but the original "N., spectandum, and its corresponding word in Exod. xxxviii, 8, authorize the translation "mirror"—that is, of some metal. Indeed, Beckman (Betragt zur Gesch. der Erfindung, iii, 819) erroneously denies that glass mirrors were known till the 18th century, adding that they are still seldom seen in the East. It is certain, however, that glass was not applied in ancient times to windows: when these were not, as they commonly were in the East, simply open apertures by day, with wooden doors placed on them by night, a kind of semi-transparent stone, a sort of tali, called ἵαρα ἴαυλορα, was generally used, and continued to be so for centuries after the Christian era. See Wissow.

It is a singular fact, that although the ancients were aware of the reflective power of glass, and although the Sidonians used it for mirrors (Pliny, H. N. xxxvi, 66), yet for some unexplained reason mirrors of glass must have proved unsuccessful, since even under the Roman empire they were universally made of metal, which is at once less perfect, more expensive, and more difficult to preserve. See Smith, Dict. of Glass, Ant. s. v. Speculum. Accordingly, the mirrors found in Egypt are made of mixed metal, chiefly copper. So admirably did the skill of the Egyptians succeed in the composition of metals, that their mirrors were susceptible of a polish which has been but partially revived at the present day. The mirror was nearly round, having a handle of wood, stone, or metal. The form varied with the taste of the owner. The same kind of metal mirror was used by the Israelites, who doubtless brought it from Egypt. In Exod. xxxviii, 8, it is expressly said that Moses "made the laver of brass of the looking-glasses (brazen mirrors) of the women." In the East mirrors had a connection with the observances of religion; females held them before the images of the goddesses, thereby manifesting their own humility as servants of the divinities, and betokening the prevalence in private life of a similar custom (Callimach. Hymn. in Philaup. 21; Senec. Ep. 95; Cyrill. De Adorat. in Spiri. ii, 04). That in the New Testament a mirror is intended in James i, 23, "keeping his natural face in a glass," appears certain; but the other passage, in which the word ἱδρυμα occurs (1 Cor. xii, 12), seems to require an imperfectly transparent medium, through which objects are beheld. What the precise substance was which the apostles thought of when he used the words it may not be easy to determine. It could not well be ordinary glass, for that was transparent. It may have been the ἵαρα ἴαυλορα, or a kind of tali, of which the ancients made their mirrors. This opinion is held by Schleusner, who says that the Jews used a similar mode of expression to describe a dim and imperfect view of mental objects (Schöttgen, Hor. Heb. ad loc.). (See Michaelis, Hist. Vitr. ap. Hebr. in Comment. Soc. Gott. ii, 57; also Dr. Falconer on the "Knowledge of the Ancients respecting Glass," in the Miscell. of the Lit. and Phil. Soc. of Manchester, ii, 96; Becker's Chrestien, i, 132; Michaelis, Suppl. p. 618; Pareau, Comment. on Job xxviii, p. 516; Hamberger, Vitr. Hist. in the Comment. Soc. Gott. 1754; Hirsch, Geschicchte der baukunst, iii, 66.) See Looking-Glass.

Glass-painting is of three kinds: (1) the mosaic, in which pieces of differently-colored glass are cut out and arranged as to represent figures or scenes, the pieces being joined together with lead; (2) the enameled, in which the colors are laid on a plate of glass and then burnt in; and (3) the mosaic-enamel, which is a union of the other two, and is by far the most beautiful and durable kind of glass-painting. The art probably had its origin in France or Germany during the tenth century. The mosaic style prevailed till the fourteenth century. Glass-painting reached its highest state in the fifteenth and sixteenth centuries. After the rise of the Renaissance around the sixteenth century, glass-painting fell into decadence. It has been quite successfully revived during the last thirty years in Germany.——Warrington, History of Stained Glass (London, 1850); Wackernagel, Geschichte der deutschen Glassmalerei (Leipzig, 1855). (G. F. C.)

Glass or Glassius, Salomo, a German theologian, eminent both for piety and learning, was born at Sonderhausen in Thuringia, in 1588. He was educated at the universities of Wittenberg and Jena, and devoted himself at an early period specially to the study of Hebrew and its cognate languages. He became in 1637 professor of theology at Jena, and in 1640 was made superintendent of the churches and schools in Saxe-Gotha. In this office he acquired himself with great zeal and success, laboring for the spiritual as well as intellectual well-being of the churches of the duchy. He died at Gotha July 27, 1656. His works are, Philosophia Sacra (4to); Iconographia Medica Physica (Jena, 1624, 4to); Disputationes in Augustam (from Confessio), et Evangel. Evangelii utraque s. 285), Ernst. Theolog. E impartum (Gotha, 1647, 4to; Kuremb, 1664, fol.).——Christologia Mosaeica (Jena, 1649, 4to); Christologia Davidica (Jena, 1658, 4to).—Loch Theologici (posthumous, Go.
GLASTONBURY, "an ancient municipal burg and market-town in the county of Somerset, twenty-five miles south-west of Bath, is built on the site of a cross and occupied by a peninsula formed by the river Brue or Brent, called the Isle of Avalon. Pop. (1861) 3559. The town owes its origin to its celebrated abbey, which, according to tradition, was founded in A.D. 60, and was one of the earliest seats of Christianity in Britain. Its fragments remain. The Chapel of St. Mary is the "miraculous thorn," which flowered on Christmas-day, was, till the time of the Puritans, believed by the common people to be the veritable staff with which Joseph aided his steps from the Holy Land. The tree was destroyed during the civil wars, but grafts from its stock are under the care of the neighbors. In A.D. 605 the monks adopted the dress and rules of the Benedictine order. This magnificent pile at one time covered sixty acres; but as most of the houses in Glastonbury, and also a causeway across Sedgemoor, have been destroyed, we have now only one-fourth of the materials, the extent of which was now much diminished. The most interesting remains are the Abbey Church, with St. Joseph's Chapel, St. Mary's Chapel, and the Abbot's Kitchen. St. Joseph's Chapel is one of the most elegant specimens in existence of the transition from Norman to early English architecture, and is supposed to have been erected during the reigns of Henry II and Richard I. It is now roofless, and the vaulting of the crypt is nearly destroyed. The entrance is adorned with sculpture. Below the floor is a Norman crypt, within which is St. Joseph's Well. Of the Abbey Church a few fragments remain. The Chapel of St. Mary is roofless, but the remains of its pointed windows and arches are exceedingly elegant. The Abbot's Kitch- en, now separate from the rest of the ruins, is a square massive structure, the walls strongly buttressed, and dates from about the 12th century. Glastonbury has the honor of ranking St. Patrick (A.D. 415) and St. Dunstan among its abbots. In 1539 Henry VIII summoned abbot Whiting to surrender Glastonbury and all its treasures; and on his refusal, condemned him to be hanged and quartered, and the monastery completely destroyed, which the king's agents immediately carried into execution. According to tradition, king Arthur and his queen Guinevere were buried in the cemetery of the abbey; and Giraldus Cambrensis states that a leaden cross, bearing the following inscription, "Hic jacet sepultus Inclutos Hec Arthurus in basilis Avalonis," was found under a stone seven feet below the surface, and nine feet below this was found an oaken coffin, containing dust and bones. This disinterment took place by order of Henry II. The only other objects of interest at Glastonbury are the Church of St. Benedict; the Church of St. John the Baptist, with a tower 140 feet high; the Wasy- all Hall, where Joseph of Arimathia rested from his weary pilgrimage; and the Tor Hill, where the last abbot of Glastonbury was put to death, five feet above the sea-level, crowned by a beautiful tower, the ruin of a pilgrimage chapel of St. Michael.

GLATZ, Jacob, a Protestant clergyman of Hungary, was born in 1776 at Poprad, studied theology at the university of Jessen, became in 1797 professor at Saltz, and in 1804 professor of the Lutheran Protestant school of Vienna, in 1806 minister of the Lutheran congregation in the same city, resigned in 1836, and died in 1831 at Pragstein. He wrote numerous ju-
GLEDE 884 GLORIA IN EXCELSIS

... both passages γῆ, vultures, the Vulg. has μίμης, kites, in both. The Codex Samar., however, reads Πήγω in Deut. xiv. 18, which favors the supposition that this is the proper reading; but it still remains uncertain whether by this term we are to understand the glede or the vulture. The A.V. makes it the one in the one passage and the other in the other. As the Πήγω is distinguished from the Πήγω (Deut. xiv. 18), and as the latter is probably one of the vulture genus (comp. Isai. xxxiv. 14), it is probable that the former belongs to the kites. The kite has, in comparison with its bulk, very long wings, and a forked tail extending beyond them. It is a species that rises to a towering height, hangs apparently motionless in the sky, and darts down with immense velocity; but the legs and claws being weak, it is cowardly, and feeds upon carrion, fish, insects, mice, and small birds. About Cairo kites are particularly abundant, mixing with the carrion vultures in their wheeling flight, and coming in numbers to the daily distribution of food awarded them. But the question whether the kite of Europe and that of Egypt are the same species is not decided, though there is no want of scientific names for both species found in the valley of the Nile, one of which is certainly distinct from the European, and the other, if not so, is a strongly-marked variety. We find it not

tercus, Dandin; Elmus Cettius, Savigny; Falco Somnemnis, Lath.; Le Bleu, Le Vaill, and the Kowkib of the Arabs. It has the head, neck, and back dark rusty gray; scapulaires bordered with rusty; wing-coverts and primaries black, the last-mentioned tipped with white; tail rusty gray above, white beneath, outer dark; legs yellow. The manners of both species are much the same; it is likely that they are equally abundant at Cairo, and spread into Palestine. See Hawk.

Glenly, John, D.D., a Presbyterian minister, was born in Derry, Ireland, June 4, 1755, and was educated in the University of Glasgow, where, after some time to the study of theology, he was licensed and ordained. He subsequently accepted a call from the Church in Londonderry, where he remained till the Irish insurrection of 1788 obliged him to leave his native land. He arrived in Norfolk, Va., in 1799, and shortly after supplied the congregations of Staunton and Bethel, in Augusta Co., for nearly two years. He made the acquaintance of Washington and Jefferson, and was held in high estimation as a minister. In 1808 he was inducted as pastor of the Second Presbyterian congregation at Baltimore, and served the House of Representatives and the Senate as chaplain. He died Oct. 4, 1832. He published An Oration in Commemoration of Washington, 1800:—A Prayer offered on the 4th of July, 1821.—Sprague, Annals, iv, 229.

Glenorchy, Lady Wilhelmina Maxwell, distinguished for her benevolence and piety, was born at Preston, Scotland, Sept. 2, 1741. Her early years, though sedulously watched over by her kind and intelligent mother, were nevertheless too much devoted to the follies and gayety of fashionable life. When she had attained the age of twenty-three years, her mind was aroused by a serious illness to reflections on her present character and future prospects; and musings on the first question in the Assembly's Catechism, "What is the chief end of man?"—"It is to glorify God, and enjoy him forever," she asked herself, Have I answered the design of my being? Have I glorified God? Shall I enjoy him forever? Thus reflecting, she gradually felt the sinfulness of her nature, perceived the total alienation of her heart from God, and applied to her heavenly Father through Christ for pardon and grace. The remainder of her life was distinguished by the consistency of her deportment. She employed much of her time in acts of benevolence, in wise and benevolent contributions; in an extensive, judicious, and profitable correspondence; and in every other means for promoting the conversion of sinners and the edification of saints. For such benevolent actions, she was called a Methodist, and represented as a wild enthusiast; but such opposition her principles enabled her patiently to endure, and, through evil and good report, to pursue her work of faith and labor of love. She was an intimate friend of Darcy Lady Maxwell, and, like her, a friend to Mr. Wesley and his preachers. In 1774 she opened a chapel in Edinburgh called "Lady Glenorchy's chapel," where Mr. Jones, of Plymouth, preached for over fifty years. She built also several places of worship in the country. Though her health declined, her activity and usefulness were unabated, till, on the 17th of July, 1786, she was summoned to her reward. She bequeathed, by her will, five thousand pounds for the education of young men for the ministry in England; five thousand pounds to the society in Scotland for the propagation of Christian knowledge; and the greatest part of the residue of her property to charitable and pious purposes. See Memoirs of Glenorchy, in Burder's Pious Worthy. In Jones, Christian Biography; Jamieson, Religious Biography, p. 228; Stevens, History of Methodism.

Gloria in Excelsis ("Glory be to God on high"), the name of one of the most ancient doxologies of the Church. It is called doxologia major, to distinguish it

Egyptian Kite (Milvus Aegyptius).

Common Kite (Milvus ater).
from the Gloria Patri; and is also called hymnus angeli cus (the angelic hymn), because the first part of it was sung by the angels at Bethlehem. The latter portion is ascribed to Telephorus, about A.D. 139; but this is doubtful. The word hymn may have very little difference, to be found in the Apostolical Constitutions, and was established to be used in the church service by the fourth Council of Toledo. It is used by both the Greek and Latin churches. "In the Eastern Church," says Palmer, "this hymn is more than 1500 years old, and the Church of England has used it, either at the beginning or end of the liturgy, for above 1300 years." In the Roman Missal it stands at the beginning of the Office for the Communion, as it does also in the first Common Prayer of King Edward VI, where it immediately follows the Collect for Purity. In the present prayer-book of the Church of England and the Protestant Episcopal Church it stands after the communion, as it does also in the Ritual of the Methodist Episcopal Church. The Greek form of the hymn, as restored by Bunsen (Auseleca Antiscenna, iii, 87), is as follows: "Δοξάσατε τὸν θεόν ὑμῶν, τὸν κύριον, τὸν εστίν αἰώνιον, καὶ λογικά, καὶ θρασύνως καὶ συνεισφέροντες τῷ πατρί, ὑμεῖς καὶ ἡ οἰκουμένη μεῖζον τὸ κέρι τοῦ θεοῦ." ("Praise the Lord, all ye heavens, praise him, all ye hosts of his palace!""); some here assign the similitude of "liver," but the liver is never (like the heart and reins) assumed as the seat of the mind and affections. (3) Splendor, brightness, glory, majesty—of all my glory," i.e. splendor (Gen. xiv, 18; Isa. iv, 2); splendor (Jer. vii, 11; 19, 13); "also glory" (Isa. xxiii, 1; 1 Pet. iv, 4); "the glory of Lebanon," its magnificence of height or extent (Isa. xxxv, 2; 11, 10). Some here assign the similitude of "light," but the sun, stars, etc. (1 Cor. xv, 40, 41); of Moses's face (2 Cor. iii, 7); also of the celestial light which surrounds angels (Rev. xiv, 3), or glorified saints (Luke ii, 32; 1 Cor. xv, 40, 48; Col. i, 14; 2 Thess. ii, 10; Heb. iii, 3); when he showed himself at Sinai to Moses and the people (Exod. xvi, 7, 10; xxiv, 17; xix, 18; xxiii, 6, 23), or appeared in the tabernacle (Exod. xxi, 34), or in the Temple (1 Kings viii, 11; 2 Chron. vii, 1, 2; compare Luke ii, 9, 15, 32; Acts vii, 55; 8, 31; Rev. i, 12); 2 Cor. iv, 4; 1 Cor., when he appeared to the Thessalonians (1 Thess. i, 10, 11). See also of Jehovah (Isa. lix, 19, 11; xxii, 2; 2 Thess. i, 9; 2 Pet. i, 17; Rev. xxxi, 11, 28), that fiery splendour surrounded with dark clouds in which Jehovah is represented as appearing, or God himself as surrounded by this effulgence, from which lightnings proceed (Lev. ii, 28, 24; Num. xii, 25; Prov. xix, 23; 24, 24; 1 Pet. iii, 24, 24; 24, 24; 24, 24). Some here assign the similitude of "sight"; and sinners are said to "prove the eyes of his glory," i.e. of him as thus appearing in his glory for their punishment (Isa. iii, 8). Spoken also of the expected temporal reign of the Messiah (Mark x, 37; comp. Matt. xx, 21); and also of the glory of his second coming (Matt. xxv, 27; xxi, 28; xxiv, 30; Mark xiii, 26; viii, 88; Luke ix, 36; xxii, 37; Titus ii, 13). (4) Of internal character, i.e. glorious moral attributes. Spoken of God, infinite perfection, divine majesty and holiness (Pss. xix, 13; Isa. xi, 5; Acts vii, 2, Rom. i, 25; Eph. i, 17); so of the divine perfections as a manifestation in the power of God (John x, 40; Rom. vi, 4; Col. i, 11), or in his benevolence and beneficence (Rom. ix, 28; Eph. i, 12, 14, 18; iii, 10). So of Jesus, as the effulgence of the divine perfections (Heb. i, 3; John i, 14; ii, 11); also of the Spirit (1 Pet. iv, 14). (5) Of that exalted state of blissful glory which is the portion of those who dwell with God in heaven; e.g. spoken of Christ, and including also the idea of his regal majesty as Messiah (Luke xxiv, 26; John xvii, 5, 22, 24; 2 Thess. ii, 14, 1 Tim. iii, 16, 1 Pet. i, 11). Spoken of glorified saints, i.e. salvation, eternal life, etc. (Rom. ii, 7, 10; 7, 2; vii, 18; 1 Cor. i, 7; 2 Thess. ii, 17; 1 Thess. ii, 12; 2 Tim. ii, 10; Heb. ii, 10; 1 Pet. v, 1, 10). So to glorify, when spoken of God and Christ, is to render conspicuous and glorious the divine character and attributes of God as glorified by
GLORY

886

GLORY

the Son (John xii, 23; xiii, 31, 32; xiv, 13; xv, 8; xvi, 1, 4); of Christ as glorified by the Father (John viii, 54; xiii, 10, 11, 18; xiv, 28; xix, 14); of Moses (John x, 31, 32). See BEAT-

tow, n. v. See GLORIFIED.

Other terms less frequently rendered "glory," "glorious," etc., are: 大名, large; 得孝, to seed; 得孝, honor; 美好, beauty, etc.; 永年, renown; 足音, to boast. On these and the above, consult the Heb. and Gr. Lexicons.

We may be said to give glory to God when we confess our sins, and when we love him supremely, when we commit our cause to his service, walk humbly, thankfully, and cheerfully before him, and recommend, proclaim, or set forth his excellencies to others (Matt. v, 16; John xv, 8; Gal. ii, 20). In Exod. vii, 2, we read, "And Moses said unto Pharaoh, Glory over me." The margin has for "glory" honor, and for "over me" at Pharaoh's seat. Pharaoh had besought Moses to pray that the Lord might take away the frogs, and Moses wished the king to have the glory and honor (in preference to himself) of appointing a time when he should thus pray to the Lord to take them away. This was not only complimentary, but, if he had a sanguine tendency to convince him that the Lord had heard the prayer of Moses, because he himself had appointed the time.

As man's real glory on earth consists in submitting to the will of God, and in doing it, so will his glory in heaven consist in being eternally pleased and satisfied, and in finding in him perfect happiness. There can be no real glory, either in this world or in the next, aside from virtue. The glory we seek here consists in the esteem of our fellow-men, and it would never be a false or a dangerous glory if men were wise enough not to esteem anything but what is virtuous. Verily I say thereof to convince him that the Lord had heard the prayer of Moses, because he himself had appointed the time.

At the first glance his instructions on this point may appear somewhat contradictory. He says: "Let your light so shine before men, that they may see your good works, and glorify your Father which is in heaven." Then: "Take heed that ye do not your alms before men, to be seen of them; otherwise ye have no reward of your Father which is in heaven." Therefore, when thou doest thine alms, do not sound a trumpet before thee, as the hypocrites do in the synagogues and in the streets, that they may have glory of men. Verily I say unto you, thou hast a reward of thy Father which is in heaven. And if any men know, they are the most excellent sort of knowledge, viz. that of God and his glory. The existence of the created universe consists as much in it as in any thing: yea, this knowledge is one of the highest, most real, and substantial parts of all created existence, most remote from nonentity and desert. As there is an infinite fulness of all possible good in God, a fulness of every perfection, of all excellency and beauty, and of infinite happiness, and as this fulness is capable of communication or emanation ad extra, so it seems amiable and valuable in itself that it should be communicated or flow forth, that this infinite fountain of good should send forth abundant streams, that this infinite fountain of light should diffuse its excellent fulness, pour forth light all around —and as this is in itself excellent, so a disposition to bestow this, in the next place, must be looked on neither as an imperfection nor an excellent disposition, such an emanation of good is, in some sense, a multiplication of it; so far as the communication or external stream may be looked upon as any thing besides the fountain, so far it may be looked upon as an increase of good. And if the fulness of good that is in the fountain is itself excellent and worthy to exist, then the emanation, or that which is as it were an increase, repetition, or multiplication of it, is excellent and worthy to exist. Thus it is fit, since there is an infinite fountain of light
and knowledge, that this light should shine forth in beams of communicative knowledge and understanding; and as there is an infinite fountain of holiness, moral excellence, and beauty, it should flow out in communicative holiness. And as there is an infinite fulness of joy and happiness, so these should have an emanation, and become a fountain flowing out in abundant grace. Sometimes, sometimes, in the scheme of all things, it appears in another way to be a thing in itself valuable that there should be such things as the knowledge of God’s glory in other beings, and a high esteem of it, love to it, and delight and complacence in it: this appears say, in a certain way, viz. as the things that are but the fruits and evidences of God’s own knowledge, holiness, and joy. Thus it appears reasonable to suppose that it was what God had respect to as an ultimate end of his creating the world, to communicate of his own infinite fulness of good; or, rather, it was his last end, that there might be a glorious and abundant emanation of his infinite fulness of good ad extra, or without himself; and the disposition to communicate himself, or diffuse his own fulness, which we must conceive of as being originally in God as a perfection of his nature, was what moved him to create the world” (p. 219).

"...in this case of a emanation of the divine fulness, are not properly set in opposition, or made the opposite parts of a disjunction. Nor ought God’s glory and the creature’s good to be spoken of as if they were properly and entirely distinct; that God’s dominion is in his glory, and the communication of good to his creatures, are things altogether different; that God’s communicating his fulness for himself, and his doing it for them, are things standing in a proper disjunction and opposition; whereas, if we were capable of having more full and perfect ideas of God and divine things, which are so much above us, it is probable it would appear very clear to us that the matter is quite otherwise, and that these things, instead of appearing entirely distinct, are implied one in the other—that is, in seeking his glory, therein seeks the good of his creatures. Because a good emanation of his glory (which he seeks and delights in, as he delights in himself and his own eternal glory) implies the communicated excellency and happiness of his creatures. And in communicating his fulness for them, he does it for himself; because he seeks, which he seeks, much in union and communion with himself. God is their good. Their excellency and happiness is nothing but the emanation and expression of God’s glory. God, in seeking their glory and happiness, seeks himself, and union with himself, i.e. himself diffused and expressed (which is a delight in, as he delights in, his own infinite beauty and fulness), he seeks their glory and happiness” (Dissertation on the End of God in Creation, § 2, 3).

In thus manifesting his power, wisdom, holiness, and goodness, we say that God has established his “glory;” and so, also, when men acknowledge and worship these divine perfections, they “glorify” God. In this language there is nothing absurd or injurious to the divine majesty. In Scripture the object of divine revelation is stated sometimes to be the sanctification of man, sometimes the glory of God, as these are identical, whether considered from the divine or the human point of view. Moreover, it is an effect of the divine wisdom, holiness, and goodness, that man should find happiness in virtue, not in vice; in submission to the physical and moral laws, as it is so much by God, not in violating them. And when we submit to these laws he glorifies God, since he renders homage to the divine perfections. Hence it cannot be wrong to say that the glory of God consists in the submission of all creatures to his law, and that the glory of all rational creatures consists, as it were, in the submission of the subordinates to God. If we are to recognize the glory of God as one of his rights, as one of his regal prerogatives, it takes so "ipo the form of a duty, which becomes obligatory for us. The heavens declare the glory of God, but they only declare it to reasonable beings, for the glory of God is only realized when its revelation is understood by moral beings, willingly received by them, and independently reflected. "The Lord hath made all things for himself" (Prov. xvi. 4). Not that he makes all things for himself, for his own use, but for the use of his own creatures, or for the use of those creatures which he has appointed for his own use, or to increase his own essential happiness, but that he made all in accordance with the requirements of his divine perfections, and so as better to manifest his glory. When the adversaries of Christianity reflect upon things in this world, they see that man, holding himself vain, thirsting for praise and increase, they fall themselves into the very error which they denounce. They say: "If man seeks for glory, it is because he needs it; because he is weak; hence, if God seeks his own glory, it is also from need and weakness." This is pure sophistry: man is weak and poor because finite; God is self-sufficient because essentially happy and perfect; and it is on account of this very perfection that he acts for his glory, because he could not have any higher or more worthy aim.

"But," it is said, "to speak of glory" accruing from man to God, is not in the books. And a proper emanation of the divine fulness, are not properly set in opposition, or made the opposite parts of a disjunction. Nor ought God’s glory and the creature’s good to be spoken of as if they were properly and entirely distinct; that God’s dominion is in his glory, and the communication of good to his creatures, are things altogether different; that God’s communicating his fulness for himself, and his doing it for them, are things standing in a proper disjunction and opposition; whereas, if we were capable of having more full and perfect ideas of God and divine things, which are so much above us, it is probable it would appear very clear to us that the matter is quite otherwise, and that these things, instead of appearing entirely distinct, are implied one in the other—that is, in seeking his glory, therein seeks the good of his creatures. Because a good emanation of his glory (which he seeks and delights in, as he delights in himself and his own eternal glory) implies the communicated excellency and happiness of his creatures. And in communicating his fulness for them, he does it for himself; because he seeks, which he seeks, much in union and communion with himself. God is their good. Their excellency and happiness is nothing but the emanation and expression of God’s glory. God, in seeking their glory and happiness, seeks himself, and union with himself, i.e. himself diffused and expressed (which is a delight in, as he delights in, his own infinite beauty and fulness), he seeks their glory and happiness” (Dissertation on the End of God in Creation, § 2, 3).
patera of the Catacombs, about the 3d century, being in them applied to the head of Christ. About the close of the 6th century it was first applied to angels, and to the apostles and saints. The present art to signify power and dominion. In this sense it was occasionally used in Christian art, as when it was placed around the head of Constantine, of the empress Theodora, around six heads of the beast of the Apocalypse, and even around that of Satan. But usually it signified holiness and purity. The olden glory, or the "vesica piscis," envelops the whole person only in representations of Christ, the Virgin Mary, or other saints who are represented as ascending to heaven. The glory had many forms: thus it was a simple circle of light, or it contained a cross in the monogram A or X. It was sometimes applied to the head of a dove, a lamb, or other symbol of the Saviour.—Mrs. Jameson, Sacred and Legendary Art; Martigny, Dictionnaire des Antiquités Chretiennes. (G. F. C.)

Gloss, Glossary. A gloss is a note appended to any word or phrase for the purpose of interpretation or illustration. "Sacred glosses" are such notes appended to words or phrases occurring in the Scriptures. A glossary is a collection of such explanatory notes properly arranged.

The word gloss is borrowed from the Greek γλῶσσα, a tongue. In the above explanation it has no support from classical usage. The process, however, by which the word passed from its original meaning to that in which it was used by medieval writers, and in which it is now used, may be traced. The Greek word γλῶσσα, may mean a tongue or speech, may be used by the Greek grammarians in the sense of a word requiring to be explained. In process of time words often become obsolete, or come to be used in senses different from those in which they were originally used; new words are introduced; and words frequently have special or proper use. In such cases the grammarians of ancient times made the technical character, familiar only to a portion of the community. To the multitude such words need to be explained; and such words the Greek grammarians called γλῶσσαν. Thus Plutarch speaks of certain expressions in the poets which were not commonly understood, and which for this reason, the idiom of particular regions or tribes, as τὰς λεγόμενα χάλκους (De audiend. post. c. 6). Galen applies the same name to the antiquated words of Hippocrates, and explains the term thus: δέος τοῖν τῶν ἀναμνηστικῶν ἡ μὲν τοῖς ἑκατονταῖς, ἡ δὲ μὴ ἀναμνηστικὴς καλοῦσιν (Exeges. Gloss. Hippocr. Proem.). Aristotle applies the same term to provincialisms (De arte poet. c. xxii, §§ 4–6; xxii, 3, 4, etc.). And, not to multiply quotations, a scholiast on Dion. Halicarn., quoted by Wetstein on 1 Cor. xii, 10, expressly says γλῶσσαν φωναί ἑρμηνεύει, and αὐτοὶ ἀργοὶ μελῳδοὶ, Quintilian also says of the synonymous word glossamass, “It est voces minus usitatass.” (Instit. Orat. i, 8, 15; comp. also i, 1, 35).

The next step was from calling a word needing explanation a gloss, to apply this term the explanation itself. These explanations at first consisted merely of the explanation in itself; in abbreviating the word in common use (ὁμώμα εἰρήμ., Aristot.) to the obsolete and peculiar word; and thus the two viewed as one whole came to be called a gloss; and ultimately this name came to be given to that part which was of most interest to the reader, viz. the explanation.

These explanations constituted the beginnings of Greek Lexicography. They did not continue, however, to be merely lexical; they often embraced historical, geographical, biographical, and such like notices. Hence, they were used at first in an alphabetical order; nor did they embrace the whole range of the language, but only such parts of it as the glossographer was interested in (hence such works as the Ἀντίκαι Γλώσσας of Theodorus, etc.); nor were the words presented in their uninflected forms, but in the form in which they occurred in the course of the glossographer's reading. More methodical collections of these explanations began to be made in the Middle Ages, and such works, by ignorance preserved to us an alphabet of Hezychius, Suidas, Phavorinus, Zonaras, Photius, and in the Etymologikon Magnum.

I. The first class of extant scriptural glosses consists of explanations drawn from the Greek glossarists, a large number of the notes collected by whom are on words occurring in Scripture. Their works thus become valuable as exegetical aids, especially as they convey not the individual opinion of the collector so much as opinions which he had gathered from older writers. A Glossarium Groecum in N. T., collected by two of the most learned of these glossarists, Valckenaer, was published by Alberti in 1780. It was sometimes taken from the works of Hezychius the explanations of scriptural words (Opp. i, 173 sqq.); but this has been best done by J. Ch. Gottil. Ernesti, in his Glossa Sacra Heschylis Graece, etc. (Lips. 1786), which was followed by a similar collection from Suidas and Phavorinus, with the codex, in the Etymologicum Magn. (Lips. 1786). These are extremely convenient books of reference. Comp. Fabricius, Bibl. Graec. iv, 540 sq.; Rosenmüller, Histor. Interpret. iv, 306 sq. Suicer's Theaurus Ecclesiasticus (Amst. 1685, 1728, 2 vols. fol.) contains nearly all these explanatory words or glosses, and the manuscript of which it is the record is one of the best modern Greek Lexicons of the N. T.

II. The second class of glosses is due to the habit, as old perhaps as the art of writing itself, of readers inscribing on the margin of MSS. or books observations of their own, which were written by the glossator of the text. This was especially the case with the sacred books, partly because after the establishment of Christianity they were more read than other books, partly because their contents gave abundant occasion for theological, historical, or philological annotation. Hence, from an early period, marginal notes have been added on the text. In the oldest Greek codex, the marginal notes were the source of not a few of the Keri readings; and the glosses on the margins of the codices of the Sept. and the N. T. have given rise to many of the various readings which exist in both of these. It is believed also, as marginal notes are transferred from a margin to the text, or from a careless copyist, into the text, that some such interpolations are to be found in the received text of the N. T., and it is considered to be one of the problems which criticism has to solve to detect these, and eliminate them. The exercise of a sound and cautious judgment, however, is required to preserve over this, lest rash and unauthorized alterations be made (Valckenaer, Dissert. de Glossis Sacris [Franq. 1787]; J. A. Ernesti, De vero usu et indole Glossariorum Gr. [Lug. Bat. 1742]; Tittmann, De Glossis N. T. metonymias at justicis [Wittenb. 1783]; Waser, De Glossis N. T. [pref. to Valckenaer's Schola Lebrum quodam N. T. [Amst. 1785]; Bornemann, De Glossemate, N. T. causis justicis, in his Schola ad Luc. Exeg. 1800]. It has been proposed to restrict the term gloss to the marginal annotations as such, and to use glossa to designate those which are supposed to have been introduced into the text; but the usage of writers is not uniform in this respect.

The longer marginal annotations (Glossae Marginales) were made principally on the text of the Vulgate. These were of various kinds; some grammatical, some historical, some theological, and even allegorical and mystical. The most famous collection of these is that made in the 9th century by Walfrid Strabo in the writings of Augustine, Ambrose, Jerome, Gregory, Isidore, Bede, Alcuin, and Rabanus Maurus, with addi-
Glosses and Glossatores 889

GNAT

tions by himself. This became the great exegetical thesaurus of the Middle Ages, and was known as the Glossa Ordinaria. Of notes written between the lines (Glossae Interlineares), a collection was made by Anselm of Lucca (1118-87) and David of Hesse in the 12th century. Both of these works were printed together about the end of the 15th century, 4 vols. fol., they have often been reprinted since, with the commentary of Lyra. Other glossaries are those of Peter the Lombard on the Psalms (Par. 1353), and Hugo of St. Caro (Psalterio in universa Biblia, Verona, 1487). David of Hesse's Introci, 252; Herzog, Real-Encyklop. v. 188.

Glosses and Glossatores of the Roman and canon law. In the 12th century the Roman law, which after the downfall of the Western Roman empire had been neglected but little, but was of great importance, again was brought into notice, and studied with great zeal. The law school of Bologna, founded towards the end of the 11th century or the beginning of the 12th by 1 Mercuri (Warnerius, Guerius), was the centre of this new movement. The reputation of the school, and of its professors, spread from all parts of Europe to Bologna. The activity of the teachers did not confine itself to the expounding of the sources of the law, but also made these researches the foundation of a literary activity, and created a body of Glossatores (Glossarii), so called. The written interpretations of the Corpus juris were in the form of glosses, consisting sometimes in the explanation of some particular word or expression, sometimes in full and complete elucidations, and this sometimes between the lines of the text (interlineae glosses), sometimes on the margin (marginal glosses). Besides these the glossatores also wrote summae, reviews of the contents of some particular chapter of law; casali, real or imaginary cases intended as illustrations of particular points in connection with questions and distinctions; and also brocarda or brocardica, etc. (see Saveny, Grecius, decret. ii. c. 537-553). This literary activity of the glossatores of Roman law was an example for scientific treatment of canon law, which afterwards (in the 12th century) gave rise in Bologna and in Paris to lectures on the subject, and thus by the side of the logists the schools of the canonists, head of his professors, emerged. A number of the pupils and disciples of Gratian (q. v.) composed glosses (probably interlinear) on his Decretum. Among the oldest of these glossatores was Sicardus of Cremona, who was made bishop of Cremona in 1165. When the number of glosses in different MSS. became very great, the faculty of collecting and arranging them was undertaken by John Tetoconus, who wrote in 1212 a commentary on the Decretum, compiled from the glosses of his predecessors, and this Apparatus, augmented and improved, by Bartholomew of Breola about 1236, became the Glossa ordinaria; i.e. was indorsed by the school, appended to the M.3. copies of the Decretum, and subsequently printed with it. Glosses on the collection of decretales of Gregory IX were written by Vincentius Hispanus (about 1240), Goffredo Traniensis (+1245), and Simplicius Fiesco, who afterwards sat on the pontifical throne (1243-54) under the name of Innocent IV. From these glosses Bernhard de Botone of Parma (+1260) compiled his Apparatus, which was also recognised as glossa ordinaria. Among the glossatores of the Liber sextus are to be named Johannes Monachus (+1313), Guido de Bavario, and Petrus Andreas (+1548). The glosses of the latter were originally written in his youth; he afterwards improved them, and they have been copied and printed as glossa ordinaria. He also wrote the first glosses on the Clementini in Latin, and he was also the first to commence the collection of glossæ ordinariae. Among the other glossatores of the same collection we remark Zenzelinus de Cassania, a teacher of Toulouse, Johannes de Lignano, Petrus de Anchariano, Franciscus Zabarella (+1417), etc. The glosses on the Extravaganza were the work partly of Guillerma de Monte Lauduno, and partly of Johannes Monachus. Those on the collection of John XXII were chiefly by Zenzelinus de Cassania. The glosses have to this day a great scientific value; for the historians, who have also exerted an important influence in the practice of the law. See Sarti, De claris archipresbyteriis Bonon. professoribus, t. i., p. i, ii (Bonon. 1769, folio); Herzog, Real-Encyklop. v. 191. (J. N. P.)

Glocester, a cathedral city of England, on the Severn, 48 miles northwest of London. The cathedral is of several different eras of ecclesiastical architecture, 427 feet in length, and 144 in width; the height of the central tower, its greatest external ornament, is 225 feet; the cloisters, also of great beauty, form a large square. Formerly the church of a Benedictine abbey, it was converted into a cathedral in 1541. Gloucester is the official residence of the bishop of Glocester and Bristol, whose diocese embraces Gloucestershire, and parts of Somersetshire and Wiltshire. The diocese belongs to the province of Canterbury, and in 1829 had 13 deaneries, 465 benefices, 190 curacies, and about 210,000 church sittings. The incumbent (1899) is Charles John Elliott, D.D. (consecrated in 1888).

Gloves, part of the insignia of a bishop. See BISHOP.

Gluttony (Guttur, gulla), Deut. xxi. 20; Prov. xxiii. 21; a "riotous" person, Prov. xxiii. 20; xxviii. 7. Is prodigal, voluputous debauchee, πειχω, given to eating, "gluttonous," Matt. xi. 19; Luke vii. 34.

Gphneus (or Follonius), Willelmus, was born at the time when the English victory over the French at Poitiers was achieved. He was a man of learning, and specially versed in Latin literature. He shared in the afflictions of his friends, Jan de Wicet, and Bakker and others, who became victims to Roman Catholic intolerance and persecution. Released from captivity, he was again seized and condemned to spend three months in a monastery on bread and water. He was permitted to see the cause of the Reformation prosper, and to enjoy the esteem and confidence of his countrymen. He died in 1688, at Norden, of which he was burgomaster. He wrote several works in Latin, which bear evidence of his familiarity with the writings of Erasmus. His most important work is his Life of Johannes Pictorius. It was probably written in 1686, because it was published at Prahaux in 1628. His native city is J oh. Pictorius
eos, ob ecclesiae veritatis asseritum, apud Holendros primum ommium eustati martyrium. A new edition was brought out in 1649 by Prof. Reinsen of Leyden. See Glaucus, Godgeleer Nederland, I d. blz. 531, 532; Tpej Johannes Pictorius, Kerk, I d. blz. 104, Assentiek. blz. 60 (79); also, Haren roth, Vita Gaphnorum descriptio, in Bibl. Brunse., chris, viss., fasc. i. p. 111 sq.; Herzog, Real-Encyk. xix. 566. (J. P. W.)

Gnath (Gnath, Gnarb), to grate the teeth. Ψιγύω, Acts vii. 54; τριψίω, Mark ix. 18. "To gnash with the teeth," and "gnashing of teeth," are expressions that occur in several parts of Scripture, denoting rage or sorrow (Job xvi. 9; Psa. xxii. 10; Lam. ii. 16; Matt. viii. 12). See TOOTH.

Gnat (Gnata, Vulgat Culex), occurs only in Matt. xxiii. 24, a small two-winged stinging fly, belonging to the genus Culex (Linn. diptera, Latronne culex), which includes the mosquitoes. The common gnat scarcely yields to any insect in regard to the interestiing facts to be proved. The following outlines will recall the chief of them to the reader: the boat-shaped body of eggs, which the parent gnat forms and leaves upon the water, so admirably constructed that, though hollow, it neither becomes...
The weapon with which the gnat or mosquito makes its attack is a long and slender tufted proboscis, projecting from a socket on the mouth like a very fine bristle, and appearing to the naked eye quite simple. Under the magnifying power of the microscope, however, it is seen to be a flexible spear-like sheath of six distinct pieces, two of which are cutting blades or lancets (g), two notched like a saw with reversed teeth (f), a tubular canal (e), and the central one an exceedingly acute point (d). When the attack is made, the gnat brings the tip of the organ within its sheath to press upon the skin, into which it presently enters, the sheath remaining without and bending into an angle as the lancets descend. When the weapon has penetrated to its base—a distance of one sixth of an inch or more—the lancets slide laterally, and then cut the flesh on either side, promoting the flow of blood from the superficial vessels; at the same moment a highly irritant fluid is poured into the wound, which has the effect of diluting the blood, and thus of making it more suitable for flowing up the slender central tube into the throat of the insect. It then sucks, if undisturbed, till its stomach is filled to repletion, leaving a painful tumor accompanied with an intolerable itching. It is the female gnat alone which is noxious; the male, whose proboscis is feathered, has no power of sucking blood.

Gnesen, a town in the Prussian province of Posen, with (in 1885) 15,760 inhabitants. It is believed to be the most ancient town of the former Polish empire. The cathedral church contains the relics of St. Adalbert, the apostle of the Prussians, which were purchased and deposited there by Duke Belaslav 1. Soon after, at the beginning of the 11th century, Gnesen was made the see of an archbishop, Gaudentius, the brother and companion of St. Adalbert, being the first incumbent of that dignity. The archbishops of Gnesen were primates of the Polish church, and the archbishop of Gnesen was created archbishop of the Prussians during the vacancy of the throne. In 1821 the united archbishopric of Posen and Gnesen was organized, the archbishop residing at Posen, but Gnesen remaining the seat of a chapter. See Neher, Kirch. Statistik, vol. ii.

Gnost machi (γνωστής and μίκρον), a name given to those in the 4th century who were the arvored enemies of the Gnostics. A certain rhetorician is said to have formed a sect on the principle that matters of doctrine are indifferent, as no certainty can be obtained as to doctrine; but that a good life is all that is essential to Christianity. "It may be a question whether there was ever a regularly constituted sect professing such indifference to doctrine; whether the fact ever amounted to anything more than this, that individuals at different times and in different places were led by the same opposition and the same tendency of mind to entertain these views, of which individuals of the above-mentioned Rhetoricians may have been one."—Neander, Church History (Torrey's), ii, 702.

Gnostics. See Gnosticism.

Gnosticism. A. Gnostics. The New-Testament writers were occasionally determined in their choice of prominent words by the expressions which were current among the people they addressed. Such words as logos and gnostics, having acquired a peculiar significance in the schools, were recognised by them, and
appropriated to a sacred use. We concede, indeed, that the latter word (γνῶσις) usually denotes in their writings simply what its etymology implies, the mere act of knowing, or the objective knowledge thus acquired. In those primitive times it was seldom that any question of faith was urged, except in the dire straits when Christian truth was demanded. The contest was with reference to the simple facts of the Gospel, and Christianity was fast to secure an existence in the world before it had leisure to speculate upon abstract points. Not only was it unwise to divert men’s minds from practical religious duties by pushing the question of the individual to be intrusted with a higher wisdom. Paul, therefore, and his fellow-laborers determined to confine their apostolic ministrations to such a historical presentation of Jesus Christ and him crucified as might be called the simplest milk of the word. He declares, however (1 Cor. ii. 6), that he sometimes made known a higher wisdom among such as were perfect, though a wisdom, he is careful to say, very different from that which some heathen and Jewish philosophers had claimed. In other passages he applies the word gnōsis to this kírion, and the term impart of knowledge among those peculiar gifts of the Spirit which were possessed by the more eminent teachers (1 Cor. xii. 8), and commends a knowledge through which the more discerning believers rose above the fear of the heathen gods, and ate of the things offered to idols as of the true bread of life (cf. 1 Cor. x. 4). In this exercise of faith, (1 Cor. viii. 7). He speaks also of a gnōsis falsely so called, and thus implies that there was another which truly deserved the name (1 Tim. vi. 20). In subsequent times this use of the word became common, and great pains were taken to make obvious the distinction between the true (γνῶσις) and many a believer was taught the true (γνῶσις). A late (1715) discovered treatise of Irenæus (entitled γνώσις, ἀληθῆ), and an extended description of the true Gnostic at the close of the Stromata of Clement of Alexandria, have preserved to us the views of the Church on this subject near the close of the 2d century.

It was admitted on all sides that there was a knowledge of divine things superior to that of the multitude, not in its importance to the salvation of the soul, but in its intellectual power. It belonged not so much to the personal salvation as to the comfort and growth of believers, and to the acceptance of the Gospel among the more educated classes. It took up those facts which were objects of the common faith, and made them subjects of speculation and profound thought. It endeavored to make these objects of human knowledge, to reconcile their apparent discrepancies with each other and with the conclusions of science, and applied them to long-agoed questions which were only hinted at, but not solved, in the Christian Scriptures. At this point, however, the true and the false gnostics separated, and took different directions. The former submitted itself without reserve to the authority of the Scriptures, and professed never to venture beyond what was written. It presented itself to all men without discrimination of natural talents or social position. It was open to every man to come to the reach of the vulgar, and to be derived from sources superior to the written word. Clement describes the true Gnostic as one who grows grey in the study of the Scriptures. A scientific culture may be indispensable to the higher departments of that study, and a trend which has been known to be attended with a divine grace, but the natural talents which must be used in its acquisition have been given to all, and each one’s success will be propounded to his prayerful diligence. The sources of knowledge, too, were the same for the humblest believer and the most eminent Gnostic. for he had access to the Scriptures and the common tradition (παραδόσεις) which had been transmitted in all the churches. The gnōsis was simply a faith made perfect, an expansion of what faith had received, a building constructed wholly of materials supplied by faith. Its advocates made much use of a passage in Isa. xlii. 9 (Sept.): ‘‘If ye believe not, neither shall ye understand:’’ from which they inferred not only that any one who is capable of knowing is also capable of knowing, but that this knowledge should spring from faith. And yet it cannot be denied that many, especially of the Alexandrian school, gave an undue prominence to this higher knowledge, as if it were indispensable to all religion, and disparaged the great body of believers (πεπιστευκότας) as incapable of a just idea of belief, and to be intrusted with a Christ of an earthly and sensible existence, and as actu- ated only by a fear of punishment and a desire of personal benefits. The true Gnostic, on the other hand, they believed to be favored with such an intellectual faculty for the Gnostics had ceased to exist, and such a perpetual tuition under the divine Logos, that he could dispense, in a great degree, with outward demonstrations; and they claimed that his love of knowledge was so intense and disinterested, that if it could even be separated from his eternal salvation he would not hesitate still to afford all that his in- lightened to expiate were chiefly: God, as he must be conceived of in his absolute being, the incarnation and redeeming work of Christ, the influence of these upon our race and upon other beings, the vast chain of existence between man and God, the fall of some links of their being, and the restoration of the Church, as a part of this world, the source of moral evil and its elimination from the universe, and the future history and destiny of all things. In the discussion of such themes, we need not be surprised to find that they not infrequently transcended the province both of reason and of faith, and that some of their speculations were con- demned by their more temperate brethren (Neander, Hist. i. 544-52; Hase, Hist. § 85; Schaff, Hist. Christ. Church, vol. i, p. 79).

B. Historical Gnosticism.—I. General Character. —The name has been applied to a variety of schools which had sometimes little in common except the assumption of a knowledge higher than that of ordinary believers. Most of them claimed a place in the Church, and complained bitterly when this was denied them; and yet they generally spoke of Christianity as insufficient to afford absolute truth, and not infrequently they assumed a hostile attitude towards it. They seldom pretended to demonstrate the principles on which their systems were founded by historical evidence or logical reasonings, since they rather boasted that these were discovered by the intuitive powers of the human mind, and that the materials thus obtained, whether through faith or divine revelation, were then worked up into a scientific form according to each one’s natural powers and culture. Their aim was to construct not merely a theory of redemption, but of the universe—a cosmogony. No subject was beyond their investigations. Whatever God could reveal to the finite intellect, they looked upon as within their range. What to others seemed only speculative ideas, were by them hypostatized or personified into real beings or historical facts. It was in this way that they conceived the system, of the relation on subjects entirely beyond the range of human knowledge, which started us by their boldness and their apparent consciousness of reality.

II. External Origin.—And yet we have reason to be- lieve that Gnosticism originated in some speculations which were essential and natural. It is not impossible that what seemed to it to come in earlier systems, and then combined these fragments in new relations—not in the way of a crude syncretism, but with mutual affinities and living power. No question, however, has more perplexed those who held that while the direct origin of Gnosticism, we are in possession of scarcely any authenticated documents which have come down to us from persons living at the time and
in countries in which it had its birth. We are dependent for our information respecting it almost entirely upon the representations of opponents, who knew almost nothing of Oriental systems, and were acquainted with it only in its maturity. Unfortunately, too, the attention of the origin of Gnosticism has recently become complicated with others on which violent party feelings have been exercised. Those who have denied the apostolic origin of the epistles in which traces of Gnosticism have been discovered, have felt an interest in the question of the origin of Gnosticism that must at least a period as possible. From the discussion of this subject, however, there are some facts which may now be regarded as incontrovertible. 1. Ever since the conquests of Alexander the Great, an intense interest had been felt throughout Asia Minor and Egypt in Hellenistic philosophy and Interpenetration, and while the old mythologic fables and professed systems of positive revelation had lost their authority, many thoughtful persons had discovered under these what they looked upon as a uniting bond of truth and the elements of a universal religion. 2. The result was that, near the time of the first promulgations of Christianity, a number of new systems of religious philosophy sprang up independently in different countries, and exhibited similar characteristics. They were usually formed by incorporating with the national religion the elements of foreign systems, and softening down what was harsh and incredible in the popular faith and worship. In this way we discover a nearly simultaneous origin of the Judaistic philosophy at Alexandria, of Esseneism and Therapeutism in Egypt and southern Palestine, of the Cabbalistic literature in Syria and the East, and of New Platonism among the Hellenistic nations. These were all offshoots from the same general root, and not necessarily deriving anything original, but unquestionably drawing much assistance from one another. Similar circumstances everywhere called forth similar phenomena with results parallel from their origin, and are thus account for the origin of Gnosticism, and easily reconcile the conflicting views of different writers respecting it. As the early ecclesiastical writers were themselves acquainted almost exclusively with Occidental literature, they were in the habit of ascribing the rise of Gnosticism to the study of Greek philosophy, and especially of Platonism, and they appeal to the cosmogonies of Hesiod and others for the exemplars of the Gnostic speculations. Modern historians, however, have found in most of the Gnostic systems such a penetration of Judaisms, of Oriental and ascetic notions, have been led to infer a direct influence not merely from Alexandrian Judaism, but dualistic Persians, and even from pantheistic Buddhism. There can, in fact, be no question regarding the influence of all these systems. The Platonic doctrines of a God, without distinctions in his nature, withdrawn entirely within himself, intelligible only to the initiated, and that only through the mediation of the Nous, a higher ideal sphere reflecting itself in a lower phenomenal world, a hyle (i.e.) and an undefined dualism between it and God, a fallen spiritual being born from the divine to the sensuous sphere, the derivations of sin from contact with the material element; the Pythagorean doctrine of numbers; the Brahminic doctrine of emanation and hypostatizing of the divine attributes; the Parsee representation of the divine essence as light, of a dualism in which the material is the chief thing, the sensation of evil, a world of matter, and of a good principle in eternal conflict with the prince of darkness; and the Buddhist notions of a God in process of development, of souls longing to be freed from the bonds of matter, and to be united with all sensible things, and reunited with the divine source of life, are all unmistakable, and indicative of their respective sources. We need not, however, suppose that these elements were derived directly from their original sources. The Alexandrian literature, in which most of these elements had found a place, was diffused among the educated classes in all those countries in which Gnosticism flourished, and might have been the mediating agency through which the primitive Gnostic was brought into connection with that of the West. From the heterogeneous combining of such diverse systems, and especially from their contact with the young energies of Christianity, the Gnostic spirit might easily draw forth such materials as suited its purpose. The sources of Gnosticism, however, like those of the Nile, are concealed, and those who imagine they have discovered its principal head not infrequently learn that another remains far beyond. As its friends boasted, there were secret agencies by which truth was conveyed to the elect race under symbols and an outward letter which only initiates could understand. (See Dr. Tattmann, in the Amer. Theol. Review for 1862, p. 565-76.)

111. Classification.—It has been found very difficult to arrange the several Gnostic sects according to any principle of classification. They have been grouped together by different writers according to their origin, and their speculative views. Naander (Hist. Christ. Religion, i. 370-86) divides them into Judaizing and anti-Judaizing Gnostics, according to their agreement or opposition to ancient Judaism. Gieseler (Ecc. Hist. vol. i, § 44) arranges the sects according to their geographical distribution, as Alexandrian, Syrian, and miscellaneous. Hase (Hist. Chr. Ch. § 76) makes four classes, Syrian, Hellenistic, Judaizing, and specially Christian. Similar to this is Matter's division into those of Syria, Asia Minor, Egypt, and the rest of the Roman world (Hist. crit. du Gnost., Basle, 1838) arranges the several sects into three principal classes, according to their relation to the three earlier religions with which they came in contact: 1. Those who combined Christianity with Judaism and heathenism; 2. Those who entirely separated it from them, and opposed it to them; and, 3. Those who combined Judaism and Mithraism with heathenism. This ingenious, and, in many respects, satisfactory division, fails to bring out the historical progress and internal development of the Gnostic systems, and offers no suitable place for Manichaeism. It has, however, found much favor on account of its simplicity, as well as the judicious classification by Niederer, Marheineke (Wechtler. ii, p. 246), Tenennall (Manual of the Hist. of Phil., § 200), and others. Dr. Schaff proposes a classification, according to an ethical point of view, into the speculative and the practical, and according to the influence of the ancient philosophy and libertinism (Hist. of the Chr. Ch. i. 294). It is evident that no classification can combine together a chronological, local, and logical distribution, and hence we shall probably gain something by presenting these separately.

IV. History.—In attempting to give a historical outline of the course of Gnosticism, our object is not so much to present particular details of the several schools, since these will be found, as far as possible, under their several heads in this work, but to indicate in general the order and position of each. Lippincott, in a recent article on "Gnostics, Gnosticism, and Development," endeavors to show that this course of development was a curve which commenced with only a slight departure from orthodoxy, and, after diverging more and more from it, finally comes back again, and subdues the previous position of the Pauline (B. M. Smith in Schaff's History of the Christian Church) has attempted a distinct definition of the three stages of this development. It is difficult to discover in the actual history the regularity of departure and return implied in such a figure, and yet we may derive from it a correct notion of the general direction. In the first stadium we have the Jewish, or the fundamental, and then the several classes who, in their opposition to Judaism, defied nearly all the godless characters of the Old Testament. In the second we have not merely
Old Testament history, but Greek philosophy, a contempt of the common faith, the opposition of the psychic and pneumatic natures, and mystical personifications of speculative ideas. In the third and last stadium this opposition between the pneumatic and psychic natures begins to be modified, and finally, under the influence of Gnostic speculation appears. So it is very nearly that of the more liberal Catholic teachers. It is in this last stadium that we find the greatest difficulty in seeing how the curve approximates with much uniformity the orthodox highway, for some classes of the later Marcionites, and, above all, the Marcionites of the Gnostic speculations. So it is material to be aware of the extreme consummation of Gnosticism.

As there were strong tendencies towards Gnosticism both in Judaism and heathenism, we might reasonably infer that the Gnostics must have been powerfully attracted by Christianity. It is more, however, the current with the essential spirit of that movement to attempt to mould the new system to its fancy than to submit with docility to the exclusive authority of the Gospel. Among the remnants of Oriental tribes in Samaria we are not surprised to find such a man as Simon, who succeeded the Magi in the multitude of cults of the great power of God. It is said that he called himself the creative world-spirit, and his female companion the receptive world-soul. We have here a likeness of the Gnostic doctrine of souls and syzygies. In the tradition of the subsequent Church, this half-mythical figure is often paired with the Godhead, in especial of the Gnostics (Irenaeus, Adv. haer. lib. i, c. xxvii, § 4; Hippol. i, 62 sqq.). During the twenty years which intervened between the first Christian Pentecost and the later epistles of Paul, we know that theosophical speculations were everywhere prevalent in Syria and Asia Minor, and that these were strangely mingled with Christian doctrines. Great freedom was allowed to religious thought, even among the early Christians, as long as the moral and religious life of the people was not perverted. But Paul very soon discovered dangerous tendencies in the churches which he had recently established in Asia Minor. Josephus tells us that Alexander the Great had sent into the provinces of Lydia and Phrygia 2000 Mesopotamian and Babylonian Jews to garrison the disaffected towns there, and we are informed that the inhabitants of that region were upside down in their ideas, and that there was a great deal of Gnostic and Oriental superstitions (Alford, How to use the Epistles, Epistle to the Colossians, Sunday Mag. 1867, p. 829). The errors which he reproved at Colossae were doubtless a curious mixture of Jewish and heathen heresies, but they were of a very ancient historical growth. This forms us (Euseb. Eccl. Hist. iii, 82) that the heretical gnostics did not make its appearance with an uncovered head until after the death of the apostles, but that it previously worked in secret. After all the contentions of various writers on the question how far this error prevailed in apostolic times, there is a general agreement that, while most of the heresies of that period were Judaistic, there was an obvious difference between those reproved in the Galatian churches and those noticed in the epistles to the Colossians and Timothy. The latter are treated much more mildly, and we are to believe that they must have been much less developed and less subversive of the Christian system. They are expressly called (1 Tim. vi, 20) a false gospel, and were characterized by empty sounds without sense and subtle oppositions to the truth, a dispensation of meaning to be interpreted, as the gnostics of the second century, but the manifest gers of Docetic emanations and Gnostic dualism. Immanuel, the author of one of Gnostic speculation (Adv. haer. i, 26) that John was acquainted with Cerinthus, and wrote the fourth gospel to refute his errors. Both he and Epiphanius (Haer. p. 28) say that Cerinthus taught that the world was not made by the Most High God, but by a lower power, or by angels, and that Jesus was an ordinary man, whom the supreme Logos united with him at his baptism, but forsook during his last sufferings, to rejoin him in the future kingdom of temporal glory. So it is that the Gnosticism becomes plainly perceptible, and we can certainly understand a number of passages in John's Gospel and Epistles better if we suppose a reference in them to these and similar errors. The Nicolaitanes are a Apocalypse and the false teachers of the Apocalypse, the Gnostic spirit of Judas Iscariot and Judas of the works. What angels, ridiculed and trampled upon the law that they might insult these limited powers, and thus fell into a strange complication of gross licentiousness and bodily mortifications (Burton, Heresies of the Apost. Age; Potter in they are called themselves simply Gnostics; Kitto's Cyclop., Conybeare, in Conybeare and Howson's Life of St. Paul, note at the end of vol. i. Comp. C. C. Tittmann, De eostis Gnosticas in N. T. frustas quaedam, Leips. 1778; transl. and publ. in Contributions to Foreign Literature, New York, 1827). No sooner had the tradition of the direction of the Church been lost than the Gnostic sects lost their impress, and the Gnostics became so much more prevalent as the speculative interest and numbers of the Gnostics began to increase mightily. Real the commencement of the 2d century, flourished about the same time Basilides in Alexandria and his son Iaids [see BAZILIDUS], the dualistic and ascetic Gnosticism of Saturninus, Celsus, and other Gnostics, but more especially of the Gnostics (Irenaeus, Adv. haer. i, c. xxvii, § 4; Hippol. i, 62 sqq.). During the twenty years which intervened between the first Christian Pentecost and the later epistles of Paul, we know that theosophical speculations were everywhere prevalent in Syria and Asia Minor, and that these were strangely mingled with Christian doctrines. Great freedom was allowed to religious thought, even among the early Christians, as long as the moral and religious life of the people was not perverted. But Paul very soon discovered dangerous tendencies in the churches which he had recently established in Asia Minor. Josephus tells us that Alexander the Great had sent into the provinces of Lydia and Phrygia 2000 Mesopotamian and Babylonian Jews to garrison the disaffected towns there, and we are informed that the inhabitants of that region were upside down in their ideas, and that there was a great deal of Gnostic and Oriental superstitions (Alford, How to use the Epistles, Epistle to the Colossians, Sunday Mag. 1867, p. 829). The errors which he reproved at Colossae were doubtless a curious mixture of Jewish and heathen heresies, but they were of a very ancient historical growth. This forms us (Euseb. Eccl. Hist. iii, 82) that the heretical gnostics did not make its appearance with an uncovered head until after the death of the apostles, but that it previously worked in secret. After all the contentions of various writers on the question how far this error prevailed in apostolic times, there is a general agreement that, while most of the heresies of that period were Judaistic, there was an obvious difference between those reproved in the Galatian churches and those noticed in the epistles to the Colossians and Timothy. The latter are treated much more mildly, and we are to believe that they must have been much less developed and less subversive of the Christian system. They are expressly called (1 Tim. vi, 20) a false gospel, and were characterized by empty sounds without sense and subtle oppositions to the truth, a dispensation of meaning to be interpreted, as the gnostics of the second century, but the manifest gers of Docetic emanations and Gnostic dualism. Immanuel, the author of one of Gnostic speculation (Adv. haer. i, 26) that John was acquainted with Cerinthus, and wrote the fourth gospel to refute his errors. Both.
New Testament. They opposed heathen religions as the work of the devil, and Judaism as the product of an inferior and wrathful deity, who was to be put down by Christ and the revelation through him of the supreme God. Kindred with him were Apelles of Alexander, and his pupils Lucas and Marcus, who approximated still nearer a Christian orthodoxy, though with a singular inconsistency. Tatian, a Syrian, a rhetorician in Rome, during the latter part of his life is said to have fallen into Gnostic errors, and to have prescribed a system of extreme abstinence as the only means of dispensing ourselves from the world. A party of the system was preserved in the church as a schism, called by that of his pupil Severus, continued as late as the 4th century. A class of persons represented by the Clementine Homilies at Rome, and sometimes reckoned among the Gnostics, ought rather to be classed with the Ebionites and Valentinians. We now come in contact with several classes of the Gospels, many of whom, according to Origen, went so far in their opposition to ordinary views that they admitted none to their assemblies who did not curse Christ (Neander, ii, 446 sq.). The whole system of the God of the Old Testament, according to them, was a deception by man, and whoever is represented in the scriptural history as rebelling against it were regarded as saints. Hence some of the worst characters of the Old and New Testament were held in the highest honor. Even Jesus was reckoned among agents of the Jewish Jehovah, who, having no conception of an absolute deity, made of man, and whoever is represented in the scriptural history as rebelling against it were regarded as saints. Those who maintained this position were called Caietines, while such as dissented from such extravagances were distinguished as Sethites. The Peresites, who have recently become known to us through the Philostratus, the latter of which, appear to have approximated much nearer the Catholic doctrine. During the 3rd century Gnosticism appears to have lost its power, for the orthodox party had now attained more scientific precision of thought, and their formulas of faith presented scriptural doctrine in a style consistent with the highest culture of the age. Towards the close of that century, however, arose in the distant East one more attempt to combine Christianity with Oriental theosophy. Manichaeism sprang up in a region where neither Hellenism nor Judaism was familiar; and its object appears to have been the essential evil of evil, the good. It was an attempt to constitute a god of this day by incorporating with the original system of Zoroaster numerous elements taken from a gnosticized Christiani- ness and Buddhism. To Christianity, however, it seems to have been indebted more for its names and symbols than for its essential history or characters. Perseverance and facts taken from an era is that in that system an entirely new significance. Its founder (Mani or Manes, a Magian banished from Persia) discovered many points of agreement between the doctrines of Parseism, Buddhism, and Gnostic Christianity, and endeavored to combine these three systems into one universal religion. He accounted for all things on dualistic principles. His followers were soon driv- en by persecution from their earliest seats, but were numerous during the fourth century in every part of the East, and in Africa, Sicily, and Italy. Many per- sons of noble and influential seat, were attracted by it, but it soon fell into gross licentiousness by its professed exaltation above outward things, and of course lost its place in common esteem, and fell into contempt. Some vesti- tures, however, both of Marcionism and Manichaeism, remained even into the Middle Ages, and by means of the Priscilliansists, the Paulicians, Bogomiles, and the Cathari, transmitted the leading features of Gnos- ticism to distant ages and countries.

Many of these sects can hardly be recognized as within the pale of Christianity. While some of them claimed a place within the Church, and refused to leave it when they were discovered by its authorities, others openly adjured the Christian name. Certain such complete subverters of the essentials of the Gospel as the Carpocratians, Peraeans, Sethites, Cainites, and Manichaeans deserve to be called rather gnostized heathen than Christian Gnostics. In history of the Church they deserve a place only because they, like other heathen, influenced it from without. In a general way it is certain that the history of the Church has been the history of the Church and Gnosticism, except in the singular position. Indeed, no history of this system is quite complete without embracing some still more remote systems — Cabbalistic Judaism, Neo-Platonism, etc., which had their origin under Gnostic influences.
born) of the Ophites. He came into being from the commingling of the light-nature in the Sophia (the πνευματικόν στίγμα) with matter. As the fruit of such a parentage, he was possessed of a nature neither psychical nor material, but psychical, and he occupies an intermediate position between the supreme God and the material world. He is not, of course, an evil, but only a limited and imperfect being, and yet evil springs from the defects of his work and of his plans. He acts in general according to his own will, but the plan by which he was transformed into an organized universe. The planetary heavens, and the sidereal spirits who are over them, and the whole course of the world, are under his control. In all this, however, he is the unconscious instrument of higher powers in the world of light, who secretly influence all his movements. Of this control he finally and gradually became aware, and by some teachers he is said to have become vexed and goaded into opposition by the discovery, and by others to have gladly welcomed and submitted to it. He was the author of Judaism, and the successor of the Mandaeus, and hence by many Gnostics the former system was looked upon as defective, if not false, and even the latter, especially in its mere letter, as incapable of imparting the highest wisdom. Only by Marcion was he regarded as entirely independent of the supreme God in their conflict; the rest of his life, to the end, was a burden and a provocation, and he was banished to a department which belonged wholly to him. He remained the God of this world until the coming of Christ, who vanquished him at the crucifixion.

4. With respect to anthropology, the Gnostics held that the world was created by a fallen God. He was himself the creature of a fallen soul, and the world he created and rules is subject to imperfection. From his connection with matter there was produced a human race, which in its totality is a microssom, representing within itself the three principles of the great universe, the light, the darkness, and matter. This was in consequence of the creation of three classes of men, higher or lower in proportion to their freedom from matter. Marcion alone made this distinction dependent upon the will of man himself; the other Gnostics made it a result of creation, or of a divine communication, or some part of light and life from the upper world. The highest of these, i.e., the spiritual (πνευματικόν), share largely in the nature of the lowest soul (σοφία), who originally fell from the Pleroma, and hence they are the only ones who can attain perfection in the world of light, are capable of mingling and receiving the light which is communicated from above.

The second class, the psychical (ψυχικόν), have the nature of the Demiurge himself, who has power to raise them to some extent above the debarment of matter, and, by giving them legal form, to impart to them a legal righteousness, but not to afford them a recognition of those divine mysteries which are beyond his own reach. The third class are the fleshly or hylic (σαρκικόν, ζωοικόν) natures, in whom matter has usurped a human form and passion (σαρκογούς), has entire control, and who are therefore destined to share the former natures. The psychical are capable of renaissance, spiritual predominating under the Christian dispensation, the psychical under the Jewish, and the fleshly among the heathen of all ages. Individuals, however, of each class are numerous under all these dispensations. In the last-mentioned spirit of ancient Platonism, many of the Gnostics allowed of no transition from the one to the other of these classes, while others looked upon it as possible for the lower to rise to the higher in consequence of a divine communication of special powers. 5. The Gnostic idea of redemption was simply that of a liberation of the light-spirits from its contact with matter. Of course it is confined to the two higher classes of our race in whom that spirit is found. In every condition of humanity, some favored individuals are represented as sighing for deliverance. In this way were explained some glimpses of a higher knowledge, which break forth at intervals in the prophecies and psalms of the Jewish Scriptures, and in the writings of pagan philosophers. Some sparks of light were supposed to have been thrust into the breasts of noble persons, and the rational creation, as a whole (προδόσης), is represented as sighing for redemption (Rom. viii, 22).

A recently discovered work (Pistis Sophia) contains the penitential sighings and longings of the soul of the man who has himself fallen from her original condition of divine intuition to the world of flesh. In pity for this sighing spirit, Christ, one of the highest of all the souls, descends, and brings her, after innumerable sufferings, back to the Pleroma, and undertakes the deliverance of all pneumatic natures. To accomplish this, he assumes, not a material form, since he can have no contact with matter, but only the appearance of one. In answer to the longings of the Jews, the Demiurge had promised and actually sent among them a Messiah with only psychical powers. Most of the Gnostics suppose that the heavenly Christ (Soter) took the form of a man who had a lower himself unable to accomplish what had been promised in his behalf, and that from the baptism by John until the crucifixion this true Redeemer acted through this personage. Some, however, held that the man Jesus, with whom the son Christ then became connected, in the name of the united God, and he was henceforth endowed with the powers of an astral spirit. As this Christ cannot suffer, everything in him which seemed like it, or like any imperfection, was either a doctric illusion, or wholly in the human personade with which he was united. This work of Christ, however, commenced not wholly with the life of Jesus, but, to some extent, with creation itself, in which the Redeemer inspired the unconscious Demiurge with many divine ideas, and during the whole process of the world's government he is drawing carnal spirits to himself, and making the error of the world an object of redemptive work. In the second, the psychical natures, capable of redemption will be gathered and raised to the Pleroma. Valentinus supposed that all psychical natures are destined to a lower degree of blessedness in a peculiar kingdom of the Demiurge. Matter with all fleshly natures will either be consumed by its own powers, or sink back into its original condition of utter deadness and absolute separation from all light, all life, and all feeling. The sources from which the Gnostics professed to derive their knowledge were, (a.) Tradition, not so much that of the Church, which they generally looked upon as unphilosophical, and fit only for the multitude, but that which was said to have been communicated by Christ to a narrow circle of cerebral spirits, and by them transmitted to others. Marcion alone made this tradition accessible to all. (b.) The ordinary Christian Scriptures were only partially received among them. Marcion and the more strenuous Judaistic Gnostics entirely rejected the Old Testament, and the more orthodox rejected the spiritual parts of the Pneumatic, psychical, and hylic elements. Many of them disregarded portions of the New Testament also, while others accepted only of Paul's writings and an expurgated gospel of Luke. (c.) Other writings of the evangelists were highly esteemed belonging to particular sects. Thus Marcion's writings were most cherished among his followers, and the prophecies of Cain and of a pretended seer named Parchor among the followers of Basilides, and the apocryphal books of Adam, Enoch, Moses, Elias, Issiah, Baruch, and others. (d.) Even the writings of the heathen philosophers were much used by some, who, by a course of allegorical explications, like those which they applied to the Scriptures, discovered ineffable mysteries under the most unpromising outward letter. 7. With the
exception of the followers of Manes, we have no evidence that the Gnostics ever attempted a distinct ecclesiastical organization. Many of them were never excluded from the orthodox churches, within which they only sought to form schools and social circles. They practised baptism, and believed that in this rite, as in the baptism of C. T. H. 6, the spirit of life was abundantly imparted, and the human spirit was emancipated from the power of the Demiurge. Most of them were inclined by their poetical fancies and their love of symbols to a gorgeous style of worship, but the ascendancy of the Church and the Church's neglect as useful only to such as were on the ground of mere faith. 8. Their ethics and practical morality were usually dependent upon dualistic principles. Among the Hellenistic Gnostics it took the form of a struggle against matter, which not infrequently ran into asceticism. The use of charms and astrological practices. The Oriental Gnostics, on the other hand, are said in many instances to have plunged into immorality, sometimes with the view of showing their contempt for the Demiurge and his laws, or because they regarded the body as an insubstantial thing to a spirit subject to the supreme God, and subject to no inferior law. Saturninus, Marcion, and Manes rejected marriage; but many Gnostics not only submitted to it, but looked upon it as the highest law of pneumatic natures. We have no evidence that the standard of morality was lower among the Gnostics generally than among orthodox Christians in general.

One is amazed at the boldness, the fanciful nature, and the high pretensions of Gnosticism. In the course of a century and a half it comes and goes before us like a splendid vision. And yet its influence upon Christianity was profound and permanent. It gave occasion to a great expansion of Christian thought, to a clearer idea of the historical relation of Christianity to earlier and surrounding religions, and to a better definition of the basis of true faith. It deserves a more careful study than it has usually received. The violation of the law.

VI. Literature.—The original authorities are the ecclesiastical writers of the period generally, but especially Irenæus and Epiphanius, Ado. hæresis; Tertullian, De praescr. her., contra Gnost. scorp., ad. Valentinianos, ad. Marcionem; Hippolytus, Karo sive. H up. Zëgòs, and the Philosophy. Hippolytus is generally regarded as the author of the Doxa Gnostica; Quadratum is a long work translated from a Greek work by the father of Petermanus (Berolin, 1851); Cerdus Nazarenus (ed. by Norberg, and sometimes called the Bible of Gnosticism); Barbrienses Gnostici Syrum virum primam Hymnologiam, and Antitheses Marcionis Gnosticæ (two Gnostic works published by Aug. Hahn, Leipzig, 1819, 1823); and the Neo-Platonist work of Plotinus, Hicr. r. yewreusiv (Emend. ii. lib. ix). The English reader can gain access to many of these ecclesiastical writers by means of the Ante-Nicene Chr. Lib., edited by Drs. Roberts and Donaldson, now in course of publication at Edinburgh.

GOAD, the largest of the Portuguese possessions in India, embracing the provinces of Saffete and Kaniska and six islands. Its population was, in 1869, about 264,000, of whom two thirds were Catholics, with Roman Catholic Church. The city of Goa, the capital of Portuguese India, is the seat of an archbishop. The jurisdiction of the archbishop of Goa has been in modern times the subject of a violent dispute between the popes and the kings of Portugal. See Portugal.

Goad (γάος, malnad'), an instrument for guiding: the Greeks, the taxo (βιβλίον, i. c. v. 139, also βιβλίον, or simply κιβρόν); see Schöttgen, De simulato buno, Francol. 1717; Hager, De ποιος κιβρόν λαξεύεται, Lips. 1738. "Shamgar, the son of Anath, slew of the Philistines six hundred men with an ox-goad" (Judg. iii. 31). Maenardes gives us the account of the ox-goad, which is no doubt the same as that used in the days of Shamgar. "At Khan Leban the country people were now everywhere at plough in the fields in order to sow cotton. Two observable in that in ploughing they used goads of an extraordinary size; upon measuring several I found them to be about eight feet long, and at the bigger end six inches in circumference. They are armed at the lesser end with a sharp prickle for driving the oxen, and at the other end with a small spade or paddle of iron, strong and massive, in order to clear the plough from the earth, that encumbers it in working" (Journal of a Journey from Aleppo to Jerusalem, p. 110). This was in the north of Syria. Prof. Hackett says, "The ox-goads that I saw in the south I should judge to be Zewsiin made, of such an instrument, wielded by a strong arm, would do no mean execution. It is easy, therefore, to credit the account of Shamgar's achievement. We may suppose, however (so fragmentary is the notice), that he was not entirely alone; that some others connected with his service of labor as they could snatch at the moment" (Illustrations of Scripture, p. 155). See Agriculture.

In the other passages where the word "goad" occurs it is the representative of a different term in the original; τῆς, d'orban', something pointed (1 Sam. xiii, 21), or της, d'orban', d'orban' (Eccles. xii, 11), which is, perhaps, properly the iron point to which the rod or handle, denoted by the previous term, was fixed. This, at least, is the explanation adopted by Jahn (Archaeol. s. v. 394). According to others, it may refer to anything pointed, and the tenor of Eccles. xii means the sense of a peg or nail—anything, in short, which can be fastened; while in 1 Sam. xiii the point of the plough-iron is possibly indicated (which is Zewsiin made, of a spear, and Vulg. at Judg. iv της ἀργυραμονίου, onomat.), There are undoubted references to the use of the
goad in driving oxen in Plutarch, xxxviii, 25, and Acta xxi, 14. The expression "to kick against the goads" (Acts ii, 5; A. V. "the pricks") was proverbially used by the Greeks for unavoidable resistance to superior power (comp. Eschyl. Agam. 1633; Prom. 928; Eurip. Bacch. 791). The same means of inciting animals to greater speed is probably alluded to in 2 Kings iv, 24. (See generally Buckingham, Travels in Palestine, i, 81; Kitto, Bibl. Bibl. iii, 41; Thomson, Land and Book, i, 501.) See Ox.

Goad, Thomas, D.D., a learned English divine, was elected to King's College, Cambridge, in 1592. He became rector of Milton, Cambridgeshire, and after wards, successively, prebendary of Winchester and Canterbury, preacher of St. Paul's, rector of Nettle, Essex, and vicar of Sudley, Suffolk. He died in 1598. He was one of the deputies to the Synod of Dort in 1618, as a Calvinist, but he afterwards altered his opinions. His principal works are, A Disputation concerning the Contingency of Events in respect of God's eternal Decree (to be found in the Cambridge Tracts, and in Wunneck, Revisc. of False Principles).—Darling, Cyclo. Bibliog. Soc., i, 1726.

Godby, Robert, a printer and publisher of Sherborne, Dorsetshire, who died in 1778. He compiled and published a commentary under the title An Illustration of the Notes of Dr. Baxter on the O.T., etc. (Leeds, 1754-75, 6th ed. 3 vols. fol.). Dr. A. Clarke says of it that, "while it seems to be orthodox, it is written entirely on the Ariean hypothesis." Selten wrote a reply to it (London, 1765, 12mo.).—Darling, Cyclo. Bibliog. Soc., i, 609; Allibone, Dict. of Authors, i, 821; Home, Bibliog. Appendix, v, 72.

Goar, Jacques, a French Dominican monk, was born at Paris in 1601. He entered into the order of Preaching Friars in 1619, and taught rhetoric in several houses of the Dominicans for some years. He was then sent on a mission into the Levant, and lived eight years at Chios, where he made the doctrine and ceremonies of the Greek Church the subjects of his investigation, and then came to Rome with many collections of MSS., etc. In 1647 he published at Paris, in Greek and Latin, his Eikologon, Eukologicon sive Ritualae Grecorum (Paris, 1647, folio; Venice, 1780). For the history of the liturgies, this is a very valuable and useful work. Goar died at Amiens in 1655. See Échar, Script. Ord. Pred. vol. ii; Hoefer, Nouv. Bio. Générale, xx, 860.

Goar, St., a French anchorite, was born in Aquitaine about the year 866. The legend says that, after being ordained priest, he devoted himself to the propagation of Christianity, and left his church to retire to the neighborhood of Oberwesel (Germany), where he erected a small chapel (at the place since called St. Goar), beside his cell, to receive pilgrims, and succeeded in converting a large number of heathens. Some of his enemies, having accused him as "an impostor and a man fond of good living" to Rusticus, bishop of Treves, he cleared himself by performing several miracles. Siegfelt 111 offered to appoint him bishop in the place of Rusticus, but Goar preferred remaining in his humble position. He died July 6, 869, and was buried in the small chapel he had erected at Spilin and Eusebush, two of Siegfelt's priests. The Church of St. Goar, on the Rhine, was dedicated to him in 1768. See Hoefer, Nouv. Bio. Générale, xx, 895. (J. N. P.)

Goat, an animal of the genus Capra, found in every part of the world, and easily domesticated. There are various species or apppellations given to this in the original text of the Scriptures. See CATTLE.

1. Most frequently γάτα, generally said to denote the she-goat (as it is rendered in Gen. xxv, 9; xxx, 55; xxxii, 38; xxxii, 14; Num. xxv, 27), and in several passages undoubtedly so used (Gen. xxxii, 58; xxxii, 14; Num. xxv, 27; Prov. xxvii, 27); but it is equally certain that it is used also to denote the he-goat (Exod. i, 17; xxv, 9, 10. 14).

2. In Judges vi, 19; xiii, 15, 19; xv, 1; 1 Sam. xxxvi, 20 (1 Kings xxxii, 27; 2 Chron. xxvii, 2) it is used of a male and female goats, or rather a pair of either the male or the female animal (Gen. xxvii, 16; xxx, 55; xxxii, 38; xxxii, 51; Lev. i, 10; iii, 12; vii, 22; xxix, 19; 1 Sam. xxv, 2; 1 Kings xx, 27). It is used also to designate a kid (as rendered in Gen. xxxvii, 17, 20; Num. xi, 11; Judg. vi, 19; x, 23; xxvii, 39, 15; xxvi, 1; 1 Sam. xxxvi, 20 (1 Kings xxxii, 27); 2 Chron. xxvii, 2). From this we are led to conclude that properly it is the generic designation of the animal in its domestic state, a conclusion which seems to be fully established by such usages as ἱππος ἡ γάτα, a kid of the goats, ἱππός οἱ γάται, a flock of "goats," i. e. any of the goat species (Gen. xxvii, 6; Deut. xiv, 4). Bochart (Hieros. bii, c. 21) derives the word γάτα from γαί, os, strength; Gesenius and Fürst prefer tracing it up to ἱππος, an ox, to become strong; in either case the ground-idea is the super ior strength of the goat as compared with the sheep; Syr. ose; Arab. owsas (where the w represents the rejected r of ἱππος); Phoen. os, of which oza or ozas is the feminine form. Whether there is any affinity between this and the Sans. aga, fem. oṣ, Gr. αἴξ, αἷος, Goth. aλuun, and our goat, may be doubted. In the Sept. γάτα is usually represented by αἴξ, in a few instances by ἵππος; and when γάτως is used elliptically to denote goat's hair (as in Exod. xxxvi, 7, xxxvi, 16, 17; Num. xxv, 1; Deut. xxvii, 21; xxvi, 18; 1 Sam. xix, 13) it gives the strange rendering ἰππός ῥοιος αἴξων, reading ῥοίος for ῥοίος (comp. Joseph. Ant. vi, 11, 4). See BOSTER.

3. The next most frequent term is ἵππως, attad, which is used only in the plur. ἵπποι. In the A.V. it is translated sometimes "rams" (Gen. xxxi, 10, 12), often "he-goats" (Num. vii, 17-88; Ps. i, 9; Isa. i, 11; Jer. ii, 40; Ezek. xxxiv, 17), but usually simply "goats" (Deut. xxvii, 14; Ps. i, 13; Ixiv, 16; Prov. xxvii, 16; Isa. xxxiv, 8; Ezek. xxvi, 21; xxxiii, 18; Zech. x, 8). The singular occurs frequently in Arabic atted, and is defined in the Kemus la a young goat of a year old (Bochart, Hieros. bii, c. 58, p. 646, where other authorities are adduced). The name is derived from "τῃσ, attes, to set, place, prepare, and hence Bochart infer, describes the animal as fully grown, and fit for its functions and uses; for in its fourth month it is of full growth; but not four months old; while others think no more is implied by the name than that this animal was strong and vigorous. The attadim were used in sacrifices (Psal. lxvi, 15), and formed an article of commerce (Ezek. xxxiv, 26). In Jer. i, 8, the word is employed for the leaders of a flock ("chief ones"); and in Isa. ix, 9, and Zech. x, 3, it is used metaphorically for princes or chiefs. See θρατ. 8. ἵππως, gezi, is the young of the goat, a kid. The name is derived by Fürst from the obsolete verb ἱππάω, to crop, and so it is equivalent to the Latin inform; but was afterwards restricted to one kind, that of the goat. Gesenius traces it to θτς, ἱππάω, to crop, and supposes the name was given to it from its cropping the herbage. Both etymologies are purely conjectural. The phrase ἱππος οἱ γάται, kid of the goats, is frequently used. See above. The reason of this Kimmich finds in the generic sense of ἱππος, as applicable originally to the young either of the sheep or goat, so that it required the addition of ἱππος to specialize its meaning, until it came by usage to denote only the latter. Ibn-Zaar thinks the addition was made because the gezi, being yet tender, could not be separated from its mother. The flesh of the kid was esteemed a delicacy by the Hebrews (Gen. xxvii, 9, 14, 17; Judg. vi, 19; xiii, 15, etc.).—Kitto. See KID.
4. הָעַב, sàvî, signifies properly a he-goat, being derived from הָעַב, to stride, i.e. the shaggy ('he-goat'), only 2 Chron. xxix, 23; 'goat,' in Lev. iv, 24; ix, 15; x, 16; xvi, 7-27; Numb. xxviii, 22; xxix, 22-38; Ezek. xiii, 23; 'säyîr,' in Isa. xiii, 21; xxxiv, 14; 'devil,' in Lev. xvii, 7; elsewhere 'kid'). It occurs frequently in Leviticus and Numbers (הָעַב הָעַב), and is the goat of the sin-offering (Lev. ix, 8, 15; x, 16). The word is used as an adjective with הָעַב in Dan. viii, 21, "and the goat, the rough one, is the king of Javan," and also in Gen. xxvii, 11, 28, "a hairy man." See SATHIR. The fem. הָעַב הָעַב, seriûkh, a she-goat, likewise occurs ('kid,' Lev. iv, 28; v, 4). See SACRIFICE.

5. הָעַב, tešphir, occurs in 2 Chron. xxix, 21, and in Dan. viii, 8, 9; it is followed by הָעַב, and signifies a 'he-goat' of the goats. Gesenius derives it from הָעַב, tešphir, to leap, indicative of the sex. It is a word found only in the later books of the O. T. In Ezra vi, 17, we find the Chaldee form of the word, הָעַב, tešphir.

6. הָעַב, to'isîrâ, a buck, is from a rootשׁי ע, to strike. It is invariably rendered 'he-goat' (Gen. xxx, 83; xxi, 15; Prov. xxx, 31; 2 Chron. xvii, 11).

7. In the N. T. the words rendered goat in Matt. xxv, 32, 33, are ιπόβωλος and ιππόβωλος a young goat or kid; and in Heb. ix, 12, 13, 19, and x, 4, ραψως — a goat. Goat-skins, in Heb. xi, 37, are in the Greek αίγας δερματα; and in Judg. ii, 17, αίγας is rendered goats.

8. For the undomesticated species several Heb. terms are employed: (1) הָעַב, goâit, only in the plur. הָעַב, wild or mountain goats, rendered "wild goats" in the passages of Scripture in which the word occurs, viz. 1 Sam. xxiv, 2; Job xxxix, 1; and Isa. civ, 15. The word is from a rootשׁי ע, to ascend or climb, and is the Heb. name of the ibex, which abounds in the mountainous parts of the ancient territory of Moab. In Job xxxix, 1, the Sept. have γαλαζάφων νυμφήν. In Prov. v, 19, the fem. הָעַב, goâlah, 'tame' occurs. See ROZ. (2.) הָעַב, zekk, rendered wild goat in Deut. xiv, 5, and occurs only in this passage. It is a contracted form of הָעַב, according to Lee, who renders it pizzle, but it is probably larger, more nearly approaching the tetruglyphus or goat-deer (Shaw, Supplement, p. 76). See Wild Goat.

9. Other terms less directly significant of this animal are, (1) הָעַב, chazîph; a flock, i.e. little flock: "two little flocks of kids" (1 Kings xx, 27); and (2.) הָעַב, zekk, one of the flock of sheep and goats mixed (Lev. xxii, 28, and frequently 'goat' or 'kid' in the margin). See FLOCK.

10. For the הָעַב, AAZEEZ ('scape-goat,' Lev. xvi, 8, 10, 26), see AAZEEZ.

The races either known to or kept by the Hebrew people were probably, 1. The domestic Syrian long-eared breed, with horns rather small and variously bent; the ears longer than the head, and pendulous; hair long, often black. 2. The Angora, or rather Anadoli breed of Asia Minor, with long hair, more or less fine. 3. The Egyptian breed, with small spiral horns, long brown hair, very long ears. 4. A breed from Upper Egypt, without horns, having the nasal bones singularly developed; the nose contracted, with the lower jaw protruding the incisors, and the female with udder very low, and purse-shaped.

There appear to be two or three varieties of the common goat (Hircus agaprus) at present bred in Palestine and Syria, but whether they are identical with those which were reared by the ancient Hebrews it is not possible to say. The most marked varieties are the Syrian goat (Capra Mammallia, Linn.), with long, thick, pendant ears, which are often, says Russell (Nat. Hist. of Aleppo, ii, 150, 2d edit.), a foot long, and the Angora goat (Capra Angora, Linn.), with fine long hair. The Syrian goat is mentioned by Aristotle (Hist. An. ix, 27, § 3). There is also a variety that differs but little from British specimens. Goats have from the earliest ages been considered important animals in rural economy, both on account of the milk they afford and the excellency of the flesh of the young animals. The goat is figured on the Egyptian monuments (see Wilkinson's Ancient Egypt, i, 223). Col. Ham. Smith (Griffiths, An. King. iv, 308) describes three Egyptian breeds: one with long hair, depressed horns, ears small and pendent; another with horns very spiral, and ears longer than the head; and a third, which occurs in Upper Egypt, without horns. Besides the domestic goats, Western Asia is possessed of one or more wild species—all large and vigorous mountain animals, resembling the ibex or bouquetin of the Alps. Of these, Southern Syria, Arabia, Sindi, and the borders of the Red Sea contain at least one species, known to the Arabs by the name of Beden or Bedan, and Tastal—the Capra Jela of Ham. Smith, and Capra Sinaitica of Ehrenberg. We take this animal...
to be that noticed under the name of ḫaṭ, γαστ or γαλ (1 Sam. xxiv, 2; Job xxxix, 1; Ps. civ, 18; Prov. v, 19). The male is considerably taller and more robust than the larger he-goats, the horns forming regular, curved backwards, and with from 15 to 24 transverse elevated cross-ridges, being sometimes near three feet long, and exceedingly pious: there is a beard under the chin, and the fur is dark brown; but the limbs are white, with regular black marks down the front of the legs, with rings of the same color above the knees and on the pasterns. The females are smaller than the males, more slenderly made, brighter rufous, and with the white and black markings on the legs not so distinctly visible. This species lives in troops of 15 or 20, and plague these precincts with the same fearless impiety that distinguishes the ibex. Their horns are sold by the Arabs for knife handles, &c.; but the animals themselves are fast diminishing in number. See IBEX.

Wild Goat of Sinai.

In Deut. xiv, 5, ḫaṭ, ḫak is translated "wild goat." Schultens (Origenis Hebraicos) conjectures that the name arose from its shyness, and Dr. Harris points out what he takes to be a confirmation of this conjecture in Shaw's travels, who, from the translations of the Sept. and Vulgate, makes it a goat-deer or tragelaphus, under a mistaken view of the classification and habitat of that animal. ḫak, therefore, if it be not a second name of the zemer, which we refer to the kebeh, or wild sheep [see CAMEL], as the species must be sought among ruminants that were accessible for food to the Hebrews, we should be inclined to view as the name of one of the gazelles, probably the ahu (Aust. Subgutturosus), unless the Abyssinian ibex (Copa Walle) had formerly extended into Arabia, and it could be shown that it is a distinct species. See WILD GOAT.

From very remote antiquity goats have formed an important part of pastoral wealth in the East. They are not mentioned by name in the enumeration of Abram's possessions (Gen. xii, 16), nor in those of Job (Job i, 8; xliii, 12); but perhaps they are included under the generic term of "flocks," which Lot (Gen. xxxi, 5), and a fortiori, Abram possessed; and a she-goat formed part of the sacrifice offered by Abram on the occasion of the promise of Isaac (Gen. xv, 9). In the account of the miraculous liver of food (Exod. xxxvii, 27); their flesh was eaten (Deut. xiv, 4; Gen. xxviii, 9); their hair was used for the curtains of the tabernacle (Exod. xxvi, 7; xxxvi, 14) and for stuffing bolsters (1 Sam. xix, 18); their skins were sometimes used as clothing (Heb. xi, 37). Notwithstanding the offensively nauseousness which causes it to be significantly sep-
arated from sheep, the goat was employed by the people of Israel in many respects as their representative. It was a purificatory food sacrifice (Exod. ii, 22); a kid might be substituted as equivalent to a lamb: it formed a principal part of the Hebrew flocks, and both the milk and the young kids were daily articles of food. Among the poorer and more sober shepherd families, the slaughter of a kid was a token of hospitality to strangers, or of unusual festivity; and the prohibition, thrice repeated in the Mosaic law, "not to seethe a kid in its mother's milk" (Exod. xxiii, 18; xxxiv, 26; and Deut. xiv, 21), may have originated partly in a desire to recommend abstemiousness, which the legislators and moralists of the East have since invariably enforced with success, and partly with a view to discontinue a practice which was connected with idolatrous festivals, and the rites they involved. It is from goat-skins that the leatheren bottles to contain wine and other liquors are made in the Levant. For this purpose, after the head and feet are cut away, the case or hide is drawn off the carcass over the neck, without opening the belly; and the extremities being secured, it is dried with the hair in or outside, according to the use it is intended for. The old worn-out skins are liable to be treated with the old-fashioned preparation of drawing new wine into new bottles (Matt. ix, 17). Harmer (Obs. iv, 162) appears to have rightly referred the allusion in Amos iii, 12 to the long-eared race of goats: "As the shepherd taketh out of the mouth of the lion two legs or a piece of ear, so shall the children of Israel be as sheep in the fields."—Kitto. The passage in Cant. iv, 1, which comprise the hair of the beloved to "a flock of goats that eat of Mount Gilead," probably alludes to the fine hair of the Angora breed. In Prov. xxx, 31, a he-goat is mentioned as one of the "four things which are comely in going," in allusion, probably, to the stately march of the leader of the flock, which was always associated in the minds of the Hebrews with the notion of dignity. Hence the metaphor in Isa. xiv, 9, "all the chief ones (margin, "great goats") of the earth." So the Alexandrian version of the Sept. understands the allusion to τρίγυς τηφάναμος σώματων (comp. Theor. Id. viii, 49; Virgill, Eccl. vii, 7).—Smith. Goats, from their offensiveness, mischievous and libidinous disposition, etc., are symbols of the wicked, who are, at the day of judgment, to be finally separated from the good (Matt. xxv, 32). See SHEEP.

From Lev. xvii, 7, it appears that the rebellious Hebrews, while in the desert, fell into the idolatrous worship of the he-goat (rendered "deriv", comp. 2 Chron. xii, 15), after the example of the Egyptians, under whose influence their nation had grown up. Herodotus says (i, 46) that at Mendes, in Lower Egypt, both the male and female goat were worshipped; that the god Pan had the face and thighs of a goat; not that they believed him to be of this figure, but because it had been customary to represent him thus. They paid divine honors, also, to real goats which appeared in the table of Iis. The Stairim ("wild beasts") of Isa. xiii, 21 were, according to the popular notion, supposed to be wild men (see APE) in the form of he-goats, living in unrequited, solitary places, and represented as dancing and calling to each other.—Calmet. See SPECTRE.

A he-goat was the symbol of the Macedonian empire in the prophetic vision of Daniel (chap. viii, 5)—

Coin of Archelaus, king of Macedon.
Goath (Heb. id. Ṣib and Ṣib, a ψιθ, Sept. Γοαθ v. r. Ἡθ and Ψιθ, Vulg. Gob), the scene of two of David's encounters with the Philistines, in the former of which Sibbechah slew the giant Saph, and in the latter Elhanan slew the brother of Goliath (2 Sam. xxii, 18, 19). In the parallel passage (1 Chron. xx, 4) it is called by its more usual name Gath (2 Sam. xxii, 13; 1 Chron. xx, 6), and which, from the terms of the narrative, seems to have occurred at the same place as the others. The suggestion of Nob—which Davidson (Hebr. Text.) reports as in many MSS., and which is also found in the Compl. ed. of the Sept.—is not admissible, on account of the situation of that place. See David.

Goat. See Locust.

Gobel, Jean Baptiste Joseph, a Roman Catholic bishop of France, was born in 1727 at Thann, in Upper Alsace. He was educated in the College Germanicum in Rome, became canon at Poretnry, Switzerland, and in 1772 bishop in part of Ljubljana, and chancellor of the archbishop of Ljubljana. In 1789 he went as a delegate of the clergy to the Etats Généraux, allied himself with the Jacobins, became constitutional bishop of Paris, Upper Marne and Upper Rhine, voted on November 7, 1793, for the abolition of Christianity, and laid down his ecclesiastical dignities in the hands of the Convention. Having fallen into disfavour with Robespierre, he was executed April 13, 1794. (A. S. J.)

Goblet (грог, ogrom, prop. a trough for washing garments, hence a larger; Cant. vii, 2, where it is described as being round; elsewhere a sacrificial baín, Exod. xxiv, 6, or pénail drinking cup, Isa. xxiii, 24). In form and material these utensils were probably like those found in the Egyptian ruins, some being of gold or silver, others of bronze, porcelain, and even wood. See Bowl; Basin, etc.

Gobolitas. See Gerbal.

Goch, John of, more properly John Epaper, was born in the little city of Goch in the beginning of the 16th century. Dissatisfied with the Church of Rome, he, like some others at that time, wished for a reformation, and insisted on the free use of the Scriptures. There is no accurate history of his life; all that is known is that he established an order of canonesses at Meчин in 1451, attempted to introduce reform in the convents of that place, and for twenty-four years acted as father confessor of the deaconesses at Thabor. He died March 28, 1475. He was a man of great piety, and, though less vigorous than his friend Wessel, he was a better theologian than Thomas à Kempis. His principal works are, De Libertate Christiana, edited by Corn. Graepheus (Antw. 1521), and Dialoqà de quatuor erroribus circa legem evangelicam existit, in Walch's Monumenta mediæ ævi. The writings of Goch contain many reformatory ideas. He demanded that the Bi
GOD

bles should chiefly be explained by itself, and laid great stress on love, on living pietly, and especially on evangelical freedom. As an obstacle to the latter, he regarded the episcopal dignity, with its hierarchical elevation, above the priestly, which, in his opinion, was the highest in the Church. An excellent sketch of Goch, and of his relations to theology and Church reform, is given by Ullmann, *Reformers before the Reformation*, i, 17-157; Herzog, *Real-Encyclop.* v, 220 sq.

GOD, from the same Saxon root as good, thus beautifully expressing the divine benignity as the leading attribute of the highest and most general term of divinity, and corresponding almost invariably to two Hebrew words, both from a common root (םְדִּי, צְדִי, to be strong). Hengstenberg, however, regards the simpler of these words (םְדִי, El) as a primitive (Auth. of Pent. i, 251), while some consider the extended form (םְדִּי, Eloah) as derived from a different root (the obsolete מְדִי, found in Arabic = to worship). The corresponding Semitic terms are: Arabic, Al or Allah (q. v.); Syriac, El or Eloah; Samar. El or Elah (= powerful); Castall, in Wyclif and the earliest English Bible, v. I, v. (v.); Phoenician El ( перед, or a), and in En-El (= El Hen, Gag-el (Galilus, הגאל), Eloah (Sanchoh). See also *Almighty*.

The only other Hebrew word generally employed in naming the Supreme Being is Jehovah, יהוה, which some (Hävernick, *Historische-Kritische Einleitung ins alte Testament*, Berlin, 1889) propose to point as **י-וה**. Jahweh, meaning "the Existing One," holding that Elohim is used merely to indicate the absolute and super-richeress contained in the Divine Being. With such, therefore, Jehovah is not of the same origin, or the same original as the heathen *Jove*, but of a strictly peculiar and Hebrew origin. Both names are used by Moses indiscriminately, in strict conformity with the theological idea he wished to express in the immediate context; and, pursuing the Pentateuch nearly line by line, it is astonishing to see that Moses never uses any of the names at mere random or arbitrarily, but is throughout consistent in the application of the respective terms. Elohim is the abstract expression for absolute Deity apart from the special notions of unity, holiness, subsistence, etc. It is more a philosophical than devotional term, and consequently occurs in the term *Deity*, in the same way as *state or government* is abstractly expressive of a king or monarch. Jehovah, however, seems to be the revealed Elohim, the Manifest, Only, Personal, and Holy Elohim: Elohim is the Creator, Jehovah the Redeemer, etc. See Jehovah.

The authors of the Eng. A. V. have invariably translated this last Hebrew word by "Lord," which is printed in those passages in small capitals in our common Bibles, but whenever the two words which they thus render occur together, Adoni-Jehovah, the latter is rendered "God," in order to prevent the repetition of "Lord." The Greek *Διόνυς* (either with or without the art.) Jerome and the Rabbins enumerate ten Heb. words as meaning God; but they relate rather to his attributes. See Lord.

I. Usage of the Hebrew terms properly rendered "God."

1. **El.** El. This term is used in the most general way as a designation of Deity, whether of the true God or of the false gods, even the idols, of the heathen. In the latter reference it occurs Is. xlv, 10, 15; xlv, 20; xlv, 6; and in the plur. בְּנֵי אֵל, *Eim*. Exod. xv, 11; Dan. xi, 56; though in both these last instances it may be questioned whether the word is not used in the sense of mighty ones. To render the application of the term in this reference more specific, such epithets as **יֵאמֹן, other, foreign (Exod. xxxiv, 14), "strange, hostile* (Psa. lxxx, 10), **גָּז, strange (Deut. xxxii, 12), are used. When used of the true God, El is usually preceded by the article (בְּנֵי, Gen. xxxi, 13; Deut. vii, 9), or followed by such distinctive epithets as בְּנֵי אֵל, Alimighty (Exod. vi, 8); בְּנֵי אֵל יִשְׂרָאֵל, eternal (Gen. xxxi, 33; Isa. xl, 28); יִשְׂרָאֵל, Supreme (Gen. xiv, 18); בְּנֵי אֵל יִשְׂרָאֵל, living (Josh. iii, 10); בְּנֵי אֵל יִשְׂרָאֵל, mighty (Isa. ix, 5); or such qualifying adjectives as בָּרָאֹת, of glory (Psa. xxxi, 5); בָּרָאֹת, of truth (Psa. xxxi, 6); בָּרָאֹת, of retributions (Jer. ii, 56); בָּרָאֹת, of Belial (Gen. xxxi, 18); בָּרָאֹת, of Israel (Gen. xxxii, 20); בָּרָאֹת (Deut. xxxii, 26). In poetry El sometimes occurs as a sign of the superlative; as בָּרָאֹת, hills of God, very high hills (Psa. xxxi, 7); בָּרָאֹת, cedars of God (lxxxi, 11). The phrase בָּרָאֹת occurs Psa. xxii, 1; lxxxi, 7; and is supposed by some to refer to angels; but others take בָּרָאֹת here for בָּרָאֹת, and translate Sons of the mighty (see Rosenmuller, ad loc.).

There is no instance of El in the singular being used in the sense of mighty one or hero; for even if we retain that reading in Ezek. xxxi, 11 (though thirty of Kennicott's codices have the reading בָּרָאֹת, and the probability is that in those which present בָּרָאֹת the "h" is implied), the rendering "God of the nations" may be accepted as conveying a strong but just description of the power of Nebuchadnezzar, and the submission rendered to him; compare 2 Cor. iv, 4. In proper names בָּרָאֹת is often found sometimes in the first member of the compound, e.g. גָּז, Eljah; בָּרָאֹת, Eldad, et., and sometimes as the last member, e.g. בָּרָאֹת, Samuel; בָּרָאֹת, Lemuel; בָּרָאֹת, Tabeel, etc. See El.

2. **Eloah, Elah, plur. בְּנֵי אֵל, Eloás, Elás.** The singular form occurs only in poetry, especially in Job, and in the later books, such as Daniel, Nehemiah, and Chronicles. It is used as well of idol deities as of the true God (Dan. xi, 37, 38; Habak. i, 11; Deut. xxxii, 15; Psa. i, 22; Habak. iii, 8, etc.); once in the former case with the addition of בָּרָאֹת (Dan. xi, 89), and in the latter with that of בָּרָאֹת (Psa. cxiv, 7). The more common usage is that of the plural. This pervades all the books of the Old Testament, from the earliest to the latest. Thus it is used principally of the true God, and in this case frequently with the article prefixed (Gen. xvi, 21; vi, 9, 11; xvii, 18), as well as with such adjectives as בָּרָאֹת, Neh. 4, 4, or with the addition of בָּרָאֹת (Gen. xxxiv, 3); בָּרָאֹת (Isa. lxv, 10; בָּרָאֹת (Psa. iv, 2); בָּרָאֹת (Amos iii, 18), etc. When the relation of Israel to God is to be indicated, the phrases God of Israel, Jacob,Abram are used (Ezek. v, 1; Psa. xx, 2; xlv, 10, etc.); and in this case, as the term Elohim is equivalent in effect to Jehovah, it is often used interchangeably with that term; thus Moses, who is designated בָּרָאֹת, Ebeel-Jehovah (Deut. xxxiv, 5), is called in the same sense בָּרָאֹת, Eedel-Elohim (Dan. ix, 11); and the same object is designated indifferently בָּרָאֹת, Eeueel-Jehovah, and בָּרָאֹת, Eeueel-Elohim (comp. Judg. iii, 10, and Exod. xxxii, 3, etc.). Not unfrequently the two terms are combined (Lam. xvii, 3, 4, etc.; xis, 2, etc., 2 Sam. v, 10; 1 Kings i, 56; 2 Kings v, 18; Psa. xxxii, 18). Most commonly, however, they are used distinctively, with respect, probably, to the difference between their primary meanings (see Hengstenberg, *Auth. d. Pent.* i, 181 sq.). In the Pentateuch this discriminative usage has given place for certain hypotheses as to the composition of that work. See *Pentateuch*. In the earlier historical books, Jehovah is more frequently used than Elohim; in Job, Jehovah is more frequently used in the poetical, Eloah or Elohim in the prosaic portions; in the Psalms, sometimes the one,
sometimes the other predominates, and this has been thought to afford some criterion by which to judge of the age of the psalm, the older psalms being those in which Elohim is used; in Proverbs we have chiefly Jehovah; in Ecclesiastes, Daniel, and Jonah, almost exclusively Elohim, and in the other prophets chiefly Jehovah. Elohim is also used of idol deities or false gods; and, as in the case of any other worshiped as gods, they were otherwise distinguished from God (Exod. xii, 20; xxii, 31; Josh. xxiv, 20; Jer. ii, 11; Jonah i, 5, etc.); and, like El, it is used as a superlative (Psa. cviii, 16; lx, 10, etc.). Kings and judges, as the vassergents of Deity, or as possessing a sort of representative majesty, are sometimes called Elohim (Exod. xvi, 13; 2 Kings xix, 6; Exod. xvi, 13, 8). Whether the term is used of angels may be made matter of question. This is the rendering given to נבון by the Sept., Vulg., Targ., S equivalent, etc., in Gen. iii, 5; Psa. viii, 6; lexii, 1, 6; cvii, 7; and cvxiii, 1; but in the majority of these instances there can be little doubt that the translators were swayed by more dogmatic considerations in adopting that rendering; they preferred it because they avoided thus the strongly anthropomorphic representation which a literal rendering would have preserved. In all these passages the proper signification of נבון may be retained, and in some of them, such as Gen. iii, 5; Psa. lexii, 1, 6; this seems imperatively required. In Psa. viii, 6 also the rendering "angels" seems approved by the consideration that the subject of the writer is the grace of God to man in giving him dominion over the works of his hands, in which respect there can be no comparison between man and the angels, of whom nothing of this sort is said elsewhere. In Psa. cvxvii, 7, the connection of the last clause with what precedes affords sufficient reason for our giving Elohim its proper rendering, as in the A.V. That the author of the epistle to the Hebrews should have adopted the Sept. rendering in citing these two passages (i, 7; i, 6), cannot be held as establishing that rendering, for, as his argument is not affected by it, he was under no call to depart from the rendering given in the version from which he quotes. But, though there be no clear evidence that Elohim is ever used in the sense of angels, it is sometimes used vaguely to describe unseen powers or superhuman beings that are not properly thought of as divine. Thus the witch of Endor said "Elohim ascended out of the earth" (1 Sam. xxviii, 13), meaning thereby some being of an unearthly, superhuman character. So also in Zech. xii, 8 it is said, "The house of David shall be Elohim and of the angel of the Lord," where, as the transition from Elohim to the angel of the Lord is a mino ad majus, we must regard the former as a vague designation of supernatural powers. Hengstenberg would explain Psa. viii, 6 in accordance with this; but the legitimacy of this may be doubted. See Elohim.

On the use or absence of the article with נבון, see Quarterly (Genesis, p. 370 sq.), who, after an elaborate examination of the subject, sums up the results as follows: "The dispensing of the supposition that any essential difference existed, at least in the earlier books, between Elohim with and without the article—any difference at all, but such as the exigencies of each occasion with respect to sense or grammar would have made in the case of any common appellative; the illustration of the use of the article with particulars and prepositions, elucidating many passages of Scripture, and explaining many seeming causes of particular characteristic difference as regards the usage in the case of Elohim with or without the article, between the earlier and later books of the sacred canon." See Article (in Grammar).

II. The predicates ascribed to God by Moses are systematically enumerated in Exod. xxiv, 6; 7, 7, though we find in isolated passages in the Pentateuch and elsewhere additional properties specified; which bear more directly upon the dogmas and principles of religion, such as, e.g. that he is not the author of sin (Gen. i, 31), although since the fall man is prone to sin (Gen. vi, 5; viii, 21, etc.). But, as it was the avowed design of Moses to teach the Jews the unity of God in opposition to the polytheism of the other nations with whom they were dwelt particularly and most prominently on that point, which he hardly ever omitted when he had an opportunity of bringing forward the attributes of God (Deut. vi, 4; x, 17; iv, 32; ix, 16, etc.; Num. xvi, 22; xxii, 3; xxiii, 4; etc.; Exod. xvi, 11; xxiv, 6; xxxi, 7, etc.). In the proverbs and the earlier writers of the Old Testament these attributes are still more fully developed and explained by the declarations that God is the first and the last (Isa. xliv, 6); that he changes not (Hab. iii, 6); that the earth and heaven shall perish, but he shall endure (Psa. ciii, 26)—a distinct allusion to the last doomsday—and that he is omnipresent (Prov. xv, 3; Job xxxiv, 22, etc.).

In the New Testament also we find the attributes of God systematically classified (Rev. v, 12, and vii, 12), while the peculiar tenets of Christianity embrace, if not a further, still a more developed idea, as presented by the proverbs and the primitive constitution of the Church (compare Semisch's Justin Martyr, ii, 151 sq., translated by J. E. Ryland, 1845). The expression "to see God" (Job xix, 26; xili, 5; Isa. xxxviii, 11) sometimes signifies merely to experience his help; but in the Old-Testament Scriptures it more usually denotes the approach of death (Gen. xxiii, 39; Judg. vi, 28; xili, 22; Isa. vi, 5). See Death.

The term נבון is, "son of God," applies to kings (Psa. ii, 7; lexii, 6, 27). The usual notion of the ancients that the royal dignity was derived from God may here be traced to its source: hence the Homeric ἐνίκις βασιλεύς. This notion, entertained by the Oriental nations with regard to kings, made the latter style themselves gods (Psa. lexii, 6), נבון נבון, "son of God," in the plural, implies inferior gods, angels (Gen. vi, 2; Job i, 6); as also faithful adepts, worshippers of God (Deut. xiv, 1; Psa. lxiii, 15; Prov. xxxiv, 26). נבון נבון, "man of God," is sometimes applied to an angel (Judg. xiii, 6, 8), as also to a prophet (1 Sam. ii, 27; ix, 6; 1 Kings xiii, 3). When, in the Middle Ages, scholastic theology began to appeal to the divine attributes as the basis of systematic and dogmatic Christianity, the Jews, it appears, did not wish to remain behind on that head, and, collecting a few passages from the Old Testament, and more especially from Isa. xi, 2, and 1 Chron. xxix, 11, where the divine attributes are more amply developed and enumerated, they strung them together in a sort of cabalistic tree, but in reality representing a human figure. See Cabala.

III. The Scriptures contain frequent notices of false gods as objects of idolatrous worship: 1. By the Hebrews. These were of two kinds: a. Adoration of other beings than Jehovah, held as divine (Ehren. De die et deo. Gentil. in S. S. memor. Argent. 1750; Leuen. De idolola V. T. in his Philog. Hebr. mixt. p. 291 sq.; Kalkar, Uedigt over den idolol. Cultus som omontales i bibelin, Odense, 1838 sq.). Such false deities (which are generally identified with their images, Deut. iv, 28 sq.; Psa. cvv, 4 sq.; cxxxi, 13 sq.; 2 Macc. ii, 2, 3; comp. also נבון, idols, in passages like 1 Sam. xxxi, 9; Hos. iv, 17) are called נבון נבון, nothings (perhaps a play upon נבון, in the Jewish Church phraseology (Lev. xiv, 4; xxvi, 1; comp. Hab. ii, 18), or נבון נבון, breaths, i.e. vanities (Jer. ii, 5; viii, 19; xiv, 22, נבון נבון, uter vanitiae (Jon. ii, 9; comp. rd thai, Acts xiv, 15), נבון נבון, abominations (1 Kings xi, 5;
2 Kings xili, 18; derivatively דִּבֶּשֶׁת, ðûôšeth, logy (Exek. vi, 4; xiv, 9); their sacred rites אֲרֹן, ʾārôn; (Sam. xv, 23; Isa. lix, 3), and their whole worship harlotry (Exek. xliii; compare פַּעַת, and derivatives, in Winer, Simonis Lex. p. 286 sq.), in contrast with which Jeho- vah is called the true God מְלֹא צִיוֹן, Jer. x, 10 sq.; Dan. vi, 20, 26 (compare יִתְנָא, Pes. cxvi, 26); Acha xiv, 15; 2 Cor. vi, 16), the God of Hosts (Judith v, 7; compare Jer. x, 11, etc.). Indeed idolatry was represented as a capital offence in the Mosaic law, under penalty of extirpation and destruction in the case of the whole people (Lev. xix, 4; Deut. vii, 15; viii, 19; xi, 16 sq.; xxix, 15 sq.; xx, 17 sq.; xxxi, 16 sq.; comp. Josh. viii, 16; 1 Kings ix, 6 sq., and standing for individuals (Exod. xx, 20; Deut. vii, 2 sq.; comp. vi, 14 sq.; vii, 16; viii, 19; xiii, 2 sq.; Exod. xx, 3, 23), and the Israelites were admonished in their campaigns utterly to demolish idolatrous images (Exod. xxiii, 24; xxxv, 13; Deut. vii, 5, 25; xii, 2 sq.; comp. 1 Chron. xiv, 12, 13, and not to tolerate any heathen whatever in their land (Exod. xxix, 8; Deut. xx, 17), and, furthermore, to shun all connection (even civil and political) with idolatrous nations (Exod. xxix, 8; xxxiv, 15 sq.; Deut. vii, 1 sq.). Even in- stigation to idolatry was liable to punishment by death (Deut. xxiv, 8 sq.). In spite, however, of these severe statutes, we find the Israelites, not only during the passage through the wilderness and the unsettled period of their polity (Numm. xx, 2; Deut. xii, 18; Josh. xix, 23; comp. Amos v, 22 sq.), but also under the conditions of the fully developed monarchy of Jehovah, and attaching themselves to the adoration of Phoenic-Philotie-Syrian and Arabico-Sabaean (in the time of the Maccabees also to Greco-Syrian) deities (see Gramberg, Religionisde, i, 436), such as Ba- al, Ashturath, Moloch, Chemosh, Thammuz, etc., and conversing in personal names of the gods and their attributes (Deut. xviii, 10 sq.; comp. Dalc, De la divination, idol. V. 5. in his work De origine et progr. idolol. p. 363 sq.). See each of these names in its place.

The service rendered to foreign deities was very muliform (Mishna, Shabbath, vii, 6), but consisted principally of vows (Hos. ix, 10, incd. 1 Kings xi, 8: 2 Kings xxii, 17; xxiii, 5; Jer. i, 16; vii, 9; xii, 12; xiii, 15; xxiii, 29), bloodless (Jer. vii, 18) and bloody offerings (2 Kings v, 17), including even human beings. See MOLoch. The incense and offerings were made on high places and in the temple (1 Sam. vii, 7; Jer. ii, 20; iii, 6; 20, 27; Hos. viii, 13; 1 Kings xi, 2; 2 Kings xxii, 5; xiv, 24, comp. Philostr. Apoll. iii, 4; Pan- schema, ad Callim. Del., 70; see HIGH PLACE, on roofs (Jer. xiii, 18; xxxii, 29; Isa. lxv, 3), under shady trees (1 Kings xiv, 23; 2 Kings vii, 4; xvii, 10; Hos. iv, 18; Isa. i, 29; Jer. ii, 20; iii, 13; xvii, 2; 2 Chron. xxiv, 8; Ezek. vi, 13; xx, 28; see Movers, Phon. p. 577 sq.), also in valleys (Jer. ii, 28; 2 Chron. xxvi, 9), and gardens (Isa. i, 29; lxv, 8). See GROVE. The votaries of many of these deities made an offering of their own chastity to them, and illicit concomming of the sexes was a chief element of such cultus. See BAAL; ASHTARTE. Sitting upon graves formed also a part of idolatry, either as a propitiation to the gods or in necromancy (Isa. lxv, 4). Lustration even was not wanting (Isa. lxvi, 17). The priestly castes of these idolatrous systems were numerous (1 Kings xiv, 22; 2 Kings, 21), and in good stations (Hos. x, 5).

One kind of them was called KEMARIM (ךְָיַמְרָא, Zeph. iv, 4; 2 Kings xxiii, 5; a Syriac word, Gessen. Thes. p. 936; Mishna, Megil. iv, 9). See IDOLATRY.

6. The worship of Jehovah, under the form of any image whatever, was strictly forbidden (Exod. xx, 4; Deut. xxxii, 16; v, 8; xxxii, 15; comp. Tacit. Hist. v, 5). Such symbols are not forbidden; the symbol is the image of the thing, and not the thing itself. In Egypt (Josh. xxiv, 14; Ezek. xxiv, 7 sq.). See Ewald, Jer. Gesch. ii, 109 sqq.; Gerritsen, Der Hebräe-
GOD

The concept of God is central to many religions and philosophical traditions. The word "God" is used to describe a supreme being who is the creator of the universe and who is often worshipped in various forms. The nature of God is a topic of much debate and exploration across different cultures and time periods.

1. "God... as one of the names of Jehovah, who is the Father, the Son, and the Holy Ghost. See Trinity.

2. Connotation of the term God.—The word ἄρνης, God, taken to signify "an object of religious veneration," was formerly applied to the pretended deities of the heathen world; and these names were employed by the promulgators of the Gospel when calling on the heathen to transfer their worship from their idols to Jehovah. But the word "God" has come to signify in Christian use the Maker and Ruler of the world, and is absolutely and exclusively applied to him. There is "one God" in the Christian sense, and there can be but one. It is not meant merely that we believe this as a fact, but that it is moreover implied in the very meaning w: attach to the word. And this is a distinction which should always be carefully attended to. The word "Moamen" means nothing more or less than a believer in Mohammed, though the Christian regards Mohammed as having been in fact an impostor, and the Mohammedans regard him as a true prophet; but neither of these is implied (or connoted) by the word "Moamen" when used by a Christian. On the contrary, it is absolutely and exclusively applied to him. There is then no such being as a belief in the God and Maker of the world, would be considered by Christians not only as in error, but as an impostor. As holding that there is a God (while whoever should affirm the existence of more than one God would be held to be an idolater): and this not less than he should admit the existence of some being superior to man, such as the fairies, demons, nixes, etc., which are still feared by the vulgar in almost all parts of Chris tian Europe. Even the notion of the Godheads, and the gods and goddesses of the ancient heathens, which were all of this description. None of them was accounted the Creator, and the births of most of them are recorded in their mythology; and altogether the notions entertained of them seem to have been very nearly the same as the vulgar superstitions still prevailing in most parts of Europe relative to the fairies, etc., these being doubtless no other than the ancient heathen deities of those parts, the belief in their existence and dread of their power having survived the introduction of Christianity, though the title of 'gods' has been dropped, as well as the words 'sacrifice' and 'worship' in reference to the offerings, invocations, and other tokens of reverence with which they are still in several places honored. It appears, therefore, that as the ancient heathens denounced the early Christians as Atheists for contemning the heathen deities, so they may be considered as being, in the Christian sense of the word, themselves Atheists (as indeed they are called in Ephes. ii, 12), and that consequently the word 'God,' in the Christian sense and in the heathen, must be regarded as having two meanings. Wide, therefore, is the notion contained in Pope's 'Universal Prayer,' the Psalms, as it is called, of the ancient heathen philosophers and the Brahmins of the present day, who applied the word God to a supposed soul of the universe:

"Mens agitat mollem, et toto se corpore miscet,

a spirit pervading all things (but not an agent or a person), and of which the souls of man and brutes are portions. In the Book of Revelation, Jehovah, the self-existent and all-perfect Being, with the world which he creates, is described as "God" (Revelations). The word "Being" in this context meets our view. Though intimately present with all his works, he is yet entirely distinct from them. In him we live, and move, and have our being. He is infinitely nigh to us, and he is intimately present with us, while we remain infinitely distant from his all-perfect and incomunicable essence" (Eden).

3. Can God be known?—The Scriptures declare that God is invisible (Exod. xxxiii, 20; John i, 18; John iv, 12; 1 Thess. iv, 8, etc.). The knowledge of God is therefore the knowledge of God the Father, God the Son, and God the Holy Ghost. See Trinity.
this teaching into a higher one, viz. that the longing of the soul for God, the search for God in Christ, is always real, so that there is a "parable in the spiritual eyes of faith." Luther's doctrine that God may be taught, named, and apprehended in Christ, and in Christ alone, is quite in harmony with the early theology of the Church (e.g. Clement of Alexandria, Stromata, ii). Not that a mere intellectual faith in Christ, or a knowledge of God in Christ, is the conversion of the soul begins its new, spiritual capacity to receive and apprehend God; and as the soul is emptied of self and purged from sin by the Holy Spirit, it grows in knowledge of God, in light and love, until the "life of God" becomes the "life of the soul." Dr. Nitzsch (Die Leben des Kaisers, 1869) has observed that 'the conversion passage as to the specifically Christian conception of God: "There is a sense in which the absolute being of God, as related immediately and directly to our created being, must be considered the necessary ground of our knowing him and coming into union with him in the way of religion. The whole possibility of religion for us starts in the God-consciousness, or direct sense of Deity, which is as much a part of our original nature as the sense we have of the world around us or of our own existence. It is not put into us by any outward and external argument. It arises of itself and necessitates itself as a fundamental fact in our life; and in doing this it certifies, to the same extent, the truth of the object on which it is exercised. Or, rather, we must say, the truth of the object on which it is exercised, which is the Divine Being, or the existence of the Absolute, certifies itself, makes itself sure in and through the consciousness into which it enters. In this sense, the idea of God comes before Christianity, as it comes before religion in every other form. But who shall say that this general idea of God can be for us, therefore, the actual root of Christianity, so that any among us, starting with that alone, could ever by means of it come to a full construction of what God is for true Christian faith? It lies at the ground of pantheism, dualism, polytheism, deism, and all false religions, no less than at the ground of Christianity. For the distinctive knowledge of Christianity, then, we need some other specific principle or root, which, however it may be comprehended in the general principle of all religion, must be regarded at the same time nevertheless as the ground and beginning, exclusively and entirely, of religion under this highest and most complete form, namely, now, is that principle to be found? Where does the whole world of Christianity, the new creation of the Gospel (life, power, doctrine, and all), take its rise and start? Where do we come to the source of its perennial revelation, the ground of its infallibility, where, in the presence of the Word Incarnate, the glorious Person of him who is the Root and the Offspring of David, the bright and morning Star—the faithful and true Witness, the BEGINNING of the creation of God? But Religion has had her errors and excesses as well as Science. As the latter seeks in its pride, by purely intellectual effort, to apprehend the absolute, the former has at certain periods allowed mysticism to take the place of the simple revealed truth as to the life of God in the soul, and, in the spirit of the Oriental theosophy, has called the "redeemed soul but a drop in the ocean of God" (see MYSTICISM). The orthodox Christian doctrine keeps the golden mean between these extremes. It asserts, and has asserted from the beginning, that a real and objective knowledge of God comes only from the revelation of God in the person and work of Jesus Christ, the Logos, the Word, the Father's "little finger" (Arist. De Mund.), according to the best capacity of man. It teaches not only that God is "incomprehensible," but also that every step taken in the true knowledge of God by the soul makes his "incomprehensibility" more obvious. It does not pretend that the scriptural doctrine of one God in three persons is perfectly within the scope of the human intellect to comprehend as well as to apprehend; but all Church history shows that the genuine and even scientific knowledge of God has been preserved better maintained in the doctrine of the Trinity than without it. When the Arians attacked the Nicene doctrine of the Trinity on the ground that it transcended human reason, the orthodox replied that it was easier to know God by receiving it in the doctrine of the Trinity than to resist it. A monotheism, whether in Judaism, Islamism, or elsewhere, has always ended in bald pantheism (q.v.), while on the other hand the Christian doctrine of the Trinity, though stigmatized by infidel and rationalistic opponents as Tritheism, has, from the beginning, preserved by the Church the true spiritual, moral, religious, and personal Being, and has kept up, also, a pure and spiritual worship of the Great Supreme. See Ritter, Leben die Erkenntniss Gottes in der Welt, 1896; Nitzsch, Syst. d. Christlichen Lehre, § 7, 60–80; Nitzsch, in Herzog's Real-Encyclop. s. v. God.

V. Substantia and Mode of the Scriptural Teaching.—In the Scriptures no attempt is made to prove the existence of a God. The error of men consisted not in denying a God, but in admitting too many; and one great object of the Bible is to demonstrate that there is but one. No metaphysical arguments, however, are employed for this purpose. The evidence is drawn from facts recorded in the history of the Jews, from which it appears that they were always victorious and prosperous so long as they served the living and true God, Jehovah (the name by which the Almighty made himself known to the Hebrews), and uniformly unsuccessful when they revolted from him to serve other gods. What argument could be so effectual to convince them that there was no god in all the earth but the God of Israel? The sovereignty and universal providence of the Lord Jehovah are proved by predictions delivered by the prophets regarding the coming of the Messiah and of the nations and of empires, specifying distinctly their rise, the duration of their power, and the causes of their decline; thus demonstrating that one God ruled among the nations, and made them the unconscious instruments of promoting the purposes of his will. In the same manner, none of the attributes of God are demonstrated in Scripture by reasoning: they are simply affirmed and illustrated by facts; and instead of a regular deduction of doctrines and conclusions from a few admitted principles, we are left to gather them from the recorded works and declarations of persons whose hearts were influenced by the fear of God. These circumstances point out a marked singularity in the Scriptures, considered as a repository of religious doctrines. The writers, generally speaking, do not reason, but exhort and exhort; they do not attempt to fetter the judgment by the subtility of argument, but to rouse the feelings by an appeal to palpable facts. This is exactly what might have been expected from teachers acting under a divine commission, and armed with undeniable facts to enforce their admonitions. The sacred writers furnish us with information on the existence and the character of God (1) from the names by which he is designated; (2) from the actions ascribed to him; and (3) from the attributes with which he is invested.

1. The names of God as recorded in Scripture convey at once ideas of overwhelming greatness and glory, mingled with that wonderful mysteriousness with which, to all finite minds, and especially to the minds of children, the thought of the existence and mode of existence must ever be invested. Though One, he is τό ιδίον, EL-OHIM, GOD, person admirable. He is τὸ πάντα, JEHOVAH, self-existing; שֵׁלָל, El, the Mighty, Almighty; שָאֲדֵד, omnipotent, all-sufficient; חַי, ADONAI, Lord, Ruler, Judge. These are among the admirable appellatives of God which are scattered throughout the
revelation that he has been pleased to make of himself. But in one opinion he was pleased more particularly to declare his name, that is, such of the qualities and attributes of the divine nature as mortals are the most interested in knowing, and to unfold not only his natural, but also those of his moral attributes by which his conduct towards his creatures is regulated. And this gift of the God, the Lord God, the Lord God, merciful and gracious, long-suffering, and abundant in goodness and truth, keeping mercy for thousands, forgiving iniquity, transgression, and sin, and that will by no means cleave the guilty; visiting the iniquity of the fathers upon the children unto the third and fourth generation (Exod. xxxiv). This is the most ample and particular description of the character of God, as given by himself in the Old Testament" (Watson). The name "which is above every name" (Phil. ii, 9), is the name Jesus (Col. iii, 17). The name in Exod. iii, 14 is peculiar in denoting God as the "God who reveals himself." The declaration "I am that I am," or "I will be that I will be," does not so much include a predicate of God as a declaration of the eternal being of God, revealing himself at his own time and on his own terms. It involves not merely the sense of existence (to which it is limited by the Septuagint version Ο’ ἡμῶν), but also the idea of the continual self-revealing of God, and thus unifies, so to speak, all the successive steps and epochs of revelation. His "is the Alpha and Omega, the beginning and the ending," being all in all, and "which is to come—the Almighty" (Rev. i, 8). The name Jehovah was too holy to be uttered, and others were substituted for it by the Jews; the fearful penalty for blaspheming it was death (Lev. xxiv, 16; see Clarke's note ad loc.). In the names Father and Redeemer (Isa. lxxiii, 16), new elements of the character of the self-revealing Jehovah are set forth; he shows himself as the God of grace and love to his people who turn unto him.—Watson, Institutes, pt. ii, c. i; Nitzsch, in Herzog's Real-Encyklopädie s. v. Gott; Hengstenberg, Die Gotternamen des Pentateuch; Knapp, Theologie (Wood's ed. p. 84); Lange, On Genesis, Introd. § 7.

2. Actions.—The second means by which the Scriptures convey to us the knowledge of God is by the actions which they ascribe to him. They contain, indeed, the important record of his dealings with men in every age, who were commissioned with limited, strict, sacred history, and by prophetical declaration they also exhibit the principles on which he will govern the world to the end of time; so that the whole course of the divine administration may be considered as exhibiting a singularly illustrative comment upon those actions, and as prepared in the mind of the people before the events contained in such declarations as those which have been just quoted. (1.) The first act ascribed to God is that of creation. By this were manifested: his eternity and self-existence, as he who creates must be before all creatures, and he who gives being to others can derive itself from none; his almighty power, shown both in the act of creation and in the number and vastness of the objects so produced; his wisdom, in their arrangement and in their fitness to their respective ends; and his goodness, as the whole tended to the happiness of his amnest. The foundation of his natural and moral government are also made manifest by his creative acts. In what he made out of nothing he had an absolute right and prerogative; it awaited his ordering, and was completely at his disposal; so that he could destroy his own work, and to prescribe the laws by which the intelligent and rational part of his creatures should be governed, are rights which none can question. Thus, on the one hand, his character of Lord or Governor is established, and, on the other, our duty of lowly homage and absolute obedience. (2.) Providence.—The next and most strikingly shown to us since man was created he was placed under a rule of conduct. Obedience was to be followed with the continuance of the divine favor; transgression, with death. The event called forth new manifestations of the character of God. His tender mercy, in the compassion showed to the fallen pair; his justice, in forgiving them only in the view of a satisfaction to be hereafter offered to his justice by an innocent representative of the sinning race, in their stead, and by whose sacrifice he become this Redeemer, and in the fulness of time to die for the sins of the whole world; and his holiness, in connecting with this provision for the pardon of man the means of restoring him to a sinless state, and to the obliterated image of God in which he had been created. Exemplary instructions of the path traced from age to age in his establishing his own worship among men, and remitting the punishment of individual and national offences in answer to prayer offered from penitent hearts, and in dependence upon the typified or actually offered universal sacrifice; of his condescension, in stooping to the cases of individuals, in his dispensions both of pittance and grace, by showing respect to the poor and humble, and principally by the incarnation of God in the form of a servant, admitting men into familiar and friendly intercourse with him. And the time is coming when he will be their patron and advocate until they should be received into the same glory, 'and so to be forever with the Lord'; of his strictly righteous government, in the destruction of the old world, the cities of the plain, the nations of Canaan, and all ancient states, upon their misdeed filling up the measure of iniquity, under the plea that 'he will by no means clear the guilty,' in the numerous and severe punishments inflicted even upon the chosen seed of Abraham because of their transgressions; of his long-suffering, in frequent warnings, delays, and corrective judgments inflicted upon individuals and nations before the sentence of utter extermination and destruction; of faithfulness and truth, in the fulfillment of promises, often many ages after they were given, as in the promises to Abraham respecting the possession of the land of Canaan by his seed, and in all the promises made to the fathers respecting the advent, vicarious death, and illustrious offices of the 'Christ,' the Saviour of the world; of his immutability, in the constant and unchanging laws and principles of his government, which remain to this day precisely the same in every thing universal as when first promul- gated, and himself, and the refined chaff into heaven 10 places as well as through all time; of his preexistence of future events, manifested by the predictions of Scripture; and of the depth and stability of his counsel, as illustrated in that plan and purpose of bringing back a reviled world to obedience and felicity which we find in view in the ages of the world and the acts of God in former ages—which is still the end towards which all his dispensations tend, however wide and mysterious their sweep, and which they will finally accomplish, as we learn from the prophetick history of the future contained in the Old and New Testaments. Thus the course of divine operation in the world has from age to age been a manifestation of the divine character, continually receiving new and stronger illustrations until the completion of the Christian revelation by the ministry of Christ and his inspired followers. The foundation of his natural and moral government are also made manifest by his creative acts. In what he made out of nothing he had an absolute right and prerogative; it awaited his ordering, and was completely at his disposal; so that he could destroy his own work, and to prescribe the laws by which the intelligent and rational part of his creatures should be governed, are rights which none can question. Thus, on the one hand, his character of Lord or Governor is established, and, on the other, our duty of lowly homage and absolute obedience. (2.) Providence.—The next and most strikingly shown to us since man was created he was placed under a rule of conduct. Obedience was to be followed with the continuance of the
ble.' That, after all the manifestations he has made of himself, he is, from the infinite perfection and glory of his nature, incomprehensible: 'I know not how or in what way of his ways, and bow little a portion is heard of him.' 'Touching the Almighty, we cannot find him out.' That he is unchangeable: 'The Father of Lights, with whom there is no variableness, neither shadow of turning.' That he is the fountain of life, and the only independent, eternally true, universal, unvarying, and only hath the attribute of immortality. That every other being, however exalted, has its existence from him: 'For by him were all things created which are in heaven and in earth, whether they be visible or invisible.' That the existence of every thing is upheld by a creature being the unpromised and independent of his support: 'By him all things consist;' 'upholding all things by the word of his power.' That he is omniqritis: 'Do not I fill heaven and earth with my presence? saith the Lord.' That he is omnisciens: 'All things are naked and open before the eyes of him with whom we have to do.' That he is the absolute Lord and Owner of all things: 'The heavens, even the heaven of heavens, are thine, and all the parts of them; The earth is thine, and the fulness thereof, the world and them that dwell therein.' 'He doth according to his will in the sphere among the angels of the heaven, and in the circle of the sun.' That his providence extends to the minutest objects: 'The hairs of your head are all numbered;' 'Are not two sparrows sold for a farthing?' and one of them shall not fall on the ground without your Father.' That his knowledge is perfect: 'The eye of the Lord is upon the righteous, and his ear heareth their cry;' 'He that is perfect, he shall have perfect knowledge.' That his providence comprehends all things: 'Holy, holy, holy Lord God of hosts!' 'A God of truth, and in whom there is no iniquity;' 'Of purer eyes than to behold iniquity.' That he is just in the administration of his government: 'Shall not the Judge of the whole earth do right?' 'Clouds and darkness are round about him;' 'judgment, and justice are the habitation of his throne.' That his wisdom is unsearchable: 'O the depth of the wisdom and knowledge of God! How unsearchable are his judgments, and his ways past finding out!' And, finally, that he is good and merciful: 'Thou art good, and thy mercy endureth forever;' 'His tender mercy is over all his works;' 'God, who is rich in mercy, for his great love wherewith he loved us, even when we were dead in sins, hath quickened us together with Christ;' 'God was in Christ, reconciling the world unto himself, not imputing their trespasses unto them;' 'And hath given to us eternal life, and this life is in his Son.' See Attributes: also VI below.

"Under these deeply awful but consolatory views do the Scriptures present to us the supreme object of our worship and trust; and they dwell upon each of the attributes of God, in strict accordance with infinite beauty of language, and with an inexhaustible variety of illustration. Nor can we compare these views of the divine nature with the conceptions of the most enlightened of pagans without feeling how much reason we have for everlasting gratitude that a revelation so explicit and so comprehensive should have been made to us on a subject which only a revelation from God himself could have made known. It is thus that Christian philosophers, even when they do not use the language of the Scriptures, are able to speak on this great and mysterious doctrine in language so clear and with conceptions so noble; in a manner, too, so equable, so different from the sages of antiquity, who, if at any time they approach the truth when speaking of the divine nature, never fail to mingle with it some essentially erroneous or groveling conception. By the word God, it is shown, 'Lo, I am with you always, even unto the consummation of the world;' 'Theolphus, Præsidii, li, 811, ed. 1803; Watson, Inst. pt. ii, c. i.

VI. Dogmatical Treatment of the Doctrine of God.

The highest veneration and most profound submission and obedience are due' (Barrow, On the Creed). 'Our notion of Deity,' says Bishop Sherlock, 'both comprise, signify a Being or Nature of infinite perfection; and the infinite perfection of a being or nature consists in this, that it is absolutely and essentially necessary, an actual being of itself, and potential or causative of all beings beside itself; independent from any other which all things depend on, and by which all things else are governed' (Pearson, On the Creed).

'God is a Being,' says Lawson, 'and not any kind of being, but a substance which is the foundation of other beings; and not only a substance, but perfect. Yet many beings are perfect in their kind, yet limited and finite; but God is absolutely, fully, and infinitely perfect, and therefore above spirits, above angels, who are perfect comparatively. God's infinite perfection includes all the attributes, even the most excellent. It excludes all dependency, borrowed existence, composition, corruption, mortality, contingency, ignorance, unrighteousness, weakness, misery, and all imperfections whatever. It includes necessity of being, independency, perfect unity, simplicity, immensity, eternity, immortality; the most perfect life, knowledge, wisdom, integrity, power, glory, bliss, and all these are contained in God, who reaches up to the secrets of this eternal Being. Our reason comprehends but little of him, and when it can proceed no farther faith comes in, and we believe far more than we can understand; and this our belief is not contrary to reason, but is justly and necessarily united to us that we must believe far more of God than can form us of' (Lawson, Theo-Politico). To this we may add an admirable passage from Sir Isaac Newton: 'The word God frequently signifies Lord, but every lord is not God: it is the dominion of a spiritual Being or Lord that constitutes God; it is that which constitutes God, the supreme, the Supreme; feigned, the false god. From such true dominion it follows that the true God is living, intelligent, and powerful, and from his other perfections that he is supreme, or supremely perfect; he is eternal and infinite, omnipotent and omniscient; that is, he endures from eternity to eternity, and is perfect from infinity to infinity. He governs all things that exist, and knows all things that are to be known; he is not eternity or infinity, but eternal and infinite; he is not duration or space, but he endures and is present everywhere; he endures and is present everywhere; he is omnipresent, not only virtually, but also substantially; for power without substance cannot subsist. All things are contained and move in him, but without any mutual passion; he suffers nothing from the motions of bodies, nor do they undergo any resistance from his omnipresence; his eternity and his infinity are necessary, and by the same necessity he exists always and everywhere: hence also he must be perfectly similar, all eye, all ear, all arm, all the power of perceiving, understanding, and acting; but after a manner wholly to us unknown. He is destitute of all body and all bodily shape, and therefore cannot be seen, heard, or touched, nor ought he to be worshipped under the representation of any thing corporeal. We have ideas of the attributes of God, but do not know the substance of even any thing; we see only the figures and colors of bodies, hear only sounds, touch only the outward surfaces, smell only odors, and taste tastes, and do not, cannot, by any sense or reflex act, know their inward substances, and much less can we have any notion of the substance of God. We know him by his properties and attributes,' """"Theopol. Principi, ii, 811; Principal, Principi, ii, 811, ed. 1803; Watson, Insti. pt. ii, c. i.
according to their views of the relations of the subject to the other branches, but in general it constitutes the first topic treated, and is divided very much as follows:

2. Division.—I. The Nature of God: 1. As the original and unoriginated personal Being: (a) One; (b) self-existent; (c) infinite. 2. As the original Word and Will: (a) Creator; (b) preserver; (c) governor of the world, or the original Spirit; (d) Essential Spirit; (e) origin of all moral and spiritual laws and existences. And hence, II, the Trinity of three persons in the one Godhead: Father, Son, Holy Ghost. See Monothelism; Trinity. III. The Attributes of God: 1. Those intrinsic to the nature of God and essential to his existence; but conceptions of the Idea of God in his relations to the world and to human thought (Suaideissen, p. 150). Perfections Dei, qua essentiam divinam nostrum conspiciendi modo per se conosceamus et de Deo parumque prudenscuntur (Hollas, p. 254). So Aquinas: “The name of God does not express the divine essence as it is, as the name of man expresses in its signification the essence of man as it is; that is to say, by signifying the definition which declares the essence” (Summa, pt. I, q. xiii, art. I). The ground of this distinction was the conviction that finite things cannot be so perfectly and equally accurate, than God and his attributes are, since the limit of eternity is not otherwise than by imperfect analogies. “The attributes of God must be represented to our minds, so far as they can be represented at all, under the similitude of the corresponding attributes of man. Yet we cannot conceive of an essence, in God, in the same manner, as we exist as man. In man they are many, in God they must be one. In man they are related to and limit each other; in God there can be no relation and no limitation. In man they exist only as capacities at times carried into action; in God, who is purus actus, there can be no distinction between capacity and operation. Hence the divine attributes may properly be called mysterious; for, though we believe in their coexistence, we are unable to conceive the manner of their co-existence.” (Quarterly Review, July, 1864, art. iii). There have been many divisions of the attributes of God. The scholastic theology set forth the attributes in three ways: 1. by causality (via causaliatis), in which all the perfections we observe in creation, and especially in man, are necessarily to be attributed to their Creator; 2. by negation (via negationis), under which there can be created beings as kept out of the conception of God; 3. by analogy or eminence (via analogiae, via eminentiae), by which the highest degree of all known perfections is attributed to God. Accordingly, the attributes of God were classed as negative and positive, the negative being such as remove from the conception of a perfect being, such as infinity, immutability, immortality, etc.; while the positive assert some perfection in God which is in and of himself, and which in the creatures, in any measure, is from him. This distinction is now mostly disregarded. Among modern writers, Dr. Samuel Clarke sums up the attributes as ultimately referrible to three leading ones: omnipotence, omniscience, and perfect goodness. Others distinguish them into absolute and relative: absolute are such as belong to the essence of God, as Jehovah, Yah, etc.; relative ones are such as may be ascribed to him in time, with relation to his creatures, as creator, governor, preserver, redeemer, etc. Others, again, divide them into communicable and incommunicable attributes. The communicable are those which can be imparted to the creature, as goodness, holiness, wisdom, etc.; the incommunicable are such as cannot be so imparted, as independence, immutability, immortality, and eternity. Another division makes one class of natural attributes, e.g. eternity, immensity, etc., and another of moral, e.g. holiness, goodness, etc. The later German theologians adopt more scientific classifications; e.g. Böhme (Lehre v. d. Gött. Erscheinungen, 1821; last ed. Altenburg, 1842) distinguishes the attributes into those which refer to the world in general, and those which refer to the world in particular; and he makes two classes: (1.) attributes which refer to the universal sense of dependence on God, viz. omnipotence, omniscience, omnipresence; (2.) attributes which refer to the Christian sense of redemption and of dependence on God, viz. holiness, justice, wisdom, love, etc. (Theol. Enzyklop. § 74) and classifies them as (1.) attributes of God as absolute cause (a) in himself—eternal, infinite, self-sufficient; (b) in relation to the world—omnipotent, omnipresent; (2.) attributes of God as the original and self-revealing soul—good, holy, just, benevolent, etc., which are not of the divine essence, but set forth by Babul in the Bulletin of the Revue Chrétienne (1866, No. 8, Juillet): I. Absolute or immanent Attributes: 1. self-sufficiency of God as a pure and absolute Being; 2. majesty; the divine will; 3. blessedness. II. Relative Attributes, implied in God’s relation to the universe; the love of God is the source of creation and being, while the essence of God is expressed in infinity, immensity, immutability. The personality of God is manifested to the world in goodness, wrath, grace; the intelligence of God in omniscience, holiness, truth. The self of God is manifested in omnipotence, immutability. The divine personality is manifested in the one attribute of omnipotence. See Bate, Harmony of the Divine Attributes. Charnock, Existence and Attributes of God (Lond. 1845, 8vo, last edit.); Elwet, in Tub. Zeitschrift, 1809; Blasche, Christus, dei et hominis redemptor, 7th ed. VII. History of the Doctrine of God.—The history of the argument for the being of God will be found under NATURAL THEOLOGY. We treat here briefly the history of the doctrine of the nature and attributes of God. The first office of Christianity was to vindicate the spirituality of God against the materialistic and anthropomorphic ideas of paganism, and even of corrupted Judaism. The proposition “God is a Spirit” was therefore a fundamental one; yet at an early period anthropomorphic ideas were developed in the Church. Melito, bishop of Sardis, in his treatise De oussais tou theou (Euseb. Hist. Eccl. iv. 26), taught a corporeal representation of God. Tertullian (adv. Praxem., c. vii) declares Deum corpus esse, etn Spiritus esse; nihil enim incorporeale nisi quod non est; and thus plainly shows that he could not distinguish reality from form even in corporeal things, such as the pho- tophobes took the phrase “image of God” in a material sense, and taught that God is man per eminentiam, etc. (2.) The second error was Dualism (q. v.), brought in by the Gnostic distinction between the supreme God and the Demiurg. See Gnosticism. (3.) Opposed to both these was the philosophical mode of conceiving God, including the idea of immateriality, proved negatively, e.g. Minucius Felix: Ilic nec videt potest—invisus est; nec comprehendi potest—incognitus est; nec essentiam—insignis est: infinitus, immutabilis et omnium irlandiae opposits all crude anthropopathisms, but they were not-successful in correctly separating the real and the sensual view, and hence were led into a subtilizing of the divine attributes. Clement attributes all errors in the apprehension of the Old Testament to the sensual and liberal mode of understanding it, which led men to represent, after human fashion, the nature of God, who is exalted above all human passions. The prophets could represent God to us, not as he is, but only as we sensuals men can understand it (Ström. p. 392). Origen also sees in the Old Testament a condescension of God to the weakness of man.
In fact, there is no wrath in God, but he must appear as if wrathful to the lad, on account of the sufferings which their own evil conduct entailed upon them (Hom. 18, in Jerem.). The Alexandrians disputed the self-substinance of God's primitive justice, and merged it in the idea of a τεταγμένος σωτήρα, a disciplining reformatory love. Augustine spells out God's grace in terms of God as the immediately acting source, in the act of salvation, good and not evil, not of itself, notadium non mutatur, verum etiam mutari non potest, etc. But he declares that no complete definition of God can be given: Deus ineffabilis est: factus dicimus quod Deus non sit, quam quid sit (Comm. in Psal. lxxxxi). I mean that the same controversy and questions as to the nature of God were bound up with the discussion of the Trinity (q.v.); and in the period from Gregory I to the scholastic age (11th century), with that of the doctrines of the Holy Spirit and the Person of Christ. See CHRISTOLOGY. In the scholastic period Anselm supposed an analog (before by Augustine) between the divine mind and the human.

"We cannot know," he says, "the supreme Being in himself, but only after a certain analogy with created beings, therefore most of all with the rational spirit. The more this spirit enters into itself and observes itself, the more it can be trusted in reversion to the knowledge of the absolute Spirit. The human spirit is a mirror in which we may see the image of that which we do not directly behold. The supreme Spirit presupposes his own existence, knows himself; the human spirit supposes not only his own existence but also the human spirit.

Thus the supreme Being expressed himself. As everything which is produced by human art was before in the idea of the formative spirit, and as this idea remains even when the work perishes and is, in this respect, one with the art of the formative spirit itself, so it is in the case of the holy word, but the same word by which God knows himself and all creatures. In the divine Word creatures have a higher being than in themselves: the ideal being rests in the divine thoughts. The relation of the Son to the Father is something elevated above all language. The expression generation is best suited to represent the relation, but not the human.

Further, as God knows himself, he loves himself; his love supposes his being and knowing. This is also denoted by the procession of the Holy Spirit from both; all three pass completely into one another, and thus constitute the unity of the supreme Being" (Monologium, c. 64). The view of God taught by Scotus Eriugena—In de immutabili et essentiali sunt omnino—led, in the hands of David of Dinant and Amalric of Bena, to a pantheistical theory, which was opposed by Aquinas and the later scholastics. As to the attributes of God, the principal discussions of the scholastic period related to his omnipotence and omnipresence. The confessions of faith of the Reformation period generally agree as to the doctrine of the nature, attributes, and works of God; the discussions that have arisen in the bosom of Protestantism on this subject refer chiefly to the doctrines of the Trinity (q.v.) and predestination (q.v.). The later theories of the philosophical period, on the sceptical side, are those of Idealism, Materialism, and Pantheism (see the several heads). Some later Christian writers, in opposing the extremes of German Rationalism, have denied the possibility of any scientific knowledge of God. Mansell (Limits of Religious Thought, Bampton Lectures for 1859) maintains that only a regulative (as distinguished from a speculative) knowledge of God is possible. "A conception of the Deity as purely abstract, we must not conceive him as first cause, as absolute, and as infinite. But do not these three conceptions imply contradiction to each other, when viewed in conjunction, as attributes of one and the same being? A cause cannot, as such, be absolute; the absolute cannot, as such, be a cause. How can the infinite become that which it was not from the first?"

Mr. Mansell here pushes his opposition to the use of reason too far; and finding the words "absolute" and "infinite" used in transcendantal senses by the Germans, he adopts those senses, and reasons as if no other definitions were possible. For criticisms of his work, see London Review, July, 1860, p. 390 sq.; Young, The Province of Reason (London, 1859); Armstrong, The Method of the Divine Government (Edinb., 1859, 6th ed.).

The universal doctrine of God over against the modern speculative idea is well set forth in the following passage: "The problem in regard to God is simply this: The human mind is compelled to think a unity or synthesis of all things. But how is this unity to be conceived? Is it outside the human being, or outside and above it? Here it is that the Christian idea breaks off from the speculative. The Christian, realizing his own personality, feeling intensely that he himself in his inmost being is numerically different from and above nature, is compelled to think of the divine as in like manner supernatural. Having attained to this stage, the next question that arises is, How are we to image forth the divine Being? and the answer is, not surely by the lowest kind of natural existence, but by the highest. The human personality itself, not the immutabilities of the materialistic God, was the inner secret in revealing himself to be the image which shall shadow forth the divine Being. That which comprehends all things must, at least, equal in perfection the highest of these things. Thus the human personality becomes in the Christian system in a way analagous and like the eternal being of the transcendent.
Goddard, Josiah, a Baptist minister, missionary, a native of Scituate, Mass., was born at Wendell, Mass., in 1813; graduated at Brown University in 1838, and at Newton Theological Seminary in 1838. He was appointed a missionary to the Chinese in Siam. China being not yet open to the residence of foreigners. There he labored with success as a preacher, translator of the Bible, and created tracts. Mr. Godfrey, an Anglo-Chinese vocabulary. Being taken with bleeding from the lungs, he removed to Ningpo, one of the treaty ports then recently assigned for foreign trade and residence. Here he continued, with conscious and growing weakness, holding upon life by a peculiarly uncertain tenure, yet with courage and patience, to labor on for six years—preaching, journeying, preparing and circulating tracts, and carrying to completion his version of the New Testament. This is a valuable contribution to the difficult work of Biblical translation in Chinese language. He was an excellent scholar, and made high attainments in the study of that language. He proved himself a sensible and cautious, but brave and earnest worker. The disease against which he had borne up so long proved fatal in 1854. (L. E. S.)

Godken, Antoine, a Roman Catholic bishop, was born at Dreux in 1605. He was destined by his parents for public life, but, having been disappointed in love, entered the ministry. He was one of the ornaments of the Hotel Rambouillet at Paris, where his talent for verse gained him distinction. Richelieu made him bishop of Grasse in 1636. After his consecration he retired to his diocese, and devoted himself to its duties. He subsequently quit the see of Grasse for that of Venice, where he died April 21, 1672. He wrote Morale Charitienne (1605, 8 vols. 12mo): Paraphrases des Epitres de St. Paul et des Epitres Canoniques (1610, 1611, 4to): Pauvres de David, traduits en vers Français:—Nouveau Testament traduit et expliqué (1628, 2 vols. 8vo), besides other smaller ecclesiastical and chiefly biographical. The most important of his productions is l'Histoire de l'Eglise, from the commencement of the world to the end of the 9th century (Paris, 1635-1678, 5 vols. fol.). He left MSS. containing the work on grace in which he was engaged. He disputed the author of his history with his three and the threats of a powerful ecclesiastic induced him to write the rest of his work with less impartiality.—Dupin, Ecles. Writ. 17th cent.; Hook, Ecles. Biog. vol. v.; Niebr, Minnes. xvii-xx; Hoff, Novae. Biog. gen. xx, 885.

Godfrey of Bouillon, duke of Lorraine, was born at Bézé, in Brabant, probably about A.D. 1060. He served with high distinction in the armies of the Emperor Henry IV. Near the end of the 11th century, the first crusade was set on foot, he entered into the movement, and was the first in rank among the Crusaders. "He not only signified himself by valor among the valorous, and by enthusiasm among the enthusiastic, but he showed also disinterestedness, probity, skill, and sagacity, which were of the first order. He maintained the most complete discipline among his division of the Christian army, which he brought safely to the appointed muster-place beneath the walls of Constantinople in the winter of 1096. By his sagacity and firmness he prevented hostilities breaking out between the Crusaders and the Greek emperor, Alexius Connenus, and in the spring of 1097 Godfrey led the Frankish nations into Asia Minor, to the siege of the capital of the Turkish sultan of Nice. This city was captured after a siege, in which the personal valor of Godfrey, as well as his generalship, was frequently displayed. He was tall, well-proportioned, and of such remarkable strength and dexterity in the use of his weapons that he is said, in more than one encounter, to have cloven his foe by a single sword-stroke from skull to skull. After Nice was captured, the Crusaders marched to Antioch, and defeated a Turkish army in the great battle of Dorylaeum. They reached Antioch, in Syria, late in the winter of 1097. The city was captured after an obstinate resistance, and the weakened army of the victors was in turn besieged in its walls by an innumerable host of the Mohammedans. After enduring the utmost suffering and loss, Godfrey led the Crusaders in a sudden sortie upon their enemies, which was completely victorious. The enthusiasm caused among the Christian army by the supposed discovery of the relic of the holy lance was one great cause of this success. It was not till 1099 that the Crusaders reached Jerusalem, and their numbers were then reduced by the sword and by disease to only 1500 horse and 20,000 foot fit for service. The Mohammedan garrison was far more numerous, and the city was fortifically strong. But the zeal of the Crusaders was invincible. The Crusaders had completed the conquest of Jerusalem, and the Syrian City was carried by storm July 15, 1099. Godfrey was proclaimed first Latin king of Jerusalem, but he rejected the title, and assumed the style of "Defender and Baron of the Holy Sepulchre." He defeated the sultan of Egypt at Ascalon, August 12, 1099. Godfrey compiled and promulgated a code named Les Asises de Jerusalem, which, as finally revised towards the close of the 14th century for the use of the Latin kingdom of Cyprus, is printed in old law French in Beaumanoir's Coutumes de Beaumanoir (Bourges and Paris, 1690). He died in 1100. See Creasy, in Rich's Cyclop. of Biography; English Cyclopedia; Michaud, Histoire des Croisades.

Godhead, the nature or essential being of God (Acts xvii, 29; Rom. i, 29; Col. ii, 9).

Godliness, strictly taken, is right worship or devotion, but in general it imports the whole of practical religion (1 Tim. iv, 8; 2 Pet. i, 6). It is difficult, as Saurin observes, to include an adequate idea of it in what is called piety, or what is commonly called devotion; a chiefly biographical. It import knowledge, veneration, affection, dependence, submission, gratitude, and obedience; or it may be reduced to these four ideas: knowledge in the mind, by which it is distinguished from the visions of the superstitious; rectitude in the conduct, that is,-poetry: sacrifice in the life, or renunciation of the world, by which it is distinguished from the unmeaning obedience of him who goes as a happy constitution
leads him; and, lastly, seal in the heart, which differs from the languishing emotions of the luke-warm. The advantages of the study are, peace, safety, usefulness, support in death, and prospect of glory; or, as the apostle sums up all in a few words, "it is profitable unto all things, having the promise of the life that now is, and of that which is to come" (1 Tim. iv. 8).

In 1796, he embarked upon the sublimate bound re-ligion as furnished in the various particulars enumerat-ed.

Barrow, Works, i, 9; Scott, Christ. Life; Scougal, Life of God in the Soul of Man; Saurin, Sermons, Eng. trans. v, serm. 3.

Godman, John D., an American naturalist and physician, was born at Annapolis, Maryland, in 1754, and at an early age left an orphan, was a pupil, and apprentice to a printer, and afterwards entered the navy as a sailor-boy. At nineteen he commenced the study of medicine, and on completing his studies he settled in Philadelphia as a physician and private teacher of an-thomy, and for some time was an assistant editor of the Medical Journal. In 1795 he was elected to the professorship of anatomy in Rutgers' Medical College, and removed to New York, where he soon acquired ex- ten-sive practice as a surgeon. Ill health, however, obliged him to relinquish his practice, and spend a winter in the West Indies. He died of consumption at Greenwich, Pa., April 17, 1830. He wrote a num-ber of medical works of value; but he is men- tioned here because of the fact that, having at one time adopted the infidelity and atheism of the French natu-ralists of the last century, the death of a friend in 1827 led him to reflection and to the reading of the Scrip-tures, and he became eminent for Christian piety. An account of him by Dr. T. Sewall is published by the American Tract Society.—Davenport, Biol. Dic- tionary; Allibone, Dictionary of Authors, i, 861.

Godman. See INCARNATION.

Godwin, Francis, an eminent English prelate and Church historian, was born at Hastingon, North-amptonshire, in 1561. In 1578 he entered the college of Christ Church, Oxford, of which his father, Thomas Godwin, was dean. Here he took successively the degrees of B.A. in 1580, M.A. in 1583, B.D. in 1598, and D.D. in 1595. He held divers ecclesiastical offices un-till his publication of the Catalogue of the Bishops of England (1621), in which he was appointed bishop of Lindauf. A Latin translation of this work, dedicated to James I, secured the support of the bishop of Hereford. He died April 10, 1633. His works are, A Catalogue of the Bis- hops of England since the first planting of Christianity in the island, with a history of memorable actions (1601, 4to; 2d ed., with additions, and Latin translation, 1615. This translation, with a continuation, was republished by Richardson, under the title De Praestibus Angliae Commentarius. Cambridge, 1748, folio);—Sermon Anglicorum Hereticorum VIII, Edwaedo VI, et Mariae regnantibus, 4 volume (1614, fol.; London, 1628, 4to; English, by his son Morgan, 1650, fol.);—Nuncius immensus in Utopia (1620, 8vo):—A Computation of the Value of the Roman Sextere and Attic Taelum (1630):—The Mm in the Moon, or a Discourse of a Voyage thither by Domingo Gonzalez (1638, 8vo); another edit. of 1665 (with a translation of the latter) (1666, 8vo). See Biographia Britannica; Chalmers, General Biog. Dictionary.

Godwin, Thomas, D.D., an English theologian, was born in Somersethire in 1587. He entered Mag-dalen Hall, Oxford, in 1602, became head master of the free school of Aldington in 1609, and afterwards rector of Burscot, in 1617. He was also dean of Chichester, and, finally, pastor of the Lutheran Church in Paris in 1649. There, together with Boisard, he opened the church called the Bib-lettes, took care of over 14,000 souls dispersed all over Paris, attended to the poor, the schools, and all the other details of his charge. He was one of the found-ers of the Missions Evangeliques, of the Societe Biblique.
the Société protestante de Proovance et de Secours mutuels, and the Société de la Morale Chrétienne. In 1815, at the time of the massacre of the Protestants at Nîmes, a London society had made proposals to the French Protestants to help them. Had the proposals been accepted, the position of Protestantism in France would have become even more worse than it had been. Goepp, while gratefully acknowledging the offer, declined, in the name of the French Protestants, accepting the protection of any foreign power. The French government acknowledged the services rendered by Goepp by creating him a member of the Legion of Honor. Goepp died at Paris June 21, 1856. Besides his immense pastoral work, Goepp did a great deal of literary labor. He wrote, besides numerous pamphlets and funeral discourses, Précis de l’histoire de la chrétienne exposée par le texte de l’Ecriture Sainte (in collaboration with Boisard, Paris, 1815, 8vo).—Prises à l’usage du culte domestique, suivies des exercices et préparation à la sainte Cène (same, Paris, 1821, 12mo).—Principes de la Religion chrétienne, à l’usage des écoles élémentaires (Paris, 1826, 12mo).—Discours sur le nom et le but de la Société de la Morale chrétienne (Paris, 1834, 8vo), etc. See Villenave, Notice sur J.-J. Goepp. — Hoefer, Nouv. Biog. Générale, xx, 949 sq.

Goeing, Jacob, a Lutheran minister, was born in York County, Pa., Jan. 17, 1775. His father was a farmer, and had designed his son for the same occupation, but, as the youth showed promising talents and holiness of character, his father consented to his becoming a minister of the Gospel. He studied theology with Dr. Helmuth, and in 1786 became pastor of the Lutheran Church at York, Pa. Here he continued to labor until his death in 1807. Mr. Goeing was regarded as an extraordinary man, a profound scholar, and an eloquent preacher. Nothing could check his ardor in the prosecution of his studies, or divert him from his purpose. In the pulpit he would often electrify his audience, and sway them at his will. It was his practice to present to his people systematic doctrinal instruction, always accompanied with a pointed application and an earnest appeal. On the afternoon of the Lord’s day, in connection with the catechetical exercise, he examined the whole congregation on the subject of the morning’s discourse. Although he wrote much, he published very little—only two small works on Rhetoric and on Method. His Méthode contained discussions of theological questions, inquiries into the Oriental languages, and translations from the Arabic poets, but these valuable papers, with all his letters, in compliance with his directions in his last illness, were committed to the flames. (M. L. B.)

Goerres (or Gößers), Johann Joseph von, an eminent German Roman Catholic writer, was born Jan. 25, 1776, at Coblenz, and educated at the gymnasium in that place. In early life he was involved in politics, and in 1798 he set up a Republican newspaper, the "Rothe Blätt." Being sent on a deputation to Paris in 1799, he saw French "freedom" under Bonaparte, and became disgusted with it. In that year he gave up his journal, and devoted himself to the study of law, and at intervals to philology and natural science. In 1802 he appeared his Aphorismen über Kunst (Aphorisms on Art); in 1805, Erzähler der Physiologie (Physiologist); and Glaube und Wissen (Faith and Knowledge). In 1808 he went to Heidelberg, and lectured on Physics there till 1808, when he left. From 1811 to 1810 he published Mythengeschichte der Asiatischen Welt (Mythology of the Asiatic World, Heidelberg, 8vo). In 1814 he again entered the political field against the French as editor of the Rheinischer Merkur (The Rhine Mercury), an organ to express the whole public mind of Germany. It was prohibited by the Prussian government in 1816—a strange reward for the services it had rendered. In 1819 he had to take refuge in Strasburg, in consequence of publishing Deutschland und die Revolution, in which he pleaded for the liberal party of Germany. He afterwards published a number of political works of the same vein, and tinged with mysticism. In Strasburg he was surrounded by the Roman Catholic influence, and began to despair of reforming society by politics. In 1825 he accepted the professorship of history in the new University of Munich, and there he spent the remainder of his days. In 1838-42 appeared his Christliche Mystik (Christian Mysticism, Ratibon, 4 vols. 8vo). During the current conflict, he was considered a prominent adherent of the first philosophic system of Schelling, but he found in the abstruse speculations of German philosophy no elements adequate to content his restless spirit of investigation. He was then swept away by that current of conservative Roman Catholic restoration which in the early part of the present century, carried a number of German politicians, historians, and poets into the bosom of the Church of Rome. Like most of them, Goerres never regarded Romanism as it appears in the light of history, but invested it with all the brilliant features and colors of the ideal picture of a political society which had been previously conceived in his own mind. Still, under the influence of his former studies, he went down to the deep grounds of mysticism to discover there a light in the darkness, which he had found bestressing the sources of all sciences. He persuaded himself that he had there a great discovery in finding new and wonderful relations between the fables and myths of paganism as a shadow, and Roman-Catholic Christianity as the full truth; between the myriads of mysteries in all sciences, and the Roman-Catholic doctrine as a key to all. At the beginning and end of his science he posted a Roman Catholic dogma as a watchman; by it he measured all the manifold inventions of our age, boldly pretending that everything true in them came from and pointed to a "Catholic" truth; and then he called upon the youths of his Church to rewrite the history of the historical moment, also the political champion of the Roman Catholic interests, principally through the "Historische-politische Blätter" of Munich, a periodical edited, although not under his name, yet under his guidance and controlling superintendence. In one thing, however, Goerres was greatly disappointed. He found many readers, hearers, and admirers, but only a very few disciples. They could not master the sense of their teacher’s words; a bad omen, indeed, for his anticipated domination over the literature of the world. The first volume of his collected works (Geheimnisse der Wissenschaft, heraus, von Marie Goerres) appeared at Ratibon in 1854. See Meth. Quart. Rev. Jan. 1855, p. 146; Sepp, Joseph von Goerres, eine Skizze, etc. (Ratibon, 1848); Haneberg, Zur Erinnerung an J. J. Goerres (Munich, 1849); Heinrich, J. L. v., ein Lebensbild (Frankfort, 1867); Hist. Polit. Biblioth. (1956), ii. 149; Gieseler, Gesch. der Polit. Literatur Deutschlands (Leips, 1854); Hoefer, Nouve. Biog. Générale, xx, 957; Herzog, Real-Encyclop. v, 224 sq.

Goertner, John Peter, a minister of the Lutheran Church, was born April 26, 1797, at Canajoharie, N. Y. He was graduated at Union College in 1822, the Reformers of that time being his chief study. For a time he prosecuted his studies at Hartwick Seminary under the direction of professor Hagelius, and then received private instruction from
Dr. Christian Schaeffer, of New York City, whom he aided in his pastoral work. He was licensed to preach by the New York Ministerium in 1824, and, after performing extensive missionary labor among the destitute Lutherans in the northern and western counties of the state and in Canada, he accepted a call to Johnstown, N.Y. He was loved and venerated not only by his flock, but by all who were the results of his earnest labors, and the salutary influence he exercised. His career was a brief one. He died when only thirty-two years of age from pulmonary disease. The impress of his life and efforts in the sanctified, refined, and loving spirit will descend to children and children's children. He left a valuable MS. Journal of six Months' Residence at Rome, and Visit to interesting Cities in Europe. (M. L. S.)

Goeschel (or Göschel), Karl Friedr., a German writer on philosophy, was born in 1784 at Langenzaalza. After studying law at Leipzig he became judge in Langenzaalza, and in 1816 published a history of that town. In 1844 he received an appointment in the ministry of justice as "Geheimer Oberregierungsrat," from 1845 to 1848 he was president of the consistory of Magdeburg. In 1848 he withdrew from the public service and lived in retirement at Naumburg, where he died, Sept. 22, 1892. He at first favored (Apologists über Nichstieren und absolut. Wissen, 1829) to show the agreement of the Hegelian philosophy with Christianity, also to refute Strauss from this standpoint (Beiträge zur specul. Philosophie, 1838); but gradually he joined the more liberal and the party of the Confessional Lutherans. He conducted the judicial proceedings against Williche, Uhlich, and the Friends of Light (q. v.), and in 1848 had to leave Magdeburg in consequence of the excitement of the people against him. He had previously tendered his resignation because the government had allowed the Protestant population of Magdeburg the use of one of the Protestant churches of the city. Goeschel wrote several works on Dante which are highly valued. — Herzog, Real-Encyclopädie, xix, 567.

Goettingen (or Göttingen), a town of Prussia, with 12,974 inhabitants (1864). It is the seat of a celebrated German university (Georgia Augusta), which was founded in 1533 by king George II of England, and opened in 1737, and which numbered, in 1869, 106 teachers and 805 students. The library of the university contains over 800,000 volumes and 5000 MSS. Among the best known philosophers and theologians of the university belong Gieseler (q. v.), Luke (q. v.), and Ewald. See Liiter, Versuch einer akadem. Gelehrtenzusammenh. der Universität Göttingen (2 vols. Goett. 1755-88; continued by Sanfall, Hamb. 1820; and by Osterley, Goett. 1880). (A. J. S.)

Goethe (or Götzte), Georg Heinrich, a German writer, was born at Leipsig, Aug. 11, 1667. In 1687 he passed M.A. at the University of Leipzig, and in 1690 became Protestant pastor of Bury, in the duchy of Magdeburg. In 1702 he became superintendent of the churches of Lubeck, in which office he continued until his death, March 28, 1729 (according to others, April 29, 1729). He left over one hundred and fifty works, mostly on literary or historical questions. The most important are, De Virginis pacluhibus veterum christianorum (Lpz. 1687, 4to); —De Archichiconia veteris Ecclesiae (Leipsig, 1687, 4to); —De dubia Atheniari Scripta (Lpz. 1687, 4to); —De Sacrae Scripturae D. Bernardi (Drezd. 1673, 4to); in which he attempted to prove that St. Bernard preached the same doctrines as Luther.—Parallellellus Juda proctorii et Romanae Ecclesiae (Lubeck, 1706, 4to); —Elogia Germanorum quorumdam Theologorum (Lub. 1709, 4to), this work contains eighty-four biographical sketches.—Hofer, Neues, 62 sq.

Goethe (or Götzte), Johann Melchior, a German divine, was born in Halberstadt, Oct. 16, 1717, and studied at Jena and Halle. He was for nine years (1741-50) assistant preacher at Aschersleben, was then called to Magdeburg, and finally became pastor of St. Catharine, at Hamburg, in 1755. He was an orthodox Lutheran, and attacks especially the semi-infidel writings of such men as Lessing, Goethe, Semler, etc. He died May 19, 1786, leaving behind him more than sixty works, the chief among which are: Thesaurus doctrinarum et principia eticorum (2d edit. 1770), against the latent neologism of Schlosser and Alberti; —Exercitatio historico-theologica de patrum principium Ecclesie fructorum successu in propagando gen- tim componentium quadam amissae doctrina christiana (Halle, 1738, 4to); —Gedanken u. d. Betrachtung von der Bestimmung der Menschen (Halle, 1748, 8vo); —Ver- tiefung des richtigen Begriffs d. d. Aufsetzung der Todten, gegen Basidae (Hamburg, 1764, 4to, etc.). His autobiography was published in 1786 (3 vols.). See F. L. Hoffmann, Hamb. Stichr. iv; Serenium, 1855, No. 21 a, 22; Thies, Gelehr. Hamb. Deutsch. Biblioth. exuvi, xvii, 615-629; Lessing, Mendeisohn, Riebeck and Goetz (Offenburg, 1767, 8vo); Werksuche Nachr. d. d. Leben d. M. Götzte (Hamb. 1768, 8vo). —Herzog, Real-Encyclopädie, 256; Hofer, Neues. Bij. Gén. xxi, 64 sq.

Goffine, Leonord, a Roman Catholic priest, was born at Bremen in 1648, and in 1674 entered the Convent of the Premonstratensians in the abbey of Steinfelde, loured many years as a priest at Oberstein and Coerfeld in Westphalia, and died August 11, 1719. He is the author of a devotional work (Christkathol. Unternehmungen und Erfahrungen) which has passed through a very large number of editions and is still in common use. There are new revised editions of the work by Steck (Tubingen, 9th ed. 1869), and by Diez (2 vols. Wurzburg, 1864). (A. J. S.)

Gog (Heb. id. 219; Sept. and N. T. Toph, but Tophy in 1 Chron. v. 4; Vulg. Gog), the name of two men, but whether they have any connection is doubtful. It also occurs in the Samaritan and Sept. for Agag, in Numb. xxiv. 7, apparently for the sake of euphony, tradition (Mishna, Shabb. 118) making the Messianic time to be distinguished by an antecedent struggle with Gog, as the Apocalypse does the millennium. See also Hanor-Dog.

As to the signification of Gog, it appears to mean mountain, i.e. Caucasus (Persic khor, Oesotick choy, i.e. mountain; and even the classical name 'Caucasus' originated in Kock-Kof), since Caucasus was the chief seat of the Scythian people. The hardening of the last sound in (khor) (gog) from (khor) seen in (la) seems to have taken place early, and when the name had already become that of a people, the other names, Magog, Agag (Samaritan Agag, gentile Aggah, Phoenic. Agag) also arose. Another explanation from the Phelvi koka, "moon" (see Gracchart of the Daries, p. 64), because they prayed to the moon, is improbable. A Chaldean etymology is also possible. From the reduplicated form Mh33 (from the root Mhi, whence נב, a roof), in the sense of "to be high or overtopping," איה might signify a mountain or summit (compare Arabic juyu, breast of a ship, i.e. something heightened). Figuratively, this stem would mean gigantic, great of stature, powerful, warlike (cognate withי -ש of Isa. xviii. 2, 3); comp. Sanskrit kai, to be, mighty (in the Vedas, Persic war), king, modern Persian kov, warlike or valorant; in which sense the Amalekite in Num. xiv. 20 is called the Gog, and the Heb. name Gog, and the Phen. Agag in the story of Ogyges, may be taken. In Gen. xiv. 1 Symmachus has taken מגא, Gog, i.e. heathen for גוג, Gog, and therefore translates it by "Seythians." —Fürst, Heb. Lex., n. v.

3. Son of Shemshak, and father of Shime, and one of the descendants (apparently great-great-grandson) of Reuben (1 Chron. v. 4). I.C. post 856. Most copies of the Sept., however, read, very different names here.
2. In Ezekiel Gog is (1.) the name of a mixed race dwelling in the extreme north, comprehended by the Greeks under the name of the Scythians; whence transferred (2.) to the centre and representative of their race, i.e. their king (chap. xxxviii. 89). Gog comes forth from the distant north (xxxviii. 15; xxxix. 2), the home of the Austria, of the Roman empire, and of the Tartar (ap kir also of Siras), with his army of cavalry (xxxviii. 15), marching against the people of Israel, where he is miraculously encountered (xxxviii. 17-23) and annihilated (xxxix. 1-8). In the later tradition which sprang from Ezekiel's description, Gog along with Magog represents the invasion of the north, the Scythians, Caucasians, etc. (3.) Gog is the name of the country of the people Gog, i.e. of the Scythians; but this only in the somewhat modified language of the Apocalyptic seer (Rev. xx. 8, 14, together with May a',) as it has become a geographical name in Arabia; and this corresponds with the assertions of other Oriental authors, in whose traditions this people occupy an important place, as the name of a country (see D'I Herbelot, Bibl. Or. p. 528).

Interpreters have given very different explanations of the name Magog and Gog, and the differences are generally understood as being symbolic expressions for the heathen nations of Asia, or more particularly for the Scythians, a vague knowledge of whom seems to have reached the Jews in Palestine about that period. Thus Josephus (Ant. i. 6, 3) has dropped the Hebrew word Magog, and replaced it by Xezdias and Magog does Jer: ome, while Suidas renders it by Paphos—a difference that matters but little in the main question, since E'ro:math in the ancient authors, is but a collective name for the northern but partially-known tribes (Cellarius, Notit. ii. 758 sqq.; and, indeed, as such a collective name, Magog seems to indicate in the Hebrew the tribes about the Caucasian mountains (comp. Jerome on Ezek. ibid.). Bothart (Phal. iii. 13) supports the opinion of Josephus, though by very precarious etymologies. According to Reinegeg (Descrip. of the Caucas, ii. 70), some of the Caucasian peoples call their mountains by Gog, and the highest northern points Magog. The Albanians are of opinion that the descendants of Gog and Magog inhabit the northern parts of Asia, beyond the Tatars and Sclavonians, and they put Pajaz and Magaj always in conjunction, thereby indicating the extreme points of north and north-east of Asia (Bayer, in Comment. Acad. Petrop. i). Nor are there wanting interpreters who understand by the Gog of Revelations the anti-Christ, and by the Gog of Ezekiel the Goths, who invaded the Roman empire in the 5th century of the Christian era. (See Dandorfer, Gog et Magog, Lam. 1863, Zc schen, in Zeit. f. Thal. 1862, p. 111.) In the Apocalypse these names appear to symbolize some future barbarian or infidel enemy that is to arise against Christianity (Stuart's Comment. ad loc.). See Magog.

Gogerly, Daniel John, a Wesleyan Methodist missionary and scholar, was born in London in August, 1792, and at fourteen united with the Wesleyan Methodist Society. He showed signs of remarkable talent, and at an early age became a local preacher. In 1818 he was sent to Ceylon to take charge of the Wesleyan mission at Colombo. In 1822 he entered the regular missionary service, and was one of the first missionaries to preach extempore in Cingalese. He devoted himself earnestly to the study of the languages of the country, especially the Pali, which is, to the Buddhist, what Sanscrit is to the Brahmin. He was the first European who could translate a Pali scripture, and had entered the study of this dialect. In 1834 he was stationed at Madura, where he had special opportunities to study Pali under learned native priests. He arranged about 15,000 words for a dictionary, and succeeded in having copied the whole of all the sacred books, with their glosses. This copy is now in the possession of the Wesleyan mission. In 1838 Mr. Gogerly became chairman of the mission, and afterwards general superintendent. The government appointed him one of the Central School Commission of Ceylon. In 1822 he became one of the translators for the British and Foreign Bible Society, and the Cingalese version is largely due to his labors. Every word of all the editions of the Bible published by that society has been read by his eye as editor and corrector. Among his most important literary labors were contributions to the Journal of the Royal Asiatic Society, and to other periodicals, in illustration of the Pali literature of Buddhism. He was vice-president of the Ceylon branch of the Royal Asiatic Society. At an early age he entered the Pali literature, and at a late age, having been ordained a Buddhist, he published Christiani Pragmata: the Evidences and Doctrines of the Christian Religion: in Cingalese (Colombo, Wesleyan Mission Press, 1862). A native gentleman offered fifty dollars for a Buddhist exposition of this work, but it never has appeared. Mr. Gogerly died September 6, 1862. Born in England and France, he was recognised as the master of Pali literature. His writings on the subject are to be collected, it is said, and published in Paris.—London Quarterly Review, April, 1863, art. v.

Goguet, Antoine-Ven, a French jurist, was born April 18, 1716, and became counselor to the parliament of Paris. He applied himself closely to literature, and especially to historical studies. His name is chiefly preserved by his great work Origine des Lois, des Arts, et des Sciences, chez les Anciens Peuples (3 vols. 4to, Paris, 1758, in which he was assisted and introduced to the public by Pufteur). It shows the history of civilization among the Assyrians, Babylonians, Egyptians, Phoenicians, and the early Greeks, in vol. i.; and in vol. ii., the period from the death of Jacob to the establishment of monarchy among the Hebrews, with the usages, laws, and customs of the Lydians and Phrygians, with the states of Greece and the people of Crete. The third volume carries the subject down to the time of Cyrus, and upon the same plan as the other two. Goguet adds also dissertations on ancient coins; on the astronomical periods of the Chaldseans; on the antiquities of the Babylonians, Egyptians, and Chinese; on Sanchoniste; and on the authenticity and antiquity of the book of Job. Goguet died in 1758. His work has passed through several editions in France, of which the last is that of Paris, 1869, 3 vols. 8vo. There is an English translation, Origins of Laws, etc. (3 vols. 8vo, 1775, 18 vols. 8vo).—Beth Copeland, io; Hoeber, Nouv. Buvr. Général., xxii., 75.

Golm is thought to be the proper name of a people in northern Palestine ("Golm, Goyim, Josh. xii. 23; Sept. Tani, Vulg. gentes, A. V. 'nations'), whose king lived at Gilgal (q. v.). A similar designation is employed also in Gen. xiv, 1 respecting Tidal (q. v.), 'king of nations' (Sept. Tali, Vulg. gentes). It is, however, the universal term for Gentiles (q. v.).

Goring, Jonathan, D.D., a Baptist minister, was born at Reading, Vt., March 7, 1786, and graduated at Brown University in 1809. He was licensed to preach while a member of college, and pursued the study of theology under the direction of Dr. Messer, then president of the college. Dr. Messer's orthodoxy was not above suspicion, and Mr. Goring left the uninteresting views of that college for a time, but afterwards and finally became solidly grounded in 'the doctrines of the Reformation.' He was ordained in 1811, and settled at Cavendish, Vt. At this time, out of forty-five Baptist ministers in that state, he was the only one who had been educated at college, and had an extensive influence. He was called in 1815 to Worcester, Mass. Here his labors were the means of building up a large and efficient church. He took an active interest in public education, and aided in founding the Newton Theological Institution. A journey, in 1815, in which he was then "the West," awakened his interest in home missionary enterprises. The American Baptist Home
GOLAN (Heb. Golon), a place accorded to Gesen. but circle accorded to Furst; Sept. Gōlon; once Galon, גולון, "keri" at Jos. xxi, 27, Sept. Golen, a city of Bashan (Deut. iv. 24) allotted out of the half tribe of Manasseh east to the Gerazonite Levites (Jos. xxii, 27; 1 Chron. vi, 71), and one of the three cities of refuge east of Bashan (xx, 6). We find no further notice of it in Scripture; Josephus (Ant. xvi. 308, Jerome) and Josephus (Ant. xviii. 1) says it was still an important place in their time (Onomast. s. v. Γολον, Gaulon; Reland, Palest. p. 810), its very site is now unknown. The word is recognised in the present Judah, mentioned by Burch- harn (Syr. Jud. 296) as given to the district lying east of the lake of Tiberias, and composed of the ancient Gaulonitis, with part of Bashan and Argob (see also Robinson's Researches, iii. 308, 312; Appendix, p. 149, 162). It is indeed clear that the Gaulonitis of the later Jewish history must have included part of the modern Bashan, if Gaulonitis was the province, seeing that Gaulon was certainly in Bashan. The city itself may have been situated on tell el-Feras, which, although destitute of ruins, is the most prominent part of the Jabel Heilich that principally constitutes the modern district. Some have supposed that the village of Nqura, on the eastern border of Judah, round which are extensive ruins (see Porter, Handb. for Syr. and Palent)), is identical with the ancient Golon; but for this there is not a shadow of evidence; and Nawa, besides, is much too far to the eastward.

Some difficulty has been suggested as arising from the fact that the Judas whom Josephus (Ant. xvi. 308, 1) calls a Gaulonites is called by Luke (Acts v, 87) a Galilean. This is the more remarkable, as Josephus elsewhere (War, ii, 20, 4) carefully distinguishes Galilean and Gaulonitis. Yet he himself elsewhere calls this the name of the Judas whom Josephus (Ant. xviii. 1, 3; xx, 5; xx, 2, 17. 2; War, ii, 9, 1). It is, from this, probable that Judas had a double cognomen, perhaps because he had been born in Gaulonitis, but had been brought up or dwelt in Galilee; as Appollonius, although an Egyptian, yet was, from his place of residence, called Rhodes (see Kuy- nius in Jud., ii, 185, 27). See Jud., ii, 183.

The city of Golon is several times referred to by Josephus (Γαλονια, War, i, 4, 4, and 8); he, however, more frequently speaks of the province which took its name from it, Gaulonitis (Γαλονιατης). When the kingdom of Israel was overthrown by the Assyrians, and the dominion of the Jews in Bashan ceased, it appears that the aboriginal tribes, before kept in subjection, but now annihilated, rose again to some power, and rent the country into provinces. Two of these provinces at least were of ancient origin [see TRACHONIS AND ERAN]. and had been distinct principalities previous to the time when the Roman emperors united them under one sceptre. Before the Babylonish captivity Bashan appears in Jewish history as one kingdom; but subsequent to that period it is spoken of as divided into four provinces—Gaulonitis, Trachonitis, Trachonitis, and Batanes (Jos. antiqu., iii. 5, 3, and 7, 4; i, 6, 4; xvi, 9, 1; War, i, 20, 4; iii. 8, 1; iv. 1, 1). It seems that when the city of Golon rose to power it became the head of a large province, the extent of which is pretty accurately given by Josephus, especially when his statements are compared with the beautiful description of Bashan, east of the confine of Galilee and north of Gadara (Gadara, Josephus, War, iii, 8, 1). Galama, an important town on the eastern bank of the Sea of Galilee, now called El-Hum, and the province attached to it, were included in Gaulonitis (War, iv, 1, 1). But the boundary of the provinces of Gadara and Galama must evidently have been the river Hioromax, which may therefore be regarded as the south border of Gaulonitis. The Jordan, from the south to the Sea of Galilee, is the boundary (Josephus, War, iii, 8, 5). It is important to observe that the boundaries of the modern province of Jerash (the Arabic form of the Hebrew גַּלְוָת, from which is derived the Greek Γαλα- νονίστη) correspond so far with those of Gaulonitis; we may therefore safely assume that their northern and eastern boundaries are identical. The western boundary is bounded on the north by Jodur (the ancient Iturae), and on the west by the Hauran [q. v.]. The principal cities of Gaulonitis were Golon, Hippotes, Galama, Ju- lias or Bethsaida (Mark viii, 22), Seleucia, and Sogane (Josephus, War, iii, 8, 1, and 5; iv, 1, 1).

The greater part of Gaulonitis was a flat and fertile table-land, well watered, and clothed with luxuriant grass. It is probably to this region the name Miskhor (מישكور) is given in 1 Kings xx, 23, 25—"the plain" in which the Syrians were overthrown by the Israelites, near Aphek, which perhaps stood upon the site of the modern Fik (Stanley, App. § 6; Porter, Handb. for Syr. and Pal. p. 495). The western border of Gaulonitis, along the sea of Galilee, is steep, rugged, and bare. It is upwards of 2000 feet in height, and when seen from the city of Tiberias resembles a mountain range, though in reality it is only the supporting wall of the plateau. It was this remarkable feature which led the ancient geographers to suppose that the mountain range of Gilead was joined to Lebanon (Reland, p. 342). Further north, along the bank of the Upper Jordan, the plateau breaks down in a series of terraces, which, though somewhat rocky, are covered with rich soil, and clothed in spring with the most luxuriant herbage, spangled with multitudes of bright and beautiful flowers. A range of low, round-topped, picturesque hills extends southward for nearly twenty miles from the base of Hermon along the western edge of the plateau. These are in places covered with noble forests of prickly oak and terebinth. Gaulonitis was once densely populated, but it is now almost completely deserted. Among the towns and villages which it once contained are still left the names of 127 places, all of which, with the exception of about eleven, are now uninhabited. Only a few patches of its soil are cultivated, and even the best of its pastures are but the tender grass of early spring. The flocks of the Turkmans and the Fudhili Arabs—the only tribes that remain permanently in this region—are not able to consume it; and the 'Anazeh, those "children of the East" who spread over the land like locusts, and whose camels are without number" (Judg. vii, 23), only arrive about the beginning of May. At that season the whole country is covered with them—their black tents pitched in circles near the fountains, their cattle thickly dotting the vast plain, and their fierce caravans roaming far and wide, "their hands against every man, and every man's hand against them."

For fuller accounts of the scenery, antiquities, and history of Gaulonitis, see Porter's Handbook for Syria and Pal. p. 295, 424, 461, 531; Five Years in Damascus, ii, 250; Journal of Soc. Lat. vi, 293; Burchard's Tan. iii, 397; Reland, Land in Asia, iii. 277; Wilkins, and Thomson, Land and Book, ii, 12 sq.; Schwarz, Palest. p. 220. See Bashan.

Gold (Gr. χρυσόν, χρύσον, the last being prob. a diminutive of the former and more general term, and therefore expressing gold in a small piece or quantity, especially as wrought, e.g. a golden ornament, 1 Pet. iii. 3; Rev. xvi. 11; xviii. 13; xx, 10; xx, 6; xx, 83; 1 Pet. i, 18; but also used of the metal generally, Heb. ix, 4; 1 Pet. i, 7; Rev. iii. 18; xxii.
GOLD

18, 21), the most valuable of metals, from its color, lustre, weight, ductility, and other useful properties (Pliny, *H. N.* xxxii, 10). As it is only procured in small quantities, its value is less liable to change than that of other metals, and this, with its other qualities, has in all ages rendered it peculiarly available for coin. There are six Hebrew words used to denote it, and four of them occur in Job xxviii, 15, 16, 17. These are:

1. בֶּן = sobah, the common name, connected with בֶּן = teashah (to be yellow), as Germ. *geld*, from *gold*, yellow. Various epithets are applied to it, as *fine* (2 Chron. iii, 5), *refined* (1 Chron. xxviii, 18), *pure* (Exod. xx. 3). Some of these, *beaten gold* (בָּשָׁל =) is probably melted gold; *Sept. λευκίας*; used of Solomon’s shields (1 Kings x, 16). In Job xxviii, 22 it is rendered in the A.V. “fair weather;” *Sept. מָשָׁלְת יָרָשָׁא (comp. Zech. iv, 12). The corresponding Chald. word is בִּנְנ = dehab (Dan. ii, 92; iii, 1, 5, 7).

2. נָשָׁפֶה (Job xxviii, 15), elsewhere as an epithet, נֶשָׁפֶה (Job xxviii, 15, 16) which is rendered, as also in Rev. xiv, 13, as a noun, *gold*.

The countries mentioned as producing gold are Arabia, Sheba, and Ophir (1 Kings iv, 28, 31; Job xxviii, 16; in Job xxviii, 24 the word *Ophir* is used for gold). Gold is not found in Arabia now (Nebihr’s *Travels*, p. 141), but it is used to be (Artemidor, ap. Strabo, xvi, 3, 18, where he speaks of an Arabian river *ψεύρος*; in Pliny, *Nat. Hist.* xii, 56), that it was found there native (*ψεύρος*) in good-sized nuggets (*βαλάφες*). Some suppose that Ophir was an Arabian port to which gold was brought (compare 2 Chron. ii, 7; ix, 10). Other gold-bearing countries were Uzaph (Jer. x, 9; Dan. x, 5), Parvaim (1 Chron. iii, 6), and (at least partially) Havilah (Gen. ii, 11). No traveller in Palestine makes any mention of gold except Dr. Edward D. Clarke. At the lake of Tiberias, he observes, “Native gold was found here formerly. We noticed an appearance of this kind, but, with the superficial nature, neglected not to give it more attention to it, notwithstanding the hints given by more than one writer upon the subject.” However, for every practical purpose, it may be said that Palestine has no gold. It is always spoken of by the Jewish writers as a foreign product. As gold was very common in Egypt, it is, in Egypt, at a very early date, much of that in the hands of the early Hebrews was probably obtained thence (Exod. xii, 28; xxxii, 2, 4; xxxviii, 24).

Metallurgical processes are mentioned in Ps. lxi, 10; Prov. xvii, 23; xxxvii, 21; and in Isa. lv, 6, the trade of goldsmiths (compare Judg. xvii, 4, 6). See Goldsmiths.

Gold, in the Scriptures, is the symbol of great value, duration, incorruptibility, and strength (Isa. xiii, 12; Lam. iv, 2; 2 Tim. ii, 20; Prov. xviii, 11; Job xxxvi, 19). In Dan. ii, 38, the Babylonian empire is a “head of gold,” so called on account of its great riches; and Babylon was called by Isaiah, as in our version, “the golden city” (xiv, 4), but more properly “the exactness of gold.” In Ecclus. xii, 6, some explain the expression “or the golden bowl be broken” of the human head or skull, which resembles a bowl in form. In Rev. iv, 4, “the elders,” and ix, 7, “the seven golden lampstands.” “The gold is not that thou mayest be rich”), though others interpret it of being rich in good works before God. In 1 Cor. iii, 12, it seems to denote sincere believers, built into the merely as a very precious article of commerce, and was weighed like other articles” (Jahn, *Bibl. Arch.* § 115; comp. 1 Chron. xxii, 25).

Gold was extremely abundant in ancient times (2 Chron. xxii, 14; Nah. ii, 9; Dan. iii, 1); but this did not depreciate its value, which was still the standard of values consumed by the wealthy in furniture, etc. (1 Kings vii, 22; x, passim; Cant. iii, 9, 10; Esth. 1, 6; Jer. x, 9; comp. Homer, *Od. xix*, 56; *Herod. ii*, 82). Probably, too, the art of gilding was known extensively, being applied even to the battlements of a city (Herod. i, 16) and other authorities quoted by Layard, ii, 264). Many tons of gold were spent in the building of the Temple alone, though the expression περίκας αστήν (2 Chron. i, 15) may be considered as hyperbolic. It is, however, confirmed by the history of the other Asiatic nations, and more especially of the Persians, that the period referred to really existed in gold, which was imported in vast masses from Africa and the Indies (Heeren, *Ideen*, i, 1, 37 sq.). The queen of Sheba brought with her (from Arabia Felix), among other presents, 120 talents of gold (2 Chron. ix, 22).

The gold of countries mentioned as producing gold are Arabia, Sheba, and Ophir (1 Kings iv, 28; x, 1; Job xxviii, 16; in Job xxviii, 24 the word *Ophir* is used for gold). Gold is not found in Arabia now (Nebihr’s *Travels*, p. 141), but it was used to be (Artemidor, ap. Strabo, xvi, 3, 18, where he speaks of an Arabian river *ψεύρος*; in Pliny, *Nat. Hist.* xii, 56), that it was found there native (*ψεύρος*) in good-sized nuggets (*βαλάφες*). Some suppose that Ophir was an Arabian port to which gold was brought (compare 2 Chron. ii, 7; ix, 10). Other gold-bearing countries were Uzaph (Jer. x, 9; Dan. x, 5), Parvaim (1 Chron. iii, 6), and (at least partially) Havilah (Gen. ii, 11). No traveller in Palestine makes any mention of gold except Dr. Edward D. Clarke. At the lake of Tiberias, he observes, “Native gold was found here formerly. We noticed an appearance of this kind, but, with the superficial nature, neglected not to give it more attention to it, notwithstanding the hints given by more than one writer upon the subject.” However, for every practical purpose, it may be said that Palestine has no gold. It is always spoken of by the Jewish writers as a foreign product. As gold was very common in Egypt, it is, in Egypt, at a very early date, much of that in the hands of the early Hebrews was probably obtained thence (Exod. xii, 28; xxxii, 2; 4; xxxviii, 24).

Metallurgical processes are mentioned in Ps. lxvi, 10; Prov. xvii, 3; xxxvii, 21; and in Isa. lv, 6, the trade of goldsmiths (compare Judg. xvii, 4, 6). See Goldsmiths.

Gold, in the Scriptures, is the symbol of great value, duration, incorruptibility, and strength (Isa. xiii, 12; Lam. iv, 2; 2 Tim. ii, 20; Prov. xviii, 11; Job xxxvi, 19). GOLDEN CAFE

GOLDEN CAFE (ןוֹנָה תַּבְשֵׁל, ה' גֶל מַבְשֵׁל), a store.

Image, Exod. xxxiii, 4, 8; Deut. ix, 16; Neh. ix, 19, lit. a 'gold store'; (v. which was not a mere wooden idol plated with gold); an idolatrous representation of a young buck, which the Israelites formed at Mount Sinai (Exod. xxxiii, 8 sq.); compare Pas. csi, 19: Acts vii, 29 sq., idolized by Jehovah (Hengstenberg, *Pemmat. i, 169*), and eventually, in the time of Jeroboam I of the kingdom of Israel, erected into a national object of worship (1 Kings xii, 28 sq.); 2 Kings x, 29; comp. xvii, 16; Hos. viii, 5 sq.; x, 6; Tobit I, 5) at Bethel and Dan (q. v.). See IMAGE. The symbol was undoubtedly borrowed from Egypt (s. p. 69). See Philo, ii, 169; Hengstenberg, *Pemmat. i, 156 sq.,* where living bucklots, *Apis (q. v.)*, as a living symbol of sins (Plutarch, *Isid. 33*) in Hierapolis (Herod. iii, 29; Dio. Sid. i, 21; Strabo, xvii, 805), and *Mnevis (q. v.)* as a representation of the sun-god [see EGYPT] at Heliopolis (Diod. i, 21; Strabo, xvii, 805), were objects of worship (see Jablonsky, *Pmyn. Egy. i, 122 sq.; 256 sq.; Creuzer, *Symbo. i, 480 sq.*). One of these two, possibly *Apis (Lactant. Inst. iv, 10; Jerome, in Hos. iv, 15; comp. Spencer, *Leg. Rom. Jud. Heb. b, i, i, i, 52 sq.; Slink, *Isis, Orig. i, 6 sq.*; Hermes, *Oedipus Argiv. i, 2 sq.); Ktesib. *Symbo. i, 480 sq.); more probably *Mnevis (Wilkinson, *Anc. Eg. 26* ser. ii, 97), was the model of the golden calf which the Israelites in the desert, and perhaps Jeroboam afterwards, set up. On the contrary, Philo (Opp. i, 571), with whom Millar (Dissert. Sacr. p. 309 sq.) agrees, asserts that the Israel- itish calf was an imitation of the Egyptian Typhon, but this view was dictated rather by theological prejudices than historical considerations. Nevertheless, the bovine symbol is found in the ornamentation of the Temple (Ezek. i, 10; 1 Kings vii, 29), and is one of the main features in the similitude (Movers, *Phoen. p. 373 sq.*). See CHERUBIN.

How Moses was able to consume the golden calf with fire (יִנְסֹף), and reduce it to powder (יִפְרֵז, pulverize), as stated in Exod. xxxii, 20, is difficult to say, for although gold readily becomes weak and to some extent flammable under the action of fire, yet it is by no means sure that such a degree of heat is reducible to dust, and be susceptible of dissolution in drink. Most interpreters, e.g. Rosenmüller (Schol. ad loc.), think of some chemical process (which Moses may have learned in Egypt, see Wilkinson, *Ancient Egyp. abrigd.* ii, 186 sq.); by which gold may have been calcined, and so have been triturated with metallic salt. Others (e.g. Ludwig, *De modo quo comminutus est a Moses vitulus aureus, Aldtouf, 1746*) believe that Moses beat the fire-checked gold into leaves, and then ground these into fine particles in a mill, or filed the melted gold into dust (-sectora aurea; comp. Josephus, *Ant. xiii, 7, 3; 9*; see Bochart, *Isra. totius, 968*). The difficulty lies in the double procedure, and in the expression "burned with fire" (יִנְסֹף), which does not seem applicable to a chemical, but rather to a mechanical process.

See CAFE, GOLDEN.

GOLDEN CITY (ןוֹנָה תַּבְשֵׁל, madbokah; Sept. *iwvovonorich, Vulg. tributum,* a term applied as an epithet of Babylon (Isa. xiv, 4), and occurring nowhere else. Some derive it from the Aramaic עבודה, gold, as a verb-form (in the Hip. part. fem.)-gold-making, i.e. exacting gold of a not inapt emblem of the imperial mart (parallel hemistic *בּוֹם תַּבְשֵׁל, *grodning); or else - a heart of brass or golden of gold (pro prepos. of place). So Genenius prefers with hesitation (Theo. Heb. p. 322 b), after Kimchi, Aban-Ezra, etc. Others (so Furst, *Hbr. Lex. s. v.*), following the Targums, Sept., Aquila, Syriac, and Arabic of Sadas, prefer to read הַעֹלֶה, in the sense of oppression, from הָעֹלֶה, to score (compare Isa. iii, 5, where הָעֹלֶה occurs in parallelism with הָעֹלֶה), See BABYLON.

GOLDEN LEGEND (Lat. *Aurea Legenda,* a collection of the most charming and significant accounts of saints, long very popular, in almost all the European languages. It was compiled by a Dominican, James de Voragine, also written Vrangin and Vargine, about A.D. 1290. It has 377 sections, each giving an account of a particular saint or festival. It is of no historical value.

GOLDEN NUMBER, the number in the ecclesiastical calendar by which the age of the moon, and consequently the time of Easter, is determined. Easter-day being the first Sunday after the full moon, which happens upon or next after the 21st of March, to determine the time of Easter, it is only necessary to find out the precise time of the above full moon. As at the end of the year, or even at the beginning of the new year, the changes on the same days of the solar year and of the month on which they happened nineteen years before, it follows that by the use of a cycle consisting of nineteen numbers, the various changes of the moon for every year may be found out without the use of astronomical tables. The numbers of this cycle, from their great usefulness, were usually written in the calendar in letters of gold: hence the name, golden number.

Another account of the origin of the name is that the metonic cycle of nineteen years [see CASSOPOIOUS] was originally engraved in letters of gold on a marble column. The rule for finding the golden number for any particular year is: Add 1 to the number of years, and divide by 19; the quotient gives the number of cycles, and the remainder gives the golden number for that year; and if there be no remainder, then it is the golden number, and that year is the last of the cycle.

GOLDEN ROSE, a rose set in precious stones, consecrated by the pope, and sent to crowned heads and others whom the pope delights to honor. This rose was first sent in 1868 by Urban V to Joan, queen of Sicily. The end of nineteen years consecrates one every year on the 4th Sunday in Lent. The golden rose was sent to the queen of Spain just before her downfall in 1868.

GOLDEN WEDGE (ץֵן, kethem), Isa. xiii, 12; a poetical term, fine gold, as elsewhere rendered. See GOLD.

GOLDMITH (ץֵנְיָה, torepheh), Neh. iii, 8; Isa. xi, 19; xii, 7; xlv, 6; a founder or finer, as elsewhere rendered. See GOLD. See Mal. iii, 3). See GOLD. In Neh. iii, 31, the word so rendered (ץֵנְיָה) is rather a proper name, ZORPHI (q. v.). The use of gold for jewelry and various articles of luxury dates from the most remote ages. Pharaoh having arrayed Joseph 'in vestures of fine linen, put a gold chain about his neck;' and the jewels of silver and gold borrowed from the Egyptians by the Israelites at the time of their leaving Egypt (out of which the golden calf was afterwards made), suffice to prove the great quantity of precious metals wrought at that time into female ornaments. It is not from the Scriptures alone that the skill of the Egyptian goldsmiths may be inferred; the sculptures of Theses and Beni-Hassan afford their additional testimony, and the numerous gold and silver vases, inlaid work, and jewelry, represented in common use, show the great advancement they had made in this branch of art. At Beni-Hassan, the process of washing the ore, smelting or fusing the metal with the help of the blow-pipe, and fashioning it for ornamental purposes, weighing it, and taking an account of the quantity so made up, and other operations which the goldsmith, as such, might be supposed to undertake, were intended, to give a general indication of the goldsmith's trade, without attempting to
describe the means employed" (Wilkinson, *Anc. Egyptian*, abridgment, ii, 188 sq.). See Metallurgy.

Ancient Egyptian Goldsmiths.

1, 2, and 3, are wringing out the water from the gold in a bag, d, d; a, c, frames supporting the bag while draining; f, c, are articles of jewelry on a frame, e; b, a box containing implements, i, and perhaps a crucible, k. The hieroglyphics consisting of the bush in which the metal was washed, the cloth through which it was strained, and the dripping of the water, united read "goldsmith" or "worker in gold."}
GOLIATH

919

GOLIATH

German traveller who visited Jerusalem in 1788. He was followed by Dr. Clarke (Travels), Schollar (Reise, and De Golgatha Sivm), Robinson, Tobler (Golgatha), and others. The identity of Golgotha has been maintained by Von Raumer (Palestina), Kraft (die Topographie Jerusalems), Tischendorf (Reise, ii, 17 sq.), Schulz (Jerusalem, ii, 96 sq.), and especially Williams in his Holy City. The tradition that fixes the site of Golgotha upon that of the present Church of the Holy Sepulchre is not older than the 4th century, being first mentioned by Eusebius, and attributed to Quentius. The lunula discovered on the work of the fabri cross by the empress Helena. Yet, in the absence of any other tradition respecting a site which could not well have been forgotten, and in the difficulty of finding any other position answering to the requirements of the case, we may well coincide in the belief that it represents the true Pilate and the judgment hall stood at the north-west angle of the Haram area, where the house of the pasha still stands. There Jesus was condemned, scourged, and mocked. Thence the soldiers "led him out" (Mark xvi, 20) to crucify him. They met a man called Simon "coming out of the country," and offered him to bear the cross which they brought him unto Golgotha, and there they crucified him. The passers by reviled him. His mother and some others stood by the cross (John xix, 25). "All his acquaintance stood afar off beholding these things" (Luke xxiii, 49). The sensation of these evangelists shows that it lay just outside the walls of the city, opposite the tower of Antonia, and therefore probably at the north-west. See JERUSALEM. The traditional Golgotha is now a little chapel in the side of the Church of the Sepulchre, gorgeously decorated with marble, and gold, and silver. The monks profess to show the hole in which the cross was planted, and a rent in the rock made by the earthquake! (Porter, Handbook for Syr. and Pal., p. 166; Williams, Holy City, ii, 226 sq.) See Pleading, Ueb. Golgatha u. Christi Grab (Hal. 1768); Schollar, De Golgatha et J. C. seculur siti (Born, 1827); Schulze, De vera causa nominandi Golgathae (Nurnb. 1732); Themis, Golgatha et sanctum sepulchrum (in Ilgen's Zeitschr. f. hist. Theol., 1842, iv, 8-84); Zorin, De Christi extra portam suppliance (in his Opusc. ii, 193-7); Finlay, Site of the Holy Sepulchre (London, 1846); Ben-Hur and Joseph, ii, Jerusalem u. das Heilige Grab, wider Robinson und neuer Zionspilger (Land, 1862); Tobler, Golgatha, seiner Kirchen u. Kriiter (Berl. 1850). See CALVARY.

Gol'fath (Heb. Golpeth, מְגַלְפָּת; Sept. Πολύφατος; Josephus Πολυφαντος), a famous giant of Gath, who "morning and evening for forty days" defied the armies of Israel; but was eventually slain by David, in the remarkable encounter, with a sling (1 Sam. xvii). B.C. 1063. Although repeatedly called a Philistine, he was possibly descended from the old Rehaim, of whom a scattered remnant took refuge with the Philistines after their dispersion by the Ammonites (Deut. ii, 20, 21; 2 Sam. xx, 22). Some trace of this condition may be preserved in his name. The tablet it is inscribed with the sign, an exite, as thought by Genesius (Theod. 989, p. 286). Simonis, however, derives it from an Arabic word meaning stout (Onom. s. v.); while Frütsch merely indicates it as of Philitian etymology (Heb. Lex. s. v.). Hitzig (Gr. u. Myth. der Philist. p. 76) regards it as merely =Γολιάας, i. e. strong. His height was "six cubits and a span," which, taking the cubit at 21 inches, would make him 10 feet high. But the Sept. (at 1 Sam. xvii, 4) and Josephus (Ant. 6, vi, 9, 1) read "four cubits and a span." This will make him about the same size as the royal champion slain by Antimenes, brother of Alcues (ἀλκούην ἀνδραῖον ποιήσας, ἀπὸ Σαμαρία, xiii, p. 617, with Muller's emendation). Even on this computation Golias would be, as Josephus calls him, ἀνίποις μαγευτιστος—a truly enormous man. (See Wichmannshausen, De armaturae Gor. Visb. 1711.) After the victory David cut off Goliath's head (1 Sam. xvii, 51; compare Herod. iv, 6; Xen. Anab. ii, 4, 17; Strabo, xvi, 15, 5). Josephus mentions a similar custom among the Arabs, Besch. p. 304), which he brought (ver. 54) to Jerusalem (probably after his accession to the throne, Ewald, Gesch. iii, 94), while he hung the armor in his tent. See FIGT. His sword was afterwards received by David, "of a great emergency from the hands of Ahimelech at Nob, where it had been preserved as a religious trophy (1 Sam. xxii, 9). See GIANT.

The scene of this famous combat (see Trendleburg, De pugna Dom. cum Golatha, Gaden. 1792) was the Valley of the Terebinth, between Shochoh and Azekah, proud on the western passes of Benjamin, although a confused modern tradition has given the name of Ain-Jahlad (spring of Goliath) to the spring of Harod, or "crumbling" (Stanley, Palest., p. 342; see Judg. vii, 1). See ELAH, VALLEY OF. This modern name, however, may rather be (= the spring of Gilead) a reminiscence of Gideon's exploit (Judg. vii, 8). See GILEAD. The circumstances of the combat (q. v.) are in all respects Homeric, free from any of the nuerile legends which Oriental imagination subsequently introduced into it; as, for instance, that the stones used by David called out to him from the brook, "By our means ye shall ask the plant." (etc. (Herod. i, 63). See Judg. vi, 15. Oriental. i, 8, p. 111 sq.) The fancies of the Rabbes are yet more extraordinary. By the Mohammedans Saul and Goliat are called Talut and Kalkut (Jalut in Koran, i, 151 sq.), perhaps for the sake of the homoeoteleuton, of which they are so fond (Hoskett, Hist. Orient. i, 8, p. 28). Abu'l-feidas mentions a Cannaite king of the name Jalut (Hist. Antiquit. p. 176); and, according to Ahmed al-Fassi, Gialout was a dynastic name of the old giant-chiefs of the Phalistanes (d'Herbelot, Bibl. Or. s. v. Gialout). In the title of the psalm added to the psalter in the Sept. we find the name γολοθανάς; and although the allusions are vague, it is thought by some that this psalm may have been written after the victory. This psalm is given at length under David, p. 687 (see Hilscher, Ps. centra. quaequaeque, prim absat, sec. vitam Golothi, Hauthen, 1746). It is believed that we find no more than allusions to this combat in Hebrew poetry; but it is the opinion of some that the song now attributed to Nathan (1 Sam. ii, 1-10) was originally written really in commemoration of David's triumph on this occasion (Theobald, Die Bücher Sam. p. 8; comp. Bethold, Einl. iii, 915; Ewald, Ps. Bücher des A. B. i, 111). See PSALMS.

In 2 Sam. xxi, 19, we find that another Goliat of Gath, of whom it is also said that "the staff of his
GOLIUS 920  GOMER

spear was like a weaver's beam," was slain by Elhan-
nan, also a Bethlehemite. St. Jerome (Quius curtis, p. 12) cre-
ates the unlikely conjecture that Elhanan was
another name of David. The A.V. here interpolates the
words "the brother of," from 1 Chron. xx, 5, where this
is called "Lahmi." See Stiebritz, Die Da-
ridische Erlegung des Goliat's (Halle, 1743). See Elhan-
nan.

GOLIUS, Jacobus, was born at the Hague in 1596.
After finishing his studies at the University of Ley-
den, he was called to give instruction in the Greek
language at Rochelle. In 1624 he became professor of
the Arabic language, and in 1629 also of mathematics
at the University of Leyden. He died Sept. 28, 1667.
He brought out a defense of the literal translation of
the Old Testament in modern Greek. He also had the Confession of Faith of
the Reformed Church of Holland, the Heidelberg
Catechism, and the Liturgy translated into modern
Arabic by an Armenian for circulation in the Levant.
His principal work is his Lexicon Arab.-Latinum cum
ind. Lat. It was first published in London, and sub-
sequently at Leyden, 1603, in fol. See Glasius, Geod-
erler Nederland, i, 534; Bayle, Dict. hist. et crit. (J. P. W.)

GOLIUS, Petrus, brother of J. Golius, was brought
up by his maternal uncle, Jan Hemelsaer, canon at
Antwerp, in the Roman Catholic Church, in which he
remained all his life. He shared his brother's fond-
ness for Oriental studies. After spending several years
in Palestine, he was appointed professor of Oriental
languages at Rome. He translated Thomas à Kem-
pis's work, De Initiatione Christi, into Arabic, and lab-
ered on an edition of the Bible in the same language.
At the age of seventy-four he went to convert the
heathen on the coasts of Malabar. He died at Surat.
See Glasius, Geogelder Nederland, i, 586; Bayle, art.
Hemelsaer. (J. P. W.)

GOMAR, Francis, an eminent Calvinistic divine
and polemic, was born Jan. 30, 1563, at Bruges, and
educated at Strassburg under John Sturmius, and at
Neustadt, where the professors of Heidelberg found a
refuge when Louis, the elector palatine, had banished
them. In 1582 he came to England, and attended at
Oxford the divinity lectures of Dr. John Rainolds, and
at Cambridge those of Dr. William Whittaker, and at
this latter university he was admitted to the degree of
B.D. in 1584. The elector Louis dying in 1585, his
son Casimir, his brother, restored the professors of
Heidelberg, to which place Gomar returned from Cam-
bridge, and spent two years there. In 1587 he be-
came pastor of the Flemish church at Frankfort, and ex-
cercised that office until his death (1654). In 1648, in the
office of President of the Synod of Dort, he was
appointed professor of divinity at Leyden. Here he re-
mained teaching quietly until 1693, when he became
the zealous opponent of his new colleague
Arminius. Arminius, as is well known, opposed, and
Gomar defended, the peculiarities of Calvin, and in
this controversy Gomar was most violent, fervent,
ulcent, and intolerant spirit, and endeavored by various
publications to excite the indignation of the States of
Holland against his rival. The combatants disputed
before the States in 1608. See ARMINIUS. On one of
these occasions Barnevedt, in a short address to
them, declared that he thanked God that the controv-
sions did not affect the fundamental articles of the Christian
religion; Gomar replies that he "would not appear
before the throne of God with Arminius' errors." On
the death of Arminius, Gomar, 1609, retired to Middle-
sex, and in 1612 founded the theological college of
the Saurnur to be professor of divinity, and four years after he exchanged this office for the professorship of divinity
and Hebrew at Groningen. He attended the Syn-
od of Dort in 1618, where he took an active part in
the condemnation of the Arminians. See Dort.
He visited France in 1633 to revise the translation of
the Old Testament, and died at Groningen Jan. 16, 1641.

His works were published at Amsterdam in 1645 (fol.);
also in 1654, his omnia theologica (Amsterdam, fol.);
See Bayle; Hook, Eccles. Biog. v, 532; Moshein, Ch.
Générale, xxi, 146; Herzog, Real-Encyclop. v, 231.

Gomè. See GOMER.

Go'mer (Heb.  [h], coming, or perhaps, seat, t.
e. passion; Sept.  [h] and [h] or [h]), the name of a man and of a race descended from him, also of a
woman.

1. The eldest son of Japheth (B.C. post 2041), son of Noah, and father of Ashkenaz, Riphat, and Togarma-

m (Gen. x, 2), whose descendants seem to have
formed a branch of the Hittites in the western
part of Europe (Gen. x, 8; compare 1 Chron. i, 6). In
the Scriptures, however, the people named Gomer (men-
tioned along with Togarmah in the armies of Magog,
Ezek. xxxviii, 6) imply rather an obscure and but vaguely-known nation of the barbarous north (Rosen-
müller, Alerter. i, 2, 255).

The name occurs in Assyrian and Persian texts.
renders Gen. x, 8 by [h] , Africans; [h], Turke.
Bochart (Phyleg, iii, 81) identifies the name, on
etymological grounds, with [h] (from , to
come, and [h] or [h], of the name, [h], to go, to roam). [h] being,
according to ancient testimony, a [h] (from [h],
where its origin, a branch of the Togarmian (Josephus,
Ant. i, 6, 1; Jerome, Quast. in Gen. x, 3), and
therefore cannot be regarded as the stem whence the Tog-
armians themselves sprang. The same objection ap-
plies to the suggestion that Gomer is the German race
(Talm. and Aram. 10 a); for this comes under a branch of Gomer. Wahl (Avise, i, 274) compare
Gimir, the ancient name for Cappadocia, and Kiallach
(Cym. in Gen.) seeks to identify it with the Chami-
uri, a nation in Bactria, noticed by Ptolemy (vi, 11, § 6).
Most of the interpreters take Gomer to be the ancestor
of the Celts, and more especially of the Cimmerian,
Kyrmur (Herodotus, i, 6, 15, 103), who were already
known in the time of Homer (Odys., xi, 14). To judge
from the ancient historians (Herodotus, Strabo, Plu-
terch, etc.), they had in early times settled to the north
of the Black Sea, and gave their name to the wealth
of the region (from the Abris, Tâyru, by transposition from the Heb.), the ancient Cimmerian (Herodotus, v, 48, 10); and in the modern name Cimmes. They forsook this
shores under the pressure of the Scythian tribes, and
during the early part of the 7th century B.C. they
poured over the western part of Asia Minor, commit-
ing immense devastation, and delaying for more
than half a century the power of the Lydian kings.
They were finally expelled by Alyattes, with the exception of
a few who settled at Sinope and Antandrus. It
was about the same period that Ezechiel noticed them
as acting in conjunction with Armenia (Togarmah)
and Magog (Scythia). The connection between Go-
mer and Armenia is supported by the tradition, pre-
served by Moses of Chorene (i, 11), that Gimir was
the ancestor of the Haichian kings of the latter
country. After the expulsion of the Cimmerians from
Asia Minor their name disappears in its original form;
but their real descendants, as the name and the people are to be recognised in the Cim-
бри of the north of Europe, described by the classical
writers sometimes as a German, sometimes as a Celtic
race. The preponderance of authority is in favor of
the latter (Sallust, Jug. 114; Florus, iii, 3; Appian,
De Ab. H. 1, 1, 3; Bel. Civil. 1, 39; of the 1st Diodorus, xiv,
114, 11; Plutarch, Cam. 15; Mor. 25, 27; Dion. Cass.
Digitized by Google
The probability is that the Cimbrri were Celtic, and of the same tribe as the Cymry of Britain (Prichard, Eastern Origin of the Celic Nations, by Latham, p. 142; Latham, Germanics of Tuscus, Epilegmon, p. cix sq.). By the ancients the Cimmerii and the Cimbrri were held to be the same people (as they are still held by the Poles) as the city Paeon, which is fixed down the Roman empire in the north and west of Europe, particularly in the Cimbric Chersonese (Denmark), on the coast between the Elbe and Rhine, and in Belgium, whence they had crossed to Britain, and continued at one period all the way from the British isles, but were ultimately driven back to the western and northern districts, which their descendants still occupy in two great divisions, the Gael in Ireland and Scotland, the Cymry in Wales. The latter name preserves a greater similarity to the original Gomer than either of the Sodoms for being the same. The link to connect "Cymry" with "Cimbrri" is furnished by the forms Cambria and Cumberland. The whole Celtic race may therefore be regarded as descended from Gomer, and thus the opinion of Josephus (Ant. i, 6, 1), that the Galatians were sprung from the Cimmerians, is confirmed by the Ephod (Fulchius, Superint., p. 83 sq.). From the place Gomer occupies in the roll of nations in Genesis, it may be presumed that the people descended from him was one of the oldest, and this would fall in with the habit and character of the Cimmerian, as he appears in Homer. It is plain also from Ezek. xxxviii, 6 that the race of Gomer was regarded by the Hebrews as living to the far north of Palestine, and this accords exactly with the site assigned to the Cimmerii by Herodotus, who places them on the Caucasus, and represents them as skirtings the Euxine and coming down on Asia Minor by way of Colchis, and across the river Halys. If the Cimmerii and the Cimbrri are identified, and the latter be regarded as a Celtic-speaking people, the statement of Jerome that the Galatia spoke a language not greatly differing from that of the Treveri (Proleg. lib. i, ed. Ep. ad Gaiyan) may hang an important bearing on the subject of the migrations of the original Gomerian stock. See Ethnology.

2. The name of the daughter of Diblaim, a harlot who became the wife of concubine (according to some, in vision only of the prophet Hosea (Hos. i, 8). B.C. cir. 725.

Gomorrha (Heb. Amor'kh, ג'ומורה, prob. subnati- sion; Sept. δῦνα κρηθών, N. T. "Gomorrah"), one of the five cities near near to the Dead Sea (Gen. xix, 10, 13, 11) apparently overwhelmed by the destruction which caused the dead Sea (Gen. xix, 24, 28). B.C. 2064. See Sodom. Its king, Birsha, was one of those that joined battle with the forces of Cher-dorlaomer, and in the rout Lot's family became involved until rescued by Abraham (Gen. xiv, 2, 8-11). B.C. cir. 2080. The allusions in Scripture to the "cities of the plain" appear to indicate that they stood close together (Gen. xiii, 10; xiv, 8-11), and that they lay near the southern extremity of the present lake, for they are said to have gone to the mountain near Hebron, "loving toward Sodom and Gomorrha, and all the plain" (Gen. xix, 20), and this he could not have done had they been situated further north. The battle between the eastern kings and the people of the plain took place "in the vale of Siddim, which is the Salt Sea" (Gen. xix, 3). The phrase, however, is not quite decisive as to the precise position; for, as Reland observes (Polemt, p. 254), it is not stated that the five cities stood in the vale of Siddim, although this perhaps may be inferred, and seems to be implied in the name of Gomorrha. This city appears to have been next in importance to Sodom, as it is always mentioned second, and often these two of the four cities alone are named, as types of impiety and wickedness (Gen. xviii, 20; Rom. ix, 29). That what atrocious cruelty was then gathered from Gen. xii, 4-6. Their miserable fate is held up as a warning to the children of Israel (Deut. xxviii, 23): as a precedent for the destruction of Babylon (Isa. xiii, 19, and Jer. i, 40), of Edom (Jer. xlix, 16), of Moab (Zeph. ii, 9), and even of Israel (Jer. vii, 22; xxii, 14). Jerusalem herself is there unequivocally called Sodom, and her people Gomorrha, for their enormities; just in the same way that the corruptions of the Church of Rome have caused her to be called Babylon. On the other hand, according to the N. T., there is a sin which exceeds in the Sodom for being the same. The link to connect "Cymry" with "Cimbrri" is furnished by the forms Cambria and Cumberland. The whole Celtic race may therefore be regarded as descended from Gomer, and thus the opinion of Josephus (Ant. i, 6, 1), that the Galatians were sprung from the Cimmerians, is confirmed by the Ephod (Fulchius, Superint., p. 83 sq.). From the place Gomer occupies in the roll of nations in Genesis, it may be presumed that the people descended from him was one of the oldest, and this would fall in with the habit and character of the Cimmerian, as he appears in Homer. It is plain also from Ezek. xxxviii, 6 that the race of Gomer was regarded by the Hebrews as living to the far north of Palestine, and this accords exactly with the site assigned to the Cimmerii by Herodotus, who places them on the Caucasus, and represents them as skirtings the Euxine and coming down on Asia Minor by way of Colchis, and across the river Halys. If the Cimmerii and the Cimbrri are identified, and the latter be regarded as a Celtic-speaking people, the statement of Jerome that the Galatia spoke a language not greatly differing from that of the Treveri (Proleg. lib. i, ed. Ep. ad Gaiyan) may hang an important bearing on the subject of the migrations of the original Gomerian stock. See Ethnology.

2. The name of the daughter of Diblaim, a harlot who became the wife of concubine (according to some, in vision only of the prophet Hosea (Hos. i, 8). B.C. cir. 725.

Gomorrha (Heb. Amor'kh, ג'ומורה, prob. subnati- sion; Sept. δῦνα κρηθών, N. T. "Gomorrah"), one of the five cities near near to the Dead Sea (Gen. xix, 10, 13), apparently overwhelmed by the destruction which caused the dead Sea (Gen. xix, 24, 28). B.C. 2064. See Sodom. Its king, Birsha, was one of those that joined battle with the forces of Cher-dorlaomer, and in the rout Lot's family became involved until rescued by Abraham (Gen. xiv, 2, 8-11). B.C. cir. 2080. The allusions in Scripture to the "cities of the plain" appear to indicate that they stood close together (Gen. xiii, 10; xiv, 8-11), and that they lay near the southern extremity of the present lake, for they are said to have gone to the mountain near Hebron, "loving toward Sodom and Gomorrha, and all the plain" (Gen. xix, 20), and this he could not have done had they been situated further north. The battle between the eastern kings and the people of the plain took place "in the vale of Siddim, which is the Salt Sea" (Gen. xix, 3). The phrase, however, is not quite decisive as to the precise position; for, as Reland observes (Polemt, p. 254), it is not stated that the five cities stood in the vale of Siddim, although this perhaps may be inferred, and seems to be implied in the name of Gomorrha. This city appears to have been next in importance to Sodom, as it is always mentioned second, and often these two of the four cities alone are named, as types of impiety and wickedness (Gen. xviii, 20; Rom. ix, 29). That what atrocious cruelty was then gathered from Gen. xii, 4-6. Their miserable fate is held up as a warning to the children of Israel (Deut. xxviii, 23): as a precedent for the destruction of Babylon (Isa. xiii, 19, and Jer. i, 40), of Edom (Jer. xlix, 16), of Moab (Zeph. ii, 9), and even of Israel (Jer. vii, 22; xxii, 14). Jerusalem herself is there unequivocally called Sodom, and her people Gomorrha, for their enormities; just in the same way that the corruptions of the Church of Rome have caused her to be called Babylon. On the other hand, according to the N. T., there is a sin which exceeds in
far from the shore (see Maundrell, Early Travellers, p. 454).—Smith, s. v.; Kitto, s. v. M. de Sauley is confident he has discovered the remains of Gomorrah in certain ruins which he reports in a valley by the name of Gummar, on the N. W. shore of the Dead Sea. Just north of this place, but Van de Velde makes light of this account (Narratio, ii, 115 sq.), which, indeed, lacks confirmation, especially as it is generally believed that the sites of these cities are all buried under the southern shallows of the lake. See Dead Sea.

Gomo’s brick, the manner in which the name GOMORRAH is written in the A. V. of the apocryphal books and the N. T., following the Greek form of the word Γομορρα (2 Esd. ii, 8; Matt. x. 15; Mark vii, 11; Rom. i. 29; Jude 7; 2 Pet. ii, 6).

Gondulf, or Gundulf, a Norman priest, was born in the neighborhood of Rouen in 1026. After entering the Church, he made a pilgrimage to Jerusalem in company with the archdeacon William, afterwards archbishop of Rouen. On his return, being in danger of shipwreck, he vowed to become a monk, and in 1059 he entered the convent of Bec, where he became intimate with Anselm. Lanfranc, prior of Bec, being in 1063 appointed abbot of Bec, chose Gondulf for his coadjutor, and still retained him when called in 1070 to the archbishopric of Canterbury. Through his influence Gondulf was created archbishop of Rochester March 19, 1077, and restored that see to its former importance. After the death of Lanfranc he administered the diocese for about 30 years. His name is found in the charters of that period, with which he was very much occupied. According to Gonus, it was only in the year after it was promulgated by Salomon that it was adopted by the Greek Church, and in 1098 by Vasquez. While admitting that the doctrine was held by the majority of the Greeks, he points out the archbishop of Seville, Apollo Custos, and Andrea Le Blanc (Candide Philoeteus), who had opposed it in their writings. Yet Gondulf did not consider it obligatory for all the members of his order to adopt his views: he permitted each one to follow his opinions and his interests. The work he wrote against it was not a very popular work, but it remained twenty-five years in MS. before being printed, and afterwards appears to have found but few partisans among the Jews. Father Oliva, director of the Index, greatly opposed the book, notwithstanding the approbation given to it by pope Innocent IX. The first edition bore the title Fundamentum Thelogiae moralis, ut est tractatus theologico de recto uso opinioi probabilitum (Dillingen, 1699; Naples, Rome, Lyons, Antwerp, 1694, 4to). The text of the latter editions has been altered in several passages, and the earlier ones have been destroyed. Gonus also wrote De Infalibilibus Romanis Pontificis in definitione, and De mortuorum controversia extra concilium generale (Rome, 1689, 4to; printed by order of Innocent IX, and suppressed by Alexander VIII).—Manuscript of conversionem Mechriomorum Dillingen (Dillingen, 1688, 4to);—Veritas Religionis catholicae demonstrata (Lille, 1626, 12mo). See Dupin, Bibli. des Autres ecclés. du 17e siècle (pt. iv); Jour. des Savants (1695, 1698); Richard et Giraud, Bibl. sacrée; Hoefer, Nouv. Biogr. Générale, xxii, 252.

Good (Lat. bonum) is variously defined by moralists, according to the nature of their ethical theories. The Stoic would define it to be that which is according to nature; the Epicurean, that which is most agreeable or diminishes pain; the Idealist, that which accords with the fitness of things; the Christian theologian, that which accords with the revealed will of God. So the philosophical schools give various and even contradictory definitions of the highest good (summum bonum). Thus Aristippus placed it in pleasure; Epicurus, in pleasure in repose; Zeno, in tranquility of mind; Kant, in well being conditioned on morality; the Materialists, in self-love.

Schleiermacher states his views of the subject as follows: In ethics there are three fundamental concepts—duty, good, and moral action; virtue is the moral power of the agent; the highest good is the objective aim of both. In the systems of Kant and Fichte, ethics is the doc-
of duty, and its development becomes simply a treatment of individual virtues. In opposing this view, Schleiermacher maintains that a system of moral precepts, or formulæ of duty, even though it might embrace the whole life of man, could only be applied in isolated cases and single acts, leaving the moral life as a whole still without a system. It is only in the very limited sphere that a moral agent acts alone, and without reference to other agents; and his virtue has relation to a general state of things, to produce which other agents co-operate. Schleiermacher charges the existing ethical systems with making an unnatural schism between the moral (duty) and the human (freedom). From this principle the whole sphere of ethics may be mapped, placing universal nature on the one hand, and the organizing reason (the universal reason of humanity) on the other. In this theory Schleiermacher expressly recognizes the authority of Plato, who, in his Phædo, speaks of the highest form of freedom, in whom the idea of virtue was the highest, places the highest good in ευτυχία, individual happiness—not, however, in the Epicurean sense, but in the sense of ζωῆς τὴν ἐν ἰεραίᾳ καὶ ὑπὸ ἀπεργίας τελεία, the working out or realization of a perfect life through perfect virtue.

In the further development of the history of ethics, so far as relates to the definition of the "highest good," we must particularly notice the distinction (1) between the individual and the general, indicated in Plato and Aristotle, and carried to the greatest extent by Epicurus and the Stoics; (2) the resulting distinction between the objective and subjective, according to which the "highest good" is, on the one hand, a condition of man (e.g. Epicurean enjoyment, Stoical endurance); or, on the other hand, a product of human activity; the end of virtue is a moral pleasure of virtue or of activity, according to the former of which the "highest good" lies in enjoyment, while according to the latter it lies in moral activity.

In the language of Christian theology, "the highest good" is called the direction of God, which is the highest good in itself and in itself alone. If one of the ethical elements, the individual and the general, activity and happiness, theory and practice, means and end. The means of securing the "highest good" is to promote the advancement of that kingdom; the end, the "highest good" itself, is the coming of that kingdom, to the individual, in his personal salvation; to the universal race, in the realization of the promise "God shall be all in all!" See Schleiermacher, Ethische Abhandlungen, in his Phäl. Nachtr. ii, 12, 18; Herzog, Real-Encyclop. s. v. Ethik, Tugend.

Good Friday, the sixth day of the week before Easter, called Good Friday in acknowledgment of the benefit derived from the death of Christ. Among the Saxons it was denominated Long Friday, perhaps in allusion to the length of the fast. (1) In the Christian Church the day of our Lord's crucifixion was religiously observed, not independently, but as a part of the sacred season of Easter, which was celebrated by Christians instead of the Jewish passover, in commemoration at once of the sacrifice and death and resurrection of Christ. A bishop was accustomed to designate Good Friday and Easter-day, which had reference, in name at least, to the passover: πάσχα σαρκάων, and πάσχα οὐσιαστικόν, passover of the crucifixion, and passover of the resurrection. The day was observed as a strict fast. The usual acclamations and blessings were omitted, and nothing but the most plaintive strains of music, such as the Κηρίς δίκληνα, etc., were allowed to be sung. No bell was rung. None bowed the knee in prayer, because thus the Jews reviled Christ. The kiss of charity was omitted, for Judas betrayed his Master with a kiss. The Lord's supper was celebrated; but the element was not consecrated on this day, but on the day before. Communion-tables and reading-desks were stripped of ornaments; and the gospel of St. John was read, because he was a faithful and true witness of our Lord's passion. In reference to the Jewish ritual, the day was sometimes called ἀπεξαρτήσεως, ἀπεξαρτήσεως, but the element was not consecrated on this day. (2) In the Roman Church the day is celebrated with great care. "The Church in her whole office expresses the deepest mourning and compunction. The altars are naked, except at the priest's communion, when the chalice is in the form of a golden plate, and the host is covered with a black veil till the prostration, after which it is left uncovered." Instead of the ordinary mass, the "Mass
of the Presanctified" is said, without the consecration of the Host. The sacrament, reserved the day before, is received in one kind only by the priest, who recites the Lord's prayer and a small part of the prayers of the mass.

No others receive the holy communion except priests, alcoholics, and the sick in mortal danger of death, to whom it is administered by way of viaticum."

(3.) Among the Protestant churches Good Friday is observed as a fast, and by special services and prayers by the Church of England, the Lutherans, German Reformed, and many Methodists. —Covin, Abridged Christianity, p. 516; Wheatly, Common Prayer, ch. v, § 15; Butler, Feasts and Fasts, tr. vi, ch. v.

Good Tidings. See GOSPEL.

Good Works. See WORKS.

Goodall, WILLIAM, a clergyman of the Church of England, rector of Allhallows the Great and Less, London, and later dean of Ripon, died in 1868. He was a prominent and prolific writer of the Low-Church school. Among the best known of his works are: The Extraordinary Gifts of the Spirit (London, 1834); — The Early Services of the Church (1834); — The Directory of Faith and Practice (1849); — The Divorce Act and the Church Rates (1849); — The Divorce Rule of Faith and Practice (1842, 2 vols.; 2d ed. 1855, 3 vols.), directed against the views of Dr. Pusey concerning the value of tradition as a rule of faith; — Tract XC Historically refuted (1844); — The Effects of Baptism in the Church of England, as to the Tests of Baptism in the case of Infants (1849); — Vindication of the Church of England on the Validity of the Orders in the Scotch and Foreign Non-episcopal Churches (3 pamphlets, 3d ed. 1852).

Goodall, WILLIAM, D.D., a Congregational minister and eminent missionary, was born at Templeton, Mass., Feb. 14, 1792. In early youth he manifested great energy of character. At fifteen he went sixty miles on foot, carrying his trunk, to Phillips Academy, in Andover; and there, and afterwards in Dartmouth College, he overcame all difficulties until he graduated in 1817. He spent three years in Andover Theological Seminary, and in 1820 was accepted as a missionary of the American Board. He travelled for some time as agent for raising funds for the society from New England as far as Alabama, and also visited the Cherokee and Choctaw missions east of the Mississippi. In Dec. 1822, he sailed for India. After preaching in India and studying other languages during nine years, he left India for Britain, where he arrived Nov. 16, 1829. "By the presence of the stations. Goodall and Bird, Beirut became a regular station of the Board. After some attention to the Arabic, Mr. Goodall went in, June, 1824, to Sidon, to study the Arameo-Turkish language with an Armenian ex-bishop, Yakob Aga, where he became acquainted with another Armenian bishop, Dionysius Carabot, who, a year and a half later, was received into the mission church at Beirut. Thus singularly did the Mission to Syria and the Holy Land, at the very outset, take hold of a people who were not thought of in its establishment, and of whom but a few years before had been found by it as pilgrims to the sacred places. In March, 1826, after the repulse of the Greeks in an attack on Beirut, Mr. Goodall's house was plundered and his life endangered by Arab soldiers. In May, 1828, when the government between Turkey and England, the missionaries were obliged to flee to Malta. There Mr. Goodall labored in connection with the press until the summer of 1831, when he repaired to Constantinople, and commenced the mission to Turkey, with special reference to the Armenians, in which he had joined a few months later by the Rev. H. G. O. Dwight. From that time on his work lay especially among the Armenians. Mr. Goodall's early experience and natural temperament combined, with divine grace, to fit him eminently to meet them with a cheerful

1. GODMAN of patience. With a true Christian heroism, in which his wife had an equal share, he encountered such incidents of life as being obliged, by confessions, visitations of pestilence, convulsions and war, the exactions of landlords, hierarchical persecutions, interference of government, etc., to pack up and move his residence 'some thirty times in twenty-nine years,' and battled with the opposition and obstacles that were ever before him as a missionary. Indomitable in his purpose to do good, affable and courteous in manner, of ready tact, and abounding in restless pious activity, he gained access wherever he chose to go, and exercised a magnetic attraction that never left him without subjects on whom to pour, in some form, the light of truth. He commanded the respect of foreign ambassadors and travellers, of dignitaries of the Oriental churches, bankers, and the highest in society, with whom, at different periods, he had no little intercourse, as well as the common people; and even enemies to his work were constrained to honor him. Few possess in so high degree as he did the admirable faculty of doing good without offence, and of recommending personal religion to the world." One of his most important labors was the translation of the Bible into Armeno-Turkish, commenced in 1848, and finished (the last revision) in 1863. In 1856 he returned to America, worn out with labor, and died in Philadelphia Feb. 18, 1867. "In the future history of the kingdom of Christ in the lands where the first word of the Gospel was planted in Eden, and the scenes of events most sacred to Christian hearts, the name of William Goodall will be precious to successive generations of sanctified souls, even to the end of the world." —Missionary Herald, May, 1867.

Good Tree is the rendering of "Yv yv, etk kada", tree of splendor, the fruit ("yb, "boughs") of which (Sept. eptik dvyv kovv dvoe, Vulg. fructus arboris pulchri, et fructibus pulchris, i.e. carry about in festive procession) on the first day of the Feast of Tabernacles, in memory of the inhawing dwell in booths in the wilderness (Lev. xxii, 40). The tree generally concealed to be meant is the citron (Citrus, Hierobot, l. 202), the fruit of which Josiphus states that was in the hands of the Jews on the day of the festival of the Sukkot, when they pelted king Jehu with it (Am. xiii, 13, 5). See Citron. Others regard the olive as meant, this being the tree mentioned in the parallel account of Neh. viii, 15. It would seem, however, that no specific tree is intended, but any one that would add beauty to the occasion (Ursini Arboribus, Bibl. p. 577). See TREE.

Goodman of the House, oikodemos, Matt. xxv, 11; xxiv, 43; Mark xiv, 14; Luke xxi, 11, master of the house, as usually elsewhere rendered (Matt. x, 20; Luke xii, 39; xiv, 21; "householder," Matt. xxv, 27, 28; xx, 1; xxv, 33). In Prov. vii, 15, "goodman" is the rendering of ZWN, id, zven, i.e. husband.

Goodman, Christopher, an English divine, was born at Chester in 1520. He studied at Brasenose College, Oxford, and graduated in the university during the reign of Henry VIII and Edward VI. When queen Mary ascended the throne he withdrew to Frankfort and thence to Geneva, where, with Knox, he became pastor of the English church. After Mary's death he went to Scotland, and became rector of Greenock in 1564. About 1570 he went to England, and accompanied Sir Henry Sidney in his expedition against Ireland. He was afterwards rector of Chester, and died there in 1602. He wrote, How far superior Powers are to be obeyed of their Subjects (Geneva, 1668, 16mo), against queen Mary;—A Commemoration of the Peace of Westminister (1555), an Prayer to Knox's The First Discourse against the Monstrous Regiment of Women. See Wood, Athenae Oxonienses (vol. i); Scott, Lives of the Scotch Reformers.
Mr. Goodrich was elected professor of rhetoric and oratory in the Boston Latin School, in 1839, to accept the chair of pastoral theology in the theological seminary, a position which he occupied until his death—a period of twenty years. In 1820 he was elected president of Williams College, but declined to accept that honor. In 1856 he received the degree of Doctor of Divinity from Brown University.

"In 1814 he prepared a Greek grammar, which passed through several editions. In 1827 he superintended the abridgment of Webster's Quarto American Dictionary. In 1829 he established the Quarterly Christian Spectator, which he edited for nearly ten years. In 1846 and 1847 he prepared revised editions of Webster's Dictionary, and in 1856, the university edition of the same work. In 1852 he published his admirable work on British Eloquence, which has been extensively circulated, both in England and America. Besides performing the literary labors involved in preparing and editing these various works, Prof. Goodrich was prominently connected with many of the most important benevolent societies of the country. At the time of his death he was laboriously engaged, as one of the 'Committees on Versions' of the American Bible Society, in preparing the new edition of the Christian Standard Testament. As an instructor, Prof. Goodrich was enthusiastic, uniring, and effective, always impressing himself upon his pupils, inspiring them to the highest effort. He guided them to imitate models of clear and eloquent thinking, and taught them to express their own thoughts in a similar style. As a manly style, a manly character, and a successful writer of the college, he was singularly active and energetic, never shrinking from any duty or responsibility, and always making the interests of the institution the object of his own personal care and anxious solicitude."

Goodrich, Ellinor, D.D., a Congregational minister, was born in Wethersfield, Conn., Oct. 26, 1784. He graduated at Yale College in 1762. He was now studying theology, but was called to be tutor at Yale College in 1765. In 1766 he was invited to the Congregational church in Durham, Conn. In 1766, to aid in the support of his growing family, he began to prepare students for college. His thorough scholarship made him a highly successful teacher, and during the next twenty years more than three hundred young men passed under his instructions. He was repeatedly sent by the General Assembly of Connecticut, as a delegate to the convention held by that association, and the synods of New York and Philadelphia, from 1767 to 1776. He received the degree of doctor of divinity from Princeton College. In 1776 he was elected to the corporation of Yale College, and, as a member of the Prudential Committee, his labors in behalf of the college for twenty years were among the most useful of his life. He died of apoplexy at Norfolk, Conn., Nov. 22, 1797. He published a number of occasional discourses.—Sprague, Annals, i, 506.

Goodrich, Thomas, an eminent English divine, was born at East Kirby, Lincolnshire, about 1480. He studied at Corpus Christi College, Cambridge, graduated at Jesus College in 1506, and became professor of the university in 1515. In 1529 he gained great favor with Henry VIII by pronouncing himself against the validity of that prince's marriage with Catharine. He was successively appointed rector of St. Peter's, London, canon of St. Paul's, Westminster, and chaplain of the king. In 1584 he was elected bishop of Ely, and showed himself a zealous supporter of the Reformation. He took an active part in the organization of the English Church, was one of the theologians commissioned to examine the translation of the N. T., to compile the Common Prayer—look of 1548, and the Institution of Christian Man, called also the Bishop's
Book, with the collaboration of Cranmer, Stokesley, Gardiner, Sampson, Latimer, etc. Goodrich was a member of the privy council under Henry VIII and Edward VI, who also employed him several times as ambassador. In 1531 he was appointed lord chancellor of England. This office he lost when Queen Mary ascended the throne, but he retained his bishopric, and died May 10, 1564.—Hoefer, *Novum Biogr. Generale*, xxii, 261; *Hook, Eccles. Biog. v*, 388; Burnet, *Hist. of Engl. Reformation*, ii, 214, 291, 427.

Goodwin, John, an eminent Armenian divine, was born in 1503, and was educated at Queen's College, Cambridge, where he became fellow in 1517. In 1523 he became vicar of St. Stephen's church, Cambridge, London, of which he was ejected in 1645 for refusing to administer baptism and the Lord's supper promiscuously. He was a man of great courage, eloquence, and energy; and, though an Independent in Church government, he was a zealous Armenian in doctrine. At the Restoration he was exempted from pardon; but no measures were taken against him, and he died in 1655. He wrote *The Divine Authority of the Scriptures asserted* (London, 1614, 4to); *Redemption redeemed, wherein the most glorious Work of the Redemption of the World by Jesus Christ is vindicated against the Fabric of Certain Times of Post-Reformation, fol. new ed. 1840, 8vo); *Exposition of Romans ix* (new ed. by T. Jackson, London, 1835, 8vo); *Imputatio Fidei, a Treatise of Justification* (London, 1645, 4to). This last treatise was published in an abridged form (12mo) by Mr. Wesley, who held Goodwin's views of grace in high esteem. A summary of Christian Theology selected from Goodwin was published by S. Dunn (London, 1836, 12mo); and Goodwin's *Life* has also been written by Rev. T. Jackson (London, 1839, 8vo). John Goodwin was in advance of his age, not only in his theology, but in the broad views of the nature of the Church and of toleration. His writings contributed greatly to the diffusion of sound doctrines on religious liberty. "Had Redemption Redeemed been his only publication, it should have been enough of itself to perpetuate his fame. Its great learning, clear reasoning, sound judgment, and admirable spirit, render it worthy of the study of all lovers of this glorious doctrine, and the name of its author one which all Armenians should delight to honor. A volume so ably written, and going to the bottom of the controversy, could not, in that solemn age, fail of creating a profound impression. The pulpit rang with voices of hallelujah. The people were fired with sermons, pamphlets, and books. Some were bitterly scourious. Dr. Hill, master of Trinity College, Cambridge, charged him with falsifying his quotations, and with the errors of Pelagius. Rusby wrote very much in the spirit of Edwards. Robert Baillie seems to have taken Pryne for his model. Barlow, afterwards bishop of Lincoln, alone among the crowd addressed him in a style of manliness and Christian candor, speaking of his learning and talents with compliment and respect. George Kendall filled two folios, and actually removed to London that he might watch Goodwin and the better oppose him and his doctrine. He says of himself that though he sometimes sneers, he never snarls or bites. He doubtless tells the truth about the sneering and the biting. Toplady thought the 'Redemption Redeemed was effectually answered' by Kendall. 'If it was,' says Sellon, 'I wish that it, as tough a morsel as it is.' Dr. John Owen, then vice-chancellor at Oxford, and overaweled with labors, deemed it necessary to employ eight hundred and fifty octavo pages in a reply to the seven chapters on the *Penitence of the Saints* ('D. A. Whedon, in *Mediol. Quart. Rev.* July, 1863, p. 371; *Med. Q. Rev.* Oct. 1869, art. 1).—Hoefer, *Eccles. Biog. v*, 389; Allibone, *Dict. of Authors*, i, 704; *Neal, Hist. of the Puritans*.

Goodwin, Thomas, D.D., a nonconformist Calvinistic divine of the 17th century, was born at Rollesby, Norfolk, Oct. 5, 1600. He was educated at Christ Church College and Catharine Hall, Cambridge, of which he afterwards became fellow. In 1628 he became lecturer of Trinity Church, Cambridge, and four years afterwards was present by the king to the vicarage. In 1635, on account of the uniformity, he relinquished his preferences, and in 1634 quitted the university. During the subsequent persecution of the Puritans he fled to Holland, where he became minister of a congregation at Arnhem. At the beginning of the Long Parliament he returned to London, and from the Assembly of the Realm he never afterwards withdrew, though he had not always been a member. He died Feb. 28, 1679. A portion of his works were published in five vols. folio (London, 1681); and besides those to be found there he wrote *Certain select Causes resolved, peculiar to the Comfort of Believers in Temptation* (London, 1647, 4to). The following have been recently reprinted, viz. *Child of Light* (London, 1840, 12mo); *Ephebias and Revelations* (London, 1842, 8vo); *Christ the Mediator* (London, 1846, 4vo); *Glories of Christ* (1847, 8vo); *Government of the Church* (1848, 8vo); *The Epistle of Fitch* (1849, 8vo); *Works*, compiled by J. Babb (London, 1847–49, 4 vols. 8vo). A new and complete edition of Goodwin's works has just been completed in Nicholla's *Series of standard Dienes*, making 12 vols. 8vo (Edinb. 1851–66), containing (vol. ii) a *Memoir of Goodwin*, by Robert Halley, D.D., Jones, *Christian Burial* (London, 1606), p. 185; *Darling, Cyclcop. Bibliograph. i*, i, 1295; *Calamy, Nonconformists' Memorials*; *Neal, Hist. of the Puritans*.

Gopatara. See JOTAPATA.

Goopher (Hebr. *גֹּפֹר*; see *Genesis* i. q. גַּפֵּר, pitch; acc. to Furst, connected with גַּפֶּר, *branston*, i. e. resin; Sept. *ερνύον*, Vulg. *leucipu- tuus*), a kind of tree, the wood of which is mentioned only once in Scripture, as the material of which Noah was directed to build the ark (Gen. vii. 14): "Make thee an ark of gopher wood; rooms shalt thou make in the ark, and shalt pitch it within and without with pitch" (probably bitumen). In endeavoring to ascertain the particular kind of wood which was mentioned in the above passage, some have supposed the name to mean, the country where the wood was supposed to have been procured, or the traditional interpretations. The Sept. renders it "squared timbers," and the Vulgate *planed wood* (apparently understanding נָּבַע). Some have adopted the opinion that a kind of pine-tree is intended; and others that several species may be included, as they all yield resin, tar, and pitch. The Persian translator has also adopted the pine; but Celsius objects that this was never common in Assyria and Babylonia. The Chaldee version and others give the ceder, because it was always plentiful in Asia, and was distinguished by the incorruptible nature of its wood. But ceder is a very general term, and correctly applied only to different kinds of juniper. These, though yielding excellent wood, remarkable for its fragrance, never grow to a large size in any warm country. Eu. tychius, patriarch of Alexandria, relates in his *Annals* (p. 94, as quoted by Celsius [*Hierobi. i*, 381], that the ark (q. v.) was "made of a wood called eban, which is the teak, and not likely to have been the wood employed. The Chaldee Samaritan translator, for goopher, gives, as a synonym, *siym*, of which Celsius says (*Hierobi. i*, 382), "Vocem obscuram, sive referas ad *Eban* elsewhere, Malhia adferri sensuit Calyman* [*Perip. Mar. Erythr. p. 162, et Ebeno similis peribent alii* (Salmasius, in *Ordia. p. 727)]." The *siym* is probably the *simeon*, mentioned by Forskal as import-
ed in his time into Arabia, and is a highly-valued, dark-colored wood, of which one kind is called blackwood (Dalbergia latifolia). This greatest number of writers have been of opinion that by the gopher wood we are to understand the cypress; and this opinion is supported by such authorities as Fuller (Sacred Missals, iv, 209), Bocart (Gesch.), and others, as well as by Celsius (Historicon, 1, 229). It has been supposed that gopher is the Greek καυχυσωρός, with a mere addition to the root. It is argued, further, that the wood of the cypress, being almost incorruptible, was likely to be preferred; that it was frequently employed in later ages in the construction of temples, ships, and even ships; and that it was very abundant in the countries where, according to those authors, the ark is supposed to have been built, that is, in Assyria, where other woods are scarce. See also

Gophna (Γόφνα in Josephus; Γοφνα in Ptolemy; see Reland, Ptolem. p. 461), a town of Palestine, which gave its name to one of the ten toarchies, Gophanitis (qv Γοφνητις τοπογραφία, Josephus, War, iii, 3, 5; "to- parchia Gophnatis," Pliny, v, 14). Josephus recounts it second in importance to Jerusalem, and usually joins it with Archebala. It was one of the four cities taken by Cassius (War, i, 11, 2) and reduced to slavery (Ant. xiv, 11, 2), restored to freedom by a decree of Marcus Antonius after the battle of Philippi (8, 12, 2 and 8). It was taken by Vespasian in his last campaign in Pal- estine (War, iv, 9, 9), and, as Titus marched on Jeru- salem by way of Caesarea and Samaria, he passed through their Gophna (8, 12, 5, 5). It was to be the place that the latter allowed certain important Jewish refugees to retire temporarily during the siege of Jerusalem (v1, 2, 3). Eusebius probably gives the true origin of the name (from μαθητής, μαθητής, a vine, from the vineyards in the vicinity), although he errs (or is, rather, himself uncertain) in identifying it with the Eshkol of the spies (Numana, p. 157, ed. Clericus); and he states that they built the city (qv Ποππος) fifteen miles from Jerusalem towards Neapolis, in near agreement with the Peutinger Table, which makes it sixteen miles. It was identified by Dr. Robinson with Jufna, a small Christian village, rather more than one hour north-west of Bel- tina (Bethel), with many ruins of the Middle Ages, and situated in a very fertile valley (Sb. Bras. iii, 7-2). It is probably the Ophini (q.v.) of Benjamin (Josb. xviii, 24).

Gologistus (q.v.), the name of three Roman emperors. Marcus Antonius Gordionus I, descended from a noble family, but distinguished, for his literary education, twice consul, under Caracalla and Severus. By the latter he was appointed proconsul of the province of Africa, in which position he gained the affection of the people of the province to so high a degree, that on the installation of the emperor Maximinus, he was, at the age of 80 years, restored to his residence in company with Plut- eny, by his son, who assumed the name of Marcus Anto- nius Gordionus II. The Roman Senate recognised them; but after a reign of only a few weeks Goria- nius II fell in a battle at Carchage against Capellianus, the governor of Mauritania, and Gordionus I, on learning the news, killed himself. At the demand of the Roman people, a minor grandson of Gordionus I was placed as Caesar by the side of Publius Maximinus and Balbinus, who had been elected emperors against Max- iminus; and when all these three emperors were killed by their own soldiers, he was still in the same year (289) proclaimed as Augustus by the Praetorians. He carried on a successful war against the Persians, and had an excellent advisor in his father-in-law Misitheus. He reigned until 244, when Philippus the Arabian, who for some time had been his colleague, caused him to be assassinated. The Christian Church during the reign of Gordionus was undisturbed. (A.J.S.)

Gordon, George N., a Presbyterian minister and missionary, was born in Prince Edward Island in 1821. He studied at the Free-Church College, Halli- fax, N.S., and was sent by the Presbyterian Church of Nova Scotia to the New Hebrides, and settled at Enomanga, in 1857, with his wife, whom he married in England. On the 30th of May, 1861, he and his wife were killed by the natives. —Wilson, Presb. Hist. Al- manac, 1862, p. 330.

Gordon, James Huntley, an eminent Scotch Jesuit, was born in 1843. He was educated at Rome, and entered the order of the Jesuits Sept. 20, 1863. For nearly fifty years he taught Hebrew and theology at Rome, and was his master. He travelled also, as missionary, through England and Scotland, where his zeal for making converts to the Roman Catholic Church caused him to be twice put in prison. He died at Par- is, April 16, 1820. Gordon was a learned and skilful man, and very zealous for his order. He wrote Con- troversiarum christianae fidei Epitome, 3 parts (1, Limos, 1612; ii, Paris; iii, reprinted with the two others, Cologne, 1629, 8vo). See Aegambre, Bibliotheca Scriptorium Societatis Jesu; Hoefler, Nouv. Biog. Géné- rale, xxii, 230.

Gordon, James Lesmore, a Scotch Jesuit, was born at Aberdeen in 1845. He became a member of the Society of Jesus, and taught in various places in Scotland, and in the colleges of his order, at Toulouse and Bordeaux. Later in life he was appointed confessor to Louis XIII. He died at Paris, Nov. 17, 1641. We have from him D. du- tribua de catholica veritate (Bord. 1623, 12mo); Biblia Sacra, cum commentariis ad eaum litterar et explicationes locorum omnis in sacra litteris obscuritatebant (Paris, 1632, fol.) —Theologia moralia unive- rsa, cos libris comprehensa (Paris, 1634, fol.). Du- pin highly commends his commentary.—Hoefler, Nouv. Biog. Générale, xxii, 280.

Gordon, Robert, D.D., a Scotch divine, was born in Dumfries. His first settlement in the min-

Gorgias (γοργίας, a frequent name among the Oriental Greeks), one of the generals of Antiochus Epiphanes, was chosen by Lysias, the general and min- 

Gorgias, the governor of the forces of Judaea, defeated them with great loss (1 Macc. v, 56 sq.; Joseph. Ant. xii, 7, 6).

The account of Gorgias in 2 Macc. is very confused. In one passage he is described simply as "a captain, who in matters of war had great experience," and therefore sent with Nicander, the son of Patroclos, one of the generals of the son of Antiochus Theos. The governor of Coele-Syria and Phœnicæ (comp. 1 Macc. iii, 38; Jo-
seph. Ant. xii, 7, 8), to root out the whole nation of the Jews (2 Mac. viii, 9). In another passage he is rep-
resented as 'governor of the holds' (στρατηγὸς τῶν τοίχων [Alex. MS. τοίχων], 2 Mac. x, 14), and ap-
parently of the holds of the Idumæans (?) (Acrabat-
tene[?]) comp. 1 Mac. v, 8; Joseph. Ant. xii, 6, 1; see Mac. xiv, 4, ed. 92, 815. He appears the same
according to the present text, described as 'governor of Idumæa' (2 Mac. xii, 82).
Grotius (see Wernsdorff, Der fidel. Libr. Mac. § 78) suggests that the reading 'governor of Idumæa' is an
error for 'governor of Jamnia' (as at 1 Mac. v, 58). Josephus itself does not contradict this construction (ος τοις Ιδομενεων
ζητηματικῶς, Ant. xii, 8, 6). From the epithet applied to Gorgias, he seems to have been held in the highest
destestation by the Jews (A. V. "that cursed man," τὸν καταρατὸν, 2 Mac. xii, 85). The description
of his flight to Marissa and his defeat by Dothnas, son
of Judas' general, is given at some length, though in an
obscure and confused manner (2 Mac. xii, 84-88; comp. Joseph. Ant. xii, 8, 6).

Gorham Case, a case in law involving the doc-
trine of the Church of England as to baptismal regen-
cration. In August, 1849, the Rev. Richard (lord Cottenham) Bloom encouraged to present Mr. Gorham to the
vicarage of Bramford-Speke. The bishop, on being re-
quested to countersign his testimonials, stated on the paper his doubts as to Mr. Gorham's views, both of
discipline and doctrine. The lord chancellor, howev-
er, concluded that he was a person to whom the appro-
val of the archbishop's nominees was due. The
bishop then intimated his intention of examining
Mr. Gorham before he instituted him. The examination
took place, and continued for several days. The
result was, that the bishop of Exeter declined to insti-
tute Mr. Gorham to the vicarage of Bramford-Speke.
"This," he alleged, was a refusal of the see which, he laid stress on, was one of the causes of the
injuried and formularies of the Church declare them to be.
The case was brought before the Arches Court of
Canterbury, which decided (1849) that baptismal regenera-
tion is the doctrine of the Church of England, and that
Mr. Gorham maintained doctrine on the point oppo-
sed to those of the Church, and that consequently
the bishop had shown sufficient cause for his refusal to
institute, and that the appeal must be dismissed with
costs. From this decision Mr. Gorham appealed to
the judicial committee of privy council. The com-
mittee upheld the bishop's view, and therefore the
injuried and entangling, and that the answers were not
given plainly and directly. Their decision was in sub-
stance as follows, and it must be noted what points
they undertook to decide, and what not. The court
declared that it had no jurisdiction to settle matters of
faith, or to determine what ought, in any particular
matter, to be the doctrine of the Church of England, its
duty being only to consider what is by law established
as the basis on which the legal construction of her
articles and formularies. It appeared that very dif-
ficult questions had been discussed by ministers of the
Church, held by the promoters of the Reformation; that differ-
ences of opinion on various points left open were al-
tways thought consistent with subscription to the arti-
cles; and also, that opinions in no important particu-
lar to be distinguished from Mr. Gorham's had been
maintained by ministers on the point. The court also
ruled that the judgment of the Arches Court should
be reversed. Mr. Gorham was accordingly in-
stituted to Bramford-Speke. During the two years
that the suit was pending, the theological question was
discussed with all degrees of ability and acrimony in
sermons and pamphlets."—History of Christian Church

Sects, i, 42; Cunningham, Discussion of Church
Principles (Edinburgh, 1865), chap. vi.

Gorton (Goriton), son of Josephus (? Calaphus),
and one of those of eminent family who inclined the
Jewish populace to resist the anarchy of the Zealots
(Josephus, War iv, 3, 9), but was eventually slain by
them (ib. 6, 1).

Gorlin, surnamed Skantchel (the Admirable
One), an Armenian theologian, lived in the 5th century
of the Christian era. After studying philosophy, theo-
dology, and the Syriac and Greek languages under St.
Macrop (q. v.) and patriarch Isaac I, he was sent to
Constantinople to complete his studies. On returning
to his country, he engaged with Eneig (q. v.) and four
others in a translation of the Bible, and of several works
of the Greek fathers, into the Armenian. He subse-
quently became bishop of a see in the province of
Georgia. He is the author of a work on The Life
of Macrop, which is of importance for the early his-
tory of the Armenian Church, and was published by the
Mekhitarians in Venice in Opere di antichi Scrittori Armeni
del quinto secolo (Ven. 1883). See De Weerde, Goriani

Gorkum, the Martyrs of, the name given in
the Roman Catholic Church to two Armenian priests
of Dordrecht who had fled to Gorkum, were
captured at the conquest of that town by the Gueux
in 1572, and hung. On account of pretended miracles
 wrought by their relics, Pope Clement X, in 1674, al-
lowed them to be venerated in Holland. In 1867 they
were canonized by Pius IX. (A. J. S.)

Göte. See Gote.

Gorski, Theophylact, a Russian theologian,
died bishop of Kolomna in 1788. He wrote Orthodox
orientalis Ecclesiæ Dogmata (Lp. 1784), and a Compen-
dium of Christian Dogmas, in Latin and Russian, which
has since been translated into German and French (St.
Petersburg, 1792). These books, although in general
use in the Russian seminaries, openly advocate Pro-
testant views, and are opposed both to the Roman
Catholic and to the orthodox Greek dogmas. See Dict.
Hist. des Écrivains de l'Eglise grecque-russe; F. Pagarin,
De la Théologie dans l'Eglise russe (Paris, 1857); Hoe-

Gorton, Samuel, founder of a sect called Gorto-
monia, was born at Gorton, England, about 1600. He
says himself that he was one of the leaders in the
sects taught in the schools of human learning, and I bless God for
it." He was first in the employ of a linen- draper in London, but left that city in 1686 and went to Bus-
ton, U.S., in the hope of enjoying religious liberty;
but the Church there not being disposed to put up
with his extravagant ideas, he went to Plymouth, where he fared still worse, being fined, imprisoned, and
finally expelled in the midst of winter. In June, 1689,
he became an inhabitant of Aquidneck, or Rhode Is-
land, where fresh persecution befell him. Driven from
place to place, he finally sought some land at Pawtow-
exet, R.I., where he settled. Complained of by his
neighbors as encroaching on their property, he refused to ap-
pear before the court of Massachusetts, and in 1642
settled at Shawmut, where he had bought land of the
sacred Miantonomoh. His claims under this pur-
purchase were contested in court, where he was de-
criminated, convicted, and committed to prison, the cur-
sor, who appealed to the general court of Massa-
uchuets for assistance. Gorton and ten of his disci-
plaries were captured soon after and taken before the
court, where the land question soon gave place to
a trial for their lives as "damnable heretics," and that
the suit was pending, the theological question was
discussed with all degrees of ability and acrimony in
unlimited time. In 1644 the sentence was

changed into banishment. Gortyn then returned with his partisans to Rhodes Island, where he per-
sued the Indians to put themselves under the pro-
tection of England, and to abandon to that country a
part of their territory. He then returned to Eng-
lund where, in conclusion of this service, he re-
cived letters patent guaranteeing to him the peaceful
possession of his property at Shawmut. He called the
place Warwick, in remembrance of services rendered
him by the earl of Warwick. Gorton died about 1677.
His sect was in the end soon extinct. He wrote, "Secticopic
Defence against see-n-headed Policy" (1646, 4to):
- An incorruptible Key, composed of the 36 psalms, 
whereby you may open the rest of the holy Scriptures (1647, 4to):
- Salmancor, returned from the Dead (1655, 4to):
- An Antidote against the common Plague of the World: See
Mar's Life of Gorton in "The Sparks of Virtue, or
Divinity, Cyclop., American Literature, i. 178;
New American Cyclopaedia, viii, 384; Bartlett, Biblical,
Rhode Island, 134 sq.; Hutchinson, History of Mas-
achusetts, i. 117. (J. W. M.)
Gortyua (Gortynia; in classical writers, Gortyn,
or Gortyia; on a coin, Gortyia [pergortyia], a city
of Crete, mentioned in the Apocrypha in the list of
cities to which the Romans sent letters on behalf of
the Jews, when Simon the Macabees renewed the
treaty which his brothers Judas and Jonathan had
made with the Egyptians, xxviii, 23; Josephus, xxviii,
1 sq.; xlii, 1 sq.). There is no doubt that the Jews
were settled in great numbers in Crete (Josephus, Anti-
xvii, 12, 1; War, ii, 7; Philo, Leg. ad Caesam, sec. 86),
and Gortynia may have been their chief residence.
Tolemen Philometor, who treated the Jews kindly, and
who had received a numerous body in Egypt when
they were driven out of Judah by the opposite party
(Josephus, Anti. xiii, 8; War, i, 1, 1), rebuilt part of
Gortynia (Strabo, x, Didot. ed., p. 411). When Paul,
as a prisoner, was on his voyage from Caesarea to
Rome, the ship, on account of a storm, was obliged to
run under the lee of Crete, in the Bay of St. Paul,
Salmon, and soon after came to a place called Fair
Havens, which was near a city called Lassea (Acts
xxvii, 8). Lassea is probably the Lasia of the Peutin-
ergian Tables, and is there stated to be sixteen miles
east of Gortynia. It is very uncertain how long the
vessel was detained at Fair Havens, though "much
time had been spent" (Acts xxvii, 9), not since
they had sailed from Caesarea, but at the anchorage
(Alford, ad loc.). Doubtless the sailors, soldiers, and
prisoners had frequent intercourse with Lassea, and perhaps
Gortynia was a member of the League of the Great
Company at one or both of these places, but of this there is
not the slightest proof (comp. Coneybere and Howson, Life
Gortynia, according to Ptolemy (ili, 17, 10), was situ-
ated in 54° 15' and 84° 50'. Simon proposes a Sthoic-
omy for the name (Onom., p. 50; but see Sick-
ler, Handbuch, p. 470). Next to Cnosus, it was the most
important city in the island for power and mag-
nificence. At one time Gortynia and Cnosus in union
held the whole of Crete in their power except Lyttus
(Polyb., vi, 19), at other times they were in a con-
tinual state of warfare (Strabo, x, Didot. ed., p. 410).
Gortynia was founded by a colony from Gortys of Ar-
cadia (Plato, Leges, iv, Didot. ed., p. 320). It was
not of very considerable size, its walls being fifty stadia in
circuit, whilst those of its rival, Cnosus, were not more
than 100 stadia (Strabo, x, Didot. ed., p. 320). Its connec-
tion with Philopoemen in B.C. 201 is shown by the
Gortyaniacs having invited him to take the command
of their army (Plutarch, Philipp. 15). When the Acha-

III. - 90

an League was in alliance with the Romans, B.C. 197,
against Philip V of Macedon, 500 Gortyaniacs joined
Quinclus Flaminiinus when on his march to Thessaly,
previous to the battle of Cynoscephalae (Livy, xxxiii,
9). It is only recently that a coin bearing the well-
known title of the late Col. Leake was found, struck at
Gortyna. The late Col. Leake has shown that the coin with the legend KOPTYNION AXAIION, which had previously been assigned to Gortyna in Arcadia by the late Mr. Burgon (Num. Chron. xix, 253-56), cer-
tainly belongs to the Cretan Gortyna (Supp. Num.

Coin of Gortyna.

Holl. p. 110), thus proving that cities beyond the con-
tinent were admitted into the League (R. S. Poola,
Num. Chron., new ser., i, 178). About the same period
there are evidences of an alliance, political or commer-
cial, between Athens and several of the Cretan towns.
Some of the coins of six of these—Cnosus, Cydonia,
Gortyna, Hierapytna, Phalasarna, Cyrenae, and Phasias,
are tetradrachmas, with exactly the types of those of
Athens of the same age, but distinguished by having
the distinctive badges of the Cretan towns. They
were probably struck by the Cretan cities of the great
alliance against Philip V of Macedon about B.C. 188
(Paris, 36, 5, 6; comp. Eckhel, iii, 186, 12, i;
Leake, Num. Hel. Insular Greece, p. 19; Poole,
L. C.). As Cnosus declined, Gortyna rose to eminence,
and became the metropolis of Crete. About A.D. 200 a
brother of Septimius Severus held at Gortyna the
office of proconsul and questor of the united provinces
of Crete and Cyrenaica (Bockh, No. 2321). In the ar-
rangement of the provinces by Constantine, Gortyna
was still the metropolis of Crete (Hier. Synecd.

The remains of Gortyna near Agibus Bheka (the
ten Saints), and the cavern in the mountain, have been
described by Tournefort (Relation d'un Voyage de La-
souss; and Pococke (Description of the East), and the
cavern, more recently, by Mr. Cockerell (Walpole, ii,
402). The modern Gortyaniacs hold this cavern to be
the Labyrinthe, thus claiming for themselves the hon-
ors of the discovery of the Minotaur. The Gortyna
coins do not appear from the Gortyna coins, which date from the
time of the Persian war to that of Hadrian (and there
are none later), that their ancestors ever entertained
such an idea (Leake, Num. Hel. Insular Greece, p. 18).

The famous Labyrinthe is represented on the coins of
Cnosus, and Col. Leake says that it is difficult to
reconcile this fact with the existence of the Labyrinthe
near Gortyna, for that the excavation near Agibus Bheka,
at the foot of Mount Ida, is the renowned Cretan
labyrinthe, cannot be doubted after the description of
p. 156). This opinion is given not on exceptional in the
assertion of Pausanias (i vii κωστών ἀντικεῖας, 
i, 27, 9). One of the coins of Cnosus bears, besides the
labyrinthe on its reverse, the Minotaur on the ob-
verse. It cannot be much later than the expedition
of Xerxes to Africa, when Homer was alive, though
the tradition of the Labyrinthe, if not of its real ex-
istence; whereas Héc (Kretas, i, 56 sq.), relying on
the silence of Hesiod and Herodotus, and the assumed
silence of Homer—though the Eii adds what looks
very like an allusion to the Cretan wonder (H. viii,
256 sq.)—has supposed it to have been an invention
of the later poets borrowed from Egypt (Poole, ut sup.
i, 171-72). A full account of the remains of the old site
and the modern place is given in the Museum of Crea-
sical Antiquities (ii, 277–286). Mr. Falkener here describes the cavern near Gortynia from Sieber, who spent three days in examining it, and says that certain sites of it are in a position which probably supplied the stone for building the city (Revue des Etudes Grecques, i, 511–520). Hock seems to hold similar views (Kretz, i, 447–454). See Cret.

Goshen (Heb. id. יגש, prob. of Egyptian origin, but unknown signif.). The name of at least two places.

1. (Sept. usually Πτερον or Πτεροτ). A province of Egypt, or of Thebes, in which Jacob and his family settled through the instrumentality of his son Joseph, and in which they and their descendants remained for a long period (Gen. xlv, 10; xlii, 28, 29, 34; xlviii, 1, 4, 6, 27; i, 6; Exod. viii, 22; ix, 26). (B.C. 1674–1558.) It is usually called the "land of Goshen" (גַּֽשְׁנָה נִבָּר, "country of Goshen," Gen. xlviii, 27), but also "Goshen" simply (Gen. xlv, 28, first clause, 29). It appears to have borne another name, "the land of Rameses" (רְמַה פָּרָה, Gen. xlviii, 11), unless this be the name of a district of Goshen. (See below.) That Goshen lay on the eastern side of the Nile may be justifiably inferred from the fact that Jacob is not reported to have crossed that river; nor does it appear that the Egyptians did not live in their territory of Egypt. The various opinions that have been held on the subject may be found classified and considered by Bellermon in his Handb. der Bibl. Lit. iv, 191–220. Lake-macher (Ox. Phil. vi, 291 sq.) locates Goshen in the vicinity of Bubastis, not far from Tanis; but this is too far from Palestine. Bryant (Ox. sum. des anc. Hist. of Egypt, p. 75 sq.) prefers the Saitic nome, which likewise is far west (comp. Eichhorn, Bibli, vi, 854 sq.). Jablonsky (De terra Gosh, Fruct. a. V. 1756; also in his Opusc. ii, 70) holds it to be the Heracleotic nome; but this has not been confirmed by the Greeks, nor by the Egyptians. The language of the land was not far removed from the Red Sea. It appears probable that we may fix the locality of Goshen in Lower Egypt, on the east side of the Pelusiac branch of the Nile, in the district around Heropolis. The Sept. renders the words "land of Goshen" (Gen. xlviii, 28), כֹּֽהֵן הַנֵּבָּר בֶּלְבֶל, with the idea of the Hebrew "grass" (as in Ps. xlii, 6; Ps. cvii, 13). But Jacob and his family settled in the Pelusiac branch of the Nile, therefore, Rameses. This would make Goshen correspond with one of the divisions of what was anciently termed the Prefecture Arabica, Ti-Arabia, the eastern district, lying that is, on the eastern or Arabian side of the Nile. This is mentioned by Strabo (xv, 5, 1), and Ptolemy (iv, 6). C. C. Robinson, however, remarks that is, the southern branch of the Nile leaves the delta and continues, without a break, to the north of the Pelusiac branch of the Nile: this, Manetho tells us, was the custom of the first Shepherd king (Josephus, c. Ap. 1, 14). From the account of the arrival of Jacob (Gen. xlvii, 28, 29) it is evident that Goshen was between Joseph's residence at the time and the frontier of Palestine, and apparently the extreme province towards that frontier. The advice that Joseph gave his brethren as to their conduct to Pharaoh further characterizes the territory as a grazing one (Gen. xlvii, 33, 84). (It is remarkable that in Coptic writings signifies both a "shepherd" and "disgrace," and the like, Rosellini, Monumenti storici, i, 177.) This passage shows that Goshen was scarcely regarded as a part of Egypt Proper, and was not peopled by Egyptians—characteristics that would positively indicate a frontier province. But it is not to be inferred that Goshen had no Egyptizer in the earlier period; at the time of the ten plagues such are distinctly mentioned. That there was, moreover, a foreign population besides the Israelites seems evident from the account of the calamity of Ephraim's house (1 Chron. vii, 20–30) [see BERIAH], and the mention of the "mixed multitude" (תִּֽמְתָּל מֵתָּכָא), who went out at the Exodus (Exod. xii, 38), notices referring to the earlier and the later period of the sojourn. The name Goshen may possibly be Hebrew, or Semitic—although we do not venture with Jerome
to derive it from גֶּשֶן—for it also occurs as the name of a district and of a town in the south of Palestine (see below, No. 2), where we could scarcely expect an appellation of Egyptian origin unless given after the Exodus, which in this case does not seem likely. It is also noticeable that some of the names of places in Goshen or its neighborhood, as certainly Migdol and Bas-sephon (q. v.), are Semitic, the only positive exceptions being the cities Pithom and Ramses, built during the oppression. The next mention of Goshen confirms the previous inference that its position was between Canaan and the Delta (Gen. xlvii, 1). The nature of the country is indicated still more clearly than in the passage last quoted in the answer of Pharaoh to the request of Joseph's brethren, and in the account of their settling (Gen. xlvii, 5, 6, 11). Goshen was thus a pastoral country where some of Pharaoh's cattle were kept. The expression "in the best of the land" (יוְאֵשׁ גֶּשֶן) must, we think, be relative, the best of the land for a pastoral people (although we do not accept Michaelis's reading "pastures" by comparison with the Arabic, Suppl. p. 1072; see Gesen. Thes. s. v. גֶּשֶן), for in the matter of fertility the richest parts of Egypt are those nearest to the Nile, a position which, as has been seen, we cannot assign to Goshen. The sufficiency of this tract for the Israelites, their prosperity there, and their virtual separation, as is evident from the account of the plague, from the great body of the Egyptians, must also be borne in mind. The clearest indications of the exact position of Goshen are those afforded by the narrative of the Exodus. The Israelites set out from the town of Ramses, in the land of Goshen, made two days' journey to the "edge of the wilderness," and in one day more reached the Red Sea. At the starting-point two routes lay before them, "the way of the land of the Philistines . . . that [was] near," and "the way of the wilderness of the Red Sea" (Exod. xliii, 17, 18). It is also represented, in conformity with this position, at the last great struggle, as comparatively near to Palestine, by the route that lay through the land of the Philistines (Exod. xliii, 17). Then, while the Israelites do not appear to have had any considerable settlements on the further side of the Nile, yet it is clear they were in a position that admitted of ready access to it: it was on the river (whether the main stream or one of the branches) that the infant Moses was exposed; in connection with it also that several of the miracles wrought by Moses were performed; and the fish of which they had been wont to partake, and the modes of irrigation with which they were familiar, bespoke a residence somewhere in its neighborhood (Exod. ii, 5; vii, 19; viii, 5; Numb.
vi, 5; Deut. xi, 10). Yet the locality occupied by the Israelites could not have been very near the Nile, since three days were sufficient for their going into the wilderness to keep a feast to the Lord (Exod. v, 5). From these indications we infer that the land of Goshen in part has been near the border of the ancient Delta, Rameses lying within the valley now called the wady et-Tumaylat, about thirty miles in a direct course from the ancient western shore of the Arabian Gulf. See Exodus. The superficial extent of the land, if we include the more fertile part of the natural valley, which may somewhat exceed that of the tract bearing this appellative, is probably under sixty square geographical miles. If we suppose the entire Israelitish population at the time of the Exodus to have been 1,600,000, and the whole population of Egypt, including Egyptians and fully as many other than the Israelites, about 2,000,000, this would give no less than between 30,000 and 40,000 inhabitants to the square mile, which would be half as dense as the ordinary population of an Eastern city. It must be remembered, however, that we need not suppose the Israelites to have been limited to the valley for pasture, but, like the Arabs, to have led their flocks into fertile tracts of the deserts around, and that we have taken for our estimate an extreme sum, that of the people at the Exodus. For the greater part of the sojourn there numbers must, however, have been, and before the Exodus they seem to have been partly spread over the territory of the oppressor, although collected at Rameses at the time of their departure. One very large place, like the Shepherd stronghold of Avaris, which Manetho relates to have had at the first a garrison of 240,000 men, would also greatly diminish the disproportion of population to superintendees. The very small superficial extent of Egypt in relation to the population necessary to the construction of the vast monuments, and the maintenance of the great armies of the Pharaohs, requires a different proportion to that of other countries, may, however, be in part explained by the extraordinary fertility of the soil. Even now, when the population is almost at the lowest point it has reached in history, when villages have replaced towns, and hamlets villages, it is still denser than that of many parts of England. It is not necessary, however, to suppose that during the whole period of the sojourn in Egypt the Israelites continued to dwell altogether within the same region: as they multiplied in number, and in process of time began to devote themselves to other occupations, they would naturally extend their territory. But these must be included in the number given, be they teachers or reapers, become more intermingled with the population of Egypt. It is quite possible that certain of their number crossed the Pelusiac arm of the Nile, and acquired dwellings or possessions in the tract lying between it and the Tanitine (Robinson, Researches, i. 76; Hengstenberg, Egypt and Books of Moses, p. 45). Particular families may have also shot out in other directions; and in this way would naturally arise that freer intercourse between them and the families of Egypt which appears to be implied in some of the later notices (Kings, ii. 29). Still, whatever area is indicated above as the land of Goshen, the district in which the original settlers from Canaan were assigned a home, continued to be the last the head-quarters of the covenant people (see Geiger, De regno Gionormum in Egipto, Marb. 1795). From the field of Zoan being mentioned in part has been near the eastern side of (Psa. lxxxvii, 12, 43), some have supposed that the town of that name, situated in the Tanitine nome, must have been the capital of Pharaoh at the time. Bocch and Hengstenberg, among others, have advocated this view; but not all that is positive is evident from it, but they have not been able to establish the point altogether satisfactorily; and it is quite probable that Zoan, in the passage referred to, is used in a general sense, as a kind of representative city in the land of Egypt for the land itself (see Kurtz, Hist. of Old Con., § 41; Naville, Goshen [4th Memoir of "Eg. Explor. Fund"], Lond. 1887, 4to). See Egypt.

2. (Sept. Gōsēn; Vulg. Gessen, Gosen), the "land" or the "country [both μητρόν] of Goshen," twice named as a district in southern Palestine, included in the conquests of Joshua (Josh. x, 41; xi, 16). From the first of these it would seem to have lain between Gaza and Gibeon, and therefore to be some part of the maritime plain of Judah; but in the latter passage that plain, the Shefelah, is expressly specified (here with the article) in addition to Gosen. In this place, too, the situation of Gosen—if the order of the statement be any indication—seems to be between the Beth-horon and the Shefelah (A. V. "valley"). If Goshen was any portion of this rich plain, is it not possible that its fertility may have suggested the name to the Israelites? On the other hand, the name may be far older, and may retain a trace of early intercourse between Egypt and the south of the promised land. For such intercourse comp. 1 Chron. vii, 21. The name may even have been extended from No. 8 below (see Keil, On Josh. p. 290).

3. (Sept. Gōsēn, Vulg. Gozem.) A town of the same name is once mentioned (between Anim and Holon) in company with Debir, Soco, and others, as in the mountains of Judah (Josh. xv, 51), in the group on the south-western part of the hills (see Keil, Josh. p. 884). It is probably the origin of the application to an adjacent region (No. 2, above), for it is not likely that two entirely different places would be called by the same name, both in the southern quarter of Judah. From the mention of Gaza (Josh. x, 41) and the route of Joshua (ver. 10), the locality in question would seem to be situated in the gorges of Judah, running up between the territories of Benjamin and Dan, now occupied by the town of Malak, south of Kirjath Jearim (see Robinson's Researches, ii. 387). See JUDAH, TRIBE OF.

Gospel. This word, "conformably to its etymological meaning of Good-tidings, is used to signify, (1.) The welcome intelligence of salvation to man, as preached by our Lord and his followers. (2.) It is after-wards transitively applied to each of the four histories of our Lord's life, published by those who are" therefore called "Evangelists," writers of the history of the Gospel (ιεραγλιον). (3.) "The term is often used to express collectively the Gospel-doctrines; and 'preaching the Gospel' is accordingly often used to express the practice of conveying to others the good tidings, but the 'teaching men how to ament themselves of the offer of salvation,' the declaring of all the truths, precepts, promises, and threatenings of Christianity. It is termed "the Gospel of the grace of God," because it flows from God's free love and goodness (Acts xx, 24); and, when truly and faithfully preached, is accompanied with the influences of the divine Spirit. It is called "the Gospel of the kingdom," because it treats of the kingdom of grace, and shows the way to the kingdom of glory. It is styled "the Gospel of the Christ" because he is the great subject of it (Rom. i, 16); and "the Gospel of peace and salvation," because it publishes peace with God to the pientiful and believing, gives to such, peace of conscience and tranquillity of mind, and in the means of their salvation, present and eternal. As it displays the glory of God and the means of his salvation in the means of eternal glory, it is entitled "the glorious Gospel" and "the everlasting Gospel," because it commenced from the fall of man, is permanent throughout all time, and produces effects which are everlasting. This use of the word Gospel has been so extensive as to the Gospel-truth is to be found exclusively or chiefly in the "Gospels," to the neglect of the other sacred writings; and others, to conclude that the discourses of our Lord and the apostolic epistles must exactly com-
cide, and that in case of any apparent difference, the former must be the standard, and the latter must be taken to bear no other sense than what is implied by the other. Whereas, it is very conceivable, that though both might be, in a certain sense, "good tidings," yet one may contain a much more full development of the Christian doctrine, and the one be the correct form of the day. It has been disputed whether the Gospel consists merely of promises, or whether it can in any sense be called a law. The answer plainly depends upon adjusting the meaning of the words gospel and law. If the gospel be taken for the declaration God has made to men by Christ, concerning the manner in which He will treat them, and the conduct He expects from them, it is plain that this includes commands, and even threatenings, as well as promises; but to define the Gospel so as only to express the favorable part of that declaration, is indeed taking the Gospel for granted, and confining the word to a sense much less extensive than it often has in Scripture (comp. Rom. ii, 16; 2 Thess. i, 8; 1 Tim. i, 9-11); and it is certain that, if the Gospel be put for all the parts of the dispensation taken in connection one with another, it may well be called, on the Gospel message. In like manner, the question, whether the Gospel be a law or not, is to be determined by the definition of the law and of the Gospel, as above. If law signifies, as it generally does, the discovery of the will of a superior, teaching what he requires and warning of the consequences of his intention of dispensing rewards and punishments, as this rule of their conduct is observed or neglected; in this latitude of expression it is plain, from the proposition, that the Gospel, taken for the declaration made to men by Christ, is a law, as in Scripture it is sometimes called (James i, 25; Rom. iv, 15; viii, 2). But if law be taken, in the greatest rigor of the expression, for such a discovery of the will of God and our duty, as to contain in it no intention of our obtaining the divine favor otherwise than by a perfect and universal conformity to it, in that sense the Gospel is not a law. See Win- ton, The Cos- mants, vol. iii, ch. i; Doddridge, Lectures, lect. cixii; Watts, Orthodoxy and Charity, Essay ii.

GOSSPEL SIDE OF THE ALTAR, the right side of the altar or communion-table, looking from it, at which, in the English Church service, the Gospel appointed for the day is read. It is of higher distinction than the opposite side of the Chantry, and is occupied by the Archdeacon of the highest ecclesiastical rank who happens to be present. In some cathedrals, one of the clergy has this special duty to perform, and is designated the Gospeller.

Gospeller. (1.) A term of reproach, though really an honorable epithet, applied by the Romanists to those who advocate the circulation of the Scriptures. It was first given in England to the followers of Wickliffe, when that eminent reformer translated the New Testament (Eden). (2.) A term applied in the Reformation period to certain Antinomians. "I do not find anything objected to them as to their belief, save only that the doctrine of predestination has been generally taught by the reformers, many of this sect began to make strange inferences from it, reckoning that since everything is decreed, and the decrees of God could not be frustrated, therefore men were to leave themselves to be carried by these decrees. This drew some into great impety of life, and others into desperation. The Germans soon saw the ill effects of this doctrine, Luther changed his mind about it, and Melancthon openly writ against it; and since that time the whole stream of the Lutheran churches has run the other way. But both Calvin and Bucer were still for maintaining the doctrine of these decrees; only they warned the people not to think much of them, since the Scripture speaks of these things which men may not penetrate into; but they did not so clearly show how these consequences did not flow from such opinions. Hooper, and many other good writers, did often dehort people from entering into these curiosities; and a caveat to that same purpose was put afterwards into the article of the Church about predestination" (Burnet, History of Reformation, pt. ii, bk. i, p. 180). (3.) It is customary in the Church of England for the ministers to read the gospel at the opening of the service before the communion table. He who reads the gospel, standing at the north side of the altar, was formerly called the Gospeller; and he who reads the epistle at the opposite side, was called the Epistoler. In the canons of Queen Elizabeth, we find that a special reader, entitled an Epistoler, to read the epistle in collegiate churches, vested in a cope.

Gospel, a term evidently of Anglo-Saxon origin (according to some, i. q. God's Spell, i.e. Word of God; but according to most and better authorities, i. q. good spell, i.e. glad news) is the rendering of eowga- gyl(i)on, lit. good message (originally spoken of a record for good news, Homer, Odyssey, xiv, 152, 166; Plutarch, Ages. 38; then of glad tidings itself, and so Sept. for γεγογησα, 2 Sam. xviii, 20, 22), constantly used in the N. T. (but not in Luke nor by John, and only twice in Acts, once in Peter, and once in Rev.) to denote, 1. The announcement of the kingdom of the Messiah, as ushered in by the coming and life of Christ; 2. The Gospel as an act or plan of salvation thus inaugurated, especially in its proclamation in the world; and, 3. The characters of the persons or histories which constitute the original documents of this system of faith and practice. Justin Martyr em- ployed for the last the less appropriate term ενσώπου- μαρα, memoirs; and other ancient writers occasionally style them, evangelia, i.e.; but they were not so much de- signed as biographical sketches, whether complete or otherwise, but rather as outlines of the divine econo- my introduced in the New Dispensation. The central point of Christian preaching was the joyful intelli- gence that the Saviour had come into the world (Matt. iv, 23; Rom. x, 15); and the first Christian preachers, who characterized their account of the person and mission of Christ by the term εὐαγγελίου, were themselves called εὐαγγελισται (Ephes. iv, 11; Acts xxii, 8). The former name was also prefixed to the written accounts of Christ; and this intelligence was ascribed by various writers in various forms, the particle κατα, "according to," (e.g. εὐαγγελίου κατὰ Ματθαίου) was inserted. We possess four such accounts; the first by Matthew, announcing the Redeemer as the promised King of the kingdom of God; the second by Mark, de- claring him the prophet mighty in deed and word (Luke xxiii, 19); the third by Luke, of whom it might be said that he represented Christ in the special char- acter of the Saviour of sinners (Luke vii, 86 sq.; xv, 18-9 sq.); the fourth by John, who represents Christ as the Son of God, in whom deity and humanity be- came one. The ancient Church gave to Matthew the symbol of the ox, to Mark that of the lion, to Luke that of the man, and to John that of the eagle; these were the four faces of the cherubim. The cloud in which the Lord revealed himself was borne by the cherubim, and the Evangelist who were also the symbols of the glory of God which appeared in the form of man.

I. Relative Position.—Concerning the order which they occupy in the Scriptures, the oldest Latin and Gothic versions, as also the Codex Cantabrigiensis, place Matthew and John first, and after them Mark and Luke, while the other MSS. and old versions fol- low the order given to them in our Bible. As di- istmatic reasons render a different order more natural, there is much in favor of the opinion that their usual position arose from regard to the chronological dates of the respective composition of the four gospels (see Seiler, De ordine codicum quos de Evangel. priores scriptorum, Erlang., 1805). This is: the Gospel of Origen, Irenæus, and Eusebius. All ancient testimo- nies agree that Matthew was the earliest and John the
latest evangelist.—Kitto, s. v. For the dates, see each gospel. See also Tischendorf's tract, *Worte waren unsere Evangelien verfasst* (3d ed. Lpz. 1865).

11. Authenticity. — It may fairly be said that the genuineness of these four narratives rests upon better evidence than that of other ancient writings. They were all composed during the latter half of the 1st century. Before the end of the 2nd century there is abundant evidence that the four gospels, as one collection, were generally used and accepted. Irenæus, who suffered martyrdom about A.D. 185, in the discreditation of Polycarp and Papias, who, from having been in Asia, in Gaul, and in Rome, had ample means of knowing the beliefs of various churches, says that the authority of the four gospels was so confirmed that even the heretics of his time could not reject them, but were obliged to attempt (Apent. ad Apolin. i. p. 141) *an abridgment* or *another exposition of them* (Contra. Hær. iii, 11, § 7). Tertullian, in a work written about A.D. 205, mentions the four gospels, two of them as the work of apostles, and two as that of the disciples of apostles (apostolici); and sets their authority on their apostolic origin (Adv. Marcion. iv, ch. ii). Origen, who was born about A.D. 185, and died A.D. 255, describes the gospels in a characteristic strain of metaphor as "the four elements of the Church's faith, of which the whole world, reconciled to God in Christ, is composed" (In Joh., v. Elsewhere, in commenting on the opening of the gospel of John, he draws a line between the inspired gospels and such productions as "the gospel according to the Egyptians," "the gospel of the Twelve," and the like (Hom. in Luc. iii, p. 582 sq.). Although Theophylact, who became sixth (seventh?) bishop of Athens about A.D. 106, speaks only of "the gospels," without adding, at least in that connection, the names of the authors (Ad Autol. iii, p. 124, 125), we might fairly conclude with Gieseler that he refers to the collection of four, already known in his time. But from Jerome we know that Theophylact arranged the records of the four evangelistic gospels only one week of "the gospels," without adding, at least in connection with the names of the authors (Ad Autol. iv, p. 127). Tertullian, who died about A.D. 225 (?), compiled a Diatessaron, or Harmony of the Gospels. The Muratorian fragment (Muratori, Antiq. ii. iii. 584; Routh, Relig. S. vol. iv, which, even if it be not by Caesius and of the 2nd century, is at least a very old monument of the Roman Church, describes the gospels of Luke and John; but time and carelessness seem to have destroyed the sentences relating to Matthew and Mark. Another source of evidence is open to us in the citations from the gospels found in the earliest writers. Barnabas, Clement, Polycarp, Ignatius, and possibly Papias, bear witness to the genuine quotations from them, but not with verbal exactness. The testimony of Justin Martyr (born about A.D. 99, martyred A.D. 165) is much fuller; many of his quotations are substantially found in the gospels of Matthew, Luke, probably of John, and possibly of Mark also, whose words it is more difficult to separate. The quotations from Matthew are the most numerous. In historical references, the mode of quotation is more free, and the narrative occasionally unites those of Matthew and Luke: in a very few cases he alludes to matters not mentioned in the parallel gospel, as, for instance, Apoc. Dkokowigik. j. M. Justin. Hamil. 1846). Beside these, Matthew appears to be quoted by the author of the epistle to Diognetus, by Hegesippus, Irenæus, Tatian, Athenagoras, and Theophilus. Eusebius records that Pantaenus found in India (the south of Asia?) Christ "in a clearer light than any other ancient writer." All this shows that long before the end of the 2nd century the gospel of Matthew was in general use. From the fact that Mark's gospel has few places peculiar to it, it is more difficult to identify citations not expressly quoted to him; and Athenagoras and Theophilus appear to quote his gospel, and Irenæus does so by name. Luke is quoted by Justin, Irenæus, Tatian, Athenagoras, and Theophilus; and John by all of these, with the addition of Ignatius, the epistle to Diognetus, and Polycrates. From these we may conclude that before the end of the 2nd century the Gospel collection was well known and in general use. There is yet another line of evidence. The heretical sects, as well as the fathers of the Church, knew the gospels; and as there was no greatest hostility between them, if the gospels had become known in the Church after the discussion arose, the heretics would never have accepted them as genuine from such a quarter. Both the Gnostic and Marcionites arose long before the 3rd century; therefore it is probable that the gospels were then accepted, and thus they are traced back almost to the times of the apostles (Ols-hausen). Upon a review of all the witnesses, from the apostolic fathers down to the Canon of the Laodi-cean Council in 364, and that of the third Council of Carthage in 397, it is clear that the four gospels are numbered in the Canon of Scripture, there can hardly be room for any candid person to doubt that from the first the four gospels were recognised as genuine and as inspired; that a sharp line of distinction was drawn between them and the so-called apocryphal gospels, of which the number was very great; that, from the citations of passages, the gospels bearing these four names were the same as those which we possess in our Bibles under the same names; that unbelievers, like Celsus, did not deny the genuineness of the gospels, even when they were implying their infidelity; that heretics thought it necessary to plead some kind of sanction out of the gospels for their doctrines: nor could they venture on the easier path of an entire rejection, because the gospels were everywhere known to be genuine. As a matter of literary history, nothing can be better established than the genuineness of the gospels; and if in these latest times they have been assailed, it is plain that theological doubts have been concerned in the attack. The authority of the books has been denied from a wish to set aside their contents. Out of a mass of authorities the following may be selected: *Norton, Genuineness of the Gospels* (Lond. 1846–8, 8 vols.); Kirchhoffer, *Quellenansammlung zur Geschichte des N. T. Canons* (Zurich, 1844); De Wette, *Lehrbuch der hist.-krit. Einleitung,* etc. (8th ed., Berlin, 1860; tr. Botst. 1858); Hug's Einleitung (tr. with notes, Andover, 1836); Olshausen, *A Sketch of Christian Hermeneutics*; and W. Lougher, *A Sketch of the Ecclesiastical Authority of the N. T. Canons.* (Königsb. 1823); Jones, *Method of settling the canonical Authority of the N. T.* (Oxf. 1758, 2 vols.); Baur, *Krit. Untersuchungen über die Canon. Evangelien* (Tüb. 1847); Reuss, *Grund. des N. T.* (4th ed., Brunswhick, 1844); *Greek Text of the N. T.* (2d ed., Lond. 1851; 3d ed. Lond. 1866); Gieseler, *Historisch-kritischer Versuch über die Einleitung,* etc., der schriftlichen Evangelien (Leipzig, 1818).

II. Mutual Relation and Origin.—"Many portions of the history of Jesus" (remarks Mr. Norton, who has minutely investigated the subject) "are found in common in the first three gospels, others are common to two of their number, but not found in the third. In the passages referred to, there is generally a similarity of wording, sometimes in the greatest degree, in particular circumstances, in the aspect under which the event is viewed, and the style in which it is related. Sometimes the language found in different gospels, though not identical, is equivalent or nearly equivalent; and not infrequently, the same series of words, and the same order, are the characteristic marks of the whole or a great part of a sentence, and even in larger portions." (Genuineness of the Gospels, i, 240). Mr. Westcott exhibits the proportion of correspondences and peculiarities in several numerical tables: if the asserted coincidences are represented by 100, their proportionate distribution will be, Matthew, Mark, and Luke, 58; Matthew and Luke, 21; Matthew and Mark, 20; Mark and Luke, 8, 6, etc. Looking only at the general result, it may be said that of the
contents made to it at different periods. Various copies of this original gospel, with these additions, being ex-
tant in the time of the evangelists, each of the evan-
gelists is supposed to have used a different copy as the
basis of his gospel. In the hands of bishop Marsh,
who adopted and modified the hypothesis of Eichhorn,
this original gospel becomes a very complex thing.
He supposed that there was a complete, literal text of
the Aramaean original gospel, and various transcripts
with alterations and additions. But when it is considered
that all these suppositions are entirely gratuitous,
that they are made only to meet the emergencies of
the case as it has come to be refuted, it is evident
that the whole theory of hypothesis is carried beyond
just bound.
The grand objection to this original gospel is the
element of historical evidence for its existence. If
such an original gospel ever had existed, it must have
been of the very highest authority, and, instead of being
tampered with, would have been carefully preserved
in its original form, or at least in its Greek translation.
The alterations and additions supposed to have been
made in it are not only inconsistent with its sacred
and authoritative character as the original gospel, but
also with the habits of the Jews. Even if this hypothesis
were true, it is clear that the writer of the first
three gospels, it is far too artificially contrived
to be true; but it fails of its aim. The original work,
supposed to consist of the sections common to the three
gospels, cannot be made out; and the individuality
of character, that is so much the mark of the evangelists,
cannot be reconcilable with the supposition that several
different writers contributed materials. Notwithstanding
the identity of subject among the three gospels, each writer
is distinguished by his own characteristic style. It
is remarkable that Dr. Weiss, of Königsberg, has quite
recently (Stud. u. Kritik, 1821, i. 4) propounded a the-
ory of explanation very much akin to that of Marsh.
He supposes that the first evangelist, the writer of
Matthew's Gospel, as well as Luke, used a copy of
Mark's Gospel, and, along with this, a second more
ancient, perhaps immediately apostolic written source,
which Marius also made use of in the composi-
tion of his gospel. In this way he thinks all the
phenomena are simply and easily explained. He
endeavors to establish his view by a detailed examina-
tion and comparison of the three synoptic gospels,
and he holds that the whole argument against the hypo-
thesis of Griesbach thought that Mark copied from
Matthew and Luke, and this opinion is still held by some;
but an opinion in favor of the originality of Mark has
of late been gaining ground (Thilenius, Meyer, Weiss).
It must, we think, be held that the gospels are
more consistent with the hypothesis that Matthew
wrote his gospel in Hebrew, while there is no trace of the Hebrew
gospel itself. The conclusion is that the Hebrew gospel
of Matthew must have been displaced at an early period
by another containing its essential contents, but richer
and more complete in accordance with the ancient
tradition that Matthew wrote his gospel in Hebrew.
Hence the later Greek gospel was held to be the work
of Matthew the apostle, the more ancient Hebrew one
having been really the apostle's work. This revival
in the present day of what is substantially the hypoth-
esis of Eichhorn and Marsh is significant of the still
unsolved state of the question.

3. That our present gospels are to be traced mainly
to the oral teaching of the apostles as their source, was
the opinion of Herder and Giseler, and more recently
of De Wette, Guericke, Norton, Westcott, and others.
They are 'oral traditions' (says De Wette) 'the spirit of Christian antiquity who regard the oral
tradition of the gospel (the oral original gospel) as the
basis and source of all the Christian gospels, and who
endeavor to apprehend the history of the origin of the
latter in a definite relation to the former' (Introd. to
N. T., sec. 87). The above account was published orally
before it was committed to writing, and the preaching
of the apostles must, from the nature of the case, have
consisted chiefly of a narration of the facts recorded
in our present gospels. It is naturally supposed that
the same source which now constitutes the narrative
would be the result, and that we have a transcript,
as it were, of this type or form of narrative in the first
three gospels. The verbal coincidences in the gospels are found especially in those cases in which it might have been expected that the first preachers of the gospel would be exact, namely, the recital of the words of Christ and quotations from the O.T. This account of the probable origin of the gospels is not only in accordance with the testimony of the apostles or of the period, but is an instance of the oral tradition rather than of writing, but is also substantially the same as that which Luke gives in the preface to his gospel (Luke i, 1-4). While Luke refers to written accounts of the ministry of Christ in the preparation of some Christians at that time, he mentions that these accounts of Christ were founded directly or indirectly upon the oral accounts of the apostles (ελθει απαντήσων ἤν τοις ἀρχαῖς ἀπάντησι καὶ ὑποτείναι γενέμαν τοῦ λόγου). The statement of Papias respecting the origin of Mark's Gospel is, that it was derived from the preaching of Peter, and we have already quoted the important testimony of Irenæus to the same effect. To prevent misapprehension, however, it ought to be observed that our written gospels date from the latter half of the first century, and that, "so long as the first witnesses survived, so long the tradition was current and the traditions of their masters; whereas they passed away it was already fixed in writing" (Westcott, p. 192). The theory of the oral origin of the gospels, while it has much evidence in its favor, cannot be accepted as a complete solution of the problem. It has been the object of some instances of verbal coincidence in the narrative common to the three synoptics, or to two of them; nor the instances in which either two or all the three evangelists agree with each other in their quotations from the Sept., and at the same time differ from the Sept. itself (Matt. iii, 8; Mark i, 8; Luke iii, 4; compared with Isa. xi, 8, Sept., and Matt. iv, 10; Luke iv, 6, compared with Deut. vii, 15, Sept.). De Wette would combine "the two hypotheses of a common oral source, and of the influence through writing of one evangelist on another." There is a striking difference between the fourth gospel and the synoptic gospels in respect both to contents and form; but, with all this difference, there is a general and essential agreement. John relates in part the same things as the synoptists, and in a similar manner, but not with the verbal agreement. The following are parallel: The purification of the Temple, i, 12-22 = Matt. xxi, 11 sq.; the feeding of the multitude, vi, 1-15 = Matt. xiv, 18-21; the walking upon the sea, vi, 16-21 = Matt. xiv, 22-36; the anointing, xii, 1-8 = Matt. xxii, 16-18; the entrance into Jerusalem, xii, 9-19 = Matt. xx, 1-16; the prediction of Peter, xiiii, 36-38 = Matt. xxvi, 33-35. In some of these instances the expressions are verbally parallel; also in the following: xii, 25 = Matt. x, 19; xiii, 20 = Matt. x, 40; xiv, 31 = Matt. xxvi, 46. There is a similarity between i, 24, and Luke vi, 40 (De Wette, Evang. Handb. zum N. Test.). On the other hand, however, much important matter has been omitted and much added by John, while his manner of narration also differs from that of the synoptists. In the first three gospels, the course of our Lord's ministry is chiefly laid in Galilee, but in the fourth gospel it is more largely in Judaea and Jerusalem. This may partly account for the different style of our Lord's discourses in the synoptic gospels, as compared with the Gospel of John (Hug, p. 435). In the former, Christ often makes use of parables, parables of the fish; in the latter, John records long and mystical discourses. Yet we find proverbial maxims and parables also in John xii, 24-26; xiii, 16, 20; x, 1 sq.; xv, 1 sq. Many points of difference between the fourth gospel and the others may be satisfactorily reconciled for from the fragmentary character of the narratives. None of the four gospels are to be considered a complete biography, and, therefore, one may omit what others omit. Besides, the fourth gospel was composed after the others, and designed to be in some respects supplemental. This was the opinion of Eusebius, and of the still more ancient writers whose testimony he cites, Clement of Alexandria and Origen; and the opinion appears to be well founded. Whether John was acquainted with the works of his predecessors or not is uncertain, but there is no doubt acquainted with the evangelical tradition out of which they originated. We have, then, in this circumstance, a very natural explanation of the omission of many important facts, such as the institution of the supper, the baptism of Jesus by John, his life as a Nazorean, the temptation, the temptation, and the internal conflict at Getsemane. These his narrative assumes as already known. In several passages he presupposes in his readers an acquaintance with the evangelical tradition (i, 39, 45; ii, 1, iii, 24; xi, 2). It is not easy to say precisely, we and the synoptists with reference to the day on which Christ observed the last passover with his disciples. Lücke decides in favor of John, but thereby admits the discrepancy to be real. Again, in the synoptic gospels, the duration of our Lord's ministry appears to be one year; whereas John mentions three passovers which our Saviour attended; but neither the synoptists nor John determine the duration of the Saviour's ministry, and, therefore, there is no contradiction between them on this point. It has been alleged that there is an irreconcilable difference between the synoptic and the Johannine view of the resurrection of Christ, in considering the historical reality of the former, the latter must be regarded as ideal and subjective; particularly, that the long discourses attributed to Christ in the fourth gospel could hardly have been retained in John's remembrance, and that the denial of the resurrection of Christ in the other gospels, and so like John's own style in his epistles, that they appear to have been composed by John himself. If the allegation could be made good that the Christ of John is essentially different from the Christ of the synoptists, the objection would be theoretical. On the contrary, however, we are persuaded that, on this all-important point, there is an essential agreement among all the evangelists. We must remember that the full and many-sided character of Christ himself might be represented under aspects which, although different, were not inconsistent with each other, but by no means so diverse. The fourth gospel represents Christ as God, while the others describe him as a mere man. Yet we may find in the fact of his wondrous person as the God-man an explanation of the apparent difference in their respective views of him. The denial of the resurrection essentially from John in their view of Christ is shown by Dorner in an admirable comparison (Dorner, Entwicklungsge schichte, i, 81 sq.; E. tr. i, 50 sq.). Lücke and Frommann, as well as De Wette, greatly incline to the view that John has mingled his own subjectivity with the discourses of Christ, which he professes to relate. That the evangelist does not transfer his own subjective views to Christ appears from the fact that while he speaks of Christ as the Logos, he never represents Christ as applying this term to himself. We may also refer to those passages in which, after quoting obscure sayings of Christ, the Evangelist appears in different occurrences, he either adds an explanation or openly confesses his ignorance of their meaning at the time (ii, 19-22; vi, 70; vii, 37-39; xi, 11; xii, 16, 22; xiii, 27; xx, 9). The susceptible disposition of John himself, and the intimate relation in which he stood to Christ, make the supposition reasonable that he drank so deeply into the spirit of his master, and retained so vivid a recollection of his very words, as to reproduce them with accuracy. Instead of transferring his own thoughts and experiences to Christ, he appears to have reproduced those of Christ himself. In this way the similarity between John's language and that of Christ is
accounted for. It is acknowledged, even by Strauss and De Wette, that the most characteristic expressions in John were really used by Christ himself. When it is objected that John could not retain in remembrance, or hand down with accuracy, such long discourses of Christ as he records in his gospel, far too little regard is paid to the influence of the historical background upon the memory. The literary form of the Discourse is to be expected especially in such a case as this, according to the Saviour's promise. "He shall teach you all things, and bring all things to your remembrance, whatsoever I have said unto you" (John xiv, 20).

See Bp. Marsh's "Translation of Michaelis's Introduct. to N. Tii. III. 2 (1803) for an account of Eichhorn's earlier theory and of his own. Veyssie's "Examination of Mr. Marsh's Hypothesis (1808) has suggested many of the objections. In Bp. Thirlwall's "Translation of Schleiermacher's "St. Luke (1856, Introduction) it is an account of the whole question. Other principal works are, an essay of Eichhorn, in the 5th vol. Allgemeine Bibliothek der Biblischen Literatur (1794); the Essay of Bp. Marsh, just quoted; Eichhorn, "Einleitung in das N. T. (1874); Gratz, "Neuer Versuch die Entdeckung der wahre Beschreibung der Geschichte der Erlösung von Christi Leid und Sterben in die Einleitung der Bibel. Historische kritische Einleitung in sämtliche kanon. and apok. Schriften des A. und N. T. (1812-1815); and the work of Gieseler quoted above. See also De Wette, Lehrbuch, and Westcott, "Introduct., already quoted; also Welse, "Evangelienfuge (Lpz. 1856); Schleitholf, "Verkündigung und Erlösung des Menschen (Lpz. 1850); Willke, "Erzähler (Gottingen 1853); Wilken, "Der Ueberzeugelit (Dresden and Leipzig 1888); Lücke, "Kommentar zu Ec. Joh.: Frommann, "Der Johanneische Lehrgriff; Schwatt, "Untersuchungen über d. sympl. Evangelien (Tub. 1884); Anon. "Die Evangelien, ihr Geist, Verfasser und Verhältniss zu einander (Leips. 1848); Ritsch in the "Theol. Jahrb. 1851; Ritsch, "Das UrspRUNg und Kompos. d. sympl. Evangelien (Stuttg. 1858); Smith (of Jordanhill), "Origin and Connection of the Gospels (Edinb. 1853). For the mythical theory of the origin of the gospels, as developed by Strauss and others, see "RATIONALISM, and the art. JESUS. For discussion on the gospels, see "HARMONIES OF THE GOSPELS.

IV. Commentaries, expressly on the whole of the four gospels alone, have been numerous; the most important are here designated by an asterisk (*); prefixed: Theologen-Evangelien kommentir (1812); Bartholomae, Scripturae colegium, ii, 229 sq.; Athanasius, "Quaestiones (in Opp. [Syrac.], ii, 153 sq.; Jerome, "Expositio (in Opp. [Syr]., xi, 738 sq.; Augustin, "Quaestiones lib. ii (in Opp. iv, 511 sq.; Juvenal, "Carmina (in Bibl. Patr. Gallandii iv); Sedulius, "Expositions (in Matt., Mark, and Luke, 9 vols.; Kuchenreuter, "Der Adamitc, (in "Annalen der akadem. Vereinigung (in Bibl. Max. Patr. viii); Theophylact, "Commentarius (in Opp. i); Anselm, "Explanations (in Opp. ed. Picard); Rupert, "Exeget. lib. i (in Opp. i, 55 sq.; Eu­thymius, "Commentarius (Gr. and Lat., Lips. 1792, 3 vols. in 4, 8vo); Aquinas, "Aurea Catena (Paris 1687, fol.; also in "Opp. iv, 8; in Bibl. Patr. Gall. xiv, 297, et al.; Catena aus der Vaters, by Pusey, etc., Ox. 1841-5, 4 vols. in 8, 8vo); Gorman, "Commentarius (Colonia. 1472, 1587, Hag, 1592, Awtv. 1617, Lugd. 1693, fol.); Zuinglic, "Commentaries (ed. Leo Judae, St. Omer iv); Faber, "Commentarius (Molv. 1599, Basill. 1593, Col. 1541, fol.); Bucer, "Exe­narrations (Argent. 1527, 1598, 2 vols. 8vo; Basil. 1587, Geneva, 1558, fol.); Arboeus, "Commentarius (Paris 1829, 1551, fol.); Cajetan, "Commentarius (Venice. 1820, Paris 1828, 1556, 1546, 4 fol.; ib. 1542, Lugd. 1558, 1574, 8vo); Samoy, "Exegetica (Oviedo, 1612, fol.); Masa vurtuosa (Mal. 1593, Basel. 1583-50, 4 vols. 8vo); Broeckweg, "Exe­narrations (Par. 1548, 8vo; Ven. 1648, 4to); Herborn, "Ex­narrations (Col. 1546, 4to); Brunsfeld, "Adnotationes (in­cluding Acta (Argent. 1583, fol.); Delcroix, "Commentaries (Htispe, 1556, fol.); Lossel "Adnotationes (Franc­fort. 1552, 2 fol.; also in "Reiner, "Commentarius (in suc­cessive gospels; together, Tigrini, 1561, fol.); Arzutus, III. 30—*
The Gospels, especially the Nostorians and Monophysites. It was found to have been universally read by the Syrians of St. Thomas, in Travancore, and was condensed by the Synod of Dionysius. It was publicized by Macenas, who describes it as "the book of the Infancy, almost condemned by the ancients for its many blasphemous heresies and fabulous histories." Wherever the name Jesus occurs in this gospel he is universally entitled c-rb, while in the New Testament he is Christ. This Gospel was introduced by the Nostorians. The blessed Virgin is also entitled the Lady Mary. The Persians and Copts also received this gospel (De la Brosse's Lexic. Pos. s. v. Tinctoria Ars). The original language was probably Syriac. It is sometimes called the Gospel of Peter of Antioch.

2. The Gospel of Thomas the Israelite (Gr.), a work which has flowed from the same source with the former, was first published by Cotelerius (Notes on the Constitutions of the Apostles, i. vi. c. xvii, tom. i. p. 846), from an imperfect MS. of the 15th century, it was republished and divided into chapters by Fabricius. The most perfect edition was that of Magarelli, in the Nuova Raccolta d'Opereologica e Filosofiche (Venet. 1764), from a Bologna MS. of the 15th century. Magarelli (who believed it to have been a forgery of the 3d century) preserved his text, but the translation. Thilo has given a complete edition from a collation of Magarelli's work with two MSS., preserved at Bonn and Dresden. This gospel relates the fable of Christ's learning the Greek alphabet, in which it agrees with the account in Irenæus. In other Gospels of the Infancy (as in that published by Siborne) he is represented as learning the Hebrew letters. It has been questioned whether this is the same work which is called the Gospel of Thomas, by Origen, Ambrose, and others. This gospel probably had its origin among the Gnostics, and found its way into the Church through the Gnostics, and was translated into several languages. It is seldom copied by the monks, which accounts for the paucity of MSS. Nicephorus says that the Gospel of Thomas contained 1600 oryxos. This pseudepigraphal work is probably the foundation of all the histories of Christ's infancy, but it is supposed to have been recast and interpolated.

8. The Protevangelion of James has descended to us in the original Greek, and was first published by Bibilander at Basel in 1554, in a Latin version by William of Glanum, and afterward translated into English, and the Greek churches, and maintained that it was a genuine work of the apostle James, and intended to be placed at the head of St. Mark's Gospel. These recommendations provoked the wrath of the learned Henry Stephens, who insinuated that it was fabricated by Pottell himself, whom he calls a detestable monster (Introduction au Treilit de la Conformité des Métravli Anciennes avec les Modernes, 1565). It was reprinted in the Orthographica, and in the Orthographica, vol. i. of 1629, of Jacob Grynew, who entertained a very favorable opinion of it. Subsequent discoveries have proved that, notwithstanding the absurdity of Pottell's high pretensions in favor of the authenticity of this gospel, Stephens's accusations against him were all ill founded. There had, even at the time when Stephens wrote, been another apocryphal work, which had been published by Neander, of which Stephens was not aware; it appeared among the Apocrypha annexed by Opip to his edition of Luther's Catechism (Basel, 1654). It was republished by Fabricius (who divided it into chapters), and subsequently translated by Hase, and was collated for his edition six Paris MSS., the oldest of which is of the 10th century. From the circumstance of these MSS. containing a Greek calendar or martyrology, and from other internal evidence, there seems little doubt that this gospel was formerly read in the Eastern Christians, especially the Nostorians and Monophysites. It was found to have been universally read by the Syrians of St. Thomas, in Travancore, and was condensed by the Synod of Dionysius. It was publicized by Macenas, who describes it as "the book of the Infancy, almost condemned by the ancients for its many blasphemous heresies and fabulous histories." Wherever the name Jesus occurs in this gospel he is universally entitled c-rb, while in the New Testament he is Christ. This Gospel was introduced by the Nostorians. The blessed Virgin is also entitled the Lady Mary. The Persians and Copts also received this gospel (De la Brosse's Lexic. Pos. s. v. Tinctoria Ars). The original language was probably Syriac. It is sometimes called the Gospel of Peter of Antioch.
GOSPELS

Greek Church (Montfaucon, Palæogr. Græc. p. 304). There are also extant versions of the Gospel of the Infancy in the Arabic and other languages of the Eastern churches, among which they appear to have possessed a high degree of authority.

Although this work is styled by Postell the Protevangelium, there is no MS. authority for this title, nor for the fact of its being ascribed to James the apostle. It appears to have been written by a man who was a Gnostic, and whose and the narratives of this gospel were known to Tertullian (A. decret. Gnost. c. viii.), Origen (Com. in Matt. p. 223), Gregory Nyssen (Orat. in diem Nat. Christ. Op. iii. 340), Epiphanius (Hær. 79. § 5), the author of the Imperfecta version on Matthew, Chrysostom (Ev. op. vii.), and many others among the ancients, (Socock, De ory. et ind. Prot. Jacobi, Bresl. 1830.)

4. THE GOSPEL OF THE NATIVITY OF MARY (Latin). Although the Latins never evinced the same degree of credulity which was shown by the Greeks and Orta for the gospel in such fabulous productions, and although they were generally rejected by the fathers, they were again revived about the 6th century. Notwithstanding their contemptuous rejection by Augustine and Jerome, and their condemnation by popes Innocent and Gelasius, they still found readers in some itinerant religious mendicants, and are in the book concerning the Nativity of St. Mary and the Midwife.

The Gospel of the Nativity of Mary, which most probably, in its present form, dates its origin from the 6th century, has even been recommended by the pretended authority of St. Jerome. There is a letter extant which is written by him in the name of Damascus and Heliodorus to Jerome, requesting him to translate out of Hebrew into Latin the history of the Birth of Mary, and of the Birth and Infancy of Christ, in order to oppose the fabulous and heretical accounts of the same contained in the apocryphal books. To this Jerome accedes, observing, at the same time, that the real author of the book was not, as they supposed, the evangelist Matthew, but Seleneus the Manichees. Jerome observes that there is some truth in the accounts, of which he furnishes a translation from the original Hebrew.

It is from these Gospels of the Infancy that we have learned the names of the parents of the blessed Virgin, Joachim (although Bede reads Eli) and Anna. The narratives contained in these gospels were incorporated in the Golden Legend, a work of the 13th century, which was utilized into all the languages of Europe, and frequently printed. There are extant some metrical accounts of the same in German, which were popular in the era of romance. These legends were, however, severely censured by some eminent divines of the Latin Church, of whom it will be sufficient to name Aegidius, in his Hesychia, in the 9th, and Fulbert and Petrus Damianus (bishop of Ostia) in the 11th century. "Some," says the latter, "beating its wise than they should be, with superfluous curiosity, they inquire into the names of the parents of the blessed Virgin, for the evangelist would surely not have failed to have named them if it were possible to mankind." (Germom on the Nativity). Eadmer, the monk, in his book on the Excellence of the Virgin, writes in a similar strain (cap. ii. Anselm. Opp. p. 485, Paris, 1721). Luther also inveighs against the reader's concern about questions of this kind (W. theol. tom. xi. and Tab. Localis, ch. vii. tom. xxii. p. 896).

There were several editions of Jerome's pretended translation published in the fifteenth century, one of them by Caxton. It is printed by Thilo from a Paris MS. of the 14th century, and divided by him into twenty-four chapters, after a MS. of the 15th century in the same library. One of the chief objects of the writer of these gospels seems to be to assert the Davidic origin of the Virgin, in opposition to the Nestorians, or some later Christians in India. Lardner (Credulity, vol. viii.) so far differs from Mr. Jones as to believe the author not to have been a Jew. That these legendary accounts have not altogether lost their authority appears from the Life of St. Joseph, in the Catholic Augsburg for December, 1782. In the Catholic Augsburg for December, 1819.

The Gospel of the Nativity of Mary was received by many of the ancient heretics, and is mentioned by Epiphanius, St. Augustine, and Gelasius. The Gnostics and Manichees endeavored to found on its authority some of their peculiar opinions (such as that Christ was not the Son of God before his baptism, and that he was not the tribe of Judah, but of that of Levi); as did also the Collyridians, who maintained that too much honor could not be paid to the blessed Virgin, and that she was herself born of a virgin, and ought to be worshipped with grace and reverence. See the book concerning the Nativity of St. Mary and the Midwife.

5. Although the GOSPEL OF MARCHON, or rather that of Luke, as corrupted by that heretic in the 12th century, is no longer extant, professor Hahn has endeavored to restore it from the extracts found in ancient writers, especially Tertullian and Epiphanius. See MARCION. This work has been published by Thilo.

6. Thilo has also published a collation of a corrupted Greek Gospel of St. John, found in the archives of the Knights Templars in Paris. This work was first noticed (in 1791) by the Abbe Marchon, as well as by abbé Grégoire, ex-bishop of Blois. It is a vellum manuscript in large 4 to, said by persons skilled in paleography to have been executed in the 13th or 14th century, and to have been copied from a Mount Athos MS. of the 18th. The writing is in gold letters. It is divided into twenty sections, each containing a gospel, and is on this account supposed to have been designed for liturgical use. These sections, corresponding in most instances with our chapters (of which, however, the twentieth and twenty-first are omitted), are subdivided into verses, the same as those now in use, and said to have been invented by Robert Stephens. See VERSUS. The omissions and interpolations (which latter are in barbarous Greek) represent the heresies and mysteries of the Knights Templars. Notwithstanding all this, Thilo considers it to be modern, translated into verse, and fabricated since the commencement of the 18th century.

7. One of the most curious of the apocryphal gospels is the GOSPEL OF NICODERUS, or ACTS OF PILATE. It is a kind of theological romance, partly founded on the canonical gospels. The first part, to the end of ch. xxvii, it little more than a paraphrastic account of the trial and death of Christ, embellished with fabulous additions. From that to the end (ch. xxviii) is a detailed account of Christ's descent into hell to liberate the spirits in prison, the history of which is said to have been obtained from Lanthius and Charinus, sons of Simon, who were two of those "saints who slept," but were raised from the dead, and came into the holy city after the resurrection. This part of the history is so far valuable, that it throws some light upon the ancient ideas current among Christians on this subject. It is therefore not a forgery (it is therefore not a forgery (Birch, p. vi) to be as valuable in this respect as the writings of the fathers.

The subscription to this book states that it was found by the emperor Theodosius among the public records in Jerusalem, in the hall of Pontius Pilate (A.D. 388). We read in ch. xxvii that Pilate himself wrote all the
transactions from the relation of Nicodemus, who had taken them down in Hebrew; and we are informed by Epiphanius that the Quartodecimans appealed to the Acts of Pilate in favor of their opinions as to the proper time of keeping Easter. It was written in these Acts that our Saviour suffered on the eighth Kal. of April, a circling of the Jews; all sects of Christians are stated in the ancient Papias, 2 Euseb. vii. 21, or English translation, by Chevalier, 1838. From this circumstance it has generally been held that such documents must have existed, although this fact has been called in question by Tanaquil Faber and Le Clerc (Jonge, On the Fabricator of Gospels, Lucius Charisius, who flourished, however, in all probability first furnished the ideas of the present pious fraud. Mr. Jones supposes that this may have been done in order to silence those pagans who denied the existence of such Acts. The citations of those fathers are all found in the present work. (See Hengel, Papii Pilati actus in causa J. C. ad Tiberii, 1784.)

We have already seen that a book entitled the Acts of Pilate existed among the Quartodecimans, a sect which originated at the close of the third century. We are informed by Eusebius that the heathens forged certain copies of their Acts, lords of which they again present to Christ, which they procured (A.D. 808) to be dispersed through the empire; and that it was enjoined on schoolmasters to put them into the hands of children, who were to learn them by heart instead of their lessons. But the character of the Gospel of Nicodemus, which contains no blasphemy of the kind, forbids us to identify it with these Acts. This gospel probably had its origin in a later age. From the circumstance of its containing the names of Lenthis and Charinus, Mr. Jones conceives it to have been the work of the celebrated Fabricator of Gospels, Lucius Charisius, who flourished in the beginning of the 4th century. It is certainly not later than the 5th or 6th. "During the persecution under Maximin," says Gieseler (Eccles. Hist. vol. i. § 24, note), "the heathens first brought forward certain calumnious Acts of Pilate (Euseb. ix. 5), to which the name of the Greek Church (Ephrain, Hist. 24, § 10), which were afterwards in various ways amended. One of these improved versions was afterwards called the Gospel of Nicodemus." See Acts of Pilate.

Beaumarchais supposed that the latter part of the book (the descent into hell) was taken from the Gospel of Pilate. Fabricius (Eccles. Hist. 24, § 10), and the character of the so-called "Codex Apocryphon" (see Bezae) thinks that it is the work of a Jewish Christian, but it is uncertain whether it was originally written in Hebrew, Greek, or Latin. The only Greek writer who cites it is the author of the Synagoge, and the first of the Latins who uses it is the celebrated Gregory of Tours (Hist. Franc. i. 20, 23).

The Gospel of Nicodemus (in Latin) was one of the earliest books printed, and there are subsequent editions in 1490, 1516, 1522, and 1588, and in 1658 in the Orthodoxorographia of Grynaeus. It was afterwards published by Fabricius (Eccles. Hist. 24, § 10), and divided it into chapters. Fabricius gives us no information respecting the age or character of his MS., which is extremely defective and inaccurate. Mr. Jones republished this, with an English version.

The Greek Gospel of Nicodemus was first published from an incorrect Paris MS. by Birch (Auctorarium), and subsequently from a collection of several valuable manuscripts, the most ancient of which are of the 12th century, by Thilo, with the Latin text of the very ancient MS. at Einsiedel, described by Gerbert in his Iter Alemannicum, for conversion (1821). The text of this Greek work, uncorrected, comprises an important portion of the composition of the canonical Gospel of Matthew. Baronius, Grotius, father Simon, and Du Pin lock upon the 6th century, and consequently that this gospel is extremely useful in a critical point of view.

The esteem in which this work was held in the Middle Ages may be seen from the number of early versions which were in popular use, of which innumerable MSS. have descended to our times. The earliest of these is the Latin version, known as the "Sermones in Egitto," in a manuscript in the Bodleian Library in Oxford, in 1698, from a Cambridge MS. (Talbot's Hepaticus). This is a translation from the Latin, as none of the Greek MSS. contain Pilate's letter to Claudius. There are also MSS. of the same in the Bodleian and Canterbury libraries. That in the Bodleian is divided into five books, that in the Canterbury MSS. of the English version in the Bodleian, one in Sion College, and one in English verse in Pepys's collection. It was also translated by Wicliffe; and there were versions printed in London, in 1507 and 1509, by Julianus and Wypshyn of Werke, which ran through several editions (Pantaleon's Annals). The latest published before Mr. Jones's work was by Joseph Wilson in 1797. He says nothing of the age of his MS., but the following specimen from the prologue may not prove uninteresting: "It beft in the 18th year of the reign of the emperor Trajan, the grandson of the emperor Titus, and the son of Hadrian, who was king of Galilee, the 8th kalend. of April, which is the 25th day of March, the fourth year of the son of Vellum, who was counselor of Rome, and Olympias had been afore two hundred years and two; at this time Joseph and Annaes were in Egypt. The emperor Trajan, according to the command of the emperor Nigidemus, who was a worthy prince, did write this blessed history in Hebrew, and Theodosius the emperor did translate it out of Hebrew into Latin, and bishop Turpin did translate it out of Latin into French, and hereafter did ensue the blessed history called the Gospel of Nicodemus." The regard, indeed, in which this book was held in England will be understood from the fact that, in 1524, Erasmus acquaints us that he saw the Gospel of Nicodemus affixed to one of the columns of the cathedral of Canterbury.

Translations were also common in French, Italian, German, and Swedish. In the French MSS., and editions, it is united with the old romance of Perseforest, King of Great Britain. There was also a Welsh translation (Lloyd's Archaeologia, p. 256), and the work was known to the Eastern Christians, and has been even supposed to have been cited in the New Testament, but this has been shown by Ludolf to be a mistake, as the lesson is from the history of Nicodemus, in John iii (see Brunn, De indol. et atae et univ. Evang. Nexc. Brdl. 1794; Tischendorf, Pilati circa Chr. judicid quod in us afferetur ex Acta Pilati, Lips. 1865). See Nicodemus.
it as the Gospel of Matthew—interpolated, however, by the Nazarenes. Baroinus and Grégoire think that it was cited by Ignatius, or the author of the epistles ascribed to him. Others look upon it as a translation altered from the Greek of Matthew. Mr. Jones thinks that this gospel was referred to by Paul in his Epistle to the Galatians. It is referred to by Hegesippus (Consecratio Eclesiae, Hist. iv, 22), Clement (Strom. ii, p. 280), Origen, Comm. on John; Hom. viii in Malabath, and Eusebius (Hist. Ecles. iii, 25, 27, 89). Epiphanius (Hær. § 29, 30) informs us that it was held in great repute by the ancient Judaizing Christians, and Eusebius states that it came to be used by the days of Herod, king of Judaea, that John came baptizing with the baptism of repentance in the river Jordan,” etc. It consequently wanted the genealogy and the first two chapters.

2. The Gospel of the Egyptians is cited by Clemens Alexandrinus (Strom. iii, p. 445, 452, 453, 465), Origen (Hom. in Luc. p. 1), Ambrose, Jerome (Pref. to his Comm. on Matt.), and Epiphanius (Hær. Ixxii, § 2). Grabe, Mill, Du Pin, and father Simon, who thought highly of this gospel, looked upon it as one of the works referred to by Luke in the commencement of his gospel. Mill ascribes it to the Essenes, and supposes this and the former gospel to have been composed in or a little before A.D. 58. It is cited by the Pseudo-Clement (Second Epistle to the Corinthians, Chevalier’s translation, 1883), who is generally supposed to have written before the 3d century.

III. Literature.—See Car. Chr. Schmidt’s Corpus omnium vet. Apocr. extra Biblia; Kleuker, De Apocryph. N. Test. (Hamburg, 1798); Birch’s Acta Aegyptiorum, fasc. 1 (Haen. 1804); Cave, Hist. Lit.; Oudin, Script. Ecle.; Ant. v. Dale, De orig. idolol. p. 252 sqq.; Vitringa, Intro. in N. Test. p. 6, 58; Mosheim, Dissert, ad Hist. Ecle. spect. i, 217; Nitzsch, De apocryph. Evang. (Viteb. 1806); Tischendorf, De Ecle. apocr. origine et usu (Hag. 1831); Reuss, Gesch. der H. S. neuen Test. § 258 sqq.; Hofmann, Das Leben Jesu nach den Apocryphen (Lips. 1851). A list of most of these apocryphal addenda to the N. Test. may be seen in Toland’s Aemontor (1699); and a fuller list in Toland’s reply to Dr. Blackhall’s (bishop of Exeter) attack on the Aemontor, found in De Maizena’s edition of Toland’s Miscellaneous (posthumous. Lps. 1843), London, 1803, 3 vols. 4to. Most of these apocryphal fragments were collected and published by Fabricius in his Codex Apocryphi Novi Testamenti (8 vols. 8vo, Hamb. 1719-48). This work, with additions by other authors, was republished by Dr. Giles (London, 1852). English translations of some of these apocrypha are now hardly forgone sights in the works of Jones, Lardner, Whiston, Cotton, and Laurence. Hone’s Apocryphal N. T. (London, 1820) contains a translation of many of them. Other collections (in the original languages), more or less complete, have been made by Græbe (Sched. Patrum et Heret. sec. i-iii, Oxon. 1689), Schmid (Corpus Apocryphi extra Biblia, Had. 1804), and especially Thilo (Cod. Apoc. N. Test. coll. et illustr. Lps. 1832, vol. i). Still later, Tischendorf has edited (in some cases for the first time published) the following apocryphal gospels (Evangelica Apocryphala. Lps. 1848, 2 vols. 8vo) (Pseudo-Matthaei’s Gospel (Gr.)), “Pseudo-Matthew’s Gospel” (Lat.); “Gospel of the Mativity of Mary” (Lat.); “History of Joseph the Carpenter” (Latin, from the Arabic); “Gospel of Thomas” (Greek A.); “Gospel of Thomas” (Greek B.); “Gospel of Thomas” (Lat.); “Gospel of the Infancy of Christ” (Lat.); “Gospel of Pilate” (Greek); “Gospel of Pilate” (Greek A.); “Deeds of Pilate” (Gr. B.); “Descent of Christ into hell” (Latin A.); “First Epistle of Pilate” (Gr. A.); “Second Epistle of Pilate” (Gr. B.); “Ananphora of Pilate” (Gr. C.); “Paradoxa of Pilate” (Gr. D.); “Death of Pilate” (Gr. E.); “Narrative of Joseph of Arimathea” (Gr. F.); “Defence of the Saviour” (Lat.). See also H. Cowper, The Apocryphal Gospels, etc., translated, with notes, etc. (Lips. 1867, 8vo); A. Hilgenfeld, Nos. Testam. extra canones, embracing the apocryphal gospels, epistles, etc., with notes, etc. (Lips. 1866 sqq.). See APOCRYPHA.

Göschele. See GÖRSEL.

Gospel (from “God” and “sak,” a Saxon word signifying “kindred”), a name given in England to sponsors as bearing a spiritual relationship to the children for whom they stand. —Procter, On Common Prayer, p. 361.

Goßner, Johannes Evangelista, a prominent divine of the Evangelical Church of Germany, was born in 1773, of Roman Catholic parents, at Hausen, near Augsburg. He studied at Dillingen under Salier (q. v.) and Zimmer, entered in 1798 the College of Innsbruck, and was appointed chaplain. The profoundly evangelical convictions which he had already had for several years were strengthened by personal intercourse and correspondence with Martin Boos (q. v.), and they were certainly not weakened by persecutions from ultramontane zealots. He was appointed parish priest at Dirlewang, which position he resigned in 1811 in order to accept a small benefice at Munich, which allowed him greater liberty in his evangelical and literary labors. Having been deposed in 1817 on account of his evangelical views, he was in 1819 appointed professor at the gymnasium of Düsseldorf. From 1820 to 1824 he was pastor of a German congregation in St. Petersburg; in 1826 he openly joined the Evangelical Church; in 1827 he became pastor of the Bethlehem church at Berlin. He died March 29, 1858. He wrote a great deal to the last. At seventy he learned English, and translated some of Ryle’s tracts when he was upwards of eighty. His writings, numbering (exclusive of many posthumous works) forty-six, occupy the press of a separate book and tract society. They enjoy unusual popularity, some having run through annual and semi-annual editions for many years. Among the best known of his works are the Schutzhützen (1824) and Goldkörner (1859). Up to the spring of 1858 he corrected proofs and continued his correspondence. The summer previous he was still able to train his vines. He established a missionary society, which during his lifetime sent out more than 140 missionaries. His life was, like the life of Abraham, one of wonderful faith. From humble little Hausen and the unnoticed struggles of a country priest, he rose to be the Father Goßner of a reverent, religious Germany. The story is well told in a little work which was published by the Carters, of New York.—Bismarck-Hollweg, J. Goßner, (Berlin, 1858); see also Prochnow, J. Goßner, Biographie aus Togbächern u. Briefen (Berlin 1868-9, 2 vols.); Herzog, Real-Encyklopädie, xix, 572. (A. J. S.)

Gotama, a Hindu philosopher, the exact time of whose life is not known. The Indians consider him as the author of the philosophical system which, under the name of Nyaya (logic), is still in use among them. All we know of him is derived from the mythical tradition contained in the Ramayana and the Puranas. According to this legend, Gotama was born in Mount Himalaya, and for a long time lived as a hermit in the woods; he then married Ahalya, one of the daughters of Brahma, but subsequently divorced her for having been led astray by Indra. He spent the remainder of his life in prayer and ascetic practices, and when he died his body was cremated and all that had commented on, and which together form the Nyaya. The work in which his system is expounded has been published, for the use of the Indian schools, under the title Nyaya extra vritti (The logical Apokryphs of Go- tama), with a Commentary by Vijnanavachas or Phalancha or Go- tama, published under the authority of the Committee of Public Instruction, Calcutta, 1828, 8vo. The book is
GOTAMA

942

GOTHIC ARCHITECTURE

divided into five parts: the first and most important contains the dogmatic exposition of the doctrine of the Nyaya. The author proceeds by axioms, of which there are sixty in his first part. He distinguishes sixteen points in the art of reasoning, the first nine teaching to discern truths, and the last seven to detect and against objections. He begins by pointing out the general sources of certainty, of which he recognizes four: perception, induction, comparison, and divine or human testimony. He next inquires into the objects of certainty, i.e., the objects presented to human knowledge and recognized as such. Each of these objects can be considered in different ways, and they can all be brought down to one—the knowledge of man and of his destiny. After having thus established his general dialectic principles, Gotama proceeds to their application. His third point is doubt: when anything has been presented to our knowledge by one of the above-named sources of certainty, we must first doubt it, and only affirm its truth after thorough investigation. Affirmation is the fourth point. After a thing is affirmed it has yet to be proved, and first of all the axioms form the foundation of this framework. When once the illustrative example is found, the object of the demonstration has to be stated: this is the sixth point. The seventh is the enumeration of the five members of the demonstration. Colebrooke gives the following illustration of this process of argumentation, in an attempt to think in the manner of the Nyaya system's syllogism: 1. proposition, This mountain is burning; 2. reason, for it smokes; 3. explanation, whatever smoke is burning, as, for instance, a kitchen fire; 4. application, and the mountain smokes; 5. conclusion, hence it is burning. The eighth point, which is called reductio ad absurdum by Colebrooke, and raisonement supposé by Barthélemy Saint-Hilaire, is a sort of confirmation of the argument. Finally, the ninth point is the definitive conclusion, the absolute affirmation which closes the argument. The last seven points treat of all the objections which can be opposed to a demonstrated fact. These objections are sophisms, and be who uses them will necessarily be overthrown by his opponent if the latter follows strictly the rules laid down in the Nyaya. As for the defender of truth, Gotama promises him not only the pleasure of defeating his adversary, but also everlasting happiness. This line of thought of the first part of the Nyaya will suffice to show how inadequate the system of the Indian philosopher is as an analysis of the operations of the human mind. Still there is much to be admired in the doctrine of the Nyaya. The method was an immense progress for India, and as such deserves a high place in the history of philosophy. It would deserve a still higher one if it had, as was advanced by Sir William Jones, served as a model for the Organon, and if the fifth point of Gotama had been the origin of Aristotle's syllogism. Jones maintained, on the strength of a more than doubtful tradition, that Callisthenes gathered during Alexander's expedition a number of details on Indian doctrines, and afterwards transmitted them to Aristotle. According to him the logic of the latter would be but a development of Gotama's system. This strange assertion is completely disproved by Barthélemy Saint-Hilaire, who has shown that there is no relation between the Nyaya and the Organon, and that those who spoke of their resemblance must have been acquainted with each. His conclusion is that the Greek system owes nothing to the Indian. But might not the question be reversed so as to inquire whether the Indian system may not to some extent be derived from the Greek? Greek civilization hovered over centuries near the Indus and Himalaya. The Greek kingdoms of Bactria appear to have exerted great influence over the poetry of India; may they not also have had some influence over its philosophical systems? And may not the Nyaya in particular, which differs so much in its analytical process from the other Indian systems, owe its peculiarities to the influence of Greece? These are questions which it has so far been impossible to solve, since none has yet been able to find out the dates of the various Indian systems. Barthélemy Saint-Hilaire believes the Nyaya older than the Organon, but admits that it is only authentically named in works posterior to the Christian era. See Sir William Jones, Arist., Research.; Ward, View of the History, Literature, and Mythology of the Hindoos; Colebrooke, in the Transact. of the As. Soc. of Gt. Britain and Ireland, 1823, i. 76, and Misc. Gothic Architecture, the style of architecture that prevailed in central and western Europe from the middle of the 12th till the 16th century, being preceded by the Romanesque (q. v.), and followed by the Renaissance style (q. v.). Under the influence of the revival of taste for classic art, the Renaissance architects applied the name Gothic, meaning thereby barbaric, to the styles of architecture that were developed north of the Alps during the Middle Ages. The name Gothic is now limited by critics of all nations to the architecture of the period above indicated.

In the extraordinary activity that pervaded every department of social, industrial, intellectual, and religious life during the 12th century, many churches were founded upon a scale of grandeur and magnificence which, with the exception of a few isolated cases (as the Santa Sophia, q. v.), was entirely unprecedented in the history of Christianity. These churches embodies, in the style and spirit of their architecture, and the grand scale upon which they were projected, more of the sublime aspiration of the Christian faith, of confidence in its endurance, and love and sacrifice in its behalf, than do the churches of any other period. Many elements of the Gothic architecture had been developed during the classic, Byzantine, and Romanesque periods; others were taken from the Saracen architecture; and others still were developed within the Gothic itself. The typical features of the Gothic architecture are: the universal use of the pointed arch (Fig. 1); a general tendency to vertical lines;
are sustained against lateral thrust by prominent buttresses and by flying-buttresses (Fig. 5); the ornamentation is conventionalized from various forms of foliage, and is distributed freely over all prominent parts of the building, being thrown in great profusion over the façades, and especially around the main entrances; the towers are square at the base, octagonal above, and terminate in lofty spires, which are richly decorated with ornament; the plan is cruciform, the apsis being replaced by a choir, which is surrounded by a row of chapels (Fig. 6).

While these are the typical features of the Gothic architecture, great variety prevailed in their adaptation in the different periods of the style, and in the various lands where it was employed.

Gothic architecture owes its character mainly to the adoption of the pointed arch. There is no longer a
discussion as to the origin or the invention of the pointed arch, as it is to be found occasionally in all the most ancient styles of architecture, as the Egyptian, the early Greek, the Etruscan, and the Roman. It is found in the court of a monastery in Sicily, which was built in the 6th century after Christ. It was adopted in Saracenic edifices in Cairo as early as the 9th century. Probably a knowledge of its effects in architecture was brought to Europe from the Orient by the Crusaders, though the production of the pointed arch by the crossing of round arches in the external ornamentation of Romanesque churches could not have escaped the notice of architects. The contest for supremacy of the pointed over the round arch lasted a long time, the two being often employed in different parts of the same edifice. The earliest church in which the pointed arch only was adopted is the cathedral of St. Denis, founded 1144. The Gothic style, being thus fully developed, spread rapidly over the Ile de France, Normandy, England, Spain, and the countries bordering on the Rhine. A large number of the most magnificent churches in the world were founded between 1150 and 1250, and thus the new style had immediate opportunity for full development. (Fig. 7.)

Three chief periods are usually marked in the history of Gothic architecture. During the first (1144–1280), called by English writers the "early English" period, the general effect of the style was very grand, though rather severe. The ornamentation was rather meagre, and sculpture was used rather sparingly on exteriors. During the second period (1280–1380), termed by many writers the "decorated" or "complete Gothic" period, greater freedom and lightness were introduced into all the ornamentation, without diminishing the boldness of the general effect. The windows were enlarged and filled with rich flowing tracery. The third, usually termed the "perpendicular" period (1380–1550), and extending till the revival of classic architecture, was marked by a general decadence of style, and finally by a loss of all true Gothic spirit. The arches were depressed; beauty of outline disappeared from the mouldings; a minuteness, and finally a triviality, was introduced into all the ornamentation. The rapid decadence of the style was contemporaneous with the revival of taste for ancient classic art. In less than a century it was banished from all the countries where it had held sole dominion for nearly four centuries.

The Gothic churches in France are distinguished for the magnificence of their façades and the grandeur of their interiors. As the true object of a church is to have a good interior, the French Gothic churches are to be esteemed superior to those of any other land. The cathedral at Rheims (Fig. 8) is esteemed the finest Gothic church in existence. The other most important churches are the cathedrals of Paris, Amiens, Rouen, Dijon, Chartres, Beauvais, etc. In the cathedral at Paris (Notre Dame), and in some other French Gothic churches, there is a greater tendency to horizontalism in the lines of the exterior than is found in the English or German Gothic.
The English Gothic cathedrals surpass those of all other lands in the varied combinations of striking effects in the exteriors. The windows often overpower the doors and other features of the façade, and the nave is usually too long and narrow for fine effect. The plan is frequently rectangular, and is sometimes crossed by two transepts. The finest examples of English Gothic are the cathedrals of York (Fig. 9), Salisbury, Canterbury, Lincoln, Peterborough, and the Westminster Abbey. The richest interior in English churches is that of Henry’s chapel in the Westminster Abbey. The grandeur of the effect of this interior is diminished, however, by the minuteness of the ornamentation.

In the German Gothic churches the spires are more beautifully wrought, and are more harmoniously joined to the towers than in the churches of any other country. The spires of the cathedrals of Freiburg and of Vienna are considered the finest in the world. The round choir, with a row of chapels, that prevails in the plans of most French Gothic churches, is generally adopted. The cathedral of Cologne (founded 1248) is the largest Gothic church ever erected. Its towers are now (1869) being finished. When they are completed, this edifice will be the most glorious work of ecclesiastical architecture ever erected. The style is somewhat affected by the too great minuteness of the detail. The harmonious perpendicular tendency of the lines is unexampled in any other edifice (Fig. 10). The other chief Gothic churches of Germany are the cathedrals of Strasburg, Freiburg, Ulm, Vienna, Magdeburg, Meissen.

The Spanish surpassed the French, English, or German Gothic in the varied richness of outline; but there were frequently too many horizontal lines in the interior as well as the exterior, and the ornament was often overlaid. The cathedral of Burgos (Fig. 11), begun in 1224 and finished in 1567, is marked by a
prodigality of external ornamentation. But, with all this richness, there is a lack of repose and of lightness in the general effect. Other important Gothic churches in Spain are the cathedrals of Oviedo, Toledo, Barcelona, Oviedo, Leon, and Valencia. The influence of the Moorish architecture is visible in many of the Gothic churches in Spain. There are several excellent examples of the Gothic architecture in Portugal, as the cloister church in Batalha and the church in Belem. The entrance to the mausoleum of Manoel, in the church of Batalha, is one of the most gorgeous specimens of Moor-Gothic architecture.

In Scotland, Belgium, and Holland, Gothic architecture took the general characteristics of this style in the adjacent countries of England, France, and Germany. The cathedral of Antwerp is remarkable for the beauty of some of the details of the interior. On the other hand, the violations of constructive and aesthetic laws, both in the interior and in the exterior, are striking proofs of the decadence of artistic feeling during the latter part of the history of Gothic architecture. In Scandinavia, also, Gothic architecture is marked by the development of few, if any, native elements. The cathedral of Upsala is essentially a French, and that of Drontheim an English edifice. The interior of the latter is marked by a number of exceedingly picturesque effects.

Gothic architecture was never fully naturalized in Italy. The traditions of classical and basilican architecture in favor of round arches and horizontal lines overpowered the Gothic tendency to perpendicular lines. The predilection for paintings on walls prevented the adoption of glass-painting in the windows. Towers surmounted by spires were replaced by campaniles adjacent to the church. Marble of two colors is usually employed in the exteriors, and mosaic paintings frequently replace sculpture in the facades. The fronts, though very impressive in themselves, are
often false, not representing the true size of the church. The finest examples are the cathedrals of Sienna (Fig. 12), Orvieto, Florence, Perugia, and Milan. The cathedral at Milan has a magnificent interior, and its roof is covered by a forest of statuary and turrets. The tower of the cathedral of Florence, designed by Giotto, is the most beautiful ever erected. Its cost was over $5,000,000.

It is a mistake to consider Gothic architecture to be adapted only to ecclesiastical edifices. During the Middle Ages this style was applied with marked effect to edifices of all kinds—to castles and fortified gates of cities, as well as to city halls, courts of justice, and palatial residences.

As to the material employed in the erection of Gothic edifices, stone was generally used. In Italy especially, the finest marbles were often employed. With marble of two colors very pleasant variations of surface effects were produced, many of which were inconsistent with the extensive use of buttresses and flying buttresses that were so generally introduced in the Gothic edifices north of the Alps. Brick was also employed with excellent success in the erection of Gothic edifices, both ecclesiastical, civil, and domestic; this was especially the case in North Germany. Fine contrasts of surface color also were produced in North Italy by the alternation of brick and colored marble.

But few Gothic churches have been completed, and in fewer yet has the original design been carried out. At least one, and sometimes both spires are generally lacking. This incompleteness or defect in design is often copied in modern Gothic churches, frequently producing very absurd effects.

With all its beauty and even grandeur, Gothic architecture has some features that make its adoption in modern, and especially in Protestant church edifices, a most dangerous experiment. The pillars are apt to obstruct the view and sound. The clerestory is so high that it often detracts from the harmony of the interior, while its ornamentation is also lost to the view; high pointed ceiling is apt to produce an echo; and the churches are very difficult to heat. But the great error in modern Gothic edifices is the indiscriminate copying of unfinished churches, built in the age of decadence of Gothic architecture. See Kugler, Geschichteder Baukunst; Lübke, Geschichte der Baukunst; Ferguson, Styles of Architecture; Hugues, Course and Current of Architecture; Pugin, Gothic Ornaments; Viollet-le-Duc, Dictionnaire de l'Architecture Française; Street, Gothic Architecture in Spain. (G. F. C.)

Gothic Version of the Bible. The Mosso-Goths were a German tribe which settled on the borders of the Greek empire, and their language is essentially a German dialect. Their version of the Bible was made by Ulphius, in the fourth century, after Greek MSS. in the N. T., and after the Septuagint in the Old. The author is generally regarded as an Ariian; but his peculiar doctrinal sentiments do not seem to have influenced his translation. Of the O.-T. portion, nothing but a fragment of Nehemiah has been printed, although parts of other books have been discovered. A great part of the New has been published at different times in fragments. The four gospels ex-
GOTHOLIAS 949

GOTHS

In the very celebrated MS. called the Codex Argenteus, now preserved in the library of the university at Upsal, Sweden, are contained by Dr. E. D. Clarke and Zahn. See Argent. Codex. This MS., however, has considerable chasms. The gospels have been several times printed from it, but not very correctly. The ed. of Uppström is the most exact and beautiful (1854). Bosworth has lately published, in the Berol. saxon gospels together (Lond. 1866). Knittel described fragments of Paul's Epistle to the Romans in a codex rescriptus belonging to the Wolfenbüttel library, which he published in 1762, 4to, and which were re-published by Zahn in the complete edition of the Gospels issued in 1817. The Gospels of the Codex'described important parts of the Greek version among five codices rescripti in the Ambrosian library at Milan. They contain, for the most part, the Pauline Epistles, with the exception of that to the Hebrews and two fragments of Matthew. Various portions were printed by Mai, in conjunction with Castellionus, in 1819. In 1829 the latter published the fragments of Paul's Second Epistle to the Corinthians. In 1834 fragments of the Epistle to the Romans, the First to the Corinthians, and that to the Ephesians; and in 1855, the fragments of the First to the Galatians, Philippians, Colossians, and the First to the Thessalonians. In 1839 the same scholar published the fragments of the Second Epistle to the Thessalonians, to Timothy, Titus, and Philemon. These were all combined in the edition by Gobellants and Loebi 2 vols. 1836, 1847. See also the works of Neander, Plummer, and Deissmann.

Gotho(n)ion (Γόθονιος), father of Jostis, who latter was one of the "sons of Elam" who returned from Babylon with Ezra (1 Esd. viii, 33); the same as Athalith (q. v.), of the Heb. text (Ezra viii, 7).

Gothoni(é)l (Γοθονίλε), father of Chabris, who was one of the governors (ἀρχοντας) of the city of Bethulia (Judith vii, 15).

Goths, the, appeared in the countries of the Lower Danube, the former seat of the Gete, in the 3d century A.D. Yet from this we are not to infer that the former drove away and replaced the latter, but, on the contrary, they are to be considered as one and the same people, as has been shown by J. Grimm (Gracc. d. deutsch. Sprache, 2 vols. ed. Leipz. 1838). This consideration sheds an important light on a period in the history of the Goths, whose migrations have been involved in deep obscurity, and gives us an insight into their deeply-rooted predisposition to embrace Christianity. The mighty confederacy of the Gete, founded by Berebites, was dissolved even before the end of the 3d century; and before the end of that year there were two distinct nations, the one called the Nicene party; the latter also prevented the assembling of another council promised to the former for 388. Religious divisions among the Goths afterwards permitted Chrysostom to attempt uniting the sectarians on the Nicene basis; but he was thwarted by the influence of the dispersed tribes of the Roman empire in the provinces of the Lower Danube about the first century A.D. and from them sprung a new nation, composed of these different tribes again united, which, under the name of Goths, appeared during the reign of Caracalla, in the beginning of the 3d century A.D. Their unity emboldened them to attack the Roman empire; and in the reign of Alex. Severus we already find them receiving tribute to preserve the peace, and the issue of the struggle with Decius led to new invasions. Commodian, the Christian apostle of the triumphant faith, in his letter to the emperor, attributed the justice and advantages of Christianity to the Goths. The Visigoths, under Alaric, invaded the countries south of the Danube to the Peloponnesus, destroying the temples and altars of the heathen gods; the sacking of Eresus put an end to the famed mysteries of the Pythian games; and after the death of Alaric, 406, the last of the Visigoths fell before the host of Attila. The Gothic nation was thus extirpated.
the city, with the exception of the Christian churches, sparing only such of the inhabitants as had taken refuge in them. After Alaric's death, his brother-in-law Athaulf succeeded him; and, having married Gallia Placidia, daughter of Theodosius the Great (in which marriage some saw a fulfillment of Dan. ii. 92), he attempted to return to Ravenna, desiring to recover the Gothic help. Finally, the Visigoths were rewarded for conquering Spain to Rome by permanent possessions in Gaul, where they founded an independent empire. See VISIGOTHS. The Ostrogoths settled for a while in Spain, where they found a hospitable people and the Visigoths in Gaul, while the greater part followed Theodosius into the Eastern empire. The emperor Zenra finally induced them to retreat, to Italy, where Theodoric, in 498, founded the Ostrogoth kingdom (see that art.).

GOUGE
951

in attending to all the duties of his pastoral charge, and, by the smallest abilities and accomplishments that distinguished and adorned his character, he possessed great and extensive influence among his clerical brethren, as well as in general society. "The virtue, however, which above all others shone brightest in him," says archbishop Tillotson, "and was his reigning attribute, was that of meekness, with the plain, silent, and unobtrusive zeal in acts of pious charity. In this he left behind him all that ever I knew, and had a singular sagacity and prudence in devising the most effectual ways of doing good. For the last nine or ten years of his life, he did almost wholly apply his charity to Wales, because there he judged there was most occasion for it; he did not only lay out whatever he could spare out of his own estate, but employed his whole time and pains to excite and engage the charity of others for assisting him in it. By the large and bountiful contributions thus obtained, to which, among his writings, are, his own income (amounting to £200 a year), there were every year 800, and sometimes 1000 poor children educated by his means; and by this example several of the most considerable towns in Wales were excited to bring up, at their own charge, the like number of poor children. To this care, in 1688, was added the care and instruction. But which was the greatest work of all, and amounted indeed to a mighty charge, he procured a new and very fair impression of the Bible, and the liturgy of the Church of England, in the Welsh tongue, to the number of 9000; the former impression being the holy scripture of the Church of England, he had in all London. This was a work of such a charge that it was not likely to have been done in any other way. And always, but usually twice a year, he travelled over a great part of Wales, none of the easiest countries to travel in; but for the love of God and man he cheerfully endured all privations, so that, all things considered, there have not, since the primitive times of Christianity, been any among the sons of men to whom that glorious character of the Son of God might be better applied, that he 'went about doing good.'" He died October 29, 1681. Among his writings are the Principles of Religion (1679); Young Man's Guide to Heaven (1681), and other practical treatises. His Works are collected in one vol. 8vo, with a sketch of his life and Tillotson's funeral sermon at his burial (Lond. 1706). His sermon on The Surest and Swiftest Way of Throwing with a Stone (1685) is a sketch of the life of this great man. Sir R. Blinney (Lond. 12mo.—Jamieson. Cyclop. of Biography. p. 2:0; Tillotson, Works, i, 265 sq.; Neal, History of the Puritans, ii, 233; Allibone, Dictionary of Authors, i, 710.

Gouge, William, D.D., an eminent Puritan divine, was born in Bow in 1675, and educated at Eton and Cambridge. He entered the ministry at the age of thirty-one, and was minister of St. Ann's, Blackfriars, London, for forty-five years. He was esteemed as the father of the London ministers, and the spiritual oracle of his time. In 1648 he was called to be a member of the Assembly of Divines, and was in such reputation that in the moderator's absence he frequently filled the chair. He was appointed one of the annotators on the Scriptures, and performed, as his part, from the beginning of 1 Kings to the book of Job, in a manner that gained high approbation. He also published several works, the principal of which are: Domestical Duties, and The Whole Armor of God; The Lord's Prayer Explained; and all to be found in his Works, revised and enlarged (Lond. 1696, fol.).—a learned and very useful Commentary on the Hebræus (Lond. 1656, 2 vols. fol.), containing a thousand of his Wednesday lectures. He died December 12, 1658.—Neal, History of the Puritans, ii, 611; Darlington, Cyclop. Bibl. a. r.; Middleton, Essays of Mr. Darlington, 267; Life by his Son, prefixed to his Works (1665).

Goulart, Simon, a French Protestant theologian, was born at Sens, October 20, 1540. He embraced the Reformation in 1545, went to study theology at Geneva in 1566, and was consecrated pastor on the 90th of October of the same year. He obtained at once charge of a rural congregation, and in 1571 became a pastor of the parish of St. Jérome, Geneva. Here his plain speaking brought him repeatedly into troubles with the civil authorities, yet he remained at Geneva notwithstanding numerous calls from other places. After the death of Beza (January 2, 1607), the pastors chose him for their president, but he resigned that office December 18, 1612. He died at Geneva, February 8, 1626. Goulart was a very prolific writer, both of original and translated works. Among his scores of publications we name: Imitations chrétienennes, etc. (1574, 8vo);—Expositio verisimilis et succincta de rebus super nobis gestis inter Allodiorum regulam et Helvetiae regis Gulharum carissimis copiae (1589, 4to);—Vingti Dixme canoniques touchant l'estat du monde et de l'Eglise de Dieu (1591, 16mo);—Apophthegmatum sacrorum. Loci communes, ex sacris, ecclesiasticis et secularibus libris collecta (Geneva, 1592, 8vo);—French transl. Gen. 1604, 12mo);—Vræ Discours de la miraculeuse délitérature enlevée de Dieu à la ville de Genève, au manoir, etc. (Paris, 1604, 4to);—Recueil de la vie de Paul l'Ecreviseur de l'Eglise (Lyon, 1659, 12mo; English, London, 1621, 4to);—Quarantäux Tableaux de la mort repréentées (last ed. Lyon, 1606, 12mo; German, Cassel, 1606);—Considérations de la Conscience humaine (Gen. 1607, 8vo);—Considérations sur divers articles de la doctrine chrétienne (Gen. 1610, 4to);—Considération de la doclrine de l'Incarnation (Gen. 1621, 8vo);—Consideration de la doctrine de Dieu, etc. (Gen. 1623, 8vo);—Recueil des choses mémorables advenues sous la Ligue, etc. (Gen. 1637-80, 3 vols. 8vo);—last ed. by abbé Goujet, under the title Mémoires de la Ligue sous Henri III et IV, etc. (Amst. 1734, 4 vols. 4to). He also edited a number of authors, ancient and modern, with annotations, and translated numerous works on history and theology. Some of his letters were published in the Épistres francois des personnages illustres et doctes à J. J. de la Salle, mène en lumière par Jacques de Rioux (Paris, 1627, 8vo).—S. Goulart's Syllabex, in Ecclesia Generum pastoris, etc. (Gen. 1628, 4to);—Bayle, Dict. Hist.; Nicéon, Mémoires, xxix, 863-874; Senebier, Hist. litt. de Genève; Haag, La France Protestant; Hoefer, Nouv. Biog. Générale, 1830, 246.

Goulart, Simon, a Swiss Protestant theologian (son of the preceding), was born at Geneva about 1576. He was at first pastor of the French Protestant church at Wesel, and in 1601 was called to Amsterdam to take charge of the Wallon church. Being a zealous Arminian, he engaged in a controversy with his colleagues, and was accused of heresy, and in 1618 the Remonstrants chose him as one of their defenders at the Synod of Dort. He was, however, forbidden to appear, as being under interdiction. When the Arminian ministers were banished in 1619, he followed Episcopius to Antwerp. When hostilities were renewed between Holland and Spain he went to Calais. In 1628 he was accused of conspiring against the prince of Orange, but was proved innocent and the next year removed to Friedrichstadt, where a large number of Remonstrants had sought refuge. He died there March 19, 1628. He wrote, Brief Traité de la grâce de Dieu envers les hommes et de l'éternelle élection des fidèles et réputation des indifférents (Amst. 1616, 8vo);—Érasmien des opinions de M. François Rosescourt, comme dans un livre de disputé intitulé L'élection éternelle et ses dé-
It has also been called Pentadactyles and Palma Christi, from the palmate division of its leaves. It was known at much earlier times, as Hippocrates employed it in medicine; and Herodotus mentions it by the name of alκαντος (II. 91) when speaking of Egypt: "The inhabitants of the marshy grounds make use of an oil which they term κίκι, expressed from the Silli-
cyprian plant." That it has been known there from the earliest times is evident from Caillaud having found castor-oil seeds in some very ancient sarcophagi. That the Arabs considered their kherw to be the same plant is evident from Avicenna on this article, or kηλραβ of the translation of Plinius (p. 801); so Serapion (iii. c. 79). But most decisive of all seems the derivation of the Hebrew word from the Egyptian κικί (Herodot. ii, 94; comp. Bähr, ad loc.; and Jablon-
sky, Opusc. p. 1, p. 110), established by Celsius, with whose arguments Michaelis declares himself entirely satisfied (J. D. Mich. Suppelm.). and confirmed by the Talmudical פֶּתַדַּכְּל (Peta
dacle), prepared from the seeds of the ricinus (Buxtorf, Lex. Chalda. Talmud. col. 2029), and Dioscorides, iv, 164, where αρχαν (Palma Christi) is described under the name of αρχαν, and the oil made from its seeds is called αρχανίας (Rosenmuller, p. 127). Lady Calcott states that the mod-
ern Jews of London use this oil, by the name of oil of κικί, for their Sabbath lamps, it being one of the five kinds of oil which their traditions allow them to em-
ploy. The castor-oil plant attains a considerable size in one season; and though in Europe it is only known as an herb, in India it frequently may be seen, especially at the margins of fields, of the size of a tree. So at Bursa, Niebuhr saw an eλκρως which had the form and appearance of a tree. From the erect habit, and the breadth of its foliage, this plant throws an ample shade, especially when dry. From the softness and little substance of its stem, it may easily be destroyed by insects, which Rumphius describes as sometimes being the case. It would then necessarily dry up rap-
idly. As it is well suited to the country, and to the purpose indicated in the text, and as its name kherw is so similar to kikyos, it is generally thought by inter-
preters to be the plant which the sacred penman had in view.

This opinion, however, that the first-named plant
above is the true representative of Jonah's gourd, is reviewed by the Rev. H. Loebel, M.D., missionary in Aserpa, in a letter published in the Bibliotheca Sacra, April 6, 1855, p. 85 sq., who says, "The Mohammedans, Christians, and Jews all agree in referring the plant to the kera, a kind of pumpkin peculiar to the East. The leaves are large, and the rapidity of growth astonishing, but the fruit is for the most part eaten in a fresh state, and is somewhat like the squash. It has not more of a generic resemblance to the gourd of the United States, though I suppose that both are species of the cucurbita. It is grown in great abundance on the alluvial banks of the Tigris, and on the plain between the river and the ruins of Nineveh, which is about a mile wide. . . . The castor-oil plant is cultivated, indeed, to some extent here, but is never trained, like the kera, to run over structures of mud and brush to form boodas in which the gardeners may protect themselves from the terrible heats of the Asiatic sun. I have seen at a single glance dozens of these boodas—these lodges in the fields of melons and cucumbers around the old walls of Nineveh (Isa. i. 8)—covered with the vines of the kera, of which there are numerous species, the fruit of which weighs from one to fifty pounds. One species, growing in Kurdistan, a few days' distance from Mosul, is a genuine gourd; but there is no probability that it ever flourished on the hot plains of Mosul." The same view is taken by Thomson (Land and Book, i, 96 sq.), who says that "Orientals never dream of training a castor-oil plant over a booth, or planting it for shade; and they would have but small respect for any one who did. It is in no way adapted for that purpose, while thousands of arbors are covered with various creepers of the gourd family. . . . The gourd grows with extraordinary rapidity. In a few days after it has begun to run the whole arbor is covered. It forms a shade absolutely impenetrable to the sun's rays even at noonday. It flourishes best in the very hottest part of summer. Lastly, when injured or cut, it withers away with equal rapidity." See JONAH.

Oriental Arbor covered with a Gourd-vine.

2. WILD GOURDS (עֵבָד, pâkâthôth; Sept. râlômân, Vulg. colocythis). It is related in 2 Kings iv. 38-40 that Elisha, having come again to Gilead, when there was a famine in the land, and many sons of the prophets were assembled there, he ordered his servant to prepare for them a dish of vegetables: "One went out into the field to gather kera (orach), and found a wild vine (legation, field colocythis), and gathered thereof wild goards (עֵבָד, pâkâthôth), his lap-full, and came and shrewd them into the pot of pottage, for they were eating the potage. . . . They poured out for the man to eat; but as they were eating of the potage, they cried out, O thou man of God, there is death in the pot; and they could not eat thereof." Though a few other plants have been indicated, the pâkâthôth has almost universally been supposed to be one of the family of gourds or cucumbers, several of which are conspicuous for their bitterness, and a few poisonous, while others, it is well-known, are edible. The reasons are given in detail by Celsius (Hieron. 1, 505). (1.) The name is supposed to be derived from פַּת, pâth, "to spout," or "to burst," from the exploding of the fruit, and scattering the seeds on being touched; and this is the characteristic of the species called the wild cucumber by the ancients. (2.) The form of the fruit appears to have been ovoid, as the name is essentially the same with that of the "knops," or פַּתָּה, pâthâ, of 1 Kings vi. 18, vii. 24, rendered "eggs" in the Chaldaic version of Jonathan, to whom the form of the fruit could not have been unknown. (3.) The seeds of the pâkâthôth, moreover, yielded oil, as appears from the words מֵאָמָה, "the meal," (ii, § 2). The seeds of the different gourd and cucumber-like plants are well known to yield oil, which was employed by the ancients, and still is in the East, both as medicine and in the arts. (4.) The bitterness which was probably perceived on eating of the pottage, and which disappeared on the addition of meal, is found in many of the cucumber tribe, and conspicuously in the species which have usually been selected as the pâkâthôth, that is, the Cocoythus (Cucumis Cocoythus), the Squirming Cucumber (Momordica alatrum), and Cucumis prophetarum; all of which are found in Syria, as related by various writers, from the first, or Colocythis, essentially a desert plant. Kitto says: "In the desert parts of Syria, Egypt, and Arabia, on the banks of the rivers Tigris and Euphrates, its tendrils run over vast tracts of ground, offering a prodigious number of gourds, which are crushed under foot by camels, horses, and men. In winter we have seen the extent of many miles covered with the connecting tendrils and dry gourds of the preceding season, the latter exhibiting precisely the same appearance as in our shops, and when crushed, with a cracking noise, beneath the heel. Re-charging, in the form of a light powder, the valuable drug which it contains" (Pict. Bible, note ad loc.). In the Arabic version, hinnazal (which is the Cocoythus) is used as the synonyme for pâkâthôth in 2 Kings iv. 38. The third, or Globe Cucumber, "derives its specific name (Cucumis prophetarum) from the notion that it afforded the sons of the prophets' shroud by mistake into their potage, and which it shrouding, in the form of a light powder, the valuable drug which it contains" (Pict. Bible, note ad loc.). But this plant, the fruit not being bigger than a cherry, does not appear likely to have been that which was shrouded into the pot. Celsius, however, is of opinion that the second of the above-named species, the Cucumis aegyptiaca of the ancients, and which was found by Bezae descending from Mount Sinai, was the plant, being the Cucumis asinus of the druggists. This plant is a well-known drastic purgative, violent enough in its action to be considered even a poison. Its fruit is ovate, oblong, and scabrous, and likely to be mistaken for orach; and might certainly be mistaken for young gherkins. The wild cucumber bursts at the touch of the finger, and scatters its seeds, which the cocoythus does not (Rosenmüller, Alterthumk. iv, pt. i, etc.). The etymology of the word פַּת means to have been thought to favor the identification of the

di rations théologiques et critiques sur le projet d'une nouvelle version française de la Bible, publié l'an 1696, sous le nom de M. Ch. Lecène, etc. (Amst. 1698, 12mo), a violent Calvinistic attack, accusing Lecène's translation of favoring Arminianism at the expense of correctness: — 

"De l'occupation des États de Bourgogne et d'Écosse et de l'Église protestante dans l'Europe, etc. (Amst. 1702, fol.; Lpz. 1743, 4to). — Les joies de la mort et des martres d'un évêque français de l'Église protestante (Amst. 1696, 8vo). —

Gouttes, Jean Louis, a French Roman Catholic priest and political economist, was born at Tulle in 1740. He first entered the army, and soon after the Church. He was for some time curate of a parish near Bordeaux, then of Arguillers (Languedoc), where he remained until the beginning of the French Revolution. He had acquired great influence over the clergy of the diocese of Béziers, and was in 1789 sent as their representative to the States General. Here, on Oct. 5, 1789, he was appointed by the National Assembly to the office of Chaplain in the navy. He also succeeded the motion of Talleyrand-Périgord, bishop of Autun, proposing the sale of the property of the clergy. In February, 1791, he succeeded Talleyrand as bishop of Autun. But afterwards, opposing the excesses of the Republican party, he was accused of re-

lectionary sympathy, arrested, judged, condemned, and executed, all in one day, March 26, 1794. He wrote Théorie de l'intérêt de l'argent, etc. (Paris, 1780, 12mo; 2ed edit., with a Defense, etc., 1785; —

"Droit de Règne, ou réflexions sur l'Assemblée nationale (1790, 8vo). —

"La scène nationale du Clergé (April 12, 1790, 8vo). —

"Exposé des Principes de la Constitution civile du Clergé, par les écrivains des Assemblées nationales (1790, 8vo); this latter work is under a collective name, but Gouttes was its principal author. See Moniteur universel (1789, 1790); Quartard, La France protestante; Hoetzer, Nouv. Biog. Générale, xxi. 470. (J. N. P.)

Government of God. See Theocracy.

Government of the Hebrews. This we shall here treat in its secular or political relations, so far as these can be severed from the divine ordinances which underlie them all. See Monarchy.

1. Constitutional Form. — This varied materially in different ages. With the Israelites, as with all other nations, unquestionably the earliest form of government was the patriarchal, and it subsisted among them long after many of the neighboring countries had exchanged it for the rule of kings. The patriarchs, that is, the heads or founders of families, exercised the chief power and command over their families, children, and domestics, without being responsible to any superior authority. Such was the government of Abraham, Isaac, and Jacob. So long as they resided in the land of Ca-

The Hebrews having greatly increased in numbers in Egypt, it appeared very evident that they could not live among nations given to idolatry without running

the hazard of becoming infected with the same evil. They were, therefore, in the providence of God, assigned to a peculiar existence as the extent of which was so small, that they were obliged, if they would live independently of other nations, to give up, in a great measure, the life of shepherds, and devote themselves to agriculture. Besides, very many of the Hebrews, during their sojourn in Egypt, had formed doubtful habits. These were to be brought back again to the knowledge of the true God, and all were to be excited to engage in those undertakings which should be found necessary for the support of the true religion. All the Mosaic institutions aim at the accomplishment of these objects. At a time when they had passed to the desert—then the true God, the creator and governor of the universe, and none other, ought to be worshipped. To secure this end the more certainly, God became king to the Hebrews. Accordingly, the land of Canaan, which was destined to be occupied by them, was declared to be the land of Jehovah, of which he was to be the king, and the Hebrews merely the hereditary occupants. God promulgated, from the summit of Mount Sinai, the prominent laws for the government of his people, considered as a religious community (Exod. xx.); and the organization of the civil and military government, most completely and effectively developed by Moses. The rewards which should accompany the obedient, and the penalties which should be the lot of the transgressor, were at the same time announced, and the Hebrews promised by a solemn oath to obey (Exod. xx.xiv.; Deut. xxvii.-xxx.); see Law.

In order to preserve the true religion, God governed the whole people by a striking and peculiar providence, which has rightly been termed a theocracy. But, although the government of the Jews was a theocracy, it was not destitute of the usual forms which exist in civil governments among men. God, it is true, was the king, and the high-priest, if we may be allowed so to speak, was his minister of state; but still the political affairs were, in a great measure, under the disposal of the elders, princes, etc. It was to them that Moses gave the divine commands; he determined their powers, and submitted their requests to the divine decision (Numb. xiv. 5; xvi. 4; xxvii. 5). Josephus pronounced the government to be aristocratical, but Lowman and Michaelis are in favor of considering it a democracy, and in support of their opinion such passages as the following: Exod. xxiv. 3-8; Deut. xxix. 9-14. The Hebrew government, however, putting aside its theocratical feature, was of a mixed form, in some respects approaching to a democracy, in others assuming more of an aristocratical character. In the time of Samuel, the government, in point of form, was changed into a monarchy. The election of a king, however, was committed to God, who chose one by lot; so that God was still the ruler, and the king the vicegerent. The terms of the government, as respected God, were the same as before, and the same duties and principles were inculcated on the Israelites as had been originally (1 Sam. viii. 7; x. 17-25). In consequence of the fact that Saul did not choose at all times to obey the commands of God, the kingdom was taken from him and given to another (1 Sam. xii. 5-14; iv. 1-31). David, through Samuel, was selected by Jehovah for king, who thus gave a proof that he still retained, and was disposed to exercise, the right of appointing the ruler under him (1 Sam. xvi. 1-8). David was first made king over Judah, and before he received his appointment from God, and acted under his authority, the elders of the tribes submitted to him (2 Sam. v. 1-8). The paramount authority of God as the king of the nation, and his right to appoint one who should act in the capacity of his vicegerent, are expressly recognised in the books of Kings and Chronicles. See King.

The rebuilding of Jerusalem was accomplished, and the reformation of their ecclesiastical and civil polity was effected, by the two divinely-inspired and pious governors, Ezra and Nehemiah; but the theocratic government does not appear to have been restored. The new temple was not, as formerly, God's palace; and the cloud of his presence did not take possession of it. After the death of Ezra and Nehemiah, the Jews were governed by their high-priests, but theocratic function, however, to the Persian kings to whom they paid tribute (Ezra iv. 18), but were ruled by their own magistrates, and were in the full enjoyment of their liberties, civil and religious. Nearly three centuries of uninterrupted prosperity ensued, although during that time they had passed to the Gentiles, and in the reign of Antiochus Epiphanes, king of Syria, when they were most cruelly oppressed, and compelled to take up arms in their own defence. Under the able conduct of Judas, surnamed Maccabaeus, and his valiant brothers, the Jews maintained a religious war for twenty-six years with five successive kings of Syria; and after destroying upwards of two hundred thousand of their best troops, the Maccabees finally established the independence of their country, and the royal station of their own family. This illustrious house, whose princes were distinguished for their sagacity and excellence, under the guidance of their own persons, administered the affairs of the Jews during a period of one hundred and twenty-six years; until disputes arising between Hyrcanus II and his brother Aristobulus, the latter was defeated by the Romans under Pompey, who captured Jerusalem, and reduced Judas to the rank of a dependent kingdom, B.C. 50. See Jews.

2. Executive Department. The organs through which these various forms of administration were exhibited always partook of that absolute and arbitrary character, both in their appointment and their exercise, which was common among Eastern nations. The government of the Israelites, however, under the monarchy, was, as far as we can understand its political organization, very simple, and in its principal features analogous to modern Oriental forms (see Paulsen, Die Regierung Mosas- länders, Altona, 1750, vol. i.). The king, not simply the central figure, but more properly the representative of civil power, had around him as advisers and supreme executors of his commands several "councillors," or נבכ保護 (2 Sam. xv. 12; 1 Chron. xxvii. 82; 1 Kings xii. 2), at whose head stands almost always the chancellor, ריבש, "recorder," whose chief duty, however, was that of heralds and heralds (comp. 2 Kings xix. 18, 87), and who is immediately recognised as the prime minister, such as is to this day the organ of the royal command in Persia (see Elstten, "Persische Landeskunde," 1876, p. 258). Co-ordinate with him probably stood the "scribe," ידנ, or state (cabinet) secretary (2 Sam. viii. 17, xx. 25; 2 Kings xvii. 18, xix. 2; xxii. 8, 10 sq.; Jer. xxxvi. 10). Sometimes we find several of these officers mentioned as existing at the same time (1 Kings iv. 8); their bureau is called the "scribe's chamber," ידנ חנ_cb (Jer. xxviii. 12). By the side of the king was also the prefect of the royal palace, ידנ יכ, whose functions, however, were not entirely confined to the royal household (such as commissions and messages, 2 Kings xviii. 19 sq.; xix. 4, 6; Neh. i. 11), but who was also employed on state business (1 Kings xviii. 8; 2 Kings xvii. 18; Jer. xxxvi. 8), and often assumed a high degree of importance (Isa. xlix. 13 sq.), as he then became an officer of the royal household (Isa. xxxv. 1). Sometimes a prophet enjoyed the confidence of the king as extraordinary civil counsellor, and grew influential as "the king's friend," ידנ יכ (a title of most trusted minister or prime vizier in the modern East; see Gesenius, Comment. on Isa. xxix. 15; Paulsen, Register, p. 990), such as Nathan under David and Solomon, and Isaiah under Hezekiah. The superior
functionaries appear under the kings to have conducted the civil administration. It was the duty of the priests and Levities to care for the maintenance of justice (Deut. xv, 16). The king himself rendered decisions in the highest cases, not seldom in less weighty causes, or even altogether. See TRIAL. As officers of the exchequer, at least so far as to provide for the wants of the royal kitchen, under Solomon, twelve commissioners were appointed (1 Kings iv, 7 sq.), one at the head of each household or establishment, the domains and manors, had their particular superintendent. See PURVEYOR. All these constitute together, as we may say, the regal board or court. On the other hand, under the 550 officials of Solomon alluded to in 1 Kings ii, 39 must be reckoned under-officers, of whose department or service we know nothing further. Among these intermediate jurisdictions are, at all events, included the lieutenants of provinces, פְּרוֹצֵי הָעָרִים ("princes of the provinces," 1 Kings xx, 14 sq.), a district-superintendents, who are first mentioned under Abiah of Israel. In conjunction with them may be classified the municipal officers, the elders and magistrates of cities, to whom were addressed and who executed the royal behests (1 Kings xxi, 8; 2 Kings x, 1). See OLD MEN. The oldest and leading men of the tribes (q. v.) also formed a kind of national representatives. The scribes (q. v.) functioned in a certain official position. Under the Chaldean rule, Gedaliah (q. v.) appears as governor פָּדָיו (of desolated and depopulated Judæa (2 Kings xxv, 22), which after this time became, in connection with Egypt, Cælo-Syria, and Phoenicia, a mere satrapy of the Babylonian empire (Berosus, in Josephus, Ant. x, 11, 1). The Persian court commanded all the provinces lying west of the Euphrates to satrape, הָאָדָם (Ezra viii, 26; Neh. ii, 9), associated with which while civil administration was a governmental one, was another functionary, secretary and assessor (Ezra iv, 8, 9). Yet the same title, הָאָדָם (l. q. pozao), was also borne by the (Jewish) prefects of the new Israelitish colony (Ezra vi, 7; Neh. vii, 14, 18; comp. Hag. i, 14; ii, 2), which it had over its own people, exclusive of the circuit or ministerial officers (Neh. iii, 9, 14, 15, etc.), municipal officials, or פְּרוֹצֵי הָעָרִים (Neh. ii, 16; iv, 19; v, 7, etc.), and judges (Ezra viii, 23). See CROSSHATCH. Besides the Persian civil functionaries, there were likewise in the subject territories tax-commissioners or treasurer-officers appointed לְעַנְדּוּת (Ezra vii, 21), and under them a general forest-keeper (Neh. ii, 8). During the Seleucid-Syrian rule Judæa belonged, while their relations were peaceful, to the precinct of a general or παρασφυγὸς of Phoenicia and Cælo-Syria (2 Macc. iii, 5; iv, 4; viii, 9), who was a provincial officer endowed with civil and military jurisdiction. The administration of the revenue was intrusted to special functionaries (2 Macc. iii, 8; 1 Macc. x, 41; xiii, 37). The chief management of the finances, however, was in the hands of the royal chamberlain (2 Macc. iii, 7 sq.). During the government of Antiochus Epiphanes we find military appointees (1 Macc. vii, 8) and extraordinary commissioners (1 Macc. i, 53; ii, 15; 2 Macc. v, 29) in Judæa. During the contests for the throne between Demetrius Soter and Alexander, the Jewish high-priests still retained the dignity of vassal-chiefs over Judæa (1 Macc. x), and Jews were intrusted with executive authority, even beyond the limits of that territory (1 Macc. xi, 59). Simon was absolute hereditary prince over Judæa, and held also the right of coinage (1 Macc. xv). In the last period of the kingdom, as well as the Egyptian dominion, the impost duties were not infrequently farmed out to the high-priests, or to wealthy Jews (1 Macc. xi, 28; xiii, 15; Josephus, Ant. xiii, 4, 4 sq., 16), which brought them into close connection with the royal functionaries, and even conferred upon them a certain executive authority in civil matters. See AS- SESSMENT.

For the government of Judæa under the Romans, see ROMAN EMPIRE.

The supreme political body of the Hebrew nation, duly met in congress, is designated in the original by two words of nearly equal frequency in the sacred writings, יְהַ֣בָּסָה, râykh, from יְבָ֣שָׁנ, to appoint, also to bring together; and יְבָ֣שָׁנ, kābal, from יְבָ֣שָׁנ, i. q. kāvalī, to come over (Sept. ἐκκοιλεῖται, ἐκκοιλεῖται; Vulgate, Congregatio, Cœtus, Ecclesia). The phrase "tabernacle of the Congregation," however, which so frequently occurs as indicating the place of meeting, is described by neither of these words, but by בִּתְרוֹת (the versions consistently mark the difference also, the Sept. invariably translates it by הַשְּׁכוֹת, Μυστήριον, and the Vulg. by tabernaculum mysteriorum; comp. also Num. x, 33, where the word בִּתְרוֹת occurs without the בִתְרוֹת (as in Num. xvi, 2), it has somewhat of the ambiguity of the Latin Curia, which equally well signifies the Senate and the Senate-house. In this passage בִּתְרוֹת is translated by בִּתְרוֹת and Tempus Concilia; in many other passages the word is variously rendered, but generally bears reference to a set time or place, e. g. in Lam. i, 15, A.V. renders it assembly; but in ii, 6, place of assembly and solemn feast; the Sept. and Vulgate are equally capricious—κατάκοπος and tempus standing in Lam. i, 15, and topiō, tabernaculum and festivitas in ii, 6. This word בִּתְרוֹת is the most frequent original equivalent of our noun "congregation." Apart from בִּתְרוֹת (tabernacle), it has a highly generic sense, including all the holy assemblies of the Jews.

There is good reason to believe that, not unlike the Servian constitution of the Roman people (Arnold's History of Rome, i, 70), the Hebrew nation from the first received a twofold organization, military as well as political (comp. Exod. xii, 51; Num. i, 8, and throughout; Num. xxxvii, 5; and 1 Chron. vii, 4 and 40. See also Josephus, Ant. i, 10, 6). The civil government (the Civil Government on the Hebrews, p. 159, 168, etc.). The classification of the people is very clearly indicated in Jos. vii, 14-18. (1) The Tribe פִּי הָרְגָּז or פִּי הָרְגָּז was divided into clans, genea., A. V. "families," פִּי הָרְגָּז. (2) Each Mishpachah comprised a number of families, A. V. "houses," פִּי הָרְגָּז. (8) Each Tribe or "house" was made up of qualified men, fit for military as well as political service, being twenty years old and upward (Num. i, 8). The word which describes the individual member of the body politic, פִּי הָרְגָּז (pl. פִּי הָרְגָּז), is very significant; for it means vir a robor devote (Gesenius, Thes. i, 267), "a man of valor," from פִּי הָרְגָּז, to be strong (Furst, Heb. Wörterbuch, p. 220; Meller, Heb. Wörterbuch, VI. B. p. 202). Now it was the organic unit of the tribes which constituted the highest and trunest sense of the פִּי הָרְגָּז, or פִּי הָרְגָּז, i. e. "Congregation," convened duly for a competent purpose (Kurtz, Hist. Old Cost. ii, 163). As with the Greeks there was an arvóura, and with the Latins a Duminatio Capiro, so there were sundry factions which deprived a home-born Israelite (=set. פִּי הָרְגָּז, Sept. πολιτεία, Vulg. indigenea; or פִּי הָרְגָּז, civis, in Deut. i, 16) of his privilege as a member of the national assembly (see Deut. xxiii, 1-8 [comp. with Neh. xiii, 1-
GOVERNMENT

3] also Exod. xii, 17, 19; xxx, 38, 88; xxxvi, 14; Lev. xvii, 20, 21, 25, 27; xviii, 4, 9, 10, 14; xviii, 29; xix, 8; xxi, 17, 19; xx, 17, 18, 20, 21. On the other hand, the franchise or civitas was conferred (with certain exceptions, such as are mentioned in Deut. xxiii, 3) on foreigners, i.e. "strangers;" Sept. προφόλοκοι; Vulg. pergraii), after they had qualified themselves by circumcision (Exod. xii, 19; Lev. xvi, 94; Deut. x, 19; Jos. xiii, 9). On this subject, comp. with Isaiah 56, 3.

The above words, expressive of the national congregation, sometimes imply 1 (a) a meeting of the whole mass of the people; sometimes 2 (a) a congregation of deputies (Jahn's Hebrew Republic, p. 348). 1. At first, when the nation dwelt in tents, in their migration from Egypt to Canaan under their divine command of the great legislator, the congregation seems to have comprised every qualified Israelite who had the right of a personal presence and vote in the congress. In Exod. xxxvi, 1, this ample assembly is designated בְּכֵלָ֣ה־כֹּל, the entire congregation of the Sons of Israel (קְרַע תַּנְיָת יִשְׂרָאֵל, omnis tota Israel). Similarly in Num. xxvii, 19, the phrase is בְּכֵלָ֣ה—קֶּרֶם, in all the land of Canaan (קְרַע תַּנְיָת יִשְׂרָאֵל, omnis multitudine), while in Lev. xvi, 17 we have בְּכֵלָה־יִשְׂרָאֵל, the entire assembly of Israel (קְרַע תַּנְיָת יִשְׂרָאֵל, universus cocus Israel).

We would have no difficulty in supposing that every member of the Edok was present at such meetings as these, in the lifetime of Moses and before the nation was dispersed throughout its settlements in Canaan, were it not that we occasionally find, in later times, an equal or ample designation used, when it is impossible to believe that the nation could have assembled at one place of meeting; e.g. in Josh. xxii, 12, where "the whole congregation of the children of Israel" is mentioned; and again still later, as at the dedication of Solomon's Temple (1 Kings v, 1; 2 Chronicles iii, 14; Jer. xxxvii, 18, etc.). From this impossibility of personal attendance in the national congregation, we should expect to find a representation constitution provided. Accordingly, in Num. i, 16, we read of persons called יְהַנְּמִיָּה יִשְׂרָאֵל, not, as in the A.V., "renowned of the Congregation," but went to be called to the Congregation (Michaelis, Laws of Moses, i, 290). In xvi, 2, they are still more explicitly styled יְהַנְּמִיָּה יִשְׂרָאֵל, i.e. chiefs of the Congregation who are called to the Convocation (נְעַבְּרֵי יִשְׂרָאֵל, qui tempore consili vocabantur). While in Exod. xxviii, 25 occurs the phrase יְהַנְּמִיָּה יִשְׂרָאֵל, those deputed to the assembly, which exactly describes delegated persons. From Josh. xxii, 2, and xxiv, 1, it would appear that these deputies were—(1) "The elders" (called יָדְנֵי יִשְׂרָאֵל, elders of the Congregation," in Lev. iv, 15), as if deputed thereto; and "elders of Israel," or "of the people," as if representing them and nominated by them (Deut. i, 15). (2) "The heads," יְהַנְּמִיָּה יִשְׂרָאֵל, i.e. the princes of the tribes (Num. i, 4, 16), and the chiefs of the Mishpochoth, or "families" (Michaelis, Laws of Moses, i, 280). (3) "The judges;" not, of course, the extraordinary rulers, beginning with Othniel, but the דָּשָּׁנִי, referred as in Deut. xvi, 18, stationed in every great city, and summoned probably as ex officiö members to the congregation. (4) "The officers" יָדְנֵי יִשְׂרָאֵל, יָדְנֵי יִשְׂרָאֵל, יָדְנֵי יִשְׂרָאֵל, יָדְנֵי יִשְׂרָאֵל, whom Jahn calls genealogists, and Gesenius magistrati), whether central, as in Num. xi, 16, or provincial (Deut. xiii, 18). These four classes of men, in addition to official duties, were also attached to their offices the prerogative of representing their countrymen at the national congregation or Edok. We have not classed among these delegates either the "Judithonian prefects" (Exod. xviii, 15; Deut. iii, 13-15) (Neh. 11, 15), for they were undoubtedly included already in one or either of the normal classes (comp. Numb. xi, 16, and Deut. i, 15). The members of the Congregation were convened by the ruler, or judge, or king, for the time being; e.g. by Moses, pæsthum; by Joshua (xxiii, 1, 2); probably by the high-priest (Judges xx, 27, 28); frequently by the kings—by David (1 Chron. xiii, 2), by Solomon (1 Kings vi, 5, etc.), by Jehoshaphat (2 Chron. xx, 3, 4), by Hezekiah (2 Chron. xxx, 2), probably by the Tirhakah after the Exile (see Ezra x, 9, 12), and by Judas Maccabæus (1 Macc. iii, 42-46). The place of meeting was at the door of the Tabernacle of the Congregation; sometimes, however, some other place of celebrity was selected, as Shechem by Joshua (xxiv, 1, 2); Mizpah by Sam. i, 7, 8); Hezekiah by Saul; and Ggila by Samuel (1 Sam. xi, 7, 8).

As long as the Israelites were encamped in the wilderness, the Edok were convened by the sound of the silver trumpets. From Numb. x, 2-4, it appears that the blowing of one trumpet only was the signal for a more select conversation, composed only of the priests, the Ἐκπακεῖτοι, and the princes of the tribes; whereas when both trumpets sounded the larger congregations met. But after the occupation of Canaan, when this mode of summons would be clearly ineffectual, the congregations seem to have been convened by messengers (Judg. x, 5; 1 Sam. xi, 7, 8). As to the powers and authority of the congregation—it was not a legislative body (Conringius, De Rep. Hebr. sec. 10, p. 246). The divine law of Moses had already foreclosed all legislation, properly so-called; there was only room for by-laws (Sherlock, Disert. iii, 217). Now was exercising power within the country of the Israelites Edok: "the national revenues of the state were so settled in the tithes and other offerings, and there being no subleay in pay, all holding their estates by military service, there was no room for new or occasional taxes; so that the Hebrew parliament could have no business either to make new laws or to raise money" (Lowman, Disert. p. 135). But there was, for all that, a large reserve of authority, which sufficiently guaranteed the national autonomy. (1) The divine law itself was deliberately submitted to the Edok for acceptance or rejection (Exod. xix, 3, 8, and xxiv, 8). (2) Their public or private chris were submitted to this body on appointment for its approval; e.g. Joshua (Num. xxvii, 19); Saul (1 Sam. x, 24); Saul again, on the renewal of the kingdom (1 Sam. xxi, 15); David (2 Sam. v, 1-8); Solomon (1 Chron. xxvii, 22); so the latter kings—indeed, as an instance Josiah (2 Chron. xxxvi, 8). (3) The Edok seems to have had a sort of staving the execution of a king's sentence (as in Jonathan's case, where "the rescue" was not by force or violence, but by constitutional power (יָדְנֵי יִשְׂרָאֵל carries with it the idea of authority). 1 Sam. xiv, 44, 45). (4) In parliament, if it had not actually the prerogative of making peace and war, it possessed the power of checking, by disapprobation, the executive authority (see Josh. ix, 15; comp. with ver. 18). In later times, indeed, the prince seems to have laid questions of foreign alliance, etc., before the congregation, either for deliberation or approbation, or both (see the case of Simon Maccabæus in 1 Macc. xiv, 18-20). (5) But in the absence of a ruler, the Edok itself apparently decided on war or peace (Judg. xx, 1, 11-14; also xiii, 12-20). (6) The congregation was a high court of appeal in cases of death and life (Num. xxxv, 12, 24, 25). (7) Capital punishment was not inflicted without the cognizance of the Edok, and the execution of the sentence was on the one hand (Exon. xxiv, 10-14; Numb. xiv, 28-36). Lastly, the congregation was consulted by Hezekiah and Josiah in their pious endeavors to restore religion (2 Chron. xxx, 2-4; xxxiv, 29). When David mentions his "praises in the great congregation" (בְּכֵלָ֣ה יִשְׂרָאֵל, Ps. xxvii, 29), this is probably in reference to his composition of Psalms for the use of the Israelitish Church, and the establishment
in its full splendor of the choral Levitical service" (Thrupp, Psal. i, 111), in all which he would require and obtain the co-operation and sanction of the Edah. After the rejection of the theocratic constitution by Jeroboam, the congregation sometimes receives a more limited designation, a. the *congregation of Judah*, all the congregation of Jerusalem (2 Chron. xxx, 2), and *the congregation of Judah*, all the congregation of the whole land (ver. 25). The phrase "congregation of Israel" is used, indeed, twice in this later period (see 2 Chron. xxiv, 6, and xxx, 25); but in the former passage the expression directly refers to the original institution of Moses, and in the latter to the large number of people, among whom Hezekiah selected or received the neighboring kingdom to attend his passover. See Congregation.

4. Literature.—See the Critical Bibliography, vol. i: Courting, De politica Heraeorum (Helmstäd, 1668); Cuneus, De republica Heraeorum (Leyden, 1617; Cur 1666; with notes by Nicolai, Leyd, 1765); Dietrich, De jure et status Judaeorum (Marburg, 1695); Hoëllum, Staatsverfassung der Israeliten (Lpz. 1824); Leidheck, Antiquitates Judaeorum (Amst. 1794); id. De vara republica Heraeorum (Ib. 1710); Lowman, Civil Government of the Hebrews (Lond. 1740, with an appendix, 1741); Mendelssohn, Vollendung der Staatsrechtslehre (Hamburg, 1744); Paalson, De civitate Judaeorum (Berlin, 1805); Reimer, De republica Heraeorum (Hav. 1857); Relke, Theocratis (Jena, 1763); Sigonius, De republica Heraeorum (F. a. M. 1858; also in his Annotat. et Antiq. Leyden, 1701); Walch, Monarchiae Hebræarum (from the Spanish of Vinyé for N. Philip, 1718; vol. i); and Wehner, De republica Heraeorum (Vilhelm. 1657).

Governor, a term used by the A.V. to denote various degrees of authority and power: absolute and limited, acquired by birth or by election, military and civil. The numerous and mostly vague original terms are found in other passages translated by "ruler," "chief," "prince," "captain," etc.

1. "Ruler" (Phon. 32b, 33b: Ar. majdul; Syr. mgdla; from "mgha," a verb only used in Hiph. and Hoph. in the signification of to tell). The original meaning of the root megil, to be visible, to be in front (comp. "mgha," preterot, roterot, to lead, to be first (compare Gsm. Firdh = prince). The word mgd, therefore, denotes a prominent personage, whatever his capacity, and is used of a chief or precept, "governor" of the royal palace, Aziram (2 Chron. xxviii, 7; compare 1 Kings iv, 6; Isa. xxii, 15; oiskosmos, chamberlain, secretary of state), whose power (from mgd) seems to have been very considerable (compare Isa. xxii, 21 sq. "Shebanah . . . a nait to the throne"; and, who, it would appear, was distinguished from the other court officers by a particularly brilliant uniform (girdle and robe), and to whose insignia belonged a key worn over the shoulder. In a wider sense the word is applied to the chief of the Temple: Azariah, the high-priest, "ruler of the house of God" (1 Chron. ix, 13; compare 2 Chron. xxvii, 18); Paschur, "chief governor of the house of God" (Jer. xx, 1); further, to the "leader of the Aaronites," Jehoiada (1 Chron. xii, 27). Again, it is used of the keeper of the sacred treasury, "Shebuel, ruler of the treasures" (1 Chron. xxi, 24); of the chiefstalls of a tribe, "Zebadiah, the ruler of the tribe of Simeon" (1 Chron. ii, 22; 2 Chron. xxx, 18); of the "captains" of the army (1 Chron. xiii, 1; 2 Chron. xxxii, 21); of the eldest son of the king, the heir-apparent, "Abijah, the son of Maachah [the chief], to be ruler among his brethren" (2 Chron. xxiii, 25). It is found also in connection with the kingdom of Manasses, "Amen to him to be captain," 1 Sam. ix, 16 (etc.), to "Messian [the Anointed], the Prince" (Dan. ix, 25, etc.). In the plural the word occurs in the more general sense of aristocracy, "Nobles" (Prov. viii, 16).

The Targum renders דבשכש, "their judges," by דבשכש, and in the Talmud רכמ is used paradoxically for "leader of a flock." "When the shepherd is angry with his flock he gives it a blind leader" (Baba K. 92)—a corrupt generation to which God appoints a bad king. How far the talmudic use of רכמ, in the sense of "flagellate" (Pesi. 92) and of "extend" (Baba Met. 74), may be connected with the notion of supremacy, reign, we cannot decide here.

2. נָשָׁא, nasi' (from נָשָׁא, to carry, lift up; lit. raised, exalted, set aside, Sept. syvhoyn, 'agaparon'), a word applied to the chiefs of the families of which a tribe was composed (Num. iii, 24, 28, 30, 32, xvi, 2; as many as 290 on one occasion, Num. xvi, 2); and who, as deputies (commoners) at the National Assembly, are also called נויס of the congregation, or Nasi of the tribe (frequently called the hanoshim, under whom it was also used of the twelve supreme chiefs of the tribes themselves (Num. ii, 8 sq; vii, 2 sq; iii, 32, etc.). Both these dignities, the chieftdom of a family as well as that of a tribe, would appear to have been elective—corresponding to the word נָשָׁא—not hereditary, as Michaelis and Winer hold. The Nasi of Judah, e.g., was called benaminahad, the eldest son from the first line of the tribe (Num. ii; compare 1 Chron. ii, 10, 10). The Nasi of Issachar, again, is called נויס Nathaniel ben-shuar, a name not found among the eldest sons of this tribe (1 Chron. vii, 1-3). Finally, in the table of the Nasi—no doubt the chief of the tribes—"the head of the tribe" is mentioned, and the tribal land was insturcted by Moses at his death, no son of the Nasi of the desert occurs (Maim. Pielast. p. 194).

נָשָׁא is further employed for generals, under a head (נָשָׁא), 1 Chron. vii, 40; of Abraham, a Nasi of God, a mighty sheik; for non-Israelite "princes:" of the Midianites (Josh. xiii, 21), and of the Hivites (Shechem) (Gen. xxiv, 2). On the Maccabean coins Simeon is called נויס of Israel. Nasi was also the official name of the president of the Sanhedrin (under whom stood the "father of the tribunal, or vice-president"), whose seat was in the middle of the seventy-one members (Maim. Todach. xiv, Sima. i).}

3. פְּקָד, p'kad' (from פּקָד, to appoint), an officer, official, magistrate, applied to the ecclesiastical delegate of the high-priest, who, together with the king's scribe, bore the chest containing the books to the Temple (2 Chron. xxiv, 11); to the Levites (Neh. xi, 22); to the "chief" of the Temple (Jer. xx, 1, 9); to "officers in the house of the Lord" (Jer. xxiv, 20); to a military commander (2 Kings xxxix, 19; Jer. lii, 20); and to his adjutant or principal manager (Judg. ix, 28). Further, to the officers whom Joseph suggested that Pharaoh should put over Egypt during the years of the famine (Gen. xli, 34); to those who were to gather all the vegetables unto Shushan for Ahasuerus (Ezra ii, 8); to prefects; "overseers," etc. (Neh. vi, 9; xii, 42); and, finally, to the nobles or "princes" of the king (Jer. xx, 1; 2 Chron. xxxv, 8).

4. שָׁלֵל, Shalh', Heb. and Aram. (from שלל, to rule, have power, Arab. id. comp. Sultán); "one who hath power" (Eccles. viii, 8); "Arioch the king's captain" (Dan. ii, 15); "Joseph, the governor over the land" (Gen. xiii, 6); a "mighty man" or hero (Eccles. viii, 19); a "king" or satrap (Ezra iv, 20); Daniel, the third "ruler" (Daniel ix, 1); etc. The verb שלל, שלל is also used in later Hebrew in the sense "to have power," of evil hours, evil spirits, etc.

5. פִּקְדָה, P'k'dah' (from פיַד, Arab. id. to join, etc.), originally, one who is put over a "thousand," or פִּקְדָת, פִּקְדָה, the round number of families which constitute a clan or subdivision of a tribe (comp. saxon Hundred). It is first used of the chiefs, "dukes," of Edom (Gen. xxxvi, 1 Chron. i, 51); we find it at a
GOVERNOR 585 GOVERNOR

counsellor" (Exra viii, 25), to "king" (Hos. iv, 3). The merchants of Tyre are called ד"ענש, merchant-princes (Isa. xxix, 9); the same term is applied to noblemen and courtiers, "the princes of Pharaoh" (Gen. xii, 15); "princes of Zaan" (Isa. xix, 11, 13).

The priests are called chiefs or princes of the sanctuary (Isa. xiii, 28; 1 Chron. xxv, 5), and the chief priests again are called princes of the priests. Gradually the word came to be used of angels, as patrons and representatives of special nations (guardian angels): of Persia (Dan. x, 13, 20); of Greece (Dan. x, 20); of Israel (x, 21); Michael, "the great prince" (xii, 1); the chief princes (x, 13); "the eyes of princes"—God (vii, 25; comp. Sept. in Deut. xxxii, 8). The use of מ"ג as guardian angel is retained in the Midrash, but the word is also applied in the Talmud to "a hero at the table, a mighty drinker" (Nidd. 16, etc.). See CAPTAIN.

Of foreign origin is, מ"ע, Peqah', מ"ע, יִּעָר, יִּעָר; Josephus, Ἰραχος, of Tattal (Ant. xi, 4, 4). This word has been variously derived from the Persian for "magistrate" (Bodel); Persic "to cook" (Ewald); Persic for "Satelles," "Pedisoeus" (Gesenius); from the Turkish for "general" (Fränz); from the Assyrian פֹּֽקָה (Pakka); whence paška—friend (of the king), adjutant, governor of a province (Bene, Stera); from the Arabic فل ("the lower," and גלא, "royal officer" (=Fegah, sub-kings (Fatra); from the Arabic verb מ"כ, walled (John); and, finally, from the Hebrew מ"כ, yarih. It is applied to a sub-province of a province, who is subject to the authority of the prefect or real governor, in contradistinction from the מ"כ, a satrap (Esth. viii, 9); from מ"כ (ib.); from מ"כ, "sagan," municipal officer (Jer. ii, 28); and from מ"כ, "king" or sub-king (2 Chron. ix, 14). It is used of the chiefs of provinces in the Assyrian (2 Kings xxv, 24; Isa. xxxvi, 8). Babylonian Chaldean (Jer. ii, 57; Ezek. xxiii, 6, 28; Dan. iii, 2); Median, and Persian empires (Jer. ii, 28; Esth. iii, 12; viii, 9). Palestine stood, while under Persian domination, under such officers, called "prefects over the rivers" (Esdras), whose official residence (וכֵֽשְׁבָּה) was in Jerusalem (Neh. iii, 7; Ezra v, 5; vi, 6; Neh. ii, 8). They are also referred to (Cant. iii, 1); e.g., Zeoribabel (Ezra ii, 63; Hagg. ii, 21, etc.). Nehemiah, who succeeded Sheshazar (Neh. v, 5, 14; xvii, 12). The word seems to have been adopted into the Hebrew idiom at an early period, since we find it used in 1 Kings x, 15 (2 Chron. ix, 14) of the tributary chieftains "of the country," together with the "kings of Arabia." Further, of Syrian chieftains to be put in the room of the (vice-)kings at the time of Ben-hadad (1 Kings xx, 24); and, finally, it passed current for any person in high authority who was to be propitiated by gifts (Mal. i, 8). With respect to the ב of Ḫa-da, introduced by Persian rule, it would appear that their remuneration ("bread of the governor") Ezra iv, 14) was on the part, partly in money ("bread, wine, and forty shekels of silver," Neh. v, 15), chargeable upon the people (Neh. v, 18): "One ox and six choice sheep, also fowl, and once in ten days store of all sorts of wine." Their office seems to have consisted in collecting the taxes of the province (Ezra vi, 8); an office at a later period in the hands of the high-priest, and still later let out on lease. See PAHATH-MOAB.

10. The Chaldean term מ"כ, Sogas (in the pln. מ"כ), is applied (Dan. iii, 2, 27; vi, 8) to the governors of the Babylonian satrapies, in a general way, in connection with other official terms, from which it is not clearly distinguishable, except that to designate the provincial prefects or viceroys; and elsewhere (Dan. ii, 48) it is applied to the prefects
over the Magi, of whom one is especially entitled as chief or supreme (καγ) over his colleagues. The corresponding Heb. term "צגד, zagad", is spoken of the provincial rulers under the Chaldee supremacy (Jer. ii, 23, 28, 57, where it distinguished from פירס, above; Ezek. xxii, 6, 12, 23; comp. Isa. xii, 25); also to the chiefs and rulers of the people of Jerusalem under the Persian supremacy (Ezra ix, 2; Neh. ii, 16; iv, 8, 18; v, 7, 17; vii, 5; xii, 40; xiii, 11; in many of which passages it is associated with other titles (of office or honor); and in the Targums it is used of the eir of the high-priest, or the presiding officer of the Temple. Corresponding to this term are the modern Persian, Arabic, and Syriac words for satrap. It is apparently of Mesopotamian origin.

The Greek terms rendered in the N. T. "governor" are the following, of which the first two relate to public or military officers, and the last two to domestic usages:

11. Εθνάρχης, Ethnarch (2 Cor. xi, 82), an officer of rank under Aretas, the Arabian king of Damascus. It is not easy to determine the capacity in which he acted. The term is applied in 1 Macc. xiv, 47; xv, 1, to Simon the high-priest, who was made general and eirarch of the Jews as a vassal of Demetrius. From this the office would appear to be distinct from a military term. The jurisdiction of Aretas, called by Josephus (War, ii, 6, 3) an ethnarchy, extended over Idumaea and all Judaea, the half of his father's kingdom, which he held as the emperor's vassal. But, on the other hand, Strabo (xvii, 13), in enumerating the officers who formed part of the machinery of the Roman government in Egypt, mentions ethnarchas apparently as inferior both to the military commanders, and to the monarchs, or governors of districts. Again, the prefect of the colony of Jews in Alexandria (called by Philo γενώρχης, ib. in Flaccus, § 10) is designated by this title in the edict of Claudius given by Josephus (Ant. xix, 5, 2). According to Strabo (Joseph. Anti. xiv, 7, 2), he exercised the prerogatives of an ordinary independent ruler. It has therefore been conjectured that the ethnarch of Damascus was merely the governor of the resident Jews, and this conjecture receives some support from the parallel narrative in Acts ix, 24, where the Jews alone are said to have taken part in the conspiracy against the apostle. But it does not seem probable that an officer of such limited jurisdiction would be styled "the ethnarch of Aretas the king; and as the term is clearly capable of a wide range of meaning, it was most likely intended to denote one who held the city and district of Damascus as the king's vassal or representative. See ETHNARCH.

12. Ἰμηράρχος, the Procurator of Judaea under the Romans (Matt. xxvii, 2, etc.). The verb is employed (Luke ii, 2, etc.) to denote the nature of the jurisdiction of Quirinius over the imperial province of Syria (see Gerlach, Die römischen Stellhalter in Syrien und Judäa, Berlin, 1865). See PROCURATOR.

13. Οἰκονόμος (Gal. iv, 2), a steward, apparently instructed with the management of a minor's property. See STEWARD.

14. Κανελειώς (John ii, 9), "the governor of the feast." It has been conjectured, but without much show of probability, that this officer corresponded to the συμμετοχιος of the Greeks, whose duties are described by Plutarch (Sympos. Quest. 4), and to the arbiter biiwai of the Romans. Lighfoot supposes him to have been a judge who pronounced on the persons offering the sacrifice, upon the wine that was drunk during the seven days of the marriage feast. Again, some have taken him to be equivalent to the τρισκελεως, who is defined by Pollux (Onom. vi, 1) as one who had the charge of all the servants at a feast, the carvers, cup-bearers, cooks, etc. But there is nothing in the narrative of the marriage feast at Cana which would lead to the supposition that the κανελειως held the rank of a servant. He appears rather to have been on intimate terms with the bridegroom, and to have presided at the banquet in his stead. The duties of the master of a feast are given at full length in Ecclus. xxv (xxvii). See ARCHITECTS.

In the apocryphal books, in addition to the common words ἁγγαρευς, ἐνόπτωτος, στραταγες, which are rendered "governor," we find εὐστάτος (1 Esdr. i, 8; Judith ii, 14), which closely corresponds to τρισκελεως; ἐφόρος used of Zenobius and Tatnai (1 Esdr. vi, 3; 8, 29; vii, 1), and στραταρχης, applied to Sheshbazzar (1 Esdr. ii, 12), both of which represent φυλαττων (1 Esdr. vii, 2) and φυλαττων του ενωου (2 Macc. iii, 4), "the governor of the temple"; τρισκελεως (comp. 2 Chron. xxvii, 9); and στραταρχης (1 Esdr. iii, 2, 21), "a satrap," not always used in its strict sense, but as the equivalent of στραταρχης (Judith vi, 2; vii, 8).—Smith, a. v. See PRINCE.

15. In James iii, 4, the Greek term rendered "governor" is κυριωτα, a guide or director, i.e. helmsman (prop. κυριοτητας, whence Lat. gubernator, Eng. governor, the last in a different sense). See STEER.

The following list (modified from the Biblical Reropository, 1832, p. 581, 582) of the presiding officers of Judaea (q. v.) will be found useful in comparing the history of those times. See each name in its place. For those of Syria, see SYRIA.

PROCURATORS OF JUDEA

1. (1) Κομποσθες 9-12
2. (2) Μαρκος Αμβυθιου 9-12
3. (3) Αμμιλας Ριφιου, These three were appointed by Augustus; the two following by Tiberius 15-15
4. (4) Βλετος Αροιου 15-10
5. (5) Πολιτος Ριφιου 16-35
6. (6) Μαριλος, sent by Vitellius, the governor of Syria, 37-40
7. (7) Πουλιπιος Πετρονιους, who was at the same time governor of Syria, 37-40

8. (8) Πενελειος Φλωρος, the last procurator of Judea 40-48
9. (9) Ενερεχ Ζελιους, sent by Caligula 43-48
10. (10) Τιβεριους Αλεξανδρου 44-44
11. (11) Βασίλειου Καμαντας 45-14
12. (12) Α. Καλοσθεις 49-21
13. (13) Πολτος Φειτους, under Nero 55-50
14. (14) Απλιους 60-69
15. (15) Γεσεις Φλωρος, the last procurator of Judaea 70-70

16. (16) Ζησοθεις, however, speaks (War, vi, 4) of a Marcus Antonius as the being (or having been procurator (διαργος) of Judaea in the last struggle with the Romans, A.D. 70.

Govinda, SINGH, the tenth and last guru (teacher) of the Sikhs, was born at Patna, in Behar, in 1631. He was a son of Tegh Bahadur, the ninth guru. He was educated at Madra Des, in the Punjab, where the Sikhs have always been very numerous. His father, whose power was offensive to the Great Mogul Aurungzebe, was put to death by order of the latter in 1675. Govinda himself had to retire to the mountains surrounding Djemnah, where he passed twenty-five years, devoting his time to religious meditation, to the study of the Koran, of the religious books of the Hindus, and the Persian language. He then undertook a religious reformation of the Sikhs (q. v.). It was his object to be a special friend of the Lord, though he at the same time always declared that he was only a mortal man. He sanctioned the abolition of caste; all the Sikhs are to be equal. They must only adore the one God. The worship of saints and of images of the Deity are regarded as acts of superstition. He considered the Evam and the Puranas cannot procure salvation. The faithful, on the contrary, must totally separate from the Musulmans and the Hindus. They are permitted to kill animals and to use their flesh. Govinda declared all the infamors who were not to the Mongols was, on the other hand, declared to be a meritorious act. War was to be the occupation of all his followers, to every one of whom
he gave the title singh (lion or soldier), and threat- ened with excommunication and everlasting damnation all who would abandon the chief in a battle at the moment of danger. For admission into the sect a kind a baptism was prescribed, and it was declared to be a mortifying act to bathe from time to time in the lake or river sacred to the sect. Had he adhered to this, he would have been absolved every where where five of his disciples would be assembled; and he introduced a kind of council, at which the prominent chiefs met to discuss public affairs. Govinda gained many converts for the sect of the Sikhs. His relative, Ram Rae, who disputed with him the title guru, was put to death. He was one of the leaders in the revolt against the Mongols, and in the battle of Panipat, when the Sikh forces were defeated; but finally, as all his allies abandoned him, he had to withdraw into the interior of his states. While he endeavored to defend his strongholds, all his children perished. When the last stronghold, Tschambor, fell, he made good his escape in the disguise of a dervish, and safely reached the desert of Bhitnata. Having been joined by many of his adherents, he was able to repulse his enemies. Finally, he accepted an invitation to the court of the Great Mogul Aurangzebe; but, before he reached the seat of power in Delhi, Aurangzebe was assassinated, and the successor of the latter, Bahadur Shah, received him with marked honor, and is said to have made him governor of a province in the valley of the Godavery. There he died soon after. The Sikhs regard Govinda as superior to the preceding gurus, and none of his successors has been worthy to bear the title. Govinda is the author of a part of the Dastam Padshah ka Graft (Book of the Tenth King), one of the sacred books of the Sikhs, which is written in Hindoo verses, with a conclusion in the Persian language. Of the sixteen parts of this work, the five first and a portion of the sixth are from Govinda. He also made additions to the other sacred book of the Sikhs, the Graft (Book), a collection of sentences of several gurus. Besides these works, he wrote Roti namak (Book of Rules) and Ten- kau namak (Book of Restrictions).—Hoefler, Novum. Biog. Generale, xii. 503; Magie, History of the Sikhs, vol. i. (A. J. S.)

GOZAL. See FLEETING.

GOZAN (Heb. Gozam), 1 Macc. 11:4, according to Genenius, quarry; according to Furst, ford; Sept. Tawaw; r. towzap and xowzep, the tract to which the Israelites were carried away captive by Pup, Tiglath-Pileser, and Salmanasser, or possibly Sargon (2 Kings xvi, 6; 1 Chron. v, 26). It is also mentioned as a region of Assyria, with Asarainen, the Asyrians (2 Kings xii, 12; Isa. xxiii, 12), and again (2 Kings xvii, 6; xviii, 11). Ptolomy, in his description of Media, mentions a town called Gauzania (Geogr. vi. 2, 10), situated between the Zagros mountains and the Caspian Sea. Bochart (Opp. i. 194) and others (so Rosenmüller, Sbm. Geogr. i. i, 109) have attempted to identify this town with Gozan. Rennell further states that the river Gozan (1 Chron. v, 26) is the modern Kishon, which rises near Sinna, in the eastern part of the Zagros chain, and, after a winding course, joins the Senid-rud, which flows into the Caspian (Geography of Herodotus, i. 521, 2d ed.; see also Eltzer, Erdkunde, viii. 16; Ker Porter, Travels, i. 267; Kinnier, Memos on the Persian Empire, p. 121; Morier's Second Journey, i. 267). This theory, however, places Gozan too far east for the requirements of the Scripture narrative. Dr. Grott suggests that the word Gozan signifies "pasture," and that is the same as the modern Goz, but is given by the Nestorians to all the highlands of Assyria which afford pasture to their flocks. He thinks that the ancient province of Gozan embraced the mountainous region east of the Tigris, through which the Kha- bidzir runs (Dr. Grott's Memoirs, in the Geographical Journal, p. 125 sq.). A close examination of the notices in Scripture and other materials in comparison with the Geography of Ptolomy and modern researches, enable us to fix, with a high degree of probability, the true position of Gozan. It appears from 2 Kings xvii, 6 (also xviii, 11), that Go- zan was in Assyria, which is there distinguished from Media; and that Habor was "a river of Gozan." There can be little doubt that the Habor is identical with the Khabidzir of Mesopotamia. See HABOR. Gozan must, therefore, have lain in Mesopotamia, or at least, in the eastern part of it. The text of 2 Kings xix, 12, in 1 Chron. v, 26, Gozan, is, by an erroneous transposition of the last word, called a river, and is distinguished from Habor. The true explanation seems to be, that in this passage Habor is the name of a district, probably that watered by the lower Kha- bidzir; while the upper part of the same river, flowing through the province of Gozan, is called 1 Macc. 11:4, the river of Gozan. Gozan seems to be mentioned on the cuneiform tablets (Lagash, q. v.). Ptolomy states that Gauzania (Tawaw) was one of the provinces of the Mesopotamia adjoining Chalidzita (Geogr. xvi, 18, 4), which may probably be, as suggested by Rawlinson, another form of the same name (Ancient Monarchies, i. 266), being prefixed and rendered into δ. As we find Halah, Habor, and Haran grouped together in Mesopotamia; as we find beside them a province called Gauzania; and as in Scripture Gozan is always mentioned in connection with the above places, we may safely conclude that Gozan and Gauzania are identical. Gauzania lay along the southern declivities of the Moons Massus, and extended over the region watered by the upper Khabidzir and Jerrul rivers to the ranges of Sinjar and Hamma. The greater part of it is an undulating plain, having a poor soil and scanty vegetation (Layard, Nineveh and Babylon, p. 275). On the other hand, Mr. Layard describes the tract immediately along the Khabidzir as one of remarkable fertility (ib. p. 227). See CAPTIVITY.

GRAAL (Grail, from the old French, but originally Celtic word Griel, Provençal grazel, and in medieval Latin gradaet) signified originally a "bowl-shaped vessel." The poetry of the Middle Ages makes numerous mention of the Saint Graal (in old French San Graal, in old Provençal San Graal), a vessel which lay on the altar where the body of Jesus was placed on the cross, and which contained the last supper and in which Joseph of Arimathaea caught the blood that fell from the side of Christ (hence the erroneous meaning attached to the word, as sang real, i.e. royal blood, blood of the Lord). The legend was made the subject of a poem in old French by Guilet de Provins, which has been lost. This tale furnished Wolfram with material for the famous Parzival and Titurel, but he gave the subject a deeply allegorical meaning of his own. The subject was more
GRABA

thoroughly treated by the author of the second Túrcoł in 1720; yet he connects it with the legends of Lohengrin and of Prestor John.

The legend of the Saint Gran is of some importance in the history of the Church. Attempts have been made to derive the story of the word itself, gran, from the Latin granum, or grain, a comparison to the blood shed in crucifixion as the type of the blood of Christ. But it appears certain that it means a vessel, cup, or shell. A costly cup was really found by the first crusaders at Cæsarea. It was allotted to the Geneuese, who brought it to Genoa, where it remained for several centuries in the chapel of John the Baptist in the Porta San Giorgio. From Genoa it was transported to Paris. There appears to be some connection between the legend of Prestor John, as joined with the Ban Gran, and the still existing remains of the Gnostic sect known by the appellation of Disciples of John (Sábians, Zabana, Nazareans, Mardeans, Bajistas). Not only the name John, but the locality also, is evidently used in the legend (viz. the interior of Asia, on the southern frontier of the Turkish empire), as well as the fact that in this Gnostic sect the king is at the same time high-priest, seems to favor the idea of a connection. The use of the name John, according to the tradition, is as follows: It is claimed on every Good Friday there comes into it, from heaven, a holy wafer, which is intended as the food for many; thus the Gran is a sort of continuation of the miracle of feeding the multitude (Matt. xv, 53). It provides food and drink in abundance for the assembled multitude to the tune of hundreds of thousands, which cannot be obtained by violence, but is to be received by faith. At the bottom of the legend we find the doctrine of the real presence in the Lord’s Supper. The wondrousings of the Saint Gran, which came from the East to the West, afterwards to return again to the East, points the Church to the duty of not lessening the Church of the平淡, etc. In all these poetical legends one point is especially deserving of notice: it is the evidence they afford of the tendencies of the Christian mind in all ages to fathom the unfathomable, and to cling to the memory of past events, and to reproduce them. But for this very reason it becomes more necessary for us to distinguish between the original and the image, between the real facts and the errors which have grown up around them. By a just criticism, the poetry of the Middle Ages, which in latter times has been much studied, can be made very instructive on the history of the Church of the平淡, etc.

GRACE (Gr. géra, Gr. χάρις, Heb. חָּרָה and יָרָה, a word of various import in Scripture and in theology.

I. Scriptural Uses.—(1.) Physical beauty (grace of form and person) (Prov. i. 9; ii. 22; xxxii. 80; Ps. xiv, 2, etc.). (2.) Favor, kindness, goodness, leniency, friendship of God towards men, or of men towards one another (Gen. vi. 8; xviii. 8; xix. 19; 2 Sam. x. 2; 2 Tim. i. 9). (3.) God’s forgiving mercy, as granted in apocalyptic language to the Hebrews (Is. v. 3; II. xii. 5; Coles. i. 6, etc.). (4.) The Gospel generally, as contradistinguished from the law (John i. 17; Rom. vi. 14; 1 Pet. v. 12, etc.). (5.) Certain gifts of God, freely bestowed; e. g. miracles, prophecy, tongues, etc. (Rom. xii. 6; 1 Cor. x. 13, Eph. iii. 8, etc.). (6.) Christian virtues, e. g. charity, humility, meekness, etc. (2 Cor. vii. 7; 2 Pet. iii. 8). (7.) The glory to be revealed, or eternal life (1 Pet. i. 8). Wilson (Sermon Lecture on the Communion of Saints, Oxford, 1861, 8vo) remarks as follows on the scriptural use of the word: "Grace occurs in the Septuagint at only five times, of which number it stands sixty-one times for ἡγαγὴ, and its signification in the New Test. cannot be fairly estimated without reference to the ideas expressed by that Hebrew word. This is drawn alto-
GRACE, MEANS OF. See MEANS OF GRACE; SACRAMENTS.

GRACE AT MEALS, a short prayer at table, implying the direction, expressing and approving thanks to God for the food he has provided. The form of such an act is evident both from the scriptural injunction (1 Cor. xiii, 31) and from the example of our Lord (Mark viii, 6, 7).

GRADUAMONTS. See GRANDMAINTANS.

GRADUAL, an anthem, psalm, or part of a psalm chanted in the mass between the epistle and the gospel. So called because the chantor stood on the pulpit steps. The name is also given to the book containing the psalms chanted at mass, which was called graduale, or graduae.—Palmer, Orig. Liturg. ii, 46; Procter, On Common Prayer, p. 8, 317.

GRADUATE, one who has obtained a degree in a university: the name is usually given to those who have obtained merely the lowest degree, that of A.B. See DEGREES.

GRECIA. See GREECE.

GRIEFE, JOHANN FRIEDRICH CHRISTOPH, a German philosophical and theological writer, was born at Göttinngen Feb. 15, 1754. He studied in the university of that city, became pastor of Oberreisa in 1784, and in 1792 became pastor of a parish and professor of catechetics at the college of St. Gotthard, which he left in 1816. He wrote several works on philosophy and theology, all more or less on the system of Kant. Among them are: Vollständige Lehrbuch d. allgemeinen Katechekis nach Kantischen Grundsätzen (Göttingen, 1795-95, 2 vols.; 8vo).—Grundzüge d. allgemein. Katechek, nach Kantischen Grundsätzen (Göttingen, 1799).—De Miraculaurum Natuna, philosophia principii non contraefficient (Helmstadt, 1797).—Commentar über eine der schwersten Stellen in Kant's metaphysischen Anfangsgründen d. Naturwissenschaft (Celle, 1798).—Die Piaritischeologie nach ihrem gräz. Umfange (Celle, 1803, 2 vols.).—See Beyer, Allg. Mag. für Predig., vol. xii; Doering, Ges. Theol., i, 525; Hoerner, Nowa. Bibl. Geneal., xxx, 584.

GRAFT (ιγκουρινια), to prick in or spur on, Wisd. xvi, 11; hence to insert by an incision, Rom. xiii, 23, A.V. "graft in", the process of inculcating fruit-trees, often resorted to in order to preserve the quality of the fruit; by budding shoots or buds from approved trees and inserting them on others, where, with proper precautions, they continue to grow (Rom. xvi, 17-24). By this process particular sorts of fruit may be kept from degenerating, which are very apt to do when raised from the seed; for the graft, though they receive their nourishment from the stocks, always produce fruit of the same sort as the tree from which they were taken. This process is peculiarly appropriate to the olive-tree (Stuart, Comment. ad loc.). An insect of the gnat species is said to breed in the male fig-tree, and, being covered with pollen, pollinizes the male flowers, impregnates with it the stigma of the female tree. The flowers of the palm-tree yield fruit only on the female tree, when its stigmata have been fecundated by pollen from the male; and as it is precarious to leave this process to be effected by insects or the wind, it is commonly done by manual labor. See Fig. The Hebrews appear to have pinched off the blossoms of the fruit-trees during the three first years of their growth, in order to improve their fruitfulness (Numb. xxvii, 12, 18). See TREM.

GRAFTON, JOSEPH, a highly respected and useful Baptist minister, was born at Newport, R. I., in 1757. His father, a sea captain, had established and set up the business of sail-making in Providence. Joseph, at the age of fourteen, began working at his father's trade. He was hopelessly converted in 1776, and joined the Congregational Church, which included Baptists dissatisfied with strict communion. He began
GRAHAM

peaching in 1776. While preaching to a congregation of "Separates" in Plainfield, Conn., he reconsidered his views on communion, and joined in 1781 the Baptist Church. He was ordained a pastor of the First Baptist Church in Newton, Mass., in 1786, where for nearly fifty years he continued his studies and labors in the cause and in behalf of missionary and benevolent undertakings. He was actively engaged in founding the theological seminary at Newton, and was for many years one of its trustees. He died in 1836. He published four sermons and some occasional addresses. (L. E. S.)

Grain, a woman noted for her piety and intelligence, one of the "saints" of modern times. She was born in Lanarkshire, Scotland, and was piously educated by her parents, Mr. and Mrs. John Marshall. At seventeen she was admitted by Dr. Witherspoon (afterwards president of Princeton College) to Lord's Supper. In 1765 she was married to Dr. Graham, and accompanied him to Canada, where his regiment was stationed. Her husband died at Antigua in 1774. She returned to Scotland, and supported her father and her four children by opening a school for young ladies. In 1789 she returned to New York, and opened a seminary. In 1799 a society was instituted at New York for the relief of poor widows with small children. The original plan of the society was formed at the house of Mrs. Graham, and a school for the instruction of orphans was opened, and taught by Mrs. Graham's former pupils. Besides establishing this school, Mrs. Graham selected some of the widows best qualified for the task, and engaged them for a small compensation to open day schools for the instruction of the children in distant parts of the city. She also established two Sunday-schools. In 1806 a society of ladies was organized to procure or build an asylum for orphan children. Mrs. Graham remained in the office of directress of the Widows' Society, but felt also much interest in the success of the Orphan Asylum Society, and herself, or one of her family, taught the orphans daily until the friends of the institution were sufficient to provide a teacher and superintendent. In 1811 some gentlemen of New York established a Magdalen Society, and Mrs. Graham became its president until her death. In 1814 she united with some ladies in forming a society for the promotion of industry among the poor. For some weeks (previous to her last illness she was favored with unusual health, and much enjoyment of religion. She died on the 24th of July, 1814. Few books have been more widely circulated than her Life and Letters (5 vols. ed. London, 1839, 8vo). In America, Dr. Mason's sketch of her has been widely scattered by the Tract Society. See Mason, Life of Isabella Graham (N. York, 12mo); Bethune (Mrs.), Letters and Correspondence of Mrs. Graham (1888, 8vo); Jones, Christian Biography, p. 189.

Graham, Mary Jane, was born in London in 1803, and was so carefully educated, and so industrious in study, that she acquired a knowledge of nearly all the modern languages, as also of Latin, Greek, and mathematics. In her eighteenth year she fell into infidel doubts, but soon emerged from them into Christian light and hope. To save others from a like experience, she wrote the Test of Truth (London, 12mo, 7th ed. 1859), giving an account of her mental exercises, her infidelity, and her conversion. She also wrote a treatise on The Freedom and Sovereignty of God's Grace, published after her death (12mo). Her last years were full of suffering, but she died in great peace and joy at Stoke Fleming, Devonshire, Dec. 1st, 1836. See Bridges, Life of Mary Jane Graham (London, 1889, 12mo 1835, 1840, and 1858, 12mo).

Grain (occurs only as a rendering of γυμνός, trocer, a small stone or kernel, Amos ix, 2; ἀκορός, a berry or individual seed, e. g. of mustard, Matt. xiii, 31, etc.; or wheast, John xii, 24; 1 Cor. xv, 57) is not used in the A. V. in our American collective sense of corn (q. v.) in general, which is the designation of οἰκήμα, ἀγρός, or αὐτός. The Hebrews planted only wheats, barley, and spelt (comp. Isa. xxviii, 25; Ezek. iv, 9); rye and oats are not mentioned in the Bible (in the Talmud five species of grain are named, Mishna, Neduut, vii, 2; and some find even rye and oats in the הַכַּבֵּד בֵּית הַמִּשְׁכָּב). On the other hand, some (e. g. Michaelis) think that rice is referred to by רֵחֶן (Isa. xxi, 19), in opposition to Rosenmüller and Ge- senius. As diseases of seed-grain, γυμνός, paleness ("mildew"), and γύμνωμος, night ("blasting"), are mentioned. See Cereals.

Grail or Grail. See Graal.

Gramma, Graphē (γραμμα, γραφή), terms ordinarily used in the ancient Church to signify the Holy Scriptures. They were also occasionally employed as names of the Apostles' Creed, perhaps because it was gathered entirely from Scripture; or else because it was used in reference to the learning of the Creed by the catechumens. As the word "graphē" was the word used to designate the Creed, because the catechumens were bound to commit it to memory.—Valerius, Not. in Socrat. i, 8; Bingham, Orig. Eccl. bk. x, ch. iii, § 4.

Granary. Originally corn was kept in subterranean storehouses, and even in caves; but in progress of time granaries were erected, both in Egypt and Persia. In the former country granaries were often of an extensive character. They were laid out in a very regular manner, and varied of course in plan as much as the houses, to which there is every reason to believe they were frequently attached, even in the towns; and they were sometimes only separated from the house by an avenue of trees (Wilkinson, Anc. Egypt. abridgment, i, 13). They had vaulted roofs, and complete arrangements for depositing and removing the grain. Dr. Robinson, when visiting Huj, a village not far from Gaza, says, "Here were several subterranean magazines for grain, like cisterns, with a month like a well, such as we have seen in several villages" (Jub. Res. ii, 885). The peasantry in the East generally prefer these subterranean storehouses, not so much for the preservation of the corn as for the greater security against the incursions of marauding parties, while erected barns are generally confined to more populous districts (Deut. xxvi, 8; Prov. iii, 10; Gen. xli, 55; Exod. i, 11; 1 Chron. xxvii, 25; Luke xii, 18). See Garrek.
Grundler, Urbain, a French priest of the 17th century of unhappy memory. He was educated among the Jesuits, became a Jesuit, and later attached himself to St. Peter's, archbishop of Bordeaux. His preaching became very popular, and not the less so because of his attacks upon the vices of the clergy. Bitter enmities were excited, and he was charged with favoring the French revolutionists, and generally against the celibacy of the clergy was found among his papers. He was condemned by the bishop of Piotiers in 1850 to do penance, and interdicted from service as a priest for five years. From this penalty he was freed, on appeal, by the archbishop of Bordeaux. This triumph increased, and he returned. He died in 1854, and soon got into new trouble. In 1863 the nuns of the Ursuline convent of Loudun became, as they said, possessed with devils: hysterical convulsions and all sorts of extravagances abounded among them. Grundler was charged with "bewitching" them, and sending "legions of devils into their bodies." A libel on cardinal Richelieu, published in 1632, was charged upon Grundler, with no ground whatever. He was arrested and conducted to Angers Dec. 7, 1633. The charges against him were sacrilege, adultery with the wife of his dean, and witchcraft, and he was put into the Ursuline nuns. The records of the trial are very curious. One of the necessary signs of "possession," according to the Romish law, is the knowledge of languages not acquired in the ordinary way. The exorcist who was appointed to test the nuns asked one of the nuns for "haberdashery." She was found, with convulsive contortions, "Jesus Christmas." One of the judges could not help remarking, "This devil, at least, does not know syntax." The trial lasted a long time, and ended in the condemnation of Grundler, who was burnt alive Aug. 18, 1634. But the devils still kept possession of the nun; it was not till November 5, 1635, that "Leviathan" was dislodged from the head of the superior of the convent; and "Bebomoth," the strongest of all the demons, stubbornly kept his place till August 15, 1637. The affair, of course, caused immense scandal, and a small library of pamphlets and books was written upon the subject. Alfred de Vigny recounts the story of Grundler at length in his Cinq-Mars. A similar trial took place in 1647 with regard to certain cases of possession (or of crime) in the convent of Louviers. See Mierlet, Louise Quareron, p. 935. Grundler, Malakoff, Maitre Malakoff, des Diables de Louvain (Amst. 1668, 12mo); Bayle, Dictionnaire; Hoevel, Nouv. Biog. Générale, xxi, 644 sq.

Grandmont or Grammont, Order of. This religious order was founded by Stephen of Thiers, who in 1076 withdrew to the mountains of Muret, near Toulouse, France, to lead an ascetic life. He wore a pensive's shirt made of meshes of steel, and slept in a bed made of boards in the shape of a coffin. His extravagant asceticism found many imitators, who joined him in his retreat. Unwilling to take the title of prior or abbot, he called himself their corrector. To avert the evils which had ruined so many other monastic orders, he required his followers to make vows of poverty as well as of obedience and humility; and would not even permit them to possess a church or a piece of land. Gregory VII's reformers were in favor of this order, and he expressed condition of its submitting to the rule of Benedict. It is evident, however, that the founder had more in view than a mere return to the original strictness of the rules. St. Stephen said to his disciples, "You are to ask for what order you belong, among these Cenobiasts, and the Tertiaries," which is the model of all the other orders." Two cardinals who were going to France as nuncios went to visit Stephen in his retreat, and while there happened to ask him whether he considered himself a canon, a monk, or a hermit. "I am none of these," answered Stephen. Being pressed to define more clearly his position and that of his followers, he said, "We are poor sinners whom God has mercifully called to the wilderness to live upon the charity of the people. I, therefore, request, he has himself appointed the duties we fulfill here. We are too imperfect and too weak to emulate the example of the saint benedicts who were so absorbed in their divine contemplations as to make them forget the existence of the natural part of their duties; besides, that we do not wear the habit either of canons or of monks; and we do not desire to be called either, as we are far from having the merits of the one or the sanctity of the other." After the death of their founder (1124) the order withdrew to the wilderness of Grandmont, near Murret, where they dwelt in caves. But they had given them no written code of rules; they were transmitted verbally from one to another, until Stephen of Lissac, fourth prior of Grandmont, caused to be collected and written all that could be ascertained of the words and acts of their founder. He even represents himself in several instances as the author of the rules. The order of the Grandmonts spread only in France. In 1170 there were sixty convents following their rule, and so great was the respect they had gained that they were generally known under the name of "Rule of St. Stephen." Rules which were subsequently introduced in the observance of their rules are to be attributed to the popes. The later history of the order is chiefly a record of quarrels and contentions. It was extinguished in the time of the French Revolution. —Joseph Fehr, Allgemeine Ge- schichte der Kirche, vol. iv, p. 215, etc. Butler, Lives of the Saints, Feb. 8. (A. J. S.)

Grange, a farming establishment, especially such as belonged to ancient monasteries. Most monasteries had farm-houses on their estates, to which were attached chapels, as well as barns and other offices. Many of these buildings, as well as the chapels, were built in fine architectural taste.

Grant, Asaiah, M.D., an American missionary, was born in Marshall, N. Y., August 17, 1807. He early commenced the study of medicine, and at the age of twenty he married and settled in Braintrim, on the Susquehanna; but, losing his wife four years after, he removed to Utica, where he acquired a large and lucrative practice as a physician. The meeting of the American board at this place in 1846 wrought an entire change in his destiny; he was directed to foreign missions, and, after carefully considering the subject, he made an offer of his services to Dr. Anderson. Having expressed a preference for the mission contemplated among the Nestorians, he was directed to join Dr. Perkins, who was already on his way to Persia. Abandoned in his second voyage, he sailed from Boston May 11, 1855, and on the 27th of October they arrived at Oromiah, their future home. "The district of Oromiah is in the western part of Azerbijan, the ancient Atropatane, and forms the frontier line of Persia in the direction of the Turkish empire. The scenery is unfitted even beneath a Persian sky." To the missionary the scene was endeared by the most sacred associations. "In the city of Orom-iah, and amid the three hundred villages of the plain, there still lingered the scattered remnant of a once illustrious and luminous people, a people whose history is bound up with the history of Rome herself the spiritual dominion of half the world." See NESTORIANS. When they were first visited by American missionaries, the vast jurisdiction which had once comprehended twenty-five metropolitan provinces had shrunk to a petty sect, hardly able to maintain itself against the Moslems, which is the history of the model of all the other orders." Two cardinals who were going to France as nuncios went to visit Stephen in his retreat, and while there happened to ask him whether he considered himself a canon, a monk, or a hermit. "I am none of these," answered Stephen. Being pressed to define more clearly his position and
Mr. Merrick had joined him at Constantinople. Together they commenced the work of establishing the mission. Dr. Grant’s character as a physician secured the confidence of the Government, and the Nestorian bishops and priests gave him a hearty welcome. A school was at once commenced, and the work soon extended in every direction. (For details, see Nestorianism.) In 1859 Dr. Grant visited the almost inaccessible region in which the Nestorian patriarch, Mar Shimion, resided. On the sides of the rugged hills of Kordostan, and within their deep ravines, dwelt the “Wildness of the East—the Protectors of Asia.” Among those hills were thousands who had preserved, with few corruptions, an apostolic faith. The difficulties in the way of the missionary labors with them were numerous and formidable; but Mr. Grant was not to be deterred, and finally received an invitation from the patriarch, with the promise of a guard through the Koord villages. His fame as a physician had been carried to the mountain districts, and, indeed, his professional character not only gave him many opportunities of doing good, but often saved his life. Dr. Grant remained among them five weeks, gaining all the information he could, and, soon after, his wife’s death and the failure of his own health compelled his return to the States. In consequence, the board decided at once to establish a mission among the mountains. Being appointed to that work, he returned to his labors in April, 1841. In company with the patriarch, Mar Shimion, he now made an extensive tour through the different villages and districts (1842). A school was opened at Askitas in April, 1843, and Mr. and Mrs. Laurie took charge of the station. Soon after, Dr. Grant ascertained that the barbarous Mohammed, pacha of Mosul, was forming an alliance with the Koords against the Nestorians, who had always before made peace and submission. Dr. Grant was convinced that this independence was gone at an end, and tried to persuade them to make terms with the Turks. This the infatuated Nestorians refused to do; but Dr. Grant did not relinquish his hopes of sustaining the mission; and, though abandoned by all his native assistants, when hostilities commenced he hastened with Mr. Stocking to the Persian emir, and gained the promise of his protection. They then proceeded to the patriarch, but all their efforts were unavailing to induce him to unite with the Persians against the Turks and Koords. The infatuated patriarch had entered into correspondence with the Persian governor, and the Nestorian Armenian, Media, and Moscopatia (London, 1841; Bost. 1843, 2d ed.).—See Lotthorp, Memoir of Aba Chel Grant, M.D. (N.Y. 1847, 18mo); Laurie and Grant the Mountain Nestorians (Bost., 1858; 3d ed. 1856, 12mo); D’Iriens, Rev. Engledore, August, 1858, art. vii; Newcomb, Cyclop. of Missions, p. 561 sq.

Grant, Johnson, an English divine, and an author of some merit, was born in Edinburgh in 1778, and was educated at St. John’s College, Oxford, where he passed A.M. in 1806. He became rector of Binbrok in 1818; minister of Kentish Town Chapel in 1822; and died in 1845. He was a faithful and, at the same time, a popular preacher. Among his writings are a History of the Church of England, and of the Sects which have departed from it (London, 5th ed., 1824; 2 vols.); Lectures and Sermons in six vols. (London, 1821–45); Sketches in Divinity (London, 1840, 8vo).—Darling, Cyclop. Bibl. Bibliographica, i, 1802.

Grantham, Thomas, an English Baptist minister of distinction, was born in 1838. He was selected to deliver to Charles II the confession of faith drawn up by the General Assembly of the English church, in a later period of life to present a remonstrance against persecution, both of which were kindly received by the king, and redress of grievances promised. He was often engaged in public disputations, in which he displayed great logical skill. He also had a long controversy with the Rev. John Concourt, vicar of Norwich, who yet remained his friend through life. Among his writings is Christianus Primitivus, or the Christian Religion in its nature, certainty, excellency, etc., vindicated (London, 1678, fol.).—Benedict, History of the Baptists, vol. i; Darling, Cyclop. Bibliographica, i, 1806.

Granville, Antoine Perrenot, cardinal, one of the most eminent politicians and diplomatists of the 15th century, was born in 1413, died on 29th May, 1517. He studied law at Padua, and afterwards theology at Louvain. He became canon of Liege, then bishop of Arras, and was often employed by the emperor Charles V in diplomatic missions. He went with his master to the diets of Worms and Augsburg, and was at the latter in the capacity of ambassador. He defended the rights of the emperor, and vainly endeavored to array the Council against France. After the battle of Mühlberg he managed the capitalization of the electors John Frederick of Saxony and Philip of Hesse, and was at the peace of Passau in 1552, and in 1558 negotiated underhand for the marriage of queen Mary of England and Philip II of Spain. When Charles V resigned the crown, Granville entered the service of his son, Philip II; in 1559 he signed the treaty of Château-Cambresis with France, and afterwards remained in the Netherlands which he protected from M. prefects. The young Turk deceived him with promises, and the unsuspecting Nestorians allowed the enemy to close against them without resistance. At last the storm burst, and there ensued such a massacre as has few parallels in history. Faint attempts were made to fill the void thus created, and choked the mountain streams. All the efforts of Dr. Grant to avert the catastrophe were useless, though for some time the protection of the emir was observed, and the missionary buildings were left undisturbed. Soon, however, they too were destroyed, and the missionaries fled for their lives. After Dr. Grant reached Mosul, “all his energies were devoted to the work of relieving the wretched fugitives who crowded the city.” In the spring he looked forward to a return home, but early in April his health began to fail, and on the 28th he died at Mosul. Dr. Grant published The Nestorians, or the Lost Tribes, with Sketches of France in 1855, 8vo. Fenton’s Service he was created archbishop of Mechelin by the king, and cardinal by the pope. Being succeeded almost by his enemies of too great leniency towards the Protestants, he left the Netherlands in 1564. He was finally appointed archbishop of Besançon in 1564, and died at Madrid Sept. 21, 1566. His letters and memoirs were collected by abbot Boisot; they form 80 vols. under the title of Trésor de Granvelle, in the Archives of Besançon. The most interesting of these are published in the Documents inédits pour l’histoire de la France. See Gerlach, Philip I1 d’Granvelle (Brussels, 1842); Mollet, History of the Dutch Republic; and Fenton, Rev. Dr. (Bibl. Bibliographica).—D’Iriens, Rev. Engledore, August, 1858, art. vii; Newcomb, Cyclop. of Missions, p. 561 sq.

Grape is the representative in the A. V. of the following Heb. and Greek words: properly 2357, ephos, grapes in the berry (Gen. xii. 10, 11; xli. 11; Lev. xxv, 5; Num. vi, 8; xili, 29, 38; Deut. xxiii. 24; xxxii, 14, 32; Neh. xii, 15; Isa. v, 2, 4; Jer. viii. 13; Hos. ix. 10; Amos ix. 13; “wine,” Hos. iii. 1); not in the bunch, στόμιλος(”grapes,” Matt. vii, 16; Luke vi. 44; Rev. xiv. 10); improperly for 2357, pe'evi (lit. scattering), grapes that drop off spontaneously (Lev. xii. 10);
GRASS

GRASS is the somewhat indistinct rendering in the English Versions of several Heb. terms:

1. It is the ordinary rendering of the Hebrew word בָּרִיאָה, chaitar, which signifies properly an inclosed spot, from the root בָּרִיא, to incline; but this root also has the second meaning to flourish, and hence the noun frequently signifies "fodder," "food of cattle." It designates ripe grass fit for mowing and for feed, and in this sense it occurs in 1 Kings xvii. 5; Job xx. 5; Ps. civ. 14; Isa. xxv. 6, etc. As the herbage rapidly fades under the parching heat of the sun of Palestine, it has afforded to the sacred writers an image of the fleeting nature of human fortunes (Job vii. 12; Isa. xxvii. 2), and also of the brevity of human life (Isa. ix. 5; Ps. xxv. 5). The Sept. renders it by בָּרִיאָה and נוֹם, but most frequently by יִכְוף, a word which in Greek has passed through the very same modifications of meaning as its Hebrew representative: יִכְוף = γραμμή, "fodder," is properly a court or inclosed space for cattle to feed in (Homer, II. xi. 774), and then any feeding-place, whether inclosed or not (Job xxv. 6; Ps. lxxiv. 134). Gesenius questions whether מַעְלָה, יִכְוף, and the Sansc. kaśūra = green, may not be traceable to the same root. See LEXX.

In the N. T., wherever the word grass occurs, it is the representative of the Greek ἑγερτής. The dry stalks of grass, etc. were often used as fuel for the oven (Matt. vi. 30; xiii. 30; Luke xiv. 30). See FRIER,

2. The next most usual, and, indeed, more appropriate word, is מַעְלָה, de'ak, green grass, from the root מָעֶל, to germinate. This is the word rendered grass in Gen. i. 11, 12, where it is distinguished from שָׁכַה, e'eb, the latter signifying the herb suitable for fowl and cattle. Gesenius says it is used chiefly concerning grass, which has no seed (at least not to general observation). The sickly and few-leaved weeds which spring up spontaneously from the soil. It properly signifies the first shoots from the earth, tender grass, young herbage, as clothing the meadows, and as affording the choice food of beasts (Gen. i. 11 Isa. lxvi. 14; Deut. xxxii. 2; 2 Sam. xxiii. 4; Job vi. 5; Ps. lxix. 19; Prov. xl. 13). The sickly and few-leaved weeds which spring up on the flat plastered roofs of houses in the East are used as an emblem of speedy destruction, because they are small and weak, and, being in an elevated part, with little earth, exposed to the scorching rays of the sun, they soon wither away (2 Kings xix. 28; Ps. cxxxix. 6; Isa. xxxvii. 27). (See Hackett's Illustra, of Scrip. p. 125.) The Sept. renders it by γάλακτος, as well as by יִכְוף, בָּרִיא, and מַעְלָה. In Dan. iv. 15, 16, the corresponding Chaldee מַעָלָה, de'ak, is used. See HEBR.

In Jer. i. 11, the A. V. renders מַעְלָה קְדִישָה as the heifer at grass, and the Sept. ἀγέλθισα καὶ φέραινα. It should be "the heifer treading out corn," (comp. Hose. x. 11). מַעְלָה, דֹּאָה, the word here employed, comes from מַעְלָה, to trample out, and has been confounded with the preceding term. See FODOR.

3. שָׁכַה, e'eb, is used in Deut., in the Psalms, and in the Prophets, and as distinguished from the foregoing מַעְלָה, signifies ἀγρός for human food (Gen. i. 30; Ps. civ. 14), but also fodder for cattle (Deut. xi. 15; Jer. xiv. 6). It is the grass of the field (Gen. ii. 5; Exod. x. 29) and of the mountain (Isa. xlii. 15; Prov. xxviii. 25). See HAY.

He was consequently arrested (1521), imprisoned at Brussels, compelled to recant, and deposed from his office. The later years of his life he spent in literary retirement at Antwerp, sympathizing with reformation movements, without, however, daring to be their avowed leader. He died at Antwerp Dec. 15, 1558. Herzog, Real-Encycl. xiii. 577.

Grass is the somewhat indistinct rendering in the English Versions of several Hebrew terms:

1. It is the ordinary rendering of the Hebrew word הבַּרִיאָה, chaitar, which signifies properly an inclosed spot, from the root הבָּרִיא, to incline; but this root also has the second meaning to flourish, and hence the noun frequently signifies "fodder," "food of cattle." It designates ripe grass fit for mowing and for feed, and in this sense it occurs in 1 Kings xvii. 5; Job xx. 5; Ps. civ. 14; Isa. xxv. 6, etc. As the herbage rapidly fades under the parching heat of the sun of Palestine, it has afforded to the sacred writers an image of the fleeting nature of human fortunes (Job vii. 12; Isa. xxvii. 2), and also of the brevity of human life (Isa. ix. 5; Ps. xxv. 5). The Sept. renders it by בָּרִיא and נוֹם, but most frequently by יִכְוף, a word which in Greek has passed through the very same modifications of meaning as its Hebrew representative: יִכְוף = γραμμή, "fodder," is properly a court or inclosed space for cattle to feed in (Homer, II. xi. 774), and then any feeding-place, whether inclosed or not (Job xxv. 6; Ps. lxxiv. 134). Gesenius questions whether מַעְלָה, יִכְוף, and the Sansc. kaśūra = green, may not be traceable to the same root. See LEXX.

In the N. T., wherever the word grass occurs, it is the representative of the Greek ἑγερτής. The dry stalks of grass, etc. were often used as fuel for the oven (Matt. vi. 30; xiii. 30; Luke xiv. 30). See FRIER,

2. The next most usual, and, indeed, more appropriate word, is מַעְלָה, de'ak, green grass, from the root מָעֶל, to germinate. This is the word rendered grass in Gen. i. 11, 12, where it is distinguished from שָׁכַה, e'eb, the latter signifying the herb suitable for fowl and cattle. It properly signifies the first shoots from the earth, tender grass, young herbage, as clothing the meadows, and as affording the choice food of beasts (Gen. i. 11 Isa. lxvi. 14; Deut. xxxii. 2; 2 Sam. xxiii. 4; Job vi. 5; Ps. lxix. 19; Prov. xl. 13). The sickly and few-leaved weeds which spring up on the flat plastered roofs of houses in the East are used as an emblem of speedy destruction, because they are small and weak, and, being in an elevated part, with little earth, exposed to the scorching rays of the sun, they soon wither away (2 Kings xix. 28; Ps. cxxxix. 6; Isa. xxxvii. 27). (See Hackett's Illustra, of Scrip. p. 125.) The Sept. renders it by γάλακτος, as well as by יִכְוף, בָּרִיא, and מַעְלָה. In Dan. iv. 15, 16, the corresponding Chaldee מַעָלָה, de'ak, is used. See HEBR.

In Jer. i. 11, the A. V. renders מַעְלָה קְדִישָה as the heifer at grass, and the Sept. ἀγέλθισα καὶ φέραινα. It should be "the heifer treading out corn," (comp. Hose. x. 11). מַעְלָה, דֹּאָה, the word here employed, comes from מַעְלָה, to trample out, and has been confounded with the preceding term. See FODOR.

3. שָׁכַה, e'eb, is used in Deut., in the Psalms, and in the Prophets, and as distinguished from the foregoing מַעְלָה, signifies ἀγρός for human food (Gen. i. 30; Ps. civ. 14), but also fodder for cattle (Deut. xi. 15; Jer. xiv. 6). It is the grass of the field (Gen. ii. 5; Exod. x. 29) and of the mountain (Isa. xlii. 15; Prov. xxviii. 25). See HAY.

Palestine Grasses (of natural size)
GRASS 968

GRATIAN

4. In Numb. xxii, 4, where mention is made of the ox licking up the grass of the field, the Heb. word is פָּרָת, פָּרָת, which elsewhere is rendered green when followed by נְצָר or נְצָר, as in Gen. i, 30, and Psa. xxxvii, 2. It answers to the German das Grünne, and comes from the root פָּרָת, פָּרָת, of a flower like grass.—Smith, v. 1. See Grass.

אר (from חָזָק, to be late ripe, in the "after-math" or "rowen" that springs up on meadows after being once mown ("latter growth", Amos vii, 1). See MEADOW.

"Mown grass" is יָאָש, a mowing or mown meadow (Psa. lxxxi, 6; Amos vii, 1). See MOWER.

Dry grass or self-made hay is called עַזְרָשׁ, עַזְרָשׁ, "staff" (Isa. v, 24; xxxvii, 11). See STUBBLE.

As in Matt. vi, 30, where a lily is called "the grass of the field," it is evident that, like the Latin graminem and the English "grass," the Hebrew equivalent had a very extensive range, and was not restricted to the "grassess" (Gramineae) of the botanist. These are themselves a very ample order, ranging from diminutive plants like our own mouse-ear barley to the bamboo which seems to rise to a height of fifty or sixty feet in an Indian jungle, and including productions as various as the Aamuda domae of Southern Europe, which furnishes the fisherman with his rod and the weaver with his "reed," the cereals which supply to all mankind the staff of life, and the sugar-cane which, on the table of the humblest artisan in Europe or America, places luxuries unknown to a Roman emperor. See REED.

But when we speak of grass we are usually thinking of the narrow blades, so thickset and tender, which form the sward on a meadow, or the matchless turf on an English lawn. Or, if we are thinking of a separate plant, it is a hollow glossy stem rising up from the midst of these spiral blades, and throwing out similar leaves from its joints, till it ends in blossoming spikelets, loose or more compact, which, when the flowering time is over, show the taper corn-like seeds inclosed in the chaffy glum "as food for the cattle, even as we reserve the fruit of the cereal grasses as food for ourselves. The fescues, darnels, and poa, which clothe the meadows and build up the hay-ricks at home, are pignums, however, when compared with the grass which grows for the cattle" (other blades with the "tussac" for domestic use, whose enormous tufts form an inextricable supply to the herds both amphibious and terrestrial of the Falkland Isles, and the beautiful pampas-grass, under which the huntsman can ride and see high overhead its "plumes of long sylphic feathers."

The imperfect enumeration which we possess of grasses native to Palestine is of less importance, as the scriptural allusions may very well be understood without being able to identify the species. The psalmist wishes (Psa. cxviii, 6) that the haters of Zion may be "as the grass upon the house-tops, which withereth afore it groweth up," or, as it should be rendered, "before it is plucked up" (see Hengstenberg, Walford, etc.); and Isaiah (xxxvii, 27) speaks of vanished populations "as the grass of the field, as the grass on the house-tops, blasted before it be grown up." On the flat roofs at the present day any one may see grass which has sprung up in the rainy season, withered away by the first weeks of sunshine. "When I first came to reside in Jerusalem," says Dr. Thomson, "my house was connected with an ancient church, the roof of which was covered with a thick coat of grass. This being an awkward way of a man employed to repair my house, he actually set fire to it and burned it off; I have seen others do the same thing without the slightest hesitation. Nor is there any danger; for it would require a large expense for fuel sufficient to burn the present city of Jerusalem" (Land and Book, ii, 574). Indeed nearer home we may often see grass and even oats springing up on the roof of a thatched cottage, and a goat peregrinating nibbling the herbage before it is withered. The dew "distilling" on the grasses in the morning descending on the mown grass, or rather on the grass which has been close-browsed by the cattle, furnishes the sacred poetry with a frequent and exquisite image (Deut. xxxiii, 2; Psa. lxxvi, 6; Prov. xix, 12; Micah v, 7); and still more frequently does that emblem occur in which our fleeting generations are compared to the grass "which in the morning growth up and which in the evening cut down and withereth" (Psa. xc, 6; xxxvii, 2; xcii, 7; cii, 11; ciii, 15; Isa. xi, 6; James i, 10; 1 Pet. i, 24).

Grasshopper is the rendering in certain passages of the Auth. Vers. of three Heb. words: פָּרָת, פָּרָת, "arkh" (Judg. vi, 5; vii, 12; Job xxxix, 20; Jer. xvi, 26), a locust (as elsewhere rendered), sometimes a particular species, the migratory kind (Lev. xi, 22; Joel i, 4); בַּלְגֹּל, balgal (Lev. xi, 22; Num. xxx, 88; Eccles. xi, 5; Isa. xi, 22), a locust (2 Chron. vii, 19), winged and edible (Lev. xi, 22), and therefore evidently not a proper grasshopper. See Locust. In Numb. xxiii, 38; Isa. xi, 22, this insect is used to express comparative insignificance. In Exe. xi, 5 reference is probably made to that degree of weakness and infirmity in old age which makes the weight, or even the chirping of this insect, to be burdensome. For the curious illustration of this passage from the fable of Tithonius, see Kittle's Daily Bible Illustr. ad loc. See OLD AGE.

The true grasshopper (Gryllus grassus) belongs to a tribe of neopterous insects styled Gryllides, and it appears from modern travellers that it is not unknown in Palestine. Its habits greatly resemble those of its congener, the Oriental locust; it has mandibles or jaws peculiarly fitted for devouring green vegetables, and in many parts even of America its ravages often become quite formidable. See INSECT.

Grate (גָּרֶט, tibrith, something twined, from גָּרָה, to braid; Sept. lekinia), a network of brass for the bottom of the great altar of sacrifice (Exod. xxvii, 4; xxxv, 10; xxxix, 4, 5, 50; xxxix, 38), placed horizontally in the fire-bed so as to allow the cinders, ashes, etc. to pass through, and a draught of air to supply the fire upon it. See ALTAR.

Gratian. See GRACE.

Gratian or Gratianus, an Italian Benedictine and distinguished canonist, was born toward the end of the 11th century. He appears to have first entered the convent of Classe, near Ravenna, from whence he removed to that of St. Felix de Bologna, where he wrote his Decretum. According to his contemporaries, he was a nephew of Mont St. Michel. He became subsequently bishop of Avignon, which fact is also asserted by an Italian biographer in the 14th century. The latter adds that Gratian, having sent his Decretum to the pope by a priest, the latter claimed to be the author of it, but the fraud having been detected, the pope indemnified

Gratianus, emperor of Rome, son of Valentinian I, was born in 329, and on the death of his father, A.D. 375, succeeded to a share of the Western Empire. On the death of his uncle Valens, A.D. 378, he obtained control of the whole empire; but he appointed Theodosius his colleague, giving him the Eastern provinces. He was killed A.D. 398, in a revolt in Gaul. Gratian was tolerant towards the various sects which divided Christianity, but he displayed a stern determination against the remains of the heathen wor- ship. At Rome he oversaw the altar of Victory, which continued to exist; he confiscated the property attached to it, as well as the property belonging to the other priests and the Vestals. He also refused to as- sume the title and the insignia of Pontifex Maximus, and on his death the dignity was transferred as an appendage of the emperor. These measures gave a final blow to the old worship of the empire; and although the senators, who for the most part were still attached to it, sent him a deputation, at the head of which was Symmachus, they could not obtain any mitigation of his decrees.—Engl. Cyclopaedia; Moseheim, Church Hist. cent. iv, pt. ii, ch. v, § 15.

Gratus (pleasing, Gracezied Fyrgo), Valerius, procurator of Judaea from A.D. 15 to 26, being the first appointed by Tiberius, and the immediate predecessor of Pilate (Josephus, Ant. xviii, 6, 5). The government of Gratius is chiefly remarkable for the frequent changes which he made in the Jewish highpriests, the deposition of Ananias and the substitution in his room of a man named Fabi; next Eleazar, son of Ananias; then Simon, son of Ca- mitius; and lastly Joseph Caiaphas, son-in-law of Ananias (ib. 2, 3). He put down two formidable bands of robbers that infested Judaea during his procuratorship, and killed with his own hand the captain of one of them, Simon, formerly a slave of Herod the Great (ib. xvii, 10, 6, 7; War, ii, 4, 2, 5). Gratius assisted the procurator Quintius Varus in quelling an insur- rection of the Jews (War, ii, 5, 2).—Smith, Dict. of Class. Biog. s. v. See Judas.

Gratul, Karl D.D., a German theologian, was born in Feb. 6, 1801, at Dusseldorf. After studying theology at Leipzig, he was for a time tutor in an Eng- lish family residing in Italy. On his return he was appointed teacher in a school at Dusseldorf, and in 1844 director of the missionary society of Dresden. During his management, which lasted from 1839 to 1847, the society had an almost tenfold increase of its annual reve- nue, and from being a society merely of the little king- dom of Saxony, became a general Lutheran missionary society of Continental Europe. In order to give to the pupils of the missionary seminary an opportunity to at- tend the lectures of a university, Gratul caused, in 1834, its transfer from Dresden to Leipzig. He concentrated

...
GRAVE

all the efforts of the Church upon the missionary work among the Tamula in South India, and from 1849 to 1858 made himself a journey through Palestine and Egypt to India, to examine the condition and the prospects of the mission. While in India he devoted a special attention to the study of the language and literature of the Tamula, as the result of which he published the "Lithoea Tazulica" (Leips. 1854-56, 6 vols.). He also published an account of his journey in 5 vols. (Reise nach Odintzeln, Leips. 1854-56). In the question of caste, Graul was opposed to the practice of all the English and American missionary societies, and in favor of tolerating the differences of caste among the Christian converts. He published, in defense of his views, in 1852, a pamphlet in the English language at Madras, and in 1861 another in the German language at Leipsic ("Die Stellung der evangel.-luther. Mission in Leipsig zur onlind. Kautenfrage, 1861"). He resigned his place as director of the missionary seminary at Leipsic, and in 1862 went to Erlangen with a view of connecting himself with the university, but a serious sickness prevented him from carrying out this design. He died Nov. 10, 1864. Of the numerous works of Graul, that with which he was most familiar was his "Biблиocl. Беblenstahne, Lpz. 1846; revised by Harnack, 1867), in which he shows an extreme unfailness in his remarks. His "Reise nach Odintzeln" is the most noted work among his other works is one on Ireneus ("Die christ. Kirche an der Schwelle des 7ten. Zeitalters, Lpz. 1860.").—Herzog, Real-Encykl. xix, 578.

GRAVE (properly "grab la, kerber, a sepulchre; Greek μνημεῖον or μνημονίου, a tomb, as a monument [see Buri-
al]) is also in some passages of the common vers. the rendering of ἱερᾶς, "shrine," ἱερός, "sacred" [see SHEEL; HADDAS]; once of μνημονεύω, "shun the (Job xxxii, 29), the pit or open sepulchre, as elsewhere rendered; and once erroneously of "grā, "prefer" (Job xxx, 24). See TOMB.

Sepulchres among the ancient Hebrews were, as still among all Orientals (Schweigger, Reisen, p. 199; Shaw, Travels, p. 192; Hasselquist, p. 56 sq.), outside of cities (see Lightfoot, Hor. Heb. p. 167; according to the Talmud, Babs. Batr. ii, 9, at least fifty yards distant from the city walls), in the open field (Luke v, 12; John xi, 39; compare Cicero, Leg. ii, 23; & ad famili. iv, 12, 9; Plutarch, Afr. 58; Theocrit. vii, 10; Homer, Il, viii, 435 sq.; Michaelis, Mos. Recht. ii, 807). Only kings and great nobles (Job xvi, 6, 29; 2 Chron. xxv, 33, 35; xvii, 9; 2 Chron. xvi, 14; xxvii, 37) and prophets (1 Sam. xxv, xvi; xxvii, 8) were allowed to be buried within cities (Harn. Obs. ii, 129 sq.; compare Thucyd. v, 11; Potier, Gr. Ant., ii, 427 sq.; when it is said that any one was interred in his house (1 Kings ii, 54; 2 Chron. xxviii, 20), we must understand the grounds or environs of the house to be meant, i. e. the garden (comp. Numb. xix, 18); it was otherwise among the ancient Romans, Isidore, Orig. x, 2). Generally the graves were pits or graves (Gen. xxvii, 17; xxxvii, 8; 1 Sam. xiv, 18; 2 Kings xxii, 18, 26; John iii, 41; comp. Strabo, iv, 636; Virgil, Ec. vi, 851), shady spots under trees or in gardens being preferred (Eck, De sepulcris in hortis, Meling. 1738 sq.; Walch, Observ. in Matt. xx inscript. p. 89); and those excavations were either natural, with which Palestine abounds [see C. T. Leslie, "Israel," chap. vii], or the result of which he published the subject and walked up; see Knobel, Jena. p. 99, or hewn in rocks (Isa. xxii, 16; 2 Chron. xvii, 14; Matt. xxvii, 60; John xii, 38; Luke xxiii, 53), sometimes very spacious and with numerous side-passages and chambers (Baboo Bucholz, "Israel," 9); they are also described as graves sunk perpendicular as in the ground (Luke xi, 20); and were occasionally situated on hills (2 Kings xxiii, 16; comp. Isidore, Orig. x, 11). Not only in the case of kings and nobles (2 Kings ix, 28; 2 Chron. xxxii, 32; xxxv, 24; 1 Macc. ii, 70; ix, 19; xiii, 25, etc.), but in every good family (Gen. xlviii, 20; Judg. viii, 32; 2 Sam. ii, 32; 1 Kings xii, 22; Tobit xiv, 12; 1 Macc. ii, 70), were there hereditary vaults (it was a deep disgrace to the remains of persons of distinction to be buried among those of the poor). See Jer. xxvi, 23; and it appears the very natural desire of those dying abroad to repose in such family cemeteries (Gen. xlviii, 29; i, 5; 2 Sam. xix, 37; 1 Kings xii, 32, 31; Neh. ii, 8; comp. Sophocles, Elektra, 1181 sq.; Aeschyl. Gr. ii, 169; 2 Sam. iv, 15; 2 Kings xxiv, 6; De terra sancta a Jacobo et Josepto expatrat. Viteb. 1742; Semler, De patriarcharum ut in Palest. sepulturatur decedere, Hale, 1756; Carpaov, in Ugolini Theaur. xxxiii). But whoever had not such a hereditary sepulchre wished none the less to rest in the land of his fathers, but went to the fields (see Prov. xi, 10, in the margin). (Ex. xxv, 4, 5). For the poor were (later) public buri-
al-places assigned (Jer. xxvi, 23; 2 Kings xxii, 6; comp. Matt. xxvii, 7). As a protection chiefly against the carnivorous jackals (Plini., v, 44), the graves were closed with doors or large stones (Matt. xxvii, 57, 109; Luke xxiii, 53; Acts iv, 30). (March), after the rainy reason (Shekel, i, 1), they were (in the post-elemental period) whitewashed afresh (Massee Smén, v, 1), in order to warn the great multitudes of strangers visiting the Passover against contact (Matt. xxvii, 37; see Lightfoot and Schöttgen, ad loc. Prochorus, ad loc. Oecumenes, ad loc. and Reustach, Die sepulcrum calce notaarvz, in Ugolini Theaur. xxxiii), which caused pollution (Numb. xix, 16; comp. Josephus, Ant. xvii, 2, 5). There are still many such sepulchral grooves in Palestine, Syria, and Idumae generally (see Pococke, East, ii, 70, 100, etc., Burchhardt, i, 229 sq.; Robinson, i, 78 sq.; ii, 175 sq.; 668; iii, 817, 692). They descend sometimes vertically, sometimes horizontally in the earth, the former by steps. Within are usually found several chambers or apartments, of which one sometimes lies deeper than another. Most of them have on the side of the cells, six to seven feet long, in which the bodies are deposited. Among those found at Jerusalem, for which tradition assigns special names and origin, are the Sepulcrum of the Kings (perhaps derived from 2 Chron. xxvi, 20; xxvii, 37; compare Neh. iii, 16; Acts ii, 29; see Ne-

buhler, p. 63; Rosenmuller, Alt. ii, 269 sq.; Robinson, i, 386 sq.; ii, 183; compare Hottinger, Cippili Hebraici, Heidelberg, 1850 [also in Ugolini Theaur. xxxiii]). They consist of an anteroom and between chambers, lying on the north of the city, east of the temple (Malch. i, 3; misc. of the nobility, and not merely, if at all, to the ancient Jewish kings. See Jerusalem. Far more imposing are the sepulchres of Egypt, and especially celebrated by the ancients is the tomb of king Osyamandias (Diod. Sic. i, 47 sq.), of which the ruins are still extant (Pococke, i, 159). Above the tombs were from the earli-
est times erected monuments (Gen. xxxv, 20; 2 Esd. xxxv, 20, as often on the Phoenician grave-stones, originally of very rude work (Stich. auf der Erde, 22; John xxii, 22; 1 Macc. xxv, 255 sq.; Virgil, Ec. vi, 851), later in the form of splendid mausolea (1 Macc. xxvii, 27 sq.; Josephus, Ant. vii, 10, 3; xx, 4, 8; comp. Pausanias, viii, 16, 3; see Salmianus, ad Solin. p. 851; Zorn, in the Nov. Miscell. Jp. v, 218 sq.) with various devices (2 Sam. xviii, 16). To open a grave forcibly in order to ab-

struce a stone or earth (Joseph. Ant. vii. 10; 2 Sam. iv, 4); weapons (Ezek. xxxii, 27; 1 Macc. xxii, 29; Curtius, v, 18), or other articles deposited with the body (comp. Sept. Vet. at Josh. xiv, 30; Jerome, ad Jer. vii; Rosenmuller, Morgend. iii, 10), or even the bones of the deceased (John, 20, 24; comp. Dind. Sic. xiii, 86; xiv, 63; see Wächter, Uber Ezechiesid bei d. Röm. p. 209 sq.; Abegg, Straf-
The reliefs of the dead were thus pillaged for magical purposes (Apul. Metam. ii, p. 38, Bp.; Heron, Epod. xiv, 8 sq.; Lucan, vi, 538; and Cebes and Thule, 2). The marble does not appear very clearly from Isa. lxv, 4. There are scriptural traces of the popular idea that graves were the residence of demons (comp. Matt. viii, 28), who were perhaps connected with soothsaying (Acts xvi, 16); other, more subtle allusions to the superstitious notions respecting offering to the manes of the departed (inferior, fructuations; compare Athen. iii, 98; Macrobr. Sat. i, 13, p. 263, Bp.; Barhebr. Chron. p. 256); or a species of necromancy practised in such spots (see Gregor. Nazianz. Or. in Psal. p. 91; Otho. Lex. Rhyd. p. 171). The graves of the prophets and holy persons were in post-exilian times sedulously repaired and adorned (Matt. xxiii, 29; see Schöttgen, Hor. Hebr. i, 205; Eckhard, De adhibitiose et exorcismate sepulcorum, Jena, 1746), a tribute of reverence (and eventually of grateful veneration, Matt. xxiii, 80 sq.), which was not unknown likewise in Greek antiquity (Kilian, Var. Hist. ii, 7; Diod. Siculus, xi, 58; Athen. xii, 583; Suetonius, Octav. xviii; the Greeks even appointed the tombs of honored men, Plutarch, Alex. c. 15), and still general in the East (Kämpfer, Asia, iii, 171, as works of art and of general utility). See generally Nicolaï, De sepulcris Hebr. (1. B. 1706; also in Ugo-, lino, xxxiii); Fuhrmann, Hist. Unterricht über die Bergräberplätze der Alten (Halle, 1800). See SEPUL- 

CHRE.

Gravel (גֶּלע, chesta'ts), something broken or small: gravel-stone, Prov. xx, 17; Lam. iii, 16. In Psa. lixvii, 7, נֹּֽבַה, "thine arrows," is regarded by First as a redundant formative from נֹּֽבַה; in Isa. xxviii, 19, נֹּֽבַה, erroneously "the gravel thereof," is undoubtedly the same as in נֹּֽבַה preceding, and stands elliptically for "[the issue of its bowels," sc. the sea's, i. e. the fish that spawn so numerous], com- minuted rock, coarser than sand, but smaller than stones, forming a large part of what is known geolog- 

ically as "drift" or diluvium over the surface of the earth. See LAND.

Graven Image (גֶּלע, pe'el, plur. נֹּֽבַה, a carving). From the passage in Deut. xxvii, 15, "Cursed be the man that maketh any graven or molten image, an abomination unto the Lord, the work of the hands of the craftsman, and putteth it in a secret place, and all the people shall go out, and say unto him, Amen," we may fairly infer with Michaelis, in his Commentaries on the Laws of Moses, that there was a marked distinction between idols and images, or rather between idolatry and image-worship, which appears to have prevailed from the earliest times. See IDOL, pe'el, or graven image, seems to refer to the household gods; an idol is termed נֹּֽבַה, eli', and in some places נֹּֽבַה, he'bel, both words having a similar signification, that of "valn, void, void." The distinction is particularly marked in Psa. xc, 7: "Confounded be all they that serve graven images, that boast themselves of idols." John says (Archeol. § 400), "Every nation and city had its own gods, which at first had acquired some celebrity by the worship of some particular family merely, but were at length worshipped by the other families of that town or nation, yet every family had its separate household or tutelary god. No one felt himself bound to worship every god, but paid his honors, as he chose, to those he deemed the most propit- ious or most powerful. But still he did all he could to think it advisable wholly to neglect other gods, lest perchance, thinking themselves consoled by such neglect, they should revenge themselves by sending some evil retribution." (See Reineccius, De non faciendo sculptulis, Wurmeia, 1724.) See TERAPEUT.

There has been a good deal of discussion as to the extent of the prohibition contained in the second com- mandment; some (including early Jewish commentators) have thought that the prohibited articles were "con- dened against this extreme view Michaelis protests (Laws of Moses, art. 250), on the reasonable ground that certain figures were in fact made by God's own command. Both in the Tabernacle and the Temple many objects were provided which would put under contribution the above-mentioned "sacrificial" laws. In the Temple, for example, the gilded candlestick (xxxv, 34); the various embroidered hangings of the sanctuary (ch. xxvi); and the brazen serpent (Num. xxi, 5, 9). So again in the Temple, besides the cherubim, were the dragon, the figures of all kinds, as well as the brazen sea, as it was called, which rested on twelve brazen oxen. Ezekiel's temple, in like manner, has cherubim with the heads of men and lions. Even after the return from Babylon, when men severely interpreted the prohibition of the commandment, there were figures of animals on the golden candlestick (Beland, De Spolios Temp. Hier. in Arcs Selmos), and vines with pendent clusters on the roof of the second Temple, and the golden symbolic vine over the large gate. Not the making of images itself, but all attempts to represent the very God, or even their saints (Kitto, Pictorial Bible, Deut. v, 8, 9). There were, however, from whatever cause, limitations in fact, which the artisans who ornamented the Tabernacle and the Temple observed. In the for- mer, nothing is mentioned as fabricated of φιλος; nor is skill in metalworking His metal included among the qualifications of the artificer Bezaleel; while i in the Temple there is no mention made of sculptured stones in any part of the building. All the decorations were either carved in wood and then overlaid with metal, or wholly cast in metal. Even the famous portal of Jachin and Boaz were entirely of brass (Kitto on 2 Chron. iii, 6). The qualifications of the accomplished men who built the Tabernacle (Bezaleel and Abiob) and the Temple (Hiram) are carefully indicated; to the former, especially Bezaleel, is attributed skill in 'carving (Exod. xxxii, 4); to the latter, "the candlestick and the table after the work of the sea, and all manner of workmanship that thou shalt do." (See GREGORY.)

Graving Work. A French Protestant theologian, was born at Nismes, July 28, 1647 (Sept. 11, 1656, ac- cording to Gravorol de Floghrevrair). After studying theology at Geneva, he was appointed minister of Tra- del (Vivarais) in 1671. In 1672 he removed to Lyons. After the revocation of the edict of Nantes he went to Holland, remained a while in Amsterdam, and finally went to take charge of a French congregation in Lon- don. He died there in 1780, according to Menard; in 1778, according to Watt. He wrote De Religiones Con- ciliatoribus (Lausanne, 1674, 12mo, under the pseudo- nym of "theologian"); L'Eglise protestante est sû- re par l'Eglise romaine sur quelques points de contro- verse (Geneva, 1682, 12mo, Anon.):—Projet de réunion entre les protestants de la Grande-Bretagne (Lond., 1689, 8vo):—Moes viaductus ad Th. Burnettii archeologias philosophicas (Amst. 1684, 8vo):—Projet de réunion entre les protestants de la République helvetique (Amst., 1697, 8vo). See Moréri, Dict. Hist.; Bayle, Œuvres diverses, iv, 605 and 610; Michel Nicholas, Hist. litt. de Nimes, vol. ii: Haug, Les Francs Protestants; Hoefer, Nouv. Biog. Générale, xxi, 746.

Graves, Hiram Atwill, a Baptist pastor and
writer, was born at Wendell, Mass., in 1818. In boyhood he was a precocious student. He graduated at Middlebury College, Vt., in 1834. On account of impaired health he did not pursue a regular course of study for the ministry, but was ordained in 1837 at Springfield, Mass. He became pastor of a church in Lynn, and in 1842 editor of the Christian Reflector, a paper which has since, in conjunction with another, become a journal of extensive influence. Infirm health sent him to Cuba in 1845, and to reside in Jamaica in 1849. He returned without essential benefit, and died in 1856.

Graves, Richard, D.D., a learned Irish divine, was born at Kilfinnan, Linnecar, Oct. 1, 1768, and was educated at Trinity College, Dublin, of which he became fellow in 1786. In 1813 he became dean of Ardfag, and regius professor of divinity. He died Mar. 29, 1829. Horne pronounces his Lectures on the Pentateuch (1807, 2 vols. 8vo) "indispensably necessary to the Biblical student." Besides that learned work, which passed through several editions, he wrote The Apostles and Evangelists not Enthusiasts (1798):—Scriptural Proofs of the Trinity (four discourses):—Absolute Prostration compared with the Scripture statement of the Fatherhood of God:—Prostration repugnant to the general tenor of Scripture (London, 1829). These, with a number of Sermons, are given in his Whole Works now first collected (London, 1840, 4 vols. 8vo), of which vol. 1 contains a memoir of his life and writings by his son, R. H. Graves, D.D.

Graving. There is much indiscernibility in the terms of this ancient art of the Jews, arising from the fact that one and the same artisan combined, in skill and name, in so many branches, which the modern principle of "division of labor" has not yet applied to different pursuits. Thus Aholiah was not only "an engraver," but also "a cunning workman in general art," and an embroiherer in blue, and in purple, and in scarlet and fine linen (Exod. xxxviii, 23). In like manner Benazeel is described as accomplished "in all manner of workmanship; and to devise curious works, to work in gold, and in silver, and in brass, and in cutting of stones to set them, and in carving of wood, to make any manner of cunning work" (Exod. xxxv, 35—38). These numerous gifts they both possessed and employed themselves and others; indeed, that they formed an early school of art to supply the demand created by the institution of the Mosaic ritual, the members of which school were as comprehensive in their attainments as their great teachers (Exod. xxxv, 34, xxxvi, 1). The same combination of arts seems to have characterized the later school, which was formed under the auspices of David, when preparing for the erection of the Temple (1 Chron. xxii, 15; xxvii, 21). Many of these artificers were Phenicians, whom the king had invited to his new capital. II (Sam. v, 11; 1 Chron. xiv, 1). In the next reign, Hiram, to whose genius the Temple, which Solomon owed much of the beauty of its architectural details, as well as its sacred vessels (1 Kings vii, 15—45), was a native of Tyre, the son of a Tyrian artificer by an Israelitish mother. This man's skill was again as comprehensive as that of his great predecessors (v, 16).

3. צֶ֣כֶת, chakak, describes a branch of art which more literally coincides with our idea of engraving. In Ezek. iv, 1 the word is used of engraving a πέτρα on a πέτρας or on a στήλη (Job xxxii, 25); in Job xxxii, 25, of inscribing upon tablets of stone or metal, a very early instance of the art; similarly in Isa. xxx, 8; while in Ezek. xxii, 14 (_particle?) the word seems to indicate painting, portraying in colors ( Particle) : and the addition of Particle upon the wall, raises the suspicion that fresco art, which was known to very ancient nations, including the Egyptians, was practiced by the Babylonians, and admired, if not imitated by the Jews; compare comp. Soc. iv, 8 (Painting is known to the Assyrians, Egyptians, Greeks, etc., see Sir G. Wilkinson, On Color and Taste, p. 153.). The Sept. renders the remarkable phrase before us, Particle, with specifying color; but Symmachus, the Vulgate, the Peshito, and the Chaldee paraphrases all include in their version the press idea of color. The idea of careful and accurate art which is implied in the term under consideration implies
much beauty to the passage in Isa. xi, 16, "Behold, I have grafted thee upon the palms of my hands," where the same word is used. (There is here an allusion to the Eastern custom of tracing out on the hands the sketches of eminent cities or places, and then rubbing them with the powder of the henna or cypress, and so making the figures perpetually visible.) Journey from Aleppo to Jerusalem, p. 100 [London, 1830] describes the process of "pillgrims having their arms and hands marked with the usual ensignia of Jerusalem." See also Rosenmüller, ad loc., and J. D. Michaelis, Note in Locutio Prophet. [Oxford, 1827], p. 601, 605, and Barthelemy, oriental Costume and Costume, p. 149 [London, 1810].

The second clause of this passage, "Thy walls are continually before me," may be compared with Isa. xxii, 16, where our verb פֶּן is also employed to describe the engraved plan or sketch of a house for architectural purposes. Among other applications of the art indicated by this word may be mentioned monolithic monuments, such as the אֶּרֶץ יִשְׂרָאֵל of Sam. vii, 12, with suitable inscriptions; see especially Deut. xxxii, 4-8.

4. In יָרָשׁ, paexel, and its noun יָרָשָׁה, pe sel (always rendered in A. V. "graven image"), we have the operation rather of the sculptor's or the carver's art than the engraver's. In several passages of Isaiah (xxx. 27; xxi. 19; xii. 7; xlix. 12-15) curious details are given of the fabrication of idols, which afforded a facile employment of the various artist's engiemed in the complicated labor of image-manufacture (see also Jer. x. 8-9, from which it would seem that the wrought and prepared metal for covering the idol was imported, and put on by Jewish artisans). Working in ivory was common to the ancient Egyptians (Wilkinson's Anc. Egyptians, iii, 169), the Assyrians (Layard's Ninevites, ii, 420), the ancient Greeks (Grube's Grecia, vi, 30-32), and the artificers of Jerusalem (Solomon's ivory throne, 1 Kings x, 18; ivory palaces, Psa. xiv, 8; ivory beds, Amos vi, 4) and of Samaria (Ahab's ivory house, 1 Kings xii, 32; which was not an uncommon luxury, Amos iii, 15). No doubt the alliance of the royal houses of Israel and (indirectly) of Judah with the Phoenician monarch (1 Kings xvi, 31) was the means of attracting many of the artificers of Tyre, and Sidon, and Gebal to the metropolis of each of the Jewish kingdoms; both in Solomon's time and in Ahab's, ivory-sculpture was probably a Phoenician art. The neighboring idolators, whose example was so disastrous to Israel, were skilled in image-manufacture. From Deut. vii, 25 it appears that the body of the idol was of sculpture, and the head overlaid with one or more precious metals. The passage, 1 Sam. vi, 2-12, seems to prove that the Philistines had artificers in the precious metals capable of forming the figures of small animals; and their idols that were taken from the spoils of the great battle of Baal-perazim were probably graven of wood (1 Chron. xiv, 12).

5. מָשָׁל, pathock (in Fiel and Pual), is perhaps distinguished from the term we have just considered (מְשָׁל) by being used to describe figures in relief rather than statues, such as the cherubic figures on the walls of the Temple (see 1 Chron. iii, 7). Compare the cognate noun מִשָּׁל, puliuach, engraved figure, in 1 Kings vi, 29, which passage informs us that the Temple walls were lavishly adorned with these figures, standing out probably in various degrees of relief (see also other such work, described by this word, 1 Kings viii, 26). The chief application, however, of the word is to the cutting and engraving of precious stones and metals (issantio work, as distinguished from the raised work of cameo, etc.), such as the breastplate of the high priest, the altar, the door and the plate of his mitre (ver. 36, 37). The mystic engraving of Zech. iii, 9 is likewise described in the same terms. The splendid jewelry of Solomon's time, as referred to in the Canticles, i, 10, 11, is best classed under the art indicated by מְשָׁל and its derivatives. From Isa. iii, 18, 24, it appears that this art of the goldsmith continued rife in later reigns, and was not unknown even after the captivity (see Zech. vi, 11). The neighboring nations were no less skilled in this branch of art; for instance, the Egyptians, Exod. xxi, 35, compared with xxxii, 3-5; the Chaldeans, Josh. vi, 19; the Medes, Ezech. xlix, 51, and (afterwards) Judg. viii, 24-26; the Ammonites, I Chron. xxx, 2; the Syrians of Zoba- hab and Hamath, 2 Sam. vii, 7-11.

6. מְשָׁל, mik'ath, like our last term of art, describes sculpture in relief (Pirrt, Hebr. Worterb. i, 780); it occurs 1 Kings vi, 18, 29 ("carved figures" of cherubims), vii, 2; viii, 31 ("graving").

7. מָשָׁל, m'sel, occurs only in Exod. xxxii, 4 (A. V. "giving food") and in Isa. viii, 1 (A. V. "a pen"). This was rather the sculptorum fabrile of the Romans (Livy xxiv, 49) than the stylus (see Smith's Dict. of G. and R. Antiq. s.v. Sculptura). For other two opinions as to the meaning of מְשָׁל in Exod. xxxii, 4, see Gesenius, Thee, p. 530.

8. מָשָׁל, m'sel, (which in Psa. xiv, 2 and Jer. viii, 8, means a writer's style or reed), has the same meaning as the previous word in the other places of its occurrence (Job xii, 10; Prov. xvii, 11; Dan. iv, 18). Yet he has given it the use of מָשָׁל, i.e. "pen of iron." The occurrence of מָשָׁל in Job xii, 10, points to the קֶּרֶב the idea of a finer art than is usually expressed by that verb (see De Saulcy's Hist. de l'art Judaïque, Paris, 1856).

See CARVE.

Gray (some form of the root מָשָׁל, m'sel), applied to the hair as an indication of old age (q. v.), which in the East is universally respected (Prov. xx, 29). See HAIR.

GrayFriars. One of the mendicant orders, otherwise called Franciscans, Minorites, etc. The name is derived from the dress which they wore. See FRANCISCANS.

Gray, James, D.D., a minister of the Associated Reformed Church, was born at Corvoam, Ireland, Dec. 25, 1770. He entered the college of Glasgow in 1790; graduated in 1798; afterward studied theology under the Rev. John Rogers, and was licensed by the Presbytery of Monaghan. In 1797 he sailed for America. After laboring with great acceptance at Washington, N. Y., until 1808, he accepted a unanimous call to the Spruce-street Church, in connection with the Associate Reformed Synod, Philadelphia. In 1808 he received the degree of D.D. from the University of Pennsylvania. He was one of the most important agents in establishing the theological seminary of the Associated Reformed Church in the city of New York. In 1808 he took an active part in the organization of the Philadelphian Bible Society, and was for a long time its corresponding secretary. At this time, in connection with Dr. S. B. Wylie, he opened a classical academy, which soon obtained great repute. After several years of this labor he resigned the school, and also his pastoral charge, and removed to Baltimore, where he devoted himself especially to the study of certain points in theology until his death, which occurred at Gettysburg, Pa., Sept. 20, 1824. His literary reputation rests chiefly on his Mediatorial Reign of the Son of God. He also edited for one year a Theological Review, and published several Occasional Sermons.—Sprague, Annals (Associate Ref.), i, 94.

Gray, Robert, D.D., bishop of Bristol, was born at London in 1763. He studied at Eton and Oxford, took his degree of Bachelor of Arts in 1791, and became successively vicar of Holy Trinity (Berkshire), rector of Cralk (Yorkshire) in 1802, and canon of Durham in 1804. His benevolence, and the talents evinced in his works, caused him to be appoint-
ed by Lord Liverpool's cabinet to the bishopric of Bristol in 1827. He was very popular in this position, and the duke of Wellington offered him the see of Bangor. He declined, and died soon after at Rodney House, Sept. 28, 1834. He wrote: *Key to the O. T. and Apocrypha*, or an account of their several books, their contents, and authors, and of the times in which they were respectively written (Lond. 1790, 8vo; 9th ed. 1829, 8vo):—*Discourses Illustrative of the Evidence, Influence, and Doctrines of Christianity* (Lond. 1789, 8vo):—*Sermons on the Principles of the Reformation of the Church of England* (Bampton Lecture, 1798, 8vo):—*The Theory of Dreams* (Lond. 1806, 8vo):—*The Connection between the Sacred Writings and the Literature of Jewish and heathen Nations* (Lond. 1812, 8vo); *A View to Establish Evidence in Confirmation of the Truth and Revealed Religion* (Lond. 1819, 2d ed. 2 vols. 8vo).—Rose, *New General Biographer*, Dict.; Hosier, *New Biog. Générale*, xxi, 766; Darling, Cyclop. Bibliographiae, 1, 1890.

Grease (γρατζ), *ca’ leb*, Psal. cxix, 70, *fist* [q. v.], as elsewhere rendered.

Great Britain and Ireland, the United King- dom of, is, since the union of Ireland, the full official designation of the country more generally known as Great Britain, that is, the United Kingdom of Great Britain and Ireland. It includes the two large islands of Great Britain (England and Scotland) and Ireland, and the adjacent smaller islands, together with the Channel Islands and the Isle of Man. The island of Great Britain—so called to distinguish it from Britannia Minor, or Little Britain (see Ireland) —lies between Lat. 49° 57' 50" and 58° 40' 24" N., and between long. 1° 46' E. and 6° 18' W., and is the largest island in Europe. It is bordered on the N. by the Atlantic, on the E. by the North Sea, on the S. by the English Channel, and on the W. by the Atlantic, the Irish Sea, and St. George's Channel. The most northerly point is Dunnottet Head, in Caithness; the most southerly, Lizard Point, in Cornwall; the most easterly, Lowestoft Ness, in Norfolk; and the most westerly, Ardnamurchan Point, in Argyllshire. Its greatest length is about 800 miles, and its greatest breadth (from Land's End to the east coast of Kent) about 320 miles, while its surface contains about 89,600 square miles. In addition to the home territories comprising the kingdom, Great Britain possesses a multitude of dependencies, some of them of vast extent, scattered over every part of the globe, and which are also styled "empire", or "an empire over the sun never sets." According to the official census held in 1861 in the United Kingdom, and nearly all the colonies except British India, the extent and population of all the British dominions were in that year as follows:

<table>
<thead>
<tr>
<th>Territory</th>
<th>Area (sq. miles)</th>
<th>Population (thousands)</th>
</tr>
</thead>
<tbody>
<tr>
<td>United Kingdom (including soldiers and sailors)</td>
<td>131,115</td>
<td>89,821,298</td>
</tr>
<tr>
<td>Colonies and possessions (exclusive of soldiers, 45,814 men)</td>
<td>3,964,792</td>
<td>9,864,943</td>
</tr>
<tr>
<td>British India (exclusive of British army, 42,002 men)</td>
<td>953,729</td>
<td>120,571,300</td>

<td>114,156,280</td>
</tr>
</tbody>
</table>

Not included in this enumeration is the vast territory in North America which heretofore belonged to the Hudson's Bay Company, which in 1869 ceded its right of sovereignty. Added to the above total of square miles, this territory would increase the total extent of the British dominions to about seven millions of square miles, and make it, in point of extent, the first empire of the world. The total population was estimated in 1860 at 200,000,000; and in this respect the British empire was the second of the world, being exceeded only by the Chinese empire.

In England and Wales the Anglican Church is recognised as the state Church [see England, Church of], and the sovereign must belong to it. In Ireland the Anglican Church was also the established Church until 1869, when, after a long and violent struggle between the Conservative and Liberal parties, it was disestablished. See Ireland. In Scotland the established Church is Presbyterian. See Scotland. According to the census returns of 1861 (in the census returns of 1861 religions statistics were not included), the number of places of worship, together with the sittings provided in England and Wales, and the estimated number of attendants on a particular day, were as follows:

<table>

* In England the chief institutions for education are the ancient national universities of Oxford and Cambridge; the more recent institutions of London, Durham, and Lampeter in Wales; the classical schools of Eton, Westminster, Winchester, Harrow, Rugby, and Eton College; the schools of the dissenting denominations; the middle-class schools, either started by individual teachers, and hence called 'adventure' schools, or by associated bodies; the new academies as directors, to which the parishes are responsible; the schools of design, and the various elementary schools and training-colleges in connection with the different religious denominations. The number of day-schools in England and Wales in 1861 was 46,042, of which 15,518 were public.—i. e. schools deriving a portion of their incomes from some sources besides
the scholars—and 38,524 private—i.e. sustained entirely by the payments of scholars. The total number of scholars was 2,144,578, of whom 1,422,982 attended the public, and 721,596 the private schools. As the population then amounted to 17,927,608, this gives a proportion of one scholar to every 8% of the inhabitants.

Scotland possesses four universities for the higher branches of education, viz. those of Edinburgh, Glasgow, St. Andrew's, and Aberdeen, besides a variety of minor colleges connected with the Episcopalian, Free Church, and other non-established churches; a complete system of parish schools, grammar-schools, or academies in the chief towns, which serve as preparatory gymnasium for the universities, and a large number of denominational schools." In 1861 the number of 'day-schools' was 294, of which 3849 were public, and 1853 private. The number of scholars was 366,317, of whom 290,945 belonged to the public, and 88,472 to the private schools. Out of a population of 2,888,742, this gives a percentage of 12.78, or 1 scholar to every 7½ of the inhabitants. According to the education statistics of 1866, the number of children from 5 to 15 years of age attending school in Scotland was 441,166, which, out of a population of 3,061,291, gives 1 scholar to every 6½ of the inhabitants.

For the Church History of Great Britain, see England, Church of; Scotland, Church of; Ireland, and the articles on the several dissenting denominations. The most important works on the Church History of Great Britain have been referred to in the art. on England, Church of; besides them must be mentioned Bogue and Bennett, History of Dissenters (Lond. 1808–14, 4 vols.); J. Bennett, History of Dissent during the last thirty years (Lond. 1849). (A. J. S.)

Greathead. See Grosseteste.

Great Owl. See Owl.

Great Sea. See Sea.

Great Shears. See Shears.

Great Shears (מְאֹל, bı̂ lōkāš, lit. a cutting; Sept. κυστίς, Vulg. orcas) occurs in the A. V. only in 1 Sam. xviii, 6, in the description of the equipment of Goliath—"He had great oars of brass (מְאֹלָה, copper) upon his legs" (םֵעָלָה בְּפֹט, lit. on his foot, whence some have supposed only a kind of boot to be meant). Its ordinary meaning is a piece of defensive armor reaching from the foot to the knee, and thus protecting the shin of the wearer. This was the case with the isthμις of the Greeks, which derived its name from its covering the isthμή, i.e. the lower part of the leg, and was a highly esteemed piece of defensive armor (see Smith, Dict. of Class. Ant. s. v. Orcas). The Heb. term is derived from מְאֹל, the fore part of anything. Hence all the ancient versions and Josephus (Ant. vi, 3, 1) agree in regarding it as designating a defensive armor for the leg. It is to be distinguished from מְאֹלָה, same (Isa. xi, 4), which Gesenius thinks was a sort of military shoe like the Roman calces, and it probably was similar to the greaves of the Assyrians, as represented in their sculptures, which not only protected the leg, but covered the upper part of the foot like our gaiters, and seem to have been laced up in front; in other cases they appear to have extended over the whole thigh (Layard, Nineveh, ii, 261). See Armor.

Gre'cia (Heb. Yawwər, יָוֵר, l. e. Jawwər [q. v.], as usually rendered), the Latin form (Dan. vii, 21; x, 20; xi, 2) of the country elsewhere termed Greece (q. v.).

Grek'ian ( Heb. in the plur. Benēy Ḥay-Yeowsim', בנים הַיִּשְׂרָאֵלי, sons of the Israelis, Joel iii, 6; in the Apoc. 'Eλλανίς, 1 Macc. vi, 2; viii, 9, 18; 2 Macc. iv, 15; xii, 2; in the N. T. Ἑλληνσίς, a Hellenist, Acts vii, 1; ix, 29; xii, 20), the name of the people elsewhere called Greeks (q. v.).

Grecian Architecture. Grecian architecture differs from other styles of ancient architecture in this, that it was devoted almost solely to religious uses. Its chief aim was to supply permanent and worthy temples as residences of the deities, as, during the early history of Greece, the images and statues of the deities were placed in the hollow trunks of trees and under canopies for protection. Most of the elements from which the Ionic order of architecture was developed are easily traced to an Assyrian origin, as is seen in the ornamentation of the

---

Fig. 2. Section of the Treasury of Atreus.
columns and walls of the Treasury of Atreus at Mycenae. On the other hand, the elements of the Doric order were mostly adopted from the more severe and stately temple architecture of Egypt. Under the extraordinary aesthetic feeling and culture of the Greeks, these elements, though of foreign origin, were developed and modified until, with the addition of certain native elements, there was produced a degree of perfection of architectural form, and of symmetrical and harmonious combination of parts into a unique whole, that has never been surpassed in the whole history of architecture.

The tendency to Oriental luxury and individual power that characterised the treasure-houses of the τησπορεία was checked by the overthrow of their chiefs and the establishment of democracy. From the time of the τησπορεία till the accession of Alexander the Great, Grecian architecture (as well as sculpture and painting) was devoted almost solely to the service of religion.

In addition to the Ionic and Doric orders, a third order, the Corinthian, was developed in Greece. It was, however, but little used until after the time of Alexander, when true religious feeling and patriotic sentiment had given way, throughout Greece and its colonies, to Oriental sensuous enjoyment and luxury.

The greatest variety and artistic freedom pervaded the Grecian architecture, both in the development of the individual members and in the general planning of the temples. All of the moldings and the ornamentation were drawn with a free hand, and not by mathematical instruments, as was the case in Roman and Gothic architecture. With all of this variety and freedom, the typical character of the Grecian architecture was well preserved. The Doric order was the favorite, as the best adapted to the spirit of temple architecture. More than one order was frequently introduced, however, into the same edifice. From the erection of the earliest Doric temple, that of Neptune at Corinth, there was a gradual progress in the development of elegance of form in the single members of the edifice, and in the development of symmetry and harmony in the entire structure. During the earlier history of Grecian architecture, polychromy was used to a great extent. Later, the ornamentation became more sculptural. But color was used to develop the relief of the architectural forms of the capitals, the cornices, and the panels of the ceilings, until the period of decadence of the Grecian architecture.

Great care was taken to select the best sites for these temples. Oracles were consulted for their location. The temples of tutelary deities were usually placed on the highest ground in the city. They thus commanded, in many cases, most magnificent prospects. They were also thus seen at a great distance. The temples were sometimes surrounded by sacred groves, or by groves of olive and orange trees. The temples were often surrounded also by sacred inclosures, within which were frequently erected altars, and even temples to other deities. The temples of Mercury were usually placed on lower grounds; those of Mars, Venus, Vulcan, and Esculapius outside of and near the gates of the city. The front was always adorned with an equal number of columns—of four, six, eight, or ten. On the sides the number of columns was usually unequal. As the length of the temple was usually double the breadth, the number of columns at the side was thirteen for six on the front; seventeen for eight on the front. The proportion between the diameter and the height of the columns and of the space be-
of the deity. This cella opened to the east, that the first light of the morning might fall upon the image of the deity. Sometimes there was another room in the rear of the cella (as the treasury in the Parthenon at Athens). The gables contained groups of sculpture illustrative of some event connected with the mythology of the deity to whom the temple was dedicated. The metopes of the friezes frequently contained also smaller groups of sculpture. Upon the walls of the portico were frequently long series of sculptures.

The entire temple was erected primarily as a residence for the deity. It could contain but few persons at a time. Sacrifices, ceremonies, and processions were performed without the temple. Beside the statue of the deity, to whose service the temple was erected, were often placed smaller statues of friendly deities. Statues of priests were sometimes placed in the vestibule of the cella. Thank-offerings, sometimes of great value, were often placed upon the walls both of the cella and of the portico. An altar upon which offerings were placed often stood before the deity. But sacrifices were performed upon an altar placed before the entrance, but within the view of the image of the deity.

The other edifices of Grecian architecture were, like the temples, for the benefit and use of the entire population. They consisted mainly of fortifications, fortified entrances (propylaea), and halls of justice (basilicas). These partook of the general style of architecture in which the temples were built.

So different in principles of construction, and in the object for which they were designed, were the edifices of ancient Greece, that only with the greatest modification of detail can they be adapted to the wants of modern life. Least
of all is the Grecian temple adapted to the purposes of a Christian church.

The history of Grecian architecture extends from the 7th century B.C. till the conquest of the Orient by Rome. The greater part of the earlier monuments of this architecture are found in the western colonies of Sicily and Grecia Magna. Most of the ancient temples in Greece itself were destroyed by the Persians. Most of the temples in Ionia and the further Orient were built during or after the reign of Alexander the Great. The Doric style prevailed mostly in Sicily, Grecia Magna, the Peloponnesus, and the northern part of Greece. The Ionic and Corinthian styles prevailed mostly in Asia Minor, while all three styles were found in Attica, and especially in Athens.

In Sicily there were over twenty temples that were famous for their size and splendor. They were mostly built in the 5th and 6th centuries B.C. The largest of these was the temple of Jupiter at Selinus, which was 260 feet long and 170 feet wide. The temple of Diana at Syracuse is remarkable for the indications of the influence of Egyptian architecture in its style and construction. The temple of Minerva at Syracuse was famous for its costly ornamentation. Hiero II built also at Syracuse a colossal altar, which rested on a lofty base 625 feet long and 73 feet wide, and was remarkable for the elegance of its architectural proportions. In Agrigentum were three imposing temples, the largest of them, that of Jupiter Olympus, being 844 feet long and 176 feet wide. At Paestum, in Italy, are the remains of two temples and of a basilica that rank among the finest ruins of Grecian architecture. They show still the heavy influence of Egyptian architecture upon the Doric style, but yet they are marked by great freedom of treatment and harmony of proportion.

One of the most remarkable temples in the Peloponnesus was that of Neptune at Corinth, of which but seven columns and the architrave above them remain. As the earliest ruins of Greek architecture extant, these are characterized by a heaviness of proportion that is not found in any later edifices. This temple dates from 630 B.C. The temple of Minerva, on the island of Egina, is remarkable for the traces of coloring yet remaining in the architectural ornamentation, and for the archaic character of the sculpture of the pediments, now in the Glyptothek at Munich. Among the most famous temples in Greece itself was that of Jupiter Olympus at Olympia. It was 206 feet long and 93 feet wide, and was adorned with most choice works of Grecian sculpture.

The glory of Grecian architecture is, however, to be seen in the city, with all its temples, was utterly destroyed by the Persians 480 B.C. First among the temples of the newly rebuilt city was that of Theseus. This is to-day the best preserved of all ancient Grecian temples. In symmetry of proportion it surpassed all other temples that were built before it. The second temple in the new city was that of Victoria Aptera. This temple was taken down by the Turks in the 17th century to build a battery with. All of its parts were found in 1885, and the temple was completely restored. It is one of the most graceful monuments of Grecian architecture. The Parthenon at Athens is, however, the crowning glory of Grecian architecture. It was erected 448 B.C. Its length was 290 feet, and its breadth 102 feet. In the perfection of proportion of all the parts, and in the harmony of their union in an entire edifice, the Parthenon equals or surpasses all other edifices ever erected by the hand of man. It was also adorned with statues and other works of sculpture by the best sculptors that Greece or the world has ever produced. The Erechtheum and the Propylaeum also showed the freedom with which the Greek architects varied the plans and construction of their temples. Without losing the character of the architecture, or grace of proportion and unity of effect. Nearly equal to the Parthenon was the temple of Diana at Eleusis, in which the mysteries were performed. These are few ruins of the famous temple of Apollo at Delphi, which was burnt in the 6th century B.C., and the rebuilding of which was hardly completed at the time of the Roman conquest.

In size and costly magnificence, the temple of Diana at Ephesus exceeded all other temples of Grecian art. This magnificent edifice was completed in B.C. 400. It was 425 feet long and 220 feet wide. Erostratus set fire to it in B.C. 404, but it was rebuilt with renewed magnificence by Alexander the Great. It was plundered by the Goths, and later overthrown by an earthquake. It furnished much of the material for building the church of Santa Sophia (q. v.), and still its colossal ruins are the wonder of the antiquarian. The temple of Apollo at Didymus, near Miletus, destroyed by the Persians B.C. 496, and rebuilt B.C. 390, was one of the edifices in which the Oriental origin of the Ionic order is most plainly seen. It was also one of the largest and most elegant temples of antiquity. The Mausoleum at Halicarnassus was so large and costly as to be reckoned among the wonders of the world. It was 410 feet long, had nearly the
shape of an arc of a circle, and was 140 feet high. Though built in a period when noble inspiration had left Greek art, it was marked by an elegance of execu-
tion that was not surpassed in any edifice erected
during the history of Greek architecture. The chief
works of Greek architecture in Africa were in Cyrene,
and especially in Alexandria, which was this city. All the
resources of a luxuriant architecture were called into
requisition in the erection of every class of edifices
that should adorn a new and gorgeous capital city.
(For the literature upon Greek architecture, see
the article Architecture of Greece.)

1. Greece is sometimes described as a country con-
taining the four provinces of Macedonia, Epirus, Achaea
or Hellas, and Peloponnesus, but more commonly
the two latter alone are understood to be comprised in
it. We will consider it as composed of Hellas and Pelop-
onnesus. By this we mean to be no question that
the four provinces were originally inhabited by
people of similar language and origin, and whose reli-
gion and manners were alike. Except upon its north-
ern boundary it is surrounded on all sides by the
sea, which intersects it in every direction, and naturally
gives it the character of maritimeness. It was also a
very mountainous country, abounding in eminences
of great height, which branch out and intersect the
land from its northern to its southern extremity, and
form the natural limits of many of the provinces into
which it is divided. At the southern point of Corinth it is separated
into its two great divisions, of which the northern was
called Αίτωπος or Peloponnesus, and the southern
the Peloponnesus, now called the Morea. The moun-
tain and sea are thus the grand natural characteristics
of Greece, and had a very considerable influence on
the character of its inhabitants, as is evidenced in the re-
ligion, poetry, history, and manners of the people.

The Greek nation had a broad division into two
races, Dorians and Ionians, of whom the former seems
to have long lain hid in continental parts, or on the
western side of the country, and had a temperament
and institutions more approaching the Italic. The
Ionians, on the contrary, retained many Asiatic usages
and tenets, and were, therefore, witnessing the effects
of the sudden and overwhelming change so thoroughly cut off as the Dorians from Oriental con-
nection. When afterwards the Ionic colonies in Asia
Minor rose to eminence, the Ionian race, in spite of the competition of the half Dorian Ελλανις, continued to at-
tract most attention in Asia.

Of the history of Greece before the first recorded
Olympiad, B.C. 776, little that can be depended upon
is known. There is no doubt that from very remote
periods of antiquity, long prior to this date, the coun-
try had been inhabited, but facts are so intermingled
with legend and fable in the traditions which have
come down to us of these ancient times, that it is im-
possible with certainty to distinguish the false from the
true (Grote, Hist. of Greece, pref. to vol. i.).

After its conquest by the Romans, B.C. 146, Greece contin-
ued for one thousand three hundred and fifty years to be as a
nearly as possible a portion of the Roman empire.
Literature and the arts, however, long after the Latin conquest
in 1304, Greece was divided into feudal
principalities, and governed by a variety of Roman,
Venetian, and Frankish nobles; but in 1321, with the
exception of the dukedoms of Athens and Nauplia,
and some portions of the Archipelago, it was reunited to
the Constantinopolitan empire by Michael Paleologus.
In 1488 it was invaded by the Turks, who completed its
conquest in 1481. The Venetians, however, were not
so speedily disposed to retire as to throw all the
country during the sixteenth and seventeenth cen-
turies was the theatre of obstinate wars, which con-
tinued till the treaty of Passarowitz in 1718 confirmed
the Turks in their conquest. With the exception of
Maina, the island of Salamis, remained under their despot-
ic sway till 1821, when the Greeks ran away
from their lethargy, and asserted their claim to a na-
tional existence. The revolutionary struggle was con-
tinued with varied success and much bloodshed till the
great European powers interfered, and the battle of
Navarino, in 1827, secured the independence of Greece,
which was reluctantly acknowledged by the Porte in
1829. In 1831 Greece was erected into an independent
monarchy: it retains its classic name, and nearly its
ancient limits, comprehending the Morea, or ancient
Peloponnesus, south of the Gulf of Corinth, now Gulf
of Lepanto, and the province of Livadia, and the island
of Grecia proper, with part of Thessaly and Epirus,
north of that gulf; besides the island of Nergopont,
the ancient Euboea, and other smaller islands in the
Archipelago. The Republic of the Ionian Islands,
Cephalonia, Zante, Corfu, and others on the western
coast of Greece, is under the protection of Great Brit-
ain.

2. The relations of the Hebrews with the Greeks were
always of a distant kind until the Macedonian
conquest of the East: hence in the Old Testament the
mention of the Greeks is naturally rare. See JAVAN.
It is possible that Moses may have derived his geo-
graphical outlines from the Egyptians, but he does not
use them in Gen. x. 2-5, where he mentions the de-
scendants of Javan as peopling the isles of the Gen-
tiles. This is merely the vaguest possible indication
of a geographical locality; and yet it is not improba-
ble that his Egyptian teachers were almost equally
in the dark as to the position of a country which had not
at that time arrived at a unity sufficiently imposing to
arrest the attention of its neighbors. The amount
and precision of the information possessed by Moses
must be measured by the nature of the communication
by which we can conceive as existing in his time between Greece
and Egypt. Now it appears from Herodotus that pri-
or to the Trojan War, there was there a tradition of
transit, sacred and mythological, set from Egypt towards Greece;
and the first quasi-historical event which awakened
the curiosity of the Greeks, and stimulated the imagina-
tion of the Egyptian priests was the story of Paris and Helen
(Herodotus, ii, 48, 51, 52, and 112). At the time of the
Exodus, therefore, it is not likely that Greece had ent-
tered into any definite relation whatever with Egypt.
Withdrawn from the sea-coast, and only gradually
lighting their way to it during the period of the Jdg-
ges, the Hebrews could have had no opportunity of form-
ing connections with the Greeks. From the time of
Moses to that of Joel we have no notice of the Greeks
in the Hebrew writings, except that which was con-
tained in the communications of these ancient times,
and it was natural that they should mark the similarity of sound between
יָנָן ייֶרֶם and Ιοάννης, and the application of that name
to the Asiatic Greeks would tend to satisfy in some
measure a longing to realize the Mosaic ethnography.
Accordingly, the O.-T. word, which in the A. V. is
Greece, Greeks, etc., is in Hebrew יָנָן, יאָוָן (Joel iii,
Dan. viii, 21): the Hebrew, however, is sometimes retained (Isa. lxvi, 19; Ezek. xxvii, 13). In Gen. x, 2 the Sept. has καὶ Ἰώνας καὶ Ἑλιας, with which Rosenmuller compares Herod. i, 56–58, and professes to discover the two elements of the Greek race. From Ἰωνας he gets the Ionian or Pelagian, from Ἐλιας (for which he supposes the Heb. original מַעֵלָה), the Hellenic element. This is excessively fanciful. See Elishah.

The Greeks and Hebrews met for the first time in the slave-market. The medium of communication seems to have been the Tyrian slave-merchant. About B.C. 800 Joel speaks of the Tyrians as selling the children of Judah to the Grecians (Joel iii, 6); and in Ezek. xxvii, 13 the Greeks are mentioned as bartering their brazen vessels for slaves. On the other hand, Bochart says that the Greek slaves were highly valued throughout the East (Geogr. Sac. pt. i, lib. iii, c. 8, p. 175); and it is probable that the Tyrians took advantage of the calamities which befell either nation to sell them as slaves to the other. Abundant opportunities would be afforded by the attacks of the Lydian monarchy on the one people, and the Syrian on the other; and it is certain that Tyre would let slip no occasion of replenishing her slave-market. See Tyre.

Prophetic notice of Greece occurs in Dan. vii, 21, etc., where the history of Alexander and his successors is rapidly sketched. See Goat. Zechariah (xi, 13) foretells the triumphs of the Maccabees against the Greco-Syrian empire, while Isaiah looks forward to the conversion of the Greeks, among other Gentiles, through the instrumentality of Jewish missions (lxvi, 19). For the connection between the Jews and the quasi-Greek kingdoms which sprung out of the divided empire of Alexander, see Antiochus; Ptolemy.

The presence of Alexander (q. v.) himself at Jerusalem, and his respectful demeanor, are described by Josephus (Ant. xi, 8, 3); and some Jews are even said to have joined him in his expedition against Persia (Heest. ap. Joseph. c. Apion, ii, 4), as the Samaritans had already done in the siege of Tyre (Josephus, Ant. xi, 8, 4–6). In 1 Macc. xii, 5–28 (about B.C. 180), and Josephus, Ant. xii, 4, 10, we have an account of
an embassy and letter sent by the Lacedaemonians to the Jews. The most remarkable feature in the transaction is the claim which the Lacedaemonians prefer to kindred with the Jews, and which Aesop professes to establish by reference to a book. It is by no means unlikely that two declining nations, the one crouching beneath a Greek-Syrian invader, and the other beneath a Roman yoke, should draw together in the face of the common enemy with which they were so often at war. (I. ii, 91, note) regard the affair as a piece of pompous trifling or idle curiosity, at a period when "all nations were curious to ascertain their origin, and their relationship to other nations." See OIANAS.

The notices of the Jewish people which occur in Greek literature are collected by Josephus (con-
tra Apion, i, 22). The chief are Pythagoras, Herodotus, Chorillus, Aristotle, Theophrastus, and Hecataeus.

The main drift of the argument of Josephus is to show that the Greek authors derived their materials from Jewish sources, or with more or less distinctness refer-
ted to Jewish history. For Pythagoras, he cites Hermippus's life; for Aristotle, Clearchus; but it should be remembered that the Neo-Platonism of these authorities makes them comparatively worthless; that Hermippus, in particular, belongs to that Alexandrian school which maintained that the Hebrews had borrowed their traditions with the philosophy of Greece, and propitiated the genius of Orientalism by denying the merit of originality to the great and independent thinkers of the West. This style of thought was further developed by Iamblichus, and a very good specimen of it may be seen in Le Clerc's written (Itinera, vii, 18). It has been ably and vehemently assailed by Ritter, Hist. Phil. b. i, c. 8. Herodotus mentions the Syrians of Damascus as confessing that they derived the rite of circumcision from the Egyptians (ii, 104). Bähr, however, does not think it likely that Herodotus visited the interior of Palestine, though he was acquainted with the sea-coast. (On the other hand, see Dahlman, p. 55, 56, Engl. transl.) It is almost impossible to suppose that Herodotus could have visited Jerusalem without giving us some more detailed account of it than the merely incidental notices in ii. 139, and iii. 5, not to mention that the site of Κιδουνίς, or Caditys, is still a disputed question. The victory of Pharaoh-
Necho over Josiah at Megiddo is recorded by Herodo-
tus (comp. Herod. ii, 159 with 2 Kings xxiii, 29 sq.). 2 Chronicles xxvii, 2 is singularly like a verse that Josephus should have omitted these references, and cited Herodotus only as mentioning the rite of circumcision. The work of Theophrastus cited is not extant; he enumerates among other oaths that of Corbus. Che-
rilus is supposed by Josephus to describe the Jews in a book now lost; if so, it is the same treatise, withoder other circumstances to affect it, the Greek tongue and Greek feeling spread far and sank deep through the Macedonian dominions. Half of Asia Minor be-
came a new Greece, and the cities of Syria, North Palestine, and Egypt, were deeply imbued with the same influence. See Greece, 2.

The Greeks were eminent for their appreciation of beauty in all its varieties; indeed, their religious creed owed its shape mainly to this peculiarity of their mind, for their logical acuteness was not exercised on such subjects until quite a later period. The puerile or in-
decent fables of the old mythology may seem to a mod-
er reader to have been the very soul of their religion; but to the Greek himself these were a mere accident, or a vehicle for some embodiment of beauty. What-
other the other varieties of Greek religious ceremonies, no violent or frenzied exhibitions arose out of the na-
tional mind; but all such orgies (as they were called) were imported from the East, and had much difficulty in establishing themselves on Greek soil. At quite a late period the managers of orgies were evidently reg-
arded as mere jugglers of not a very reputable kind (see Demosthenes, 4, § 179, p. 813); nor do the Greek states, as such, appear to have patronized them. On the contrary, the solemn religious processions, the sacred games and dances, formed a serious item in the public expenditure; and to be permanently exiled from such spectacles would have been a moral death to the Greeks. Wherever they settled they introduced their
native institutions, and reared temples, gymnasia, baths, porticoes, sepulchres, of characteristic simple elegance. The morality and the religion of such a people had subjects since the fall of the Byzantine empire. The kingdom was enlarged in 1883 by the annexation of the Ionian Islands, which until then had been subject to the sovereignty of Great Britain. The total area in 1881 amounted to 24,970 square miles, the town population in 1881 to 1,856,412, and in 1889 to about 2,179,298.

The great majority of the people of Greece belong to the Greek Church (q. v.), which is in Greece (since 1888) independent of the patriarch of Constantinople, and constitutes a national Church, which the patriarch recognised in 1850 by the so-called Tomos. The supreme management of ecclesiastical affairs is in the hands of a Holy Synod, consisting of five bishops and an officer of the government. At the beginning of the revolution the higher clergy consisted of 20 metropolitan, 5 archbishops, and 12 bishops; in 1869 there were 18 metropolitan, 13 archbishops, and 16 bishops. The number of male monasteries was, on the advent of the regency which was established after the expulsion of the Turks, about 400, and the number of nunneries from 30 to 40, together with about 800 inmates; in 1869 there were 138 monasteries of monks and 4 nunneries, the former with 1,500, the latter with 150 inhabitants. There are about 3905 parish churches, with 8200 priests. The secular clergy and the monks are generally but little educated, but enjoy, nevertheless, great respect among the people, the majority of whom are firmly attached to their Church. For the orthodox Greek Church there are 4 archbishops in Lydia (Chalcis and Eubea, *Etolia and Acarnania, Phthiotis, the metropolis see of Athens, Megara and Egin- nai), with 4 bishops; in the Morea, 6 archbishops (Argo- lides, Corinth, Patras and Elis, Mantinea and Cyarnia, Mystras, Thermopylae, Mani), 6 bishops; in the Archipelago, 1 archbishop (Syros and Tinos) and 3 bishops; in the Ionian Islands, 4 metropolitan, and 3 bishops. The Roman Catholics, who are mostly the descendants of families which immigrated at the time of the Crusades and during the rule of the Venetians, number about 18,000, chiefly in the Ionian Islands, and the Archipelago, and have in 2 archbishoprics, at Naxos and Corfu, and 4 bishops. There are a few thousand Mohammedans in Eubea, and a few hundred Protestants and Jews in the commercial towns.

The labors of Protestant missionaries began in 1829, and have ever since been carried on without intermission. The American Board of Missions, the Episcopal Board, and Baptist Board were all concerned in the work. The Rev. Dr. King, who arrived in Athens in 1829, when it sent out Messrs. Robertson and Hill. These gentlemen, in the outset, started upon the conciliatory course, under the impression that the Greek Church would be freed from its evils by liberal education. On the contrary, it was the Church that was virtually sold to the Greek government, which for a time, gave every encouragement to the American missionaries. In 1830 the representative of the American Board assisted in the establishment of the first college in Greece which was established under government assistance. Soon after this three other missionaries arrived in Greece, who opened schools in the mountains. In 1841, suddenly, and without any apparent provocation, the Church party made war against missionary operations, and attempted to extinguish the Gospel light. These persecutions ended in the banishment of Dr. King from the country. This action became the means of introducing the American Board into the mission field of the Kalopothakes, who had become acquainted with Protestantism in one of the schools of Dr. King, and who had subsequently spent four years in the United States to prepare for missionary work in his country, started in Athens a religious newspaper, the *Star of the East*. In 1869, Dr. King again went to Greece, he found the paper prospering, and two regular Church services were conducted every Sabbath in Athens. In 1869, Dr. Kalopothakes and Mr. Constantine published a daily paper, a weekly paper, and a children's paper, and also a number of cheap religious books. One of the chief results of the Protestant mission has been the increased circulation of the Bible, which is proved by the fact that in 1859, when Dr. Kalopothakes first opened the Bible depot at Athens, he did not sell 100 copies of the New Testament, whereas in 1868 he disposed of 3000.

Popular education has made considerable progress since the establishment of independence. There were 750 primary schools in 1856; 38 pro-gymnasia or Hel- lenic schools, with 165 teachers and 4900 pupils; 11 gymnasia (organized after the model of those of Germany), with 67 teachers and 1160 pupils; an ecclesiastical ('ussian') seminary, and a national university established in 1837, with a library of more than 80,000 volumes, an observatory, and botanical garden. See Wiggars, *Kirch. Statistik*, i, 179 sq., 207 sq. (A. J. S.)

Greek, a term not found in the A.Y. of the O.T., where either Jews is retained, or, as in Joel iii, 6, the word is rendered by Greeks. In Maccabees Greeks and Grecians seem to be used indifferently (comp 1 Macc. i, 10; vi, 2; also 2 Macc. iv, 10, Greek). In the N.T., on the other hand, a distinction is observed, *Eλλανος* being rendered "Greek," and *Ελληνικός* "Grecian." The difference of the English terminations, "The Episcopal Board, a Jew (Rev. op. cit.); etc.", is explained. (See Overkamp, *De distinctiones inter Judaeos et Graecos, et inter Graec et barbaros*, Grvpb. 1782; Amnell, *Hist. E.T. Illustrata*, Upral. 1759. *Ελληνος* in the N.T. is either a Greek by race, as in Acts xvi, 1-6, xviii, 17, Rom. i, 14; or more frequently by a Greek spirit, as in *Eλληνος* properly "one who speaks Greek") is a foreign Jew; opposed, therefore, not to *Ἰουδαίος*, but to *Εβραῖος*, a home-Jew, one who dwelt in Palestine. So Schleusner, etc. according to Salmacius, however.
the Hellenists were Greek proselytes, who had become Christians; so Wolf, Parkhurst, etc., arguing from Acts xii, 20, where 'Æle·lvp·tai are contrasted with 'Iv·w·n·i in 19. The question resolves itself partly into a textual one, Grisbach having adopted the reading 'Ælπρατωι, and so also Lachmann, Tischendorf, and others. See ελεπρατωι.

Christian is a name usually given to the largest branch of the Oriental or Eastern churches (q.v.). It comprehends all those Christians following the Greek or the Greco-Slavonic rite, who receive the first seven general councils, but reject the authority of the Roman pontiff and the last article of the Western Church. The title "Greek Church" is hardly an appropriate one. A communion embracing several other nations and languages besides the Greek, each performing divine worship in its own tongue, and in which, out of sixty-six millions of Christians, perhaps fifty-nine millions are Slavonians, and pray in the Slavonic tongue, cannot properly be called Greek merely because its ritual is derived in great measure (by no means exclusively) from Greek sources, and because it was once united with the Greco-Roman empire (Palmer, Disquisitions, p. 9). The Church is the Holy Orthodox Catholic and Apostolic Church." The Greek Church has not, like the Roman Catholic Church, one head, but consists of eleven different groups, which, in point of administration, are independent of each other (see below, Statistic), though they fully agree in point of doctrine. The Orthodox Eastern or Russian Church as a separate body begins with the interruption of ecclesiastical communion between the pope and the patriarch of Constantinople. After the establishment of the imperial residence at Constantinople, it was the natural ambition of both the bishops of Constantinople and the emperors to enlarge the authority and prerogatives of the see of Constantinople (q.v.). In 861 the first Ecumenical Council of Constantinople gave to the bishops of Constantinople, because it was the New Rome (διὸ τῷ νέῳ τῶν μετὰ τοῦ Πατριαρχείου), the "precedence of honor" next after those of ancient Rome. The canon was not recognised by the churches of Rome and Alexandria, but the authority of the bishop of the imperial residence naturally rose, and in 451 the Council of Chalcedon not only confirmed the precedence already given, but also, under his jurisdiction the dioceses of Thrace, Asia, and Pontus, and grounded the ecclesiastical privileges, in the case of the new as well as the old Rome, upon the political distinction of the two cities. The Roman legates protested against this canon, and pope Leo the Great did not recognize it, but when the emperor Justinian Anaxarios, by an imperial edict, acquired a kind of superiority over the other three patriarchates of the East, and assumed the title of Ecumenical Patriarch. The support given by patriarch Acacius of Constantinople (471-489) to the Hemiotos (q.v.) led in 496 to the excommunication of Acacius, together with the emperor and the patriarch of Alexandria, by pope Felix III, who also charged him with encroaching upon the rights of the patriarchs of Antioch and Jerusalem. For thirty-five years (484-519) the communion between Constantinople and Rome remained interrupted, most of the Eastern bishops siding with Acacius, while those of Syria, Libya, the Caucasian, and Antich, and the converts in the vicinity of Constantinople, ranged themselves on the side of the pope. The withdrawal of the excommunication by pope Hormisdas involved a complete acknowledgement of the supremacy of the pope, and the reunion in 498 of the patriarchs of Constantinople continued, and pope Gregory the Great in vain endeavored to prevail upon the pious John the Faster of Constantinople to relinquish the title Ecumenical Patriarch. The antagonism of the two churches was increased by the support which several of the patriarchs of Constantinople gave to the iconoclast emperors, and by the complete political separation between the East and the West. When Photius, after ascending the patriarchal see, could not obtain the recognition of pope Nicholas, he excommunicated the pope, and arranged the whole Latin Church for her doctrine of the twofold procession of the Holy Ghost and the addition of "Filiusque" (q.v.) to the creed, for the practice of clerical celibacy, and for denying to the pope the power of administering holy communion. As the rival of Photius for the see of Constantinople, Ignatius, was a declared partisan of the pope and the Latins, the struggle for the possession of the see grew added to the animosity of the party of Photius against that of the Latin arch. After the death of emperor Michael III, Ignatius returned to the see, and a council at Constantinople under his presidency, which by the Latins is accounted as the eighth ecumenical council, established in 869 the union between the two churches. After the death of Ignatius in 877, Photius again became patriarch. A council held by him in 879 repealed the decisions of the Council of 869. The papal legates were induced by Photius to approve the acts of this council, which the Greek Church numbers among the ecumenical, but pope John rejected it, and excommunicated Photius and the patriarchs of Constantinople and Alexandria. Leo IV, and his successor, Stephen, accepted the demands of the pope. Peace between the two churches was preserved until the middle of the 11th century, when Michael Cerularius (q.v.) was, though a layman, elected patriarch, contrary to the canons of the Council of 869, and the emperor Leo VI, by the election of Legate to this dignity. Cerularius, in union with bishop Leo of Achirola, the metropolitan of Bulgaria, wrote a letter to bishop John of Trani, in Apulia, who was asked to communicate it to the bishops and priests of the Franks, and appealed to the pope. Besides this, a letter of the pope to Leo IV, and his successor, Stephen, accepted the demands of the pope. Peace between the two churches was preserved until the middle of the 11th century, when Michael Cerularius (q.v.) was, though a layman, elected patriarch, contrary to the canons of the Council of 869, and the emperor Leo VI, by the election of Legate to this dignity. Cerularius, in union with bishop Leo of Achirola, the metropolitan of Bulgaria, wrote a letter to bishop John of Trani, in Apulia, who was asked to communicate it to the bishops and priests of the Franks, and appealed to the pope. Besides this, a letter of the pope to Leo IV, and his successor, Stephen, accepted the demands of the pope. Peace between the two churches was preserved until the middle of the 11th century, when Michael Cerularius (q.v.) was, though a layman, elected patriarch, contrary to the canons of the Council of 869, and the emperor Leo VI, by the election of Legate to this dignity. Cerularius, in union with bishop Leo of Achirola, the metropolitan of Bulgaria, wrote a letter to bishop John of Trani, in Apulia, who was asked to communicate it to the bishops and priests of the Franks, and appealed to the pope. Besides this, a letter of the pope to Leo IV, and his successor, Stephen, accepted the demands of the pope. Peace between the two churches was preserved until the middle of the 11th century, when Michael Cerularius (q.v.) was, though a layman, elected patriarch, contrary to the canons of the Council of 869, and the emperor Leo VI, by the election of Legate to this dignity. Cerularius, in union with bishop Leo of Achirola, the metropolitan of Bulgaria, wrote a letter to bishop John of Trani, in Apulia, who was asked to communicate it to the bishops and priests of the Franks, and appealed to the pope. Besides this, a letter of the pope to Leo IV, and his successor, Stephen, accepted the demands of the pope.
John Lomaterus, to enter into a union with Rome. At the Council of Lyons, 1217, delegates from the Greek Church were present, and they, as well as the emperor Michael Palaeologus, declared in favor of union. But the son and successor of Michael, Andronicus, was a decided opponent of the union, and imprisoned the patriarch. In 1244, the emperor John Palaeologus II, and the patriarchs Philotheos of Constantinople (1268-1287), Niphon of Alexandria, and Lazar of Jerusalem, also re-entered into communion with Rome, and sent to pope Clement VI their profession of faith. At the Council of Ferrara, which began in January, 1438, the emperor John Palaeologus VI, his brother, the patriarch of Constantinople, representatives of the three other patriarchs, many bishops, priests, and officers, and altogether some 700 Greeks and Orientals, were present. After a long discussion of the points differing between unionists, on July 5, 1439, signed by the pope, the Greek emperor, the cardinals, the patriarchs and bishops of both churches, with the sole exception of the bishop Markos Eunikes of Ephesus. See Ferrara; Florina. But this union was short-lived. On the return of the Greeks to their homes, their sects was repudiated by the large body of the priests, monks, and people. The great majority of the bishops themselves yielded to the public pressure and renounced the union, and soon after, in 1458, the fall of Constantinople opened the way for the attempted reconciliation. The patriarchs of Alexandria, Antioch, and Jerusalem declared in 1660 their readiness to accept the union, but, as usual, this declaration bore no practical fruit. Many attempts to effect a general union have since been made, but without effect. Only small bodies of Greeks, especially through the influence of the Catholic government of Poland, have entered into and remained in union with Rome, receiving from the pope permission to retain the use of the Greek language at divine service, and some other peculiarities of the Greek Church. See United Greek Church. Pope Pius IX, on ascending the papal see, invited the bishops of the Greek Church, in a circular letter addressed to them, to re-enter into the union with Rome. The Greek bishops replied by a letter, setting forth their reasons for not complying with the invitation. In 1868 the pope invited the Greek bishops individually to attend the coming council, but this invitation also was declined by every bishop.

The Greek Church comprised within its ancient limits, anterior to the Mohammedan conquests, Greece properly so called, the Peloponnesus, Eastern Illyricum, Asia Minor, Thrace, Thessaly, Epirus, Asia Minor, Egypt, and parts of Mesopotamia and Persia. Her territory in Asia and Africa was in the course of time almost wholly lost in consequence of the advance of the Mohammedans, and with the fall of Constantinople in the 14th century nearly all the ancient sees of the Church in Europe came likewise under the rule of a Mohammedan government. Other portions became subject to the Catholic governments of Austria and Poland, leaving only one single government, that of Russia, as the protector of the interests of the Greek Church. In Austria and Poland the Greek Church suffered some losses in consequence of the efforts of the governments of those two countries to induce the Greek bishops to accept the supremacy of the pope. In European Turkey the Church maintained, on the whole, her ground, as the Turks, though opposing, did not support it. The emperor John Palaeologus and his successors, however, again conceded to the patriarchs the right of appointing the metropolitan of Kieff. In 1164 the patriarch of Constantinople sent a new metropolitan to Kieff without even asking for the consent of the prince; but prince Rostislav, though willing to comply with the will of the emperor, declared that the election of the metropolitan would require the sanction at least of the government. Negotiations of the princes of Russia and the metropolitan of Kieff with the pope for a union of the Russian Church with Rome began in the 11th century. Some of them, in particular in the 12th century, were on the whole repulsed by the large body of the people and clergy in Galicia, and the metropolitan Isidore, who took part in the Council of Florence, really joined the union, but among the mass of the people and clergy it never gained ground. In 1668 the metropolitan Job of Moscow recognized the patriarch of Constantinople the first patriarch of Russia, and was recognized by the other Oriental patriarchs as the fifth patriarch of the orthodox Church. At the close of the 16th century an attempt was made to establish a union between the Russian Church and those of Georgia and Armenia, but it failed in consequence of the intolerance of the Russian patriarch. The attitude of the patriarch towards the metropolitan of Kieff induced the latter, with a number of other bishops of South Russia, and a population of about ten millions, to enter in 1594, at the Council of Brasz, into communion with Rome. The breach between the Russians and the Church of Rome was greatly widened by the elevation of the house of Romanoff to the throne and by the consolidation of the Russian nationality in its hereditary struggle against Catholic Poland. In 1657 and the three following years the Russian ambassador in Constantinople obtained from the patriarchs of Constantinople, Alexandria, Antioch, and Jerusalem an official recognition of the right of Russia to have the patriarchs of Russia elected by the Russian clergy, without obtaining the previous sanction of the Oriental patriarch. The Russian ambassador to Damascus in 1702, Peter the Great left the patriarchal see vacant, and in 1721 put the administration of the Church in the hands of a board of bishops called the Holy Synod. Since then the Church of Russia has been eminently a state church. Though in doctrinal union with the other branches of the Greek Church, it is, in point of ecclesiastical administration, entirely unconnected with them. At home it has been unable to prevent the growth of numerous dissenting sects; but the rapid growth of the Russian empire has made it not only by far the most numerous and important branch of the Greek Church in the present age, but the largest state church in the Christian world. (For a fuller account of the inner history of the Church, see Russia.)

The establishment of the independence of the Hellenic nation for the second time by the revolution of the present century created another independent Greek state church. In 1833, the regency of Greece, at the request of thirty-six metropolitans, declared the orthodox Oriental Church of Greece independent of every foreign ecclesiastical authority, and, after the model of the Russian Church, set up for the administration of the church a "Holy Synod." This independent constitution was recognized by the patriarch of Constantinople in 1836.
GREEK CHURCH

(For a fuller account of this branch of the Greek Church, see GREECE.)

The Reformed Churches which arose in the 16th century made also several attempts to establish an understanding with the Greek Church. The Augsburg Confession and Luther's Smaller Catechism were translated into Greek, and, very early after the Reformation, it was thus possible for the patriarch Joseph of Constantinople through a deacon Demetrius Mysus, who visited Germany in 1558. Another Lutheran embassy of a more imposing character, headed by the well-known Tübingen divines Andreae and Fritzsche, represented the ordinary protestant interest to the patriarchate of Jerusalem (1576 to 1581). But both missions remained without result. Negotiations with the Reformed Churches were opened by the patriarch Cyril Lukaris, who in 1590 issued a decidedly Calvinistic confession of faith. But he was not only unable to carry his Church with him, but also himself deserted and imprisoned; and, to cut off future attempts of this kind, a doctrinal declaration was signed by the patriarchs of Constantinople, Alexandria, and Antioch, and many metropolitans and bishops, which, by clear and decided definitions, draws a marked line between the Greek and the Reformed, in both Cyril's and Lukaris' Lettera. This exposition was generally adopted by the churches, and in a synod held in Jerusalem in 1672 it was adopted as the creed of the Greek Church. (See below.)

Several efforts have also been made by the Anglican churchmen to form a union with the Greek Church, which during the last ten years have received the official indorsement of the English convocations and of the General Convention of the Protestant Episcopal Church of the United States. The plan has found many friends even among bishops of the Greek Church, some of whom are members of a Society for Promoting the Unity of Christendom (see ENGLAND), which comprises Anglicans, Roman Catholics, and Oriental Christians among its members.

II. Doctrine.—The Greek Church, in common with the Roman Catholic, recognizes the infallible authority of the first seven councils. Its particular doctrines are laid down in a number of confessions of faith, among which the most important are, the Confession of patriarch Gennadius (q.v.), and the Confessio orthodoci cæsare episcopis ecclésiæ pontifices. 4. 5. 6. Pe- trus Munch, in a document of 1642, which in 1653 was sanctioned by a synod at Yassy, in 1653 signed by all the archbishops, and in 1672 again sanctioned by a synod at Jerusalem, and declared to be an authentic exhibition of the doctrine of the Church.

The Greeks agree with the Roman Catholics in accepting the rule of faith not alone the Bible, including the Deuterocanonical books, but also the traditions of the Church. They deny the procession of the Holy Ghost from the Son (see FILIOQUE), and reject the papal claim to supremacy and doctrinal authority. They admit the seven sacraments of the Roman Catholic Church, but differ in some of the rites used in their administration. They administer baptism by trine immersion, and confirmation in immediate connection with baptism, even in the case of infants. The right of administering confirmation is conceded to priests only. They do not observe the communion in both kinds, and even to children. (For their peculiarities in the sacraments of extreme unction and priestly orders, see EXTREME UNCTION AND ORDERS.) They forbid marriage altogether to bishops; priests and deacons are forbidden to contract marriage, and, in case of remarriage, must be married more than once, nor to a widow. Married priests must live separate from their wives during the time when they are actually engaged in Church service. They regard marriage as dissolable in case of adultery, and regard four marriages as utterly unlawful. They do not permit the use of grave images, with the exception of that of the cross. They observe four great feast days: the forty days of Lent, from Pentecost to the Feast of Sts. Peter and Paul, the fifteen days before Assumption Day, and the six weeks before Christmas; and, besides, the Wednesdays and Fridays throughout the year are fast days. At divine service they generally use the liturgy of St. Chrysostom, and on certain Sundays and festivals the liturgy of St. Basil. The liturgy of the Roman Church is in the Old Slavonic language; that of the Church in the kingdom of Greece, in modern Greek; that of the Church of Georgia, in the Old Georgian language. Instrumental music is forbidden, but singing is universally in use. The public reading of sermons is at times used, but not being turned towards the east; only at Pentecost is kneeling in use. The sign of the cross is in more frequent use among them than in the Roman Catholic Church, but in a different form. The preaching of sermons is not common; generally a homily is read from ancient collections. Corresponding to the breviary of the Latin Church is the Horologion, which contains prayers for different hours of divine worship, a complete calendar (Menologion), and different appendices for worship. Festivals peculiar to the Greek Church are the consecration of water on January 6 (Old Style) in the church of the Holy Spirit at Jerusalem, and the Jordan, and the orthodox Sunday (Estomiá), with a litany anathematizing heresies and in honor of the imperial patrons, the prelates, and martyrs of the Church.

III. Constitution and Statistics.—The constitution of the Greek Church is, in many respects, similar to that of the Roman Catholic Church. They reject the claims of the pope to a supremacy over the whole Church, and are only willing to recognize him as the patriarch of one great section of the Church. The higher clergy (Archiereis) are the patriarchs, archbishops, and bishops, who have to live in celibacy; the lower clergy are divided into the regular clergy (monks; also called, from the color of their dress, the black clergy) and the secular clergy (also called, in opposition to the regulars, the white clergy, although their dress is, in fact, often of a brown, violet, or other color).

In point of ecclesiastical organization, the Greek Church consisted in 1869 of eleven groups, which were more or less independent of each other, namely, 1. The patriarchate of Jerusalem, which has 15 sees (metropolitan and 1 archiepiscopal). 2. The patriarchate of Antioch, with 6 metropolitan sees. 3. The patriarchate of Alexandria: it has 4 metropolitan sees. 4. The patriarchate of Constantinople, which consists of 100 sees (90 metropolitan and 4 archiepiscopal). 5. The patriarchate of Russia, which has 65 sees (5 metropolitan, 25 archiepiscopal). 6. Cyprus, 4 sees (of which 1 is archiepiscopal). 7. Austria, 11 sees (2 metropolitan). 8. Montenegro, 1 see. 9. Montenegro, 1 metropolitan see. 10. Greece, 33 sees (the archbishop of Athens is ex officio president of the Holy Synod). 11. Rumania, 4 bishops in Wallachia and 3 in Moldavia. The people of Servia and those of Bulgaria desire for their bishops a similar independence of Constantinople. The statistics of the Greek Church, reported in 1869, were as follows:

<table>

For fuller information on the several branches of the Church, see the articles RUSSIA; TURKEY; GREECE; AUSTRIA; SERBIA.
GREEK CHURCH, UNITED

Greek Church, United. This is the name of those Christians who, while following the Greek rite, observing the general discipline of the Greek Church, and speaking Greek in the Church, yet unite with the Church of Rome, admitting the double procession of the Spirit and the supremacy of the Roman pontiff, and accepting all the doctrinal decisions subsequent to the Greek schism which have forces as articles of faith in the Roman Church. They have been allowed to keep the same law of discipline as among the other Greeks. They are also permitted to administer communion under both kinds. The United Greeks are found chiefly in Southern Italy, in the Austrian dominion, in Poland, in the Russian empire, and in Turkey. In Italy they are computed at 80,000; in Austria at about 4,000,000; and in Poland about 250,000. In Russia it is difficult to ascertain what their number is. As regards nationalities in Austria, they are divided into Rumanians and Rutenians—the former being settled in Wallachia, Transylvania, and Eastern Hungary; and the latter in Lower Galicia, and Northern Hungary. The union of the Greek Christians of Wallachia and Transylvania dates from the end of the 12th century. The union of the Gallic. Greeks or Rutenians is of much later date, about the close of the 17th century. The United Greeks, in 1868, had in Austria two archbishops, one for the Rumanian rite at Fogaras (with suffragan bishops at Sâmos-Uyar, Gran Wardenil, and Lagos), and one for the Rutenian rite at Lemberg (with bishops at Premisl, Kreuz, Eperle, and MankaCe). In Russia there is one bishop at Chelim. In European Turkey there is one bishop in Bulgaria; a patriarch in Antichic; three archbishops at Damascas, Emeas, and Tyre, and bishops at Aleppo, Beyroot, Boira, Balbeck, Faraul, Jerusalem, Hauran, and Sidon. See Annuario Pontificio for 1869. (A. S. J.)

Greekish (Eλληνική, Holenisk), another term (3 Macc. iv. 10) for Greek (q. v.).

Greek Language, Biblical Relations of the. In treating of the peculiarities of the Greek language found in the Sept., we may substantially adoptDr. Donaldson's article in Kitto's Cyclopaedia, s. v. The affinities between the Greek and the other branches of the Indo-Germanic family are copiously drawn out by Bopp, Comparative Grammar, etc. (Lond. 1861, 2 vols.). The affinities between the Greek and the German are discussed, as by E. Neumann, and by Neumann, in the G. For its coincidences with the Hebrew, see Philology, Comparative.

Greekish, another term (3 Macc. iv. 10) for Greek (q. v.).

Greek Language, Biblical Relations of the. In treating of the peculiarities of the Greek language found in the Sept., we may substantially adopt Dr. Donaldson's article in Kitto's Cyclopaedia, s. v. The affinities between the Greek and the other branches of the Indo-Germanic family are copiously drawn out by Bopp, Comparative Grammar, etc. (Lond. 1861, 2 vols.). The affinities between the Greek and the German are discussed, as by E. Neumann, and by Neumann, in the Germ. For its coincidences with the Hebrew, see Philology, Comparative.

I. Historical Character.—There has been much discussion as to the peculiar nature of the language used by the Septuagint translators and by the writers of the N. T. It would be useless to attempt to give an account of these discussions in this article. We shall simply indicate the main facts which have come out in the course of these discussions, stating at the same time the theory which seems to account most satisfactorily for the peculiarities of Greek which these writings present.

In the earliest stages of a language the dialects are excessive in number, and, even in small districts, the differences and the peculiar variations of its own. Such a case as this has been the case with Greek; for, though its dialects have generally been reckoned as four, we know that each of these was variously modified in various places. In course of time, however, one of these dialects, the Attic, grew to such a field that the conquestion, and almost all Greeks who wrote books wrote in that dialect, wherever they might have been born. The Attic which they used underwent some changes, and then received the name of the so-called common dialect. This dialect has been used by Greeks for literary purposes ever since the time of Alexander the Great down to the present age.

While Attic thus became the literary language, the various communities spoke Greek as they had learned it from their parents and teachers. This spoken Greek would vary in different places, and it would gradually become very different from the literary language which was used in writings. Now it seems that the language used by the Sept. and N.-T. writers was the language used in common conversation, learned by them, not through books, but most likely in childhood from household talk, or if not, through subsequent oral instruction. If this be the case, then the Sept. is the first translation which was made for the great masses of the people in their own language, and the N.-T. writers are the first to appeal to men through the common vulgar language intelligible to all who spoke Greek. This Greek thus used was, however, considerably modified by the circumstances of the writers; and hence some have, but rather unnecessarily, termed the Greek in question the Hebraistic or Hellenistic dialect. See HELLENISM.

II. Inflection.—Max Müller justly affirms that the grammar of a language is "the most stable part of its development, and therefore the ground of classification in all languages which have produced a definite grammatical articulation" (Lectures on the Science of Language, p. 74). Now the grammar of the Sept. and N.-T. in its very essential features from the common language approximates to the medieval Greek of Proechnodromus in the 12th century, and to the modern Greek of the present day, both of which are simply the language of the common people, as debased by time and vulgar usage. Thus the N.-T. and modern Greek have no dual. In their declension of nouns we find a mixture of dialects, such as, for instance, ας in the genitive singular of proper names in σ; and η in the genitive, and ρ in the dative, of nouns in ρα (στριξ, Acta xxv. 1; μεκρινος, Rev. xiii, 10, etc.). There is in both a change from the second to the third declension in the construct state of nouns in ας (ἄλεπος, θάλασς, ροδος, etc.). The N.-T., however, do not decline them so occasionally as the second declension. Both display great peculiarities in the forms for the comparative and superlative of adjectives, such, for instance, as μεγίστος, μεγίστος of the superlative, by means of the particle α of the genitive in δέμεναι. This is now the common form in modern Greek, δέμεναι being contracted into δέμαι.
person singular in the present passive or middle ends in modern Greek in the regular σας; so in the N.T. καὶ ἐξέστησεν καὶ ἔδεικνυτο. The third person plural of the imperfect active of contracted verbs in modern Greek ends in σας; so in Sept. and N.T. ἡδονέωσέν ἐμοί. There is a striking similarity in the conjugation of verbs in both. Both have a tendency to form all the parts of the verbs. But there are differences in the inflection with augment. Both avoid the use of verbs in μι, both generally strengthen true verbs by the insertion of a ν. Sometimes they change the vowel ε into α, as εἰσέλθη, in Jude 23 (see Cremer, s. v. εισέλθη). In- stance of this peculiarity be found in our texts of the classical writers, and a still larger number in our manuscripts of them; but it is to be noted that in them they appear as ritaries; in the New Testament their occurrence is more frequent, and in modern Greek they have passed into customary forms. Some of these forms have been set down as Alexandrian or Macedonian, but Sturz (De Dialecto Macedonicum et Alexandrinorum, Lipsiea, 1808) has entirely failed to prove that there was either a Macedonian or an Alexandrian dialect. The Macedonian and the dialect of the Hellenic forms ad- duced as Alexandrian which are not to be found in some earlier dialect. In fact, there is nothing in any of the statements to which he appeals to contradict the opinion that Alexandrians, like other Greek-speaking people, have developed up various dialects of their spoken language. The written language of the Alexandrians, as we know from the works of Philo and other residents in Alexandria, was the so-called "common dialect." Moreover, the Greek of the New Testament is to be found not in writings of any special locality, but in writings which made no pretensions to literary excellence, such as the fragments of Hesiodus, some of the apocryphal gospels, the apostolic constitutions, the liturgies, the Chronicon Paschale, and Malaee.

III. Syntax.—Here the peculiar elements that mixed themselves with the common spoken language in the N.T. writings make their appearance. The Hebrew element especially is noteworthy. The translators of the Septuagint went on the principle of translating as literally as possible, and consequently the form of the sentences is essentially Hellenic. Some of the writers of the N.T. were themselves Jews, or derived part of their information from Jews, and accordingly the form of portions of their writings, particularly in narrative, is influenced by Hebrew modes. At the same time, too much stress is not to be laid on the Hebrew influence, for the writers sometimes to differ from the classical types, not because they were Jews, but because they were simple plain-speaking (την γλωτταν εἰς τοὺς Ἑβραίους, Euseb., Hist. Eccl. iii. 24) men, who cared little about roundabout sentences. The Hebrew element shows itself in particular phrases and constructions, as in παίζειν τινα μετα τρισθαι; but the amount of this Hebrew element is not so great as it has often been supposed to be, and in some of the N.T. writers it is scarcely noticeable at all. Generally speaking, the syntax, like the grammar, has a tendency towards modern Greek. It has, like it, frequent recourse to the use of prepositions, and we find such expressions even as άδεστας εἰς τίρας (1 Thess. iv. 8). After the comparative σπάνιο is frequently used instead of ἕν in the N.T.; in modern Greek it is never employed. On account of the rarer use of the optative in which is attached to the infinitive by some of the writers, both the N.T. and modern Greek abound in the use of ἵνα with the subjunctive, and sometimes even with the indicative, as in Revelations. The neuter plural is more regularly joined with a plural than with a singular, and not living with it in modern Greek. Many other peculiarities in which the syntax and inflections of the N.T. and those of modern Greek agree might be noted. For the use of the Greek article, see Article.

IV. Vocabulary.—The words used by the N.T. writers show a still greater variety of elements. 1. Here we notice distinctly, also, the tendency towards the modern language, as, for instance, in the use of ωροφανς, to feed men, in the frequent employment of both synonyms and antonyms; the diminutives in ἔρημος and in τῆς ἐκκλησίας, which had originally the idea of vigor in them, and in a variety of adverbs and conjunctions rarely used by the classical writers. Some of these peculiar uses have been assigned to the supposed Alexandrian dialect; but in the discussions no attempt has been made to determine what may have been characteristic of Alexandrianism, and what may have been common in Greek conversation, though not in Greek writings.

2. In the words we find a Latin element, as might be expected. The Latin words used in the N.T. are not very numerous, but they show plainly that the writers had no other desire than to translate their common language. They do not translate them into Greek, as a scholar of those days or an imitator of Attic writings would have done. We find a few Greek phrases in the N.T. which have evidently been translated from Latin, such as συμβολικος λόγος—commission copula.

3. There are also several Aramaic words used in the N.T., especially by Christ. Most of these words and expressions are of a peculiar nature. They are almost all of them utterances employed on some solemn occasion. They were at one time appealed to as proof that Jesus regularly used the Aramaic in his address to others and to his people; but they have recently been adduced, and with considerable force, to prove exactly the contrary, that Jesus frequently used the Greek language in his public conversations as being more intelligible to all, but that, when powerfully moved or deeply touched, he employed Aramaic words, as being more expressive from their associations (Robert, Discussions on the Gospels, pp. i, ch. iv). Besides this, the Hebrew or Aramaic has exercised an influence on the meanings of some Greek words, as, for instance, in the use of ὁριον for a sex. In several instances, however, where this Hebrew influence has been set down as existing, a more satisfactory explanation is given in another way. Thus ἁμαρτήσειν is taken by some to mean liberality in 2 Cor. ix. 10, because they suppose that ἡμεῖς has this meaning in Psa. cxxii. 9, where the Sept. translates ἁμαρτήσειν. In both cases it may be doubted whether ἁμαρτήσειν ought to receive this meaning, and unquestionably the Greek Epistle to the Ephesians is too much simpler to suppose that Paul looks on liberality as an essential part of righteousness, and righteousness therefore as including liberality.

4. There is also another element in the vocabulary of a peculiar nature. This arises from the novelty of the teachings combined with their verbal moralism. The new thoughts demanded new modes of expression, and hence the writers did not hesitate to use words in senses rare, if not entirely unknown to the classical writers. This fact could not be fully illustrated without exhibiting the results of investigation into various characteristic words, such as ἀμαρτόνων, ἐκκλησίας, ἁμαρτήσεως, ἁμαρτίας, νίπτει, ἁμαρτίας, ἀμαρτίας ἄμαρτον, δόξα, δόξας, δόξα, etc. These results seem to us to form no inconsiderable addition to the proof of the divinity of Christianity, for the grand moral ideas that were expressed by some of them are unique in the age in which they lived, and are much simpler to suppose that Paul looks on liberality as an essential part of righteousness, and righteousness therefore as including liberality.
Like this notion of ζωή, but with them it was a speculation. They are continually reasoning about it. The writers of the N. T. treat it as an unquestionable reality. They found the writers of the N. T. separate from it every notion of material splendor or earthly renown, and use it to denote that spiritual irradiation of the whole man which takes place when God reigns in him, when the image of God is realized in him. Thus we come to God's glory when we fail to present the purity and holiness of his character and image in our characters. Thus the ζωή of the N. T. is purely spiritual and moral. Then, again, it is remarkable how, in the case of words like ἤχος, λαυράς, and βασιλεία, the meaning often of the Scripture writer and the writer who express them by the spiritually purifying power of Christ, which really and entirely cleanses both soul and body (Alexander, Αγαπητοί, τα χάριτα, p. 253). The moral fervor of the writers is also seen in their omission of certain words. Thus the sensuous υπόθεσις is never used except in the expression λακατάμα, which they had of love. The words ἀνθρώπων and τύμπανος are also unknown to the N. T., and, indeed, the writers do not use any word to express mere happiness: μακρακοτός is used several times to denote something more than mere happiness. They avoid any word connected with mythology, such as the compounds of θεός which, with its diminutive, is used in a peculiarly Jewish and Christian sense. The writers of the N. T. are also remarkable for confining a word to one meaning. Thus μυστήριον is a turning of the whole soul from evil to good, a change from evil to good, and another compound μυστήριον, which is used in the same sense, while Justin Martyr uses μυστήριον as a change from good to evil as well as from evil to good, and he employs μυστηριώτατος and μυστηριώτατος, as well as μυστήριον for the same idea.

V. Literature.—The works on the subject of this article are numerous. Many of them are enumerated and criticised in Winer's Grammatik des Neuen Testaments (Gießen, 1858, 8vo), and Schleiermacher's Grundriss der Neutestamentlichen Grammatik (Berlin, 1851, 8vo); see also Lipsius, Bibliae Graeciae Lectura (Lips., 1868, 8vo). Much information will be found in the works of various grammatical authors, such as Lobel's Ephemeris, and Jacob's Achilleu Titaus, and especially in a Glossary of Later and Byzantine Greek, by E. A. Sophocles, published as vol. ii, new series, of the Memoirs of the American Academy (Cambridge and Boston, 1855). Much important and constructive matter is also to be found in the glossaries and articles given in the Pandion, a fortnightly periodical published in Athens.

The best Grammars of the N. T., next the above work of Winer (of which the fourth ed., Leipzig, 1858, was translated by Agnew and Ebbeke, Philadelphia, 1840, 8vo; and the 6th ed., Lpz. 1854, by Masson, London, 1855, 8vo; revised and compared with the 7th ed. by Thayer, Andover, 1869, 8vo), are those of Stuart (Andover, 1841, 8vo), and Trollope (London, 1841, 8vo). The doctrine of the oracle has been especially discussed by Sturtevant (in ed. Loc. 1796, 12mo) and Middleton (1st ed. Lond. 1808, 8vo). The syllogisms have been well treated by Tittmann (Lips. 1829—32, 2 vols. 8vo; tr. in the Bibl. Cabinet, Edinb. 1833—37, 2 vols. 12mo), Trench London, 1854, 8 N. Y. 1857, 12mo), and Webster (London, 1854, 8vo). Grimm's Nov. Test. Heiligenlexikon (Leipzig, 1814, 4 vols. 8vo) contains an account of the N. T. philology with that of the Sept., which his Scholhs Hellenistica (London, 1848, 2 vols. 8vo) extends to a comparison with Josephus, Philo, the fathers, and apocryphal works. The best Lexicons of the N. T. (translated) are those of Parkhurst (ed. Ross, London, 1829, 8vo), Pasor (ed. Fischer, Lips. 1774, 8vo), Schöttgen (ed. Krebs et Spohn, Hal. 1819, 8vo), Simonis (including the Sept., Hal. 1762, 4to), Schleusner (4th ed. Lips. 1791, 4 vols. 8vo), Bretecherneich (2d ed. Lips. 1822, 2 vols. 8vo), and Wahl (2d ed. Lips. 1822, 2 vols. 8vo), remodelled by Dr. Robinson (N. Y. 1850, 8vo). The latest are Wilkius Claris N. T. (Lips. 1868, 8vo), Cremer, Bibl.-theol. Worterbuch der N. T. Gründert (Gottha, 1866, 8vo), and Thayer's Gramm. (N. Y. 1887, 8vo).

Greek Versions of the Holy Scriptures. These, except the modern Greek version of the N. T., are confined to the Old Testament, including the Apocrypha (q. v.).

I. The Septuagint.—This is the most important of all the ancient versions, whether in the Greek or any other language. See Septuagint.

If. Aquila.—It is a remarkable fact that in the 2d century after Christ there were three versions executed of the Old Testament for the use of the Scipanic Jews. The first of these was made by Aquila (אֲקָלוּאָל, אֲקָלוּאָל), a native of Sinope, in Pontus, who had become a proselyte to Judaism. The Jerusalem Talmud (see Bar-Hebraeus, Bibl. Jebusca Rabba, iv, 281) describes him as a disciple of Rabbi Akiba; and this would place him in some part of the reign of the emperor Hadrian (A.D. 117-138). It is supposed that the object of his version was to aid the Jews in their controversies with the Christians; and that, as the latter were in the habit of employing the Sept., they wished to have a version of their own on which they could rely. It is very probable that the Jews in many Greek-speaking countries were not sufficiently acquainted with Hebrew to refer to themselves for the original, and thus they wished to have such a Greek translation as they might use with confidence in their discussions. Such controversies were it (must be remembered) a new thing. Prior to the preaching of the Gospel, there were none besides the Jews who used the Hebrew Scriptures as a means of learning God's revealed truth, except those who either partially or wholly became proselytes to Judaism. But now the Jews saw to their grief that their Scriptures were made the instruments for teaching the principles of a religion which they regarded as nothing less than an apostasy from Moses.

This, then, is a probable account of the origin of this version. Extreme literality and an occasional polemical bias appear to be its chief characteristics. The idiom of the Septuagint is very much different in order to produce what was intended should be a very literal version; and thus not only sense, but grammar even, was disregarded: a sufficient instance of this is found in the rendering of the Hebrew particle בּוּר by σις, as in Gen. i, i, σιν τῷ οὐράνῳ καὶ σιν τῷ γῆς, "quod Graeca et Latina lingua omnino non recipit, a Jerusalem." Another instance is furnished by Gen. v, 5, καὶ ἐπεζην Λέυ συνεκαλείσας τοὺς καὶ οὐσιοπαξιάν ἠτοικα." It is sufficiently attested that this version was formed for controversial purposes; a proof of which may be found in the rendering of particular passages, such as Isai. viii, 14, where ἣν ζείπον, in the Sept. ἥν συνεκαλείσας is by Aquila translated συνεκαλείσας; such renderings might be regarded perhaps rather as modes of avoiding an argument than as direct falsification. There certainly was room for a version which should express the Hebrew more accurately than was done by the Sept.; but if this had been thoroughly carried out it would have been found that in many important points of doctrine—such, for instance, as in the divinity of the Messiah and the rejection of Israel, the true rendering of the Hebrew text would have been in far closer conformity with the teaching of the New Testament than was the Sept. itself. It is probable, therefore, that one polemical object was to meet these criticisms in the New Testament of the Old Testament to appear to be inconclusive, by producing other renderings (often probably more literally exact) differing from the Sept., or even contradicting it. Thus Christianity might seem to the Jewish mind to rest on a false basis. But a really
Daniel, as rendered or revised by Theodotion, has so long taken the place of the true Sept. that the latter version of this book was supposed not to be extant, and it has only been found in one MS. In most editions of the Sept. Theodotion's version of Daniel is still substituted for that which really belongs to that translation. By the Jews Theodotion's version seems never to have been much esteemed. For literature, see Furst, Bibliotheca Judaica, iii, 430 sqq. See Themistius, in Eusebius (Hist. Eccles., vii, 17; Demonstrat. Evang., vii, 1) and Jerome (Praef. in Erezum) to have been an Ebonite; so, too, in the Syrian accounts given by Assemani (Bibli. Orient., ii, 278; iii, 1, 17). Hence, to all intents and purposes, he is a Samaritan. There may have been Ebonites from among the Samaritans who constituted a kind of separate sect, and these may have desired a version of their own; or it may be that, as a Samaritan, he made this version for some of those people who employed Greek, and who had learned to receive more than the Pentateuch. But perhaps to such motives was added (if, indeed, this were not the only cause of the version) a desire for a Greek translation not so unintelligible as that of Aquila, and not displaying such a want of Hebrew learning as that of Theodotion. It is probable that the translation of Symmachus appeared prior to the time of Irenaeus, it would have been mentioned by him; and this agrees with what Epiphanius says, namely, that he lived under the emperor Severus.

The style of the work is good, and the diction periphrastic, pure, and elegant (Thieme, De puriss. Symmach. Lips. 1755; Hody, De Bibli. text. original.). It is of less benefit in criticism than that of Aquila, but of greater advantage in interpretation. It would seem from Jerome that there was a second edition of it (Comment. in Jerem. xxxii; in Noh, iii). For literature, see Furst, Bibli. Jud., iii, 399 sqq. See Symmachus.

V. The Fifth, Sixth, and Seventh Versions.—Besides the translations of Aquila, Symmachus, and Theodotion, the great critical work of Origen comprised as to portions of the Old Test. three other versions, placed for comparison with the Sept., which, from their being anonymous, are only known as the fifth, sixth, and seventh, designations taken from the process which they respectively occupied in Origen's columnar arrangement. Ancient writers seem not to have been uniform in their notation which they applied to these versions, and thus what is cited from one by its number of reference is quoted by others under a different numeral.

These three partial translations were discovered by Origen in the course of his travels in connection with his great work. His knowledge of the Biblical texts that two of these versions (but without designating precisely which) were found, the one at Jericho, and the other at Nicopolis, on the gulf of Actium. Epiphanius says that what he terms the fifth was found at Jericho, and the sixth at Nicopolis, while Jerome speaks of the fifth as having been found at the latter place.

The contents of the fifth version appear to have been the Pentateuch, Psalms, Canticles, and the minor prophets: it seems also to have been referred to in the Syro-Hexaplar text of the second book of Kings: it may be detected in all the Hexaplar books in the Syro-Hexaplar text of the Christian doctrine of the New Testament. It appears from Jerome (in Jer. xxix, 17) that there were two editions of Theodotion's version.

There can be no doubt that this version was much used by the Alexandrian tradition. In the text of the Sept. were adopted from Theodotion: this may have begun before the Biblical labors of Origen brought the various versions into one concepctus. The translation of the book of Daniel by Theodotion was substituted for that of the Sept. in ecclesiastical use as early as at least the first part of the 9th century. Hence
when he executed his work, or else the hand of a Chris-
tian scribe must have meddled with it before it was
employed by Origens, which seems, from the small in-
terval of time, to be hardly probable. For in Hab. iii,
15, the translation runs, Ἵθ νηθετ ὀδος των λαω
των έαν ηρωη τον ραυμη των σω\nOf the seventh version very few fragments remain. It
has since contained the Psalms and minor proph-
phets, and the translator was probably a Jew.
From the references given by Origens, or by those
who copied from his columnar arrangement and its
results (or who added to such extracts), it has been
thought that other Greek versions have been of.
Of these, Εκθεσις probably refers to the Hebrew text,
or to something drawn from it; δι Σεφος, to the Old
Syrian version; το Σαμαριτανικον, probably a refer-
tance to the Samaritan text, or some Samaritan glos;
ο Θεληματις έ Αλλος, δι ιεραιτσιους, some unspeci-
ified version or versions.
The existing fragments of these varied versions are
mostly to be found in the editions of the relics of Ori-
gen's Hexapla, by Montfaucon and by Bahrth. (See
Epiphanius, De Ponderibus et Mensurae, cap. 17; Euse-
bius. Patrum. eccl. vi. 15; Jerome, Comment in T N. cap.
3.; Apology contra Ruffin ii. 84; Hefele, p. 560, sq.) See
Origens.
VI. THE GRECO-VALENTIAN VERSION.—A MS. of the
11th century, in the library of St. Mark at Venice, con-
tains a peculiar version of the Pentateuch, Proverbs,
Ecclesiastes, Canticles, Ruth, Lamentations, and Da-
niel. All of these books, except the Pentateuch, were
published at the Aldisdon at Strassburg in 1784; the
Penta-
tateuch was edited by Ammon at Erlangen in 1790-91.
The version itself is thought to be four or five hundred
years older than the one MS. in which it has been trans-
mitted; this, however, is so thoroughly a matter of
opinion, that there seems no absolute. The author was
missing that one MS. may not be the original, as
well as the only one in existence. In any case, the MS.
cannot be considered earlier than the 14th century, or
the version earlier than the 9th. It is written in one
very narrow column on each page; the leaves follow
each other in the Hebrew order, so that the book begins
at what we should call the end. An examination of
the MS. suggested the opinion that it may have been
written on the broad inner margin of a Hebrew MS.,
and that for some reason the Hebrew portion had been
cut away, leaving thus a Greek MS. probability unique as a payment arrangement. As to the translation
itself, it is on any supposition too recent to be of im-
portance in criticism. It may be said briefly that the
translation was made from the Hebrew, although the
present punctuation and accentuation is often not fol-
lowed, and the translator was no doubt acquainted with
some other Greek versions. The language of the trans-
lation is a most strange mixture of astonishing and ca-
cophonous barbarism with attempts at Attic elegance
and refinement. The Doric, which is employed to an
answer to the Chaldean portions of Daniel, seems to be an
indication of his allowable affinities. The author was
probably a Christian of Byzantine, but not of Jewish ex-
traction. (See Eichhorn, Allg. Bibl. iii. 371; v. 748;
vii. 198; Dahler, Vers. Græc. Argent. 1786.) See
Vetride-Grekke.
Green is the rendering in the A.V. of the follow-
ing term in the original [see Color]: prop.
some form of the root πρώτος, πραγματικός, to be pale green, as grass or
an affrentlyed person, χαρακτις; also Νερός, de ake, early vegetation; other less appropriate or less usual
words so rendered are Ρεχθος, Gen. xxx. 97; Judges
vii. 8; Ezek. xxvii. 44; xx. 4; 47, more with sa (as in
Num. xi. 10), like πραγματικός. Like xxiii. 21, and like ἄρος, ἀριστίς, ἄρος, in Sxxi. 16, ἀριστίς, ἀριστίς, verdant with
foliage (in connection with "tree", etc., "fresh" in Pss. xxii. 10; "flourishing" in ver. 19); but in Esth.
6, the word is ναρκοτις, κάρπος, fine linen (q. v.). i. e. κάρπος, carassin. See also Zan (of Corn); l Fig.
Green, Aabbel, D.D., an eminent Presbyterian
divine, was born at Hanover, Morris Co., N. J., July
17, 1822. He was educated at Pennsylvania College,
where he graduated with high honors in 1844. He
was immediately appointed tutor in the college, and two
years after professor of mathematics and natural philos-
ophy. He was licensed to preach by the presbytery of New Brunswick in Feb.
1886, and, after declining a call from the Independent
congregation of Charleston, S. C., accepted one from
the Second Presbyterian Church in Philadelphia,
where he was installed in May, 1877, as colleague of the
Rev. Dr. Sproat. In 1878 he was elected a mem-
ber of the American Historical Society, and in 1790
the General Assembly of the Presbyterian Church,
where he moved for a renewal of communications with the
College of New Jersey. He was a graduate of the
University of Pennsylvania in 1792, and in the
same year was appointed chaplain to Congress, which
office he held until 1800. In 1812 the College of New
Jersey was destroyed by fire, and Dr. Green,
who had been one of the trustees since 1780, was
appointed to fill the place of the president, Dr. Smith,
while the latter went on a collecting tour through the
States. The establishment of a Presbyterian Theo-
logical Seminary was first proposed in the General As-
sembly of May, 1809, and a board of directors having
been appointed in May, 1813, the latter charter for
Green for their purposes; he held the office until his
death. Being elected president of the College of New
Jersey in August, 1812, he accepted the appointment,
and resigned his pastoral charge. In the same year
he was made LL.D. by the University of North Caro-
olina. At the college he delivered a series of lectures
on the Abject's Catechism, which were afterwards
published by the General Assembly's Board of Publ-
ication (2 vols. 12mo) and in the Christian Advocate.
Reigning the presidency of the college in September,
1822, he took up his residence at Philadelphia, where he
published the next two years the Christian Advocate,
a religious monthly, writing the greater part of it him-
self, besides preaching to an African congregation for
two years and a half, and often supplying the pulpets
of other ministers. He died May 19, 1848. He
was a very abundant writer; his principal works, in addi-
tion to those already named, are, Ten occasional Ser-
mons (1799-1808)—Six Addresses, Reports, etc. (1793-
1836) History of Presbyterian Missions (1 vol.)—
Discourses on the College of New Jersey, together with a
History of the College (1832) etc. He also superintend-
ed an edition in 1827 of R. H. Pown's Left in MS. a biography of that great man. For several
years, beginning with 1804, he was the responsible ed-
itor of the General Assembly's Magazine. See Life of
Aabbel Green, V.D.M., prepared for the Press at the Au-
thor's request by R. H. Jones (N. Y. 1849, 8vo); Sprague, Annals of Edu., ii. 715; Allibone, Dict. of Authors, i. 741;
Green, William, a divine of the Church of Eng-
lund, was a fellow of Clare Hall, Cambridge, and after-
wards rector of Hardingham, Norfolk. He wrote a
New Translation of the Psalms, with Notes (Loud.
1849),—A New Translation of Isaiah, with Notes (ch.
xiil-xliii, and Poetical and Doctrinal and Others.
An Old Testament, translated from the Hebrew, with
Notes (Camb. 1781, 4to). He died in 1794.—Europ. Mag.
GREENE, Thomas, bishop of Ely, was born at Norwich in 1586, and educated at Benedict College, Cambridge, of which he obtained a scholarship, and in 1608 a fellowship. After numerous prebendal, he obtained the vicarage of St. Martin’s-in-the-Fields, Westminster, in 1716. This he held in commune with the bishopric of Norwich, which he was consecrated on October 8, 1721, but was thence translated to Ely on September 24, 1728. George I, soon after his accession, appointed him one of his domestic chaplains. He died in 1738. He wrote, 1. The Sacrament of the Lord’s Supper explained to the meanest capacities (London, 1710, 12mo) – 2. The Principles of Religion expounded for the Weak (id. 1726, 12mo) – 3. Four Discourses on the Last Things (London, 1784, 12mo.) – Hook, Eccles. Bibl. vol. v.

Greenfield, William, a celebrated linguist, was born in London April 1, 1799. In his thirteenth year he was apprenticed to a London bookseller. His love of the study of languages was so great that, while laboring all day in his master’s service, he acquired successively Hebrew, Greek, Latin, and several modern languages. In 1822 he submitted to Mr. Bagster, a publisher in London, the prospectus of a Polyglot Grammar of nearly thirty languages, on the principles of construction. He was authorized to publish the Complete Bible issued by Bagster in 1826. In 1828 he edited an edition of the Syriac New Testament, and in 1830 he prepared a revised translation of the N. T. into Hebrew, both for Bagster’s Polyglot. He published a Lexicon of the Greek N. T., followed by an abridgment of Schmidt’s Greek Concordance. In 1830 he was appointed editor of foreign versions to the British and Foreign Bible Society. His laborous strength, his death, and died Nov. 5, 1831.

Kitto, Cyclop. p. 178; Allibone, Dict. of Authors, i, 794; Imperial Magazines, Jan. and Feb. 1834.

Greenham, Richard, an English Puritan divine, was born at or near Oxford, and educated at Pembroke Hall, Cambridge. He was for many years pastor of Drayton, near Cambridge, where he died in 1651. He published a number of sermons, treatises, etc., which, after his death, were collected and published under the title The Works of the Rev. Richard Greenham, revised and published by H. E. (7th ed. Lond. 1821, fol.).–Darling, Cyclop. Bibliographia, i, 1812.

Greenhill, William, M.A., a learned and pious Nonconformist divine, was born in Oxfordshire. He entered Magdalen College, Oxford, in 1604, and obtained the living of Stepney in 1655. Having joined the Independents, he was one of the Commissioners of the Restoration, and died about 1677. His principal work is An Exposition of the Prophet Ezekiel, with useful Observations thereon (Lond. 1648, 5 vols. 4to). A new edition, revised and corrected by Sherman, was published in 1659 (Lond. imperial 8vo).

Darling, Cyclop. Bibliographia, i, 1812.

Greenland, a region in North-eastern America of unknown extent northwards, stretches from its southern extremity, Cape Farewell, along the Atlantic and Arctic Oceans on the east, and Davis’s Strait, Baffin’s Bay, and Smith’s Sound on the west. It obtained its name from an Icelandic, Eric Raud (the Red), who led thither an expedition in 986 or 986, and founded two settlements on the west coast, called the Oestre and Westre Bygd (the east and west colonies). About centuries afterwards, the Westre Bygd was destroyed by the pestilence called the “black death,” combined with swept the arctic seas; and a century after this, the Oestre Bygd, in which the south of Greenland was visited, and its west coast explored, successively by Frolicher, Davis, and Baffin, the latter having advanced as far as lat. 78° N. (the limit of the inhabited country). More recently Dr. Kane has extended his explorations as far as lat. 82° 30’ N., or within 590 miles of the north pole. In 1868 and 1869 new expeditions to explore the coast were sent out from Germany. The most important incident in connection with this bleak region is the settlement, in 1711, of Hans Egede (q. v.), a Norwegian clergyman, at Godthaab (lat. 64° N.), and with him a colony of 43 men. The colony was supported by the Danish government till 1721, when the supplies were stopped; but a few years afterwards it was restored, and a new settlement was granted to the mission. Since that time the Danes have established thirteen different colonies or factories along the west coast, seven in North Greenland (north of lat. 67° N.), and six in South Greenland; the total population of the colony being about 10,000, inclusive of 250 Danish and 1000 American settlers. The Danish Society seeks to sustain various institutions formed in Greenland in eight different places. The Moravians, in 1886, supported in Greenland 6 stations, 25 missionaries, 56 native assistants, and their congregations had a total membership of 1501. See Chambers, Cyclop. s. v.; Newcomb, Cyclop. of Missions; Schein, American Ecclesi. Almanac for 1869. (A. J. S.)

Greenaway, Peter, an Indian of the Lake Superior country, one of the first converts under the missionary labors of John Sunday (q. v.), was born in 1807, and became a Christian in 1820. He received license on Sept. 21, 1824, and was subsequently employed as an interpreter to Rev. Mr. Daughtery, of the Presbyterians Board, for several years. June 18, 1859, he was again licensed as a local preacher in the Methodist Episcopal Church; and in 1862 he was admitted into full connection in the Conference, and ordained deacon November 5, 1865. He was in charge of the Ojibway Indian Mission. In 1864 he was again appointed in charge of the Pine River Indian Mission. In 1866 he was ordained elder, and returned to Pine River. He died of quick consumption, April 5, 1886. Among his own people he was an extraordinary influence. He was a laborious student, a good theologian, and a powerful preacher. The Indians in Northern Michigan are greatly indebted to him for their civilization and piety. – Minutes of Conferences, 1886, p. 170.

Greenwood, Francis William Pitt, a Unitarian minister, was born in Boston, Feb. 5, 1817. He graduated at Harvard in 1814, and then pursued his theological studies. He became pastor of the New South Church, Boston, in 1818, but was soon compelled, on account of his health, to go to Europe. He returned in 1821, and passed several years in Baltimore, where he became the Unitarian Minister. In 1824 he was made associate minister of King’s Chapel, Boston, and, after 1827, pastor. In 1837–38 he was associate editor of the Christian Examiner, to which he was an able and frequent contributor for many years. He died August 2, 1843. Dr. Greenwood was a man of rare gifts; an eloquent preacher, and a very accomplished writer. “He gladly acknowledged as Christian brethren those who led a Christian life, though their theological opinions might lead them to exclude him from the fellowship of the saints.” He published Chapel Lane Life, ed. Boston, 1827, 189pp. – Papers was Hymns (1838) – History of King’s Chapel (Boston, 1838, 12mo). – Sermons to Children: – Lives of the Twelve Apostles (1838) – Sermons of Communion (1842). – Sermons on various Subjects (1844, 2 vols. 12mo). – Allibone, Dict. of Authors, i, 786; Crit. Examiner, xxxvii, 227.

Greeting (prop. διαβαίνεται, shalom, peace; χαίρε, to wish joy; also χαῖρε, shawd, to ask after one’s health). See Salutation.

Grégoire, Henri, constitutional bishop of Blais, was born in 1615 near Lavaline, Dec. 4, 1790. He was educated at the Jesuits’ College of Nancy, entered the Church, and became teacher in the school at Pont-Mousson. When the French Revolution broke out he embraced its principles, and in 1789 he was elected a member of the States-general. He soon became distinguished for the boldness of his opinions on civil and
religious liberty; his eloquent efforts in favor of the Jews and the blacks placed him high among the friends of humanity. It was on his motion that the Convention in 1794 abolished negro slavery. He was the first among the clergy to take the constitutional oath. In Sept. 1792, he advocated the abolition of royalty in the Convention, yet proposed also the abolition of capital punishment, intending thus to save the king's life. In the Reign of Terror he had the courage to resist in the Convention the storm of invectives from the tribunes, and the threats from the Mountain. "Are sacrifices demanded for the country?" he said: "I am accustomed to make them. Are the revenues of my bishopric demanded? I abandon them without regret. Is religion the subject of your deliberations? It is a matter beyond your jurisdiction; I demand the freedom of religious worship." Later, he was one of five who opposed the accession of the first consol to the throne. In 1814 he signed the act deposing the emperor, and the next year, as member of the Institute, declined signing the additional act, which led, in the Restoration, to his expulsion both from that body and from the bishopric. He then devoted himself to literary and benevolent labors until his death, April 28, 1831. He had a large share in the foundation of some of the greatest institutions of that period, such as the Bureau des Longitudes, the Conservatoire des Arts et Mâiers, and the Institut National. Notwithstanding his clear reserve to his views of royalty, and his repeated refusals, in the worst periods of the Revolution, to abandon the Roman Catholic Church, he was treated by the authorities of that Church, on their return to power, not merely with neglect, but with cruelty. The archbishop of Paris refused him the last sacraments, except on condition of retracting the constitutional oath taken forty years before, and also refused him Catholic burial! His principal publications are Essai sur la régénération morale, physique et politique des Juifs (Metz, 1798);—Mémoire en faveur des gens de sang noirci. (Dominique, 1798);—La littérature des Nègres: recherches sur leurs facultés intellectuelles et morales;—Liberté de l'Eglise Gallicaine (1826, 2d ed.);—Histoire des sectes religieuses dans les quatre parties du monde (2d ed. 1826, 6 vols. 8vo);—Chronique religieuse (6 vols. 8vo);—Recueil de lettres encycliques: A. maîtres de la religion (18 vols. 8vo);—Hertzog, v. 318; Migne: Carnot, Mémoires de Grigoré (1837, 2 vols. 8vo); Hoefer, Nouv. Biog. Générale, xx., 882.

The different character of the Gregorian tones depends entirely on the places of the semitones, which in the above example are marked with a \( \flat \). Several of the tones have various endings, some as many as four, while the second, fifth, and sixth tones have each only one ending. For a full and interesting account of the Gregorian church music, see N. A. Jansen's Grund-
Greek writer of the first part of the 10th century. Though always called "the monk," he was not, as he did not live in a convent, but practised an ascetic life at his own home. His spiritual guide was St. Basil the Younger, after whose death he wrote two memoirs of him, one of which survives in the Acta Sanc-
torum, March, iii, 667. With many absurd stories, it gives a gory account of the Saint's life, a valuable historical source. Fab-
bricius, Bibl. Græca, x, 206; Cave, Hist. Lit. anno 940; Hoef-

Gregorius Nazianzenus (Gregory of Naza-
lzenus, or Nazianzenus), one of the greatest of the Greek Church Fathers, was born either at Arianzus, a small village in Cappadocia, near the town of Nazianzus, or at Nazianzus, from which he derives his surname, and of
which his father was bishop, or else in the town of Nazianzus itself. The date of his birth has never been precisely settled, but it was probably about A.D. 329 (see Ullmann, Life of Gregory, Appendix II.). His pious mother, Nonna, devoted him when an infant to Christ and the Church. His education, which commenced at Cesarea in Cappadocia, was prosecuted next at Cesarea Philippi, and at Alexandria, and was finished at Athens, where he began a life-long intimacy with the Great. See Basil. He was also a fellow-student with Julian, afterwards the apostate emperor. Gregory, with a quick instinct, discerned the character of Julian even then, and said to one of his friends, "How great a scourge is here in training for the Roman empire!" He then remained at Athens nearly ten years, part of this time he was busy with his learning and rhetoric with great success. About A.D. 386 he returned to Nazianzus, where he intended to enter upon civil life. Shortly after he was baptized, and consecrated himself anew to the service of God, re-
solving the对象 of eloquence to serve no interests but those of God and the Church. But for his aged father, he would probably at this time have gone into the desert to lead an ascetic life, at least for some years. At home he remained, and devoted himself to the study of the Scriptures, living by a rule of life (the strictest self-denial). About A.D. 389 he visited Basil in his retreat, and remained a short time with him in the practice of ascetic and devotional acts. Returning home at the request of his father, probably to aid in the settlement of a difficulty into which the aged bishop had fallen by signing the Arimenian formula, which he denied. A.D. 389. Gregory, the amasius makes it A.D. 573. One of his friends, Anatolius, was put to death with severe tortures on a charge of magic, and the people of Antioch accused Gregory of complicity with him, but he was acquitted. His enemies then changed their strategy with incessant with his own sister: of this, too, he was acquitted. Weary of con-
tention, Gregory gave up his See to Anastasius, and soon after died (about A.D. 554). He distinguished himself by his hostility to the Aeccepl (q.v.). When the imperial troops rebelled in Persia, Gregory brought them back by an oration, which is preserved by Ev-
anglius, under the title Μανογορια πτος του σπραυτος; he wrote also λογος εις τις μαθροφές (σειρείας in μαθροφές 
μαθροφές); and both are given in Gallandi Bibl. Patrum, t. xii. See Evanglius, Hist. Eccl. v, 6, 18; vi, 4, 11, 18, 24; Smith, Dict. of Gr. and Rom. Bibl. and Art., i, 338; Hoefner, Nova. Bibl. Générale, xxxi, 876.

Gregorius Cassianarius (Gregory of Cas-
seus), a presbyter of the city of that name in Cappadocia in the 10th century. He wrote a life of Gregory of Na-
zialzenus, which is given in a Latin version by Billenas, in his edition of Gregory of Nazianzus. It is also in
Surius, Vit. Sanc. May, 121. We have also of Gregorius of Grecian Art, in Patres Neniae in Comment. No-

Gregorius Monachus (Gregory the Monk), a
Iii, 32
if against a personal enemy. "He takes eloquence away from us," he says, "as though we were thieves who had stolen it." Elsewhere, addressing the hearers, he writes: "Everything else, riches, birth, glory, power, and all the vain pomps of earth whose brilliancy vanishes like a dream, I willingly abandon to you; I am willing to abandon all the hope which divine eloquence has put above things visible." And again: "It is our duty to render thanks unto God that eloquence has again become free." These two discourses, it must be admitted, are really nothing but pamphlets, exhibiting little of the charity and mildness which one would expect from a Christian, and was, in fact, bishop of the enemy. There is, nevertheless, a certain grandeur in the indignation which Gregory pours out against Julian. At the close of the second discourse the orator grows calmer, and endeavors to prevent revenge being taken on the partisans of Julian: he says: "Let not the facility of avenging ourselves lead us to forget the necessity of accommodating ourselves to God." Let us leave to God's judgment the chastisement of those who have offended us and be satisfied with seeing the people openly hissing our persecutors in the public places and in the theaters." Gregory, in his discourses with the people, is near being easily interrupted. Gregory had, in 365, brought about a reconciliation between his friend and Eusebius of Cæsarea. The latter dying in 370, Basil succeeded him as archbishop, and Gregory came to visit him in the year following. There was a contest between Basil and Anthimus, bishop of Tyana in Cappadocia, who pretended to be metropolitan of the province. Basil, in order to secure a useful ally, offered Gregory the bishopric of Saisina, a small unhealthy place on the frontier of the two provinces which divided Cappadocia. Gregory, after declining for some time, finally accepted, and was ordained bishop in 372; but the press of business and his recent ascetic life made him impatient of the office. He retired to Nazianzus, a bishopric without a bishopric, of Saisina, and spent his time in the solitude of the desert. The hermits, whom he assisted in the government of his church, he taught the people, defended the Church against the vexations of the Roman governors, and by his eloquence and spirit exerted that kind of religious supremacy which, in the early ages, formed part of ecclesiastical government. Toleration, ascribed to the christienne au quatorzième siècle, p. 183). Losing his father and mother almost at the same time (at A.D. 374), he retired to a convent of Seleucia. He was still there, living in a calm which, as he said himself, "the silence of heretics" could not disturb, when he heard of the death of Basil in 379. It affected him deeply, and he wrote a letter of encouragement and consolation to Gregory of Nyssa, the brother of his deceased friend. The Church of Constantinople had been for forty years a prey to Arianism, when Gregory was chosen as the most proper person to bring it back to orthodoxy. Though unwilling to be drawn out from the calm retreat so much enjoyed, Gregory permitted himself to be led by the advice of his friends and the interests of the Church. His emaciated appearance, the marks of severe penance and of sickness, and his voice, which had a pathetic monotony, gave great merit to the laughter and irony of the heretics at Constantinople. The orthodox had not a single church of their own in Constantinople; Gregory was therefore obliged to preach at first in a private house, which gave place, after a short time, to the chapel of the monastery of the episcopal palace of the real father of faith. He taught and defended the Nicene Creed before crowded audiences attracted by his eloquence. It is then he was surnamed the Theologus, on account of the profundity of his learning. His success excited his enemies still more against him and his life was several times in danger. Peter, patriarch of Alexandria, who had appointed him bishop of Constantinople, sided afterwards against him, and favored the pretensions of a synodical philosopher called Maximus, who caused the discipline of the Church to be changed. Once, it seems, Gregory said to a friend, "I was not bishop of Constantinople in the year of the world 380." Vainly did Theodotus urge St. Gregory to take possession of the church of St. Sophia at the head of a large troop of soldiers, assuring him of his protection, and causing a council assembled at Constantinople to condemn the majority of the clergy of the new bishop, and annul that of Maximus. He could not put an end to the intrigues and calumnies which pursued Gregory. Some bishops of Egypt and of Macedonia attacked the validity of his election on the plea that he was already bishop of Saisina, and that the canons for the transfer of a poor man to God and to me, Gregory offered to resign, saying, "If my election is the cause of trouble, throw me into the sea like Jonas, to allay the storm, though it was not I who raised it." This proposal was accepted with a haste which could not but wound the susceptibility of Gregory. Before leaving Constantinople, he ordained the people in the church of St. Sophia, and delivered his farewell address—the grandest of all his orations. "Forbear," said he at the close; "farewell, church of Anastasia, as called in remembrance of our piæa trust; farewell, my sons in faith; farewell, gentlemen of our assembly; farewell, all who dwell in Saisina, where, after forty years' wandering in the desert, we had for the first time settled the ark of the covenant; farewell, too, thou great and famous temple, our last trophy . . . farewell to you all, holy abodes of faith. . . . farewell, holy apostles, celestial colonists, my model in the combat I have sustained; farewell, episcopal chair, post at once so envied and so full of perils; farewell, ministers of God at his holy table . . . farewell, choir of the Nazarenes, harmony of psalms, pious watches, holiness of virgins, modesty of women, assemblies of widows and of orphans, glances of the poor turned to God and to me; farewell, hospitable houses, friends of Christ who have succored me in mine infirmities . . . . Farewell, kings of the earth, palaces, retinue, and courtiers of kings, faithful, I trust, to your master, but for the most part, I fear, faithless towards God . . . . . . farewell, exalt heaven your new orator the troublesome voice which displeased you is hushed. . . . Farewell, sovereign city, the friend of Christ, yet open to correction and repentance; farewell, Eastern and Western world, for whose sake I have striven, and for whose sake I am now striving, and for whose sake I shall strive, until the thoughts of this church, who protected me in my presence, and who will protect me in my exile; and thou, holy Trinity, my thought and my glory, may they hold fast to thee, and mayest thou save them, save my people! and may I hear daily that they are increasing in knowledge and in virtue." On his way to exile Gregory stopped at Cæsarea, where he delivered a funeral oration on St. Basil. In the year 382 he retired to Aranzus for quiet and repose. In 383 Theodosius invited him to take part in a council held at Constantinople. He declined, saying, "Tell the truth, I will always avoid these assemblies of bishops; I have never seen them lead to any good result, but rather increase evils instead of diminishing them. They serve only as fields for tournaments of words and the play of ambition. He added that, at all events, he would have preferred to die in Constantinople. He remained in retirement until his death in 389. A garden which he cultivated, a fountain, and the shade of a few trees, composed all his enjoyments. He divided his time between prayer and the writing of poems, in which he expressed his thoughts, hopes, and longings. He was essentially a naturally inclined to melancholy and melancholy. He is one of the most polished among the sacred writers of the 4th century, and...
ranks first after Chrysostom and Basil. The richness of his imagination, developed in the solitude in which a great part of his life was spent, gives to his writings a character which few contemporaries of men most intimate with the writers of that age. His letters are full of playful sprightliness, sometimes tinctured with a slight under-current of harmless irony. A severe critic might show some passages bordering on declamation and bombast. But these faults were general at the time in which he lived; and a writer, however great, always bears more or less the imprint of his day. He is commemorated as a saint in the Roman Catholic Church on May 9, in the Greek Church on the 25th and 30th of January.

St. Gregory the number of poetical pieces. During the reign of Julian, when profane literature was a forbidden pursuit for Christians, Gregory, considering it as a powerful aid to piety, attempted to supply the wants of his brethren by means of religious poems on the plan of the classics. He accused of stupefaction and ignorance (ναυτικοί καὶ κακοί ἀλόγοι) those who attempted to prevent the study of literature. "Most of his poetical works are religious meditations, which, in spite of the differences of time and manners, have still many points of affinity with the poetical reveries of the days of sceptical scepticism and social prostration" (Villehardouin, "R. Litt. 226 s. c. IV° siècle," p. 139). Gregory wrote also a large number of discourses or orations, both while administering the diocese of Nazianzum for his father and while defending orthodoxy at Constantinople. Among those discourses are funeral addresses and paeonies, e.g. those of Athanasius and Basil; inuncteas, the two discourses against Julian; σερμόνα on questions of morals, discipline, and dogmas. Most of those written in Constantinople, while he was opposing the Arians and Macedonians, are of the latter kind. These discourses are 156 in number. Some critics claim that the 45th, 47th, 49th, 50th, and 53d cannot be genuine. The Letters of Gregory amount to 242, on all subjects; some of them are quite uninteresting except as they contribute to throw light on the character of Gregory and of his age. Gregory of Nazianzus has often been named as the Ignorance (ἀναγνώσις) of his times, which is now generally attributed to Gregory Thaumaturgus. The Poems of Gregory number 156, differing very much from each other in length, subject, and metre; we find among them religious meditations, devotionals, literary compositions, 228 small pieces, which were collected and published by Muratorii in 1769. In some collections of his works is included a tragedy entitled Christ suflering (Χριστὸς παθήσων [ed. by Ellisen, Leipzig, 1855]), which is probably not his.

As a theologian, Gregory shows marks of the powerful influence of Origen. As to the Trinity, he earnestly defended the Nicene doctrines (Orationes, 27-31), and vindicated, against the Apollinarians, the humanity of Christ. In common with nearly all theologians before Augustine, he maintained side by side the doctrines of the necessity of grace and the freedom of the human will.

Gregorius Neo-Caesarianus, or Thaumaturgus, received the latter surname from the miracles ascribed to him. His proper name was Theodorus. He was born in the 3d century, of rich and noble parents, at Neo-Caesarea, in Pontus. He was educated very carefully, and had many religious reading and associations. It is of the church- ism by his father, who was a warm zealot; but losing this parent at fourteen years of age, his inclinations led him to Christianity. Having studied the law for some time at Alexandria and Athens, he accompanied his sister to Cæsarea, and there became the pupil of Orijen, about the year 302 of our Lord. He afterwards continued his tuition, during which he learned logic, physics, geometry, astronomy, and ethics, and what was of infinitely greater consequence, the knowledge of the true God and the Christian Scriptures. When Gregory returned to his native country, he was received with great respect, and he lived a private and retired life, but Pherdinus, bishop of Amasa, ordained him bishop of Neo-Caesarea, in which, and the whole neighborhood, there were only seventeen Christians. Gregory Nyssen, who has written an account of his life, says he was more perfectly instructed in the Christian doctrine by the Egyptian Egyptian, in which he heard and saw the Virgin Mary and St. John discussing together of the Christian faith! When they disappeared, he wrote down carefully all they spoke, which, as Nyssen says, was preserved in Gregory's own handwriting in the church of Neo-Caesarea in his time. There are other legends of miracles wrought by him, among them the following: On his way to take possession of his unpromising bishopric he was benighted, and obliged, through the inclemency of the weather, to take up his lodging in a heathen temple, the doors of which had been barred against him, and his frequent appearances to the priest, and for the offerings which he delivered. Gregory and his companions departed from this place early in the morning, after which the priest performed the usual rites, but the daman answered that he could appear no more in that place, because of him who had lodged there the preceding night. The pagan priest besought Gregory to bring the demon back. The saint laid on the altar a piece of paper, on which he had written, "Gregory to Satan—enter." The devils returned, and the pagan, astonished, was converted to Christianity. When Gregory arrived at the city a vast crowd of people came together, to whom he preached the gospel, and numbers were converted. As the number of believers increased daily, he formed the design of building a church, which was soon effected, all cheerfully contributing both by labor and money. This was probably the first church ever erected for the sole purpose of Christian worship. After having converted all the Neo-Caesareans except seventeen persons, he died full of faith and the Holy Spirit, rejoicing that he left no more unbelievers in the city than he found Christians at the commencement of his ministry. In the year 394 he attended the synod at Antioch, where Paul of Samosata made a feigned recantation of his heretical opinions. Gregory died most probably in the following year, certainly between A.D. 265 and 270. The many accounts of miracles ascribed to him do not rest upon the authority of
his contemporaries. We are chiefly indebted for an account of them to Gregory of Nyssa, who flourished a hundred years after Thaumaturgus, who wrote a panegyric relating to Gregory would not have been evidenced in every wonder of which he received a report without examination. Lardner, however, says that he will not assert that Gregory worked no miracles. The age of miracles was not entirely concluded, and had there been no foundation in truth, the wonderful stories relating to Gregory would not have been believed. He is commemorated in the Roman Catholic Church on the 17th of November.

The creed of Gregory is very important, as showing us how clearly defined was at this time the faith of the orthodox Church. Episcopacy has been debased, but it is received as genuine by Bishop Bull and Dr. Waterland: it is as follows: "There is one God, Father of the living Word, the substantial wisdom and power and eternal express image: perfect Parent of one perfect, Father of the only begotten Son. There is one Lord, Only-begotten of God; it pleases him to signalize his in defence of the orthodox faith, in opposition to the Arians. He drew upon himself the vengeance of that party, and was banished from his see by the emperor Valens about 374. On the death of Valens in 378, he was recalled by Gratian, and restored to the possession of his see. A council was convened by Emperor Gratian, at which the Church of Nyssa to reform the Church of Arabia, and Palestinian bordering upon it, he visited Jerusalem and the holy places, as well to perform a vow as to settle peace and tranquility among them who governed the Church of Jerusalem. When he returned, he informed the emper- orey the emperor allowed him the use of the public carriages, so that, having a wagon at his own disposal, it served him and those who accompanied him both as a church and a monastery; they sang psalms, and observed their fasts as they travelled. He visited Beth-lehem, Nazareth, and the Mount of Olives; however, he was not much edified by the inhabitants of the country, who, he says, were very corrupt in their manners, and notoriously guilty of all sorts of crimes, especially murder. Therefore, being afterwards consulted by a monk of Cappadocia concerning the phenomenon of a luminous column, he replies in the affirmative, "that he does not think it proper for such as have renounced the world, and have resolved to arrive at Christian perfection, to undertake these journeys. Advise your brethren, therefore, rather to leave the body to its fate, that it may go to heaven," but he added: "it is only" "the idea of Gregory of Nyssa concerning pilgrimages. In 381 and the subsequent years, Gregory attended the Council of Constantinople. In this city he pronounced the funeral oration of his sister Macrina, and three years afterwards he was deprived by death of his wife, a woman of many virtues, who, in her later years, devoted herself to religious duties, and has been supposed by some to have become a deaconess. His own death took place in the beginning of the year 400.

As a theologian, Gregory had great reputation in his age. His theory shows independent and original thought, but contains many of the ideas of Origen. He maintained the Nicene doctrine of the Trinity, the doctrine of Redemption, the freedom of the will, faith as the subjective, and the sacraments as the objective means of grace. His style was magnificent, he was an abundant writer, but his abundance too often degenerated into diffuseness; his style drags; his illustrations are often in questionable taste, and, being too fully developed, fatigue the reader. When attempting to be refined, he becomes subtle, and his grander passages on onomastics: have wearied us; one may many passages full of elevated views and true beauty, and animated by a warmth of feeling reaching even to enthusiasm. An analysis of his writings may be found in Clarke, Succession of Sacred Lives, i, 354 sq.; and in Dupin, Hist. of Ecc. Writers, cent. iv. They may be di-

Gregory

Viced into, 1. Doctrinal (chiefly relating to the Ariean controversy), 2. Exegetical; 3. Practical treatises; 4. Discourses; 5. Epistles and Panegyrics. Many of these have been published in separate editions. The first edition of his collected Works appeared at Cologne (1537, fol.), then at Basle (1562, 1571), and at Paris (1572). The first complete edition in Greek and Latin was that of Paris (1615, 2 vols. fol.); an Appendix appeared in 1618. This edition was reprinted in 1638 (edited by Gretzer, 3 vols. fol.). It is a large catalog of the separate editions of Gregory's writings in the Historia Francisca (in a new German version, Kirch. Gesch. 1. d. Franken Würzburg 1855, 1860), and by Giesebrecht (Breslau 1851, 2 vols.). See Löbel, Gregory, in the tours and short period. (Leips. 1838-1850, 2d ed. 1867); Kries, de Greg. Tour., etc. (Vat. 1838, 1850); Moschei, Church History, vol. vi. pt. ii. ch. ii. note 42; Clarke, S. Success. Sacred Literature, ii. 44; Neander, Church History, vol. iii. Dupin, Lectures, t. i. Hist. Litt. de la France, iii. 372; Hoefner, Nov. Biogr. Gén., xvii. 856.

Gregorius of Armenia (Gregory Illuminatus; Greek Photiesus, Armenian Luuaurwoc), first bishop of Armenia and apostle of Christianity in that country (3d century). Others had preached before him, but he was the first to organize Christianity thoroughly. Accurate information about him is wanting. The Bollandists (Acta Sanctorum, September, vol. viii) give a life of him professedly written by his contemporary, Agathangellus, but it is clearly spurious. He is the author of several Homilies, which have been published by his name (Venice, 1837). His name is held in just veneration in the Eastern churches, and he is also a saint in the Roman Calendar, Sept. 30. The United Armenians in Constantinople claim to possess his relics, which, in August, 1869, were transferred from one church to another. — Hoefner, Nouvelle Biogr. Générale, xvi. 868 (where the traditional account is fully given); Moschei, Church History, ii. 225; Malan, Life and Times of Gregory Illuminator (London, 1868). See Armenia.

Gregorius of Betica, bishop of Illiberis (Elvira in the ancient Betica, now Andalusia), 4th century. He is mentioned by Jerome (Chron. anno 371) as a vigorous Arianizer. The Arians, who were his relatives and kinsmen, and strove, but without success, to drive him from his see. Gregory wrote several works, and among them a treatise de Fide, which Jerome styles elegans libellus. The treatise de Fide contra Ariano, which is given as Gregory's in some editions of the fathers, is by Faustinus (q. v.)—Tillemont, Mémoires, x. 272.

Gregory of Heimberg, one of the boldest opponents of papal encroachments in his time, was born at Würzburg in the early part of the 15th century. He studied in the University of Würzburg, and took the degree of L.L.D. about 1430. We next find him at the Council of Basle in company with Eneas Sylvius (afterwards Pope Pius II), who, as appears from a letter to Heimberg in Goldast's Monarchia S. Rom. Imperii (vol. ii, p. 1632 sqq.) fully appreciated the character and talents of his colleague. Eneas took Gregory as his secretary, and the two opposed very successfully the papal encroachments on the domain of the temporal power. Heimberg, however, soon retired to Nuremberg, where he was elected synode, and acquired such reputation that all important questions in civil or ecclesiastical law were referred to his arbitration. His relations with Eneas Sylvius changed on the occasion of the latter's election to the papacy, and when he was finally raised to the see of Rome, the friends found themselves in complete opposition to
Gregory, the patriarch of the Bohemian Brethren. Among the earnest-minded Hussites of the Calixtine party, which began, about 1453, to form around Rokycan, elected but never consecrated archbishop of Prague, and to listen with enthusiasm to his sermons on the取消of the Church, the most prominent was Gregory, surnamed “the Patriarch.” The time and place of his birth are unknown. He was the son of a Bohemian knight, and the nephew of Rokycan, whose sister was his mother. Disappointed in his uncle, who was not willing to be a reformer practically; however, he seems to have decided on the side of the reformers, with a number of his friends, to the barony of Litits, and there founded in 1457 the Church of the Bohemian Brethren, or Unitas Fratrum. Accepting no ecclaiastical office in the same, he remained merely a lay elder, but was the life and soul of the organization. In its internal he wrote and published many letters, doctrinal treatises, and apologetic works, nearly all of which have perished. His doctrinal tendencies were derived mainly from Peter Chelicky, a Bohemian writer, who inveighed with stern rigor, from out of an isolated retreat, against the corruptness of that age. A letter of his about Chelicky [see his article on the Taborites and the Germ of the Moravian Church, in the Presbyterian Review of July, 1864.] In consequence, his views of Christian discipline grew to be extreme, and more than puritanical. These he impressed on the Church. Some of his eloquent points were the following: men of rank must strip themselves of the same, and lay down every worldly office, before they can be received into the Church; no member is allowed to go to law, or to testify before a civil court; judicial oaths are forbidden, and no member may keep an inn, or engage in any trade calculated to advance luxury. His object was to preserve the Church unspotted from the world, amid the fearful degeneracy which prevailed. At the time of his death, which occurred in 1473, at Brandels, on the Adler, in Bohemia, these and other similar regulations were in full force. Twenty-one and a half years later, in 1494, they were formally abrogated, and a more liberal policy was introduced. In the first persecution (1461) which came upon the Brethren, Gregory was frightfully tortured on the rack.—Palacký’s Geschichte der böhmischen Brüder, vol. v. (Prague, 1851), p. 725. The successor of Gregory was the nephew of Rokycan; Geidel’s Geschichte der böhmischen Brüder, vol. i., ch. iii.—The Geschichte der alten Brüderkirche, vol. i., ch. i.—Benham’s Notes on the Origin and Episcopate of the Bohemian Brethren, p. 1-120. (E. de S.)

Gregory, patriarch of Constantinople, was born at Calvritza (Arcadia) about 1740. He studied in the schools of Dimitzana (Morea), Athos, Patmos, and Smyrna; entered the Church, and, after being successively ordained deacon and priest, was, while yet a young man, appointed metropolitan of Smyrna. Most of the churches of the diocese were in ruins, and the Turks opposed their restoration, yet he succeeded in fitting some of divine worship, and endowed himself greatly to the Greek population by his zeal and virtues. In 1758 he was appointed patriarch of Constantinople. When the expedition of Napoleon I. against Egypt took place, the Turks accused Gregory of favoring the French, and deposed him. He withdrew to a convent on Mount Athos, where he buried himself not only in writing religious books, but in learning the art of printing. Being soon after reappointed patriarch, he established a printing-office in the episcopal palace. His duties were interrupted by the politic maneuvers, e.g., the envoys sent on a charge of favoring Russia. He had finally been reappointed a third time patriarch, when the invasion of the Danubian provinces by Ypsilanti in 1821 led
to the rising of the Greeks. Constantinople was their supposed aim, and it was rumored that the Greeks of that city, in the fear of the rising, murdered the Patriarch of Constantinople. The Turkish soldiery were daily killing the Greeks in the streets of Constantinople, and the patriarch's palace was pointed at as the arsenal where Christians kept their ammunition. The position of the Greek clergy, in view of this revolution, was so critical as to render the restoration of the patriarchate daily more critical. Gregory, following the traditions of his Church, which had always enjoined obedience to the temporal powers, excommunicated the leaders of the insurrection. He was intrusted with the custody of the Morousi family, the head of which had been killed. The priests and became a royal pleader. Gregory committed them allowed them to escape, and from that moment Gregory foresaw the fate which awaited him. Pressed to fly by his friends, he refused to leave his post, and on Easter celebrated public worship with all the splendor and solemnity habitual on that occasion among Eastern Christians. He was arrested on leaving the church, thrown into prison, and a few hours later hanged in front of the church as an originator of the insurrection. The chief members of the synod shared his fate, or were thrown into prison of the galleys. The day after the body of the patriarch was thrown into the sea by the Jews, but was taken out, put on board of a vessel, and sent to Odesa, where it was buried with great pomp, June 28. He compiled a Greek Lexicon, of which, however, only two volumes have appeared Constantinople (A.D. 571) as his capital, and the day after the death of his father, when he came into the possession of immense wealth, the greater part of which he devoted to the establishment of monasteries, six of which he founded in Sicily, and one at Rome, dedicated to St. Andrew, into which he retired himself, and was soon after ordained a deacon. Pelagius II sent his son-in-law, John, bishop of Perga, to Constantinople to secure the favor of the emperor, who had been alienated by the ordination of the pope without the imperial consent. He succeeded in his mission. On his return he assumed the government of his own monastery of St. Andrew, and at the same time was secretary to the pope. On the death of Pelagius, Gregory was chosen pope by the clergy and the people, and, much against his will, this election was confirmed by the emperor Maurice (A.D. 590). He was installed as pope Sept. 3, 595.

No sooner was the ordination completed than, according to custom, the new pope drew up his confession of faith, and sent it to the other patriarchs, viz., to the patriarchs of Constantinople, Alexandria, Antioch, and Jerusalem. In this confession he professed to receive the four Gospels, the first four Councils, to reverence the fifth, and assuming the title of Patriarch of Constantinople, adds, "Whoever presume to lessen the persons whom the councils have bound, or to bind those whom the councils have loosed, destroys himself and not them." This is apparent that even in the 6th century the authority of the councils was equal to that of the holy Scriptures. St. Gregory at this time was ready to receive him; for they who were chosen the time which Christ himself foretold; the earth is now laid waste and destroyed with the plague and the sword; all things that have been predicted are now accomplished; the king of pride, that is Antichrist, is at hand; and what I dread to say, an army of priests is ready to receive him; for they who were chosen to point out to others the way of humility and meekness are themselves now become the slaves of pride and ambition. Here Gregory treats the bishop of Constantinople as the forerunner of Antichrist for taking upon him the title of universal bishop. The Jews experienced some degree of favor from him. He assisted Theodolinda, queen of the Longobards, in converting that people to the Catholic faith. He likewise sent the clergy of Sardis, and he notably supported the mission to England to bring the British into relations with Rome. It was previous to his exaltation to the pontifical chair that, seeing one day in the slave-market at Rome some Anglo-Saxon children exposed for sale, he is said to have exclaimed, "They would be indeed not Angli, but angels, if they were Christians," and from that time he engaged his predecessor, Pelagius, to send missionaries to England. See England, Church of. At home he exerted himself strenuously for the preservation of Church discipline. The celibacy of the clergy was riveted upon the Roman system by the measures taken by Gregory. His course of action invariably was directed to strengthen the power of the Roman see; and, in fact, he was the father of the medieval Roman system. He held monastic institutions in great favor, made strict rules concerning them, and granted them special privileges. This feature of his career gained him the title of pater monachorum. One of the marked events of his pontificate was his contest with John, patriarch of Constantinople, and he assumed the title of universal Bishop (A.D. 595), which Gregory called "proud, heretical, blasphemous, antichristian, and abdolical." (Epist. 5, 18), and assumed to himself, in opposition, the title of "Servant of Servants" (Servus servorum Domini). "Whom do you imitate," says he, "in addressing yourself to me, a crafty, fickle, and ungodly man? Whom but him who, swelling with pride, exalted himself above so many legions of angels, his equals, that he might be subject to none, and all might be subject to him?" It was then, in the opinion of Gregory, imitating Lucifer for any bishop to exalt himself above his brethren, and to presume that his see would be a rival to the pope's. The bishops were subject to him, himself being subject to none. And has not this been for many ages the avowed pretension and claim of the popes? We declare, say, define, and pronounce it to be of necessity to salvation for every human creature to be subject to the Roman pontiff," is a decree issued by Boniface VIII in the fourteenth century. "The apostle Peter," continues Gregory, "was the first member of the universal Church. As for Paul, Andrew, and John, they were only the heads of particular congregations; but all were members of the same Church, and none would ever be called universal." The meaning of Gregory is obvious, viz., that the apostles themselves, though heads of particular congregations or churches, were nevertheless members of the Church universal, and none of them ever pretended to be the head of the whole Church, or to have power and jurisdiction over the whole Church, that being peculiar to Christ alone. This agrees with what he had said before, addressing himself to the patriarch, viz., "If none of the apostles would be called universal, what will you answer on the last day to Christ, the head of the Church universal? You who, by arrogating that name, strive to subject all his members to yourself?" For it was not the bare title of universal bishop that thus alarmed Gregory, but the universal power and authority which he apprehended his rival aimed at in assuming the title of Patriarch of Constantinople. While Gregory had been thus engaged, a mure has added, "Whoever presume to lessen the persons whom the councils have bound, or to bind those whom the councils have loosed, destroys himself and not them." This is apparent that even in the 6th century the authority of the councils was equal to that of the holy Scriptures. St. Gregory at this time was ready to receive him; for they who were chosen to point out to others the way of humility and meekness are themselves now become the slaves of pride and ambition. Here Gregory treats the bishop of Constantinople as the forerunner of Antichrist for taking upon him the title of universal bishop.
In the year 596, Gregory sent Augustine, abbot of his monastery at St. Andrew at Rome, to convert those of the English who yet remained heathens, and under his auspices Christianity was established in the northern parts of the island. See Augustine; and England, Church of.

In several contests with the emperor Maurice, Gregory maintained his independence without popular acquiescence or support. He was a master of the Latin idiom, a penetrator of the rational spirit, and the author of the germinal Dieselian Grammar of Science, which has been translated into Latin. See Augustus; and England, Church of.

Gregory was a very voluminous writer. His letters amount to eight hundred and forty; and besides them he wrote a Comment on the Book of Job, comprised in thirty-six books; a Pastoral, or a treatise on the duties of a pastor, consisting of four parts, and, as it were, of four different treatises; twenty-two Homilies on the Prophet Ezekiel; forty Homilies on the Gospels, and four books of Dialogues. The Comment on the Book of Job (Moralia), being rather a collection of moral principles than an exposition of the text. It is translated into English in the Library of the Fathers (Oxford, 4 vols. 8vo). That work and the Pastoral were anciently, and still are, reckoned among the best writings of the Latin Church. They are held in such high esteem by the Gallican Church that all bishops were obliged by the canons of that Church to be thoroughly acquainted with it, and punctually to observe the rules it contained; nay, to remind their assistants of that obligation, it was written in Latin, and was read at the time of the ordination of the bishops.

The last years of Gregory's life were passed in great suffering from gout and other diseases, but he retained his vigor of mind and will to the end. He died March 12, 604. His career, according to the school and the doctrines of the Church, is worthy of imitation by all Christian nations.

See Augustine; and England, Church of.

In theology Gregory was a moderate Augustinian: he held to predestination, but not an unconditional predestination. He held also to the value of good works and penance as restoratives; and, in fact, he furnished a basis for the later system of works of supererogation, etc. He may be called the inventor of the doctrine of Purgatory, and of the modern Romanish doctrines of Masses and Transubstantiation. The better side of his life and character is set forth strikingly by Neander in his Dichterleben. The following extract will show how far later bishops of Rome have wandread his obligation. See also Bulgar. A history of the Church of Rome to the close of the Hase, Church History, § 130; Hook, Eccl. Biog. v., 497; Clarke, Succession of Sac. it., 354; Bayle, Dict. Hist. s. v.; Dupin, Ecclesiastical Writers (7th cent.); Hoefer, Nouv. Biog. Générale, vii. 798; Millman, Litt. Christiano, i, 423-422; Bower, Lives of the Popes (4th cent.); Neander, Hist. of Dogmas, p. 396, 413, 418; Methods Quarterly Review, 1845, p. 524.
II. Pope, was a Roman by birth, and of a patrician family. He was early set apart for the clerical life, and educated in the College of Robert, king of France, at whose time he was librarian to the Roman see. Afterwards he went with Constantine as deacon to Constantinople, and succeeded to the pontificate on Constantine’s death, A.D. 715. He was a strenuous supporter of the powers of the papal see, and did much to establish its supremacy. Himself a Benedictine, he restored the monastery at Monte Cassino, under the severest rule of St. Benedict, as an example to other monasteries. In the year 727 began the famous contest between the emperor Leo Isauricus with the Iconoclasts, or Image-breakers, on one side, and Gregory II, with the papal see, on the other. The pope anathematized the emperor, and condemned the council he had held (to abolish the worship of images), abused his name, vilified his actions, and summoned the French to attack his authority in Italy. He died A.D. 731. His writings are of no great account: fifteen Letters, a Memorial, and a Liturgy are preserved in the Biblioth. Patrum, vol. ix. See Mosheim, Ch. Hist. cent. viii, pt. ii, ch. ii; Cave, Hist. Lit. i, 620; Gieseler, Church Hist. per. iii, div. i, ch. ii, § 4; Dupin, Eccles. Writers, cent. viii.

III. Pope, a native of Syria, succeeded Gregory II, and was a first rate figure of imagery as his predecessor, and contended, with all weapons, against the Iconoclasts (q. v.), and against the Byzantine court. He found considerable difficulty in maintaining his ground against the warlike prince Leutprand, and had recourse to the stratagem of fermenting discords among the Lombards themselves. His reign was an epoch in the temporal power of the popes: he was the first to rule the exarchate of Ravenna as sovereign, and he obtained by his legates (the first sent to France) the homage of Charles Martel, who, however, could not aid him with material force. He died Nov. 28, 741. Some pontificates remain. See Dupin, Eccles. Writers, cent. viii.

IV. Pope, a native of Rome, made pope A.D. 827. By taking, in 833, the part of the three rebellious sons of Louis le Débonnaire against their father, this pretense emboldened himself much with his clergy, especially those of France, who, favoring the cause of Louis, refused to receive either him or his decrees. Gregory wrote a Letter to them, which is among Aegidius’s Works, which shows him to be arbitrary and tyrannical, claiming obedience to him, though against the commands of their prince. There are three other Letters in the same, Concil. vol. vii, and Concillii Miscell., which evince the same spirit of grasping dominion. It was this pope who made the feast of All Saints general throughout the Western Church. He died A.D. 844.—Clarke, Succession of Sacred Lit. vol. ii; Baronius, Anales, t. xiv.

V (Bruno), Pope, was a native of Germany, son of the duke Otho of Carinthia, and nephew of Otho III, king of Germany. The latter caused him to be elected pope May 17, 998, when he was only 24 years of age. Eight days after, Gregory, in return, crowned his uncle Emperor of the West. As soon, however, as Otho had recrossed the Alpe, Crescentius, a powerful senator, noted for his opposition to the previous pope (John XV), foretold a revolution, took the title of consul, drove out Gregory, and appointed in his place a Greek of low birth, Philagathos, bishop of Placentia, who took the name of John XVI. The Council of Pavia (997) communicated both Crescentius and the anti-pope. Otho marched against Rome, and John XVI was made prisoner while attempting to escape. The servants of the emperor tore out his tongue, his nose, and his eyes, and Gregory caused him to be paraded through the streets of Rome covered with the insignia of his office torn into tatters, and sitting bound upon an ass. Crescentius, who had taken refuge in the castle of St. An- gelo, was beheaded, in spite of the articles of capitulation, which guaranteed his life. Otho took his widow away for a mistress. Robert, king of France, who had murdered his cousin Bertha without dispensation, Gregory condemned him to do penance for seven years, deposed the archbishop who had officiated at the marriage, and demanded that Bertha should be discarded. Robert, refusing to comply, was excommunicated; and so great was the fear inspired by this ecclesiastical punishment, that only two persons dared remain in the king’s service, and even they threw into the fire everything he had made use of, for fear of being contaminated by contact with it (P. Damiens, Opera, Paris, 1665, fol. Epist. v). At the end of three years Robert gave up his kingdom, and discarded Bertha, to whom he was much attached. Gregory died Feb. 11 (or 18), 999, not without suspicion of poison. Several letters and patents of Gregory are contained in Baluze, Miscell. vol. vi; five bulls in Ughelli, Bullett. storica, ii, 352—364; iii, 18; iv, 98; two in D’Achery, Spicilegium, vol. vi; one in De Marco, Marco hispanicas, p. 502; and four letters in Labbe, Concil. i, 762. See Baronius, Anales, xvi, 345 sq.; F. Paggi, ii, 262; J. B. de Glen, p. 183; A. Duchesne, i, 338; Hoeffer, Nouv. Ann. Génér. xxii, 789; Hoeffer, Die deutschen Päpste, i, 186.

VI. Anti-pope, was elevated, in June, 1012, to the papal see. He was a man of weak mind and political disposition to Benedict VIII. As he was not recognized by the emperor, Henry IV, he seems to have resigned, and to have ended his life in retirement.

VII. Pope, a Roman, whose original name was JOHANNES GRATIANUS, and who had had great repute for sanctity as a priest; obtained (A.D. 1044) the papal chair by the murder of Pope Gregory IX, and married a girl of noble family. Falling in this, he claimed the seat again, and there were three claimants at once—Benedict IX, Gregory VI, and Sylvester III. Rome was filled with brawls and murders, and Gregory himself wielded the sword with effect! In 1046 Henry III came to Rome, deposed all three of the rival popes, and seated Clement II in the apostolic chair. Gregory died in Cologne A.D. 1048. See Baronius, Anales, t. xvii; Hoeffer, Die deutschen Päpste, i, 224.

VIII. Hildebrand, the greatest man that ever occupied the papal throne. The exact place and year of his birth are not known; yet he is generally supposed to have been born about 1010 or 1020 at Siena in Tuscany, where, it is said, his father was a carpenter. He spent part of his youth at Rome in the service of pope Gregory VI, whom he accompanied in exile after he left Rome by order of the emperor. They went together to the convent of Cluny (France), and Hildebrand’s austerity and asceticism soon gave him such ascendency that he was made prior of the convent, though still quite young. He was not destined to remain long in seclusion. Henry III, after having regained the exclusive right of appointing popes, had made three in rapid succession, the latter of whom, Leo IX (Bruno, bishop of Toul), stopped at Cluny on his way to Italy. Hildebrand’s influence over him became so great that, laying aside the insignia of his office, he went to Rome in the garb of a pilgrim, and declared that his appointment could only be considered as valid if confirmed by the clergy and the people of Rome. His election being confirmed (1049), he called Hildebrand to Rome, and created him cardinal. Guided by Hildebrand’s advice, Leo IX attempted many reforms in the Church. Councils were assembled at Rome, Rheims, and Mayence, at which the pope declared that he was above any man, and in whose influence lay the justifying of cardinals arising from the state of the Church were discussed. The encroachments of lay authority, the laxity of the convents, the immorality of priests, the practice of selling ecclesiastical charges, and their consequent enslavement by the civil authorities, which resulted in filling the Church with persons devoted to the tempo-
rival powers—such were a few of the evils the Church was suffering with. Hildebrand directed all the measures of reform, under the authority of the pope. Leo IX died April 19, 1054. Hildebrand was then sent to the emperor by the clergy and the people of Rome to obtain his assent to the appointment of a new pope. Hildebrand proposed bishop Gebhard; the emperor proposed the archbishop of Milan, who was then only prevailed on, and the new pope was elected in 1055, under the name of Victor II, in the old Roman way, thus rendering the consent of the emperor a mere matter of form. Victor II, urged by Hildebrand, continued the reforms commenced by Leo IX. He assembled councils, and sought to return the Church to the state in which it was in great disorder, and still disturbed by the doctrines of Berengar (q. v.). Both the pope and the emperor dy- ing soon after, Stephen IX, an enemy of the new emperor Henry IV, was made pope. Hildebrand was not consulted about the election. This appointment, which resembled a challenge to the emperor, threatened to cause serious difficulties, and to overthrow the plans of Hildebrand, who wished to withdraw from the emperor the power of appointing popes in a more slow but surer manner. Stephen, however, died soon after his election with the sickle-clothing, the clergy, and the people to await Hildebrand's return before proceeding to another election. This advice was disregarded, and the powerful counts of Tusculum ap- pointed a bishop of Velletri entirely devoted to their interests. Stephen IX, on the death of the name of Benedict X. This election caused great trouble in Rome, and Hildebrand returned in haste from Ger- many. Backed by the power of Germany, he caused the bishop of Florence to be elected pope, under the name of Nicholas II, by an assembly held in Tuscany, and submitted the appointment to the approbation of the emperor in order to secure his protection. At the same time, to avoid the recurrence of irregular elec- tions by means of bribery, as had been the case in that of Benedict, he contrived a new method of election, ac- cording to which the choice should first be made by the cardinal bishops, and afterwards submitted succes- sively to the other cardinals, the clergy, and the people, all “saving the respect which is due to our beloved son Henry, at present king . . . .” Nicholas II dying in 1061, after a reign of two years, new trou- bles arose concerning the same mode of election. The cardinals chose Anselm, bishop of Lucca, under the name of Alexander II, but the Roman nobility and part of the population refused to recognise him, and appealed to the emperor, who assembled at Basle a synod of bishops devoted to his cause, which elected Cadalus, archbishop of Roma, for the name of Honorius II. Cadalus, like the other bishops of Lombardy, had been at open war with the sea of Rome. Had Rome yielded to his election, all the ground gained by Hildebrand would have been lost. Without any hesitancy, Hildebrand recognised the validity of Alex- ander II’s election, and the latter wisely chose the pow- erf ul monk for his chancellor. Cadalus, at the same time, advanced against Rome at the head of a German army, and the two popes, after duly excommunicating each other, fought at the doors of Rome. The Ger- mans were defeated, and Cadalus fled. The young emperor was taken away from his mother’s influence and put under the care of the archbishop of Cologne (Anno or Hanno), who caused Alexander’s election to be confirmed by the Synod of Goslar. Hildebrand, more powerful now than ever, continued to work with all his might for the reformation of the Church and the suppression of simony. About that time an occurrence took place which throws some light upon Hildebrand’s character, viz. his quarrel with one of the most virtu- ous and most austere men of that period, Peter Damian (q. v.). Hildebrand, by the unity of views and unity of aim, they disagreed on some point not known, and after that time the writings of the eloquent bishop are full of proofs of his resentment. At the death of Alexander II, Hildebrand himself was chosen pope in 1073. He accepted the nomination with re- luctance; contemporary writers say that the day of his election was one of great trial to him. This can readily be believed, for none knew better than he the dangers and difficulties of his new position, where he would have to act out the course already prevail- ing in the world for so many centuries. The history of his reign is the political and religious history of Europe in those times.

Hildebrand did not assume his title until he had re- ceived the approbation of the emperor Henry IV, to whom he dispatched messengers for the purpose. The emperor sent his own emissary, who, after a good deal of delay, confirmed his election, and Hildebrand assumed the name of Gregory VII. The great object of Gregory’s ambition was, as he expressed himself in a letter to Hugo, abbot of Cluny, to effect a total reform of the Church in the points already named, as having em- ployed his energies under the preceding popes. Greg- ory determined to remove the root of many of the ex- isting evils by taking away from the secular princes the right which they assumed of disposing of the sees within their dominions. He aimed at nothing less than a restoration of a true spiritual order in the world in the hands of the pope; and his whole reign was a struggle to secure this supreme dominion, which included, in its ideas, the absolute subordina- tion of the temporal powers of the world to the spiritual power of the pope. The emperor Henry IV, licentious and profane, and at war with his wife’s fami- lies, and therefore continually in want of money, was one of the most culpable in respect of simony. He disposed of sees and benefices in favor of vicious or in- capable men, and the bishops of Germany readily en- tered into his views of the pope’s authority. The feudal dependant on the imperial will. Gregory began by admonishing Henry; he sent legates to Ger- many, but to little purpose. His next step was to as- semble a council at Rome in 1074, which anathema- tized persons guilty of simony, and ordered the depos- ition of those priests who lived in concubinage, under which name, however, were also included those who lived in a state of matrimony, and it was decreed also that no one should be admitted to holy orders unless he made a vow of celibacy. This last regulation cre- ated great excitement, especially at Milan, where the custom of priests being married was still prevalent, as in the Eastern Church. “Gregory summoned another council at Rome in 1075, in which, for the first time, kings and other lay princes were forbidden, under pain of excommunication, from giving the investiture of sees and other benefices to any prelate, no matter how noble or illustrious. This was the beginning of the quarrel about the investiture which distracted Europe for many years after, and which may here require some explanation. In the early ages of the Christian Church, it would ap- pear that the body of the clergy, or presbyters of a town or district, together with the municipal council or notables, elected their bishop or chief pastor, and the Christian emperors did not interfere with the choice except in the case of the great patriarchal sees, such as Rome and Constantinople, the candidate to which, after being elected by the clergy and people, was re- quired to wait for the imperial confirmation. The Gothic kings of Italy followed the same system, as well as the exarchs of Ravenna after them, in the name of the Byzantine emperors. At Rome, and probably in the rest of Italy also, the laity participated in the election of their bishop, and till the 10th century; in the East they appear to have been excluded from it sooner. Charlemagne is said by some to have intro- duced the custom of putting the ring and crozier into the hands of new-elected bishops, while he required from the same the consecration by a majority of views and unity of aim, they disagreed on some point not known, and after that time the writings of the eloquent
son of this was, that the churches having been richly endowed by various sovereigns with lands and other temporalities, the incumbents were considered in the life, however, obtained their own disposal the temporalities of the sees, the sovereigns came gradually to appoint the bishops, either by direct nomination, or by recommending a candidate to the electors. Gregory, making no distinction between spiritualities and temporalities, considered the investiture as a spiritual act, insisting that the crown was emblematic of the spiritual authority of bishops over their flocks, and the ring was the symbol of their mystic marriage with the Church; although Sarpi observes, in his Treastise upon Beneftica, there was another ceremony, namely, the consecration of the bishop elect by pious consent of the metropolitan, which was the real spiritual investiture. But Gregory's object was to take away from laity all ecclesiastical patronage, and to make the Church, with all its temporalities, independent of the state. He would not admit of any symbols of allegiance to the emperor, and he contended that the estates of sees had become inseparably connected with the spiritual office, and could no longer be distinguished; and yet he himself had waited for the confirmation of the emperor before he was consecrated. See Investiture. The emperor Henry IV paid no regard to Gregory's excommunication, and he continued to nominate not only to German, but also Italian bishoprics. Among others, he appointed a certain Tedaldo archbishop of Milan, in opposition to Azzo, a mere youth, who had been consecrated by Gregory's legates, as at that time the last remaining metropolitan, which had opened the breach between the pope and the emperor, was lost sight of in the more extraordinary discussions which followed between them. Gregory had been for some time tampering with Henry's disaffected vassals of Saxony, Thuringia, and other countries, and he now publicly commended to the emperor his excommunication of himself from the charges preferred by his subjects against him. This was a further and most unwar rantable stretch of that temporal supremacy over kings and principalities which the see of Rome had already begun to assume. Henry, indignant at this assumption of power, assembled the emperors and abbots, at which many bishops and abbots were present, and which, upon various charges preferred against Gregory, deposed him, and dispatched a messenger to Rome to signify this decision to the Roman clergy, request ing the clergy to recognize a new pope. Upon this, Gregory, in a council assembled at the Lateran Palace in 1076, solemnly excommunicated Henry, and in the name of St. Peter, prince of the apostles, declared him ipso facto deposed from the thrones of Germany and Italy, and his subjects released from their oath of allegiance. Gregory, ob serves Platinus, in his Lives of the Popes, was the first who assumed the right of deposing the emperors, whose vassals he and his predecessors had been considered till then, and who had even exercised the power of deposing several popes for illegal election or abuse of their authority. This bold act of Gregory produced for a time the effect which he had calculated upon. Most of Henry's subjects, already ripe for rebellion, readily availed themselves of the papal sanction, and a diet was assembled to elect a new emperor. Henry, however, obtained a delay, and, the matter being referred to the pope, he set off for Italy in the winter of 1077, and, passing the Alps of Susa, met Gregory at the castle of Canossa, near Reggio, in Lombardy, which belonged to the countess Mathilda, a great friend and supporter of the pope. Gregory would not see Henry at first, having ascended upon his laying aside all the insignia of royalty, and appearing in the garb of a penitent in a coarse woolen garment and barefooted. In this plight Henry remained for three days, from morning till sunset, in an outer court of the castle, in very severe weather. On the fourth day he was admitted into Gregory's presence, and, on confessing his errors, received absolution, but was not restored to his kingdom, the pope referring him to the general diet. Henry then set up a law by which all the former decrees of the simoniacal law, supported by his Lombard vassals, and indignant at the humilitating scene of Canossa, recrossed the Alps, fought several battles in Germany, and at last defeated and mortally wounded Rudolf of Swabia, who had been elected emperor in his stead, and was supported by Gregory. Having now retrieved his affairs in Germany, he marched with an army into Italy in 1081 to avenge himself on the pope, whom he again deposed in another diet, having appointed Guibert, archbishop of Ravenna, as his successor, under the name of Clement III. Gregory had meantime drawn his party by timely conferring on秾 Robert Cuscard, the Norman quor of Apulia and Sicily, who, however, could not prevent Henry from advancing to the walls of Rome; but the city was well defended, and the summer heats obliged Henry to retreat his steps towards North Italy, where his soldiers dispersed among the counties of the em pess Matilda. He repeated the attempt against Rome in 1088, but without success. It was finally agreed that a general council should decide the questions between the emperor and the pope. The council assembled at Rome in 1088, and Gregory did not again excommunicate the emperor, who continued without coming to any definitive result. In fact, Gregory's personal successes were at an end, though the principles of papal supremacy for which he contended took root and grew up in after times. In 1084 Henry is said to have invited the population of Tuscany, which had been discontented with the pope, to enter the city, which he did on the 21st of March, and immediately took possession of the Lateran, the bridges, and other important positions. Gregory escaped into the castle of St. Angelo, and the anti-pope Guibert was publicly excommunicated on Palatine hill, and declared himself to be the new pope. On the following Easter Sunday Henry IV was crowned by him as emperor in St. Peter's church. After the ceremony Henry ascended the capitol and was publicly proclaimed, and acknowledged by the Romans with acclamations. Hearing, however, that Robert Cuscard was advancing from Tuscany to Rome, he left the city and withdrew towards Tuscany. Robert came soon after with his Norman and Saracen soldiers, who, under the pretense of delivering Gregory, who was still shut up in the castle of St. Angelo, plundered and murdered all kinds of persons, and having come out of his stronghold, assembled another council, in which, for the fourth time, he excommunicated Henry and the anti-pope Guibert. When Robert left the city to return to his own dominions, the pope, not thinking himself safe in Rome, withdrew with him to Salerno, where, after conspiring a magnificent church built by Robert, he died, May 25, 1085. His last words were, 'I have loved justice and hated iniquity, and therefore I die in exile.' He probably believed what he said. Gregory's character was in many respects a grand and noble one. But impartial history decides that the good he accomplished was far more than counterbalanced by his fanatical enforcement of celibacy (q. v.), which has continued to this day to demoralize the Romanist clergy, and by his semi-blasphe mous assertions of almost divine power for the papacy. His earlier efforts for ecclesiastical reform were, no doubt, sincere and earnest; but at a later period he was led astray by the ambition of exalting his see over all the dignities and powers of the earth, spiritual as well as temporal. Not content with making, as far as in him lay, the Church independent of the empire, and at the same time establishing the control of the papal authority over the princes of the earth, objects which he left to be completed by his successor [see INNOCENT III], Gregory determined to destroy the independence of the various national churches. His object was to raise the pope to supreme pow-
er over Church and State throughout Christendom. By a constitution of his predecessor Alexander II, which he dictated, and which he afterwards confirmed, it was enacted for the first time that no bishop elect should exercise his functions until he had received his confirmation from the pope. The Roman see had already, in the 9th century, subverted the authority of the Holy Roman Empire, and the empire was gradually regain- ing the bishops, but now it assumed the right of citing the bishops, without exception, before its tribunal at Rome to receive its dictates, and Gregory obliged the metropolitan to attend in person to receive the papal commission. Archbishop of Amiens and bishop of Canterbury, with William Rufus, was owing to that monarch not choosing to let him go to Rome, whither he had been summoned. The practice of sending apostolic legates to different kingdoms as special commissioners of the pope, with discretionary power over the national hierarchy, originated also with Gregory, and completed the establishment of absolute monarchy in the Church in lieu of its original popular or representative form. This doctrine of papal absolutism in matters of discipline was by prescription and usage so intemized with the more essential doctrines of faith, that it was considered as a part of the faith itself. Gregory has defined all the skill of subsequent theologians and statesmen to disentangle it from the rest, while at the same time it has probably been, though at a fearful cost, the means of preserving the unity of the Western or Roman Church. The means and purposes accomplished and attempted by Gregory were (1) the abolition of the influence of the Roman nobility in the election of the pope; (2) the removal of all authority in the election of the pope from the emperors of Germany; (3) the establishment of the celibacy of the clergy; (4) the freedom of the Church in the matter of investitures. Great attention has been given to the history of Gregory VII, both by ecclesiastical and political writers, especially within the present century. See Dupin, Eccles. Writers (11th century); Mosheim, Ch. History, ch. xi, pt. ii, ch. ii; Neander, Ch. History, vol. iv, bk. iv, History of the Popes, i, 29 sq.; Hauck, Ch. History, § 181; Sir James Stephen, Essays in Ecclesiastical Biography, i, 1; also in Edinburgh Review, xxxi, 143; Guizot, Hist. of Modern Civilization; Bowden, Life and Pontificate of Gregory VII (London, 1840, 2 vols. 8vo); Volck, Hildesheim and Aachen under Gregor VII (Weimar, 1813, 8vo; 2d ed. 1846, 8vo); Spittert, Gregor VII (Hamb. 1827, 4to); Greasley, Life and Pontificate of Gregory VII (London, 1829, 12mo); Madelaine, Pontificat de Gregoire VII (Paris, 1857, 2 vols. 8vo); Cassan- der, Etalicher Hildesbiicher (Darmstadt, 1845, 4to); Soden, Gregor VII (Leipzig, 1855, 4to); Lohmeyer, Historie, iii, 140 sq.; Helfenstein, Gregor VII’s Be- strebungen (Frank., 1856, 8vo); Größer, Papst Gregor VII u. sein Zeitalter (ultramontane view; Schaffhausen, 1859-1861, 7 vols. 8vo); English Cyclopedia; Herzog, Real-encyklop. v, 384 sq.; Hofeer, Nov. Biog. Générale, xxii., 814.

VIII. (Albero de Mora), Pope, was a native of Benevento. He succeeded Urban III, Oct. 21, 1187, and died at Pisa Dec. 16, 1187. His short reign was unimportant. He has generally been considered as a learned, eloquent, and virtuous man. He attempted a crusade to the Holy Land, and the cardinals themselves promised to join him, and to contribute their riches towards the undertaking, but these promises were only given to be evaded. Gregory's last act was to attempt a reconciliation between the inhabitants of Pisa and those of Genoa.—Hofeer, Nov. Biog. Générale, xxii., 814.

IX. (Ugolino, count of Scagno), Pope, was a native of Anagni, and a relative of Innocent III. He succeeded Honorius III, March 19, 1227. He followed carefully the spirit of Ugolino, and of Innocent III, upholding the see of Rome as the master of all empires and superior to all kings. His consecration took place with unusual magnificence: he celebrated mass at St. John Lateran in vestments covered with gold and precious stones; then, mounting a richly-harnessed horse, and surrounded by cardinals clothed in purple and gold, he made a triumphant procession through the streets of Rome, which were decked with carpets and flowers for the occasion. The expenses of the processions Frederick II had not approved. The people party devoted to him in Rome became desirous to remove him from too close proximity with that city, and in order to achieve this, Gregory reminded him of his vow of visiting the Holy Land, and commanded him to go at once. At the mo- ment of Frederick's arrival in Rome, the archbishop of Milan, but Gregory, who believed his illness to be feigned, excom- municated him, and notified all the churches of it. Frederick, on the other hand, wrote to all the princes complaining of the pope's proceedings. Gregory, in return, excommunicated him again, and threatened to take the empire from him. Frederick, concluding this absurd threat, excited the Romans to revolt against Gregory, who, insulted even when saying mass, was obliged to retire first to Rieto, then to Spole- to, and finally to Perugia. Frederick, leaving Raymond of Rome to treat with the pope, embarked for Palestine with a large army. At the mouth of the Jordan, he met him, and, after several short engagements, the former acting for the pope, the latter for the emperor. Frederick, forestalled in Palestine by the emissaries of Gregory, badly seconded by the Christians of Syria, and, besides, being desirous of returning to Italy, where Raymond had been defeated by the papal troops, concluded a ten years' truce at the sultan of Egypt, and, though excommunicated, caused himself to be crowned king of Jerusalem, after which he returned to Europe. The pope, on hearing of his arrival, excom- municated him anew, and released his subjects from their allegiance. Frederick offered to submit, and asked for absolution; peace was in consequence concluded Aug. 28, 1230. The Romans again drove away the pope (July 20, 1232). He succeeded in going back to Rome in 1235. War soon broke out again. Frederick, having taken Sardisina, gave it to his natural son, Henry; the pope claimed it for himself, and, on the pre- ceeding any right to it, and neither would give it up to the other. Frederick was excommunicated a fourth time in 1239. Frederick marched against Rome, but Gregory died before he reached it, Aug. 20, 1241. The principal traits of Gregory's character were pride and ambition. He was a haughty man, and attached himself to the sultan of Egypt at any cost. In this he received no help except from the king of England, who gave tithes to the see of Rome in exchange for the deposition of a bishop. St. Louis, even when threatened with excom- munication, refused to free the clergy from their re- sponsibility to civil jurisdiction. Gregory was well acquainted with civil and canon law, and in 1234 published a collection of decretales which were often re- printed: Nova Compilatio Decretalium, cum glossa (1st ed. Mentz, 1478, fol.). There are also 31 letters and 191 fragments of his writings in Latin, and 56 letters in Ughelli, Italia Sacra; 9 in Vossius; 1 bull in Duchesne, Historia, v, 861; and 1 in Mabillon, p. 421, No. 106.—Hofeer, Nov. Biog. Générale, 814 sq.
Gregory

There are twenty-five epistles of Gregory in Labbe, 
Concil. vol. vi. Gerard Vossius published his Vita et 
Epistola (Grk. and Lat. Rome, 1587). See Bower, Hist. 
of Popes, vol. viii; Bonacci, Posit. Gregorii 
(Rome, 1711, 4to).

XI (Pierre Roques), Pope, born in 1529 at 
Mau- 
mont, in France, was nephew to Clement VI, who 
made him cardinal in 1350, and was for seven years age, and 
ex- 
hibited many rich benefices. He was elected pope 
December 30, 1370, and removed the papal court from 
Avignon to Rome in 1377. 
Wicilf measured this pope at 
Avignon, and went back to England disgusted with the 
vice of the priesthood. Gregory opposed all 
the plans of the Canterbury party; he condemned 
Lollard (q. v.) and his doctrines by a bull dated January 25, 
1376, caused the burning of Jeanne Daubenton, and 
condemned the writings of Wicilf. His pontificate 
was marked by gross nepotism. He died suddenly, 

XII (Angelo Corbaro), Pope, a Venetian, was 
elected pope Nov. 30, 1406, by the Roman 
cardinals, during the Western strife, while his rival Benedict XIII 
occupied the chair at Avignon. After long quarrels, 
both popes were deposed by the Council of Pisa, 1409, 
but Gregory did not yield until the assembling of the 
Council of Constance, which he summarily resigned 
(1415). He was made dean of the cardinals, and died 
Oct. 18, 1417, aged 92.—Hoofer, Nouv. Biog. Générale, 
xxii, 821.

XIII (Ugo Boncompagno), Pope, born in 1502 
1502 at Bologna, succeeded Pius V May 15, 1572. 
He was one of the most learned priests of his time, especially 
in civil and canonical law. He was a man of mild 
temper and jovial habits, yet his pontificate is stained 
by his relations to the bloody massacre of St. Bar- 
tholomew (which he openly approved by a solemn 
Te Deum, and by striking medals in honor of it), 
and he was on a sentence of condemnation against 
queen Elizabeth. His reign was agitated and un- 
quiet throughout, and, amid the confusions caused by 
his attempts to confiscate many of the estates of 
the Italian nobles, he died, April 10, 1558. His reform 
of the calendar, however, will carry his name down to 
the latest posterity.—Mosheim, Church Hist. cont. xvi, 
sec. iii, pt. i, ch. i, n. 28; Ranke, History of Papacy, 
ii, 307 sq. See Calendar.

XIV (Nicolò Spandrati), Pope, was elected by the influence of the Jesuit party, Dec. 5, 1550. 
His short reign was taken up chiefly in efforts to 
sustain the league in France against Henry IV. He died 
Oct. 15, 1591.—Ranke, Hist. of Papacy, i, 536.

XV (Alessandro Ludovisi), Pope, was born at Bologna, 1553, made pope Feb. 9, 1621, and died July 
18, 1623. With the aid of his nephew, cardinal Lud- 
vico, he signalized his brief reign by several measures 
of great importance to the Roman Church. He urged 
on emperor Ferdinand to exterminate Protestantism 
from the empire; he established the College of the 
Propaganda [see Propaganda]; and he greatly in- 
creased the missionary enterprises of Rome in South 
America, Abyssinia, China, and India. The dominion 
of the Church was more widely extended in his 
righ than at any former period of her history.—Ranke, 
Hist. of Papacy, ii, 64 sq.

XVI (Bartolommeo Alberto Cappellari), Pope, was born at Belluno, Sept. 18, 1765. He became a 
Casaldolite Benedictine under the name of Malvo, and at 
twenty-five years was made professor of theology. In 
1799 he published the Priests of the Holy See and 
of the Church (Rome, 4to), a treatise vindicating the 
absolute power of the popes. In 1801 he became abbott 
of his monastery, and in 1803 general of his order. He 
was made cardinal and prefect of the propaganda in 
1810, and on the death of Leo XII he was elected pope 
Feb. 2, 1831. His reign fell in a stormy time. Imme- 
diately after his accession revolts occurred in several 
of the papal provinces. Bologna took the lead; the 
commotion spread swiftly from Bologna throughout 
Romagna, and soon reached all parts of the pope's 
dominions except the metropolitan city. The intention 
of the insurgents was to put an end forever to the tem- 
oral sovereignty of the pope, and to unite the states of 
Italy. But the movement was not well contrived; 
it was simply a spontaneous and justifiable outbreak of 
enfeebled national feeling excited by the French Revolution of 1830. Yet so utterly 
powerless and detested was the pontifical government, 
that, left to itself, it could not have survived the shock 
of this unorganized insurrection. Austria poured 
troops into the threatened provinces, and by a series 
of tactful measures brought about a complete submission 
and steady suppression of free thought. The Papal 
States were now the only part of civilized Europe in 
which municipal institutions were unknown, and where 
the laity were wholly excluded from the conduct of 
business and affairs. Many years the people of the papal 
States were busy in plotting revolts, and the government in prac- 
ticing expropriation on the largest scale, suddenly searching 
suspected houses, punishing the suspected without 
trial, and every way embittering the spirit of hostility. 
Plans were formed by the exiled patriots to unite all 
Italy in a confederation for the defense of freedom, but these 
plots were discovered and destroyed by the Austrian police 
before they were ripe for execution. All Europe looked 
with pity, but no state offered to interfere, lest conmotions in Italy should lead to disturbances else- 
where. The punished Italians themselves, in a mani- 
facto which they published in 1845, declared that the 
ennui of Gregory's government had risen to such 
a height that each one of them more than sufficed 
to give the right of loudly protesting against his breach 
of faith, his trampling upon justice, his torturing hu- 
mans nature and all the excesses of his tyrannical 
administration. In fact, the whole pontificate of Gregory was one long 
oppression of his subjects. At its termination there 
were between two and three thousand political prisoners 
in the papal dungeons! 
Gregory was not less active in strengthening the power of the Church than in crushing out liberty and 
harmony at home. He erected, in various countries, 
twenty-seven new bishoprics and thirty-two apostolic 
capitularies. In 1836 he gave the College De Propaga- 
dans to the care of the Jesuits, and he trusted and 
freed to order in every way. He opposed the Bible 
Societies and the general diffusion of the Bible, utter- 
ing violent encyclicals on these points. A better 
feature was his opposition to the slave-trade and to 
slavery. He put down the Hermenuts (q. v.) in Ger- 
mansy with the strong hand, and greatly enlarged the 
bulk of the Index Expurgatorius. The Jesuit mis-
ions were greatly fostered by Gregory, and societies 
to raise funds, such as the Oeuvre de la Foé (Soci- 
ety for the Propagation of Faith) in France, grew 
rapidly in extent and productiveness. Romanism 
increased under his pontificate in every country in 
Europe, partly in consequence of a natural reaction 
against previous depression, but largely, also, through 
the energetic activity of the pope. He died of cancer, 
June 1, 1846. Gregory wrote several Encyclical Epis- 
ticles, which are of value as showing the unchanged 
character of the papacy; and we publish...

Gregory, John, a learned English divine, was born at Amersham, in Buckinghamshire, in 1607. In 1624 he was sent in the capacity of servant to Christ Church, Oxford, where he was placed under the tuition of Dr. George Morley, afterwards bishop of Winchester. Having been admitted into orders, he was appointed one of the chaplains of his college by the dean, Dr. Brian Dappa. In 1634 he published a second edition of Sir Thomas Rider's View of the Civil and Ecclesiastical State of Ireland, with Notes (4to). He acquired much reputation on account of the civil, historical, ecclesiastical, and ritual learning, and the skill in ancient and modern languages, Oriental as well as European, displayed in it. In 1641 he obtained the prebend of Salisbury, but was deprived of it at the Revolution. In 1646 he published Notes and Observations on some Passages of Scripture (4to), which were reprinted at different periods, and afterwards translated into Latin and inserted in the Critici Sacri. He died in 1646. An account of his life will be found in his Works (4th edit. London, 1684, 4to). Anthony Wood mentions the miracle of his age for critical and curious learning.—Fuller, Worthies of England; Hook, Eccl. Biog. vol. v; Darling, Cyclop. Bibl., i, 1322.

Gregory, Olinthus Gilbert, LL.D., was born at Yaxley, in Huntingdonshire, Jan. 29, 1774. He was educated under Mr. Weston, a celebrated mathematician at Cambridge, and graduated, at 12, at St. John's College. His examination in geometry and astronomy was very extensive, and at 19, a textile manufacturer of Morley, was placed under the tuition of his converted father's friend, a successful merchant. He possessed qualities of a still nobler and better kind than those of a scientific philosopher. He was a decided Christian—a man who had not only studied the literature of the sacred volume, but made it the rule of his life, as well as the source of his inward peace and hope. On what drrm and enlightened ground his own faith was established in the truth and fundamental principles of the Gospel, appears from his Letters to a Friend on the Evidence, Doctrines, and Duties of the Christian Religion (1st edit, 1813, 2 vols. 8vo); a treatise which has long maintained a high reputation. He also wrote Memoirs of John Mason Good, M.D. (London, 1828, 8vo);—Memoirs of the Rev. Robert Hall (prefixed to the editions of Hall's collected works); and a number of articles in the Ecclesiastic Review and other journals. He died Feb. 2, 1811.—Jameson, Relig. Cyclop. 283; English Cyclopaedia.

Grellet, Stephen (Étienne de Grellet du Mobili- lier), the fifth child of Gabriel Marc Antoine de Grellet, was born at Limoges, in France, Nov. 2, 1778. His parents were wealthy, and ranked high among the nobility. His father was comptroller of the mint, the friend and counsellor of Louis XVI, and was propriet-
GRETSER, JAKOB, a distinguished German Jew, theologian, and historian, was born at Markdorf (Susbia) in 1561. He joined the Jesuits at seventeen, and became successively professor of philosophy at Ingolstadt in 1589, of moral theology in 1592, and of scholastic theology in 1599. He continued in this office until 1610. He was afterwards engaged for literary activity, and wrote over one hundred and fifty works, mostly against the Protestants. He possessed much learning, yet was only an indifferent critic; and his style, which is flowing, is bitter and full of invectives against his adversaries. His principal works are: *Epistola de fonte divinae Scripturae* (Ingolstadt, 1589, 4to); *Integrae Rhetoriae Historia Ordinis Jesuici ab Elia Hasemillerio conscripta* (Ingolstadt, 1594, 4to); *De Sancta Cruce* (Ingol. 1598, 4to; last ed. 1616, fol.); *Locorum quosdam Tertulliianorum a persequentiae Fr. Landri Calarstanis depragrationibus Vindicato* (Ingol. 1606, 4to); *De Jure et More proboe condimentis, expurgandii et abolendi libros hereticos et nocivos* (Ingol. 1605, 4to); *Exercitationum theologicae Libri ses* (1604, 4to); *De Spontanea disciplinarum seu flagellarum Cruce* (1608, 4to; German by Vetter, 1612); *De Exegeesi catholicae scripturae* (Processius, 1606, 4to); *Defensione Bellarminiana* (1st ed. 1607, fol.; 2d ed. 1609, fol.); *De funere christianum* (1610, 4to). The catalogue of all his writings was published by himself in 1610 and 1612. A complete collection of his works was published at Ratibon, 1734-1741, 17 vols. 8vo. See Bayle, Dictionary; Etienne Baluze, *Oeuvres de l'ancien et du nouveau ycle*; Nicéon, *Mémoires*, vol. xxviii; Alemagne, *Bibl. Script. Soc. Jesu*; Viit Greteri (at the beginning of his Opera omnia); Botrel, *Bibl. Soc. Jesu*; August. et Alods de Backer, *Bibl. des Ecritures de la Compagnie de Jesus*; Dupin, *Ad litteram. Grevo or Greewe, Eugenst JAN, a Dutch theologian and Hebrew scholar, was born at Deventer, Sept. 4, 1754. He studied theology at Leyden, but refused in 1783 to sign the formula of union except as a *human contrivance*. He was elected representative in 1776, and became professor of Oriental languages and Hebrew antiquities at the University of Franeker in 1790. He wrote *Ultima Cypita Jobs* (39-42 ad graciam versionem recensita* (part i, Deventer, 1788, i, Burg-StEinfort, 1791, 4to); a Dutch translation of most of the Epistles of St. Paul (1790, 8vo); *Vaticiniam Nabham et Habacucam* (Amsterdam, 1753, 8vo); *Vaticiniam Bonum* et *notas adiecti E. J. Greve; accedit interpretatio belogica* (Amst. 1800, 2 vols. 8vo); etc. His posthumous works (in Dutch) have been published by Rhynvis Feith (Amst. 1813, 8vo). See Saxius, *Onomasticon litterarum*, part vili, p. 456; A. A. Loezer, *Laudatio E. J. Greve* (Leyden, 1815, 8vo); Hoefer, *Nouv. Biog. Générale*, xlii, 566.

Grewe, Jan, a Dutch Remonstrant divine, was born in the duchy of Cleves about 1680. He was established first at Arnhem, then at Campen, and finally at Heusden. In 1619 he was expelled from the country for refusing to sign the confession of Dort. Returning again, he preached privately for a while, but was discovered, arrested, and condemned to remain for life in the prison of Amsterdam in 1619. His friends, however, liberated him in 1621, after he had remained 18 months in prison. This time he had improved by writing his most important work: *Trunal reformatio, in quo sanctoria et tutoria justitiae via judicii christiani exspectatur* (Amsterdam, 1622, 8vo). His pamphlet was the subject of a controversy between Remonstrants and the Synod of Dort, and the greater or more moderate vehemence of character of the rebeaved individual, naturally cause a certain modification of his grief, which is too apt to be lost sight of by archaeologists. The customs of the ancient Hebrews were in this respect little different from those of the modern Orientals, and therefore derive ready elucidation from the accounts of modern travellers. In the most
violent outburst of sorrow, in the instantaneous over-flow of lamentation, they wrung their hands above the head (2 Sam. xvii, 12); and beat thence with them (Nah. ii, 8; Luke xviii, 13; comp. Joseph. Ant. xvi, 7, 5; "νύφη, κόρης κατα"
; see Homer, Il. ii, 700; Herodotus, ii, 80; Lu-
clan, xxvi, 27). Apian, 483; Virlg, Anm. iv, 478; xii, 671; Mar-
tial, ii, 11, 5; Petron. 111), or smote them upon the thigh (Jer. xxxi, 19; comp. Polyb. XV, 27, 11; Hom. Odys.

mannhauscn, De corpora scintencium De mortu- 
endo, Viteb.; Michaelis, De in.cinera proprc mortunos in
his Observ. sacr. Aethenb. 1752, p. 131 sq.) was for-
bidden by the Mosaic law (Lev, xiv, 28; Deut. xiv, 1 sq.),
as it was in the twelve Roman table (Cic. Leg. li, 23 sq). These marks of deep grief were usually
combined together. At proper and regularly ap-
pointed seasons of mourning (for the deceased), people
were accustomed to fast (q. v.), put on mourning-
weeds [see SACKCLOTH], cover up the lower part of the
countenance (Ezek. xxiv, 17, 22; Micah iii, 7; comp.
Ezra, vii, 28) or the entire head (2 Sam. xvi, 30; xvi, 
39, 4; Jer. xiv, 3, 4; Homer, Od. iv, 154; vili, 92),
eglect to wash and anoint themselves (comp. Diod. 
Sic. i, 72 and 91), or cleanse their clothes (2 Sam. xiv,
GRIESEBACH appreciated, and rewarded with honors and appointments even of a civic nature; thus he was appointed to Griesbach's endeavors, the task of dig- and on other public occasions. He died March 24, 1812.

Griesbach's name is inseparably connected with the criticism of the text of the N. T., so much so, indeed, as to Griesbach himself, the text, and the subject entirely in the shade, and to form an epoch in that special department. In order to form a just estimate of his services, it is necessary to be thoroughly acquainted with the state of this science at the time. See CRITICISM, Bib-

Griesbach's studies in regard to the text were first in the directing and actual examination of various readings. This field had often been gone over before, and it was thought that much less would be discovered in it than was found afterwards by paying greater attention to the quotations of the Greek fathers, and to some versions heretofore but little noticed, such as the Philoxenian, the Armenian, and the Gothic. Next he attempted to establish, on the basis of the ideas of Bengel and Semler, a history of the ancient text as a necessary basis for every improvement of it. On this history, all the details of which have not, however, been completed, but have given great impulse to researches, Griesbach founded a new theory of criticism, the rules of which were to regulate the choice and value of the various readings in individual passages, and which was based essentially on a combi-

nation of historical facts and logical principles. Finally, and on the task on which his reputation chiefly rests, viz., the publication of a critically amended edition of the text of the New Testament. Till then, among nearly 360 editions, there had been but two forms of text, both originating in the 16th century, when criticism was yet in its infancy. They were the so-called Tectus receptus, which the Lutheran Church considered as unimpeachable; and the Complutensian, which circulated among the Roman Catho-

Bengel alone dared to depart somewhat from the former, and that only by introducing a few readings of the latter. Griesbach's innovation excited great alarm among the partisans of the existing texts. Joachim Hartmann, professor at Halle, attacked him in a pamphlet in 1775; but this, as well as other similar attacks, were answered by the preface of Griesbach's second edition. His editions of the N. T. ap-
pear to have been of two kinds: 1. Critical edition (Halle, 1774, pt. i, ii), containing the first three gospels arranged synoptically. To this belongs as vol. i (1775), the first edition of the Epistles and Revelation, and to the latter, as well as vol. i, a second (non-synoptical) edition of the gospels. The whole is now re-

wards reprinted, sometimes separately.

2. The principal edition (Halle, and London, 1796, 1806, 2 pts. 8vo), very complete, and with important prolegomena.

3. A costly edition (Leipzig: 4 vols. small 4to, or small folio, 1803-1807, in copper types; 4th and 5th pocket ed-

tions, Leipzig, 1806, 1825), like the preceding, but with the principal variations only. A new edition of the principal critical work of Griesbach was commenced in 1827 by David Schultze, but the first part only has appeared. The text of Griesbach has not remained intact in all these editions. It has often been used or referred to by others, and its peculiarity readings, at least, are always introduced in the new critical editions. The other critical works of Griesbach are, De codicibus ev. origines (1771); — Cure in historiarum textus epp. paul. (1777); — Symbole crucis ad supplementa et correlata referente (1793); — Commentarius crucis in textum Gr. N. T. (1794 sq.).

Little need be said of his other works. They are mostly academical essays on exegesis, history, and dogmatics, and were published by Gabler in 2 parts (Kleine Schriften, 1825). Some of them, however, possess yet a certain interest, as serving to show the progress made by the influence of the theologians, conservative at heart, but advancing nevertheless more or less with the times. Such was Gries-

bach, who was not only a middle-party in the so-called faction of progress. His Vorlesungen ü. Hermeneutik d. N. T., printed after his death (in 1815), belongs to the so-called school of grammatico-historical interpretation which prevailed during the author's life, and is such a work as would naturally be expected from a pupil of Semler and Ernesti.

"The peculiar principle of Griesbach's system consists in a division of the Greek manuscripts of the New Testament into three classes, each of which is considered as an independent witness for the various readings of the manuscripts which it comprises. He thus contemplates the existence of three distinct species of texts, which, with respect to their relationship or affinity, are called by Bengel, families, and by Semler, Griesbach, and Michaelis 'recensions' or 'codices,' namely: 1. The 'Alexandrian' recension or codex, of which the manuscripts of the ancient churches, according to the citations found in the early Egyptian fathers, particularly Origen and Clements of Alexandria. 2. The 'Western' recension, which is identified with the citations of the Latin fathers, especially Cyprian and Tertullian, and was used by the Church of Rome. The task of regulating the text, which in the Constantinopolitan and the adjacent Oriental provinces, and have furnished the received text, called the Greek Vulgate. Each of these recensions has characteristics peculiar to itself, yet no individual manus-

script exhibits any recension in a pure state, but is as-

signed to the Alexandrian or Western class, as the pecu-

lar reading of each of those classes preponderate. Though Griesbach considers departures from the re-

ceived Greek Vulgate as various readings, he does not allow the existence of any standard text as a criterion for determining which are genuine or spurious read-

ings, his object being to show, not the character of par-

ticular deviations from any individual recension, but the general coincidence of manuscripts with one recen-

sion or another, rather than with any particular group. The received text does not regulate, but is regulated by his critical opinion of its comparative value; and the immense number of various readings form a floating medium in which the genuine text is considered to be in all in-

stances discoverable. How this is to be done is not at all apparent, nor is it at all necessary to determine the value of the readings by the number of classes by which they are supported, he constantly dis-

plays a very decided preference for the Alexandrian class, which he places far above the two others in the rank of authority; a few manuscripts of this recension being supposed to outnumber, with a multiplicity of such as be-

long to the Byzantine recension, which he regards as certainly the most trustworthy of all (Prof. Ixxi). The reason assigned by Griesbach for this decision is the fact that the Greek transcripts of this class contain a remarkably large number of suspected readings, owing to the fact that the scribe in these cases is not taken by the literate class in making successive alterations; and finding the coincidence of the numerous scriptural quotations of Origen of Alexandria with the celebrated Greek manu-

script of the New Testament from that city to be very extensive, he concludes that the most Mithraic of all the gospels is the Expanded Text of the 3d century, discovered the earliest, and therefore the most trustworthy, and that the Greek text of this manuscript is the true one of the original codex. The opening of the gospel of St. John, from which the text of the New Testament is derived, is so much like the text of the Griesbachian manuscript, that it is not surprising to find that the text of the latter is the true one of the original codex. fathers and versions; and of the readings thus proved to be genuine is formed his corrected text of the New Testament. Against the complicated hypothesis on which Griesbach had based his corrected text, many very important objections were urged by learned Biblical critics of Germany (as by Hartmann, mentioned above), and in England, especially by archbishop Lawrence and Dr. Frederick Nolan. The primary fact enforced by Griesbach, that the Alexandrian readings which are supported by the quotations of Origen, possess the highest authority of all, is disputed by professor Matthie, of Moscow, in his critical edition of The New Testament, and with greater confidence by professor Martin Scholz, of Bonn, in the prolegomena to his complete edition, published on a system wholly at variance with that of Griesbach. The Alexandrian manuscripts are acknowledged by Scholz to be more ancient, but he asserts them to be more corrupt than any others, and contends that in Alexandria the alterations of the text principally originated. He divides all the manuscripts, not, as Griesbach, into three, but into two classes, the Byzantine and the Alexandrian, in which latter he includes the Western; and he gives a decided superiority to the authority of the Byzantine recensions, which, in opposition to Griesbach, he considers it desirable to be derived from the autographs of the evangelists and apostles themselves. The work by archbishop Lawrence on this subject is entitled Remarks upon the Systematical Classification of Manuscripts adopted by Dr. Griesbach (1834, 8vo). The learned author states that he considers Griesbach’s system a ridiculous notion, and that he has no principle whatever to guide him. ‘The most consummate critic that ever undertook an edition of the New Testament;’ but in the course of his critical strictures on the origin and execution of his plan of appreciating manuscripts, he employs the severest terms of censure, observing that Griesbach’s mode of investigation is unsatisfactory, his classification fallacious, and his statement of the number of readings inaccurate; that no such classification of the manuscripts of the New Testament is possible; the existence of three distinct species of texts being a fact only synthetically assumed, and not capable of any analytical demonstration; so that the student finds he is treading, not on solid ground, but on a critical quicksand.’ Griesbach was long and severely attacked by Trinitarian writers as an oppressor of the doctrine of Christ’s divinity, chiefly in consequence of his having restored the celebration of the communion of the bread and the wine, and expressing the view that there is one real body and one real blood in the celebration of the Eucharist. The laborious and minute learned work by the Rev. Dr. Nolan entitled The Integrity of the Greek Vulgate, or Received Text of the New Testament, published in 1815, is chiefly occupied in presenting evidence to subvert the critical system of Griesbach, and to establish the position since the apostolical age that the word of God was written in the Byzantine, and not the Alexandrian, codices are the most worthy of reliance. ‘Griesbach’s theory,’ says Dr. Nolan, ‘is one of the most elaborate of those that have unsettled the foundation on which rests the entire cannon. His corrected text can be received only as a proof of the general corruption of the sacred Scriptures, and of the faithlessness of the traditionary testimony by which it is supported, since he states that the two principal classes of text, the Alexandrian and the Western, have been corrected. In his edition, the corrected Greek version exhibits 150,000 various readings, and has remained 1400 years in its present state of corruption; that there appears, therefore, to be no reservation by which the doctrinal integrity of the sacred Scripture can be ascertained; for if, in the apostolic and primitive ages, corruption was prevalent, whatever text the text gathered out of the immense number of various readings, it may be as well any other as that originally delivered by the inspired writers.’ Griesbach indeed declares, in his Symbolic Critic, that the manuscripts of the Gospels inscribed and printed on a system wholly at variance with that of Griesbach. The Alexandrian manuscripts are acknowledged by Scholz to be more ancient, but he asserts them to be more corrupt than any others, and contends that in Alexandria the alterations of the text principally originated. He divides all the manuscripts, not, as Griesbach, into three, but into two classes, the Byzantine and the Alexandrian, in which latter he includes the Western; and he gives a decided superiority to the authority of the Byzantine recensions, which, in opposition to Griesbach, he considers it desirable to be derived from the autographs of the evangelists and apostles themselves. The work by archbishop Lawrence on this subject is entitled Remarks upon the Systematical Classification of Manuscripts adopted by Dr. Griesbach (1834, 8vo). The learned author states that he considers Griesbach’s system a ridiculous notion, and that he has no principle whatever to guide him. ‘The most consummate critic that ever undertook an edition of the New Testament;’ but in the course of his critical strictures on the origin and execution of his plan of appreciating manuscripts, he employs the severest terms of censure, observing that Griesbach’s mode of investigation is unsatisfactory, his classification fallacious, and his statement of the number of readings inaccurate; that no such classification of the manuscripts of the New Testament is possible; the existence of three distinct species of texts being a fact only synthetically assumed, and not capable of any analytical demonstration; so that the student finds he is treading, not on solid ground, but on a critical quicksand.’ Griesbach was long and severely attacked by Trinitarian writers as an oppressor of the doctrine of Christ’s divinity, chiefly in consequence of his having restored the celebration of the communion of the bread and the wine, and expressing the view that there is one real body and one real blood in the celebration of the Eucharist. The laborious and minute learned work by the Rev. Dr. Nolan entitled The Integrity of the Greek Vulgate, or Received Text of the New Testament, published in 1815, is chiefly occupied in presenting evidence to subvert the critical system of Griesbach, and to establish the position since the apostolical age that the word of God was written in the Byzantine, and not the Alexandrian, codices are the most worthy of reliance. ‘Griesbach’s theory,’ says Dr. Nolan, ‘is one of the most elaborate of those that have unsettled the foundation on which rests the entire cannon. His corrected text can be received only as a proof of the general corruption of the sacred Scriptures, and
other.—Methodist, No. 59; Minutes of Conferences, 1862, p. 71. (G. B. D.)

Griffin, Edmund Dorr, A.M., a Protestant Episco-
pal, was born at Newton, Pa., Sept. 18, 1804. Early in life he gave proofs of classical proficiency in the composition of some Latin poems and poetical ver-
sions, which were considered to possess rare excellence. In 1823 he passed A.B. in Columbia College with dis-
guished honor; and having studied theology two years in the New York Theological Seminary, he was ad-
mitted to deacon's orders in 1826. After supplying for a time a church at Utica, he returned to New York, and was appointed agent to the Gen. Theol. Seminary; he became rector of St. James's, New York, and the Associate Church of Bloomingdale, officiating also temp-
orarily in Christ's Church, New York, as assistant to Dr. Lyell. In 1828, his health failing, he sailed for Europe, and visited England, France, and Italy. On his return he commenced lecturing at Columbia Col-
lege, April 13, 1830, on the History of Literature, con-
tinuing the series with his friend, Prof. McVickar, who had been obliged to suspend on account of ill health. Griffin's lectures had great success; and measures were in progress for the formation of a new chair of history in the college expressly for him, when, during the vacation, he was seized with inflammation of the bowels, and died Aug. 31, 1830. His lectures were pub-
lished after his death by his friend McVickar under the title Remains of Rev. E. D. Griffin (N. Y., 2 vols. 8vo). They contain several pieces of poetry, some of which are in Latin; an account of travels through Italy and Switzerland in 1829; notes on France, Eng-
land, and Scotland in 1829, and extracts from his lectures, and some essays written while a student. See McVickar, Notice (in the Preface of the Remains of R. E. G.); Cyclop. of American Literature, ii, 393; Christian Review, iv, 856; Sprague, Annals, v, 671.

Griffin, Edward Dorr, D.D., a Presbyterian minister, was born at East Haddam, Conn., Jan. 6, 1770, and graduated at Yale College in 1790 with distin-
guished honor. After teaching for a time at Derby, he studied theology under the guidance of Jonathan Edwards, and was licensed in 1792. He commenced his labors at New Salem, supplied at Farmington, and then was called to the Congregational Church at New 
Harford, of which he was ordained pastor in 1793. In 1800 he visited New Jersey, and supplied in Orange for a short time, when he accepted a call from Newark, where he was installed pastor in 1801, as colleague to Dr. M. Whorter, whom he succeeded as pastor in 1807. In 1817 he was invited to the directorship of the Union College. In 1809 he was appointed to the Bartlett professorship in Andover, and in 1811 was installed in Park-street Church, Boston. In 1812-13 he delivered his celebrated Park-street lectures. On resigning his charge in Boston he returned to Newark, and was in-
stalled in the Second Presbyterian Church in 1815. He interested himself warmly in the cause of the Africans, the American Bible and United Foreign Mission Soci-
eties. In 1821 he was appointed president of Willi-
ams College, and filled that office most ably and ac-
curately for twenty years, resigning it in 1836, and re-
tiring to Newark, N. J., where he died, Nov. 8, 1887. His ministry was marked by numerous revivals. Dr. Griffin was a man of large intellectual proportions. The peculiar cast of his preaching and other religious instructions and appeals was formed, more perhaps than in any other great mind, on that cherished habit of precise discrimination on the leading points of the prevalent theology. In his course of teaching in mental philosophy he drew the current distinctions with great accuracy and decision. His theological writings are distinguished by lucid and energetic state-
ments of the main points of the best views of the views of the time, and in such statements his ability was not surpassed by any man of the age. His taste for those theological distinctions, his high sense of their value, and his facility and satisfaction in using them, gave his most rhetorical pulpit discourses remarkable internal coherence and compactness, and enabled him to command the judgments of his hearers by the force of his eloquence. The great charm of his sermons was the intense light in which he placed some leading points of religious truth constitute the striking feature of his theological discussions. This trait is conspicuous in his Park-street lectures, his work on the Atonement, and some smaller publications on particular points of Christian doctrine. On the whole, the position and influence of Dr. Griffin are widely attested by the pro-
found and general respect for his memory, and by the evident fruits of his labors. His power of clear, penetrat-
ing, and, at the same time, of lofty and comprehen-
sive thought—his skill and force in argument, his theo-
ratical genius and culture, his eloquence, his majestic person and manner, all pervaded and controlled by his enlightened religious devotion, performed efficient serv-
vice for the Church, and placed him among the greater lights of his age* (J. W. Yeomans, cited by Sprague). He published The Eighteenth Century, the Atonement (1816, 12mo); — Divine Efficiency (1833, 12mo) — Casual Power of Re-
generation, etc. (1834), and numerous Sermons Ad-
dressed, Orations, and Lectures, from 1805 to 1833.—

Griffith, Benjamin, a minister prominent among the early Baptists in America. He was born in County Cardigan, South Wales, in 1688, and came to this country 
in 1710, settling in Montgomery township, Penn. He was baptized in 1711, called to the ministry in 1722, and ordained in 1729. He enjoyed a successful ministry, labored extensively, and churches still exist that were formed in the field of his itinerant labors. He published—1. A Treatise of Church Discipline: — 2. Vindication of the Doctrine of the Resurrection: — 3. An-
swer to " The Divine Right of Infant Baptism," printed by B. Franklin, 1747. He also wrote An Essay on the Power and Duty of an Association, and left it in MS. It was published in 1832. He died in 1768. (L. E. S.)

Grimshaw, William, a minister of the Church of England, was born in Lancashire, Eng., in 1708, ed-
cuated at Cambridge, and entered into holy orders in 1731. After spending some years as minister of Todm-
den, near Penshurst, he was appointed in 1747 to the per-
ceptual curacy of Haworth, in Yorkshire. In 1745 he en-
tered into a close union with the Methodists, acted as Mr. Wesley's assistant in what was known as the Haworth circuit, and until his death, which occurred April 7, 1763, was the mainstay of the connection in that part of the country. Mr. Grimshaw was the author of a Sermon in Defence of the Methodists, printed in 1749, and republished with his biography. He was of a cheerful, generous turn of mind, very courteous, and open as the day in his conversation with the people. Wherever he went, he was a natural orator, spoke with great fluency, and preached the Gospel with great ability and approbation." Wesley said of him, "He carries fire wherever he goes."—Myles, Life of Grima-
shaw; Crowther, Portraiture of Methodism; Newton, Memoirs of Grimshaw (Lond. 1798, 12mo); Stevens, 
History of Methodism, i, 256; Wesley, Works, iv, 117; 
vi, 750.

Grind (גָּרְנָד, gacen), to crush small, Exod. xxxii., 20; Deut. ix., 21; specially with a hand-mill, Judg. 
vi, 21; Num. ix., 8; also tropically, to oppress the poor by exacting, Isa. iii., 15. In the expression "let 
my wife grind for another," Job xxi., 10, it is put as the picture of abject poverty and degradation. "She 
becomes his mill-wench or wench; comp. Exod. xi., 5; 
Isa. xlv., 2). See Grits. In the earliest ages men
took the pains to roast the kernels of grain (Serv. ad Aes. i, 184), and to pound them (Pliney, xviii, 29) in a mortar (ὑμηλία, ἱερίδιον) with a pestle (comp. Numb. xi, 8), and this method of preparing it is still common (in small encampments) among the modern Arabs (Burckhardt, WAhaby, p. 36). Yet the hand-mill (ἡμηλία, ἱερίδιον, ἱερίαμολογία) is an ancient invention (see Virgil. Moret. 19), for it was early employed by the Hebrews (Numb. xi, 8), and continued in use by them to the latest age (being often alluded to in the Talmud under the name τῇ ἑλικίᾳ, or τῇ ἱερίδιῳ), and is still in common use (in villages) among the Orientals (Niebuhr, Baschr. p. 51; Trux. i, 150; comp. Laborde. Commentaire, p. 58). It consisted of two millstones (Plaut. Aesinar. ii, i, 16); the upper one (ἡμηλία, the sider, Deut. xxiv, 6; 2 Sam. xi. 21; or, fully ὑμηλία, the rider-piece, Judg. ix. 53; in Greek, ὑμηλὸς or ἱερίαμολος, Lat. calitus) was movable and slightly concave, so as to fit the surface of the stationary lower one (ἱερίαμολογία, Job xl. 18; Gr. μύλον, Lat. meta). It was (in poor families) worked by the women (Shaw, Trux. p. 292; (see Herod. iv, 2 and compare the tradition that king Zedekiah was thus treated, Esdr. Jer. Geach, iii, 445). An allusion to the noise of these mills, as being somewhat pleasing to the domestic ear (like that of a modern coffee-mill, which conveys an intimation of home comforts), seems to be contained in Jer. xxv, 10; Eccl. xii, 4; Rev. xxviii, 22; others, however, contend that those passages refer to the singing, or rather screaming, of the females employed, as a means of diversion during their toil, or to drown the grating of the millstones (Hackett, Illustra. of Script. p. 80). It was not lawful to distraint the family hand-mill for debt (Deut. xxiv, 6). In later times, large mills, worked by horses, were used (ὑμηλίαι, ἱερίδια, Buxtorf, Lexicon Chald. 2252), as by the Greeks (μύλος ὄνειρος, Matt. xviii, 6) and Romans (aesin molaris, Varro, R. R. i, 19, 5; Colum. vii. 1; Cato, R. R. x. 4; Ovid, Fast. vi. 518; Lucian. Anm. xxxix, 42; Apulej. Metam. vii. p. 158, Bip.; Digest. xxxiii, 17, 10), and as are still found in the East (Burckhardt, Schwecke. p. 41; Roscher, i, 161; Russell, Aleppo, i, 100). (On the subject generally, see F. L. Gotze, De pistrinum vet. Cygn. 1790; also in Ugolini Theauror. xxix. Hobeisel, De molis manus- sibus vet. Gedani, 1728; also in Ugolini, 1800; Beckmann. Erfyd. ii, 1 sq.; Monges, in the Memoires de l'institut Royal, classe d' Hist. iii, 441 sq.) See MILL.

The grinders (ἡμηλία, tockamak', fem. ones grinding, by allusion to females so employed) of Eccles. xiii, 3, are evidently the teeth, whose decay is an evidence of old age (comp. ἱερίαμολογία, tockamak', mill "grinding," ver. 4). See Cas- per-Plant.

Grindal, EDMOND, D.D., archbishop of Canterbury, was born in the year 1519, in Cumber- land. He was educated at Magdalen College, Cam- bridge, and was on all occasions distinguished as a learned man at the university. In 1550 he was selected by Rid- ley, bishop of London, as his chaplain. In 1553, on the death of king Edward VI, apprehending the persecution of the Protestants, he fled to Strauburg, in Germany, where he was well received. Dur- ing his residence abroad he devoted much time to the dis- cussion of religion, to his studies, to the study of the con- troversies of religion, to his studies, to the study of the controversies of religion, to his studies, to the study of the controversies of religion.

Joliffe, Tren. p. 37; Burckhardt, Arab. p. 187; Robinson, ii, 405, 650; Wellsted, Trux. i, 249; Thomson, Land and Book, ii, 295; see Wilkinson, Anc. Egypt. ii, 223; comp. Mishna, Tohor. vii, 4), but in large households, where it was severe toll (Artomid. ii, 42), by slaves (Arriaux, Vog. iii, 294; Burckhardt, Arab. p. 187), as a female employment (Matt. xxiv, 41; Luke xvii, 85), and that of the most menial kind (Exod. xi, 5; Isa. xlvi, 2; Job xxxi, 10; comp. Ecc. xlii, 3; see Odys. vii, 108 sq.; Simonid. Inam. 85 sq.; Plaut. Merc. ii, 3, 62; Theophr. Char. 5; Aristoph. Nab. 1585; Callimach. in Del. 242), but also as a male task, especially in punish- ment (Judg. xvi, 21; Lam. v. 13; compare Terent. Andr. i, 2, 29; Plaut. Proc. v, 8, 33; Aesinar. i, 1, 16; Epidic. i, 2, 42; Mostell. i, 1, 16; Polluce. Onom. iii, 8; Cic. Quint. 1, 2, 4; see Cod. Theodos. iv, 3, 7), such culp- ite being closely fettered (Terent. Phorm. ii, 3, 19; Plant. Pers. i, 1, 21 sq.), and even blinded (Judg. xvi, 21), by which means the giddiness arising from per- petually going round was at the same time avoided

\[\text{Griswold, Alexander Viets, D.D., Bishop of the Protestant Episcopal Church, was born April 22, 1766, in Simsbury, Conn., and died in Boston Feb. 15, 1843. He early evinced great capacity, and attained considerable proficiency in Greek and Latin, but unhappily abandoned his intention of taking a collegiate course. After studying law for several years, he decided to enter the ministry, and became a candidate for orders in 1794, officiating in the parishes of Plymouth, Harwinton, and Litchfield; was ordained in 1795, and continued in charge of the three parishes named until 1804, when he accepted Bristol parish, R. I. In 1809 he was chosen rector of St. Michael's, Litchfield, and had accepted the call, but, being elected in May, 1810, bishop of the Eastern diocese, then embracing Massachusetts, Rhode Island, New Hampshire, and Maine, he declined the invitation, and continued his ministry in Litchfield. He was consecrated in May, 1811, and for some years discharged the double duty of bishop and parish priest. The "year 1812 was signalized by an extensive revival of religion under his ministry," and "again and again his flock was visited with similar seasons of refreshing from the presence of the Lord." In reply to objections made against such "awakenings or reformation," he published some papers on "Prayer-meetings and Revivals," in which he ably and zealously vindicated them from "the exaggerated charges of disorder, fanaticism, and delusion," and maintained that under proper guidance they promote the religious life and power of the Church. Yielding to the general desire that his residence should be more centrally located for his diocese, in 1829 he accepted the rectoryship of St. Peter's, Salem, Mass., and removed thither in 1830. He remained in Salem until 1835, when provision having been made for his independent episcopal support, he removed to Boston, and devoted the remainder of his life exclusively to his episcopal duties. In 1842 he was relieved by the appointment of an assistant bishop, which was his ardent wish, and he retired from his episcopal act. He died suddenly from heart disease. Bishop Griswold was eminently distinguished among the clergy of his Church for his evangelical spirit and earnest religious life. His chief works are, On the Reformation and the Apostolic Office (Boston, 12mo);—Sermons (Philadelphia, 1880, 8vo);—Prayers (N. Y.);—Remarks on Social Prayer-meetings (Boston, 1858, 12mo). See Stone, Life of Bishop Griswold (Philadelphia, 1844, 8vo); Sprague, Annals, v. 415—425; Christian Observer, July, 1848; Allibone, Dict. of Authors, i, 744. (J. W. M.)

\[\text{Grissell from wheat appears from the Sept. in 2 Sam. xvii, 19; Prov. xxvii, 22, to be designated by the Heb. \textit{gul}, \textit{ruphah} (Vulg. \textit{prisca}, A. V. "ground corn," "wheat"). This kind of meal food is still very common in the East, and the Turks especially employ it in time of war (Faber, in Harmer, ii. 36). On the contrary, the \textit{milu}, \textit{kali}, or "parched corn," of 2 Sam. xxvii, 22, appears to be the roasted kernels of the new-ripe grain, which is still eaten in that manner in Palestine (Robinson, ii. 688). See CORN.\]

\[\text{Griszled (straw, spotted), party-colored or variegated, as goats (Gen. xxxi, 10, 19) or horses (Zech. vi, 3, 6).}\]

\[\text{Groat. The edge formed by an intersection of two vases (or curled ceilings). During the early part of the Romanesque period the groats were left perfectly plain, but later, and especially through the Gothic period, they were invariably covered with ribs (or mouldings).}\]

\[\text{Groot, Geert (Lat. Gerhardus Magnus), was born at Deventer in 1540, studied in Paris, and subsequently taught philosophy and theology in Cologne. Being possessed of a considerable property and of several prebends, he abandoned himself to a luxurious life, from which he was recalled by a serious sickness and the impressive exhortations of a friend, the Cartesian Henry More. Thoroughly reformed, he entered the monastery of Monkmueen, near Antwerp; but he left it again in three years, in order to become a traveling preacher. In union with Florence Radwy, he established at Deventer the Society of the Brethren of Common Life, which was consecrated by Gregory XI. He died at Deventer of the plague, August 20, 1384. He wrote De Veridica Preditione Evangelii;—De Sacris Libris Studianda (both in Kempis, Opera, t. iii). Thirty-three treatises of his remain in MS. See Ulmann, Reformers before the Reformation, vol. i. p. 281.}\]

\[\text{Groot, De. See GROOTUS; HOFFSTEDE.}\]

\[\text{Gropner, Johann, a German Romanist divine, was born at Soest in 1501, became successively canon of Cologne, provost of Bonn, and archdeacon and provost of St. Gereon of Cologne. He convoked a provincial synod in 1536 with the intention of effecting some reforms, and was afterwards sent by Charles V to the religious assembly of 1541 at Regensburg; he is even said to have framed the Interim which was there decided on. In 1548 he went to Soest, to reform the churches of that place agreeably to the Interim. In 1551, on the occasion of the reopening of the Council of Trent, the pope called him to Rome for the purpose of consulting with him. Here he died, March 12, 1558. Gropner belonged to the class of milder Romanists who, at the time of the Reformation, sought to reunite the Protestant and Catholic Churches of Rome by means of conciliatory measures. His principal works are, Anacritis (against the archbishop Hermann, Cologne, 1544);—Institutio catholica (1560);—Von wahrner u. bleibender Gegenwart d. Leb. u. Blutes Christi (1556);—Copula institutionis ad piatem (1557), etc.–Herseck, Real-Encykld. s. v.; Distinger, Kathol. Zeitschrift (vol. ii, 1844).}\]

\[\text{Grosseteste, Grosse-teste, Gosteste, Gostest, Grossthead, Groashead (Capito, "Qui cognominatus est pluribus GROSSTESTE-CAPTU," Triv.); Robert, bishop of Lincoln, a celebrated ecclesiastic, theologian, statesman, mathematician, astronomer, natural philosopher, poet, moralist, and teacher, in the first half of the thirteenth century. The various forms of the name indicate that it was a descriptive epithet, agnostem, or byname, rather than a family designation, which was still no common appellation. The nickname has been rendered fester; but the career of his bearer, who contended with pope and king, was the early counsellor of Simon De Montfort, the teacher, patron, and friend of Roger Bacon and Adam De Marisco, the colleague of the scarcely less eminent Robert Bacon and Richard Fitzakre. He has often been regarded as the first translator of Scripture into English, and as the precursor of the Protestant Reformation, and his continued reputation is mainly due to his strenuous and bold resistance to the corruptions of the Church at home, and to the vices of the papal court. The thirteenth century is one of the most active, bustling, eventful, and important periods, in the whole series of the ages.}\]
was prepared for the governance of his household (Mons. Francisc. Appendix. 12). The sons of the highest nobles, among them the noble Simon de Montfort, frequented the college, and were instructed in the liberal arts, to prepare them for the army, and to equip them for the arts of war and government. The college was established in 1228, and was under the control of the bishop of Oxford. The college was also a center for the education of the nobility, and was known for its strict discipline and rigorous academic standards. It was a haven for scholars and intellectuals, and played a significant role in the cultural and intellectual life of the time.

The college was not without its controversies, however. There were allegations of corruption and manipulation of the system, which led to the resignation of the college's head, Archdeacon Thomas, in 1232. The college was also involved in the political maneuverings of the time, with its members holding high positions in the government and the church. The college was a symbol of the power and influence of the nobility, and its members were often involved in the political and social affairs of the time.

The college was also a center for the study of the classics, and was known for its library, which contained many rare and valuable manuscripts. It was a place of learning and scholarship, and was held in high esteem by the intellectual and cultural elite of the time. The college was a symbol of the intellectual and cultural life of the time, and was a place where the highest minds of the day gathered to learn, teach, and exchange ideas.

The college was also a center of the arts, and was known for its music and drama. It was a place where the finest musicians and actors of the time performed, and where the highest standards of performance were set. It was a place of celebration and festivity, and was known for its elaborate and opulent celebrations.

The college was also a center of the spiritual life of the time, and was known for its devotion to the faith. It was a place where the highest minds of the day sought solace and comfort in the midst of the trials of the world. It was a place where the highest ideals of the faith were pursued, and where the highest standards of morality were set.

mission for the king's benefit. This was the prelude to the Provisions of Oxford and the Barons' War. In November of this year, bishop Grosseteste, with his friends, fled to England, were arrested by the papal court to look after the appeal of his chapter on the subject of visitation. He is thus present at the General Council of Lyons in 1245, which had been summoned for the condemnation, excommunication, and deposition of the emperor Frederick II. He does not appear prominent among the processions, and the general action of the pontiff, whose cause was assuredly that of national liberty and independence against the menace of universal imperialism. In the autumn of this ominous year Grosseteste returned to England, having obtained an excommunication in regard to his authority. His right of visitation was acknowledged, but a comparison of his letters with the statements of Matthew Paris demonstrates that he did not obtain all that he demanded from the pope. It is equally erroneous to suppose that he sacrificed any principle in urging to the Roman court the natural rights of his see. The attempt was made to Boniface, the new archbishop of Canterbury. There is no abatement of his principle, or of his resolution. He resumes his visitations, and extends them to the rich monasteries. They provoke fresh opposition, and occasion much complication. At the king's request, he writes upon the rejection of the sacerdotal and kingly powers. Despite all of his labors, he steadily maintains his course. He contends in Parliament against the exactions of the king and the intrusion of foreigners into English benefices. He continues as dean and chancellor of Oxford, is in no degree a minister of the king; he is seated in offices of prudence and charity, especially in ministering to the wants of poor scholars. He is indefatigable in his own pursuits. To this period must be referred the accusatory letter of Adam de Marcisco accusing him from excessive study and "Vetustissima studia quod inducibiliter nosse visa atque spiritus evanuit et attentum corporis habitudinem, exasperant affectionem et rationem omnubilat" (Ep. xxxix.) The renewed resistance to his visitations, particularly by the monks in the north of England, the personal attacks, and his differences with Boniface of Savoy, his archbishop, and the uncle of the queen, compelled him to make another visit to Lyons in 1250. He was coolly received by Innocent, and, at the close of an excited conversation, exclaimed, "Oh, money, money, how powerful you are, especially at the court of Rome!" He had anticipated the denunciations of Dante and Petrarch. He gave larger development to his honest indignation in the celebrated sermon on papal abuses which he preached on the 10th of May before the pope and three of the cardinals. This daring re- buke was not calculated to conciliate favor at court, and he turned his face homeward in December "tristes et vacuius." He came back wounded in spirit, and burdened with age, care, and anxiety for the future. He contemplated the resignation of his bishopric — no unusual procedure at that time—and seclusion with his books; but he was induced to renounce this purpose by the representations of Adam de Marcisco and other friends—perhaps by the authority of the archbishop—and the fear that the temporalities would be despoiled by the king during the vacancy. The determination to retain his high station was moral, not pecuniary, or in the repression of scandals. Matthew Paris censures with great bitterness his severity in putting down monastic luxury, but admits the righteousness of his purpose. His first open breach with the pope occurred at this time. He had refused the pontifical request to induct an Italian, ignorant of English, into a rich cure. He was suspended for a short time in consequence. This did not arrest his reforming ardor. He excommunicated the Norwegians, being brother bishops, placed an interdict on the church to which he had been presented. In the great Parliament of London, October 13, 1292, he opposed the king's demands, fortified by the pope's bull, and induced his brethren to join in a firm refusal of the application for a new subsidy. On this occasion he made the celebrated prayer made in the names of the Latins benefited in England by Innocent, and found that they reached 70,000 marks, or three of the clear revenue of the crown. He addressed a formal appeal to the lords and commonalty of England to suppress this disastrous spoliation (Ep. cxxxi). It was the first direct claim of popular support to the clerical and political dissensions, and indicated the course to Simon de Montfort as a popular leader. His conduct was still more decided and menacing at the Parliament of May, 1258. In this year, the last of his long and useful life, Grosseteste gave the final arrest to Innocent IV, and by one notable act, in strict accordance with his whole previous career, secured the highest public favor, and won the renown by which he is chiefly remembered. He rejected the pope's demand of a canony at Lincoln for his nephew, Frederick of London, converting his refusal into a strong argument and striking condemnation of the infamous "non-obstante" and "provisionis" of the papal procedure. It was a note of preparation for Edward III's celebrated '"Statute of Provisors' nearly a hundred years afterwards (1446). This event is recorded by Matthew Paris, who, in his history, speaks with the characteristic "filiiilet et obedientem non obedi, contrado, et rebelle" (Ep. cxxviii.) The pope was thrown into uncontrollable rage by this letter, but his rage was exchanged for equally unseemly joy when he heard of the death of Grosseteste within the year. This event occurred at Burgh Castle, Saxony, in October 1293. His remains were buried in Lincoln Cathedral, where they were joined about four years later by those of his friend, Adam de Marcisco, "God so providing that, as they were lovely and amiable in their lives, so in death they should not be divided" (Lanercost Chroni- cle). The contemporaneous and posthumous fame of Grosseteste insured a copious crop of legends. He was supposed to have prophesied the ensuing civil war, which he might have done without any extraordinary illumination. On the night of his death, Alberic, the ring- ing in the sky were heard by Mr. Bishop of Lincoln, and by some Franciscan friars in the neighborhood. He appeared in a portentous dream to Innocent IV in his last illness. Miracles were attributed to him, and in 1307 the king requested his canonization. To him was also ascribed the talking head of brass, which has been sometimes assigned to Friar Bacon, and sometimes to Friar Bangay; but this arose from his reputation as a magician, and not as a saint. His books he bequeathed to the Franciscans at Oxford, out of friendship for Adam de Marcisco, or out of regard for the school which he had taught, governed, cherished, and organized. The services rendered by Robert Grosseteste to the University of Oxford have been too little appreciated. Character, Requirements, and Influence.—There was no one in the age in which he lived who displayed higher excellences than Grosseteste: Matthew Paris, whose temperament and associations bred prejudice, attests his pre-eminent virtues. The elegance of his manners attracted admiring comment; the placidity and placability of his disposition were the result of his early training; and when pronounced upon him after his death by the University of Oxford was entirely just: "No one knew him to neglect any good action appropriate to his office or his charge from fear of any man; he was ever ready; for martyrdom if the sword of the executioner should pre-
sent itself." This testimony is re-echoed by Adam de Marisco. He was essentially a reformer without being an innovator. He "stood upon the ancient ways" to restore, preserve, or improve what was good and old. In this sense he was a reformer in Church and State, in education, in letters, and in philosophy. He is regarded as a reformer of the Reformation—as a herald of either Lollardism or Lutherananism. His career tended to that result, but it was unforeseen and undesigned. He is devoted to the order of the Church, solicitors for Catholic orthodoxy, imbued with the spirit, sentiments, and doctrines of his community; his points are also confirmed by his letters (Epp. lxxii, cxxii). Notwithstanding the sternness and severity of his ministry, there was great gentleness in his demeanor, with moderation and prudence in his private and public counsels. He seems to have been withal a very moderate opinion of his own judgment, and habitually sought aid from others whom he deemed wiser than himself. He was easily charmed with simple amusements, enjoyed a jest, and had a rich vein of native humor, as numerous anecdotes attest. This lofty character was sustained and irradiated by the glory and splendor of his accomplish- ments. These can be only imperfectly appreciated from his remains published or preserved. They must be estimated from the commendations of his own and of immediately succeeding times. His pupil, Roger Bacon, calls him "apostolissimus Latinarum," and "apostolissimus in Christianum homo" (these letters Minus, p. 317, 320), and remarks that "Grosseteste alone knew the sciences" (Opus Tert. c. x.; Compend. Stud. c. viii); that "Robert, bishop of Lincoln, and Brother Adam de Marisco, were perfect in all wisdom, and that no more were perfect in philosophy" than these two, and Avicenna, and Aristotle. Roger Bacon, in Op. Tert. c. xiv; that the said Robert and Adam were "the greatest clerks in the world, perfect in divine and human knowl- edge" (Ibid. c. xxii). Tyssington speaks of him, "cumus comparatio ad omnes doctores modernos est usit comparatio solo ad lexum quando sleeputur." The range of his acquirements will be partially illustrated by the number and variety of his writings. He is credited with a consummate mastery of all existing science, and with a knowledge of the three learned professions. Roger Bacon distinctly assigns to him the adoption or the improvement of the Experimental Method (Roger Bacon, Op. Tert. c. viii). Several poems, Latin, French, and even English, are attributed to him; and he certainly en- couraged the use of the English tongue in preaching, and it may have been, from his employment of the still rude vernacular, that he became the most popular as well as the most influential of all his days. It is said to have been familiar with Greek and Hebrew, but we are assured that he attained only in advanced life a sufficient mastery of the former to translate Greek books (Roger Bacon, Op. Tert. c. xxv), and then not with- out more competent assistance (Comp. Stud. c. viii). The vast influence which he exercised over his con- temporaries and our succeeding times is ably present- ed by Luard (Pref. p. lxxxv, ix): "No one," says he, "had a greater influence upon English thought and English literature for the two centuries which followed his time; few books will be found that do not contain some quotations from Lincolniensis, "the great clerk Grossetest." 

Writings.—The works of Grosseteste have been dis- covered and reported at 200 and 300. The difference of estimation, as well as the magnitude of the sum, may be explained by loose modes of enumeration, as indicated by the comparison of the lists of Roger Bacon's treatises with his actual remains. Divisions or chapters were frequently accounted separate productions. The same works were circulated under different titles. Many of the later are recorded under only elaborate or rate epiplies or occasional essays, which would now pass as tracts. Many compositions were assigned to him of which he was guiltless; many fathered upon him to secure the favor of his name. But, after all such rectifications, the multitude and multiplicity of his writings must have been amazing, especially when regarded as the leisure fruitage of an active life. Most of them have been lost, destroyed, or forgotten. Le- derer has summed up the best he could of the Repertoire as a reformer of the Franciscan order and Le- derer has summed up the best he could of the Franciscan order and Grossetestus in consideration of his own eager exploration of the Franciscan resources at Oxford at the time of the dissolution of the monas- teries: "Sumnum Jupiter! quid ego illic inveni! Pul- veram autem inveni, tales araneam, lineas, basilas, ritum denique et aquilem. Inveni eliam atque librum, sed nemo nos habet. Sermones vero, biblia, eodem nominibus. Much, however, remains, the greater part of which is still unpublished. In Pegge's Life of Grosseteste— "the scarcest of modern books"—the list of his writings fills twenty-three quarto pages, closely printed. Similar catalogues are given by Leland, Tanner, Odi- din, etc. These it were unreasonable to repeat or re- view. He was the reputed author of a religious ro- mance in verse, Chastite d'Amour, and of the didactic poem Manuel Poche, translated by Robert de Brunne. Richard Hambpel's Pricks de Conscience has also been referred to him. He may have been the compiler of the rude draft of these noted productions, or may have provided the crude materials with which they were constructed. We know from many sources that the venerable bishop was devoted to music, and "smite with the love of sacred song." Polycarpus Leyer sacnscribentem metris accesserit Minus, p. 317 "et assidue animam, of which many versions exist in Anglo-Norman, English, Greek, Provençal, French, German, Walloon, Spanish, Italian, Danish, and Swedish (Lat- ine Poems of Water Maps, ed. Wright, p. 55-106, 321, 940), and whose echoes may have occasioned Tennyson's Two Biresses. Grosseteste in the Order of Solomon from many moral and theological treatises, and a copious collection of sermons. He wrote commentaries on Aristotle and Boethius, and translated several works from the Greek. He wrote on agriculture, digested according to the cal- endar, The Buke of Hawmburde, and of Plantsynge and Graftynge Trees and Vynce, according to Wynkyn de Worde's title of the version printed by him. This was probably compiled from Palladius and the Geoponica. We trace in the letters of Adam de Marisco his uniting interest in all physical research and contempor- neous history, and from his sayings we learn that he wrote De Iride, de Cometes, et de aŭlia (Comp. Stud. c. viii), including probably a discussion of tides. Other works have been alluded to already. But the most in- teresting of his remains, for the knowledge of the man and of his age, is the large volume of his letters, from which much of his influence, as it is reputed by Mr. Luard, this notice has been principally drawn. 

Authority.—The fascination of Grosseteste's name has in successive centuries excited the enthusiasm of biographers, but has rarely resulted in the accomplish- ment of their designs. Bishop Barlow, of Lincoln; Samuel Knight, the biographer of dean Colet and Erasmus, and Anthony à Wood, collected materials for his life. William, archbishop of York, previously bishop of Lincoln, the successor of lord Bacon in the custody of the seals, mediated the publication of Gros- seteste's life and writings in 1657, but was prevented by the outbreak of the Great Rebellion. Edward Browne, of Clare Hall, designed a life of the great bishop, but was anticipated by death in 1659. Dr. Samuel Pegge achieved his biography, which is valuable, but unattainable. Other authors, some of which have been previously referred to, are Leland, Script. Hist. Brit.; Ball, Script. Ill. Mog. Brit.; Tanner, Bibliotheca; Wharton, Anglica Sacra; Oudin, Script. Eccles.; Pope Blount, Cons. Celebr. Auct.; Godwin, De Praestantibus Angliae; Cave, Script. Ech. Hist.; Warner, Hist. Antarctica; and many others. The works of Luard; Monumenta Francicae, ed. Brewer, containing Eccleston, De Adventu Fratrum Minorum, and Ada-

mi de Murisco Epistola, with valuable appendices; Rogeri Baconis Opera Anecdot., edit. Brewer; Royal and Historical Letters regni, Henrici VI. The last four were put upon the British Treasury in continuation of the task of the Record Commission. To these authorities should be added the Chronicles of Matthew of Paris, Matthew of Westminster, Roger of Wendover, Capgrave, Trivet, Risbanger, and Lanercost. See also Lechien, Robert Grotsete (Leipzig, 1867). (G. F. H.)

Grostete, Claude, a French Protestant theologian, was born at Orleans in 1617. He studied law and was admitted to the bar by the Parliament of Paris in 1655, but afterwards devoted himself to theology, and in 1675 became pastor of Lisy. In 1689 he accepted a call to Rouen, but soon after returned to Lisy, where he remained until the revocation of the edict of Nantes in 1685. Obliged to leave France, he went to England, and died at London in 1713. He wrote Traité de l'Inspiration des livres saints du N. T. (Amst. 1655, 8vo): — Entretiens sur la correspondance prêterelle de l'Eglise angloise avec les autres Eglises réformées (Hague, 1708, 12mo): — Relation de la Société établie pour la propagation de l'Evangile dans les pays étrangers, avec trois sermons (Rotterdam, 1708): — Nouvelles Mémoires pour servir à l'histoire des trois Commissaires où l'on voit les déclarations de M. le colosse Grotse, sur le projet de l'Harmonie (Hague, 1708, 8vo): — La Partie du cerisier de l'Harmonie (Amst., 1710, 12mo): — Charitsis Angiolica (about 1712): — Le Docteur du christianisme, en quatorze sermons sur le Ps. cant. 8, 9, et les quatre sentimens du roi Esteban sur sa maladie, sa convalescence et sur sa chose après son convalescence (Hague, 1713, 8vo): — Sermons sur divers textes (Amsterdam, 1715, 8vo). See Vie de Claude Grostete (prefixed to his Sermons sur divers textes); Haag, La France Protestant; Hoefer, New Bibliographie Générale, xxii, 190.

Grosvener, Benjamin, D.D., an eminent Dissenting minister, was born in London Jan. 1, 1675, and educated at the academy at Attercliffe, Yorkshire. Mr. Grosvener entered upon his public ministry in the year 1699 as a Baptist. Soon after he was chosen to succeed Mr. Slater as pastor of the Presbyterian congregation in Crosby Square. To this charge he was ordained July 11, 1704. His popularity as a preacher, his solid judgment, added to a lively imagination, his great anxiety for the conversion, and fervent entreaties, his being appointed to take a part in several important lectures which were then carrying on in the metropolis. In 1730 the University of Edinburgh presented him with the degree of D.D. He continued at Crosby Square till the year 1745, when he was compelled to relinquish his pastoral office. He died October 27, 1758. A catalogue of his published pieces, chiefly occasional sermons, amounting to about thirty in number, may be found in Wilson, History of Dissenting Churches. A volume of his Sermons, with a Memoir by J. Duines, was published in 1808 (Newport, 8vo). Jones, Christian Biography; Skeats, Free Churches of England.

Grotius, Hugo (Dutch name De Groote), one of the most illustrious names in literature, politics, and theology. He was born at Delft April 10, 1583, and in his boyhood gave signs of extraordinary ability. At eleven he was sent to the University of Leyden, where he remained three years, devoting himself especially to theology, law, and mathematics. In 1597 he maintained two theses on philosophy, and wrote in praise of Henri IV, in Latin, a poem entitled Triumphant Gallia, which he dedicated to M. de Buzeval, the French Ambassador. He accompanied the Dutch embassy to Paris, where he was introduced to the king, who gave him a brilliant reception. On his return home, 1599, he entered on the practice of law, but devoted himself also to literature. Each year was marked by a new book, or by a new edition of some important work from his hand. In 1607 he married Mary of Heigersberg, a lady of excellent family, and of high moral and intellectual qualities. In 1608 he published his celebrated treatise More Libertas, his first essay in treating the law of nations. Appointed pensioner of Rotterdam in 1613, he foresaw the difficulties in which the country would soon become involved, and only accepted office on condition that it should be made permanent. He was a member of the right of entering the States-general, where he was thrown into close relations with Barneveldt the elder, with whom he formed a lasting friendship. In 1615 he was sent to represent Holland in a conference held in England on the subject of the Greenland fisheries. During his stay in England, Grotius had several conferences with Casaubon on the means of uniting the Roman Catholics and the Protestants, a problem to which he devoted a great deal of thought and labor throughout his life. After his return to Holland he took an active part in the religious discussions which were soon to divide the country, and in which he was always found on the side of freedom. He had at all times favored the views of Arminius, whose enulogy he published in 1609. Though not then, as he afterwards became, a skilled theologian, he was especially attracted by the system of Arminius, and his views on predestination were afterwards strengthened by study and reflection. And, indeed, the Arminian doctrine, which, discarding the Calvinistic dogmas of absolute predestination, teaches that man is free to accept or to refuse grace, could not fail to suit a mind such as that of Grotius. It was held by the majority of the Dutch states and supported by Goer (q.v.) and his party attempted to obtain the proscription of the Arminians, the states did their utmost to prevent it, and enjoined on both parties to tolerate each other. The Gomarists then incited the people to disobey the states; revolts took place in various towns, and some Arminian ministers were driven out of their churches. Grotius, who had previously helped his friend Uttenboeert with his advice when framing the Acta Remissarium, in which the Arminian principles are laid out, framed, together with Barneveldt, a new edict of toleration which was voted by the states. But fresh disturbances occurred every day, and the states, by a decree dated Aug. 4, 1617, gave to the town magistrates the power of raising troops to put down insurgents. This decree was passed without the participation of the stadtholder Maurice of Nassau, who had for a long time been seeking occasion to act in conjunction with Barneveldt and the Republican party. He therefore availed himself of the opportunity offered him by this decree, which, he asserted, disregarded his rights as captain general. He at once sided with the Gomarists, approved all their plans, and forbade the soldiers to obey the civil authorities. Shortly before these events, Grotius had been sent to conciliate the authorities of Amsterdam, who were opposed to the Arminians. His failure in this mission, with the increasing troubles and perils of the country, caused him an illness. During the disturbances, he wrote several works in defence of his party, in which, in order to justify the measures taken by the Dutch States, he attempted to prove that the state has the right to regulate all that relates to the discipline and even the dogmas of the Church. He also applied himself to show that the Arminian doctrine was not in agreement with fathers and the councils. The Gomarists, beaten in argument, employed violence to overcome their adversaries. In 1618, Maurice, backed by the States, undertook to coerce the towns, which, on the ground of the sovereignty guaranteed to them by the constitution, had declared war on the order treating More as illegal and forbidding their raising troops. Holland was invaded by the troops of the stadtholder, who gave free vent to his anger. Assembling eight members of the States, he made them decree the arrest of Barneveldt, Grotius, and Hogenbeets, under the accusation of being "en-
GROTIUS

mies of their country for having attempted to resist at
Utrecht the sudden seizure of the prince. The magistrates of
Rotterdam and of some other cities of Holland protested
against this open violation of their rights, but were
deposed. The Synod of Dort, which the Gomarists, sure of having the majority of the clergy on their side, had for a long time demanded, in order to obtain a con-
demnation of the doctrines of their adversaries, was then
assembled. See Dort. In consequence of the decisions of Dort, some of the Arminian ministers were
exiled, others put in prison. See ARMINIANS.

The Gomarists, with the partisans of Maurice, commenced
in Nov. 1618, the trial of the three prisoners. Twenty-
six witnesses were called from the city of Amsterdam, two
were appointed to judge them. After hearing, under appearance of legality, murdered Barneveldt in spite
of the remonstrances of Du Maurier, ambassador of France, and a friend of Grotius, they began the trial
of the latter. He declined to recognize their compe-
tence, claiming that he could only be judged by the
States of Holland. His remonstrances were of no avail;
five hours' time and one sheet of paper were all the
facilities afforded him for his defense. He was
condemned on the 18th of May, 1619, to perpetual im-
prisonment. He was at liberty conditionally. Pursuant
to this sentence, he was conveyed on the 6th of June,
in the same year, to the fortress of Loeveesteyn, situated
at the extremity of an island formed by the Maas and
the Waal. His wife was allowed to share her hus-
band's imprisonment, but Grotius' father was refused
permission to visit him by the Synod. During his imprison-
ment, Grotius, contrary to the learned flippancy of Chrestian's court, and resolved
on quitting Sweden. The climate, also, did not agree
with him. The queen, having in vain tried to retain
him in her service, made him a present of a large sum
of money, and of some goods, which she gave him a vessel, in which he embarked for Lubeck on the
2th of August; but a violent storm, by which his ship
was tossed about during three days, obliged him to
land on the 17th in Pomerania, about 15 leagues from
Dantzig, whence he proceeded towards Lubeck. He
arrived at Rostock on the 20th, very ill from the fa-
tigues of the journey, and from exposure to wind and
rain in an open carriage; he died on the 29th of Au-
gust, 1645, in the sixty-third year of his age. His last
moments were spent in religious preparation, and he
died expressing the sentiments of a true Christian.

His body was entombed to Delft and deposited in the
grave of his ancestors, where a monument was erected
to him in 1781. (English Cyclopedia.)

Of the many claims on posterity of this distinguished
man, we have only to consider those which relate to
theological and critical studies of theology. We
notice, first, his exegetical writings. His "Annotations on the O. and N. T." (Abb.
notat, in libro evangeliorum et varia loca S. Scripturae [Amst. 1641]), Annotation in Epist. ad Philemonem [ib. 1642, 8vo; 1646, 8vo], Annotation in varia loca S. Scripturae..., Annotation in varia loca S. T. [ib. 1644, 2 vols., 4to], Annotation in varia loca S. T. [ib. 1644, 2 vols., 4to; 1647, 2 vols., 4to] remained for a long time unknown almost to
all except Arminian divines, and some Calvinists even
spoke of them as dangerous works; for instance, Abr. Calov in Bibl. V. et N. T. Illustrat. The chief cause of the present popularity of Grotius's exegesis is purely
philological and historical character. In this respect Grotius may be considered as the forerunner of Ernesti.

Valuable, however, as these writings are in this re-
spect, the notes and comments which heinserted in his Apology characteristic of his classical training and
style, and the critical and exegetical character of his work De Juris Publici et Privati, which was published in the next year. During his residence in France he was constantly anno
d with importunities to pass over to the Roman Catholic religion. But,

though he was tired of the country, and received invi-
tions from the duke of Guise, and the king of
Denmark, he declined them. Gustavus Adolphus also
made him offers, which, after his death, were repeated
by Ozenstern in the name of queen Christina. In
the mean time the stadtholder Maurice died, and his
successor seeming less hostile to Grotius, he was in-
duced by the extraordinary generosity of his friends to return. He arrived at Rotterdam in September,
1631, and the news of his return excited a great sensa-
tion throughout all Holland. But, in spite of all the
efforts of his friends, he was again obliged to leave the
country, and went (1632) to Hamburg, where he lived
1633, and then to the electoral court at Frankfurt-on-the-Main, who appointed him councillor
to the queen of Sweden, and her ambassador at the
court of France. The object of the embassy was to
obtain the assistance of France against the emperor.
Grotius arrived at Paris in March, 1635; and although
he had many difficulties to encounter from Richelieu,
and afterwards from Mazarin, he maintained the rights
and promoted the interests of his adopted sovereign
with great firmness. He continued in his post till 1644, when he was recalled at his own request. Har-
ting his position of chief minister by the abdication of
his return at Dieppe, and on his landing at Amster-
dam (1645) was received with great distinction,
and entertained at the public expense. From Amsterdam he proceeded by Hamburg and Lubeck to Stockholm,
where he was received in the most flattering manner
by the king, who, however, did not employ him in
the learned flippancy of the court, and resolved
on quitting Sweden. The climate, also, did not agree
with him. The queen, having in vain tried to retain
him in her service, made him a present of a large sum
of money, and of some goods, which she gave him a vessel, in which he embarked for Lubeck on the
12th of August; but a violent storm, by which his ship
was tossed about during three days, obliged him to
land on the 17th in Pomerania, about 15 leagues from
Dantzig, whence he proceeded towards Lubeck. He
arrived at Rostock on the 20th, very ill from the fa-
tigues of the journey, and from exposure to wind and
rain in an open carriage; he died on the 29th of Au-
gust, 1645, in the sixty-third year of his age. His last
moments were spent in religious preparation, and he
died expressing the sentiments of a true Christian.

His body was entombed to Delft and deposited in the
grave of his ancestors, where a monument was erected
to him in 1781. (English Cyclopedia.)

Of the many claims on posterity of this distinguished
man, we have only to consider those which relate to
theological and critical studies of theology. We
notice, first, his exegetical writings. His "Annotations on the O. and N. T." (Am-
notat, in libro evangeliorum et varia loca S. Scripturae [Amst. 1641]), Annotation in Epist. ad Philo-
menon [ib. 1642, 8vo; 1646, 8vo], Annotation in varia loca S. Scripturae..., Annotation in varia loca S. T. [ib. 1644, 2 vols., 4to], Annotation in varia loca S. T. [ib. 1644, 2 vols., 4to; 1647, 2 vols., 4to] remained for a long time unknown almost to
all except Arminian divines, and some Calvinists even
spoke of them as dangerous works; for instance, Abr. Calov in Bibl. V. et N. T. Illustrat. The chief cause of the present popularity of Grotius's exegesis is purely
philological and historical character. In this respect Grotius may be considered as the forerunner of Ernesti.

Valuable, however, as these writings are in this re-
spect, the notes and comments which heinserted in his Apology characteristic of his classical training and
style, and the critical and exegetical character of his work De Juris Publici et Privati, which was published in the next year. During his residence in France he was constantly anno
d with importunities to pass over to the Roman Catholic religion. But,
the Mount, but this should only have been the preparatory step to a full elucidation of the points wherein the imputation of Christ differs from that of antiquity. Thus, also, it was quite correct in the elucidation of the O.-T. prophecies to reject the practice of an arbitrary typology of separate passages taken without regard to their original historical connection. But Grotius went towards the other extreme, and gave at least a show of generality; he made of a remnant, merely of a fragment, a whole; he made of the O. T. everywhere in the O. T., while Grotius found him nowhere. On Grotius's merits as an interpreter, see Segara, Oratio de Hugone Grocio, illustri humanorum et divinorum N. T. scriptorum interprete (Ultr. 1785, 8vo); Meier, Gesch. d. Schriftenverkehr (iii, p. 434 sq.).

In 1652, Grotius was called into an inquiry by the Stadtholder of the States of Holland as to the O. T. is contained in his exposition of the 1Sa 26:23 in the Annotations on Matt. i, 22, which is worthy of being studied.

In the field of Apologetics Grotius achieved a great and enduring success by the publication of his treatise De sacrate religionis christianae (1627; often reprinted). The best editions are those of Clerecus (1709, 1717, 1724, 8vo) and of J. C. Köcher (Jena, 1727, 8vo; Halle, 1784-89, 3 vols. 8vo). It was translated into German by Hoff (Chemnitz, 1768, etc.); French, by Le Jeune (1630, 1669); into English, by Clarke (1793), by Middleton (Lond. 1849, 12mo); Arabic, by Pocock (1660, etc.), and even into Chinese and Malay. The first plan of it was drawn up by Grotius in 1652 while a prisoner at Loovereit. The original object of this prison work, which was written for the express purpose of qualifying himself for a visit which should come in contact with the heathen, arguments in defense of their faith. But when translated into Latin prose it found its way into the highest circles of educated men, and was, until very recently, a standard text-book on the evidences of Christianity. In this work Grotius may be said to have erected apologetics into a science, and thus rendered immense service, even though his treatment of the subject does not meet all the wants of the present age. It is divided into six books, of which the first treats of the existence and attributes of God; the second, of the excellence of the doctrine and ethics of Christianity; the third, of the authenticity of the books of the New Testament; the last three, of objections supposed to be made on the part of pagans, Mohammedans, and Jews.

Grotius accepts the Arminian system as regards the doctrine of predestination. He pronounced clearly for the universality of divine grace, without, however, falling into Pelagianism, an accusation often brought against him, but which he vigorously repelled. See his Conciliatio Dissertationis de re libertatis praedestinationis, in which he terms his Doctrinæ ad Pelagianam sicut ad dogmatam quæ sub eo nomine tradatur, both treatises are given in his Opera Theologica, vol. iii. He also refuted in his Christologia the accusation of inclining to Socinianism in his views on the doctrine of redemption. He defended the doctrine of the expiatory nature of the death of Christ against the Socinians in his Defensio fidei catholici de satisfactione Christi adversus F. Soci- nium (Leyden, 1617; often reprinted). The Socinians answered in the person of Crelly by the Responsio ad Librum Grothii de Satisfactione, which was refused by Stillingsfeet, etc. But the orthodoxy, on the other hand, attacked Grotius on account of his theory of the atonement; and it is certainly true that he differs as well from the theory of satisfaction of Anselm as from the orthodox system both of the Lutheran and Reformed Churches. In place of a real satisfaction, Grotius substitutes a solutio on the part of God for the sake of Christ; he saw in the death of Christ more a substitutum than a satisfactory act; it was not a penal example, by which, on the one hand, the majesty of God's law was vindicated, and, on the other, his horror of the sin of the world was exemplified in a most striking manner. Baur (Versammlung, 1852) gives a clear, and, in the main, fair account of the Grotian theory of atonement, from a translation of part of which, by the Rev. J. Swain, in the Bibliotheca Sacra for April, 1852, we extract the following:

'The fundamental error of the Socinian view was found by Grotius to be this: that Socinians regarded God in the work of redemption as holding the place of a creditor or, in short, as a creditor, whose simple will is a sufficient discharge from the existing obligation. But, as we have in the subject before us to deal with punishment and the remission of punishment, God cannot be looked upon as a creditor, or an injured party, since the act of inflicting punishment does not belong to the cognizance of the creditor, or of the creditor's servant. It is not one of the rights of an absolute master or of a creditor, these being merely personal in their character; it is the right of a ruler only. Hence God must be considered as a ruler, and the right to punish belongs to the ruler as such, since, as demonstrated, not for the punisher's sake, but for the commonwealth, to maintain its order, and to promote the public good. The act of atonement itself is defined in general as a judicial act, in accordance with which one person is punished in order that another may be freed from punishment, or as an act of divorce, by which a husband or wife is divorced. This is the ground on which all positive laws are relaxed. The threat of punishment in Gen. ii, 17, contains in itself, therefore, the implied right to dispense with the infliction of that punishment, and that, too, without supposing any essential change in God himself, since a law in relation to God is nothing having an internal force and authority of its own (zichts inneheurts), but is merely an operation or effect of the divine will. The objection that none but the guilty person himself can receive the punishment which is due to his crime is answered by the distinction that although every sinner, as such, does, according with the very idea of sin, deserve punishment, still it is not a matter of absolute necessity that this punishment should be actually inflicted. As, therefore, the remission of punishment is a thing which is not in its nature impossible, and as the circumstances of each particular case do decide how far such remission shall really be admitted. If the authority of law is not to be dangerously weakened, it should be admitted only in cases of the greatest exigency. Such a clear case is that which is offered in the case of the very subject, on which we have been dealing, the case where, by the actual infliction of the punishment, the entire race of man becomes devoted to death; and as, on the one side, the possibility of the remission of punishment cannot be denied, so, on the other, it cannot be shown to be absolutely unjust that one person should be punished for another's sin. The essential thing in punishment is that it should be inflicted in consequence of sin, not that it should be inflicted upon the person who committed the sin. If, now, it admits of no doubt that a superior may properly inflict upon a subject, as the punishment of another's sin, whatever he might properly inflict upon him irrespectively of another's sin, then may God, without incurring the charge of injustice, permit Christ to suffer and die for the sins of men. This course, then, being in itself a permissible one, the only question is why God actually determined to do it. As the Scripture says that Christ suffered and died for our sins, we are to infer that God purposed not to forgive sins so numerous and so great without a striking penal example, in order to show his displeasure at sin by some act which should in strictest propriety be termed a penal act. And besides this inward reason, lying in the very nature of
the Deity, and called in Scripture the wrath of God, the was the additional consideration that the less sin is punished more lightly it will be regarded. Prudence itself, therefore, must lead the Deity to exact the punishment, especially where such punishment has been justly intended beforehand. Thus, in the penal example furnished by the death of Christ, there is exhibited at once the divine grace and the divine severity, the hatred of God against sin and his care for the maintenance of the law. And this is the mode of relaxing the laws which jurists themselves pronounce the best in the contexts of composition; because, if the court were to hold that the least injury is done to the authority of the law, and the design with which the law was made is effectually secured, when one who is charged with the delivery of a thing is free from his liability on its full value, for theft of a thing and the same value are terms very nearly related. Such a composition may take place not only with respect to things, but also with respect to persons, when it can be done without injury to another.

In these few statements is contained the entire theory of the Grotius. The real object of consideration in this main proposition: God neither would nor could forgive the sins of men without the setting up of a penal example. This is done by the death of Christ. Hence the death of Christ is the necessary condition of the forgiveness of sin, and what it always actually means in the theory, is this: that upon the idea of a penal example and of its presupposed necessity, and the question for us now to consider is how, by means of that idea, it stands related, on the one hand, to the theory of the Church which it would defend, and, on the other, to the Socinian theory which it would conflict.

As to its relation to the satisfaction-theory held by the Church, it will be seen at once that it asserts the necessity of the death of Christ in order to the forgiveness of sin, in a sense wholly different from that which the Church intends. The idea of the necessity of the death of Christ is necessary only as a penal example, then its necessity is grounded, not in the very nature of God himself, not in the idea of absolute justice, by which sin, guilt, and punishment are inseparably bound together, but merely in that outward relation which God holds to men. The connection, therefore, the design of punishment is an inherent, internal connection, founded in the very nature of sin; the design of punishment is merely to prevent sin; or, in other words, it is connected with sin only in consequence of a positive law emanating from God as the supreme Ruler. Hence the final ground upon which Grotius goes back to prove the necessity of instituting a penal example is merely the penal sanction contained in Gen. ii, 17. The advocates of the satisfaction-theory, indeed, go back to the same sentence, but only to remark in it a necessary connection between the divine justice. Grotius, on the contrary, takes the absolute idea of divine justice entirely away; for he affirms, in opposition to Socinus, that justice is an attribute which belongs of itself to the very nature of God, but at the same time asserts that the actual exercise of the attribute depends on the will of God, it is precisely the same as the assertion of Socinus himself, that penal justice is the effect of the divine will; and if he further says that God does what he does not without a cause, still the ultimate ground is not God's absolute nature, but his absolute will, which in itself equally competent to punish or not to punish.

Here, then, is an important distinction between the theory of Grotius and that of the Church. The main point in the Church's theory of satisfaction is that, if Christ had not made a strict and perfect satisfaction for men, they could not have been released from sin. Socinus objected to this that satisfaction and forgiveness were contradictory ideas. This assertion Grotius, in the name of the Church, which he so strongly maintained, could not admit. He therefore replied that satisfaction and forgiveness were not strictly simultaneously; that, according to the conditions established by God, the latter then first follows the former when a man by faith in Christ turns to God and prays him for the forgiveness of sins. This distinction could not be made if the objection of Socinus is to be successfully met, and the two ideas are to be permitted to stand side by side. But Grotius could not stop here. If it is only a penal example that is furnished by the death of Christ, the idea of satisfaction, strictly speaking, has no further relevancy. As, however, Grotius wished to retain this idea, he brought to his assistance a peculiar distinction which is made in law between the two ideas denoted respectively by the terms solutio and satisfactio. If, said Grotius, the very thing which is owed be paid satisfaction and remission must, why should in this case the thing, by another in the debtor's name, then the discharge of the debt takes place by that very act; but it is to be called a discharge, not a remission (remissio). Not so, however, when something else is paid than the specific thing which was due. In this case, there is a discharge of the debt, a discharge, according to the creditor or ruler, an act of remission as a personal act; and it is this kind of payment, which may be either accepted or refused by the creditor, which is properly called, in the technical language of the law, satisfaction. While, therefore, it was the original design of Grotius, in all this, merely to prove, in opposition to Socinus, that the idea of satisfaction did not exclude that of remission, what he really did was to substitute in place of the common idea of satisfaction a totally different one; for the common idea of satisfaction re-essentially supposes the supposition that Christ has rendered precisely the same thing which men themselves were to have rendered. If, now, such a payment (solutio) be, as Grotius asserts, no remission (remissio), but only a discharge (liberatio), then it must be conceded to Socinus, which was the thing contested by Grotius, that the liberalis was to be substituted for the solutio. This is a contradiction and excludes each other, or, in other words, that the satisfaction which was made by Christ does not render the name of satisfaction in the sense which the common theory of the Church connected with that expression. But Christ has not made any satisfaction in this sense, if he has not truly and perfectly rendered for men what they were to have rendered for themselves, then the idea of satisfaction can be applied only so far as he has given to God something, whatever that something may be, in place of that which was to have been rendered by men themselves in their relation to God. This, then, is the precise meaning of the theory of Grotius, and the difference between it and the satisfaction-theory of the Church. The idea of satisfaction is let down from its full and real import to the idea of a mere rendering of something; Christ has made satisfaction in a sense that he has not made any satisfaction; so far as he has given to God something with reference to that end. This something is that penal example without the setting forth of which God could not have forgiven the sins of men.

Many of the writings of Grotius are important in the sphere of Church History: such are, for instance, his Hist. Gothorum, Vandalorum et Longobardorum (1605); and his Annales et hist. de rebus Britannicis ab obtine Philippi Africani regis aetate ad annum 1603. He also states in a letter several questions of ecclesiastical jurisprudence in his De imperio summorum pontificum circa sacra (Opp. theol. iii, p. 201), in which he sides with Arminius in
favor of the territorial system against the opinion of Gomara. The theological writings of Grothus are collected under the title Opera omnia theologica (Lond. 1679, fol. 8 vols.). The first vol. contains a Life of Grothus, with his Amot in V. T.; vol. ii contains the Amot in N. T.; vol. iii includes his miscellaneous theological writings. There has been many lives of Grothus, none of them adequate except Brandt, Hist. zum heiligen des Heeren Huig de Groot (Amst. 1727, 2 vols. fol.). See also Lehmann, Grothi Mones ab iniquis obstructationibus vindicati (Delft, 1777; Buriginy, Vie de Grothus (Paris, 1752, 2 vols. 8vo), translated into English (Lond. 1754, 8vo); Butler, Life of Grothus (Lond. 1827, 8vo); Cruzier, Luther und Grothus (Heidelb. 1816, 8vo); Cras, Laudatio H. Grothus (Amst. 1796, 8vo); Luden, H. Grothus nach seinen Schicksalen und Schriften dargestellt (Berlin, 1806, 8vo); Seegeg, Orat. de Grothus (Utrecht, 1785, 4to); Bayle, Dictionary, s. v.; Herzog, Real-Encyklopädie, v., 365 sq.; Niceros, Mémoires pour servir, vol. xix.; Schrock, Kirchengeschichte, v., 216; Hoefer, Nouv. Biogr. Générale, xxiii., 197 sq.; Piper, Kalender, 1867; Nichols, Calvinism and Arminianism, ii., 582-641; Shedd, Hist. of Doctrines, ii., 547 sq.

Groves, the representative in the A. V. in certain passages of two Heb. words. 1. גְּרֶם (or גְּרֶמֶה, asherah') (from גְּרֶמֶה, to be upright). Selden was the first who endeavored to show that the Granum or Grumus of the Sept. and Vulg. is generally rendered grove, in which our authorized version has followed them—must in some places, for the sake of the sense, be taken to mean a wooden image of Ashethoreth (De Dies Syria, ii, 2). Not long after, Spencer made the same assertion (In Leg. Hebrom, ii, 16). Vitringa then followed out the same argument in his note on Isa. xvii. 8. Gesenius, at length, has treated the whole question so elaborately in his Thesaurus (p. 162) as to leave little to be desired, and has evinced that Asherah is a name, and also denotes an image of this goddess. Some of the arguments which support this partial, or, in Gesenius' case, total rejection of the signification grove for asherah are briefly as follows: It is argued that it almost always occurs with words which denote idols and statures of idols; that the verbs which are employed to express the making an Asherah are incompatible with the idea of a grove, as they are such as to build, to shape, to erect (except in one passage, where, however, Gesenius still maintains that the verb there used means to erect); that the words used to denote the destruction of an Asherah are those of breaking to pieces, subverting; that the image of Asherah is placed in the Temple (2 Kings xxiii. 7); and that Asherah is coupled with Baal in precisely the same way as Ashethoreth is (comp. Judg. ii, 18; x, 6; 1 Kings xviii. 19; 2 Kings xxiii. 4; and particularly Judg. iii, 7, and ii, 13, where the plural form of both words is explained as of itself denoting images of this goddess; see also 2 Chron. xxvii. 10; xxiv. 3, 4). Besides, Selden objects that the signification is even incongruous in 2 Kings xvii, 10, where we read of "setting up groves under every green tree." Moreover, the Sept. has rendered Asherah by Astrota in 2 Chron. xv, 16 (and the Vulg. has done the same in Judg. ii, 7), and, conversely, has turned every Naboth's groves in 1 Sam. vii, 8. See Ashethoreth: High-place.

On the strength of those arguments most modern scholars assume that Asherah is a name for Ashethoreth, and that it denotes more especially the relation of that goddess to the planet Venus, as the lesser star of good fortune. It appears, namely, to be an indisputable fact that both Baal and Ashethoreth, although their primary relation was to the sun and moon, came in process of time to be connected, in the religious conceptions of the Syrio-Arameans, with the planets Jupiter and Venus, as the two stars of good fortune. See Meni. We may instance the connection between Artemis and Selene; that between Juno and the planet Venus, mentioned in Cruzier, ii, 566; the fact that astra is also the name of the same planet in the religious books of the Tsalians (Norberg's Doctrinal, vol. ii, p. 20). It is in reference to this connection, too, that a star is so often found among the emblems with which Ashethoreth is represented on ancient coins. Lastly, while the word Asherah cannot, in the sense of grove, be legitimately deduced from the primitive or secondary signification of any Syrio-Aramean root, as a name of the goddess of good fortune it admits of a derivation as natural in a philological point of view as it is appropriate in signification. The verb עֵשֶּב means to prepare; and Asherah is the feminine of an adjective signifying fortunate, happy. See Asherah.

We must not omit to notice a probable connection between this symbol or image—whatever it was—and the sacred symbolic trees, the representation of which occurs so frequently on Assyrian sculptures, and is shown in the subjoined woodcut. The connection is ingeniously maintained by Mr. Ferguson in his Nineveh and Persepolis restored (p. 299-304), to which the reader is referred.
the Hindoo, and wsx as the Persian synonym. The tamarisk and its products were highly valued by the Arabs for their medicinal properties, and are described in several places under different names in Avicenna. If we refer to travellers in Eastern countries, we shall find that most of them mention the aškāl. Thus Prosper Alpinus (De Plantis Ægyptiis, c. ix. De Tamariscae asto vocata) gives a figure which sufficiently shows that it must grow to the size of a large tree, and says that he had heard of its attaining, in another place, to the size of a large oak; that its wood was employed for making a variety of vessels, and its charcoal used throughout Egypt and Arabia; and that different parts of it were employed in medicines. So Forskål, who calls the species Tamaricis orientalis, gives all as its

Arabic name, and identifies it with ezbel. So Belon (Observe. ii, 28). In Arabia Burckhardt found the tree called צד in the neighborhood of Medina, and observes that the Arabs cultivated it on account of the hardness of its wood. If we endeavor to trace a species of tamarisk in Syria, we shall find some difficulty from the want of precision in the information supplied by travellers on subjects of Natural History. But a French naturalist, M. Bové, who travelled from Cairo to Mount Sinai, and from thence into Syria, has given ample proofs of the existence of species of tamarisk in these regions. A minute description of the tree under its Arabic name is given by I. E. Faber, in Frib. und Reiesh. Opusc. med. ex mon. Ar. p. 137. It is very remarkable that the only tree which is found growing among the ruins of Babylon is a tamarisk. "The one in question is in appearance like the weeping-willow, but the trunk is hollow through age, and partly shattered. The Arabs venerate it as sacred, in consequence of the calf All having reposed under its shade after the battle of Hillah." (Rosenmüller, Bibl. Greg. ii, p. 20, from Ker Porter; comp. Ainsworth's Researches, p. 125.) From the characteristics of the tamarisk-tree of the East, it certainly appears as likely as any to have been planted in Beer-sheba by Abraham, because it is one of the few trees which will flourish and grow to a great size even in the arid desert. Besides the advantage of affording shade in a hot country, it is also esteemed on account of the excellence of its wood, which is converted into charcoal. It is of less valuable on account of the galls with which its branches are often loaded, and which are nearly as astringent as oak-galls. See TAMARISC.

3. It is now generally recognised (see Gesen. Thes. 50 b; Stanley, S. and F. 7, 76, 3; p. 124 note, 220 note) that the word Elun, ἔλον, which is uniformly rendered by the A. V. "plain," signifies a grove or plantation.

Such were the Elons of Manre (Gen. xiii, 18; xiv, 12; xviii, 1); of Moreh (Gen. xii, 6; Deut. xiii, 30; of Zaanain (Josh. xix, 83); of the pillar (Judg. ix, 6); of Meonom (Judg. ix, 57); and of Tabor (1 Sam. x, 8). In all these cases the Sept. has ἐλυς or πολυσυς; the Vulgate—which the A. V. probably followed—Vallis or Convalium; and in the last three, however, Quercus. See ELOM.

In the religions of the ancient heathen world groves play a prominent part. In old times altars only were erected to the gods. It was thought wrong to shut up the gods in temples. Hence, as Pliny expressively tells us (H. N. xi, 22), "trees were the first temples" (Titc. Germ. 2; Lucian, de Sacrific. 10; see Carpzov, App. Crit. p. 335), and from the earliest times groves are mentioned in connection with religious worship (Gen. xii, 6, 7; xiii, 18; Deut. xi, 30; A. V. "plain"); and this custom, though lost in high antiquity, refreshing shade, solemn silence, and awe-inspiring solitude, as well as the striking illustration they afford of natural life, marked them out as the fit localities, or even the actual objects of worship ("Lucos et in siletia ipsa adoramur," Pliny, xii, 1; "Secretum lucil... et admiratio umbra domo tibi sider numinis facta," Sib. Ep. xii; "Quo posses viso dicere Numen habet," Ovid, Fast. iii, 295; "Sacra nemus acculet umbrā," Virgil, Georg. iii, 384; comp. Ovid, Met. viii, 743; see Ezek. vi, 13; Isa. lxi, 5; Hos. iv, 13). This last passage hints at another and darker reason why groves were of great importance for the worship of the gods of idolatry; they conveyed the atrociies and obscenities of heathen worship. The groves were generally found connected with temples, and often had the right of affording an asylum (Titc. Germ. 3, 40; Herod. ii, 138; Virgil, Aen. i, 441; ii, 512; Sil. Ital. 8, 83). Some have supposed that the even the Jewish Temple had a νυμφαιος planted with palm, olive, and cypress (1 Sam. xiii, 17, 18), and olive (Psa. iii, 8), as the mosque which stands on its site now has. This is more than doubtful; but we know that a celebrated oak stood by the sanctuary at Shechem (Josh. xxiv, 26; Judg. ix, 4; Stanley, Sinai and Pal. p. 142). We may repeat mentioned of groves consecrated with deep superstition to particular gods (Livy, vii, 25; xxiv, 3; xxxx, 51; Titc. Ann. ii, 12, 51, etc.; iv, 73, etc.). For this reason they were stringently forbidden to the Jews (2 Esd. xxiv, 15; Jer. xvii, 2; Ezek. xx, 28), and Malachi (xvii, 18) lays down the law that it is forbidden to build the shade of any green tree where an idol-statue was (Fabric. Bibl. Antiq. p. 290). Yet we find abundant indications that the Hebrews felt the influence of groves on the mind ("the spirit in the woods," Wordsworth). They were selected for their solemn purity, such as great national meetings (Judg. ix, 6, 37) and the burial of the dead (Gen. xxxvii, 8; 1 Sam. xxxi, 14), Those connected with patriarchal history were peculiarly liable to superstitions reverence (Amos v, 5; vii, 19); and we find that the groves of Mamre were in a place of worship (Josh., H. E. ii, 4; Euseb. Vit. Const. p. 81; Roland, Palest. p. 714). There are in Scripture many memorable trees; e.g. Allon-bachuth (Gen. xxxvii, 8), the tamarisk (see above) in Gibeon (1 Sam. xxii, 6), the terebinth in Shechem (Josh. xx iv, 26, under which the law was set up), the palmtree of Deborah (Judg. iv, 5), the terebinth of the encampments (Judg. i, 37), the terebinth of wandering (Judg. iv, 11), and others (1 Sam. xiv, 2, 8; x, 8; sometimes "plain" in A. V., Vulg. "convalia").

This observation of particular trees was mentioned in the heathen religions. The particular worship of the gods may be traced from the interior of Africa not only into Egypt and Arabia, but also onward uninter ruptedly into Palestine and Syria, Assyria, Persia, India, Thibet, Slav, the Philippines Islands, China, Japan, and Siberia; also westward into Asia Minor, Greece, Italy, and other countries; and in most of the countries here named it obtains in the present day; combined as it has been in other parts with various forms
of idolatry." (Poole, Gen. of Earth and Man, p. 139).

"The worship of trees even goes back among the Ira-
nians to the rules of Hom, called in the Zend-Avesta
the promulgator of the old law. We know from Her-
odotus the delight which Xerxes took in the great
plane-tree in Lydia, in which he bestowed golden or-
naments, and appointed for it a sentinel in the person
of one of the 'immortal Ten Thousand.' The early
veneration of trees was associated, by the moist and re-
freshing canopy of foliage, with that of sacred foun-
sains. In similar connection with the early worship
of nature were among the Hellenic nations the fame
of the sacred olive, and the evergreen pines and plat-
tanus in Arcadia. The Buddhists of Ceylon venerate
the colossal Indian fig-tree of Anurap-depaura. . . .
As single trees thus became objects of veneration from the
beauty of their form, so did also groups of trees, under
the name of 'groves of oaks.'" (Humboldt, Cosmos, i, 86, Eng. ed.). The custom of adorning trees "with jewels and mantles" was very ancient.

"(Isid., ed. H. ii., 14; Theod. ed. xxiv.; Ovid, Met. ivii, 723, 745; Arnob. de Gent., ii., 30; and even still exists in the East.)

The sacred trees of antiquity are well known (Homer, H. vi., 233; Od. i., 237; Soph. Tract. 746; Virgil, Georg., ii., 36; Sili. Ital. ii., 13); such a god had some sacred tree (Virgil, Eccl. vii., 61 sq.). The Christi-
ans are said to have worshipped a palm, and the Celts an
oak (Max. Tyr. Dialett. 38, in Godwyn's Mos. and
Art. ii., 1). On the Druidic veneration of oak-groves,
see Pliny, H. n. vi., 44; Tacit. Ann. xiv., 30. In the
same way, according to the missionary Olendrop, the
negroes have sacred groves, the abodes of a deity, and
which no negro ventures to enter except the priests")
(Pricharch, Nat. Hist. of Man, p. 525-539, 3d ed; Park's Travels, p. 63).

So, too, the ancient Egyptians (Raw-
linson's Herod. ii., 299). Long after the introduction of
Christianity it was found, necessary to forbid all
abuse of trees and groves to the purposes of supersti-
tion (Harduin, Act. Concil. i., 988; see Orelli, ad Tac.
Germ. 9). See Pehnen, De arbo non plantanda ad
allure Deli (Lipsi, 1725); Dresler, De levia religionis gentilis,
destitutis (Lipsi, 1740); Lakenhamer, Antiqu. Grac. ac-
rae. (Lipsi, 1786 sq).

GROVE, Henry, a Presbyterian divine of distinc-
tion, was born at Taunton, Somersetshire, Jan. 4, 1683.
He received his academic training under Mr. War-
ren at Taunton, whose school was in excellent repute.
At 22 he began to preach; at 23 he succeeded Mr. War-
ren as head of the Taunton Academy. At first he taught
ethics, but in 1725 he began to teach theology also. He
at the same time succeeded Mr. Japesh in his pastoral
charge at Fullwood, near Taunton, in which he con-
tinued till his death. In 1730 he published The Ex-
scription of our Saviour's Redemption considered, and the
same year, Some Thoughts concerning the Proof of a Future
State, from Reason. In 1729 he printed A Discourse
concerning the Nature and Design of the Lord's Supper,
where he set that institution in the same light as bish-
op Hoadly. In 1734 he published, without his name,
Wisdom the First Spring of Action in the Deity, which
was animadverted on by Bolugu. He in 1736 published
A Discourse on Sufficient Proof. He died February 9,
1737-8. After his death came out by subscription his
Posthumous Works (1740, 4 vols. 8vo); also Sermons
(Lond. 1742, 2 vols. 8vo); Works published in his life-
time (Lond. 1747, 4 vols. 8vo); System of Moral Philos.
(Lond. 1742, 2 vols. 8vo); a Collection of Sermons by
Grove, prefixed to his Posthumous Works (1745; vol. 1);

GRUBER, Jacob, a Methodist Episcopal minister,
was born in Lancaster County, Pa., Feb. 3, 1878, of
German Lutheran parents. He was converted at four-
teen or fifteen; entered the travelling ministry, in the
Philadelphia Conference, in 1890; labored fifty years,
chiefly in Pennsylvania and Maryland, with abundant
usefulness, and died May 25, 1950. Mr. Gruber was
"a singular and extraordinary man." He was alike
remarkable for "strength and originality of mind, en-
emical depth of character, energy of character, and
power of endurance, extensive usefulness, and simplic-
ity and regularity of life." His conversion was pow-
erful, and, although driven from his home in youth for
his religious course, he kept his faith. Through his
long life his vigor and industry were untiring, and he
was ever ready to help any good cause until the year of
his death. Although eccentric, and often rude in style, he
was nevertheless a sound theologian and an able defender of Methodism. In the pulpit he
was sometimes grand and overwhelming. "He spent
thirty-twelve years on circuits, seven in stations, and
eleven as presiding elder. Many anecdotes are on
record of his eccentric wit and sarcasm, and of his
great control over men."—Minutes of Conferences, iv,
519; Wakeley, Heroes of Methodism, p. 407; Strickland,
Life of Gruber (N. Y. 1860, 12mo).

GRUNER, Johann Friedrich, a German theologian
and philologist, was born at Coburg in 1723. He study-
ed at the university of that city, and afterward at
Jena. In 1747 he became professor of Latin and of
Roman archaeology in Jena, afterwards professor of el-
oquence at Coburg, and in 1764 professor of theology at
Halle. He died March 29, 1778. His principal works, so far as they relate to theology, are, Mosis, Jovis
et Ieshu sacra (Jena, 1750); De Oilt Romanorum ade-
us Christianos causa (Coburg, 1755); De origine
Episcoporum et curorum in Ecclesia primitiva Jure (Halle,
1761); Anweisung z. geistlichen Beredemkeit (Halle,
1761); Versuch eines prymtischen Anwugs von d. Kirchenpraelazartheit und Christenheit (Halle, 1766);
Lehrbuch in d. Religion und d. Heiligen Schrift (Halle, 1773); Institutionum Theologiae dogmatische Libri tres
(Halle, 1777); Observationum criticalium Libri ii. (Jena,
1777). See Harlesius, Vite Philologorum, i, 254-255. Hoefler,
Deutschlands.

GRYNEUS, Johann, a Swiss Protestant theologi-
ian, was born at Leutelsingen (Basle) in 1705. He
acquired great proficiency in theology and the Oriental
languages, and was for seven years professor in the
theological faculty of Basle. He died in that city April
11, 1744. He wrote Gymnæus Theol. missic. (Basle,
1746, 8vo), a learned and valuable work.—Hoefler,

GRYNEUS, Johann Jacob, D.D., a Swiss Protes-
tant theologian, third son of Thomas Gryneus (q.v.),
was born at Berns Oct. 1, 1540. He studied at Basle,
as ordained deacon in 1550, and in 1556 succeeded
his father as pastor. In 1577 he became professor of
theology at Basle, and remained there until 1584, when
he removed to Heidelberg. In 1586 he returned to
Basle, where he died head pastor (anistes) of the city,
Aug. 30, 1617 (Aug. 31, 1618, according to Michaud).
He published Variarum Patrum Graecorum et Latinum
Monumenta orthodogmatica (Basle, 1569, 2 vols. fol.)—Ecdesiaestica Historia Eusebii Pamphilii, Ruff-
fini, Socratis, Theodori, Somm., Thodori, Egurgii, et
Dorothy, etc. (Basle, 1571, 1578, 1611, fol.);—Epitoma Sacrorum Bibliorvm, pars 1 (Basle, 1577, 8vo)—Char-
acter Christianorum, seu de fide, spe et charitati do-
trina, etc. (Basle, 1578, 8vo)—Synopsis Historie Hum-
inae, seu de prima hominis origine, ejusque corruptione,
reconciliatione, etc. (Basle, 1576, 8vo);—Chronologia
bravae Historie Evangelicae (Basle, 1580);—Schegraphia
Sacrae Theologiae (Basle, 1577, 4to);—Censura theologica
de prima Antichristiana et errorologica (Basle,
1584);—Theologia et Primaeterna Theologia (Basle,
1590, 3 vols.).—De virius illustrioris purorum opere De
reformati ecclesiae usus est (1602); and a large

Gryneus or Gryneus, Simon, surname Ma<er>, a Swiss Protestant theologian, was born at Vehringen (Hohenzollern) in 1495. He studied at Pforzheim and Vienna, and early embraced the Reformation. He taught Greek at Heidelberg from 1524 to 1529. In 1534 he went to Tubingen, commissioned by duke Ulrich of Württemberg to reform the churches of that place. In 1536 he settled at Basle, where he died of the plague Aug. 1, 1541. Intimately connected with Melancthon, Luther, Calvin, Thomas More, and others, Gryneus was a zealous promoter of the Reformation, and, as such, was exposed to great dangers, but always managed to get out of them unharmed, thanks to his powerful protectors. He was present at the diets of Spiers and of Worms, and went to England in 1531 to confer with Henry VIII about his divorce. He was employed to collect the opinions of the Reformed theologians on that subject. A great admirer of the classics, he did much to promote the interests of English education in the German universities. He discovered in a convent on the Rhine the last five books of Livy (published by Erasmus, Basle, 1531, fol.). Gryneus published Latin translations of the works of Plutarch, Aristotle, and Chrysostom, the first Greek edition of the *Liberatae medici (Basle, 1537 and 40), and of the *Almagest of Pтолемей (Basle, 1538, fol.). He was also the author of *Nors Orbis regionum ac insularum veteri.bu incognitarum, etc. (Basle, 1532-1555, fol.). See Brucker, *Historia critica Philosoph. vol. iv, section iii, p. 103 sq.; *Historia Literarum, iii, 497; *Melch. Adam, *Vita Theolog. p. 56; *Athenea Rusticae, ii, 69-72; *Reimann, Hist. Lit. Histor. iv, 207; *Hoefer, *Nov. Biog. Générale, xxii, 272; *Burnet, *History of Reformation, pt. i, bk. ii; Herzog, *Real-Encyclop. v, 402; Middleton, *Evangelical Biography, i, 149.

Gryneus, Simon, a Swiss Protestant theologian and philologist (last of the eminent family of Gryneus), was born at Basle in 1729, and died in that city in 1799. He was a thorough theological and classical scholar, and well acquainted with French, English, and Latin literature. He published a translation of the Bible (Basle, 1776), and also versions of Juvenal, *Thom<us> à Kempis, and Erasmus’s *Exercitior Morum. He was appointed German Examiner of the English works against Deism. See M. Lutz, *Nekrol. denkm. Schweiz. a. d. xvi. Jahrh. ; Hoefer, *Nov. Biog. Générale, xxii, 275.

Gryneus, Thomas, nephew of Simon Gryneus major, and an eminent Protestant divine, was born at Vehringen in 1512. He was brought up by his uncle Simon, and became professor of the dead languages at Basle in 1529, and died in that city in 1729. He was a zealous promoter of the Reformation. The margrave Charles of Baden appointed him pastor and ecclesiastical superintendent at Röteln, where he remained until his death, Aug. 2, 1564. See Melch. Adam, *Vita Theolog. p. 191; Hoefer, *Nov. Biog. Générale, xxii, 273; Middleton, *Evangelical Biography.

Gualfrid. See *Gregory.

Guard. The Scripture terms used in this connection mostly have reference to the special duties which the body-guard of a monarch had to perform. See *King.

1. Tabl<ab>, तब्ला, originally signified a “cook,” and as butchering fell to the lot of the cook in Eastern countries, it gained the secondary sense of “executioner,” and is applied to the body-guard of the kings of Egypt (Gen. xxxvii, 36) and Babylon (2 Kings xxii, 11; Jer. xxii, 12; Dan. ii, 14). So Poliphæ, the master of Joseph, was captain of Pharaoh’s body-guard, i.e. chief executioner (Gen. xxxix, 1; i, 10, 12). In Egypt he had a public prison in his house (Gen. xii, 3-4). It is evident from Herodotus (i, 165 sq.) that the kings of Egypt had a guard who, in addition to their usual duties, had the care of the regular income of the soldier, also received a separate salary. In the paintings of marches and battles on the monuments, these royal guards are commonly seen to be employed in protecting the person of the king, and are distinguished by peculiar dresses and weapons (Wilkinson, i, 387, 405). During the reign of the Ptolemies, who in general adhered to the usages of the ancient Egyptians, the office of the commander of the body-guard was a very important one. They possessed the confidence of the king, and were often employed in the most important political transactions. Finally, the superintendence of the executions belonged to the most distinguished caste. In Babylon, Nebuzaradan, who held this office, commanded also a part of the royal army (Jer. xxxii, 15; liii, 19). See *EXECUTIONER.

2. Bidas, *बिड, properly means a courier, and is the ordinary term employed for the attendants of the Persian kings, whose office it was to run before the chariot (2 Sam. xv, 1; 1 Kings i, 5), like the *curators of the Roman emperors (Seneca, *Epist. 87, 126). That the Jewish “runners” superadded the ordinary duties of a military guard appears from several passages (1 Sam. xxii, 17; 2 Kings iii, 25; xii, 6; 2 Chron. xii, 10). It was their office also to carry dispatches (2 Chron. xxx, 6). They had a guard-room set apart for their use in the king’s palace, in which their arms were kept ready for use (1 Kings iv, 28; 2 Chron. xii, 11). See *FOOTMAN. They were perhaps the same who, under David, were called *Pelethites (1 Kings i, 1; iv, 27; 2 Sam. xv, 1). See *PELETHITE.

3. The terms mishām rēth, मिशामरेठ, and mishāmvar, मिशामवर, express properly the act of watching, or else a watch-station, but are occasionally transferred to the persons who kept watch (Neh. iv. 9, 22; vii, 3; xiii, 9; Job vii, 12). The A. V. is probably correct in substituting mishāmarto (मिशामर्त) for the present reading in 2 Sam. xxiii, 28, Benalaih being appointed “captain of the guard,” but mishāmvar (Am. vii, 14, 4) relates, and not privy councillor: the same error has crept into the text in 1 Sam. xxiii, 14, where the words
GUARDIAN ANGEL

1025 GUELPHS AND GHIBELLINES

*"which goeth at thy bidding" may originally have been "captain of the body-guard." * See CAPTAIN.

The kind of this "captain of the bodyguard," for the Latin episcopus (rendered "executioner," margin guard, Mark vi, 27), properly a pike-men, kaliber, a kind of soldiers forming the body-guard of kings and princes, who also, according to Oriental custom, acted as executioners. The term curvatura, for the Latin custodia, i.e. custodie, a watch or guard, is spoken of the Roman soldiers at the sepulchre of Jesus (Matt. xxvii, 63, 66; xxviii, 11). The ordinary Roman guard consisted of four soldiers (rerudivium, "quartionem"), of which there were four, corresponding to the four watches of the night, who relieved each other every three hours (Acts xii, 4; comp. John xix, 28; Polybi- vi, 33, 7). When in charge of a prisoner, two watched outside of the cell while the other two were inside (Acts xii, 6). The officer mentioned in Acts xxviii, 16 (στραταναπόδηρης), "captain of the guard") was perhaps the commander of the Roman troops, to whose care prisoners from the provinces were usually consigned (Pliny, Ep. x, 65). See WATCH.

Guardian Angel, a term which represents a theory prevalent from antiquity, that human beings are accompanied through life by a special supernatural being (sometimes termed their "attendant genius"), whom they must obey for their guide and protection. Such has been thought to be the meaning of Socrates when he claimed a particular δαιμον as his spiritual counsellor. See ΔΑΙΜΟΝ. Among Christian writers the theory has been thought to derive confirmation from the statement of our Saviour respecting children, that "in heaven their angels do always behold the face of my Father which is in heaven" (Matt. xviii, 10); and from the declaration that angels "are all ministering spirits sent forth to minister for them who shall be heirs of salvation" (Heb. i, 14). A more cautious criticism, however, has usually held that these passages in the New Testament do not evidence the providence over the young and believers; and the peculiar form of the doctrine referred to appears to favor rather of a pagan than an evangelical origin. Monographs are named in Walsh, Bibliotheca Theologica, i, 178, and Volbeding, Index Programmatis, p. 116. See ANGEL.

Guardian of the Spiritualities, in England, the person in whom is vested the ecclesiastical jurisdiction of a diocese upon the death or translation of the bishop, or in cases of infirmity of the incumbent or bishop.—Eden, Churchman's Dictionary.

Guerre, a French herald, was born at Tronquay (Normandy) in 1678. He entered the order of the Benedictines of St. Maurit Oct. 21, 1696, became subsequently professor of Greek and Hebrew, and died librarian of the abbey of St. Germain des Prés, Dec. 29, 1729. He had a lively literary controversy with canoe Maceset, and wrote Grammatica HEBRÆICA ET CHALDAICA, etc. (Paris, 1724-8, 2 vols. 4to):—Lexicon Hebri- cum et Chaldeobicum (Par. 1746, 2 vols. 4to). Guer- rin only compiled this dictionary to Men inclusively; the following letters were the work of other Benedictines. See Le Cerf, Bibl. Hist. et crit. des Auteurs de la Comp. de St. Maur; Hoefer, Nouv. Bihk. Gén. xxii, 318.

Guastallines, a monastic order in the Roman Catholic Church, founded in 1584 by countess Torelli, of Guastalla. They were at first connected with the Barnabites, whom they assisted in their missions; but, as this led to disorders, they were ordered to take the vow of seclusion. They were also called the Apostolick order (Apostolic), which name was to remind them that they should be pure as in their lives as angels.

Guatemala. See CENTRAL AMERICA.

Gude, Gottlieb Friedrich, a German theologian, was born at Laibach Aug. 26, 1701. He studied theology in the universities of Halle and Leipzig, and taught for some time in the latter. Having returned to his native city in 1727, he was made chief deacon in 1743, and archdeacon in 1745. He died at Lauban June 90, 1786. In 1742, he published De Canonicis Doctrinam inter Scripturae Interpretes (Lips. 1742).—De Christen Kaste nach dem rechten Wasserland (Hal.1726, fol.):—De Jurisdictionum Meritis in Scriptu- rorum (Lauban. 1728).—De mythis Maccabæorum et fa- torns Christi Interpretationes (Lips. 1729).—Grundliche, gründliche Erörterung über das Thema: Die Dichtkunst der Laubanner (Lauban, 1758).—Hoefer, Nouv. Bihk. Gen. xxii, 340.

Gugdo dah [some Gutgoda] (Heb.) with the art and the definite, kag-Gugdah—Akk., γιγδά, γιγδα, rent, or perch. θυδερόν; Sept. Γυδόδα; Vulg. Gugdah), the fortieth station of the Israelites during their wanderings in the desert, between Mount Hor and Jottath (Deut. x, 7); doubtless the same with Hor-MAGGDAD, through which they had previously passed between Bene-Jaakan and Jotbath (Num. xxxiii, 22). The name appears to be preserved in the present wady Khudhokhidh ("diminutions"), mentioned by Robinson (Res. 1, 267) as "a broad sandy valley which drains the remainder of the region between the Jerசefal and el-Mukhrah, and carries its waters eastward to the former." See EXODE. In this identification there are two later travelling publications (p. 213; Bonar, p. 266, 295). See HOR-MAGGDAD. Dr. Robinson suggests that Gugdah and Jottathah may be in the Arabah, near the junction of wady Gharun- del and wady-el-jeib (Res. ii, 685). See JOTBATH.

Gudele, Goulie, or Ergoule, Sr., a Belgian virgin, patroness of Brussels, is said, according to tradition, to have been born in Brabant about 600. She was the daughter of St. Amalberge, and was educated by her godmother, St. Gertrude, abbess of the convent of Ni- vele. In 664, Gertrude having died, Gudule went to reside with count Witger, the second husband of her mother. While there she led a life of extravagant asceticism, and, according to the Romish legend, accumulated such a stock of good works that God gave her the power to work miracles both during her life and after her death? She died Jan. 8, 712, and was buried in the church of St. Michael, Brussels, which was subsequently called after her, and is now called Church of St. Gudule. She is commemorated on the 9th of January, and is the object of special veneration throughout Belgium. See Ruth d'Aan, Vie de St. Gudule (Brussels, 1708, 12mo); Bailleit, Vie des Saints (vol. i, Jan. 8); Hoefer, Nouv. Bihk. Générale, xxii, 382; Butler, Lives of the Saints, i, 8, 9.

Guebres. See PARSEES.

Guédier de Saint-Aubin, Henri Michel, a French theologian, was born at Gournay-en-Bray June 17, 1695. He studied at Paris, and received the doc- tor's degree from the Sorbonne Oct. 29, 1723. He be- came professor in that institution in 1730, and his libra- rian in 1736. Some time after he obtained the abbey of St. Valmer. He was acquainted with Hebrew, Greek, Latin, French, English, and Italian, besides history, theology, and kindred sciences. For fourteen years he decided all cases of conscience presented to the Sor- bonne. He died at Paris Sept. 27, 1742. He wrote, Histoire saison des deux Alliances (Paris, Didot, 1741, 7 vols. 12mo), which Mortier considers a good concord- ance of the O. and N. T. At the end of every part are remarks and arguments on the designs of the sacred writers, and on the authenticity and inspiration of their writings.—Laducat, Dict. historique; Mortier, Dict. Hist. (edit. 1769); Hoefer, Nouv. Bihk. Gen. xxii, 586.

Guepharytzenius, Codex. See WOLFENBUT- TEL MANUSCRIPTS.

Guelphs and Ghibellines, the names given to two great mediaval parties which acquired a pre- eminent celebrity especially in Germany and Italy, inasmuch as their contests made up a great portion of the history of those countries from the 11th to the 14th cen- turies, and which claim notice here because of the close
GUELPHS AND GIBELLINEs 1026  GIBERT DE NOGENT

connection of their party strives with the ecclesiastical
history of that period, and the use which the papacy
made of them to increase its power and authority.
According to the most reliable authorities, the word
Guelph, or Guelf, is derived from the "Welfi," a baptismal
name in several Italo-German families, which may be
traced even up to the 9th century in a line of princes
who migrated from Germany to Italy. In the 11th cen-
tury, when it appears there as the name of several
chiefs of the ducal house of Saxony. Gibellines is re-
ferred to "Wasilbingen" (anciently Wilsabingen), a town
of Württemberg, and the patrimonial seat of the Hohen-
staufen family. The party conflicts originating in the
rule of the Guelphs, and the Ghibellines, and prob-
elably also the party names, are of earlier date, but
the first recorded use of these terms to designate the
opposing parties occurred A.D. 1140, in the great battle
of Weinsberg, in Swabia, fought between the partisans
of Conrad of Hohenstaufen and those of Henry the
Lion, of the house of Welf, rival claimants of the
imperial throne. In this battle the followers of Conrad
rallied to the cry of "He Wasilbingen!" and those of
Henry to the cry of "He Welf!" These party cries,
transferred to Italy, subsequently the chief theatre of
theological ecclesiastical disputes between Guelphs and
Ghibellines, or Guelfi, in the Italian language, the former
designating the supporters, and the latter the opponents
of the imperial authority, which generally vested in the
Hohenstaufen house. The opposition to this authority
arose from two sources, viz. (1) from the cities and
municipal corporations jealous of their local rights and
liberties, and (2) from the popes, who, jealous of the
power of the German emperors, and irritated by their
exercise of authority in ecclesiastical matters,
especially in regard to investitures (q. v.), favored the
party of the Guelphs, and, indeed, became the represent-
ative leaders thereof. Hence the term Guelph came to
signify in general those who favored the Church's
independence of the State, and the maintenance of mu-
cipal liberty as against the partisans of a supreme and
centralized civil authority represented in the em-
peror. This statement, however, seems not to hold
good always, since in the multiplied and complicated
conflicts of these parties an interchange of the distinct
principles and objects of each appears to have taken
place in certain instances, and the interests of the
hierarchy by no means always coincided with the
aspirations of the cities and municipalities. Hence,
now ever freely it evoked them to advance its own ends.
The contest of the papacy for supremacy over the civil
power, organized and definitely directed to its object
by Gregory VII (q. v.), culminated in the pontificate of
his arch-enemy (q. v.), when, "under a young and
ambitious priest, the successors of St. Peter attained
the full merit of their greatness." (Gibbon, vi, 36,
Harper's ed.), and "the imperial authority at Rome
breathed its last sigh" (Muratori, Annali. Ital. anno
1190).

In the contests of the Ghibellines and Guelph par-
tisians historians note "five great crises," viz. (1) in 1055,
under Henry IV; (2) in 1127, under Henry the Proud;
(3) in 1140, under Henry the Lion; (4) in 1150, under
Frederick Barbarossa; and (5) the pontificate of Inno-
cent III. After the decline of the imperial authority
in Italy, in the conflicts between opposite parties among
the nobility and in the cities, Ghibellina was used to
designate the aristocratic party, and Guelph those pro-
fessively favoring popular government. But the party
name, as thus defined, did not always represent the real
principles involved in the conflicts of the two factions.
In course of time the contest "degenerated into a mere struggle of
rival factions, availing themselves of the prestige of ancient
names and traditional or hereditary prejudices" (Chambers),
so that in 1278 pope Gregory X used the following
language: "Guelphus aut Ghibellinus, nomina ne illis quisdem, qui illis proficient, nona.
nonem, quod signifiit, nemo intelligit" (Muratori,
Sergius, rerum Italicarum, xi, 178); and in 1384 pope
Benedict XIII forbade the further use of the terms and
"we read little more of Guelphs and Gibellines as ac-
tually existing parties." The conflict of principles in
ecclesiastical as well as civil polity which these terms
once served to represent may be traced through every
subsequent age, and has not, even in this 10th century,
cessation to the present day. (Cyclop. s. v.; New American Cyclop., viii, 547-8; Hoe-
Des Francais (see Index); Ranke, Hist. of Papacy (see
Index); Herzog, Real-Encycl. xvii, 659 sq. (J. W. M.)

Guénée, Antoine, a French abbot, was born at
Fontainebleau, 1747. He studied at Paris, entered the
Church, and attained high degrees in the univer-
sity. For twenty years professor of rhetoric at the
college of Plessis, he travelled through Italy, Ger-
many, and England to acquire a knowledge of their
languages, and on his return published several trans-
lations. He afterwards wrote Les Lettres de quelques
Juifs against Voltaire, for which he was made canon
of the cathedral of Amiens, and afterwards attached
to the chapel of Versailles by cardinal de la Roche-
Aymon. During the Revolution he was imprisoned for
ten months in the巴士底狱, and after his libera-
tion lived in retirement with his brothers in stroke
at Fontainebleau Nov. 27, 1808. Among his publications are:
Les Temoinage de la Résurrection de Jésus Christ ex-
aminées suivant les rôles du barreau (from the Engl.
of Sherlock, against Woolston, Paris, 1758, 12mo); —
La Religion chrétienne décrit par le témoignage de
tous les peuples de la Terre (from the Engl. of Lyttelton,
with the addition of two discourses by Seed); — Sur l'Excel-
ence intarissable de l'Ecriture (Paris, 1764, 12mo); —
Observations sur l'histoire et sur les prêches de la Résurrec-
tion de Jésus Christ (from the Engl. of West, against
Wolstenholme, London, 1767, 12mo); — Les
Juifs portugais, allemands et polonais à M. de Voltaire
(Paris, 1769, 8vo); often reprinted, with additions, as
1815, 4 vols. 8vo; 8th ed. Paris, 1817, 8vo; Lyon and
Paris, 1857, 8 vols. 12mo; transl. into English by Le-
fanu under the title Letters of certain Jews to Voltaire
(Dublin, 1777, 2 vols. 8vo); — Recherches sur la Judé
considérée principalement par rapport à la liberté de
son toread, depuis la copie des Babyloniens jusqu'à nos
temps, in Mémoires de l'Académie des Inscriptions,
vol. I (1808); — Les Juifs de France, or the Jewish
Society, of which he had been elected member in 1778. —
Dacier, Notice sur l'abbé Guénée (at the head of the 7th
ed. of Lettres de quelques Juifs, etc., Paris, 1815); Qué-
vard, La France littéraire; Hoefer, Nouv. Biog. Gén.,
xxii, 381; Darling, Cyclop. Bibliographica, i, 1851.

Guertier, Nicholas D., a learned Protestant
divine, was born at Basel in 1624. He studied at the
university of that city, and in 1655 became professor
of philosophy and rhetoric at Herborn. He after-
wards became professor of theology at Hanau, and in
1696 at Bremen. From thence he removed to De-
venter in 1729, and to Franeker in 1767. He died in
1771. His principal work is Systema theologica pro-
phetica, cum indicibus necessariis (Utrecht, edito se-
cunda emendata, 1724, 4to).—Darling, Cyclop. Bibl.,

GIBERT DE NOGENT 1027

GIBERT DE BRES

Gibrard, Anti-pope, was born at Parma in the 11th century. He was never formally consecrated, but he was said to be descended from the counts of Augeburg. Made archbishop of Ravenna through the influence of the emperor Henry IV. He was elected pope by a council held at Brescia (hostile to Gregory VII) in 1080, and took the name of Clement II. His greatest act of authority was the formal excommunication of Gregory VII in 1086; in turn, put him under the ban, and never consented to grant him absolution. Gibrard took Rome by force, but in 1089 was compelled to leave the city. He died at Ravenna in 1100. His election gave rise to the sect of the Libertines, who claimed that the emperor alone possessed the right of appointing popes. The sect was condemned by several councils, and finally disappeared towards the end of the 12th century.—See Artand, Hist. des souverains Pontifes, vol. ii; Art de Verifier les Dates; Hoenfer, Nouve. Biog. Géner. xxii, 514; Herzog, Real-Encycl., v, 498 sq.

Gibert of Ravenna. See Gibert (Anti-pope).

Guide (the rendering, more or less proper, of various Heb. words; Gr. ὑποψις). Such was Hobab invited by Moses to become to the Israelites in the wilderness (Num. x. 31, "that thou mayest be to us instead of eye"). See EXOD.

Guido de Aresso, or Guis, a Benedictine monk of the abbey of Pomposa, noted in the history of music. He was born at Aresso about 990, and early distinguished himself by his talent for music, which he taught in his convent. Numerous inventions (e.g. counter-point) have been attributed to Guido without due regard to his originality; but he did render great service to music by his ingenious simplification of the existing methods of notation. He wrote Micrologus de Disciplina Artis Musicae, "or Brief Discourses on Music, in which most of his inventions are described, as well as his method of instruction." His doctrine of solmisation is, however, not found in that work, but set forth in a small tract under the title of Argumentum nunc Canus inveniendi. He died about the middle of the 11th century, but the exact date of his death is unknown. See BURNEY, History of Music: GERBERT, Scriptores Eccl. Musica Sacra: HOEFNER, Nouv. Biog. Générale, xxii, 511; HERZOG, Real-Encycl., v. 411.

Guido de Bres, an evangelist and martyr of the Walloon Church, was born at Mols in 1540. He was brought up in the city of Rome, but by searching the Scriptures arrived at the knowledge of evangelical truth, and was compelled by persecution to escape to London, where he joined the Walloon Church organized under Edward VI, and prepared himself for the ministry. He afterwards returned to his native country as evangelist and travelling preacher, in which capacity he showed great zeal, first at Lille, where there was a large sect Protestant community, which was destroyed by imperial decree; and then returned to Ghent, where he published a polemic tract out of the fathers entitled Le bâton de la foi. He then went to prosecute his studies at Geneva, where he became a determined adherent of Calvin. Returning to his country, he resumed his evangelical labors, reorganized the three principal centers of the French speaking peoples of Brabant, and Valentienne, and made the whole of southern Belgium and northern France, from Dieppe to Sedan and from Valenciennes to Antwerp, the field of his indefatigable activity. Valentienne, which had become almost entirely Protestant, was stormed by Noircarmes in 1567. Guido was editor of that work, and was taken to prison. After seven weeks of imprisonment he was hanged, with the young La Grange, on the last day of May, 1567. Guido, though in the prime of life, leaving behind him a wife and several
young children, met death not only calmly, but cheerfully. While in prison he had written letters of consolation to his mother, to whom he was much attached, and to his congregation; the latter epistle, containing a thorough refutation of the Roman Catholic doctrine of transubstantiation, is to be found in the Histoire des Martyrs (Geneva, 1617), together with a life of Guignard and La Grange (p. 751-811). Guido's prediction that the seeds of Protestantism he had so carefully sowed would grow with greater strength after being watered with his blood, has been fulfilled. To him the Dutch Church owes the fact that, instead of becoming a mere branch of the French (Cercle de la Fortune Française) Reformed Church, it has remained between the two, a shield and a blessing for both. Guido drew up in 1569 a confession of faith, after the model of the French Confession drawn up in 1559 at Paris. This confession he submitted to Calvin, by whose advice he changed it in some particulars, and, after obtaining the assent of the principal Reformed churches in the Netherlands, he published it in 1562 as the Confession of Faith of the Reformed Church in the Netherlands, sending a copy of it, with an appropriate and remarkable introduction, to King Philip II. The theologians of Geneva declared that the Netherlands might adopt the French Confession as it stood; but Guido probably foresaw that the adoption of a confession exclusively their own, in French and Low-Dutch, was the only means to form a united church in that country, inhabited by people of many tongues and speaking two languages. See Le Long, Kort historisch Verhael van den oorsprong der Nederlandse hervormde kerken onder Krijgs, etc. (Amsterdam, 1743, 4to); G. Brandt, Historie der reformatie in en omstreken der Nederlanden (Amsterdam, 1671); Teyp en Dermont, Geschiedenis der Nederlandse Hervormde Kerk (Breda, 1813, 2 vols.); and especially Van der Kemp, de Eere der Nederlandse hervormde Kerk (Rotterdam, 1880).—Herzog, Rec. Encyclop., v, 412; Motley, Rise of the Dutch Republic, vol. 1; Christian Intelligencer, March 14, 1861.

Guignard, Jean, surnamed Briquevard, a French Jesuit of the 16th century, and, during the League, rector and librarian of the college of Clermont at Paris. After the attempt of Jean Châtel against the life of king Henry IV, the Jesuits were charged with being implicated in the affair, as the would-be assassin was one of their pupils. Their houses were searched, and some violent writings of Guignard against the king were discovered. He defended himself by saying they had before the king's permission to the Roman Catholicism, and that since that time he had always taught obedience to the royal authority and remembered the king in his prayers. He was condemned of high treason, sentenced to be hanged, and his body burnt. The execution took place on the same day, Jan. 7, 1559. He persisted to the last in asserting his innocence. The next day all the Jesuits were banished from Paris. Some Jesuit writers—father Jouveney, for instance—in writing the history of the order, have represented Guignard as a martyr. See Sully, OEuvres de l'Etoile, Journal des Hommes; L'Histoire III; De Thou, Hist. lib. xxi; Simondi, Hist, des Francais (see Index); Hesfor, Nouv. Biog. Générale, xxil, 566. (J. N. P.)

Guignes, Christien Louis Joseph de, a French Orientalist, was born at Paris Aug. 25, 1759, and died in the same city March 9, 1845. He was instructed by his father, Joseph de Guignes, in the Oriental language, having Chinese as a special study. In 1784 he was appointed French resident in China and consul at Canton, and before his departure thither he was also appointed correspondent to the Academy of Sciences and the Academy of Inscriptions and Belles-Lettres. After spending 17 years in China he returned to France, having meanwhile communicated to the academies several interesting and useful papers, which were published in their Mémoires. In 1808 there issued from the imperial press of China, under the title of Vahr, Fleur d'or de France, Rallot dans la intervalles des Armées 1784 à 1801 (3 vols. 4to, with fol. atlas of maps and plates). Among the grand literary projects of the reign of Louis XIV was the publication of a dictionary of the Chinese language, but the project has not been realized, and was apparently abandoned. The imperial government of Napoleon I determined to revive and complete the enterprise, and de Guignes, by a decree dated Oct. 22, 1808, was selected to compile such a work. In 1818 it appeared from the imperial press, bearing the title of Dictionnaire de la langue française, impair, l'ordre de S. M. l'empereur et roi Napoleon le Grand, etc. (Paris, fol.). This work proved to be, in the main, only an adaptation of the Han-tz-i-giu (i.e. Occidental interpretation of Chinese characters), a Chinese-Latin vocabulary by a Franciscan missionary to China, Basile de Glemonts, whose modest but valuable labors de Guignes had appropriated without acknowledgment. The plagiarism was discovered, and severely but justly censured by the critics of the time, and the effect was undoubtedly to diminish the appreciation of any additions or improvements made by de Guignes. See Guignes, Notice biogr. Q. Ann. Acad. phil., 1828, 1829; New American Cyclopaedia, viii, 555. (J. W. M.)

Guilbert. See Guir bert and GIlbert.

Guilbertines. See Gilbertines.

Guil, William, a divine of the Church of Scotland, was born at Aberdeen in 1586, and educated at Marischal College, then recently founded, with a view to holy orders. Before he entered the ministry, however, he published a treatise entitled The New sacrifices of Christian Incense to Christ and The only way how we can come in that perfect position. He was very soon after called to the pastoral charge of the parish of king Edward, in the presbytery of Turiff and synod of Aberdeen. In 1617, when James I visited Scotland with a view to establish episcopacy, and brought bishop Andrews, of Ely, with him, to assist in the management of that affair, the latter paid great regard to Guil; and the following year, when Andrews was promoted to the see of Winchester, Guil dedicated to him his Moses Unveiled, pointing out those figures in the Old Testament which allude to the Messiah (new ed. Edinb., 1619, royal 8vo). He wrote several works against Popery; an Exposition of Solomon's Song (Lond., 1656, 8vo):—An Explanation of the Apocalypse (Aberdeen, 1656);—Exposition of Second Samuel (Oxford, 1659, 4to). He was a man of great learning. In 1640 he was made principal of King's College, Aberdeen, but, giving up his taking part with the monarchy, he was deposed by the Parliamentary commissioners in 1651, and died in 1657. See Shirreffs, Life of Guil (Aberdeen, 1799, 2d ed. 8vo); Allibone, Dict. of Authors, 1, 746; Darling, Cyclop. Bibliographica, 1, 1582.

Guil. In the Middle Ages, religious clubs or mutual benefit societies, embracing men and women, were established in nearly every parish church. They kept yearly feasts, supported annals for the repose of deceased members, sometimes also hospitals for the relief of decayed members, and always collected alms for their sick and poor. On certain anniversaries they met, dressed in the almsman's habit, wearing liver green gowns and hoods, usually of two colors, and the badges of their patron saint. In the monasteries, kings, nobles, and benefactors were admitted as lay members, and in the parish societies as honorary members. "The members were divided into several classes relating to the guild ranks and obedience to the superiors." Of late, the Ritualists in the Anglican Church are endeavoring to revive the guilds, and quite a number had been re-established up to the year 1869. A list of them is given in the Church Union Almanac for 1869 (Lond. 1869).—Walcott, Sacred Archaeology, s. v.

Guilain. See Gislain.
GUILLAUME. See WILLIAM.

Guillumine or Guillelmette, a Bohemian enthusiast of the 13th century. She went from Bohemia to Milan, where she gave herself out as the daughter of King Louis of Bohemia. She pretended to have been conceived in a miraculous manner, like Christ. She professed to have the mission of saving bad Christians, Jews, and Mohammedans. Her pretended visions and semblance of sanctification gained her many adherents. The mysteries of her system are said to have been greatly in vogue in Bohemia and Hungary. She died in 1290, according to Moréi (1300 according to Bosi), and was buried with great honors in the monastery of Chiaravalle, near Milan, founded by St. Bernard. The sect continued under the management of a priest, Andrew Sammita, and of a nun of the convent of Humiliati, whom Guillaumine had herself pointed out for her successor. Six years after, however, their secret practices were revealed, and the women were imprisoned and punished. Saramita and Porovana were burnt after being condemned by the Inquisition, as was also the body of Guillaumine, disinterred for the purpose. The house where the sect met was razed, and a hermitage erected in its place; it became afterwards part of a convent of Carmelites. Some writers have attempted to refute the accusation of immorality made against the sect. See Bosi, Chron.; Maillon, Musée; Mém. de la Soc. d'Anthrop., 1814; Hocque, Nouv. Biog. Générale, xxii, 714 sq. (J. N. P.)

Guillon, Marie Nicholas Silvestre, a French priest and distinguished humanist, was born at Paris Jan. 1, 1760. He studied at the colleges of Du Plessis and Louis-le-Grand, and acquired great proficiency not only in theology, but in medicine, natural sciences, and mathematics. Received as professor in the university in 1789, he founded the Church, and was chosen by his colleagues to direct the Course of Polytechnic and Humanism, and disinguished as a preacher. He was afterwards almoner and librarian of the princess of Lamballe until her murder, Sept. 1792. He then fled to Sceaux, where, under the name of Paste, he practiced medicine for some time to avoid persecution. He afterwards removed to Meaux, and in 1798 to Paris. Some time after he became connected with the abbot of Fontenay in the publication of the Journal général de Littérature, des Sciences et des Arts. After the restoration of Roman Catholic worship he became honorary canon and librarian of Paris cathedral of St. Paul, and then professor of rhetoric and homiletics in the theological faculty, and almoner of the college of Louis-le-Grand. He was afterwards successively appointed almoner of the duchess of Orleans in 1818, and inspector of the academy. His ready acquiescence in the Revolution of 1830 excited the displeasure of the clergy, and it was with great difficulty the king succeeded in obtaining his appointment as bishop of Beauvais. In this position he attended the last moments of the abbé Grégoire (q. v.), to whom he administered the sacraments. Severely censured for this, he referred the matter to the pope, resigning his bishopric in the mean time. Thanks to the interference of the court, the matter was settled, and Guillon was appointed bishop of Morocco in partibus infidelium, July 7, 1833. In 1837 he was appointed dean of the faculty of theology; but, when the French government entered into union with Rome, Guillon was sacrificed by being sent to Dreux to keep the chapel which had successively received the remains of several children of the king. He died in Montfortmill Oct. 16, 1847. He was a most prolific writer. Among his theological works we notice the following: "Quaestiones," ed. by a priest of Paris (Paris, 1798, 8vo); "Collection ecclé., ou recueil complet des ouvrages faits depuis l'ouverture des désirs généraux relativement au clergé (Paris, 1793-1792, 7 vols. 8vo, under the name of Baruel);" "Parii. des Révolutions pour le repos et la sûreté de l'Eglise (Paris, 1791, 8vo, often reprinted);" "Brefs et Instructions au saint-siège relatifs à la Révolution française, etc. (Paris, 1793, 2 vols. 8vo);" "Discours prononcé dans l'église de St. Sulpice, à l'invitation de l'Eglise romaine (Paris, 1802, 8vo);" "Hist. générale de la Philosophie ancienne et moderne, etc.; ou supplément à la Bibliothèque choisie des Pères grecs et latins (Paris, 1835, 2 vols. 8vo, and 4 vols. 12mo, 1848, 4 vols. 12mo);" "Hist. de la nouvelle Hérésie du ciel" (Paris, 1835, 3 vols. 8vo);" "Examen critique de la Lettre du Gilbon, de l'Abbe de M. Sibulier (Paris, 1841, 8vo)." See Léon Laya, Notice biog. (Moniteur de Dec. 15, 1874); Hoefer, Nouv. Biog. Générale, xxii, 736 sq.

Guillou, See Sin.

Guilt, besides its proper significance, occurs in the A. V. in the sense of italiq, as a rendering of τάξις, Num. xxxvi, 31; τιμωρία, Matt. xxvi, 66; Mat. xiv, 64; and ἐφίλω, Matt. xxiii, 18, like the Lat. reus.

Guion. See Guyon.

Guiscard, or Guichard de Beaulieu, an Anglo-Norman poet, who flourished probably in the reign of Stephen of Angoulême, in the beginning of the reign of Henry II of England. He is known by a poem of some length bearing the title of Sermon of Guiscard de Beaulieu (le sermon Guichart de Beaulieu in the Harleian MS.), which is a satire against the vices of his day. According to this poem, Guiscard, disgusted with the follies and vanities in which he had passed his youth, retired to a monastery. Walter Mapes, a contemporary, or nearly contemporary writer, states (De Nugiis Curial. dist. i, c. 13) that Guiscard was a man distinguished for his wealth and valor, who in his old age surrendered his estates to his son, and, entering a Cistercian monastery, became so eminent a poet in his vernacular (Anglo-Norman) as to be styled the "Home of the laity" (Isaorum Homerus). Of the Sermon, which is all now known of his writings, there is a MS. of the 12th century in the British Museum (MS. Harl. No. 4986), and an imperfect one in the Bibliothèque Impériale de France (No. 1856—given by De Juyss as No. 2560). From this last MS., an edition of the Sermon was published by Judinal (Paris, 1834, 8vo). This poem is written in the versification of the earlier metrical romances, and exhibits considerable poetical talent, and fine language and elegance of manner. —Wright, Biog. Brit. Lit. Anglo-Norman Period, p. 131; Hoefer, Nouv. Biog. Générale, xxii, 771. (J. W. M.)

Guise, HOUER of, the name of a branch of the ducal family of Lorraine, which, during the reign of Francis I, established itself in France, where it was conspicuous in its hostility to the Protestant cause, and played a leading part in the religious wars of the 16th century. The three following members of this family were the most prominent for their abilities, and for bigoted and unscrupulous antagonism to the Reformed party, viz.

1. Charles, cardinal of Guise, better known as cardinal of Lorraine, was born at Joinville Feb. 17, 1524, and died Dec. 26, 1574. He was made archbishop of Rheims in 1538, created a cardinal in 1547, and was employed on several important embassies. In 1558, at an interview with the cardinal Granville at Jérone, he laid the foundations of the alliance between the Guises and Spaine, which continued through, and exerted an important influence on, the civil wars in France. He was present at the Council of Trent (1562), where at first he favored the demand for reform and the superiority of councils to the pope, but was too ambitious to adhere to such principles throughout. Under Francis I he was made governor, and himself, the administrator of the finances. His char-
actor is thus portrayed by De Felice (p. 71): "The cardinal Charles de Lorraine, archbishop of Rheims, and Roman Catholic, was the most prominent victim of that sad day. In 1575 he received, in an encounter with the Calvinists, a face-wound, which gave him the name of Balafré (the scarred), an epithet also applied for a like reason to his father. In 1576 he was active in the fighting less than two miles from the castle of the crown of France for his brother, and to the tiares for himself. So Pius V, somewhat anxious concerning the pert he was playing in the Church, habitually called him the pope on the other side of the mountains. For the rest, he was a priest without settled convictions, yet at the Council of Augsburg he was described as "to please my good masters the Germans," as says Brantôme; he was decried for his evil habits, which he did not even care to hide, and raised the booting of the populace on quitting the dwelling of a courtesan; lastly, he was as pusillanimous in the face of danger as he was arrogant in prosperity." He was, however, a protector of letters, and Rheims owes to him its university. He left some letters and sermons.

II. FRANÇOIS DE LOHRNAINE, brother of the preceding, and second duke of Guise, was born Feb. 17, 1519, at the castle of Bar, and died Feb. 24, 1563, of wounds received on Mount Joze, close to the village of Bar-le-Duc, to be slain by his guards.—Hoefer, Nouvelle Biogr. Générale, xxii, 756-9, and 784-6; De Felice, Hist. de l’Ordre de la Toison d’Or, 200-3. He was the fourth son of the cardinal de Guise, to be slain by his guards.—Hoefer, Nouvelle Biogr. Générale, xxii, 756-9, and 784-6; De Felice, Hist. of the Protagonists of France (London, 1853, 12mo); Wright, History of France, 1, 660-718; Sambon, Histoire des Francs (see Index); Roos, New Gm. Biog. Dict. vol. ii, 443; Huc, Hist. de la Révolution française (see Index); New Amer. Cyclopædia, viii, 568, 564; English Cyclopædia, s. v.; Chambers, Cyclop. s. v. (J. W. M.)

Gulf (χειμαρρος, a chama), an opening or impassable space, such as is represented to exist between Elysium and Tartarus (Luk exvi, 26). See Hades.

Gullich or Guliachi, ABRAHAM VAN, was born at Heemstede, near Amsterdam, in 1579. After studying at Nimegue and the University of Leyden, he was appointed professor of theology at Nimegue, Jan. 17, 1667. Near the close of the same year he became ordinary professor of philosophy and eloquence, and extraordinary of theology, in the gymnasium of that place. In 1672 he was appointed professor of the Carthusian philosophy in the University of Franeker. He died Dec. 31 of the same year. While at Hamburgh he published a philosophical work entitled Disputationes philosophiae. His theological works are, (1) Theologiae Pesantissimae Disputationes, 1675-6 (2nd edition, 1664); (3) volume is appended a treatise on Hermeneutics, entitled Hermeneutica Sacra bipartita:—(2) Libri Propheticorum Vet. et N. Test. compropium et analysis (Amst. 1694). See Geschichte der Niederlandische Historiche Kerk door A. Spyck en J. Dernmont, D. ii; Glasius, Gescbl. Nederland, D. i; also J. Schotanus, Sterringa, Oratio funebris in obitu A. Guliachi. (J. P. W.)

Gulielmus. See William.

Gulloth (Γυληθα, fountain; Sept. Γυληθα and λυγηθα, Vulg. irrigium; Eng. Vers. "springs"), the name of two plots given by Caleb to his daughter, at her special request, in addition to her dower (Josch. xv, 16: Judg. i, 10); from which passages it may be inferred that they were situated in the "south land" of Judah, and were so called from the copious supply of water in their vicinity. See Achar. The springs were "upper" and "lower" possibly one at the top and the other at the foot of a ravine or grot; and they may have derived their unusual name from the supposed variance being different to that of the ordinary springs of the country. The root (Ϡʔʔ) has the force of rolling or tumbling over, and perhaps this may imply that they welled up in that bubbling manner which is not uncommon here, though apparently most rare in Palestine (Stanley, Palestine, Append. § 55). Dr. Rosen (Carlsch. der Deutsch. Mähr. Gesch. 1857, p. 56 sq.)
Gundulf, founder of a sect in Arres and Liege in the 11th century. In the year 1026, Gerhard, bishop of Cambrai and Arres, caused the arrest of a number of persons who were adherents of the heretical doctrines in his diocese, and in various parts of the north of France. A synod was convened at St. Mary's church, in Arres, for their trial. Their rules commanded them to forsake the world; to bring into subjection their fleshly lusts and passions; to support themselves by their own labors; to remain in Arres, and in 1026, to exorcise love to all who felt inclined to adopt their mode of life. This confession, joined with their well-known practices of washing each other's feet, led to the belief that they differed from other Christians only in a devoted attachment to the letter of Scripture. But Gerhard professed to know more of their rules than they acknowledged publicly. He had caused himself, he says, to be initiated into their worship by some proselytes, and so learned all their tenets. They appear to have held the following principles: "The holy Church is called to be the kingdom of God, to have all the precepts (Acts iv. 32), and all the consciences of men, to preach the gospel to all nations chosen by election. Admission into it is signified by the imposition of hands, after a confession of faith and taking certain vows. Besides the regular assemblies in the church, there are prayer-meetings, in which the disciples wash each other's feet. The apostles and martyrs are venerated, but saintliness is nowhere hidden. The fulfilment of the law constitutes righteousness, which alone works salvation. Disobedience in the elect, and disregard of their professional vows, entail everlasting condemnation on them. Neither penance nor conversion can afterwards avail them. These people rejected the Roman Church, the supremacy of the bishop of Rome, the respect shown to bishops, the whole hierarchical system, and even all clergy whatever. "Dogmatic, liturgical, and constitutive traditions are worthless and of no account. All the sacraments of the Roman Catholic Church are rejected, especially baptism and the Lord's supper. The consecrated elements of the Lord's supper are nothing more than what they appear to our senses. At the last supper, Christ did not really give his disciples his body for food and his blood for drink. Marriage and all sexual intercourse are to be avoided, the church is not holy, hence worship does not derive any special virtue from its being held in them. The altar is but a heap of stones. Fumigations and the ringing of bells are useless ceremonies. Croases, crucifixes, images, etc., tend to idolatry."

Bishop Gerhard charged the Gundulfans with holding these and similar opinions, but they refused to acknowledge them. They attempted only to defend their views regarding baptism, but finally announced that they were ready to recant their errors. Then the bishop and other members of the clergy solemnly condemned the heresy, excommunicated its originators in case they did not repent, and made the prisoners sign a Roman Catholic statement of the doctrines on which they had held heretical opinions, translated from Latin into the vernacular; after which the prisoners were released, the synod closed, Gerhard wrote a copy of its acts to the bishop of Liege, who applied himself also with great zeal to the suppression of the heresy. These acts, which are the only source from which we can gather the details of this affair can be obtained, are to be found in Archbishop's Spicilegium (2nd edit., i. 607-624), and in Mann's Concilia (xiii, 433 sq.). Still they give no information as to the rise and development of this party, nor on its relation to those which arose before and after it in the same and neighboring districts. Gundulf appears to have made northern France the exclusive field of his exertions, and it was probably there he had made the converts which were afterwards arrested at Arres. His connection with them was probably an imitation of Christ's association with his disciples; they called him the Master, and, as already stated, considered the imitation of the apostles as their highest aim. Gundulf may have been himself a working man who went to that country because the trades, and especially that of weaver, were in a prosperous condition. There, he probably found a body of disciples among his fellow-workers, whom he instructed in his principles, and whom he afterwards sent as travelling workmen to propagate his views in their own districts. Of the end of Gundulf's career nothing is known. The period of his greatest activity was 1026, and he was already in Arres in 1026. As we see no mention of search for him having been made by order either of Gerhard or of the bishop of Liege, although his disciples had proclaimed him as their chief, it is probable he was out of the reach of both, and had perhaps been already removed by death. We have no further information as to what became of the sect afterwards, and, at any rate, it continued, if at all, in secret. Similar sects have existed at all times in the bosom of the Romish Church, and they are generally found to represent vital piety as opposed to the corruptly Christianized life of Rome. Among the earliest was the Mittelalterlicher, p. i. p. 39 sq.; Herzog, Recl.-Encycl. v. 414 sq.; Neander, Ch. History, iii. 597.

Guni't (Heb. Guni, גוני), dyed [Gesen.] or protected [Fürst]; Sept. 'Pouvi, but in 1 Chron. vii. 18, 'Pouvi, Vulg. Guni), the name of two men.

1. One of the sons of Naphtali (B.C. ante 1856, but not necessarily born before the migration to Egypt) (Gen. xvii. 31; Num. xxvii. 48; 1 Chron. vii. 18). His descendants are called Gunites (Num. xxvii. 48).

2. Father of Abdil, and grandfather of Ahi, which last was chiefest of the Gileadite Gadites (1 Chron. v. 15). B.C. between 1093 and 792.

Guni'te (Hebrew with the art. lqy-Guni', גוניט, Sept. i 'Pouvi, Vulg. Gunites, A. V. "the Gunites"), a general name of the descendants of Guti, of the tribe of Naphtali (Num. xxvii. 48).

Gunn, Walter, was born in Carlisle, Scholaric Co., N. Y., June 27, 1715. He was graduated at Union College in 1840, and studied theology in the seminary at Gettysburg. He was licensed by the Hartwick Synod in 1842, and the following year was ordained as a missionary to foreign lands. He soon sailed for India, where he labored in faith, and with perseverance and success until his residence in the United States, which occurred at Guntown July 8, 1857. Mr. Gunn was the first missionary from the Lutheran Church in the United States who fell in the foreign field. He exerted an influence in India which still lives. He was a man of faith and love, a missionary in the highest sense, of whom the "world was not worthy." (M. L. S.)

Gunn, William, a minister of the Methodist Episcopal Church, was born in Caswell Co., N. C., March 13, 1797, and died at Lexington, Ky., Sept. 8, 1853. He removed in early life to Tennessee with his father; became, while a mere youth, an active member of the Church; was licensed to preach before 21 years of age, and joined the itinerancy in 1819. He spent his subsequent life in ministerial labors, mainly in the state of Kentucky, filling with great acceptability and usefulness the positions of circuit and station preacher and presiding elder, and died in the full assurance of the faith he preached to the others and so beautifully exemplified in his life. He published, in connection with another minister, The Christian Psalmsim (Louisville, Kentucky), and also another work, chiefly selections of the preceding, and entitled The Christian Melodist. - Sprague, Annals of the Amer. Pulpit, vii. 622; Minutes of Conf. of M. Church South. (J. C.)

Gunning, Peter, D.D., an eminent English High-church bishop, was born at Hoo, in Kent, in the
year 1618, and was educated at Clare Hall, Cambridge. He became fellow and tutor of his college, and distinguished himself as a preacher, but on account of his zeal for the king's service he was ejected, and afterwards was made chaplain to Sir Robert Shirley, at whose death he obtained the chapel at Exeter House. Strangford. Sir Robert promised his son-in-law that as long as his son should be rewarded; he was created D.D. by the king's mandate. He was one of the censurers selected by the bishop to maintain the High-church cause at the Savoy Conference (1651), and was the principal disputant with Baxter. He had a Romanizing tendency, and advocated papistry, for in 1662 he composed a paper for the Anglican church of Chichester, and in 1674 was translated to Ely, where he died in 1684. He wrote largely on the controversies of the time, and especially The Paschal or Lent Past Apostolical and Perpetual, recently reprinted in the Library of Angora, vol. iv. of Hook, Eccl. Hist. vol. v; Neal, History of the Puritans, iii, 90, 168; Darling, Cyclop. Bibliographica, 1. 1655.

Gunpowder Plot, a conspiracy formed and matured in the years 1604-5 by some English Romanists to blow up with gunpowder the Parliament House, and thus destroy the king, lords, commons, and representatives of England when assembled as the opening of Parliament, with the hope of being able, during the resultant confusion, to re-establish their faith in the kingdom, or, at least, avenge the oppressions and persecutions of their adherents. At the accession of James I to the throne of England, the Catholics, who had been banished, or, at all events, a great relaxation in the rigor of the penal laws against them, and were greatly exasperated on finding that not only were their hopes in this regard disappointed, but that increased severity was employed towards them; were, therefore, on the 5th of November, when they were yearly seated on his throne, in Feb. 1604, 'assured his council that 'he had never any intention of granting toleration to the Catholics,' that he would fortify the laws against them, and cause them to be put into execution to the utmost.' The concever of the design of taking so indifferent a nation and brutal a regency was Robert Catesby, of 'ancient family and good estate,' who had once absconded and then returned again with increased ardor to his early faith. He made known his scheme first to Thomas Winter, a 'gentleman of Worcestershire,' and next to John Wright, who belonged to a highly respectable family, and the justice of the Court, and was mentioned in prison (Nov. 19, 1605) by a fellow-conspirator (Fawkes), "these three first devis'd the plot, and were the chief directors of all the particularities of it." Winter refused his assent to the plan until an effectual undertaking was obtained from him. The plot was to take place on the 5th of November, the most meditated time of the year for Spanish influence in England, and to be carried out by the English Catholics by a clause to that effect in the treaty then negotiating between England and Spain. He accordingly went to the Netherlands to further that object, where he learned from the Spanish ambassador that it could not be accomplished. He, however, met at Ostend an old associate, Guy Fawkes (q. v.), and foreseeing in him an efficient coadjutor in Catesby's scheme, induced him to return with him to England without making known to Fawkes the particular nature of the plot. Fawkes, though not the projector or head, became by far the most notorious member of the conspiracy, and popular opinion long represented him as a low, cruel, and mercenary ruffian; but he appears to have been by birth a gentleman, and of a nature chivalrously daring and unshifful, but thoroughly perverted by a blind fanaticism, a man of confidence, and of a self-willed turn of his own fancy and its adherents as the essence of Christian virtues. Soon after the arrival of T. Winter and Fawkes in London, a meeting was held at Catesby's lodgings, at which there were present the four already named and an additional member of the conspiracy, Thomas Percy. The business of the meeting was "the present service to the interest of the earl of Northumberland." These five, at Catesby's request, agreed to bind themselves to secrecy and fidelity by a solemn oath, which, a few days afterwards, in a lonely house beyond St. Clement's Inn, they took on their knees in the following words: "You swear by the blessed Trinity, and by the sacrament you now propose to receive, never to disclose, directly or indirectly, by word or circumstance, the matter that shall be committed to your knowledge. Be it for the execution thereof until the rest shall give you leave." They then went into an adjoining room and received the holy sacrament from father Gerard, a Jesuit priest, who was, it is said, ignorant of their horrid project. A few particulars of the plot were then communicated to Fawkes. Petre, an agent of the king, and the plan then agreed on. Percy, whose position as a gentleman pensioner would prevent any suspicion arising therefrom, rented of a Mr. Ferriss, on May 24, 1604, a house adjoining the Parliament buildings, the keys of which were given to Fawkes. A considerable sum of money was raised in London, and who assumed the name of John Johnson, and the position of servant to Percy. They took a second oath of secrecy and fidelity to each other on taking possession of the house, but before their preparations were completed for beginning the work of mining through the cellar, the Commons, on the 15th, prorogued Parliament was prorogued to Feb. 7, 1606. They separated to meet again in November, and, in the mean while, another house was hired on the Lambeth side of the river, in which wood, gunpowder, and other combustibles were placed, to be removed in small quantities to the cellar of the house of Petre. A man was put in charge of Robert Kay, or Kayes, an indigent Catholic gentleman, who took the oath and became a member of the band. On a night in December, 1604, the conspirators, having provided themselves with tools and other necessaries, and other implements were placed to work on the mine, Fawkes acting as sentinel. The wall separating them from the Parliament House was found to be very thick, and more help was needed; so Christopher Wright, a younger brother of John Wright, was taken in on oath, and Kay brought over from Lambeth. The work was carried on secretly, the conspirators begin- ning the labor with discussions of future plans. They agreed in the policy of proclaiming one of the royal family in the place of James, as they supposed his eldest son, prince Henry, would be present and perish with his father in the Parliament House, Percy undertook to blow up the Parliament building, the same or the mine were exploded; and, in default of Percy's success, arrangements were made to carry off the princess Elizabeth, then near Coventry under the care of lord Harrington. 'Horses and armor were to be collected immediately,' they said, 'in case Percy should not lay any safe plan for saving the lives of Roman Catholic members of Parliament. While the matter was thus progressing, Fawkes reported the prorogation of Parliament to Oct. 8, and they separated until after the Christmas holidays. In January, 1605, John Grant, a Warwickshire gentleman, and Robert Winter, eldest brother of Thomas Winter, were admitted to the conspiracy, and shortly after them Thomas Bates, a servant of Catesby, and the only participant in the plot not of the rank of a gentleman. While going on with the work in Feb., 1605, they were alarmed by some noises, and Fawkes, who was about to work on the stove of the cell where the iron, brass, and other (86 lbs.) was conveyed from its place of concealment at Lambeth into this cell, and covered up with stones, bits of iron, and fagots of wood. All was ready in May, and the conspirators separated to await the meeting of Parliament. Fawkes went to the Netherlands on a mission conducted in distant relations of the earl of Northumberland. These five, at Catesby's request, agreed to bind themselves to secrecy and fidelity by a solemn oath, which, a few days afterwards, in a lonely house beyond St. Clement's Inn, they took on their knees in the following words: "You swear by the blessed Trinity, and by the sacrament you now propose to receive, never to disclose, directly or indirectly, by word or circumstance, the matter that shall be committed to your knowledge. Be it for the execution thereof until the rest shall give you leave." They then went into an adjoining room and received the holy sacrament from father Gerard, a Jesuit priest, who was, it is said, ignorant of their horrid project. A few particulars of the plot were then communicated to Fawkes. Petre, an agent of the king, and the plan then agreed on. Percy, whose position as a gentleman pensioner would prevent any suspicion arising therefrom, rented of a Mr. Ferriss, on May 24, 1604, a house adjoining the Parliament buildings, the keys of which were given to Fawkes. A considerable sum of money was raised in London, and who assumed the name of John Johnson, and the position of servant to Percy. They took a second oath of secrecy and fidelity to each other on taking possession of the house, but before their preparations were completed for beginning the work of mining through the cellar, the Commons, on the 15th, prorogued Parliament was prorogued to Feb. 7, 1606. They separated to meet again in November, and, in the mean while, another house was hired on the Lambeth side of the river, in which wood, gunpowder, and other combustibles were placed, to be removed in small quantities to the cellar of the house of Petre. A man was put in charge of Robert Kay, or Kayes, an indigent Catholic gentleman, who took the oath and became a member of the band. On a night in December, 1604, the conspirators, having provided themselves with tools and other necessaries, and other implements were placed to work on the mine, Fawkes acting as sentinel. The wall separating them from the Parliament House was found to be very thick, and more help was needed; so Christopher Wright, a younger brother of John Wright, was taken in on oath, and Kay brought over from Lambeth. The work was carried on secretly, the conspirators begin-
family in Gloucester;" was admitted into the plot and sent to Iome, not to reveal the project, but, on its consummation, to gain the favor of the Vatican by explaining that its object was the re-establishment of Roman Catholicism in England. A further prostration of Parliament to Nov. 5 having been made, the conspirators were led, in consequence of the repeated proclamations, to fear that their plot was suspected; but Thomas Winter's examinations, made on the day of prorogation, served to reassure them. "Catesby purchased horses, arms, and powder, and, under the pretext of taking a shooting party, went to each of his friends in the Shrewsbury, as if for a hunting party; Ambrose Rookwood, of Suffolk, who owned a magnificent stud of horses; and Francis Tresham, who "engaged to furnish twenty;" but when he arrived, the prince was not at home, having intrusted his secret to him. As the 5th of November drew near, "it was resolved that Fawkes should fire the powder by means of a slow-burning match, which would allow him time to escape before the explosion" to a ship ready to proceed with him to Flanders. The other events of the plot—delivering the prince of Wales and prince Charles, the prince Elizabeth should be proclaimed, and a "regent appointed during her minority." On another point they failed to harmonize so fully. Each conspirator had a friend or friends in Parliament whose safety he wished to secure, but to communicate the project to so many persons involved too great a risk, and it was concluded that no express notice should be given them, but only such persuasion, upon general grounds, as might deter them from attending. Many of the conspirators were averse to this resolution; and angering against Montague, in particular, for his sisters who had married lords Stourton and Mounteagle. On a refusal of Catesby and other leaders to allow him to notify directly Mounteagle, it is said he hinted that the money promised by him would not be forthcoming, and ceased to be a holder of the meeting. It is probable he suspected Mounteagle, for this nobleman unexpectedly gave a supper, Oct. 26, ten days before the meeting of Parliament at a house at Hoxton which he had not lately occupied, and while seated at table a page brought him a letter indicating that he had received it in the street from a stranger, who urged its immediate delivery into Mounteagle's hands. The letter warned Mounteagle not to attend the Parliament, and hinted at the plot, and was on the same evening shown by Mounteagle to several lords of the council, and on Oct. 31 shown to the king also. The conspirators suspected Tresham of having betrayed them, and accused him of it, but he stoutly denied it. They were now thoroughly alarmed; some left London, and others concealed themselves; but Fawkes remained courageous at his post in the cellar, notwithstanding the hourly increasing intimidation that was known to him. On the evening of Nov. 4 the lord chamberlain visited the cellar, saw Fawkes there, and, noticing the piles of faggots, said to him, "Your master has laid in a good supply of fuel." After informing Percy of this ominous circumstance, Fawkes returned to his post, where he was arrested about 2 o'clock on the morning of Nov. 5 by a company of soldiers under Sir Thomas Knevet, a Westminster magistrate, who had orders to search the houses and cellars in the neighborhood. On Fawkes's person was found a watch (then an uncommon thing), some small instruments, and a key. Some news, and behind the cellar door a dark lantern with a light burning. They removed the wood, etc., and discovered the gunpowder also. Fawkes was taken before the king's council, where he boldly avowed his purpose, only expressing regret for its failure, and, in reply to the king's inquiry "how he could have the heart to destroy his children and so many innocent souls," said, "Dangerous diseases require desperate remedies. He utterly refused to name his accomplices, and neither temptations nor tortures, whose horrible severity is shown by the contrast in his signatures on the 8th and 10th of November, could induce him to implicate others further than their own actions had already done, while at no time would he admit the act to have been premeditated, refusing to plead guilty on his trial because the indictment contained averments implicating them. For the connection of the Jesuits with this conspiracy, see Garnett; Jesuits; and the authorities given at the end of this article.

Catesby and John Wright had departed for Dunchurch before Fawkes's arrest, and the other conspirators, except Tresham, fled from London after that event. They met at Ashby Legders, and resolved to take up arms, and endeavor to excite to rebellion the Roman Catholics in Warwickshire, Worcestershire, Staffordshire, and elsewhere. But their action was complete, and their efforts only served to point them out as members of the conspiracy. They were pursued by the king's troops, and at Holbeach the two Wrights, Percy, and Catesby were killed, and Rookwood and Thomas Winter wounded in a conflict with the troops. The other events of the plot—Tresham died in the Tower of disease; the remaining seven, viz., Digby, Robert and Thomas Winter, Rookwood, Grant, Fawkes, Kay, and Bates, were tried on the 27th January, 1606, and executed on the 80th and 81st of that month. This diabolical plot resulted fearfully against the Romish state, and its memory is still a bulwark of Protestant feeling in England. The revolting atrocity of the deed performed by these misguided men must ever excite horror and reproach; but we may hope that candid minds in this more tolerant age, while judging them, will condemn the offenses, despise the works, and despise the attempts which bred such fanaticism, and the spirit of persecution which aroused it to action.

The 5th of November, in commemoration of this plot, is called Guy Fawkes's Day, and until recently a special service for it was found in the ritual of the English Church. It was ruled, but is now kept by the church. It was first kept in 1606, and is still kept as such in England, especially by the juveniles. The following account of the customs pertaining thereto is abridged from Chambers, Book of Days, ii, 540-50. The mode of observance throughout England is that he who dresses up a figure in cast-off clothing (with a paper cap, painted and knobbed with paper strips, insisting ribbons), parading it in a chair through the streets, and at night burning it in a bonfire. The image represents Guy Fawkes, and, consequently, carries a dark lantern in one hand and matches in the other. The procession visits the houses in the neighborhood, repeating the time-honored rhyme—

"Remember, remember,
The fifth of November,
The gunpowder treason and plot;

There is no reason
Why the gunpowder treason
Should ever be forgot!"

Numerous variations of the above rhyme are used: for example, at Lisle, the following:

"The fifth of November,
Since I can remember,
Gunpowder treason and plot;
This is the day that God did prevent,
To blow up his king and Parliament.

A stick and a stake,
For Victoria's sake.
If you won't give me one,
You'll be sorry, you will.
The better for me,
And the worse for you!"

It is an invariable custom on these occasions to solilo-
GUNTHER
1034
GURLY

GUTHER was as obnoxious as that of Hermes. His philosophical treatment of the Christian doctrines was deemed in a very derogatory tone by Goethe. He also gave great offence by daring to criticise high authorities, as Thomas of Aquinas. Still greater dissatisfaction was created by his dualistic theory concerning mind and body. His works were denounced in Rome; on April 10, 1857, his works were put on the Index of prohibited works, and the Pope appeared charging him with errors in the doctrine of the Trinity, of Christology and Anthropology, and an over-estimation of the powers of reason. Günther, and with him most of his adherents, submitted to the Index condemned as canonically invalid. He died on January 20, 1867. Günther himself was deeply affected by this humiliation, and expressed the hope that his philosophy might be supplanted by something better. He died Feb. 24, 1863, in Rome.

Guptha. See Jotapata.

Gur (Heb. id. נֹּב, a sheep, fully נֹּבָּא, מַעֲלֶ֖ה גָּרָ֑עָה; Sept. נְבָעָ֖ה, תֶּרֶם נֹּבָּא; Pesh. غُر, i.e. access of the sheep; Sept. να ἀναφέρειν Πεσην, i.e. the coming up to Gurr), a place or elevated ground in the immediate vicinity of (2) Ibleam, on the road from Jezreel to Beth-haggan, where Jehu's servants overtook and mortally wounded the flying king Abaziah (2 Kings ix, 27), B.C. 883. It is, perhaps, the little knoll marked on Van de Velde's Map about midway between Zenin and Jerahmeel. See Ibleam; Gur-baal.

Gur. See Whelp.

Gur-baal (Heb. id. גָּרָ֖א, a sheaf; Sept. וֹרַפָּא, Vulg. Gurbath), a place in Arabia, successfully attacked by Uzziah (B.C. 805) (2 Chron. xxxvi, 7); hence on the confines of Judæa; probably so called from having a temple of Baal. From the rendering of the Sept., Calmet infers that it was in Arabia Petraea. Arabian geographers mention a place called Baal on the Syrian road, north of El-Medinah (Marashid, s. v.). The Tarqum reads "Arabs living in Gerar"—suggesting נֹּבָּא instead of נֹב. See Gerar.

The ingenious conjectures of Bochart (Phaleg, ii, 22) respecting the Meluhim, who are mentioned together with the "Arabians that dwell in Gur-baal," may be considered as corroborative of the identification (compare 1 Chron. iv, 89 sq.; see Ewald, Jer. Gesch. i, 322). See Muhumin.

Gurgoyle. See Gargoylo.

Gurley, Phineas Denmark, D.D., an eminent Presbyterian minister, was born Nov. 12, 1816, at Hamilton, Madison County, N. Y., and died Sept. 80, 1868, in Washington, D. C. During his infancy his parents removed to Paraisoville, St. Lawrence County, N. Y., where, at the age of fifteen, he joined the Presbyterian Church, and soon after entered Union College, where he graduated in 1837 with the highest honors of his class. The same year he entered the Theological Seminary at Princeton, N. J., and graduated there in Sept. 1860, having been licensed to preach the April preceding at Cold Spring, N. Y. He accepted straightway a call to the First Presbyterian Church of Indianapolis, Ind., from which a strong minority had separated and organized a second church (New School), with the Rev. Henry Ward Beecher as pastor. In this place he remained for nine years with great success, the church being blessed with revivals and largely increased numbers; but in 1850, for the benefit of the health of his family, he removed to Dayton, Ohio, where for four years like success attended his ministry as pastor of the First Presbyterian Church in that city. In 1855, yielding to the wishes of his brethren, he accepted the pastorate of the F-street Presbyterian

It money from the passers-by in the formula "Pray remember Guy!" or "Please to remember Guy!" or "Full and tender Zarah!" he accused the bond of being. In former times the burning of Guy Fawkes's effigy was in London a most important ceremony. Two hundred cart-loads of fuel were sometimes consumed in the bonfire in Lincoln's Inn Fields, and thirty Guys would be glibbed and the rest into the moat of the house. A boat and a ship were kept up in the Clare Market by the butchers, who the same evening paraded the streets with the accompaniment of the famed "narrow-bone-and-claeve" music. The uproar occasioned by the shots of the mob, the ringing of the church bells, and the torches that could be only put out by water, founded the present day.—Jardine, British Criminal Trials (Library of Entertaining Knowledge), vol. ii; Pictorial Hist. of England, iii, 20-32 (Chamber's ed.); Knight, Popular Hist. of England, iii, 321-37; ibid., Old England, ii, 151-62; Chambers, Book of Days, ii, 540-56; Hume, Hist. of England, vol. iv; Chambers, Cyclopaedia, s. v. See Fawkes. (J. W. M.)

Günther, Anton, a prominent Roman Catholic philosopher of modern times, was born Nov. 17, 1785, at Lindenau, in Bohemia. He studied philosophy and law at Prague, Leghorn, and Paris. He was professor of the Realschule of Leghorn, and tutor in the family of prince Breslau, and took priestly orders in 1820. He was then for several years vice-director of philosophical studies at the University of Vienna. The professorship of philosophy, for which he was a candidate at the earliest solicitation of his friends, he did not obtain, in contrast to the efforts made by the opponents of his philosophical views. The life-work of Günther was to attempt, in opposition to the prevailing philosophical systems, which he regarded as more or less unchristian, the establishment of a thoroughly Christian philosophy. He desired to show that the teachings of divine revelation, being the absolute truth, need not only not to shun the light of reason, but that, on the contrary, reason itself will lead the sound thinker to an acceptance of the Christian philosophy, which he thought had found its most complete expression in the Roman Catholic doctrine. The first work of Günther was the Vorschrif zur speculativen Theologie (Vienna, 1826; 3d enlarged edition 1846), which contained the theory of creation; and it was followed in 1829 by the theory of the incarnation. These works at once established for him the reputation of a great and the foremost philosopher of the Roman Catholic Church. The University of Munich conferred upon him the title of Doctor Philosophiae, which, however, the illiberal government of Austria did not allow him to use. Günther, who lived in great retirement, continued to publish a series of philosophical works, and was for several years professor of philosophy at the Catholic University of Vienna. (1820-1830).—Süd-und Nordlitteratur (1823).—Januarius für Philosophie und Theologie (published by him conjointly with his friend Dr. Pant, Vienna, 1833).—Der letzte Symboliker (with special reference to the works of Mührer and Baur, 1834).—Theses & Scripula: zur Transformation der Persönlichkeitsanschauungen neuester Zeit (1835).—Die Jute-Mithys in der deutschen Philosophie der gegenwärtigen Zeit (1837).—Erathüsae und Herculae (1842). He also published from 1845 to 1854, conjointly with his friend Dr. Veith, a philosophical annals. He was in some of his works did he undertake to develop a philosophical system as a whole, but he contributed ample material for a new system. He was, in particular, acknowledged as one of the keenest and most powerful opponents of the pantheistic schools, and the adherents of all schools of Germany. The "Güntherian philosophy" (Günterische Philosophie) came to establish itself at many of the Roman Catholic universities, and for a time shared with the school of Hermes (q. v.) the control of philosophical studies, namely, in Germany. The Jesuits, and the Ultramontane school, the school of

Church in Washington, D.C., with which, in 1859, the Second Presbyterian Church of that city united. Dr. Gurney remained until his death pastor of the united body, worshipping in a new edifice, and called the New York Avenue Church. He was elected chaplain to the United States Senate in 1859, and was the pastor of several presidents of the United States, among them of the present, and in the last dying scene of whom his dying moments he was present. The following incident which then occurred illustrates forcibly the spirit and power of his Gospel ministrations. When the patriot president had ceased to breathe, Mr. Stanton, secretary of war, turning to Dr. Gurney, said, "Do you think there is anything I can do?" and when the pastor paused, Dr. Gurney, addressing the weeping relatives and sympathizing friends, replied, "Let us talk with God;" and, kneeling, offered "a most touching and impressive prayer, which even in that dark hour of gloom lighted up with sunshine every sorrowing heart." Dr. Gurney was a member of the General Assembly (Old School) in 1866, and chairman of its judicial committee; was made moderator of the General Assembly held in 1867, was chosen a member of the committee of fifteen appointed to confer with a like committee of the Southern Presbyteries of this Synod on the subject of the union of the two Presbyterian bodies in the United States, and "was the author of the amendments to the basis of union adopted by the joint committee in Philadelphia, and subsequently adopted by both assemblies." His health failed in 1867, and, after vainly seeking its restoration in rest and change of scene, he returned to his duties among his people. Great earnestness and single-ness of purpose, with an ever-active zeal for the glory of God and the salvation of souls, characterized his life. See Memoir Sermon on Dr. Gurney by W. E. Schenck, D.D. (W. Chalmers, 1869), and New York Observer, Oct. 8, 1868. (J. W. M.)

Gurnall, William, an English divine, and a "man of great excellence of character," was born in 1617, was educated at Emanuel College, Cambridge, and was minister at Lavenham for 35 years. He became a rector in 1614, but did not receive episcopal ordination until the Restoration. He published a volume of Sermons (1660, 4to), but is best known as the author of The Christian in Complete Armor (1st ed. 1656-1659, 3 vols. 4to; new ed. 1844, 1 vol. 8vo), of which an edition, with a biographical introduction by the Rev. J. C. Ryle, was published in 1865 (Lond. 2 vols. imp. 8vo). This work is described by Dr. E. Williams (Christian Preacher) as "an excellent book to those who are seeking expressions of deep thought, generally well supported; sanctified wit, holy fire, deep experience, and most animated practical applications." Gurnall died in 1679. See Biographical Introduction by Ryle in the edition last named above, and Allibone, Dict. of Authors, i, 740. (J. W. M.)

Gurney, Joseph John, an eminent minister of the Gospel, Christian philanthropist, and theological writer, was born at Earlham Hall, near Norwich, England, Aug. 2, 1788. The family of Gurney, or Gourney, sprang from a house of Norman barons who followed William the Conqueror into England. Such was his reputation for wisdom, discrimination, and sound scholarship, that lord Morpeth, when in Philadelphia, used to say, "Mr. Gurney is authority upon any subject in London." Although his family for two centuries deservedly wielded great influence in Norfolk, his large reputation is based upon his individual character and merit. In early manhood he dedicated himself to the service of his directing master, and made an open Christian confession as a member of the religious Society of Friends, in which Church he became an illustrious minister, being instrumental in winning many souls to Christ in Great Britain and Ireland. In 1801 he was one of the original draftsmen of the Great Britain Missionary visits to the continent of America, and spent three years (1837-40) in North America and the West India Islands, preaching Christ with powerful demonstrations of the Gospel character. He often joined his ministry, the celebrated and excellent Elizabeth Fry, in labor in the British prisons. The apostolic character of his preaching is shown in the volume of sermons and prayers delivered in Philadelphia in the winter of 1838, and taken in small-hand by Edward Hopper, Esq. Possest with the spirit of the divine, he dealt in the faithful steward, and his large-hearted and well-directed benevolence was "like the dew, with silent, genial power, felt in the bloom it leaves along the meads." He was the associate of Clarkson, Wilberforce, his brother-in-law, Sir T. Powell Buxton, and others, in the successful efforts for the emancipation of the negro, and voluntary therefor to be silent or unsympathizing when others needed his voice or his purser. Eminent as were his gifts and acquirements, his simplicity of character and humility, and, more than all, his conformity to the will of Christ, made him the sweet and willing minister and servant of all. In this capacity he served his generation according to the will of God. In his Christian authorship, his influence for good will extend to successive generations. His principal writings are as follows: Observations on the distinguishing Views of the Society of Friends (this is a selection of the best of his writings); containing the author's latest revisions, and an introductory treatise of great value, should supersede former editions):—Essays on Christianity:—Biblical Notes on the Daily of Christ (an illustration of the texts relating to this subject):—Essays on the habitual Exercise of Love to God as a Preparation for the Understanding of a Friend on the Doctrine of Redemption:—Hints on the portable Efficacy of Christianity:—Brief Remarks on the History, Authority, and Use of the Sabbath:—Guide to the Instruction of young Persons in the holy Scriptures:—On the moral Character of our Lord Jesus Christ:—Christianity a Religion of Motives:—An Account of John Stanford:—An Address to the Mechanics of Manchester:—The Accordance of geological Discovery with natural and revealed Religion:—Familiar Sketches of the late William Wilberforce:—Chalmeriana:—Sabbath Sermons, and other Pieces:—A Winter in the West Indies:—A Journey in North America, described in familiar Letters to Amelia Opie:—Thoughts on Habit and Discipline:—Terms of Union in the Bible Society:—Puritanism traced to its Root:—Notes on Prisons and Prison Discipline, etc. His last publication was an elaborate apologium and Christian declamation upon his faith. In him was illustrated the Scripture, "The path of the just is as a shining light, which shineth more and more unto the perfect day." He fell asleep in Jesus Jan. 4, 1847. See Memorial issued by London Yearly Meeting, J. B. Brathwaite, D.D.; J. Gurney, with Selections from his Journal and Correspondence (Norwich, 2 vols. 8vo); Hoefer, New Biog. Gindrale, xxii, 854; Allibone, Dict. of Authors, i, 750. (W. J. A.)

Gurtlerius. See Guertler.

Gury, Joseph Pierre, a Roman Catholic theologian, whose works on moral theology have obtained a great notoriety by the many offensive doctrines which he defends. He was born Jan. 23, 1801, entered in 1824 the Society of Jesus, became professor of moral theology at Valis, in France, and died April 18, 1866, at Merceur, in the Auvergne. He wrote a Compendium Theologiae moralis (4th ed. Ratisbon, 1868; German translation, Ratisbon, 1869), and Casus Conscientiae in praecipuis quaestionibus Theologiae moralis (Ratisbon, 1869), of which many editions have been published in France and other countries, and have been introduced as text-books into a number of ecclesiastical seminaries. In the Diet of the grandduchy of Hesse-Darmstadt, the government was in 1869 charged by the liberal party for allowing the Roman Catholic bishop of Metz to introduce this work into the diocesan seminary, on the ground that it teaches,
GUSCH-CHALAB

1038 GUSTAVUS-ADOLPH. SOCIETY

In many cases, disobedience to the government, and principles incompatible with a civilised form of government. See Linsa, Das Handbuch Gyr’s und die christliche Ethik (Friesberg, 1889). (A. J. S.)

Gush-Chalab. See Gischala.

Gustavus I, Vasa, the first Protestant king of Sweden, was born at Lindholm, Sweden, May 12, 1496. He descended, both on the paternal and maternal side, from noble Swedish families, and his original name was Carl Eriksson. Since he was the son of the councillor Eric-Johansson. From 1512 he was educated for a statesman at the court of the Swedish administrator, Sten Sture. In 1516 and 1517 he took an active part in the war against the Danes, but was treacherously made a prisoner by the Danish king, Christian II, and carried to Denmark. He escaped in September, 1519, landed in Sweden in May, 1529, aroused the peasants of Dalecarlia to a revolt against the Danish rule, and was proclaimed by them head of their own and other communities of Sweden. The forcible abdication of Christian II put an end to the Scandinavian union, and the Swedish crown was proclaimed Gustavus as king. Being a decided adherent of the Reformation of Luther with whom he carried on a correspondence, Gustavus declined to be crowned by the hands of the Roman Catholic bishops, and postposed the coronation, which did not take place until 1526. In 1548 he formally joined the Lutheran Church, the cause of which he promoted with great eagerness, and even severity, crippling the power of the Roman Catholic clergy by enormous imposts and finally (1544) forcing the Lutheran doctrines upon all his subjects. Like many other Protestant princes of that time, he arrogated to himself an undue influence upon the Church, assuming in 1540 the highest authority in ecclesiastical matters, and thus burdening Sweden with the pernicious system of an oppressive and even intolerant state-churchism. By an act of the Diet of Wismar, 1555, his town was declared heretical in his male descendants. On the whole, Gustavus was one of the best and wisest princes of his time. "He had found Sweden a wilderness, devoid of all cultivation, and a prey to the turbulence of the people and the rapacity of the nobles; and, after forty years' rule, he left it a peopled and civilized nation, with a full exchequer, and a well-organized army of 15,000 men, and a good fleet, which were both his creations. He promoted trade at home and abroad. Every profession and trade received his attention and fostering care, and schools and colleges owed their revival, after the decay of the older Roman Catholic institutions, to him. He made commercial treaties with foreign nations, and established fairs for foreign traders. In his reign roads and bridges were made in every part of the country, and canals begun, one of which has only recently been brought to completion. In his relations with his subjects Gustavus was firm, and sometimes severe, but seldom unjust, except in his dealings towards the Romish clergy, whom he despised with something like rapacity of all their lands and funds. To him the various tribes of Lappe were indebted for the diffusion of Christianity among them, and the Lutheran missionaries, while the Finns owed him the first works of instruction, Bibles and hymn-books printed in their own language. Gustavus was methodical, just, moral, and abstemious in his mode of life; an able administrator; and, with the exception of a tendency to avarice, possessed few vices that are unworthy of esteem." He died Sept. 29, 1560. (A. J. S.)

Gustavus II, Adolphus, king of Sweden, was the grandson of Gustavus I (q. v.) by his youngest son, Charles IX, at whose death he succeeded to the throne of Sweden. Gustavus, who had been strictly brought up in the Lutheran faith, determined to quell some disorders at home, arising from the disputed succession of his father (third son of Gustavus Vasa), who had been elected king on the extinction of his nephew Sigismund, king of Poland (son of John III, the second son of Gustavus Vasa), whose profession of the Roman Catholic religion made him obnoxious to the Swedish people, and virtually annulled his claims to the crown. He reconciled the Estates by making them meet, restrained the warlike spirit of his people, and, in 1612, unsuccessfully, but obtained from the Czar in 1617, by virtue of the treaty of Stolbow, several places, and renounced all claims to Livonia. The numerous exiles who, during the reign of his father, had fled to Poland, were permitted to return, and thus he threw open the frontiers of the Polish insular states of the Baltic islands to the inhabitants of the world. In 1630 he built Gothenburg anew, and founded or renewed sixteen other towns. He was eagerly intent upon enlarging the powers of the sovereign by reducing those of the Estates. In 1621 he was involved in a war with Poland, and gained Livonia and Courland, and carried the war into Prussia. Several revolts in Sweden, which broke out in consequence of the heavy taxes, were promptly quelled. In the summer of the year 1630 he went to Germany with an army of about 15,000 men to support the Protestants in the war against the emperor, having thus taken the charge of the government and the care of his infant daughter Christina to his chancellor Oxenstierna. After carrying on the war triumphantly for two years [see Thirty Years' War], he fell at Lützen, Nov. 6, 1632. Although Gustavus was eminently a warrior, he made many salutary changes in the internal administration of his country, and devoted his short intervals of peace to the promotion of commerce and manufactures. He was pre-eminently religious, and his success in battle is perhaps to be ascribed not only to a better mode of warfare, but the stricter discipline which he enforced, but also to his own moral influence which his deep-seated piety and his personal character inspired among his soldiers. The spot where he fell on the field of Lützen was long marked by the Schenkenstein, or Swede's Stone, erected by his servant, Jacob Ericson, on the night after the battle. Its place has now been taken by a noble monument erected to his memory by the German people on the occasion of the second centenary of the battle held in 1832. Other monuments were erected between Goslar and Herzogsaal (1840), and at Bremen (1883). A statue made by Forberg was set up in 1862 in Burg in 1884. In 1832 Protestant Germany established in his honor an association for the support of poor Protestant congregations. See Gustavus Adolphus Society. Biographies have been written, among others, by Oldenbourg (Lpz., 1842), Sparck (Lpz., 1844), Gröner (3d ed. Stuttg., 1852), Freywell (Gm. town, Lpz., 1852), Heilig (Lpz. 1854), Flüche (Gustav Adolf u. der dreissigjährr. Krieg, Dresd. 1840 sq., 4 vols.), H. W. Thiersch (Nördlingen, 1868), and Droysen (vol. 1, Leips. 1869). (A. J. S.)

Gustavus Adolphus Society (Gustav-Adolf Verein), a union of members of the Evangelical Protestant Church of Germany for the support of their persecuted or suffering brethren in the faith. It originated as follows. On the occasion of the second secular anniversary of the battle of Lützen [won by Gustavus Adolphus] (q. v.) at the cost of his life, on Nov. 6, 1622), held in that city Nov. 6, 1822, Schild, a merchant of Leipzig, proposed that a memorial should be erected to the champion of Protestantism. By the influence of Dr. Grossmann it was afterwards resolved that, in memory of his conflict of storm and stress, a commis-

sion must be formed in honor of the Protestant hero, having for its object the succor of the Protestant communities suffering from persecution in Roman Catholic countries. An association was soon formed at Dres-

den and another in Leipzig, and the two were united in 1834. The society thus formed was very popular in Saxony and Sweden. Its funds were chiefly the
fruit of house and church collections. On the anniversary of the Reformation in 1841, Dr. Zimmermann, of Heidelberg, addressed an appeal to Prof. G. T. Martineau to spread the work of uniting the various branches of the association for the support of such Protestant communities as required and were worthy of help. In order to effect this, and to incorporate in it the Leipzig and Dresden associations, a preparatory meeting was held at Leipzig Sept. 16, 1842, at which the "Stiftsverband, Graf Schurth's Adolphus Institution" was formed. A general assembly was held at Frankfurt Sept. 21 and 22, 1843, in which twenty-nine societies were represented.

According to the rules adopted at this meeting, the object of the association is to succor all Protestants, whether Lutherans, Reformed, or Union churches, or any other who have given proof of their adherence to the principles of the evangelical Church. The means are furnished partly by the income of the permanent funds of the association, partly by donations, endowments, yearly collections, etc. The local societies send to the superior association their annual collections.

In every state (and for large countries in every province) there is a chief association, with which the others are connected as auxiliaries. The revived union of these three parts is under the absolute control of the society which collects it; one third is sent to the central society, with directions as to the application of it, or is even sent direct to its destination; and the remaining third is placed at the disposal of the central society. The central association consists of twenty-four members, elected by the members of the chief associations; nine of them (including the president, treasurer, and cashier) must be residents at Leipzig, the other fifteen must be non-residents; every three years one third of the members go out of office. This central association represents the society in all its general business, and when occasion presents, appoints a committee to inquire into the case of parties applying for assistance, and reports on it to the chief associations. In the general assemblies, which are held in different parts of Germany, the state of the association is discussed, the accounts adj usted, questions of general interest settled, etc.

In 1846 there were thirty-nine chief associations, viz. eight in Prussia, two in Saxony, three in Hanover, and in the other states each one, except in Bavaria. The government of Bavaria, on Feb. 19, 1844, forbade the formation of branch societies, on the receipt of gifts from the society; but this prohibition was annulled Sept. 16, 1849, and representatives of Bavaria appeared at the general assembly of 1851. Austria permitted the establishment of societies by the "Protstant'sagian" of April 8, 1851. At the general assembly held at Nuremberg in 1862, two central societies (Hauptvereine) of Austria, Vienna and Medias, were received, the first embracing the German provinces and Galicia, and the latter the German part of Transylvania. The organs of the association are the "Bote der Evangelischen Vereine" of G. A. I., published by Zimmermann and Grossmann, Darmstadt, since 1843, and similar ones for Thuringia and Brandenburg. Numerous occasional sheets, reports, etc., are issued by the association.

The society has not been entirely free from internal troubles. While some of its members have sought to confine its operations within the strict limits of the evangelical confession, others have desired to see it based upon humanitarian principles, and thus to receive even Jews and Roman Catholics into membership. The conflict most important in this respect occurred at the general meeting of 1846, at Berlin, where the delegates refused, by a vote of thirty-nine against thirty-two, to recognize Dr. Rupp as the delegate of Königsberg, on account of his having seceded from the national Church. Great excitement spread throughout Germany, and for a moment endangered even the existence of the association. The question was settled in the Assembly of Darmstadt in 1847, when it was resolved that the society should acknowledge the right of all denominations to voting at the general assembly, and would accord the credentials of all delegates. The strict Lutherans have generally kept aloof from the association on account of its support of Reformed and Union churches. The means of the association have been steadily increasing. Up to 1841 the receipts amounted to 172,777 thalers. "Gustavianus Adolphus Vereini" appropriated 107,666 thalers to 979 communities (224 in Germany and 155 in other countries). From 1848 to 1858 the central and branch associations received legacies and donations amounting to 50,000 thalers. Sweden and the Netherlands (where the first Gustavianus was founded in 1832) have contributed 120,000 thalers to the German association, and helped to swell its funds. According to the report for the financial year 1863-64, the expenditures amounted to 189,000, by which 723 poor congregations were supported (100 in Germany, 4 in North America, 10 in Belgium, 27 in France, 7 in Holland, 3 in Italy, 269 in Austria, 43 in Prussian Poland, 4 in Portugal, 4 in Switzerland, and 1 in Turkey). At the general assembly held at Dresden in 1865 it was announced that the society, since its foundation in 1842, had expended in the support of Protestant congregations 2,678,256 thalers. The receipts from the last year were stated to be 194,000 thalers. The number of congregations supported by the society amounted to 904; of these, 12 were in America, 348 in Prussia, 301 in Austria, 39 in France, 8 in Belgium, 60 in Rumania, 16 in Holland, 4 in Italy, 5 in Russia, 6 in Switzerland, and 1 in Spain. The total amount expended by the society from its beginning to the close of the financial year 1867-68 in supporting new and poor Protestant congregations amounted to 3,205,879 thalers. Aside from its external efficiency, the society has also been beneficial to the internal life of its own churches by its many institutions, and is a notable instance of Christian activity for the national Protestant Church of Germany. Its appropriations are made as much as possible in a form to give permanent rather than temporary relief to weak churches. See Zimmermann, D. Gustavius-Adolphus Vereini (Darmstadt, 1857); Allg. Real-Encyk., vii, 272.

Guthlac, Sr., a Mercian saint, who died in 714. His early life was a wicked one, he even being the leader of a band of robbers; but, abandoning his evil ways at the age of 24, he retired to the monastery of Repton, where he learned to read, and studied the lives of the hermit fathers. He then took up his abode on the desolate isle of Croyland, where, we are told, his temptations and trials paralleled those of Anthony, but acquired for him extraordinary favors and consolations from God. He died at the age of 47, and his sanctity, according to the legend, wrought posthumous miracles, which brought about the erection of the abbey of Croxley, famed for its libraries and seminaries, and the church of Turketel (q. v.), abbot thereof in 948. See Life of Guthlac, by Felix of Croyland, in Mabillon's Acta Sanctorum, Ord. S. Benedicti, iii, 263-284. Butler, Lives, etc., April 11; Jameson, Legends of the Monastic Orders, ch. 8, 4; Wright, Hist. Brit. Lit. (Anglo-Saxon Period), p. 262-8. (J. W. M.)

Guthrie, William, an eminent clergyman of the Presbyterian Church of Scotland, was born at Pitfo-
Gutter (Gαττα, ταμπόν) occurs in the proposal of
Paul while attacking Jesus, that some one should
'get up to the gutter and spit the Jewsbot' (2
Sam. vi, 8). The Sept. here renders 'with the sword'
(γίγαλσαι, and the Vulg. "roof-pipes" (domum
futuri). The word only occurs elsewhere in Psa. xiii,
7 (Sept. and Vulg.: cæcturus, English Vers. "water-
spouts"). Gesenius supposes it to mean a souter-course.
Dr. Boothroyd gives 'secret passage,' and in Psa.
xiii "water-fall." It seems to refer to some kind of
subterranean passage through which water passed;
but whence the water came, whether it went, or
the use to which it was applied, cannot be determined,
though we know that besiegers often obtained access
to besieged places through aqueducts, drains, and
subterranean passages, and we also know that Jerusalem
is abundantly furnished with such underground
avenues. See JESUS.

In account of Jacob's artifice for producing party-
colored young among his flock, by placing peeled rods in
the drinking-troughs (Gen. xxx. 38, 41), the word for
"gutter" in the original is מַגָּכָה, rack'at, vessels
overflowing with water (as in Exod. ii. 16) for cattle.

Gützlaff, Karl Friedrich August, missionary to
China, was born at Stettin, in Pomerania, in 1802,
and attracted attention at an early age by his zeal in
study, and by the promise of activity which his youth
afforded. To open for himself the work of mission
fulness at home, but having resolved to devote himself
to missionary labor in foreign parts, he volunteered to
go to the Dutch settlements in the East, under the
auspices of the Netherlands Missionary Society. Before
proceeding thereto he came to England, where he met
Dr. Morrison, the eminent Chinese scholar and mis-
sionary, and received a strong bias towards China as
his ultimate field of labor. In 1828 he proceeded to
Singapore, and it is said that before he had been there
two years he was able to converse fluently in five
European languages, and to read as many as as many
more. In August, 1828, in company with Mr. Toul-
min, Gützlaff went to Siam, where he remained more
than a year. In 1831 he went to China. Between
1831 and 1834 he made three voyages along the coast,
and published an account of his observations. From
1834 to 1838 he was chaplain and interpreter in the
British government as interpreter and secretary to the
minister. An attempt to land in Japan (1857) was
unsuccessful. In 1844 he established, conjointly with
the American missionary Roberts, two Chinese, and
others, a society for the propagation of the Gospel in China,
which in 1860 had forty preachers. In 1849 he re-
visited Europe, and, by his personal exertions, gave
a new impulse to missionary effort for China. He
returned to China in 1850, and died at Victoria on the
9th of August, 1851. His way of life has been de-
scribed as follows: The whole of the early morning
was devoted to the religious instruction of successive
classes of Chinese who came to his house. From
ten till four he was occupied with government duties.
After a very brief interval he went out for the rest of
the evening to publish his lectures, which were given
from house to house. He also, from time to time, made
excursions to different places, accompanied by native
teachers. All this toll was voluntary and unremuner-
ated, for, except when he first went out to the East, he
was not connected with any missionary society. A
few friends in New York and London sent occasional-
ly, we believe, some contributions for purchasing books
and medicines, but the work was mainly carried on at
his own cost. He was a man of generous, self-denying
spirit, with an ardent love for the salvation of those
in labor indescribable. He early inured himself to hard-
ships, and in his devotedness to his work of spreading
Christian truth he was regardless of privations and
dangers. His medical skill and great learning often
opened a way for him where few Europeans could have
made headway, and whenever he was known he was
beloved by the natives. They used to say some-
times that he must be a descendant of some Chinese
family who had emigrated to the islands of the Western
Ocean. Whatever may be the permanent results of
Gützlaff's labors in the East, it is certain that his ef-
fors for the cause of religion, and of Christian civiliza-
tion in China, deserve to be held in the grateful
remembrance of the Church. He translated the New
Testament into the language of the Middle Kingdom.
He made himself thoroughly acquainted with the social
life of the Chinese, and even introduced himself among
their numerous secret societies, concerning the most
important of which, the Triad, he wrote a memoir,
published in the Journal of the London Asiatic Society
(1849). He never lost an opportunity of disseminating Christi-
nity among the Chinese. Of his visit in 1850 he gave a
description in the Journal of the London Geogra-
phical Society, vol. ix, 1819. The English gave his
name to an island situated some seventeen miles from
the mouth of the Yang-tze-Kiang. He wrote, besides
the above-mentioned papers, Observations on the
Kingdom of Siam (in the Journal of the London Geo-
grphical Society, vol. viii, 1848)—Journal of three
Voyages along the Coast of China, with Notices of Siams,
Corea, and the Loo-Choo Islands (Lond. 1833)—Sketch
of Chinese History, ancient and modern (Lond. 1834,
2 vols. 8vo)—China opened, or display of the Topogra-
phy, History, Religion, and Correspondence of the Chi-
inese Empire (Lond. 1838, 2 vols. 8vo)—The Life of
Tiou Kang, the last Emperor of China (Lond. 1835,
8vo)—Hist. of the Chinese Empire (2 vols. 8vo), which
was also published in German, etc.—See Hoefer, Nouv.
Biblo. Générale, xxii, 223; Methodical Quarterly Review,
Jan. 1852; American Quarterly Review, vol. xvii; Quart.
Rev. (Lond. ii, 458); Allibone, Dictionary of Authors
i, 751.

Guy.

See GUIDO.

Guyon, Jeanne-Marie Bouvier de la Motte, an
eminent French mystic, was born at Montargis
April 13, 1648. She was educated in a convent, and
in early youth showed signs of great quickness of
mind. At seventeen she wished to take the veil, but
her father was strongly opposed to her consent. In 1664
she was married to M. Jacques Guyon, a rich pensioner, for
whom she had no affection. Her marriage was not a happy
one, in consequence of the tyranny of her husband and
mother-in-law, who, acting under the advice of her
confessors, endeavored to withdraw her from the
ward prayer and retirement to which, at the age of
twenty, she began to addict herself. Vanity and co-
quetry were her besetting sins, and, to conquer them,
she thought it necessary to purify herself by "good
works" and bodily mortifications. She read largely in
mystical writers, especially Kempis, Francis of Sales,
and the life of St. Francis of Assisi, which she had
imitated. A Franciscan monk taught her to "look
within instead of without" for peace, and to "seek
God in her heart." Her doubts and fears fled: "I
was on a sudden so altered that I was hardly to be
known by my former self," she said. She formed a
plan on dated this conversion from July 22, 1699. Her
domestic troubles continued, but she could now bear
them patiently. In 1676 her husband died, leaving
her with three young children. Her religious feelings
now increased in intensity. She believed that she
had certain interior communications of the divine will,
but was often deeply distressed about the state of her soul. In 1672, on the anniversary of her conversion, she made "a marriage contract" with Christ, and signed it in her own blood! She formed an intimate acquaintance with Lacombe, a Barabino mystic, who, from 1656 to 1658, became her confessor. In 1681, on St. Magdalene's Day, on occasion of a storm, she says, "My soul was perfectly delivered from all its pains." She soon after went to Paris, was exorhited in what she considered a miraculous manner to devote herself to the service of the Church, and went to Geneve to be a missionary among Protestants. Her family then urged her to resign her guardianship of her children, which she did, giving up all her fortune to them, retaining only sufficient for her subsistence. Soon after, D'Arnaut, bishop of Geneve, wished her to bestow this pittance upon an establishment, of which she was to be made priora. She declined, and left Gex for the Ursuline convent at Thono, where Lacombe became her "father confessor." Her work habilitated the priest as an ally of laity in dreams and revelations of bliss. Both Lacombe and Madame Guyon soon, however, began to gather waves of the Christian life, and of the true nature of faith; but the errors of Romanism and mysticism were too closely incorporated with her mental habits to be got rid of, and she reconciled to the Ursuline convent at Thono not only "salvation by faith," but "indifference to life, to heaven, to hell, in the entire union of the soul with God." She returned to Gex, and there, in prayer at night, it was revealed to her that she was "the spiritual mother of Lacombe," her relations to him became more intimate than ever, and she occasionally afterwards to great but groundless scandal. Lacombe seems to have been a weak man: he finally died in a madhouse. The bishop of Geneve became alarmed, and sought to be rid of his dangerous protégée. Madame Guyon now wandered for some years (1685-1686), visiting Turin, Grenoble, and other places. At about this time also she began to write. Her first work (begun at Gex) was Les Torrnes Spirituels (published in her Opuscules, Cologne, 1704, 12mo). The "torrents" are souls tendency to lose themselves in the ocean of God. Her work habits the writer as an ally of laity in dreams and revelations of bliss, but principally demonstrates her unfitness as a pattern or teacher of experimental godliness. At Grenoble she found herself "suddenly invested," as she expresses herself, "with the apostolic state," and able to discern the condition of those that spake with her, so that one received from her was changed from an impious man in the morning till eight at night speaking of divine things. "There came," she says, "great numbers from all parts, far and near, friars, priests, men of all sorts, young women, married women, and widows; they all came after the other, and God gave me that which satisfied them in a wonderful manner, without my thinking or caring at all about it. Nothing was hidden from me of their inward state and condition. . . . I perceived and felt that what I spake came from the fountain-head, and that I was only the instrument through which it passed. I heard in the exhibition of Solomon's Song and of the Apocalypse appeared in 1684 at Grenoble. Her notes were written under a quasi inspiration: she had dreams, visions, and marvellous manifestations. "Before I wrote I knew nothing of what I was going to write, and after I had written it, too. She received the true Church, and she says, in the singular autobiography which she has left of herself. Another of her works of this period was Moyen court et tres facile pour l'onais, which was published, and rapidly ran through five or six editions. This was received with great favor, and was translated into many languages and was translated into many languages and many tongues. In July, 1686, accompanied by Lacombe, she returned to Paris, where persecution and tribulation awaited the wanderers. The "Quietism" of Molinos was condemned by the pope in 1687, and there was no peace or rest for the mystics or their abettors in Paris. In 1688 Madame Guyon was shut up (chiefly through the instigation of her brother, the Barabino Lamothe, who bitterly hated her doctrines) in the convent of the Visitation at Paris. In 1689 Madame de Maintenon procured her release, and she and soon gathered round her a circle of admiring and devoted friends, among whom was Fénelon, who formed an affection for her which was "stronger than persecution or death. A storm soon arose: Harlay, Bishop of Carcassonne, prohibited her writings, and other bishops followed his example. The court took notice. Madame Guyon demanded of the king, through Madame de Maintenon, a dogmatical examination of her writings. A commission was appointed, consisting of Bossuet, Fénelon, the abbé Trenson, and the bishop of Chartres. At the end of six months thirty articles were drawn up by Bossuet, sufficient, as he deemed, to prevent the mischief likely to arise from Quietism, which were signed by Madame Guyon, who submitted at the same time to the censure which Bossuet had not on her writings in the preceding April. Notwithstanding this submission, she was officially involved in the persecutions of Fénelon, the archbishop of Cambray, and in 1695 was imprisoned in the castle of Vincennes, and thence removed to the Bastille, enduring the hardest treatment, and subjected to repeated examinations. In November, however, she was released, when she retired to Abria, to the house of her daughter, where she passed the remainder of her days in quiet and repose, in acts of love and charity, and in writing books. No reproach of her enemies and persecutors ever escaped her lips. All the neighborhood loved her; and her bitterest foes admitted that all the charges brought against her moral character had been false and scandalous. Her last will begins as follows: "I protest that I died in the faith of the Catholic, apostolical, Roman Church; having no other doctrines than these; believing all that she believes, and condemning, without the bishop of Chartres, all that she condemns." She died June 9, 1717.
and joy in the Holy Ghost! How few such instances
do we find of exalted love to God and our neighbor;
of genuine humility; of invincible meekness and un-
bounded resignation! So that, upon the whole, I know
not whether we may not search many centuries to find
another woman who was such a pattern of true hol-
liness" (Wesley, Works, vii, 562, 565). See also Curry
in Methodist Quarterly Review, July, 1898, which con-
tains a discriminating estimate of Upham's Life and
Religious Opinions of Madame Guyon (N. Y. 1844-1850;
2 vols. 12mo).—Comp. Christian Reviser, iii, 449; xvi,
51; American Biblical Re postory, iv, 606 (third series);
New Englander, vi, 105.

Gymnosophists (Γυμνοσοφοστα), an ancient sect of
Hindoo philosophers, who distinguished themselves
outwardly from others by dressing aside. They were
believers in metempsychosis, and often sought to
facilitate their transmigration by committing suicide—
generally by burning themselves alive. They placed
the height of wisdom in contemplation and mystic prac-
tices to mortify carnal instincts. They inculcated utter
disregard of temporal advantages. This sect furnished
for a long time councilors to the kings, and stood
in high consideration. They were divided into two clus-
ers, the Guyonians and the Gypians, or Gypisiae,
in the time of Alexander the Great, belonged to
this sect. See Farkis, as also Cicero, Tusc. Quaest. v,
27; Plutarch, Vit. August. c. 65; Arrian, Indica, xii;
Quintus Curtius, viii, cap. iv; Strabo, § 712-719.

Gypsies, Gipsy, or Gypsi (a corrupt form of Egyptians),
the English name of a singular vagabond race of people,
with a language and customs peculiar to themselves,
found throughout the whole of Europe, and in parts of Asia,
Africa, and America, and everywhere noted for their averse
to the habits of settled life, and for the practice of deceptive
tricks and thieving. They bear different names in different
countries. In France they are called Boe-
kméniens (because they first came thither from Bohem-
ia, or from boëm, an old French word meaning
sorcerer, because of their practiseing on the credulity of
the vulgar); in Spain, Génzóos or Zionci; in Ger-
many, Zigenen; in Italy, Zingari; in Holland, Hoedren
(nestrians); in Sweden and Denmark, Tartari; in
Scalian countries, Tygami; in Hungary, Czigájok;
in Turkey, Tchémengel; in Persia, Sisèch; in Arabia,
Harami, etc. Various nicknames are also applied to
them, as Cogonze and Gareuz in France; Zieh-Gamer
(wandering rogues) in Germany, and Tcheller in Scotc-
land. They call themselves Rom (men or husbands;
comp. Coptic Rém), Oslo (black), or Sinte (from Ind;
therefore Zinsel, or black men from Ind).

Origin and History.—In the absence of any histori-
cal records of their migrations, their original country
and the causes which drove them thence to scatter
so widely over the earth have been the subject of
speculation among the learned, and various theories
have been proposed as solutions of the mystery of
their origin and history. Some writers have connect-
•ed them with the Συγγυς, mentioned by Herodotus
(6.10) as a people of the sea, and others have
seen the Lower Danube, and the Συγγύς, described
by Strabo (§ 590) as living near Mount Caucasus, and
practising Persian customs. Others have referred them to Syria, Turkey, Nubia, Coptomantes, Assyria, Ethiopia, Morocco, etc., but the fact which the Gypsys, at their appearance in Western Europe, gave of themselves, claimed "Little Egypt" as the original home of the race, whence they were driven in consequence of the Moslem conquests. According to one version, God himself had doomed them to this vagabond life because their forefathers had refused hospitalities to the shepherds. Alternatively, the Gypsys were supposed to have come to Egypt with the infant Saviour—"a notion which, curiously enough, been partly revived in our own day by Roberts, with this difference only, that he proves them, from the prophecies of Isaiah, Jeremiah, and Ezekiel, to be the descendants of the ancient Egyptians, and their wanderings to be the predicted punishment of the various iniquities of their forefathers" (Chambers). We owe to the once-prevalent belief that they were from Egypt the origin of the English term Gypsys and the Spanish Gitano. The results of investigations by various scholars within the last hundred years in the fields of comparative philology and ethnology prove beyond reasonable grounds of doubt that the theories above named are erroneous, and that we must look to India, "the nursing home of nations" (iclita genium maxtrix), as also the fatherland of the Gypsys, as soon as it is shown that in more universal and particularly received opinion that they came to Europe from Hindustan, either impelled by the ravages of Tamerlane, or, more probably, at an earlier date, in quest of fresh fields for the enjoyment of their vagabond life, and the exercise of their propensity for theft and deception. The vision of their origin rests upon the supposition of the physiological affinities with Asiatic types of men, as well as on the striking resemblances between the Gypsy language and Hindustani, and the similarity of their habits and modes of life to those of many roving tribes of India, especially of the Nats or Bazegurs, who are styled the Gypsys of India, and are counterparts of those in Europe, both in other respects and also in having no peculiar religion, since they have never adopted the worship of Brahma. The Nuts are thought by some to be an aboriginal race, prior even to the Mongols, to which the Egyptian history, written about the same time, once the Gypsy statement of an Egyptian origin with the clear evidences of a Hindoo one, would find their ancestors in the mixed multitude that went out from Egypt with Moses (see Exod. xii, 38; Numb. xi, 4; Neh. xi, 8). The old and the new, according to this view, passed onward to India and settled there, and their descendants, subsequently, bands of Gypsys migrated to Europe, probably at different times and by different routes (see Simson).

The earliest supposed reference to Gypsys in European literature is contained in the German paraphrase of Genesis, written about A.D. 1122 by an Austrian monk, in which mention is made of "Ishmaelites and braziers, who go peddling through the wide world, having neither house nor home, cheating people with their tricks, and deceiving mankind, but not openly." In the 15th century, Gypsys established themselves in Hungary and Wallachia, and began to spread over Western Europe in considerable numbers; one of their bands, which appeared at Basle in 1422, numbered, according to the old Swiss historians, 150,000. These were under a kind of feudal leadership of so-called dukes, knights, etc., and, telling the story of their expulsion from Egypt and penal pilgrimage, sought to excite sympathy. At first they were well received as Christian pilgrims performing their allotted penance; but the deception was soon found out, and their thefts and impostures on the credulity of the people soon caused them to be regarded as nuisances and pests to society. Very stringent laws, even by the cruelst laws were enacted, and in most places enforced against them, without, however, extirpating them, or seriously diminishing their numbers. After the middle of the 18th century more humane views in regard to them obtained, and measures were employed to improve their social and moral condition, with some degree of success. The foundation for their improvement was formed at Southampton, England, in 1832, by the Rev. George Crabbe, and a school has been established at Farnham, in Dorsetshire, in which Gypsy children are instructed in the knowledge of Scripture, where they are at the same time trained for service in the missions amongst the Gypsys, and taught how to lead a useful life in the countries to which they may be sent, and to adopt the character and customs of the people among whom they settle. The number of them who adopt more settled modes of life is increasing, according to Simson, who further states that Gypsys have been found occupying honorable and responsible positions in public as well as private life, and reckons the celebration of the John Bunyan Gypsys. Greliman estimated the number of Gypsys in Europe at 700,000 to 800,000. Simson (p. 439) considers those that estimate far too low, and thinks there are at least 4,000,000 in Europe and America. The Gypsys, as a race, have no religion, and, indeed, are usually considered as atheistic or at least monotheistic, but having no fixed ideas, their language containing no word signifying God, soul, or immortality. But the sacrifice of horses, which, Simson asserts, formerly constituted a part of the Gypsy marriage ceremonies, and is still a necessary part of a valid divorce ceremony, not only in India, but in all other places, is an idea that is very distasteful to all Hindoo mythological conceptions. See GANGES. They have, for policy's sake, often conformed, so far as necessary, to the religion of the country in which they roved, but Velasquez says sarcastically, "The Gypsys' church was built of lard, and the dogs ate it." In regard to the moral virtues, little can be said. They are described as squallid, thievish, treacherous, and revengeful, and their most strongly-marked virtue, viz. a strict regard for the corporeal chastity (locke) of their women, is sadly disfigured by the permission allowed them to employ the grossest licentiousness in manner merely in order to allure others to vice for the sake of gain as procurers. Some of them show great aptitude for music, and the choirs of Moscow owe their chief excellence to them, and among the Hungarian Gypsys are the most celebrated of the famous and celebrated bands in Europe. They have a field for the display of the religious activities of this age, full of difficulties, yet provocative of effort, and Christians should zealously labor and pray for the conversion of this race, assured that its evangelization and consequent moral and material elevation will be one of the grandest of the victories of the Gospel over degradation and sin promised to the Church of Christ in its conflicts here.

Language and Version.—The Gypsys call their language Rommany, and modern philological researches prove that it belongs to the Sanskrit family. It has doubtless received additions and modifications from the languages of the countries in which the race has sojourned, yet it is still so nearly the same with modern Hindustani that a Gypsy can readily understand a person speaking in that dialect—a fact which tends to verify the statements made estatic to the Gypsys and Romany, with which the Gypsys have cherished their ancestral tongue. Mr. George Borrow, who devoted himself to the study of their language and life, translated the whole of the New Testament into the Spanish dialect of Romany, and in 1838 printed at Mahalburg, in the Spartan edition of which, as far as the eighth chapter, he had been assisted by Gypsys. This version was found to be perfectly intelligible to the Gitanos, and copies were eagerly sought after by them, not, Mr. Borrow thinks, because of the truth it contained, but from a desire to see and read their broken Jargon in print. He remarks: "The
only words of assent I ever obtained; and that rather of a negative kind, were the following from the mouth of a woman: 'Brother, you tell us strange things, though you say you do not lie; a month since I would sooner have believed these tales than those this day I should see one who could write Romany.' The following specimen of the version is from Bapst's Bible of every Land, p. 111—Luke vi, 27—29: 'かれ tamis penelos a sangue sos lo Jumelais: Cameld a jires dasch-mamnet & juntos de camel sangue choro. Bjarad a june sos seremelis & a sangue, y mangueld & Debel por junej os arqueralan sangue choro! 27 Y o sos curar tuce andro yque mejilla, ditem tambien a aaver. Y o sos niobclaire tucej o uchebati, na o impida illugarrem tambien a fur.' For further information on the Gypsies and their language, see the following works: Peyssonnel, Observations historiques et geographiques sur les peuples barbares qui ont habite les bords du Danube et du Pont-Euxin (Paris, 1765, 4to); Fray, Annales regum Hungariae ab annum Christi D.LXV., de ductu (Vienna, 1764-70, 5 pts. fol.); Greimes, Historische Versuchs über die Zigeuner (2nd ed. Gottingen, 1787; English translation by Roper, Lond. 1787, 4to); Bischoff, Deutsch-Zigeunerméhisches Wörterbuch (Ilmenau, 1827); Kogalchichian, En- quête sur l'histoire, les Mœurs et la langue des Cigéins (Bourdeaux, 1846); Orsi, Ricerche sugli Zingari (Milan, 1841); Pott, Die Zigeuner in Europa und Asien (Halle, 1844—5, 2 vols. 8vo—"the most wonderfully thorough and exhaustive book ever written on the subject of the Gypsies and their language"); Von Heister, Die Geschichte und geschichtliche Notizen über die Zigeuner (Königsberg, 1842); Désirat, De la misére et de la dispersion des Bohémijens en Europe (in 5th vol. of the Bibliothéque de l'école de Chartres, 1844); Böhtlingk, Die Sprache der Zigeuner in Russland (St. Petersburgh, 1852); Borrow, The Zingari (London and New York); Bacher, Reisetagebuch der Zigeuner (Leipsic, 1855); Simonsen, A History of the Gypsies (N. Y. 1855, and Lond. 1866, 12mo); Roberts, Gypsies, their Origin, Continuance, etc. (Lond. 8vo); Brand, Popular Antiquities (Lond. 1842, 3 vols. post 8vo), ili, 45—53; Thos. Browne, Works (London, 1852, Bohn's ed.), ii, 204—6; Chambers, Cyclopaedia, or New American Cyclopaedia, vol. ii, 612 sq. (J. W. M.)

GYROVAGI, scolding monks. The monasticism of Occidental Europe at an early period took the form of common life in monasteries. Ascentics and hermits were generally obliged to connect themselves with their brethren in convents. Monastic life was also less regular; the same monk could live in different convents as occasion served, and was sometimes even a member of two monasteries at the same time; for occasional latitudinarianism was by no means unknown. It is told of an English abbot by the name of Vangaris (cf. Bower, Antiquities, i, 114—17), that he would not allow his monks to take any vow, either religious or secular, without his consent, and that he would not allow them to wear any visible sign of consecration, such as the tonsure, until he had given his approval.”

SUPPLEMENTARY.

Endeavor, CHRISTIAN, MOVEMENT is a general designation of a recent effort to promote personal and social religious experience and activity. The following pledge is taken by all its members:

"Trusting in the Lord Jesus Christ for strength, I promise Him that I will strive to do whatever He would like to have me do; that I will make it the rule of my life to pray and read the Bible every day, and to support my own church in every way, especially by attending all her regular Sunday and midweek services, unless prevented by some personal cause of conscientious guilt; and that, just as far as I know how, throughout my whole life, I will endeavor to lead a Christian life."

As an active member, I promise to be true to all my duties, to be present at all our meetings, and to take part, with all the confidence of an Endeavor heart, under the banner of Jesus. If obliged to be absent from the monthly meeting of the section, I will, if possible, send at least a verse of Scripture to be read in response to my name at the roll call.

Notions and Progress.—In the winter of 1880-81, a revival visited the Williston Congregational Church, of Portland, Me., in the progress of which many persons, especially youth, were happily converted under the ministrations of the pastor, the Rev. Francis E. Clark, D.D., who, together with his devoted wife, had for several years been particularly earnest in similar work in the congregation and community. Out of this grew a formal organization, Feb. 2, 1881, by the signature of pledge and constitution to the above effect in the parsonage of that church by 57 young persons as active members, and 6 officers as associates; to this the name of "The Williston Young People's Society of Christian Endeavor" was given, and the object and methods laid down were substantially those embodied in the later constitution and by-laws of the succeeding movement, the earlier stages of which we give mostly in the language of Short History of the same, published by the society itself (Boston, 1894, 12mo).

1. Early Spread.—The first knowledge of this experiment given to the world was contained in an article published in a religious weekly, in Boston, Aug., 1882, entitled, "How One ChurchCarest for Its Young People."

This, and others which followed it, at once brought letters from pastors and Christian workers in all parts of the country. First they came singly, then in pairs, and then in scores, almost every day, and they have kept coming in constantly increasing numbers ever since. One of the first pastors to introduce this system of Christian nurture among his young people was Rev. C. A. Dickinson, then pastor of the Second Parish Church of Portland, now pastor of Berkeley Temple, Boston; and no small share of the success which has been since is due to his wisdom and counsel. The second society, however, was established in Newburyport, Mass., by Rev. C. P. Mills, in the same year that the movement originated; while another gentleman who soon threw himself into the movement with characteristic energy was Rev. James L. Hill, then of Lynn, and now of Medford. The first president of the United Society was Mr. W. J. Van Patten, of Bangor, Me., a son whom the generosity of the congregation, at his pastor's house, on that winter evening in 1881, was Mr. W. H. Pennell, teacher in the Williston Sunday-School of a large class of young people. Among others conspicuous in the early history of the movement were Rev. S. W. Adirondack, of Woodford, now of Lowell; Mr. J. W. Stevenson, of Portland; Ell Manchester, Jr., of New Haven, Conn., and others whose names we cannot mention.

2. Conventions.—For some months, in fact for years, little was done in a systematic or organized way to establish societies. One of the first developments of the new work was naturally in the line of annual conventions, the first of which was held June 2, 1882, in the Church of our Lord, Cambridge, Mass. There were some 30 societies represented there, though doubtless there were others, which were not then known to the conference. The program of the convention was as follows. In the afternoon of "The Prayer Meeting," "The Experience Meet-

The next annual conference was held in the same city of Portland, Nov. 19, 1883, and another in the same, and a third the next year at Portland. A large growth over the preceding year was noted, though statistics were obtained from only 23 societies with 2800 members. Of these 23 societies, the report says 5 were organized in 1881, 21 in 1882, and 27 in 1883 in the first five months of 1884, showing that an impetus to the work was given by the little convention of the year before. Seventeen of these societies were located in Maine, and 22 in Mass. While the other 12, 5 were in New York, and the rest scattered throughout the West, a very large one being organized in the First Congregational Church of Oakland, Cal. At this convention those questions which have since been so fully and satisfactorily discussed, and the annual business performed by the Rev. W. J. Van Patten, afterwards the first president, was chosen treasurer, and vice-presidents were elected from the states and provinces.

After this convention the society held on the even tenor of its way, growing rapidly and steadily, but did not call another convention until Oct. 16, 1885, when it was convened in Kirk Street Church, Lowell, the church of which Rev. C. A. Dickinson had become pastor. This was a twoday convention, and was a large, enthusiastic meeting, though only 106 delegates from out of the city were in attendance. The treasurer reported that the society had nearly trebled during the past year, having grown to 121 societies, with 6442 members.

The next annual convention convened July 9 and 10, 1886, at Ocean Park, a charming seacoast resort near Old Orchard Beach, Me., and was by far the largest and most important of the kind to that time.

Not only was this convention notable for good speeches, but for the tone, spirit, and wise and far-reaching plans. The idea of securing a general secretary, who was to give all his time to the work, was here broached: $1200 was raised to defray his salary, his position being considered so important that the "United Society of Christian Endeavor" was founded and incorporated under the laws of Maine. At this convention Mr. Van Patten was chosen president in place of Mr. Pennell, who had served the society so faithfully and acceptably for three years past.

The society had now grown to 156 societies, with 14,028 members in all parts of the country. They had begun to be reported in foreign lands, and, also, and news came of flourishing Christian Endeavor societies in Poonooch, Honolulu, and other foreign lands. From this convention the work received a fresh start, and everywhere where the churches began to establish societies.

Mr. Geo. M. Ward, of Lowell, was chosen secretary, and Mr. W. M. Shaw, of Boston, became the treasurer of the society. Headquarters of the United Society were established at No. 8 Beacon Street, Boston, but were soon removed to more commodious rooms at No. 50 Bromfield Street, and later to its present headquarters at 446 Washington Street, Boston, which was occupied by the General Convention, Rev. F. H. Clark was chosen president of the United Society and editor of Christian Endeavor Literature, a position which he occupied until his death in June, resigning the pastorate of Phillips Church, South Boston, to accept the position.

Some of the great features of the recent growth have been the establishment of state unions in nearly all the states of the Union, many of these patterned after Connecticut, which led the way in the state organizations. The establishment of local unions in hundreds of places, the adoption of the "Vacation Bible," as the official representative of the societies, have been some of the
causes which, under the blessing of God, have increased the influence of the growth of the church in the present time, with their hundreds of thousands of members in America, and millions added thousands in Great Britain and all missionary lands.

The conventions of 1866 and 1867, both held at Saratoga Springs, N. Y., were without precedent in their dignity and power. They were attended, the first by 1000 and the second by 9000 delegates.

The Second Annual Convention was held at Chicago, July 5-8, 1868. Over 6000 delegates were present from thirty-three states and territories. The addresses and papers were of a high order of merit.

The Eighth Annual Convention was held at Phila-delphia, Pa., Oct. 3-6, 1874, and over 9000 delegates were present, representing thirty-one states and territories, Ger-many, Turkey, Canada, Ontario, Quebec, and Nova Scotia. The convention was held in the city of St. Louis, Mo., June 19-23, 1890. Over 6000 delegates were present from thirty-seven states, territories, and provinces.

The Third Annual Convention was held at Minneapolis, Minne-sota, July 9-13, 1951. Over 14,000 delegates were present from nearly every state in the Union and the provinces of Canada.

The Eleventh Annual Convention, held in New York City, August 4-7, 1870, was the most enthusiastic convention. Its numbers were enormous, a conservative estimate placing them at 25,000. The exer-cise of the convention received the same fame that the hands of the press, both secular and religious, speakers of the highest eminence, both in church and state, made the grandest of the greatest brilliancy meetings. This convention was especially memorable on account of the large number of delegates it attracted from the states and provinces, and some of the addresses made by Hodge, Chinese, and native Africans were indeed remarkable. The convention was in the form of an account of 1,000,000 with the exclu-sions of sentiment in regard to the Sunday closing of the World's Fair.

The Twelfth Annual Convention, held in Montreal, Can., July 6-9, 1893, was the first international conven-tion of the Baptist churches of this continent. Many things conspired to reduce the attendance, notably the World's Fair, and the failure to secure reduced rates from the Union Pacific. But, in spite of this, yet in 1893, over 10,000 dele-gates enjoyed what many have called the most practical and spiritual convention ever held. The experiment of hav-ing the meetings in the afternoon and organizing meetings of equal merit, was tried and worked successfully.

4. Denominational Societies.—The year 1891 saw the submersion of all protestantism in the agitation for separate denominational societies, to the exclusion of the Christian Endorsement name and inter-denominational fellowship. The Euphrates Leagues of the Methodist Church of Canada have adopted the name "Euphrates Leagues of Christian Endorsement," and hold full fellowship with each organization. The Baptists have formally de-cided to admit to their young people's union Baptist so-cieties with all that they do in the realm of denomina-tional societies strictly denominational. The Free Baptists have their "Advocates of Fidelity in Christian Endorsement." The Evangelical Association has named its organizations "Keystone Leagues of Christian Endorsement." It is be-comes evident that the number of Christian Endorse-ment should go wherever the principles go, and where-ever the inter-denominational fellowship for which it stands goes.

4. A World-wide Movement.—In the spring of 1888, Dr. Clark visited England in the interest of Christian Endorsement, and again in the spring of 1911. Large and enthusiastic meetings were held, and the young people's union societies to move hand in hand. In 1991 there were 190 societies in England alone, which had increased to 1000 Jan. 1, 1994. In the month of Aug.-vust, 1889, Dr. Clark, with Mrs. Clark, and their son Gen., set out on a journey around the world in the interest of Christian Endorsement, at the invitation of many friends in Australia, Japan, China, India, Turkey, Spain, and England. This year of travel was not for the purpose of travel, but to paint the Christian Endorsement, inspiring those already formed, of learning how Christian Endorsement adapts itself to new conditions, and of promoting the hopes of the country a deeper interest in the missionary countries visited.

Altogether this important Christian Endorsement journey could be considered to have seen no accidents, and no detention from any cause. Out of the large number of appointments, not a single one was missed. Over 500 addresses were made by Dr. and Mrs. Clark, before audiences that aggregated largely 100,000. The jour-ney in speaking to our audiences we made the greatest effect at the addresses were made, largely through interpreters, in more than twenty different languages.

The Christian Endorsement movement began in Canada, since Dr. Clark was born there, and some of its most interesting developments have taken place in the University of Western Canada. The Christian Endorsement societies, the larger number of which are in western Canada, are from 500 to 1200, in provinces of British Columbia and Manitoba each over 100, while Quebec has about 150. The rest are in Alberta, Assiniboia, British Co-

1044 ENDEAVOR

II. Principles and Methods.—Under this head we con-consider the statement given in the above pamphlets.

The first section is the Baptist mission stations at Tom-\noo, Bangtik, and Rauigoon.

Three societies are reported from the land of the Shah. One is at Hamedan, and the other two are at Teheran. The first is made up entirely of men and boys, as in Persia, and not a single woman or girl has a Baptist. Every member of this society is a total abstainer, and indeed, this society began as a temperance society. In the land of the Shah, the matrons and monastics are mingled, and all of them are very earnest in preserving the law from all.

At least fifteen Christian Endorsement societies are found on the continent of Africa, besides the thirty that exist in Madagascar. The members of these are in Cape Colony and Natal, while the others are in the Orange Free State, Guines, and Liberia.

1. Fundamental Purpose.—1st. The Society of Chris-tian Endorsement is not, and is not to be, an organization independent of the Church. It is the Church at work for and with the young, and the young people at work for and with the Church. Many of us have, for the sake of the Church, for the sake of the Church, be the mind, and seek for the fullest co-operation of the school and society, of the pastors and members in carrying on our work. The Society of Christian Endorsement can always afford to wait rather than force itself upon an unwilling Church.

2. Since the societies exist in every evangelical denomina-tion, the basis of the union of the societies is one of common faith in Christ, and of common methods in the study of the Holy Scriptures, and mutual Christian affection, rather than a doc-trinal or social unity. The Christian Endorsement Societies of the evangelical Christians can unite without repudiating or being disloyal to any denominational custom or tenet.

5. The purely religious feature of the organization is always to be paramount. The Society of Christian Endorsement Centre about the prayer meeting. The strict praying of the "prayer-meeting pledge, honestly interpreted, is as an experience has proved, essential to the continued success of a society of Christian Endorsement.

6. The Society of Christian Endorsement sympathizes with temperance and all true moral reform, with wise philanthropy, and with patriotism. In all the work we do, we are at home and abroad; yet is not to be used as a convenience by any organization to further ends other than its own.

5. The purely religious feature of the organization is always to be paramount. The Society of Christian Endorsement Centre about the prayer meeting. The strict prying of the "prayer-meeting pledge, honestly interpreted, is as an experience has proved, essential to the continued success of a society of Christian Endorsement.

7. The Society of Christian Endorsement sympathizes with temperance and all true moral reform, with wise philanthropy, and with patriotism. In all the work we do, we are at home and abroad; yet is not to be used as a convenience by any organization to further ends other than its own.
"Second, the covenant obligation embodied in the prayer-meetings, which can be no true society of Christian Endeavor.

"Fourth, strenuous loyalty to the local church or denomination with which each society is connected. This loyalty is maintained through the pledge of the whole idea of the movement, and, as statistics prove and pastors testify, is very generally exemplified in the lives of active members. Thus the Society of Christian Endeavor, in theory and practice, is as loyal a denomination as the world knows, as well as a broad and fraternal inter-denominational society."

"Fifth, we reaffirm our increasing confidence in the influence of the original fellowship, through which we hope, not for organic unity, but to fulfill our Lord's prayer, that "they all may be one." This fellowship already extends to all evangelical denominations, and we should greatly deplore any movement that would interrupt or impede such a movement.

"The Minneapolis Convention unanimously adopted the following: "Resolved, That, as from the beginning, we view the "Evangelical" as a personal faith in the divine-human person and atoning work of our Lord and Saviour, Jesus Christ, as the essential element, though suggested by Dr. Clark in the second article ever written concerning the movement,—"The Christian Endeavor," in The Sunday School Journal, 1861, have had a more gradual growth. Their most enthusiastic advocates are found in Australia. The words "Young People" and "Christian Endeavor" have been adopted by the South Australian Christian Endeavor Union, in order to make room for the admission of their increasing Senior Christian Endeavor Societies.

"4. Other Features.—(a.) Lift-Savers. Among the most important forces in the Christian Endeavor movement is the large number of men whose noble and brave lives are to a large extent debarred from Christian influences—the lift-savers along our sea and lake coasts.

"A national committee was formed, whose chairman is Rev. B. E. Young, and whose secretary is Rev. J. Lester Wallis, of Jersey City. Every state in the Union now has its representative on this committee, whose business it is to organize the Endeavorers for work among these lift-savers. The efforts are being made in all directions to spread the gospel among these lift-savers. It was this consideration, together with the need of furnishing an organization for the militant Christians who are commercial travellers, that led to a remarkable gathering in Philadelphia, Nov. 14, 1899. At this time the "Travellers' Christian Endeavor Union of America was organized, with Mr. F. D. Wing, of Palmyra, N. J., as the president, and Mr. J. Howard Breed, Ich, First Street, Philadelphia, as the secretary."

"(b.) Floating Societies. One of the first to be developed of Christian Endeavor societies, and one of the most important thus far, was the work among the seamen who wander life and many hardships make religious service a great sacrifice. The first Floating Society of Christian Endeavor was formed at the United States revenue marine steamer Dartmouth at New York, on Nov. 1, 1890. This steamer was at Woods Hole, Mass., in April, 1890, where twelve of the sailors signed the pledge, organized a society, and held their first society meeting. State superintendents of Floating Society work have been appointed by many state unions, leaders in this work being California, Maine, Pennsylvania, Maryland, Ohio, and Washington. Some societies are found in mariners' churches and some in labor unions. This work has been largely extended through the earnest efforts of Miss Antoinette P. Jones, of Falmouth, Mass."

"(a.) Army, Police, Prison, and Indian Societies. Christian Endeavor societies are also doing good work in the United States, among policemen, army soldiers, prison guards, and in the state prisons of Wisconsin and Connecticut.

"Great success has attended the work of the societies among young Indians."

"Christian Endeavor Day.—More and more widely the second day of February, or some day near it, is signalized by the many beautiful exercises of the last two or three years a capital custom has arisen, which has become so much a part of every Sunday school to recommend these societies to older workers. A collection is taken up by the societies on this day for the mission of the societies and its respective denominations. These collections are planned for long beforehand, in most instances, and have brought large sums into missionary work.

"(f.) Questions of the Day.—Christian Endeavor societies and local unions are giving special attention to such questions as missions, temperance, Sunday school, Sunday observance, citizenship, and systematization and proportionate giving to the work of God. Conferences have been arranged and practical methods adopted to push these various reforms."

"Public Agency.—The United Society is a bureau of the union, through the President, and other officers, thousands of letters of inquiry, supports one general secretary, and in general seeks to spread the Christian Endeavor idea. It levies no taxes, receives no contributions, and assumes no authority whatever over any local society. Each society, next to the Lord, is accountable to no authority that of its own church and its own pastor; every society is its own affair, and its representatives are its own church. Any member of an evangelical church can become a member of the United Society with voting power by paying one dollar into its treasury each year, or by paying twenty dollars at one time for life membership."

"III. Statistics.—The following summary is given in the society's Year-book and Almanac as the numerical results in the various fields up to Oct. 1, 1898:

IV. Literature.—Besides the above publications, and a large number of pamphlets and tracts on the subsidiary ends and operations of the society, its principal periodical organ is The Golden Rule; and two of its most notable small volumes are A Decade of Christian Endeavor, by Dwight M. Pratt (New York and Chicago, The Revell Co., 1891, 8vo), and tome: a Hand-book of Christian Endeavor Methods (Boston, at the society’s office, 1893, 8mo).

Ewpworth League is an organization of the Methodist Episcopal Church, similar to and in some sense growing out of the Christian Endeavor societies of the Calvinitic churches. Its members are required to sign the following pledge:

I will constantly seek for myself, and do what I can to help others, to attain the highest New Testament standard of experience and life. I will obtain from all forms of worldly amusements forbidden by the Discipline of the Methodist Episcopal Church, and I will attend, as far as possible, the religious meetings of the chapter and the Church, and take some active part in them.

I. History.—The following epitome of the origin and progress of the society in taken from its Annual for 1894:

The Ewpworth League was formed at Cleveland, O., May 28, 1886, at the union of the Oxford League, the Young People’s Methodist Alliance, the Young People’s Christian Endeavor, the Young People’s Union, and the North-Ohio-Conference Methodist Episcopal Alliance. The leagues which had not been merged into Oxford Leagues were unrepresented. From the beginning to November, 1942, Dr. H. B. Hulburt and Doherty were its secretaries, and the central office was the Sunday-school Rooms, 150 Ninth Avenue, New York City. The General Conference in May, 1892, formally adopted the League and made it a department of the Church, and at the central office at 47 Washington Street, Chicago, 11. In November, 1893, Rev. Edwin A. Schell was chosen General Secretary by the Board of Control, and the number of chapters on the four anniversaries were as follows:

May 15, 1890. | 1,292 chapters |
May 15, 1891. | 5,092 |
May 15, 1892. | 5,106 |
May 15, 1893. | 6,109 chapters

2. We condense the following account of the above five original sources of the Ewpworth League organization from Four Wonderful Years, by Dr. Joseph F. Berry (New York, 1893, 12mo):

a. The Young People’s Methodist Alliance came into existence Aug. 25, 1883, in a woody grove on the Desplaines in a camp-ground, not far from Chicago, where Dr. Asbury Lewis was preaching the Wesleyan doctrine of entire sanctification. One day two young women met by appointment under a certain tree for prayer and conversation. The next day a larger group strolled off to the sequestered spot for conference and prayer. This group grew and grew each August, until on Aug. 27, there were twenty in attendance. These meetings were later joined by ministers, one of whom, Mr. H. Date, proposed a permanent young people’s society, to keep alive and spread the holy enthusiasm thus aroused. This was accordingly done on the date above mentioned, with a membership of 30, which was soon increased to 80, with Mr. Date as president. In August, 1885, the constitution was made national in its scope, its name herefore being “The Young People’s Christian Alliance.”

b. The Methodist young people’s league was formed in December 1885, after started under the title of The Alliance (Herold), a special course of devotional, daily study of the Bible, and the formation of local alliances in the churches. The pledge then adopted was as follows:

I will in all things seek for myself, and do what I can to help others, to attain the highest New Testament standard of experience and life. I will obtain from all forms of worldly amusements forbidden by the Discipline of the Methodist Episcopal Church, and I will attend, as far as possible, the religious meetings of the chapter and the Church, and take some active part in them.

This pledge was not required of associate members. Three motives were in use: (1.) “Holiness to the Lord;” (2.) “We live to make our own Church a power in the land, while we love every other Church that exalts our Christ;” (3.) “All for Jesus.”

In the fall of 1886 several district and camp meetings joined the Alliance, increasing the membership to 1900. In 1887, there were over 50 local societies, and over 2000 names on the roll. During 1888 the membership again doubled. In July and August of that year several training-schools for Christian workers were held, and in September the first international convention of Methodist young people was held at Chicago under the auspices of the Alliance. In the nine months that followed 800 new societies were formed, and it is estimated that over 10,000 persons were converted in the meetings held by the Alliance. Some men were now kept busy in the field, and more than 100,000 circuits were quickly distributed. The average monthly expenditure was more than $400. The convention and training-schools gave a great stimulus to the work. In 1889 the Alliance had 410 local societies, and nearly 17,000 members; and on July 9 of that year its national convention, held at Annapolis, endorsed the action of the Cleveland Conference, and voted to merge itself into the Ewpworth League.

c. The Oxford League originated with Dr. (now Bp.) John H. Vincent, and was warmly endorsed at the centennial anniversary of the famous "Christmas Conference," in Baltimore, 1883. The purpose was to be stated as follows:

I. The commemoration of the meetings of certain students at Oxford, England, between 1792 and 1793, princip
pally under the leadership of John and Charles Wesley, from which meetings were developed the great religious awakening of the last century; by which the doctrine and applied the methods of the Primitive Methodist Church in their fulness to the world, and the power of the primitive Church once more established.

1. The existence of the fourfold objects of the original Oxford Club: 1. The more careful and devout study of the Holy Scriptures and the higher and newer personal Christian character; 2. The study of the Christian classics for literary culture; 3. The doing of methods for doing good to others.

The Oxford League was thoroughly denominational, though liberal-minded in its approach to all bodies of Christians. It was also specifically religious in its aim and methods. It claimed the consecration of every faculty and every opportunity of its members to the service of Christ.

Its success during the first years was not extraordinary, but gradually numerous chapters were established, and the names of the men who were its leaders increased. Until the winter of 1888-9, when the Board of Control somewhat revised its plans. Dr. J. H. Hurbut, the Secretary of the Sunday-School Union and Tract Society, gave it an impulse, and in sixty days 500 chapters were enrolled. It then resolved itself, as above stated, into the general Epworth League.

c. The Young People's Christian League originated with the late Rev. Dr. J. H. Twombly, who, early in 1887, presented a resolution at the Boston Methodist Preachers' Meeting, calling for a convention to promote the welfare of the young people of New England. Accordingly, a mass meeting was held March 3 in Bromfield Street Church, Boston, which appointed a committee to report a second similar convention. This latter was held in First Church, Boston, Oct. 26, 1887, when about 300 young persons were present, and reports were received from various young people's societies of New England, similar in object to that now proposed. A new organization was effected with the above title; a motto suggested by Bishop Vincent, "Look Up," was adopted, with a badge containing its initial letters. It aimed to unite the interests of the older societies, lyceums, guilds, bands, etc., with their local histories and associations as auxiliaries to the new League, without requiring them to abandon their former name, constitution, or plans of action.

The first annual meeting was held in Tremont Church, Boston, Oct. 17, 1887, with over 200 delegates present, representing 175 societies and 8000 members. It issued a call to the affiliated societies to aid in the consolidation with the Epworth League, as above mentioned.

d. The Methodist Young People's Union was the outgrowth of a meeting of certain alert pastors of the Detroit Conference, who broached the subject of a society for the social and religious culture of their young people at the Methodist Ministers' Meeting in Detroit in November, 1887. A convention was accordingly called, which met in Detroit, Dec. 12 and 13 following. Delegates from more than 50 churches and societies attended, and an organization was formed with the title, "Young People's Society of Detroit Conference." The movement spread with great rapidity. Inquiries for the model constitution devised were soon received from nearly every state in the Union and also from foreign parts.

At the annual meeting held in Saginaw, Mich., Dec. 4, 1888, the constitution was revised for the more general field indicated by the title before adopted. Provision was made for the publication of a monthly periodical to be called Our Young People, which after two years was enlarged into Our Young World, the official organ of the Epworth League, as a result of the consolidation then effected with the latter body.

e. The North-Ohio-Conference Methodist Episcopal Alliance was the outgrowth of a general desire similar to that above mentioned, by the members of the young people of Methodists. The subject was broached at the session of the Conference in Ashland, O., in September, 1888, and a resolution adopted, which resulted in the meeting of a committee of the presiding elders at Marietta, O., Dec. 6 following. The organization by the above name there proposed was in the way of successful operation when the whole project was merged, as above stated, the next spring, in the Epworth League.

II. Design and Methods. 1. The object of the League is to promote intelligent and loyal piety in the young members and friends of the Church; to aid them in the attainment of purity of heart and constant growth in grace, and to train them in works of mercy and help.

2. It seeks the accomplishment of this purpose by means of monthly meetings usually monthly meetings of each local society, at which papers are read and other exercises held, including especially prayer, reading the Scriptures and devotional singing, and reports from sub-committees appointed for the detailed operations of the society in the communities and as well as the spiritual work.

3. The operations of each chapter are conducted through the following departments, for each of which a special committee is annually appointed: (1) Spiritual Work; (2) Mercy and Help; (3) Literary Work; (4) Social Work; (5) Correspondence; (6) Finance. A vice-president and the secretary of each chapter is ex-officio chairman of each of these sub-committees.

III. Organization and Corporate Action. The general management of the League is vested in a "Board of Control," consisting of 15 members appointed by the presiding bishop, one of whom shall be a bishop and president of theEpworth League, and one of the Board of Control it- self; also of one member from each General-Conference district, to be chosen as the League organization in each such district may decide. There are four vice-presidents (two of whom must be laymen), a general secretary, a general treasurer; these, together with the president, the editor of the Epworth Herald, and the German assistant secretary, constitute the General League cabinet. The Board of Control elects the vice-presidents, secretary, and treasurer.

The subordinate forms of organization are the General Conference District Leagues, the Epworth Elder's District League, which have in a few instances only been realized, and the local chapter, which is the universal efficient body.

Membership in these last is constituted by election by the chapter itself, on nomination of its president, after approval by the cabinet. The pastor is a member of the chapter and the cabinet. There may be two classes of members: the active and the associate. The officers of each chapter are a president, four vice-presidents, a secretary, a treasurer, and a treasurer; and these, together with the pastor and the superintendent of the Junior League, form the cabinet. The president must be a member of the Methodist Episcopal Church, and the other officers must be members of some evangelical denomination. The election of the officers must be confirmed by the Quarterly Conference, of which body the president becomes a member.

IV. Collateral Associations. These are specifically:

(1) The Junior Epworth League, which has particular care and culture of the children. Its scheme is a modification of the local chapter, the chief officer being a superintendent, appointed by the pastor, and other subordinate officers chosen by the members. (2) Epworth Guards have been in some places organized for a sort of military drill and co-operative work. (3) Extension to Other Bodies and Foreign Fields has taken place in the organization of similar Leagues in the Methodist Episcopal Church South, among the Germans of this country and abroad, as well as in several other countries.

V. Literature. A large body of publications, mostly small volumes and tracts or even leaflets, has already grown up. The best of these is Improver, adapted to the general organ of the League, entitled the Epworth Herald, with its supplement, the Junior Herald, and the Year-book above mentioned.
A Course of Reading is also recommended to the members, and a select Epworth Library, all of which, together with the above, and the necessary blanks for constitutions, certificates of membership, badges, uniforms, and other apparatus, are prepared and kept on sale at the headquarters of the League in Chicago, or may be ordered of any of the Methodist Depositories.

VI. Statistics.—The following tables exhibit those as reported for the year 1898:
