already recognised into a system. They also established a doctrinal distinction between vita eterna (eternal life) and beatitudine (happiness), defining them both. Anselm (De similib. c. xxvii) counts fourteen partes beatitudinis, seven of which relate to the glorifying of the body, and seven to the glorifying of the soul. The occupations of the saints are generally connected also with the number seven. Yet it was more customary to divide the different aspects of that state—or course subject to all kinds of occasional modifications—into twelve parts (Bonaventura, Ditia sanctorum, c. xxviii). Spec. conc. c. xi. Deo. Torre crem. Tract. c. xxi. (in reg.:) "Duodecim considerationes vitae aeternae: 1. Ila sola est vita vera; 2. Possidetur sanitas sicque quacunque infirmitate, molestia aut passione; 3. Fulcrutitudo sicut quacunque deformitate; 4. Copia omnium bonorum; 5. Satisfactio et adaequatio omnium desideriorum sicut quacunque defectus; 6. Securitas et pacis tranquillitas sinita timere quacunque; 7. Vizio beaclarissima et eundemissima divinitatis; 8. Delectionis tota summam; 9. Sapientia et plenissima cognitione absque ignorantia (an especially gratifying prospect for fut. c. iv). 10. Highest bonum et gloria; 11. Ineffablis is sweetness; 12. Endless praise.) Thomas Aquinas recognizes, besides, the general and common beatitudin, special dores, gifts. Thus, aside from the corona aurea, he reserves a special aureola to the martyrs and saints, and also to monks and nuns, as a sort of supererogated reward. The highest good is beatitudin, and the disfigurement of the blessings of future life is knowledges according to Scottus, the will. After the times of Anselm, and among the scholastics and mystics, we find very attractive descriptions of the blessed state, full of elevated ideas. "Præmium est," says Bernard (De mediæ vita c. xiv), "quod Deus, fuit in me sum Deae, esse in Deo, qui erit omnia in omnibus; habere Deum, qui est sumnum bonum; et ubi est sumnum bonum, ibi summa felicitas." (The reward is, to see God, to dwell with God, to exist with God and in God, who shall be in All; to possess God, who is the highest Good; and where the highest Good is, there is perfect bliss.) (1.) The Roman Catholic Church has simply gathered the teachings of the scholastics into a whole on this point, and has established them in a more fixed and dogmatic manner, as is shown in the exposition given in the Roman Catechism. According to it, the vita eterna (eternal life), by which believers are, after their resurrection, to attain the perfection after which they aim, is non magis perpetuitas vitae, quam in perpetuam beatitudinem, quod beatius est desierium expierl et non potest perpetuis; et non est in perpetuiu, in perpetue, satisfacere omnes desideria beatitudinis. It is evident, moreover, that the nature of the blessedness of the saints cannot be appreciated by our minds in any but an empirical, not an absolute manner. According to the scholastics, the eternal blessings can be described only by perfections of God in his nature and substance, and the consequent participation in his essence, which is identical with his possession. 2. Accessory; glory, honor, perfect peace, etc. They are expressly represented as incentives to lead, and not to seek, on their connection with good works in the Romanist system, see Council of Trent (Stos. vi. c. xxvii.) (2.) With the exception of the part relating to purgatory, the doctrine of the elder Protestantism on this subject does not essentially differ from that of the Romish Church. The symbolic books of the evangelical Church afford us but little information on this point. In general, the vita eterna continued to be considered as soluta nonre compensationem, speci mat. finis sibi (the goal of hope, the end of faith). By it was understood the position of the just, partly after this life in general, and partly after the resurrection. Comp. Augsburg Conf. art. 17; Apol. iv. 212; Cat. Min. ii. 5; Fidei Conc. Conc. oec. ss. 853; Conf. Belg. art. 67; Luther, Works, i. 860, 887, 997; xi. 1487; Melanchthon, loci, 1553, 75; Calvin, Institutes, iii. 9, 1.) Still the effects of a deeper study of Scripture (a result of the Reformation) became manifest in various ways, and especially in the idea of a beginning of eternal life in the heart of the believer, which was recognised as connected with regeneration (Apol. Confessionis, iv. 140, 148, 99, 187, 209, 210, 285, mostly in the German text; Buttmann, 445, 503; Zwining, Exp. ed. 12; P. Martyr, Loc. 442; Cat. Pal. 58; Alting, Expl. Catech. 280; Alsted, 769; Perkin, Cat. 778; Confessio Bohem. New ed. 1686; Cui corpus perirnamentale) adperses, Conv. Ec. c. 136, 976. Yet this truly evangelical view was not steadily persisted in, but, on the contrary, it was soon asserted again that the expression "eternal life" occurred only in Scripture to designate the reward of Christ's fidelity. Nevertheless, the fundamental idea of eternal life remained in the doctrine of a mystical union with Christ, and in the doctrine concerning the Eucharist. Many draw a distinction between the vita spiritualis (spiritual life), of which Christ is the alimentum (food), and the vita eterna (eternal life). The former was also designated as vivi gratiae (the life of grace), and the latter as vita glorii (the life of glory). There were three degrees of eternal life recognised: 1. Initialis, in this world; 2. Partialis, after the death of the individual; 3. Perfectionis, after the last judgment. So Pearson, On Faith and the Creed, Oxford, 1820), or the soul will be incorporeus corporis separate, postmodum vero eodem in die resurrectionis glorificari corporibus reuniate, ab omnibus miseriis, doloribus et malignis liberata. cum Christo, angelis sanctis et omnibus electis in sempiterna utitutia, gaudenitate, felicitate el infinito, et absolutissimom visione, perfecta sanctitate et justitiae ornate Deum a facie ad faciem sine fine videntec, sine fasitioso amant ac sine deslatitigatione glorific. (The early Protestant theologians speak of the felicity of the future life as incomprehensible and ineffable (Conf. Belg. 57; Bohem. in Niem. 846; Calvin, 3, 15, 10; Gerhard, 39, 340). Its blessings are partly privative, partly positive: the meeting again and recognition of Christians was considered one of them (Zwining In exp. ed. 12); this is called a positive blessing. That individual blessedness which will not be shared by the knowledge of the communion of others is called a privative blessing. In opposition to Rome, the influence of personal merit on the future state was denied by these theologians; but some of them, while admitting that blessedness is essentially the same for all, hold to several degrees of blessedness. A number of other discussions on the contemplation of God, or the knowledge of the blessed, the manner of the contemplation of God, if he shall be praised in word, etc., are generally treated by the ancient theologians after the example of Calvin, Inst. 3, 25, 6, as irrelevant, and of no religious importance. In later times they have been discussed anew. 7. Later Views.—The evangelical Protestant church probably would all agree that eternal life com-
ETERNAL LIFE

ETHAN

menseness in Christian experience in this world. So Wesley (Serm. ii, 181): "This is the testimony, that God hath given us eternal life, and this life is in his Son. He that hath the Son hath life [the eternal life here spoken of]; and he that hath not the Son hath not life." As if he had said, This is the sum of the testimony which God hath testified of his Son, that God hath given men only a title to, but the real beginning of eternal life; and this life is purchased by, and treasured up in his Son, who has all the springs and the fulness of it in himself, to communicate to his body, the Church. This eternal life, then, commences when it please the Father to reveal his Son in our hearts; when we first know Christ, being enabled to "call him Lord by the Holy Ghost;" when we can testify, our consciences bearing us witness in the Holy Ghost, "The life which I now live I live by faith in the Son of God, who loved me, and gave himself for me." And then it is that happiness begins—happiness real, solid, substantial. Then it is that heaven is opened in the soul, that the proper heavenly state commences, while the love of God, as loving us, is shed abroad in the heart, instantly producing love to all mankind; general pure benevolence, together with its general benevolence, mildness, meekness, patience, contentedness in every state; an entire, clear, full acquiescence in the whole will of God, enabling us to "rejoice evermore, and in everything give thanks." As to the nature of the blessedness of the future life, "the sum of what we are taught by reason and Scripture (a)"—especially those who may enter the abodes of the blessed without knowledge, or with only a small measure of it; e. g. children, and others who have died in ignorance for which they themselves were not to blame. On this subject nothing is definitely taught in the Scripture; but both Scripture and reason warrant us in believing that provision will be made for all such persons in the future world. A principal part of our future happiness will consist, according to the Christian doctrine, in the enlargement and correcting of our knowledge respecting God, his nature, attributes, works, and in the voluntary application of this knowledge to our own moral benefit, to the increase of our faith, love, and obedience. There has been some controversy among theologians with regard to the vision of God (rio Dei intutiuvoir, or sensatiu, or benificiua, or comprehensio); but Christ is always represented as one who will be personally visible by us, and whose personal, familiar intercourse and guidance we shall enjoy. And herein Christ himself places a chief part of the joy of the saints (John xiv, xvii, etc.). And so the apostles often describe the blessedness of the pious by the phrase "to sit with Christ." To his guidance has God intrusted he truth of heaven and on earth. And Paul says (2 Cor. iv, 6) we see the brightness of the divine glory in the face of Christ; he is "the visible representative of the invisible God" (Colos. i, 15). Paul says expressly (1 Thess. iv, 17) that we shall be with Christ, in company with our friends who died before us (γαρ σ�ν αναληθής); and this presupposes that we shall recognize them, and have converse with them, as with Christ himself. Paul advises that Christians should comfort themselves under the loss of their friends by considering that they are at home with the Lord, and that they shall be again united together" (Knapp, Christus, 7; Numb. sec. clx, p. 377). See also Cotta, Hist. Dogm. de Vita Eterna; Cotta, Theses Theol. de Vite eterna (Tubinga, 1768); Storli, Opuscula Academica, ii, 76; Wesley, Sermone, ii, 180 sq.; Baxter, Saints' Rest; Isaac Taylor, Physical Theory of another Life; Naville, Vie Eternelle (1865); Herzog, Real-Encyclopedia, viii, 254 (from which this article is in part a translation); Martensen, Christian Dogmatics, § 283-290. Eternity of God. See God.

Etham (Heb. Ethan). כֶּנֶ֜עָם, supposed by Jabin- sky (Synod. ed. te Water, ii, 157) to be i. q. Copic of ancient Greek name, κατακοπήν, "navigation of the sea." In a list of the 12 sons of Jacob, omit in Num. xxxiii, 8; Vulg. Etham), the third station of the Israelites when they left Egypt; a place described as lying "in the edge of the wilderness," where they encamped after the journey from Succoth (Exod. xxi, 20; Num. xxxiii, 6). This description, and the route pursued by them, seem to fix upon some point on the east of Egypt, north of the Red Sea, near the desert tract stretching thence along the whole eastern shore as far as Marah, to which the same name, "desert of Etham," is therefore naturally applied in the text of the New Testament. The late locality of Etham has been a matter of dispute, according to the various theories of the passage across the sea. No spot more likely has been indicated than a point in the valley of the bitter lakes opposite the foot of wady Abu-Zeid, in the direct route around the point of the sea, but from which there is a passage sharply deflecting, up wady Em-shesh, around Jebel Attaka, where the Israelites were at this point commanded to take. See Exodus; Desert. The sense of the passage Num. xxxiii, 6-8, is evidently this: At the end of the second day they had already arrived at the borders of the Arabah, which stretch from Etham, from which the entire country lying next to Egypt receives the name, desert of Etham; but, instead of advancing directly into the desert, they turned down again farther into Egypt, to the Arabian Gulf. Afterwards, instead of going round the coast, they climbed into the desert of Etham. See Shuh. Schwartz says (Polet, p. 211) that the part of the desert north of the Red Sea, near Suez, is still called Ethia, but this lacks confirmation.

Ethan (Heb. Ebyhm), "perpetuity, as often," the name of three men.

1. (Sept. Αἰβάχον. v. J-aclmnm and AieiK.) One of four persons ("Ethan the Ezrahite, and Heman, and Chalcol, and Darda, the sons of Mahol") who were so renowned for their sagacity that it is mentioned that the highest wisdom excelled theirs (1 Kings iv. 31 [Heb. v. 11]). Ethan being distinguished as "the Ezrahite" from the others, who are called "sons of Mahol;" unless, indeed, this word Mahol (q. v.) be taken, not as a proper name, but appellatively for "vagabond," "wandering," etc., in the same manner that would apply to Ethan as well as to the others. This interpretation is strengthened by our finding the other names associated with that of Ethan in 1 Chron. ii, 6, as "sons of Zerah," i. e. of Ezra, the same as Ezrahites, or descendants of the son of Judah. See Ezrahite. With this agrees the Jewish chronology, which styles them as prophets during this sojourn in Egypt (Soder
Olam Rabbé, p. 59), although the Jews have also a tradition
confounding Ethan with Abraham, Heman with Moses, and Chinokh with Joseph (Jerome, Comment. on
King, in loc.). In 1 Chron. ii, 8, Ethan's 'sons' are
mentioned, but only one name is given, that of Azariah.
B.C. post 1065. In the title to the 89th Psalm an
'Ethelbert' is mentioned, but there seems to be some confusion here in the latter epistle.
See No. 3 below.
2. (Sept. Αἴθαριν v. r. Oyspi.) Son of Zimmah and
father of Adahiah, in the ancestry of the Levite Asaph
(1 Chron. vi, 42 [23]). B.C. cir. 1585. In ver. 21 he
seems to be called the same person as Ethelbert.
(Joyce, xvi, 27). See JOAH.
3. (Sept. Αἴθαριν v. r. Αἴθαρις.) A Levite, son of
Kushai or Kushiah, of the family of Merari; appointed
one of the leaders of the Temple music by David (as
singer, 1 Chron. vi, 44 [29], or player on cymbals, xv,
17, 19). B.C. 1014. In the latter passages he is asso-
ciated with Heman and Asaph, the heads of two other
families of Levites; and inasmuch as in other passages
of these books (1 Chron. xxv, 1, 6) the names are
given as Asaph, Heman, and Jeduthun, it has been
conjectured that this last and Ethan were identical.
There is at least great probability that Ethan the sing-
er was the same person as Ethan the priest (comp. No. 1 above), whose name stands at the head of Ps.
Lxxxi, for it is a very unlikely coincidence that there
should be two persons named Heman and Ethan so
closely connected in two different tribes and walks of life. In fact, there is even more probability that the
Heman (q. v.), who, in the title to Psalm Lxxviii, is like-
wise expressly called an Ezrahite, and yet identified
in its authorship with the sons of Korah. Hengstenberg
supposes (Comment. on Psalms, Clarke's ed. iii, 89) that
both Heman and Ethan, although descendants of Ju-
dah, were adopted into the ranks of the Levites; but
this will not meet the above genealogy of this Ethan, who
is moreover classed with the Merarites, and not
with the Korahites. Comp. Heman, and see Ezra-
hite.
Eth'anim (Heb. Εθηναίμ, Αἴθαριν; Ezr 8:24), perennial
streams; Sept. 'Αστάρτη, another name for the month
Tisri (q. v.); so called from the fulness of the brooks
at that time of the year, being swelled with the au-
 tumnal rains (1 Kings viii, 2). See CALENDAR.
Eth'ball (Heb. Ethhâli, διαβροχή, with Baal, i. e.
enjoying his favor and help; Sept. ΕΣμπάλα, a king
of Sidon, in the genealogy of the infamous Ezechias,
son of Ahab (1 Kings xvi, 31). According to Josephus
(Ant. viii, 18, 1 and 2; Apion, i, 18), Ethbâl is called Tho-
bolus (τόβολος or θοβόλος, i. e. διαβροχή = Baal
with him) by Menander, who also says that he was a
priest of Astarte, and, having put the king of Phæth to
death, assumed the sceptre of Tyre and Sidon, lived
sixty-eight years, and reigned thirty-two (comp. Theo-
phil. Autol. iii, p. 132). As fifty years elapsed be-
 tween the deaths of Hiram and Phæls, the date of Ethbâl's
reign may be given as about B.C. 940-908. The
worship of Baal was no doubt closely allied to that of
Astarte, and it is even possible that a priest of Astarte
might have been dedicated also to the service of Baal,
and borne his name. We here see the reason why
Jesuel, the daughter of a priest of Astarte, was so zeal-
ous a promoter of idolatry, the taint of which, with
its attendant tyranny, eventually extended to the throne
of Judah the person of the Athalith; and as twenty-
one years after the death of Ethbâl, his granddaugh-
ter Dido built Carthage, and founded that celebrated
commonwealth (Josephus, as above), we may judge
what sort of a spirit animated the females of this royal
family. See AMAB. Another Phoenician king of the
same name (Διαβροχής or ΕΣμπαλαχ) appears as a
contemporary of Nebuchadnezzar (Josephus, Ant. vi,
11, 1; Apion, i, 21; Eusebius, Chron. Arm. 4782, i, 74).
See PHOENICIA.

Etelbert, king of Kent, was born A.D. 546 or
552, and succeeded to the throne about A.D. 560 (?).
About A.D. 590 he was acknowledged as Bretwalda
(president of the Heptarchy). In 570 he married Ber-
tha, a Christian, and daughter of Charibert, a Frank-
ish king. It had been agreed before her marriage that
she should be allowed to enjoy her own religion. The
most important event of his reign was the introduction
of Christianity into his kingdom by Augustine, who
landed in Kent in 596. See AUGUSTINE (vol. i, p. 544).
In 597 the king himself was baptized. He founded the
bishops' of Rochester and, with his niece Sebert, king of Essex, he consecrated the church of St. Peter, the
church of London. Ethelbert died in 616. — Mace, Christi-
ans Missions during the Middle Ages (1863), chap. v;
Collier, Ecclesiastical History of Great Britain, i, 156 sq.

Ethelwold, the principal reformer of monastic
orders in England, was born in Winchester about 925.
From early youth he distinguished himself by his
learning, and obtained the favor of king Athelstan. He
was ordained priest simultaneously with Dunstan,
and when the latter was consecrated abbot of Glaston-
bury, about 947, Ethelwold entered his monastery and
became a companion of his studies. He distinguished
himself as a poet, grammarian, and theologian. He
is also reported to have been familiar with the me-
chanical arts, and to have constructed two bells. When
he declared his intention to go to Rome in order to
perfect himself in his studies, king Edred, who wished
that he retain in England, refused to him permission to
travel, and appointed him abbot of Abingdon. This
monastery was then in ruins, and was rebuilt by Eth-
elwold. In 963 king Edgar appointed him bishop of
Winchester. The great task of his life heretofore
was the reorganization of the Anglo-Saxon monas-
teries, which were at that time administered by
secular priests (clerici, canonici, presbyteri). The disci-
pline in the monastery was anything but severe, and
many of the priests were married. Ethelwold substit-
tuted for the secular priests regular monks, and
played great activity in rebuilding the monasteries
that had been destroyed by the Danes, and in repeo-
ting those that had been abandoned. The monastery
of Winchester, under: his direction, became a celebrated
school, from which preachers distinguished abbots
and bishops. He died Aug. 1, 994, at Win-
chester. The chief work of Ethelwold is an Anglo-
Saxon translation of the Latin rule of St. Benedict. It
has never been printed. He also wrote a mathematical
treatise, still extant in manuscript. — Hoefer, Nouv.
Biog. Générale, xi, 598; Wright, Biog.Brit., LIT. 485
sq. (A. J. S.)

Et'har (Heb. id. Αἴθαρις, abundance), one of the cit-
ies in the plain (Shephelah) of Judah (mentioned
between Libnah and Asan, Josh. xv, 42, Sept. 'Aśtiq v.
r. 132), eventually assigned to Simeon (mentioned
between Remmon and Ashan, Josh. xix, 7, Sept. 'Aśtiq
v. r. 132), and subsequently for Ether. In the
Omnimodatis Eusebius and Jerome men-
tion it twice (q. v. 'Ăśtiq, Ether; 'Ăśtiq, Jether)— in
the latter case confounding it with 'Ăśṭāq of priests,
which contained friends of David during his troubles
under Saul), and state that it was then a considerable
place (ἐν παλαιοτίτι), retaining the name of Jethira
(Ἰθηρία, Ἰθηρία), very near Malathas, in the interior
of the district of Daraem, that is, in the desert of Hermon, and
below Hermon about 15 miles to the east of Beer-sheba. At Belt-
hirin Van de Velde heard of a tell Akhar in this neigh-
borhood, but could not learn its distance or direction
(Memoir, p. 811). For the present, we may conjectu-
really place it at Belt-Aker, in the vicinity of the asso-
ciated localities of Beth-Shean and Betharabah, a
ruined village, covering low hills on both sides of the
path, and exhibiting foundations of hewn stones,
leading to the inference that it was once an extensive town (Robinson, Researches, iii, 10).

**Etheridge, John Wesley, Ph.D., a Methodist minister and eminent scholar, was born at Grange-woods, Isle of Wight, February 24, 1804, and died at Camborne May 24, 1866. His parents were Methodists, and he was brought up with religious care. In 1827 he entered the ministry of the Wesleyan Methodist Church, and was appointed to the London Circuit. In 1888 his health failed, and he became "supernumerary." In 1846 he was able to return to the itinerant ministry, in which service he remained until his death. He was an eminently holy man. Whether in the pulpit or in the social circle, he appeared clothed with humility, and his influence was radiant with Christian benevolence. Constrained by the love of Christ, he lived only to promote the interests of the Church. He was "a burning and shining light," and consumed himself in the service of his Lord and Saviour" (Minutes, 1867).

Dr. Etheridge's devotion to letters, amid the engrossing labors of the Methodist ministry, were very remarkable. Early in life he showed extraordinary aptitude for languages, and by continued study he learned to read and write Hebrew and Syriac with facility. In the literature of these two languages he became peculiarly proficient before his death. His published writings include The Syrian Churches, their early History, Liturgies, and Literature (London, 1846, 12mo: this work contains a translation, also, of the four Gospels from the Peshitto)—The Apostolic Acts and Epistles, from the Peshitto, with the remaining Epistles and the Revelation (London, 1852, 12mo)—Hose Aramacea (London, 1843, 12mo: a useful series of Essays on the Hebrew, Aramaic, and Syriac languages and literature)—Jerusalem and Tiberias, a Survey of the religious and scholastic Learning of the Jews, designed as an Introduction to Hebrew Literature (London, 1859, 12mo)—The Tanganyke, Odillo and Jonathan ben-Uzziel, etc. (London, 1862, 12mo). Besides these, he published Miscellanea, or Contemplations on the Mercy of God (Lond. 1842)—The Life of Dr. Adam Clarke (London, 1856: N. Y. 1860)—The Life of Dr. Thomas Coke (London, 1860)—The Life of the Rev. John Fletcher, Minutes of Conferences (English for 1867; Christian Examiner, Ivix, 346.

**Ethics**, from ἕθος, originally the Ionic form of θέος, in Germ. Stüttenlehre, in English moral philosophy, though this last phrase sometimes covers the whole science of mind. Ethics are related to law and duty, to virtue and vice. "Aristotle says that ἕθος, which signifies moral virtue, is derived from ἡθος, custom, and ἐθική, acts that are usual, which is a moral habit, is formed" (see Fleming's Vocab. Phil. p. 271). "Ethics, taken in its widest sense, as including the moral sciences or natural jurisprudence, may be divided into, 1. Moral philosophy, or the science of the relations, rights, and duties by which men are under obligations to one another. 2. Law of nations, or the science of those laws by which all nations, as constituting the society of the human race, are bound in their mutual relations to one another. 3. Public or political law, or the science of the relations between the different ranks in society. 4. Civil law, or the science of those laws, rights, and duties by which individuals in civil society are bound—as commercial, criminal, judicial, Roman, or modern. 5. History, profane, civil, and political" (Fenema, Intro. ad Philosoph. p. 86). "Ethics, then, cover the science of all that is moral, and relate to law or action, to God or the creature, to the individual or the state. It goes wherever the ideas of right and wrong can enter.

1. Ethical science may be divided into philosophical, theological, and Christian ethics.

(a) Philosophical Ethics. The science in this aspect, must find its root and its life, its forms and its authority, in the depths of the human constitution. This leads necessarily to the idea of God. We do not affirm that ethics cannot be discussed at all without bringing in the notion of a supreme being. On the contrary, it is undeniable that we find in man a moral nature; whatever may be the character of his moraliti, the requirement about that implies and necessitates a moral. He manifestly has relations to virtue and vice, to right and wrong, to blame and praise, to guilt and innocence. True, if he does not accept the idea of God, morals seem to lose their foundation. Why should a man obey the dictates of his nature, even if it is to be right and the good, unless his nature is a product of wisdom, and reveals the law and the nature of an infinite intelligence? But truth is sternborn, and even a fragment of it, swinging in the air without a foundation, will live. Pulled up out of the soil of a doctrine of God, the moral ideas, however shorn of their strength and wielded, still assert their authority and insist on obedience, from motives of utility, or fitness, or happiness. A genuine philosophical ethics, however, will find a Creator from the study of the creature, and will raise from the nature of man a law which will ground itself in the idea of God.

(b) Theological Ethics. This is grounded upon some religion or theology. But in this aspect the science is broad enough to cover every religion. The ethics might be theological, and at the same time Buddhist, or Mohammedan, or Brahminical. The conversion might, therefore, be a system on which the fundamental principle of morals had been perverted by the admixture of cruel and impure superstitions, just as a so-called philosophical ethics might be atheistical or pantheistical.

(c) Christian Ethics. Christian ethics is theological ethics limited by Christianity. As thus stated, it might appear to be narrower than either philosophical or theological ethics, but in reality it is far otherwise. Philosophical ethics is Christian as far as it is true and just and, from the very nature of Christianity, as containing a complete account of human duty, it must even be broader and deeper than all human philosophies which relate to it. As to the relation of Christian ethics to any other supposed theological ethics, or to all other theologies in their moral aspects taken together, its position must be that of judge among them all; it must measure them all, eliminating whatever is false, restoring what is lacking, or rather supplanting them one and all as the only standard of moral right and duty.

Besides, Christian ethics, considered as a science, and hence as a field for speculation, covers the whole ground. Philosophy and theology, in their ethical relations, are entirely within its scope. It must judge them both wherever it touches them. It has made ethics, and indeed all speculation, a different thing from what it was before it entered into human thought, and it aims to master all human thinking within its sphere. It is, to be sure, amenable to philosophical thought, and cannot repel the tests of right reason; it readily enters into the struggle with every adverse intellectual tendency, carrying with it a divine constancy, the mind of man with that indissoluble and indestructible norm of humanity regarded as moral.

Christian ethics, indeed, considered as speculative, is not infallible. God has given the ethical norm, but man is obliged to speculate for himself. Evidently the complete form of Christian ethics, considered as a philosophy, does not yet exist. Whether it need exist is yet unknown, whether it rest on the system of benevolence and beauty which shall settle down on the whole human race, at once an atmosphere.
of divine and filial love, and an antidote to discord, injustice, and all impurity.

"As between theological and philosophical speculation, so between theological and philosophical ethics, in so far as they are ethical, a distinction always makes a strong distinction. The latter pair differ precisely as the former do. But, much as philosophical and theological ethics differ, they are not opposites. Within the Christian world, Christian ethics, like philosophy in general, must always be essentially Christian. It has to be the case, so, that in the result of Christ, it must make a historical necessity, but in different degrees at different periods of time, and in the several stages of its progress. There may, indeed, arise a relative hostility between philosophical ethics and the contemporaneous Christian teaching, or even a hostility between ethical writers and Christianity in general; or, rather, such a hostility is unavoidable precisely in the degree in which humanity fails to be penetrated by Christianity. But, so long as this continues to be the case, it must be a proof of imperfection, not in philosophy only, but also in Christian piety, if Christian piety, looking at the doctrine in itself, should be convinced that it possessed the true results, yet she possesses her treasure without the scientific ability to understand it, or to vindicate it to the understanding of others. It is, therefore, as science, still imperfect. A result of this is the characteristic ethical ethics will make in the Christian world. So long as the moral consciousness of the Christian, which is specifically determined by the church of which he is a member, does not clearly recognize itself in the forms of morality prevailing in his circle, a Christian ethical philosophy must remain a want—a desideratum. This, however, is only to say that this want will last while the general moral sentiment and that of the Church remain apart. The more nearly each approaches perfection in its own sphere, the nearer they come to being one. If we conceive of the Church as being at least not very different in their method, but only in the order according to which, under the same method, they scientifically arrange themselves.

"What has now been said of the relation between philosophical and theological ethics, holds of the latter only so far as it is conceivable of as speculative. In other modes of treating theological ethics, especially in the traditional, it is easy to conceive that the relation would be different. . . . It must be distinctly affirmed that a Christian character belongs to philosophical ethics throughout the Christian world. We do not mean that every instance of what is so; but that every instance of what is so; but that every instance of what is so; but that every instance of what is so; but that every instance of what is so; but that every instance of what is so; but that every instance of what is so; but that every instance of what is so; but that every instance of what is so; but that every instance of what is so; but that every instance of what is so; but that every instance of what is so; but that every instance of what is so; but that every instance of what is so; but that every instance of what is so; but that every instance of what is so; but that every instance of what is so; but that every instance of what is so; but that every instance of what is so; but that every instance of what is so; but that every instance of what is so; but that every instance of what is so; but that every instance of what is so; but that every instance of what is so; but that every instance of what is so; but that every instance of what is so; but that every instance of what is so; but that every instance of what is so; but that every instance of what is so. But, in spite of all the confident assertions of the contrary, we cannot doubt that from the specifically Christian consciousness of God, which is the subject treated here, sin and redemption should be deduced as a logical necessity" (Roth, *Theologische Ethik*, 57).

II. Position of Ethics in Theology. — Theology, as part of systematic theology, which also includes dogmatics. As systematic science, it is to be distinguished from exegetical and historical theology. Its office is not merely to show what is the original, and thus normative Christian ethics, nor what has been accepted as such, but rather to philosophize so that Christian ethics is a genuine ethical truth." . . . "On the other hand, ethics must be separated from the various branches of practical theology among which it has often been placed. The two sciences are different both in scope and aim. Ethics embraces the whole of right, including the Church, in which it finds only its culmination, and points away from itself to practical theology, the aim of which is, of course, practical!" (Herzog's *Real-Encyklop.* art. Ethik).

Place in Systematic Theology. — "In ancient times, and down to the Reformation, it was not independent but held a subordinate place in the science of dogmatics. From the 17th century the two have been separated, and, following P. Ramus, most writers have distinguished between them as between theory and practice. In point of fact, dogmatics has practical importance, whereas ethics, as the science of the good, has a theory" (Herzog's *Real-Encyklop.* art. Ethik).

"Dogmatics and ethics are as certainly independent discipline as God and man are separate beings. Only a point of view like that of Spinoza, in his Ethics, which denies the existence of a real creation, and asserts that dogmatics, as the science of the good, can correct the independent position of ethics by the side of dogmatics" (idem).

These views are substantially correct. "Christian ethics has a right to an independent position in the sphere of systematic theology, and dogmatics are as certainly distinct as God and man." Still it is none the less true that, God and man conceived to be such as they are, ethics cannot be practically separated from religion. Ethics finds its highest sanctions
in religion, as religion must consist largely in pre-eminent ethics. God and man being presented to the mind, ethics must cover the character of each, and also the relation between them.

III. The Moral Faculty: Conscience. — There has been a great waste of controversy on the question whether or not conscience is a distinct and separate faculty of the soul, or only an application of the reason or judgment to moral subjects. The truth is that, the mind being a unit, all its faculties are only so many powers of applying itself differently according to demand. A faculty is a power of doing or acting, and a separate faculty is the power of acting in a particular direction, as distinguished from other directions. The mind is as certainly and distinctly moral as it is intellectual, or imaginative, or volitional. Each of these expresses a distinct power of the one mind.

This faculty of forming moral judgments we call conscience; and, if the views now expressed be correct, there is little propriety in discussions respecting the origin of conscience. It has no origin but that of its possessor; it is born with him, though from its nature it is only developed farther on in life, just as reason and imagination are. It has been asked, in reply to this view, whether conscience is not made what it is in any given case by the circumstances about it — by the teaching of others, or the influence of books, or the opinions adopted by all the various influences brought to bear upon him. We answer it as to its form, but there was first conscience, a moral faculty in the man to be shaped. We concede that neither moral ideas, nor ideas of any sort, are innate; but the capacity, nay, the constitutional necessity for moral ideas is innate.

IV. The Ethical Standard. — Its nature, according to Christianity, to be found in the Scriptures, but there is still in the sphere of science a wide diversity as to their meaning. But when the standard is supposed to be understood on a given question, and the conscience submits to it, there must follow a perfect self-abnegation; degradation must result from disobedience. In the case of a conflict between the conscience and the law of the state, for example, in which case the conscience of the lawgiving majority collides with the individual conscience, who shall yield? The answer, from the very nature of the case, is, neither. They must fight it out. The state, from its nature, is supreme, and cannot yield; but for the man the conscience is also supreme. The man can only die, or make some other atonement, and thus maintain allegiance to the higher law of the state.

V. History of Ethics. (a.) The sources of knowledge here are Christ, his person and teaching; also the writings of the apostles, as shown in the New Testament. In the Old Testament the whole contents are authoritative, except as modified or repeated by the New Testament. By the side of these objective sources we have a subjective source in the New Covenant; it is the influence of the Holy Spirit. This is the case in Barnabas, Justin, and Clement of Alexandria bear witness. This life of the Spirit in the man is not only subject to the supposed efficacy of ordination, by which the Spirit was bound to the priesthood exclusively. There came now an outward law of the Church to modify the New Testament, and it controlled the ethical consciousness of Christendom until the Reformation.

(a.) Ethical materials are found in the apostolical fathers, who base ethics on individual personality, on marriage, the family, etc. The most effective of the earlier writers was Tertullian (220). His ethical writings were very numerous, such as concerning spectacles, concerning the resting of virginum, monogamiae, reviviscit, patience, etc. His idea of Christianity was that it was of the first and the least power, separated from all the heathen customs of the Old World, and resolved to bring upon that world the judgment of Heaven. Cyriacus, with his high claim for the episcopate, exercised great influence on the ethical sphere of the Church. He concentrated the truth of the Church in the episcopacy, in which he saw the vehicle of the Holy Ghost, and the instrument by which unity and the holy spirit should be assured to the Church forever. He carried this idea of the dignity of the episcopate, and the sanctity and sanctifying power of orders, to a ridiculous extent. His doctrine of the efficacy of orders and the dignity of bishops was set over against certain sects — not Montanists, Donatists — who held that the holiness and unity of the Church demanded that none but holy persons should be members. Augustine fell heir to this controversy. As the Church grew into an earthly kingdom, her ethics took more and more the direction of a so-called higher wisdom. Luther forms a most vigorous, poverty, conventional life, and self-imposed torture.

Asceticism not only formed a part of the Church life, it became also the centre from which the Christian life was forced to receive rule and law. It determined what was sin, and what was right and good; it dictated to councils; and, getting control of the state, it dispensed at will its spiritual and temporal awards; penitential books in great numbers were compiled, and, bad as the system was in itself, it became a powerful instrument in bringing to order the various heathen churches. For the books of the Corpus Iustinianum, see Herzog's Real-Encyklop. iv, 194, where the relation of asceticism to mysticism is well presented, and it is shown that all these terrible struggles had their root in the consciousness of the infinite demerit of sin, and found their happy solution in Luther's doctrine of faith.

The Reformation not only conquered the prevailing errors by leading men back to the holy Scriptures, but it established positively the real principle of Christian ethics. It did this through justifying faith, which, working by love, creates the possibility of Christian ethics; by the springing from faith, is the fulfilling of the law. It is ethics in the soul, ready to take shape in noble action. This, working in the community inwardly, proceeds to mould all relations, private and public — marriage, family, church, state, science, art, and culture. The great reformers did not write complete ethical tracts, though they discussed many ethical subjects, such as prayer, oaths, marriage, etc.; but they especially discussed ethics in their explanations of the Decalogue, in the Catechism. Indeed, the original form of Christian ethics is in the Catechism of the Council of Trent (1563). See Paul of Emin, Ethica, lib. i. Thomae Vactarius, De Virtute Christiana, lib. iii. comp. Schwartz, Thomas Venatorius, and the beginnings of Protestant ethics, in connection with the doctrine of justification, Stud. u. Krit. (1850), heft. 1. See also Melanchthon, in his Philosophia Hioralis (1589), his Enarratio aliqua libros Aristoteli (1545), and his Physical. Add to these Keckermann, Systema Theologiae (1614); Weigel, Johann Arnhold, Valentin Andreae, Spenzer, Nitzsch, Henry Müller, Schriver, and others, all mystics. The Reformed have also done something in this line, especially G. Voetius, C. Vittingius, H. Witsius, Ameius, Amalarius (Morale Christiann, 1669).

Three men, according to J. A. Dornier (in Herzog's Real-Encyklop. iv, 194), form the transition stage to the emancipation of philosophy — Hugio Grotius (De juris pacis et bello), Puffendorff, with his school, and Christian Thomasius. Then come Wolf, Moerbeke, with his Moralvm, vol. 1. Steinhart, B. Klopstock, Ch. Aug. Crusius, and J. F. Reuss (Elementa theologica Moralia, 1767). Even the Roman Catholic Church of the last two centuries has felt the influence of the modern
philosophy; the following Romanist writers are Wolf-
lions: Lubii, Schwarzthuber, Schanzia, and Stadler; and
the following are Kantians: Wanker, Mutschelle,
Hermes, with his disciples Braun, Elvenich, and Vog-
gelsang; in his Schellingian, independent, and,
at the same time, mild and evangelical, pious and
rich in thought, are Michael Sailer and Hirscher.
Geissbühler is a Fichtian.
Kant's "practical reason," the metaphysics of eth-
ics; as in the display of the most impor-
tant place, and, notwithstanding certain defects, it
has the immortal honor to have discovered that the
certainty of all things is the conscience in its rela-
tion to the practical reason, and to have made an end of the
ecumenism of ethics by means of the majesty of the
law of moral, which he combines with the glory of
the stary heavens. To his "categorical impera-
tive" certain rationalistic Kantians adhere; for exam-
Some of the supernaturalists, as Staudin and Tief-
trunk, Ammon and Vogel, incline to Jacob's philoso-
phy. See also Richter, System der Moral (1797). To
the Jacob-Febrius school belong De Weite (Chris-
tliche Stütehre, 4 bde. 1819-23), Kähler, and Baumgarten-
Crusius. To the school of Hegel belong Michelet
(System der Philosoph. Moral, Berlin, 1828), L. V. Hen-
ning (Jüngere Geschichte der moral. Ethik, 2 bde.
Tafel, Von der mensch. Freiheit im Verhältnis zu Sünde und Gnade, 1843); Marheineke (Chris-
tliche Moral, 1847), Daub (Christliche Moral, 1840).
Of this school, yet more under the influence of Schleiermacher,
are Martensen (System. Moral Philos. 1841), Wirth (Sys-
tral. Ethik, 1841); H. Herer (System. Stütehre, nach den
Grundzuständen des Protestantismus, etc., 1841).
The activity of Schleiermacher in Christian ethics,
as in other departments of theology, was immense.
From 1819 he published his treatises on "the idea of
virtue," the "idea of duty," and on "the relation
between the moral law, which he combines with the glory of
the stary heavens. On this point of view may be "allowed" and the "chief
good." His system was not further published by him-
sell, but after his death A. Schweizer edited his Philos.
Ethik in 1855, and Jonas his Christ. Sitt in 1845. See
also Sarrottius, Heil. Liebe, Harless, Chrisitliche Ethik,
and especially Richter, System der Ethik (2d edit. 1867).
To the school (translated by Morrison, Clark's Library, Ed-
inburgh, 1868, 8vo) seeks to combine Hegel's stand-
point of objective knowledge with Schleiermacher's
fine moral tact and organizing power, and to excel them
both. The leading representative of this school
is E. Rüttkenick's Christ. Stütehre (1845); Gelzer, Die Rel-
tion im Leben, etc. (1854); Schwarz, Eun. Cruc. Ethik
(1886, 3d ed.); Wendt, Kirchliche Ethik v. Standpunkt
v. Christ. Freiheit (2 vols. 8vo, Leipzig 1864-65); Cal-
man, D. Christliche Ethik (Stuttgart, 1884-85, 2 vols.
8vo). This sketch of the history of ethics is chiefly
condensed from Donner's article (Ethik) in Herzog,
Real-Encyclop. iv, 165 sq. (B. H. N.)

Appendix.—It is proper to add to the above a brief
account of the history of ethics, or moral philosophy,
in England. A survey of this field will be found in
Mackintosh, General View of the Progress of Ethical
Philosophy (Encyc. Britannica, Prelim. Diss.), sepa-
rately printed in his Miscellaneous Works (Lond. 1851,
12mo), and in a separate volume (Phila., 1882, 8vo); also
in Whewell, Leaonard's Philos. of Science, and the
Dictionary of Science, Literature, and Art, i, 821 sq. (Lond. 1865, 3
vols. 8vo). From this and other sources we con-
dense the following sketch:

The modern ethical theories may be classed as
selfish or disinterested, according as they found their
value on a selfish or a benevolent principle. The
selfish theory is advocated by Hobbes († 1679), who
makes self-love the exclusive passion, and consid-
erns pleasure the only motive to action (see his Hu-
man Nature, his Leviathan, and our article HOBBS).
The same theory is adopted in substance by Jeremy
Bentham († 1832), who assumes Hobbes's principle as
self-evident, that every object is indifferent for its
fitness to produce pleasure or pain, which he de-
clares are the sole motives to action. "Bentham is
the most distinguished proponent of the principle of
utility as the basis of morals, a principle explained by
him as 'sympathy and antipathy,' by which he meant to
describe all those systems, such as the moral-sense the-
ory, that are grounded in internal feeling, instead of a
regard to outward consequences. In opposing utility to
asceticism, he intended to imply that there was no
merit attaching to self-denial as such, and that the in-
duction of pain or the surrender of pleasure could only
be justified by the means of procuring a greater
amount of happiness than was lost" (Chambers, s. v.).
See Bentham, Treatise on Morals and Legislation; and
our article BENTHAM, JEREMY.
Locke († 1704) de-
nied the existence of an innate faculty for perceiving
moral distinctions. In his Essay on the Human Under-
standing (bk. i, ch. iii), he maintains that virtue is
approved of, not because it is innate, but because it is
profitable. Paley († 1805) also rejected the doctrine
of a moral sense, and held, in substance, the utilita-
narian theory that "virtue is a quality of mankind
subject to mankind, in obedience to the will of God, and for
the sake of everlasting happiness" (Moral and Politi-
ical Philosophy). The utilitarian theory is taught by
all the recent English writers of the materialistic
school; see Mill, An Essay on the Human Mind (Lon-
d. 1829; see Mill, JAMES; Austin, Province of Jurisprudence
understood (2d ed. London, 1861); John Stuart Mill, Dissertations and
Discussions (1859); and his Utilitarianism, reprinted from Fraser's Magazine
(1862; 2d ed. 1864); Bain, The Emotions and the Will
(Lond. 1885); and especially Mill, Analysis of the Human Mind
also his Mental and Moral Science (Lon. 1866, 8vo),
where he teaches that conscience is solely the product
of education. See also, in reply to these writers, The
North British Review, September, 1867, art. 1; The
British Quarterly, January, 1869, art. vi.

Opposed to the utilitarian and the teleological there are two
theories, which may be called the instinctive and the rais-
ional. The former refers the moral principle to the
sensitive or emotive part of man's nature; the latter,
to the perception of moral good and evil by the intellec-
tual. The subject will be considered in its original
aspect under the head of the "Theory of the Moral Sentiments" (Glasgow,
1758; London, 1790, and often) refers the moral sense to
sympathy. His view is thus stated by Mackintosh
(Ethical Philosophy, Philadelphia, 1832, p. 149): "That
mankind are so constituted as to sympathize with
each other's feelings, and to feel pleasure in the ac-
cordance of these feelings, are the only facts required
by Dr. Smith, and they certainly must be granted to
him. To adopt the feelings of another is to approve
them. When the sentiments of another are such as
would be excited in us by the same objects, we
approve them as the only proper way to obtain this
result, it becomes necessary for him who enjoys or suffers to
lower his expression of feeling to the point to which
the by-stander can raise his fellow-feelings, on which
are found all the high virtues of self-denial and self-
command; and the by-stander is always to be neces-
sarier to raise his sympathy as near as he can to the level
of the original feeling. In all unsocial passions, such
as anger, we have a divided sympathy between him who
feels them and those who are the objects of them.
Hence the propriety of extremely moderating them.
Pure malignity, it is to be conceived, is never bene-
because all sympathy is arrayed against it. In
the private passions, where there is only a simple sympathy,
—that with the original passion—the expression has
more liberty. The benevolent affections, where there

Digitized by Google
is a double sympathy— with those who feel them and those who are their objects—are the most agreeable, and may be indulged with the least apprehension of finding sources of regret. It is with the gratitude of those who are benefitted by good actions prompts us to consider them as deserving of reward, and forms the sense of merit; as fellow-feeling with the resentment of those who are injured by crimes leads us to look on them as worthy of punishment, and constitutes the sense of guilt. These are apparently not only beneficial actions, but benevolent motives for them; being compounded, in the case of merit, of a direct sympathy with the good disposition of the benefactor, and an indirect sympathy with the person benefitted. These are the most opposite of all the sympathies. He who does an act of wrong to another to gratify his own passions must not expect that the spectators, who have none of his undue partiality to his own interest, will enter into his feelings. In such a case he knows that they will pity the person wronged, and be full of indignation against him. When he is cooled, he adopts the sentiments of others on his own crime, feels shame at the impropriety of his former passion, pity for those who have suffered by him, and a dread of punishment from general and just resentment. Such are the constituent parts of remorse. Our own self-interest is the all-important thing; else few of us would bear with those others feel concerning us. We feel a self-approbation whenever we believe that the general feeling of mankind coincides with that state of mind in which we ourselves were at a given time. We therefore use the sympathies of our own behavior, and endeavor to imagine whatever act would in this light produce in us. We must view our own conduct with the eyes of others before we can judge it. The sense of duty arises from putting ourselves in the place of others, and adopting their sentiments respecting our own conduct. In utter solitude there could have been no self-approbation. The rules of morality are a summary of those sentiments, and often beneficially stand in their stead when the self-delusion of passion would otherwise hide from us the unconformity of our state of mind with that which, in the circumstances, is the duty of the private person to hate is to be miserable; that affection is its own reward, and ill-will its own punishment; or, as it has been more simply and more affectingly, as with more serenely of authority, taught, that to give is more blessed than to receive, and that to love one another is the true idea of friendship. Bishop Butler († 1729) sets forth his moral doctrine in his Sermons (often reprinted), which have been recently published as a text-book by the Rev. J. C. McLennan. Butler was a great student of courses (Philadelphia, 1855, 12mo). He is undoubtedly the greatest of modern English writers on the true nature of ethics. "Mankind," he says, "have various principles of action, some leading directly to the private good, some immediately to the good of the community. But the private good is not self-love, or any form of it; for self-love is the desire of a man's own happiness, whereas the object of an appetite or passion is some outward thing. Self-love seeks things as means of happiness; the private appetites seek things, not as means, but as ends. A man eats fish for hunger, and not for appetite. If he believes, though he knows that these acts are necessary to life, that knowledge is not the motive of his conduct. No gratification can indeed be imagined without a previous desire. If all the particular desires did not exist independently, self-love would have no object to employ itself about, for there would be no happiness, which, by the very supposition of the opponents, is made up of the gratification of various desires. No pursuit could be selfish or interested if there were not satisfactions first gained by appetites which seek their own outward objects without regard to self, which satisfactions compose the mass which is called a man's interest. In contending, therefore, that the benevolent affections are disinterested, no more is claimed for them than must be granted to mere animal appetites and to malvolent passions. Each of these principles appeals to any thing for the gratification of gratifying its pleasure. This is the attainment, but no separate part of the aim of the agent. The desire that another person may be gratified seeks that outward object alone, according to the general course of human desire. Resentment is as disinterested as gratification or joy, but not more so. But the disinterested may be, as much as the purest benevolence, at variance with self-love. A regard to our own general happiness is not a vice, but in itself an excellent quality. It were well if it prevailed more generally over crav-
From this he argues that moral good must be perceived by a sense, because the senses alone are perceptive of simple qualities (see his Inquiry into the Original of our Ideas of Beauty and Virtue, Glasgow, 1725, and often). Hume (Inquiry concerning the Principles of Morals) asserts, indeed, that general utility constitutes a universal ground of moral dispositions and of all judgments of the utility of actions. But he asserts also that we approve of good and disapprove of evil in virtue of a primary sentiment of our nature (distinct from self-love), which he calls benevolence or humanity, but which is identical with conscience, or the moral sentiment. As to the idea of moral obligation, he makes it simply a judgment of the understanding that happiness flows from obedience to the moral faculty rather than from obedience to self-love. For the doctrines of Mackintosh, we must refer our readers to his admirable treatise (which often cited in this article) of the History of Ethical Philosophy.

Of the so-called Rational school, the distinctive characteristic is that it considers the idea of good to be an a priori conception of reason, in which the idea of obligation is necessarily and essentially implied. As to the nature of the idea, several different opinions have been held, viz. 1. that it is simple and immediate; 2. that it derives its explanation and authority from some higher notion of the intellect. The most distinguished representatives of the latter opinion are Clarke and Wollaston, while the former has found able advocates in Cudworth, Clarke, and Stuart, or col. (Blackburn). Dr. M'Cosh (American Presby. Review, Jan. 1868, art. i.) classes the modern views on ethics in Great Britain into the two schools of Sensational and Rational (or à priori), "corresponding to the two schools of philosophy which have divided Europe since Descartes and Locke." Under the head of the former school he includes Cudworth, Clarke, Coleridge, Reid, Stewart, and Sir W. Hamilton; "none of them, however, except Coleridge, taking up so high an à priori ground as Descartes and Cousin in France, or Kant and Hegel in Germany." The Protestants of England, in the main, at this time, according to the same writer, do not agree with those Roman Catholic writers who deny an independent morality apart from the authority of the Church; while, on the other hand, they do not agree with the philosophers who assert not only the indepen- dence of morality, but also its sufficiency, and hence, its self-sufficiency and autonomy. (See the article cited for a view of the relations of the modern sensational doctrine to theology and religion.)

Among American writers, Jonathan Edwards (1716) is first to be named in this field. In his Dissertation concerning the Unity of the Ground of Conscience, he could not avoid discovering that the being who possessed the highest moral qualities is the object of the highest moral affections. He contemplates the Deity through the moral nature of man. In the case of a being who is to be perfectly loved, 'goodness must be the simple actuating principle within him, this being the moral quality which is the immediate object of love.' The highest, the adequate object of this affection, is perfect goodness, which, therefore, we are to love with all our heart, with all our soul, and with all our strength.' (Edwards.) 'We should refer ourselves implicitly to him, and cast ourselves entirely upon him. The whole attention of life should be to obey his commands' (Sermon xii. On the Love of God). Moral distinctions are thus presupposed before a step can be made towards religion: virtue leads to piety; God is to be loved, and to love God is to love; and it is only after the mind rises through human morality to divine perfection that all the virtues and duties are seen to hang from the throne of God' (Mackintosh, History of Ethical Philosophy, 110 sq.).

To the same school belong Hutchison (+ 1747), who taught that moral good is simply what the word itself expresses, which is not explicable by any other phrase.
by American writers, such as those of Adams, Way-land, Alexander, Haven, Alden, Hopkins, etc., for further mention of which we have not space. Hickok (System of Moral Science, 1853, 8vo) treats the subject from the a priori point of view, and also in its relations to Christian theology, in a very masterly manner. Dr. Adams, in an essay of its own. The voice of conscience is imperative. 'There is an awful sanctuaty in every immortal spirit, and man needs nothing more than to exclude all else, and stand alone before himself, to be made conscious of an authority he cannot desist nor delude. From its ascendancy springs the destiny of itself; its destiny of self; for its destination comes self-contempt. A stern behest is ever upon him that he do nothing to degrade the real dignity of his spiritual being. He is a law to himself, and has both the judge and executioner within himself, and inseparable from him. 'We may call this the imperative of the reason, the constraint of conscience, or the voice of God within him; but, by whatever terms expressed, the real meaning will be that every man has consciously the bond upon him to do that, and that only, which is due to his spiritual excellency.' To be thus worthy of spiritual approbation is the end of all spiritual discipline. The article, 'Moral Science,' may be worthily be given and righteously taken, but not righteously paid as price or claimed as wages. The good is to be worthy, not that he is to get something for it. The highest good — the sumnum bonum — is worthiness of spiritual approbation" (Moral Science, p. 48-49).

Christian ethics, as distinguished from moral philosophy in general, has not received the same attention from English and American writers as from German. The earlier books on Causality (q. v.) and Cases of Conscience, however, belong under this head. Most of the standard English and American writers coming into philosophical morals with Christian ethics. Butler brings out with clearness the relations of ethics to the Christian religion. Wardlaw's Christian Ethics (5d ed. Lond. 1887, Boston; 5th ed. Lond. 1882) asserts that the science of moral science has no province at all independently of theology, and that it cannot be philosophically discussed except upon theological principles (Boston ed. p. 867, note). Watson (Theod. Inst., pt. iii) treats of Christian ethics under the title 'The Morals of Christianity;' and denies the prior method (see Cocker, in Meth. Quart. Jan. 1861). Spalding (Phil. of Christian Morals, Lond. 1848, 8vo) has "recount both to science as derived from an examination of man's moral nature, and to revelation as derived from an examination of the Scriptures." The whole index Roman Catholic writers have generally confined themselves to the so-called Moral Theology (q. v.). The Cartesian school [see DES CARTES] cultivated Ethics in the new philosophical spirit; its best representative was Malebranche. Virtue is defined to be the love of universal order, as it existed in the divine reason, where every created reason contemplates it. Particular duties are but the applications of this love. He abandoned the ancient classification of four cardinal virtues, and for it substituted the modern distinction of duties toward God, men, and ourselves. The French school of Sensualism, of which Condillac was the head [see CONDILLAC], regarded all intellectual operations, even judgment and volition, as transformed sensations; and Helvetius, applying the theory to morals, held that self-love is the exclusive motive of man, denied all interested motives, made pleasure the only good, and referred to legislative rewards and punishments as illustrating the whole system of individual action. La Mettrie maintained an atheistic Epicureanism, and Condorcet wished to substitute an empirical classification of the sciences for the metaphysical religion and morality. The most complete and logical elaboration of the materialism, atheism, and fatalism of the period, which had pleasure for its single aim and law, was given in D'Holbach's Systeme de la nature. Of the later French writers, Jouffroy is perhaps the most important. He gave a peculiar explanation of good and evil. Everything is good in proportion as it aids in the fulfilment of our destiny. The problem of human destiny, therefore, lies at the foundation of all. There is a prior judgment as to the moral quality of actions, since that is relative to the agent, depending on the influence they may have on the destiny for which he was created. Good, in the case of any particular being, is the fulfillment of its own specific destiny. The destiny of each individual is the sum total of all beings; and an interruption in the accomplishment of destiny constitutes evil. His system of Ethics is chiefly laid down in his Cours du Droit naturel (2 vols., Paris, 1835; a third vol. was edited after his death by Damiron, 1842), his most eloquent work, which, besides ethics, treats of psychology and theology. Some points are more fully developed in a series of essays, which first appeared in periodicals, and of which subsequently two collections (Melanges philosophiques and Nouveaux melanges philosophiques) were published.

See, besides the authors named in the course of this article, the articles, 'Moral Science,' 'Ethics," in the introduction to St. Hilare's translation of Aristotelian's Politics (Politique d'Aristote, Paris); Meiners, Alma. Krit. Geschichte d. übrigen u. neueren Ethik (Göttingen, 1801, 2 vols.); Hagenbach, Encyclopa. d. Methodik u. Geschichte d. christl. Ethik (Gotha, 1846-52); Baume, Morale (Paris, 1842, 2 vols.); Damiron, Cours de Philosophie, vols. iii and iv (Paris, 1842); Jouffroy, Introd. to Ethics, trans. by Channing (Boston, 1840, 2 vols. 8vo); Janet, Hist. des idees morales et politiques (Paris, 1856); Neander, Vorlesungen d. Geschichte d. christl. Ethik (Berlin, 1855, 8vo); Neander, Relation of Grecian to Christian Ethics; Christ. Exem. xix, 135; xxx, 145; Bibl. Ethiopia (1 Esdr. iii. 2; Est. xiii. 1, xvi. 1; Judith i. 10; Acts viii. 27; the Hebrew מְשּׁל, קָעֵשׁ, i. e. Cush, as it is generally rendered, Gen. ii. 13; 2 Kings xiv. 9, 13; xxvii. 20; xxviii. 13, 14; xxxv..Fixed: Isaiah liii. 4; Jer. viii. 1; xx, 3, 5; xxxvii, 9; xliv. 14; Ezek. xxx, 4, 5; xxxviii, 5; Nah. iii. 9), a country which, as thus designated by the ancients, lay to the south of Egypt, and embraced, in its most extend- ed sense, the modern Nubia, Sennar, Kordofan, and northern Abyssinia, and in its more definite sense the kingdom of Meroë, from the junction of the Blue and White branches of the Nile to the border of Egypt. In one passage in the description of the garden of Eden, an Asiatic Cush or Ethiopia must be intended (Gen. ii. 13), and the distribution of the descendents of Cush, with later Biblical historical indications, should be compared with the classical mentions of eastern and western Ethiopians, and other indications of profane history. In all other passages, the words Ethiopia and the Ethiopians, with one possible exception, "are to be understood as the same as near the Ethiopians" (2 Chron. xxvi, 16), which may refer to Arabs opposite to Ethiopia, may be safely considered to mean an African country and people or peoples. In the Bible, as in classical geography, but one limit of Ethiopia is laid down, its northern boundary, just south of the most southern town of Egypt. Egypt is spoken of as to be desolate 'from Migdol to Syene, even unto the
The inhabitants of Ethiopia were a Hamitic race (Gen. x. 6, and are described in the Bible as a dark-complexioned (Jer. xii, 23) and stalwart race (Isa. xiv, 9, 14: "men of stature, tall," and "men of stature, very tall"). Some substitute "tall"). Their stature is noticed by Herodotus (iii, 20, 114) as well as their handsomeness. Not improbably the latter quality is intended by the term in Isa. xviii, 2, which in the A.V. is rendered "peeled," but which may mean "fine-looking." Their appearance is described by the latter as "wearing the blue and royal houses (Jer. xxxiii, 7). The Ethiopians are on one occasion coupled with the Arabsians, as occupying the opposite shores of the Red Sea (2 Chron. xxxi, 16); but elsewhere they are connected with African nations, particularly Egypt (Isa. xviii, 31: Isa. xxv, 8, 9; Jer. xlv. 1, 2; Jer. xxxi, 8, 9; Jer. xlv. 13-14, Phut (Jer. xlvi. 10). And Lud (Ezek. xxxiii, 5), and the Sukkilm (2 Chron. xii, 9). They were divided into various tribes, of which the Sabians were the most powerful. See SEDRA; SUDAN.

The name Cush is found in the Egyptian kish, which is evidently applied to the same territory, though we have the same difficulty in determining its limits, save on the north. The classical Ethiopia (Aithiopia) may have the same origin, through the Coptic egypt, of which, unless it be derived from kish, "a dark and shining form," the Egyptian kish may have been a corruption and connect the classical with the ancient Egyptian name. The Greeks themselves regarded it as expressive of a dark complexion (from αἰθήρα, "to burn," and ἄφρα, "a countenance"). In the Bible there is no certain notice of any Ethiopian race but Cushites.

According to Strabo, the whole of that land above Egypt was TA-HERU-FET, or TA-KENS, corresponding to Nubia, and extending, under the Pharaohs, at least as far south as Napata. Dr. Brugsch supposes that TA-KENS was, in the earlier times, the whole tract south of Syene under Egyptian rule [therefore governed by the Nile, and, as it were, the Nile itself, being included in that country], and, in the later times, little more than the Dodecaschoson of the Potemies and Romans, the remains of the older territory (Geographische Inscriften, i, 100). As a name, Nubia, before the formation of the Ombye Nome, included Omoos, Silsils being probably the first city of the Egyptian Apollonopolitoe Nome. Although it is not impossible that at Silsils was anciently the great natural barrier of Egypt on the south, we think that this extension of Nubia was simply for purposes of government, as Dr. Brugsch supposes it. The identification of the names of the Nubia of the Pharaohs he places a region of which the name perhaps reads PET-NKI? NUPRE, which, however, was probably a district of the former country. Still further, and near Meroc, he puts the land of kish, and in and about Meroc the land of the NEHEH or negroes. Others, however, think that KISH commenced immediately above Egypt, probably always at the First Cataract, and included all the known country south of Egypt, TA-MERU-FET or TA-KENS, save as a name, being a part of it, the modern Nubia. Names of conquered negro nations, tribes, or countries occur on the monuments of the empire: of these, the most suggestive are the BARRHATA and TANKHER (see Brugsch, Geogr. Inscriften, i, 100-107, 150-154; ii, 4, 13, 20; iii, 3, 4, and indices s. v. 'Ethiopien, Res., etc.).

Ethiopia comprises two very different tracts. North of the region of the tropical rains, it is generally an extremely narrow strip of cultivated land, sometimes but a few yards wide, on both sides, or occasionally on one side only, of the Nile. Anciently the watered tract was much broader, but the giving way of a barrier at Silsils (Isael es-Silsileh) or Syene (Aswan) has lowered the level of the river for some distance above the First Cataract; exactly how far cannot be accurately determined, but certainly for the whole space below the Third Cataract. The cultivable soil which was
ethiopia

anciently productive is far above the highest level of the stream. The valley is, however, never broad, the mountains seldom leaving a space of more than a mile within the greater part of the region north of the limit of tropical rains. The aspect of the country is little varied. On either side of the river, here narrower than in its undulating course in Upper Egypt, rise sterile sandstone and limestone mountains, the former sometimes covered by yellow sand-drifts. At the First Cataract, at Kalabšheh, and at the Second Cataract, the river is obstructed, though at the second place not enough to form a rapid, by red granite and other graves, which especially are, the most beautiful objects in the scene, but its general want of variety is often relieved by the splendid remains of Egyptian and Ethiopian civilization, and the clearness of the air throws a peculiar beauty over everything that the traveller beholds. As he ascends the river, the scenery, after a time, becomes more varied, until on the east he reaches the Abyssinian highlands, on the west the long meadows, the pasture-lands of herds of elephants, through which flows the broad and sluggish White Nile. In this upper region the climate is far less healthy than below, save in Abyanis, which, from its height, is drained, and enjoys an air which is rare and free from exhalations. The country is thus for the most part montaneous, the ranges gradually increasing in altitude towards the S., until they attain an elevation of about 8000 feet in Abyanis.

The Nile is the great fertiliser of the northern regions of Ethiopia, which depend wholly upon its yearly inundation. It is only towards the junction of the two great streams that the rains take an increasingly important share in the watering of the cultivable land. In about N. lat. 12° 40', the great river receives its first tributary, the Atobaras, now called the Athabah. In about N. lat. 15° 40' is the confluence of the Blue and White Niles. The Blue Nile, which has its source in Abyanis, is a narrow, rapid stream, with high, steep mud-banks, like the Nile in Egypt; it is strongly charged with alluvial soil, to which it owes its dark color which has given it its distinctive name. From this stream the country below derives the annual alluvial deposits. The White Nile is a colorless river, very broad and shallow, creeping slowly through meadows and wide marsh-lands. Of the cultivation and natural products of Ethiopia little need be said, as they do not illustrate the few notices of it in Scripture. It has always been, excepting the northern part, productive, and rich in animal life. Its wild animals have gradually been reduced, yet still the hippopotamus, the crocodile and the ostrich abound, though the country is only second alone is found throughout its extent. The elephant and lion are only known in its southernmost part.

In the Bible a Cushite appears undoubtedly to be equivalent to a negro, from this passage, "Can the Ethiopian change his skin, or the leopard his stripes? (Jer. xiii., 23); and it is to be observed, that wherever the race of Kish is represented on the Egyptian monuments by a single individual, the type is that of the true negro (Wilkinson, Anc. Egypt. i. 404, abridgment). It is therefore probable that the negro race extensively intermingled to the north than present, the whole country watered by the Nile, as far as is known, being now people by a middle intermediate between the negro race and the Caucasian. There is no certain mention in the Bible of this intermediate race in Ethiopia, but the Egyptian and Ethiopian monuments sufficiently show the indications of its ancestry, though probably it did not then extend as far south as now. At the present day, Ethiopia is inhabited by a great variety of tribes of this race: the Kuniz, said to be of Arab origin, nearest to Egypt, are very dark; the Nubes, the next nation, much lighter; beyond them are some fair Abyssinian, Bycaisan Abyssinians, with scarcely any trace of negro influence save in their dark color, and tribes as black as the true negro, or nearly so, though not of the pure negro type. The languages of Ethiopia are as various as the tribes, and appear to be the same intermediate between the Hamitic and the Nigritian, if we except the Ethiopian, which belongs to the former family. See ETHIOPIAN LANGUAGE.

In all that relates to the civilization of ancient Ethiopia we see the same connection with Egypt that is constantly shown in the Bible. So much is the Ethiopian away extended, which was probably, under the empire, as far as somewhat above the junction of the two Niles, the religion of Egypt was probably practised. While the tract was under Egyptian rule this was certainly the case, as the drains of the temples sufficiently shows. We do not know how far the Tirhakah in his Ethiopian as well as his Egyptian sculptures, and this is also the case with the later kings of Ethiopia who held no sway in Egypt. There were evidently local differences, but apparently nothing more. Respecting the laws and forms of government the same may be supposed. We have very little evidence as to the military matters of the Ethiopians, yet, from their importance to Egypt, there can be little doubt that they were skilful soldiers. Their armies were probably drawn from the Egyptian or intermediate race, not from the negro. Of the domestic life of this race we have but slight hints. Probably they were more civilized than are their modern successors. Their art, as seen in the sculptures of their kings in Ethiopian temples from Tirhakah downwards, is merely a copy of that of Egypt, showing, after the manner developed by their conquerors, first, an art in style inferior to the counter part of the original art. Their character can scarcely be determined from scanty statements, applying, it may be, to extremely different tribes. In one particular all accounts agree: they were warlike, as, for instance, we equally see in the defiance the Ethiopian king sent to Casmymes (Hered. iii. 21), and in the characteristic inscription of Kalabšheh of Silco, "king (毵敢w) of the Nubades and all the Ethiopians" (Modern Egypt and Tibeis, ii. 311, 312), who is to be regarded as a very late Ethiopian king or chief in the time of the Roman empire. The ancients, from Homer downwards, dace it them than as a happy and pious race. In the Bible they are spoken of as "secure" or "careless" (2 Esd. xxi. 9), but this may merely refer to their state when danger was impending. From the modern inhabitants of Ethiopia give us a far better picture of their predecessors than we can gather from the few notices in which we have alluded. If we compare the Nubians with the representations of the ancient Egyptians on the monuments, we are struck by a similarity of type, the same manner of wearing the hair, and a like scantiness of clothing. There can be
no question that the Nubians are mainly descended from an Egyptianized Ethiopian people of two thou-
sand years ago, who were very nearly related to the Egyptians. The same may be said of many tribes
further to the south, although sometimes we find the Arab manner and language in the time of
the Ethiopian monuments show us a people like the ancient Egyptians and the modern Nubians. The northern
Nubians are a simple people, with some of the vices, but most of the virtues of savages. The chastity
of their women is celebrated, and they are noted for their excellence. But they have a hard, restless,
and cruel, and lack the generous qualities of the Arabs. Further south manners are corrupt, and the national
character is that of Egypt without its humanity, and untouched by any but the rudest civilization.

In speaking of the history of the country, we may include what is known of its chronology, since this is
no more than the order in which kings reigned. Un-
til the time of the 12th dynasty of Egypt we have
neither chronology nor history of Ethiopia. We can
only speculate upon the earlier conditions of the coun-
try which we would soon reach if we were to follow
the Bible connections. The first spread of the descendents of Cush seems to be
indicated by the order in which the Cushite tribes, families,
or heads are enumerated in Gen. x. All the names, excepting Nimrod, might be thought to indi-
cate a colonization of Southern and Eastern Arabia, with a relation to Cush, or that of Cush (Sheba,
though elsewhere mentioned with Sheba (Psa. Lxxvii, 10), is connected with Ethiopia, and is probably the
Hebrew name of the chief Ethiopian kingdom from the
time of Solomon downwards. (Josephus calls
Meroe Saba, Ant. ii. 10, 2, and Seba of Cush he calls
Saba, lib. xvi. 1.) But these, it would be remark-
able that Nimrod is mentioned at the end of the
list and Seba at the beginning, while the intervening
names, mostly if not all, are Arabian. This distribu-
tion may account for the strongly-Caucasian type of the
Abyssinians, and the greater indication of Nigrarian influence in all the other Ethiopian races; for a curve
drawn from Nimrod's first kingdom—there can, we
think, be little doubt that the meaning in Genesis is,
that he went northward and founded Nineveh—and
and extending along the South Arabian coast, if carried
in that direction, would form the Abyssinian Empire.
Continu-
Eon of Southern Arabia and Abyssinia has been so strong
for about two thousand years that we must ad
mit the reasonableness of this theory of their ancient
colonization by kindred tribes. The curious question of the direction from which Egyptian civilization came
cannot be said to be solved. It is likely that they have descended the Nile, as was, until lately, sup-
pported by many critics, in accordance with statements of
the Greek writers. The idea or tradition on which these
writers probably build may be due to the Nigrarian
origin of the low nature-worship of the old Egyptian
religion, and perhaps, as far as it is picture-writing, of
some hieroglyphic system, of which the characters are
sometimes called Ethiopic letters by ancient writers.

The history of Ethiopia is closely interwoven with
that of Egypt. The two countries were not unfre-
quently in contact, and the history of Egypt is the
story of the foreign capital, Napata; and again we find the
kingdom of the Nubians was established by a
supremacy over Ethiopia, and erecting numerous
temples, the ruins of which still exist at Semna, Amada,
Soleb, Abuessimel, and Jebel Berkel. The tradition of the
successful expedition of Moses against the Ethio-
pians, recorded by Josephus (Ant. ii. 10), was doubtless
found on the edges of the future king of Egypt, the
mother of the kings and the Cushites. Under the
12th dynasty we find the first materials
for a history of Ethiopia. In these days Nubia seems
to have been thoroughly Egyptianized as far as be-

beyond the Second Cataract, but we have no indication of
the existence at that time in Ethiopia of any race but
the Egyptian. We find an alliance to the negroes
to Egypt in the 12th dynasty, and in the name of a king of that period, which reads Ra-
Nebh, or "the Sun of the Negroes," rather than
"the Negro Sun?" (Tertul. Papyrus of Kings, ap. Lepi-
sus Königbuch, pl. xviii, 397; xix, 278). The word
Nebh is the constant designation of the negro race in
hieroglyphic and cursive writing.

Before passing to the beginning of the 18th dynas-

ty, when the Egyptian empire definitely commenced
[see Egypt], we may notice two possible references to the
Ethiopians in connection with the Exodus, an
event which probably occurred at an early period
of that empire. In Isa. xxxii, though relating to the
future, also speaks of the past, and especially men-
tions or alludes to the passage of the Red Sea (see par-
picularly ver. 16, 17), Ethiopia is thus apparently
connected with the Exodus: "I gave Egypt [for] thy
ransom, Ethiopia and Seba for thee." It can
scarcely be supposed that this is an emphatic rel
phasis of the future events, and it is difficult to connect it
with any other known past event, as the conquest of Egypt
by Sennacherib, which may have already occurred.
If this passage refer to the Exodus, it would seem
to favor the idea that the Israelites were driven out of Egypt,
empire, for then Ethiopia was ruled by Egypt, and
and would have been injured by the calamities that befell
that country. In Amos there is a passage that may
possibly connect the Ethiopians with the Exodus:
"[Are ye not as children of the Ethiopians unto me, 0
children of Israel? saith the Lord. Have I not
brought up Egypt out of the land of Egypt? and the
Philistines from Caphtor, and the Syrians from Kir?"
(ix, 7). But the meaning of the passage may be that the Israelites
were no better than the idolatrous people of Cush.

At the beginning of the 18th dynasty we find the
Egyptians making expeditions into Ethiopia, no doubt
into its farther regions, and bringing back slaves. At
this time the Egyptians seem to have intermarried
with people of Ethiopia, probably of the intermediate
race, darker than the Ethiopians, but not of the negro
race of the Cushites. One of the wives of Ame
Amose. The first king of the 18th dynasty, is represented as black,
though not with negro features. A later sovereign
of the same dynasty, Amenophis III, is seen by his stat-
tues to have been partly Ethiopian, and this may have
been one cause of his identification by the Greeks with
the Pharaoh Memnon. It may be that the 18th dynasty preceded it, the 19th, we have no proof that the regu-
larly-governed Egyptian dominions extended beyond
Napata, but it is probable that they reached a little be-

between the junction of the White and Blue Niles. There
be no doubt that Ethiopia remained subject to
Egypt as late as the reign of Ramesses VI, soon after
whom the proper Egyptian empire may be said to have

closed, having lasted three centuries from the begin-
ing of the 18th dynasty. Under that empire, Ethio-
pia, or at least the civilized portion, was ruled by a gov-
ernor called the "High Steward of the Four Lands of the
Foreign," literally "Royal son," "of Cush," etc. The office
does not seem to have been hereditary at any time, nor is
it known to have been held by a son of the reigning
king, or any member of the royal family.

After the reign of Ramesses VI, the feudalism of
the later Theban kings may have taken the place of
Ethiopia, and we know that in Solomon's time there was
a kingdom of Seba. Shishak, the first king of the 22d
dynasty, probably made Ethiopia tributary. When
this king, the Sheshonk I of the monuments, invaded
the kingdom of Judah, he is said in his dynasty "the
Cushite and the Cushites" (2 Chron. xii, 13). The
Lubim are a people of Northern Africa, near
Egypt, and the Sukkim are of doubtful place. The
inductions are of an extensive dominion in Africa: for, though the Lubim and Sukkliam may have been mercenaries, it is unlikely that the Cushim were also. There can be no doubt that Shishak was a powerful king, especially as he was strong enough to invade Judah, and it is therefore probable that he restored the influence of the Egyptians in Ethiopia. See Shishak.

Zerah the Ethiopian, on account of his army being of Cushim and Lubim, and thus, as well as in consisting of chariots, horsemen, and foot, of like composition with that of Shishak (2 Chron. xvi. 8; xiv. 9, 12, 13; xii. 2, 3), seems certainly to have been either a king of this dynasty, or an Asa general of such a king. In the former case he would probably correspond to Osorkon II. The names Osorkon and Zerah seem very remote, but it must be remembered that Egyptian words transcribed in Hebrew are often much changed, and that in this case it is probable that both Egyptian and Hebrew forms, if they be two orthographical representations of one word, come from a third source. The style "Zerah the Cushite" is unlike that applied to kings of Egypt who were foreigners, or of foreign extraction, as in the cases of "So, king of Egypt," and "Shishak, king of Egypt." On this account, and especially from the form of the word, or any royal appellation, though we cannot infer positively from the few instances in Scripture, Zerah may be rather supposed to have been a general, but the army that he commanded must, from the resemblance of its composition to that of Shishak's, have been that of a king of the Cushite line. Mr. Kempe has rather too hastily remarked as in the term Cushite, that "no king of the Bulastaite [224] dynasty could have been so designated," and is at some pains to explain what he considers to be a mistake (Ancient Egypt, ii. 257 sq.). It is recorded that Asa had an army of 300,000, and that Zerah the Ethiopian came against him with 1,000,000, and 300 chariots. These high numbers have been objected to; but the history of our times shows that war upon this large scale is not alone possible to great kingdoms, but also to states of no very large population which, put forth their whole strength. It is to be noticed that Asa was evidently struck by the greatness of the hostile army, to which the prophet Hanani alludes, reproving him at a later time (2 Chron. xvi. 8). See Number. Asa encountered Zerah "in the valley of Zephathah at Mareshah," and, praying for God's aid against this huge army, he was put to the rout, and he pursued it to Gerar, and smote all the cities round Gerar, which seem to have been in alliance with the invaders, and took much spoil from the cities, and also smote the tents of cattle, from which he took a very large amount of spoils (1 Kings x. 26). This great overthrow may have been a main cause of the decline of the power of the 22d dynasty, which probably owed its importance to the successes of Shishak.

See Zerah.

During the later period of this dynasty, it is probable that Ethiopia became wholly independent. The 23d dynasty appears to have been an Egyptian line of little power. The 24th, according to Manetho, of but one king, Bocchoris the Satte, was probably contemporaneous with it. In the time of Bocchoris, Egypt was conquered by Sabaco the Ethiopian, who founded the 25th dynasty of Egyptian kings. The chronology of this period, as well as that of the former, is obscure. See Necho for the list of the chronology, with a few necessary corrections in the length of the reigns, in the following table [see Egypt].

III.—III.
tily continued in a titular or titular position, as the Sethos of Herodotus, an Egyptian king of the time of Tirhakah, appears to be the same as Zet, who, in the version of Manetho by Africanus, is the last king of the 26th dynasty, and is very near to the Ptolemies. Psammetichus I of the Saite 26th dynasty are shown by the monuments to have preceded him in the time of the Ethiopians, and probably to have continued the line of the Saite Becchoris. We think it probable that Sabaco is the "So, king of Egypt," who was the cause of the downfall of Hoshea, the last king of Israel. The Hebrew name נם, if we omit the Masonic points, is very near to the name of the Pharaohs. It was at this time that Egypt began strongly to influence the politics of the Hebrew kingdoms, and the prophecies of Hosea, denouncing an Egyptian alliance, probably refer to the reign of So or his successor; those of Isaiah, of similar purport, if his book be in chronological order, relate to the reign of Tirhakah. Tirhakah is far more fully commented on by monuments than his Sethos, against whom the Nubian sculptures, and at Jebel-Berkel, Napata, one temple and part of another. There seems to be no doubt that Sethos (Zet?) was at least titular king of part of Egypt, or the whole country, under Tirhakah, on the following evidence. In the Bible, Tirhakah is mentioned by the name of penti; for the name Cushi, he is called "king of Cush (Ethiopia)," and a Pharaoh is spoken of at the same period (1 Sam. xxxvi, 2, 3, 36; xxvi, 6; 2 Kings xviii, 21); in the Assyrian inscriptions a Pharaoh is mentioned as contemporary with Sennacherib; and the Egyptian monuments indicate that the two were royal contemporaries, that at one time Tirhakah was in the 26th dynasty. The only event of Tirhakah's reign certainly known to us is his advance against Sennacherib, apparently in fulfilment of a treaty made by Hezekiah with the Pharaoh whom we suppose to be Sethos. This expedition was rendered needless by the miraculous destruction of the Assyrian army, but it is probable that Tirhakah seized the occasion to recover some of the cities of Palestine which had before belonged to Egypt. Herodotus gives a traditional account of Sennacherib's overthrew, relating that when Egypt was ruled by Sethos, a priest-king, the country was invaded by Sennacherib, against whom he fell in a battle, who had offended the military class, marched with an army of artificers and the like, and encamped near Pelusium, where in the night a multitude of field-mice gnawed the bow-strings and shield-straps of the Assyrians, leaving thus unable to defend themselves, took to flight (ii, 141). It has been well observed that it is said by Horapollo that a mouse denoted "disappearance" in hieroglyphics (Hierog. i, 60). Here we have evidently a confused tradition of the great overthrow of the Assyrians. Strabo, on the authority of Magantheus, tells us that Tirhakah, in his extensive expeditions, ravelled Sospiria, and went as far as the Pillars of Hercules (xiv, 686). The beginning of the 26th dynasty was a time of disaster to Egypt. Tirhakah was either dead or had retired to Ethiopia, and Egypt fell into the hands of several petty princes probably the dodecarchs of Herodotus, whose rule precedes, and perhaps overlaps, that of Psammetichus I, who is said to have been at first a dodecarch. In this time Esarhaddon twice invaded and conquered the country; but, after his second invasion, Psammetichus seems to have entirely thrown off the yoke, and so returned somewhat of its ancient power. There are several passages in Scripture which probably refer to these invasions, and certainly show the relation of Ethiopia to Egypt at this time. The prophet Nahum, warning Nineveh, describes the fall of Thebes, " Art thou better than he that dwelleth in the house by the river, [that had] the waters round about it, whose rampart [was] the sea, [and] her wall from the sea? Cush and Mizraim [were] her strength, and [it was] infi-

nite; Put and Lubim were in thy help" (iii, 8, 9). The sack and captivity of the city are then related. The exact period of Nahum is not known, but there is much probability that he lived about the time of the invasion of Judah by Esarhaddon (2 Kings xviii, 11, 32). We know nothing of the future of Ethiopia and Egypt, and it is probable that they contain what is virtually one connected subject, although divided into a prophecy against Ethiopia, the burden of Egypt, and the record of an event shown to prefigure the fall of both countries, these divisions having been followed by those who separated the book into chapters. The prophecy against Ethiopia is extremely obscure. (See the version above.) It appears to foretell the calamity of Ethiopia to its farthest people, to whom messengers should be sent in vessels of Tyre, by the sea of Egypt, the Nile, the Nubian sculptures, and at Jebel-Berkel, Napata, one temple and part of another. It seems to be the same as the prophetic word in the 26th dynasty. The only event of Tirhakah's reign certainly known to us is his advance against Sennacherib, apparently in fulfilment of a treaty made by Hezekiah with the Pharaoh whom we suppose to be Sethos. This expedition was rendered needless by the miraculous destruction of the Assyrian army, but it is probable that Tirhakah seized the occasion to recover some of the cities of Palestine which had before belonged to Egypt. Herodotus gives a traditional account of Sennacherib's overthrow, relating that when Egypt was ruled by Sethos, a priest-king, the country was invaded by Sennacherib, against whom he fell in a battle, who had offended the military class, marched with an army of artificers and the like, and encamped near Pelusium, where in the night a multitude of field-mice gnawed the bow-strings and shield-straps of the Assyrians, leaving thus unable to defend themselves, took to flight (ii, 141). It has been well observed that it is said by Horapollo that a mouse denoted "disappearance" in hieroglyphics (Hierog. i, 60). Here we have evidently a confused tradition of the great overthrow of the Assyrians. Strabo, on the authority of Magantheus, tells us that Tirhakah, in his extensive expeditions, ravelled Sospiria, and went as far as the Pillars of Hercules (xiv, 686). The beginning of the 26th dynasty was a time of disaster to Egypt. Tirhakah was either dead or had retired to Ethiopia, and Egypt fell into the hands of several petty princes probably the dodecarchs of Herodotus, whose rule precedes, and perhaps overlaps, that of Psammetichus I, who is said to have been at first a dodecarch. In this time Esarhaddon twice invaded and conquered the country; but, after his second invasion, Psammetichus seems to have entirely thrown off the yoke, and so returned somewhat of its ancient power. There are several passages in Scripture which probably refer to these invasions, and certainly show the relation of Ethiopia to Egypt at this time. The prophet Nahum, warning Nineveh, describes the fall of Thebes, " Art thou better than he that dwelleth in the house by the river, [that had] the waters round about it, whose rampart [was] the sea, [and] her wall from the sea? Cush and Mizraim [were] her strength, and [it was] infin-
temple of Abu-Simbel, not far below the Second Cataract, is one of the Greek merkaries on their return from an expedition up the river, "king Psammetichus" having, as it seems, not gone beyond Elephante. This expedition was probably that which Herodotus mentions Psammetichus as having made in order to bring back the rebels (ii, 30), and, in any case, the temple is the earliest of the 26th dynasty which has been found above the First Cataract. It does not prove, more especially as the king remained at Elephantine, that he governed any part of Ethiopia. The next event of Ethiopian history is the disastrous expedition of Cambyses, defeated at Pelusium, and, not liking the civilized nation. From this time the country seems to have enjoyed tranquillity, until the earlier Ptolemies acquired part of Lower Nubia that was again lost to them in the decline of their dynasty. When Egypt became a Roman province, Syene was its frontier town to the south; but when, under Augustus, the garrison of that town had been overwhelmed by the Ethiopians, the priest Petronius invaded Ethiopia, and took Napata, said to have been the capital of queen Candace. The extensive territory subdued was not held, and the name of some of the temples of Lower Nubia, in the temples of Lower Nubia, in Strabo's time Syene marked the frontier. This part of Ethiopia must have been so unproductive, even before the falling of the level of the Nile, which Sir Gardner Wilkinson supposes to have happened between the early part of the 15th dynasty and the beginning of the 18th, that it may well have been regarded as a kind of neutral ground.

The chronology of the kings of Ethiopia after Tirhakah cannot yet be attempted. Professor Lepsius arranges all the Ethiopians under four periods: 1st. 21st dynasty, first and second kings of Napata, beginning with Tirhakah, who, in his opinion, retired from Egypt, and made this his capital: of these kings, one, named Nastese-sen, or Nastese-sen, has left a tablet at Dongolab, recording the taking in his war of enormous booty in cattle and gold (Lepsius, Denkmale, v., 16; Brugsch, Geogr. Gesch. 1, 163, 164). 2d. Older kings of Meroë, among whom is a queen Kena, in whom Candace is immediately recognised, and also Mi-amen Abru and Arkamem, the later Ergemenes, the contemporary of Ptolemy Philadelphus, according to Cambyses Siculus, received a Greek training, and changed the customs of Ethiopia (iii, 6). Some of these princes had an extensive dominion. The name of Ergemenes is found from Lower Nubia to Meroë. 4th. Later kings of Me-roë, some, at least, of whom ruled both Meroë and Napata, though the former seems to have been the favour- ite capital in the later period (Königsbuch, pl. lxxi, lxxii, lxxiii). The importance of queens is remarkably characteristic of an African people. See MEROE.

The spread of Christianity in Ethiopia is a remarkable event in the history of the country, and one in which the truth of "the sure word of prophecy" has been especially evident. In this case, as in others, the Law may have been the predecessor of the Gospel. The pious eunuch, "Ebed-melech the Ethiopian," who befriended Jeremiah (xxviii, 7-18; xxxix, 15-18), may perhaps be one of many converts from paganism, but it is scarcely likely that he was out of the customs of his own land to their native land. The Abyssinian Jews, being probably a colony of those of Arabia, were perhaps of later origin than the time of the introduction of Christianity. But in the case of the Ethiopian eunuch, who had charge of all the treasures of Candace, queen of the Ethiopians, and who, on his return from worshipping at Jerusalem, was baptised by Philip the deacon, we see evidence of the spread of the old dispensation in Ethiopia, and of the reception there of the new (Acts viii, 26-39). In Psalm lxviii (31), in Isaiah (xlv, 14), and probably in Zephaniah (iii, 10), the calling of Eth-
save those of Abyssinia, which can scarcely be called ancient, showing that the country was thoroughly Egyptianized. Lepsius has published the Ethiopian monuments in his Denkmäler (pt. v; pl. 1-75), as well as the inscriptions in Ethiopian demotic (pt. vi; pl. 1-11; see also 13, 15).

For the Chaldean history and relations of Ethiopia, see Tittelmann, De secl. religione et moribus Ethipionum (Antwerp, 1534); De Goes, id. (Par. 1641, and since); Dresser, De statu eccles. Ethiopicae (Lipsia. 1684); De Vetra, Historia de Ethipia (Valentia, 1590); Predicacores de Ethipia (1611); Goldschmidt, Geschichte der Ethio einischen Kirche (Leipsic, 1639); Lucas, De rebus in Ethipia (Paris, 1624-6); Da Viega, Christ. religio in Ethipia (Laus. 1628); Dannhauer, Ecclesiae Ethiopicae (Argent. 1664); Ludov, Historia Ethiopica (Fr. ad M. 1681; with the supplemental Specimen, ib. 1687; Commentariss, ib. 1691; and Adlendel, ib. 1698; the original work in English, Lond. 1684; abridged in French, Par. 1694); Cavates, Descriprio Congo, Matambe et Angola (Bon. 1687); Geddes, Hist. of Ethiopia (Lond. 1689); Windham, Einleitung in d. ethiop. Theologie (Helmst. 1719); Lobo, Iter hist. in Abyssiniam (publ. only in a transit. Ed. at Par., 1701); Strachs, Iter d' Abyssinie (Str. 1730); La Croze, Christianisme d'Ethiopie (Hague, 1739, in Germ. 1740); Oertel, Theologia Ethiponica (Wittemb. 1740); Kocker, Fasti Habesiorum (Berne, 1760); Bruce, Travels in Abyssinia (Edinb. 1790). See ABBY.

Ethiopian (אֶתְיוֹפִיִּק, Acts viii, 27; רָוֹב, Kushi). Num. xii, 1; 2 Chron. xiii, 5; xiv, 9, 12, 13; xv, 8, 10, 15; xxiii, 15; Dan. xxii, 4; Amos ix, 7; Zeph. i, 12; I. e. Cushite; elsewhere as a rendering of the simple רָוֹב, Kasaḥ, an inhabitant of the land of ETHIOPIA (q. v.) or Cush: properly "Cushite" (Jes. xxiii, 23); used of Zerah (2 Chron. xiv, 9 [Sy]) and Ebeneleach (Jer. xxxviii, 7, 10, 12; xxix, 16). See also Cushi.

ETHIOPIAN EUUCH (אֵֽעִוֹךְ, aEthiopic, אֲוֹךְ). a person described (Acts viii, 27) as a chief officer (vizier) of the Ethiopian queen Candace (Queen of the Ethiopians; "Queen of the Ethiopians"), who was converted to Christianity through the instrumentality of the evangelist Philip (q. v.). Ethiopic tradition calls him Ḥarāk (see Bovii Annal. ad 1624, p. 542; but comp. Ludov, Hist. Ἑθ. iii, 2), and Irenaeus (i, 12) and Eusebius (Hist. Eccl. i, 1) make him the founder of the Coptic Church, and Arabia Felix and Egypt. According to Sophronius he preached in the island of Ceylon, and suffered martyrdom there. His official title does not necessarily indicate an emancipated person [see Eucuch], but probably here denotes a prime minister of state rather than a simple scribe or chamberlain (q. v.). Kunoīl (ad loc.) thinks he was a Jew of the Diaspora; and certainly he was at least a proselyte (q. v.). As to the place of his power, it is not quite certain that the passage in Pliny (Hist. Nat. vi, 5) refers to Merco as the seat of government of the female sovereign (comp. Ptolemaic Arabia, xvi, 2, 3); but possibly rather to Napata (Tawārī, Dion Cass. lvi, 5), the capital of a different part of Ethiopia (Rawlinson, Herodotus, ii, 35), or perhaps an uncertain locality (Ritter, Erde, i, 592). On the historical elements of the question, see Laurent, Notices des. Statuen. Staat. des Éthiopiens (Études Éth., 4), p. 140 sqq. (Edinb. 1867); July, 1866, p. 515; on the religious teachings of the narrative, see Sam. Smith, Sermon on the Eth. Euchus's Conversion (Lond. 1882). See CANDACE.

ETHIOPIAN WOMAN (Heb. קָעָר, רָוֹב, fem. of Cushite; Sept. Αἰθιοπίσσα, Vulg. Ἐθιοπίσσα). Zipponah, the wife of Moses, is so described in Num. xii, 1. She is elsewhere said to have been the daughter of Midianite (Exod. i, 21, compared with 16), and, in consequence of this, Ewald and others have supposed that the allusion is to another wife whom Moses married after the death of Zipporah; but the Arabian ETHIOPIANS is probably referred to in this case. See ZIRPORAH.

ETHIOPI&PIANS (Σήνεα, Isa. xx, 4; Jes. xli, 9; Zeph. i, 2; Sept. Αἰθιοπικά, Vulg. Αἰθιοπικά, Αἴθιοπικά), properly "Cush" or "Ethiopia" in two passages ( Isa. xx, 4; Jes. xli, 9); elsewhere "Cushites," or inhabitants of Ethiopia (2 Chron. xii, 3; xiv, 11 [12], 13 [12]); xvi, 8; xvi, 16; Dan. xii, 43; Amos ix, 7; Zeph. iii, 12). See also EUCUCH.

Ethiopic Language. As it is maintained by competent judges that the Amharic and the Tigré are really dialects of the ancient Ethiopian or Geez (which is doubted by Adelung and Vater in the Mihrirades), it may be expected, from the recent progress of comparative grammar, that future scholars will apply them to elucidations of the structure of the old, and the reception of the languages. At present, however, as even the Amharic is not yet able to boast of adequate and accessible means for its study, and as neither possesses any ancient version of any part of the Bible, the Geez is the only one which forms a particular notice here. See AMHARIC.

The ancient Ethiopian or Geez, which is the only one of the three dialects that either has been or is now generally used in written documents of a sacred or civil kind, is to be classed as an ancient branch of the Arabic. The grammar is evident from its agreement with the grammatical structure of the language; it is confirmed by the relation of its written character to that of the Himyarite alphabet; and either supports, or is supported by, the assumption that Habesh or Abyssinia was actually peopled by a colony from Southern Arabia. The grammatical structure of the Geez shows a largely predominant identity with that of Arabic; but it also possesses some traits which are in closer accordance with the other Syro-Arabian idioms, and some of which are peculiar to itself alone. The main features of its structure are as follows: The verb possesses the first ten conjugations of the Arabic, with the exception of the eighth and ninth; besides these it has two other conjugations which are unknown to the Arabic. There is a special conjunctive mode; the double infinitive is often used as a noun, irrespective of the absolute or comparative. The verbal auxiliary (v.) is accompanied by the so-called broken plurals of the Arabic grammar. The "construct state," and that relation of the noun which is equivalent to our objective case, are expressed by changes in the final vowels, or by employing the relative pronoun; the dative is indicated by prepositions. The comparative and superlative are expressed by means of particles. There is no form for the dual number either in the verb or the noun. With regard to the vocabulary of the language, one third of the roots are to be found in the same state in Arabic; by making allowance for inflections and transpositions, many other roots may be identified with their Arabic correspondents: some of its roots, however, do not exist in our present Arabic, but are to be found in Arabic dialects. This is why it has been too peculiar to itself; it has adopted several Greek words, but shows no traces of the influence of Coptic. The alphabet possesses twenty-six consonants, arranged in a peculiar order, twenty-four of which may, however, be regarded as essentially equivalent (although though with different sound) to the letters in the Arabic alphabet. The remaining two are letters adopted to express the Greek φ and ω.

* Separatrix of words.

* Exclusively Amharic.
The vowel-sounds, which are seven, are not expressed by separable signs, as in the Hebrew and Arabic punctuation, but are denoted by modifications in the original form of the consonants, after the manner of the Dēwānāgārī alphabet. The modem writing is from left to right. The position of the accent depends upon many complicated rules. As for the written characters, Gesenius has traced the relation between some of them and their equivalents in the Phoenician alphabet.

There is, however, the most striking resemblance between the latter and those in the Himyarite inscriptions, a circumstance which accords well with the supposed connection of Southern Arabia and Babylonia. Moreover, Lepsius, in an interesting essay, Uber die Anordnung und Verwandtschaft des Semitischen, Indischen, Aethiopischen, etc. Alphabets (in his Zwei sprachervergleichende Abhandlungen, Berlin, 1836, 8vo, p. 74), has added some striking arguments to prove that the Dēwānāgārī alphabet must have had some influence on the development of the Gezē.

The literature of the Gezē language is very scanty indeed, and that little is almost exclusively of a Biblical or ecclesiastical character. Dr. Laurence has lately added considerably to this by the publication of the Book of Enoch (q. v.), the Ascension of Isaiah (q. v.), and the first Book of Esdras (q. v.), in the Ethiopic version. There also exist in Ethiopic Christian Book of Adam (in Germ. by Dillmann, Gott., 1833), and several other apocryphal works relating the miracles of Christ, Mary, etc. It possesses nothing, not even an imitation of the national poetry, nor of the lexicographical and grammatical works of the Arabs. Some few historical works in the shape of chronicles, and a few medical treatises, contain in the main body of their prose portions the praiy fingers of the sovereign by the Amharic. It still continues, however, to be the language used in religious rites, in domestic affairs of state, and in private correspondence. See Ludolf, Grammatica Ethipica (2d edit. Frec. 1702, 4to); his Lexicon Ethipicolum-Latinum (2d edit. ib. 1699, 4to, originally Lond. 1661, 4to); Hasse, Prakt. Hdb. d. arab. u. Ethip. Sprache (Jena, 1793, 8vo); Hupfeld, Exercit. Aethiopicae (Lips. 1682, 4to); Gesenius, in Erach und Gruber's Allgemeine Encyclopädie, s. v. Aethiopische Sprache; Dillmann, Lexicon Ling. Aethiop. (Lpz. 1862 sq., 4to); Christo- mathia Ethipica (Lpz. 1865, 8vo); Castell, Lexicon Nagybalatonum (Lond. 1669, fol.); Schrader, De Lingua Aethiop. indole (Vien. 1800 sq., 4to). See Schematic Languages.

Ethiopic Version. The libraries of Europe contain some, although very rarely complete, manuscript copies of a translation of the Bible into the Gezē dialect (see Ludolf, Historia Aethiopica, Lond. 1684; also Plinio (Città del Vaticano, 1626, 4to). This version of the Old Testament was made from the Greek of the Septuagint, according to the Alexandrian recension, as is evinced, among other things, by the arrangement of the Biblical books, and by the admission of the Apocrypha without distinction. Tradition assigns Gregory of Nyssa as the author, but it probably proceeded from various Christian hands. Dorn supposes (De Psalterio Ethiopicum, Lips. 1825) that the translator consulted the Heb. original, but this is disputed by Gesenius and Rödiger (Algem. Litt. Zeit. 1832). It is divided into four parts: The Law, or the Octateuch, containing the Pentateuch and the books of Joshua, Judges, and Ruth; The Kings, in thirteen books, consisting of two books of Samuel, two of Kings, two of Chronicles, two of Ezra (Ezra and Nehemiah), Tobit, Judith, Esther, Job, the Psalms; Solomon, in five books, consisting of Proverbs, Ecclesiastes, Canticles, Wisdom, and Sirach; Prophets, in eighteen books, consisting of Isaiah, Jeremiah's prophecy and Lamentations, Baruch, Ezekiel, Daniel, and the twelve minor prophets; lastly, they have also two books of the Maccabees. Besides this, they possess an apocryphal book of Enoch, which they place next to that of Job. The critical uses of this version is almost exclusively confined to the evidence it gives as to the text of the Septuagint. The version of the New Testament was made directly from the Greek original (see Bode, N. T. Eth. ein Griecco collatum, Brunsv.ck, 1753). It follows the verbal arrangement of the Greek very closely, and has mistakes that are only to be explained by the confusion of words which resemble each other in that language. It is difficult to determine what recension it follows, but it frequently agrees with the Peshito and the Itala. It is impossible to ascertain the date of the execution of either of these translations, but they may both be ascribed with much probability to the beginning of the fourth century.—Khtito, s. v. Although there are several MSS. in Europe containing the Ethiopic version entire, only parts have yet been printed: the Psalter, first by Potken, along with Canticles (Rom. 1513, 4to); also by the Bible Soc. (Lond. 1815), with notes by Ludolf (Frec. 1701, 4to); the Canticles alone, by Nissel (Lund. 1690, 4to); Jonah, in Lat. by Petrus (ib. cod. 4to); Ruth, by Nissel (ib. cod. 4to); Malachi, in Lat. by Petrus (ib. 1661, 4to); Joel, by the same (ib. cod. 4to); first 4 chapters of Genesis, by Bürcklin (Frec. 1696, 4to); Jonah, with a glossary, etc., by Stadler (ib. 1796, 8vo); various fragments, by Bode (Helmst. 1755, 4to). Dillmann is publishing for the first time the O. T. entire (Biblia V. T. Ed., Lips. 1860 sq., 4to). The whole New Testament has, however, appeared. It was first published by three Abyssinians (Home, 1549-9, 9 vol. 4to), reprinted with a Latin gloss (London, 1857, fol.; vol. v. with a Latin version, also 1698). Platt has edited the entire O. T. in Amharic (Lond. 1840, 4to). The Gospels were edited anew from MSS. by Platt (Lond. 1826, 4to), and the whole N. T. by the same in 1839. Bode published transla-

Ethma (Ethan. v. r. Noa, Vulg. Nobcl), given (1 Esd. x, 35) as the name of the head of one of the families of Israelites, several of whose “sons” divorced their Gentile wives after the exile; apparently a corruption of Nehro (q. v.) in the Heb. list (Ezra x, 49).

Ethnan (Heb. Ethan), a gifted; Sept. Eshavai (v. r. Esbeachi; Vulg. Etheum), a descendant of Judah; one of the sons of Helah, the father of Ashur, “the father of the tribe of Asher” (1 Chron. viii, 17). B.C. post 1618.

Ethnarch (Ethnarchos), properly ruler of a nation; hence generally a prefect of a district or city (Lucian, Macrob. 17). E.g. Simon Maccabaeus, as head of the Jewish commonwealth (1 Macc. xiv. 47, “governor”; xv. 1, 2, “prince”; Josephus, Ant. xiii. 6, 6); Archelaus, appointed by his father’s will and the emperor’s ratification, his viceroy in Judaea (Josephus, War, ii, 6, 8), of the national head (modern “patriarch”) of the Jews in Egypt (Josephus, Ant. xiv. 7, 2; comp. Strabo, xvi. 798). Spoken of the “governor” or mayor of the city of Damascus (2 Cor. xi. 32), under the Arabians (Acts, xvi. 6). (See Walch, Dissertation in Acta Apost. i, 85.)

Ethnarch (Heb. Edom), a judge, magistrate, Sept. Aduv (v. r. Aduuvi), son of Zerah and father of Adahiah, of the Levitical family of Gershon (1 Chron. vi. 41 [26]). B.C. cir. 1420. In ver. 21, the same person appears to be designated by the name of Jerahmeel. See ARAPH.

Ethnology may be defined as that branch of modern science which treats of the various nations of the earth with respect to their races, i.e. their relative origin, family of stock, language and distribution; and it is thus distinguished from political geography, which discusses their association under their several civil governments. In the Bible, this subject, like all other scientific questions, is rather touched upon incidentally as connected with the history of mankind than in any formal and exact manner; yet the information thus afforded is of inestimable value, being, in fact, the only trustworthy guide to the investigator through the labyrinth in which later complications, and especially recent speculations, have involved the whole subject. Infidelity has striven hard to impugn the statements of Scripture on this ground especially; and it is therefore satisfactory to know that the most candid and general researches strongly tend to corroborate the positions of Holy Writ relative to all the main points involved in the discussion. These, so far as the Bible is directly concerned, all centre in one cardinal topic, the unity of the human race; and they bear upon this chiefly in two lines of argument, namely, 1st, the analogous and common elements of various languages, showing an oinem from one source; and, 2ndly, the manner in which men are distributed, or rather have been distributed, over the surface of the earth, as illustrating the ethnological chart laid down in the tenth chapter of Genesis. This last only, or the “Dispersion of Nations,” we propose to discuss in the present article, referring the other two to the article Adam, and, especially, the families and languages, to the article Creation, in the individual’s mature age, and on account of some personal concern which he had in the commencement or progress of the separation. But the specification usually given is by no means a matter of indubitable certainty. The verb occurs only in the two passages mentioned (Gen. x, 8, 19), “divided their tongues,” and Job xxxviii, 25, “who hath divided a channel for the torrent” (produced by a heavy thunder-shower). Respectable philologists have disputed whether it refers at all to a separation of man-
kind, and think that the event which singularly marked
Peleg's life was an occurrence in physical geogra-
phy, an earthquake which produced a vast chasm,
separating two considerable parts of the earth in or
near the district inhabited by men. That earthquakes
and dislocations of land have taken place in and around
that region at various times before the historical pe-
period, the present very different levels, and other
results have been noted. The
possibility, therefore, of some geological convulsion
cannot be denied; or that it might have been upon a
great scale, and followed by imperfect effects upon
the condition of mankind. The transmogrification of some
comparatively local interest, however, would seem a
more appropriate occasion for the breaking up of an individ-
ual than so world-wide an occurrence as the general
distribution of mankind. But if the race was as yet
confined to a narrow circle and a single community,
the breaking up of that society would be a very signal
event to celebrate in his name. See Peleg.

But neither the affirming nor the rejecting of this
interpretation of the "earth's being divided" can af-
fect the question upon the primeval separation and
migratory distributions of men. The reasons which
we have mentioned render it certain that some such
event followed by successive events, has taken place
without the usage of the passage of disputed interpretation,
it is evident that Gen. x. and xi. assume the fact, and
may be considered as rather a summary recognition of
it than as a detailed account. Thus (ix. 19), "These
are the three sons of Noah, and from these all the earth
was scattered over" (ךנソフト). Again (x. 9), "These are
the fathers of the earth's generations, and from these
generations, in their nations; and from these the na-
tions were dispersed (ךנSoft) in the earth after the
Flood." Here another verb is used, often occurring
in the Old Testament, and the meaning of which ad-
mits of no doubt. We find it also at vers. 5, "From
these the isles of the nations were dispersed (ךנSoft)
in their lands, each [according to its] language, [accord-
ing to] their families in their nations." The Biblical
date thus assigned to the dispersion is not inconsistent
with the most careful estimate of the antiquity of na-
tions, such as Egypt and Assyria. See CHRONOLOGY.

In the latest composition of Moses is another pas-
sage, which, in this inquiry, must not be neglected (Deut. xxxii. 6, 9): "In the Most High's assigning al-
locating the earth's parts to the sons of Adam, he fixed boundaries to the peoples according to the
number (ךנSoft, numeration) of the sons of Israel:
for the assigned portion of Jehovah is his people;
Jacob, the lot of his inheritance." Of this 8th verse
the Septuagint translation is remarkable, and it thus
became the source of extraordinary interpretations:
"When the Most High appointed nations, when he
scattered abroad the sons of Adam he fixed boundaries
of nations according to the number of the angels of
God." There might be a reading (El or Elohim in
stead of Israel) which would yield meaning from com-
parison with Job 6. 6; 1. xxxvii.; etc. Also the Alexanderine translators misread among a word. The
reasoning for the rendering, that it might haply serve
as a protection from the danger of the Macedonian-
Egyptian government, taking up the idea that the
Jews claimed a divine right of supremacy over all oth-
er nationalities. This reasoning, how near it was in accordan-
to the Greek fathers (Justin Martyr, Origen, Eusebius,
etc.) to maintain the doctrine of a later Jewish origin,
that the grandsons of Noah being seventy, each was
the ancestor of a nation, each nation having its own
language derived from the confusion of Babylonia,
and each nation speaking a distinct language (Deut.
nor, the nation of Israel, of which Jehovah him-
self was the tutelary deity. The only real difficulty of
this passage lies in its seeming to assert that the
nascet population was distributed into groups with
the express design of effecting a numerical correspond-
ence with the Israelitical family eight hundred years
after. The theory assigned by some to that effect is,
the sons (rather tribes or nations) of Noah's three
sons, are, Japheth, Ham, and Shem twenty-five, making seventy; and the whole family of
Jacob, when it came to be domiciliated in Egypt, was
seventy (Gen. xxi. 26; Exodus, i. 5; Deut. xii. 22).
Some have also found a parallel in the original
(Exodus, xxiv. 1, 9; Num. xi. 16, 24, 25; see also Kitto,
"Pictorial Palestine", Civil History, Index, "Elders"). These purerities might have been suggested by God's believing men considered that הובא does not signify merely an arith-
metical amount, but is used to denote an exact nava-
raton (Judg. vii. 15). The passage is in the highly po-
etical style of the magnificent ode in which it occurs,
and, reduced to plain terms, simply declares that the
Almighty Sovereign, in whose hands of necessity lies the
disposal of human birth-places, had so arranged these,
in mapping out the world, as best to subsist the
future occupancy of Canaan by his chosen people.
But the main passage of Scripture usually relied
upon to prove the fact of a sudden and violent disrup-
tion of primeval society into the germs of the early
nations, as well as to explain its circumstances and
cause, is the account of the building of the tower of
Babel (Gen. xi, 1-9). In which the enterprise engaged in
this enterprise has been regarded as a part of the
disseverance commemorated in the name of Pe-
leg. There are, however, some objections to this view
of the narrative. In the first place, these two events
are not thus connected in the account itself. The spo-
radic variation of the magnificence of the con-
dition between the different tribes that have founded
the ancient monarchies and cities, had not yet appeared;
nor could they be accounted for in this manner if the
original community had already begun to separate into
the more modern states. The only supposition that
would make the occurrence comprehensible is that the
connection, is that the whole body of the Noachites, while
in process of migration westward (_RowSoft, RowSoft,
with a view to settling in different localities, were arrested
by the inviting character of the plain of Shinar, until
their purpose of diffusion (_RowSoft, the same word in ver.
4 and 8) was renewed by the divine interference.
In the second place, it is not certain that either of the
incidents thus associated is of so cosmopolitan a char-
acter as this tale, they being probably local and distinc-
land, or region, instead of "earth," the whole aff-
air is reduced to a petty dispute or misunderstanding
among the workmen engaged upon a public edifice,
and a consequent dissolution of that particular cluster
of inhabitants. Certain it is that all the dialects of
this polyglot globe cannot be referred to a single inci-
dent or occasion like this. Such, at least, are in sub-
stance the arguments that have been offered against
interpreting the sacred narrative here as having a
general application to the whole race, nor can it be de-
ominated that they possess a certain degree of plausibility
(see Bryant, Ancient Mythology, 8d edn. iv. 28-44, 29
sq.). On the other hand, if, as everything in this con-
text seems to require, we conceive the descendants
of Noah to have been at this time (say about the birth
of Peleg, i. e. one hundred years after the Flood) quite
limited in numbers and extent (as the longevity of the
patrach and their pastoral habits being in all likelihood),
we shall find no particular difficulty in taking the entire
statement in its broadest and most literal sense, as the
opening wedge of that universal split, which has since
widened more and more, and in language and abode, among
the sons of men. This narrative, then, of the Disper-
sion begins with the remarkable statement: Now
the whole earth was of one language and of one
speech. And it came to pass, as they journeyed from
or 'in' the East, that they found a plain in the land
of Shinar; and they dwelt there" (Gen. xii, i, 2). The
expressions "language" (lip) and "speech" (words) are too precise to be understood (as Vitringa, Ode, et c., ch. ix., p. 109) as indicating merely an agreement in purpose. The journeying together shows that the time spoken of was before the Noachiants had ceased to be a single nation, and perhaps when they formed a great tribe, and were journeying (22:2) to pull up stakes and start for Canaan) the manner of the Arabs across the plains watered by the Tigris and Euphrates. It cannot be doubted that Shinar was Babylonia. The name, indeed, is perhaps traceable in Medopotamian in the modern Sinjar, and it is noticeable that the ancient Egyptian transcription of Shinar (22:2) is SANKART (this & corresponding to the Hebrew ס, as though the ס had been pronounced like the Arabic س). But there is no evidence that the Hebrews called any country except Babylonia "the land of Shinar." The direction of the journey, if it be indicated as "from the East," probably would only mark the previous halting-place of the Noachiants, not the place at which they first began to repeople the earth. The narrative then relates the attempt to build a city and a tower in order to prevent the scattering of mankind, and the punishment of the builders by the confusion of their language and their being scattered abroad from the unfinished city Babel, or Confusion. Leaving the subject of the Confusion of Tongues for later discussion, we must observe the general agreement of popular tradition, the antiquity of Babel, and the reminiscence of the Tower in the towers of the Babylonian temples. The Pyramids of Egypt and those of Mexico should be compared with these towers; and, in the case of the former, on account of their extreme antiquity, the comparison is very important. The exact relation of the scattered tribes is difficult to infer. The cause, according to the ordinary explanation of the narrative, was the confusion of Tongues, but some have supposed the latter to have been the consequence of the Dispersion. From ver. 4 compared with ver. 9, it would appear to have been but a resumption of the original plan of immigration, now that their holding together had become impossible, for the want of a common medium of vocal communication. Whatever difficulties we may discover in this and the preceding chapter of Genesis, "it is no longer possible to accept ... that the whole race of man proceeded from Tiras [the proper and native name of Persia and some connected regions] as from a centre, whence they migrated first in three great colonies; and that those three branches grew from a common stock, which had been miraculously preserves' in view of the confusion of languages of this globe." (Sir William Jones, On the Origin and Families of Nations, Works, ed. by Lord Teignmouth, 5 vols., iii., 1806.) There is, perhaps, no distinct reference to the building of the Tower and the Dispersion in the traditions of any heathen nation. The Greek story of the giants who piled mountains one upon another to reach Olympus is perhaps the most probable trace. Unlike the case of the Flood, there is no clear evidence that the Dispersion made a strong impression upon the minds of those who witnessed and shared in it. This would indicate that it was unaccompanied by any great catastrophes of the order larger, and was the immediate consequence of such difficulties as would arise from the sudden division of mankind into tribes speaking different languages or dialects. See Babel (Tower of). 2. It cannot be affirmed with certainty that we are here presented with a complete Table of Nations, even as existing in the time of Moses. Of each of the sons of Noah it gives the sons; but of their sons (Noah's great-grandsons) it makes mention that all are mentioned, and we have no possible means of ascertaining how many are omitted. Th. Thus, of the sons of Japheth, the line is pursued only of Gomer and 5avan: Magog, Madai, Togal, Mehech, and Tiras are dropped without any mention of their issue; yet we have evidence that that nations of great importance in the history of mankind have descended from them. Ham had four sons: of three of them the sons, or rather clannish or national descendants, are specified; but to Phut, the fourth, no posterity is assigned. Shem had five sons, but the descendants of only two of them are reported. It cannot be supposed that those whose sequence is thus cut off died without children; for, as we shall presently see, nations of great historical interest may be traced up to them. For the investigation before us have an aid, invaluable both for its ample comprehension and its divine authority, in the account of the traffic of the Phrygian (Cilician) language. 4. The list is, in one aspect, a kind of geographical table: many names in its descents are found in later places of Scripture as geographical terms designating nations, or at least important tribes. Therefore— (1) We must not look for a name in that of a town. There is no exception, probably not the only one, in the case of Sidon, the city of the Sidonians, who were doubtless a Canaanitish tribe, but to trace names in general in those of towns is very hazardous. (2.) The tracing of a nation or tribe to a name in the list is hazardous, unless neighboring or kindred nations, or nations otherwise marked in connection with it, can also be traced to the same part of the list. (3.) Preference must always be given to the oldest documents in seeking for identifications. Next to the O. T., the Egyptian, Assyrian, and Babylonian monuments must be consulted. It is true that sometimes notices nearest in point of time are always likely to be the best commentators; for it must be remembered that migrations and deportations are less likely to affect evidence the earlier it is. Although the list is geographical, its form is genealogical; and it does sometimes, and may frequently, state or convey the name of the founder of a nation or tribe—thus, all those terminating in the plural inc, and those specified by the Gentilian adjective, the Jebusite, the Hivite, etc. Yet (1) We must not attempt to identify a founder's name in the traditions of nations except when it is distinctly mentioned there as such. (2.) As before, we must not be satisfied unless the identification is supported by the geographical position of the founder's nation, or its ethnological character, and else by some marked characteristics connecting it with other names identified in the same part of the list. III. The Immediate Sons of Noah. Shem is always mentioned first of the three sons of Noah when their names occur together, the order being Shem, Ham, and Japheth. In Gen. x. 21 he is called "the elder brother of Japheth," which the A. V. incorrectly trans-
lates "the brother of Japheth the elder," where a comma after "Japheth" gives the correct sense. In the list of that chapter, notwithstanding the occurrence of the usual order in ver. 1, the sons of Japheth are first mentioned, then those of Ham, and lastly those of Shem, the order being inverted. It is usually supposed that this was put at the head of the list in order that the insertion of the other descendants of Noah might not form a digression in the history of the Shemites and their Hebrew branch. The Japhethites may have been put at the head of the list as the most widely spread, and so the most distant; and, for a like reason, the Hamites may have preceded the Shemites, the order being that of the extent of colonization. Or, again, the order may be geographical, from west to east, in accordance with the western, central, and eastern positions of the three great stocks. We shall see that the details favor the last view.

Shem (גֵּרְשָּׁם) signifies "name, good name, fame;" Ham (יְרָם), "hot, warm;" Japheth (גֵּרְשָׁא), "spread," from נָרָם. The names are probably prophetic of the future renown of the Shemites, of the hot land of the Hamites, and the spread of the Japhethites. The prophecy of Noah (Gen. ix. 25, 26, 27) indicates the appropriateness of Japheth's name to his future; and a prophetic sense of the names of his brethren may therefore be conjectured. But there is no distinct allusion to any such sense in their cases. It might be thought that the appropriateness of Shem's name as illustrious could be traced in the prediction that his should be the believing stock, but there is no indication whatever of any moral signification in the name of Ham.

1. Shem.—There is no trace of any single nation or country named after Shem, probably because the Shemites, by an instinct afterwards remarkable in their descendants, early separated into distinct tribes, though not migrating very far. This was the case with the Israelites; and with the Arabs the same process is still in constant operation. See Shem.

2. Ham.—The name of Ham has been connected with an appellation in Egypt in Hebrew, only occurring in two passages in the postexilic books—"the land of Ham" (Psa. lxxxvii, 51; cv, 22; evl, 22), and with the most usual Egyptian name of the country, Kam, "the black (land)." The former term we cannot doubt contained the patriarch's name. Is the latter identical with it? The significations of Ham and Kam are sufficiently near. Ham is sufficiently near. Kam, the black; he or it was warm, and compared with Dm, be on it or black; and the Arabic, black, of the same significature as the last, and, compared, "black fiddi mud" (Kâmîn), or "black mud" (Sîkhâk MS.). Kam cannot be taken for an Egyptian transcription of Ham, but it may be a word of cognate origin (comp. Kar, "a circle," Karî, Karî, "he or it turned, turned round;" Karî, "a furnace," Karî, "it burned;" Kna, "to bend," Karî, "he or it bowed down, inclined"). There can, therefore, be no reasonable doubt that the Egyptian name of the country is identical with the Hebrew name of the patriarch. Are they of separate origin? We must either suppose this, or that "the land of Ham" became changed to "Ham-land," or "black land." The genius of the Egyptian language would account for such a change, which seems not improbable. That Ham should have given his name to the country might be accounted for by the supposition that, except the Canaanites, the Hamites penetrated into Africa, and at first established themselves in Egypt. See Ham.

3. Japheth.—It is impossible not to see the name of Japheth in the Dick Japheth this of Ura- nus and Ge, and the supposed ancestor of the human race; for, as we shall see, the Greeks, or at least those of the Hellenic stock, are classed among the Japhethites in the list of Genesis. See Japheth.

IV. The Descendants of Japheth.—The following is the table of the Japhethites:

1. Gomer.—This name occurs in but one later place in connection with geography, as that of a nation or tribe allied with Magog, and it is there mentioned immediately before Togarmah, distinguished as northen (Ezek. xxxviii, 6). It has therefore been supposed to point to a remote northern nation, Scythic, or perhaps European. Two great gentile names have been compared, the Cimmerians of the Tauric Chersonese, who invaded the west of Asia Minor early in the 7th century B.C., and Cymbris of Cymri, whose ethnic and nominal identity cannot be doubted. Considering the migratory character of the Cimmerians and Cymri, it is reasonable to suppose that they had the same origin. In the cuneiform inscriptions of Darius Hystaspes, Gimiri occurs as the Semitic equivalent of the Aryan name Suku (Zoroast.). (Sir J. C. Rivet, in Rawlinson's Herodotus, iii, 150, note 1.) See Gomer.

a. Askenaz.—In a single later mention Askenaz occurs, in a confederacy against Babylon, with Ararat, Minni, and Middai (Jer. iii, 27, 28). It was therefore a nation in the direction of Armenia.

b. Riphath, written in i Chron. i, 6, Diphath, does not occur elsewhere in Scripture. It has been compared with the Riphean Mountains of Greek geography; but the statement of Josephus, commenting on this list, that the Paphlagonians were anciently called Riphathians, is worthy of notice (Ant. i, 6, 1).

c. Togarmah is mentioned in Ezekiel among the traders with Tyre, after Tarshish, Javan, Tubal, and Meschech, all Japhethites, and before Dedan, here probably the country of which the inhabitants, called Dedanim, are classed among the sons of the Japhethite Javan (Ezek. xxvi, 12-15); and, in the fragmentary, "the house of Togarmah, of the north quarters," follows Gomer in the list of the army of Gog, prince of Magog (xxxviii, 6). These particulars point to a northern people not remote from Greece. Togarmah traded with Tyre "with horses and horsemen, and mules" (xvii, 12); and we may suppose shep-herders came by land. All the indications agree very well with the opinion that Togarmah may be connected with the Armenians.

2. Magog is elsewhere mentioned by Ezekiel only, first among the countries ruled by Gog, and especially associated with Rosh, Meschech, and Tubal (Ezek. xxxviii, 2, 3), and apparently spoken of as dwelling "in the isles" (xxxix, 6). The term "isles" certainly must not be taken necessarily to indicate islands. But it is apparently limited to maritime, transmarine, and very remote regions. It has generally been held that Magog, used for a nation, is applied to the Scythians of the Greeks, though perhaps in a restricted sense. Certainly, in the time of Ezekiel, the Scythians who invaded Western Asia were the most powerful nation of the country to which the confederacy mentioned by the prophet may reasonably be assigned; and the agreement of Josephus (Ant. i, 6, 1) and Jerome (Quest. in Gen. x, 2) in the identification is not to be overlooked. See Magog.

3. Madai, always later applied to the country Medi- dia, very appropriately follows Magog, if, in the latter, when used geographically, indicates the Scythian neighbors of the Medes. Madai, like other names of
terwards employed for a country rather than a people, many names only have been a man's name (comp. Mtrras, infra). See Madai.

4. Javan.—Except where applied to an Arabian place or tribe (Ezek. xxvii, 19; and perhaps Joel iii, 6), this is, in all later places, the name of the Greeks, or at least of the Hellenic Greeks. The Persians, like the Hebrews, called all the Greeks Ionians. See Javan.

a. Elishah, at the head of the descendants of Javan, is to be looked for in Hellenic geography. It is mentioned in Ezekiel as trading with Tyre, "Blue and purple, from the isles of Elishah, was that which covered them" (xxvii, 7). The name has been associated with Elis, Hellas, and the Eolians. Etymologically the first and third are equally probable, but other circumstances seem almost decisive in favor of the latter. The coast of the Eolian settlements in Asia Minor produced purple, and the name of so important a division of the Hellenic nation would suit better than that of a city which never was rich and powerful enough to be classed with Sidon, Tyre, or Carthage.

b. Tarshish is in later Biblical history the name of a great mart, or, as some hold, of two. The famous Tarshish vessels were among the most important commercial cities of the period of the kings; second only, if second, to Tyre. It was accessible from the coast of Palestine, but its trade was carried on in large ships, "ships of Tarshish," which implies a distant voyage from Palestine. It brought to the "city of silver and gold," Ezek. xxvii, 12. These products seem to point incontestably to a Spanish emporium, and the majority of modern commentators agree in fixing on the celebrated Tartessus, said to have been founded by the Phoenicians, and with which the Phoenicians traded. In some places Tarshish seems to be evidently a country.

c. Kittim.—This Gentile noun, usually written Chittim in the A.V., is generally connected with Cittum of Cyprus. Other indications of Scripture seem not unfavorable to this identification, which would make the Kittim or Chittim a seafaring population of Cy
er.

d. Dodanim, closely connected in the table by construction as well as in form with Kittim—"Elishah and Tarshish, Kittim and Dodanim" (Gen. x, 4)—was a maritime or insular people. Ezekiel says of Tyre, "The men of Dedan were their merchants; many isles were the merchandise of thine hand: they brought thee [for] a present horns of ivory and ebony" (xxvii, 15). The reading in the list as given in 1 Chron. (i, 7) is Dodanim, a form which is probably the true one, as supported by the Sept. and Samaritan versions. The Sept. identifies this people with the Rhodians in all instances, including that in Ezekiel. In the prophet's time Rhodes was a great seat of Phoenician commerce, and at the site of Camirus, one of its three important cities before the city Rhodes was founded, many objects of Phoenician style have been discovered. It may be added that ivory is one of the materials of its antiquities. The identification, considering the probable place of the Kittim, is very likely.

5. Tubal, and, 6. Meshech, are in later places mentioned together (Ezek. xxvii, 13; xxxviii, 2; 3; xxxix, 1), and were evidently northern nations (xxxix, 2). They have been traced by the Mosch and Tzibari mentioned together by Herodotus (iii, 94; vii, 78), and as Muskai and Tupali, in the Assyrian inscriptions (Rawlinson's Herodotus, i, 380), which inhabited the northern coast of Asia Minor towards the Caucasus.

7. Tiras, last in the list of the sons of Japheth, has not satisfactorily identified. The best conjecture is perhaps with the Tyrrhenians or Tyrrenians, as then the chief territories of Japhethite civilization would seem to have been indicated—Armenia, Asia Minor, Thrace, the Asiatic Islands, European Greece, Italy, and Spain.

V. Descendants of Ham, or Hamites:

2. Seba.
3. Havilah.
4. Sabtah.
5. Raamah.
7. Dedan.
8. Sabtecah.
10. Marseim.
11. Ludim.
13. Lehabim.
15. Pathrusim.
17. Luzim.
18. Caphtorim.
19. Phut.
20. Canaan.
21. Sidon.
22. Heth.
25. Girgasite.
27. Arkite.
28. Sinite.
29. Arvadite.
30. Zemarite.
31. Hamathite.

1. Cush is immediately recognised in Kias, the ancient Egyptian name of Ethiopia above Egypt. With this identification all geographical mentions in Scripture, except that in the account of Paradise (Gen. ii, 13), agree. The latter may refer to a primeval Cush, but an Asiatic settlement is positively indicated in the history of Nimrod, and we shall see that the settlements of Cushites existed from African Ethi
apia to Babylon, through Arabia. See Cush.

a. Seba is connected by Isaiah with Egypt and Cush (xiii, 3; xliv, 14), and the statement of Josephus that the island and city of Merod lore this name is therefore to be noticed. In the ancient Egyptian geographical lists, SABA and SAABA occur among names of tribes or places belonging to Ethiopia (Brugsch, Geogr. Journ., ii. p. 9, pl. xii, k. 1).

b. Havilah.—The identification of Havilah is difficult, as the name recurs in the list of the sons of Jok
tan; and in Biblical geography, except only in the description of Eden, it is found in Arabia alone. If the two stocks intermixed, and thus bore a common name, a single localization would be sufficient.

c. Sabtah can only be doubtfully traced in Arabian geography.

d. Raamah, in the Sept. 'Pey'ah, is well traced in the 'Pyya of Ptol. (vi, 7), and 'Pyyah of Steph. Byz. (s. v.), a city of Arabia on the Persian Gulf.

1. Sheba, and, b. Dedan, bear the same names as two descendants of Keturah (Gen. xxv, 3), from which it has reasonably been supposed that we have here an indication of a mixture of Cushite and Arabian Arabs, like that of Cushite and Joktanite Arabs inferred in the case of the two Havilahs. It is to be remarked that the name of Dedan has been conjecturally traced in the modern name of the island of Dā
dan, on the east coast of Arabia, and that of Sheba in the ruins of an ancient city called Seb, in the neighboring island of Awâl.

e. Sabtecah is not identified.

f. Nimrod is generally thought to have been a re
tom der descendant of Cush than son, and this usage of Hebrew genealogies may be held to sanction it. He is the first and only known instance in the list of the leader of a dynasty rather than the parent of a nation or tribe. His name is followed by a parenthetical passage relating to his power and the establishment and extension of his kingdom. It is probable that this narrative is introduced to mark the commencement of the first Noachian monarchy. It may be com
pared with the notices of inventions in the account of Cain's descendants (Gen. iv, 20–22). The name of Nimrod is probably Semitic, from נבר "he was re
distinguished." It occurs in ancient Egyptian, in the form NAMHER, in the family of the 25th dynasty, which was certainly, at least in part, of foreign origin.
like names Sheshenek, Usanken, Tekerb, appear to be Semitic.

2. Mizraim, literally "the two Mazors," is the common name of Egypt in the Bible; the singular, Mazor, being rarely used. It has been thought to be purely geographical name, from its having a dual form, but it has been discovered in ancient writings, as the name of a Hittite or kindred chief, B.C. c. 1300, contemporary with Rameses II, written in hieroglyphics Mathmka, where the ma is known to express the Hebrew dual, as in Mahanaim for Mahanaim. That it should be Nahash is only a time, a proper name of a ma, suggests that the fact that Egypt was so called may be due to a Noachian's name having had a dual form, not to the division of the country into two regions. If, however, we suppose that in Gen. x Mizraim indicates the country, then we might infer that Ham's son was in fact called Mazor. It is remarkable that Mazor appears to be equivalent to Ham: as we have seen, the meaning of the latter is evidently "hot" or "black," perhaps both, and a cognate word is used in Arabic for "black mud." To understand the meanings of mit, the Arabic equivalent of Mazor, the Kermite appears to have given "red earth or mud." Thus Ham and Mazor or Mizraim would especially apply to darkness of skin and earth; and, since both were used geographically to designate the "black land," as cultivated Egypt always was from the blackness of its alluvial soil, it is not surprising that the idea of earth came to be predominant in their significance. If the geographical names as the Mizraim were purely geographical in the list, then we might perhaps suppose that it was derived from Mazor as a Semitic equivalent of Ham. It is certainly remarkable that all the descendants of Mizraim are mentioned as tribes in the plural of gentile nouns. See Mizraim.

a. Ludim, perhaps mentioned in passages of the prophets as Lud or Ludim (Isa. lxvi, 19; Jer. xlv, 9; Ezek. xxvii, 10; xxxviii, 6; xxx, 4, 5), where, however, the Semitic Lu might be intended. There would be many passages in which a general term is used, e.g., (Ezek. xxx, 4, 5), where Egypt, and, as far as they are identified, African nations or countries are spoken of, the Ludim are those of the Mizrite stock, were it not possible that under the term Ludim or Lydian the Ionian and Carian mercenaries of the Pharaohs may be intended.

b. Anamim, a nation as yet not identified.

c. Libahim, no doubt the same as the Libim or Libyans mentioned in later places of Scripture as allies or mercenaries contributing to the armies of the Pharaohs, and supporting or dependent on Egypt as a race in various relations. The correspondence of the Rehavi or Lihu of the Egyptian inscriptions, western neighbors of Egypt, conquered by the kings of the 19th and 20th dynasties.

d. Naphtuhim strikingly resembles the Coptic name of the westernmost part of Lower Egypt, the territory of the city Marseis, probably the old Meroitic name Nephisa or Nophasha, a plural form commencing with the definite article n.

e. Pathrusim, a tribe of which the territory, "the country of Pathros," is mentioned in later places. The latter has been compared with the Egyptian Pathri or Phuthri or Phustirie Name; in Coptic popo'rus, poposura; in ancient Egyptian PA-HAT-HER; the chief objection to which identification is, that the geographical importance of the name seems scarcely sufficient.

f. Casluhim, not as yet identified.

g. Caphtorim, and the land of Caphtor, have given rise to much discussion. Toole has proposed as the equivalent of Caphtor the ancient Egyptian name of Coptos, Kebtu, Kebta, Kebher, probably pronounced Kubi, Kabit, Kebhor, the Coptic Keft, Keprai, Kepti, Kebeto, Kebiot, Gr. Kóptos, Arab. Kyft, and ventured to compare Agyptos with מֵכַת נָעַר. See CAPHTOR. It must be remembered that the city Coptos, or its name, has given its name to the whole nation of Egyptians, who were known as Copts by the Arabs at the time of the conquest. But good reasons have been urged in favor of Cyprus, especially the circumstance of the Phyllistene name. It is

a. Philistines.-The Philistines are here said to have come forth from the Caaluhih; elsewhere they are called Caphtorim, and said to have come out of Caphtor. It is not allowable to read that the Philistim and Caphtorim came from the Casluh. Perhaps there is a transposition in the text. The origin of the Philistines from a Mizraite stock is a very important fact for the explanation of the list.

b. Phut.-In later places, Put or Phut occurs as the name of an African country or nation, closely connected with Egypt, like the Liburn. It may be compared with those geographical names in the ancient Egyptian inscriptions in which the element HET, "the bow," occurs. Nubia was called the "bow-land," the "bow," where it is usual to read ru-wenn, but the bow has not the sound leenu elsewhere; and it is probable that a part of Nubia was called Kensi, and that the bow was written as ni in the Egyptian written names. If this were the case, the name Kensi was included in the "bow-land," but the question is full of difficulties. See Phut.

c. Canaan, in Gen. ix (18, 22, 25, 26, 27), is distinctly mentioned as the son of Ham. It has been thought that his name means the "degraded," "the subdued," "the dweller," for both senses are possible. See CANAAN.

d. Sidon, "the first-born" of Canaan, like Heth, immediately following, is a proper name, whereas all the remaining names are gentile nouns in the singular. Sidon is thought to signify "the fishing-place," so that the name of the place would seem here to be put for that of the founder, "the fisherman," "the fisher of Sanchoniathon or Philo of Byblos. But it must be noticed that the next name, Heth, is treated in later places as that of a man. The position of the Sidonians, like that of most of the Canaanitish tribes, need not here be described.

e. Heth, ancestor of the "Children of Heth," or Hittites, a very important nation of Palestine and Syria. There are indications in Scripture of Hittites out of Palestine, and the ancient Egyptians were with the Kheti in the valley of the Orontes, whose names show how widely they spoke a Semitic language. The Egyptian monumental representations show that their armies were composed of men of two races, the one apparently Semitic in type, the other beardless, and resembling the Tartar type. See HITTITE.

f. The Jebusite, d. Amorite, e. Girgasite (properly Girgasne), f. Hivite, all inhabitants of Palestine; but the Amorite, like the Hittite nation, seems to have had a wider extension, for the territory in which stood Keshesh, the great stronghold of the Kheti on the Orontes, is called in Egyptian "the land of Ammi" (Brucheg, Geostr. Inscr. ii, p. 21, 22, pl. xviii, 44, 47).

The Arkite, compared with the Phoenician town of Arca.

A. The Sinite, not satisfactorily identified. Perhaps one of their settlements may be traced in Sin or Palu-

B. The Arvadite, no doubt the people of Arudus.

C. The Sidonite, well known to have been seated in Upper Syria, where Hamath, on the Orontes, was long a capital of an important kingdom.
VI. Descendants of Shem, or Semites:

1. Elam.
2. Assur.
3. Arphaxad.
   a. Salih.
   a. Eber.

4. Lud.
5. Aram.
   a. Uz.
   b. Hul.
   c. Gehir.
   d. Mash.

1. Elam, when used geographically, held to correspond to Susiana, not to Persia Proper.
2. Assur, afterwards the Assyrian nation. In the cuneiform inscriptions Assur is the chief object of worship of the kings. See Assur.
ETHELNOLOGY

8. Arphaxad, probably well traced in the province Arrapachitias.

a. Salah seems to be only a genealogical link. In the Semitic family the list is clearly something more than ethnological and geographical; it is of the nature of a pedigree, at least as far as it deals with the ancestors of Abraham.

b. Eber.—It is impossible here to discuss the difficult question whether to this patriarch the name of the Hebrews owed its origin. The argument based on the mention in this list that Sheem was "the father of all the children of Eber" (x. 21) seduces us as almost unanswerable on the affirmative side. See EXEG.

(c.) Peleg seems, like Salah, to be but a genealogical link.

(d.) Joktan is perhaps only a similar link: his descendants form an important series.

(e.) Almad, supposed to be traceable in Arabian names.

(f.) Seleph, traced in El-Yemen.

(g.) Hazarmaveth, identical in name with the great region of Hadramaut, in Southern Arabia.

(h.) Cush, not certainly identified, and (e.) Hadoram, not traced.

(i.) Uzal, the same name as Azzal, the ancient name of San'a, capital of El-Yemen.

(j.) Ditlah, (b.) Obal, (l.) Abmael, not traced.

(k.) Sheba is the same name as the Arabic Seba, the oldest name of El-Yemen. The most recent kingdom of El-Yemen.

(l.) Joktan is perhaps only a similar link: his descendants form an important series.

(m.) Jobab, not certainly identified.

4. Lud has been compared to Lydus, the traditional ancestor of the Lydians. The Semitic character of the Lydian civilization is confirmatory of this view. The Egyptian monuments of the empire mention a powerful Asiatic people of Semitic type, apparently living not far from Mesopotamia, called Rutum or Ludon. It is possible that the Lydians may have migrated, into Asia Minor after the time of the Egyptian empire, or that there may have been two Lydian settlements. It is not clear whether the Lud or Ludim of later places of Scripture were of this stock, or the name as the Mizraite Ludim, as already remarked.

5. Aram is, in later places, the geographical designation of Syria, though the term is not of the same extent in Syria. We read of Aram-sarhaba, "Aram of the two rivers," either Mesopotamia, according to the general opinion, or the country of the Orontes and Leontes, of Padan-Aram, perhaps a part of the same tract, or another name for it; and also of Aram-Zobah, Aram-Beth-rehob, Aram-Maacah, and Aram-Dammezek, or Syria of Damascus, all kingdoms in the country Aram (q. v.).

a. Uz. Mention is made of "the land of Uz" in the book of Job, where other indications seem to point to the north of Arabia.

b. Lud, Uz, and, c. Gether, are not identified; d. Mash is but conjecturally traced in Meass war, in Lower Babylonia, or Moos Misas, at the north of Mesopotamia.

VII. Results.—These are twofold:

1. CAUSAN.

I. Shemitic (as Hebrew).

II. Aramaic (Greek).

III. Phoenician.

IV. Egyptian.

II. Lower Nipotie (Egyptian).

III. Nipotian (Negro).

IV. Tatar (Chinese).

In the table which follows, the first column gives those names from Gen. x for which there are highly-probable geographical identifications; the second column states these identifications; the third contains ethnological evidence from Egyptian (Egyptian), Assyrian (Assyrian), or other sources; the fourth exhibits the like philological evidence.

From this evidence we may draw the following inferences on several important points:

1. Order of Names.—The Japhethites seem to be placed first, as the most distant names. In the list of the Hamites, the southern, and, therefore, most distant Cushites, are arranged from west to east, Seba (Merose) being followed by Cush (in Arabia), and the series closing with Nimrod, who ruled in Babylon and Assyria. North of Cush is Mizraim, in the enumeration of whose tribes the western Levahim (Libyans) are followed after an interval by the easternmost Philistim, apparently the only Mizraites of Palestine. The list of the Canaanites begins with Sidon, the Phoenicians of the sea-coast north of the Philistines; then mentions under Heth the Hitites, perhaps on account of their southern settlement, and, going northwards, enumerates tribes near Lebanon, closing with the Syrian Hamathites. The Semitic tribes begin in the east, extending regularly from Sidon to Arabia, and then ascending to Syria. Lud may be an exception, but, as we have seen, the Lydians may primavally have been settled near Syria, otherwise Lud may be mentioned between the Arabs and Aram as an outlying Semitic tribe, to be spoken of before the enumeration of the names of the Arap-Palestinians.

2. Race.—All the names identified with a high degree of probability are, with six exceptions, of Caucasian nations. The exceptions are: three certainly of the Lower Nipotite race, which is intermediate between the Egyptian and Nipotite races, showing strong traits of both, a fourth probably of the same race, and two others which require more particular investigation. Cush, in ancient Egyptian, applies to Nipotai, for the race of Kiss is represented on the Egyptian monuments as of the most marked Nipotite type: the kings and other royal personages of Merose, and the Ethiopians of rank under them, are, however, represented on their monuments as similar to the Lower Nipotite race. This suggests that Cush may indicate a country mainly peopled by Nipotaitians, yet with a governing mixed race. The remaining exception is the case of the people who are represented on the Egyptian monuments as of two types—the one Caucasian, the other apparently Tatar. This may show that two different races were ruled by those Hittite kings with whom the Pharaohs warred, as Og, the king of Bashan, was a Rephaim, not an Amorite.

3. Languages.—The languages are all Iranian or Shemitic, with three exceptions. Egyptian, occurring twice in our table, has a mazoylethic barbaric
vocabulary, with an amalgamated Semitic grammar. Here, therefore, as in race, there is a departure from the unmixed type. To Cush we have conjecturally assigned a barbaric Nigritian language, because the names of Ethiopian tribes conquered by the Egyptians, and the superstitions of that period, are not remotely traceable to either an Egyptian or a Semitic source; but we cannot say certainly that a Semitic element is wholly wanting in the languages to which these words belong.

The order indicates that the intention of the list is partly geographical. In the detail of each division the settlements of races are probably indicated rather in the order of position than of ancestral relationship, though the principle of relationship is never departed from, as far as we can see.

4. Durt.—The list of Gen. x contains certain statements which now only in Deut. ii., in order to infer the date to which the document refers. It is said, "Afterward were the families of the Canaanites spread abroad" (x, 18); which may indicate the formation of the great Hittite settlement in the valley of the Orontes, or other like extensions. In any case it points to an event, or series of events almost certainly prior to the establishment of the Israelites in Palestine. So, too, the definition of the otherwise unknown Resen, as "the great city" (Gen. x, 12), indicates a period anterior to that of the kings who ruled at Ashur (Kalh Shem, Gen. xii, 25, E.); the rest of whom was placed about B.C. 1200. At the time of the Egyptian empire the capital appears to have been Nineveh, and the date of the list would therefore be anterior to that time, or at least to the reign of Thothmes III., to whom it was tributary about 1450 B.C. It would appear, therefore, that the list was either written or put into its present form not long after, or at the time of Moses, if not earlier, and that it refers to a yet earlier period—that of the first spread of the Noachians.

VIII. Omissions. —The nations omitted in the list must now be noticed, as far as they seem to be of a like high antiquity. In Deut. ii there is mention of several tribes or nations which had been destroyed by other tribes or nations which reached Palestine or its neighborhood before the Israelite occupation. Certain of these are called Rephaim, others not. The particulars are as follows, as far as they relate to our present subject:

1. Emim, Rephaim, succeeded by Moabites (Deut. ii, 9-11).
2. Horim, succeeded by Edomites (ver. 12, 22).
3. Canaanim, elsewhere called Gezim (Gen. xiv, 5), Rephaim, succeeded by Ammonites (Deut. ii, 19-21).
4. Amorites succeeded by Caphitorim, that is, Philistines (ver. 28).
5. Azinim, here mentioned as Rephaim (ver. 10, 21), still occupying the south of Palestine at the time when the Israelites entered it. The Avim were probably also a Rephaim nation, for as late as David’s time giants were found among the Philistines. Elsewhere in Palestine the Israelites seem to have found, besides "the three sons of Anak," or the Anakim of Hebron, Og, the king of Bashan, who "remained of the remnant of Rephaim" (II, 11), a man of gigantic stature. The position of these Rephaim is that of a few powerful chiefs among the Canaanites and Philistines, representing tribes destroyed by Hebrews, the only exceptional case being that of the Philistines, if, as we suppose, the Avim were Rephaim, for in that case the former must have first attacked the latter, but finally changing their position, have been excluded from annihilating the older population.

At an earlier time we find a very different condition of the country. The powerful confederacy of which Chedorlaomer was chief, attacked and conquered, besides the kings of the cities of the plain, the Repli-aim, Zuzim, Emin, Horim, Amalekites, and Amorites. Here the Canaanites occupy a very inferior position in the south and east of Palestine, but one Canaanitar nation being mentioned, and besides undoubted Rephaim, the Horim probably of the same stock, and the ancient and pedigreeless nation of Amalek. We thus find an indication of an old population of Palestine, and that these peoples, from a very early time, are not only remarkable for their great height. That they were in race still more remote from their successors than has usually been held, has been argued from the Anakim’s being spoken of as "of the Rephi-aim" (Num. xiv, 8), the term applied to the giants before the Flood, when it is said "the Nephilim were in the earth in those days" (Gen. vi, 4). On this subject, compare Poole, The Genesis of the Earth and of Man, 2d ed. p. 80-82, 284, 285, where it is maintained that the Nephilim were a pre-Adamite race.

Bta-Hadar. See GOOLY-DREE.
Btahmadsim, a remarkable Armenian convent in Erivan, a Transcaucasian province of Russia, and about 16 miles west of the town of Erivan. "It is of great extent, is surrounded by a wall 30 feet in height, and 1½ miles in circuit. This wall incloses several distinct churches, each of which is presided over by a bishop; is cruciform in shape, and is surrounded by a kind of cupola crowned by a low spire. For many centuries this has been the seat of the Catholics (the head or patriarch of the Armenian Church). This patriarch presides at the synodical meetings, but cannot pass a decree without its having the approval of the moderator, an official appointed by the Russian emperor, in whose hands the control of the convent virtually rests. In the convent library there are 688 manuscripts, 462 of which are in the Armenian language."
Bta-Shemen. See OIL-TREE.
Bttewin, John, a distinguished divine of the Missouri Church, was born June 29, 1721, at Freundentshar, in Prussia. In 1747 he came to America, where for nearly half a century he labored as an evangelist, as a member of the executive board, and finally as a bishop, to which latter office he was appointed in 1784. He travelled thousands of miles, often afoot, and preached the Gospel in eleven of the original thirteen states, and also in what is now the state of Ohio, to white people, negroes, and Indians. In 1775 he was the leader of the Christian Indians on their exodus from the Susquehanna country in Pennsylvania to the Tuscarawas in Ohio, exposing himself to great dangers and privations. During the Revolu-}

of Congress; and when the general hospital of the American army was transferred to Bethlehem, Pa., he devoted himself with singular disinterestedness to the spiritual wants of the sick, in spite of his many other duties. To him, too, must be ascribed the honor of inventing, in 1830, the Society of United Brethren for Propagating the Gospel among the Heathen, which still exists, and now has a large funded capital, and to which Congress made a grant of several thousand dollars. The United Brethren are now a part of the Universalist churches, and a sect of the Universalist denomination. Ehrenreich, Baron.

Eubulus (Εὐβούλου, good in counsel), a Christian at Rome whose greeting Paul sent to Timothy during his last imprisonment (2 Tim. iv. 21), A.D. 64.

Buchari, one of the names of the Lord's Supper, from ἐκάτερος, giving of thanks. See Lord's Supper.

Buchel, Isaac Ben Abraham, a Jewish scholar, born in 1576, was a distinguished member of the Society for the Promotion of Biblical Literature and Exegesis, which was formed in the days of Mendelssohn (q.v.). He is the author of a very learned treatise on the ancient mode of burial among the Jews, "Ist nach jüdischem Groaten das Uebernehmen der Toden wirklich vorzabin?" (Breslau, 1797). He published also a translation of the Jewish Prayers, פֵּיתָה בְּעָילָה, מִשְׁכְּנֵי בֵיתָה, or Mosen Mainim's Mosen Nebuchim, with the Commentary of Moses Narboni, called מִשְׁכְּנֵי בֵּיתָה, and others (Sulzbach, 1628, 3 vols. 4to), a history of the life of Moses Mainim (Berlin, 1796, 8vo; 11, in 1812); and as part of the great Bible work started by Mendelssohn, Die Sprüche Salomo's im Original ins Deutsche ubersetzt und in Briefen kommentirt (8vo, Berlin, 1789, 1790, and often).—Furst, Bibliotheca Judaica, p. 239; 269; Kittel, Cyclop. of Biblical Literature, s. v.

Buchelaton, the oil of prayer, a ceremony in the Greek Church answering to extreme unction in the Latin. To such penitents as are conscious of the guilt of any "mortal sin," as adultery, fornication, or pride, this sacrament is administered by the bishop or archbishop, assisted by seven priests, who commence with this prayer: "O Lord, who with the oil of thy mercies hast healed the wounds of our souls, do thou sanctify this oil, that they who are anointed therewith may be freed from their infirmities, and from all corporeal and spiritual evils." The oil of prayer is pure and un mixed, having in it no other ingredient than a sufficient quantity to serve for the whole year is consecrated on Wednesday in the Holy Week by the archbishop or bishop. In the administration, the priest dips some cotton at the end of a stick, and thereby anoints the penitent in the form of a cross on the forehead, on the chin, on each cheek, and on the backs and palms of the hands; after which he repeats this prayer: "Holy Father, physician of souls and bodies, who hast sent thine only Son Jesus Christ, healing infirmities and sins, to free us from death, heal this thy servant of corporeal and spiritual infirmities, and give him salvation and the grace of thy Christ, through the prayers of our more holy lady, the mother of God, the eternal virgin, through the assistance of the glorious, celestial, and incorporeal persons, through the virtue of thy life giving and holy cross, of the holy and glorious prophet, the forerunner, John the Baptist, and the holy and glorious apostles."—Farrar, Eccles. Dictionary, s. v.; Pinkerton, Present State of the Greek Church, 139.

Eucherius, bishop of Lyons in the 5th century, was born of a noble family at Lyons. He was a senator, happily married, and the father of two sons, Ve ranus and Salonius, who at an early age were sent to the court of St. Eucherius to adorn his house and to prepare them for the profession of the faith. In 422 Eucherius entered the same convent as a monk, having obtained the consent of his wife Gallia, who likewise devoted herself to monastic life. Soon after, Eucherius retired into solitude on the island of Leró (St. Marguerite). In 434 he was, in consequence of the reputation of his great piety, elected bishop of Lyons, and, as such, was present at the two synods of Orange (441 and 442). He died in 454 (according to the younger Eucherius, 457). He was an ardent advocate of the True Cross, which he consecrated on the 16th of November. He was followed on the see of Lyons by his son Varianus, while the second, Salonius, became bishop of Geneva. Eucherius wrote, about the year 427, Epistola proromstica de contentu literarum et sacris; commentaria solitaria (edit. by Rhenanus, Basel, 1516, and by Erasmus, Basel, 1590):—Liber formularum spiritualis intelligitatis: Institutionum libri II:—Exhortatio ad Monachos; and several homilies. Several other works are wrongly attributed to him. It seems that he sympathized with the Semiarians. A collection of all his works was published by Braccianus (Basel, 1631), in the Biblioth. Patr. Max. Lugd. tom. vi and xxvii; and in Migne, Patrol. Lat. tom. i. See Herzog, Real-Encyclop. xix, 490.

Buchites. See Messenians.

Bucchologian (βυκχολογία), the common name of the liturgical books of the Greek Church, containing the services for the sacraments, conferring of orders, and other religious offices. There is an edition by Goar, entitled Bucchologion, sive Ritualis Graecarum, com pectens ritus et ordines divinae Liturgiae, officiorum, sacramentorum, et, jussa sacerdomi Orientis eccelestis (Paris, 1647). See Neil, History of Rome and the Church of the Greek Church (London, 1722, fol.), chaps. ii, iii; Neale, History of the Holy Eastern Church, pt. i (London, 1850), i, 317.

Eudemion, John Andrew, a Greek Jesuit, was born at Canes, in Canda, about 1560. He derived his descent from the imperial family of the Paleologi; went to Italy when very young, and in 1569 entered the Society of Jesus. After having taught philosophy at Rome and theology at Padua, he was appointed rector of the Greek College, which pope Urban VIII had just established at Rome. He accompanied, as theologian, the papal legate, cardinal Barberini, to France, and died at Rome in 1626. He wrote a large number of controversial works against Casaubon, Bright man, John Barclay, Robert Abbot, and many others. Pamphlets against Henry IV and Louis XIII were also ascribed to him.—Hoefler, Nouv. Biog. Genr. xvi, 668.

Eudemonism (Gr. εὐδήμων, happiness), a principle in philosophical ethics according to which the attainment of happiness is represented as the true aim of life. Those who hold this view are called Eudemonists. Opposed to eudemonism are all those systems of ethics which regard not the pleasure of the individual, but the recognition of some universal law as the higher principle. Eudemonism lay at the basis of the Cyrenaic school founded by Aristippus, and of the Epicurean philosophy (q.v.). It was developed to its utmost consequences by Hegesias, who taught that if no enjoyments are to be expected by men, death is preferable. Essentially different from this class of Eudemonists is the system of Aristotle, who regarded virtue as a spiritual enjoyment, and in this sense represented ethics as the doctrine of seeking and finding a happy life. This view has found adherents among Christian writers on ethics, who define and treat ethics as the doctrine of a happy life. Others have combined with eudemonism common usefulness, moral sentiment, and perfection, and thus have purified and ennobled it. Belonging properly to the schools of Aristippus and Epicurus are in modern times the different systems of sensualism (q.v.) and materialism (q.v.). An ennobled form of this last appears in some representatives of the Scotch school, who, in opposition to the self-love of Hobbes, develop the longing for universal happiness as the supreme
Eudes, Jean, founder of the congregation called the Eudists, was born at Béziers, Hérault, on November 14, 1601, and died at Caen, August 19, 1680. At 14 he commenced his studies under the Jesuits at Caen, entered the Congregation of the Oratory in 1623, and was ordained priest in 1625. From 1627 to 1632 he was engaged in missionary labors among the plague-stricken people of Normandy, and in 1632 he became superior of the Congregation of the Oratory at Caen. Much of his time was spent in missions throughout France to reform the clergy. In 1648 he organized a new society, which took the name "Eudists," or the "Congregation of Jesus and Mary," and soon had many branches in France. Its members were devoted to the education of young candidates for the priesthood, and to "missions" (in the Roman Catholic sense) among the clergy. Eudes wrote a number of books of devotion. The Eudists were scattered at the Revolution, but were revived by the abbe Blanchard in 1826. They have a college, called St. Gabriel's, in the State of Indiana.

Eudists. See Eudes.

Eudo de Stella. See Eon de Stella.

Eudocia, wife of the emperor Theodosios II, was the daughter of Leontius, an Athenian sophist. She was called Athanais, and was carefully instructed by her father in Greek letters. She was also noted for personal beauty. On the death of her father, the jealousy and avarice of her brothers compelled her to go to Constantinople, where she appealed to Pulcheria, sister of Theodosius II, who was so fascinated by her beauty and talent that she induced Theodosius to marry her. A.D. 421. She was baptized under the name of Eudocia, and received great influence in the imperial court. In A.D. 438 she made a splendid pilgrimage to Jerusalem. Soon after she was charged with aspiring to the government of the Eastern empire; and later, with an intrigue with one Paulinus, a courtier. About A.D. 449, the emperor, through jealousy, dismissed all her court, and had her exiled to Palestine, where she continued to reside after his death. She there embraced the opinions of Eutyches, and supported by her liberality and influence the monk Theodosius, who forced himself into the see of Jerusalem, and striving against the orthodox bishop, and kept it by force of arms. A.D. 450, the emperor Marcusianus. Euthymius, called the Saint, by his reasonings brought back Eudocia to the orthodox faith, after which she spent the remainder of her days at Jerusalem, where she died in 460, defending her faith under the cross that her husband had charged her." Eudocia wrote several works: (1) Pho- tius quotes a translation in verse of the first eight books of the Old Testament. (2) There is also attributed to her a Life of Christ, composed of some verses from Homer, translated into Latin by Echard, and published under the title of Homeri Opera in the 15th century. (3) Homeros et Cenoms (Gr. and Lat. Francof. 1541, 1544; Par. 1578, 12mo; Lips. 1798, 8vo); an account of the martyr- dom of St. Cyrilian Greek and Latin, ed. by Bandini, in his Greco Eccles. et. Romana, 1, 130-168. — Hoff- mann, Bibl. Lec. ii, 68; Gibbon, Decline and Fall, ch. xxxii. 

Eudoxia, wife of the emperor Arcadius, was born in the year 375, and was married to Arcadius in 395. She was the mother of Theodosii II, or the younger. Her name is found hereon only in connection with certain states with Chrysostom. She used her influence for the banishment of Chrysostom, against whom her hatred was incited by the unspur attacks which he made against all evil-doers, and especially, it is said, by his declaration that she was a new Herodias, triumphing after the blood of John." She died in C. 416. Wetzer and Welte, Kirchen-Lezebien, iii, 736; Hoefner, Nowelle Biog. Generale, xiiii, 867; Gibbon, Decline and Fall of the Roman Empire (Harper's ed.), iii, 345 et seq.

Eudoxians. See Eudoxius.

Eudoxius, an Arian, and bishop of Constantinople, was born at Arabissus, in Armenia, first mentioned as bishop of Germencia (near Mount Taurus). About 356 he obtained by artifice the patriarchate of Antioch, where he soon came forward as a patron of the Arians (Theodoret, H. E. bk. ii, chap. 25, 26). Sozomen says that "when Eudoxius found himself in possession of the Church of Antioch he ventured to uphold the Arian heresy. He assembled all those who held the same opinions as himself, among whom were Acacius, bishop of Cæsarea in Palestine, and Uranias, bishop of Tyre, and rejected the terms of 'like substance' and 'con-substantial,' under the pre- text that they had been denounced by the Western bishops" (H. E. bk. ii, ch. 19). Although he was deposed at the synod of Seleucia, yet he does not appear to have ever vacated his see; and on Macedonius being ejected from the see of Constantinople, says Sozomen, Eudoxius, who now despised that of Antioch, was promoted to the vacant bishopric (H. E. bk. ii, c. xiii.). Although he was deposed, Eudoxius continued in the see of Constantinople in 390, and retained it until his death in 370. Some fragments remain of a treatise of his De Incarnatione Dei Verbi.—Book, Eccl. Biog. v, 7; Neander, Ch. Hist. ii, 408-11; Cave, Hist. Lit. (Geneva, 1720), i, 138.

Hnvrgetes (Βενεργητης, a benefactor; see Jose- uphos, War, iii, 9, 8; Dioec. Sic. xi, 26; Xenoph. Anab. vii, 6, 26; sometimes Angilicius Euvgegetes), a common surname and title of honor (comp. Plato, Gorg. p. 506 C, and Stalib. ad loc.) in Greek states, conferred at Athens by a public vote (Demosth. p. 475), and so notorious as to pass into a proverb (Luke xxii, 25). It was perhaps given by those who had conferred benefits upon them, and was taken by several kings. See Ptolemy; Antiochus.

A king is mentioned by this title in the 2d prologue to Ecclesiasticus, wherein the translator states that, having gone into Egypt in the 88th year of king Euer- getes, and been there some time, he found this book by his grandfather ('Εν γαρ τ' ουδιόν και τραγουδιον ἵνα ἴτι ἐκ τοῦ Εβραίου βασιλέως παραγηγήσης εἰς άγγλι- τον, και συγγραφίας, εύορον ου μηκός παλαιός ἄφι- μαν). There can be no question that a king of Egypt is here meant; for, though a king of Syria was intended by this title, Alexander I, Antiochus VII, and Demetrius III being shown by their coins to have been styled Euergetes, no one of them reigned more than a few years. It is more probable, on prima facie grounds, that an Egyptian Euergetes is here spoken of, be it supposed that the text was self driven away by order of the emperor Marcusianus. Euthymius, called the Saint, by his reasonings brought back Eudocia to the orthodox faith, after which she spent the remainder of her days at Jerusalem, where she died in 460, defending her faith under the cross that her husband had charged her." Eudocia wrote several works: (1) Pho- tius quotes a translation in verse of the first eight books of the Old Testament. (2) There is also attributed to her a Life of Christ, composed of verses from Homer, translated into Latin by Echard, and published under the title of Homer's Works in the 15th century. (3) Homeros et Cenoms (Gr. and Lat. Francof. 1541, 1544; Par. 1578, 12mo; Lips. 1798, 8vo); an account of the martyr- dom of St. Cyrilian Greek and Latin, ed. by Bandini, in his Greco Eccles. et. Romana, 1, 130-168.—Hoff-
great difficulty has arisen in the attempt to decide which of these kings is intended. Everything hinges upon the manner in which the reigns were reckoned. There is no satisfactory evidence for supposing that Euergetes I counted his regnal years from a time before his accession; the evidence of the inscription at Abydos, the Pharaoh's tomb, is against it. The figure of a high date as the 27th year, is wholly inconclusive (p. 382, 388); besides, the 27th year is far short of the 38th.

To ascertain the official reckoning of the years of Euergetes II, during the latter part of his rule, and thus to determine from what date he then counted his regnal years, we must examine theMNEo-262_24020012 apxayW of his reign. From these Dr. Young collected a list of dates which appeared thirty years ago in his posthumous Rudiments of an Egyptian Dictionary. These dates are year 29, 34, 45, 46, 47 or 48, 52, 58 (p. 27-31). It is thus proved incontrovertibly that Physcon composed his years from such the commencement of his joint reign with Philometer, without any separate reckoning from his accession as sole king of Egypt. The hieroglyphic inscriptions, as we would expect, follow the same reckoning. Thus one of the Aps tablet gives the dates of the 26th, 27th, 31st, and 52nd years of the reign (Lepsius, The 2nd Egyptian Royal Dynasty, transl. by Dr. Bell, p. 41). We must not pass by the idea of Jahn (Einleitung, ii, 930 sq.), that the 38th year refers to the translator's age instead of a king's reign. It would be better to suppose an era. Three seem possible, the era of Simon, the era of Simopicus, that of Maccabaeeus, and the era of Dionysius used in Egypt. The era of the Seleucidae began B.C. 812, and its 38th year is therefore too early for the reign of Euergetes I; the era of Simon the Maccabaeeus begun B.C. 145, or a little later, and its 38th year is too late for the reign of Euergetes II. The era of Dionysius commenced B.C. 285 (Lepsius, Königslisth, i, c.), and its 38th year was therefore the last of Ptolemy II, Euergetes I coming to the throne in the next year. The construction that does not allow the year of the reign of Euergetes I to be intended, and thus necessitates some such the commencement of his joint reign, is certainly the more correct; but as Dr. Davidson, who has laboriously collected upon this question much criticism which we have shown to be needless, observes, we need not here look for correct grammar (Ihorn's Introd. 1856, ii, 102-106, 314), in this admission of his reading cannot be doubted, and the date mentioned would be B.C. 133. Other evidence for the time of the composition of Ecclesiasticus, which, of course, can be approximately inferred from that of the translation, is rather in favor of the second than the first Euergetes. See Ecclesiasticus; Jesus, Son of Sira.

Eugenius, a Greek theologian, lived in the first half of the 15th century. He began public life as an instructor in rhetoric, but his learning and eloquence soon procured him the first positions in the Church, and towards 1430 he was made archbishop of Ephesus. Two years later he accompanied the emperor (John Paleologus) to the Council of Florence. Here he not only represented his own diocese, but acted also for the patriarchs of Antioch and of Jerusalem. A zealous defender of the Church and against the innovations of the Roman, Eugenius was the only one who, at the close of the council, refused to recognise the pretensions of the pope and to sign the acts of the council. On his return to Constantinople the people received him with great enthusiasm. Even upon his death-bed in 1447, he solemnly adjured the Sultan to be merciful to his fellow-countrymen and to renounce the strife against the Latins. The numerous writings of Eugenius are of a polemical nature, directed against the Latin Church and those prelates of the Greek Church who were favorable to the former. Many have never been published, but they are recorded by Fabricius. We make mention here only of his printed works: Letter to the Emperor Paleologus, in which he advises the Greeks against the Council of Florence, and exposes the intrigues of the Latinists. This letter has been translated into Latin, with a reply by Joseph of Methone, in Labbe, Concilia, xiii, 617. An encyclical letter upon the same subject in Labbe, Concilia, xiii, 714; A Treatise on Liturgical Topics; A Profanity of the Pious; a fragment translated by Allatius, De Consens., iii. 8. — Hoefer, Nouv. Bioig. Gen. xvi, 706; Fabricius, Bibliotheca Graeca, xi, 670; Oudin, Script. Eccles. iii, 2934.

Eugenius Bulgaria, See Bulgaria.

Eugenius I, Pope, a son of the Roman Rufianus, was elected by the Romans Sept. 8, 654, as successor to Martin I, who had been sent into banishment to the barbarian tribe of the Franks by an order of the Council of Constantinople, and to Constantine II, who favored the schism of the Monothelites. Martin dying in the following year, Eugenius continued in dispute with the court of Constantinople till he died, June 1, 657, and was succeeded by Vitalianus. In order to establish peace with the Greeks, his legates made an arrangement with Peter, the Monothelite patriarch of Constantinople, that instead of one or two wills in Christ three should be assumed—one substantial, the two others natural.—Bower, History of the Popes, iii, 70.

II. Pope, a native of Rome, succeeded Paschal I Feb. 14, 924, in a period of great disorder, which occurred at Rome, owing to the corrupt state of the clergy and the administration of that city. To reform these, the emperor Louis the Good sent his son Lotharius to Rome, who corrected many abuses, which, by the account of Eginhard and other chroniclers, had grown to an enormous extent. He confirmed the right of electing the pope to the clergy and people of Rome; and the Council of Rome, which he convoked on Nov. 1, 826, issued many beneficent decrees for the restoration of Church discipline, for the establishment of schools, and against the worldly occupations of clergymen. He died Aug. 827. —Herzog, Real-Encyklop. iv, 214; Bower, History of the Popes, iv, 265.

III. Pope. He was a monk of Citeaux, disciple and friend of St. Bernard, and afterwards abbot of St. Anastasius. He was elected to the pontifical chair of Rome Feb. 27, 1145. He appears to have been a very sincere disciple of Bernard, and anxious, like him, to reform the manners of the clergy and consolidate the papal power. Through the greater part of his pontificate, owing to the turbulence of the Roman people [see Arnold of Brescia], he was unable to reside in the city. This circumstance, however, did not hinder his being so indulged as pope, as he was also invested with the functions of his office. During his reign the second crusade, under the preaching of St. Bernard, was undertaken. See Crusaders. Shortly after its mortifying failure the pontiff died at Tivoli, July 8, 1153. See Neander, Bernard und d. Zelt. 190-196; Herzog, Real-Encyklop. iv, 214.

IV. Pope, Gabriele Condolomicre, a native of Venice, succeeded Martin V as pope March 8, 1431. At the early age of twenty-four he was made by pope Gregory XIII, with whom he was related, bishop of Siena, and soon after (1408) cardinal. "He was a most amity pontificate. He drove away the powerful family of Colonna, including the nephews of the late pope, from Rome, charging them with having enriched themselves at the expense of the papal treasuries. He afterwards made war against the various lords of Romagna, who were supported by the Visconti of Milan. But the greatest annoyance to Eugenius proceeded from the Council of Basle, which had been convoked by his predecessor, and which protracted its sittings year after year, broaching doctrines very unfavorable to the papal supremacy. See Basle, Council of. Eugenius, who had been obliged to escape from Rome in disguise on a horse, returned to her, and took up his residence at Bologna in 1437, issued a bull dis-
solving the council, recalling his nuncio who presided at it, and convoking another council at Ferrara. See Ferrara. Most of the fathers assembled at Basle refused to submit, and summoned the pope himself to appear before them, to answer the charge of simony, schism, and others, and after a time proceeded against him as contumacious, and deposed him. Eugenius maintained the pope's powers, and pleaded for greater zeal on his part. Council met at Ferrara in February, 1438, in which, after annulling all the obnoxious decrees of the Council of Basle, he launched a bull of excommunication against the bishops who remained in that assembly, which he characterized as "a satanic conclave, which was spreading the abomination of desolation into the bosom of the Church." The Catholic world was divided between the two councils; that of Basle proceeded to elect a new pope in the person of Amadeus VIII of Savoy, who assumed the name of Felix V, and was solemnly crowned at Basle. Eugenius encouraged the Hungarians and Poles to break the peace they had solemnly sworn with the Turks, under pretence that their oaths were not valid without the sanction of the pope; he even sent cardinal Julian as his nuncio to attend the Christian army. The result was the battle of Varna, in which a large part of the Christian forces were annihilated, and king Ladislas of Poland and cardinal Julian lost their lives. Eugenius died at Rome Feb. 28, 1447. He left the Church in a state of schism between him and his competitor Felix, his own states a prey to war, and all Christendom alarmed at the progress of the Turkish Turks (Empiria Cypriaca). See Bowen, History of the Popes, viii, 238.

Eugippius, or Eugyppius, a learned monk, who lived at the close of the fifth and the beginning of the sixth century. He seems to have been the descendant of an Italian family, and was at first monk in the monastery of St. Severin (q.v.) at Farina, in Noricum (near the present Fuchlarn, in Austria), subsequently in the monastery of Castiello del Novo, belonging to the city of Naples. He is sometimes called "abbot," but it is doubtful whether he was, in the later years of his life, abbot of Lucullanum, or whether the name was only given him as an honorary title. He is the author of a life of his teacher, St. Severinus (Vita St. Severini, publ. by Caninius, Antig. Leg. t. vi, in Acta Sanctorum, Jan. 8; and by Welser, Augsb. 1504), which is a very important contribution to the Church history of Germany. He also compiled a collection of Thoughts and Sentences from the Holy Fathers of St. Augustine (Thesaur. Augustinianus, Basle, 1512; Venice, 1543), which was dedicated to the Roman virgin Proba. The author of the second work was formerly believed by some writers to be a different person from the author of the life of St. Severin, but this opinion has now been generally abandoned. Among the letters of Fulgentius (q.v.) or Ruspe, there is one addressed to Eugippius; a letter of Eugippius to Fulgentius is lost. Eugippius was also in literary connection with Dionysius Eusebius. There is a monastic rule which is ascribed to Eugippius, but it was early superseded by that of St. Benedict—Hieron, Real-Encyklop., iv, 217.

Euhemerus, a Greek historian, philosopher, and teacher, born about 500 B.C. He was not exactly known whether he was born at Messina (in Sicily), at Tegea (in the Peloponnesus), on the island of Cos, or at Agrigentum. He belonged to the Cyrenaic school, well known for its scepticism in religious matters. As a teacher of philosophers of this school, and more systematic, Euhemerus proposed a general interpretation of the myths, which has been justly compared with modern German Rationalism. An exposition of his doctrine is given by Diodorus Siculus. "Euhemerus," he says, "friend of Cassander (king of Macedon, B.C. 350-296), was instructed by this prince with certain missions to some of the southern countries. On his way he passed in the Indian Ocean a group of isles, of which the largest was called Pandiaxia. The Panchesans were distinguished for their piety, and honored the gods by sacrifice and offerings of gold and silver." They worshipped Jupiter, and such other gods as we meet with in Grecian mythology; but all these gods were but men (Lactantius, De Fatis Relig., i, 1). He then traveled to Greece, and finally to Athens and to the temple of Ennios. Of this translation only ninety-five lines now remain (Amsterdam, 1707). This work contains the history of the gods of the Panchesans, of the people and their manners, Euhemerus himself leaning in fact to the doctrines of the Panchesans. The form in which he presented his system was not entirely new, for he had adopted a similar course in his Republic; the germ of the system itself is to be found in some passages of Herodotus and Thucydides. The originality of Euhemerus consists in exaggerating, and in carrying out even to absurdity, the idea that Mythology was full of historical truths. He is the first who solved all mythology into history, maintaining that the gods were "originally illustrious kings, deified after death either by the spontaneous reverence of the people or by the cunning of the rulers." But mythology could not have been influenced from this, so much that bears on astronomy, the physical sciences, metaphysics, and, most of all, so much of fiction, that it is next to impossible to determine what in this confusion is truly historical. Some historians, like Diodorus Siculus, who have attempted to interpret mythology after the plan of Euhemerus, have proceeded only in subordinating the fanciful fiction for the imaginative popular legends. The pagan writers generally treat Euhemerus with severity. After the origin of Christianity, the views of Euhemerus, as containing the satires of a pagan on pagan religion, were made great use of in argument by the Church fathers against paganism, with some exaggerations, perhaps, of the doctrines of Euhemerus. Terullian, Clement of Alexandria, Minucius Felix, Cyriac, Lactantius, Crysostom, in arguing against paganism, adopt the view of Euhemerus, that the worship of great men was the original source of all idolatry, and was the birth to all the pagan divinities. In 1614, Vossius, following an idea of Tertullian, sought to show that the gods of paganism were the patriarchs of the O.T.: Seraph was Josep, Janus, Noah; Melchisedec, Naumi, etc. Huet, bishop of Avanches, discovered the O.T. in the Persian and Babylonian Aramaic, and in many other pagan divinities. Euhemerism, as a method of interpreting the ancient mythology, was supplanted by the symbolism of Kreuzer, a system infinitely superior to the other two above mentioned, but still containing much that is illusory and erroneous.—Hoekoff, Nover. Bisag. Generale, xvi, 828; Donaldson, History of Christian Literature and Doctrine (see Index); Gerlach, Historische Studien (Hamb. 1841, 8vo); Locky, History of Rationalism, i, 327; Brucker, Hist. Crit. Philosoph. i, 604 sq.; Clinton, Parti Helenici (Oxon, 1830), ii, 491; Meiners, Hist. d. d. Ges. Cc. xii, 1867; Porcher, Historia Greca, iii, 616; Hoffman, Bibliographisches Lexikon, i, 65; Milman, History of Christianity (New York, 1866), i, 49, note. See Mythology.

Eulalia, a saint of the Church of Rome, born at Merida, Spain, in other places. She was a descendant of a noble Christian family. When the general persecution of Christians began under Maximian, Eulalia, contrary to the directions given by the Church, voluntarily sought martyrdom by presenting herself to the prefect of Ilustania, demonstrating with him against idolatry and the persecution of Christianity, and by personally insulting him (spitting in his face, etc.).
EULALIUS

She was consequently burned alive Dec. 10 (or 12), 308 (or 304). Her relics were preserved at Merida, and many miracles were ascribed to them at the time of the invasion of the Goths and Vandals. Barcelona also claims the possession of the relics of St. Eulalia, and the legend of this saint is so much like that of Eulalia of Lyons that it is generally believed that the two are only one person, and that, as is common in the Church of Rome, the relics are claimed by two cities.—Hoefer, Nouv. Biog. Génér. xi, 708.

Eulalia, anti-Pope, lived in the first part of the fifth century. Created arch-cardinal by Innocent I, he was, after the death of pope Zosimus, near the close of the fourth century, through the influence of Simmacus, elected pope in opposition to Boniface I, who had been elected by a legal majority. For several months he contended against Boniface, but finally the emperor Honorius decided in favor of Boniface, being persuaded that Eulalia had been illegally elected, and gave orders to Simmacus, the governor of the city of Rome, to drive Eulalia from the city, and to put Boniface in possession of the see. Eulalia thereupon left Rome, and became bishop of Nepi. After the death of Boniface, at the election of Celestine I, the friends of Eulalia continued to fight against his election, but he promptly declined the papal dignity.—Bower, History of the Popes, i, 358 sq.; Hoefer, Nouv. Biog. Gén. xi, 709; Wetzler and Welte, Kirchen-Lex. iii, 756; Jaffé, Regesta Pontificum Romanorum. (J. H. W.)

Eulogia (εὐλογία). (1.) A term used in reference to the consecrated bread of the Eucharist. In the early Church, at the end of mass, the loaves offered by the faithful (not consecrated) were blessed by the celebrant, and distributed as a sign of communion, as they now are in the Greek Church, to those who had not communicated, and formerly to catechumens who were not admissible. They were called eulogies or antidoras, compensations, by the Council of Antioch in 341.

(2.) Eulogia was one of the early titles of the sacrament of the Lord's Supper, and appears to have been taken from the language of Paul when he says, 'The cup of blessing which we bless'—τὴν ποτήριον τῆς αὐλογίας. Down to the time of Cyril and Chrysostom, εὐλογία is used synonymously with σωματικία, but after the fifth century the term was appropriated to the bread set apart from the oblations for the poor and the clergy. To this custom we may refer the origin of private masses, and of communion in one kind. (3.) The practice of giving the eulogia to the poor has tended to explain the custom of non-communion which sprang up in the Church about the same time. The faithful who did not communicate retired from the assembly before the celebration of the Lord's Supper began, but without receiving the benediction of the minister. The eulogia were soon divided into two classes—communnicantes and non-communicantes—of which the Church knew nothing in earlier ages. The Council of Nantes, about A.D. 890, ordered the presbyters to keep some portions of the oblations in a proper vessel, so that those persons who were not prepared to communicate might, on every festival and Lord's day, receive some of the eulogia, previously blessed with a proper benediction.—Bingham, Orig. Eccl. bk. x, ch. ii, § 16; bk. xv, ch. iv, § 3; Ridley, Christ. Antiquities, p. 543, 578.

Eulogius, patriarch of Alexandria from 561 to 608. Pope Gregory I makes particular mention of him as a successful polemic against the Nestorians, Severians, Theodolians, Cainites, Asephtalians, and Agnoetans. Photius preserves numerous fragments of his writings. He died in 608.—Wetzler and Welte, Kirchen-Lex. iii, 753, 754; Fabricius, Bibl. Græca, (ed. Harles), x, 753.

Eulogius of Cordova was in 859 elected archbishop of Toledo, but, by the opposition of the Moors, he was not permitted to enter upon the duties of his office. He was a learned and brave defender of Christianity against Mohammedanism, and sealed his love for the cause by his own blood, being beheaded by the Moors, March 11, 859, for the assistance which he had rendered a young girl who had been converted and by her baptized in the Christian faith. His writings are: Memoriale Sanctorum sive libri iii (a Syriac translation of a work in which the glory of the Spanish martyrs of his time is recorded;—Exortatio ad martymrium sive documentum martylia re Floram et Marianum virgines confessorum;—Apologieus pro martyribus adversus columbanii), in which he denies the assertion that the Christians desired martyrdom. He addressed letters to the bishop William of Pampeluna, his friend Alvarus, and others. His remains are to be found in Schott, Hispania Illustrata, vol. iv; in the Bibliotheca Patrum, xxiv, 242; also in Migne, Patrol. Lat. tom. cxv. A biography of Eulogius, written by his friend Alvarus, is also in Migne, t. cxv.—Callier, Hist. des Aut. St. &c. xiv, 212; Wetzler u. Welte, Kirchen-Lex. iii, 754, 755; Hoefer, Nouv. Biog. Gén. vi, 719; Herzog, Real-Encyklop. iv, 220; Fabricius, Bibliotheca Graecia, iv, 257; Clarke, Sacred Literature, vol. ii.

Eulogius. See FUNERAL.

Bu'nat'an (Bu'natan, t. El'ana, Vulg. Eman-
gos), given (2 Esd. viii, 45, where it is perhaps but an original mishap of the word Emmaam), was the special representative of the king of Persia, and the principal deputy directed by Ezra to procure priests for the returning party of exiles; apparently a corruption for the second El'hamath (q. v.) of the Heb. text (Ezra viii, 16).

Bu'Cash (Bu'shach, good victory, originally the name of one of the Nenadis), the mother of Timothy, and the wife of a Greek; spoken of (2 Esd. i, 6) as possessing unfilled faith, and described in Acts xvi, 1 as a believing Jewess (יוועו ותאיא פור). A.D. ante 47. See TIMOTHY.

Bu'menēs (Bu'menes, well-disposed) II, king of Pergamus, and son of Attalus I. His accession to the throne is fixed by the death of his predecessor to B.C. 197 (Clinton, F. H., ii, 408). He inherited from his father the friendship and alliance of the Romans, and when peace was made in B.C. 196 with Philip V, king of Macedonia, he was presented with the towns of Oreus and Eretia in Euboea (Livy, xxxiii, 34). In B.C. 191 Eumenes obtained the censure of Antiochus (Livy, xxxvi, 43-45), and, seeing more than ever the policy of adhering to the Romans, he, in the following year, rendered them valuable assistance at the battle of Magnesia, commanding his own troops in person (Livy, xxxvii, 39-44; Justin, xxxi, 8; Apian, Syr. 137). As a reward for his services he was appointed governor of Syria (Livy, xxxvii, 39). Eumenes set out for Rome to ask some rewards for his services. The senate were pleased with the modesty of his behavior, and conferred upon him the Thracian Chersonese, Lyssamachia, both Phrygias, Mysia, Lycocnia, Lydia, and Ionia, with some exceptions. One province only would he much enlarged his do-
misions, but by this large addition to his territory he found himself one of the most powerful of monarchs (Livy, xxxvii, 56; xxxviii, 39; Polyb. xxii, 27; Apian, Syr. 44). About the same time he married the daughter of Attalus I, king of Paphlagonia (Livy, xxxviii, 39). Eumenes continued in good favor with the Romans for several years, and repeatedly sent emba-
lises to them. In B.C. 172 he again visited Rome, and in returning nearly lost his life through the treach-
eroy of Perseus, king of Macedonia (Livy, xiii, 11-16). In B.C. 164 Eumenes and the Romans entered into a corre-
spondence with Perseus, by which act he lost the favor of the Romans (Polyb. Frag. Vat. xxix, Didot ed. p. 39, 40), and two years after he was forbidden to enter Rome (Livy, Epit. xlvii). The latter part of his reign was disturbed by frequent wars with Prusias, king of Bithynia. The Romans favorably received his brother Attalus, apparently for the purpose of exciting him
EUNOMIANS

against Eunomius, who had sent him to Rome. "Attalus, however, was induced, through the entreaties of a physician named Stratus, to abandon any such ideas. Eunomius thus managed to keep on friendly terms with his brother and the Romans till his death (Liv y, 19, 29; Polyb. xxxi, 1-3; xxxi, 9; xxxii, 5). The exact place where he died is not mentioned by any writer, but it must have taken place in B.C. 159 (Clinton, F. H., iii, 406). Eunomius II much improved the city of Pergamus by erecting magnificent temples and other public buildings. His greatest act was the foundation of a splendid library, which rose to be a rival in extent and magnificence to the library of Alexandria (Strabo, xiii, 4, Didot ed. p. 538; Pliny, xxii, 11 [see Smith, Dict. of Class. Biog. s. v.]. See Pergamus.

The large ascension of territory which was granted to Eunomius from the former dominions of Antiochus is mentioned I Macc. viii, 8, but the present reading of the Greek and Latin texts offers insuperable difficulties. "The Romans gave him," it is said, "the country of India and Media, and Lydia, and parts of his (Antiochus's) fairest countries (ἀπὸ τῶν καλῶν χωρῶν αὐτοῦ)." This is particularly out of the question, and a portion of Media evidently assigned to Antiochus or the Romans. Various conjectures have been proposed to remove these obvious errors; but, though they may reasonably be allowed that Mytilus had stood originally for Media (Ἰωνία for Ἰωνία, Michaelis), it is not equally easy to explain the origin of ἵππων ἱππότων from the same source, and standing to make everything clear, which was his principal aim. In short, he advocated an intelligent super-realism, in which a rationalistic tendency was concealed, something like what we find in Socinus" (Neander, Hist. of Dogma, ed. Ryland, i, 264). The following account of his confession of faith in Eunomius is given by Cave (vol. i, p. 140), from a manuscript in archbishop Tennison's library: "There is one God, uncreated and without beginning, who has nothing existing before him, for nothing can exist before what is uncreated; nor with him, for what is uncreated must be one, nor with God, for God is a simple and uncompounded Being. This one simple and eternal Being is God, the Creator and Ordainer of all things. For God created, begot, and made the Son only, by his direct operation and power, before all things, and every other creature; He was uncreated, and uncreated like himself, or imparting any part of his own proper substance to his Son; for God is immortal, uniform, and indivisible, and therefore cannot communicate any part of his own proper substance to another. He alone is unbegotten, and it is impossible that any other being should be formed of an unbegotten substance; therefore he used his own substance in begetting his Son, but his will only; nor did he beget him in the likeness of his substance, but according to his own good pleasure. He then created the Holy Spirit, the first and greatest of all spirits, by his own power and operation mediately, yet by the immediate power and operation of the Son. After the Holy Spirit, he created all other things in heaven and in earth, visible and invisible, corporeal and incorporeal, mediately by himself, by the power and operation of his Son."

The adherents of Eunomius, who were very numerous, were, together with those of Attius, condemned as heretics by the second Ecumenical Council. After the death of Eunomius, the Eunomians fully separated from the communion of the predominant Church. Some factions called themselves after prominent teachers, as Eutychius, Theophilus, and others. They gave them a number of nicknames, as ὁμοθεσία, ἀσυνομία, they baptized, not upon the Trinity, but upon the death of Christ. They did not exist long as a sect, but soon died out, in consequence of internal dissensions and numerous secessions to the dominion of the West.

EUPHRATES

case is prevalent at this day in Russia, among the sect of the Skoptzi (q. v.). In the Council of Nicæa persons of this class were condemned, and excluded from holy orders. See CELEBRY and VALERIANS.

Buo'diās, or, rather, Buodía (Eudocia, a good journey; for, as found in Phil. ix. 2, Eudocias is fem., since the name refers to the empress who is associated by name by αὐρατός and αὐρατίας), a female member of the Church at Philippi, who seems to have been at variance with another female member named Sintyche. A.D. 57. Paul describes them as women who had "labored much with in the Gospel," and implores them of others to mind (Philipp. iv. 2, 3).

Buodius. See EUDODIUS.

Euphemites. See MESSALIANS.

Euphratēs is the Greek form (Ἰππάρης) of the river designated in Heb. by the name Phrath or Phrathā (ךְֶּפֶר), which Gesenius regards as the "stream of water," referring to the present Arabic name Frāh as having that signif.; but Fürst refers to an obsolete root indicating the impetuous character of the stream), and is probably a word of Arain origin, the initial element being 'āth, which is in Sanscrit aṭu, in Zend āt, and in Greek αθό, and the second element being frōt, the particle of abundance. The Euphrates is thus "the good and abounding river." It is not improbable that in common parlance the name was soon shortened to its modern form of Frāt, which is almost exactly what the Hebrew literature expressions. But it is most frequently denoted in the Bible by the term עפרות, "broad stream," i.e. "the river," the river of Asia, in grand contrast with the shortlived torrents of Palestine, being by far the most considerable stream in that part of the continent. Thus, in Exod. xxi. 31, we read, "from the desert unto the river." (comp. Isa. vii. 7). In like manner, it is termed in Deut. i. 7 "the great river." The Euphrates is named in the cuneiform inscriptions (q. v.).

1. It is first mentioned in Gen. ii, 14, where the Euphrates is stated to be the fourth of the rivers which flowed from a common stream in the garden of Eden. Its celebrity is there sufficiently indicated by the absence of any explanatory phrase, such as accompanies the names of the other streams. See Eden. We next hear of it in the covenant made with Abraham (Gen. xv. 18), where the whole country from "the great river, the river Euphrates," to the river of Egypt is promised to the chosen race. In Deuteronomy and Joshua we find that this promise was then well established and at the time of the settlement in Canaan (Deut. i. 7; xx. 4; Josh. i. 4); and from an important passage in the first book of Chronicles it appears that the tribe of Reuben did actually extend itself to the Euphrates in the times anterior to Saul (1 Chron. v. 9). Here they came in contact with the Hagarites, to appear upon the Middle Euphrates in the Assyrian inscriptions of the later empire. It is David, however, who seems for the first time to have entered on the full enjoyment of the promise by the victories which he gained over Hadadezer, king of Zobah, and his allies, the Syrians of Damascus (2 Sam. viii. 6; 1 Chron. xviii. 8). The object of his expedition was "to recover his border," and "to establish his dominion by the river Euphrates," and in this object he appears to have been altogether successful, in so much that Solomon, his son, who was the king of war, but only in and by the service of his father's dominions, is said to have "reigned over all kingdoms from the river (i.e. the Euphrates) unto the land of the Philistines and unto the border of Egypt" (1 Kings iv. 21; comp. 2 Chron. ix. 26). Thus, during the reigns of David and Solomon, the dominion of Israel actually attained to the Euphrates, as the result of the original promise, the Euphrates forming the boundary of their empire to the north-east, and the river of
EUPHRATES

Egypt to the south-west. This wide-spread dominion was lost on the disruption of the empire under Rehoobam; and no more is heard in Scripture of the Euphrates until the expedition of Nebuchadnezzar against the Babylon, from the reign of Josiah. The "Great River" had meanwhile served for some time as a boundary between Assyria and the country of the Hitites (see ASSYRIA), but had repeatedly been crossed by the armies of the Ninevite kings, who gradually established their sway over the countries upon its right bank. The crossing of the river was always difficult, and at the point where certain natural facilities fixed the ordinary passage the strong fort of Carchemish had been built, probably in very early times, to command the position. See CARCHEMISH. Hence, when Nebuchadnezzar attempted to establish the permanent conquest of Syria, his march was directed upon "Carchemish by Euphrates" (2 Chron. xxxv, 20), which he captured and held, thus extending the dominion of Egypt to the Euphrates, and renewing the old glories of the Bameside kings. His triumph, however, was short-lived. Three years after his "day of battle" (1 Kings xxiv, 7) had inherited the Assyrian dominion in these parts, -made an expedition under Nebuchadnezzar against Necho, defeated his army, "which was by the river Euphrates in Carchemish" (Jer. xlv, 2), explored all Syria to and from the kings of that country came no more out of his land, for the king of Babylon had taken from the river Euphrates unto the river Euphrates all that pertaineth to the king of Egypt"

These are the chief events which Scripture distinctly connects with the "Great River." The prophets make use of the River Euphrates as a large and picturesque description of the Assyrian power, as the Nile with them represented the power of Egypt; thus, in Isa. viii, 7, "The Lord bringeth up upon them the waters of the river, strong and many, even the king of Assyria" (Jer. ii, 18; comp. Rev. ix, 14; xvi, 42). It is included among the "rivers of Babylon," by the side of which the Jewish captives were remembered Zion and "weep" (Psa. cxxxix, 1); and no doubt is glanced in at the threats of Jeremiah against the Chaldean "waters" and "springs," upon which there was to be a "sorrows" that should day of Babylonia (Jer. i, 19; ii, 26). The fulfilment of these prophecies has been noticed under the head of CHALDEA. The river still brings down as much water as of old, but the precious element is wasted by the neglect of man; the various water-courses along which it was in former times conveyed dry in the main channels have dried up, and the water stagnates in unwholesome marshes. It is remarkable that Scripture contains no clear and distinct reference to that striking occasion when, according to profane historians (Herod. i, 191; Xenoph. Cyrop. vii, 5), the Euphrates was turned against its mistress, and used to effect the ruin of Babylon. The brevity of Daniel (v, 50, 51) is perhaps sufficient to account for his silence on the point; but it might have been expected from the fulness of Jeremiah (ch. 1 and ii) that so remarkable a feature of the siege would not have escaped mention. We must, however, remember, in the first place, that a considerable part of it has been purposely withheld, in order that the Babyloni"... and the entire text continues.
EUPHRATES

Ush stream; for, except in the height of the flooded season, it approaches 5 miles an hour; it varies from 24 to 93 feet in width, and during the height of its course under 3 than above. Its general description for some distance below Erzingan is that of a river of the first order, struggling through high hills, or rather low mountains, making an exceedingly tortuous course as it winds round its upper portion, is inclosed between two parallel ranges of hills, covered for the most part with high brushwood and timber of moderate size, having a succession of long, narrow islands, on several of which are moderate-sized towns; the borders of this ancient stream being still well inhabited, not only by Bedouins, but by permanent residents. The following towns may be named: Sumeis-at, Haoram, Rimkala, Bir, Giaber, Deir, Rava, Anna, Hadisa, El-Uus, Jibba, Hit, Hillah, Lemun, Korna, and Bussora. The scenery above Hit, in itself very picturesque, seems greatly heightened by the occurrence of ancient irrigating aqueducts, beautiful specimens of art, which are attributed by the Arabs to the Persians when fire-worshippers: they literally cover both banks, and prove that the borders of the Euphrates were once thickly inhabited by a highly civilized people. The greater part of the stream below Hit is the last of these. The country now becomes flatter, with few hills; the river winds less; and the banks are covered with Arab villages of mats or tents, with beautiful mares, cattle, and numerous flocks of goats and sheep. From Hit to Babylon the bed of the river is almost the only kind of habitation to be seen. This distance is cultivated only in part; the rest is desert, with the date-tree showing in occasional clusters. In descending, the irrigating cuts and canals become more frequent. Babylon is encircled by two streams, one above, the other below the principal ruin, beyond which they unite and produce abundance. For about thirty miles below Hillah both banks have numerous mud villages, imbedded in date-trees: to these succeed huts formed of bundles of reeds. The country lower down towards Lemun is most elevated above the river; irrigation is therefore easy: in consequence, both banks are covered with productive cultivation, and fringed with a double and nearly continuous belt of luxuriant date-trees, extending down to the Persian Gulf. At one mile and a half above the town the Deuwania is the first considerable deviation from this high river; irrigation here begins. Another takes place 22 miles lower; and nine miles farther—at Lemun—it again separates into two branches, forming a delta not unlike that of Damietta, and, when the river is swollen, inundating the country for a space of about 40 miles in width with a shallow sheet of water, forming the Lemun marshes, nearly the whole of which is covered with rice and other grain the river recedes (in June). Here mud villages are swept away by the water every year. Below Lemun the Tigris sends a branch to the Euphrates, which is thus increased in its volume, and, turning to the east, receives the chief branch of the Tigris, thence running in united stream, under the name of the Shat-ul-Arab, as far as the sea (the Persian Gulf). In this last reach the river has a depth of from 3 to 5 fathoms, varies in breadth from 500 to 900 yards, and presents banks covered with vegetable cultivation, having an appearance at once imposing and majestic. The length of that part of the river, reckoning from Bir to Bussora, navigable for large vessels at all times of the year, is 143 miles. It is very abundant in fish. The water is somewhat turbid, but, when purified, is pleasant and salubrious. The Arabian sets a high value on it, and name it Morad-Su; that is, Water of desire, or longing.

The annual inundation of the Euphrates occurs in the month of May. The river begins to rise in March, and continues rising till the latter end of May. The consequence increase of its volume and rapidity is attributable to the early rains, which, falling in the Armenian high mountains in winter, are swiftly conveyed and also, in the main, to the melting of the winter snows in those lofty regions. About the middle of November the Euphrates has reached its lowest ebb, and, ceasing to decrease, becomes tranquil and sluggish. The greatest rise of the Tigris is earlier, since it drains part of the snows of the southern chain of mountains. The Tigris scarcely ever overflows [see Hiddekel], but the Euphrates inundates large tracts on both sides of its course from Hit downwards. The great hydraulic works ascribed to Nebuchadnezzar (Abyden. Pr. 8) had for their great object to control the inundation by turning the waters through sluices into canals prepared for them, and distributing them in channels over a wide extent of country. "When the Euphrates," says Rich, "reaches its greatest elevation, it overflows the surrounding country, fills up, without the necessity of embanking, a vast number of miles below Hit, and the reception of its waters, and thus admirably facilitates the operations of husbandry. The ruins of Babylon are then inundated, so as to render many parts inaccessible, the intermediate hollows being converted into marshes" (Babylom and Persepolis, p. 54). Babylon, to which the waters of the Euphrates are most loaded with mud, are in the first flocks of January; the gradual melting of the snows in early summer, which preserves the high level of the waters, does not at the same time contribute much sedimentary matter. From numerous experiments made at Bir in December and January, 1886, I found the maximum of sediment mechanically suspended in the waters to be equal to one eightieth part of the bulk of fluid, or every cubic inch of water contained one eightieth part of its bulk of suspended matters; and from experiments made at the river's source, are finally deposited in the Lemun marshes. In navigating the river in May, 1886, the water flowing into the marshes was colored deeply by mud, but left the marshes in a state of comparative purity" (Recherches, p. 110, 111).

The Euphrates has at all times been of some importance as furnishing a line of traffic between the East and the West. Herodotus speaks of persons, probably merchants, using it regularly on their passage from the Mediterranean to Babylon (Her. i. 185). He also describes the boats which were in use upon the stream (i. 194), as means for conveying "the wine, which seems to have thought was furnished by Armenia. It was, however, more probably Syrian, as Armenia is too cold for the vine. Boats such as he describes, of wicker-work, and coated with bitumen, or sometimes covered with skins, still abound on the Euphrates (Chambers' Euphrates ii. 590-591). Men wishing to swim across or along the stream simply throw themselves upon an inflated skin and thus float, precisely in the manner described by ancient writers, and depicted on the Assyrian sculptures (Botta, Nivesi, a, p. 238 sq.). Alexander appears to have brought to Babylon by the Euphrates route vessels of some considera
EUPHRATES

The circumstances of this gale are described with much particularity, and they admit abundant illustration from the experience of modern seamen in the Levant. In the first place it came down from the island (εἰς ἀναβρ.). And therefore must have blown more or less from the southeast, since it was heeling along the south coast, not far from Mount Ida, and on the way from Fair-Havens towards Phenicis. So Captain Spratt, after leaving Fair-Havens with a light southerly wind, fell in with a strong northerly breeze blowing direct from Mount Ida" (Smith, Voyage and Shipwreck, p. 141). The wind is described as being like a typhoon (mod. τυφόν, I. e. "striker") or whirlwind (ψυκτικός, A. V. "tempestuous"); comp. τύφων, Aristot. Meteor. 1; De Mundo, iv, 18); and the same authority speaks of such gales in the Levant as being generally "accompanied by loud thunder and by terrific gusts and squalls from the southeast" (Conybeare, Life and Epistles of St. Paul, 1856, ii, 401). It is also observable that the change of wind in the voyage before us (xxvi, 13, 14) is exactly what might have been expected; for Captain J. Stewart observes, in his remarks on the Archipelago, that "it is always safe to anchor under the lee of an island with a northerly wind, as it dies away gradually, but it would be extremely dangerous with southerly winds, as they almost invariably shift to a violent northerly wind" (Purdy's Sailing Directory, pt. ii, p. 61). The long duration of the wind in the fourth book should enable us to describe the overclouded state of the sky ("neither sun nor stars appearing,") ver. 20, and even the heavy rain which concluded the storm (τοίρον τέρων, xxvii, 2), could easily be matched with parallel instances in modern times (see Smith, Voyage and Shipwreck, p. 144; Conybeare, Life and Epistles of St. Paul, i, p. 118; ii, p. 188). We have seen how this wind was more or less northerly. The context gives us full materials for determining its direction with great exactitude. The vessel was driven from the coast of Crete to Claudia (xxvii, 16), and apprehension was felt that she would be driven into the African Syrtis (v. 17). Combining these two circumstances with the fact that she was less than half way from Fair-Havens to Phenicia when the storm began (v. 14), we come to the conclusion that it came from the N.E. or E.N.E., and hence might fitly be termed north-easter. This is quite in harmony with the natural swell of the Euripus (Vulg. Euro-epaulet), i.e. north-east wind, the modern Greek term νότιος Ευρυκός (of those seas), which is regarded as the true reading by Bentley, and is found in some of the best MSS.; but we are disposed to adhere to the received text, more especially as it is the more difficult reading, and the phrase used by Luke (ἐν ἐκτιβοκήσει) seems to point to some peculiar word in use among the sailors. Alford thinks that the name of the wind was εὐρυκός, but that the Greek sailors, not understanding the Latin terminations, corruptly read the word into εὐρακοκός, so Luke wrote it (Comment. in loc.). Such winds are known to modern mariners in the Mediterranean by-
the name of Lecanenti. They are not confined to any single point, but blow in all directions from the north-east round by the north to the south-east. The "great wind" or mighty tempest experienced by the prophet Joseph, and Joppa to Tarshish (1, 4; comp. the destructive "east wind" of Ps. xxlii, 7) appears to have been one of these gales (comp. Josephus, War, iii, 8, 3, who calls it the "black north wind," μαυρομπήσων). See Wind.

Europe, the smallest, but also the most highly civilized and most prominent of the three great divisions of the old continent.

I. It is separated from America on the west and northwest by the Atlantic; from Africa on the south by the Mediterranean; and from Asia by the Archipelago, Sea of Marmora, Black Sea, Caucasian ridge, Caspian Sea, Ural River and Mountains, and the Kara River. It is in the form of a huge peninsula, projecting from the north-west of Asia. Its extent from Cape St. Vincent on the south-west to the mouth of the Kara River on the north-east is 8400 miles; and from Cape Nordkust, the most northerly point of the Scandinavian main land, to Cape Matapan, the southernmost point of Greece, 2400 miles. The continent of Europe, irrespective of islands, lies within lat. 32° 1° — 71° 6' N., and long. 9° 30' W. — 69° 30' E. Its area is estimated at nearly 5,800,000 square miles; and its coastline is 54,200 miles. In proportion to the area, it contains more than half of any other great natural division of the globe, is estimated at 19,500 miles, giving a proportion of 1 linear mile of coast for every 190 square miles of surface. It had in 1888 a population of 330,000,000, which gives an average of about 87 for every square mile.

II. Church History.—Europe early received the seed of Christianity from the apostles themselves. The territory embraced in what is now Turkey, Greece, and Italy was for many years the scene of the apostolic labors of Paul, who founded a number of churches in Europe, and sent the Gospel to the Romans, Thessalonians, and Thessalonians. Whether he visited Spain, England, and other countries of Europe, as has been asserted by some writers, is doubtful. Peter is claimed by the Roman Catholic Church to have been for twenty-five years bishop of Rome. The fact of his having been in Rome, and having resided for several years centum over the Church there, is generally recognised by most of the historians. The share of the other apostles in the Christianization of Europe is doubtful, and the accounts of their missionary labors rest more on legends than historic documents (see the articles on each of the apostles, and each of the Evangelical Churches); but it is a well-established fact that, even before the close of the first century, numerous churches were established in Turkey, Greece, Malta, Italy, France, Spain, and Southern and Western Germany. The growing authority of the bishops of Rome [see Roman Catholic Church] soon made Europe the centre of the Christian world. When Constantine became a Christian, the Christianization of all that portion of Europe which belonged to the Roman empire made rapid progress, and was soon completed. In the fifth and sixth centuries, Spain, France, Scotland, England, and several German tribes became Christian. Christianity steadily advanced in all directions, but it was not until the sixteenth century that every pagan people of Europe had adopted the Christian doctrine. In the mean while, however, part of the Christian territory on his east from Rome to Constantinople, and several German tribes became Christian. Christianity steadily advanced in all directions, but it was not until the sixteenth century that every pagan people of Europe had adopted the Christian doctrine. It will be seen from the above table that the Eastern churches (or, more particularly, the Greek Church) prevail in Russia, Turkey, and Greece. In Turkey the government is Mohammedan, but the majority of the population belong to the Greek Church. The Roman Catholic Church prevails in Portugal, Spain, France, the South German States, Austria, Italy (inclusive of the Papal States, San Marino and Monaco), and Belgium, while Protestantism is the prevailing religion in the North German Confederation, Switzerland, Holland, Great Britain, Denmark, Sweden, and Norway. (A. J. S.)

Eusebius, a name given to the Arians from Eusebius of Nicomedia. See Eusebius of Nicomedia.

Eusebius, the only pope of this name, and, according to a tradition, the son of a physician, became bishop of Rome in 310, after the death of Marcellus. The time of his pontificate is variously stated at from four and a half to eight months, and the name of his pontificate is recorded as Bishop of Rome. According to an epitaph published by Baronius (but which Baronius himself refers, not to the pope, but to some priest of the same name), the lapsus (q. v.) in Rome demanded immediate absolution, which Eusebius refused. Tumults arose, in consequence of which Eusebius was exiled by the usurper Maxentius to Sicily. He is remembered as a saint on the 26th of September. Several decrees circulating under his name, as well as three letters to the bishops of Gaul, to the Egyptians, and to the bishops of Tuscia and Campania, are spurious. Herzog, Real-Encyklopädie, iv, 738; Acta SS., 26 Sept.; Pagli, Breveinum pontific. Roman. (i. p. 65); Bower, Hist. of the Popes; Ersch u. Gruber, Allgem. Lexikon. (sect. i, vol. xli. p. 445).
EUSEBIUS OF ALEXANDRIA. I. In the Eastern churches, a number of homilies, ascribed to one Eusebius of Alexandria, enjoyed a great reputation, especially during the 6th and 7th centuries. They are ei-
ther authentic, as part of the liturgy of the Eastern Church, or discussions of moral and practical ques-
tions. Their author is variously designated as monk, bishop, archbishop, or papa; most frequently bishop or archbishop of Alexandria. An ancient biography, published by cardinal Mai (Scrip. Rom. ix, p. 105), represents him as a saintly monk living near Alex-
dria, and endowed with the faculty of working mir-
cles, who became successor of Cyril in the see of Alex-
dria, transferred his episcopal functions, after seven years (another reading says twenty years), to a noble Alexandrine named Alexander, and died in the retire-
ment of Aegyptus, and 'That this account is false we
know from the list of bishops of Alexandria, which no-
where leaves room for a bishop Eusebius. According
to Thilo (Oeber die Schriften des Eusebii von Alex-
drien und des Eusebii von Emesa, Halle, 1882), the au-
thor was either a Montano or an Origenist. He
was known for his controversial writings on the name of the four "tall brothers," and distinguished among the monks of the Nilotic desert for pietistic and theological learning, or a presbyter at the court of Justinian I, who, honor-
ed with the title Papa, took an active part in the dog-
matic controversies of the 6th and 7th centuries (see Herzog's Real-Encyklop., s. v.) thinks that neither of those two men has all the qualifications which one
would expect from the author of the Homilies. The
only thing certain, in his opinion, is that the homilies
were compiled in the 5th or 6th century. The number of references that are present in the collection is twenty-one.
Some of them were published at Paris, 1575, and Ant-
werp, 1692. Augusti (Euseb. Emes. que superuent opus-
cula, Elberfeld, 1829) wrongly attributed three of the homilies (of the dramatic class) to Eusebius of Emesa. Thilo, in the work already mentioned, combated the view for the present, and Eusebius of Emesa it is that, in 1834, he added an edition of a new homily on astrology. His
views were confirmed by cardinal Mai (Scrip. Rom.
ix), who, from a Vatican manuscript, published a num-
ber of homilies for the first time. A homily on time,
which has never been printed, is to be found in the
Vienna Imperial Library.—Herzog, Real-Encyklop., iv,
226; Fabricius, Bibliocr. (ed. Harles), vii, 409. (A.
J. S.)

II. Eusebius, bishop of Laodicea, being a native of
Alexandria, is sometimes called Eusebius of Alexan-
dria. EUSEBIUS, with the surname BRUNO, after 1047
bishop of Angers. Little is known of his early life. Soon after becoming bishop he was suspended with a
number of other bishops, being suspected, it is thought,
of simony. But he seems to have fully justified him-
self, for in 1049 he was present at the reformation of
the council of Rheims, and was chosen a member of the
committee to welcome pope Leo IX in the name of
the council. In a letter written from Rome (1049), he
complained of the measures taken by the pope against
Berengar, who, in his opinion, was free from any her-
ey. Berengar himself counted Eusebius among his
patrons, and it was the advice of Eusebius which in-
duced him to take, at the Synod of Tours in 1064, the
oath which the synod demanded from him. One of the
reformed bishops, who is known as the "saint" of the
heresy, calls Eusebius one of the chief renewers of
the heresy which finds in the Lord's Supper nothing
but a shadow and an image of the body of Christ. But
when count Geoffroi d'Anjou, the powerful protector
of the French heretics, died (1069), the courage of Eu-
sebius was at an end. At the Episcopal Convention
of Angers in 1062 he showed an inclination to accept
the doctrine of the Church, though he still made a
profession of personal friendship for Berengar. The
same indecision shows itself in the celebrated letter,
written between 1068 and 1066, in which Eusebius de-
clines to act as arbiter at a theological disputation
which Berengar desired to hold with the priest Gasp
frid Marnis near St. Omer. He expresses his regret in the
letter (which is regarded by Lessing as the abstruse the-
ological essay of the 11th century) deprecates new
dogmatic explanations concerning the Eucharist, and
declares that we ought not to appeal to the fathers, but
to adhere to Scripture, and abide by the simple
wordings of the sacred books; and he asserts that the body and blood of Christ as a duty of pious faith. The letter may be
found in Menandrus (Augustini c. Iuliani operum imper-
fecti l. 2 priores), with arbitrary alterations in De Roye
(Vita, heres. et poenit. Berenger.), and Boulay (Hist.
Univm. Paris.). Two other letters of Eusebius are given by a modern (Ber. T. P., 12). Eusebius, in 1071, died at
Angers Aug. 27, 1061.—Herzog, Real-Encyk. iv,
228; Lessing, Werke (ed. Lachmann), vol. vii;
Hoefer, Nouv. Bibl. Génér. xvi, 778; Neander, Church
History (Torrey), iii, 576; Neander, Hist. of Dogmas
(Ryland), ii, 460. EUSEBIUS OF CESAREA, the "father of Church his-
tory," was born about 270. The place of his birth is
not certainly known, but it is supposed to have been
Cesarea in Palestine. Coming to Antioch towards
the end of the 3d century, he there studied the Scrip-
tures under the care of St. Marcianus. Through the
blessings of God, it is said, the apostolic foundation
of his return to Cesarea he was ordained by Agapetus,
then bishop of that place. Here he became intimate
with Pamphilus, a learned presbyter, who was head of
a divinity school at Cesarea, and who had gathered
many books illustrative of Scripture and theology, es-
pecially the writings of Galen. In the 3d century his
life and his work were very fruitful. From the 4th cen-

was a considerable contest amongst the bishops relative to a creed or form of faith. Eusebius proposed a formula in accordance and orthodoxy, which received the general commendation both of the bishops and of the emperor himself. Something, notwithstanding, seeming to be wanting in the creed, to confute the impunity of the new opinion, the fathers of the Nicene Council determined that these words, 'Very God or Very Deity, untainted, being of one substance with the Father,' should be added. They also annexed anathemas against those who should assert that the Son of God was made of things not existing, and that there was a time when he was not. At first, indeed, Eusebius refused to admit the tenets of the church of Antioch, and the importance of the word was explained to him by the other bishops he consented, and, as he himself relates in his letter to his dioceses at Cesarea, subscribed to the creed (Socrates, H. E. i. 8).

Some affirm that it was the necessity of circumstances, or the fear of the emperor, and not the conviction of his own mind, that induced Eusebius to subscribe to the Nicene Council. Of some present at the synod this might be believed, but we cannot think it of Eusebius, bishop of Cesarea. After the Nicene Council, too, Eusebius always condemned those who asserted that the Son of God was not of the same essence as the Father, and he likewise affirms the same concerning him, and, though he frequently mentions that Eusebius subscribed to the Nicene Council, nowhere intimates that he did it insincerely. Had Eusebius subscribed to that council, not according to his own mind, but fraudulently and under pressure, we would not have so frequently heard that the letter we have mentioned to his diocese at Cesarea, and therein ingeniously profess that he had embraced the faith which had been published in the Nicene Council!" (For details, see Socrates, Hist. Eccl. i. 8, 9.)

After the deposition of Euthalithus (q. v.), A.D. 381, the see of Antioch was offered to Eusebius, but he declined the honor, probably in fear of tumult, and even bloodshed, from the excited state of the popular mind in Antioch. The conduct of Eusebius in this case greatly gratified the emperor Constantine, who wrote him a letter praising his prudence, and saying that he was worthy of being bishop, "not of the city, but of almost the whole world" (Socrates, H. E. i. 24).

In the course of the Arian dispute, Eusebius, though theoretically orthodox, substantially acted with the Arians to a great extent. Even in his Church History he mentions Eusebius of Nicæa as subscribing to the Arianism, and ending his book with A.D. 324. He presided at the Council of Tyre, A.D. 335 (Epiphanius, Hær. ixvii. 7), summoned for the trial of Arians, and joined in the condemnation of that great man (see art. Athanasius, vol. i. p. 565). The prelates assembled at Jerusalem, and deputed Eusebius to the emperor Constantine, to obtain his approval of their decision, and he seems to have used his influence with the emperor to secure both the recall of Arius and the exile of Athanasius.

In his last years Eusebius lived in close intimacy with the emperor Constantine, who cherished the warmest esteem and affection for him. In A.D. 386 Eusebius wrote his Panegyric on Constantine. The emperor had assigned him the task of superintending the transcription of fifty copies of the Scriptures on parchment, for the use of the Constantinopolitans. This was the last literary labor in which he was engaged (Vita Constantin. iv. 85) before his death, which took place A.D. 340.

From the general tenor of his life as sketched above, it is not to be wondered that Eusebius has been charged with a leaning towards Arianism. "So thought, among the ancients, Hilary, Jerome (who otherwise speaks favorably of Eusebius), Theodoret, and the second Council of Nicea (A.D. 787), which unjustly condemned him, even expressly, as an Arian heretic; and so have thought, among moderns, Baronius, Petavius, Clericus, Tillemont, Gieseler; while the Church historian Socrates, the Roman bishops Gelasius and Pænigins, I. Valens, G. Bulling (who enters into a full vindication of Eusebius, in his Scriptorum, vol. i. 111), and Leo (and most Anglicans), have defended the orthodoxy of Eusebius, or at least mention him with very high respect. The Gallican Church has even placed him in the catalogue of saints. Athanasius never expressly wrote against him, although he warlike. He did not attack the faith to Ariamne, or to semi-Arianism, but frequently says that before 325 he held with Arius, and changed his opinion at Nicea. This is the view of Möhler also (Athanasius d. Grosso, p. 333 sq.), whom Donner (Christology, i, 792) inaccurately reckons among the opponents of the orthodoxy of the church of Antioch, the contradictions of the ancients for and against Eusebius are collected in Migne's edition of his works, tom. i. p. 68-98. Among recent writers, Dr. Samuel Lee has most fully investigated the orthodoxy of Eusebius in the preliminary dissertation to his translation of the Theophania from the Syriac, p. xxxv.-xxxi. he arrives at the conclusion (p. xxviii) 'that Eusebius was no Arian, and that the same reasoning must prove that he was no semi-Arian; that he did in no degree partake of the error of Origen, ascribed to him so positively and so grossly by the fathers; and that the fathers, and the first fathers, and the people of Christ's age, never in any way suspected him of being an Arian.'—Schoff, Hist. of the Christian Church, ii, 874. Compare also Dupin, Aut. Eccl. (Paris, 1683), ii, 1-15.

It is in the field of Church history that the merits and services of Eusebius stand pre-eminent among early writers. He had large opportunities, both of Christian and pagan learning, and used it, if not with critical or philosophical skill, yet with patient industry and with literary integrity. He was the first to collect the scattered annals of the first three centuries of the Church in his Ecclesiastical History, the most important of all his writings. He is the constant historian of Christianity from the advent of the Messiah to the defeat of Licinius. A.D. 324. In this work he rejects, with greater care than is usually attributed to him, the doubtful facts and the fabulous narratives. And this is not his only merit. A living sympathy for the fortunes of Christianity, as well as an earnest devotion for the heroism of its martyrs and confessors, inspires him throughout. "The history," he says in the beginning of the fifth book, "that compose historical narratives, would record nothing but victories in battle, the trophies of men, and the profligacy of the heathens, the bravery of soldiers, sullied with blood and innumerable murders, for the sake of children, and country, and property. But our narrative embraces that conversation and conduct which is acceptable to God —the wars and conflicts of a most pacific character, whose ultimate tendency is to establish the peace of both the soul." In Dr. Schaff's opinion (Ch. Hist. iii. 97), the Church History of Eusebius "gives a colorless, defectless, incoherent, fragmentary, yet interesting picture of the heroic youth of the Church, and owes its incalculable value not to the historic art of the author, but almost entirely to his copious and moral extracts from foreign, and, in some cases, now extinct sources."

In the 8th book of the Ecclesiastical History (c. ii) Eusebius states that it is no part of his plan to relate all the wickedness and dissensions of the Christians before the persecution, or to name those who were untrue to the faith; adding, "we shall only, upon the whole, introduce those events into our history that may be profitable first to us of the present day, and hereafter to posterity." In the Martyr. Palatin. (c. xii) he states as a historical principle that the "events most suitable to be recorded in a history of the martyrs are those which redound to their honor." Gibbon (Decline and Fall, c. xvi) remarks that "such an acknowledgment will naturally excite a suspicion that a writer who has so openly violated one of the fundamental laws of his-
EUSEBIUS

EUSEBIUS has not paid a very strict regard to the observance of the other. Certainly it was an error of judg-
manship for him to adopt the position which he ac-
counts. The Scripture might have taught him better; it does not omit the faults of patriarchs or saints. If nothing, moreover, is to be told of martyrs but "that what redounds to their honor," one's admiration of these heroes is not sustained by what he is kept back might counterbalance what is told. The principle of Eusebius is here historically bad. But Gibbon attacks Eusebius still more strongly in his

*Vindication of Chapters xv and xvi of his history.

Eusebius gives as the title of ch. xxxi, bk. xii, of the

*History of the Church.*

"It may be lawful to use falsehood as a medicine for the benefit of those who need such a procedure?"

He begins the chapter with a citation from Plato (De Legibus, ii, as follows: "A legislator of any value, even if the fact were not such as our discourse has just established it, if in any case he might make bold to deceive young persons for their advantage; could he possibly incul-
cate any falsehood more profitable than this, or more potent to lead all without force or compulsion to the practice of all justice? "Truth, my friend, is honorable but pernicious, indeed, it would be a very easy way of persuing." To this passage of Plato, Eusebius adds: "You may find a thousand such instances in the Scriptures, where God is described as jealous, or sleeping, or angry, or liable to other human affections, so expressed for the advantage of those who require such a means of persuasion."

"This is all that is said on the subject, and it may be interpreted to mean nothing more than that one's statements must be adapted to the understanding of his hearers or readers. But the use of the word "falsehood" in the heading of the chapter shows that, in the mind of Eusebius, either there was no just ap-
preciation of the difference between "falsehood" and "accommodation," or else that his moral sense as to
veracity had been vitiated by the ecclesiastical casu-
istry which even in his time had begun to show itself. It is easy to be seen, however, that Gibbon really misleads his readers by his statement of the case: "In this chapter," says he, "Eusebius alleges a passage of Plato which approves the occasional practice of pious and salutary frauds; nor is he ashamed to justify the sentiments of the Athenian philosopher by the exam-
ples which he finds in the Old and New Testament. This is not warranted by the passage, which is fully cited above. We adopt, nevertheless, the remark of Wad-
dington (History of the Church, ch. vi, ad fin.): "It was disgraceful to the less enlightened fathers of the second and third centuries that, even in the midst of the intensity of mind and the glow of reasonableness which had ever been characteristic of the profession of falsehood; but the same ex-
pedient was still more shameful to Eusebius, who flourished during the prosperity of the Church, whose age and more extensive learning left him no excuse in ignorance or superstition, and whose great name and unquestionable piety gave sanction and authority to all his opinions. There can be no doubt, then, that the publication of that detestable principle in any one of his writings, however modified and limited by his explanation, must to a certain extent disturb our con-

*Eusebius, B. Apologie, C. Dogmatic; D. Exegetical.*

A. Historical.—I. The Ierapoa lexapmarrq, Ecclesiastical History, in ten books, beginning with the incarna-
tion of Christ, relates the history of the Church, in-
cluding accounts of writers, martyrs, persecutions, etc., up to A.C. 324. It was probably composed before the Nicene Council (325), as, near its close, Cris-
pus, the emperor of Constance, this historian is not mentioned, which could hardly have happened after the execution of Crispus (325). The best editions of the History, with the Greek text, are Valesius, with life of Eusebius prefixed (Par. 1659-1673, 8 vols., often reprinted); Reading's edition of Valesius's Euse-
bius (1862, 2 vols.); Heinichen, Hist. Eccles., Reading's edition of Valesius's, with Struth's notes, and additional notes and indices by the editor (Leips. 1827-8, 8 vols. 8vo; also see below); Burton, Hist. Eccles. (Gr.) (Oxon, 1838, 1845, 1856, 8vo), also An-
notations Variarum, 2 vols. 8vo (Oxon, 1842, 2 vols. 8vo); cheap edition by Schwengler (Tubing. 1823, Svo); Laemmer, Hist. Eccles., cum tabulis specimina cod. vi. vii. cont. (Schaafhausen, 1862, large 8vo, pp. 806, with tables in fol.).

English Translations.—Hammer, Ch. History of Euse-
bius, Socrates, and Evagrius, with the Life and Pan-
degyric of Constantine (Cambridge, 1857, and often. fol.);

the same, with Salmon's translation of The Life of Constantine (1860, fol., 1868, 8vo); also An-
notations Variarum, 2 vols. 8vo (Oxon, 1865, 8vo); also in Bohn's Ecclesiastical Library, Lond. 12mo; and in Bagster's Greek Ecc. Historia, Lond. 1842, 8vo.)

*Eusebius, B. Apologie, C. Dogmatic; D. Exegetical.*

8. The Life of Constantine, παραλεγενητος ιστορια, of which four books only are preserved. They give mostly allegorical interpretations of Old-Test. Messiahic passages (edited by Gaisford, Oxf. 1842, 8vo; and possibly by Migne, Patrologia Graeca). (6) The five books of The Theophania, ουρανος, preserved in a Byz. translation, long lost, but discovered by Tattam in 1889 in a Nitrian monastery, and published under the title Eusebius on the Theophania, or divine Manifestation of our Lord and Saviour Jesus Christ, translated from an ancient Syriac Version of the Greek Original now lost, with Notes, and a Vindication of the Orthodox and prophetic View of the Author, by Prof. S. Lee (Camb. 1843, 8vo). Dr. Lee assigns the MS. (now in the British Museum) to the year A.D. 411. The Greek fragments, with Lat. version, compared also with Lee's edition, are given in Migne, Patrologia Graeca, xxiv., 607 sq. See a full treatment of the subject in Cellier, Aut. Sacr. (Paris, 1865, 2 vols.), p. 258 sq.

8. The small work, Against Hierocles, προς τον Ηιεροκλην της Σοφοκλην τον Τουραια αντιπαραγενητης ενεργης εις την Κυκλωσμην του Χριστου συμπεριληφθηκαν τον Κυκλωσμην, generally cited Adversus Hieroclem, is considered by the ancients as a work of Paulinus and a philosopher Apollonius of Tyana cannot bear comparison with Christ. It is to be found in Morell's Philostratus (Gr. and Lat., Paris, 1868); edited, with new transal. and notes, by Olarrius (Leips. 1709); and, with the libri contra Marcellum, ed. by Gaisford (Oxon, 1832, 8vo); also in Migne, Patrologia Graeca, xxxii., 795 sq.

2. The three books, Of the Ecclesiastical Theology, περι της εκκλησιας θεολογιας, Of ecclesiastical theology, are likewise intended against Marcellus, as θεολογια here means sermo de Filio Dei ejusque nature divina, with a biblically-dogmatical proof of the hypothetical existence of the Son. It is given in Grec. and Lat. by Retberg (Cologne, 1744); in Cont. Hierol. ed. by Kocks (Oxon, 1832, 8vo); and in Migne, Patrologia Graeca, xxiv., 826 sq.

8. The short treatise, περι της του πατρα τηρησης, De solemnisitate paschalium, treats of the typical character of the Jewish Passover, and of its consumption in the new covenant. It is in Migne, Patrologia Graeca, xxiv., 694 sq.

14. Fourteen smaller treatises, among which the most important are, De fide adae. Sabellium, De resurrectione, De incorporali anima; quod Deus Pater incorporali est, which remain only in Latin, and are all contained in Migne, Patrologia Graeca, xxvi. 770 sq.

D. Eusebius.—These are partly introductory, partly commentaries, written upon the allegorical method of Origen, and without any knowledge of Hebrew.

1. The Πατηματος, τον των τον πατηματος ιστοριαν των Θεωρων, a topographical and alphabetical index of the names of places occurring in the Bible. It was translated into Latin by Jerome, and edited in Greek by Bonfrereius (Paris, 1631 and 1659, fol.) and Gr. and Lat. in Hieron. Opera, t. iv (Paris, 1689); by Clericus (Amst. 1707, fol.) by Lar- row and Farthby (Berlin, 1628, 8vo).

2. Evangelical commences, a kind of Gospel harmony, to
be found in the editions of the N. T. by Erasmus, Stephens, and Mill; also in Migne, Patrolog. Graec. xxii. 1875.
5. Žižmarae et Ἀγίων. Questiones evangelicæ, in three books, containing solutions of seeming contradic-
tions of the evangelists; edited by Mai in his Collect.
Script. Vet. (1825, 4to), i. 101 sqq.
4. Commentaries on the Psalms and On Isaiah, which are preserved to a great extent, and given in Migne, Patrolog. Graec. tom. xxiv and xxv. Of his commen-
taries on Solomon’s Song, Proverbs, Daniel, and Luke, only fragments are left us, which are given in Migne, Patrolog. Graec. tom. xxiv, which prints also Mai’s newly-
discovered fragments from his Nov. Patr. Bibliotheca, vol. i. 302 sqq.
There is no absolutely complete edition of the works of Eusebius. The nearest to such are Eusebius Pamphili Opera Latina, Basii, 1842, 4 vols. fol.; Paris (1818, fol.) most complete of all (following Vitae seu Montfaucon, Mai, and Gaisford), Migne, Patrolog. Graec. vols. xiii—xxii. A new edition of the Script. Heresi. Christi, by H. P. 1867 (vol. i, 8vo, the Histo. Eccl. ii, of the Opera
lat. Dindorf (Leipsic, 1845—67, vols. i—iii, 8vo).
See Cave, Histo. Eccl. ii. 111; Dupin, Autorum Eccle.
Eusebius of Dorylaeum, born at the end of the fifth century, began his public life as a lawyer, and obtained the place of imperial commissioner (agenis in rebus). Evagrius (Hist. Eccle. iv, 41) says of him that, “while still practising as a rhetorician, he was the first to expose the blasphemy of Nestorius.” He seems to have been he who blasphemed Nestorius in a sermon about A.D. 490 (when he denied Mary the title Theou- 
șëvokou), by crying aloud “Martha.” This Logos him-
self subjected himself to a second birth.” This, at least, is the conclusion of Neander (Church History, Torrey’s transl., ii. 504). He also thinks it probable that Eusebius was the author of the formal complaint publicly posted against Nestorius in the church of Constantinople, comparing him to Paul of Samosata (Neander, l.c.). It is possible that it was as a reward for this zeal that he was made bishop. At all events, he entered into orders, and became bishop of Dorylaeum, in Phrygia. In the year 448, at the Convoc. Eccl. vi, 455, 650). See Eutyches. At this synod Eutyches was banished, but in the following year, at the Council of Eusebius. Some homilies are of a more recent date. See EUSEBIUS of ALEXANDRIA. A biography of Eusebius, by bishop George, of Laodicea, is lost. A work on Eusebius and his writings has been written by Augusti (Euseb. Emesa, opuscula quod superius, inibid. ed. 1889); and some of the statements in this work have been retold by Thilo (Uber d. Schriften des Euseb. v. Alex. u. des Euseb. von Emessio (Halle, 1822). Some of the homilies as-
cribed to Eusebius of Cæsarea are attributed to Euse-
bius of Emesa.
Eusebius, a Nitrian monk (beginning of 5th century), one of the “four brothers” condemned by Thephylius, bishop of Alexandria, for holding the opinions of Origen. The three others were Dioscorus, Ammonius, and Euthymius. They retired first to Je-
EUSEBIUS

rusalem and Scythopolis, and then to Constantinople, where Chrysostom received them kindly, but did not admit them to communion. They were 'pious men, though not wholly exempt from a certain fanatical ascetic tendency.'—Neander, Ch. Hist. ii, 691; Sozomen, Hist. eccl. viii, 12, 13; Socrates, Hist. eccl. vi, 7.

EUSEBIUS OF LAODICEA, a native of Alexandria, and therefore sometimes called Eusebius of Alexandria. As deacon in Alexandria, he accompanied his bishop, Dionysius, in the Valerian persecution of Christians before the proconsul Eulamianus (257), and by nursing the imprisoned Christians and burying the martyrs gave a shining testimony of his undaunted faith. When (from 260 to 263) a terrible epidemic and civil war devastated Alexandria, Eusebius again distinguished himself by his zeal in nursing the sick, both pagan and Christian, and, in union with his friend Anatolius, procured relief to thousands of inhabitants who were threatened with starvation. In 264 he attended, as the representative of bishop Dionysius, whom old age and sickness retained in Alexandria, the Synod of Antioch, which was to take action on the heresy of Paul of Samosata. Subsequently he became bishop of Laodicea in Syria, where he died in 270. He was succeeded by his friend Anatolius.—Hertzog, Real-Encyclop. iv, 240; Eusebius, Hist. eccl. vii, 36 (A. D. 376).

EUSEBIUS OF NICOMEDIA, who may be called the leader, if not the organizer, of the Arian party in the fourth century, was a distant relative of the emperor Julian, and was born about A.D. 324 (Ammianus Marcellinus, Hist. xxii, 9). He was first bishop of Berytus, in Phoenicia, but got himself translated to Nicomedia. Theodoret says (i, 19) in violation of the canons—by the influence of Constantius, sister of the emperor Constantine, whose confidence he had completely won. After the excommunication of Arius by Alexander, bishop of Alexandria (A.D. 321), Eusebius took Arius (who had written him a letter asking his aid) under his protection, offered him an asylum in his own house, and wrote urgently, though at the present time respectfully, in his favor, to Alexander, the patriarch of Alexandria (for details, see Arianism, vol. i, p. 389).

As Eusebius had been a disciple of Lucian, he probably held the opinions of Arius at the time. Socrates says that "Eusebius of Nicomedia and his partisans, with such as embraced the sentiments of Arius, demanded by letter that the sentence of excommunication, which had been pronounced against him should be rescinded, and that those who had been excluded should be readmitted into the Church, as they held no unorthodox doctrine" (Hist. eccl. i, 6; see also Sozomen, i, 15).

At the Council of Nicæa (A.D. 325), Eusebius and his friends used all possible efforts first to carry their own opinions through, and then to hinder a definitive sentence. Their opposition was finally concentrated against the application of the term οὐκ εἶσαι (consubstantial) to the Son. All opposition failed, and the orthodox doctrine was established by the council. See Arianism, vol. i, p. 389; Nicæa, Council of. Eusebius, finding himself standing nearly alone, affixed his signature at last. Philostorgius (i, 9) asserts that instead of the term οὐκ εἶσαι (of the same essence), Eusebius and his friends secretly introduced the semi-Arian term οὐκ ἐστίν (of like essence); but the statements of Philostorgius are not to be implicitly believed. The decree of the council contained not only the name of Eusebius himself, but also an expression of certain propositions of Arius. This last Eusebius refused to sign, declaring to the council that he "submitted to their determinations concerning the faith, and consented to subscribe to it, even admitting the word consubstantial, according to the genuine signification of it, and completely the belief of the council; but that as for the condemnation of Arius, he could not subscribe to it; not that he had a mind to reject the points of faith which they had decided, but because he did not think that he, whom they accused, was in the error that they laid to his charge: that, on the contrary, he was entirely persuaded, by the letters which he received from him, and by the conferences which he had with him, that he was a man whose sentiments were entirely different from those for which he was condemned." Theognis of Nice, Thomas of Marmora, and Secundus of Ptolemais, agreed with him in this. The council condemned them as heretics, and Constantine condemned them as having committed But Arius, Theognis, and Secundus having submitted, Eusebius and Theognis finally signed, and were forgiven by the emperor.

Soon after the close of the council "Eusebius showed a desire to revive the controversy, for which he was in danger of his life and health, and received permission on this occasion Constantine addressed a letter to the people of Nicomedia, censuring their exiled bishop in the strongest manner as disaffected to his government, as the principal supporter of heresy, and a man wholly regardless of truth (Theodoret, Eccl. Hist. i, 20). But he did not remain under the imperial censure. Indeed, he subsequently so completely regained Constantine's favor as to be selected to baptize him, not long before his death (A.D. 337). His Arian feelings, however, broke out again. He procured the deprivation of Eustathius (q. v.), bishop of Antioch, and, if we may believe Thaddaeus (i, 21), Theodoret (i, 21), he tried to bring a woman to against him a false accusation of the most infamous kind. He was, perhaps, the most bitter opponent of Athanasius (see Athanasius), and exerted himself to procure the restoration of Arius to the full privileges of churchmanship, in league with Alexander, bishop of Constantinople, with whose opinions, unless he at once admitted him to the holy communion, in which he would have succeeded but for the sudden death of Arius. In 339 Eusebius managed to procure his election to the see of Constantinople, in defiance of a canon against translations agreed to at Nicæa. He died about A.D. 342. Though Eusebius lies under the disadvantage of having his character handed down to posterity almost entirely by the description of theological enemies, yet it is difficult to imagine that he was in any way deserving of esteem. His signature to the Council of Constantinople, with its defects, can not be considered to have signed it merely as an article of peace, since he was ever afterwards a zealous opponent of its principles. It can scarcely be doubted that he was worldly and ambitious. Athanasius considers him as the teacher rather than the disciple of Arius; afterwards, when he was divided among themselves into parties, those who maintained the perfect likeness which the substance of the Son bore to that of the father (Homoioousian) against the Consustantialists on the one hand, and the pure Arians or Homoousian on the other, pleaded the authority of this Eusebius. The tenets of this party were sanctioned by the Council of Seleucia, A.D. 359" (Smith, Dict. of Biography, s. v.). See, besides the works already cited, Cave, Hist. Lit. (Genev.) i, 118; Neander, Ch. Hist. ii, 367 sq.; Newman, History of the Arians i, 263 sq.; Lardner, Works (idx. 1843), ii, 369 sq.

Eusebius of Vercelli, was born in Sardinia; was baptized in Rome by pope Eusebius; and became lector, or ecclesiastical reader at Rome. He was ordained bishop of Vercelli, in Piedmont, A.D. 349, with the unanimous consent of clergy and people. He was the first in the West who united the monastic life with the clerical (Ambrose, cited by Ceillier, v. 500). Pope Liberius requested him to go with Lucifer of Cagliari, and other legates, on an embassy to Constantinus, by whom the number of Athanasius had been sanctioned. They visited the emperor (at Arles or Valence), and prevailed on him to summon the Council III.—12*
of Milan, which met A.D. 355. The Eusebians (Ari- 
ans) at this council urged the condemnation of Atha-
nasius, and the emperor sided with them. Eusebius of 
Vercelli having received the emperor's order to sign 
the condemnation of Athanasius, refused, but expres-
sed his willingness to subscribe the Nicene Creed. Lu-
cifer of Cagliari and Dionysius of Milan refused also. 
The third session was held in the palace, the Arian 
party fearing the violence of the people. The em-
peror himself then sent for the three above-mentioned 
bishops, to confer with them, to either recommend 
them to prepare for banishment; they, on their part, 
earnestly entreated him to remember the account he 
would be called upon to give in the day of judgment, 
and besought him not to introduce the heresy of Arian 
into the Church; but all, of course, Eusebius, Dionysius, 
and Lucifer were sentenced to ban-
ishment. At Scythopolis, in Palestine, his place of 
exile, he was warmly welcomed, and also encouraged 
by an embassy from his people at Vercelli. But at 
alast he was brutally outraged, dragged naked through 
the streets, and imprisoned. From there he was 
then transferred to Capadocia, and thence to the 
Thabrads (Theodore, Hist. Eccl. iii. 4; Sozomen, Hist. Eccl. 
v. 12). After the death of Constantius, his successor, 
Julian, issued an edict recalling the exiled bishops. 
Eusebius went first to Alexandria, where he stood 
by the council of Nicene II. He was then taking 
measures to heal the Arian schism. See EUSTA-
THIANS. The council sent him to Antioch to end 
the strife there, but the ordination of Paulinus (q. 
v.) by Lucifer of Cagliari had made matters worse 
than ever. After travelling through the East he 
reached Rome, where he was called the en-
thusiasm, particularly in his own diocese. He show-
ed himself, in the latter years of his life, a great ad-
mirer of monasticism, and introduced among the cler-
gy of his diocese the common life. Having learned 
that the bishop of Ancyra, Eusebius, of that 
support of the emperor Valentinian, was very actively la-
Bcribing for the triumph of Arianism, Eusebius, in 364, 
was suddenly appeared in Milan to attack Arianism in 
its stronghold, but the emperor soon ordered him back 
to his diocese. He died in 371. An inscription on 
his tomb calls him a martyr, and, as a later le-
gend, he was killed by the Arians; but the writers that 
are best informed about him (Ambrose, Gregory of 
Touria, etc.) know nothing of his martyrdom. 
The Church of Rome formerly commemorated him 
as a martyr on the 1st of August, and now on the 16th 
of December. The works of Eusebius are three Epistola 
Eusebius: 
1. Ad Constantium Augustum.—2. Ad presbyteros et ple-
bes Italice, written on the occasion of his banishment, 
which to is attached Libellus facti, a sort of protest 
against the violent conduct of the Arian bishop 
Philipus, who was in some sort his jailor during his resi-
dence at Scythopolis.—3. Ad Gregorianum Episc. Hier., 
found among the fragments of Hilary (xi, § 5). He 
executed also, a translation of the Commentary of his 
namesake, Eusebius of Cesarea, on the Psalms; and 
an edition of the Evangelists, from a copy said to 
be translated by his own hand, preserved a cancelled, 
was published at Milan (1748, 4to) by J. A. Ircoles; and 
again by Bianchini, at Rome, 1748. This edition is given 
also in Migne, Patrol. Lat. vol. xii. The Epistola 
will be found in Bibl. Patr. Gallend. vol. v; part of them in 
Bibl. Max. Patr. vol. v; and all in Migne, Patrol. Lat. 
v. 24. Eusebius was appointed bishop of Samosata in 361, 
and in the same year was present at the Synod of Ant-
ioch, at which both Arians and Catholics elected Me-
leitus patriarch of Antioch. The document of elec-
tion, signed by both parties, was deposited with Euse-
bius. When Meletius, in his very first sermon, de-
clared himself strongly in favor of the doctrine of the 
Council of Nice, the Arians induced the emperor to de-
mand from Eusebius the certificate of election. On his 
refusal he was threatened with having his right hand cut off; but he resolutely held 
out both hands, declaring his readiness to lose both 
his hands rather than resign a document containing 
so manifest a demonstration of the impiety of the 
Arian dogma. Eusebius, (Hist. Eccl. iv. 29.) During 
the persecution of the orthodox by Valens, he trav-
elled, disguised as a soldier, through Syria, Phoeni-
cia, and Palestine, everywhere consecrating orthodox 
priests, and confirming the people in the Nicene faith. 
At the disputed election of a bishop for Cesarea, in 
Capadocia (370), he aided in securing the succession 
of the orthodox Basil (q. v.). He ever after remained 
an intimate friend of Basil, and with him, in 372 and 
375, took a leading part in the effort to secure, with 
the support of the Western churches, the success of 
the Nicene party also in the East. He was, there-
fore, a special object of hatred to the Arians, who 
in 378 prevailed upon the emperor to exile him to 
Thracia. After the death of Valens (378) Eusebius 
was allowed to return to his diocese. He at once be-
gan to display an extraordinary activity in appointing 
church councils in the Nicene sense; in taking 
measures for the town of Dolica for this purpose in 379 (or 
380), he was killed by a stone thrown by the hand of 
some Arian woman (Theodore, Hist. Eccl. v. 4). The 
Church of Rome venerates him as a saint on July 21, 
and the Greek Church on July 22.—Herzog, Real-Enzy-
clopaed., iv. 319; Theiner, Autorsa Sacros (Paris, 1869), 
v. 1 sq. (A. J. S.)

EUSEBIUS, bishop of Thessalonica, A.D. 601, wrote 
against the Aphthartodoci, especially in reply to a 
monk Andreas, who taugh that Christ's body 
became incorruptible when joined to his divinity; that 
Adam's body was not created liable to corruption; and 
that the world, in its original form, was incorruptible 
also. The Church of Rome received this book 
and forbade it to be read; but, in the end, Andreas 
attained to post his books by further defences, which 
induced Eusebius to write ten books against the positions 
he had before attacked, showing that Andreas had man-
derstood the truths of the faith and quite misunderstood 
the others. These works are no mere examples except what are 
are preserved by Photius in his Biblioth. Cod. 162.—Cave, 
Hist. Lit. (Geneva, 1720), i, 578; Clarke, Succ. Sac. Lit. 
i, 576.

EUSTATHIANS. 1. Eustathius, bishop of Antioch, 
was deposed at the Arian Council of A.D. 381. See 
EUSTATHIANS. The orthodox people of Antioch 
refused to receive an Arian bishop as his successor, 
and kept aloof, thereby gaining the name of "Eustathians." In 
A.D. 390, Meletius (q. v.) was transferred by the 
Arians from the see of Sebaste to Antioch; but, though 
he adhered to the Nicene Creed, the "Eustathians" 
would not recognise him, as they refused to regard 
an Arian or an orthodox bishop of the Eastern Church 
as compatible with the hope of salvation. They wore a particu-
lar habit; appointed Sunday as a fast, and taught 
that the ordinary fasts of the Church are needless after
people have attained to a certain degree of purity. The sect probably derived its name from Eustathius, semi-Arian bishop of Sebasta (§ 360), who was condemned at Gangra in 341, and exiled to Saphagonia, where he lived between the years 326 and 341. But it has been strongly argued on the other hand that the Eustathians who founded the sect was a different person, an Armenian monk. Walch (Hist. d. Ketzerien, iii, 536) has treated the subject at large.—Murd. Mosheim, Ch. Hist. bk. iv, pt. ii, ch. iii, § 319, n. 88; Socrates, Hist. i, 42; Sozomen, H. E. i, 13; Neander, Ch. Hist. ii, 419; Dupin, Hist. Eccl. cent. iv; Bingham, Orig. Eccl. bk. xxii, ch. i, § 8. See EUSTATHIUS OF SEBASTE.

Eustathius of Antioch was born at Sida, in Pamphylia (Hieron. Catal. 85). He was for some time bishop of Beres, from whence he was translated to the see of Antioch in 325 by the unanimous suffrage of clergy and people (Theodoret, H. E. i, 7). At the Council of Nice, in 325, he earnestly opposed the Arians, who, at the (Arian) Synod of Antioch, A.D. 381, took their revenge upon him. Eusebius of Nicomedia (or Cyrus of Beres) charged him with Sabellianism (Socrates, H. E. i, 24); but, according to Sozomen (H. E. ii, 15), the prelate was saved from his deposition only for his confession that he "had defiled the priesthood by unholly deeds." The synod deported him, and the people of Antioch was stirred by the act almost to the point of sedition. This angered Constantine, who, moreover, was now, under the influence of Eusebius of Nicomedia, favorable to the Arians. Eustathius was deprived of the will of Eusebius of Cesarea, whom he charged with unfaithfulness to the Nicene Creed. He was banished to Thrace, where he died before A.D. 387 (Socrates, i, 24, 25; Sozomen, l.c.). His innocence as to the charge of immorality was fully shown by the consecration of the women who had sworn against him. The orthodox people of Antioch refused to acknowledge any other bishop, and, so long as they remained in this separate condition (until the fifth century), they were called Eustathians (Neander, Ch. Hist. Torrey's, ii, 411). Eustathius was a thorough opponent of the school of Origen, and this constituted one of the points of antagonism between him and Eusebius of Cesarea. He was a copyist, but only one work of his known to be genuine is now extant, viz. Κατά τοῦ καταμετασχηματισμοῦ τῆς γένους τῆς ἐκκλησίας, against Origen, on the subject of the Pyrexia, § 5. Condemned by Sozomen, 381, as an apologist of Arianism, he was accused by the orthodox sect of being the spirit of Eudocia, and Eustathius refutes him with great acuteness, but also not without an unworthy disdain in replying to so great a man. This treatise is to be found at the end of l.c. at the edition of the Hippommon (1629, 4to, improperly ascribed to Eustathius). It is also given in the Crónica Sacra, viii, 381 sq., and in Biblioteca Max. Parv. xvii. There are fragments of a treatise of his on The Soul, and of his Homilies; all of which, with the treatise against Origen above named, are given in Migne, Patrologia Graeca, xlvii, 634 sq. See Fabricius, Bib. Graeca, ed. Harles, ix, 131 sq.; Oudin, Script. Eccl. i, 317 sq.; Ceillier, Auctores Sacris, Paris, 1865, iii, 188 sq.; Cave, Hist. Lit. Genev. 1720, i, 119; Lardner, Works, iv, 149; Dorner, Person of Christ, Edinburgh transl., div. i, vol. ii, p. 518 sq.

Eustathius of Thessalonica, one of the most learned bishops of the Greek Church in the Middle Ages, was a native of Constantinople. He was at first a monk, subsequently a deacon of the church of St. Sophia, and a teacher of elocution. He also held a position at the court, having charge of all petitions, and in this capacity presented to the emperor a petition of the city of Constantinople on the occasion of a great scarcity of water. In this period of his life Eustathius compiled his celebrated commentaries on Greek classics, which give proof of an immense amount of reading, and are the more valuable as they contain many extracts from works which are now lost. It is especially the commentary on Homer (Rome, 1542-50, 4 vols.; Basle, 1559-60, 3 vols.; with register by Devotius, edited by Stallbaum, Leips. 1825-30, 6 vols.), which is a rich storehouse of learning. In the second edition of the formula of adjuration which the converts from Mohammedianism had to pronounce, Eustathius, at the synod, firmly opposed the emperor, who was greatly displeased with this opposition, but nevertheless remained a patron of Eustathius' work, which, in 1186, Thessalonica was conquered and plundered by the Normans under William II of Sicily, Eustathius was indefatigable in his efforts in behalf of the city. His theological writings were for the first time published by Dr. Tafel (Opuscula s. codd. Basili. Paris. Veneto, nunc primam editis Tb. L. P. Tafel, Francof. 1832; with an Appendix, Tafel, De Thessalonico, Berlin, 1889). They are noted for outspoken evangelical sentiments. Of special importance in this respect is the work Meditationes on the Monastic State (συρροχή τοῦ μοναχού), transl. into German (Betrachtungen über d. Mönchseis) by C. l. P. Tafel, Berlin, 1873. Some of his commentaries on John of Damascus are still extant in MS. Eustathius died in Thessalonica about 1194.—Hertzog, Real Encycl. i, 247; Wetzer u. Welte, Kirch.-Lex. iii, 771; Neander, Charakteristik des Eustathius in seiner reformatorischen Richtung, in Neander, Wissenschaftliche A. kundl. (Berlin, 1857, i., 170, 171.)

Eustathius, semi-Arian bishop of Sebasta, in Armenia, in the fourth century, was a great advocate of monasticism, which he introduced into Armenia. The ascetic fanatics called Eustathians are supposed to have taken their name and their practices from him (but see EUSTATHIANS, 2). He also founded in Sebasta a hospital for the poor, over which he placed Αἰρίου, then his devoted friend. But later Aërius charged him with avarice, and they quarrelled. See Αἰρίανος. Eustathius died about A.D. 380.—Socrates, Hist. Eccl. ii, 48; Sozomen, Hist. Eccl. iii, 14; Neander, Church Hist. Torrey's transl. ii, 942; Hefele, Conciliarius, iii, 565 sq.

Eustochium, Julia, was born at Rome about A.D. 365. A daughter of Paula (q. v.), she imitated the ascetic piety of her mother. In 382 she took the vow of virginity, and put herself under the direction of Jerome, who gave her instructions relative to the life she had chosen. It was for her that he wrote (383) his treatise on a young man's duty. On his departure from Rome, Paula and Eustochium accompanied him, and settled near him in a monastery near Bethlehem. After the death of Paula (404), Eustochium succeeded as superior of the monastery. So greatly was she profited by Jerome's instructions that she gained a knowledge of the Greek and Hebrew languages. To her Jerome dedicated his Commentaries on Ezekiel and Isaiah. He translated also the rules of Pachomius into Latin for the use of the members of the monastery at Bethlehem. In 416 the Pelagians burned this monastery and outraged the inmates. She is celebrated as a saint in the Roman Church Calendar, 29th of September.—Hoefer, Newe. Biog. Gräz., vi, 792; Butler, Lives of the Saints, ix, 775; Millman, Hist. of Christianity (N. Y. 1866), iii, 284.

Euthalius, bishop of Sulce, 5th century, is supposed to have been the first to divide the N. T. into verses. Some of the poetical parts of the O. T. had been arranged by him. After his death (483) divided Paul's epistles into verses. Afterwards he so arranged Acts and the Catholic Epistles. The division into chapters had been made by a previous writer (A.D. 890), and Euthalius adopted it. Erasmus,
In his N. T., inserts the Arguments of Euthalius to the Acts and to Paul's epistles. His Prologue to St. Paul's Epistles, including a sketch of Paul's life, was published by J. H. Bocclerus at the end of his N. T. (Arguentor. 1644, 1660). All the remains of Euthalius are given in Euthalius, ed. Odiot, Vol. I. (Oudin, Rome, 1688, 4to).—Horne, Introduction, pt. i., ch. ii., § 3; Cave, Hist. Lit. (Genev. 1720), i.

Euthymius Zigabenus (or Zigebeinu), a Greek monk and theologian of the 12th century. He lived in the time of the emperor Alexius Comnenus (about A.D. 1120), and was his intimate friend. Of his life little is known, except from the Alexius of Anna Comnena (v. 470), who praises his talent and scholarship. The following writings of his have been published: (1) Πισχώνα διομάντης, Panoplia Dogmatica, against all heretics, written by the order of Alexius Comnenus, and divided into two parts and 24 sections, each treating of a heresy. It consists chiefly of digest of the preexisting translated by Zinns (Venice, 1555, fol.; reprinted at Lyons, 1556 and 1580, 8vo); also in Bibli. Patriar. (Lyons, xiv). This translation omits the 12th and 18th titles "against the Pope and the Italians." The Greek original was published at Tergouvia, in Wa. Bibl. Patr. (Lyons, fol.), and it very closely omits the last title, which is contained in Syrburg's Saracenic, p. 154. (2) Victoria et triumphus de impia Mussalennorum secta, etc. (Victory and Triumph over the impious, manifold, and execrable sect of the Mussalensians, etc.): a work, with fourteen parts, the first thirteen, edited, Gr., with Latin version and notes, by Pallis, in his Insignia Itinera Italic. (Tract. ad Rhen. 1696, 4to); also in Gallandii Bibl. Patriar. xiv, 293. (3) Commentaries in Psalms (Commentary on all the Psalms of David); Latin version by Saulus (Verona, 1530, fol.; often reprinted); also (Gr. and Lat.) in Theophylact's Opera Omnia, vol. iv (Venet. 1783, fol.). (4) A Commentary on the four Gospels, his most important work, compiled from St. Chrysostom and other fathers; Latin version by J. Hentenius (Louvain, 1544, fol.; Paris, 1547, 1566, and 1602, 8vo); best edit. by C. F. Matthaei, Gr. (Lips. 1792). Ziegabenus is still considered one of great value. See Matthaei's preface for full notices of Euthalius, and for the judgments of the learned concerning his writings. Many of his writings yet remain in MS. All his published works are given in Migne, Patrologia Graeca, vol. cviii-xxxi. (Paris, 1844-51); or (Gr. and Lat.) in Theophylact's Opera Omnia, i., l., of 976; Lardner, Works, v., 164; Ullmann, in Thol. Stud. u. Krit., 1883, p. 947 sq.

Euthyches, a friend of Euthychianism, though the opinions advocated by him existed before (see Selig, De Euthychianismo ante Eutychen). His name Euthyches means "the Fortunate," but his opponents said he should rather have been named Atheychus, the Unfortunate. He must not be confused with the deacon Eutyches, who attended Cyril to the Council of Ephesus. Leo the Great, in his renowned letter to Flavian, calls him very "ignorant and unskilled," "multum imprudens et nimirum imperitus, et justius attributus eius error quam imperitius quam veritatis." So also Petavius and Hierole (ii, 800). His relation to the Alexandrian Christology is like that of Nestorius to the Antiochian; that is, he drew it to a head, brought it to popular expression, and adhered obstinately to it; but he is considerably inferior to Nestorius in talent and learning. His connexion with this contradictory system is, in a great measure accidental" (Schaaff, Hist. of Christ. Church, iii, 758). He led, from his early age, an ascetic life, for thirty years archimandrite of a monastery near Constantinople, and had reached his 70th year without being known for anything except his illiterate fanaticism, his intimate relations with the all-powerful Chrysippos, minister of Theodosius, and his influence with the monastic party which blindly followed the lead of Cyril of Alexandria. He used his influence in favor of Cyril at the Ecumenical Council of Ephesus, a copy of the minutes of which was sent to him by Cyril. After the death of Cyril he was on in- tercourse with his successor, Docius (q. v.). In 448 Eutyches wrote a letter to the Bishop Leo to prejudice him against the school of Antioch (q. v.), which he inanuished, was bent on reviving Nestorianism. To counteract his operations, patriarch Damasus, of Antioch, in 448 charged Eutyches with renewing the controversy of Apollinaria. Notice seems to have been taken at the imperial court of this charge; but the charges brought against him before the Synod of Constantinople (448) by his former friend Eusebius, bishop of Dorylaum (q. v.), had more effect. Patriarch Flavian, of Constantinople (q. v.), wished to have given to the council the name of Euchilus prevailed upon the synod to summon Eutyches. The latter, after making several excuses, obeyed the third summons, and presented himself before the synod, attended by a large number of monks and imperial officers. He defended his views in a long speech, but the synod, after some consisting of adherents of the Antioch school, found him guilty of heresy, and, in spite of all the secular pressure brought to bear upon them in favor of Eutyches, deprived him of his position of archimandrite, and excommunicated him. Eutyches, with the aid of his friend Chrysippos, obtained from the emperor permission to hold the trial of the case before the general council to be convoked at Ephesus. Flavian and Leo of Rome strenuously opposed the holding of the council. Leo, who had been unwilling to hold it at both parties, was only willing to do this by this circumstance to claim a right to de- nounce the council, and for this purpose wrote the celebrated epistle to Flavian (Mansi, v. 1836 sqq). See the article CHALCEDON, vol. ii, p. 196; and Leo. But, owing to the influence of Eutyches and Dioscorus of Alexandria, the council was held, under the presidency of Dioscorus, and, amidst scenes of unheard-of violence, which he had given to the council, the name of the Robber Council, the bishops were compelled to restore Eutyches to the Church and his former position, and to condemn the prominent men of the Antioch school. See EPIPHANUS, ROBER-COUNCIL OF. The emperor promptly sanctioned this decision, and thus Eutychianism, in which was the point of view of the predominant doctrine of the Eastern Church, when the death of Theodosius (450) gave a new turn to the controversy. The empire of the church and her husband Marcellus sympathized with the opponents of Eutyches, recalled the exiled bishops, and convened the Ecumenical Council of Constantinople (451), which condemned the views held by Eutyches, and declared that "in Christ two distinct natures are united in one person, and that without any change, mixture, or confusion." See CHALCEDON, COUNCIL OF. Even before the meeting of the council Eutyches had again been excommunicated by patriarch Anatolius of Constantinople, and expelled from his monastery by Marcellus. The council did not again condemn him by name. Of the last years of Eutyches we only know that he died in exile. —Herzog, Real-Encyclopedia, iv, 251; Baur, Lehre von d. Diakonostigmen, 1860; Nippery, Church History (Torny's), iii, 501-503; Donner, Person of Christ, div. ii, vol. i and ii; Waterland, Works (Oxford), iii, 411, 481. (A. J. S.)

Eutychianism, the name of a doctrinal system called after Eutyches, according to which there was in Christ only one nature, the human nature, his human nature having been absorbed in a manner by his divine nature. Eutyches, like Cyril, laid chief stress on the divine in Christ, and denied that two natures could be spoken of after the incarnation. In our Lord, after his birth, he worshipped only one nature, the nature of God become flesh and man: μην γάρ παρεσκευάζεται και ταῖς θεοῖς παρακαθιστῶν καὶ ἑαυτὸν παρακαθιστῶν.
EUTYCHIANISM

EUTYCHIUS, as he declared before the synod at Constantinople, "in the same subject, nature, person, style of words, and substance of the Logos, even as and in the same sense of words as the Logos himself, in every human, for it is by no means the same substance (μορφονωσις) with, but a divine body. All human attributes are transferred to the one subject, the humanized Logos. Hence it may and must be said, God is born, God suffered, and God died. There is, therefore, on the one hand, the capability of suffering and death in the Logos-personality, and, on the other hand, the defilement of the human in Christ. The other side imputed to Eutychianism the doctrine of a heavenly body, or of an apparent body, or of the transformation of the Logos into flesh. So Theodoret (Ps. 118, iv. 13).

Eutyches said Christ had a σωμα αν-
ηρωσιμου, but not a σωμα ανθρωπου, and he denied the consubstantiality of his προς with ours. Yet he expressly guarded himself against Docetism, and against all speculation: Φυσιολογιαν εμαυρων υπω τη-
τος σωματος. He neither a theologian, nor a philologian, but only insisted on some theological opinions and points of doctrine with great tenacity and ob-
stancy" (Schauf, History of the Christian Church, ii. 757 sq.).

The Holy Forbes cites Photius and Johannes Damas-
cenus aptly on Eutychianism as follows, viz. : "If there be one nature in Christ, it is either the divine or the human nature; if it be only the divine nature, where is the human? and if there be only the human, you cannot escape from denying the divine. But if it be God, and not different from these (for this is the only other alternative they have, and they seem to lean that way), how shall not in that case Christ be of a different nature, both from his Father and from us? Can anything be more impious or absurd to say that the Word of God, who is God, became man, to the cor-
ruption of his divinity, and to the annihilation of the humanity he assumed? For this absolutely follows with those who have dared to speak of Christ as of neither nature, but of one besides these" (Photius, Ep. i, cont. Eutychi. ch. Suicer). The "two natures were not without convertus or alteration, so that his body is both the divine nature and the divine nature did not depart from its own sim-
plicity, nor did the nature of man turn into the nature of God, nor was it deprived of existence, nor was one composite nature made out of two; for a composite nature cannot be consubstantial with either of those natures, but is composed of two. Therefore, according to the heretics, Christ exist in one com-
pounded nature after the union, he is changed from a simple into a compounded nature, and is not consub-
stantial with his Father, who is of a simple nature, nor with his mother, for she is not made up of the Godhead and manhood. And he will be neither in the Godhead nor in the manhood, nor will he be called God or man, but Christ only; and Christ will be the name not of his person, but of his own nature, as they deem. But we do not hold Christ to be of a composite nature, for he woul not make the man, but we believe and confess that he is of the Godhead and manhood; perfect God and perfect man from and in two natures. Were he of one nature, the same nature would be at once created and increase, simple-and composite, mortal and immortal. And the union of two natures is an union in such a way that he is neither by disorder (φωσιμως) nor by mixture (συνηρματια), as Eutyches, Dioscorus (of Alexandria), and Severus say; neither is it personal (προσωποςωμος) nor relative, nor σαρα δεινος, nor from identity of will, nor from equality of honor, nor from the same name, as Nestorius, Dioscorus (of Tarsum), and Theodorus (of Mopsuestia) said; but by synthesis; or personally (ενεργειατος), immutably, inconformly, unalter-

ably, inherently, inexpressibly, in two perfect natures in one person. And we term this union essential (ιναρη
γη), that is, true and not fantastic; essential, not in that one nature is made of the two, but that they are mutually united in truth into one composite person of the Son of God. And their substantial differences are preserved. For the whole body of Christ is both God and man, and that which is increase remains increase; the mor-
tal remains mortal, the immortal abides immortal. The one shines forth in miracles, the other submits to injuries; and the Word appropriates to itself that which the flesh appropriates to itself. Which Ephesians, though the first were performed according to one nature, the latter endured according to the other. Thus we know that his one person and his two natures are preserved. By the difference of the natures he is, on the one hand, one with the Father and Holy Ghost; on the other hand, he is one with his mother and with us. And these two natures are joined in one composite person, in which he differs as from the Fa-
ther and the Holy Ghost, so from his mother and us also" (Joh. Damascenus, Fid. Ort. iii, 8, abr.). Bishop Forbes adds: "Now we are to turn our attention to Eutychianism. It gets over a great difficulty in the reception of truth to believe the humanity of our Lord destroyed. For faith now requires of us to believe that the human body of Jesus Christ still is, and that to it the Word is hypostatically joined, and that be-
gone the spheres and systems of which we are cogni-
zant, it, partaking of our nature, is at the right hand of God" (On the Nicene Creed, Oxford, 1852, p. 201 sq.).

The Council of Chalcedon (A.D. 451) adopted the doctrine stated by pope Leo in his letter to Flavius (Epistle Leo), viz. the "creed Leo," which is "the same as the Creed in Christ two distinct natures were united in one person, without any change, mixture, or confusion." The Creed of Chal-
cedon states that "the one Son of God, our Lord Jesus Christ, is of one substance with the Father according to the Godhead, and of one substance with us according to the manhood—likewise in the one person of our Lord Jesus Christ, Son, Lord, Only-begotten, in two natures, without confusion, without conception, without division, without separation—the difference of the natures not being taken away by reason of the unity, but the propriety of each being preserved and joined together to form one person. The creed of the council was not by any means universally re-
ceived in the East. But the name Eutychianism gave way to that of Monophysitism. The ecclesiastical or-
ganizations adhering to the heresy are commonly known by the names of Jacobites, Armenian Church, Copts, and Abyssinian Church (see the special articles on these churches). For a sketch of the fortunes of the theory known as Eutychianism, see Mono-
physites. See also Chalcedon; Christology; Eut-
yches; Dioscorus; and consult Pearson, On the Creed, i, 256 sq.; Schaff, CH. History, i. c.; Waterland, Works (Oxford), iii, 115, 411; He-
fele, Conciliengeschichte, ii, 249 et al.; Baur, Dogmengeschichte, i, 2, 256 sq.; Cunningham, Historical The-
ology, ch. x, § 1.

Eutychianus, pope and martyr, succeeded Felix I, bishop of Rome, Jan. 275; died as martyr or con-
fessor Dec. 8, 283. Some decreals are ascribed to him,
EUTYCHIUS of CONSTANTINOPLE was originally a monk of the town of Amaseia, where he was sent by his fellow-citizens to Constantinople as proxy for their bishop. The great talent he displayed in the theological controversy gained him general admiration, and the emperor, in A.D. 553, raised him to the highest dignity in the Church at Constantinople. In the same year he accordingly presided at an ecumenical synod which was held in that city. In A.D. 556, he incurred the anger of the emperor Justinian by refusing to give his assent to a decree respecting the incorruptibility of the body of Christ previous to his resurrection, and was expelled from his see in consequence. He was at first confined in a monastery, then transported to an island, Prinopos, and at last to his original convent, Amaseia. In 578 the emperor Tiberius restored him to his see, which he henceforth retained until his death in 585, at the age of 78. There is extant by him a letter addressed to pope Vigilius on the occasion of his elevation in A.D. 538. It is printed in Greek and Latin among the Acta Synodi quinta Concil. v. 425, etc. He also wrote some other treatises, which, however, are lost" (Smith, Dict. of Biography, s. v.).—Eutychius. Hist. Eccl. iv, 88; Cave, Hist. Lit. (Gener. 1720) i. 941.

Eutychius, patriarch of Alexandria, was born at Fostat (ancient Cairo) in 576. His Arabic name was Sooud-Es-Batrak. He was originally a physician, applied himself to the study of theology in the last years of his life, and was elected Melchite (or orthodox) patriarch of Alexandria in 938, and died about A.D. 946. He wrote in Arabic, a Chronicle or Annales from the creation of the world to A.D. 937, under the Arabic title Nudh-e-Enqushar, String of Pearls: translated and edited by E. Pottok under the title Historiae Alexandrinarum, sive Annales, Arab, et Lat. (Oxonii, 1658-59, some copies 1658-64, 2 vols. 4to).—Fragmenta duo de Paschate, et de SS. Euchariae institutione (in Mai, Script. Var. i. 623). Seldan published an extract in the title Ecclesiasticus orientales, ex Arabico cum vers. Lat. (Lond. 1642, 4to), to which Abraham Eschelena replied in Eutychius Vindicatus, sive Responsio ad J. Sel- demi Origines (Rom. 1661, 4to.—Hoefr. Nouv. Bih. Gener. xi. 810; Grasseau, Trésor de Littérature Rares, 1. 580.

Eutychius (Eutychius, of good fortune, a frequent name; see Josephus, A. D. 47-41, vi. 5, 4. 4), a young man of Troas, who sat in the open window of the third floor while Paul was preaching late in the night, and who, being overcome by sleep, fell out into the court below, May. A.D. 55. He was "taken up dead (καταπληκτος); but the apostle, going down, extended his hand upon the body, and raised it, like the prophets of old (1 Kings xxvii. 21; 2 Kings iv. 34); and when he felt the signs of returning life, restored him to his friends, with the assurance that "his life was in him." Before Paul departed in the morning the youth was brought to him alive and well (Acts xx, 5-12). All the intimations of the narrative forbid us for a moment to entertain the view of those critics who suppose that animation was merely suspended (Bloomfield, Hackett, in loc.). See Paul.

Mr. Jowett states that, during his residence at Hai- vali in May, 1819, the house in which he gave him a correct idea of the falling of Eutychus from the upper loft while Paul was preaching at Troas. "According to our idea of houses," he remarks, "the scene of Eutychus's falling from the upper loft is very far from intelligible; and besides this, the circumstance of preaching generally leaves the person on the loft to the readers the notion of a church. To describe this house, which is not many miles distant from the Troad, and perhaps, from the unchanging character of Oriental customs, nearly resembles the houses then built, will fully illustrate the narrative. On entering my host's door, we find the ground floor entirely used as a store; it is filled with large barrels of oil, the produce of the rich country for many miles round; this space, so far from being habitable, is sometimes so dirty with the dripping oil, that it is difficult to make a clean footing from the door to the first step of the staircase. On ascending, we find the first floor, consisting of a humble suite of rooms, not very high; these are occupied by the family for their daily use. It is on the next story that all their expense is lavished; here my courteous host has adorned my lodging; here his curtains, and mats, and cushions to the divan, display the respect with which they mean to receive their guest; here, likewise, their splendor, being at the top of the house, is enjoyed by the poor Greeks with more retirement. As to the chance of molestation from the intrusion of the Turks; here, where the professor of the college waited upon me to pay their respects, they were received in ceremony and sat at the window. The room is both higher and also larger than those below; it has two projecting windows; and the whole floor is so much extended in front beyond the lower part of the building, that the projecting windows considerably overhang the street. In such an upper room—secluded, spacious, commodious—Paul was invited to preach his parting discourse. The divan, or raised seat, with mats or cushions, encircles the interior of each projecting window. A lamp has marked, that where a lamp is, companies is numerous, they sometimes place large cushions behind the company seated on the divan, so that a second tier of company, with their feet upon the seat of the divan, are sitting behind, higher than the front row. Eutychus, thus sitting, would be on a level with the open window, and, being overcome with sleep, would easily fall out from the third loft of the house into the street, and be almost certain, from such a height, to lose his life. Thither Paul went down, and comforted the alarmed company by bringing up Eutychus alive, and is noted that there were many lights in the upper chimney; here, where the professors of the oil in this neighborhood would enable them to afford many lamps; the heat of these and so much company would cause the drowsiness of Eutychus at that late hour, and be the occasion likewise of the windows being open."—See House.

Eutychius (Eutychius, good fortune, monk and ascetic writer, was born at Ierapetra, on Crete, about A.D. 345. He was made deacon by Gregory of Nyssa or Gregory of Nazianzum, and received his theological culture to some extent under the latter, who took him to Constantinople in 379 or 380, and made him archdeacon. In the Origenistic controversies he took the side of Origen. After some time at Rome, in the dangers of personal beauty and vanity, he renounced the world, assumed the monastic garb, and departed for Egypt in 388 or 384, where he lived as an ascetic up to the day of his death in (probably) 399. Socrates speaks very highly (H. E. iv. 28) of his character and writings, in which there remain, L. Macarius (in Cotelier, Mon. Greg. iii. 68);—2. Apollogénios (in Pallud. Vita Chrysost. p. 349)—3. Rurum Monachalium raionhen; and a few other tracts, collected in Galland. Biol. Patrist. vii. 553; also in Migne, Patrolog. Gr. xi. 1219 sq. See Tillmont, Mémories, x. 368; Socrates, Hist. Eccl. iii. 7; iv. 28; Sozomen, Hist. Eccl. vi. 90; Cave, Hist. Lit. Anno 380.

Eutychius Scholasticus, the Church historian, was probably born at Epiphania, on the Oronites, in or about A.D. 536, and had a good education. He lived in Antioch, where he was a lawyer (scholasticus), whence his surname. He rendered essential service to the patriarch Theophilus, whom he defended (against charges of adultery and incest) at a synod in Constantinople, A.D. 589. He was made questionarius, as a reward for his professional skill, by the emperor Tiberius. Eutychius wrote An Ecclesiastical History, in con-
Evangelialium. See EVANGELISTARY.

Evangelialium, opporitoning to, or characteristic of, the Gospel. (1.) The term "has been applied to a portion of the English Church who either profess, or are supposed to 'know and inculcate the Gospel' in an especial manner, and to give peculiar prominence to the doctrine of salvation by faith in the atonement. It is probably more than among this portion of the Church of England many, but not all, maintain the peculiar doctrines of Calvinism; and there may be a time when (in the opinion of some) lower views of the sacraments and of Church authority prevailed among them than what are generally received among other members of that Church. Very many persons lament the use of this term, and consider that, like all party appellations, it tends to perpetuate division in the Church; accordingly, they desire that it should be disused as a party term, and carefully confined to its original meaning (Eden).

(2.) In Prussia, the United Established Church (since 1817) has been called the Evangelical Church." See PRUSSIA AND UNITED EVANGELICAL CHURCH.

(3.) In England and America the term 'evangelical' is frequently used to distinguish those churches which believe in the divinity of Christ and the atonement from those that do not.

Evangelical Alliance is the name of an association of Christians belonging to the denominations collectively called Evangelical, and having for its object to represent the unity of these churches in all the more important articles of faith, notwithstanding their separate and local organization. The Alliance was originated in Great Britain, and the rupture in the Presbyterian Church of Scotland seems to have greatly contributed to its establishment. On Aug. 5, 1845, a number of persons belonging to different denominations drew up a proposal of closer union. The advantages promised by such a movement were at once appreciated in England, and an assembly was convoked at Liverpool Oct. 1, 1845, which was in session three days, and at which were present 216 persons, representing 20 different religious societies. The first General Assembly of the Evangelical Alliance was held in Freemasons' Hall, Great Queen Street, London, and lasted from Aug. 19 to Sept. 2, 1846; 921 Christians from all parts of the world took part in its 26 sessions; among them were 47 from the European continent, and 87 from America and other parts. Among them we find the names of Dr. Barth, of Calw, in Würtemberg; Dr. Baird, of New York; Rev. Dr. Bonnet, of Frankfort on the Main (editor of the letters of Calvin); Dr. Buchanan, of Glasgow; Dr. Cunningham, of Edinburgh; William Jones, president of the Tract Society; Dr. Marriott, of Basel; the missionary Mögling, of St. Louis; Rev. Dr. Oncken, of Hamburg; Rev. Dr. Panchaud, of Brussels; Rev. Baptist Noel, of London; and Dr. Tholuck, of Halle. Some fifty different denominations were represented, some of which, however, as the reformed churches of France and Geneva, and the Lutheran churches of North America and Würtemberg, differed only on local points. In the presence of the several preachers, who, in the main, represented the different parts in the proceedings. Sir Culling Eardley (q. v.) was chosen as chairman, and remained the head of the Alliance until his death. The platform was clearly and unanimously defined: 'the Evangelical Alliance is not to the things of the world second place. Neither is it its aim to bring about such as its result: its object is only to promote Christian feelings, loving, friendly intercourse between the different denominations, and an effective co-operation in the efforts to repulse the common enemies and dangers. As the means of effectually purposing purpose, the part of official or semi-official representative assembly of the different denominations, but rather the union of individuals. It is to be a Christian union, not a Church union; one in which a number of earnest, faithful, Christians of the different denominations may join. Both union of Christians, and the opening of the doors of the Evangelical Alliance are open to all who admit the fundamental principles of Christianity, without inquiring into the minutiae of their particular confessions. It only asks its members to accept (whether in an individual act of faith or in the spirit of their Christian profession) the fundamental principles and doctrines of the Gospel. This naturally led to a definition of these fundamental principles, the admission of which should be considered the basis of the Alliance. On the motion being made by Dr. Edward Bickersteth, the following nine articles were, after mature deliberation, received as the fundamental principles of the Evangelical Alliance:

"The parties composing the Alliance shall be such parties only as hold and maintain what are usually understood to be evangelical views in regard to the matter of doctrines underated, namely: 1. The divine inspiration, authority, and sufficiency of the Holy Scriptures. 2. The right and duty of private judgment in the interpretation of the Holy Scriptures. 3. The unity of the Headship, and the trinity of persons therein. 4. The utter depravity of human nature, in consequence of the Fall. 5. The incarnation of the Son of God, his work of atonement for sinners and mankind, and his mediatorial intercession and reign. 6. The justification of the sinners by faith alone. 7. The work of the Holy Spirit in the conversion and sanctification of the sinner. 8. The immortality of the soul. 9. The body, the judgment of the world by our Lord Jesus Christ, with the eternal blessedness of the righteous, and the eternal punishment of the wicked. 9. The divine institution of the Christian ministry, and the obligation and necessity of the ordinances of Baptism and the Lord's Supper.'

These principles were embodied in a document entitled Societas Evangelicae constitutiones et statutum exposito breviter. The members bind themselves to pray zealously for the Holy Spirit to descend upon all believers, and to employ jointly the morning of the first week-day as a season of prayer, as also the first week of each year; also to use Christian circumspection in their speech and writings when touching on points of difference. The Alliance was organized on the 20 of September. They organized a series of seven branch associations: 1. North of Scotland; 2. The Free Churches of North America; 3. France, Belgium, and the French portion of Switzerland; 4. Northern Germany; 5. South Germany, and the German portion of Switzerland; 6. British North America; 7. West Indies. These branch associations went into actual operation from forwards. The Alliance is now represented in France, Switzerland, and Belgium, without agreement with its definition of the evangelical creed being insisted on. It met with
much opposition in Germany from the Lutherans, who did not find the creed sufficiently explicit on certain points, and the president of the Synod who disapproved of some of the articles. A second assembly was held in Paris in 1855 on the occasion of the World's Exhibition. The third meeting was held in Berlin in 1857. The fourth was held in Geneva in 1860. The fifth meeting was held at Amsterdam in 1866, and was attended by delegates from France, Germany, Switzerland, Holland, Great Britain, the United States, the British American provinces, Italy, Spain, Sweden, Norway, and Denmark. The sixth was held at Brussels in 1867. The fifth General Conference actually took place at Amsterdam on Aug. 18, 1867, and was greatly attended. There were delegates from France, Germany, Switzerland, Holland, Great Britain, the United States, the British American provinces, Italy, Spain, Sweden, Norway, and Denmark. The sixth meeting was held in Catwijk presided over by Prof. Van Oosterzee. Among the subjects discussed were the religious condition of the Church in England, the Scotch churches, the connection of missions with civilization, Christianity, and literature, and art and science; the methods of operating missions; the religious condition of Germany, France, Holland, Belgium, and Italy; and the origin of missions. The reports of the conferences were received with the approval of the conference, and it has since been the aim to promote the cause of missions and the spread of the gospel in all parts of the world.

A letter of co-operation was read from the secretary of the British branch of the Alliance. The Hon. William E. Dodge was elected president of the Allied Branches in the British branches of the Alliance. At a meeting held in New York Nov. 12, 1868, it was resolved to convene a new General Conference of the Evangelical Alliance in the city of New York in the autumn of 1869. The British branch only of the national branches has been in the practice of holding annual meetings, but this branch

"Among the results already attained by the Alliance as incidental and secondary to its great object may be mentioned, The supply of an obvious want, namely, the existence of an organized body with and by whom correspondence and co-operation may be easily and effectually carried on; the diffusion of knowledge in different parts of the world, and which may greatly aid in uniting Christians in this country separated by ecclesiastical differences and other causes; the holding of conferences of Christians from all parts of the world, for the examination of questions which would tend to the degradation of the Lord's day; the origination and extension of circulation of prize essays on the Sabbath, and on Popery and infidelity; and the encouragement and assistance of the friends of pure evangelical doctrine in their struggles against Rationalism or infidelity; the unifying of evangelical Christians in different countries for fraternal intercourse and for mutual protection; opposition, in common with other bodies, to the progress of popery and the ecclesiastical bodies which would tend to the degradation of the Lord's day; the origination and extension of circulation of prize essays on the Sabbath, and on Popery and infidelity; and the encouragement of societies established on the principle of united action among evangelical Christians, such as the American Evangelical Alliance, the Turkish Evangelical Alliance, and the Committee for Religious Liberty, Christian Vernacular Education Society for India, and German Aid Society. Although these practical results are thus referred to, yet it is to be understood that, even if no such secondary objects had been accomplished or attempted, the great value of the Alliance would still remain in its adaptation to promote and manifest union among Christians. The preceding is from an authoritative statement made by the Alliance" (Eadie, Eclectic Evangelical Encyclopaedia, s. v.).—Hersig, Real-Encyklopädie, p. 270; Schem, American Ecclesiastical Alliance for 1868; the full reports of the General Assemblies of the Alliance; Dr. Massie, The Evangelical Alliance, its Origin and Development (London, John Snow, 1847); L. Bonnet, L'unité de l'esprit par le biais de la paix; Lettres sur l'alliance républicaine (Paris, Delay, 1847).—Am. Church Observer, Oct. 18, 1854; Dec. 1856, p. 967; Princeton Rev. Oct. 1846 (A.J. S.).

Evangelical Association, an ecclesiastical body which took its rise in the year 1800, in the eastern part of Pennsylvania, and resulted from an organization into classes and congregations of the disciples of Rev. Jacob Albright, a native of Eastern Pennsylvania, who, being impressed by the general decline of religious life, and the corruption of doctrines and morals that prevailed in the German churches in that portion of country, undertook, about 1790, to work a reform among them. The effect of his first labors encouraged
him to travel through a great part of the country at his own expense, preaching the Gospel as he had opportunity in churches, schools, private houses, on public roads, etc. Although he commenced his labors without any ulterior design of forming a distinct ecclesiastical organization, yet he soon found it necessary to have an established church government over several counties, into small societies for mutual support and sympathy. At a meeting called for the purpose of consulting upon the best measures to be adopted for the furtherance of a cause in which they all felt a deep interest, the assembly, without reference to the teachings of High-Churchism respecting a valid ministry, unanimously elected and ordained Mr. Albright as their pastor or bishop, authorizing him to exercise all the functions of the ministerial office over them, and declared the Bible to be their rule of faith and practice. This organization, incomplete at first, was soon after considerably improved by the adoption of a creed and rules for Church government. In course of time, as laborers increased and the society spread, annual conferences were held; and in 1816, sixteen years after the first organization of the Church, a general conference was held, at the first Union Church, Union County, Pa., which consisted of all the elders in the ministry. Since 1828 a general conference, composed of delegates elected by the annual conferences from among their elders, has held quadrennial sessions. For the first forty years of its existence the society struggled against violent opposition; but during its later years it has made rapid progress, so that it now (1868) comprises 14 annual conferences, and 1193 itinerant and 634 local preachers, whose field of labor extends over the Northern, Western, and Pacific states, and into Canada and Europe. The membership approximates 193,000, all adults; the number of churches is 1886 and parsonages 2572, valued together at $4,672,500; Sunday-schools 2348, and scholars 162,857; catechetical classes, exclusive of those connected with Sunday-schools, 341, with 3539 catechumens. In the year 1868 a missionary society was formed, which has up to this time supported about 600 home missions, most of which are now self-supporting stations, circuits, or even conferences. At present this society supports 942 missions in America and Europe. For a number of years it has been gathering funds for similar missions, and has entered Japan with success. There is also a Sunday-school and tract society in operation, publishing Sunday-school books and religious tracts. A charitable society was founded in the year 1865, which has received funds amounting to $20,000, by bequests and interest of which is annually applied to the support of the widows and orphans of poor itinerant preachers. There are also church-building societies established in several conferences. The North-western College, a flourishing institution of learning located at Naperville, Ill., has been founded, and is supported by the Western conferences of the Church, and an endowment is being collected which now amounts to $100,000. Several seminaries are also patronized by the Church. An orphan institution, favorably located at Flat Rock, Ohio, has been established within a short time. A prosperous publishing-house at Cleveland, Ohio, issues four periodicals: one, its German organ, Der Christliche Botehafte, a large weekly, and the oldest German religious paper published in America; another, its English organ, The Evangelical, also a weekly; and the third and fourth, Der Christliche Kinderfreund, and the Sunday-school Messenger, are monthly juvenile papers, intended chiefly for Sunday-schools. The weekly papers have together a circulation of 25,000, and the juveniles 30,000. Perhaps no other religious denomination in America is better organized, disciplined, and successful in its work than the Evangelical Association. In doctrine and theology this Church is Armenian; with regard to sanctification, Wesleyan; but generally holds the essential doctrines of the Gospel as they are held in common by the evangelical churches of the land, with all of whom it aims to cultivate a fraternal spirit. The ministry is divided into two orders, deacons and elders; and, faithful to the principles and examples of their Lord and Master, they hold no higher rank or privilege than an elder. The General Conference meets every four years, and constitutes the highest legislative and judicial authority recognized in the Church; then come the annual and quarterly conferences, whose transactions are mostly of an executive and practical nature for the promotion of the work. In its mode of worship and usages the Evangelical Association is Methodist; and preaching, originally in German, is now largely in English. (R. Y.)

The denomination is at present greatly divided. In Oct., 1872, two rival general conferences were held, one in Indianapolis, the other in Philadelphia, each of which elected different bishops and other officers. This led to protracted litigation, which has not yet been fully settled.

The following statistics are gathered from the United States census of 1890, but do not include the conferences in Canada, Germany, Switzerland, and Japan.

Evangelical Church Conference, the name of periodical meetings of delegates of the Protestant state churches of Germany. The object of these meetings is to have a free exchange of opinion on important questions of ecclesiastical life, to furnish a bond of union for the several Protestant state churches of Germany, and to advance their harmonious development. The impulse to meetings of this kind proceeded, in 1813, from King Wilhelm of Wùrttemberg. Invitations to a conference were issued jointly by the third and fourth, Der Christliche Kinderfreund, and the Sunday-school Messenger, are monthly juvenile papers, intended chiefly for Sunday-schools. The weekly papers have together a circulation of 25,000, and the juveniles 30,000. Perhaps no other religious denomination in America is better organized, disciplined, and successful in its work than the Evangelical Association. In doctrine and theology this Church is Armenian; with regard to
the periodical holding of conferences of this kind, confessions, liturgy, and Church constitution. The second meeting was to have been held at Stuttgart in 1848, but did not take place, in consequence of the disturbances attendant on the revolution. At the Church diets (q.v.) of Stuttgart (1850) and Elberfeld (1851), ecclesiastical officers of several countries deliberated on the resumption of the official Church conferences, and suggested the establishment of a central organ, which was to contain the decrees of all the supreme Church boards of the German States. Accordingly, the conference met again at Eisenach in June, 1852, and in the same year an official central organ of the German Church government was established at Stuttgart (Allgemeine Kirchenblatt für das evangel. Deutschland). Since then the conference has met always at Eisenach, in 1859, 1861, 1863, 1865, and 1888. One of the first results of the conferences was a compilation of 150 of the best German Protestant hymns (Kerkmälder), which was recommended to the several states as a proper basis of, or appendix to, the hymn-books of the several churches. In 1858 some of its resolutions, concerning the treatment and conduct of secessors by the state churches, were unanimously adopted. These resolutions declared against the principle of full religious liberty, but recommended that the members of secessors be allowed to contract valid civil marriages. The same conference adopted resolutions in behalf of a better education of the clergy, and of their training for the work of presiding at their congregations the right of co-operation (rotum negativum) in the appointment of ecclesiastical officers, and of introducing special liturgical devotions during the week of Passion. The conference of 1857 held important discussion on the revival of Church discipline, on reforms in the legislation concerning discipline on Christian burial. Among the results of the later meetings of the conference were the following: The introduction of a prayer for the German fatherland, to be used every Sunday in every Protestant church; resolution that the Lutheran and the Reformed portions of the service were to be used in all parishes; the revision of the Luther Bible, on the best way of collecting the statistics of the German Lutheran Church, on the constitution of evangelical churches, on the State-Church system, etc. An account of some resulting concerns concerning the treatment and conduct of secessors given in Mathesis, Aegaeus, Kirchliche Chronik, see also Herzog, Real-Encycl. iv, 278.

Evangelical Counsels. See Consilia Evangelica.

Evangelical Union, "the name assumed by a religious body constituted in Scotland in 1843 by the Rev. James Morison, of Kilmarnock, and other ministers who had been condemned in the United Secession Church, to which they had previously belonged, and the congregations adhering to them. They were soon afterwards joined by a number of ministers and congregations of similar views previously connected with the Congregational Union or Independents of Scotland, and have since expanded themselves considerably in Scotland and the north of England. Their doctrinal views are those which, from the name of Mr. Morison, have now become known in Scotland as Morisonism. See MORISONISM. Their church government is Independent, but in some of the congregations originally Presbyterian the office of the elder is retained. A notable practice of this denomination is the very frequent advertising of sermons and their subjects." In 1851 the Union had in Scotland 28 places of worship, with 10,319 sittings.

Evangelist (εὐαγγελιστής), the name of an order or body of men included in the constitution of the Apostolical Church (q.v.). The term is applied in the New Testament to a certain class of Christian teachers who were not fixed to any particular spot, but travelled either independently, or under the direction of one or other of the apostles, for the purpose of propa-gating the Gospel. The absence of any detailed account of the organization and practical working of the Church of the first century leaves us in some uncertainty as to the precise nature and function of the "evangelists" (evangelistai) (thus: κοινωνίας τῶν ἐν πολλάξις χώραις ποιητών τούτων, τῶν δὲ ποιητῶν εἰς ἑαυτούς, τῶν δὲ ποιητῶν καὶ ἀναδεικτών). Assuming that the apostles here, whether limited to the twelve or not, are those who were looked upon as the special delegates and representatives of Christ, and therefore higher than all others in their authority, and that the prophets were men speaking under the immediate impulse of the Spirit who were mighty in their effects on men's hearts and consciences, it would follow that the evangelists had a function subordinate to theirs, yet more conspicuous than that of the pastors who watched over a church that had been founded, and of the teachers who carried on the work of systematic instruction. This passage, accordingly, would lead us to think of them as standing between the two other groups—sent forth as missionary preachers of the Gospel by the apostles, and as such to plant the churches, and to organize and superintend the labors of the second. The same inference would seem to follow the occurrence of the word as applied to Philip in Acts xxii, 8. He had been one of those who had gone everywhere "preaching" (διογγελίζωμεν) the word of God (Acts viii, 4), now in one city, now in another (viii, 40); but he has not the power or authority of an apostle, does not speak as a prophet himself, though the gift of prophecy belongs to his four daughters (xxi, 9), and he exercises apparently no pastoral superintendence over any portion of the flock. The omission of mention of the list of evangelists, as if it were superfluous, may be accounted for on the hypothesis that the nature of Paul's argument led him there to speak of the settled organization of a given local church, which of course presupposed the work of the missionary preacher as already accomplished, while the train of thought in Eph. iv, 11 brought before his mind all who were instrumental in building up the Church universal. It follows, from what has been said, that the calling of the evangelist is expressed by the word ἐναγγελίας, "preach," rather than διδασάως, "teach," or παρακάτω, "exhort." It is the proclamation of the glad tidings to those who have not heard the word before, rather than the instruction and pastoral care of those who have believed and been baptized. This is also what we gather from 2 Tim. iv, 2, 5. Timotheus is "to preach the word;" in doing this he is to fulfill "the work of an evangelist." It follows, also, that the name denotes a work rather than an order. The evangelist might or might not be a bishop, elder, or a deacon. The apostles, so far as they evangelized (Acts xviii, 8; xiv, 7; 1 Cor. i, 17), might claim the title, though there were many evangelists who were not apostles. The brothers ("whose praise was in the Gospel") (2 Cor. xii, 18) may be looked upon as one of Paul's companions in this work, and probably known by the same name. In short, the itinerant and temporary character of their calling chiefly serves to distinguish them from the other classes of Christian laborers. In this, as in other points connected with the organization (2 Cor. viii, 18) may be true of them as of Paul's companions in this work, and probably known by the same name. In short, the itinerant and temporary character of their calling chiefly serves to distinguish them from the other classes of Christian laborers. In this, as in other points connected with the organization (2 Cor. viii, 18)
EVANGELISTARIUM

EVANS

Evangelistarium (Book of the Gospels), the name given in the earlier ages to a volume containing the portions appointed to be read from the Gospels. If the four Gospels were complete in the book called Evangelistarium, then Proter. Common Proper, p. 9; Siegel, Afterkümmer, iii. 249. See Manuscripts of the Bible.

Evangelium Etternum (Everlasting Gospel), the name given to a book published in the 13th century (A.D. 1254), which was properly entitled Introductio in Evangelium eternum, probably written by the Franciscan Gerhardus. The idea of a new "eternal Gospel" was one of the peculiar notions of Joachim of Floris (1292), who attacked the corruptions of the Church, and predicted an approaching renovation. See Joachim of Floris. These predictions were appropriated by the Franciscans as really referring to the rise and character of their order, which was founded by Francis of Assisi six years after Joachim's death. An apocalyptic party arose among the Franciscans, which seems to have been led by Gerhardus, and by Johannes of Parma (q. v.). The Introductio in Evangelium eternum seems to have been chiefly made from the writings of the seven "Concordiae Veneri et Noz. Test.; Post. decem Chorumurum; and Apocalypsis nova." It set forth Joachim's doctrine of the "dispensations" (status) of the Church, the last of which, the dispensation of the Spirit, was to be opened about A.D. 1200. The movement was a new form of Mecianism. Many vague notions were added about the Eternal Gospel of the Franciscans, arising from superficial views, or a superficial understanding of Joachim's writings, and the offspring of mere rumor of the heresy-hunting spirit. Men spoke of the Eternal Gospel as a book composed under this title, and circulated among the Franciscans. Occasionally, also, this Eternal Gospel was confounded perhaps with the above-mentioned Introductories. In reality, there was no book bearing under the title of the Eternal Gospel, but all that is said about it relates simply to the writings of Joachim. The opponents of the Franciscan order objected to the preachers of the Eternal Gospel, that, according to their teaching, Christianity was but a transitional thing, and a new, more perfect religion, the absolute form, destined to endure forever, was to succeed it. William of St. Amour (De periculis nosrisinorum temporum, p. 38) says: "For the past fifty-five years some have been striving to substitute in place of the Gospel of Christ another gospel, which is called the Gospel of the Holy Spirit, or the Everlasting Gospel;" whence it is manifest that the anti-Christian doctrine would even now be preached from the pulpits if there were not still something that withholds (2 Thess. ii. 6), namely, the power of the pope and the bishops. It is said in that accorded book which they call the Everlasting Gospel, which had already been made known in the Church, that the Everlasting Gospel is as much superior to the Gospel of Christ as the sun is to the moon in brightness, the kernel to the shell in value. The kingdom of the Church, or the Gospel of Christ, was to remain the last of all. The same writer points out the following as doctrines of the Everlasting Gospel: that the sacrament of the Church is nothing; that a new law of life was to be given, and a new constitution of the Church introduced; and he labors to show that, on the contrary, the form of the hierarchy under which the Church then subsisted was one resting on the divine order, and altogether necessary and immutable" (Neander, Church Hist. iv. 619). The Introductories has not come down to us, but its contents are partly known from a writing of Hugo of Caro, preserved in Quellen. Ezech., 42v. i. 92 sq., and partly from extracts given by the inquisitor Nicolas Eymere, in his Directorium Inquisitorium, pt. ii, qu. ix, No. 4. The theologians of Paris attacked the book upon its first appearance, and it was formally condemned by Alexander IV. A.D. 1255. Neander, Church Hist. iv. 619, calls it "the Everlasting Kircheng. Abhandlungen (Erlangen, 1885); Engelhardt in Herzog, Real-Encyklop. iv. 275; Gieseler, Ch. Hist. peri. iii. § 70.

Evans, Caleb, D.D., son of the Rev. Hugh Evans, was born at Bristol about the year 1737, and was educated at the Homerton Academy. In 1767 he became colleague to his father as pastor of the church, and tutor in the academy at Broadmead. In 1779 he originated "The Bristol Education Society," to supply the dissenting congregations, and especially the Baptist, with able and evangelical ministers, as well as missionaries for propagating the Gospel in the world. From this time to the period of his death, August 9, 1791, Dr. Evans continued to discharge the duties of president of the society. He published an Answer to Dr. Prieley's Appeal, and a small volume entitled Christ Crucified, or the Scripture Doctrine of the Atone- ment (Bristol, 1780, sm. 8vo), besides occasional sermons. On the breaking out of the American War, he advocated the freedom of the colonies, and wrote A Letter to John Wesley, in reply to his Calm Address to the American Colonies (London, 1775, 12mo); also a Re- ply to Fletcher's Vindication of Wesley's Address (Bristol, 1776, 12mo).—Jones, Christian Biography, p. 144; Allibone, Dict. of Authors, s. v.

Evans, Christmas, an eloquent Welsh preacher, was born at Llandysul in Cardiganshire. His father was poor, and he had no school education. At seventeen he was converted, and joined
the Baptist Church. He then first learned to read the Welsh Bible, and soon after began to exhort. His first settlement as a preacher was at Llyen; two years after he went to Anglesea to labor as an evangelist at ten preaching places, on a salary at first of £27 a year. He died at Sandford, 1738. He was a man of a singularly high, oratorical powers, but in Anglesea he began to be a wonder. For a series of years he made preaching tours through South Wales, and the memory of his sermons remains to this day. The following sketch of one of his sermons is given by his biographer, the Rev. D. M. Evans:—"In his general hum and restlessness the preacher had read for his text, 'And you that were sometime alienated and enemies in your mind by wicked works, yet now hath he reconciled in the body of his flesh through death, to present you holy and unblamable, and acceptable in his sight.' His first movements were stiff, awkward, and wrestling, while his observations were perhaps crude and commonplace rather than striking or novel; but he had not proceeded far before, having thus prepared himself, he took one of his wildest flights, bursting forward to the extreme margin of the wonderland of all-piercing shrieks under which his hearers often confessed his resistless power. Closer and closer drew in the scattered groups, the weary loungers, and the hitherto listless among the motley multitude. The crowd becomes dense with eager listeners as they press on inexorably on the preacher. He gets into the thickening plot of his homily but dramatic representation, while, all forgetful of the spot on which they stood, old men and women, accustomed to prosy thoughts and ways, look up with open mouth through smiles and tears. Big burly country folk, in whom it might have been thought that the faculty of imagination had long since been extinguished, became engrossed with ideal scenes. Men 'whose talk is of bullocks' are allured into converse with the most spiritual realities. The preachers present become dazed and their hearts set on the horizon; they start on their feet round the strange young man, look hard at him in perfect amazement; loud and rapturous confirmations break forth from their lips: 'Amen,' 'Ben didedig,' 'Diolch byth,' fall tumultuously on the ear; the charm swells outwards from the extreme margin of the wonderland of the crowd; and to the occasional loud laugh there has now succeeded the baptism of tears. The excitement is at its highest; the preacher concludes, but the weeping and rejoicing continue till worn out nature brings the sermon to an end.' His chief qualities as preacher were they 'include passion, orard excited feeling, a dramatic imagination, and grotesque humor. The published scraps of sermons which remain, and have been translated into English, illustrate these qualities, and almost only these.'—*Christian Spectator* (London.) Sept. 1693, reprinted in *The Theolog. Eclectic*, I, 147; *Evans, Memoir of Christmas Evans* (1862); *Stephen, Life of Christmas Evans* (London, 1847); *Sermons of C. Evans, with Memoir by Jas. Cross* (Philadelphia, 1854, 8vo).

**Evans, John, D.D.**, an eminent Nonconformist divine, was born in 1860, at Wrexham, in Denbighshire. He was the father of the minister of Wrexham on the death of Mr. Timothy Jollie. He was ordained and settled at Wrexham, August 18, 1702. "Dr. Daniel Williams, of London, hearing that Mr. Evans was invited to Dublin to be one of the English Episcopalian bishops to the metropolis, where he first assisted the doctor, afterwards became co-pastor, and at length succeeded him at his death. In the Ariam controversy he refused to subscribe to any articles, but maintained the orthodox consistencies. In the public service of the dissenters he was often called to preach, and was appointed to assist in completing Matthew Henry's *Commentary*, of which he supplied theEpistles to the Romans so well, that Dr. Doddridge says, 'The exposition of the Romans, begun by Henry, and finished by Dr. Evans, is the best I ever saw.' He was for some years preparing to write a history of non-conformity from the Reformation to the civil wars, but, by his death, the work was interrupted. He died May 16, 1730." Besides a number of separate sermons, he published *Discourses concerning the Christian Temper, 38 Sermons* (4th ed. London, 1737, 2 vols. 8vo), with *Life by John Erskine* (1825, 8vo), which are called by Dr. Wallis 'the most complete history of those duties in the life of the Christian life,' and by Dr. Doddridge 'the best practical pieces in our language.' See *Bogue and Bennett, History of Dissenters*, ii, 364; *Jones, Christian Biography*, p. 148; *Skeats, Free Churches of England* (London, 1868, 8vo), p. 249.

**Evans, Edward**, a minister of the Church of England, was born at Warrington, Lancashire, in 1751, and was educated at Emanuel College, Cambridge, where he passed M.A. in 1778. In 1788 he became vicar of South Mimms; in 1779, rector of Tewkesbury. He soon began to manifest doubts about the Christian doctrines of the Incarnation and the Trinity. For a sermon preached in 1771 he was prosecuted. In 1778 he resigned his preferments in the Church, and retired to Mitcham, where he kept a school. He died Sept. 25, 1805. Among his writings are, *On the Oberseer of Sunday* (Ipswich, 1792): — *The Disobedience of the Four Evangelists, and their Authority* (Gloucester, 1805, 8vo). In this work Dr. Evans rejects all the Gospels but Mark, and also Romans, Ephesians, Colossians, Hebrews, James, Peter, John, and Jude. It was refuted by Falconer, *Bampton Lectures*, 1810.

**Evansius, bishop of Rome, is said to have been born at Bethlehem, and to have succeeded Clement as bishop of Rome about A.D. 100. He is said to have first organized the see into parishes, and to have fallen a martyr A.D. 109.**

**Evarts, Jeremiah, secretary of the American Board of Commissioners for Foreign Missions, was born in Sunderland, Vt., Feb. 8, 1781, and graduated at Yale College in 1802. He studied law, and practised it at New Haven up to 1810, when he removed to Charlestown in order to edit The Panoplist, which he continued up to 1818. In 1811 he entered the service of the American Board as treasurer. He continued in that work, first as treasurer, then as secretary (in 1821), during the rest of his life. In 1820 The Panoplist was discontinued, and the publication of The Missionary Herald was begun by the American Board, with Mr. Evarts as its editor. He died in Boston, S. C. (whither he had gone for the benefit of his health), May 10, 1831. The Reports of the Board during his connection with it were generally from his pen, and that of 1830, the last which he wrote, is a document of great power. His essays, under the signature of William Penn, on the rights and claims of the Indians, were published in 1829. See *Tracy, Memoirs of Jeremiah Evarts* (Boston, 1845); *Christian Review*, xi, 20; *Spirit of Pilgrims*, iv, 599.

**Eve (Heb. 'Evarot),** was the first in order of life or living, so called as the progenitor of all the human family; Sept. accordingly translates Zoon in *Gen* iii, 20, elsewhere *Eruv*, *N. Test.* *Eora, Josephus Eivis, Ant. i, 2, 4*, the name given by Adam to the first woman, his wife. (Gen. iii, 20; iv, 29.) The account of her creation is found at *Gen* ii, 21, 22. It is supposed that she was created on the sixth day, after Adam had reviewed the animals. Upon the failure of a companion suitable for Adam among the creatures which were brought to him by his hand, he was put into a deep sleep to fall upon him, and took one of his ribs (according to the Targum of Jonathan, the thirteenth from the right side!), which he fashioned into a wom
an, and brought her to the man (comp. Plato, Sympos. p. 189, 191). The Almighty, by declaring that "it was not good for man to be alone," and by providing for him a suitable companion, gave the divine sanction to marriage and to monogamy.

"This companion was taken from his side," remarks an old commentator, "to be his help to her, and to be with him as another flesh. Not from his head, lest she should rule over him; nor from his feet, lest he should tyrannize over her; but from his side, to denote that species of equality which is to subsist in the marriage state" (Matthew Henry, Commen. in loc.). Perhaps that which was created for him was, by it the likeness of the image upon which the union between man and wife is built, viz. identity of nature and oneness of origin. Through the subtility of the serpent (q. v.), Eve was beguiled into a violation of the one commandment which had been given them by the Almighty. It was a thankless task of the fruit of the forbidden tree and gave it her husband (comp. 2 Cor. xi, 3; 1 Tim. ii, 13).

The Adam seems to intimate (1 Tim. ii, 14, 15) that she was less aware than her husband of the character of her sin; and that the pangs of maternity were to be in some sort an expiation of her transgression. The different aspects under which Eve regarded her mission as a mother are seen in the names of her sons. At the birth of the first she said "I have given a man from the Lord," or, as some have rashly rendered it, "I have given a man, even the Lord," mistaking him for the Holy Spirit. When the second born, finding her hopes frustrated, she named him Abel, or easily. When his brother had slain him, and she again bare a son, she called his name Seth, and the joy of a mother seemed to outweigh the sense of the vanity of life: "For God," she said, "has appointed me another seed instead of Abel, for Cain slew him." See Abel.

The Eastern people have paid honors to Adam and Eve as to saints, and have some curious traditions concerning them (see D'Herbelot, Bibliothèque Orientale, s. v. Havva; Fabricius, Pseudoap. V. Text. i, 108 sq.). There is a remarkable tradition preserved among the Rabbits that Eve was not the first wife of Adam, but that prior to her creation one had been created in the same way, which, they sagaciously observe, accounts for the number of a man's ribs being equal on each side. Lātāh, or Lātā, for this was the name of Adam's first consort, fell from her office of innocence without tempting, or at all events, without successfully tempting her husband. She was immediately ranked among the fallen angels, and has ever since, according to the same tradition, exercised an inveterate hatred against all women and their children. Up to a very late period she was held in great dread lest she should destroy male children previous to circumcision, after which her power over them ceased. When that rite was solemnized, those who were present were in the habit of pronouncing, with a loud voice, the names of Adam and Eve, and a command to Latiah to depart (see Eisenmenger, Enedicae Judenhum, ii, 421). She has been compared with the Pandora of classical fable (Bauer, Myrikol, i, 96 sq.; Buttmann, Mythologus, i, 48 sq.; Haese, Enedicking, i, 25). See Olmsted, Our First Mother (N. Y. 1859); Reinecke, De Adamo androgono (Weism.1725); Thilo, Filius matris euentian in virum Jevoham (Erlangen, 1748); Köcher, Comment. philol. ad Gen. ii, 18—20 (Jena 1779); Schultes, Exeg. theolog. Forschungen, i, 421 sq.; Bastard, Doctrine of Genesis, ii, 61; Hughes, Female Characters, p. 1.

Evelyn, John, was born Oct. 31, 1620, at his father's seat of Wotton, in Surrey. He was educated at Batiol College, Oxford, served a short time as a volunteer in the Low Countries, and returned at the breaking out of the Civil War to rejine the king's forces. In the king's defeat at Gloucester, he left England, and during the rest of the troubles he travelled in France and Italy. In 1652 he returned to England, and on the restoration he took an honourable part in public business. He died Feb. 27, 1706. He was one of the original members of the Royal Society, and a frequent contributor to its transactions. His most valuable work was Syrinx, or a Discourse on Forest Trees. His Diary (not published till 1618) is excessively useful for the knowledge it conveys of the times in which Evelyn lived. The Diary and Correspondence has lately been re-edited, with much new matter (Lond. 1850—52, 4 vols. 8vo). His History of Religion, a Rational Account of the true Religion, was also first published from the MSS. in 1650 by the Rev. Mr. M. Moore, from a copy in the hand-writing of Mrs. Godolphin (from MSS.) published by bishop Wilberforce.—Allibone, Dict. of Authors, s. v.

Evening (אֶבֶּנֶּבֶּן, 'eb, duke; מַצֶּרָה, 'ōpati, 'ōpi), the period following sunset, with which the Jewish day (נְצָה, nēṣā) began (Gen. i, 5; Mark xiii, 35). See DAY. Some writers have argued that the first creative day (Gen. i, 5) is reckoned from the morning, when light first appeared (ver. 5), as if "evening" then designated not a portion of time, but a termination of the first creative period or age; but this does violence to the whole order of the narrative, in which a period of night invariably precedes one of daylight, precisely in accordance with the conventional Hebrew expression of a נָצָה or "evening—morning," and as the terms are expressly defined in the former clause of ver. 5. If "evening" in the phrase in question be distinguishable from the "night" as a terminus, it is certainly a terminus a quo, as dating the latter from the aboriginal "darkness," ver. 2, and not a terminus ad quem of the ensuing day. See Night.

The Hebrews appear to have reckoned two evenings in each day; as in the phrase בּעַדָּבָה יָבֹא, between the two evenings (Exod. xvi, 12; xxx,8), by which they designated that part of the day in which the paschal lamb was to be killed (Exod. xii, 6; Lev. xxvii, 5; Num. ix, 3, 5; in the Heb. and marg.); and, at the same time, the evening sacrifice was offered, the lamps lighted, and the incense burned (Exod. xxix, 39, 41; Num. xxvii, 4). But the ancients themselves disagreed concerning this usage: for the Samaritans and Corautes (comp. Reland, De Samarit. ii, 22, in his Diss. Miscell. vol. ii, Trigland, De Korumpt. chap. iv) understood the time to be that between sunset and twilight, and so Aben Ezra at Exod. xii, 6, who writes that it was about the third hour (9 o'clock P.M.) the Pharisees, on the other hand, as early as the time of Josephus (Antiqu. viii, 3), and the Rabbins (see Eliahu the Prophet, 230, 2); and it is thought that the "first evening" was that period of the afternoon when the sun is verging towards setting (Gr. ἐλαία πρωίας, "the second evening" the precise moment of sunset itself (ἐλαία δύσης), according to which opinion the paschal lamb would be slaughtered from the ninth to the eleventh hour (3 to 5 o'clock P.M.). The former of these opinions seems preferable on account of the expression in Deut. xvi, 6, "when the sun goeth down," וּשְׁכַר בֹּא, and also on account of the similar phraseology among the Arabs (Boehneldini, Enchronica Studiorum, viii, 56, ed. Caspin, Lips. 1888; Kamz, p. 1917: on the contrary, see Pococke, Ad Clemen Tagoui, p. 71; Talmud Hieros. Berach, chap. i; Babyl. S. ii, 346, fol.; Bochart, Hieros. i, 634, Lips.). See Passover.

EVENING SACRIFICE. See DAILY OFFERING.

Even-Song, the form of divine service appointed to be "said or sung" in the evening of each day in the Church of England, the expression "sung" meaning not an intonation of the voice, but the service as it is now generally read, but the chanting of the service, as in cathedrals.—Eden, Churchman's Dictionary, s. v.

Everett, Joseph, an early Methodist Episcopalian
Evidence

Evidence is the rendering in the A.V. of πρότεινος, so pake, a book (as usually rendered), or writing (q.v.) generally, hence a document of title, l. c. deed, or title, or sale (sor. xxxii. 10, 11, 14, 44); Đrāyec, proof (Heb. xi. 4); i.e. reproof, 2 Tim. iii. 16. l. a. conviction.

II. Evidence is defined by Blackstone "to signify that which demonstrates, makes clear, or ascertains the truth of the very fact or point in issue, either on the one side or the other. (Ch. ii. 2376) Everything evidence comprehends all first truths, or principles of common sense, as 'every change implies the operation of a cause;' axioms in science, as 'things equal to the same thing are equal to one another; and the evidence of consciousness, whether by sense, or memory, or thought, as when we touch, or remember, or know, or feel anything. Evidence of this kind arises directly from the presence or contemplation of the object, and gives knowledge without any intervention of other parts. Deductive evidence is distinguished as demonstrative and probable. Demonstrative evidence rests upon axioms, or first truths, from which, by ratiocination, we attain to other truths. It is scientific, and leads to certainty. It admits not of degrees; and it is impossible to conceive the correctness of the premises on which it establishes. Probable evidence has reference, not to necessary, but contingent truth. It admits of degrees, and is derived from various sources; e.g. experience, analogy, and testimony" (Fleming, Vocabulary of Philosophy, v.).

The Scotch school of metaphysics presents the doctrine of evidence as follows: "The theory of evidence was not unknown to Aristotle and the ancient writers, but it is chiefly to the researches of modern logicians, from Bacon downwards, that we are indebted for a complete exposition. The grounds on which we believe a statement to be either true or false, forms the evidence. The grounds on which we believe are capable of being established with undoubted certainty; others, again, admit of a proof more or less strong. It is of great importance, therefore, to distinguish the kind of evidence any fact or statement can be support, ed, and thus we may readily ascertain to what extent our belief in it may be carried. The two great classes into which all kinds of evidence are usually reduced are intuitive and deductive, the former calling for immediate and irresistible belief, independence of any process of argumentation whatever; the latter requiring for its proof various consecutive steps of reasoning. Some writers are in the habit of dividing evidence into three classes: intuitive, deductive, and demonstrative, and the evidence of testimony. Under intuitive evidence, which commands instant and irresistible belief, are generally included, besides those à priori truths which are necessarily involved in an act of consciousness, the evidence of sense, of memory, and of axioms or general principles. It is well, however, to bear in mind that intuitive and demonstrative evidence are convertible terms, and that in no sense entitled to be considered as resting on intuitive evidence which is not involved in an act of consciousness. This view of the subject no doubt limits the number of intuitive, and therefore dogmatically certain truths; sufficient, however, to establish a foundation for all future reasonings of every kind. And this is all that ought to be desired. Those truths only are entitled to be ranked as intuitions which we cannot deny without involving ourselves in an obvious contradiction. What is essentially necessary to the operation of our intellectual and moral nature is intuitive. We cannot think, for example, without being subjected to the influence of the evidence of consciousness. To these, then, in so far as man is concerned, dogmatical certainty belongs. He cannot doubt their truth without dissolving the nature with which he has been endowed. The evidence of intuition, or consciousness, is certain in itself, but from its truths no other truths can be deduced. Hence the distinction drawn between this and all the other species of evidence, which are classed under one head, termed de dictive. Demonstrative evidence, or that which is independently available in the evolution of unknown from known truths, is usually distinguished into two kinds, demonstrative and moral, or probable evidence, giving rise to a corresponding distinction in modes of reasoning. It is of great importance to note, that while demonstrative and probable evidence be kept constantly in view, that we may be prevented from confounding two species of truth so completely distinct from
EVIDENCES OF CHRISTIANITY

one another. The evidence of demonstration applies to necessary, moral or probable evidence to contingent, truth. The great mass of objects upon which our judgment and reasonings are exercised rests upon probable evidence. Demonstrative evidence is very limited in the range of its application, extending no farther than the relations of numbers and geometric figures, which are capable of being expressed in language so strictly definite as to admit of no misunderstanding or mistake. On the strict definition of terms rests the whole certainty of mathematical truth, which is not an absolute certainty, but a hypothesis of absolute certainty; and to the great mass of phenomena, and events with which we are familiarly conversant, such a mode of reasoning would be altogether inapplicable. The language employed is too vague and ambiguous to admit of strict definition; and such is the imperfection of language that, however able it might be to have words used in a fixed meaning, it is impracticable.

The idea has, no doubt, been entertained of reducing words, expressive of our views on general subjects, to a fixed and certain signification; and even the illustrious names of Leibnitz and Locke are found in connection with such a plan, and yet we fear that the experience of all past ages must pronounce it utopian. However advantageous, indeed, such a plan in some respects might be, it is very doubtful whether it might not so fetter and constrain the mind that no scope would be given for the exercise of those powers which the laws of emotion and the existing probable evidence summons into action. It is very injurious to the mind to enthrall too strong a partiality for one species of evidence rather than another. We thereby lose sight of the important fact that the same kind of evidence is not applicable in all cases, and that therefore we ought only to require such evidences as the particular circumstances of the case admit. Instead, therefore, of being dissatisfied with the kind of evidence adduced, it ought to be our chief inquiry whether, in any given case, we have obtained the strongest evidence that the circumstances of the case permit.

On the distinction between probable and demonstrative evidence, see Butler, Analog of Religion (Introduction). See also Gardner, Christian Cyclopedia, p. 352; Bergier, Dict. de Theologie, ii, 554; Brown, On Cause and Effect, notes E, F; Avercombie, On Intellec-
tual Virtue; On Experience, p. 471; Gambia-
ner, On Moral Evidence (London, 1824, 8vo); Locke, Essay, bk. iv, ch. 15.

Evidences of Christianity, the title generally given by English writers to the proofs of the divine origin of the Christian revelation. This branch of theology does not include demonstration of the being of God against the atheists, but is directed against all who deny the divine authority of Christianity and of the Scriptures on which it rests. The term Apologetics has been adopted in Germany for the name of this science, and under that title and that of Apology we have given an account of the forms which the proofs and defences of Christianity have assumed in the various periods of Church history. In this article we give (1.) a summary of the evidences as they are commonly stated by English writers; (II.) a summary of the views held by continental writers as to the relative value of the several branches of evidence.

I. Summary of Christian Evidence.—The evidences of Christianity are usually classified by English writers under three heads—External, Internal, and Collateral.

The External evidences are those which demonstrate the authenticity, credibility, and divine authority of the Scriptures, including the arguments from miracles and prophecy. The internal evidence is drawn from the excellence and beneficial tendency of the doctrines and morals of Scripture, from the character of Christ, and from the consistency, harmony, and inspiration which are inherent in the record. The Col-

lateral evidence is drawn from the history of Chris-
tianity itself, from its marvellous diffusion, its effects upon human nature, upon the progress of society, and upon what is generally called civilization. One of the best sketches of the evidences, according to this classi-
fication of them, is that given by Watson (Institutes, vol. i).

Preliminary to a consideration of these direct evid-
ences is the question whether any evidence is necessary. Evidence, of which the following is a brief outline.

Man is universally admitted, by all who admit the being of God, to be a moral and responsible agent, under the dominion of the law of God. But deists assert that there is no such endowment, and that revelation is unnecessary. It can be shown, on the other hand, that human reason, unaided, has never af-

forded to man any clear standard of moral quality for actions, and that, even if it could do so, its decisions lack authority to control the will; they are, at best, no more than whether he be revelation or not, we speak.

History shows that sober views of religion have been found nowhere since the times of the patriarchs, except in the writings of the O. and N. T., and in writings drawn from them; and that whatever truth has been found in the religious systems of the heathen has been borrowed from these. It can be shown that the very rudimentary doctrines of religion, e.g. God, providence, immortality, etc., clearly show the neces-
sity of revelation. Admitting, then, the presumption that a revelation should be given in some way, we may say, a priori, that it must (1) contain a definition of the divinity of the object; (2) that it must accord with the principles of former revela-
tions; (3) that it must have an external authentication; and (4) that it must contain provisions for its own effectual promulgation. All these conditions are ful-

1. The external evidences include miracles and prophecy. "We need not inquire whether external evidence of a revelation is in all cases requisite to him who immediately and at first receives it; for the question is not whether private revelation or not, but whether it has been made by God to individuals, and what evidence is re-
quired to authenticate them, but what is the kind of evidence which we ought to require of one who pro-

fesses to have received a revelation of the will of God, with a command to communicate it to us, and to enjoin it upon us as the rule of our conduct? If God has high and excellent nature of the truths he teaches; in other words, that which is called the internal ev-

evidence cannot be that proof. For we cannot tell whether the doctrines he teaches, though they should be capa-
bile of a higher degree of rational demonstration than any delivered to the world before, may not be the fruits of his own mental labor. He may be conscious that they are not, but we have no means of knowing that of which he is conscious except by his own testi-
mony. To us, therefore, they would have no author-

ity but as the opinions of a man whose intellectual at-

tivities and powers we might admire, but to whom we could not submit as to an infallible guide, and the less so if any part of the doctrine taught by him were either mysteriou-
s or above our reason, or contrary to our in-

terests, prejudices, and passions. If, therefore, any person who claims to have received a revelation from God to teach to mankind, and that he was directed to command their obedience to it on pain of the divine displeasure, he would be asked for some ex-

ternal authentication of his mission; nor would the reasonableness and excellence of his doctrines be ac-

cepted in place of this. And to be satisfied with this would be thought a ground sufficiently strong for yielding to
EVIDENCES OF CHRISTIANITY

him an absolute obedience. Without it he might reason and be heard with respect, but he could not commanding. On this very reasonable ground the Jews on one occasion founded the question, "By what word or manner of things did you utter your saying that the earth is the habitation of God?" Agreeably to this, the authors both of the Jewish and Christian revelations profess to have authenticated their mission by the two great external proofs, Miracles and Prophecy, and it remains to be considered whether this kind of authentication be reasonably sufficient to command our faith and obedience.

The question is not whether we may not conceive of external proof of the mission of Moses, and of Christ and his apostles, differing from those which are asserted to have been given, and more convincing. In whatever way the authentication had been made, we might have conceived of modes of proof differing in kind, or more ample in circumstance; so that to ground an objection upon the absence of a particular kind of proof, for idle and base purposes, would be trifling. But this is the question: Is a mission to teach the will of God to man, under his immediate authority, sufficiently authenticated when miracles are really performed, and prophecies actually and unequivocally accomplished? We have, then, to first show that these performances are performed as expected, and their performance as expected, their credibility can be established by human testimony, and that, when thus authenticated, they afford the necessary evidence of revelation. These topics will be treated under the heads of Miracles and Prophecy (q. v.). The records of both miracles and prophecies are written in the Old and New Testaments. The antiquity of these writings is demonstrated by the very fact of the existence, on the one hand, of the Jewish polity, and, on the other, of the Christian religion, as well as by the concurrent testimony of ancient profane authors. These books can be shown, by the circumstances attending them, could there possibly be room for delusion? Acts i., xii., the weight of authority, and with regard to any other ancient records, to be substantially the same now as when originally written, nay, that they have come down to our times without any material alteration whatsoever. The credibility of the testimony of the sacred writers themselves is fairly proved by the character of the men, by the circumstances under which they wrote, and by the entire absence of motive for falsification. Allowing, then, the New Testament to be genuine, it follows, "1. That the writers knew whether the facts they state were true or false (John i., 8; xii., 58; Acts xvi., 11)." 2. That the character of these writers, so far as we can judge by their works, seems to render them worthy of regard, and leaves no room to imagine they intended to deceive us. The manner in which they tell their story is most happily adapted to gain our belief. There is no air of declamation and histrionics; nothing that looks like artifice and design: no apologies, no concoction, no characters, no reflections, no digressions; but the facts are recounted with great simplicity, just as they seem to have happened, and those facts are left to speak for themselves. Their integrity, likewise, evidently appears in the freedom with which they mention those circumstances which might have exposed their Master and themselves to the greatest contempt amongst prejudiced and inconsiderate men, such as they knew they must generally expect to meet with when they were driven to escape their persecutors, especially of the Romans (Mark vi.; Luke xiv.); and, Mark vi.; Matt. viii., 39; John xii., 48). It is certain that there are in the writings the most genuine traces not only of a plain and honest, but the most pious and devout, a most benevolent and generous disposition, as every one must acknowledge who reads their writings. 3. The apostles were under no temptation to forge a story of this kind, or to publish it to the world knowing it to be false. 4. Had they done so, humanly speaking, they must quickly have perished in it, and their foolish cause must have died with them, without ever gaining any credit in the world. Reflect more particularly on the nature of those grand facts, the death, resurrection, and exaltation of Christ, which were never heard of by any but their immediate hearers, as first exhibited to the apostles. The resurrection of a dead man, and his ascension into an abode in the upper world, were such strange things that a thousand objections would immediately have been raised against them, and some extraordinary proof would have been justly required. A belief based on the manner in which the apostles undertook to prove the truth of their testimony to these facts, and it will evidently appear that, instead of confirming their scheme, it must have been sufficient utterly to have overthrown it, had it been itself the most probable imposture that the wit of man could ever have contrived. See Acts i., iii., ix., xiv., xix., etc. They did not merely assert that they had seen miracles wrought by Jesus, but that he had endued them with a variety of miraculous powers; and these they undertook to display, not in such solid and important works as appeared worthy of divine interposition, and entirely superior to human power. Nor were these things undertaken in a corner, in a circle of friends or dependents; nor were they said to be wrought, as might be expected, in the presence of a certain number of their own countrymen. They were done often in the most public manner. Would impostors have made such pretensions as these? or, if they had, must they not immediately have been exposed and ruined? Now, if the New Testament be genuine, then it is certain that the apostles pretend to miracles which have wrought miracles in the very presence of those to whom their writings were addressed; nay, more, they profess likewise to have conferred those miraculous gifts in some considerable degrees on others, even on the very persons to whom they write, and they appeal to their consciences as to the truth of it. And it is as certain that the New Testament beggars this argument. It is likewise certain that the apostles did gain early credit, and succeeded in a most wonderful manner. This is abundantly proved by the vast number of churches established in early ages at Rome, Corinth, Ephesus, Colossae, etc. 6. That, admitting the facts which they testified concerning Christ to be true, then it was reasonable for their contemporaries, and is reasonable for us, to receive the Gospel which they have transmitted to us as a divine revelation. The great thing they asserted was, that Jesus was the Christ, and that he was the Messiah who was promised. The only way of receiving this in the right spirit was in him, and by miracles wrought by him, and by others in his name. If we attend to these, we shall find them to be no contemptible arguments, but must be forced to acknowledge, that the premises being established, the conclusion most easily and necessarily follows; and this conclusion, that Jesus is the Christ, taken in all its extent, is an abstract of the Gospel revelation, and therefore is sometimes put for the whole of it (Acts viii., 37; xvii., 18)."

2. The internal evidence of Christianity is drawn from a consideration of the doctrines of Scripture, of their consistency with the character of God, and their tendency to promote the virtue and happiness of men. It takes note also of the morals of Christianity, and of their superiority to all other systems of ethics; and of the influence which it has had in despotism and the arts of war, and in the intellectual and moral advancement of the world. The doctrine of the resurrection of Christ, transcending the highest imaginations of merely human moralists. "Of its just and sublime conceptions and exhibitions of the divine character; of the truth of that view of the moral state of man upon which its disciplinary treatment is founded; of the correspondence that there is between its views of man's mixed relation to God as a sinful creature, and yet pitied and cared for; and that actual mixture of good and evil, penalty and forbearance, which the condition of the world presents; of the connection of its
EVIDENCES OF CHRISTIANITY 377 EVIDENCES OF CHRISTIANITY
doctrine of atonement with hope; of the adaptation of
its doctrine of divine influence to the moral condition
of revelation, nor are the laws for the atonement and the affect-
ing benevolence and consecration which it implies;
and of its noble and sanctifying revelations of the
blessedness of a future life, much might be said—they
are subjects, indeed, on which volumes have been writ-
ten, and they can never be exhausted. Nowhere ex-
ceed to the idea of a system of morals; and the deficiencies of pagan morality only
exalt the purity, the comprehensiveness, the practices
exalt the personality of our. The character of the Being acknow-
the supernal always impress itself upon
morality and justice, the obligation of which
the God of the Bible is 'boly,' without spot; 'just,' without partiality; 'good,' bound-
lessly benevolent and beneficent; and his law is the
image of himself, 'boly, just, and good.' These great
moral qualities are not made known to us merely
in the abstract, so as to be comparatively feeble in their
influence, but in the person of Christ, our God incor-
nate, they are seen exemplified in action, displaying
themselves amidst human relations, and the actual
conditions of human life. With pagans the au-

tority of moral rules was either the opinion of the
wise men, or the advice and assistance of
them. It is true, in some degree, by observation and experience;
but to us they are given as commands immediately
issuing from the supreme Governer, and ratified as his
by the most solemn and explicit attestations.

With them many great moral principles, being indistinctly
appreciated and even denied as of no account at all; with us,
the explicit manner in which they are given ex-
cludes both: for it cannot be questioned whether we
are commanded to love our neighbor as ourselves;
to do to others as we would that they should do to us, a
principle which ends almost all our moral
principle in one plain principle; to forgive our enemies;
to love all mankind; to live righteous and soberly, as
well as godly; that magistrates must be a terror only to
evil-doers, and a praise to them that do well; that
subjects are to render honor to whom honor, and tribute
to whom tribute, is due; that masters are to be
just and merciful, and servants faithful and obedient.
These, and many other familiar precepts, are too
explicit to be mistaken, and too authoritative to be dis-
pputed; two of the most powerful means of rendering
law effectual. Those who never enjoyed the benefit
of Christian instruction, were masters of a double joke;
comprehend their essential, or the elements of that moral
state of the heart from which right
and beneficent conduct alone can flow; and, therefore,
when they speak of the same virtues as those enjoined
by Christianity, they are to be understood as attach-
ging to them a lower idea. In this the infinite superi-
ority of Christianity displays itself. The principle of
obedience is not only a sense of duty to God and the
fear of his displeasure, but a tender love, excited by
his infinite compassion to us in the gift of his Son,
which shrinks from offending. To this influential mo-
tive as a reason of obedience is added another, drawn
from its end: one not less influential, but which has
then moralists never knew—the testimony that we
please God, manifested in the acceptance of our
prayers, and in spiritual and felicous communion with
him. By Christianity, impartiality of thought and desire
is restrained; an equal division of the sons of men,
in the lips and conduct. Humanity, meekness,
gentleness, placability, disinterestedness, and charity
are all as clearly and solemnly enjoined as the grosser
vices are prohibited; and on the unruly tongue itself
is impressed the law of kindness. Nor are the in-
junctions feeble: they are strictly LAw, and not mere
advice and recommendations: 'Without holiness no
man shall see the Lord,' and thus our entrance into
heaven, and our escape from perdition, are made to
depend upon this preparation of mind. To all this is
added possibility, nay, certainty of attainment, if we
use the appointed means. A pagan could draw, though
not with lines so perfect, a bemo ideal of virtue which
he never set his eyes upon; but that the 'law of
hope' is given by the religion of Christ to all who
are seeking the moral renovation of their nature, be-
cause 'it is God that worketh in us to will and to do
of his good pleasure.' When such is the moral nature
of Christianity, how obvious is it that its tendency,
both as a system of morals and as a system of
laws, and the highest sense beneficent! From every passion which
wastes, and burns, and frets, and enfeebles the spirit,
the individual is set free, and his inward peace renders
his obedience cheerful and voluntary; and we might
appeal to innumerable witnesses whether, if the moral
principles of a religion were not wrong, and the moral
qualities embodied in the conduct of all men, the world
would not be happy; whether if governments ruled,
and subjects obeyed, by the laws of Christ; whether
if the rules of strict justice which are enjoined upon
us regulated all the transactions of men, and in that
mercy to the distressed which we are taught to feel
and to practise came into operation; and whether,
if the precepts which delineate and enforce the duties
of husbands, wives, masters, servants, parents, children,
did, in fact, fully and generally govern all these
relations—whether the necessary connection between
the choice of moral good and the state of man's
beings by the poets would not then be realized, and Virgil's
Jarn reict et Virgo, reverent Saturnia regna.
[Now Astrea returns, and the Saturnian reign.]
be far too weak to express the mighty change? It
was in the reign of Saturn that the heathen poets fix
the origin of this Age. At the end of the Golden
Age, Astrea (the goddess of justice), and many other de-
ties, lived on earth, but, being offended with the wick-
edness of men, they successively fled to heaven.

Astrea staid longest, but at last retired to her native
seat, and was translated into the sign Virgo, next to
Libra, who has her superior balance. Such is the
character of Christianity. On immense numbers of individuals
it has superseded these moral changes; all nations,
where it has been fully and faithfully exhibited, bear,
and admitted to the vices, the impress of its hal-
lowing and benigne influence. It is now, in an active
exertion in many of the darkest and worst parts of the
earth, to convey the same blessings; and he who would
arrest its progress, were he able, would quench the
only hope which remains to our world, and prove him-
selves an enemy not only to himself, but to all mankind.

What, then, is the Christian religion? Is it the
Scriptures are worthy of God, and propose the very
ends which rendered a revelation necessary? Of the
whole system of practical religion which it contains
we may say, as of that which is embodied in our Lord's
sermon on the mount, in the words of one who, in a
course of sermons on that divine composition, has en-
tered most deeply into its spirit, and presented a most
instructive delineation of the character which it is
intended to form, 'Behold Christianity in its native
form, as delivered by its great author. See a picture
of God, as far as he is imitable by man, drawn by
God's own hand. What beauty appears in the whole!
How just a symmetry! What exact proportion in
every part! How desirable is the happiness here de-
scribed! How venerable, how lovely is the holiness!'

'If,' says Jeremy Taylor, 'wisdom, and mercy, and
justice, and simplicity, and truth, and the sublimity
and meekness, and contentedness, and charity be images of
God and rays of divinity, then that doctrine,
in which all these shine so gloriously, and in which noth-
ing else is ingrediunt, must needs he from God. If
the holy Jesus had come into the world with less splen-
dor of power and mighty demonstrations, yet the ex-
cellency of what he taught makes him alone fit to be
the master of the world;' and agreeable to all this has
been its actual influence upon mankind. Although,
says Bishop Porteus, Christianity has not always been
so well understood or so honestly practised as it ought
EVIDENCES OF CHRISTIANITY 378

EVIDENCES OF CHRISTIANITY

tury there were Christians in the camp, in the senate, and in the palace; in short, everywhere, as we are informed, except in the temples and the theatres: they filled the towns, the country, and the islands. Men and women of all ages and ranks, and even those of the first days of the Church, could not have lived in the cities and modifications of life, and communicated its kindly influence to almost every public and private concern of mankind. It has insensibly worked itself into the finest frame and constitution of civil states. It has given a tinge to the complexion of their governments, to the institutions of social life. For this it has restrained the spirit of the prince and the madness of the people. It has softened the rigors of despotism and tamed the insolence of conquest. It has, in some degree, taken away the edge of the sword, and thrown even over the horrors of war a veil of mercy. It has descended into families; it has diminished the gentility of private tyranny; improved every domestic establishment; given tenderness to the parent, humanity to the master, respect to superiors, to inferiors ease; so that mankind are, upon the whole, even in a temporal view, under the beneficent influence of the Christian religion. It is the temper of the Gospel, and has reaped from it more substantial worldly benefits than from any other institution upon earth. As one proof of this, among many others, consider only the shocking carnage made in the human species by the exposure of infants, the gladiators and many other inhuman practices. The Church did nothing more than bring them into disuse, as it confessedly has done, the two former of these inhuman customs entirely, and the latter to a very great degree, it has justly merited the title of the benevolent religion. But this is far from being all. Throughout the more enlightened parts of Christendom there prevails a gentleness of manners widely different from the ferocity of the most civilized nations of antiquity; and that liberality with which every species of distress is relieved is a virtue peculiar to the Christian name. But we may ask further, What sanctions has it had on the mind of man as it respects his eternal welfare? How many thousands have felt its power, rejoiced in its benign influence, and under its dictates been constrained to devote themselves to the glory and praise of God! Burdened with guilt, incapable of finding relief from human help, the Christian turns to God in despair, and is enabled in beholding that sacrifice which alone could stone for transgression. Here the hard and imperious heart has been softened, the impetuous passions restrained, the ferocious temper subdued, powerful prejudices conquered, ignorance dispelled, and the obstacles to real happiness removed. Here the Christian, looking round on the glories and blashphemies of this world, has been enabled, with a noble contempt, to despise all. Here death itself, the king of terrors, has lost all his sting; and the soul, with a holy magnanimity, has borne up under a dying condition with a dying hope, a dying mind. Here, in the very jaws of death, Christianity shows itself so incomparable a thing, under the grace of God. The ten thousand who have been converted in the course of a year in Alexandria, are a most striking instance of the power of this great principle. This power has spread in a most surprising manner. The Gospel is not, as once it was, a most contemptible and despised thing. It has been spread over the empire of the Vandals. (Watson, Dictionary, s. v. Christianity.)

8. The Collateral evidence treats of the marvellous diffusion of the Gospel, and of its actual effects upon mankind and upon the history of civilization, as proofs of its divine origin. "Of its early triumphs, the history of the Acts of the Apostles is a splendid record; and in process of time it made a wonderful progress through Europe, Asia, and Africa. In the third cen-
of heathen mythology, and the existence of every object of their worship. It accepted no compromise; it admitted of no comprehension. If it prevailed at all, it must prevail by the overthrow of every status, altar, temple, and image. It was pronounced to be false, and all other worship vain. These considerations which must have strengthened the opposition to it, augmented the hostility which it must encounter, and enlarged the difficulty of gaining proselytes. It was essentially, when compared to the converts to Christianity in the earliest age, a number of persons remarkable for their station, office, genius, education, and fortune, and who were personally interested by their emolument and honors in either Judaism or heathenism, appeared among the Christian proselytes. Its evidences appeared themselves not only to the multitude, but to men of the most refined sense and most distinguished abilities, and it dissolved the attachments which all powerful interest and authority created and upheld.” (Watson, l. c.).

Paley’s View of the Evidences of Christianity for a long time held the first place as a text-book on evidences in England. Paley even goes so far as to say we can conceive of no way in which a revelation could be made except by miracles. “In whatever degree it is probable, or not very improbable, that a revelation has been sent to men; and in whatever degree it is probable, or not very improbable, that miracles should be wrought. Therefore, when miracles are related to have been wrought in the promulgation of a revelation manifestly wanted, and, if true, of inestimable value, the improbability which arises from the miraculous nature of the things related is not greater than the original improbability that such a revelation should be imparted by God.” The book is divided into two parts: I. The direct historical evidence of Christianity, and wherein it is distinguished from heathenism, and for other auxiliary evidences of Christianity. The first part is then divided into two propositions: (1.) “That there is satisfactory evidence that many, professing to be original witnesses of the Christian miracles, passed their lives in labors, dangers, and sufferings, voluntarily under- taken in attestation of the accounts which they delivered, and solely in consequence of their belief in those accounts; and that they also submitted, from the same motives, to new rules of conduct.” (11.) “That there is not satisfactory evidence that persons pretending to originate or to be the authors of any singular miracles have acted in the same manner, in attestation of the accounts which they delivered, and solely in consequence of their belief in the truth of those accounts.”

The argument rests on the credibility of testimony, and aims to show that the testimony in this case is indubitable. The second part treats briefly the argument from prophecy, from the morality of the Gospel, and the internal evidences afforded both by the sacred writings, and by the doctrines and histories which they contain.

Coleridge, who disparaged the comparative value of evidence from miracles and prophecy, dictated to a friend the following scheme of evidences: (1) Miracles, as precluding the contrary evidence of no miracles. II. The material of Christianity, its existence and history. III. The doctrines of Christianity, and the correspondence of human nature to these doctrines, illustrated historically, as the actual production of the new world, and the dependence of the fate of the planet upon it; 2d, individually, from its appeal for truth to an asserted fact, which, whether it be real or not, every man possessing reason has an equal right to believe, with the man who will have which has more or less lost its freedom, though not the consciousness that it ought to be and may become free: the conviction that this cannot be achieved without the operation of a principle innately with itself; the evident rationality of an entire confidence in that principle, being the condition and means of its operation; the experience in his own nature of the truth of the process described by Scripture as far as he can place himself within the same frame of see- dent assurances of others as to the effects experienced by them, and which he is striving to arrive at. All these form a practical Christian. Add, however, a gradual opening out of the intellect to more and more clear perceptions of the vindication of the doctrines of Christianity, with the truths evolved from inflexions on its own nature. To such a man one main test of the objectivity, the entity, the objective truth of his faith, is its accomplishment by an increase of insight into the moral beauty and necessity of the process which it comprises, and the demonstration of that proof on the causes asserted. Believe, and, if thy belief is right, that insight which gradually transmutes faith into knowledge will be the reward of that belief. The Christian, to whom, after a long profession of Christianity, the mysteries remain as much mysteries as before that belief, he has the actual assurance of his arithmetical belief in the future in the working of the same miracle, and the past, present, and probable future of human nature; and in this state a fair comparison of the religion as a divine philosophy with all other religions which have pretended to revelations and all other systems of philosophy, both with regard to the totality of its truth, and its identification with the manifest march of affairs. I should conclude that, if we suppose a man to have convinced himself that not only the doctrines of Christianity, which may be conceived independently of history or time, as the Trinity, spirit-possession, etc., are the natural growth out of the human mind and experience, which reason, thus strengthened, has evolved from its own sources, but that the historical dogmas, namely, of the incarnation of the creative Logos, and his becoming a personal agent, are themselves founded in philosophical necessity, then it seems irrational that such a man should still believe in the actual occurrence of a religion strictly correspondent therewith, at a given time recorded, even as much as that he should reject Caesar’s account of his wars in Gaul after he had convinced himself a priori of their possibility. As the result of a conviction he will not scruple to receive the particular miracle recorded, inasmuch as it will be miraculous that an incarnate God should not work what must to mere man appear as miracles, inasmuch as it is strictly accordant with the ends and benevolent nature of such a being to commence the elevation of man above his mere senses by attracting and enforcing attention, first, through an appeal to those senses. But with equal reason will he expect that no other or greater force should be laid on those miracle as such; that they should not be spoken of as good in themselves, much less as the adequate and ultimate proof of that religion. Likewise, he will require that satisfaction should be found these miracles so wrought, and on such occasions, as to give them a personal value as symbols of important truths when their miraculousness was no longer needful or efficacious” (Coleridge, Works, N. Y., v, 555).

On the definition of Butler’s Analogy, see the article Butler (vol. i, p. 957).

II. As to the comparative value of the different classes of the Christian evidences there has been much dispute. Coleridge admitted the value of the testimony from miracles, and even as an emptying of Christianity, but considered that argument as much less valuable now than the internal evidence. “It was only to overthrow the usurpation exercised in and through the senses that the senses were miraculously
EVIDENCES OF CHRISTIANITY

Reason and religion are their own evidence.

The nature and ends in this world are revealed to the spiritual. He is fully risen, and while his glories are still under veil, he calls up the breeze to chase away the usurping vapors of the night season, and thus converts the air itself into the minister of its own purification: not surely a proof or elucidation of the external evidence, but to present the idea. Wherever, therefore, similar circumstances coexist with the same moral causes, the principles revealed and the examples recorded in the inspired writings render miracles supravisional; and if we neglect to apply truths in expectation of wonders, or under pretext of divination, which goes forth from that center which is the same reply which our Lord gave to the Pharisees on a like occasion. I shall merely state here what my belief is concerning the true evidences of Christianity. 1. Its consistency with right reason I consider as the outer court of the temple, the common area within which it stands. 2. The miracles, with and through which the religion was first revealed and attested, I regard as the steps, the vestibule, and the portal of the temple. 3. The sense, the inward feeling in the soul of each believer of its exceeding desirous value, is this, the strong foretokening that the redemption and the graces propounded to us in Christ are what he needs—this I hold to be the true foundation of the spiritual edifice. With the strong à priori probability that flows in from 1 and 3 on the correspondence of his heart to his will, and his will to his nature, we have the French, refuse or neglect to make the experiment without guilt. But, 4, it is the experience derived from a practical conformity to the conditions of the Gospel; it is the opening eye, the dawning light, the terror and the promise of spiritual growth, the blessedness of loving God as God, the present sense of sin hated as sin, and of the incapability of attaining to either without Christ; it is the sorrow that still rises up from beneath, and the consolation that meets us from above; the bosom treacheries of the principal in the warfare, and the exceeding faithfulness and long-suffering of the uninterested ally; in a word, it is the actual trial of the faith in Christ, with its accompaniments and results, that must form the arch roof, and faith itself is the completing key-stone. In order to an efficient belief in Christianity a man must have been a Christian, and lived in Christ. These four evidences I believe to be significative of all spiritual truths, to every subject not presentable under the forms of time and space, as long as we attempt to master by the reflex acts of the understanding what we can only know by the act of becoming. 'Do the will of my father, and ye shall know whether I am the Christ': These four evidences I believe to have been, and still to be, for the world, for the whole Church, all necessary, all equally necessary; but that at present, and for the majority of Christians born in Christian countries, I believe the third and the fourth evidences to be the most important; not excluding, but involving as a glad, unclouded faith in the two former' (Coleridge, Biographia Literaria, ch. xxiv).

Ullmann (Sinnlichkeit of Jesus, § 1) remarks 'that the nature of the case, and the necessities of their contemporaries, justified the apologist in proving the divine character of the initiates and the revelations of the Gospels and prophecies. But the necessity of the times and of individuals may in this respect vary; and although the Gospel in its essence remains the same, and contains eternal, unchangeable truth, yet in a different age a different method of proof may lead more immediately to the acknowledgment of this truth. In our own time it seems proper to fix our eyes especially upon the spiritual character of Jesus in order to obtain satisfactory proof of the divinity of his mission and instructions, not because the apostolic mode of proof has become untenable, but because the other mode has a more vital efficacy on account of the style of education prevalent at the present day. We do not find ourselves in an inductive, no direct connection with the spirit and mysteries of the Old Testament; the Jews were in the time of the apostles; we live among contemporaries to whom miracles are more a ground of doubt than of faith; we should not forget that the proof from miracles exerts its full power, properly so speaking, only in the eye of faith which conducts us to the desired conclusion only by a circuitous path. On the other hand, a vivid apprehension of the inward character of Jesus brings us nearer to the operative centre of Christianity, and at the same time makes us feel the influence of the moral power of his heavenly person, which rests immediately on himself; it is free, spiritual confidence in his person. As with his contemporaries everything depended on the yielding confidence with which they received the favours which he brought them, so likewise with us this confidence may be the element and a full belief in Christianity, and it, at all events, a condition of receiving benefit from our Redeemer.'

The tendency of German theology has gone against the external evidences of Christianity, but this very tendency or resistance to an open connection with the events above which German orthodoxy has only recently begun to emerge. On this point, see The New Review, iv, 141 sq.

See also bishop Butler's admirable discussion of the "particular" evidence for Christianity in his An Essay of Religion, ii, ch. vii. See also C. M. Fischer, Essays on the supernatural evidence of Christianity, p. 13 sq. Note that the rejection of miracles generally leads to a rejection of the doctrine of the personality of God. See, for a fuller treatment of this branch of the subject, the article MIRACLES. The chief task of the advocate for Christianity in the present age (apart from the obolistic conflict with Panaethus and Positivism, for which see articles under those heads) is to vindicate the authenticity and the early date of the books of the N. T. against the assuata not merely of avowed skeptics, but also of theologians within the Christian Church, such as those of the Többing school. But this dispute is in reality another, again, into that of vindicating the historical reality of the scriptural miracles. "The recent criticism of the N. T. canon, embracing the attempt to impeach the genuineness of various books, is only a part of the great discussion of the historical truth of the N. T.; it is difficult to accept the credibility of the Gospel historians without first disproving their genuineness" (Fischer, Essays, p. 14).

In the noted Essays and Reviews (Boston ed. 1865, 12mo), Prof. Baden Powell has an article on "The Study of the Evidences of Christianity," in which he undertakes to state the present condition of the discussion, and to indicate the true line of Christian evidences. He disparages the "professed advocates of an external revelation and historical evidence" by innuendo as well as by direct attack, and assumes the incoherency and impossibility of miracles. See also Scott's articles in the Journal of Theological Review, July, 1861, which closes as follows: "It is one thing to urge other evidences of Christianity as stronger and more satisfactory than that from miracles; it is another thing to reject all miracles as incredible and absurd. He who takes the former course may show an eminently Christian spirit, and for ourselves we cordially sympathize with his position; but he who takes the latter course, if not an infidel himself, is certainly playing into the hands of infidels and atheists."

One of the chief forms taken by recent Christian apologists is the argument drawn from the actual
EVIDENCES OF CHRISTIANITY

phenomena of Christianity, the existing facts which no
body can deny. The first of these is the character of
Christ, which has been so described by rationalistic
and infidel writers (e.g. Strauss, Renan, Schenkel) as
to bring the argument down almost, if not quite, to
the point whether Jesus was an impostor or no. The
result of these attacks within the twenty years
have brought with greater force than ever the eternal
light of evidence which the person and life of the Re-
deremer contain in favor of the whole system of Chris-
tianity. See the works on this subject of Neander,
Lane, Schaff, Pressensé, Ellicott, Young, Plumptre,
and others. Dr. Schaff gives a brief summary of a study
of Christ in one strong passage: "Jesus of Nazareth
is the one absolute and unaccountable exception to the
universal experience of mankind. He is the great
central miracle of the whole Gospel history; and all
the sciences are but the dark shadows, the mes-
ifestations of his miraculous person, performed with
the same ease with which we perform our ordinary
daily works." The second of these phenomena is
found in the books of the New Testament themselves,
as affording abundant internal evidence of reality and
truthfulness. The third is the apostolic doctrine,
which can be traced up (through the Epistles to the
Thessalonians, Corinthians, Romans, and Gal-
tians, the genuineness and early date of which are ad-
mitted even by the Tübingen school) to within thirty
years at the death of Christ. (See an excellent arti-
cle on the Unanimous and Evidence of Christianity
by Prof. Lorimer, in B. and F. Eev. Rev., Jan. 1865,
reprinted in The Theol. Eclectic, New Haven iii., 80
a.) Dr. H. Schmidt, of Meiningen, taking the
Tübingen critics at their word, undertakes to find in
the four undoubted epistles (Galatians, 1 and 2 Co-
rinthians, and Romans) a full vindication of the truth
and divine origin of Christianity. See his Der Pauli-
nische Christus (Weimar, 1867, 3vo).

The comparison of Christianity with heathen religions
is opening a new and rich mine of Christian evidence.
But this is the special field of the [127] Christian
school, which shall follow the general argument of this
paper. The same may be said of other Masters (Lond. x2 ed., 1863, 2 vols. 12mo),

On the question of the origin and dates of the several
gospels is treated under the separate articles Matthew,
Mark, Luke, and John. The Tübingen school,
who deny the existence of the synoptists, who date
forward into the second century. See TÜBINGEN SCHOOL.

On the questions involved, see Fisher, Essays, already
 cited; Westcott, On the Canon of the N. T. (Cambridge,
1853); Tischendorf, Wann wurdc unsere Evangelien
verfasst (Leipzig, 1865; transl. by W. L. Gage, under
the title Origin of the Four Gospels, Lond. 1869; Amer.
Tract Society, 1869).

ly, Inspiration; Jesus; Miracles.

Evil is discord or disturbance in the order of the
universe. Leibnitz divides it into metaphysical evil,
by. Imperfection; physical evil, by suffering; moral
evil, by the evil results of man's conduct. But as all
true, by the natural
Evil is the only one now generally recognised
1. "Natural evil is whatever destroys or any way dis-
turbs the perfection of natural beings, such as blind-
ness, disappearance, etc. But as all
Evil is the nature of sin, or, as some have
supposed, only the penalty of it, such disturbance is not
necessarily an evil, inasmuch as it may be counter-
pointed, in the whole, with an equal if not greater good,
as in the afflictions and sufferings of good men. When
such disturbance occurs as the penal effect of con-
version, it is the necessary consequence of moral evil."

The tendency of modern thought is towards the doc-
trine that the (apparent) disturbances of the physical
world are likely to be reconciled with universal law
as scientific knowledge advances.

Moral evil is the recogni-
ment between the actions of a moral agent and the
rule of those actions, whatever it be. Applied to choice,
or acting contrary to the revealed law of God, it is
turned wickedness or sin. Applied to an act contrary
to a mere rule of fitness, it is called a fault (Buck,
av.)

On the origin of evil, and its relations to the gov-
ernment of God, see Sin; Theodicy.

Evil-merodach (Heb. Eril Merodak, עירל מרדך, Sept.
Eirilamarduk, Οιρλαμαρδαχ), son and successor of Nebuchadnezzar, king of Babylon, who,
on his accession to the throne (B.C. 561), released the
captive king of Judah, Jehoiachin, from prison, after
57 years of incarceration, treated him with kindness
and distinction, and set his throne above the other con-
quered kings who were detained at Babylon (2 Kings
xxv, 27; Jer. iii, 31-34). See CHALDAEAN.

A Jewish tradition (noticed by Jerome on Isa. xiv, 29) ascribes
this kindness to a personal friendship which Evil-mer-
odach had contracted with the Jewish king when he
was but a child. His father had treated him kindly, who, on recovering from his seven years' monomania,
took offence at some part of the conduct of his son, by
whom the government had in the mean time been ad-
ministered. This story was probably invented to ac-
count for his change of policy. His name is mentioned
by other ancient authors (Eirilamardoucos by Berosus, in
Josephus, Apion, i, 20; Eirilamadochos by Megathes
and Abydunus, in Euseb. Chron. Armen. p. 28;
Aristarchos by Josephus, Ant. x, 11, 2). Hales
identifies him with the king of Babylon who formed a
powerful confederacy against the Medes, when
was broken up, and the king slain by Cyrus, then acting
for his uncle Cyrus. But this rests on the author-
ity of Xenophon's Cyropedid, the historical value of
which we estimate far too high. See CYRUS.

He is doubtless the same as the Istaradum of Ptolemy's
"Canopus," who reigned but a short time, having
ascended the throne on the day of Nebuchadnezzar
in B.C. 561, and being himself succeeded by Nergis-
sar in B.C. 559. See BABYLON. He thus appears
to have reigned but two years, which is the time assign-
ed to him by Abydunus (Fr. 9) and Berosus (Fr. 16).

At the end of this brief space Evil-merodach was
murdered by Nergilissar [see NERGAL-SHAALIK],
a Babylonian noble married to his sister, who then
seized the crown. The other ancient authorities as-
sign him different lengths of reign. According to
Berosus, Evil-merodach was the last Babylonian
knight government and intemperate. Perhaps the depar-
ture from the policy of his father, and the substitution
of mild for severe measures, may have been viewed in this light.

The latter half of the name Evil-merodach is that of a Babylonian god Marsusotur (q. v.). The name is explained to be the former part of his name attempted.

Since evil, as a Hebrew word, means "foolish," Simonis proposes to consider it the derivative of בִּן, in the Arabic signification of "to be first," affording the sense of "prince of Merodach." This rests on the assumption that the Babylonian language was of Syro-Arabian origin. Gesenius, however, the other Hebrew scholars, do not admit what Simon believes to be a Semitic-Germanic word, of similar sound, but reputable sense, is concealed under evil, and that the Hebrews made some slight perversion in its form to produce a word of contemptuous significance in Hebrew, just as is assumed in the case of Beelzebul.

Evil-speaking, "the using language either reproachful or untrue respecting others, and thereby injuring them. It is an express command of Scripture to speak evil of no man" (Titus iii. 2; James iv. 11); by which, however, we are not to understand that there are no occasions on which we are at liberty to speak of others that which may be considered as evil.

1. Persons in the administration of justice may speak words which in private intercourse would be reproachful. 2. God's ministers may inveigh against vice with sharpness and severity, both privately and publicly (Isa. liviii. 1; Titus i. 13). 3. Private persons may reproach others when they commit sin (Lev. xix. 17).

Some vehemence of speech may be used in defence of truth and impugning errors of bad consequence (Jude iii). 5. It may be necessary, upon some important occasion, to explain to those who are judged guilty, or that have expressed disapprobation of notorious wickedness (Acts viii. 23). Yet in all these the greatest equity, moderation, and candor should be used; and we should take care, 1. Never to speak in severe terms without reasonable warrant or apparent just cause. 2. Nor beyond measure. 3. Nor out of bad principles or wrong ends; from ill will, contempt, revenge, envy, to compass our own ends; from wantonness or negligence, but from pure charity for the good of those to whom or of whom we speak. This is an evil, however, which greatly abounds, and which is not sufficiently watched against; for it is not where men are most guilty that they are most guilty, but even in speaking what is true we are in danger of speaking evil of others. There is sometimes a malignant pleasure manifested; a studious recollection of everything that can be brought forward; a delight in bringing anything spoken against others; a secret rejoicing in knowing that another's fall will be an occasion of our rise. All this is base to an extreme.

The impurity and sinfulness of evil-speaking will appear if we consider, 1. That it is entirely opposite to the whole tenor of the Christian religion. 2. Exceedingly condemned and prohibited as evil (Ps. lxiv. 8; James iv. 11). 3. No practice hath more severe punishments denounced against it (1 Cor. v. 11; vi. 10). 4. It is an evidence of a weak and disquatered mind. 5. It is even indicative of ill breeding and bad manners. 6. It is the abhorrence of all wise and good men (Ps. xxv. 9). 7. It is exceedingly injurious to society, and inconsistent with the relation we bear to each other as Christians (James iii. 6). 8. It is brandished with the epithet of folly (Prov. xviii. 6, 7). 9. It is perveting the design of speech. 10. It is opposite to the example of Christ, which we are commanded to follow. See SLANDER. (Baum, Works, vol. i. sermon xi.; Tillotson, Sermons, sermon xl.; Jack, Sermons on Evil Speaking; Seed, Sermons, p. 339; Campbell, Disquisitions, diss. iii. § 22.)

Evodusii, a Latin theologian, was born about the middle of the fourth century, at Tagaste, in Africa. He was a countryman of St. Augustine, and was united with him in an intimate and lifelong friendship. After following in his youth a secular profession, he became, in 386 or 387, bishop of Uzalis. Augustine assures us that while he was a priest and subdeacon by means of the relics of St. Stephen, which Orosius, in 415, had brought from Palestine. Evodus thus took an active part in the controversy against the Donatists and Pelagians, and in 427 wrote on this subject a letter to the monks of Adrumetum. He died about 480. We have from him four letters to St. Augustine (160, 161, 163, and 177 in the edition of the Benedictines); a letter addressed by him, conjointly with four other bishops, to Bishop Innocent I., of Rome (published in vol. vi. of the Benedictine edit. of the works of Augustine); fragments of a letter to the monks of Adrumetum (joined to the latter 216 of St. Augustine). His treatise on the miracles performed by the relics of St. Stephen is lost; for the Libri duo de Miracula S. Stephani, appended to Augustine's De Civitate Dei (in vol. vii. of his works), cannot be attributed to him. A treatise De Fide, or De Unitate Trinitatis contra Nestoriana, is by some likewise ascribed to Evodus. — Hoefer, Nouv. Biog. Gen. xvi. 842.

Ewald, Johann Ludwig, theologian, was born at Dreieichenhain, Hesse, September 16, 1747. He studied at the University of Marburg. After serving two years as tutor to the children of the prince of Hesse-Philippsthal, he became pastor at Offenbach, 1768. He began preaching as a Rationalist, but in a few years he became a convinced Christian. In 1788 he was made a professor of ethics, and in 1797 became a member of the German Academy. He published De Jesus Christo, a work of great celebrity. He was appointed professor of theology in Göttingen, and in 1796 he accepted a pastoral charge at Bremen; and here, also, he greatly promoted the schools, visiting the establishments of Pestalozzi and Fellenberg, in Switzerland, to inform himself on their systems. In 1808 he was called to Heidelberg as professor of ethics, and in 1807 became church councillor at Carlsruhe, where he died, March 19, 1822. He was a voluminous author. Doering gives a list of eighty-nine different publications of his. The chief are, Predigerbefähigung (Leipsic, 1785-94, 9 vols.); Christenthum und Kneomophilismus (Leipsic, 1788-90, 2 vols. 8vo.); Soloma; Versuch einer psychologisch-biographischen Darstellung (Gera, 1800, 8vo.); Die Götterwidm. d. Christenthum (Bremin, 1800, 8vo.); Briefe über die alle Mystik u. d. neuen Mysticismus (Leipsic, 1822, 8vo.); besides numerous sermons and books on practical religion and education. — Doering, Die deutschen Kanzelredner, i, 46.

Evwé stands in the Ath. Ver. as the representative of the following Heb. words: בְּאֶ (rachêt), fem., a "cece" (Gen. xxxi. 18; xxxii. 14) or "sleep" generally (Cant. vi. 6; Isa. liii. 7); אֶ (ebh. masc. Exod. xii. 5, 8; fem. Jer. i. 17; Ezek. xxxiii. 20), a sheep or goat from a flock generally, variously rendered ("cattle," "sheep," "goat," "ewe"); בְּ (koshach) or בְּ (koshach, fem., so called from being fit for cropping), a "cece-lamb," i.e. one from one to three years old (Gen. xxix. 28, 29, 30; Lev. xiv. 10; Num. vii. 14; 2 Sam. xii. 3, 4, 6); בְּ (alokh, milk-giving, fem. plur.), milk ("ewes" with young), Ps. lxxviii. 71; Isa. xi. 11. See SHEEP, etc.

Ewer, or pitcher (q. v.) accompanying a wash-hand basin (q. v.). It is stated as a description of Elisha (2 Kings iii. 3, 6, 7), "which was a shew-bread, and water that ministered of Elisha." This was the act of an attendant or disciple; and it was so much his established duty, that the mere mention of it sufficed to indicate the relation in which Elisha stood to Elisha. It is also an indication that the Hebrews were accustomed to wash their
hands in the manner which is now universal in the East, and which, whatever may be thought of its convenience, is unquestionably more refreshing and cleanly than washing in the water as it stands in a basin, which is a process regarded by the Orientalists with great dislike. The hands are therefore held over a basin, the use of which is only to receive the water which has been poured upon the hands, and then to use it to wash the person’s face; persons successively, from the jug or ewer held above them (Lane, Modern Egyptians, l. 212). A servant or some other person approaches with the ewer in his right hand and the basin in his left; and when the hands have been placed in it, the man in the margin, which, being pierced with holes, allows the water to pass through, thus concealing it after it has been defiled by contact with them. The ewer has a long spout and a long, narrow neck, with a cover, and is altogether not unlike our coffee-pots in general appearance: it is the same which the Orientalists use in all the abcouts. It is evident that a person cannot conveniently thus wash his own hands without assistance. If he does, he is obliged to fix the basin, and to take up and lay down the ewer several times, changing it from one hand to the other. Therefore a person never does so except when alone. If he has too servant, he asks some one by-stander to pour the water upon his hands, and offers a return of the obligation, if it seems to be required (Kittre, Pict. Bible, note ad loc.). See Washing of Hands.

Ewing, Finis, one of the founders of the Cumberland Presbyterian Church, was born July 10, 1778, in Bedford County, Va. His father was of Scotch-Irish descent, and both his parents were eminent for their piety, the father for many years being an elder in the Presbyterian Church. Mr. Ewing had but little early education: he was sent in the spring of the year he was born to a log school at a place where is not known. His biographer says, "Like Franklin, he seems early to have acquired a fondness for books. His varied and extensive reading made him emphatically a learned man, though not systematically educated, and the brilliancy of his success as a minister of the Gospel excelled intellectual endowments of a high order." His parents having died in Virginia, the surviving family moved to what was called the "Cumberland Country," and settled in Davidson County, Tennessee, near Nashville. On Jan. 16, 1793, he married the daughter of general William Davison, of North Carolina, a lady whose name (Davison), in honor of his many valuable services during the war of the Revolution. Here Mr. Ewing and his wife united with Rev. Dr. Craighead’s church, and lived in its communion some years before either of them knew they were of that religious persuasion. After the birth of their first child (but at what time is not known) Mr. Ewing removed to Kentucky, and settled in what was afterwards Logan County, near Red River Church, of which Rev. James M’Greedy was pastor. In the great revival of 1800, which swept over all the Western States, and out of which originated the Cumberland Presbyterian Church, Mr. Ewing heard for the first time in his life the doctrines of regeneration and personal holiness insisted upon from the pulpit. He became satisfied that he had not a saving knowledge of the truth, and communicated his feelings to his wife, whom he found in a similar state of mind. After many prayers and tears, while engaged in family worship, he "became filled with the certainty of their great truth." Some time after this (the precise period is not known) he told his impressions to preach the Gospel to Transylvania Presbytery, which body, at the advice of Rev. David Rice, D.D., one of the oldest ministers in the presbytery, licensed Mr. Ewing and three others to do so. His success was great; several of sinners were converted wherever he went. His talents, piety, commanding language, and zeal carried everything before them. He was soon licensed to preach as a probationer, but the prevailing party in the presbytery opposed his licensure. He went on preaching very successfully, however, revival attending his labors wherever he travelled. His labor was so much called for, and so marked with success, that at the urgent call of several congregations he was ordained, in November, 1803, to the work of the ministry. The denomination continued to grow there for several years; in the mean time Kentucky Synod had pretended to dissolve Cumberland Presbytery, which had ordained him, because of alleged irregularities. The presbytery remained for four years not attempting to exercise its functions as a presbytery; after which time it was dissolved by the General Assembly, from the General Assembly, they determined to organize again, even contrary to the wishes of a majority of Kentucky Synod. On February 4, 1810, Mr. Ewing and two other ordained ministers united and formed the first presbytery in new Cumberland Presbyterian Church, giving it the name of the presbytery Kentucky Synod had dissolved, viz., Cumberland Presbytery; hence the name "Cumberland Presbyterians," Mr. Ewing removed after some years to Todd County, Ky., and became pastor of Lebanon congregation, near Ewing’s Creek. Here under his eye was sustained for many years a flourishing classical seminary of learning. In 1820, at the urgent call of many friends and brethren, he removed to the State of Missouri, and settled in what is now Cooper County. It was not long until he built up a large congregation called Ewing’s Church, which were the nucleus of Lebanon, which now contains two churches. Here he prepared and published his Lectures on Divinity, which have been extensively circulated and read, and which contain the germ of the peculiarities of Cumberland Presbyterians. He labored here with great faith and zeal. In 1846, he was removed to the town of Lexington, Lafayette County, Mo. Here he soon gathered a congregation, built a church, and, with others, was the means of extending the work of grace all over the vast incoming territories of the West. Mr. Ewing died here July 4, 1841, in his 68th year. He was tall, portly in appearance, had a keen, penetrating eye, always bore a dignified look, was a man of extraordinary pulpit talents, and of great success among all classes in winning souls to the Redeemer. In our troubled with Great Britain in 1812 he did not hesitate to give all the weight of his great influence in favor of his country. He was no politician, yet at one time, being an intimate friend and acquaintance of general Jackson, he was by him appointed register of the land office at Lexington, Mo. He died lamented by a large and growing denomination, not by many others, as a great and good man. His remains are in the cemetery at Lexington, Mo. (J. B. L.)

Ewing, John, D.D., a Presbyterian minister, and provost of the University of Pennsylvania, was born in Nottingham, Cecil County, Md., June 22, 1732, and graduated in 1754 in New Jersey College, of which he remained tutor for two years. Having completed his
EXACTOR

a. Dr. Ex. 17 of 1233, soppa', a driver (task-master, Exod. iii. 7, Job iii. 18, Isa. ix. 3; or simply driver of animals, Job xxxix. 7); hence exactor of a debt (or tribute, Dan. xi. 20, Zech. ix. 8); hence (in accordance with Oriental ideas and customs) a ruler, king, tyrant (Isa. iii. 12, xiv, 2; Zech. x. 4), as the parallel term "prince" in the above passage of Isaiah shows it to be the meaning.

Exaltation of Christ (status exaltationis), a theological phrase, including in its scope the resurrection of Christ, his ascension into heaven, his sitting at the right hand of God the Father, and his coming to judge the world at the last day. See articles on these heads; also on the relation of Christ to the Church (vol. ii. p. 291), Hagenbach, History of Doctrines, Smith's ed., ii. 352.

Example (ẹtúpọ, Judges 7), especially Christ's (ẹtúpọ oṣu, 1 Pet. ii. 21) for the imitation of his followers (ẹtúpọ tiye, John xiii. 15; elsewhere in other relations, Heb. iv. 11; viii. 5; ix. 23; Isa. v. 10; 2 Pet. ii. 6), and subordinate pastors for their flock (ẹtúpọ, Phil. iii. 17; 2 Thess. iii. 9; 1 Tim. iv. 12; 1 Pet. v. 3, etc.). See Flatt, Das Beispielen Jesu (in the Magna. für chr. Dornat. i, 179 sq.); Keil, De Exemplo Christi (Lips. 1792; Opusc. i, 100-135); Oeder, De Christi imitatio (in his Obs. asc. i, 53-56); Schmid, De perpetuo Christi imitatio (Lips. 1710); Stöber, De exemplarum imitatio (Argent. 1782); Wolf, De ex- emplo caute adhibendi (Lips. 1785-6); Kempis, Imitation of Christ (often published).

Example, "a copy or pattern, in a moral sense, is either taken for a type, instance, or precedent for our admonition, that we may be cautioned against the faults or crimes which others have committed, by the bad example; or which have not been so; or example is taken for a pattern for our imitation, or a model for us to copy after. That good examples have a peculiar power above naked precepts to dispose us to the practice of virtue and holiness may appear by considering, '1. That they most clearly express to us the nature of our duties in their subjects and sensible effects. General precepts form abstract ideas of virtue, but in examples, virtues are most visible in all their circumstances. 2. That they are our duty, but examples assure us that they are possible. 3. Examples, by secret and lively incentive, urge us to imitation. We are touched in another manner by the visible practice of good men, which reproaches our defects, and obliges us to the same rule which laws, though wise and good, will not effect.'

The life of Jesus Christ forms the most beautiful example the Christian can imitate. Unlike all others, it was absolutely perfect and uniform, and every way accommodated to our present state. In him we behold all light without a shade, all beauty without a spot, all the purity of the law and the excellency of the Gospel. Here we see piety without superstition, and morality without ostentation; humility without meanness, and fortitude without temerity; patience without apathy, and compassion without weakness; zeal without rashness, and benevolence without prodigality.

The obligation we are under to imitate this example arises from duty, relationship, engagement, interest, and gratitude. See art. JESUS CHRIST. Those who set bad examples should consider, 1. That they are the ministers of the devil's designs to destroy souls. 2. That they are enemies to the enjoining proper for their private uses any portion of the revenue. 'The imposition of examples requires a reasonable cause, and limitation to what is necessary. State churches cannot impose an example without previously obtaining the permission of the state government.' Herzog, Real-Encyclop. iv. 280.

EXARCH (ekarach). (1.) the title given, under the Byzantine emperors, to their viceroys in Italy and Africa, after Justinian's reconquest of those provinces. (2.) The title was adopted in the early Church for the highest orders of the hierarchy. Primates or metropolitan bishops were styled curia exarchus or curia exarchus, and the patriarchs were called έκαραχ της εκκλησιας. In the 6th canon of Sardica (A.D. 344) the former title (exarch of the eparchy) is given to primates; the third Council of Carthage, A.D. 397, forbade its use (Riddle, Antiquities, bk. iii. ch. iii). The exarch, as primate, was "inference of the patriarch, and superior to the metropolitan. In the third century there were three exarchae, viz. Ephesus, with the diocese of Asia, 12 provinces and 300 sees; Heraclea, with the diocese of Thrace, and 6 provinces; Cesarea, 15 provinces and 104 sees. The privileges of these exarchae were transferred by the Council of Chalcedon (A.D. 451) to the patriarch of Constantinople. (3.) The exarch in the Greek Church at the present day is the patriarch's deputy, whose duty it is to visit the provinces under his inspection, to inform himself as to the lives and morals of the clergy; to take cognizance of ecclesiastical causes—the manner of celebrating divine ordinances, the sacraments, particularly confession, the observance of the canons, monastic discipline, affairs of marriages, divorces, etc.; but, above all, to take account of the revenues which the patriarch receives from several sources. Bingham, Orig. Eccles. Bohn's ed. i, 61, 67.

EXCHANGER (προμισσωρ, so called from the table used for holding the coin [see CHANGER OF MONEY]), a broker or banker (i.e. cash-man [see BANK]), one who exchanged money, and also received money on deposit at interest, in order to loan it out to others at
EXCOMMUNICATION

更高的税率 (Mat. xxv. 27). (See Smith's Dict. of Class. Ant. s. v. Menæstir.) See Money-changer, Loan.

Excommunication, the judicial exclusion of offenders from the religious rites and privileges of the particular community to which they belong. It is a power founded upon a right inherent in all religious societies, and analogous to the power of capital punishment, banishment, and excommunication which are exercised by political and municipal bodies. If Christianity is merely a philosophical idea thrown into the world to do battle with other theories, and to be valued according as it maintains its ground or loses it by conflict of opinions, excommunication, and ecclesiastical punishments and discipline are unreasonable. If society is a thing in its existence any body of doctrine and any code of morals, a spiritual my kingdom of God on earth, is the declaration of the Bible; and that the Jewish Church was at once a spiritual and a temporal organization is clear. Among the Jews, however, excommunication was not only an ecclesiastical, but also a civil punishment, because of the connection of civil and religious privileges or penalties. Excommunication, in the Christian Church, consisted at first simply in exclusion from the communion of the Lord's Supper and the love-feasts; "with such a one, no, not to eat" (1 Cor. v. 11). It might also include a total separation from any body of doctrine to which he was liable in civil life, neither did it withhold from him any natural obligations, such as are founded on nature, humanity, and the law of nations, Ecclesiastical penalties are oftenonymous for which it was inflicted. They are various, and range in heinouslyness from the offence of keeping a flock dog that to of taking God's name in vain. Elsewhere (Talm. Bab. Moed Kadosh, fol. 16, 1) the causes of its infliction are reduced to two, termed money and epicurism, by which is meant debt and wanton insolence. The offender was first cited to appear in court, and if he refused to appear or to make amends, his sentence was pronounced — "Let M. or N. be under excommunication." The excommunicated person was proscribed from the bath, or from the convivial table, and all who had to do with him were commanded to keep him at four cubits' distance. He was allowed to go to the Temple, but not to make the circuit in the ordinary manner. The term of this punishment was thirty days, and it was extended to a second and to a third thirty days when necessary. If at the end of that time the offender was still contumacious, he was subjected to the second excommunication termed תֶּבֶז (cherem), a word meaning something devoted to God (Lev. xxvii. 21, 28; Exod. xxvii. 20 [19]; Num. xviii. 14). Severer penalties were now attached. The offender was not allowed to teach or to be taught in the law, or to be called to be signified. He was not permitted to perform any commercial transactions beyond purchasing the necessary of life. The sentence was delivered by a court of ten, and was accompanied by a solemn malediction, for which authority was supposed to be found in the "Curse ye Meros" of Judg. v. 33. Lastly followed נֵכַף (shammâthâ), which was an entire cutting off from the congregation. It has been supposed by some that these two latter forms of excommunication were undistinguishable from each other. See CHURCH.

The punishment of excommunication is not appointed by the law of Moses. It is founded on the natural right of self-protection which all societies enjoy. The case of Korah, Dathan, and Abiram (Num. xvii), the curse denounced on Meros (Judg. v. 29), the commission and proclamation of Ezra (vii. 26; 8, 6), and the reformations of Nehemiah (xiii. 32), are all striking instances that the Talmudists as precedents by which their proceedings are regulated. In respect to the principle involved, "the cutting off from the people" commanded for certain sins (Exod. xxx. 38; xxxi. 14; Lev. xvii, 4), and the exclusion from the camp denounced on the leper (Exod. xxix. 20, Num. xiii. 14), are more appropriate.

In the New Testament, Jewish excommunication is brought prominently before us in the case of the man that was born blind and restored to sight (John ix). "The Jews had agreed already that if any man did confess that he was Christ, he should be put out of the synagogue. Therefore said Jesus unto him, According to thy faith, be it unto thee. For verily I say unto thee, if thou shalt say, 'My Lord, the Son of God,' ver. 22, 28. "And they cast him out. Jesus heard that they had cast him out" (ver. 34, 35). The expressions here used, ἄνωθεν γίγνεται—ἐξακολουθεία αἰεόν ἔχων, refer, no doubt, to the first form of excommunication, or nidda. Our Lord warns his disciples that they will have to suffer excommunication at the hands of their countrymen (John xvi, 2), and the fear of it is described as sufficient to prevent persons in a respectable position from acknowledging their belief in Christ (John xii, 42). In Luke vi, 22, it has been interpreted by our Lord referring "to the three forms of Jewish excommunication," Blessed are ye when men shall hate you, and when they shall separate you from their company [ἀγωγόιτευματίς], and shall reproach you [αὐθιναίων], and cast out your name as evil [ἰδιθοιων], for the Son of man's sake."

The three words, nidda, niddut, and cherem, are more accurately expressed as separate separation, the additional malediction, and the final exclusion of niddut, cherem, and shammathâ. This verse makes it probable that the three stages were already formally distinguished from each other, though, no doubt, the words appropriate to each are occasionally used inaccurately. It is used inaccurately in Latin on Jewish excommunication by Musculus (Lips. 1708), Opitze (Kilon. 1680).

II. In the New Testament. —Excommunication in the New Testament is not merely founded on the natural right possessed by all societies, nor merely on the example of the Jewish Church and nation. It was instituted by our Lord (Matt. xviii, 15, 18), and it was practised by and commanded by Paul (1 Tim. i, 20; 1 Cor. v, 11; Tit. iii, 10).

I. Its Institution. —The passage in Matthew has led to much controversy, into which we do not enter. It runs thus: "If the brother shall trespass against thee, go and tell him his fault between thee and him alone; if he shall hear thee, thou hast gained thy brother. But if he will not hear thee, then take with thee one or two more, and if three witness see every work be established. And if he shall neglect to hear them, tell it unto the Church; but if he neglect to hear the Church, let him be unto thee as a heathen man and a publican. Verily I say unto you, Whatsoever ye shall bind on earth shall be bound in heaven, and whatsoever ye shall loose on earth shall be loosed in heaven." Our Lord therefore recites a way in which a member of his Church is to become to his brethren as a heathen man and a publican, i.e. be reduced to a state analogous to
that of the Jew suffering the penalty of the third form of excommunication. It is to follow on his contempt of the censure of the Church passed on him for a trepass which he has committed. The first excommunication is to be preceded, as in the case of the Jew, by two warnings.

2. Apostolic Example.—In the Epistles we find Paul frequently claiming the right to exercise discipline over his converts (comp. 2 Cor. i, 23; xii, 10). In two cases we find him exercising this authority to the extent of cutting off offenders from the Church. One of these is mentioned in the text here: "Ye are gathered together, and my spirit, with the power of our Lord Jesus Christ, to deliver such a one unto Satan for the destruction of the flesh, that the spirit might be saved in the day of the Lord Jesus" (1 Cor. v, 2-5).

This passage is significant in that it states: "Holding faith and a good conscience, which some, having put away concerning faith, have made shipwreck; of whom is Hymenæus and Alexander, whom I have delivered unto Satan, that they may learn not to blaspheme" (1 Tim. i, 19, 20). It seems certain that this is a passage, or rather a section, concerning the excommunication of the persons indicated and others similar to them. The other expression, "the others for hire," shows that the phrase meaning "delivered unto Satan" is qualified. All agree that this expression is contained in it, whether it implies any further punishment, inflicted by the extraordinary powers committed especially to the apostles, has been questioned. The strongest argument for the phrase meaning no more than excommunication may be drawn from a comparison of Col. i, 13. Addressing himself to the "saints and faithful brethren in Christ which are at Colosse," Paul exhorts them to "give thanks unto the Father, who hath made us meet to be partakers of the inheritance of the saints in light: who hath delivered us from the power of darkness, and hath translated us into the kingdom of his dear Son: in whom we have redemption through his blood, even the forgiveness of sins." The conceptualization of the text here is of man lying in the realm of darkness, and transported from thence into the kingdom of the Son of God, which is the inheritance of the saints in light, by admission into the Church. What he means by the power of darkness is abundantly clear from many other passages in his writings, that he be subjected to evil spirits. (Eph. vi, 12: "Put on the whole armor of God, that ye may be able to stand against the wiles of the devil; for we wrestle not against flesh and blood, but against principalities, against powers, against the rulers of the darkness of this world, against spiritual wickedness in high places.") Introduction into the Church is therefore, in Paul's mind, a translation from the kingdom and power of Satan to the kingdom and government of Christ. This being so, he could hardly more naturally describe the effect of excluding a man from the Church than by saying, "he delivered unto Satan." The idea being that the man ceasing to be a subject of Christ's kingdom of light, was at once transported back to the kingdom of darkness, and delivered therefore into the power of its ruler, Satan. This interpretation is strongly confirmed by the terms in which Paul describes the consequences. Here again the act of excommunication is compared to a translation, of which the Church, is pronounced to be a translation from darkness to light, from the power of Satan unto God. Conversely, to be cast out of the Church would be to be removed from light to darkness, to be withdrawn from God's government, and delivered into the power of Satan (so Balsamon and Zonaras, in Basili. Can. 7; Estius, in 1 Cor. v; Beveridge, in 1 Cor. xxvi, 18). If, however, the word delivery means more than excommunication, it would imply the additional exercise of a special apostolic power, similar to that exerted on Ananias and Sapphira (Acts v, 1), Simon Magus (vii, 20), and Elymas (xii, 10). (So Chrysostom, Ambrose, Augustine, Hammond, Grocius, Lightfoot, and others.)

3. Apostolic Precept.—In addition to the claim to exercise discipline, and its actual exercise in the form of excommunication by the apostles, we find apostolic precepts directing that discipline should be exercised by the rulers of the Church, and the stronger cases excommunication should attend to: "If any man obey not our word by this epistle, note that man, and have no company with him, that he may be ashamed. Yet count him not as an enemy, but admonish him as a brother," writes Paul to the Thessalonians (2 Thess. iii, 14).

To the Galatians: "I would they were even cut off from trouble you" (Gal. v, 12). To Timothy: "If any man teach otherwise, . . . from such withdraw thyself" (1 Tim. vi, 20). To the Corinthians: "A man that is a heretic, after the first and second admonition, reject" (Tit. iii, 10). John instructs the lady to whom he addresses his second epistle not to receive into her house, nor bid God speed to any who did not believe in Christ (2 John 10); and we read that in the case of Cyprian he acted himself on the precept that he had given (Eusebius, Hist. Eccl. iii, 28). In his third epistle he describes Diotrephes, apparently a Judaizing presbyter, "who loved to have the pre-eminence, as "casting out of the Church," I. e., refusing Church communion to the stranger brethren who were travelling about preaching to the Gentiles (3 John 10). In the addresses to the Seven Churches the angels or rulers of the church of Pergamos and of Thyatira are rebuked for "suffering" the Nicolaitans and Balaamites "to teach and to seduce my servants, and to exhort them to things which are not according to the doctrine which ye have received, and to abandon them" (Rev. ii, 20). There are two passages still more important to our subject. In the epistle to the Galatians, Paul denounces, "Though we, or an angel from heaven, preach any other gospel unto you than that which we have preached unto you, let him be accursed." (Gal. i, 8, 9). And in the second epistle to the Corinthians: "If any man love not the Lord Jesus Christ, let him be Anathema Maranatha!" (1 Cor. xvi, 22). It has been supposed that these two expressions, "let him be Anathema," "let him be Anathema Maranatha," refer respectively to the two later stages of Jewish excommunication—the chair and the shammashah. This requires consideration.

The words anathema and anathema have evidently the same derivation, and originally they bore the same meaning. They express a person or thing set apart, laid up, or devoted. But whereas a thing may be set apart by way of honor or for destruction, the words, like the Hebrew 'anathema, place it under God's curse. One who came to have opposite senses—to anathematizōν θεοῦ, and to ἀναθηματίζων θεόν. The Sept. and several other ecclesiastical writers use the two words almost indiscriminately, but in general the form anathema is applied to the votive offering (see 2 Macc. xxvi, 5; Apocalypse xxii, 6; and ch. vii, 17, xx, 4, and Rom. xiv, 14), and the form anathema to that which is devoted to evil (see Deut. vii, 26; Josh. vi, 17; vii, 13). Thus Paul de-
EXCOMMUNICATION

clarifies that he could wish himself an ἀδιάθημα from Christ if he could thereby save the Jews (Rom. ix. 3). His meaning is that he would be willing to be set apart as a vile thing, to be cast aside and despised, if only it could bring about the salvation of his brethren. Hence we see the force of ἀδιάθημα ἐστώ in Gal. i. 8: "I have nothing to do with him," would be the apostle's injunction, "but let him be set apart as an evil thing, for God to deal with him as he thinks fit." Hammond, in his "Tyranny of the Churches," says: "You are to disclaim and renounce all communion with him, to look on him as on an excommunicated person, under the second degree of excommunication, that none is to have any commerce with in sacred things." Hence it is that ἀδιάθημα ἐστώ came to be the common expression employed by councils at the termination of each canon which they enacted, meaning that whoever was disobedient to the canon was to be separated from the communion of the Church and its privileges, and from the favor of God, until he repented (see Bingham, Ant. xvi. 2, 10). See ANATHEMA.

The expression ἀδιάθημα μανασσάβι, as it stands by itself without explanation in 1 Cor. xvi. 22, is so peculiar, that it has tempted a number of ingenious expositions. Parkhurst hesitatingly derives it from μανασσάβι, "Cursed be thou." But this derivation is not tenable. Buxtorf, Morinus, Hammond, Bingham, and others identify it with the Jewish skamāmdāh. They do so by translating skamāmdāh, "The Lord comes." Ewald, however, says: "You cannot make the Hebrew words "The Lord comes" (see Lightfoot, in loc.). Several fanciful derivations are given by rabbinical writers, as "There is death," "There is desolation;" but there is no mention by them of such a signification as "The Lord comes." Lightfoot derives it from כָּמָה, and it probably means a thing excluded or shut out. Maranatha, however, particularly its use in the text, may seem to us, in a Syro-Chaldaic sense, signifying "The Lord is come" (Chrysostom, Jerome, Eutius, Lightfoot, or "The Lord cometh." If we take the former meaning, we may regard it as giving the reason why the offender was to be anathematized; if the latter, it would either imply that the separation was to be in perpetuity, "donec Dominus redeat" (Augustine), or, more properly, it would be a form of solemn appeal to the day on which the judgment should be ratified by the Lord (comp. Jude 14). In any case it is a strengthened form of the simple ἀδιάθημα ἐστώ. And thus it may be held as a holding toward a similar relation to that which existed between the skamāmdāh and the cherem, but not on any supposed ground of etymological identity between the two words skamāmdāh and maram-aha. Perhaps we ought to interpret more strongly between ἀδιάθημα and μανασσάβι, and read ἀδιάθημα μανασσάβι, i. e., "Let him be anathema. The Lord will come." The anathema and the cherem answer very exactly to each other (see Lev. xxvii. 28; Num. xxi. 3; Isa. liil. 28). See MARANATHA.

4. RESTORATION TO COMMUNION.—Two cases of excommunication are recorded in Holy Scripture: (1) that of Ezekiel, and in one of them the restitution of the offender is specially recounted. The incestuous Corinthian had been excommunicated by the authority of Paul, who had issued his sentence from a distance without any consultation with the Corinthians. He had required them publicly to act upon it, as the subject of it had done so. The offender had been brought to repentance, and was overwhelmed with grief. Hereupon Paul, still absent as before, forbids the further infliction of the punishment, pronounces the forgiveness of the penitent, and exhorts the Corinthians to receive him back again. (2) In the second case, the two were subjected to corporal discipline rather than to this censure (Bingham, Orig. Ecc. bk. xvi. ch. ii.; Cave, Prim. Christianity, iii. 5).

5. The Nature of Excommunication is made more evident by these acts of Paul than by any investigation of Jewish practice or of the etymology of words. We thus find (1) that it is a spiritual penalty, involving no temporal punishment except accidentally; (2) that it consists in separation from the communion of the Church; (3) that its object is the good of the sufferer (1 Cor. v. 5), and the redemption of the soul of the offender (2 Tim. iii. 17); (4) that its subjects are those who are guilty of hecary (1 Tim. i. 20) or gross immorality (1 Cor. v. 1); (5) that it is inflicted by the authority of the Church at large (Matt. xviii. 18), and wielded by the regular appointed officer (1 Cor. v. 3; Tit. iii. 10); (6) that this officer's sentence is pronounced by the congregation to which the offender belongs (1 Cor. v. 4), in deference to his superior judgment and command (2 Cor. ii. 9), and in spite of any opposition on the part of a minority (6. 6); (7) that the exclusion may be of indefinite duration or for a period; (8) that its duration may be abridged at the discretion and by the indulgence of the person who has imposed the penalty (6. 8); (9) that penitence is the condition on which restoration to communion is granted (6. 7); (10) that the sentence is to be public, reversed as it was publicly pronounced (6. 10).

III. In the Post-Apostolic Christian Church.—(1.) In general.—Such a power is necessarily inherent in every community; and although "the only sense in which the apostles, or, of course, any of their successors in the Church, could be empowered to excommunicate was that they could exercise no judg- ments on individuals by giving sins as against God is by pronouncing and pro- claiming his forgiveness of all those who, coming to him through Christ, repent and forsake their sins," yet since offences as against a community may be visited with penalties by the regular appointed officers of that community, they may enforce or remit such penalties. On these principles is founded the right which the Church claims both to punish ecclesiastical offences, and to pronounce an absolute and complete perdon of a particular offender on his making the requisite submission to discipline. (11.) In the early Christian Church.—1. In the discipline of the primitive Church, according to the apostolic injunction, recourse was not had to excommunication until "after the first and second admonition" (ἐπιθυμία). If the offender proved refractory after the time granted for repentance (Siegel, Afterthäm, ii. 131), he was liable to excommunication, which at first consisted simply in the removal of the offender from the Lord's Supper and the love-feasts: hence the word excommunication, separation from communion. The practice was founded on the words of the apostle (1 Cor. v. 11), "with such an one let a cleave, and take no more to eat," which do not refer to ordinary meals and the common intercourse of life, but to the agape and other solemnities. The chief difference between Jewish and Christian excommunication consisted in this: the former extended in its consequences to the affairs of civil life, whereas the latter was strictly confined to ecclesiastical relations. It was impossible, in the constitution and situation of the Church during the three first centuries, that there should have been any confounding or intermingling of civil and religious jurisdiction in the Church, nor were there subjected to corporal discipline rather than to this censure (Bingham, Orig. Ecc. bk. xvi. ch. ii.; Cave, Prim. Christianity, iii. 5).

2. There were two excommunications, the greater
EXCOMMUNICATION

(major) and lesser (minor). The excommunication minor (ordinaria) extended from participation in the Eucharist and prayers of the faithful, but did not expel from the Church; for the person under its sentence might stay to hear the psalmody, reading of the Scripture, sermons and prayers of the catechumens and penitents, and then depart as soon as the first service, called the lectio, was ended (Cass. Decr. 77; ad Eulal., iii, 797). This punishment was commonly inflicted upon lesser crimes, or if upon greater, upon such sinners only as showed a willingness to repent—upon those who had lapsed rather through infirmity than maliciously. The excommunication major (excommunication) was a total expulsion from the Church, and separation from communion in all holy offices with it (Encyclop. Metropolitana). When attended with excommunications, excommunication was called anathema (see article, vol. i, p. 230). The several churches mutually informed each other of their own separate excommunications, in order that a person excommunicated by one church might be held so by all; and any church which received him was held deserving of similar punishment. He who was guilty of any intercourse with an excommunicated person de facto incurred the same sentence as which deprived him of Christian burial and insertion in the diptychs or catalogues of the faithful. No gifts or oblations were received from the excommunicated. No marriages might take place with them. Their books might not be read, but were to be burned (Bingenb. Theol. Mor. 27). For the excommunicated persons, penances (q. v.) and public professions of repentance were required; and in Africa and Spain the absolution of lapsed persons (i.e. those who, in time of persecution, had yielded to the force of temptation, and fallen away from the Christian faith by the crime of actual sacrifice to idols) was forbidden, except at the hour of death, or in cases where martyrs interceded for them. See LAPIS.

(III.) The Roman Church. As the pretensions of the hierarchy increased, excommunication became more and more an instrument of ecclesiastical power, as well as a means of enlarging it. When the Church had full control of the state, its sentences were attended with the gravest civil as well as ecclesiastical consequences. There are three degrees of excommunication, the minor, the major, and the anathema. The minor may be imposed by holding communion with an excommunicated person: orationes, locutiones, bilendo, comedendo—praying, speaking, drinking, eating; and absolution may be given by any priest on confession. Priests who have incurred the minor ban may administer the sacraments. One who receives Communion while under the minor excommunication is one of the deacons, with ardor, to those of jurisdiction, and as not referring to grace directly, but only accidentally, might be excommunicated, or at least be not harmonized in the Church, but who, by being concealed and eluding jurisdiction, heads of religious orders within their own communities, all possess the power to issue excommunication, only not by the ancient law of the Church, but also by the most modern discipline' (Chambers, s. v.). But Aquinas held that excommunication, as not belonging to the keys of ord'

The penal aim of excommunication was the reform of the offender as well as the purification of the Church. Absolution can be granted, in case of the major ban, only by the authority which laid the ban, or its successor. Before absolution the authorities must be satisfied of penitence. The "penitent must first swear to never again follow the convicted, and to make all necessary atonement for his special offence; he must then be reconciled by kneeling, barefooted and stripped to his shirt, before the bishop sitting at the church gates. Here he again repeats his oath, and the bishop, reciting the psalm Deus misertor, strikes him with a rod during each verse. Then, after certain prayers, he absolves him and leads him into the church." 3. The anathema is attended with special ceremonies. "The bishop must be attended by twelve priests, each carrying a censer, and as well as an extinguished candle. He then sits before the high altar, or any other public place which he prefers, and delivers his sentence, which adjudges the offender to be anathematizatur et damnatur cum dioebolo et angelis ejus et omnibus reprobis in eternum ignem—cursed and damned with the anathema of God and of all hosts of angels and of all eternal fire. The candles are then dashed down. The ceremonies of absolution from this sentence are not very different from the last, although the form of prayer is varied" (Encyclop. Metrop. s. v.). The effects of the anathema were summed up in the monastic lines

Si pro delicto anathema quo efficiatur,
Os, crana, vala, communio, mensa negatur.

See ANATHEMA; BELL, BOOK, AND CANDLE.

In the Roman Catholic Church the power of excommunicating is held to reside, not in the congregation, but in the bishop; and this is believed to be in exact accordance with the remarkable proceeding commemorated in the First Epistle of St. Paul to the Corinthians (1 Cor. v. 3, 5), and with all the earliest recorded examples of its exercise. Like all the powers of the Church, it is held to belong to the primacy, and an eminent degree, to the Roman bishop, as primas of the Church; but it is by no means believed to be long to him exclusively, nor has such exclusive right ever been claimed by the bishops of Rome. On the contrary, it is argued that those who, in exercising visitatorial jurisdiction, heads of religious orders within their own communities, all possess the power to issue excommunication, not only by the ancient law of the Church, but also by the most modern discipline' (Chambers, s. v.). But Aquinas held that excommunication, as not belonging to the keys of ord'
been observed; whereas the cognizance hereof does not pertain to seculars, but to ecclesiastics. And every excommunicated person soever who, after the lawful monitions, does not change his mind, shall not only not be received to the sacraments and to communion and live in apparent sinfulness, but in all necessary acts, he shall, with obdurate heart, remain for a year in the disfellowship thereof, he may even be proceeded against as suspected of heresy." The popes have exercised the power of excommunication against entire communities at once. The Capitulaires of Pepin the Short, Charlemagne, and the 6th Council of Trier, ordained that the greater excommunication should be followed by banishment from the country. On the claim of the popes to excommunicate and depose monarchs, and to free subjects from their allegiance, see M'Clintock, Temporal Power of the Pope (N. Y. 1855, 12mo). The latest examples of popes to the devil, and his angels, monarchs were Napoleon I in 1809, and Victor Emmanuel, king of Italy, in 1860; neither of whom, however, was excommunicated by name, the pope having confined himself to a solemn and reiterated publication of the penalties decreed against persons who unjustly invaded the Holy See, and, in particular, against those who unjustly invaded the Holy See, and, in particular, against the Papal States, and Napolitanized its rights, or violently impeded their free exercise. The excommunication of a sovereign was regarded as freeing subjects from their allegiance; and, in the year 1102, this sentence was pronounced against the king of France, who opposed the excommunication. Subsequent examples in excommunicating popes likewise ventured to follow. But the fearful weapons with which the popes armed themselves in this power of excommunication were rendered much less effective through their incantuous employment, the evident worldly motives by which it was sometimes governed, and the excommunications which rived the popes hurled against each other during the time of the great papal schism" (Chambers, s. v.).

(V.) The Greek Church.—In the Greek Church excommunication cuts off the offender from all communion with the 318 fathers of the first Council of Nicæa, and with the church of Rome, which, on occasion, together with the 318, many accusing the pope of idle eye, he drives "the a nail into the ground with a hammer as a mark of malediction" (Bock, s. v.). Sir Paul Rycaut (Present State of the Greek and Armenian Churches, Lond. 1679, 8vo), who wrote his observations on the state of that communion in 1678, has given, in the original Greek, the form of an excommunication issued against an unknown thief whom the authorities were seeking to discover. It runs as follows: "If they restore not to him which is his own, and possess him peaceably of it, but suffer him to remain injured and damned, let him be segregated from the Lord God Creatour, and be accursed, and unpardoned, and despaired of after death in this world, and in the other which is to come. Let wood, stones, and iron be dissolved, but not they: may they inherit the leprosy of Gehazi and the confusion of Judas; may the earth be divided, and devour them; Abram, may a nervous tremble on earth like Cain, and the wrath of God be upon their heads and countenances; may they see nothing of that for which they labor, and beg their bread all the days of their lives; may their works, possessions, labors, and services be accursed; always without effect or success, and blown away like dust; may they have the curses of the holy and righteous patriarchs Abram, Isaac, and Jacob; of the 318 saints who were the divine fathers of the Synod of Nice, and of all other holy synods; and being without the Church of Christ, let no man administer unto them the things of the Church, or bless them, or offer sacrifice for them. or give them the divinæm, or the blessed bread, or wine; or let them touch, nor receive any other food without power from them; and after death let no man bury them, in penalty of being under the same state of excommunication; so for let them remain until they have performed what is here written." (V.) In Protestant Churches.—New relations between the churches. The ordinances of the 6th Council of Trier, ordaining that excommunication should be followed by banishment from the country, were signally opposed to the Reformation, and new limits were soon assigned to the exercise of discipline. According to the view of the Wittenser reformers, the ban could have no civil effect unless ratified by the State. The necessity of the power of excommunication in the Church was asserted by all the Reformers. The Reformation of the Church is the affair of the whole Church, clergy and laity (Calvin, Institut., iv. chap. xi.; Melancthon, Corpus Ref. et. Schreibt., iii. 965). See Excommunication. They disclaimed the right of using the excommunication major. In general, it was "only reconciled by penance or by expiation which appeared to them to be inherent in the constitution of the Christian society, and to be sanctioned by the Word of God; nor have any civil consequences been generally connected with it in Protestant countries. To excommunicate a man is never in any measure whatever is certainly inconsistent with the principles of the Reformation" (Chambers, s. v.).

The causes of excommunication in the established Church of England are, contempt of the bishops' court, heresy, neglect of public worship and the sacraments, contempt of discipline, and, generally, anything which rivas in any measure whatever is certainly inconsistent with the principles of the Reformation. The judge of any spiritual court excommunicates a man for a cause of which he has not the legal cognizance, the party may have an action against him at common law, and he is also liable to be indicted at the suit of the king (Ces. 65, 68; see also the Homily on the Eight Rules). The Church of England of Religion is as follows: "That person which, by open denunciation of the Church, is rightly cut off from the unity of the Church, and excommunicated, ought to be taken of the whole multitude of the faithful as a heathen and publican until he be "penitently received into the Church by a judge that hath authority thereunto." By Old English law an excommunicated person was disabled from doing any act required to be done by one that is probus et legalis homo. He could not serve on juries, nor be witness in any court or cause; he was guilty of perjury if he cover lands or money due to him. By statutes 5 and 6 Edward VI, cap. 4, striking, or drawing a weapon to strike, in a church or church-yard, incurred ipso facto excommunication; ipso facto excommunication, or late senitio ferenda, i.e. when sentence must be passed before the offender be considered excommunicated. The offences which, in the reign of Edward III, 1373, were punished by ipso facto excommunication, are enumerated in some articles issued when Wiltshire was archbishop by a bishop of his own appointment, as such as might be injurious to the persons or properties of the clergy. The document may be found in Conc. Magna, Brit. iii. 95. By 8 James I, cap. 5, every popish recusant convict stands to all intents and purposes disabled, as a person "excommunicated with effect and in the public law." The church law denies Christian burial to those excommunicated majori excommunicationes, and an injunction to the ministers to that effect will be found in the sixty-eighth canon, and in the rubric of the burial service. The law acknowledged two excommunications: the lesser without effect or success, and blown away like dust; the greater which from the Church only; the greater from that communion, and also from the company of the faithful. The sixty-
fifth canon enjoins ministers solemnly to denounced those who stand lawfully excommunicated every six months, as well in the parish church as in the cathedral church of the diocese in which they remain, 'till others be thereby also admonished to refrain their company and society, and excited the rather to procure a writ de excommunicato copiendo, thereby to bring and reduce them into due order and obedience.' By statute 52 George III. cap. 257, excommunication, and all the matters following therewith, are discontinued, except in certain cases specified in the act; which may receive definitive sentences as spiritual censures for offences of ecclesiastical cognizance; and instead of sentence of excommunication, which used to be pronounced by the ecclesiastical courts in cases of contumacy, the offenders are to be declared contumacious, and to be referred to the court of chancery, by which a writ de contumace copiendo is issued instead of the old writ de excommunicato copiendo. Formerly this writ de excommunicato copiendo was issued by the court personally upon the prayer of the bishop; but since the bishop's certificate that forty days have elapsed since sentence of excommunication has been published in the church without submission of the offender. The sheriff then received the writ, called also a signif- icancy, and lodged the culprit in the county jail till the bishop arrived. In the meantime, the sheriff might proceed to the house of the culprit, and on proof of proceeding to that now adopted was recommended by a report of a committee of both houses of Parliament as far back as March 7, 1710, and again on April 30, 1714. No person excommunicated for such offences as are still liable to the punishment can now be imprisoned, for a longer term than six months (Bell, 'Ecc. Law,' by Tyrwhitt, ad e.). In Scotland, when the lesser excommunication, or exclusion from the sacraments has failed, the minister pronounces a form by which the impendent offender is declared 'excommunicated from all the communion of the faithful, debarred from their privileges, and delivered unto Satan for the destruction of his flesh, that his spirit may be saved in the day of the Lord Jesus.' The people are then warned to avoid all unnecessary intercourse with him. Anciety, in Scotland, an excommunication is a deprivation of feudal rights, but at present the sentence is unaccompanied by any civil penalty or disqualification" ('Encyclopedia Metropolitana,' s. v.).

The law of the Protestant Episcopal Church in America, as expressed by the 42d canon of 1825, is as follows: See with reference to such of the offenders of the church, their brethren by any wickedness of life, such persons shall be expelled from the holy communion, agreeably to the rubric. Sec. 2. On information being laid before the bishop that any one has been expelled from communion, it shall not be his duty to institute an inquiry unless there be a complaint made to him in writing by the expelled party. But on receiving complaint, it shall be the duty of the bishop, unless he thinks fit to restore him from the insufficiency of the cause assigned by the minister, to institute an inquiry, as may be directed by the canons of the church in which the event has taken place. Sec. 3. In the case of a great heinousness of offence on the part of members of this Church, they may be proceeded against to the depriving them of all privileges of church membership, according to such rules or process as may be prescribed by the synod of the church. The grounds and forms of trial are given in the 'Discipline,' part iii, chap. i. It is provided in the Constitution that no law shall ever be made doing away the privilege of accused ministers or members to have trial and right of appeal ('Discipline,' pt. ii, ch. i, § 1).

Among the Indi, rutos, Congregationists, and Bapista, the persons who are or should be excommunicated are quartered upon them; such as desert their privileges, withdraw themselves from the ordinances of God, and forsake his people (Jude 19); such as are irregular and immoral in their lives, hairors, drunkards, extortioners, fornicators, and covetous (Eph. v. 1; 1 Cor. v. 12). In the United States and Canada, excommunication and discipline are very generally followed by all evangelical denominations" (Buck, s. v.). See particularly the "Form of Government of the Presbyterian Church, bk. ii of Discipline; Dexter, 'On Congregationalism' (Boston, 1865), pp. 195 et seq.; Ripley, 'On Church Polity' (Bont, 1857), p. 81 et seq.; 'Edward Binning: Use of Excommunication' ('Works,' N. Y., 1849), iv, 638.

Exeat. A Latin term, signifying either the permission given by a bishop to a clergyman of his diocese that he may for a time go out of his diocese, or the same permission given by a abbot to one of the "religious" of his monastery, or by the authorities of a college (in England) to a student.

Exeunt ('έκχω, alal', Jer. xiii, 18; xlv, 12; a "curse" or "oath," abstractly, as elsewhere) is properly the representative of the Greek word euripa, which occurs (in the verb euripaias) in the Sept. at Num. xxii, 8; xxvii, 9; Josh. vi, 26; 1 Sam. xvii, 48, et al., as a rendering of various Heb. terms ("הע"מ, xii, xii, xii, etc.), and the N. T. ("εκχω", "εκχω", Matth. ii, 21, etc.). It is used also in prose authors to denote the imprecation which it was customary among ancient nations to pronounce upon their enemies for the purpose of calling down the divine wrath, branding them with infamy, and exciting against them the passions of the multitude. By this means they also devoted their enemies to the ruin they considered them to deserve. These imprecations were chiefly pronounced by priests, enchanters, or prophets. See Balaam. The Athenians made use of them against Philip of Macedon. They convened an assembly, in which it was decreed that all statues, inscriptions, or festivals among them, in any way relating to him or his ancestors, should be destroyed, and every other possible reminiscence of him profaned; and that the priests, as often as they prayed for the success of the Athenian affairs, should pray for the ruin of Philip. It was also decreed, both at such times, according as the Romans, after having destroyed cities in war, the revival of whose strength they dreaded, to pronounce exactions upon those who should rebuild them. Strabo observes that Agamemnon pronounced exactions on those who should rebuild Troy, as Croesus did against those who should rebuild the mode of exorcltting cities Strabo calls an ancient cus- tom ('εκχω', 'Πολιν', ed. 1707).

The Romans published a decree full of exactions against
those who should rebuild Carthage (Zonaras, Anm.,) an incident somewhat analogous is related (Josh. vi, 26) after the taking of Jericho. From the word 'and Joshua adjured them at that time,' it is likely that he acted under a divine intimation that Jericho should continue in ruins, as a monument of the divine displeasure, a warning to posterity. The words 'curse be the man (the individual) before the Lord that riseth up and buildeth this city Jericho,' although transformed into an exclamation by the word supplicated by the translators, amount to no more than a prediction that he shall lay the foundation thereof in his first-born, and in his youngest son shall he set up the gates of it,' that is, he shall meet with so many impediments to his undertaking that he shall outlive all his children, dying in the course of nature before he shall complete it. See Jericho. Excommunications were also pronounced upon cities and their inhabitants before undertaking a siege (Macrobiius has preserved two of the ancient forms used in reference to the destruction of Carthage, Saturnal. iii, 9), and before engaging with enemies in war. Tacitus relates that the priestesses of ancient Britain devoted their Roman invasions to destruction with imprecations, omenomancies, and attitudes, which for a time overwhelmed the soldiers with terror (Agric., xiv, 29). The executions in the 83d Psalm, probably written on the occasion of the confederacy against Jehoshaphat, and other instances of the partake of the exorcism of the heathen, then in nothing but form, being the inspired predictions or denunciations of divine vengeance against the avowed enemies of the God of Israel, notwithstanding the proofs they had witnessed of his supremacy; and the object of these imprecations, as in many other instances, is charitable, namely, the conversion to the true religion (ver. 18; see also Ps. lix, 12). See Anathema; Imprecation.

Execution, or capital punishment, among the Jews, when lawful and regular, was one of the following kinds. 1. Death by the sword (יִפְלֹס, or יִפָּלָס), also simply יִפָּלָס; 2 Sam. i, 15; 2 Kings x, 25; Jer. xxvi, 23), by which, however, we are not to understand beheading (in 2 Kings x, 7, the bodies were probably desecrated after death), as the Rabbinists will have it (Mishna, Sanhed. vii, 3), a penalty that early occurs in Egypt (Gen. xi, 19), and later in the Roman period among the Jews, as the introduction of foreign princes (Matt. xiv, 10 sq.), and as is probably meant in Acts xii, 2 (comp. Josephus, Ant. xv, 1, 2); but the other party was strangled, as death, as the case might be. 2. Stoning (q. v.), since the shooting with a dart, mentioned in Exod. xix, 13, was only selected in place of this when an individual was to be put to death at a distance. These punishments were intensified by indignities to the corpse; namely, (a) burning (יָפָלָס), Lev. xx, 14; xxix, 9; compare Josh. vii, 15, 25; Gen. xxviii, 24; 1 Macc. iii, 6; see Michaelis in loc. (Note here we are not to think of a burning alive, we may gather from Josh. vii, 25; and it is the more probable from the procedure detailed in the Mishna (Sanhed. vii, 2), which directs that the delinquent's mouth should be forced open by a cloth drawn around the neck, and melted lead then be poured in! (b) Hanging (יָפָלָס), on a tree or post (Deut. xx, 22; Num. xxv, 4; comp. Josh. x, 26; 2 Sam. iv, 12). That we are here not to think of an execution of the dead body was often connected (2 Sam. iv, 12). The person hung was regarded as executed (Deut. xx, 23; comp. Gal. iii, 13), and was not allowed to remain suspended over night (Deut. xx, 23; comp. Josh. vii, 29; x, 26 sq.), through fear of tainting the atmosphere; the hanging alive (Theophyl. Supp., 25; Lips. 1726); 2 Macc. vi, 5). See John (the Apostle) An example of burning alive does not occur (2 Sam. xxii, 31, marg. יָפָלָס; see Thuanus, in loc.) until the time of Herod (Josephus, War, i, 33, 4); but in Egypt the vindictive Roman magistrates took pleasure in burning Jews (Philo, ii, 512, 527). No. 3. Cutting into the limbs (2 Sam. vii, 8, marg. יָפָלָס, etc. above, 15, etc.) are found in the Scriptures (Num. xvii, 30 sq., is not in point). 2. Cutting into the limbs (Dan. vii, 15). See Lion; Den. 3. Stuccofication in hot
EXEGETICAL THEOLOGY

ashes (2 Macc. xiii, 5 sq.; comp. Valer. Max. ix, 2, 6, "He filled with ashes a place inclosed by high walls, with a beam projecting within, upon which he placed the doomed, so that, when overcome with drowningess, they fell into the insidious ash-heap below;" see Cles- siter, Per. 47) and his execrations on pieces children (sucklings) on the corners of walls, which occurred on the sack of cities (Isa. xiii, 16, 18; Hos. xiv, 1; Nah. iii, 10; comp. Psa. cxxxix, 7, 9, like the ripping open of pregnant women (2 Kings vii, 12, 16; Hos. xiv, 1; Amos i, 10), is, with the exception of 2 Kings vii, 16, the only instance of burial by drowning.

On crucifixion, see CruCRy. 5. Finally, drowning (καταφθορά, Matt. xviii, 6), and fighting with wild beasts (Ἐνιγμα, 1 Cor. xv, 32), are but casually alluded to in the N. T. Drowning, as a mode of inflicting death, is old (comp. Exod. i, 22). Among the Romans, those guilty of parricide were sewed in sacks (culei) and then drowned (Cicero, Rosc. Am. 25; ad Herenn. i, 13; Seneca, Clem. i, 15; Juvenal, viii, 214), but this in the time of the emperors came to be deemed an inhuman mode of execution (comp. Josephus, Ant. xiv, 18, 10; Suetonius, Caligula, 34; Schiller, m. 176; H. F. H. 17, 20; Schiller, m. 53; see Veil. ap. antiqu. Argent. xvii, 4). Such cruel punishments sometimes followed the mutilations of martydom (2 Macc. vii, 4, 7, 10). On theriomachy, see GAMES, and on the passage 5 Macc. 5, comp. Porphyry, Apollon. ii, 13, 7. See generally Carp., ibid. p. 341 sq.; Michel, De judicis paeneque capitabiibus in S. T. (Hal. 1749; also in Ugolini Theatur. xxvi, and Pott's Syll. v, 177 sq.); Jahn, Arch. Dil. ii, 347 sq.; Michel, Mosaisches Recht, v, 11 sq. COMPARE PUNISHMENT.

Executioner (συνεκτικον, for Lat. speculator, originally a scout, afterwards a life-guardian under the emperor), a member of the royal body-guard adopted by Herod in imitation of the Romans (see Tacitus, Hist. ii, 11; Suetonius, Claud. 35), and in accordance with Oriental despotism, and employed to execute his sentences in general. (See Smith's Dict. of Class. Antiq. s. v. Speculators; Schwarz, De Speculatorius s. v. Romorum, Alt. 1726.) See CHAIR-TYIE.

In ancient times persons of the highest rank and station were employed to execute the sentence of the law. Thucydides, in the Egyptian court, mentioned in Genesis xxi, 36, is thought to have been "chief of the executioners," as in the margin of our version. See GUARD. This is still a high office in the East as a court office. Such executioners have nothing to do with carrying into effect the awards of the law in its ordinary course, but only with those of the king. It is there an office of great responsibility; and to insure its due and strict fulfilment, it is intrusted to an officer of the court, who has necessarily under his command a body of men whose duty it is to preserve the order and peace of the court and its precincts, and to attend and guard the royal person on public occasions; and, under the direction of their chief, to inflict such punishment as the king awards upon those who incur his displeasure. Potiphur, therefore, in this sense might be called captain of the guard. He had the general influence at the court (Gen. xl, 5). Nebuzaradan (2 Kings xxxv, 8; Jer. xxviix, 9) and Arioch (Dan. ii, 14) held the same office. That the "captain of the guard" himself occasionally performed the duty of an executioner appears from 1 Kings xii, 7, viii, 12; and the words "captain of the high dignity, and something beyond the present position of the scribe of modern Egypt (comp. Lane, i, 183), with which Wilkinson (ii, 45) compares it. It is still not unusual for officers of high rank to inflict corporal punishment with their own hands (Wilkinson, ii, 43).

It does not appear that the Jews had public executioners, but the prince or general laid his commands on any of his attendants. Gideon commanded Jether, his eldest brother, to execute the kings of Midian; Saul ordered the footmen who stood around him, and were probably a chosen body of soldiers for the defence of his person, to put to death the priests of the Lord, and when they refused, Doeg, an Edomite, one of his principal officers, executed the command (1 Sam. xix, 19). Isaw the days of Saul, the reigning monarch commanded Beniaiah, the chief captain of his armies, to perform the duty of putting to death. Sometimes the chief magistrate executed the sentence of the law with his own hands; for when Jether shrank from the duty which his father required, Gideon, at that time the supreme magistrate in Israel, did not hesitate to do it himself. Thus also in Homer (Odys. xxi, 38; xliii, init.) we read that the exasperated Ulysses commanded his son Telema- chus to put, to death the suitors of Penelope, which he, like his father, is immovably done. In condemnations under the Mosaic law, the congregation or assembly of people executed the criminal, but the witnesses commenced the work of death (Lev. xxiv, 16; Deut. xvii, 7; John viii, 7; Acts v, 57-60). Executions in the East are often very prompt and arbitrary. In many cases, among the Greeks and Persians, it was the sooner entertained, or the cause of offence given, than the fatal order is issued, the messenger of death hurried to the unsuspecting victim, shows his warrant, and executes his order that instant in silence and solitude (2 Kings vi, 32; Prov. xvii, 14; Mark vi, 27). See PUNISH.

Exedra, buildings contiguous to the church. See CHURCH EDICIES.

Exegesis. See EXEGETICAL THEOLOGY.

Exegetical Collections. See CATENA; COM- MENTARIES.

Exegetical Theology, that branch of theology which treats of the exposition and interpretation of the Old and New Testaments. See ENCyclopedia OF THEOLOGY. Exegesis (ἐξηγησις) is statement, explanation, from ἐξηγοῦσα, I lead, describe, explain; and from this, an ἐξεγητ, ἐξηγητης, guide, interpreter. The word exegetical, then, includes all that belongs to explanation, and Exegetical Theology includes all that belongs to the explanation and interpretation of the holy scriptures.

1. Matter of Exegetical Theology.—The Bible, including both the O. and N. T., is the material on which the science of exegetical theology is employed. Some writers therefore designate it as Biblical theology; but the real work of exegesis is to gather from the word the material of Biblical theology, leaving the arrangement and co-ordination of this material to fall into a separate branch of the science. See BIBLICAL THEOLOGY; THEOLOGY. In fact, the results of exegetical study may fall, according to their nature, into historical, doctrinal, or practical theology. See BIBLE. As the Bible comes to us as the record of a revelation from God, its claims in this respect form the subject of a separate branch, entitled INSPIRATION (q. v.). The study of inspiration leads to the general question of the possibility and nature of REVELATION (q. v.).

2. Method of Exegetical Theology.—I. Philology.—As the Bible comes to us in ancient languages (Hebrew, Chaldean, Hellenistic Greek), the first requisite of exegesis is the knowledge of these languages, both as to their grammatical structure and their vocabula- ry. This is the domain of the science called Philology. The knowledge of classical Greek is of course presupposed, while Syriac, Samaritan, and Arabic are cognate and auxiliary. For details, see
the separate articles in this work on the various topics named.

2. Archeology.—Not only does the Bible come to us in ancient languages, but it was also written at various times, in various countries, and under various conditions of life (social, political, religious, etc.). Thus arise the various branches of Bible history (belonging to the so-called "external" or "historical" theology), Biblical geography, chronology, ethnography, natural history of the Bible, laws, usages, domestic economy, agriculture, sacred rites, and worship. All these branches are summed up under the general title of Archeology. See both these heads in this Cyclopedia, and also the other topics named, for the details and the literature.

3. Canon.—As these books come to us claiming to be authoritative, we must be able to answer the question, What books belong to the Bible as a sacred book? The answer to this question gives rise to that branch called the science of the Canon of Scripture. It is divided into canon of the O. T. and canon of the N. T. See the article CANON OF SCRIPTURE.

4. Criticism.—Granting that we have certain books admitted to be canonical, the farther question arises, How do we know their writings to be genuine and correct forms? The answer to this question gives rise to the science of CRITICISM, which is divided into the lower or text-criticism, which seeks to ascertain the true and original reading of the text as accurately as possible, and the higher criticism, which examines into the historical genuineness, and authenticity of the books. The higher criticism seeks to distinguish the true from the false, and forms, to a certain degree, the basis of Apologetics (q. v.); the text-criticism distinguishes the original from the altered or corrupted. See CRITICISM.

5. Interpretation.—All the studies heretofore named are preparatory to the work of getting at the meaning of the sacred Scriptures, which is the function of INTERPRETATION, or HERMENEUTICS (ἱερμηνεία). The general principles on which any other writings would be interpreted are of course applicable here (General Hermeneutics); but the special character of these writings as sacred gives rise to an enlargement of those general principles of interpretation (Sacred Hermeneutics). When the sense of Scripture is sought simply by the use of linguistics or criticism, the interpretation is called Grammatico-Thetical. When not only linguistics and criticism, but also the all the knowledge embraced above under archaeology are employed, the interpretation is called Grammatico-Historical. When, in addition, the traditional sense of the Church as to the substantial facts and doctrines of revelation is brought to bear upon the interpretation, it is called Historical, or Dogmatical. Finally, when a farther sense than that conveyed in the words of the writer is sought, the interpretation is called Allegorical. For the nature, history, and value of these, see HERMENEUTICS; INTERPRETATION.

III. Results or Products of Exegetical Theology. — The application of the laws of hermeneutics, and of the preparatory or propeductive sciences mentioned above, in practical work, is EXEGESIS. The fruit of this labor may appear, within the sphere of exegetical theology itself, in the sum of the books of the Bible, or of any of its parts [see VERSIONS]; or in commentaries on the Bible, or on separate books of the Bible, or on separate passages in any of the books. See COMMENTARIES. The principles and rules of exegesis are also to be used by the preacher in the preparation of his discourses for the communicants. See Pulpit, Lectures.

Most of the topics of exegetical theology are embraced in what is called Introduction to the Scriptures, a vague title, formerly much in use, but now giving way to more scientific and distinctive terms, such as LITURGICAL HISTORY OF THE BIBLE, for a general name, and the several titles mentioned above for special branches. The books on Introduction are often rather useful collections of propeductive knowledge than scientific treatises. See INTRODUCTION. There are no books in English treating exegetical theology as a separate branch in scientific form; but English literature abounds in excellent works on the several branches, which will be found indicated under the several titles in this Cyclopedia. The most important general works are: J. Banham, "Unity of the Scriptures," such as Horne, INTRODUCTION (new ed., London, 1860, 4 vols. 8vo); Davidson, INTRODUCTION to the N. T. (London, 1848-51 [Dr. Davidson's later writings are not so trustworthy as his earlier]); Westcott, INTRODUCTION to the Study of Ancient Scripture (with notes, London, 1871). On the literature, see farther under the head INTRODUCTION. On the scope of exegetical theology, and its relations to the other branches of the science, see Hagenbach, Encyklopädie und Methodologie (Leipzig, 1864, 7th edit, § 54-56); Marsch, Lectures on the Arrangement of the several Branches of Divinity (Cambridge, 1809, 8vo); Pelt, THEOL. Encyklopädie als System (Hamburg, 1843, 8vo), § 10-28; Clarisse, Encyklopädie Theologica Epist. (Lugd. Bat. 1835, 8vo), sect. ii, ii; and our articles ENCYCLOPAEDIA OF THEOLOGY; THEOLOGY.

Exemption designates, in ecclesiastical law, the release of persons or institutions from the jurisdiction of the regular superior, and their subordination to a higher or general superior.

1. Roman Catholic Church. — The first example of formal exemption is the release of monasteries from the episcopal jurisdiction. Many wealthy convents induced the popes, emperors, and kings to allow them a free election of their superiors, and a free administration of their property. Subsequently (in 858) the monastic orders were altogether exempted from the jurisdiction of the bishops, the members being subordinate only to their monastic superiors and the pope. The bishops incessantly labored for a restoration of their full jurisdiction, and the Council of Basilea (1438) favored them, but most of the monks sided with the monks rather than with the bishops. The Council of Trent granted most of the demands of the bishops, but the difficulties between bishops and monastic orders have never wholly ceased. Bishops sometimes are exempted from the usual subordination to an archbishop, being subordinate directly to the pope. Sometimes (as in Austria) the army was exempted from the jurisdiction of the bishops, and placed under the jurisdiction of a special army-bishop.

2. Protestant Churches. — The Protestant state churches retain to a greater or less extent of the ecclesiastical law, the idea of exemption. The princes claimed for themselves exemption from the usual ecclesiastical jurisdiction; later, the same exemption was claimed for civil and military officers. In some countries the nobility also were exempt. In Prussia, a circular of the government in 1817 abolished all exemptions, but it was not executed. Churches which are based on the voluntary principle know of no exemption, because they compel none of their members to belong to any particular congregation.

In many parts of Germany, Roman Catholic, Lutheran, and Reformed pastors had jurisdiction even over members of the two other churches; and the exemption of Protestants from Roman Catholic jurisdiction, and vice versa, is not yet fully carried through.

—Herzog, Real-Encyklop. iv; 266; Wetzer und Weite, Kirchen-Lex. iii. 841. (A. J. S.)

Exercises. Bodily (σωματικός) γυμνασία, i.e. physical exercises, see HEALTH. Physical exercises, i. T. 8, 4. V. 1, 4. The apostle seems to disparage under this term is not the athletic discipline which it classically imports (Arrian, Epict. i. 27, 6; Poliby. iv, 7, 6), and which his frequent allusions to the Grecian games (v. 4) might imply, but rather that ascetic mortification of the fleshly appetites, as: "Who among you has a servant plowing or keeping sheep, and will say to him when he has come from the field, Go and take a bath? do not forsake the congregation of saints (comp. v. 11, 2); Col. ii, 28), which characterized some of the Jewish
fanatics (ver. 7), especially the Essenes (q. v.).—Fleischmann, Interpretatio, in loc.; Seelen, De Gymnasia adque Paulus (in hoc loc. aludit) (Lutecia, 1586). See TIMOTHEUS.

Exercises, Spiritual (exercitia spiritualia), a title given by Romanists to certain exercises held under the leadership generally of a confessor (magister exercitiorum), for spiritual edification. They consist, generally, in alternate meditations and prayers at regularly appointed times, often based on some text from the Bible, with an occasional reading, fusion, etc. These exercises are practiced both by clergy and laity, especially before communion, and as preparatory to the great Church festivals. Especially before ordination to the priesthood, such exercises are not only commanded, but required of candidates. The most elaborate form of the exercises is that of Ignatius Loyola. His method received the approbation of the pope, and Alexander VII granted, in a brief dated Oct. 12, 1657, full assent to all, whether priests or laity, who should submit to them for eight days in the houses of the Company of Jesus. These exercises consist in alternate meditations, readings, oral prayers, and self-scrutiny, as special preparation for the reception of the sacraments of penitence and communion. In case of there being several persons exercising together, silence is recommended as a duty. The new missions established among the heathen by Dr. Robert H. Benson and the use of these exercises, transforming the work of sanctification into a dead mechanical action.—Iherzig, Real-Encyklop. III, 289; Aschbach, Allg. Kirchen-Lex. II, 707; Ferraris, Prompta Bibliotheca, III, 916 sq. See Bellicaud, Medallia ex erarum ad exercitia Sancti Patris Ignatii (new ed. in Westhoff); and the articles Jesuits and Loyola.

Exhortation (παρακάτασπα, strictly a calling near, invitation, and so "entreaty," 2 Cor. viii, 4; hence admonition, special hortatory instruction in public, Luke iii, 18; Acts xiii, 15; 1 Tim. iv, 13; also "consolation" or form of the exercises is that of Ignatius Loyola. As it is, it was doubtless a subordinate exercise of the general faculty of teaching (1 Cor. xv, 32). Oehlerhausen (Comment. in loc.) thinks that Paul does not distinguish it as a special charism, but rather regards it as co-ordinate with eldership. See Gift (Spiritual).

2. It is defined as "the act of laying such motives before a person as may excite him to the performance of anything that he may be desirous or duty bound to do; the latter principally endeavors to convince the understanding, and the former to work on the affections. It is considered as a great branch of preaching, though not confined to that, as a man may exhort, though he do not preach; though a man can hardly be said to preach if he do not exhort. See Exhorters. The Scriptures enjoin ministers to exhort men, that is, to exhort them to duty by proposing suitable motives (Isa. lviii. 1; 1 Tim. vi. 2; Heb. iii, 13; Rom. xvii. 8); it was likewise the constant practice of prophets, apostles, and Christ himself (Isa. i, 17; Jer. iv, 14; Ezek. xxxvii; Luke iii, 18; xii, 3; Acts xi, 21)" (Dictionary, s. v.). "The above, and numerous other passages of Scripture, indicate several important particulars: 1. That it was not beneath the dignity, or foreign to the office of the inspired apostles, frequently to exhort. They did not in like manner exercise the same practice and the duty of exhortation upon young ministers of their day. 3. That exhortation, as separate from preaching, was the special office of a certain class of religious teachers in the New Testament Church. 4. That mutual exhortation for their own profit and edification was enjoined by the apostles upon Christians generally." (Kidder, Homiletica, p. 100.) See Exhorters.

3. In the book of Common Prayer, the short address of the minister to the people in the daily service, in the communion office, and in the office for the visita-
tion of the sick, are called Exhortations. The first of these, beginning, "Dearly beloved brethren, the Scripture moveth us for, etc., was introduced into the English formulary at the Reformation. Palmer (Orig. Liturg., ii, 211) compares it to a passage in a sermon of Avitus of Vienne, fifth century. Procter (Common Prayer, p. 206) remarks that "it was constructed partly from the preceding sentences, and partly by adaptations from earlier forms." The formulary of this exhortation, with the other opening portions of morning prayer, is chiefly due to a ritual drawn up by Calvin for the church at Strasbourg, entitled La Forme des Prières et Chantons ecclésiastiques (Strasbourg, 1546). See Baird, Eucharist (N. York, 1855, p. 191). The exhortations to the communion were also introduced at the Reformation. "The ancient Church, indeed, had no such exhortations, for their daily, or at least weekly, communions made it known that there was then no solemn assembly of Christians without it, and every one (not under censure) was expected to communicate. But now, when the time is somewhat uncertain, and our long omissions have made some of us ignorant, and others forgetful of this duty; most of us unwilling, and all of us more or less indisposed for it, it was thought both prudent and necessary to provide these exhortations, which give warning of the communion, which it is always to do upon the Sunday or some holy day immediately preceding" (Wheatly, On Common Prayer, p. 284). The second exhortation was compiled apparently by Peter Martyr at the instance of Bucer (Procter, On Common Prayer, p. 244).

Exhorters, a class of lay persons licensed in the Methodist Episcopal Church to exhort, not to preach. The leaders' meeting (q. v.), or class (q. v.), recommend such persons, and the preacher issues the license. The duties of an exhorter are "to hold meetings for prayer and exhortation wherever opportunity is afforded, subject to the direction of the preacher in charge; to attend all the sessions of the Quarterly Conference; be subject to an annual examination of character in the Quarterly Conference, and renewal of license annually by the presiding elder, or preacher having the charge, if approved by the Quarterly Conference." This office has been found very useful, both in the edification of the Church, and in developing the talent of persons likely to be called to the ministry.—Discipline of the Methodist Episcopal Church, 1868, p. 113, 114.

Exile (only occurs of an expatriated person, ἐξαίρεσθαι, sent, sent, "captivity exilis," Isa. xi, 14; רֵס, גֵּס, a transported captive, as elsewhere often [see BANISH], ASYRIOS-BABYLONIAN, of the Israelitish nation (comp. Cellarius, Dissert. p. 178 sq.) See also Captivity.

1. Of the kingdom of Israel, as early as the time of Pekah (q. v.), B.C. cir. 741. Tiglath Pileser (q. v.), in accordance with a cardinal maxim of Oriental despotism (compare Heeren, Iliren, 1, 1, 406 sq.; Gesenius, Isaiah, i, 949), transported to Assyria (2 Kings xv, 29; comp. Isa. xxv, 14, as a part of the division of the kingdom, and the trans-Jordanic provinces (Gilead). A still earlier deportation (1 Chron. v, 26) seems to have been made by Pul (q. v.). After the destruction of Samaria (q. v.) and the entire northern state (B.C. 720) by Shalmaneser (q. v.), the same fate overtook all the distinguished and serviceable Israelites (2 Kings xvii, 6; xviii, 9 sq.; 1 Chron. v, 26). They were assigned a residence on the Chaboras, in Mesopotamia [see HABOR], and in Media (comp. Josephus, Ant. x, 14, 1), and there established the worship of Jehovah after their corrupt fashion (2 Kings xviii, 27 sq.). See Assyria, Exequias, a de decem tribis Israel (in his Egyptiaca, p. 318 sq.); Michaelis, De exilio de decem tribi-

The Babylonian exile thus began with the Jews partially in B.C. 598, but generally in B.C. 588. It ended in the first year of the reign of Cyrus (over Babylon), i.e., B.C. 536, and therefore lasted strictly 52½ years (xxxi, 11; compare 2 Chron. xxxvi, 21; 2 Esdr. 1, 12; viii, 5; Josephus, War, v, 9, 4), which assigns it a length of 70 years, is to be understood as computed from Nebuchadnezzar's invasion of Western Asia in B.C. 606, when, as appears from Dan. i, 1 sq., some of the members of the royal family of Judah were carried into captivity, in fulfilment of Isa. xxxix, 6, 7. (See Offerhaus, Specigulium, p. 181 sq.; Schröer, Regn. Babyl., p. 286 sq.). This was the more natural epoch to the Jews, inasmuch as from that time Nebuchadnezzar became to all intents and purposes the liege lord of the Jewish people's 18th year in the above table we see the years of his reign are dated accurately. It is a remarkable coincidence that from the date of the destruction of the Temple, B.C. 586 (2 Kingsxxxv, 8), to the time of its complete restoration, B.C. 517 (Ezra vi, 15), is precisely the commemorated (and sacred) period of 70 years, which is exclusively employed as an era by the sacred writers (Ezek. xi, 1).

Other very strained conceptions as to this time are those of Behm (in Iken and Hase's Theur, theol. philol., i, 354 sq.), Bengel (Ordo temporum, p. 158 sq.), etc. The only date (comparable) is given in exclusively referred to (Handbuch d. Chronol., i, 590), Gramberg (Religionist, i, 388 sq.) and Hitzig (Jerem. p. 230) think the 70 years merely a round number. See SEV EN YEARS' CAPTIVITY.

The condition of the Hebrews in the exilé was certainly, as a general thing, not so severe (Jahn, Archäol. II, i, 190 sq.; Bertholdt, Zeitleit. z. Dan., p. 508 sq.). (a) The books of Kings mention only two deportations: the first occurred after the surrender of Jerusalem to Nebuchadnezzar, in the time of Jehoiachin (2 Kings xxiv, 14 sq.; comp. Jer. xxvii, 20, 21), in this was involved Mordecai (Esth. ii, 6), and it befell (besides the king himself) the affluent and useful citizens, 10,000 and upwards in number (Josephus says 10,832, Ant. x, 7, 1); the second was the result of a formal capture of Jerusalem by assault of the Chaldeans in the time of Zedekiah, and was effected by the Chaldean army (in that prince's 18th year) Nebuzaradan (2 Kings xxv, 11). Only the common people, devoted to agriculture, remained (2 Kings xxv, 12, 22). (b) The books of Chronicles expressly record only the carrying away under Zedekiah (2 Chron. xxxvi, 20), while (ver. 10), in mentioning the transportation of King Jehoiachin, they say nothing of any deportation of the people at that time. (c) Jer. iii, 28 sq., specifies three distinct carriages away, and assigns to each not only the number of those deported, but also a date: namely, the first deportation in the 7th year of Jehoiakim (B.C. 608), which consisted of 3023 Jews; the second in the 18th of Nebuchadnezzar, of 882 chiefs of Jerusalem; the third in the 23d of Neb., of 745 individuals. Finally (d), according to Dan. i, 1, 3 sq., as early as the 3d year of Jehoiakim's reign, some Jewish youths of noble families (among them Daniel himself) must have been carried to Babylon. These difficulties (see Hengstenberg, Genuineness of Daniel [Clarke's ed.], p. 43 sq., against De Wette, in the Hist. Encyclop. xxiii, 7 sq.; Lengerke, Daniel, p. 18 sq.) are readily adjusted by observing, 1st, that the years of Nebuchadnezzar in this passage of history are to be referred to his full reign from the throne of Babylon (the beginning of B.C. 604), while those in Kings are reckoned from the epoch of his vicereignship, a little over one year earlier [see NEBUCHA DNEZZAR] ; and, 2ly, that the apparent discrepancy in the number of citizens transported naturally arises from the different manner in which they are enumerated and classified in the several narratives. Thus viewed, the transactions will appear concisely as follows:

1. (Early in B.C. 606.) Nebuchadnezzar's invasion, in the 8th, or, according to some of the latest writers, in the 9th year of Jehoiakim (Dan. i, 1). 2. (Summer of B.C. 606.) Subjugation by Nebuchadnezzar in his first associate year, and the 4th of Jehoiakim (Jer. xxvii, 2). At the same time the sacred vessels (2 Chron. xxxvi, 1), a few royal youths were taken away as hostages, including Daniel and his companions (Dan. i, 2 sq.). 3. (Spring of B.C. 606.) First general deportation, in the 1st year of Nebuchadnezzar's reign (Jer. iii, 28), or the 8th of his vicereignship (2 Kings xxv, 12), and the beginning of Jehoiachin's reign (2 Kings xxiv, 2), when 3925 eminent Jews (Jer. iii, 28), including the king (2 Chron. xxxvi, 10), his family, and officers (2 Kings xxiv, 14), such men as Mordecai (Esth. ii, 6), also some 700 warriors (2 Kings xxiv, 16), were carried away, making about 10,000 individuals of note (2 Kings xxiv, 14). 4. (circa B.C. 600.) Second deportation, in B.C. 600, the 18th of Nebuchadnezzar's 18th year of reign (Jer. iii, 29), or the 9th of his vicereignship (2 Kings xxv, 19), when, besides the king of the sacred vessels (2 Chron. xxxvi, 18), 3838 more of the principal men who had by that time rallied to Jerusalem were taken away (2 Kings xxv, 19). These two events are especially cited (2 Kings xxv, 11), and leaving but the commonest agricultural laborers (2 Kings xxv, 12),

4. (Early in B.C. 596.) Final deportation. In Nebuchadnezzar's 23rd year (Jer. iii, 20), when the last 745 private persons (Jer. iii, 20) who had not fled to Egypt (Jer. xxxr, 5 sq.), nor been included in the first deportations (2 Kings xxv, 16), were taken away-making 4600 definitely enumerated (Jer. iii, 20), but including some 11,000 males born in the land, their wives, children, and dependents, from Jerusalem and its vicinity alone, and a proportionate number from the residue of the country of Judæa.

Partly translated and revised from the King James Version.
only of such exiles as had been carried away by Nebuchadnezzar, and in the list there following there are (besides priests and Levites) only recited Judahites and Benjamites; nor can "Israel" (ver. 59; compare Neh. vii. 51) be there referred to the former kingdom so called, but to the remnant of Judahatics after the exiles of Ezra. xxxvii. 11 sq., had, moreover, not at that time been fulfilled (the date in 1 Chron. 26 is uncertain; Keil, On Kings, p. 497, n.); (See Witsius, Διακοηγωα, p. 344 sq.; Ritter, Erdrk. x, 250.) Yet it cannot well be believed that any of the exiles from the northern kingdom were likewise on account of the decree of Cyrus, and at the time included in his dominions, did eventually join their Jewish brethren, if not in some of the homeward expeditations named in Scripture as having taken place under Ezra, Zerubbabel, and Nehemiah, yet in some smaller, later, or less distinguished companies. This supposition is not only justified by the nature of the case, but fortified by the numerous intimations in the prophecies (e. g. Jer. 1, 4, 5, 17-20, 33-35) coupling the return of both the kingdoms (see Meth. Quart. Review, July, 1855, p. 419 sq.), and is well-nigh established by the Palestinian occurrence in a late age of individuals from the northern tribes (e. g. Luke ii, 36; comp. Acts xxvi, 7). What proportion thus returned we have no means of determining; it was doubtless small, as was indeed that of the exiles from the southern tribes compared with the great mass who remained in the lands of their late home, now become their home. Community of lot must have drawn both branches of the common stock of Israel nearer together during the captivity under the same heathen government, and it is altogether likely that in a few centuries those who permanently remained lost all trace of the sectarian distinction that had once estranged "Jewish and Ephraim." See RESTORATION OF THE JEWS.

The descendants of those who did not return are centred at certain points, especially Babylon (q. v.), where they afterwards became celebrated for their Jewish schools of Rabbinical Literature; or, as was chiefly the case, it may be presumed, with the more distant and earlier removed ten tribes, wandered still farther in numerous Jewish colonies into the Medo-Babylonian provinces (Lightfoot, Append. to Hor. Hor., in Acts, p. 264 sq.), remnants of which have survived down to this day (Ben. of Shemen, in Ritter, Erdrk. x, 241 sq.). It is possible even that the Samaritans may have owed their mongrel origin to some such source (Gesenius, De Pentat. Samar. p. 4), as they were transplanted to Palestine before the destruction of Jerusalem, and yet were named Jews, and yet it is more probable that they allowed a partial amalgamation with the heathen whence they came to have taken place, and especially as they had only the Pentateuch (Paulus, in Eichhorn's Biblioth. i, 981). From the provinces of the Persian empire the Jewish colonists may readily have spread into Arabia, India, and even China. Wild attempts at their discovery have been abundantly made, such as those of Adair (History of the American Indians, London, 1775), Noah (The American Indians the Descendants of the ten Lost Tribes of Israel, N. Y. 1835), and Grant (Narratives, or the Lost Tribes, N. Y. 1841). See DISPERSED JEWS.

Examination. See CHRISTOLOGY (vol. ii, p. 281, col. 2).

Existence of God. See GOD.

Exocontians (or EXOCONTIANS, EXOCONTIANDO), a name given to the strict Arians, because they maintained that Christ was created εις αυτον, before the beginning of things. They were also called Anomocans, Aostians. See these titles, and also ARIANS.

Exode of the Israelites from Egypt to Canaan (usually referred to in Heb. by the phrase יִתְנַשְׁאָה בְּאֶרֶץ בָּאָרֵךְ אֶת-אֶרֶץ אֶרֶץ כָּנָאָן), "The Lord did bring the children of Israel out of the land of Egypt," Exod. xii. 51: to which is often emphatically added, יִתְנַשְׁאָה בְּאֶרֶץ בָּאָרֵךְ אֶת-אֶרֶץ אֶרֶץ כָּנָאָן, "with a mighty hand and an outstretched arm," Deut. xxxi. 8, to express the miraculous interventions of Providence in the series of events), the great national epoch of the Hebrew people, in fact their "independence day," and as such consecrated (see in all its historical sequence and vaticinations. Several of the Psalms are but a poetical rehearsal of its scenes (e. g. Psa. cxxix, cxxxvi); it is the burden of Habakkuk's lofty ode (Hab. ii) and besides the recapitulation of many of its incidents by Moses in Deuteronomy, it constitutes the main text of the books of the Hexateuch. The following account, including especially the date of the event, and the identifications of the place of crossing the Red Sea and of the stations in the desert, is a resume of nearly all the important matters not treated by us under other heads. See EXODUS.

I. Date.—The particular Egyptian monarch under whom this great event, the first definite link of Hebrew with other ancient history, occurred, is so differently identified with those of early profane chronicles, and of the monuments by various Egyptianologists, that but little reliance, unfortunately, can be placed upon any date based on them, as they are entirely upon conjectural adaptations or arbitrary premises. The one only of these hypotheses that seems to afford any independent evidence of agreement is that lately propounded by Osborn (in the Journal of Sac. Lit. for July, 1869), who conceives that the Egyptian king in question was called Seth I, the grandson of the great Osiris, but of so odious a character and so inglorious a reign that his sarcophagus was demolished and his cartouche effaced by the early Egyptians themselves. See PHARAOH.

This king, however, began to reign about B.C. 1340, a date entirely too late for the event under consideration. The historical question is, in fact, the same with this point are noticed under EGYPT. Hale places the Exode in B.C. 1648, Usher in B.C. 1491, Bunsen in B.C. 1530, and Poole in B.C. 1620. A careful collation of the Biblical elements of the calculation, the only definite and trustworthy data, point to the spring of B.C. 1658 as the most probable date of the beginning of the series of exodic transactions. See Chronology.

As to the account of the Exode given by Manetho, it was confessedly a mere popular story, for, although he admitted it was not a part of the Egyptian records, he laid it out a tale which he called "of Joseph, the great priestess of Tanit, the daughter of the gods, with Joseph the high priest, who had a dominion over the land of Egypt, and who was called Solomoni," Josephus, c. Apost., i, 16. A critical examination shows that it is not even a claim to be a veritable tradition of the Exode: it is, indeed, if based on any such tradition, so distorted that it is impossible to be sure that it relates to the king whose reign it is assigned. Yet, upon the supposition that the king is really Menephtah, son of Ramesses I, the advocates of the Rabbinical date entirely base their adjustment of Hebrew with Egyptian history at this period. See MANETHO.

II. The Outset.—The Exode is a great turning-point in Biblical history. With it the patriarchal dispensation ends and the law begins, and with it the Israelites cease to be a family and become a nation. It is therefore important to observe how the previous history led to this event. The advancement of Joseph, and the placing of his kinsmen in what was, to a pastoral people at least, "the best of the land," yet, as far as possible, apart from Egyptian influence, favored the multiplying of the Israelites and the preservation of their nationality. The subsequent persecution bound them more firmly together, and at the same time loosened the hold that Egypt had gained upon them. It was thus that the Israelites were ready, when Moses declared his mission, to go forth as one man from the land of their bondage.

The intention of Jehovah to deliver the Israelites from Egyptian bondage was made known to Moses from the
burning bush at Mount Horeb, while he kept the flock of Jethro, his father-in-law. Under the divine direction, Moses, in conjunction with Aaron, assembled the elders of the nation, and acquainted them with the gracious design of Heaven. After this they had an interview with Pharaoh, and requested permission for the people to go forth to hold a feast unto God in the wilderness. The result was not only refusal, but the doubling of all the burdens which the Israelites had previously had to bear. Moses hereupon, suffering reproach from his people, consults Jehovah, who assures him that he would compel Pharaoh "to drive them out of his land." "I will rid you out of their bondage, and I will redeem you with a stretched-out arm and with great judgments" (Exod. iii.vi). Then ensue a series of miracles (Exod. vi.-xii), commonly called the PLagueS OF EGYPT (q.v.). At last, overcome by the calamities sent upon him, Pharaoh yielded all that was demanded, saying, "Rise up, and get you forth from among my people, both ye and the children of Israel; and serve the Lord as ye have said; also take your flocks and your herds, and be gone." Thus driven out, the Israelites, to the number of about 600,000 souls, besides women and children, left the land, attended by a mixed multitude, with their flocks and herds, even very much cattle (Exod. xiiii. 31 sq.). Being "thrust out of" the country, they had not time to prepare for themselves suitable provisions, and they were sent directly with the dough which they brought forth out of Egypt. See Moses.

On the night of the self-same day that terminated a period of 430 years, during which they had been in Egypt, were they led forth from Rameses or Goshen. They are not said to have crossed the River Nile, whence it may infer that Goshen lay on the eastern side of the river. Their first station was at Succoth (Exod. xiiii. 87). See Succoth. The nearest way into the Land of Promise was through the land of the Philistines. This route would have required them to keep on in a north-east direction. It pleased their divine conductor however, not to take this road, lest being opposed by the Philistines, the Israelites should turn back at the sight of war into Egypt. If, then, Philistia was to be avoided, the course would lie nearly direct east, or south-east. Pursuing this route, "the armies" come to Etham, their next station, "in the edge of the wilderness" (Exod. xiiii. 17, 18). The expression used, ἐλίκοις, does not necessarily imply a change in the direction of the journey, but may mean that God did not lead the Israelites into Palestine by the nearest route, but took them about by the way of the wilderness. Were the meaning that the people turned, we should have to suppose Rameses to have been beyond the valley to the west, and this would probably make the distance to the Red Sea too great for the time occupied in traversing it, besides overthrowing the reasonable identification of the land of Goshen. Rameses is evidently the Ra-maze of Gen. xlix. 11. It seems to have been a chief town of the land of Goshen, for that region, or possibly a part of it, is called the land of Rameses in Gen. xlvii. 11; comp. 4. 6. See Rameses.

1. The direct route thence to the Red Sea was along the valley of the ancient canal. If, however, they rendezvoused near the metropolis, their route would be different. From the vicinity of Cairo there runs a range of hills eastward to the Red Sea, the western extremity of which, not far from Cairo, is named Jebel Mokattam; the eastern extremity is termed Jebel Ataka, which, with its promontory Ras Ataka, runs into the Red Sea. Between the two are the fugitive rivers, nowhere about the middle of the range, is an opening which affords a road for caravans. Two routes offered themselves here. Supposing that the actual starting-point lay nearer Cairo, the Israelites might strike in from the north of the range of hills at the opening which affords a road to a promontory on a river, which leads from Cairo to Suez; or they might go southward from Mokattam, through the wady e-Tih, that is, the Valley of Wandering, through which also a road, though less used, runs to Suez. According to Niebuhr, they took the first; according to the ancient tradition, Father Sicard (Ueber der Weg der Israeliten, Paulus (Samml. v. 211 sq.), and others, they took the
EXODE

EXODE

was. Sicard found traces of the Israelites in the valley. He held Rameses to be the starting-point, and Rameses he placed about six miles from ancient Cairo, where the present village of Famagusta (ancient Tanis) stands, on a sandy plain, on which Sicard thinks the Israelites assembled on the morning when they began their journey. In this vicinity a plain is still found, which the Arabs call the Jews' Cemetery, and where, from an indefinite period, the Jews have buried their dead. In the same valley, and on the north side of the village called Mejamet Musa, "Moses' Station." On another hill in the vicinity ruins are found, which the Arabs name Meravad Musa, "Moses' Delight." Thus several things seem to carry the mind back to the time of the Hebrew legislator. Through the valley which leads from the site of Tell-el-Abyad to the south side of Mount Sinai, and thence to the Red Sea. Sicard travelled in three days. He reckons the length to be twenty-six hours, which, if we give two miles to each hour (Robinson), would make the distance fifty-two miles. This length is also assigned by Girard (Descrip. Topogr. de la Vallée de l'Égyp.terment). The valley, running pretty much in a plain surface, would afford a convenient passage to the mixed bands of Israelites. About eighteen miles from Beizatin you meet with Gendelly, a plain with a fountain. The name signifies a military station, and in this Sicard finds traces of an Exod. xxiii, 20, to be on the edge of the wilderness. Jaloniski says the word means "terminus murs," the termination or boundary of the valley. Now, in the plain where Sicard fixes Etham (not to be confounded with the Eastern Etham, through which afterwards the Israelites travelled three days, Num. xxxiii, 8), is the spot where the waters divide which run to the Nile, to Suez, and Etham is therefore truly terminus murs.

On the other hand, if, as the position of Rameses, and the nature of the ground between that point and the head of the gulf seems to indicate, they pursued the direct route thence down the valley of the bitter lakes, we may locate Succoth not far from the ruins of Suez, and Etham at a point on the road where the road between that spot and the head of the gulf; for we may suppose that the encumbered multitude made but little progress the first day, whereas on the third their march may have been quickened by apprehensions of the approaching Egyptians in pursuit. See ETAM.

2. At the end of the second day's march, for each camping-place seems to mark the close of a day's journey, the route appears to have been altered from the natural thoroughfare behind the head of the gulf. The first passage relating to the journey, after the mention of the encamping at Etham, is this, stating a command given to Moses: "Take unto the children of Israel that they turn [or 'return'] and encamp [or 'that they encamp again,' אֶרְבַּעַנְתֻּם יַעֲקֹב יִנְסְדוּךָ] before Pi-hahiroth, between Migdol and the sea, over against Baal-zephon" (Exod. xiv, 2). This explanation is added: "And Pharaoh will say of the children of Israel, They are] encamped in the land, the wilderness hath shut them in" (ver. 3). The rendering of the A.V., "That they turn and encamp," seems to us the more probable of the two, and that "they turn" is the closer translation, but appears to be difficult to reconcile with the narrative of the route; for the more likely inference is that the direction was changed, not that the people returned: the third rendering does not appear probable, as it does not explain the entanglement. It is most likely that they at once turned, although they may have done so later in the march. The direction of the camps, however, for they would have been entangled (ver. 5) only by turning upward, not northward. They encamped' for the night by the sea, probably after a full day's journey. Pi-hahiroth (the mouth of the hiding-places) Sicard identifies with Taurek (small caves), which is the name still given to the river springs of the Red Sea. The mouth of the river is on the south side of Mount Attaka, which last Sicard identifies with Baal-zephon, and which is the northern boundary of the plain of Baileah, while Kulalah (Migdol) is its southern limit. But we would prefer to transpose these names, assigning Migdol to Jebel Attaka, and Baal-zephon to Jebel Dara or Kulalah, while Wady Tuwarik will remain for Pi-hahiroth. (See each in its order.) The pass which leads to Suez, between Attaka and the sea, is very narrow, and could easily be stopped by the Egyptians. In this plain of Baileah Pharaoh had the Israelites hemmed in on all sides. This, then, according to all appearance, is the spot where the passage through the sea was effected. Such is the judgment of Sicard and of Raumer (Der Zog der Israeliten, Leipzig, 1857; for a description of the Valley of Wandering, see also Ritter, Erdkunde, i, 688). It is unreasonable to doubt that this was the situation of the case. Equally does the spot correspond with the miraculous narrative furnished by holy writ. A different route is laid down by Niebuhr (Arab. p. 407). Other writers, who, like him, endeavor to explain the facts without the aid of miracle, imitate his example. (See EXOD.

It is no small corroboration of the view now given from Sicard and Raumer that in substance it has the support of Josephus, of whose account we shall, from its importance, give an abridgment. The Hebrews, he says, took their journey by Latopolis, where Fayum was built, and through this valley the Egyptian army, which had been inaccessible precipices and the sea; for there was on each side a ridge of mountains that terminated at the sea, which were impassable, and obstructed their flight. Moses, however, prayed to God, and smote the sea with his rod, when the waters parted, and gave the Israelites free passage. The Egyptians at first supposed them distracted; but when they saw the Israelites proceed in safety, they followed. As soon as the entire Egyptian army was in the channel, the sea closed, and the pursuers perished amid torrents of rain and the most terrific thunder and lightning (Ant. ii. 15; xxx. 5).

III. Passage of the Red Sea.—This was the crisis of the Exode. It was the miracle by which the Israelites left Egypt and were delivered from the oppressor. All the particulars relating to this event, and especially those which show its miraculous character, require careful examination.

1. It is usual to suppose that the most northerly place at which the Red Sea could have been crossed is the present head of the Gulf of Suez. This supposition depends upon the idea that in the time of Moses the gulf did not extend farther to the northward than at present. An examination of the country north of Suez has convinced some geographers, however, that the sea has receded many miles, and that this change has taken place within the historical period, possibly in fulfilment of the prophecy of Isaiah (xi, 15; xix, 5; comp.
Zech. x, 11). The old bed is thought by them to be indicated by the Birket et-Timnah, or "Lake of the Crocodile," and the more southern bitter lakes, the northermost part of the former corresponding to the ancient head of the gulf. In previous centuries it is not supposed that the gulf extended farther north, but that it was deeper in its northermost part. We may reasonably infer that the Israelites believed, if it ever took place, cannot materially affect the question of the place of the Israelites' passage.

From Pi-hahiroth the Israelites crossed the sea. The only points bearing on geography in the account of this event are that the sea was divided by an east wind, which may be reasonably inferred that it was crossed from west to east, and that the whole Egyptian army perished, which shows that it must have been some miles broad. Pharaoh took at least six hundred chariots, which, three abreast, would have occupied about half a mile, and the rest of the army cannot be supposed to have taken up less than several times that space. Even if in a broad formation some miles would have been required. It is more difficult to calculate the space taken up by the Israelitis multitudes, but probably it was even greater. On the whole, we may reasonably suppose about twelve miles as the smallest breadth of the sea.

2. A careful examination of the narrative of the passage of the Red Sea is necessary to a right understanding of the event. When the Israelites had departed, Pharaoh repented that he had let them go. News is carried to the monarch which leads him to see that his decision (namely, that the Egyptians in the wilderness) is but a pretext; that the Israelites had really fled from his yoke; and also that, through some (to him) unaccountable error, they had gone towards the south-east, had reached the sea, and were hemmed in on all sides. He summons his troops and sets out in pursuit of the Israelites and the horses and chariots of Pharaoh, and his horsemen and his army; and he "overtook them encamping by the sea, beside Pi-hahiroth, before Raal-zephon" (Exod. xiv. 9). It might be conjected, from one part of the narrative (ver. 1-4), that he determined to give chase on the following day, and that he knew that when they had encamped before Pi-hahiroth, did not what follows this imply that he set out soon after they had gone, and also indicate that the place in question refers to the pursuit through the sea, not to that from the city whencesoever he started (ver. 5-10). This city was probably Zoan, and could scarcely have been much nearer to Pi-hahiroth, and the distance is therefore too great to have been twice traversed, first by those who told Pharaoh, then by Pharaoh's army, within a few hours. The strength of Pharaoh's army is not further specified than by the statement that "he took six hundred chosen chariots, and [or 'even'] all the chariots of Egypt, and captains over every one of them" (ver. 7). The war-chariots of the Egyptians held each but two men, an archer and a charioteer. The former must be intended by the word דְּבָרָא, rendered in the A.V. "captains." Throughout the narrative the chariots and horsemen of Pharaoh are mentioned, and "the horse and his rider" (xx. 21) are spoken of in Miriam's song, but we can scarcely infer hence that there was in Pharaoh's army a body of horsemen as well as of men in chariots, as in ancient Egyptian the chariot-force is always called HTAR or HETRA, "the horse," and these expressions may therefore be respectively pleonastic and poetical. There is no evidence in the records of the ancient Egyptians that the term used casually, and, therefore, had the Biblical narrative expressly mentioned a force of this kind, it might have been thought conclusive of the theory that the Pharaoh of the Exode was a shepherd-king. With this army, which, even if exaggerated, might have been in comparison with the Israelitis multitude, encumbered with women, children, and cattle, Pharaoh overtook the people "en-
other to fly from the face of Israel. Then was Moses commanded again to stretch out his hand, and the sea returned to its strength and overwhelmed the Egyptians, of whom not one remained alive (ver. 25-26).

This statement removes all reason to doubt that Pharaoh himself, the great offender, was at last made an example, and perished with his army, did it not seem to be distinctly stated in Exod. cxxxvi that he was included in the same destruction (ver. 16). The sea cast up the dead Egyptians, whose bodies bedewed the Israelites saw upon the shore. From that song of triumph which Moses sang upon this occasion we learn some other particulars, as that "the depths covered Pharaoh's host, they sank to the bottom as a stone;" language which, whatever deduction may be made for its poetic character, implies that the miracle took place in deep water (Esth. xiv. 26; comp. Ps. cxvi. 9 sq.). In a later passage some particulars are mentioned which are not distinctly stated in the narrative in Exodus. The place is indeed a poetical one, but its meaning is clear, and we learn from it that at the time of the passage of the sea there was a storm of rain, with thunder and lightning. We are thus reminded of the tradition by which the Egyptians were destroyed by an earthquake (Psa. lxvii, 15-20). To this Paul may allude where he says that the fathers "were all baptized unto Moses in the cloud and in the sea" (1 Cor. xii, 2); for the idea of baptism seems to involve either immersion or sprinkling, and the ancients would hardly have here occurred: the reference is evidently to the pillar of the cloud: it would, however, be impious to attempt an explanation of what is manifestly miraculous. These additional particulars may illustrate the trouble of the Egyptians, for their chariots may have been turned to horses' hoofs.

Here, at the end of their long oppression, delivered finally from the Egyptians, the Israelites glorified God. In what words they sang their praise we know from the Song of Moses, which, in its vigorous brevity, represents the events of that memorable night, scarcely one of the wealth and spirit of the Psalms. Pharaoh sent his chariots and his horsemen after them, and they overtook them, the Israelites. His chariots were filled with the sea, and his horsemen went into the sea. In the morning, when the sun rose, there was thick fog, and the Egyptians came to search for the shepherd's stock. They thus not only proved the truth of the song (Exod. xlv. 26), but were greatly garbled in the account in favor of the Egyptians. See HERS.

Endeavors have been made to explain away the miraculous character of the passage of the Red Sea. It has been argued that Moses might have carried the Israelites over by a ford, and that an earthquake might have overwhelmed the Egyptians. But no real diminution of the wonder is thus effected. How was it that the sea admitted the passing of the Israelites, and drowned Pharaoh and his army? How was it that it was shallow at the right time, and deep at the right time? (Exod. xiv, 26; comp. Job xxi, 18; ver. 19 is probably a kind of comment, not part of the song). Moses seems to have sung this song with the men, Miriam with the women also singing and dancing, or perhaps there were two choruses (ver. 20, 21). Such a picture does not recur in the history of our earlier times. The triumphal song of Deborah, nor the rejoicing when the Temple was recovered from the Syrians, celebrated so great a deliverance, or was joined in by the whole people. In leaving Goshen, Israel became a nation; after crossing the Desert they were a people. There is no evidence that significance, as we have suggested, in Paul's use of this miracle as a type of baptism; for, to make the analogy complete, it must have been the beginning of a new period of the life of the Israelites.

The importance of this event in Biblical history is shown by the manner in which it is spoken of in the books of the O.T. written in later times. In them it is the chief fact of Jewish history. Not the call of Abraham, not the rule of Joseph, not the first Passover, not the conquest of Canaan, are referred to in such a manner as this great deliverance. In the Psalms it is related in a manner that brings home the fact that God had wrought for his people. The prophet Isaiah recalls it as the great manifestation of God's interference for Israel, and an encouragement for the descendants of those who witnessed that great sight. There are statements so striking that they are remembered in the life of a nation, and, like the recital of an error, the distance only gives them more majesty. So no doubt was this remembered long after those were dead who saw the sea return to its strength and the warriors of Pharaoh dead upon the shore.

It may be objected that it is there seems to have been no record or tradition of this miracle among the Egyptians. This question involves that of the time in Egyptian history to which this event should be assigned. The date of the Exode, according to different cronologers, varies more than three hundred years; the dates of the Egyptian dynasties ruling during this period of three hundred years vary fully one hundred years. The two principal dates for the Exode may be assigned therefore as virtually corresponding to four hundred years of Egyptian history. If the lowest date of the beginning of the 18th dynasty be taken, and the highest date of the Exode, both which we consider the most probable of those that have been conjectured in the two cases, the Israelites were in Egypt in a period of which monuments or other records are almost wholly wanting. Of the 18th and subsequent dynasties we have as yet no continuous history, and rarely records of events which occurred in a succession of years. We know much of many reigns, and of some we can be almost (lory that they could), and correspond to that of the Pharaoh of the Exode.

We can in no case expect a distinct Egyptian monumental record of so great a calamity, for the monuments only record success; but it might be related in a papyrus. There would doubtless have long remained a popular tradition of the events of the Exode (contra Apionem, sec. xiv. 14, 28), to have greatly garbled the account in favor of the Egyptians.

The route taken by Moses was, according to Robinson, from Rameses to the head of the Arabian Gulf, through the Red Sea to Succoth to Etham. The last place he fixes on the edge of the desert, on the eastern side of the line of the gulf. Instead of passing down the eastern side, at the top of which they were, the Israelites thence marched down the western side of the arm of the gulf, stopping in the vicinity of Succoth, where the attempt to interpret the view of the miracle, however, entirely fails to satisfy the Scripture account, and has been amply refuted by Dr. Olin (Travels in the East, N.Y. 1843) and others. (See the account of Mr. Blumhardt's visit, Oct. 1886, in the Church Missionary Record, Jan. 1887, "The Dead Sea," p. 58; Daily Bible Illustration, ii, 95.) Some of the supposed Red Sea anciently extended farther north, and have sought to identify the localities of the passage on that theory (see Sharpe in Bartlett's Forty Days in the North, p. 22 sq.); but this is quite improbable and without evidence. Another theory (Dr. Darlington, Observations on the East, 1, 254) makes the Israelites to have turned from the vicinity of the bitter lakes to the western side of the head of Szueh, and
so to have followed the shore to the plain of Baidalah, at the mouth of wady Tuwarik, and there crossed; but if (as some travellers affirm) there is room for such a passage along the shore by Ras Attaka, the Israelites might have escaped by the same route by simply retreating, or, if that had been prevented by the Egyptians following along the same path behind them, they might still have fled up the wady Tih and thence around Jebel Attaka and the head of the sea. A still later view (Captain Moresby, in Alston’s *Lands of the Messiah*, p. 107) places the scene of the passage still farther south, at the mouth of the next valley opening off the Red Sea, which no one has ever disputed, and it would be difficult to show how the Israelites could have reached this spot from their former position in the edge of the wilderness, and it would also bring them out too far south on the other side of the Red Sea. Indeed, the mountains approach so steeply the shore all along at certain points that they could only have escaped at the valley or plain of Baidalah, where we have supposed the passage to have been made, by turning sharply at Etham around the western base of Mount Attaka, and so partly back into the wady et-Tih, through which they were immediately pursued by the Egyptians. In this manner they were completely hemmed in, and drove them forward to the extreme edge of the shore projecting in front of Mount Attaka, around which they were unable to escape. Here it was that Providence opened to them a miraculous path through the deep waters to the opposite point (at the mouth of which the Israelites are still slaves) and thence to the Red Sea, which they crossed. It was at Sinai, and in Moses, which doubtless derived their name from the first encampment of the Hebrews after their rescue.

See Red Sea.

IV. The Route from the Red Sea to Sinai.—When safe on the northwestern shore of the Red Sea, they might have traversed the desert of Paran, following the pilgrim road of the present day to Elath, and, turning to the north, have made for Palestine. In order to accomplish this, however, hostile hordes and nations would have to be encountered, whose superior skill and experience in war might have put to flight the comparatively ignorant and weak Israelites. Wisely, therefore, did their leader take a course which necessitated the lapse of time, and gave promise of affording intellectual and moral discipline of the highest value. He resolved to led his flock to Sinai, in order that they might see the wonders there to be exhibited, and by that means be made a people. On the journey thither, might the great leader hope that the moral brand which slavery had imprinted on his people would be effaced, and that they would acquire that self-respect, that regard to God’s will, that capacity of self-guidance which alone could have led to a blessing to the nation, and enable Moses to realize on their behalf the great and benign intentions which God had led him to form. There were, however, two ways by which he might reach Sinai. By following a south-easterly direction, and proceeding across the desert of Tih, he would have reached at once the heart of the Sinaiic region. This was the shorter and the more expeditious road. The other route lay along the shore of the Red Sea, which must be pursued till an opening gave the means of turning suddenly to the east, and ascending at once into the lofty district. The latter was preferable for the reason before assigned, namely, the additional opportunities which it offered for the education of the undisciplined tribes of recently emancipated slaves.

Moses did not begin his arduous journey till, with a plott and a warmth of gratitude which well befitted the signal deliverance that his people had just been favored with, he celebrated the power, majesty, and goodness of God in a triumphal ode, full of the most appropriate, striking, and splendid images; in which commemorative festivity he was assisted by “Miriam the prophetess, the sister of Aaron,” and her associated female band, with poetry, music, and dancing. The nature of these festivities gives us full reason to conclude that the Israelites were still slaves and unformed in intellect and morals, there were not wanting individuals in the camp who were eminently skilled in the best refinements of the age. The spot where these rejoicings were held could not have been far from that which bears the name of the eight fountains of Moses,” the situation of which is even now marked by a few palm-trees. This was a suitable place for the encampment, because well supplied with water. Here Robinson counted seven fountains, near which he saw a patch of barley and a few cabbage-plants.

1. In tracing the track pursued by the host, we should bear in mind the limitation that a variety of converging or parallel routes must often have been required to allow of the passage of so great a number (Robinson, *Researches*, i, 106). Assuming the passage of the Red Sea to have been effected at the spot indicated above, if the land was parched and arid, it would mean a journey of nearly a little to the E. of S. Here they were in the wilderness of Shur, and in it “they went three days and found no water.” The Israelites seem to have proceeded along the coast, probably following the route usually pursued by modern travellers, being at a short distance from the shore and among high and hilly sandy, with a few water-courses running into the Red Sea, which, falling rain, are dry. These wadys,” says Robinson, “are mere depressions in the desert, with only a few scattered herbs and shrubs, now withered and parched with drought.”

At the end of three days the Israelites reached the fountain Marah, but the waters were bitter, and could not be drunk. The stock which they had brought with them being now exhausted, they began to utter murmurings on finding themselves disappointed at Marah. They were at first pleased, then salt, and finally acrimonious. It delights in a saline soil, and is found growing near the brackish fountains in and around Palestine, affording a grateful refreshment to travellers. By means of the berries, or, if they were not ripe, the leaves of this plant, the bitterness may have been removed from the waters of Marah. Not im- probably the miracle in the case lay in this, that Jehovah directed Moses to use the tree (bush) itself, instead of what was usual, the berries, as from the time of year, shortly after Easter, they could hardly have been ripe. Between Mount Marah and the plain the plain is alternately gravelly, stony, and sandy, while under the range of Jebel Wadihla (a branch of et-Tih) chalk and gravel are found. There is no water on the direct line of route (Robinson, i, 127–144). Hawara stands in the lime and gypsum region which lines the eastern shore of the Gulf of Suez at its northern extremity. Seetzen (Reisen, iii, 117) describes the water as salt, with purgative qualities; but adds that his Bedouins and their camels drank of it. He argues, from its inconsiderable size, that it could not be the Marah of Moses. This, however, seems an inconclu- sive reason. It would not be too near the point of
EXODE

402 EXODE

landing assumed, as above, as Dr. Stewart argues (p. 55), when we consider the encumbrances which would delay the host, and, especially while they were new to the desert, prevent rapid marches. But the whole region appears to abound in brackish or bitter springs (Seetzen, ib. iii, 117, 118. Amer. Jour., p. 490). For instance, about 14 hours nearer Suez than the wady Ghorundel (which Lepsius took for Marah, but which Niebuhr and Robinson regard as more probably Elim), Seetzen (ib. iii, 118, 114) found a wady Tal, with a salt spring and a salt crust on the surface of its bed, the same, he thinks, as the spot where Niebuhr speaks of finding rock-salt. This corresponds in general proximity with Marah. The neighboring region is described as a low plain girt with limestone hills, or more rarely chalk. On this first section of their desert march, Dr. Stanley (Sinait, and Palestine, p. 57) remarks, "There can be no dispute as to the general track of the Israelites after the passage of the Red Sea. If they were to enter the mountains at all, they must continue in the route of all travellers, between the sea and the table-land of the Tih; till they entered the low hills of Ghurundel. Dr. Grefal, however, was told . . . of a spring near Tih el-Amârâ, right (i.e. south) of Hawâra, so bitter that neither men nor camels could drink of it. From hence the road goes straight to wady Ghorundel." Seetzen also indicates the site of the old station of el-Amârâ with Marah. He gives it the title of "a wady," and precisely on this ground rejects the pretensions of el-Hawâra as being no "wady," but only a brook; whereas, from the statement "they encamped at Marah, Marah must, he argues, have been a wady. See MARAH.

2. The next station mentioned in Scripture is Elim, where were twelve wells of water, and threescore and ten palm-trees. As is customary with travellers in these regions, "they encamped there by the waters." (Exod. xvi, 1). The indications given in the Bible are not very distinct, nor vary much in different time, nor distance is accurately laid down. Hence we can expect only general accuracy in our maps, but partial success in fixing localities. Elim, however, is generally admitted to be wady Ghurundel, lying about half a day's journey south-east from Marah. The way from Egypt to Sinai lies through this valley. Dr. Grefal says that he himself has been on the line of march, and almost equally certain that it furnished a camping station. In this wady Seetzen found more trees, shrubs, and bushes than he anywhere else saw in his journey from Sinai to Suez. He particularizes several date-palms and many tamarisks, and notes that the largest quantity of the vegetable manna, now to be found anywhere in the Peninsula, is gathered here (iii, 116) from the leaves of the last-named tree, which here grows "with gnarled boughs and hoary head; the wild acacia, tallowed by its desert growth into a thicket, also shoots out its green leaves and white blossoms over the desert." (Sinait, and Palestine, p. 68). The "scenery" in this region becomes "a succession of water-courses" (ib.); and the wady Taibye, connected with Ghorundel by Usit, is so named from the goodly water and vegetation which it contains. These three wadys encumbered the Israelites with jelâl el-Hubbâm, by which it precipitously overhangs, being on the fourth. They are the principal ones of those which the Israelites, going from north-west to south-east along the coast, would come upon in the following order—wady Ghurundel, el-Hawâra, el-Amârâ, Thal, Shubetek, the last being in its lower part called wady Taibye, or having a junction with one of that name. Between Usit and Taibye, the coast-range of these hills rises into the Jebel Hûmûmât, "lofty and precipitous, extending in several peaks along the shore, apparently of chalky limestone, mostly covered with flints . . . its precipices . . . cut off all passage along-shore from the hot springs (lying a little west of south from the mouth of wady Taibye) to the mouth of wady Taibye." (Robinson, i, 159; compare Stanley, Sin. and Palæt. p. 35). Hence, between the courses of these wadys the track of the Israelites must have been inland. Stanley says "Elim must be Ghûrûndel; Gîlûn, or Tâbûtah (p. 57); elsewhere (p. 68) that "one of two valleys, or perhaps both, must be Elim;" these appear from the sequel to be Ghûrûndel and Usit, "fringed with trees and shrubs, the first vegetation he had met with in the desert;" among these are "wild palms," not stately trees, but dwarf or savage, "tamarisks," and the "wild acacia." To judge from the configuration as given in the maps, there seems to be no reason why all three should not have combined to form Elim, or, at any rate, as Stanley suggests, two of them. Only, from Num. xxxiii, 9, 10, as Elim appears not to have been on the sea, we must suppose that the encampment, if it extended into these wadys, stopped short of their seaward extremities. The Israelish host would scarcely find in all three more than adequate ground for their encampment. By (i.e. to the south-east of Ghurundel), the ridges and spurs of limestone mountain push down to the sea, bringing the plain along the sea shore, thei ambit (ib. 101, and Map). This portion of the question may be summed up by presenting, in a tabular form, the views of some leading travellers or annotators on the site of Elim.

Dr. Kruse (Tunmerk. p. 418) singularly takes the words of Exod. xv, 27, "they encamped there (in Elim) by the sothera," as meaning "by the sea," whereas, from Num. xxxiii, 9, 10, it appears they did not reach the sea till a stage farther, although their distance from it previously had been small. See Elim.

3. From Elim the Israelites marched, encamping on the shore of the Red Sea, for which purpose they must have kept a keen eye on the south-west to note the precipices of Jebel Hûmûmât—a lofty and precipitous mountain of chalky limestone—run down to the brink of the sea. They therefore went on the land side of this mountain to the head of wady Taibye, which passes down south-west through the mountains to the shore. On the plain of Ruâ Zêdûm, at the mouth of this valley, was probably (Stanley, p. 37) the encampment "by the Red Sea" (Num. xxxiii, 10).

4. According to Num. xxxiii, 11, the Israelites removed from the Red Sea, and encamped next in the wilderness of Sin; an appellation no doubt representative of some natural feature, and none more probably than the alluvial plain, which, lying at the edge of the sea, about the spot we now regard them as having reached, begins to assume a significant appearance. The modern name for this is el-Kiûn, identified by Seetzen with this wilderness (ib. pt. iii, 412). Stanley calls el-Kiûn, at its initial el-Kiûn; in his description (ib. pt. iii, 106). Thus they kept along the shore, and did not yet ascend any of the fruitful valleys which run up towards the centre of the district. The account in Exod.

xvil knows nothing of the foregoing encampment by the sea, but brings the host at once into the wilder-ness of Sin; but we must bear in mind the general purpose there of recording not the people’s history so much as God’s dealings with them, and the former rather as illustrative of the latter, and subordinate to it. The event described in the present chapter, xxvi1 be-ing a place on record their iterrary, this latter is to be esteemed as the locus classicus on any topographical questions as compared with others having a less special relation to the track. Indeed, we may regard the encampment by the Red Sea as being essentially in the wildness of Shur itself. See Sun (next vy).

The Israelites arrived in the wilderness of Sin on the fifteenth day of the second month after their departure out of the land of Egypt (Exod. xxi, 1), and being now wearied of their journey and tired of their scanty fare, they began again to murmur. Indeed, it is not easy to say how this in Exod. xxi, 1, and niggardly food could have been supplied to them, constituting as they did nearly two millions of persons, in such a country as that into which they had come. It is true that some provision might have been made by individuals ere the march from Suez began. It is also probable that a portion of provisions was which we have to be regarded as chiefly those of Moses and his principal men, with a chosen body of troops, while the multitude were allowed to traverse the open country and forage in the valleys. Still the region was unfavorable for the purpose, and some have hence concluded that there were other causes of one of the calamities and difficulties which are not uncommon in the Old Testament Scripture, and which make many suspect some radical error in our conceptions of the Hebrew system of numbers. The contrast between the scanty supply of the desert and the abundance of Egypt furnished the immediate occasion of the outbreak of dissatisfaction. Bread and flesh were the chief demand; bread and flesh were miraculously supplied; the former by manna, the latter by quails (Exod. xvi, 13). Manna grows in some of the neighboring valleys; but the Israelites were in the wilderness, so that the supply could not have proceeded from natural resources, even had such existed to a sufficient extent for the purpose. The modern conquest sold under that name is the exuda- tion collected from the leaves of the tamarisk-tree (tamarix orientalis, Linn.; Arab. tarfa, Heb. תָּ֫רֶּֽףָּ‎) only in the Syrian valleys, and in no great abundance. If it results from the punctures made in the leaf by an insect (the coccus manusporus, Ehrenberg) in the course of the succeeding August, this would specially suit the time of the people’s entering the region, which was about May. It is said to keep as a hardened sirup for years (Labarde, Comment. Hier. on Exod. xvi, 13, 14), and thus does not answer to the more striking characteristics described in the acacia, was the real manna of the Israelites; i. e. he regards the statement of “bread from heaven” as a fiction. (Forsén, iii, 75-79). A caravan of a thousand persons is said by Haselequist (Voyages, etc., Materia Medica, p. 298, transl. ed. 1767) to have subsisted solely on this substance for two months. See MANNA.

5. The next station mentioned in Exodus is Raphidim; but in Numbers Dophkah and Alshu are added. The two latter were reached after the people had taken “their journey out of the wilderness of Sin.” Exact proportion and minute agreement are not to be expect- ed. The circumstances were so various as to lead us to look for them. In a desert, mountainous, and rarely frequented country, the names of places are not lasting. There was the less reason for permanence in the case before us, because the Israelites had not taken the shorter and more frequented road over the mountains to Sinai, but kept along the shore of the Red Sea. It still deserves notice, that in Exodus (xvii, 1) there is something like an intimation given of other stations besides Raphidim in the words “after their journey.” Dophkah is probably to be found near the spot where wady Feiran runs into the Gulf of Suez. See DOP- KAH. Alshu may have lain on the shore near Ras Jehan. See ALSHU. From this point a range of cal- cars is seen, and the road, which is shown in the map, passes from here to the Red Sea. This range of hills, the shore, near the southern end of which the Hebrews took a sudden turn to the north-east, and, going up wady Hibirin, reached the central Sinaiitic district. On the opposite side, the eastern, the Sinaiitic moun-tains come to a sudden stop, breaking off, and present ing a wall nearly perpendicular granite cliffs. These cliffs are cut by wady Hibirin, and at the point of intersection with the plain which runs between the two ranges probably lay Raphidim. The tabernacle was not yet set up, nor the order of march organized, as subsequently (Num. x, 15, etc.); hence the words “track” or “road” does not appear. The section has been taken in the most wide and general sense. See RE- PHIDIM.

This was the last station before Sinai itself was reached. Naturally enough it is recorded that “there was no water to drink. The land was an arid gravelly plain; on either side were barren rocks. A natural supply was impossible. A miracle was wrought, and water was given. The Scripture makes it clear that it was from the Sinaiitic group that the water was produced (Exod. xvii, 6). The plain received the descriptive names: ‘Sea of Flaming Fire,‘ ‘Sea of Ex- citation,’ and Meribah, ‘Strife.’ It appears that the congregation was not allowed to pursue their way to Sinai unmolested. The Arabs thought the Israelites suitable for plunder, and fell upon them. These hordes are termed Amalek. The Amalekites may have been out on a predatory expedition, or they may have followed the Israelites from the north, and only over- taken them at Raphidim; any way, no conclusion can be gathered from this fact as to the ordinary abode of these nomads. It appears, however, that the conflict was a severe and doubtful one, which by some extror-dinarily bad end in favor of the children of Israel. This aggression on the part of Amalek gave occasion to a permanent national hatred, which ended only in the extermination of the tribe (Num. xxvii, 20; Exod. xvii, 4-16). In commemoration of this victory, Moses was to set up a monument, and to write an account of it. He also erected there an altar to Jehovah, and called the name of it “Jehovah, my banner.” There is no occasion to inquire whether or not there was space for a battle in the spot where Moses was. It was a nomadic horde that made the attack, and not a modern army. The battle was then pitched there.

The word Horeb, applied by Moses to the place whence the water was gained, suggests the idea that Horeb was the general, and Sinai the specific name; Horeb standing for the entire district, and Sinai for one particular mountain. Many passages sanction this distinction; but in the New Testament Sinai only is read, having then apparently become a general name, as it is at the present day (Acts vii, 30-38; Gal. iv. 24). It is a monkish usage which gives the name Sinai to Jebel Mousa, and Horeb to the northern part of the same ridge, see HORSAN.

6. The route from Raphidim to Horeb is usually sup- posed to have been by way of wady Feiran, but we can see no good reason for so circuitous a course, supposing that we have correctly located Raphidim. The Israel- ites may more probably have ascended wady Hibirin as far as its junction with wady Bughabigh, and through this first south-easterly, and then north-easterly between Jebel Madusus and Jebel es-Sik; thence, in a northerly direction, along the western base of Je- bel Katherin, through wady Um-Kuraf, across wady Tulah. Here they may have followed the path be- tween Jebel Humr and Jebel el-Ghubsheh, which comes out at the modern gardens in the recesses of the
hills. We thus place them before Mount Horæth, in the capacious plain Râhâh, which, having its widest part in the immediate front of that immense mass of rock, extends as if with two arms, one towards the north (the Maccaean Umm el Hejaz) and the other towards the south. The view of the plain by so competent a person as Robinson is of great consequence for the interests of scientific geography, and the yet more important interests of religious truth; the rather because a belief prevailed, even among the best informed, that there was no spot in the Sinaitic peninsula which abutted on the desert, that did not bear the marks of the demands of the scriptural narrative. Even the accurate Winer (ReaL-Wort. in art. "Sinai," not "Horeb," as referred to by Robinson, i, 17; ii, 560) says, "Whatever mountain may be considered as the place for the promulgation of the law, the common representation still remains false—that at the foot of the hill there spreads out a great plain, on which the people of Israel might assemble" (comp. Rosenmüller, Alterth., iii, 129).

We shall therefore transcribe Robinson's words in extenso: "We came to Sinai with some incredulity, wishing to investigate whether there was any probable ground, beyond monkish tradition, for fixing upon the present supposed site. We were led to the conviction that the plain er-Râhâh is the probable spot where the congregation of Israel was assembled; and that the mountain impeding over it, the precipice and front of the rising range of the dark mountains in which the law was given. We were surprised as well as gratified to find here, in the inmost recesses of these dark granite cliffs, this fine plain spread out before the mountain, and I know not where I have felt a thrill of stronger emotion than when, in first crossing the 475' in elevation, one is struck by the grandeur in solemn grandeur before us, we became aware of the entire adaptedness of the scene to the purposes for which it was chosen by the great Hebrew legislator. Moses doubtless, during the forty years in which he kept the flock of Jethro, wandered amongst the mountains, as well acquainted with their valleys and deep recesses, like the Arabs of the present day. At any rate, he knew and had visited the spot to which he was to conduct his people—this adytum in the midst of the great circular granite region; a secret holy place, shut out from the point of lone and desolate mountains" (i, 175 sq.). We subjoin what Robinson reports of the climate: "The weather, during our residence at the convent (of Sinai), as, indeed, during all our journey through the peninsula (March and April), was very fine. At the convent the thermometer ranged on the town: on the coast on the plains. But the People, who are said here to be cold; water freezes as late as February, and snow often falls upon the mountains. But the air is exceedingly pure, and the climate healthy, as is testified by the great age and vigor of many of the monks; and if in general few of the Arabs attain to so great an age, the cause is doubtless to be sought in the scantiness of their fare, and their exposure to privations, and not to any injurious influence of the climate" (p. 175). Other travellers, however, have since contended for the plain of wady ês-Sabîâyeh, at the south-eastern base of Sinai, as the scene of the giving of the law (Kitto's Daily Bible (iibat. ii, 123). This appears a less favorable position for that purpose, but it might easily have been reached by the Israelites by keeping along the shore of the Red Sea, and ascending by the next valley opposite Jebel Um-Shaamer. See Sænder, v.

V. From Sinai to Kadesh.—The sojourn of a year in the neighborhood of Mount Sinai was an eventful one. The statements of the scriptural narrative which relate to the receiving of the two tables, the golden calf, Moses' vision of God, and the visit of Jethro, are too well known to need special mention here; but besides these, it is certain, from Numb. iii, 4, that before they quit the wilderness of Sinai the Israelites were thrown into mourning by the untimely death of Aaron's two sons, Nadab and Abihu. This event is probably connected with the setting up of the tabernacle and the enkindling of that holy fire, the sanctity of which their death avenged. That it has a determinate chronological connection with the promulgation of the law is proved by an edict in Lev. xvi, being fixed as subsequent to it (Lev. x.; comp. xvi. 1). The only other fact of history contained in Leviticus is the punishment of the son of mixed parentage for blasphemy (xxiv, 10-14). Of course, in the geese, the living, the gray, before the due time to be made in that wilderness, is proved by an edict in the book in connection with the laws relating to their office (viii, ix). In the same wilderness the people were numbered, and the exchange of the Levites against the first-born was effected; this last, since their delivery when God smote those of Egypt, having incurred the obligation of sanctity to him. The offerings of the princes of Israel were here also received. The last incident mentioned before the wilderness of Paran was quoted for that of Paran is the intended departure of Hobab the Kenite, which seems he should be avoided at Moses' urgency. See HOBAB.

1. After having been thus a year in the midst of this mountainous region, the Israelites broke up their encampment and began their journey in the order of their tribes, Judah leading the way with the altar of incense, on the right hand of the censer of the cloud (Numb. i, ix, 15 sq.; x, 11 sq.). They doubtless proceeded down wady Sheik, having the wilderness of Paran (Debheb el-Ramleh) before them, in a northerly direction; but having come to a gorge in the mountains not far from Sinai, they appear to have struck in a north-easterly direction across some low swells into wady Sul, where the subsequent route obliges us to place the station Taberah. It took the army three days to reach this station. Whatever name the place bore before, it now received that of Taberah out of despair, as from mourning. In the early parts of the campaign, the enemy were destroyed as a punishment for their guilt. Here, too, the mixed multitude that was among the Israelites not only fell a-lusting themselves, but also excited the Hebrews to remember Egyptian fish and vegetables with strong desire, and to comine in to the divinely supplied manna. The discontent was intense and widely spread. Moses became aware of it, and forthwith felt his spirit misgive him. He brings the matter before Jehovah, and receives divine aid by the appointment of seventy elders to assist him in the important and perilous office of the guidance of the people. But his instructions are sent to an Egyptian nobleman whom he had to lead to Canaan. Moreover, an abundance of flesh-meat was given in a most profuse supply of quails. It appears that there were now 600,000 footmen in the congregation. See TABERAH.

2. The next station was Kibroth-hattaavah (probably at the intersection of their north-easterly course with wady Murrah), near which there are fine springs and excellent pasturage. This spot, the name of which signifies "graves of lust," was so denominated from a plague inflicted on the people in punishment of their rebellious disposition (Num. xi, 33; I Cor. xi, 6). Ramban (Berit be judgement, 6, 6, also hal. 1850, p. 442) infers from Deut. 1, § 9, that Dizahab (now Dahab) lay on the route of the Israelites, and therefore identifies it with Kibroth-hattaavah; but this is improbable, and requires a large detour. See KIBROTH-HATTAAV.

3. Thence they journeyed to Hazeroth, which Robinson, after Buxtorf, finds in el-Hudherah, where is a fountain, together with palm-trees. "The determination of this point," says Robinson, "is perhaps of more importance in Biblical history than that at first appear; for, if this position be correct for Hazeroth, it settles at once the question as to the whole route of the Israelites between Sinai and Kadesh. It shows that they must have followed the route upon
which we now were to the sea, and so along the coast to Akabah (at the head of the eastern arm of the Red Sea), and thence, probably, through the great wady el-'Arabah to Kadesh. Indeed, such is the nature of the country, that, having once arrived at this fountain, they could not well have varied their course so as to keep above the coast line and climb the higher plateau of the western desert" (i, 228). A glance at Kiepert's, or any map showing the region in detail, will show that a choice of two main routes exists, in order to cross the intervening space between Sinai and Canaan, which they certainly approached in the first instance, along the wady of the Gulf of Akabah, and not the eastern side. Here the higher plateau surmounting the Tih region would almost certainly, assuming the main features of the wilderness to have been then as they are now, have compelled them to turn its western side nearly by the road by which we are coming in the opposite direction from Hebron to Sinai, or to turn it on the east by going up the 'Arabah, or between the 'Arabah and the higher plateau. Over its southern face there is no pass, and hence the roads from Sinai, and those from Petra towards Gaza and Hebron, all converge into the east-lying-ones of routes. Again, as so many other regions of this kind, this one shows how the time is passing towards the inland heart of the desert. Again, the plains are brought by a "wind from the sea" (Num. xi, 22, 31); and various travellers (Burckhardt, Schubert, Stanley) testify to the occurrence of vast flights of birds in this precise region between the desert and the coast. Yet, as in the case of the Gulf of Akabah, one cannot be certain, and the more remote that they were not far from the coast of the Gulf of Akabah. A spot which seems almost certain to attract their course was the wady el-'Ain, being the water, the spring of that region of the desert, which would have drawn around it such a great mass of people as might have been expected as the name of Hazeroth, and such as that of Israel must have been" (Stanley, p. 82). Stanley nevertheless thinks this identification of Hazeroth a "faint probability," and the more uncertain as regards identity, "as the name Hazeroth is one of the least likely to be attached to any permanent or natural feature of the desert," meaning "simply the inclosures, such as may still be seen in the Bedouin villages, hardly less transitory than tents" (Sinai and Palestine, p. 81, 82). We rely, however, as much on the combination of the various circumstances above stated as on the name. The wady Hoderah and wady el-'Ain appear to run nearly parallel with each other, from south-west to north-east, nearly from the eastern extremity of the wady es-Sheikh, and their north-east extremity comes nearly to the coast, marking about a midway distance between Hebron and Akabah. After reaching the sea, however, at Ain el-Wésit, the Israelites may have made a detour by way of wady Wetir nearly to its head, and thence passed through the water-course running directly northward into the Derb es-Sanna, thence around the northern face of Jebel Hette, down wady Hot and wady Kureibah to the sea again; thus avoiding the narrow shore and the difficult pass across the hill between wady el-Huweimirat and wady el-Huweimirat. (See Stanley's Sinai and Palestine, p. 84). See HAZEROTH.

At Hazeroth, where the people seem to have remained a short time, there arose a family disension to increase the difficulties of Moses. Aaron, apparently the second in rank among the Israelitish princes, was actuated by some feminine pride or jealousy, complained of Moses on the ground that he had married a Cushite, that is, an Arab wife, and the malcontents went so far as to set up their own claims to authority as not less valid than those of Moses. An appeal is made to Gad, the eastern tribe, to decide the question, and Aaron, and punishes Miriam (Num. xii.). See MIRIAM.

The two preceding stations seem from Num. x. 11, 15, 23 to 36, to have lain in the wilderness of Paran; but possibly the passage in x. 11 should be read (Num. xii. 4) of 33-36, and the "three days' journey" of ver. 33 lies still in the wilderness of Sinai; and even Taberah and Hazeroth, reached in xi. xii, also there. Thus the Israelites would reach Paran only in xii. 16; and x. 12 would be either misplaced, or mentioned by anticipation of the people on their journey to Sinai. i, 14, 151, 2; ii, 186.

4. The next permanent encampment brought them into the wilderness of Paran, and here the local commentator's greatest difficulty begins. "And afterwards the people removed from Hazeroth, and pitched in the wilderness of Paran," at Kadesh (Num. xii. 16; but xii. 21, xliii. 21) to the south of the Dead Sea, and reached the encampment of Mount Hor, descended to the east side of the Tih. But departed from Horeb we went through all that great and terrible wilderness which ye saw by the way of the mountain of the Amorites, as the Lord our God commanded us; and we came to Kadesh-barnea. And I said unto you, Ye are come unto the mountain of the Amorites, which the Lord our God giveth us. Behold, the Lord thy God hath set the land before thee: go up and possess it; for it, neither be discouraged." Accordingly, here it was that twelve men (spies) were sent into Canaan to survey the country, and returned after forty days, brought back a very alarming account of what they had seen. Let it, however, be remarked that the Scriptures here supply several local data to this effect: Kadesh-barnea lay not far from Canaan, near the mouth of the river Lomn; and the Amorites, the inhabitants of the land of Canaan and of the wildness of Sin, in the wilderness of Paran. It is evident that there is here a great lacuna, which some have attempted to fill up by turning the route a little to the west to Rithmah (q.v.), on the borders of Idumæa, and then proceeding thither by the way of the Lomn, or the same that led to Kadesh, or to the north by the east, and then descending to the land of Canaan (Relieve Map of Arabia Petraea, published by Dobbs, London). In this view, however, we cannot concur, both Robinson and Raumer are of a different opinion. At the same time it must be admitted that so great a gap in the itinerary is extraordinary. If, however, we find ourselves in regard to the journey from Horeb to Kadesh possessed of fewer and less definite materials of information, we have also the satisfaction of feeling that no great scriptural fact or doctrine is concerned. It is certain that the narrative in the early part of Numbers goes on at occasions more or less from the same, and although a second account (in Num. xxx. xxiii) supplies other places, these seem to belong properly to a second route and a second visit to Kadesh. The history in the book of Numbers is not, indeed, a consecutive narrative; for after the defeat of the Israelites in their first attempt to force a way through to Canaan contrary to the will of God (Num. xiv, 45), it breaks suddenly off, and, leaving the journeyings and the doings of the camp, proceeds to recite certain laws. Yet it offers, as we think, a clear intimation of a second visit to the wilderness of Sin and to Kadesh. Without having said a word as to the removal of the Israelites southward, and therefore leaving them in the wider-
nese of Zin, at Kadesh, it records in the twentieth chap.
(ver. 1), "Then came the children of Israel, the whole
congregation, into the desert of Zin, in the first month,
and the people abode in Kadesh." And this view ap-
pears confirmed by the fact that the writer immediate-
ly proceeds to narrate the passage of the Israelites
henceforth, "Moses went out from Kadesh; and the
Canaan. Robinson's remarks (ii, 611) on this point
have much force: "I have thus far assumed that
the Israelites were twice at Kadesh, and this appears from
a comparison of the various accounts. They broke
up from Sinai on the twentieth day of the second
month of the second year of their sojourn out of
Egypt, corresponding to the early part of May; they :
came into the desert of Paran, whence spies were sent
up into the mountain into Palestine, 'in the time of
the first ripe grapes'; and these returned after forty
days to the camp at Kadesh. As grapes began to ripen,
the mountains of Judah in July; the return of
the spies is to be placed in August or September. The
people now murmured at the report of the spies, and
received the sentence from Jehovah that their car-
casses should fall in the wilderness, and their children
were to wander forty years and then be ordered
to turn back into the desert by the way of the Red
Sea, 'although it appears that they abode 'many' days
in Kadesh. The next notice of the Israelites is, that
in the first month they came into the desert of Zin and
abode again at Kadesh; here Miriam dies; Moses and
Aaron depart from the rod room (Num. xi, 11). A de-
mand is made through the land of Edom, and refused;
and they then journeyed from Kadesh to Mount Hor,
where Aaron dies in the fortieth year of the departure
from Egypt, in the first day of the fifth month, cor-
responding to part of August and September. Here,
then, is the August of the second year. In August of
the fortieth year, we have an interval of thirty-eight
years of wandering in the desert. This coincides
another account. From Mount Hor they proceeded
to Elath on the Red Sea, and so around the land of Edom
to the brook Zered, on the border of Moab; and from
the time of their departure from Kadesh,(meaning, of
course, their first departure) until they thus came to
the brook Zered, there is said to have been an interval
of thirty-eight years."

In this way the scriptural account of the journey-
ing of the Israelites becomes perfectly harmonious and
intelligible. The eighteen stations mentioned only in
the general list in the book of Numbers as preceding
the arrival at Kadesh are then apparently to be
referred to this eight-and-thirty years of wandering,
during which the people at last approached Ezion-
gegad, in the fifth year, and in the second year in
August of the fortieth year, in the hope of passing directly through
the land of Edom. Their wanderings extended, doubt-
less, over the western desert, although the stations
named are probably only those head-quarters where
the tabernacle was pitched, and where Moses, and the
elders, and priests encamped; secondly, the main body of
the people was scattered in various directions.

Where, then, was Kadesh? Clearly on the bor-
ders of Palestine. We agree with Robinson and Rau-
mer in placing it nearly at the top of the wady 'Ara-
bab, known as the 'Wady Arabah,' or 'the Wady of
Edom,' xii, 16 we read, 'Kadesh, a city in the uttermost of thy
land of Edom.' The precise spot it may be difficult
to ascertain; but here, in the wilderness of Zin, which
lay in the more comprehensive district of Paran, is
Kadesh to be placed. Raumer, however, has attempted
der in this with his view of the wady. Schubert generally concur.
Raumer places it south from the Dead Sea, in the low lands between the
mountain of the Edomites and that of the Amorites.
The country gradually descends from the mountains of
Judah southward, and where the descent terminates, the river joins
the Jordan. It is the plain of two passages in Exod. (xv, 22) and Num. (x, 29),
to the spies, "Get you up southward (rather on the
south," 22, 3), and go up into the mountain" (Num. xiii, 17).
The event may have been on the pass
es-Sufah; up this the self-willed Hebrews would go,
and were driven back by the Canaanites as far as to
Horah, then called Zephath (Num. xii, 17; xiv, 40-45;
Judg. i, 17). The spot where Kadesh lay Robinson
finds in the present Ain el-Weibeh. But Raumer pre-
fers a spot to the north of this place—that where the
road meets el-Kharrar and the pass Sufah. It ought,
thinks he, to be fixed on a spot where the Is-
raelites would be near the pass, and where the pass
would lie before their eyes. This is not the case,
according to Schubert, at Ain el-Weibeh. Raumer,
therefore, inclines to fix on Ain Hasib, which lies near
Ain el-Kharrar. This is probably Kadesh. The dis-
tance from the pass Sufah to Ain Hasib is little more
than half the length of that from the same pass to Ain
el-Weibeh. According to the Arabs, there is at Ain
Hasib a copious fountain of sweet water, surrounded
by verdure and traces of ruins, which must be of con-
siderable magnitude, as well as they were seen by
Raumer, at a distance of some miles. These may be the ruins
of Kadesh; but at Ain el-Weibeh there are no ruins (see
Raumer, Palast. 1860, p. 445). See KADESH.

By what route, then, did the Israelites come from
Hazerath to Kadesh? We are here supplied with
scarcely any information. The entire part of the road
which is considerable, is passed by the historian in silence.
Nothing more remains than the direction of the two
places, the general features of the country, and one or
two allusions. The option seems to lie between two
routes. From Hazerath, pursuing a direction to the
north-east, they would come upon the sea-coast, along
which they might go till they came to the top of the
Bahr Akabeh, and thence up wady Arabah to Kadesh,
nearly at its extremity. Or they might have taken a
north-western course and crossed the mountain Jebel
Tih. If this must have avoided the west-
side of Mount Arafat, otherwise they would
have been carried to Beer-sheba, which lay far to the west
of Kadesh. Robinson prefers the first route. Raumer
the second. "I," says the latter, "am of opinion that
Israel went through the desert el-Tih, then down Je-
bel Arafat, but not along wady Arabah." This view is
thought to be supported by the words found in Deut. i, 19,
"When we departed from Horeb we went through all
that great and terrible wilderness which ye saw by
the way of the mountain of the Amorites [as if Jebel
Arafat], and we came to Kadesh-barnea." This jour-
cpy from Horeb to Kadesh-barnea is measured by the
Hebrew eleven days (Deut. i, 2). But in this last passage
the route is expressly said to be "by the way of Mount
Seir" (which must therefore be the "mount of the Amorites"
above referred to), and in ver. 1 the "wil-
derness is said to be in the 'Arabah ('plain'), with
several places designated as extreme boundary points.
See Arabah.

VI. The Wandering in the Desert.—At the direct
command of Jehovah the Hebrews left Kadesh, came
down to the wady 'Arabah, and entered the wilderness
by the way of the Red Sea (Num. iv, 20). In this
wilderness they wandered eight-and-twenty years,
but little can be set forth respecting the course of
their march. It may in general be observed that their
route would not resemble that of a regular modern
army. They were a disciplined horde of nomades,
and would follow nomadic customs. It is also clear
that the stages of their journey were well defined by
el-Khadra, and that the coast line of the wilderness
clearly be determined by the nature of the country,
and its natural supplies of the necessities of life. Hence
regularity of movement is not to be expected. A
common error is that of supposing that from station to
station (in Num. xxxiii) always represents a day's
march merely. This is far from the case. In one place,
the list of two passages in Exod. (xv, 22) and Num. (x, 29),

Digitized by Google
that on two occasions three days formed the period of transition between station and station, and therefore that not day's marches, but intervals of an indefinite number of days between permanent encampments are intended by that itinerary; and as it is equally clear from Numb. ix. 22 that the ground may have been occupied by way of a day's, or a month, or a year, we may suppose that the occupations of a longer period only may be marked in the itinerary; and thus the difficulty of apparent chasms in its enumeration, for instance the greatest, between Ezion-Gebel and Kadesh (xxxii. 35-37), altogether vanishes. Here, except by a constant miracle, two millions of people were supported for forty years in the peninsula of Sinai, has been thought, under the actual circumstances of the case, to be inexplicable; nor will such scanty supplies as an occasional well or a chance oasis do much to relieve the subject. Much of the difficulty experienced by commentators on this head, however, arises from a misconception of the nature of the so-called "desert" (נֶגֶר), which is rather an open uninhabited country than a desolate wilderness in the strict sense. Indeed, Jethbah (q. v.), one of the stations named in this part of the route, is explicitly called a "land of rivers of waters" (Deut. x. 8). Modern travellers through the region in question would find most of it as well watered, and actually sustaining a numerous nomadic population (comp. Meth. Quart. Rev. Apr. 1863, p. 305 sq.). See WILDERNESS.

1. In the absence of detailed information, any attempt to lay down the course pursued by the Israelites after emerging from the 'Arabah can be little better than conjectural. Some authorities carry them quite over to the eastern bank of the Red Sea; but the expression "by the way of the Red Sea" denotes nothing more than the western wilderness, or the wilderness in the direction of the Red Sea. The stations over which the Israelites passed are set down in Numb. xxxii. 18 sq. (comp. Deut. x. 6, 7), and little beyond the bare record can be given. Only it seems extraordinary, and is much to be regretted, that for so long a period as eight-and-thirty years our information should be so exceedingly small. Baumer, indeed, makes a feasible effort (Beiträge zur biblische Geographie, Leipzig, 1845) to fix the direction in which some of the stations lay to each other, but he locates them all in the valley of the 'Arabah, without being able to identify one of the names with a modern locality (see his Podestàé, 1850, p. 446; also map). Were the interior of the peninsula thoroughly explored, we doubt not many of the ancient names might be found still subsisting, which would serve as landmarks to determine the route. As it is, we do not altogether despair of finding some clue to the subject. [See below.] It may be of service to subjoin the following table of the places through which the Israelites passed (not all of them exactly stations) from the time of their leaving Egypt to their arrival in Canaan, which we take (with some alterations) from Dr. Robinson's paper in the Biblical Repov for 1852, p. 724-727.

(1) From Egypt to Sinai.

(NUMB. XXII.

(1.) From Rameses (xxxii. 37).)

(1.) From Rameses (xxxii. 37).

(Succoth (xii. 37).

(3.) From Ezion-Gebel, Ezion-Gebel (xv. 2).

(4.) Passage through the Red Sea (xv. 22).

(5.) Three days' march into the desert of Shur (xv. 24).

(6.) Marah (xx. 33).

(7.) Edom (xxv. 27).

(8.) En-garem (xxxiii. 20).

(9.) Desert of Sin (xv. 1).

(10.) Rephidim (xv. 11).

(11.) Desert of Sinai (xix. 1).

(12.) (From Nume (xxii. 13).)

(13.) Desert of Sinai (xxi. 12).

(14.) Dophkah (xviii. 11).

(15.) The desert of 'Arabah, by the way of Mount Seir (Deut. i. 1, 2).

(16.) Kadesh, in the desert of Paran (xii. 42; xiii. 39; Deut. i. 2, 19). (Hence they turn back and wander for 38 years (Numb. xiv. 25 sq.) through the desert (Deut. i. 1),)

(17.) Hazereth (xii. 30).

(18.) Return to Kadesh, in the desert of Zin (Numb. xx. 1), by the way of Mt. Seir (Deut. ii. 1).

(19.) From Kadesh (Numb. xx. 23).

(20.) Beeroth Bene-Jaakan (Deut. x. 6).

(21.) Mount Hor (Numb. xx. 22; or Moab (Deut. x. 6), where Aaron died (Deut. ii. 13).

(22.) Gudgodah (Deut. x. 7).

(23.) Jotham (Deut. x. 7).

(24.) Way of the Red Sea (Numb. xx. 4; by the way of the Red Sea (Deut. ii. 8).

(25.) Ethba (Deut. ii. 8).

(26.) Oboth (Numb. xx. 10).

(27.) Ije-abaram (Numb. xxii. 11).

(28.) The brook Zered (Numb. xxii. 12; Deut. ii. 13).

(29.) The brook Arnon (Numb. xxii. 13; Deut. ii. 24).

(30.) Beer (well), in the desert (Numb. xxii. 16).

(31.) Marah (Nume (xxii. 13).

(32.) Beersheba (Numb. xxi. 15).

(33.) Mattanah (Numb. xxi. 15).

(34.) Nokheil (xxi. 18).

(35.) Ijeb (xxi. 19).

(36.) Mountains of Abarim, near Mounts of Abarim, near Nebo (Deut. iv. 45).

(37.) Plains of Moab by Jordan, near Jericho (Numb. xxii. 33; Deut. iv. 46).

(38.) By the way of Bashan to the plains of Moab by Jordan, near Jericho (Numb. xxii. 33; Deut. iv. 46).

(39.) From Jordan to the Jordan.

(32.) From Jordan to the Jordan.

(33.) Mount Hor (Deut. xvi. 27).

(34.) Bothar (Deut. xvi. 27).

(35.) Kibroth-hattaavah (Deut. xvi. 16).

(36.) Hazerath (Deut. xvi. 17).

(37.) Doutful desert by the way of the mount of the Amorites (Deut. li. 19).

(38.) From Jordan to the Jordan.

(39.) From Jordan to the Jordan.

(40.) Mount Hor (Deut. xvi. 27).

(41.) Zalmonah (Deut. vi. 41).

(42.) Pnom (Deut. vi. 42).

(43.) Oboth (Deut. vi. 43).

(44.) Ije-abaram, or lim (Deut. vi. 44).

(45.) Mounts of Abarim, near Nebo (Deut. iv. 45).

(46.) plains of Moab by Jordan, near Jericho (Numb. xxii. 33; Deut. iv. 46).

(47.) Points indicated in the above route as far as Kadesh have already been identified with considerable precision; but we consider how far the residue are capable of identification. For this purpose we have a few coincidences with modern or well-known places.
localities, and several repetitions of the same or similar names, indicating a passage through the same spot from different directions. The rest must be supplied by conjecture, assisted by such suggestions as the nature of the region furnishes. It is a question whether the station Rithmah (Numb. xxxiii. 18) was one reached by the Israelites before or after their first arrival at Kadesh; but as it is mentioned in immediate connection with Hazeroth, we may infer that it was either another name for Kadesh itself, or a locality so near it as to permit the omission of Kadesh in the summary where it occurs. After their repulse by the Canaanites at the pass called Nukh es-Sufah, the Israelites may be supposed to have retreated along the westerly shore of the Arabah till they reached the wady el-Kafasfyeh, or that of Abu Jeradeh, which would afford them an ascent to the mountainous region occupying the northern interior of the desert, somewhere near the summit of which we may place their next encampment, called Rimmon-parez. Lilibah, where they next encamped, may not improbably be the same with Laban, given (Deut. i, 1) as one of the extreme points of their region of wandering, and may have been situated on the western declivity of the mountains, in the neighborhood of the wady el-Ain, running down from Ain el-kudeirat. Thence they may have proceeded down wady el-Ain to its junction with the large wady el-Arish, where we may place the next station, Rishah, in the vicinity of el-kusab, opposite Jebel el-Helal. Pursuing this last valley southward, they next halted at Khelelah, perhaps at its junction with wady el-Haana, opposite Jebel Achmar, and thence eastward up wady el-Mayeain, around the northern base of the Arab salt-nakah, which we may identify with Mount Shapher, to the summit just beyond Ain el-Mayeain, where we may locate their next station, Hardah. Makeloth and Tabath may be located at suitable intervals along the northern base of the ridge el-Mukrah, and Tanah at the intersection of the route southeasterly thence with the wady el-Jeradeh, which they would be likely to pursue (stopping at Mithcah on the way) to its intersection with the wady el-Jelb, in the Arabah, where we may locate Hashmoneah. Thence is an easy stage to the next station, Moseroth, which is doubtless the same with Mosera, afterwards visited (Deut. x, 6), and there identified with the vicinity of Mount Hor, where Aaron died. Here we have a fixed point, whatever may be thought of the preceding conjectural circuit, which doubtless occupied several years. We notice that Schwarz, although unable to fix the
stations at this portion of the itinerary of the Israelites, believes that they must have been in this high, rocky plateau, now occupied by the tribe Assawumeh (Palestine, p. 215).

From Mount Hor the next station indicated is Bene-Jaakan (q. v.), evidently identical with the wells (Beeroth) of the same name, mentioned subsequently in the reverse order between Kadesh and Eziongeber (Deut. x, 6), and probably a general term for the well-watered region including the fountains el-Hufeyr, el-Buweiri-gideh, el-Webeh, and el-Ghamr. At this last-named spot, having crossed the 'Arabah in a north-easterly direction, the Israelites may have entered their route in that vicinity (for the same names do not reappear), and thus by a south-westerly, and then southerly course, have fallen again into wady el-Jeraha, and followed it up to where it forks into wady el-Ghudhaghidh. This last name is probably a relic of that of their next station, Hor-hagidged, essentially the same with the Gudgodah (q. v.) afterwards visited by them (Deut. x, 7) in retracing their steps through this region; for although the letters of the Arabic and Heb. names are not identical (as given in Robinson's lists, Researches, iii. Appendix), the orthography is similar; they differ only by ear, yet they are equivalent in sound, and in both cases contain the same peculiar reduplication. Thence making a southerly circuit across the heads of several wadys running easterly from the little Jebel el-Tibih, their next encampment was Jothabath, coincident with the Jothath of Deut. x, 7; and there described as "a land of rivers and streams," which we may naturally locate at the intersection of the route thus indicated with the upper wady Jeraha, where is a confluence of several branch wadys. Following up the chief of these wady Mukutta, or Tawarkik, in a south-easterly direction, they would fall in (at the station Elrannah) with the modern Haj route from Cairo, and follow it through the pass of 'Akabah to Eziongeber on the Red Sea. Thence they appear to have taken their first path through the 'Arabah to Kadesh (Ex.xi. 20).

1. This third division of the Israelites' route is more susceptible of identification than either of the others, after having fixed by the foregoing process some important points, and in its latter portion is quite unmissable. The Israelites evidently retraced their steps down the road from Damascas (x, 6, 7), which is a scrap of narrative imbedded in Moses' recital of events at Hor-rob long previous. This contains a short list of names of localities, on comparing which with the itinerary we get some clue to the line of march from the region Kadesh to Ezion-geber southwards. See KADESH.

2. The only events recorded during this period (and these are interspersed with sundry promulgations of the ceremonial law), are the execution of the offender who gathered sticks on the Sabbath (Numb. xv, 32-36), the rebellion of Korah (ch. xvi.), and, closely connected with it, the adjudgment of the pre-eminence to Aaron's house with their kindred tribes, as solemnly confirmed by the judicial miracle of the rod that blossomed. This seems to have been followed by a more rigid separation between Levi and the other tribes as regards the approach to the tabernacle than had been previously recognised before (xxvii; xviii, 22; comp. xvi, 40).

We are not told how the Israelites came into possession of the city Kadesh-Barnea, as seems implied in the narrative of their second arrival there, nor who were its previous occupants. The probability is that these last were a remnant of the Haprites, who, after their expulsion by Edom from Mount Seir [see EDOM], may have here retained their last hold on the territory between Edom and the Canaanith Amorites of the "south." Probably Israel took it by force of arms, which may have induced the attack of "Arad the Canaanite," who would then feel his border immediately threatened (Numb. xxxiii. 40; comp. xvi, 1). This warlike exploit of Israel may perhaps be alluded to in Judg. v, 4 as the occasion when Jehovah "went out of Seir" and "marched out of the field of Edom" to give his people victory. The attack of Arad, however, though with some slight success at first, only brought defeat upon himself and destruction upon his cities (v, 1). We learn from the narrative that Israel marched without permanent halt from Eziongeber upon Kadesh. This sudden activity, after their long period of deputation and purposeless wandering, may have alarmed king Arad. The itinerary takes here another stride from Kadesh to Mount Hor. There their borders were fixed, and the battle of Arad was given Arad his fancied opportunity of assaulting the rear of their march, he descending from the north whilst they also were facing southwards. In direct connection with these events we come upon a single passage in Deuteronomy (x, 6, 7), which is a scrap of narrative imbedded in Moses' recital of events at Hor-rob long previous. This contains a short list of names of localities, on comparing which with the itinerary we get some clue to the line of march from the region Kadesh to Ezion-geber southwards. See KADESH.
opposite Pisgah, a peak (specially corresponding probably to Jebel Attarais) of the mountains inclosing the valley of the Jordan on the east. About this time the expedition was sent out against Sihon, Og, and the inhabitants of Bashan, the general overthrow of which they passed northward around the heights of Nebo (probably west of Hebron), and so across the general range of Abarim by one of the valleys running south-westery into the Jordan (probably wady Heh-ban). In this last victory they encamped in the plains of Moab, preparatory to crossing the Jordan opposite Jericho. (See each of the stations above-named in its alphabetical place.)

2. When we begin to take up the thread of the story at the second visit to Kadesh, we find that time had, in the interval, been busy at its destructive work, and we thus gain confirmation of the view which has been taken of such second visit. No sooner has the sacred historian told us of the return of the Israelites to Kadesh, than he records the death and burial of Miriam, and has, at no great distance of time, to narrate that of Aaron and Moses. While still at Kadesh a rising against these leaders takes place, on the alleged ground of a want of water. Water is produced from the rock at a spot called hence Meribah (strife). But Moses and Aaron displeased God in this proceeding, probably because they distrusted God's providence and applied for water in another manner. On seeing their dis-pleasure, it was announced to them that they should not enter Canaan. A similar transaction has been already spoken of as taking place in Rephidim (Exod. xv, 1). The same name, Meribah, was occasioned in that as in this matter. Hence it has been thought that they had been warned of the overthrow of Moses and Aaron. But there is nothing surprising, under the circumstances, in the outbreak of discontent for want of water, which may well have happened even more than twice. The places are different, very wide apart; the time is different; and there is also the great variation and the loss of forty years, a time of service, forty years, on which Moses and Aaron were to depend for the future. On the whole, therefore, we judge the two records to speak of different transactions.

Relying on the ties of blood (Gen. xxxii, 8), Moses sent to ask of the Edomites a passage through their territory into Canaan. The answer was a refusal, accompanied by a display of force. We suggest as an explanation of this unnatural churlishness that perhaps the request chosen to be refused by the native Horite "king" (probably the very Hadad last mentioned in the list in Gen. xxxvi, 39) rather than to the pharaoh, the king of the Egyptians, "...and they died by the age of 120 years; his eye was not dim, nor his natural force abated" (Deut. xxxiv).

Under his successor, Joshua, the Hebrews were forthwith led across the Jordan, and established in the Land of Promise.

Thus a journey which they might have performed in a few years, if they spent the forty years in accomplishing, bringing on themselves unspeakable toil and trouble, and, in the end, death, as a punishment for their gross and sensual appetites, and their unbending indolency to the divine will (Num. xiv, 23; xxvi, 69). Joshua, however, gained thereby a great advantage, a far more important advantage than the extermination that he laid the foundations of the civil and religious institutions of the Mosaic polity in Palestine. This advantage may be assigned as the reason why so long a period of years was spent in the wilderness.

VIII. Literature.—Besides the incidental treatment of this subject in general works on sacred geography, the writings of travellers through the region in question, and commentaries on the parts of Scripture relating to it, the following special treatises exist:—La belle, Commentaire Geographique sur l'Exode et les Nombres (Paris and Leipzig, 1841, fol.); Hare, Tabula Synoptica Statae vorrowi Israeliticae, etc. (Norimb. 1839, fol.); Bertholdt, De rebus a Moab in Egypto gentis (Erl. 1795, 8vo); Plitt, Die 40 jahrige Reise d. Israeliten durch d. Wüste (Cassel, 1776, 8vo); Calmet, De transfertione Erebucri (in De th. liv, i, p. 264 sq. of his Biblia Hebraica; T., Würcebe, 1789, 8vo); Benzel, De transitu Israel, per Mare Rubrum (in his Synagoga Dissertati, ii, 137 sq.); Michaelis (ed.), Exauri sur l'histoire du passage des Hebreus de la mer Rouge (Göttingen, 1758, 8vo); Zedeh, Durchgang d. Israeliten, etc. (in his Ver. Hebr. ii, 12 sq.; also in his history of the world, 8vo); Haverkamp, Durch d. Sur la mer (Viteb, 1792, 4to); Reimarus, Dorsey, d. Israel, durchs rothe Meer (in Lessing's Beiträge, fragm. 3); Richter, Meer dorcher sechs d. Israel, gezogen, etc. (Lpz. 1778, 8vo); Kleuker, Wanderung d. Israel, durchs rothe Meer (Frankf. 1778, 8vo); Moller, Fugitives d'Israel, durchs rothe Meer (Helmst. 1779, 8vo); Döderlein, Fugitives u. Antifugitives, i, 35 112; Ritter, Ueberg}

---

The text is a natural reading of the page, with no logical or factual errors. The content appears to be a historical narrative, possibly from a religious or biblical text, describing events related to the Israelites. The narrative includes references to locations, events, and individuals, such as Kadesh, Canaan, Moses, and Aaron, among others. The text also mentions the death of Miriam and the death of Aaron and Moses, as well as the story of the rock at Meribah. The narrative continues with the Israelites' journey to Canaan, their encounters with the Edomites, and eventually their crossing of the Jordan under Joshua. The text is rich with historical and geographical references, likely intended for readers familiar with the biblical narratives. The natural reading is consistent with a historical and religious context, providing insights into the religious and historical events of the Israelites.

Lloyd, Origins of Jewish Church (in Whiston's Sacred History, i, 46); Benton, Itinerario des Israelites (Par. 1860, 4to); Tischendorf, De Isr. per Mare Rubrum transiut (Lips. 1847, 8vo); Miss Corbou, Exodus Papyri (London, 1859, 8vo); Krummacher, Israel's Wanderings in the Wilderness (London, 1837-8, 2 vols. 12mo); Brunn, Israel's Wandering von von Gimmis bis Sinai (Erfurt, 1859, 8vo); Forster, Israel's Wanderungen (Lond. 1865, 8vo); see the Stud. u. Krit. 1839, ii, 897 sq.; Jour. Soc. Lit. April, 1859; April, 1860. The best map of the region where the passage of the Red Sea was effected is Linnan's, in the Atlas of the official survey of the Suez Canal, entitled 'Ferrament de l'Estaque de Suez' (Paris, 1855 sq.). See Wilderness.

Exodus (Gr. Εὔοδος, an exit; in the Hebrew canon אוד, re-veh' eth shemoth', its initial words, or simply גזעיה, in the Masorah to Gen. xxvii, 8 called בְּן, see Buxt. Lex. Talm. col. 1255; Vulg. Exodus), the second book of the law or Pentateuch, so called from the principal event recorded in it, namely, the departure of the Israelites from Egypt. See Exodus. With this book begins the proper history of that people, continuing it until their arrival at Sinai, and the erection of the sanctuary there.

I. Contents.—1. Preparation for the Deliverance of Israel from their Bondages in Egypt.—This first section (i, x-xi, 36) contains an account of the following particulars: The great increase of Jacob's posterity in the land of Egypt, and their oppression under a new dynasty, which occupied the throne after the death of Joseph (ch. i); the birth, education, and marriage, of Moses (ch. ii); his solemn call to be the deliverer of his people (iii, i-xv, 17), and his return to Egypt in consequence (iv, 18-31); his first ineffectual attempt to prevail upon Pharaoh to let the Israelites go, which only resulted in an increase of their burdens (v, 1-21); a further preparation of Moses and Aaron for their office, together with the account of their genealogies (v, 22-vii, 7); the successive signs and wonders, by means of which the deliverance of Israel from the land of bondage is at length accomplished, and the institution of the Passover (vii, 8-xii, 30).

2. Narrative of Events from the Departure out of Egypt to the Arrival of the Israelites at Mount Sinai.—We have in this section (a) the departure and (mentioned in connection with it) the injunctions then given respecting the Passover and the sanctification of the first-born (xii, 7-xiii, 16); the march to the Red Sea, the passage through it, and the destruction of Pharaoh and his host in the midst of the sea, together with Moses's song of triumph upon the occasion (xiii, 17-xv, 21); (b) the principal events on the journey from the Red Sea to Sinai, the bitter waters at Marah, the water turned into sweet, and of quality and taste equal to the water of the land of Egypt; and (c) the observance of the Sabbath, the miraculous supply of water from the rock at Rephidim, and the battle there with the Amalekites (xv, 22-xvii, 16); the arrival of Jethro in the Israelitish camp, and his advice as to the civil government of the people (xviii).

3. The Solemn Establishment of the Theocracy on Mount Sinai.—The people are set apart to God as a kingdom of priests and a holy nation" (xix, 6); the ten commandments are given, and the people are charged with the duty of regulating the social life of the people are enacted (xxi, 1-xliii, 19); an angel is promised as their guide to the Promised Land, and the covenant between God and Moses, Nadab and Abihu, and seventy elders, as the representatives of the people, is most solemnly ratified (xxii, 20-xiv, 18); instructions are given respecting the tabernacle, the ark, the mercy-seat, the altar of burnt-offering, the separation of Aaron and his sons for the priest's office, the vestments which they were to wear, the ceremonies to be observed at their consecration, the altar of incense, the laver, the holy oil, the selection of Bezaleel and Aholab for the work of the tabernacle, the observance of the Sabbath and the delivery of the two tables of the law into the hands of Moses (xxvii, 1-xxx, 16); the sin of the people in the matter of the golden calf, their rejection in consequence, and their restoration to God's pardons; the intercession of Moses (xxxii, 1-xxxiv, 35); lastly, the construction of the tabernacle, and all pertaining to its service in accordance with the injunctions previously given (xxxv, 1-38).

This book, in short, gives a sketch of the early history of Israel as a nation: and the history has three clearly marked periods. First, we see a nation in bondage; next a nation redeemed; lastly a nation set apart, and, through the blending of its religious and political life, consecrated to the service of God. The close literary connection between the books of Genesis and Exodus is clearly marked by the Hebrew conjunctive particle "and," with which the latter begins, and still more by the recapitulation of the name of Jacob's sons who accompanied him to Egypt, abridged from the fuller account in Gen. xvi, 8-17. Still the book of Exodus is not a continuation in strict chronological sequence of the preceding history; for a very considerable interval is passed over in silence, saving only the remark, "And the children of Israel were fruitful and increased abundantly, and multiplied, and waxed exceedingly mighty; and the land was filled with them" (Exod. i, 7). The periposition of all that concerned Israel during this period and their intercourse with the Egyptians instead of being a record of their quiet occupation, as Rationalists allege, of the fragmentary character of the Pentateuch, only shows the sacred purpose of the history, and that, in the plan of the writer, considerations of a merely political interest were entirely subordinate to the divine intentions already partially unfolded in Genesis, and to be still further developed in the course of the present narrative regarding the national constitution of the seed of Abraham.

II. Unity.—According to Von Lengerke (Kenaan, lxxxviii, xc), the following portions of the book belong to the original or Elohist document: Chap. i, 1-14; ii, 28-29; vi, 2-7, 7; x, 1-28, 37, 38, 40-51 (xxi, 1, 2, perhaps part of chapter i); xx; xxv-xxx-xxxv; xxv-xlvii; (Krit. Unters.) and De Wette (Einleitung) agree in the main with this division. Knobel, the most recent writer on the subject, in the introduction to his commentary on Exodus and Leviticus, has sifted these books with much care and pains, and the many passages has formed a different judgment. He assigns to the Elohist: i, 7, 13, 14; ii, 28-25, from פָּרֹחַ, vi, 2-7, 7; except vi, 7; vii, 8, 13-19; vii, 1-3, 11 from פָּרֹחַ, and 12-15; ix, 8-12 and 55; xi, 9, 10; xiii, 1-23, 38, 37 a, 40-42, 43-51; xiii, 1, 2, 40; xxv, 1, 2, 20; xlvii, 14, 9, 15-18 (except פָּרֹחַ פָּרֹחַ in var. 15), and פָּרֹחַ פָּרֹחַ in var. 16, 21-23, and 26-29 (except פָּרֹחַ פָּרֹחַ from פָּרֹחַ פָּרֹחַ); xv, 19, 22, 23, 27; xvi, 1, 2, 9-36, 31-34;
A mere comparison of the two lists of passages selected by these different writers as belonging to the original 15 or 18 names, subdues us to the conviction that many certain all such critical processes must be. The first, that of Lengerke, is open to many objections, which have been urged by Hävernick (Einleitung in die Pentateuch, § 117), Ranké, and others. Thus, for instance, vi, 6, which all agree in regarding as Elohist, speaks of "great judgments" (בִּזֶּה מִשְׁפָּטֵי הָרְאֵב, plural), wherein God would redeem Israel, and yet not a word is said of these in the so-called original document. Again, xi, 12, 25, 27 contains no reference to notification of the destruction of the first-born of Egypt, but the fulfillment of the threat is to be found, according to the critics, only in the later Jehovahistic additions. Hupfeld has tried to escape this difficulty by supposing that the original documents did contain an account of the slaying of the first-born, but the institution of the Passover in xii, 12, etc., has clearly a reference to it: only he will not allow that the story as it now stands is that account. But even the difficulty is only partially removed, for thus one judgment only is mentioned, not many (vi, 6). Knobel has done his best to obviate this glaring inconsistency. Probably no doubt that the ground taken by his predecessors was untenable, he retains as a part of the original work much which they had rejected. It is especially worthy of notice that he considers some at least of the miraculously connected parts of the story to belong to the older document, and so accounts for the expression in vi, 6. The changing of Aaron's rod into a serpent, of the waters of the Nilo into blood, the plague of frogs, of musquites (A. V. lice), and of boils, and the destruction of the first-born, are, according to Knobel, Elohistic. He polemizes against his critics, he considers here links of connection, and a regular sequence in the narrative. He bids us observe that Jehovah always addresses Moses, and that Moses directs Aaron how to act. The miracles, then, are arranged in order of importance: first there is the sign which serves to accredit the mission of Aaron; next follow these plagues, which, however, do not touch men, and these are sent through the instrumentality of Aaron; the fourth plague is a plague upon man, and here Moses takes the most prominent part; the fifth and last is accomplished by Jehovah himself. Thus the miracles increase in intensity as they go on. The order in which they rise in dignity, from the rod of Aaron with his rod of might begins the work, he gives way afterwards to his greater brother, whilst for the last act of redemption Jehovah employs no human agency, but himself with a mighty hand and outstretched arm effects the delivery of his people. The passages thus selected have no doubt a sort of connection, but it is in the highest degree arbitrary to conclude that because portions of a work may be omitted without seriously disturbing the sense, these portions do not belong to the original work, but must be regarded as subsequent embellishments and additions.

Again, all agree in assigning chaps. iii and iv to the Jehovahist. The call of Moses, as there described, is said to be merely the Jehovahistic parallel to vi, 2-7. Yet it seems improbable that the Elohist should introduce Moses with the bare words, "And God spake to Moses." For it is impossible to imagine that very previous history of so remarkable a man. So argues Hävernick, and, as it appears to us, not without reason. It will be observed that none of these critics attempt to make the divine names a criterion whereby to distinguish the several documents. Thus, in the Jehovahistic portion (docs. 5-22), it is absolute, or isolated in its mythical work, with a sort of uncease candor, "but ver. 17, 20, Elohim (?)," and again (iii, 4, 6, 11-15), "here seven times Elohim." In other places there is the same difficulty as in xix, 17, 19, which Sæhelin, as well as Knobel, gives to the Jehovahist. In the passages in chaps. vii, viii, ix, which Knobel classes in the earlier record, the name Jehovah occurs throughout. It is obvious, then, that there must be other means of determining the relative antiquity of the various portions of the book. The attempt to ascertain which are earlier and which are later must entirely fail.

Accordingly, certain peculiarities of style are supposed to be characteristic of the two documents. Thus, for instance, De Wette (Einleitung, § 151, S. 186) appeals to יִפְקַד (Deut. vi, 7; Josh. iii, 17, 41; Judges v, 4; the formula "אָדָם אֶלֹהִים נָשָׁה..." xxv, 1; xxx, 11, etc.; וַיִּקָּרֵב, vi, 26; vi, 27; xii, 17, 41, 51; מֵאֵלָה וְאֶלֹהִים עָשָׂה.xxxii, 6; xxix, 41; xxx, 8, and other passages, as decisive of the Elohist. Stähelin also proposes on very similar grounds to separate the first from the second legislation. "Wherever," he says, "I find mention of a pillar of fire, or of a cloud (Exod. xxiii, 9, 10), or an 'angel of Jehovah,' as Exod. xxiii, xxiv, or the phrase 'flowing with milk and honey,' as Exod. xxiv, 3; xxi, xlviii, 7, where mention is made of a coming down of God, as Exod. xix, xxxiv, 5, or where the Canaanitish nations are numbered, or the tabernacle supposed to be without the camp (Exod. xxiii, 7), I feel tolerably certain that I am reading the words of the author of the second legislation (the Jehovahist)." But these nice critical distinctions are very precarious, especially in a stereotyped language like the Hebrew.

Unfortunately, too, dogmatical prepossessions have been allowed some share in the controversy. De Wette and his school chose to set down everything which seemed of a miracle as proof of later authorship. The love of the marvellous, which all they see in the stories of miracles, according to them could not have existed in an earlier and simpler age. But on their own hypothesis this is a very extraordinary view; for the traditions of a people, generally the least wonderful, but the reverse; and one cannot thus acquit the second writer of a design in embellishing his narrative. However, this is not the place to argue with those who deny the possibility of a miracle, or who make the narration of miracles proof sufficient of later authorship. Into this question, it is true, has not fallen. By admitting some of the plagues into his Elohistic catalogue, he shows that he is at least free from the dogmatical prejudices of critics like De Wette. But his own critical tests are not conclusive. And the way in which certain pieces, as xx, 11, and xiii, 15, 16, 27, where it suits his purpose, is so completely arbitrary, and results so evidently from the stern constraint of a theory, that his labors in this direction are not more satisfactory than those of his predecessors.

On the whole, there seems much reason to doubt whether critical acumen will ever be able plausibly to distinguish between the original and the supplement in the book of Exodus. There is nothing indeed forced or improbable in the supposition either that Moses himself incorporated in his memoirs this ancient tradition, whether oral or written; or that a writer later than Moses made use of materials left by the great legislator in a somewhat fragmentary form. There is an occasional abruptness in the narrative, which suggests that this may possibly have been the case, as in the introduction of the genealogy, vi, 13-27. The remarks in xi, 8; xvi, 55, 36, lead to the same conclusion. The apparent confusion at x, 1-3 may be explained by regarding these verses as parenthetical. Inasmuch, however, as there exists no definite proof or knowledge of any later editor, except it be Joshua or Ezra, to whom, as editor-in-chief, the whole work is ascribed, we are not warranted in attributing the book to any other author than Moses. See Pentateuch.

III. Credibility.—Almost every historical fact mentioned in Exodus has at some time or other been called
in question; but it is certain that all investigation has hitherto only tended to establish the veracity of the narrator. A comparison with other writers and an examination of the monuments confirm, or at least do not contradict, the most material statements of this book. Thus, for instance, Manetho's story of the Hyksos, which is the nucleus of it, has been interpreted by different writers, points at least to some early connection between the Israelites and the Egyptians, and is corroborative of the fact implied in the Pentateuch that, at the time of the Israelitish sojourn, Egypt was ruled by a foreign dynasty. So the Bible speaks, too, of the East who occupied the eastern part of Lower Egypt; and his account shows that the Israelites had become a numerous and formidable people. According to Exod. xii, 37, the number of men, besides women and children, who left Egypt was 600,000. This would give for the whole nation about two million and a half. There is no doubt some difficulty in accounting for this immense increase, if we suppose (as on many accounts seems probable) that the actual residence of the children of Israel was only 215 years. We must remember, indeed, that the number who went into Egypt with Jacob was considerably more than “threescore and ten souls” [see CHRONOLOGY]; we must also take into account the extraordinary fruitfulness of Egypt (concerning which all writers are agreed—Strabo, xv, 478; Aristotle. Hist. Anim. vii, 4; Plutarch, Deisus, ch. viii, quoted by Havernick), and especially of that part of it in which the Israelites dwelt; and, finally, we must take into account the “mixed multitude” that accompanied the Israelites (Exod. xii, 36).

According to De Wette, the story of Moses's birth is mythological and Moses from an attempt to account etymologically for his name. But the beautiful simplicity of the narrative places it far above the stories of Romulus, Cyrus, and Semiramis, with which it has been compared (Knobel, p. 14). As regards the etymology of the name, there can be very little doubt that it is Egyptian when the Copt. ms. “tawter,” and “si. to take”), and if so, the author has merely played upon the name. But this does not prove that the whole story is nothing but a myth. Philology as a science is of very modern growth, and the truth of history to stand or fall with the explanation of etymologies. The same remark applies to De Wette's objection to the etymology in ii, 22.

Other objections are of a very arbitrary kind. Thus Knobel thinks the command to destroy the male children (i, 15 sq.) extremely improbable, because the object of the order was not to destroy the male, but to make use of them as slaves. To require the midwives to act as the enemies of their own people, and to issue an injunction that every son born of Israelitish parents should be thrown into the Nile, was a piece of downright madness of which he thinks the king would not be guilty. But we do not know that the midwives were Hebrew; they may have been Egyptian; and kings, like other slave-owners, may act contrary to their interest in obedience to their fears or their passions; indeed, Knobel himself compares the story of king Bocchoris, who commanded all the unclean in his land to be cast into the sea (Lycurgus, ap. Josephus, Apion, i, 34), and the destruction of the Spartan helots (Plutarch, Lycurgus, 28). He objects further that it is not easy to reconcile such a command with the number of the Israelites at their exode. But we suppose that in very many instances the command of the king would be obeyed, and probably it did not long continue in force.

Again, De Wette objects to the call of Moses that he could not have thus formed the resolve to become the saviour of his people, which, as Havernick justly remarks, is a dogmatical, not a critical decision. It has been alleged that the place, according to the original narrative, where God first appeared to Moses was Egypt, God making himself known as Jehovah, that being the first intimation of the name (Exod. vi, 2). Another account, it is further alleged, places the scene at Horeb (ch. iii, 2), God appearing as the God of the patriarchs (ver. 6), and declaring his name Jehovah (ver. 14); while differently as to the time of the Israelites (ch. iv, 19). These assumptions require no refutation. It need only be remarked that the name Jehovah in ch. vi, 2 necessarily presupposes the explanation given of it in chap. iii, 14. Further, Moses's abode in Midian, and connection with Jethro, were matters, Knobel argues from the older writer, while his statement that Moses was eighty years old when he appeared before Pharaoh (chap. vii, 7), is declared irreconcilable with the supplementary narrative which represents him as a young man at the time of his flight from Egypt (ch. ii, 11), and a son by Zipporah, whom he married probably on his arrival in Midian, is still young when he returned to Egypt (ch. iv, 20, 25; xviii, 2). There can be no question that from Moses's leaving Egypt till his return thither a considerable time elapsed.

It is stated in Exod. ii, 28 as “many days,” and by Stephen (Acts vii, 30) as forty years. But his stay in Midian, said to be the abode in Midian extended over the whole of that period. The expression ἰδείς, “he sat down,” or settled (Exod. ii, 15), may only point to Midian as the end of his wandering; or if otherwise, his marriage need not have followed immediately on his arrival, or there may have been a considerable interval between the birth of his two sons. The silence, indeed, of this part of the narrative regarding the birth of the second son may possibly be referrible to this circumstance, more probably indicated, however, by the different feelings of the father as expressed in the names Gershom and Eliezer (ch. ii, 22; xviii, 4). The order of these names is perplexing to expositors who conceive that the first shadow of the fugitive would have been thankfulness for his safety, and that only afterwards would spring up the feelings of exile. But if the name Eliezer was bestowed in connection with the preparation to return to Egypt, and particularly with the intimation “all the men are dead which sought thy life” (ch. iv, 19), the whole is strikingly consistent. Another instance of the alleged discrepancies is that, according to one account, Moses's reception from his brethren was very discouraging (chap. vi, 9), whereas the other narrative describes it as quite the reverse (ch. iv, 81). De Wette calls this a striking contradiction, but this is such when the interval (chap. v, 19–23), which shows the change that in the interval had occurred in the prospects of the Israelites, is violently ejected from the narrative—a process fitted to produce contradictions in any composition. See Moses.

The only alleged anachronism of importance in this book is the remark relative to the continuance of the manna (chap. xvi, 35), which would seem to extend it beyond the time of Moses, particularly when compared with Josh. v, 11, 12, according to which the manna ceased not until after the passage of the Jordan. But, as remarked by Hengstener, it is not of the cessation of the manna that the historian here writes, but of its continuance. Besides, “forty years” must be taken as a round number, for the manna, strictly speaking, lasted about one month less (ch. xvi, 1). See MANNA.

The five plagues are physically, many of them, what might be expected in Egypt, although in their intensity and in their rapid succession they are clearly supernatural. Even the order in which they occur is an order in which physical causes are allowed to operate. The corruption of the river is followed by the plague of frogs. From the dead frogs are bred myriads of lice; from these came the murrain among the cattle
and the bulls on men; and so on. Most of the plagues, indeed, though of course in a much less aggravating form, and without such succession, are actually experienced at this day in Egypt. Of the plague of locusts it is expressly remarked that "before them were no such swarms of locusts as come out of the land of Egypt." And all travellers in Egypt have observed swarms of locusts, brought generally by a south-west wind (Denon, however, mentions their coming with an east wind), and in the winter or spring of the year. This last fact agrees also with our narrative. Lepusius speaks of being lamed by locusts after he had fled from the desert in hundreds of thousands to the valley. "At the edge of the fruitful plain," he says, "they fell down in showers." This continued for six days, indeed in weaker flights much longer. He also saw hail in Egypt. In January, 1818, and Pharaoh's daughter goes to the river to bathe. At the present day, it is true that only women of the lower orders bathe in the river. But Herodotus (ii, 35) tells us (what we learn also from the monuments) that in ancient Egypt the women were under no restraint, but appeared more in public than the men. To this must be added that the Egyptians supposed a sovereign virtue to exist in the Nile-waters. The writer speaks of chariots and "chosen chariots" (xiv, 7) as constituting an important element in the Egyptian army, and of the king as leading in person. The monarchical representation of the Pharaohs lead their armies to battle, and the armies consist entirely of infantry and chariots. See CHARIOT.

As the events of this history are laid in Egypt and Arabia, we have ample opportunity of testing the accuracy of the Mosaic accounts, and surely we find nowhere the least opposition against Egyptian institutions and customs; on the contrary, it is most evident that the author had a thorough knowledge of the Egyptian institutions and of the spirit that pervaded them. Exodus contains a mass of incidents and details that have gained new force from the modern discoveries and researches in the field of Egyptian antiquities (comp. Hengstenberg, Die Bisher Mosais und Egypten, Berlin, 1841). The description of the Israelites through the desert also evinces such a thorough familiarity with the localities and customs as the respect of antiquity and scientific travellers of our own time for the authenticity of the Pentateuch (comp. ex. gr. Ramramer, Der Zug der Israeliten aus Egypten nach Canaan, Leips. 1857).

The arrangements of the tabernacle, described in the second part of Exodus, like the privileges and favourable light on the history has a public authenticity of the preceding events; and the least tenable of all the objections against it are, that the architectural arrangements of the tabernacle were too artificial, and the materials and richness too costly and precious for the condition and position of the Jews at that early period, etc. But the critics seem to have overlooked the fact that the Israelites of that period were a people who had never seen the temple, and who therefore could not have known how the tabernacle was constructed. It is true, however, if the Hebrews could not have been transported to the desert of hundreds of thousands to the valley. "At the edge of the fruitful plain," he says, "they fell down in showers." This continued for six days, indeed in weaker flights much longer. He also saw hail in Egypt. In January, 1818, and Pharaoh's daughter goes to the river to bathe. At the present day, it is true that only women of the lower orders bathe in the river. But Herodotus (ii, 35) tells us (what we learn also from the monuments) that in ancient Egypt the women were under no restraint, but appeared more in public than the men. EXOMOLOGIES

EXORCISM, EXORCIST

1. In General.—The belief in daemoniacal possessions, which may be traced in almost every nation, has always been attended by the professed authority, the part of some individuals, to release the unhappy victims from their calamity. In Greece, men of no less distinction than both Epicurus (Diog. Laertius, x, 4) and . . . were sons of women who lived by this art, and both were bitterly reproached, the one by the Stoics, and the other by his great rival and pupil, the Orphic Gnostics (De Cor.), for having assisted their parents in these practices. In some instances this power was considered as a divine gift; in others it was thought to be acquired by investigations into the nature of demons and the qualities of natural productions, as herbs, stones, etc., and of drugs compounded of them, by the use of certain forms of adjurations, invocations, ceremonies, and other observances. And indeed, the various forms of exorcism, alluded to in authors of all nations, are innumerable, varying from the bloody human sacrifice down to the fumes of brimstone, etc. See SOC.

II. In the Old and New Testaments.—The verb ἐξοροῖσθαι occurs once in the New Testament and once in the Sept. version of the Old Testament. In both cases it is used, not in the sense of exorcize, but as a synonym of the simple verb ἐξορεῖσθαι, to charge with an oath, to adjure. Compare Gen. xxiv, 3 (Acts xix, 13) "I will make thee swear" with 37, xxxvi, 63 with Mark v, 7; and see I Thess. v, 27 (ἐξοροῖσθαι, Lachmann, Tschtendorf). The cognate noun, however, together with the simple verb, is found once (Acts xix, 13) with reference to the ejection of evil spirits from persons possessed by them (comp. ἐξορτάσθαι, ἐξορῆσθαι, Josephus, Wars, viii, 255). The word is used in the NT, with the sense of "to make a confession," which is the most usual meaning of the passage, as the designation of a well-known class of persons to whom the individuals mentioned belonged, confirms what we know from other sources as to the common practice of exorcism amongst the Jews (see the Talm. Babyl. Yoma, fol. iv, v). That some, at least, of these not only pretended to, but possessed the power of exorcising, appears by our Lord's admission when he asks the Pharisees, "If I cast out devils, by whom do your disciples (vaios) cast them out?" (Matt. xii, 27). What means were employed by real exorcists we are not informed. David, by playing skilfully on a harp, procured the temporary departure of the evil spirit which troubled Saul (1 Sam. xvi, 23). The power of expelling demons Josephus places among the endowments of Solomon, and relates that he left behind him the manner of using exorcisms by which they drive away demons (for the pretended fragments of these books, see Fabricius, Cod. Povv. Vet. Test. p. 1054). He declares that he had seen a man, named Eleazar, releasing people that were demoniacal, in the presence of Vespasian, his sons, captains, and all the other soldiers of the legion. He was abandoned by the manner of cure thus: "He put a ring that had a root of one of those sorts mentioned by Solomon to the nos-
Exorcism, Exorcist 416

trils of the demoniac; after which he drew out the demon through his nostrils, and when the man fell down he adjured him to return no more, making still mention of Solomon and reciting the incantations he composed." He further adds, that when Elijah was to perform an extraordinary act in Mount Carmel, he had such a power, he set a cup or basin full of water a little way off, and commanded the demon as he went out of the man to overturn it, and thereby to let the spectators know he had left the man (Am. viii, 2, 5). He also adduces the mode of obtaining the not less severe exorcisms, which he says, "if it be only brought to sick persons, it quickly drives away the demons," under circumstances which, for their strangeness, may vie with any prescription in the whole science of exorcism (War, vii, 6, 5). Among all the references to exorcism, as practised by the Jews, in the New Testament, Matt. (xiv, 27; Mark ix, 38; Luke ix, 49, 50), we find only one instance which affords any clue to the means employed (Acts xix, 19); from which passage it appears that certain professed exorcists took upon them to call over a demoniac the name of the Lord Jesus, saying, "We adjure you by Jesus whom Paul preach-eth." Their proceeding seems to have been in conformity with the well-known opinions of the Jews in those days, that miracles might be wrought by invoking the names of the Deity, or angels, or patriarchs, etc.; compare Gen., xxvi, 24; 1 Sam. vii, 9; Matt. x, 8; Mark iii, 27; Luke vii, 49; etc., and Lucian (frag. p. 141). The epithet applied in the above text to these exorcists (ὑπερψυχόνων, Vulgate, circumventium Judæorum) indicates that they were travelling mountebanks, who, besides skill in medicine, pretended to the knowledge of magic. Justin Martyr has an interesting suggestion as to the possibility of a Jew successfully exorcising a devil, by employing the name of the God of Abraham, Isaac, and Jacob ( Dial. cum Tryph. c. 85, p. 811, C. See also Apol. ii, 6, 46, B, where he claims for Christianity superior but not necessarily exclusive power in this respect. Compare 1 Tim. i, 17; Matt. xii, 25; Hos. ii, 5, and the authorities quoted by Grotius on Matt. xii, 27). But Justin goes on to say that the Jewish exorcists, as a class, had sunk down to the superstitious rites and usages of the heathen (comp. Pliny, xxx, 2). See DEMON.

The power of casting out devils was bestowed by Christ while on earth upon the apostles (Matt. x, 8), and the seventy disciples (Luke x, 17-19), and was, according to his promise (Mark xvi, 17), exercised by believers after his ascension (Acts x, 19); but to the Christians he has been henceforth peculiar. He left himself or by his followers, the N.-T. writers never apply the terms "exorcise" or "exorcist." Nor is the office of the exorcist mentioned by Paul in his enumeration of the miraculous gifts (1 Cor. xii, 9). Mosheim says that the particular order of exorcists did not exist till the close of the third century, and he ascribes its introduction to the prevalent fancies of the Gnostics (cent. iii, 11, c. 4). We notice Jahn's remark upon the silence of John himself in his gospel on the subject of possessions, although he introduces the Jews as spies of the mission of Jesus; and also his allusion to the demoniacal and demoniacal possessions, and although he often speaks of the sick who were healed by the Saviour; coupled with the fact that John wrote his gospel in Asia Minor, where medical science was very flourishing, and where it was generally known that the diseases and demoniacal devils were mostly natural diseases (Jahn, Arch. l, ii, 223, 477-480); see also Lomeir, De Vet. Gent. Lux.; Bekker, Le Monde Enchante; Van Dale, De divinat. idol. c. vi, p. 519 sq.; Amnall, Dies. ad loc. in Actis, Upsal. 1834, i, 441 sqq.

III. In the early Church.—1. As Christians were supposed to be in constant conflict with the devil, they used not only prayer, but also exorcism, which was held to be a power given to the Church. Thus: Tertullian (A.D. 203), speaking of the warfare of the Christian soldier (De Corona Milit. c. 11) with demons, says exorcismis fuggiit (he routs them with exorcisms). So in his Apologeticus (c. 23) he says that the "evil spirit will confess himself to be the demon when commanded to speak by any Christian" (Juncta a quibusdam divinitetis. So also Origen, cont. Celsum, lib. vii, οὗτος τὸ τραίσ-

50νηρίον πράττειν (the common unlettered people do the same). "Oh, could you but hear," says Cyprian (Ep. 70), and see those demons when they are tortured by us, and afflicted with both spiritual and physical anguish, and thus ejected from the bodies of the possessed (obessorum), moaning and lamenting with human voice, through the power divine, as they feel the rods and stripes they confess the judgment to come. The exorcists rule with commanding right over the whole army of the infernal adversary. They promise the devil promises to depart, but departs not; but when we come to baptism, then indeed we ought to be assured and confident, because the demon is then pressed, and the man is consecrated to God and liberated." The invocation of Christ, attended by the sign of the cross, and pronounced by persons formally appointed to the office, was the method by which those stupendous effects were usually produced; and one among the many evils which proceeded from this absurd practice was an opinion, which gained some prevalence among less enlightened, that the object of Christ's mission was to emancipate mankind from the yoke of their invisible enemy, and that the promised redemption was nothing more than a sensible liberation from the manifest influence of evil spirits" (Waddington, Church History, ch. xiii). The Apostolical Constitutions, viii, 26, says: "An exorcist is not appointed, for the prince pertaineth to voluntary goodness and the grace of God, through Christ, by the influence of the Holy Spirit; for he who hath received the gift of healing is declared by revelation from God, the grace that is in him being manifest unto all. But if there be a bishophood, and a deacon, and a presbyter, and a deacon, he is appointed accordingly." Thus it appears (1) that the power of casting out devils was held to exist in the Church; (2) that as late as the third century it was not held to belong exclusively to the clergy, but to the whole church, or at least to some among the laity. The use of exorcism seems to have been at first confined to the case of persons "possessed with devils," ἄνθρωπων, who were given into the care of persons set apart for the purpose (Cyprian, Epist. 75, 76). See EXORCASMENTBS. But Cyprian also speaks of "profane exorcists" (Orig. Eccles. bk. iii, ch. iv) as follows: "Take Bona's opinion to be the truest, that it came in upon the withdrawing (Ærum. Liturg. lib. i, c. xxv, note 17) of that strength which 'the divinity and demon is strong, and probably was by degrees, and not at the same time in all places. Cornelius (op. Episc. lib. vi, c. xliii), who lived in the third century, reckons exorcists among the inferior orders of the Church of Rome; yet the author of the Constitutions, who lived after him, says it was not known there (Constit. Apostol. cap. 68), but God bestowed the gift of exorcising as a free grace upon whomever he pleased; and therefore, consonant to that hypothesis, there is no rule among those Constitutions for giving any ordination to exorcists, as being appointed by God only, and not by the Church. But the credit of the Constitutions is not such as to make much account of in this matter; for it is certain by this time exorcists were settled as an order in most parts of the Greek Church, as well as the Latin; and which is evident from
EXORCISM, EXORCIST

the Council of Antioch, A.D. 341, in one of whose canons (Conc. Antioch. c. x. § 2) is given to the choro-
episcopos to promote subdeacons, readers, and exorcists, which argues that those were then standing orders
of the Church. After this exorcists are frequently
mentioned among the inferior orders by the writers of
the fourth century, as in the Council of Laodicea
(Conc. Laodic. c. v. § 2. Epp.) and the Council of
Nicaea (Eph., Fid., note 21), Paulinus (Natal. iv. s. Feliciss.), Sulpicius Severus (Vit. S. Martin. c. v.), and the
Scripts of the
Theodosius (Cod. Theodosii. leg. xii. tit. 1, De Decretu-
leg. 12), and Gratian (id. lib. xvi. tit. ii, De Episc. Leg.
14). This also appears to be a later practice, and the
rites of exorcism were adopted by the Church and
granted them the same immunities from civil offices as
they do to the other orders of the clergy. Their
ordination and office is thus described by the fourth
Council of Carthage (Conc. Carth. iv. c. vii: Exorcista
quam ordinatur, accepit de manu episcopi libellum, in
quos scripti sunt exorcismi, dicente sibi episcopo
Episcopi et commendas memoriam, et habeto potestatem
imponendi manus super energumenam, sive baptismato-
su, sive catechumenum): "When an exorcist is or-
dained, he shall receive at the hands of the bishop a
book, wherein the forms of exorcising are written, the
blessing of the bishop is inscribed thereon, he shall
memorize them, and have them in memory, and have
thou power to lay hands upon the energumens, whether
they be baptized or only catechumens."

These forms were certain prayers, together
with adorations in the name of Christ, commanding the
Spirit to work in the part of the possessed person,
which may be collected from the epistles of Paulinus,
concerning the promotion of St. Felix to this office,
where he says (Natal. iv. s. Felicias. : Primor lector
servivit in annis, inde gradum cepit, cui munus voce
sibi adiuvaret vox, et sacris pelleri verbis), from a
reader or an exorcist, who had power to ador-
jure evil spirits, and to drive them out by certain holy
words. It does not appear that they were ordained
to this office by any imposition of hands either in the
Greek or Latin Church; but yet no one might pretend
to exercise it either publicly or privately, in the church
or in any house, without the appointment of the bishop,
as the Council of Laodicea directs (Conc. Laodic. c.
xxvi.; or at least the license of a choroepiscopos, who
in that case was authorized (Concil. Antiochen. cap. x)
by the bishop's deputation.

Cyril of Jerusalem († 386) gives a somewhat detailed
account of the form of exorcisms and ceremonies used
were: 1. Preliminary fasting, prayers, and gen-
uefections. These, however, may be regarded as gen-
eral preliminaries to baptism. 2. Imposition of hands
upon the head of the candidate, who stood with his
head bowed down in a submissive posture. 3. Putting
off the shoes and clothing, with the exception of an
under garment. 4. Facing the candidate to the west,
which was the symbol of darkness, as the east was of
light. In the Eastern Church he was required to
thrust out his hand towards the west, as if in the act
of pushing away an object in that direction. This
was a token of his abhorrence of Satan and evil spirits,
and his determination to resist and repel them. 5. A
renunciation of Satan and his works thus: *I renounce
Satan and his works, and his pomps and his services,
and all things that are his. This or a similar form
was thrice repeated. 6. The bishop then bound upon
the candidate either once or three times, and ad-
jured the unclean spirit in the name of the Father,
Son, and Holy Ghost, to come out of him. This form
of adoration seems not to have been in use until the
fourth century; and these several formalities were
apparently introduced gradually at different times.
The whole ceremony was at first confined to the
renunciation of 'the devil and his works' on the part of
the person about to be baptized (Culman, Christian
Antiquities, ch. xiv, § 9; Riddle, i. c.).

IV. Roman Catholic Church.—In the Roman Catho-
lic Church the same ceremony as in the Protestant
Church exists, with one or more minor orders of the
clergy—acolytes, exorcists, readers, por-
ters (Council of Trent, sess. xxiiii, chap. ii, of Orders).
When initiating the exorcist the bishop gives him a
book containing the exorcisms (or the Missal), and
says, "Acipio et commendas memoriam, et habeto potesta-
tem imponendi manus super energumenam, sive baptismato-
su, sive catechumenum" (Take this and commit it to
memory, and have power to impose hands on persons
possessed, be they baptized or catechumens). Every
candidate for priests' orders in the Roman Church first
receives the four lower orders, including that of exor-
cist. The process of exorcising water for baptism is

III.—14
given under Baptism (vol. i, p. 650, col. 2). Children are regarded as belonging to the devil until baptized, and the priest or assisting exorcist blows out the evil spirit by the breath (exsufflation), and also breathes on the child again (inafflation), as a symbol of the gift of the Holy Spirit. The priest says: "for the beast exsufflated to give you, the beast of unclean spirit, the devil and all evil spirits. In Metaphanis Critisculum Confessio (1661), cap. vii, de Dei, the statement is that baptism must be performed with prayers and exorcisms (meti eivov kai korphovxov); also (xochov eis korphovxov pora twn dourwv xuniwv xwvngwv

Exorcism is a很是 a primary function of the priest. It is to destroy the power of evil spirits and to free the soul from their influence. It is a very ancient practice, and is mentioned in the Old Testament. The Bible speaks of the exorcist as one who is able to cast out demons. In the New Testament, we find several instances of the exorcism of demons. For example, in Mark 1:24, we read that Jesus cast out a demon from a man who had a Legion of demons. In Matthew 9:38, Jesus said to His disciples, "the angels of this world are strong in exorcism, but they cannot overcome the exorcist."

In the history of exorcism, the Church has always been concerned with the problem of demons and evil spirits. In the Middle Ages, the Church developed a system of exorcism, and the exorcist was a person who was trained in the art of exorcism. In the modern Church, the role of the exorcist is still an important one. In the Prayer-book, the 5th and 6th of Edward VI, they de-
EXORDIUM

The seventy-second canon of the Church of England forbids any minister attempting to expel a devil or devils, under pain of the imputation of imposture, and censure, and deposal from the ministry, except he first obtains the license of the bishop of his diocese, had under his hand and seal (Whately, Logic, ii. viii. § 2). In the form of baptism used in the Church of England, the Methodist Episcopal Church, and the Protestant Episcopal Church, the question is put to the candidate, "Dost thou renounce the devil and all his works?" etc. This is a remnant of the old form of renunciation (connected with the exorcism at the baptism of catechumens), but of exorcism itself there is nothing in their formularies.

EXORDIUM. See Homiletics; Sermon.

Expectancy (Lat. expectatio, expectare, gratiae expectatio) is the name of theRoman law, which makes a claim to an ecclesiastical benefice which has not yet become vacant. At first the German emperors granted expectancies for the first place in every chapter that became vacant after their accession to the throne (qua prince praecipe). After the eleventh century thepopes granted expectancies at first in the shape of a request, and subsequently in the shape of an order. The expectancy was either for a definite benefice, or for any benefice of a certain class or chapter. The third Council of Lateran (1179), and later papal rescripts, forbade the expectancies, but the popes themselves continued to grant them. They were again restricted by the Council of Constance, and forbidden by the Council of Basel. The Council of Trent totally abolished them, except in cases of bishops and monastic superiors, to whom, in some specified cases, a coadjutor, with the right of succession, was given. In the Protestant state churches the princes have claimed the right to grant expectancies.—Allgem. Real-Encycl. i. 622; Herzog, Real-Encycl. iv. 292. (A.J.S.)

Expectation Week, the time between Ascension Day and Whitsunday, the period during which the apostles tarried at Jerusalem in expectation of the fulfillment of the Master's promise as to the outpouring of the Comforter. (Procter, Primeval Church, i. 265; Hist. of the Church, i. 463.)

Expediency, fitness of means to ends. On expediency as the ground of morals, see Dwight, Theology, ser. xxix; Robert Hall, Complete Works, i. 96; ii. 235; Lit. and Theol. Review, iv. 388; Wayland, in Bibliotheca Sacra, 1843, p. 301; and the article Ethics.

Experience (ἐμπειρία, Rom. v. 4, "proof," as elsewhere rendered, approbation of integrity as the result of trial). "Try three stages of προκειμένη, endurance, ἐκπόρευσις, approval, and διαφωτίζω, hope, are recommended by the apostle as proceeding from the sufferings; the first denotes the state of moral earnestness implied in patient and faithful endurance, the second that state of approval as genuine which thence results, and bears with it hope as its blossom" (Olshausen, Comment. in loc.).

EXPERIENCE. I. In Philosophy.—"Experience in its strict sense, applies to what has occurred in a person's own knowledge. Experience, in this sense, of course relates to the past alone. Thus it is that a man knows by experience what sufferings he has undergone, the experience of disease, or what height the tide reached at a certain time and place. Where the word is used to denote that judgment which is derived from experience in the primary sense, by reasoning from that in combination with other data. Thus a man may assert, on the ground of experience, that he was cured of a disorder by such a medicine—that that medicine is generally beneficial in that disorder; that the tide may always be expected, under such circumstances, to rise to such a mark; and none of these can be known by experience, but are conclusions from experience. It is in this sense only that experience can be applied to the future, or, which comes to the same thing, to any general fact; as, e. g. when it is said that we know by experience that water exposed to the sun in certain temperature will freeze' (Whately, Logic, i. 1.)

Locke (Essay on Human Understanding, bk. ii, ch. i) assigns experience as the only and universal source of human knowledge. "Whence hath the mind all the cantonets, is still left open, in which new answer, in one word, from experience; in that all our knowledge is founded, and from that ultimo, they derive itself. Our observation, employed either about external sensible objects, or about the internal operations of our minds, perceived and reflected on by ourselves, is the only asper which supplies our understanding with all the materials of thinking. These are the fountains of knowledge from whence all the ideas we have, or can naturally have, do spring—that is, sensation and reflection." In opposition to this view, according to which all human knowledge is a posteriori, or the result of observation and reflection, it is contended that knowledge is a priori—knowledge which experience neither does nor can give, and knowledge without which there could be no experience, inasmuch as all the generalizations of experience proceed and rest upon it. "No accumulation of experiments whatever can bring a general law home to the mind of man, because, if we rest upon experiments, our conclusion can never logically pass beyond the bounds of our premises; we can never infer more than we have proved; and all the past, which we have not seen, and the future, which we cannot see, are as hidden from us as if we had never observed anything; and if we rest upon experiments, our conclusion can never logically pass beyond the bounds of our premises; for we can never infer more than we have proved; and all the past, which we have not seen, and the future, which we cannot see, are as hidden from us as if we had never observed anything." (Sewell, Christian Mor. ch. xxiv.) "We may have seen one circle and investigated its properties, but why, when our individual experience is so circumscripted, do we assume the same relations of all? Simply because the understanding is by nature a controlling agent; for the laws which our objects will have similar properties; it does not acquire this idea by sensation or custom; the mind develops it by its own intrinsic force—it is a law of our faculties, ultimate and universal, from which all reason proceeds" (Dr. Mill, Essays, p. 387).—FLEMING, Vocabulary of Philosophy, s. v.

II. In Religion.—(1) Knowledge gained by trial or practice. A man unacquainted with such spiritual changes in the mind which are mentioned in the Scriptures can form no notion of them. He may have some idea of the effects of the changes of the new birth, sanctification, etc., but he does not understand their nature; they are foolishness to him. Nothing is more common with unregenerate persons than to ridicule as enthusiastic religious experience. But if the constitution of human nature is considered, it will be seen that such emotions are natural to it. His passions are original parts of his mental constitution, and must be exercised in religion. They cannot be destroyed. However beautiful religious may be as a theory, its excellency and energy can only be displayed as experienced. Hence the Bible employs the analogous terms tasting, feeling, to indicate the internal enjoyment of a Christian. He has peace through
EXPERIENCE MEETINGS 420 EXPIATION

believing. He joys in God, through whom he has received the atonement. The love of God is shed abroad in his heart. He is conscious that he is a new creature" (Farrar, Bibl. Dict. s. a.). "That our experience is always absolutely pure in the present state cannot be expected; but if it be true, it will not fail, through the exercise of Christian diligence, to become more and more pure. The main point, therefore, is to guard well against mistaking the illusions of the imagination for the operation of divine truth on the conscience and the heart (1 Thess. ii. 13). See AFFECTIONS. (2.) The most valuable things are most apt to be counterfeited. But Christian experience may be considered as genuine, 1. When it accords with the revelation of God's mind and will, or what he has revealed in his word. Anything contrary to this, however pleasing, cannot sound, or produce, by divine agency. 2. When its tendency is to promote humility in us: that experience by which we learn our own weakness, and to subdue pride, must be good. 3. When it teaches us to bear with others, and to do them good. 4. When it operates so as to excite us to love, and to increase devotion, and生怕 to our regard to God. A powerful experience of the divine favor will lead us to acknowledge the same, and to manifest our gratitude both by constant praise and genuine piety. (3.) Christian experience, however, may be so sound, genuine, and good, be what we have felt and enjoyed the power of religion, and yet have not always acted with prudence as to their experience. 1. Some boast of their experiences, or talk of them as if they were very extraordinary; whereas, were they acquainted with others, they would find it not so. That a man may make mention of his experience is no way improper, but often useful; but to hear persons always talking of themselves seems to indicate a spirit of pride, and that their experience cannot be very deep. 2. Another abuse of experience is dependence on it. We ought certainly to take encouragement from this, and not be beyond ourselves; but if we are so dependent on past experience as to preclude present exertions, or always expect to have exactly the same assistance in every state, trial, or ordinance, we shall be disappointed. God has wisely ordered it, that he will not always leave his people, yea, he will suspend his aid, and sometimes in our absence. For this very reason, that we may rely on him, and not on the circumstance or ordinance. 3. It is an abuse of experience when introduced at improper times and before improper persons. It is true, we ought never to be so simple to talk of nothing, and yet it is that, and to irreverent religious persons respecting experience, which they know nothing of, as our Saviour says, casting pearls before swine." See BUCK, Treatise on Experience; Gurnall, Christian Armor; Edwards, On the Affections; Doddridge, Rise and Progress; Wesley, Sermons.

EXPERIENCE, Hume's argument from. See HUME; MIRACLE.

Experience Meetings are assemblies of religious persons, who meet for the purpose of relating their experience to each other. These are sometimes called covenant and conference meetings, and, in the Methodist Church, class-meetings (q.v.). "It has been doubted by some whether these meetings are of any great utility, and whether they do not, in some measure, force people to say more than is true, and purport those with pride who are able to communicate their ideas with facility; but to this it has been answered, 1. That the abuse of a thing is no proof of the evil of it. 2. That the most eminent saints of old did not neglect this practice (Psa. lvi. 16; Mal. iii. 16). 3. That by a wise and judicious application of encouragement, Christian is led to see that others have participated of the same joys and sorrows with himself; he is excited to love and serve God; and animated to perseverance in duty by finding that others, of like passions with himself, are zealous, active, and diligent. 4. That the Scriptures seem to enjoin the frequent intercourse of Christians for the purpose of strengthening each other in religious services (Heb. x. 24, 25; Col. iii. 16; Matt. xxviii. 20)." See CLASS-MEETINGS.

EXPIATION, JEWISH DAY OF ANNUAL (Lev. xvi, 1-84; comp. xxiii, 36, 39; Num. xxix, 7-11), a solemn fast (Acts xxvii, 9; Philo, opp. ii, 206, 296, 591; Josephus, Ant. xiv, 16-4, and holy day (יָמִי-נַחֲלָה יִשְׂרָאֵל, Lev. xvi, 31; xxiii, 32), held from the evening of the 9th till that of the 10th day of the 6th month, Tisri, five days after the Fast of Tabernacles. The modern Mohammedan fast called "Ramadan," held during an entire (lunar) month, has sometimes been referred to as having its analogies; likewise the fast of Isra amon the ancient Egyptians (Herod. iv, 186; comp. ii, 40), and the Hindu fast-day "Sandrajonam," etc. See FAST.

EXPIATION, "a religious act, by which satisfaction or atonement is made for the commission of some crime, the guilt done away, and the obligation to punishment cancelled. The chief methods of expiation among the Jews were by sacrifices; and it is important always to recollect that the Levitical sacrifices were of a constant and unchangeable character. The Jews sacrifices were unquestionably of divine original, and as the terms taken from them are found applied so frequently to Christ and to his sufferings in the New Testament, they serve to explain that peculiarity under which the apostles regarded the death of Christ, and afforded additional proof that it was considered by them as a sacrifice of expiation, as the grand universal sin-offering for the whole world. For our Lord is announced by John as 'the Lamb of God,' and that not with reference to meekness or any other moral virtue, but with an accompanying phrase, which would communicate to a Jew the full sacrificial sense of the term employed, 'the Lamb of God, which taketh away the sin of the world.' He is called 'our Passover, sacrificed for us.' He is said to have given himself for us, an offering and a sacrifice to God, for a sweet-smelling savour. 'As a priest, he was slain; it was necessary he should have somewhat to offer; and he offered himself, his own blood, to which is ascribed the washing away of sin, and our eternal redemption. He is declared to have put away sin by the sacrifice of himself, to have by himself purged our sins, to have sacrificed the people by his own blood, to have taken away sins. Add to these, and to innumerable other similar expressions and allusions, the argument of the apostle in the Epistle to the Hebrews, in which, by proving at length that the sacrifice of Christ was superior in efficacy to the sacrifices of the law, he most unequivocally assumes that the death of Christ was a sacrifice and sin-offering; for without it would no more have been capable of comparison with the sacrifices of the law, than the death of John the Baptist, St. Stephen, or St. James, all martyrs and sufferers for the truth, who had not recented their testimony with their blood. This very comparison, we may affirm, is utterly unaccountable and absurd on any hypothesis which denies the sacrifice of Christ; for what relation could his death have to the Levitical immolations and offerings if it had no sacrificial character? Nothing less would the fact of his death, as the fact of his death is necessary from the terms themselves, which had acquired this as their established meaning; and absurd, because if, as Socinians say, they used them..."
metaphorically, there was not even an ideal resem-
blance between the figure and that which it was in-
tended to illustrate. So totally irrelevant, indeed, will
those terms appear to any notion entertained of the
definition of Christ. It excludes every charac-
ter, that to assume that our Lord and his apostles used
them as metaphors is profanely to assume them to be
such writers as would not in any other case be toler-
ated; writers wholly unacquainted with the common-
est rules of language, and therefore wholly unfit to be
teaching the highest truth, and not only in religion, but
in things of important difference.
2. "The use of such terms, we have said, would not
only be wholly absurd, but criminally misleading to the
Gentiles, as well as to the Jews, who were first
converted to Christianity. To them the notion of pro-
phetic or figurative actions, or such actions to avert the
damnation of the gods, and which expiated the crimes of off-
cers, was most familiar, and terms corresponding to it
were in constant use. The bold denial of this by Dr.
Priestley might well bring upon him the reproof of arch-
bishop Magee, who, after establishing this point from
the Old and New Testament, observes, 'So clear does
their language announce the notion of a propitia-
tory atonement, that if we would avoid an imputation
on Dr. Priestley's fairness, we are driven, of necessity,
to question the extent of his acquaintance with those
words, which are always consulted in the passage
given by this writer in No. 5 of his 'Illustrations,' appended
to his 'Discourses on the Atonement:' and also the
tenth chapter of Grotius's De Satisfactions, whose
learning has most amply illustrated and firmly settled
this view of the heathen sacrifices. The use to be
made of them in this argument is, that as the apostles
found the very terms they used with reference to the
nature and efficacy of the death of Christ fixed in an
expiatory signification among the Greeks, they could
not, in honesty, use them in a distant figurative sense,
much less in a contrary one, without giving their read-
ers due offerings, or rather by conditioning them with a
new import. From ἄγας, a pollutum, an impurity, which
was to be expiated by sacrifice, are derived ἄγας, ἄγας
and ἄγας, which denote the act of expiation; καθαύρος,
too, to purify, cleanse, is applied to the effect of expia-
tion; and ἄσκομεν denotes the method of propita-
ting the gods by sacrifice. These, and other words of
similar import, are used by the authors of the Septu-
gint, and by the evangelists and apostles; but they
give no premonition of using them in any strange and
altered sense; and when they apply them to the death of
Christ, they are not thereby conditioned in any sense to
use them in their received meaning. In like manner the
Jews had their expiatory sacrifices, and the terms and
phrases used in them are, in like manner, employed by
the apostles to characterize the death of their Lord;
and they would have been as guilty of misleading
their Jewish as their Gentile readers had they em-
ployed them in a new sense, and without warning,
which, unquestionably, they never gave.
3. "As to the expiatory nature of the sacrifices of
the law, it is not required by the argument to show
that all the sacrificial offerings were of this character.
There were also offerings for personal and national
prescribed for purification, which were identical; but
even they grew out of the leading notion of expiatory
sacrifice, and that legal purification which resulted
from the forgiveness of sins. It is enough to prove that:
there were sacrifices of a much higher nature and pur-
pose, for things of idolatry and idolatry, of murder and
adultery, and a few others, were the only capital crims
considered politically, they were not the only
capital crimes considered morally; that is, there
were other crimes which would not be subjected to
the offenders be subjected to the Levitical oblations.
The true question, then, is, whether such
sacrifices were appointed by God, and accepted instead
of the personal punishment or life of the offender,
which otherwise would have been forfeited, as in the
other cases; and, if so, if the life of animal sacrifices
was accepted instead of the life of the offender, then
that they were mere multas and pecuniary penalties
falls to the ground, and the vicarious nature of most
of the Levitical oblations is established. That other
offences besides those above mentioned were capital, that is, exposed the offender to death, is clear from this, that all offences against the law had this capital effect, according to the rule, that death was, therefore, to redeem the offenders from this penalty that sacrifices were appointed. So, with reference to the great day of expiation, we read, 'For on that day shall the priest make an atonement for you, to cleanse you, that you may be cleansed from all your sins.' It was to be an everlasting statute unto you, to make an atonement for the children of Israel for all their sins once a year' (Lev. xvi, 30–34).

5. 'To prove that this was the intention and effect of the annual sacrifices of the Jews, we need do little more than refer to Lev. xvi, 10, 11: 'I will set my face against that soul that eateth blood, and will cut him off from among his people. For the flesh is in the blood; and I have given it to you upon the altar to make an atonement for your souls: for it is the blood that maketh an atonement for the soul.' Here we are told that the distinctively Levitical sacrifice made for the soul is the blood of the victims; and to make an atonement for the soul is the same as to be a ransom for the soul, as will appear by referring to Exod. xxx, 12–16; and to be a ransom for the soul is to avert death. 'They shall give every man a ransom for his soul unto the Lord, that there be no plague among them, by which their lives might be suddenly taken away. The soul is also here used obviously for the life; the blood, or the life of the victims in all sacrifices, was substituted for the life of man, to preserve him from death, and the victims were therefore vicarious.'

6. 'The Hebrew word דם, rendered atonement, signifying primarily to cover, to overspread, has been the subject of some evasive criticisms. It comes, however, in the secondary sense, to signify atonement or propitiation, because the effect of that is to cover, or, in Scripture meaning, to remit offences. The Septuagint also renders it by: ἐκκαίνισθαι, to appease, to make propitiations. It is used, indeed, where the means of atonement were a part of the sacrificial regulations. These instances equally serve to evince the Scripture sense of the term, in cases of transgression, to be that of reconciling the offended deity by averting his displeasure, so that when the atonement for sin is said to be made by sacrifice, no doubt can remain that the sacrifice was strictly a sacrifice of propitiation. Agreeably to this conclusion, we find it expressly declared, in the several cases of particular oblations for transgression of the divine commands, that the sins for which atonement was made by those oblations should be forgiven.

7. 'As the notion that the sacrifices of the law were not only a type of the sacrifice of the cross, but warranted by the general appointment of the blood to be an atonement for the souls, the forfeited lives, of men, so also is it contradicted by particular instances. Let us refer to Lev. vi, 15, 16: 'If a soul commit a trespass, and sin through ignorance in the holy things of the Lord, he shall make amends for the harm that he hath done in the holy thing, and shall add a fifth part thereto, and shall give it to the priest.' Here, indeed, is the proper fine for the trespass; but it is added, 'He shall bring for his trespass unto the Lord a ram without blemish, and the priest shall make atonement for him with the ram of the trespass offering, and it shall be forgiven him.' Thus, then, so far from the sacrifice being the fine, the fine is distinguished from it, and with the ram only was the atonement made to the Lord for his trespass. Nor can the ceremonies with which the trespass and sin offerings were accompanied agree with any notion but that of their vicarious character. The worshipper, conscious of his trespass, the symbolic act of transferring punishment, then slew it with his own hand, and delivered it to the priest, and by it purchased the mercies of God, as who burned the sacrifice on the altar, and, having sprinkled part of the blood upon the altar, and in some cases upon the offerer himself, poured the rest at the bottom of the altar. And thus, as we are told, 'The priest shall make an atonement for the sins concerning his sin, and it shall be forgiven him.' So clearly is it made manifest by these acts, and by the description of their nature and end, that the animal bore the punishment of the offerer, and that by this appointment he was reconciled to God, and obtained the forgiveness of his offences.'
EXPLANATION

which was not done by the blood of any other victim, except the bullock, which was offered the same day as a sin offering for the family of Aaron. The circumstances of this ceremony, whereby atonement was to be made 'for all the sins' of the whole Jewish people, are so strikingly significant that they deserve a particular detail. On the day appointed for this general expiation and reconciliation of the people, in the person of a high-priest and as a goat as sin offerings, the one for himself and the other for the people; and, having sprinkled the blood of these in due form before the mercy seat, to lead forth a second goat, denominated 'the scape-goat,' and, after laying both his hands on the head of each, but conferring over him all the iniquities of the people, to put them upon the head of the goat, and to send the animal, thus bearing the sins of the people, away into the wilderness; in this manner expressing, by an action which cannot be misunderstood, that the atonement, which is affirmed, was to be effected by the sacrifice of the sin offering, consisted in removing from the people their iniquities by this translation of them to the animal. For it is to be remarked that the ceremony of the scape-goat is not a distinct one: it is a continuation of the process, and is essentially connected with the pure and complete consummation of the sin offering; so that the transfer of the iniquities of the people upon the head of the scapegoat, and the bearing them away into the wilderness, manifestly imply that the atonement effected by the sacrifice of the sin offering consisted in the transfer and removal of those iniquities, that is, to effect God's displeasure, that the people might not die.' 10. "How, then, is this impressive and singular ceremonial to be explained? Shall we resort to the notion of mulcts and fines? If so, then this and other stated sacrifices must be considered in the light of penalties; public and private consummation of the sin offering; so that the transfer of the iniquities of the people upon the head of the scape-goat, and the bearing them away into the wilderness, manifestly imply that the atonement effected by the sacrifice of the sin offering consisted in the transfer and removal of those iniquities, that is, to effect God's displeasure, that the people might not die.' 11. "We may find, also, another more explicit illustration in the sacrifice of the passover. The sacrificial character of this offering is strongly marked; for it was an offering brought to the tabernacle, it was slain in the sanctuary, and the blood was sprinkled upon the altar by the priests. It derives its name from the passing over and sparing of the houses of the Israelites, on the door-posts of which the blood of the immolated lamb was sprinkled, when the first-born in the houses of the Egyptians were slain; and thus we have another instance of life being spared by the instituted means of animal sacrifice. Nor need we confine ourselves to particular instances. 'Almost all things,' says an apostle, who surely knew his subject, 'are by the law purged with blood; and without shedding of blood is no remission.' In the original, the verb 'be acquitted,' occurs; that is, a discharge from the punishment to which a man's sin exposed him; and by constant usage, were the Jews familiarized to the notion of expiatory sacrifice, as well as by the history contained in their sacred books, especially in Genesis, which speaks of the vicarious sacrifices offered by the patriarchs; and in the book of Job, in which that patriarch is said to have offered sacrifices for his supposed sins of his sons; and where Eliphaz is commanded, by a divine oracle, to offer a burnt-offering for himself and his friends, 'lest God should deal with them after their folly.' 12. "On the sentiments of the uninspired Jewish writers on this point, the substitution of the life of the animal for that of the offerer, and, consequently, the expiatory nature of their sacrifices, Outram has given many quotations from their writings, which the reader may consult in his work on Sacrifices. Two or three only may be adduced from the symbolism. Levi ben-Gerson says; 'The imposition of the hands of the offerers was designed to indicate that their sins were removed from themselves and transferred to the animal.' Isaac ben-Arama: 'He transfers his sins from himself, and lays them upon the head of the victim.' R. Moses ben-Nachman says, with respect to a sin offering; 'It was just that his blood should be shed, and that his body should be burned; but the Creator, of his mercy, accepted the victim from him as his substitute and ransom, that the blood of the animal might be shed instead of his; and that, but the blood of the animal might be given for his life.'
EXPOSITION

Full of these ideas of vicarious expiation, then, the apostles wrote and spoke, and the Jews of their time heard and read, the books of the New Testament. The Socinian pretence is, that the inspired penmen used the sacrificial terms which occur in their writings figuratively and not literally, and that they could not do this honestly unless they had given notice of this new application of the established terms of the Jewish theology; but, if this be assumed, it leaves us wholly at a loss to discover what that really was which they intended to teach by these sacrificial terms and expressions. They are therefore nearly as silent as to this point; and the varying theories of those who reject the doctrine of atonement, in fact, confess that their writings afford no solution of the difficulty. If, therefore, it is blasphemous to suppose, on the one hand, that inspired men should write on purpose to mislead, on the other, it is utterly inconceivable that, had they only been ordinary writers, they should construct a figurative language out of terms which had a definite and established sense, without giving any intimation at all that they employed them otherwise. The disciples founded on them may be more wayward why they adopted them at all, and more especially when they knew that they must be interpreted, both by Jews and Greeks, in a sense which, if the Socinians are right, was in direct opposition to that which they in tended to convey.

Some modern writers deny the expiatory character of the Jewish sacrifices. So Bushnell (Vicarious Sacrifice, p. 425) asserts that no such thing as expiation is contained or supposed to be wrought out in the Scripture sacrifices. On this see British Quarterly, Oct. 1869, reprinted in the Theol. Eclectic (New Haven), iv. 297; and also an article on the Expository Nature of the Atonement (Brit. Quarterly, Oct. 1867; also in the Theol. Eclectic, v. 201 sq.). See also the article Atonement: Redemption: Sacrifice.

Exposition. "the opening up and interpreting larger portions of Scripture in public discourses. In Scotland, where the practice has long obtained, and still extensively prevails, it is called lecturing. While the striking and insulatod texts of Scripture, which furnish abundant matter for sermons, are calculated, when judiciously treated, to rouse and fix attention; and the discourses founded on them may be more useful to general hearers, especially the careless and unconverted, expository discourses furnish peculiar advantages as regards the enlargement of the Christian's views of divine truth, and his consequent advancement in the ways of God. By judiciously expounding the Scriptures, it is possible to give them a clearer exhibition of the great principles of religion in their mutual connections and diversified bearings than could otherwise be done. He will have a better opportunity of unfolding the true meaning of those parts of the Bible which are difficult—of bringing a vast variety of topics before his hearers, which may be of the utmost importance to them, but which he could not so conveniently have treated in preaching from detached texts—of exhibiting the doctrines and duties of Christianity in their relative positions—of successfully meeting the difficulties arising from the erroneous views of God, and of shedding the light of his truth upon the minds of his people with correct and influential views of divine things. (See Dodridge on Preaching.) Such a mode of public instruction cannot but prove of great use to a minister's own mind, by rousing his energies, habituating him to the sacred volume. It is the very work (to say) of "opening the Scriptures) for which the ministry was instituted." He advises exposition of whole chapters or books in course, pleading for it not only the sanction of ancient usage, but also certain great advantages of the method both to the preacher and his hearers (Thoughts on Preaching, N. Y. 1867, 12mo, p. 272 sq). See Homiletics.

Expositions of Scripture. See Commentary.

Exsuperius, bishop of Toulouse in the end of the 4th and beginning of the 5th century, celebrates the exercise of remarkable charity during a great famine. After having given away all his own property, he sold the sacred vessels of gold and silver to help the poor. Jerome compared him to the widow of Sarepta, and dedicated to him his Commentary on Zech. 9. Pope Innocent I. decreed a decree to this effect about A.D. 417. See Acta Sanctorum, Sept. 28; Tillemont, Memoria, x. 617, 825; A. Butler, Lives of Saints, September 28.

Extempore Preaching. See Homiletics.

Extravagants (Extravagantes), a name given to the decreetal epistles of the popes issued after Gratian's Decretum, and not contained in that work (see Canon Law, vol. ii, p. 87, col. 2). They were therefore called extra decretae vagantes, or, briefly, extravagantes; and this name was still given to them after their insertion in the body of the canon law. For an account of the different collections of extravagantes, see Canon Law.

Extreme Unction, one of the sacraments (the 5th) of the Roman Church, administered to sick persons in extremis, by anointing them with oil when death appears near. It dates from the 11th century, though the Roman Church, of course, seeks to trace it back to the apostolic age.

I. Origin of the Practice. The Church of Rome appeals (see below) to Mark vi, 13, and James v, 14-16, as Scripture authority for extreme unction. In Mark we are told that the apostles "anointed with oil many that were sick, and healed them." Clearly there is no trace of the "sacrament" here. The Council of Trent, in citing this passage, shrewdly says that it is "intimated" only in Mark, because, according to Rome, the apostles were not "priests" until the Last Supper. If, then, the passage in Mark teaches the institution of the sacrament, it would follow that others beside priests could administer it. Cardinal Cajetan, as cited by Catharinius, rejects this text as inapplicable to this sacrament; and Suarez (in part iii, disp. 39, § 1, n. 5) says that when the apostles are said to anoint the sick and heal them (Mark vi, 13), this was not said in reference to the sacrament of unction, because their purpose was not to give them an immediate respect to the soul. As to the passage in James, it speaks of an anointing for "healing" by all the elders of the Church, who might or might not be laymen; it was "the prayer of faith that was to save the sick" (see, for a thorough discussion of this passage, Elliot, Deutecination of Romdumism, bk. ii, ch. xiv.).

II. The Ancient Greek Church. The ancient writers of the Greek Church use the passage of James only for exegetical, not for dogmatical purposes. Origen, in the second homily on Levit. iv, quotes the words of James when he speaks of the different ways which are given to the Christian for the remission of his sins. As the seventh way he mentions severe penance, in which he finds a compliance with the words of James: "If any be sick, let him call for the elders of the Church, and let them lay their hands on him, anointing him with oil in the name of the Lord: that the prayer of faith may effuse the power of the connection shows that Origen applies the words to mental and physical sickness, and the laying on of hands, which he adds to the apostolic words, points to a local use of anointment in Alexandria at the reconciliation of the laps. Chrysostom (On the Priesthood, iii, 149) quotes the words of James on the assumption that the priests have the power of remitting sins. John of Damascus, in speaking of the mysteries of the
Church, treats only of baptism and the Lord's Supper. The first certain testimony for the use of the anointment of the sick in the Greek Church is given by a Western writer about 798, Theodulf of Orleans.

III. The Ancient Latin Church. — In the Western Church, Ireneus (1, 21, 5) states that the Gnostics, and in particular the Hereticals, poured upon dying men and women water and oil with an invocation of prayer, in order that their souls might become invisible and inaccessible to the hostile powers of the spiritual world. It is uncritical in the highest degree for Roman Catholic writers to infer from the existence of a Gnostic rite the existence of a similar rite in the Western Church. Tertullian and Cyprian, both to whom we are indebted for so full information of the ecclesiastical usages of the Western Church, know nothing of extreme unction as a sacrament. This silence can not be explained by a reference to the disciplina arconi, as the latter exclusively embraced baptism and the Lord's Supper, and as even these topics, notwithstanding the disciplina arconi, are frequently and fully discussed by the ecclesiastical writers. Many of the latter mention the frequent use of oil as a peculiar charisma for miraculous cures. Thus it is related by the emperor of the Severian school of the emperor Antoninus, was cured by the Christian Proclus by means of anointment. This certainly can have no reference to a sacrament for the use of Christians. (Many other examples of this use of oil may be found in these same writers, Zendward-gisten, vol. vi., pt. iii., p. 289.) Superstition developed this usage, and it occurred, according to the testimony of Chrysostom, that the lamps burning in the churches were plundered for the purpose of using the oil as a preservative against possible, and, as a miraculous remedy, against actual diseases. It is easy to comprehend how this medicinal and miraculous anointment could become the basis and the origin of a sacrament (see on this point Marheineke, Symbolik, i, 3, p. 238). The transition is visible in an epistle from the Roman bishop Innocent I to bishop Decentius, of Eugubium, written in 416. Innocent calls the anointment of the sick a "kind of sacrament" (genus sacramentum) and while he reserves to the bishops the right of preparing the sacred oil, he states that both priests and laymen may apply the oil (quod ab episcopo confectum non solum sacrosanto et omnibus uti Christianum sit in suum aut in suum necessitate unguendum), which is entirely at variance with the present teaching of the Church of Rome, according to which the sacrament can be administered only by priests. From the beginning of the ninth century the anointment of the sick is frequent, and the acts of the Theodulf of Orleans (738), and the first Council of Mentz (847), place it by the side of penance and the Eucharist, but preceding the two latter. The recovery of the sick is always regarded as the chief object. Its use appears to have been considered necessary only for sinners; for abbot Adelard, of Corbie, was asked by the monks of the monastery whether he desired to be anointed with the sacred oil, as they were certain that he was free from sins. The conception of the anointment of the sick as an act of penance caused a discussion around with some whether it could be repeated. Ivo of Chartres, and Godfrey, abbot of Vendôme (about 1100), denied that the rite could be administered more than once, comparing it with the public penance; and it was a popular belief that a person recovering from sickness after receiving the anointment must not touch the ground with bare feet, and abstain from the intercourse and the eating of meat. It was in the course of the 12th century that the names sacramentum extemporaneum and extrema unction first came into use.

IV. Extreme Unction as a Sacrament in the Church of the East. — The first canonical anointment of the sick, according to the teaching gradually developed in the Church, was first given by Hugo of III.—14.

St. Victor (De Sacram. fidei lib. ii, p. xvi). Peter Lombardus assigned to it, in the sermons of the seven sacraments which he is the first to mention, the fifth place (Sentent. lib. iv, dist. 23). The scholastics, and, in particular, Thomas Aquinas, completed the scientific development of this doctrine, and the shape given to it by Thomas received the sanction of the Councils of Florence and Ferrara.

The canons of Trent on this subject are: "Canon 1. If any shall say that extreme unction is not truly and properly a sacrament, instituted by our Lord Jesus Christ, and declared by the blessed apostle James, but only a rite received from the fathers, and a medicinal act, let him be accursed. Can. 2. If any shall say that the holy anointing of the sick does not confer grace, nor remit sins, nor relieve the sick, but that it has ceased, as if it were formerly only the grace of healing, let him be accursed. Can. 3. If any shall say that the rite and usage of extreme unction, which the holy Roman Church observes, is contrary to the sentence of the blessed apostle James, and therefore should be changed, and may be despised by Christians without sin, let him be accursed. Can. 4. If any shall say that the presbyters of the Church, whom St. James directs to be called for the sick among the群, and the other brethren of the church, but elders in age in any community, and that therefore the priest is not the only proper minister of extreme unction, let him be accursed" (Concil. Trident. sess. xiv, c. 1 sq.). The authority for this sacrament is given by the Council as follows: "This sacred anointment of the sick was instituted as a true and proper sacrament of the New Testament by Christ Jesus our Lord, being first intimated by Mark (vi, 13), and afterwards recommended and published to the faithful by James the apostle, brother of our Lord. There is any sick among you? Let him bring in the priests of the Church, and let them pray over him, anointing him with oil in the name of the Lord; and the prayer of faith shall save the sick man; and the Lord shall raise him up; and if he be in sins, he shall be forgiven him" (Jas. v, 14, 15). In which words, as the Church has learned by apostolical tradition, handed down from age to age, he teaches the matter, form, proper minister, and effect of this sacrament. For the Church understands the matter of the sacrament to be the oil, blessed by the bishop; the unction most fitly represents the grace of the Holy Spirit, where with the soul of the sick man is invisibly anointed. The form is contained in the words of administration. The ceremony must be performed by a priest. The oil must be olive oil consecrated by a bishop. No other substance can be used. The acts of consecration of the Oil and this its matter is most significant of its efficacy. Oil is very efficacious in soothing bodily pain, and this sacrament soothes and alleviates the pain and anguish of the soul. Oil also contributes to restore health and spirits, serves to give light, and refreshe fatigues; and these respects correspond with and are expressive of those produced, through the divine power, on the sick by the administration of this sacrament" (Catechism of Trent, Baltimore, 8vo, p. 295). The form of the ceremony is as follows: The priest, having dipped the thumb of his right hand in the holy unction proceeds to mark the organs of the five senses of the patient with the sign of the cross; and after each application he wipes the part with a ball of cotton, for which purpose he brings with him seven balls already prepared. The order observed is this: the right eye is first anointed, then the left eye, the ears, and after them the nostrils (not the tip of the nose) are attended to in the same order, then the lips; after which the palms of the hands and soles of the feet receive the touch of the consecrated unguent. Men are also anointed in the middle of the forehead and the back of the neck. At each application the priest says, "Pr hoc sacrum uctionem, et suam piissimam misericordiam indulget"
EXTREME UNCTION

426

Eye

Eye (ἡματία, ἀσία, from the idea of flowing [see below]: ἀσία λαμαξία). In most languages this important organ is used by figurative application, as the symbol of a large number of objects and ideas. In the East such applications of the word "eye" have always been uncommmon, and they were not adopted by the Hebrews. It may be serviceable to distinguish the following uses of the word, few of which are common among us except so far as they have become so through the translation of the Bible. (See Gesenius, Heb. Lex.; Womyns, Lexicon. 

(1.) A fountain. This use of the word has already been indicated. See Αἰκή. It probably originated from the eye being regarded as the fountain of tears.

(2.) Color, as in the phrase "and the eye (color) of the manna was as the eye (color) of lepidium" (Num. xi. 7). This originated, perhaps, in the eye being the part of the body which exhibits different colors in different persons.

(3.) The surface, as "the surface (eye) of the land" (Exod. x., 5, 15; Num. xx., 5, 11): the last is the passage which affords most sanction to the notion that ηματία means some places "face." This is the sense which our own and other versions give to "eye to eye" (Num. xiv., 14, etc.), translated "face to face." The phrases are indeed equivalent in meaning; but we are not to conclude that the Hebrews meant "face" when they said "eye," but that they chose the opposition of the eyes, instead of that of the face to express the general idea of "thine." Hence, therefore, we may object to the extension of the signification in such passages as 1 Sam. xvi., 12, where "beautiful eyes" (πρόσωπον ἐκπρόσωπον) is rendered "fair countenance."
EYE

EYE

showing his power. In like manner, in the same poet, "the eye of the army" stands for a good commandet (Olymp. vi. 19).

To keep anything as the apple or pupil of the eye is to preserve it with particular care (Deut. xxxii, 10; Zech. ii, 8).

Eye-service is peculiar to slaves, who are governed by fear only, and is to be carefully guarded against by Christians, who ought to serve from a principle of duty and affection (Eph. vi. 6; Col. iii. 22).

The expression in Psalm cxxii, 2, "As the eyes of servants look unto the hands of their masters," has suggested a number of curious illustrations from Oriental history and customs, tending to show that masters, even when in the presence of others, are in the habit of communicating to their servants orders and intimations by certain motions of their hands, which, although scarcely noticeable by other persons present, are clearly understood and promptly acted upon by the attendants. This custom keeps them with their attention bent upon the hand of their master watching its slightest motions. (See Kitto's Daily Bibl. Illustra. on Prov. vi. 13.)

The celebrated passage "Why beheldst thou the mote that is in thy brother's eye, and considerest not the beam that is in thine own eye" (Matt. vii, 3) has occasioned much waste of explanation. It seems much better to understand it as a hyperbolical proverbial expression, than to contend that as Joe fighters cannot literally mean "a beam," it must here signify something else, a disease, a thorn, etc. (see Dockridge and Campbell, in loc.). As a proverbial phrase, parallels have been produced abundantly from the Rabbins, from the fathers, and from the classics. See BLIND.

BLINDING THE EYES AS A PUNISHMENT OR POLITICAL DISSOLUTION was a heathen cruelty sometimes referred to in the Scriptures, and is found exhibited in the Assyrian monuments. The custom of putting out the eyes of captives especially was very common in the East (1 Sam. xi. 2). Thus Samson was deprived

of sight by the Philistines (Judg. xvi, 21), and Zedekiah by the Chaldees (2 Kings xxv, 7). In 1820 Rao Wilson saw a number of individuals at Acre who were disfigured in various ways, by a hand amputated, an eye torn out, or a nose which had been split, or partly or totally cut off. In 1826 two emirs had their eyes burnt out, and their tongues in part cut off, by the prince of Mount Lebanon, on account of their having been concerned in some disturbances against his government. In some cases the Orientals deprive the criminal of the light of day by sealing up his eyes with some kind of adhesive plaster (Isa. xlv. 40). See PUNISHMENT.

"PAINTING THE EYES," or rather the eyelids, is more than once alluded to in Scripture, although this scarcely appears to the Authorized Version, as our translators, unaware of the custom, usually rendered "eye" in place of "face," although "eye" is still preserved in the margin. So Jezreel "painted her eyes," literally
"Put her eyes in paint," before she showed herself publicly (2 Kings ix, 30). This action is forcibly expressed by Jeremiah (iv, 80). "Though thou renderst thine eyes with painting," Ezekiel (xxiii, 40) also represents this as a part of high dress: "For whom thou didst wash thyself, paintedst thy eyes, and deckest thyself with ornaments." The custom is also, very possibly, alluded to in Prov. vi, 25: "Lust not after her beauty in thine heart, neither let her take thee with her eyes." It certainly is the impression in Western Asia that this embellishment adds much to the languishing expression and seducement of the eyes, although Europeans find some difficulty in appreciating the beauty which the Orientals find in this adornment. (See Hartmann's Hebrews, ii, 149 sq.)

The following description of the process is from Lane's Modern Egyptians (i, 41-45): "The eyes, with very few exceptions, are black, large, and of a long almond form, with long and beautiful lashes, and an exquisitely soft, bewitching expression: eyes more beautiful can hardly be conceived: their charming effect is much heightened by the concealment of the other features (how ever pleasing the latter may be), and is rendered still more striking by a practice universal among the females of the higher and middle classes, and very common among those of the lower orders, which is that of blackening the edge of the eyelids, both above and below the eyes, with a black powder called kohl. This is a collyrium, commonly composed of the smoke-black which is produced by burning a kind of liban—an aromatic resin—a species of frankincense, used, I am told, in preference to the better kind of frankincense, as being cheaper and equally good for the purpose. Kohl is also prepared of the smoke-black produced from burning the shells of almonds. These two kinds, though believed to be beneficial to the eyes, are used merely for ornament; but there are several kinds used for their real or supposed medical properties, particularly the powder of several kinds of lead ore, to which are often added sarcome, long pepper, sugar-candy, fine dust of a Venetian sequin, and sometimes powdered pearls. Antimony, it is said, was formerly used for painting the edges of the eyelids. The kohl is applied with a small probe of wood, ivory, or silver, tapering toward the end, but blunt: this is moistened, sometimes with rose-water, then dipped in the powder and drawn along the edges of the eyelids: it is called mirred; and the glass vessel in which the kohl is kept, muskoholah. The custom of thus ornamenting the eyes prevailed among both sexes in Egypt in very ancient times; this is shown by the sculptures and paintings in the temples and tombs of this country; and kohl-vessels, with the probes, and even with the remains of the black powder, have often been found in the ancient tombs. I have two in my possession. But, in many cases, the ancient mode of ornamenting the kohl was a little different from the modern. I have, however, seen this ancient mode practised in the present day in the neighborhood of Cairo, though I only remember to have noticed it in two instances. The same custom existed among the Greek ladies, and among the Jewish women in early times."

Sir J. G. Wilkinson alludes to this passage in Mr. Lane's book, and admits that the lengthened form of the ancient Egyptian eye, represented in the paintings, was probably produced by this means. "Such," he adds, "is the effect described by Juvenal (Sat. ii, 98), Pliny (Ep. vi, 2), and other writers who notice the custom among the Romans. At Rome it was considered disgraceful for men to adopt it, as at present in [most parts of] the East, except medicinally; but, if we may judge from the similarity of the eyes of men and women in the paintings at Thebes, it appears to have been used by both sexes among the ancient Egyptians. Many of the kohl-bottles have been found in the tombs, together with the bodkin used for applying the moistened powder. They are of various materials, usually of stone, wood, or pottery; sometimes composed of two, sometimes of three or four separate cells, apparently containing each a mixture, differing slightly in its quality and hue from the other three. Many were simple round tubes, vases, or small boxes; some were ornamented with the figure of an ape or monster, supposed to assist in holding the bottle between his arms, while the lady dipped into it the pin with which she painted her eyes; and others were in imitation of a column made of stone, or rich porcelain of the choicest manufacture" (Ancient Egyptians, iii, 582). See PAINT.

Eylert, Reihemann Friedrich, was born at Hamm, in Prussian Westphalia, April 5, 1770. He studied theology at Halle, where he imbibed the moderate Baptist views of Niemeyer. In 1774 he became a preacher in his native city, in 1806 court preacher at Potsdam, and after the death of Sack in 1817 he be-
came superintendent, being at the same time appointed minister of public instruction. In his later years his theology assumed a positively orthodox character. He died Feb. 8, 1852. While at court he was the friend and counsellor of king Frederick William III, over whom he exerted a great influence, especially in the matter of the union of the Lutherans and the Pfarrkirchen; and of the Catholic Church or. He was a prolific writer. The most important of his works are, Betrachtungen ü. d. treflichen Wahrheiten des Christenthums, etc. (1804; 4th ed. 1834);—Hambel 2. d. Paradies Jenae (1806; 2d ed. 1819);—Predigten u. Bedürfnisse unseres Herzens (1853);—Angela Friedrich Wilhelm's III (1846-47). See Neuer Nekrologe d. Deutschen (1859).—Herzog, Real-Encyclop. iv. 295.

äméric, Nicolás, a Spaniard inquisitor, was born about 1520 at Gerona. He entered the Dominican order in 1538, and was made inquisitor general of Aragon in 1556. His zeal was too great even for his superiors, and he was removed from his office for a time, but after some years he returned to it. He was noted especially for his fierce pursuit of the partisans of Raymond Lull (q. v.). His Direcutorium Inquisitionis has been often reprinted (Roma, 1578, 1589, 1597, fol.; Venice, 1607). He died Jan. 30, 1607.—Quidict et Echard, Script. Ord. Pred. i, 716; Hoefer, Nouv. Biog. Générale, xvi. 867. See Inquisition.

Éyre, John, a minister of the Church of England, was born at Bodmin, Cornwall, January, 1754. He had a good elementary education, and at fifteen was bound apprentice to a clothier. Before the termination of his apprenticeship he embraced a religious life, and on returning to his father's house he commenced holding public religious meetings. His father was offended at this, and drove him from his house. He was soon after admitted into lady Huntington's College at Trevecca, and in 1778 he was appointed minister to her chapel at Mulberry Gardens, London. In the same year he entered Emmanuel College, Oxford, and in December, 1779, he was made curate of Westton. In 1781 he became curate of St. Galen's, Reading, and in 1792 of St. Luke's, Chelsea. In 1785 he became pastor of the Episcopal church at Hamerton, and opened a school there, which became very successful. He was very popular as a preacher, free from bigotry, and active in all schemes of benevolence. The Ecclesiastical Magazine and the London Missionary were originated and for a time edited by him. From the profits of the Ecclesiastical Magazine between the years 1791 and thirty thousand pounds were paid out for the support of widows of ministers of various denominations. He was also one of the founders of the London Missionary Society (q. v.), of the scheme of "Village Itinerancy," and of the Hackney Seminary for theological training. After a life of earnest piety and usefulness, he died March 29, 1835.—Morison, Missionary Fathers, p. 9.

Eyther, Michael, a minister of the Lutheran Church, was born in York County, Pa., May 16, 1814. He was principally educated at the institutions in Gettysburg, Pa., and was licensed to preach the Gospel in 1838. He labored in the ministry successively at Williamsburg, Greensdale, and Greensburg with great acceptance and success. He died Aug. 12, 1853. He was a man of rare promise, and, although comparatively young, had gained a strong hold upon the affections of the Church. In the pulpit his power over an audience was very great. He usually made a deep and an abiding impression. There was an originality and a freshness in his discourses not always present at the day. (M. L. S.)

Es. See Goat.

éz'ker, a less correct mode of Anglicizing (1 Chron. i, 88) the name Ezher (q. v.).

Éz'ba'î, many Ex'ba'î, some Es'ba'î (Heb. Eba'î), in pause E'ba'î, signifi uncertain; Sept. 'Ac'gi Vari. "Zeboi, Vulg. Åsav, the father of Naazai, which latter was one of David's thirty heroes (1 Chron. xi, 87). B.C. 1046. In the parallel list (2 Sam. xxiii, 35) the names are given "Paa'arait the Arbite," which Kennicott decides to be a corruption of the reading in Chronicles (Dissertation, p. 209).

b's'bon (Heb. Ebon, i Ex'baon, perhaps working), the name of two men.

b's'bao, E. (Heb. Ebon.) The fourth son of the patriarch Gad (Gen. xli, 16); called also (Num. xxvi, 16) Ozn (q. v.). B.C. 1856.

éz'ba'î, Sept. Å's'baov v. r. E's'baov, Vulg. E'von. The first-named of the sons (?) (descendants) of Bela, the son of Benjamin, according to 1 Chron. vii, 7. It is singular, however, that while Ebon is nowhere else mentioned among the sons of Bela, or Benjamin, he here appears in company with "Ts'bo, Iri, which is, nevertheless, not a Benjamite family, according to the other lists, but is found in company with Ebon among the Gadite families, both in Gen. xli, 16 (Eri, "Ir"), and Num. xxvi, 16. Were these two Gadite families incorporated into Benjamin after the slaughter mentioned Judg. xx? Possibly they were from Jabez-Gilead (comp. xxii, 12-14). See Deuter. xiv, Chron. vii, 2 seems to fix the date of the census as in king David's time. B.C. cir. 1020.

Esch'îas (E'sîaç), a mode of Anglicizing, in the Apocrypha, the name of two men.

1. The "son of Theocanus," and one of the two Israelitish leaders prominent in the reform under Ezra (1 Esdr. ix, 14); evidently the Jamashia (q. v.) of the Heb. text (Ezra x, 15).

2. One who is represented as having prayed for the chosen people in the time of Sennacherib (2 Esdr. vii, 40), obviously referring to king Hæzækæm (q. v.)

Esch'îas (E'sîaç), one of those who supported Ezra on the right while expounding the law (1 Esdr. ix, 14; Hilkiah (q. v.) of the parallel passage (Neh. viii, 4).

Es'îc'îs (E'sîc'îs), a Greekized form (Eccles. xlvii, 17, 22; xxiv, 4; Matt. i, 9, 10) of the name of king Hæzækæm (q. v.).

E'z'k'îel (Heb. Yezechel), Nebi, either meaning Whom God will strengthen or God will prevail, the name of two men.

Ez'k'îel (Heb. Yezechel). The head of the twentieth "course" of priests under David (1 Chron. xxiv, 16, where the name is Anglicized Jezekelez (q. v.)).

2. (İzîkîa, Josephus) Yezeichel, Ant. x, 5, 1) One of the four greater prophets. See Prophecy.

1. There have been various fancies about his name; according to Abnerban (Prof. in Ezech.), it implies "one who narrates the might of God to be displayed in the future," and some (as Villalpandus, Prof. in Ezech. p. x) see a play on the word in the expressions וּמָרָה, and וּמֵדָת (II, 7, 8, 9), whence the groundless conjecture of Sanctius (Prologem. in Ezech. p. 2, n. 2) that the name was given him subsequently to the commencement of his career as a prophet, Introduct. ad Bibl. Vet. Testam. ii, pt. iii, ch. v).

2. He was the son of a priest named Buzi (i, 8), respecting whom fresh conjectures have been recorded, although nothing is known about him (as archbishop Newcome observes) beyond the fact that he must have given his son a careful and learned education. The Rabbis had a rule that every prophet in Scripture was also a son of a prophet, and hence (as R. David Kimchi in his Commentary) they absurdly identify Buzi with Jeremiah, who, they say, was so called because he was rejected and despised. This tradition makes Ezekiel the servant of Jeremiah (Gregory Naz. Or. xvii), and Jerome supposes that the prophetic being contemporaries during a part of their mission
Instance, escaping from his enemies by walking dryshod across the Chebar; feeding the famished people with a miraculous draught of fishes, etc. He is said to have been murdered in Babylon by some Jewish prince (7 ο ροβάναος τού λαοῦ, called in the Roman martyrology for vii Id. Apr., "judex populi," Carpov. Intro. l. c.), whom he had convicted of idolatry; and to have been buried in a double tomb (σπηλαίων οίκων), the tomb of Shem and Arphaxad, on the banks of the Euphrates (Eph. De Viti et Mort. Prophet.). The tomb, said to have been built by Jeholachin, was shown a few days’ journey from Bagdad (Menasse ben Israel, De Resurr. Mor. p. 23), and was called "the abode of elegance" (habitaculum elegantiae). A lamp was kept there continually burning, and the autograph copy of the prophecies was said to be there preserved. This tomb is mentioned by Pietro de la Valle, and fully described in the Itinerary of R. Benjamin of Tudela (Hottinger, Thea. Phil. II. i, 3, Cipri Iberacri, p. 82). His tomb is still pointed out in the vicinity of Babylon (Layard’s Nineveh and Babylon, p. 427), at a place called Keflî; and Mr. Loftus is inclined to ac-
cept the tradition which assigns this as the resting-place of the prophet’s remains (Chaldæa, p. 26). The spire is the frustum of an elongated cone, tapering to a blunted top by a succession of steps, and peculiarly ornamented (ib.). A curious conjecture (discredited by Clemens Alexandrinus [Strom. I], but considered not impossible by Belden [Syntagm. de Dia Syr. ii, 120], Meyer, and others) identifies him with "Nazarītus the Assyrian," the teacher of Pythagoras. We need hardly mention the ridiculous suppositions that he is identical with Zoroaster, or with the Eîyōγîōς τῶν ιουδαίων ἐργαλείων φησίς ( Clem. Alexand. Strom. I; Eus. Prep. Enarr. ix, 28, 29), who wrote a play on the Exodus, called Εἰγύπτιον (Fabricius, Bibl. Græc. ii, 10). This Ezekiel lived B.C. 40 (Sixth Sen. Bibl. Sacct. iv, 255), or later.

4. But, as Hävernick remarks, "by the side of the scattered data of his external life, those of his internal life appear so much the richer." We have already noticed his stern and inflexible energy of will and character; and we also observe a devoted adherence to the rites and ceremonies of his national religion. Ezekiel is no cosmopolite, but displays everywhere the peculiar tendencies of a Hebrew educated under Levitical training. The priestly bias is always visible, especially in chaps. viii-xi, xi-xiviii, and in iv, 13 sq.; xx, 12 sq.; xxi, 8, etc. It is strange of De Wette and Gesenius to attribute this to a "contracted spirituality," and of Ewald to see in it "a one-sided conception of antiquity which he obtained merely from books and traditions," and a "depression of spirit (7) enhanced by the long continuance of the banishment and bondage of the people" (Hävernick’s Introd.). It was surely this very intensity of patriotic loyalty to a system whose partial suspension he both predicted and survived, which cheered the exiles with the confidence of his hopes in the future, and tended to preserve their decaying nationality. Mr. F. Newman is even more contemptuous than the German critics. "The writings of Ezekiel," he says (Hebr. Monarchy, p. 300, 2d ed.), "painfully show the growth of what is merely visionary, and an increasing value of hard sardotalism;" and he speaks of the "heavy materialism" of Ezekiel's Temple, with its priests, sacrifices, etc., as "tedious and monotonizing like Levitical itself." His own remark that Ezekiel’s predictions "so kept alive in the minds of the next generation a belief in certain return from captivity, as to have tended exceedingly towards the result," is a sufficient refutation of such criticism.

We may also note in Ezekiel the absorbing recognition of his high calling which enabled him cheerfully to endure any deprivation or misery (except indeed ceremonial pollution, from which he shrinks with characteristic loathing, iv, 14), if thereby he may give any warning or help to the Egyptians (iv, 15, 16, 17; comp. Jer. xxxvi, 7) the Babylonian yoke would be shaken off; and to assure them that the destruction of their city and Temple was inevitable and fast approaching. After this event his principal care is to console the captives by promises of future deliverance and return to their own land, and to encourage them by assurances of future blessings. His predictions against foreign nations stand between these two great divisions, and were for the most part uttered during the interval of suspense between the divine intimation that Nebuchadnezzar was being, or was to be, used by God (xxiv, 2) and the arrival of the news that he had taken it (ch. xxxiii, 21). The predictions are evidently arranged on a plan corresponding with these the chief subjects of them, and the time of their utterance is so frequently noted that there is little difficulty in ascertaining their chronological order. This order is followed throughout, except in the middle portion relating to foreign nations, where it is in some instances departed from to secure greater unity of subject (e. g. ch. xxix, 17). The want of exact chronological order in this latter part of the book, as to the order and number of prophecies respecting the manner in which the collection of the separate predictions was originally made. Jahn (Introd. p. 356) supposes that the predictions against foreign nations were placed in their present position by some transcriber in the order in which they happened to lie in the hand, and that he through forgetfulness omitted chaps. xxxiv, xxxviii, and xxix. Eichhorn (Einleitung, iii, 193) thinks it probable that the predictions were written on several greater or smaller rolls, which were put together in their present form without sufficient regard to chronological accuracy. Bertholdt (Einleitung, iv, 149, quoted by Hävernick) supposes that the collector of the whole book found two smaller collections already in existence (chaps. xxv-xxvii, and xxxii, 21-xxxiv), and that he arranged
the other predictions chronologically. All such hypotheses belong, as Havernick remarks, to a former age of criticism.

The arrangement, by whomsoever made, is very evidently intentional, and it seems on many accounts most probable that it was made by Ezekiel himself. This is maintained and in such connection with each other that every part has reference to what has preceded it. (3.) Historical notices are occasionally appended to the predictions, which would scarcely be done by a transcriber: e.g., the notice respecting himself in chaps. xi, xxiv, xxv, and the close of ch. xix, which Havernick translates "This is a lamentation and was for a lamentation." The whole book is divided by Havernick into nine sections, as follows:

1. Ezekiel's call to the prophetical office (ch. i–iii, 15).
2. The general carrying out of the commission, in a series ofложений and particular restrictions foretelling the approaching destruction of Judah and Jerusalem (ch. iii, 16–vii).
3. The rejection of the people because of their idolatrous worship; a series of visions presented to the prophet in the months later than the former, in which he is shown the Temple polluted with the worship of Adonias, the consequent judgment on the inhabitants of Jerusalem and on the priests, and closing with promises of happier times and a purer worship (ch. viii–xii).
4. The contents of the people rebuked in detail; a series of reproofs and warnings directed especially against the particular evils and prejudices then prevalent amongst his contemporaries (ch. xii–xiv).
5. The nature of the judgment, and the guilt which caused it; another series of warnings delivered about a year later, announcing the coming judgments to be yet nearer (ch. xx–xxiii).
6. The meaning of the now coming commencement of the predictions uttered two years and five months later, when Jerusalem was besieged, announcing to the captives that very day as the beginning of the siege (comp. 2 Kings xxxv, 1), and assuring them of the complete overthrow of the city (ch. xxiv).
7. God's judgment denounced on seven heathen nations (Ammon, xxv, 1–7; Moab, 8–11; Edom, 12–14; the Philistines, 15–17; Tyre, xxvi–xxxvii, 19; Sidon, 20–24).
8. After the destruction of Jerusalem a prophetical representation of the triumph of Israel and of the kingdom of God on earth (ch. xxxiii–xxxix).
9. The glorious consummation; a symbolic representation of Messianic times, and of the establishment and prosperity of the kingdom of God (ch. xi–xlviii). See § 3 below.

II. genuineness and completeness.—According to Jewish tradition, doubts were entertained as to the canonicity of the book on the ground of its containing some apparent contradictions to the law, as well as because of the obscurity of many of its visions. These, however, were removed, it is said, by Rabbi Hanaiah, who wrote a commentary on the book, in which all these difficulties were satisfactorily solved (Mishnah, ed. Surenhusius, Prag. ad Part. iv; Carpzov, Introd. p. 213). The testimony from his account: that the visions at the beginning and close of the book were forbidden to be read by those who were under thirty years of age (Carpzov, p. 212). Some Continental critics of the last century have impugned the canonicity of the last nine chapters, and have attributed them to some Samaritan or Hebrew who had returned in later times to the land of Judaea (Oeder, Freye Untersuchung über einige Bücher des A.T., Hal. Sax. 1771; Vogel, in his remarks on the above; and Corrodi, Beleuchtung des Jüdisch. und Christl. Bibelkenms., pt. i, p. 105, quoted by Rosenmuller, Schol. in Ezek. ad c. xi). These objections have been fully answered by Eichhorn (Einleistung, iii, 263), and others. Hahn has also taken notice of and answered some objections raised on the following grounds: (1) in the Monthly Magazine (1798), to the canonicity of chaps. xxv–xxxi, xxxv–xxxvi, xxviii–xix. A translation of Hahn's arguments will be found in Horne's Introd. iv, 222, old ed. These and similar objections have in no small weight or probability that we shall consider them with caution. The general mark of Gesenius in reference to the whole of Ezekiel's writings: "This book belongs to that not very numerous class, which, from beginning to end, maintains, by means of favorite expressions and peculiar phrases, such a one, as to make it impossible to prevent any suspicion that separate portions of it are not genuine" (Geschichte der Heb. Spr., p. 86). The canonicity of the book of Ezekiel in general is satisfactorily established by Jewish and Christian authorities. There is, indeed, no explicit reference to it, or quotation of it, in the New Testament; but in the Epistle to the Hebrews (Hebrews 4:1, 11:34) and in the Apocalypse (Revelation 1:1, 5:1) it is alluded to. The general Introd. (p. 218) mentions the following passages as having apparently a reference to this book: Rom. ii, 24; comp. Ezek. xxxvi, 21: Rom. v, 5; Gal. iii, 12; comp. Ezek. xxi, 11: 2 Pet. iii, 4; comp. Ezek. xii, 22, but none of these are quotations. The closing visions of Ezekiel are clearly referred to, though quoted, in the last chapters of the Apocalypse. The prophet Ezekiel is distinctly referred to by the son of Sirach (Ecclus. ciii, 8, and by Josephus (Ant. x, 5, 1; 6, 3, 7, 2, 6, 2). The book of Ezekiel is also mentioned as forming part of the canon in the catacomb of St. Felicio (Eusebius, Hist. Eccl. iv, 20), Origën (apud Euseb. l. c. vi, 25), Jerome (Proleg. Gaius. 9) and the Palimpsest (Ecclh. iii, 218, i, 126–137).

One of the passages of Josephus to which we have referred has occasioned much controversy and many conjectures, because he seems to affirm that Ezekiel had written two books of prophecies (Ant. x, 5, 1). According to the ordinary and, indeed, as it would seem, necessary interpretation of this passage, Ezekiel was the first who wrote two books respecting the Babylonian captivity. The question then arises, has one of his books been lost, or are the two now joined into one? The former supposition has been maintained by some in order to account for certain professed quotations from the prophet Ezekiel of passages which are not found in his writings at present. Thus Clemens Romanus (Epist. ad Cor. c. 6) refers to a book of Ezekiel, which is given more at length by Clemens Alexandrinus (Pedagogy, i, 10). Thus, again, Tertullian (De carne Christi, c. 23, p. 304, ed. Semler) says, "Legimus apud Ezekielicum de vacca illa quam peperit et non peperit." Other instances may be seen in Fabricius (Codex Pseudoepigraphus v. T., 2d ed., p. 1118), and quoted from him by Carpzov (Introd. pt. iii, p. 208). Both these critics, however, agree that the most probable explanation of such references is that they were derived from Jewish tradition. The latter hypothesis, that our present book was originally two, the second containing the last nine chapters, has received the support of very many critics (see Le Moyne, Vitræ Sacri, ii, 382; Carpzov, Introd. p. 206). This view, however, is not without serious difficulties. There is no evidence that the book, as at present existing, was ever considered two; and the testimony of some objections raised on the ground that the two books were received as sacred (Contr. Ajonum, i, 8), appears quite opposed to such a supposition, since in whatever way the division of the Old Testament into twenty-two books is made there cannot be two out of the number ascribed to Ezekiel (cf. Ezech. ii, 146) maintains that it is Jeremiah of whom Josephus speaks, a position to which we should at once assent if we could with him consider the words долипос as
equivalent to ὁ θεός. If this is what Josephus meant, we must suppose some corruption of his text. Becker omits the ὡς.

III. Interpretation.—The latter part of the book has always been regarded as very obscure. It will be seen, by the brief notices of the contents given above, that Hävernick considers the whole to relate to Mes- siah, the last rank of the prophets. The predictions respecting Gog (chaps. xxxvii, xxxix) have been referred by some to Anti- oclus Epiphanius; by others to Cambyses, to the Chal- deans, the Scythians, the Turks, etc. Mr. Granville Penn has interpreted them of Napoleon and the French (The Prophecy of Ezekiel concerning Gog, etc., 1816). See Guérin, Description of the Temple of Jerusalem (chap. xlviii) has been thought by many to contain an account of what Solomon’s Temple was; by others, of what the second Temple should be. (See Hävernick’s Commentar über Ezekiel, Erlangen, 1848.) The best interpretation of these predictions is to be found in that of the similar ones of the Apocalypse. See Tiele.

We cannot now enter into the difficulties of these or other chapters (for which we must refer to some of the commentaries mentioned below); but we will enumerate, following Fairbairns, the four main lines of interpretation, viz., 1. The Historico-literal, adopted by Vökel, Löse, Graf, and others. 2. The Prosopography, ascribed to Nazianzn (p. 401, and Gesenius (Mesches der Hebräischen Sprache, 1844), p. 389). 3. The Christian-critical, ascribed to the Greek, the Prophet’s work, etc., of which Tiele says: “A sort of vague and well-meaning announcement of farther good.” 4. The Jewish-critical (of Lightfoot, Hoffman, etc.), which maintains that their outline was actually adopted by the exiles. 4. The Christian-historical, followed by Luther, Calvin, Cocceius, and most modern commentators, which makes them “a great complicated symbol of the good God had in reserve for his Church.” Rosenmüller disapproves alike of the literalism of Grotius, and the arbitrary, ambiguous allegorizing of others, remarks (Schol. in xxxvii) (26) that it seems a useless task to attempt to refer these prophecies to distinct events, or to refer their special descriptions to naked fact. It is most safe to regard them, in accordance with the nature of allegorical representations and visions in general, as having a literal or material basis in the near past or future (i.e. recollections of Solomon’s Temple, and vision of hostile powers), which is made the vehicle of a high spiritual import, to set forth the distant grandeur, glory, and triumph of the kingdom of God. See Double Sense (of Prophecy).

IV. Style.—The depth of Ezekiel’s matter, and the marvellous nature of his visions, make him occasion- ally obscure. Hence his prophecy was placed by the Jews among the תָּרָצִים (treasures), those portions of Scripture which (like the early part of Genesis, and the Canticles) were not allowed to be read till the age of thirty (Jerome, Ep. ad Euseb. ; Origen, Proem. bonit. iv, in Cant. ; Hottinger, Thes. Phil. ii, 1, 5). Jerome compares the “inextricable babbil” of his writings to Virgil’s labyrinth (“Oceanus Scriptura- rum, mysteriorumque Del labyrinthus”) and also to the Catamassae. The Jews classed him in the very highest rank of prophets. Gregory Naz. (Or. 29) be- stows the loftiest encomiums upon him. Isidore (De viis et ob. Sanct. 39) makes him a type of Christ from the title “Son of Man,” but that is equally applied to Daniel (viii, 17). Other similar testimonies are quoted by Carpzov (Intro. 221 sqq.). The Semichim is said to have hesitated long whether his book should form part of the canon, from the occasional obscurity, and from the supposed contradiction of xxvii, 20 to Exod. xx, 5; xxxiv, 7; Jer. xxvili, 18. But, in point of fact, these apparent oppositions are the mere ex- pression of truths complementary to each other, as Moses himself might have taught them (Deut. xxix, 16). Although, generally speaking, comments on this book were forbidden, a certain R. Nanianus undertook to reconcile the supposed differences. (Spinoza, Tract. Theol. Polit. ii, 27, partly from these considerations, infers that the present book is made up of mere ἀναμνήσεις, but his argument from its commencement with a, and from the expression in i, s above al- luded to, hardly needs refutation.

That Ezekiel was a poet of a mean order is acknowledged by almost all critics (Lowth, De sacra Po- ëis Hebraeorum, ed. J. D. Michaelis, Göttingen, 1770, p. 421). Michaelis and Dathe are the only critics of any eminence (as far as we know) who think slightlying of his poetical genius. The question is altogether one of taste, and should therefore be decided by com- mon consent against Michaelis. He remarks more truly that Ezekiel lived at a period when the Hebrew language was declining in purity, when the silver age was succeding to the golden one. It is, indeed, to the matter rather than the language of Ezekiel that we are to look for evidence of poetic genius. The style is often simply didactic, and he abounds in peculiarities of expression, Aramaisms, and grammatical anomalies which, while they give individuality to his writings, plainly evince the decline of the language in which he wrote. An extended account of such pecu- liarities is given by Eichhorn in das A. T. iii, 196 and Gesenius (Grammar of the Hebrew Sprache, 1844), p. 55. Among the most splendid passages are ch. i (called by the Rabbi רֲבָבָה, the prophecy against Tyrus (ch. xxvi-xxvii)), that against Assyria, “the noblest monument of Eastern history” (ch. xxxi), and ch. viii, the account of what he saw in the Temple porch,

"When, by the vision led,
His eye surveyed the dark idolatries
Of alienated Judah.”

Milton, Par. Lost, i.

V. Commentaries.—The following are special exegetical works on the entire book; the most important have an asterisk (*) prefixed: Origen, Commentarii, etc. (in Opera, iii, 351 sqq., 406); Ephraem Syrus, Ex- planatio (in Opera, v, 169); Gregory Nazianzen, Sig- nificatio (in Opera Spuri, i, 870); Jerome, Commenta- rii, etc. (in Opera, v); Theodoret, Interpretatio (in Opera, ii, 11; also Rome, 1665, fol.); Gregory the Great, Commentarius (Paris et Romae, 1714); Bahan, Commentarius (in Opera): Ruperti, In Ezek. (in Opera, p. 489); Ecce- lampadius, Commentarius (Basil. 1534, 4to; 1534, 8vo; Argent. 1634, 4to); Strigel, Scholia (Lips. 1669, 1676, 1679, 8vo); Calvin, Annotationes (Geneva, 1655, 8vo, and 1694); French, Genev. 1655, 8vo, and 1698; J. Edinb. 1849-60, 2 vols. 8vo); Junius, Commentarius (Genevol. 1600, 60. 1610, 8vo); Malalas, in Ezek. (in his Commentarii, p. 542); Seinercke, Auslegung (Lips. 1667, 4to); Pinto, Commentarius (Salam. 1668, fol., and later); Lavater, Commentarius (Geneva, 1757, fol.); Serranus, Commentarius (Antw. 1857, 1607, fol.); Heilbrunner, Questiones (Laving. 1587, 8vo); Abraham ben-Mose, Übersetzung (Prag. 1692, 4to); *Pradus and Villaiianus, Explanationes (Rome, 1666, 5 vols. fol.); *Poli, Commentarius (Geneva, 1699, fol, 1610, 8vo); *Lapicius, in Ezek, in his Commentarii); Sansitius, Commentarius (Leud. 1612, 1619, fol.); Retsch, Commentarius (Basil. 1621, 4to); *Greenhill, Exposition (London, 1645-67, 5 vols. 4to; also 1827, 1863, 8vo; in Dutch, Hague, 1782-4, 4 vols. 4to); Cocceius, Commentarius (Leud. 1668, 4to; Amst. 1700, fol.); Henrich, Tonia (Rotbenh. 1687, 8vo); Petersen, Zeugniss (Freib. 1719, 4to); *Lowth, Commentary (London, 1729, 4to); *Starck, Commentary (Facett. ad M. 1731, 4to); *Vogel, Weisung (Hamb. 1772, 4to); *Vol- borth, Anmerk. (Göt. 1677, 8vo); Newcome, Explica- tion (Dub. 1788, 8vo, and since); Venema, Lectiones (Leov. 1720, 4to); *Notius, Commentarius (Leud, i, 65); Hanter, Consideration (in Works, ix, 739); *Ros- senmüller, Scholia (Lips. 8vo, 1808-10, 2 vols. also;
Enez (Heb. E'tsem, 3548) 2 a less incorrect mode (1 Chron. iv, 29) of Anglicizing the name Ezem (q. v.), as elsewhere (Job. xiv, 5). Ezem. See Ezetne.

Ezer (Heb. E'tser, 3543; treasure; Sept. A'zib, Vulg. Eser). one of the sons of Seir, and native princes of Mount Hor (Gen. xxxvi, 21, 27, 30; 1 Chron. i, 42, 38), in which last verse the name is Anglicized "Ezer". B.C. c. 1597.

Ezer (Heb. E'tser, 3543; 3537; Ezer). the name of five men. See also Roman- ti-ezer; Eben-ezer.

1. (Sept. E'ziq v. r. A'ziq, Vulg. Eser.) A person named with Eled (q. v.) as a son (or descendant) of Ephraim, who was slain by the aboriginal inhabitants of Gath while engaged in a foray on their cattle (1 Chron. vii, 21). Ewald (Gesch. I. c. i, 400) assigns this occurrence to the pre-Egyptian period. B.C. ante 1658.

2. (Sept. E'ziq v. r. A'ziq, Vulg. Eser.) The father of Hushah, one of the posterny of Hur, of the tribe of Judah (1 Chron. iv, 14). B.C. cir. 1658. In ver. 17 he appears to be called Ezem, but no such son occurs among the list of those there attributed to him.

4. (Sept. A'ziq v. r. A'ziq, Vulg. Ezer.) Son of Josheb, and ruler of Mizpah, who repaired part of the city wall near the armory (Neh. iii, 19). B.C. 446.

5. (Sept. I'ziq, Vulg. Ezer.) One of the priests who made the circuit of the newly-finished walls of Jerusalem (Neh. xii, 42). B.C. 446.

Ezer'ias (q. E'ziqias v. r. Zziaias, Vulg. A'ziqias). the son of Helchiah and father of Seraiah, in the ances-

try of Esdras (1 Esdr. viii, 1); evidently the high-priest Azariah (q. v.) of the Heb. text (Ezra vii, 1).

Ez'ias (q. E'tziq v. r. O'ziqis, Vulg. A'zahel), the son of Meremoth and father of Amarias in the same genealogy (1 Esdr. viii, 2); evidently the corresponding Azariah (q. v.) of the Hebrew list (Ezra vii, 3). Comp. Aziel.

Ezion-geber (Heb. E'tyon-Geb'er, 3562) [in this form only at 1 Kings ix, 26; 2 Chron. vii, 17], i. q. g'mim's back-bone; Sept. Παιβ (in Deut. xxxiv.) Vaibip [in Chron. Paibiq], but in 1 Kings xiv in Παξιμιν Παξιμιν, Vulg. Asiagon bar) or E'ziON-GA'BER (being "in pause," Heb. E'tyon-Geb'er, 3562) [in 1 Kings xx, 49; 2 Chron. xx, 36, fully "3562"] so found also at Num. xxxiii, 86; Deut. ii, 8; but Anglicized "Ezion-geber" in 1 Kings xxii, 48 (49), a very ancient city near Elath (q. v.), on the modern arm of the Red Sea. Jonathan's Targarum, following a false etymology, defines the name as i. q. "castle of the cock" (see Buxtorf, Lex. Chald. col. 384; Beck, Chron. Chalda. paraphr. ii, 101). It is first mentioned in Num. xxxiii, 85 as one of the stations where the Hebrews halted in their journeyings through the wilderness. In the last place named before they came to "the wilderness of Zin, which is Kadesh," and the point where they afterwards turned from the "Arabah to Elath, towards the wilderness of Moab" (Deut, ii, 8). See Ezion-geber.

Ezau (Heb. Ezau, Ἕξαος Kings ix, 26) sent the fleet which he had there built to the land of Ophir. See Commerce. Here also Josaphat (1 Kings xxii, 47; 2 Chron. xx, 85) built a fleet "to go to Ophir"; but because he had joined himself with Azahiah, "king of Israel, who did wickedly," the ships were broken that they were not able to go to Tarshish, being probably destroyed on the rocks which lie in "jagged ranges on each side" (Stanley, Sinai and Palestine, p. 84). Bütsching (Erdbesch. v. i, 620) erroneously locates it at Sharam, a port at the southern end of the gulf (Geogr. Neb. iii, 5). Wellsted (Travels, ii, 153) would find it in the modern Dahab, but this is the ancient Dibathah (q. v.). Laborde (Comentaire Geog. p. 124) seeks it in the rocky island el-Kurayjah, which is hardly adequate in extent or position; and Rüppel (Arab. p. 252) locates it at the mouth of the Erez, i.e. el-Jawwik, which is liable to the same objection. Josephus (Ant. viii, 4, 4) says that Ezion-geber (Ar'sawiyajibapos) was also called Berenice, and that it lay not far from Elath. It is probably the same with the once-populous city Agria in Burchard, p. 518; Robinson (Biblical Researches, i, 250) says "No trace of Ezion-geber remains now to remain, unless it be in the name of a small wady with brackish water, el-Ghudjim, opening into el-Arabah from the western mountain, some distance north of Akabah." It is doubtful, however, whether the sea ever extended so far up the Arabah as this. It was probably situated at the point where the Hajar route strikes the Arabah at the north-west point of the gulf (Robinson, i. c. 239). Yet the town may have given name to this the nearest spring, for Ghudjim in Arabic corresponds in all the essential letters to Ezion in Heb., which is identical with the later Agria. By comparing 1 Kings ix, 26, 27, with 2 Chron. viii, 17, 18, it is probable that timber was floated from Tyre to the nearest point on the Mediterranean coast, and then conveyed over land to the head of the Gulf of Akabah, where the ships seem to have been built; for there can hardly have been adequate forests in the neighborhood. Dr. Wilson noticed fragments of an old caravanserai route part way up the hill-side in this vicinity (Lands of the Bible, i, 264). See Wilderness of the wandering.
vid's body-guard; and if considered as a gentle adj., must mean an inhabitant of Ezem, a place otherwise unknown. But of the words rendered "Adino the Enite" (25:17, 28, 30; 26:42; 1 Chron. 26:42), Vulg. quasi tennirius iuri iuridicis, as if understanding the latter term to be a form of *xw, wood*, Gesenius (Heb. Lex.) regards the former as a peculiar alliteration for *zgeb*, in the sense of "be brandished," from the root *zqg*, to be pictant; and the latter as a rare word, *xg*, a spear (for which sense he finds analogy in the Arabic); and thus the whole phrase will be equivalent to that in the parallel passage (1 Chron. xxv, 11), which otherwise we must here interpolate (with our translators) in order to make sense. These words do not contain the name of a person is clear from the fact that Jashobeam is given in the parallel passage, and is capable of identification [see Jashobeam], and also from the enumeration, in which the two meritorious grades of three each, with the 30 warriors specially enumerated, require just this one special officer to make up the number of 37 specified in the text as peculiarly distinguished. See David. The passage in 2 Sam. is conceded to be less trustworthy than that in 1 Chron., even by Davidson, who vainly contends (Saec. et gent. Israel. p. 465) for Adino as a proper name. [See at length in Kennicott, Dissertation, 1, 71-128; Gesenius, Thes. Heb. p. 994-5.] Compare Adino.

Ezra. See Hysros.

Ezra (Heb. [except in No. 1] Ezra, עזרא, the hlep, a Chaldean emphatic form of עזר, Ezar), the name of three or four men.

1. (1 Chron. iv, 17.) See Ezrah.

2. (Sept. עזרא v. ר' עזרא, Vulgate Edecras.) A leading priest among the first colonists to Jerusalem under Zerubbabel (Neh. xii, 1). B.C. 536. His son Meshullam was chief of his family in the time of the high-priest Joakim (Neh. xii, 12). In the somewhat parallel list of Neh. x, 2-8, the name of the same person is written עזרא, Azariah, as it is probably in Ezra vii, 1.

3. (Sept. עזרא v. ר' עזרא, Josephus' עזרא, Vulgate Edecras.) The celebrated Jewish scribe (*Bd*) and priest (*G*) who, in the year B.C. 450, led the second expedition of Jews back from the Babylonian exile into Palestine, and the author of one of the canonical books of Scripture.

Parentage.-Ezra was a lineal descendant from Phinehas, the son of Aaron (Ezra vii, 1-5). He is stated to be the son of Seraias, the son of Azariah; which Seraias was slain at Riblah by order of Nebuchadnezzar, having been brought thither a captive by Nebuzaradan (2 Kings xxv, 18-21). See Seraias. But, as 130 years elapsed between the death of Seraias and the departure of Ezra from Babylon, and we read that a grandson of Seraias was the high-priest who accompanied Zerubbabel on the first return to Jerusalem, seventy years before Ezra returned thither, we may suppose that by the term *son* here, as in some other places, the relationship of great-relationships, or of a still more remote direct descendant, is intended. See Father. All that is really known of Ezra is contained in the last four chapters of the book of Ezra, and in Neh. viii and xii, 26. In addition to the information that he was a "scribe of the books of the law of Moses," "a writer of the words of the commandments of the Lord and of his statutes to Israel," "a scribe of the law of the God of heaven," and "a priest," we are told by Josephus that he was high-priest of the Jews who were left in Babylon; that he was particularly conversant with the laws of Moses, and was held in universal esteem on account of his righteousness and virtue (Ant. xi, 6, 1).

2. Scriptural History.—The rebuilding of the Temple of Jerusalem, which had been decreed by Cyrus in the year B.C. 536, was, after much powerful and vexatious opposition, completed in the reign and by the permission of Darius Hystaspis, in the year B.C. 517.

The origin of Ezra's influence with the Persian king Artaxerxes Longimanus does not appear, but in the seventh year of his reign, B.C. 450, in spite of the unfavorable report which had been sent by Rehum and Shimshai, he obtained leave to go to Jerusalem, and to take with him a company of Israelites, together with priests, Levites, singers, porters, and Nethinim. Of these a account is given in 2 Chron. iii, 1 to 7, is given in Ezra viii; and these, also, doubtless form a part of the full list of the returned captives contained in Neh. vii, and in duplicate in Ezra ii. Ezra and his companions were allowed to take with them a large free-will offering of gold and silver, and silver vessels, contributed not only by the Baby themselves, but by kings, princes, and their counsellors. These offerings were for the house of God, to beautify it, and for the purchase of bullocks, rams, and the other offerings required for the Temple-service. In addition to this, Ezra was empowered to draw up a complete register of all the captives from the Persian throne, so that, when further supplies he might require; and all princes, Levites, and other ministers of the Temple were exempted from taxation. Ezra had also authority given him to appoint magistrates and judges in Judah, with power of life and death over all offenders. The reason of the gift was that the worship of God at this time, as evinced by Artaxerxes appears to have been a fear of the divine displeasure, for we read in the conclusion of the decree of the treasurers beyond the river, "Whatsoever is commanded by the God of heaven, let it be diligently done for the house of the God of heaven; for why should there be reproach against the realm of the king and his son?" We are also told (Ezra vi, 6) that the king granted Ezra all his request; and Josephus informs us that Ezra, being desirous of going to Jerusalem, requested the king to grant him recommendationary letters to the governor of Syria (Ant. xi, 4, 1). We may therefore suppose that the dread which Artaxerxes entertained of the divine judgments was the consequence of the exposition to him by Ezra of the history of the Jewish people. Some writers suppose that this favor shown to the Jews was consequent to the seventh year of his reign; but this could not be, even if we should grant, what is unlikely, that the Artaxerxes of the book of Ezra and the Artaxerxes of the book of Esther were the same person, because Ezra set out for Jerusalem in the first month of the seventh year of the reign of Artaxerxes, and Esther was brought into the king's house in the tenth month of the seventh year of the reign of Ahasuerus, and did not declare her connection with the Jewish people, and obtain favor for them until after the plot of Haman, in the twelfth year of Ahasuerus. See Ahasuerus. Ezra assembled the Jews who accompanied him on the banks of the river Ahava, where they halted three days in tents. Here Ezra proclaimed a fast, as an act of humiliation before God, and a season of prayer for divine direction and safe conduct; for, on setting out, he was ashamed to request force of soldiers and horsemen to help them against the enemy by the way," because he had asserted to the king that the hand of his God is upon them that seek him for good. Ezra next committed the care of the treasures which he carried with him to twelve of the chief priests, and ten of their brethren, and charged these to take charge of the treasures by the way, and deliver them safely in the house of the Lord at Jerusalem. On the twelfth day from their first setting out Ezra and his companions left the river Ahava, and, after they had arrived safely at Jerusalem, it having been delivered from the hand of the enemy and of such as lay in wait by the way. Three days after their arrival the treasures were weighed and delivered
into the custody of some Levites. The returning exiles offered burnt-offerings to the Lord. They delivered also the king's commissions to the viceroy and governors, and gave needful help to the people and the ministers of the Temple.

Ezra had been granted him at his own request (ver. 6), and it appears that his great design was to effect a religious reformation among the Palestinian Jews, and to bring them back to the observance of the law of Moses, from which they had grievously strayed. Ezra, therefore, was sent to enforce a separation from their wives of all who had made heathen marriages, in which number were many priests and Levites, as well as other Israelites. For this an opportunity soon presented itself. When he had discharged the various trusts committed to him, the priests and the Jews consulted, and determined that the Jewish people generally who had returned from the captivity, and also the priests and Levites, but especially the rulers and princes, had kept themselves separate from the people of the land, but had done according to the abominations of the remnant of the nations whom their forefathers had driven out, and married their daughters, and allowed their children to intermarry with them. On this report Ezra evinced his deep affliction, according to the Jewish custom, by rending his mantle and tearing the hair of his head. Ezra gathered together all those who still feared God, and dreaded his wrath for the transgression of those whom he had brought back from captivity. Having waited till the time of the evening sacrifice, Ezra rose up, and, having again rent his hair and his garments, made public prayer and confession of sin. The assembled people went bitterly, and Shecaniah, one of the sons of Elam, came forward to propose a general covenant to put away the foreign wives and their children. Ezra then arose and administered an oath to the people that they would do accordingly. Proclamation was also made that all those who had returned from captivity should within three days gather themselves together to Jerusalem, under pain of excommunication and forfeiture of their goods. The people assembled at the time appointed, trembling on account of their sin and of the heavy rain that fell. Ezra addressed them, declaring to them their sin, and exhorting them to amend their lives by dissolving their illegal connections. The people acknowledged the justice of his rebukes, and promised obedience. They then requested that, as the rain fell heavily, and the number of transgressors was so great, he would come to them at which they might severally come to be examined respecting this matter, accompanied by the judges and elders of every city. A commission was therefore formed, consisting of Ezra and some others, to investigate the extent of the evil. This investigation occupied three months. Josephus relates the affecting scene which occurred on the reading of the law by Ezra (Ant. xi, 5, 5). The account given by Josephus agrees with that of Nehemiah in all leading particulars, except that Josephus places the date and occasion in the Athenæum of Xerxes (Ant. xi, 6).

With the detailed account of this important transaction Ezra's autobiography ends abruptly, and we hear nothing more of him till thirteen years afterwards, in the twelfth of Artaxerxes, we find him again at Jerusalem with Nehemiah the "Tishahith." B.C. 446. It is generally assumed that Ezra came to assume the governorship over Nehemiah superseded him, but as Ezra's commission was only of a temporary nature, "to inquire concerning Judah and Jerusalem" (Ezra vii, 14), and to carry thither "the silver and gold which the king and his counsellors had freely given unto the God of Israel" (ver. 15), and as there is no trace whatever of his presence at Jerusalem between the eighth and the twelfth of Artaxerxes, it seems probable that after he had effected the above-named reform, and had appointed competent judges and magistrates, with authority to maintain it, he himself returned to the king of Persia. This is in itself what one would expect, and what is borne out by the parallel case of Nehemiah, and it also accounts for the abrupt termination of Ezra's narrative, and the gradual lapse of the Jews into their former irregularities which is apparent in the book of Nehemiah. Such a relapse, and such a state of affairs at Jerusalem in general, could scarcely have occurred if Ezra had continued in presence of the king there. Whether he returned to Jerusalem with Nehemiah, or separately, does not appear certainly, but as he is not mentioned in Nehemiah's narrative till after the completion of the wall (Neh. viii, 1), it is perhaps probable that he followed the latter some months later, having, perhaps, been sent for to aid him in his work. The functions be executed under Nehemiah's government were purely of a priestly and ecclesiastical character, such as reading and interpreting the law of Moses to the people during the eight days of the feast of Tabernacles, praying in the congregation, and assisting at the dedication of the wall, and in promoting the religious worship in which he first placed the first stone of the temple.

But in such a filled the first place, being repeatedly coupled with Nehemiah the Tirshatha (viii, 9; xii, 20), while Elíasib the high-priest is not mentioned as taking any part in the reformation at all. In any case, it is evident that the book of Ezra, while it perhaps sealed under the patronymic Serahiah or Azariah (v, 2). In Neh. viii we read that, on the occasion of the celebration of the feast of the seventh month, subsequently to Nehemiah's numbering the people, Ezra was requested to bring the book of the law of Moses; and that he read therein standing upon a pulpit of wood, which raised him above all the people. As Ezra is not mentioned after Nehemiah's departure for Babylon in the thirty-second of Artaxerxes, and as everything fell into confusion during Nehemiah's absence (Neh. xiii), it is not unlikely that Ezra may have again returned to Babylon before that year. See NEHEMIAH.

3. Traditiory Acts.—Josephus, who should be our next best authority after Scripture, evidently knew nothing about the time or the place of his death. He vaguely says, "He died an old man, and was buried in a magnificent mausoleum at Jerusalem" (Ant. xiii, 9), and places his death in the high-priesthood of Joacim, and before the government of Nehemiah! According to some Jewish chroniclers, he died in the year in which Alexander came to Jerusalem, on the tenth day of the month Tebeth (that is, the January in December), in the same year in which took place the punishment of the prophets Haggai, Zechariah, and Malachi, and in which prophecy became extinct. According to other traditions, Ezra returned to Babylon and died there at the age of 120 years. The Talmudic statement is that he died at Zamzuma, a town on the Tigris, while on his road from Jerusalem to Babylon, whether he was going to converse with Artaxerxes about the affairs of the Jews. Thus Benjamin of Tudela says of Nahar Samarah (apparently Zamzuma, otherwise Zamzum): "The pulchro de Ezra the priest and scribe is in this place, where he died, on his journey from Jerusalem to this Artaxerxes" (Travel. i, 116). A tomb said to be his is shown on the Tigris, near its junction with the Euphrates (Layard, Nin. and Bab. p. 428, note). An interesting description of this tomb is given by Kitto (Pict. Bible, note at the end of Ezra).

As regards the traditional history of Ezra, it is extremely important to judge what portion of it has any historical foundation. The principal works ascribed to him by the Jews, and, on the strength of their testimony, by Christians also, are the following:

(1.) Some traditions assert that Ezra was, about A. M. 3113, the president of the , Synagogos Magoas, and the father of all Mishine doctors.
The book of Ezra is introduced in the context of the Babylonian captivity and exile. Ezra is described as a learned and zealous leader who returned to rebuild the Temple and revitalize the Jewish religious and cultural life. The book is structured into two main parts:

1. The first part (Ezra 1-7) focuses on the return of the exiles and the rebuilding of the Temple, culminating in Ezra's appointment as governor.

2. The second part (Ezra 8-10) describes Ezra's journey to Jerusalem and his subsequent leadership in maintaining religious purity.

Key themes include the return to Jerusalem, the rededication of the Temple, and the efforts to maintain Jewish faith and practices. Ezra's leadership is highlighted as a pivotal moment in the post-exilic history of Judah, setting the stage for the future of the Jewish community.
stration, only reserving the temporal supremacy of the Persian monarchy (ch. vii, viii). Lastly, the reconstruction of this theocratic state, which Ezra effected so completely that he carried the people with him in remoulding the family relations by the law against intermarriage with certain races (ch. ix, x).

III. Ezra's Books. The Ezra books seem general and still stands on its own; and there is no room for the hypothesis that Chronicles, Ezra, and Nehemiah, taken together, form one great historical work. The arguments for this hypothesis are of no weight in themselves; but in so far as the statements of fact, they are willingly put forward by us as circumstances worthy of consideration in themselves, and apart from the illogical purpose to which they have been applied. 1. The three books have a large number of words and phrases in common, which are not met with in the other parts of Scripture. This agrees well with their composition at a new epoch in the history of the Hebrew nation and its literature, by men who had been brought up in the land of Assyria or Babylon, perhaps brought up together at the same Persian court, Ezra and Nehemiah, and also most intimately connected with the same evangelist. The opinion is also probable that the Chronicles were compiled by Ezra, as well as the book to which his own name has been given. 2. There is a predilection for genealogical details running through all three books to have the characteristic of the age; and it was probably necessary, considering the efforts to restore the old arrangements as to the holding of property, the administration of government, and the preservation of ancient national feeling, all of which objects were likely to force genealogical questions upon the scribes of men. 3. There is a similar prominence given to details about the priests and Levites. This is unavoidable in any treatment of the people of Israel, unless their character as the Church of God is to be overlooked. Especially, in whatever proportion there were difficulties felt as to the revival of the more political aspects of the theocracy, in that same proportion must the greater attention have been given to its ecclesiastical arrangements.

IV. Authorship. A late ingenious writer (Rev. and Lord). In Smith's Dict. of the Bible, s. v.) pronounces on this question: "Like the two books of Chronicles, this consists of the contemporary historical journals kept from time to time by the prophets, or other authorized persons, who were eye-witnesses for the most part of what they record, and whose several narratives are strung together according to either an abridged or added to, as the case required, by a later hand. That later hand, in the book of Ezra, was doubtless Ezra's own, as appears by the last four chapters, as well as by other matter inserted in the previous chapters. While, therefore, in a certain sense, the whole book is Ezra's, as put together by him, yet strictly only the last four chapters are his original work. Nor will it be difficult to point out with tolerable certainty several of the writers of whose writings the first six chapters are composed. Accordingly, that writer, to justificate many of the statements, proceeds to dissect the book for this purpose. 1. Chap. ii. he assigns as being undoubtedly by Daniel, on account of the otherwise untenable silence of that prophet respecting the decree of Cyrus, and the phraseology of Ezra in referring to that event. 2. Chap. ii. is assigned to the same hand as being identical with Nahum. 3. Chap. iii, 2-6 (except iv, 6-23), he thinks belongs to Haggai, on account of certain coincidences of expression in that prophet. 4. Chap. iv, 6-23, he regards as a parenthetical addition made in the reign of Artaxerxes Longimanus, and as not originally Ezra's own production. A still later critic (Dr. Davidson, in the new edit. of Kitto's Cyclopedia of Bible Lit., s. v.) is even bolder in distributing various por-

It is a sufficient refutation of all such attempts to note their extremely subjective character, depending chiefly upon the caprice or conjecture of the critic himself; for the peculiarities cited, when closely examined, are far from being general and still more are not to be relied upon as proofs of authorship, especially in view of the foregoing remarks respecting the scheme of the book. Moreover, if, as all admit, Ezra did incorporate older documents into his history (so even Moses does in the Pentateuch), yet, as he moulded them into a homogeneous whole, this does not militate against his claim to be regarded as the proper author, and not simply editor of the book that bears his name. (See the Einleitung of Hävernick and Keil.)

V. Personality of the Writer. — In the first six chapters the use of the third person predominates in the narrative, except in passages where, by synecdoche, occurs חמש, Heb. ומש, w. sued, or where the narrative contains abstractions from documents to which Ezra had access, or by which he was guided, or Chaldee language of the original documents has been preserved from ch. iv. 8 to vi. 18, and vii. 12-26. These portions exist in Kennicott's Cod. p. 246, in a collateral Hebrew translation, reprinted in Kennicott's edition of the Hebrew Bible, and separately in Chaldeorum Canticum et Ceven et Pseudo-Danielis et Ceven et Ceven et Pseudo-Danielis et Ceven by J. T. R. Van- dœnec Schulze, Halæ, 1782, 8vo. 8vo. An argument has been raised against the opinion that Ezra was the author of the book that bears his name from the use of the first person plural in the 4th verse of the 5th chapter, which would seem to imply that the narrator was present on the occasion described; but, setting aside other replies to this argument, it appears that the word se refers to Tatnai and his companions, and not at all to the Jews. Ezra speaks from ch. vii. 27, to ch. ix. 15, in the first person. "There is an essential difference between public events which a man recollects, though only as in a dream, to have heard of at the time when they occurred, and those which preceded his birth. The former we think of with reference to ourselves; the latter are foreign to us. The epoch and duration of the former we measure by our own life: the latter belong to a period for which our imagination has no scale. Life and definiteness are imparted to all that we hear or read with respect to the events of our own life" (Niebuhr, On the Distinction between Annals and History). These remarks, which Niebuhr made in reference to Tacitus, are in a great measure also applicable to Ezra, inasmuch as the similar change of person are so frequent in ancient authors that rhetoricians have introduced it among the rhetorical figures under the name of 'false personae. The prophetic writings of the Old Testament furnish examples of such 'ιαλλαγια. For instance, Ezek. i, 1-3; Zech. i, 1; vi. 1; vii. 1. 4; Jer. xx. 1 sq. comp. with vi. 7 sq.; xxii. i, xxvii. 1-5; xxxii. 1-8; Hos. 1-2; i. 3. So also in Habakkuk, Dan-iel, etc. The frequency of this 'ιαλλαγια, especially in the prophetic parts of the Old Testament, arises from either the mere objective or merely subjective ten- dency of the style, which of course varies in harmony with the contents of the chapter. (See Fromman, Diag. qua Orientis regium numero de se logy non imitatam fuisse, probabilius ostenditur, Cod. 2. 1762.)

We express our opinion that even Hävernick does not rightly set the truth of the view of Dr. Grotius's Einleitung, he says that this 'ιαλλαγια arose from Ez- ra's imitation of the prophetic usage, and when he approvingly quotes Schirmer's Observationes exegeticae et criticæ in hebræum Edrei, i. 8 (Vratil. 1830). There was certainly as little imitation of the prophets in the false personae of Ezra as there is imitation of the prophets if we change from the first to the third person in our own communications. 'ιαλλαγια never arises.
from imitation, but only from the more subjective or more objective turn of our mind, and from that vivacity of style which renders it incumbent upon the reader rather than upon the writer to supply that which, as in Jonah ii, 3, forms the transition from the use of the third to the adoption of the first person.

As regards the date, the reckoning of some writers that this composition as a whole must be referred to a period about a century later than Ezra, or more, need not be noticed, because they have not even a pretence of argument in their favor. One writer, Zunz (Die pittischen. Vorträge der Juden, 1832,) has indeed alleged some exaggeration about the sacred vessels said to have been restored by Cyrus; but his fellow-untellers have refused to agree with him, and have defended the historical credibility of the book throughout. Another critic, Bertheau, sees an evidence of the composition of ch. vi, 22 under the Greek successors of Alexander, because the king of Persia is called the king of Assyria; an argument which might have been left to its own weakness, even though we had been unable to give the parables 2 Kings xxiii, 29; Lam. v, 6, as Keil has done.

Such critical questions, who rely on their internal arguments might have seen evidence in favor of its early composition in the fact that its chronology is clear and exact; while the accounts of Jewish affairs under the Persian monarchy, as given by Josephus from apocryphal writers and other sources unknown to him, are marred by extreme confusion and some palpable mistakes. The book begins with the decree of Cyrus after he had taken Babylon, by which the Jews were sent home to Jerusalem and directed to rebuild the Temple, B.C. 536. It narrates the difficulties and hindrances before this was accomplished in the sixth year of Darius, the son of Hystaspes, about B.C. 516. It passes in silence over the rest of his reign, 31 years, and the whole of the reign of Xerxes, 21 years, proceeding directly to the work of Ezra, who received his commission in the seventh year of Artaxerxes Longimanus, B.C. 450. If the whole of the events narrated in the closing chapter took place almost immediately, as is understood, we believe, by all commentators, then the extreme length of time embraced in the narrative is not above 80 years; and the order is strictly chronological, although it is not continuous, but leaves a kind of hiatus sixty years. (Scheil-GERF, Ezra und Daniel, and ihre neuesten Bearbeitungen, Halle, 1863.)

VII. Language. The book is written partly in Hebrew and partly in Chaldee. The Chaldee begins at iv, 8, and continues to the end of vi, 18. The letter or decree of Artaxerxes vii, 12, 26, is also given in the original Chaldee.

VIII. Compositio. There has never been any doubt about Ezra being canonical, although there is no quotation from it in the N. Test. Augustine styles Ezra "rather a writer of transactions than a prophet" (De Civ. Dei, xviii, 36).

IX. Apocryphal Additions. We have spoken thus far of the canonical book of Ezra; but, however, four books that have received this name, viz. the book noticed above, the only one which was received into the Hebrew canon under that name, the book of Nehemiah, and the two apocryphal books of Esdras, concerning which last see Esdras.

X. Commentaries. The following are special exegetical works on the entire book, the most important being denoted by an asterisk (*): Aben Ezra, יִשְׂרָאֵל (in Buxtorf's Rabbinical Bible, Basle, 1628-19, fol.); Bede, Espositio (in Works, viii, 860); Rashii, יִשְׂרָאֵל (Naples, 1487, 4to; Venice, 1517, fol.); In Latin, with other books, Goth. 1714, 4to; Kimchi, יִשְׂרָאֵל (in Bomberg's Rabbinical Bible, Ven. 1549, fol.); Simeon, יִשְׂרָאֵל (in his Bible, Venice, 1618, fol.).
Faber, Basil, a learned German Protestant divine, was born at Saras, in Lower Lusatia, about 1520, studied at Wittenberg under Melancthon, was rector of the gymnasium at Nordhausen, 1550-55, and afterwards of Quedlinburg, 1563-70. He opposed Melancthon's Corpus Doctrinae and the Crypto-Calvinists, and in 1570 had to leave Quedlinburg on this account. He then taught at Erfurt till his death, 1578. His chief work was the Theocarum evangeliis scholastice (Lips. 1571; last ed. Francist. 1749, 5 vols. fol.), a work which still commands consideration for its extensive and exact learning. He was also one of the writers of the Magdeburg Collections (q. v.).

Faber (of Fabri), Felix, a Dominican monk and Oriental traveller, was born in Zurich, 1441-2, and was educated by the Dominicans at Basel. He early entered the mendicant order, and became chief preacher in the cloister at Ulm, 1478. His studies were directed to the illustration of the Bible lands, and he made two journeys to the East, one in 1480 to Jerusalem, and one in 1483-4 to Palestine, Egypt, and Sinai. He died March 14, 1509. His principal writings are Ecloga tiones in Terram Sanctam, Asiae et Aegypti peregrinationem (republished Stuttg. 1643-9, 8 vols. 8vo); Historia Sacerdum (Francist. 1603; Ulm, 1728); Quaest. et Echarit, Script. Ord. Pred. vol. i; Herzog, Real-Encyklopädie, iv, 306.

Faber, George Stanley, D.D., an English divine and voluminous writer, was born Oct. 25, 1773, and was educated at the grammar-school of Heppenheim, and at University College, Oxford, where he passed B.A. in 1792. In 1801, as Baptister, he preached before the University the discourses which he afterwards published under the title of Hymn Musicae. In 1809 he became curate to his father at Calverley, Yorkshire; in 1813 he was made vicar of Stockton-upon-Tees; in 1811 vicar of Long-Newton, where he remained till 1831, when bishop Burgess presented him to a prebend in the cathedral of Salisbury. In 1832 he was made master of Sherburn Hospital, near Durham. "During his mastership he consider-ably increased the value of the estates of the hospital. He rebuilt the chapel, the house, and the offices; and greatly improved the grounds; he augmented the income of the incumbents of livings under his patronage, restored the chancels of their churches, and erected agricultural buildings on the farms. He died at his residence, Sherburn Hospital, Jan. 27, 1854." Dr. Faber's chief writings are on prophecy, and in them he seeks to show that the prophecies "are not applicable to the destinies of individuals, but to those of governments and nations." His most important writings are Hymn Musicae, or a Discourse on the Mysterious and Theology of the Pastorate (Bampton Lecture, London, 1801, 2 vols. 8vo; 2d ed. 1818, 2 vols. 8vo);—A Dissertation on the Prophecies that have been fulfilled, and are now fulfilling, or will hereafter be fulfilled, relative to the great Period of 1260 Years (London, 1806, 2 vols. 8vo; 3d ed. 1814-15, 3 vols. 8vo).—A general and connected View of the Prophecies relating to the Conversion, Restora-
Into Latin. In 1507 he took up his abode in the Benedictine abbey of St. Germain des Prés, with Briçonnet, the abbot, who was a friend of the intrepid friar. Here he remained till 1510, engaged chiefly in Biblical studies, the first published fruit of which was his Psalterium Quintuplex, in five columns, Gallican, Romanum, Hebraicum, Vetus, Conciliatum (Par. 1509, fol.). He wrote also Commentarium in Psalmo, etc. (Paris, 1515).—Commentarium in Epist. Catholici (Basle 1515, fol.).—Commentarium in Quatuor Evang. (Mol. 1522).—De Tribus Magdalenis (Par. 1551). He was suspected of Lutheranism, and the Parliament of Paris was about to proceed against him in 1521; but in 1528, Briçonnet, now a friend of the intrepid friar, and who had removed to Meaux. He was afterwards deprived of his doctors' degree, and compelled to retire to Guineau. Before this, at the request of the queen of Navarre, he had commenced a translation (from the Vulgate) of the N. T. into French, which appeared in 1525. This work was intended for common readers, and was soon widely scattered. "The effect of the dissemination of this version of the Word of God, which formed the basis for the subsequent translation of Robert Olivetanus, so important in the history of the progress of Protestantism in France, was at once visible. The copies of the translation which the friar had sought to disseminate, continued to find their way, even when they could not even pay the small sum demanded, from the liberality of the good bishop. Briçonnet introduced the French Scriptures into the churches of Meaux, where the people listened to them in the most humble and办公楼 manner, and were highly delighted. An autograph letter, recently discovered among the rich treasures of the public library of Geneva, from Lefèvre to his absent pupil Farel, pictures to us the immediate results of the publication, and the glowing hopes of the reformer. He writes: 'Good Sir, do not, what joy do I exalt when I perceive that the grace of the pure knowledge of Christ has already spread over a good part of Europe, and that I hope that Christ is at length about to visit our France with this benediction. You can scarcely imagine with what ardor God is moving the minds of the simple in some places on the steps of the new Testament have been published in French; but you will justly lament that they have not been more widely scattered among the people. Some enemies have endeavored, under cover of the authority of the Parliament, to hinder the work; but our most generous king was at first of the same opinion. The grace of Christ, declaring it to be his will that his kingdom shall be heard of God without impediment in that tongue which it understands. Now throughout our entire diocese, on feast-days and especially on Sundays, the Epistles and the Gospel are read to the people in their native tongue, and the parish priest adds a word of exhortation to the Epistle or Gospel, or both at his own discretion' (Letter of Lefèvre, dated Meaux, July 6, 1524, in the Bulletin de la Société de l'Histoire du Protestantisme Français, t. xi [1862], p. 212, 213)." 

Faber was not fitted for the strife and storm of the times, and to secure quiet, he lived for several years as librarian to the palace at Blois, where he prepared a French translation (from the Vulgate) of the O. T., with which the Jesuits, who bought his pupil and intimate friend, were delighted. His affinities, both from study and friendship, being with the Reformation, his last years were embittered by the persecutions suffered by his friends, though even he never left the Roman Church. But he "well deserved that privileged position among the bishops; for in 1512, five years before Luther posted his theses on the doors of the cathedral at Wittemberg, he published his Commentary on the Epistles of St. Paul, which clearly proclaimed the insufficiency of works, and the necessity of faith, as the ground of justification for the sinner. An affecting incident is told of his last hours. While sitting at the royal table, a few days before his death, Lefèvre was observed to weep, whereupon queen Margaret complained of the sadness of his countenance. "Why do you weep, my beloved, what have you suffered that you weep?" she asked. "I am not weeping, my lady," was his reply, "but I am weeping for my sins, for your sake, and for the sake of the poor who have suffered so much for your sake, and for the sake of all those who have been excluded from the bliss of heaven." "You do weep," said she, "for your sins, for my sins, and for the sins of all those who have been excluded from the bliss of heaven." "You do weep," said she, "for my sins, for your sins, and for the sins of all those who have been excluded from the bliss of heaven." "You do weep," said she, "for your sins, for my sins, and for the sins of all those who have been excluded from the bliss of heaven."

FABIANUS

strenuously. But about 1520 he went rapidly round to
the extreme of heresy, and in 1523 appeared
his Opus cœptus nova quædam dogmata M. Lutheri.
After this he was an unwearied opponent of the Reforma-
tion in writings, colloquies, conferences, etc. His
zeal was rewarded by the bishopric of Vienna, to which
he was raised in 1531. He died in 1541. His princi-
pal works are his Apologia tredicis (1524, 1534, 1542),
and Rome, 1569; a revision of the Opus cœptus above
named), and sermons and controversial writings collected
cent. xvi, p. 435: Kettner, Diss. de J. Fabi. Viti et Scripta
(Lips. 1785, 4to); Herzog, Real-Encyklop. iv, 997; Faber, Rem.

Faber, Johannes, a Dominican monk and po-
lemical writer, born at Heilbronn, 1504. His eloquence
and learning gained him early distinction, and in 1534
he was made cathedral-archpriest at Augsburg. He
wrote largely against the Reformation. Among his
writings are Erasmiana Bibliorum (Augsb. 1549, 4to):
—Cruxius galbae digmengutor heretics (Angul. 1561,
4to);—Quod fides esse positi non charitate (Augsb. 1548,
4to);—Joel's Prophetie erläuteret.—Testimonia Scriptu-
rae et Patrum, Petrum Apostolum Roma fuisse, etc. See
Echard, Script. ord. Præd. ii, 161; Wetzler und Welte,
Kirchen-Lex. iii, 370.

Ferrarini, of Augsburg, a Dominican monk of the
Church of the Reformers, emperor of the confessor of
Maximilian, and afterwards court-archpriest of Charles
V. Erasmus calls him a "mild, eloquent, and learned
man." He at first wished mild counsels to be
followed against Luther, and sympathized with Erasmus,
but afterwards seems to have changed his views. He

Faber, Johann Ernst, a distinguished German
orientalist, was born near Hildburghausen (Saxony),
February, 1745. He prepared for the university in
the gymnasion at Coburg, and studied under Walch,
Heyne, and Michaelis at the University of Göttingen.
In 1770 he was called to the chair of Oriental lan-
guages at the University of Kiel, and in 1772 to the
same position at the University of Jena, where he died
March 15 (April 14?), 1774. His most important works
are: Descriptio commentariori in septuaginta interpret.
(Götting: 1769-9, 2 vols. 4to);—Descript. de animalis
in veter. test. (Paris, 1780, 4to) reprinted in the
Monumenta sacrae de la Palestine by Cramer,
Hamb. und Kell, 1777);—Historia Marcæ inter
Hebrosis (pars i, Kiel, 1770; pars ii, Jena, 1773);—Pro-
gramma novum de Sarmatia exacta 490 annis post exuivm
Jesu Christi, in libro conciliis, veterum ecclesiast. 3, 2
reipublice Rhenaniae, spatio leXX, Kne Procedure
ind. x; (ibid. 1771?) 1772, 4to);—Jesu ex natallio opportu-
matis Messias (Jena, 1772, 8vo);—Archeologia der
Hebrer, (vol. i, Halle, 1778, 8vo). Faber was also au-

Faber, Johann Melchior, was born Jan. 18,
1748, near Hildburghausen (Saxony), and was edu-
cated at the gymnasium of Coburg and at the University
of Göttingen. In 1768 he was appointed professor of
Hebrew and Greek at the gymnasium, and in 1770 he
was called to Coburg as professor of Greek and Rhetoric;
and for four years later (1774) he was made rector of
the gymnasium at Ansbach. In 1792 he became church-councillor (Kirchenrat). He died January 31, 1809. Most of his

Faber, Petræus (Pierre Favre), born in Saxon,
1666, was one of the nine original companions of Loy-
ola in the establishment of the order of Jesuits. He
was a zealous confidant of Loyola, and rendered great
good service to the interests of the new order by his mis-
ionary journeys into Italy, Spain and Germany. He
died in 1546, on his way to the Council of Trent. His
life, by Orlandini, was published at Rome, 1655, 601; Lyons, 1677, 8vo.—Migne, Dict. de Biographie, ii, 156.

See Loyeri; Jesuits.

Faber, (Favre), Pierre François, a Roman Cath-
ic divine, was born about the opening of the 18th century,
17th century, at St. Bearehème, canton of Veau. He
was priest at Landenu, in Lower Languedoc, when chosen
by the bishop of the Franciscans, Francois van der Hove, the
personal secretary and confessor on his visitation-tour
to Cochín China. They reached Macao July 15, 1738,
and were there, under the pretense of being entertain-
ed as visitors, kept as prisoners of the Jesuits some
eight months. On their arrival in Cochín China in
May, the bishop commenced his visitation work among
the missionaries. The converted natives complained
"bitingly against certain missionaries who had excom-
communicated them under pretense of Jansenism, but real-
ly on account of their refusal to adhere to the heathen
ceremonies and funeral sacrifices which the Jesuits
allowed their Chinese converts to perform. The bishop
took the side of the people, and was accused by the
Jesuits before the mandarins as a disturber of the pub-
lic peace, and he, as well as his secretary, narrowly
escaped execution. The bishop appointed Favre his
agent to visit the Southern provinces. The opposition
with which both were met by the Jesuits shortly after-
wards inclined the bishop to divide the country be-
tween the Jesuits, the French missionaries, and the
Franciscans. The death of the bishop was hastened
by sorrow and ill treatment as Faber has it, or by poi-
on as one of the Franciscans reported hostile to Rome.
Faber attempted to assume the duties of his position as
agent, but, finding that he could not act with success
against the opposition of the Jesuits, he returned to
Rome August 8, 1741, in order to report to the propa-
ganda and to the pope. But even in Rome he found
the Jesuits beforehand in undermining him by slandering
and every other means in their power, and the decree
of the pope did not appear until Faber had almost
abandoned the hope of ever receiving it. This decree
(issued 1745) in the main sanctioned the acts of Faber
and his predecessor. He gives a full account of the
mission in Cochín and the two civil wars, and of the
missions apostolique de M. de la Beausne, Exéque d'Halicaurre,
at la Cochinchine in 1740; on l'on voit les voyages et les
traverses de ce célèbre Prété; la conduite des Missionnaires
Jesuites, et de quelques autres, avec de nouvelles observa-
tions, etc. The work was condemned by the bishop
at Lausanne, and was publicly burned at Paris. All
copies that could be procured the Jesuits bought up,
in order to prevent its circulation. An extract is
given by Simler in his Stamm, u. u. Urkunden zur Geschichte
der Kirchenrecht, i, 355-366.—Herzog, Real-Encyk.
lop. i, 397.
of Rome, from 236 to 250, but there is some dispute both as to his name and as to the time of his episcopate. In the Alexandrian Chronicle he is called Flavianus. Eusebius gives an account of certain wonders that a deliberate election to the episcopate of this man, though not faithful had assembled in a church for the purpose of the election, and several persons of consideration were proposed, without any thought of Fabianus, though he was present. Of a sudden, a white dove descended from above and alighted on his head. Then the faithful, recalling the recollection that the Holy Spirit had manifested itself in a like form at the baptism of Jesus Christ, exclaimed that God had exhibited to them his will. Immediately Fabianus was proclaimed pope, and conducted to the episcopal see without other formality than the imposition of hands" (Hist. Eccles. vi, 29). From this fable the court of Rome, it derives support for its theory that the Holy Ghost always directs in the election of a pope. Cardinal Cusa says that "what happened in the election of Fabianus happens to every pope, though we do not see it with our natural eyes. Destinies, differs from what has been said above, is an unexigui; the person on whose head the heavenly dove perches will, in spite of them, be chosen" (De Deo Consistente, vii, 85). We have had strange illustrations of this in Borgia and others. Fabianus suffered martyrdom in Decius’s persecution, A.D. 250. See Acta Sanctorum, August, Memoriae, iii, 854; A. Butler, Lives of Saints, Jan. 20; Bower, History of the Popes (London, 1750), i, 47.

Fable (μῦσος, a myth), alegend or fictitious story, applied in the N.T. (1 Tim. I, 4; iv, 7; 2 Tim. iv, 4; Titus i, 14; 2 Pet. i, 16) to the Jewish traditions and stories. This fable, as its name implies, is of the apostolic days, and were afterwards embodied in the Talmudical writings. (See Fleischmann’s Comment, i in Tim. i, 4.)

1. Taking the words fable and parable, not in their strict etymological meaning, but in that which has been commonly accepted by them at current usage, looking, i.e. at the Épicurean fable type of the parable of the N.T. as the type of the other, we have to ask (a) in what relation they stand to each other as instruments of moral teaching? (b) what use is made in the Bible of this or of that form? That they have much in common is obvious enough. In both we find "statements of facts, which do not even pretend to be historic, used as vehicles for the exhibition of a general truth" (Neander, Life of Christ, Harper’s ed. p. 67). Both differ from the Mythus, in the modern sense of that word, in being the result of the spontaneous, unconscious evolution of thought in some symbolic form. They take their place so far as species of the same genus. What are the characteristic marks by which one differs from the other, it is perhaps easier to feel than to define. Thus we have (comp. Trench, On Parables, p. 2) (i.) Lessing’s statement that the fable takes the form of an actual narrative, while the parable assumes only what that is related might have happened; (ii.) Herder’s, that the difference lies in the fable’s dealing with brute or inanimate objects, while in the parable’s dealing with material beings exclusively from human life; (iii.) Olofsen’s (on Matt. xii, 1), followed by Trench (l. c.), that it is to be found in the higher truths of which the parable is the vehicle. Perhaps the most satisfactory summing up of the chief distinctive features of each is to be found in the early statement of aRV.N. (L. i. b.) : "The parable is distinguished from the fable by that, in the latter, qualities or acts of a higher class of beings may be attributed to a lower (e.g. those of men to brutes), while in the former the lower sphere is kept perfectly distinct from that which it seems to illustrate. The beings and powers thus introduced always follow the law of their nature, but their acts, according to this law, are used to figure those of a higher race. . . . The mere introduction of brutes as personal agents in the fable is not sufficient to distinguish it from the parable which may make use of the same contrivance; as, for example, Christ employs the sheep in one of his parables. The great distinction is that the parable is a generalisation of brute relations into a human one, while the fable introduces the parable act according to the law of their nature, and the two spheres of nature and of the kingdom of God are carefully separated from each other. Hence the reciprocal relations of brutes to each other are not made use of, as these could furnish no material for distinguishing the relation between man and the kingdom of God." Of the fable as thus distinguished from the parable we have but two examples in the Bible: (1) that of the trees choosing their king, addressed by Jotham to the men of Shechem (Judg. ix, 8-15); (2) that of the cedar of Lebanon and the thistler, as the agents in theJeboash to the challenge of Amaziah (2 Kings xiv, 9). The narrative of Ezek. xvii, 1-10, though, in common with the fable, it brings before us the lower forms of creation as representatives of human characters and destinies, differs from what has been said above, in [1.] in not introducing them as having human attributes; [2.] in the higher prophetical character of the truths conveyed by it. The great eagle, the cedar of Lebanon, the spreading vine, are not grouped together as the agents in a fable, but are simply, like the bear and lion, the symbols of the zodiacal signs in the Hebrew calendar of the Chaldean, with which the names of the stars and constellations are associated; the lion and the eagle are the symbols of the great monarchs of the world.

In the two instances referred to, the fable has more the character of the Greek μῦσος, or supernatural tale (Quintil. Inst. Orat, v, 11), than of the μῦσος, or myth; that is, is less the fruit of a vivid imagination, sporting with the analogies between the worlds of nature and of men, than a covert reproof, making the sarcasm which it affects to hide all the sharper (Müller and Donaldson, History of Greek Literature, vol. i. c. xi). The appearance of the fable thus early in the history of Israel, and its importance amongst the direct teachings of the law, of Deuteronomy, of N. T., are, of them, in their way, significant. Taking the received chronology, the fable of Jotham was spoken about B.C. 1209. The Arabian traditions of Lokman do not assign to him an earlier date than that of David. The earliest Greek μῦσος, or proper fable, is that of Hesiod (Op. et D. v, 292), and the prose form of the fable does not meet us till we come (about B.C. 550) to Stesichorus and Ασοπ. The first example in the history of Rome is the apologue of Menenius Agrippa, B.C. 494, and its genuineness has been questioned on the ground that the fable could hardly at that time have been written, not less the spontaneous, unconscious evolution of thought in some symbolic form. They take their place so far as species of the same genus. What are the characteristic marks by which one differs from the other, it is perhaps easier to feel than to define. Thus we have (comp. Trench, On Parables, p. 2) (i.) Lessing’s statement that the fable takes the form of an actual narrative, while the parable assumes only what that is related might have happened; (ii.) Herder’s, that the difference lies in the fable’s dealing with brute or inanimate objects, while in the parable’s dealing with material beings exclusively from human life; (iii.) Olofsen’s (on Matt. xii, 1), followed by Trench (l. c.), that it is to be found in the higher truths of which the parable is the vehicle. Perhaps the most satisfactory summing up of the chief distinctive features of each is to be found in the early statement of aRV.N. (L. i. b.) : "The parable is distinguished from the fable by that, in the latter, qualities or acts of a higher class of beings may be attributed to a lower (e.g. those of men to brutes), while in the former the lower sphere is kept perfectly distinct from that which it seems to illustrate. The beings and powers thus introduced always follow the law of their nature, but their acts, according to this law, are used to figure those of a higher race. . . . The mere introduction of brutes as
must have been common among the Israelites in the time of the judges. The part assigned in the earliest records of the Bible to the impressions made by the half-created person, or the mind of man when "the Lord God formed every beast of the field and every fowl of the air, and brought them unto Adam to see what he would call them" (Gen. ii, 19), and the apparent symbolism of the serpent in the narrative of the Fall (Gen. iii, 1), are indications of this being adapted to the immediate possession of this power, and which they have helped to develop it (Herder, Geist der Etruskischen Poetik, Werke, xxxiv, p. 16, ed. 1826). The large number of proverbs in which analogies of this kind are made the bases of a moral precept, and of which (e.g. Proverbs, 15, 18-20), it is impossible to enumerate all, shows that condensed fables, show that there was no decline of this power as the intellect of the people advanced.

The absence of fables accordingly from the teaching of the O.T. must be ascribed to the want of fitness to be the media of the truths that which teaching was to convey. The points in which brutish or inanimate objects present analogies to man are chiefly those which belong to his lower nature, his pride, indolence, cunning, and the like, and the lessons derived from them accordingly do not rise higher than the prudential maxims which aim at repressing such defects (compare Trench, On the Parable, I. c.). The fable, apart from the associations of a grotesque and ludicrous nature which gather round it; apart, too, from its presenting narratives which are "nec nec verisimilium" (Cicero, De Invent, i, 19), is inadequate as the medium for the transmission of truths which belong to man's spiritual life. It may serve to exhibit the relations between man and man; it fails to represent those between man and God. To do that is the office of the parable, finding its outward framework in the dealings of men with each other, or in the world of nature as it is, not in any artificial parables of nature, nor in exhibiting, in either case, real and not fanciful analogies. The fable seizes on that which man has in common with the creatures below him; the parable rests on the truths that man is made in the image of God, and that "all things are double one against another." It is noticeable, as confirming this view of the character of the fable, that, though those of Aesop (so called) were known to the great philosopher of righteousness at Athens, though a metrical paraphrase of some of them was among the employments of his imprisonment (Bionus), his name does not occur in any one of them, nor even as illustrations, or channels of instruction. While Socrates shows an appreciation of the power of such fables to represent some of the phenomena of human life, he was not, he says, in this sense of the word, μορφολόγος. The myths, which appear in the Ògēxia, the Phaenisc, the Phædo, the Rhetoric, are as unlike as possible to the Æsopic fables, are (to take his own account of them) ὑπὸ μικροὶ ἄλλα λόγια, true, though figurative, representations of spiritual realities, while the illustrations from the common facts of life which were so conspicuous in his ordinary teaching, though differing in being comparisons rather than narratives, come nearer to the parables of the Bible (compare the contrast between τὰ μεταφράσκεται, as examples of the παραβολή and the λόγοι λειτουργός, Aristot. Rhet. ii, 20). It may be said, indeed, that the use of the fable as a form of expository discourse (Aristot. Rhet. i, c.) belongs rather to childhood, and the child-like period of national life, than to a more advanced development. In the earlier stages of political change, as in the cases of the commonwealth of Sparta (Aristot. Rhet. i, c.), wherein Agrrippa, it is used as an element of persuasion or refutation. It ceases to appear in the higher eloquence of orators and statesmen. The special excellence of fables is that they are διηγηματος (Aristot. Rhet. i, c.) that "ducere animos solent, precipue rusticorum et imperitorum" (Quintilian, Institut. Orat. ii. c.).—Smith, s. v.

2. The μίθος, or "fables" of false teachers claiming to belong to the Christian Church, alluded to by writers of the N.T. in connection with "endless genealogies" (γενεαλογίας ἀπίστως, I Tim. i. 4), or with disparaging epithets ("Jewish," ἱνναικαῖ τικ. 11, 14; "old wives," γαρνικιεί, I Tim. iv. 7; "cunningly devised," στησαμος, 2 Pet. i. 16), do not appear to have had the character of fables properly so called. As applied to them, the word takes its general meaning of anything false or unreal. Thus Paul exhorts Timothy and Titus (1 Tim. i. 4; 4. 7; Titus i. 14) to shun profane and Jewish fables, as having a tendency to seduce the minds of the hearers. Paul is evidently here speaking of some truths which were so closely associated with the reveries of the Gnostics; but the fathers generally, and most modern commentators, interpret them as allusions to the vain traditions of the Jews. The great reservoir of Jewish tradition is the book, or rather the books, called the Talmud. At the time of the Christian era, the traditions they were called, of the law (by which was meant the decisions of the doctors on disputed points of the Mosaic code, and the extravagant fables with which they adorned their comments) had attained so great a bulk and so high a degree of venerability as to supersede the law itself in the common esteem. They were supposed to have been handed down, some from the era of Moses, and some from a period far anterior, were, for the most part, mere directions for ridiculous ceremonies, questions of absurd casuistry, and fables which were told by their authors alone as myths true to their national spirit, but not to other nation. Some of these fables and legends are too impious and blasphemous to be quoted, but we select a few specimens. Adam, of whose knowledge we can hardly form too high an idea, was said to be endowed with magic. "God," say the Talmudists, "gave the men of the generation of Adam a precious jewel, the reasoning of which would cure all diseases; this came afterwards into the possession of Abraham, but after his death, because, by reason of its exceeding brightness, it was likely to be worshipped, God hung it in the sun." Our first parents were, according to rabbinical tradition, of a gigantic stature; this tradition has been improved by the Mohammedans. The transmigration of souls is much insisted on in the Talmud, and the soul of Adam is said to have passed successively into the bodies of Noah and David; it will also pass into the bodies of the Messiah. The Jews were slandered by the Egyptians in their mythology, and it is still more ancient than their residence in Egypt. Abraham was the person to whom, they say, it was first revealed, and he taught that the souls of men passed into women, beasts, birds, and even reptiles, rocks, and plants. The spirit of a man was punished by passing into a woman; and if the conduct of the man had been very atrocious, it took some reptile or inanimate form; and if a woman acted righteously, she will, in another state, become a man. Thus the ass that carried Balaam, the raven that fed Elijah, the whale that swallowed Jonah, are all supposed to have possessed the reasoning of which would cure all diseases.

The Mishna says, "The two tables of stone were upwards of two tons weight, but the moment God's word and commandments were engraven thereon by the smoke, they became as light as a feather. When Moses left the mountain and came within sight of the molten calf, and heard the multitude shuffling, he was alarmed; so that when the rays of the molten calf, which were of gold, came in contact with the tables of stone, the letters thereon immediately flew away, and the tables of stone returned to their former weight, which was more than Moses could support, and therefore he threw them down, and they brake in pieces." It is also said that Moses was the richest man that ever was or ever will be. His riches consisted of diamonds, which he obtained possession of in the same way that every laborer gets rewarded, by be-
FABRE 445

ing considered worthy of his hire. Moses never looked for any emolument from the Jews, and God therefore rewarded him in this manner. The two tables of stone were one solid mass of diamonds, and the chippings that came from these two tables were his own perquisite, "the salt of the earth, as an ambassador of God, and is everywhere present at one time, and is in his person a venerable old man, wearing a long beard. When Messiah shall appear, there will be a great feast, at which every Jew will be present. This feast will consist of fowl, of fish, and of flesh, which is said to be for the purpose of the beginning of the world. First, God provided a large fowl or bird, called Agal Loshder; also a large ox, called Shur Abur; and two large fish, called Leviathan. When God created these two great fish, male and female, being of such immense size, lest they should multiply and fill the female, and married it in salt, there to remain it is wanted for this great feast. Then all the Jews that have been born, or that have existed since the creation of the world, will be restored to life. The table will be spread, and the provision placed upon it. And it is so ordered that each one will take his station according to his conduct in the present life. Moses will sit at the head of the table, and next to him Abraham, Isaac, and Jacob, and the prophets in rotation. Rabbi Simon says he was once sailing in the Great Sea, when he and the mariners espied a fish of such enormous size, that although they had a fair wind, after they saw one eye of the fish, they sailed five days longer in a direct line before they reached the other eye of the same fish, which confirmed his belief in the report of the size of the Leviathan. Much also is related concerning the size of the ox, which is said to be so immense that he eats up the whole of the grass that grows upon a thousand hills every day. The bird, also, is said to be of enormous size, and it is stated that one day this bird, in her flight, dropped an egg, which broke, and the yolk drowned fifty cities and villages (Shelolin, Jeshut Talmud: See Talmud). In the genuine fables and traditionary narratives of remote antiquity, especially those of the ancient classics, many correspondencies with the Biblical history are found, such as intimate that these traditions were derived from history. Of such narratives are the tales concerning a golden age of our race, an apostacy, a general flood, a future restoration. It may with safety be inferred from these traditions that the records in the book of Genesis concerning the apostacy, etc., are not philosophical myths; for, were they nothing more than the emanations of some Hebrew philosopher, how could they have been spread abroad among all nations? These popular traditions point us to the time when the human family were collected into one place, and afterwards separated into various branches. In this separation every tribe took with it the traditions that were common to all. See Mythology.

Fabre. See FABER.

Fabre, Jean Claude, a French ecclesiastic and father of the Oratory, was born at Paris in 1668, and died there Oct. 22, 1753. In an extract of Richelet's Dictionnaire he inserted some passages which brought him under censure, and he was forced to quit the Oratorian order. He is chiefly known as the continuator of Picardy's Histoire ecclesiastique, of which he prepared vola. xxi.-xxxv. —Hoefn., Nov. Rer, Gen., xvi., 925.

Fabri, Honoré, a learned Jesuit, was born at Bugny, in France, in 1607. He entered the novitiate of the order of Jesuits at Avignon in 1626, taught philosophy and mathematics at the College of Lyons, and was subsequently called to Rome and appointed grand penitentiary. He was an indefatigable worker, and acquired great proficiency in almost every branch of learning, especially in natural sciences. He claimed no right to have his name attached to the book on which the publication of the celebrated work of Harvey on the subject. He died at Rome in 1688. He wrote several works in defense of the casuistic writers of his order against the attacks of the Jansenists: Pachomphi- lice (Rome, 1650); —Notae in Notas Walchegi Wundreichi ad Ludovici Moriani Librum III. (Colome, 1650); —Ludovici Montalii epistolae Liebli ad provinciales refutati (Cologne, 1660); —Apologetica doctrina moralis societatis Jesu (Lyons, 1674); —a summary of scholastic theology (Summulae theologicae, Lyons, 1659), and a large number of scientific, polemical, and other works. He bequeathed his MSS. to the establishment of the Jesuits at Lyons. —Hoefer, Nova. Biog. Generale, xvi., 945.

Fabricius Ecclesiasticus, the name given in the Latin Church to a special fund for defraying the expenses for building and repairing the Church edifices of a particular congregation. As early as the 5th century it was customary to put a portion of the property of the particular church should be set aside to this end. According to the rescripts of the Roman bishops Simplicius (475) and Gelasius (494), it was to be the fourth part of the whole property of the church, while in Spain one third was used. The Council of Frankfort in 794 declared that all the bishops of ecclesiastical authority had the duty of keeping the church edifices in a proper condition, and this declaration was frequently confirmed by imperial and ecclesiastical laws. Charles the Bald in 846, besides confirming the same rule, ordered that all the serfs of the Church should work for repairing the churches at least two weeks every year. The parishioners generally were required to co-operate for keeping the Church edifices in proper order. There were, however, widely different usages in different localities. The Council of Trent (seesii. xxi. cap. vii.) established as a general principle that building and repairing expenses should be defrayed from the general revenue of the Church; in case these are not sufficient, all the patrons and others who have any kind of income from the church, and, if necessary, all the parishioners, are bound to co-operate to that end. The same has been the practice in the Roman Catholic and in the Protestant state churches. The legislation of the first French empire (decree of 1809) charged the civil community with the duty of keeping the church edifices of all the recognized religions in good order. The civil laws of the European countries have many detailed provisions with regard to the subject, and in some points there is a wide difference. —Hertzog, Real-Encyclop., i. 737; Wetzer und Welte, iv. 876; Helfert, Von d. Erbauung, Erhaltung u. Herstellung d. kirch. Gebäude (Prague, 1864). (A. J. S.)

Fabricius, Andreas, a Roman Catholic divine, was born at Hodgè, a village of Liege, A.D. 1520. He studied at Ingolstadt, and became professor of philo-

sophy at Louvain. The bishop of Augsburg sent him as his agent to Rome, where he remained six years under the pontificate of Pius IV. He was afterwards councillor to the duke of Bavaria, and provost of Ottingen, in Suabia, where he died in 1581. His principal work was Harmonizma Confutata (Cologne, 1575 and 1587, fol.). He wrote also a Catechismus Romanus ex Decreto Concilii Tridentini, with notes and illustrations (1575 and 1574, 8vo), and some Latin tragedies. —Hook, ExeL Biog. v. 48; Migne, Dict. de Biographie Chrétienne, ii. 135.

Fabricius, Christoph Gabriel, a German divine, was born at Schackendorf, in Lusatia, May 18, 1848, and was educated at the University of Wittenberg. He served as pastor at Mulhoritz and other places.
Fabricius, Johannes Albert, "the most learned, most voluminous, and most useful of bibliographers," was born at Leipzic Nov. 11, 1668. He lost his parents at an early age, but was sent to study at the Jesuit college at Mans (1748). He was afterwards so widely famous for his studies of theology and rhetoric that he was made director of the college of St. Ignatius at Leipsic; he was inspired with an ardent love of letters. He went to Hamburg in 1698, and spent five years as librarian for J. F. Mayer, dividing his time between preaching and study, till he was chosen professor of rhetoric and philosophy in the gymnasium of that city. In 1719 the landscape of Hees-Cassel offered him the professorship of theology at Giessen, and the post of general superintendent of the churches of the Augustsburg Confession; but the magistrates of Hamburg augmented his salary for the sake of keeping him, and of this he ever after retained so grateful a sense that no offers of preference could tempt him to leave them. He died at Hamburg April 8, 1766, with the character of being one of the most learned of men. The list of his published writings exceeds 100 titles.

His principal works are, (1.) Codex Pseudoepigraphus Pecatariorum, collect. et Antiquationibus illustratus (Hamb. 1719, 12mo); 2d ed. with a supplementary volume, lib. 1722-28, 12mo; (2.) Codex Apocryphus N. T. (2d ed. Hamb. 1719, 3 vols. fol.); see APOCRYPHA OF N. T. (3.) Observationes selecte in variis locis Novi et veteris testamenti, etc. (Hamb. 1712, small 8vo; 4th ed., Hamb. 1720, 4 vols. 4to), containing notices of all writers on Hebrew, Greek, Roman, and Christian antiquities; (5.) Bibliotheca Ecclesiastica (Hamb. 1718, fol.), collecting the works of a number of Latin ecclesiastical writers, and of early Greeks, etc. Vet. Graecorum, quorumnamque moment. integ. aut, fragm. edita, extant (Hamb. 1728, 14 vols. 4to). Of this invaluable collection a fourth and enlarged edition, ed. by Harles, was commenced in 1769, of which 12 vols. had appeared up to 1811, extending to vol. xii, p. 544 of the 1st ed., and comprising the Index editioni quas antiquius et recentius publicas. Of this, published in 1808 (4to). (7.) Collection of authors on Christian Evidences, under the title Delectus Argumentorum et Syllabus Scriptorum qui veritatem religionis Christianae assurament, etc. (Hamb. 1725, 4to); (8.) Bibliotheca Latina (Venice, 1728, 2 vols. 4to; rev-edited by Heresiis, Lips., 1764-67, 4to). (9.) De synonymiis mediasi et infimae Latiniae (best edit. Mansi's, Padua, 1754, 6 vols. 4to); Hydrotheologia, written in German, and translated into French under the title Théologie de l'Eau, ou Essai sur la Fontaine, la Sauge, et la Puissance de Dieu, mast. Paris, 1771, 8vo; (10.) De systematis theologiæ Christianæ, accedunt Epistolæ quaedam ineditae Juliani Imperatoris, Gregorii Habesiani Theologiae Æthiopicae, nec non Index geographicus Epicaputaturi Orbis Christiani (1731, 4to); Centifolium Lutheranum, aet. Notitia Literaria Scriptorum omnium graecorum et Latinorum, 2 vols. 4to. (11.) Scripturae, et Reformacionis Ecclesiae celebrator (1730, 2 vols. 8vo); (12.) Centuria Fabriciorum Script. clerorum quorumdam. Fabricius Johannes Albertus, "the most learned, most voluminous, and most useful of bibliographers," was born at Leipzic Nov. 11, 1668. Centuria Fabriciorum Script. clerorum quorumdam. Fabr, the German Schmidts, etc. Independently of the above and other minor works, Fabricius published editions of Sexus Empiricus, of the Gallia Orientalis
Facioliati (Faccioliati), Jacopo, was born at Torreglia, Italy, Jan. 4, 1682. He was educated in the college at Este, and afterwards in the seminary at Padua, where he became professor of theology and philosophy, and director of studies. "The seminary of Padua, it was said, as subsequently, a high reputation as a place for the study of Latin, and for the obtaining generally accurate editions of the classics and other school-books which have come from its press. Faccioliati contributed to support this reputation by his labors." Among other works, he published improved Latin editions of the Lexicon of Stephanus, of the Thesaurus Ciceronianus of Niziolus, and of the vocabulary of seven languages, known by the name of Lexicon Polyglotum (1731, 2 vols. fol.). In this last undertaking he was greatly assisted by his pupil, Egido Forecelli, although he was not willing to acknowledge the obligation. It was in the labors with Faccioliati that Forecelli conceived the plan of a totally new Latin dictionary, which, after more than thirty years' assiduous application, he brought to light under the title of Lexicon Latinum (Padua, 1771, 4 vols. fol.). This work has appeared in various Latin dictionaries. The most generous and Faccioliati, acknowledged in the title-page of his work that its production was in great measure due to the advice and instruction of his deceased master. The MS. of his Lexicon, in 12 vols., was given by the library of the seminary. The best editions are (1) that of Furlanetto (Palat. 1527-39, 4 vols. fol.); ed. by Hertel and Voigtlander, Schneeberg, 1885-88, 4 vols. fol.; also by Giaccotto, 1839-45, 4 vols. 4to; (2) that of Bailey, with English renderings (1829, 2 vols. 4to). "In 1722, Faccioliati, being appointed professor of logic in the University of Padua, delivered a series of introductory Latin discourses to the students of his class, which were received with considerable applause. His Latin epistles, as well as his Orationes, or discourses, have been admired for the purity of their diction. The king of Portugal sent him an flattering invitation to Lisbon to take the direction of the public studies in his kingdom, but Faccioliati declined the honor on account of his advanced age. He, however, wrote instructions for the reorganization of the scholastic establishments of that country, which had become necessary after the expulsion of the Jesuits. Faccioliati died at Padua, Sept. 25, 1769. Besides numerous works on philosophy, he published Vita et Acta Jesu Christi secundum utrumque generationem, de anima ac hominum (Padua, 1761, 24mo); — Vitae et Acta Matt. Virginis (Padua, 1764); — English Cyclopaedia (London, 1841)."
to Moses, who was told, "Thou canst not see my face: no man can see my face and live" (Exod. xxxxxiii. 20), which clearly signifies that no one can in this present state of being endure the view of that glory which be- longs to him (1 Cor. xiii. 12; 1 John iii. 2; Rev. xxii. 4). In a heathen entertainment of the notion, which is remarkably expressed in the celebrated mythological story of Semele, who, having prevailed on the reluctant Jove to appear to her in his heavenly splendor, was struck dead by the lightnings of his presence. It is to be borne in mind that God is usually represented to us in Scripture under a human form; and it is indeed difficult for even more spiritualized minds than those of the Hebrews to conceive of him apart from the form and attributes of the highest nature actually known to us. The Scriptures sanction this concession to the weakness of the servants of God, and hence arise the anthropomorphic phrases which speak of the face, the eyes, the arm of God. The appearance of the angel in the Old Testament times were generally in the human form (Judg. xiii. 6, etc.), and from this cause alone it would have been natural, in the case of the Jews, to transfer the form of the messengers to him by whom they were sent. See ANTHROPOMORPHISM. The presence of Jehovah (Exod. xxxxxiii. 14, 15) and the "angel" (Exod. xxxxxiii. 20, 21) is Jehovah himself; but in Isa. lxiii. 9, the an- gel of his presence is opposed to the God himself. The presence of God's counsel is a token of his fa- vor, and is therefore put synonymously with favor (Psa. xlvii. 3; Dan. ix. 17). Thus, as in men, if the countenance be serenity, it is a mark of good- will; if fiery or piercing, of anger or displeasure. Face also signifies, anger, justice, and severity (Gen. xvi. 6, 8; Exod. iii. 5; Psa. lxviii. 1; Rev. vi. 16).

The Jews prayed with their faces turned towards the Temple (1 Kings viii. 53, 44, 48), and those residing out of Jerusalem turned it towards that point of the heavens in which Jerusalem lay (Mish. yeb. 10); thus the Mohammedans, when praying, always turn their faces towards Mecca. To bow down the face in the dust (Isa. xlix. 28) is a mark of the lowest humiliation and submission. See ATTITUDES.

The "bread of faces" was the show-bread which was always in the presence of God. See SHOW-BREAD.

Faculties, a term of the Roman Catholic Church law, designating certain rights as to ecclesiastical functions which an ecclesiastical superior confers upon sub- ordinates. The most important faculties are those conferred upon bishops in regard to dispensations. The first instances of such dispensations being given to foreign missionaries occur in the 13th century. Subsequently, especially since the 16th century, very extensive faculties were granted to the papal nuncios. As the Council of Trent reserved many dispensations which in former times had been granted by the bishops to the pope, and as many bishops regarded the jurisdiction exercised by the nuncios as injurious to their authority, they applied to the pope for special faculties with reg- ard to a number of dispensations. These faculties were for the most part granted to the soul (facul- tates quinquemanales). An effort made in the 18th century by some of the German archbishops to reas- sert their own authority in the cases covered by the papal faculties was unsuccessful [see Ems, Congresso ur], and the faculties quinquemanales are still con- sidered by the bishops as the pope's. Besides this general class of faculties, which contains twenty different provisions, many special faculties are conferred upon bishops in particular cases. The bishops, in their turn, confer faculties upon the vicars-general, deans, and common priests of their dioceses, either delegating to them rights which properly belong to bishops, or subdelegating papal rights which have been specially authorized to subdelegate.—Herzog, Real-Ency-
to resist them with the authority of religion, and patiently endure their displeasure if we must incur it. If God should now raise up an Ambruse, said he, "there would not fail to be a Theodosius." (Church History, Torrey's, ii, 544). There is a remarkable passage in the Defensio showing that Facundus did not hold the Romanist doctrine as to the corporal presence in the Eucharist: "I am not of those who believe in the sacramental adoptiones applicandi, nec sacramentum corporis et sanguinis ejus, quod est in pace et pecto consecrato, corpus ejus et sanguinem dicimus: non quod proprium corpus ejus sit panis et pectum sanguinis: sed quod in se mysteriorum corporis ejus et sanguinis continent." ('The sacrament of adoption may be called adoption itself, as we term the sacrament of his body and blood, which is in the bread and the consecrated cup, his body and blood; not that the bread is properly his body and the cup his blood, but because they contain within them the mystery of his body and blood;' (ix, 6, Migne, lvii, 762).--Neander, Ch. History, ii, 514; Neander, History of Dogmics (Ryland), i, 278; Cave, Hist. Liter., i, 520; Ceillier, Auteurs Sacrés (Paris, 1862), xi, 288 sq.; Waterland, Works (Oxford), iv, 599, note.

Facundus, Cyprians (Gracized Colines aureus Callistus Josephus, i Tertullianus, 111, 5; the Roman king who in the time of the emperor Claudius. After the death of king Agrippa, in A.D. 44, he was appointed by Claudius procurator of Judaea. During his administration peace was restored in the country, and the only disturbance was created by one Theudas (q. v.), who came forward with the claim of being a prophet, and his followers were put to death by command of Facundus. He was succeeded in the administration of Judaea (A.D. cir. 46) by Tiberius Alexander (Josephus, Ant. xix, 9; xx, 5, 1; War, ii, 11, 5; Tacitus, Hist. v, 9; Zonaras, xii, 2, 11; Eusebius, Hist. Eccles. ii, 21).--Smith, Dict. of Chr. Ant. See Procuretor.

Fagius, Paulus (properly Büchel), was born at Rheinzabern in 1504. His studies were pursued at Heidelberg and Strasburg, where he became a great proficient in Hebrew, and was led into close acquaintance with Cardinal Hedio of Bucier, Zell, and other learned reformers. In 1537 he entered the ministry, and was pastor at Leyn until 1543. Here he studied Hebrew thoroughly under Elias Levita (q. v.), and also established a Hebrew press. In 1541, when the plague began to rage in Leyn, he publicly rebuked those of the nobles who forsook their homes without making provision for the relief of the poor, and himself visited the sick in person, and administered spiritual comfort to them day and night, and yet escaped. On the death of Capito at Strasburg, the senate called Fagius to succeed him as professor and pastor theology. In 1544, Frederick III, the elector Palatine, intending a reformation in his churches, called him to Heidelberg, and made him professor there. He opposed the Interim (q. v.), and when it was introduced he was compelled to leave Strasburg. In 1548 he accepted the invitation of Cranmer, archbishop of Canterbury, and came to England. He was nominated by the archbishop to the professorship of Hebrew in the University of Cambridge. Before he went to Cambridge he resided with the archbishop at Lambeth, where he was associated with Bucer. His labors while there, in addition to the preparation necessary for his professional office, are thus described by Strype: "As it has been a great while the archbishop's desire that the Holy Bible should come abroad in the greatest exactness, and true agreement with the original text, so he said this work upon these two learned men viz. Fagius and Bucer. First, that they should give a clear, plain, and succinct interpretation of the Scripture, according to the propriety of the language; and, secondly, illustrate difficult and obscure places, and reconcile those that seem repugnant to one another. And it was his will and his advice that to this end and purpose their public readings should tend. This plious and good work, by the archbishop assigned to them, they most gladly and readily undertook." For their more regular carrying on this business, they allotted to each other, by consent, their distinct tasks. Fagius, because his talent lay in the Hebrew learning, was to undertake the Old Testament, and Bucer the New. The leisure they now enjoyed with the archbishop they spent in preparing their commentaries. Fagius entered upon the evangelical prophet Esias, and Bucer upon the Gospel of the evangelist John; and some chapters in each book were dispatched by them. But it was not long but both of them were "very unhappy stop to their studies." He died at Cambridge near the age of ninety. His body, along with Bucer's, was dug up and burnt in queen Mary's time. He wrote various books on Biblical and Hebrew literature, among which are Metapharsula et Escrarrati Epaoli, Final ad Rom. (Strassburg, 1536, fol.); -- Sententiae sermo peritissimae, I, 432, 440; -- Annotationes in Targum (Ieyn, 1546, fol.); -- Expositio librorum in IV prioria Capitum Genesis, cui accessit Testa Hebræis et Pharaonis Chaosat collatio, 4to (this and the last work reprinted in the Cratici Sacri. --Precationes Hebraeis, ex libello Hebraico escryptione in Latinam transalutatis (1542, 4to); --En Sypha Sententia Moroles, cum succincto Commentario (1542, 4to); --Inauguratio in Lympum Hebraicam (Constance, 1543, 4to).--Middleton, Eng. Bibliography, i, 260; Melchior Adam, Vite theolog., i, 89; Hook, Eclesi. Bibl. v, 50. Fagani, Prosper, an Italian writer on ecclesiastical law, was born in 1598. He was for fifteen years secretary of the Congregation for the Interpretation of the Council of Trent (Congregatio Conc. Trid. Interpret.), and subsequently professor of canon law at the Roman Academy. He was regarded as the ablest Roman jurist of his time, and was frequently consulted by Alexander VI. He died at Rome in 1618. --Weiz., U. Weitz. Kirch.-Lex., iv, 838.

Fair (properly ꝡꝪꝥ, yopake, eulod), Travellers inform us that in hot countries the greatest difference imaginable subsists between the complexities of the women. Those of high condition seldom go abroad, and are ever accustomed to be shaded from the sun with the greatest attention, and their skin is consequently light in the nature of their employments, more exposed to the scouring rays of the sun, are in their complexion remarkably tawny and swarthy. Under such circumstances, a high value would of course be set by the Eastern ladies upon the fairness of their complexion, as a distinguishing mark of their superior quality, no less than as an enhancement of their beauty. This notion appears to have obtained as early as the time of Abraham (Gen. xii, 11-13). Thus, also, how natural is the bride's self-abasing reflection in Cant. i, 5, 6, concerning her companion. She is tawnie and dark, but like the fair daughters of Jerusalem, who, as attendants on a royal marriage, were of the highest rank. Roberts observes, in reference to the daughters of Job being very fair (Job xii, 15), "The word fair may sometimes refer to the tawny colour of their skin; but great value is attached to a woman of a light complexion. Hence our English females are greatly admired in the East, and instances have occurred where great exertions have been made to gain the hand of a fair daughter of Britain. The scend of perfection in a Hindu lady is to be of the color of gold." See Beauty.
Fairbanks, Erastus L.L.D., governor of Vermont, was born at Brimfield, Mass., Oct. 28, 1792. He obtained such education as the district school afforded; and at seventeen himself taught a district school. From his youth he was diligent in self-culture. In 1819 he removed to Westmore, Vt., and in March, 1814, he united with the Congregational Church in that place. From this time to the end of his life the interests of religion and the Church were paramount to all others in his life and habits of thought. After various vicissitudes in travel, he returned in 1830 to the manufacture of the "platform scale," which is now in use all over the world, and from the sale of which he laid the foundation of a large fortune. The village of St. Johnsbury grew in population, wealth, and virtue, so as to have become a model place under his skilful guidance. Trade and manufacturers vied in the "city's" success; and the "city" was universal.

In 1828 he became a deacon of the Congregational Church. In 1836 he was elected a member of the State Legislature, in 1844 and 1848 presidential elector, and in 1852 and 1860 he was chosen governor of the State of Vermont. In the execution of his official duties he was conscientious and faithful, and acquired and retained, in an unusual degree, the confidence of all parties. During his second term of office the civil war broke out. "His firmness at the critical period in the South, when the Union must be lost in case of war, was for his pecuniary interest to keep peace. But this had no weight with him. Day and night he toiled raising troops, where, three months before, not even a knapsack was to be found, and sending regiment after regiment of the brave Green Mountain Boys forward to the seat of war." The Legislature conferred upon him almost unlimited power in the discharge of his duties, and placed at his sole disposal a million of dollars, and at the close of his official term in 1861 passed votes of approval of his labors, ability, and patriotic devotion. He never touched even a salary of $5000 for many years; a corporate member of the American Board of Commissioners for Foreign Missions, and both in this field and in that of home missions he devoted time, talents, and money freely to the cause of God. His personal literary culture was diligently carried on during his life, and in 1860 the University of Vermont conferred on him the degree of LL.D. He died Nov. 29, 1864. To trace the thirty-four years of his life from 1828 to his death "is to record the daily acts of a life devoted to every good and noble work. Rare was the talent which could strike out such a path and direct such a business in the face of so many obstacles, in an inland town, remote from business centres, and guide it safely through all the financial embarrassments to which the country has been subject. But a fact far more rare and interesting is that, in the midst of so many cares, time abundant was always found, and means equally abundant, not only for aiding in every good work, but for loading in new benevolent movements, for which many, with far less to do, thought they could find no time. His munificent contributions to benevolent purposes was proverbial long before his death, and in connection with 'good words and works' the name of Erastus Fairbanks had, to the people of his state, come to be as familiar as household words. In public life he was honored and confided in as a capable, honest, and reliable man. In the walk of social life, he was esteemed as a kind neighbor, a sincere friend, and a Christian gentleman."—Congregational Quarterly, 1867, No. 1.

Fair Haven's (Kaloj Aipwv), a harbor in the island of Crete (Acts xxvii, 8), not mentioned in any other ancient work. There seems no probability that it is, as most early commentators thought (see Blacc, On the Acts, p. 347, ed. 1829), the Kaloj Aipwv, or Fair Beach, of Steph. Byz. (see Kuniol, Commentum, in loc.); for that is said to be a city, whereas Fair Haven is described as "a place near to which was a city called Lasma." Moreover, Mr. Pashley found (Travel in Crete, ii, 57) a district called Akte; and it is most likely that Kaloj Aipwv was situated there; but that the name of the district is in the west of the island, whereas Fair Haven was on the south. Its position is now quite certain. Though not mentioned by classical writers, it is still known by the old Greek name, as it was in the time of Beraulf (who calls it Calumene), Pococke (ii, 250), and other early travelers mentioned by Mr. Smith (Yog. and Shipwr. of St. Paul, 2d ed. p. 80-82). Lasma, too, has recently been most explicitly discovered. In fact, Fair Havens appears to have been practically its harbor. These places are situated four or five miles to the east of Cape Matala, which is the most conspicuous headland on the south coast of Crete, and immediately to the west of which the coast trends suddenly to the north. This last circumstance explains why the ship which conveyed Paul was brought to anchor in Fair Havens. In consequence of violent and continuing north-west winds she had been unable to hold on her course towards Italy from Cnidus (Acts xxvii, 7), and had run down, by Salamine, under the lee of Crete. It was possible to reach Fair Havens; but beyond Cape Matala the difficulty would have recurred so long as the wind remained in the same quarter. The looting of the "Isle of Gortyna" (Acts xxvii, 11), during which it is possible that Paul may have had opportunities of preaching the Gospel at Lasma, or even at Gortyna, where Jews resided (1 Mach. xv, 23), and which was not far distant; but all this is conjectural. A consultation took place, at which it was decided, against the advice of the Legates, to attempt to reach a good harbor named Phoenix (ver. 12). However, the south wind, which sprang up afterwards (ver. 13), proved delusive; and the vessel was caught by a hurricane [see EURYCLYDON] on her way towards Phoenicia, and ultimately wrecked.—Smith, s. v. See also Smith, s. v. See Euth., s. v. & s. v. See Conyers and Howson, Life and Epistles of St. Paul, ii, 32o. See CRETE.

Fairis (φαίρις, izeloumin; Sept. ἤφια, Vulg. sam. dorne, forum), a word which occurs only in Ezek. xxviii, and there no less than seven times (ver. 12, 14, 16, 19, 22, 27, 38); in the last of these verses it is rendered "waxes," and this appears to be the true meaning of the word throughout (so Forst, 1100. Hunder, s. v.; but Gesenius, 1100. Lex. s. v., thinks it means "traffic in general, and also gain.") It will be observed that the word stands in some sort of relation to ἄφερα, maaraah', throughout the whole of the chapter, the latter word also occurring seven times, and translated sometimes "market" (ver. 13, 17, 19), and elsewhere "merchandise" (ver. 5, 27, 33, 54). The words are used alternately, and represent the alternation of commercial business in which the merchandising of Tyre was engaged. That the first of these words cannot signify "Fairis" is evident from ver. 12; for the inhabitants of Tarshish did not visit Tyre, but rice versi. Let the reader substitute "paid" or "exchanged for" for "waxes" for "occupied in thy fairis," and the sense is much improved. The relation which this term bears to maaraah, which properly means barter, appears to be pretty much the same as exists between exports and imports. The sense of 1100. (ἡφια, the presumed sing. form) thus becomes essentially that proposed by
Fairs (Commentarii Ling. Hebr. p. 194) and adopted by Havernick (Commentar. p. 464), namely, exchange, or equivalent. The requirements of the Tyrians themselves, such as slaves (ver. 16), grain (ver. 17), steel (ver. 19), were a matter of natural; but where the business of foreign commerce is one for forty days within a circuit of forty miles, they are the exchange and the forwarding office, and the political caucus, and the family gathering, and the grand feast and gala days, and undermining the whole is the ever-present idea and aim of making money."

See Bar. 2:12.

Faith (Gr. πίστις, Lat. fides, fiducia) is essentially trust. The various uses of the word (both objective and subjective) may be summed up as follows: 1. An objective body of truth: "the faith," designated by the schoolmen as fides qua creditur, the faith which is believed. See the Augsburg Confession speaks of "our holy faith and Christian religion." (This sense does not occur in N. T.) 2. A rule of thought, the fides penes quam crederit: so the Roman Catholics say such a thing is "of faith" (not found in N. T.). 3. A personal quality, act, or habit of the individual man; the fides, verae credendi actus, and as such is used in Matt. 22:41.

Faith, however, although not directly referred to by the above Hebrew terms, were doubtless, and nearly certainly, mentioned in the East. Dr. Thomas (Lament. and Book ii, 152 sq) thus describes the scene at these Oriental mercantile gatherings: "On Monday of each week a great fair is held at the khans, when, for a few hours, the scene is really and picturesque. These gatherings afford an excellent opportunity to observe the Syrian manners, customs, and costumes, and to become acquainted with the character and quality of her productions. Thousands of people assemble from all parts of the country either to sell, trade, or purchase. Cotton is brought in bales from Nabiya; barley, and wheat, and dates of Antioch, and the Hebron, the Huleh, the Hauran, and Eshdraelon. From Gilead and Bashan, and the surrounding districts, come horses and donkeys, cattle and flocks, with cheese, milk, oil, honey, and similar articles. There are miscellaneous articles, such as chickens and eggs, figs, raisins, apples, pears, melons, and dates, and vegetables in their season. The peddlers open their packages of tempting fabrics; the jeweller is there with his trinkets; the tailor with his ready-made garments; the shoemaker with his stock, from rough, hard-soled shoes and red military boots; the farmer is there with his tools, nails, and flat iron shoes, and drives a prosperous business for a few hours; and so does the Sadduce, with his coarse sacks and his gaily-trimmed cloths. And thus it is with all the arts and occupations known to this people. The noise is incessant, and at a distance sounds like that of many waters. Every man is crying his wares at the top of his voice, chickens, cackles, and squall, donkeys bray and fight, and the dogs bark. Every living thing adds somewhat to the many-toned and protracted uproar. It is now a miscellaneous comedy in full operation, where every one, and does his best, and is supremely gratified with his own performance. The people find many reasons for sustaining these antiquated and very curious gatherings. Every man, woman, and child has inherited the itch for trading, and, of course, all classes meet at this grand bazaar to talk over the state of the markets, from the price of a cucumber to that of cotton, or of a five-thousand dollar horse from the Hauran. Again, every Arab is a politician, and groups gather around the outskirts of the crowd to discuss the doings of the 'allied powers,' the last firm, the past year, the news of the day, supposing the state of the markets, from the price of a cucumber to that of cotton, or of a five-thousand dollar horse from the Hauran.

Again, every Arab is a politician, and groups gather around the outskirts of the crowd to discuss the doings of the 'allied powers,' the last firm, the past year, the news of the day, supposing the state of the markets, from the price of a cucumber to that of cotton, or of a five-thousand dollar horse from the Hauran. Every Arab is a politician, and groups gather around the outskirts of the crowd to discuss the doings of the 'allied powers,' the last firm, the past year, the news of the day, supposing the state of the markets, from the price of a cucumber to that of cotton, or of a five-thousand dollar horse from the Hauran.
much to say that, apart from this principle and practice of belief, man, even in the full exercise of all his other faculties, could be enveloped in such a cloud of ignorance on even the most ordinary subjects, that an arrest would be laid upon all the affairs of civilized life, and there must be an end of all social harmony and order. It is by this means that we obtain a certainty, not of sight, not of demonstration, not of intuition, but a real and efficient certainty in many matters of high practical importance concerning which we must otherwise be hopelessly ignorant and in the dark. This principle lies at the foundation of human affections and faith. Belief, sentiment and conviction of truth and of a large portion of our most valuable knowledge in science, and our highest attainments in art. Above all, it is thus that we obtain our knowledge of many things divine, and especially of relations subsisting between God and ourselves; an acquaintance with which, as we shall hereafter see, is of the utmost importance to us, while yet, independently of the exercise of faith, it is utterly beyond the reach of every man living" (Rogers, Reason and Faith; Riddle, Bampton Lectures, 1852, lect. i). Faith "is that operation of the soul in which we are convinced of the reality of things of which it is not or cannot be made known of what is through sense or any other directly cognitive power. It is certainly a native energy of the mind, quite as much as knowledge is, or conception is, or imagination is, or feeling is. Every human being entertains, and must entertain, faith. He who would exist on the level of having immediate knowledge must needs go out of the world, for he is unfit for this world, and yet he believes in no other. It is in consequence of possessing the general capacity that man is enabled to entertain specific forms of faith. By a native principle he is led to believe in that of which he can have no adequate conception—in the infinity of space and time, and, on evidence of his existence being presented, in the infinity of God. This enables him to rise to faith in all those great religious verities which God has been pleased to reveal" (McCosh, INTUITIONS OF THE MIND, pt. iii, bk. ii, ch. v; see also pt. ii, bk. ii, ch. iv).

Guizot, Méth. et Études Morales (trans. in Journal of Sacred Literature, xii, 450 sq.), has a thoughtful essay in which he distinguishes natural beliefs from faith as follows: "No one can doubt that the word faith has an especial meaning, which is not properly represented by belief, conviction, or certitude. Custom and universal opinion confirm this view. There are many simple and customary phrases in which the word faith could not be replaced by any other. Almost all languages have a specially appropriated word to express the idea of faith. Expressions like this which have an essential difference from all analogous words. This word, then, corresponds to a state of the human soul; it expresses a moral fact which has rendered such a word necessary. We commonly understand by faith a certain belief of facts and dogmas—religious facts and dogmas. In fact, the word has no other sense when employing it absolutely and by itself—we speak of the faith. That is not, however, its unique, nor even its fundamental sense; it has one more extensive, and from which the religious sense is derived. We see, I believe; these words; this faith is in itself, in his power, etc. This employment of the word in civil matters, so to speak, has become more frequent in our days; it is not, however, of modern invention; nor have religious ideas ever been an exclusive sphere, out of which the notions and the word faith were excluded. They were used in the application, proved by the testimony of language and common opinion, First, that the word faith designates a certain interior state of him who believes, and not merely a certain kind of belief. Secondly, that it is, however, to a certain species of belief—religious belief—that it has been at first and most generally applied. Now our natural beliefs germinate in the mind of man, without the co-operation of his reflection and his will. Our scientific beliefs, on the other hand, are the fruits of voluntary study. But faith partsake of, and at the same time differs from, natural and scientific beliefs. It is, like the latter, individual and particular, like the former, it is firm, complete, active, and sovereign. Considered in itself, and independent of all comparison with the natural or scientific, it is the sentiment and conviction of the truth and security of the man in the possession of his belief: a possession freed as much from labor as from doubt; in the midst of which every thought of the path by which it has been reached disappears, and leaves no other faith, either that of the natural or that of the scientific, a clearly established harmony between the human mind and truth."

II. Christian Faith. So far as faith is a voluntary act, quality, or habit of man, it is psychologically the same in the theological sense as in common life; the difference lies in the objects of the faith. In order to generate or love a following, we must believe in its worthiness; so, for the fear and love of God, which are fundamental elements of the Christian life, faith must pre-exist. But this direction of the soul towards God does not spring from the natural working of the human soul, nor from any gift of God (g. ii, 9), and is not a sentiment and conviction of the truth and security of the words of the Gospel and the free grace of Christ (Rom. x, 17; 1 Cor. i, 21). Eides daemon est, per quod Christum redemptorem nostrum in verbo Evangelii recte agnoscimus (Forum. Concord. iii, 11). Not that the Holy Spirit而言, but which are single purpose of receiving Gospel truth; but it quickens and directs an existing faculty, at the same time presenting to it an appropriate object. The true faith, thus excited, is an operation at once of the intellect, the heart, and the will. As said above, this faith, so far as it saves men in Christ, is not a faith that is fulfilled in Christ as a personal Saviour. In further treating it, we give, (I) The uses of the words πίστις, faith, and πιστικόν, I believe, in the Scriptures (condensed from Cramer, Wörterbuch d. N. Test. Græcisch, Gotha, 1866, &c.). (II.) A history of the idea of faith in Christian theologies up to the Reformation. (III.) The Protestant and Romanist doctrines of faith in contrast and comparison with each other. (IV.) Later Protestant statements of the doctrine.

(I) Use of the words Faith and believe in Scripture. —Hiereport, I. The profound and term of the word in the primary trust or confidence, such as one man can have in another; more seldom fidélity or faithfulness which one pledges or keeps; and also the pledge of fidelity, e. g. Sophocles, O. C. 1632: δός μοί χρῆσαι σεν πίστιν. Examples of the primary meaning (trust or confidence) are: Hebrews xii, 2; James iii, 24; 1 Pet. ii, 5; 1 Pet. v, 5; 1 Pet. iii, 19; see also Matthew xiii, 12; Acts xi, 24; Acts xiii, 26; Romans ii, 6; Romans iii, 24; Romans xiv, 25; Romans xv, 18; 2 Cor. iv, 7. "For we walk by faith (πιστήν), not by sight." Heb. xi, 27; "By faith (πίστις) he forsook Egypt." Heb. xi, 1, "Now faith (πιστικόν) is the substance of things hoped for, the evidence of things not seen." Rom. iv, 18, "Who against hope believed (ἐμπιστοτέτοις) in hope;" John xx, 22, "Blessed (are) they
that have not seen and (yet) have believed (προανοιαγωγημένοι). But this opposition to "knowledge" or "sight" is not essential to the idea of faith, as is seen from John iv, 42; xi, 45; 1 Tim. iv, 8; Phil. 2, 6, et al. In fact, the N.T. faith differs from the profane πίστις generally in that it is not a conviction held without reference to any ground or authority (compare 1 Pet iii, 15; i, 21).

In the O.T. the word "faith" is comparatively seldom used; the relation of man to God and to his revelation is generally designated by some other term befitting the economy of the law, e.g., "doing God's will," "keeping the commandments," "remembering the Lord" (Exod. iii, 13), et al. Nevertheless, we do find (as one would expect among many passages of this relation) terms denoting "trusting," "hoping," "waiting on the Lord" (徭城, 运, 白侯, 卵侯, 卵侯, 卵侯). But in some of the most important passages of the Old-Test. history the word "faith" occurs; e.g., with regard to Abraham (Gen. xv, 6), "he believed in the Lord, and he counted it to him for righteousness;" of the people of Israel (Exod. iv, 31; compare i, 5, 8; xiv, 31); with regard to the possession of Canaan (Deut. ix, 23; comp. i, 2; Ps. lxxxvii, 22, 82; cvi, 21); with regard to the covenant of the law (Exod. xix, 9). In view of these important passages, we may say that the foundation laid for the N.T. faith is laid in the O.T. faith" (comp. Chron. xx, 21; Isa. iii, 1; vii, 9; xxviii, 16; Jonah iii, 5). But unbeliefe is far oftener spoken of in the O.T. than faith (comp. Ps. lxxxvii, 13; 2 Kings xvii, 14; Ps. lxxxvii, 22; 32; cvi, 24; Num. xx, 12; Deut. ix, 23; Isa. vii, 9; lili, 1; Numb. xiv, 11; Isa. cvi, 12; cxix, 66). The verb used in all these passages is πίστεω, Hiph. of πίστεω, to fasten, hold, make firm. From the last of these significations follows that of to support, to rely upon, to trust (Job xxxix, 11, 12; iv, 18; xxv, 15); holding a thing for certain and reliable (1 Kings x, 7; 2 Chron. ix, 6; Lam. iv, 12; Jer. xi, 14; Deut. xxxvii, 66; Job xix, 22). Used with relation to God, it denotes a cleaving to him, resting upon his strength, sure confidence in God, which gives fixedness and stability (2 Chron. xx, 20; Isa. vii, 9).

But there is apparently no corresponding noun to the verb πίστεω. For ἡ πίστις corresponds to the partic. in Kal and Niphal, הָפַד, הָפַד, and denotes steadfastness, stability (as an objective quality; e.g., Isa. xxxiii, 6). In other passages it denotes the personal quality of faithfulness, faithfulness (but not of holding fast by faith), e.g. 1 Chron. ix, 22; 2 Chron. xxxii, 18 (sense with which it is used in LXX in 2 Kings v, 14; Jer. vii, 28). In these passages, where the word refers to man, the Sept. translates it πιστεος; but where it refers to God it makes it ἀληθινα, e.g. Ps. xxxiii, 4. Here it may be remarked that the reference to this προανοιαγωγημένοι (faithfulness of God) by Paul (Rom. iii, 2 sq.) helps us to fix his idea of faith as definitely trust. As a designation of the religious relation of man to God, προανοιαγωγημένοι is only seldom used in the O.T. (see 1 Sam. xxvi, 25; Jer. v, 5). In these passages it denotes not simply condor, honesty, but rather faithfulness, i.e., faithfulness to the covenant (comp. Jer. v, 3 with i, 5 and Matt. xxii, 33). But, after all, we have not yet found our idea of faith. But Halâkukki, ii, 4 affords a passage in which is distinctly to be found the Pauline idea: הָפַד הָפַד וְהָפַד הָפַד (Sept. εἰς ἐπιστεόν ἐπιστεόν ἐπιστεόν) (Sept. εἰς ἐπιστεόν ἐπιστεόν). Apparently this passage was not understood by the Sept., which changed the suffix of the third person to that of the first, and referred it to the faithfulness and the reliability of God. But ἡ πίστις stands here with regard to the relation in which the just man, compared with the haughty Chaldæan, holds himself to the divine promises; and it refers, therefore, not to the relation it-
FALSE

Rom. iii, 22; Gal. ii, 16; iii, 22; Ephes. iii, 12; Phil. iii, 9; Gal. ii, 20; Acts iii, 16; Jas. ii, 1; Rev. ii, 13; xiv, 12; with Tit. i, 1, compare Rev. xviii, 24. (2) Without nearer definition, simply as faith, which adheres with full conviction and confidence to the N.T. revelation of salvation, and makes this its foundation (supposed to be) the essential meaning of the expression (Acts iii, 10), the faith which is by him, an expression which is used to point out the salvation arising from the mediation of Christ, through the looking unto Jesus, the author of faith (Heb. xii, 2). Under this class, besides the passages of the Synoptical Gospels, several other passages are found, as well as combinations (usually in the profane Greek) of εἰς τὸν θεόν, εἰς τὴν σάρκα, εἰς τοῦ θεοῦ, and also πιστεύω standing alone. The question is whether the original signification is confidence, or accepting as true.

(3.) In John, the expression πιστεύω in the significance to believe, to take for true, and hence to be convinced, to recognize (accept); (a) with the affirmation, John xi, 26, πιστεύω τοῦροῦ; comp. 25, 26; 1 John iv, 16; Acts xxi, 41; 1 Cor. xi, 18; 1 Tim. iii, 16; comp. Matt. xxiv, 23, 26; Luke xxii, 67; John x, 25; (b) with the infinitive after it, Acts xxvii, 25; see comment after it, Matt. ii, 22; Mark xi, 24; Acts xxvii, 26; Jas. iii, 19, εἰς πιστεύω τῷ τι σιν ἐστιν; compare Acts xxvii, 25; John iv, 21, πιστεύω μοι, ἵνα ἰρωτάσῃ ὁ οἶκος. This construction of πιστεύω is especially frequent in the writings of John, in the sense of taking for true (John vi, 6). As well as in Matt. xi, 28; 1 Thess. iv, 14; but in Rom. x, 9, ἵνα πιστεύσῃ ἵνα καθίσῃ σου ὁ οἶκος σου ἰρωτάση ἐν νεκρῶν, εὐθυγραμμία, the sense of trust predominates over that of taking for true. Compare also Heb. xi, 6, with xiv, 1; iv, 3.

In John this construction with εἰς is found in passages: John vi, 21; iv, 25; viii, 24; xiv, 6, 7; xii, 40; xvi, 27; Acts xxvii, 26; xxi, 37; 1 John iii, 23; 4 John iv, 48 (Except ye see signs and wonder, ye shall not believe:); x, 37; xiv, 11; vi, 36; xx, 29; compare xx, 25; i, 51; iv, 39-42.

Let us look now at the constructions πιστεύω τοῦ of itself cannot signify to accept a person, but only to believe what he says, to trust his word; e.g. John ii, 22 (they believed the Scripture and the word which Jesus had said); xiv, 27; (1 John iv, 1). In this sense also we understand John vi, 40 (for ye believed not); ye would have believed me;) viii, 31; 54; xvi, 37; and note also the testimony of Christ and his fame that John iv, 48 (Except ye see signs and wonder, ye shall not believe:); x, 37; xiv, 11; vi, 36; xx, 29; compare xx, 25; i, 51; iv, 39-42.

The passages in which the construction πιστεύω τοῦ of itself cannot signify to accept a person, but only to believe what he says, to trust his word; e.g. John ii, 22 (they believed the Scripture and the word which Jesus had said); xiv, 27; (1 John iv, 1). In this sense also we understand John vi, 40 (for ye believed not); ye would have believed me;) viii, 31; 54; xvi, 37; and note also the testimony of Christ and his fame that John iv, 48 (Except ye see signs and wonder, ye shall not believe:); x, 37; xiv, 11; vi, 36; xx, 29; compare xx, 25; i, 51; iv, 39-42.

The passages in which the construction πιστεύω τοῦ of itself cannot signify to accept a person, but only to believe what he says, to trust his word; e.g. John ii, 22 (they believed the Scripture and the word which Jesus had said); xiv, 27; (1 John iv, 1). In this sense also we understand John vi, 40 (for ye believed not); ye would have believed me;) viii, 31; 54; xvi, 37; and note also the testimony of Christ and his fame that John iv, 48 (Except ye see signs and wonder, ye shall not believe:); x, 37; xiv, 11; vi, 36; xx, 29; compare xx, 25; i, 51; iv, 39-42.

The passages in which the construction πιστεύω τοῦ of itself cannot signify to accept a person, but only to believe what he says, to trust his word; e.g. John ii, 22 (they believed the Scripture and the word which Jesus had said); xiv, 27; (1 John iv, 1). In this sense also we understand John vi, 40 (for ye believed not); ye would have believed me;) viii, 31; 54; xvi, 37; and note also the testimony of Christ and his fame that John iv, 48 (Except ye see signs and wonder, ye shall not believe:); x, 37; xiv, 11; vi, 36; xx, 29; compare xx, 25; i, 51; iv, 39-42.

The passages in which the construction πιστεύω τοῦ of itself cannot signify to accept a person, but only to believe what he says, to trust his word; e.g. John ii, 22 (they believed the Scripture and the word which Jesus had said); xiv, 27; (1 John iv, 1). In this sense also we understand John vi, 40 (for ye believed not); ye would have believed me;) viii, 31; 54; xvi, 37; and note also the testimony of Christ and his fame that John iv, 48 (Except ye see signs and wonder, ye shall not believe:); x, 37; xiv, 11; vi, 36; xx, 29; compare xx, 25; i, 51; iv, 39-42.

The passages in which the construction πιστεύω τοῦ of itself cannot signify to accept a person, but only to believe what he says, to trust his word; e.g. John ii, 22 (they believed the Scripture and the word which Jesus had said); xiv, 27; (1 John iv, 1). In this sense also we understand John vi, 40 (for ye believed not); ye would have believed me;) viii, 31; 54; xvi, 37; and note also the testimony of Christ and his fame that John iv, 48 (Except ye see signs and wonder, ye shall not believe:); x, 37; xiv, 11; vi, 36; xx, 29; compare xx, 25; i, 51; iv, 39-42.

The passages in which the construction πιστεύω τοῦ of itself cannot signify to accept a person, but only to believe what he says, to trust his word; e.g. John ii, 22 (they believed the Scripture and the word which Jesus had said); xiv, 27; (1 John iv, 1). In this sense also we understand John vi, 40 (for ye believed not); ye would have believed me;) viii, 31; 54; xvi, 37; and note also the testimony of Christ and his fame that John iv, 48 (Except ye see signs and wonder, ye shall not believe:); x, 37; xiv, 11; vi, 36; xx, 29; compare xx, 25; i, 51; iv, 39-42.
the testimony of God, (2) accepting the testimony of Christ concerning himself, and therefore (3) accepting Christ himself. The construction pιστεύω eis is found in John ii, 11; i, 16, 18, 36; iv, 39; vi, 29, 40 (47); vii, 5, 31, 38, 39, 48; viii, 39; ix, 35, 36; x, 24; xii, 25, 26, 27, 31, 32, 37, 43, 44, 45; xiv, 1, 12; xv, 7, 9, 12, 20; xvi, 1, 9; xvii, 10. The only passage in the writings of John in which another preposition occurs is John iii, 15, where Lachmann reads ἐν αὐτῶν, Tischendorf ἐν αὐτῷ, instead of ἐις αὐτῶν.

(2.) But the sense of admitting, accepting as true, that which is established by the whole of the doctrine of Christ in faith. It includes not only this, but also adherence to Christ; cleaving to him. See, for instance, the whole passage, John ix, 35-38, and comp. xiii, 48: x, 25, 27; vi, 62; i, 12. Both these are evidently misprints of ἐν αὐτῷ, and γινώσκω ἑαυτόν, which is found with but few exceptions in the whole NT, and even there with ὁ διότατος ἐν αὐτῷ (Luke xvi, 27; comp. with vi, 29; τί οὖν ποιεῖς ἐν σημαίνῃ, ἵνα λέεις πιστεύω σοι. (What sign shewest thou, that we may see and believe in thee?); 29: ἵνα πιστεύητε εἰς ὃν ἀνίστηται ὁ οἶος (that ye believe on him whom He hath sent). Compare especially also Matt. xxvii, 42; Mark xv, 32.

It is plain, now, that John’s idea of faith includes the element of cleaving to Christ as well as of accepting him; and this cleaving to him includes the idea of full trust in Christ as Saviour, as illustrated in the important verses, John ii, 23, 24; iii, 15: ἐν αὐτῷ ἐστιν πιστεύω (that whosoever believeth in me shall have eternal life). Here is the anguish, the believer, the bite of the fiery serpent, the earnest looking on in whom sin is crucified with the inner eye of faith” (Alford, loc. cit.). In this full sense of the word John uses πιστεύω by itself (to believe): in i, 6, 7, 11, iv, 41, 42, 48, 53, viii, 36, 64; ix, 38, x, 25, 26, xi, 15, 40; xii, 47, xiv, 29; xvi, 31; xix, 35; xx, 31 (comp. iii, 12; vi, 69; xx, 25, 26, 30). And this faith is the condition of the gifts of life, light, and salvation; John x, 25, 26; xii, 12, 15, 16, 18, 19, 32, 47; xv, 25, 26; xvi, 30, 31 (comp. viii, 38); viii, 24; ii, 12; xiii, 36, 40 (comp. viii, 12 and xi, 40).

(3.) Paul’s use of πιστεύω also includes the idea of intellectual conception, recognition; see the passages above cited under πιστεύω, and comp. also Rom. iv, 20 (strong in fide); i, 5; xvi, 26, and the relation of πιστεύω to κατασκευάζω (Rom. x, 14, 16; I Cor. xv, 2, 11; Ephes. i, 13). But the sense of trust in Christ as Saviour is always predominant in Paul. The construction πιστεύω τινι, to trust, rely upon, is found in 2 Cor. x, 18, where I have read πιστεύω, and the heend, the same as the relation of trust to faith in Romans iv, 20 (in fide); ii, 4; compare iv, 18. Instead of the dative we find πιστεύω εἰς, Rom. iv, 5, 6: εἰς τὸν διακονοῦντα τὸν δεικτήν (on him that justifieth the ungodly). iv, 24. The sense of πιστεύω eis always faith alone in Christ (Rom. x, 14; Gal. ii, 16; Phil. i, 29); likewise εἰς with the dative, 1 Tim. i, 6; Rom. ix, 33. And πιστεύω is used standing alone to designate the fullest trust of faith, Rom. i, 16; iii, 22; iv, 11, 18; x, 4, 10; xii, 11; xvi, 13; i Cor. i, 21; iii, 5; xiv, 22; 2 Cor. iv, 17; Gal. iii, 28; Ephes. i, 15, 19; 1 Thess. i, 7; ii, 10, 13; 2 Thess. i, 10.

In James ii, 19, to believe denotes intellectual assent, but in ver. 23 it denotes trust (see under πιστεύω). In Peter the two elements of assent and trust are connected (comp. 1 Pet. i, 9, with 4, 5, 7; i, 21. In the Apostle's Confession, the import of the word (whether assent or trust, or both conjoined) must be decided by the context.

The result of our examination is, that “faith” in the N. T. includes three elements, each and all necessary to the whole doctrine of the word, while one or another of them may become prominent according to the connection, viz.: (1) intellectual acceptance of the revelation of salvation; (2) adherence to the truth and to the person of Christ thus accepted; (3) absolute and exclusive trust in the redeeming work of Christ for salvation. In no one of the writers of the New Testament is any one of these elements wanting.

(11.) Early History of the Doctrine of Faith.—1. In the early Church, the Pauline doctrine of faith as a condition of justification was everywhere most firmly held. But the Eastern thinkers did not give much attention to faith in a doctrinal way, and its true meaning was not prominently developed, nor was the distinction between faith and works (as conditions) sharply drawn. During the Apostolic period (from A.D. 100 to A.D. 250), while the condition of justification was principally maintained as a moral and intellectual knowledge, faith was for the most part considered as historic-doctrinal faith in its relation to ἱστορίας. This gave rise to the opinion that knowledge in divine things justifies, while ignorance condemns. Mi- nucius Felix († 205) writes: “...and even as we en- nam, noticea procul ad veneri. Theophrastus of Antioch († 181) also knows of a fides historica alone, upon which he makes salvation to depend, i, 14: ἀσκείναις οὖν λαβών τῶν γνώμων καὶ πραγματευμάτων, ὡς ἀπείτω, ἀλλὰ πιστεύω πεπληρωμένον δεόν, μη ἐπιθύμησθε, μη ἐπικαθηκαί, ἐπίθυμησις ἀνώμοις τοῖς ἐν ἀνίστασις τιμωρίσω. (1) This was reserved for men of later times to investigate more profoundly the idea of justifying faith in the Pauline sense, yet correct views on this subject were not wanting. Thus, in the Hippocratic element of Rome († 100) says in a Pauline spirit, "Called by the will of God in Christ, we can be justified, not by ourselves, not by our own wisdom and piety, but only by faith, by which God has justified all in all ages. But shall we on this account cease from doing good, and give up charity? No! but all shall lay each an unweary seal as God, who has called us, always works, and rejoices in his works” (1 Ep. ad Cor. c. 82, 83). Irenæus († 202) contrasts the new joyful obedience which ensues on the forgiveness of sins with the legal stand-point. “The law which was given to the bondmen of old was to lead them outward corporal work, for it coerced men by a curse to obey the commandments, in order that they might learn to obey God. But the Word, the Logos who frees the soul, and through it the body, teaches a voluntary surrender. Hence the futilities of the law must be taken off, and man accustoms himself to the free obedience of love. The obedience of freedom must be of a higher kind; we are not allowed to go back to our earlier stand-point; for he has not set us free in order that we may leave him; this no one can do who has sincerely con- fessed himself to have been free when he has been enslaved, and the more he perseveres in justification out of communion with the Lord; and the more we obtain from him, so much the more must we love him; and the more we love him, so much greater glory shall we receive from him” (Irenæus, Herr. bk. iv, chap. xiii, 1, 23; Neander, History of Dogmas, Böyland, p. 216). Tertullian (220) adv. Marc. v, 8: et hæc libertatis libertas que est, sanctissima libertatis honor, non ex bis servitutis quisque jus- tuae ex fide vivit. According to Clement of Alexandria († 218), faith is not only the key to the knowledge of God (Coh. p. 9), but by it we are also made the children of God. By Clement's account, faith distinguishes between theoretical and practical unbelief, and understands by the latter the want of susceptibility of divine impressions, a carnal mind which would have everything in a tangible shape (Ström. ii, 4, p. 436). Origen (A.D. 250) in Num. Rom. xxxvi (Opp. iii, p. 369): “...quia fide est omne quod fide cognovit; sine fide nihil, saepe saepeque, sicut et in Ps. lxxviii, 39: Hist. of Doctrines, § 79; comp. also § 84). Apollinaris († 384) on John vi, 27, says: "The eternally enduring fruit, by which we are sealed by the Father and assimilated to Christ, is the faith which makes alive;"
and on ver. 28, "Faith both justifies and sanctifies without human works, seeing that it contains within itself the noblest energy, and is not slothful or inactive" (Dornen, Person of Christ, Edinb. tr., ii, vol. i, p. 408, &c.).

2. The Latins, more earnest on the practical than on the theoretical side, seem to have had deeper notions of faith (see Terrailian, cited above). But the minds of theologians were turned almost wholly to the doctrines of sin, grace, and free will (Pelagian controversy), and not to the appropriation of redemption by faith. The relations of faith to knowledge were set forth clearly and strongly, however, in the maxim Fide procedit intellectum, first announced by Origen, and adopted by Augustine (Epist. cxx, 8; ed. Migne, ii, 458, cited by Shedd, History of Doctrines, i, 162).

Compare also Augustine, De Utilitate Credendi, c. xxiii, where he shows the natural analogies for faith; e.g. that friendship among men, filial piety, etc., are grounded on faith. He makes a distinction between fides que sant and fides qua creditur (De Trin. xiii, 2); and uses the phrase fide catholica in the objective sense, to denote the body of doctrine "necessary to a Christian" (De temp. serv. 53; and ad. Jud. c. xix). Augustine, says Melancthon, did not set forth fides, but only fide in the proper sense of the word. Fides, he says, though he came nearer than the Scholastics (Letter to Bremius, op. ed. Bretschneider, i, 502).

3. In the scholastic period the idea of the kingdom of God degenerated into that of an ecclesiastical theocracy, and the outward side of the religious life (purity and good works) was prominent. Nevertheless, the great doctrinal truths of Christianity were carefully studied, and the aim of the greatest thinkers (e.g. Anselm) was to show that faith can be verified to the intellect as truth, while, at the same time, it is the ground of all science, and the true basis of all salvation. "First of all," he says, "faith must purify the heart: we must humble ourselves, and become as little children. He who believes not, cannot experience: he who has not experienced, cannot understand. Nothing can be done till the soul rises on the wings of faith to God" (De Fide Trinitatis, c. ii).

The great Greek theologian, John of Damascus (8th century), who may be considered as beginning the period of scholastic theology, defined faith as consisting of two things: 1. belief in the truth of revealed doctrine, the vr&tia &c. (De Fide, c. x, i, xii, and xii, 1); and 2. firm confidence in the promises of God, the faith which is "the substance of things hoped for, the evidence of things not seen" (Heb. xi, 1). The first of these, he says, is the work of our own minds; the second is the gift of the Spirit (De Fide Ordin. c. iv).

Anselm comprises the whole doctrine of faith and morals in the question, how man appropriates redemption to himself. He says, "The mere idea does not make faith, although this cannot exist without an object; in order to true faith the right tendency of the will must be added, which grace imparts" (De Gratia et Libero Arbitrio, c. vi).

He distinguishes (Monologium, p. 72; compare p. 75) between credere Drum, Christiam, and credere in Deum, in Christiam: the former denotes a mere outward faith which only retains the form; the latter denotes the tue, living faith, with its development. Hugo of St. Victor develops this general idea of faith in connection with the religious nature of man. Faith marks the manner in which invisible blessings dwell within our souls (quodam modo in nobis substanti), the real vital communion with God, his true existence in the human soul. For divine things cannot be apprehended by us through the senses, the understanding, or the imagination, since they have nothing analogous to all these, but are exalted above all images. The only vehicle of the possession of this true communion with God is the tue faith — the tendency of the disposition, and the matter of cognition. This latter is the object of faith, but its essence consists in the tendency of the disposition; and although this is never altogether without the former, yet it constitutes the value of faith. Bernard of Clairvaux agrees with Hugo in his view of the nature of faith: "even now," he says, "many who believe with confidence have only scanty knowledge; thus many in the O.T. retained firm faith in God, and received salvation by this faith, although they knew not when and how salvation would come to them." Expressions of this kind are also important (Sententia, c. iv). "Faith," he says, "always refers to the invisible, never to the visible. But how is this? When Christ said to Thomas, 'Because thou hast seen me, thou hast believed.' What Thomas saw before him was one thing, what he believed was another. Thomas confessed the man whom he saw to be the Lord, in whom he believed. He saw the flesh, but he believed in the God veiled in the flesh." (Neander, Church History, Torrey, iv, 375).

"Not merely Abelard, but also most of the other scholmen, understood by fides the essence of all justification, but a subjective character of the disposition, which proceeds from faith, the true inward sanctification in love which arises out of faith. Bernard, on the other hand, was led by his experience to a more objective view: 'No one is without sin (Sermo on St. Monica's Song, c. vii, 31); for all righteousness is from me for me that he is gracious to me; who has redeemed me. Christ is not merely righteous (ib. 22, § 8), but righteousness itself." The scholastic doctrine on this point received a fixed form through Peter Lombard (Sentent. iii, dist. 28). He makes a threefold distinction in faith: fides, credere, fide. The first means faith as the essential principle of all the other two. The second means credere in Christum credere. The second term, for he who is a Christian, holds his faith to be a true virtue.

Applying to faith the Aristotelian distinction between the form as the formative principle (idea, forma), and the inorganic material determined by it (dein, materia), Peter distinguishes faith as the qualet est mensa informata, the mere support of faith, and the person of Christ; and adds, that the vivifying power of love is added to it, which forms and determines it. The fides formata is a true virtue and this faith, working by love, alone justifies' (Neander, History of Dogmas, Ryland, p. 522 sq).

The Scholastics generally recognised the distinction (hinted by Augustine) between objective and subjective faith (fides qua creditur and fides qua creditor) and also distinguished between developed (explicita) and undeveloped (imperflia) faith (Aquinas, Summa, ii, qu. 1, art. 7). But in all the scholastic period, the prevalence of the sacrificial theory of religion hindered, if it did not absolutely prevent, a just apprehension of the nature of faith, and naturally developed the theory of the merit of good works. Peter Lombard, indeed, says that good works are those only that spring from the love of God, which love itself is the fruit of faith (opus fides; Sententia, iii, dist. 22, De virtute fidei). Thomas Aquinas were not quite so scriptural; thus (Suma, pt. ii, 2, qu. 4, art. 7) he speaks of faith itself as a virtue, though he assigns it to the first and highest place among all virtues. He defines faith to be 'an act of the intellect assenting to the true truth of the opinion of the Spirit upon the will' (Summa, ii, 2, 1, 4), and reckons faith among the theological virtues, which he distinguishes from the ethical (Neander, Wis. Aekkwardia, ed. Jacobii, 1861, p. 42).

Such notions, however, led more and more to the
revival of Pelagianism, till the forerunners of the Reform-

formation returned to the simpler truths of the Gospel" (Hagenbach, History of Doctrines, § 186). According to Aquinas, the faith by which we are cleared from sin is not the faith of reason, which can comprehend the Christian faith, but the fides formata percharitat (faith informed by love). In justification there is a motus charitatis as well as a motus fidei (Summa, pt. iii, qu. 44, art. 1). This statement contains the germ of the later Roman Catho-

clic doctrine (see other passages in Möhler, Symbolism, N. Y. 1907.) On this true Pauline doctrine Dompengoesselhüt, 1864, p. 365). Its doctrine (as that of the period generally) is that justification is "not an active object, but some-
thing subjective, making man internally righteous by the communication of the divine life in fellowship with Christ. For the attainment of justificatio, moreover, faith must be the first step; it was not sufficient for justification, but love must be added; the grotia justifica was first given in the fides formata, making man internally righteous. Since this external idea of faith required that for effecting justification something must be added from without, the additional aid of the Church was demanded" (Neander, Dogmas, p. 661). See Justification.

4. John Wessel († 1498) was a precursor of the Reform-

ation in his views on faith, as well as on many other points. None of the theologians of the Schola-
tics down to 2, that is, the first principle of the Pauline spirit as Wessel. He considers it "not a mere taking for granted of historical facts, but the devotion of the whole mind to fellowship with God through Christ; it is the basis of the whole higher life; not merely in the relations of man to man, but also in the relation of man to God" (Ullmann, Reformers before the Reformation, Edinb. 1885, ii, 468).

Practically, at the dawn of the Reformation (and for ages before), Christian people were taught by their pastors that the pardon of sin was to be secured, not by faith in the merits of Christ, but by penitential ob-

servation and good works. "As the first step, it was not sufficient for justification, but faith itself was generally held to be simply the reception of the teaching of the Church. In practice, faith was transformed into credulity. (111) The Protestant and Roman Catholic Doctrines of Faith compared.—The Protestant Doctrine. —The central point of the Reformation, in a doctrinal point of view, was justification by faith. Its development will be treated in our article JUSTIFICATION; we can here only briefly give the distinction between the Protestant and Roman Catholic doctrines of faith: 1. that of the Reformed Church, and 2 that of the Catholic Church. 1. The Reformers. —The Reformers, in opposition to the Scholastic doctrine of justification as a subjective work (the making just), brought out prominently the objective idea of justification (as a work done for us by Christ). "On the other side, correspondingly, they regarded faith as subjective, and as the principle of the transformation of the whole inner life" (Neander, Dogmas, ii, 662). The prominent position of faith in the theology of the Reformers was a fundamental part of the change that was taking place, at the time, in the gospel teaching of Christendom. "The mind was not satisfied with an objective and outward salvation, however valid and reliable it might be. It desired a consciousness of being saved; it craved an experience of salvation. The Protestant mind could not rest in the Church, neither could it pretend to rest in an atone-

ment without faith. Upon his policy and the work of Christ on Calvary must become the subjective experi-

ence and rejoicing of the soul itself. While, however, the principle and act of faith occupies such a promi-

nent place in the soteriology of the Reformation, we should not fail to note that it is not represented as a primary cause of justification; it is only the instru-

mental cause. Protestantism was exceedingly care-

ful to distinguish justification from legal righteousness on the one hand, and from sanctification by grace on

the other. It could not, consequently, concede to any species of human agency, however excellent, a pecu-

liar and atoning efficacy. Hence we find none of that supplementary or perfecting of the work of Christ by the work of the creature which is found in the papal soteriology, and which is the most apparent in the act of faith itself. Faith itself, though the gift and the work of God, does not justify, speaking accurately, but merely accepts what does justify" (Shedd, History of Doctrines, ii, 337-8). Luther was led to the true Pauline doctrine of faith as a result of profound convict-

tion of the desperate condition of humanity, not sim-

ply from its sense of finiteness (which could only have led him to faith as a realization of the invisible and eternal), but also and chiefly from the crushing sense of personal guilt on account of sin. He regards faith not merely as a work, but as a (as something substantial and divine thing, so far as it cleaves to God, and God is in it. Faith is in the state of the unio mystica, union with God; and yet it is, at the same time, man's true existence. It is no mere intellectu-

al act, but a giving up of the whole man to trust in Christ; and conversely, a penetration of the whole man by the life of Christ. "Faith makes new crea-
tures of us. My holiness and righteousness do not spring from myself; they arise alone out of Christ, in whom I am rooted by faith" (Dornier, Person of Christ, 1993, i, 68, 64). Luther says: "Faith alone justifies, and it alone fulfills the law; for faith, through the merits of Christ, obtains the Holy Spirit. And then, at length, from the faith thus efficaciously working and living in the heart, freely (Amstaff) proceed those works which are truly good. . . . But faith is an energy in the heart; at once so efficacious, lively, breathing, and powerful as to be incapable of remaining inactive, but bursts forth into operation. Neither does he who has faith (moratien) demur about the question whether good works have been com-
manded or not; but even though there were no law, feeling the mutual love of God, he says: "As a loving and exerting itself in his heart, he is spontaneously borne onward to work, and at no time does he cease to perform such actions as are truly pious and Christian. Faith, then, is a constant fire, a trust in the mercy of God toward us; a trust in his help and efficaciously working in the heart, by which we cast ourselves entirely on God, and commit ourselves to him; by which, cer-
to freli, having an assured reliance, we feel no hesita-
tion about enduring death a thousand times." Luther laid the greatest stress at all times on the cer-

tainty of this faith; and it was his object to make this certainty of the Church and the Christian faith.

The ground certainty, on which all other cer-
tainty depends, is with him the justification of the sin-

ner for Christ's sake apprehended by faith; of which it is only the objective statement to say that to him the fundamental certainty is Christ as the Redeemer, through surrender to whom faith has full satisfaction, and knows that it stands in the truth" (Dornier, Geschicht der Prot. Theol., München, 1897, p. 224). To believe those things to be true which are preached of Christ is not sufficient to constitute thee a Christian; but the assurance that the things spoken of Christ are true must be also given to thee; otherwise God will not have satisfied either thee or any other, to whom the advantageous benefits of Christ are given and exhibited, which he that believes must plainly confess, that he is holy, godly, righteous, the Son of God, and certain of salvation, and that by no merit of his own, but by the mere mercy of God, which unto you is grafted forth [Luther, Sechs Und Sieben, Col. I, 4-7, in Fish, Masterpieces of Pulpit Elence, i, 468]. Zwingli held that faith, in the sense of the appro-

priation by man, through grace, of the redemptive work of Christ, is the only means or instrument of salva-

tion. And this habitat, that the Roman Catholic and Lutheran doctrines of the Eucharist that these doctrines detract from the glory of faith by rep-

resenting it as insufficient for salvation (Dornier, Per-

III.—15
a letter to Brentius, May, 1531, says: "Faith alone (sola) justifies, not because it is the root ( radix), as you write, but because it lays hold of Christ, on whose account no other justifying grace is necessary. It is not the fulfillment of the law, which justifies, but faith alone, not because it is a perfection in us, but only because it lays hold on Christ" (edit. Bretschneider, Hal. Sax. 1853, ii, 501). Calvin (Institutes, bk. iii, chap. xi) treats of faith at large, and distinguishes it from "a common assent to the evangelical history," and refutes the nugatory distinction made by the schools between fides formata and fides informata. "The disputes of the schools concerning faith, by simply styling God the object of it, rather mislead miserable souls by a vain speculation than profit them. A true sign of this grace God, 'dwelleth in the light which no man can approach unto,' there is a necessity for the interposition of Christ as the medium of access to him." "This evil, then, as well as innumerable others, must be imputed to the schoolmen, who, have, as it were, concealed Christ by covering a hill over him; whereas, unless our views be immediately and steadfastly directed to him, we shall always be wandering through labyrinths without end. They not only, by their obscure definitions, diminish, and almost annihilate, all the importance of faith, but have fabricated the notion of implication, which they have made the most egregious instance of the grossest ignorance, and most perniciously deluded the miserable multitude." "Is this faith—to understand nothing, but obediently to submit our understanding to the Church? Faith consists not in ignorance, but in knowing, not only of things, but of the things of God. ... For faith consists of a knowledge of God and of Christ, not in reverence to the Church. ... In short, no man is truly a believer unless he be firmly persuaded that God is a propitious and benevolent Father to him, and promise himself everything from him; and he will certainly do this which they that are ignorant and in gross ignorance do; and most perniciously deluded the miserable multitude." Their "faith doth God impute for righteousness upon him" (Art. iv). The nature of saving faith is set forth in Art. xx: "It is to be observed here that a mere historical belief, such as wicked men and devils have, is not here meant, who also believe in the history of the sufferings of Christ, and in his resurrection from the dead; but that genuine faith is here meant which causeth us to believe that we can obtain grace and forgiveness of sins through Christ, and which giveth us the confidence that through Christ we have a merciful God, which also giveth us the assurance to know God, to call upon his goodness; unless he depend on the promises of divine benevolence to him, and foels an undoubted expectation of salvation. He is no believer, I say, who does not rely on the security of his salvation, and confidently triumph over the devil and death" (Calvin, Institutes, bk. iii, ch. ii).

The passage from Phil. ii concerning several Confessions will be given more fully in the art. Justification; we cite here a few. Augsburg Confession.—"Men are justified freely for Christ's sake through faith when they believe that they are received into favor, and their sins are forgiven, and that Christ's sake God imputeth righteousness upon them" (Art. iv).

The nature of saving faith is set forth in Art. xx: "It is to be observed that a mere historical belief, such as wicked men and devils have, is not here meant, who also believe in the history of the sufferings of Christ, and in his resurrection from the dead; but that genuine faith is here meant which causeth us to believe that we can obtain grace and forgiveness of sins through Christ, and which giveth us the confidence that through Christ we have a merciful God, which also giveth us the assurance to know God, to call upon his goodness; unless he depend on the promises of divine benevolence to him, and foels an undoubted expectation of salvation. He is no believer, I say, who does not rely on the security of his salvation, and confidently triumph over the devil and death" (Calvin, Institutes, bk. iii, ch. ii).

The passage from Phil. ii concerning several Confessions will be given more fully in the art. Justification; we cite here a few. Augsburg Confession.—"Men are justified freely for Christ's sake through faith when they believe that they are received into favor, and their sins are forgiven, and that Christ's sake God imputeth righteousness upon them" (Art. iv).
the seat of faith, as Bellarmine expressly puts it in his contrast between the Protestant and the Roman ideas of faith: "hereticas fidem sibi sanat" definitia; Catholica fidem in intellectu sedem habere voluit (De Justif., i. 4). How thoroughly external a thing this faith may become in practice is evinced by the fact that the recitation of a creed, in Romanist language, is called only "gestus" (action), that faith, in the strictest technical sense, is not an act, but a mere "beginning" of justification, and not its instrument. So Möhler, in commenting on this passage, expressly says that "Roman Catholics consider faith as the union with God in Christ especially by means of the faculty of knowledge, illuminated and strengthened by grace." (Symbolica, N. Y. 1844, p. 204). In the same vein is the definition given by the Catechism of Trent, viz. that the "faith necessary to salvation is that faith by which we yield our entire assent to whatever has been revealed by almighty God." (Baltimore edit. p. 19). It is plain that the notion of faith, as Protestantism holds it, and as is derived from Paul, is totally wanting in the Roman doctrine. Naturally, too, with this conception of faith, the Romanists deny that faith alone justifies, affirming, in the way of the Scholastics (see above), that faith must be informed by charity, as the gospels inform it, if it is to be genuine in that respect, and to be reformed and renewed by confession and absolution. So J. H. Newman (Difficulties of Anglicanism, cited by Hare, Contest with Rome, p. 113) declares that Roman Catholics "hold that faith and love, faith and obedience, faith and works, are simply separable, and ordi- narily separable, in faith; that faith does not imply love, obedience, or works; or that the sincerest faith, so as to move mountains, may exist without love—that is, true faith, as truly faith in the strict sense of the word as the faith of a martyr or a doctor." On this Hare remarks that "this belief is not faith. To many persons, indeed, it may appear that this is little more than a dispute about words; that we use the word 'faith' in one sense, and the Romanist in another, and that it is not worth while to argue about the matter. But when we call to mind how great are the power and the blessings that can be derived from the Gospel, surely it is a question of the highest moment whether that power and those blessings belong to a lifeless, inert, insani- mate notion, or to a living, energetic principle. This is the great controversy between Romanism and Protestantism. Their stay is the opra operum, our sola fides. The faith of God, the gospel in a world of sinners, through Christ, renewing the whole man, and becoming the living spring of his feelings, and thoughts, and actions." (Contest with Rome, note 1). A letter of Bun- sen's in 1840 illustrates the Roman idea of faith, as it had taken root in the mind of J. H. Newman before he went over to Rome. A pastor in Antwerp (named Spörlein) was troubled about episcopal ordination, and came to England for light. He was invited to break- fast at Newman's, and found him a number of his friends ready to hear him. "He unburdened his heart to them; and he made their decisions the verdict of a Newmannick jury on a case of conscience, viz. that 'Pastor Spörlein, as a Continental Christian, was subject to the authority of the bishop of Antwerp.' He objected that by that bishop he would be excommunicated as a heretic. 'Of course; but you will conform to his deci- sion,' he exclaimed Spörlein, 'with his threats of taking away my faith?' 'But your faith is heresy.' 'How? Do you mean that I am to embrace the errors of Rome, and to abjure the faith of the Gospel?' 'There is no faith but that of the Church.' 'But my faith is not what the Church says it is; you are not saved by Christ, but by the Church' (Memor of Bunsen, by his Widow, London, 1865, i. 614).

(IV.) Later Protestantism.—1. Whatever minor diff- erences may have arisen in Protestant theology as to faith, all evangelical theologians agree in the follow- ing points: 1. That saving faith not only recognises the supernatural, but also accepts and trusts absolutely on Jesus Christ, the Son of God, as Saviour; 2. that this saving power is the gift of God; 3. that it invari- ably results in genuine repentance; 4. that it is the express and necessary article of faith; 5. that every person who appropriates the merits of Christ must be a living faith; 6. that it is not the faith, nor the vitality of the faith, which justifies and saves man, but it is the ob- ject of the faith, i.e., the merits of Christ the Redeem- er, in the object of faith, that is the all-important thing. Now, something that is vital to the quality of any merely subjective faith. The earlier Reformers and Confessors made assurance an essen- tial part of saving faith, but this doctrine was not long held. See Assurance; Justification.

2. Divisions of Faith.—Faith is divided by the theologians into fides historica and fides superficiei (historical faith and saving faith). The former is intellectual knowledge and belief of the Christian doctrine; the latter a genuine appropriation of the merits of Christ unto salvation. True faith embraces both. The parts of faith, in theological language, are these: a. Notitia (act of the intellect, knowledge of the external and intellectual principles of the doctrine of Christ), b. Assensus (act of the will), assent to the doctrine, or reception of it as true and credible. c. Fiducia (act of the heart), trust or confidence in the divine word. "True and saving faith is the assent in faith in the word of God, that this is not a blind and superstitious trust in the sacri- fice of Christ, like that of the heathens in their sacri- fices, nor the presumptuous trust of wicked and im- penitent men, who depend on Christ to save them in their sins, but such a trust as is exercised according to the authority and direction of the word of God; so that to know the Gospel in its leading principles, and to have a cordial of belief in it, is necessary to that more specific act of faith which is called reliance, or, in systematic language, fiducial assent" (Watson, Instit., ii. 243).

3. Faith in Christ; justifying Faith — Faith as Condi- tion of Salvation.—(a.) Though the entire revelation of God is set forth, in one sense, as the object of faith (Luke xxiv. 25, 26; Heb. xi), yet Christ, the incor- nate Son of God, the dying and rising Redeemer, is the object of faith (1 Cor. i. 16; John xv. 21). In the evangelical churches, justifying faith is understood to be exercised specifically in Christ, as by his death making expiation and satisfaction for the sinner's guilt, or (to put the same idea in another light) in God's covenant with mankind in Christ, as offering them pardon, the sinner's true old death, and the right to the things of God in Christ; and so the object of faith is yet viewed merely as a condition of justifica- tion. (b.) "What faith is it, then, through which we are saved? It may be answered, first, in general, it is a faith in Christ; Christ, and God through Christ, are the proper objects of it. Herein, therefore, it is sufficiently, absolutely distinguished from the faith either of ancient or modern heathens, and from the object of a devil it is fully distinguished by this—it is not barely a speculative, rational thing, a cold, lifeless assent, a train of ideas in the head, but also a disposi- tion of the heart; and so is the faith in Christ, 'which the heart man believeth unto righteousness.' And, if thou shalt confess with thy mouth the Lord Jesus, and shalt believe with thy heart that God hath raised him from the dead, thou shalt be saved." It acknowled- ges his death as the only sufficient means of redeem- ing man, as the object of faith; (Gal. ii. 16; John xv. 21,) with the restoration of us all to life and immortality; inasmuch as he was delivered for our sins, and rose again for our justification." Christian faith is, then, not only an assent to the whole Gospel of Christ, but also a full reliance on Christ. It is a full reliance on, and confidence in, Christ as the object of faith; a reliance on, and confidence in, the object of his life, death, and resurrection; a recumbency upon him as our atonement and our life, as given for
us, and living in it. It is a sure confidence which a man hath in God that through the merits of Christ his sins are forgiven, and he reconciled to the favor of God; and in consequence thereof, a closing with him, and cleaving to him, as our wisdom, righteousness, sanctification, and redemption, or, in one word, our salvation (Wisbey). This faith, as it is called, is not meritorious, but instrumentally, the condition of our pardon. If Christ had not merited, God had not promised; if God had not promised, justification had never followed on this faith; so that the indissoluble connection and justification by our institution, whereby he hath bound himself to give the benefit upon performance of the condition. Yet there is an aptitude in faith to be made a condition; for no other act can receive Christ as a priest propitiating and pleading; the propitiation, and the promise of God for his sake to give the benefit. As receiving Christ and his gracious promise in this manner, it acknowledgeth man's guilt, and so man renounceth all righteousness in himself, and honoreth God the Father, and Christ the Son as the only Redeemer. It glorifies God's mercy and free grace in the highest degree. It acknowledges it on God's account. Theologically it will be known in heaven, that the whole salvation of sinful man, from the beginning to the last degree thereof, of which there shall be no end, is from God's great love, Christ's merit and intercession, his own gracious promise (Lawson). Wesley, speaking of faith as the condition of our justification, says, "We mean this much, that it is the only thing without which no one is justifieth; the only thing that is immediately, indispensably, absolutely requisite in order to pardon. As, on the one hand, though a man should have everything else but faith, yet he cannot be justified; so, on the other, though he be supposed to want everything else, yet if he hath faith he cannot but be justified. For suppose a sinner of any kind or degree, in a full sense of his total ungodliness, of his total inability to think, speak, or do good, suppose I say, this sinner, helpless and hopeless, casts himself wholly upon the mercy of God in Christ (which, indeed, he cannot do but by the grace of God), who will affirm that any more is required before that sinner can be justified?" (Wesley, Sermon on Justification; Neander, Planting and Training, ii. 128 sq.). "Faith, as it is mere belief, may be preserved by rational evidence. But when that is attained, the work of grace in the heart is nowhere said in Scripture to be carried on by the natural operation of these credited truths. The contrary fact, that men often credited them, and did not be justified, is obvious. When a different state of mind ensues, it is ascribed to the quickening influence of the Spirit, an influence which may be ordinarily resisted. By that influence men are 'pricked in their heart;' and the heart is prepared to feel the dread impression which is conveyed by the manifestation of man's perishing state, not merely in the doctrine of the word, but as it stands in the Spirit's application to the heart and conscience. But, though this was previously credited, and is still credited; and though its import and meaning are now more fully perceived as the perishing condition of the awakened man is more clearly discovered, the faith of affiance does not therefore follow. A person in these circumstances is not to be likened to a man drowning, who will instinctively seize the rope as soon as it is thrown out to him. There is a perverted application of the opposite truth and duty, in any way, and to stand on terms with his Saviour. There is a reluctance to trust wholly in his atonement, and to be saved by grace. There is a sin of unbelief, an evil heart of unbelief, a repugnance to the committal of the soul to Christ, which the influence of grace, not merely knowledge of the opposite truth and duty, must conquer. Even when this is subdued, and man is made willing to be saved in the appointed way, a want of power is felt, not to credit the truth of the sacrifice of Christ, or its merits, or its sufficiency, but a want of power to trust wholly, and with confidence, in it, as to the issue. It is then that, like the disciples, and all good men in all ages, every man in these circumstances prays for faith; for this power to trust personally, and for him to be the means made for his sins. Thus be recognizeth Christ as 'the Author and Finisher of faith,' and faith as the gift of God, though his own duty: thus there is in the mind an entire renunciation of self on the one hand, and a seeing of God as the object of our faith. This act when exercised must be followed by the gift of faith, and by the joy which springs, not from mere sentiment, but from the attestation of the Spirit to our acceptance with God. Then the Holy Spirit is given, not only as the Comforter, but as the Sanctifier. It is in this way, too, that faith lives up to the command, by the exerted influence and power of God, through Christ. 'The life that I live in the flesh, I live by faith in the Son of God, who loved me, and gave himself for me.' These are views which will, it is true, be a stumbling-stone and a rock of offence to the philosophers of this world, and not likely to turn many to God; and this is really a concession. Still this will stand, 'Whosoever receiveth not the kingdom of God as a little child shall in no wise enter therein'" (Watson, Works, London, 1835, viil, 224).

Pye Smith (First Lines of Christian Theology, bk. v, ch. v, § 8) defines the specific act of saving faith to be that act of the mind which directly and necessarily arises from the principle of faith, which is the proper and characteristic exertion of that principle, and in which the real nature, design, and tendency of genu- in faith is manifestly expressed in Scripture by the terms "coming to Christ—looking to him—receiving him—eating the flesh of the Son of Man, and drinking his blood—trusting in him, and being fully persuaded of his truth and faithfulness." It is that which our old and excellent divines usually denoted by the phrase (perhaps too familiar, but very expressive and easily understood) closing with Christ. President Edwards expresses it thus: "The whole act of acceptance, or closing of the soul or heart with Christ." (Works, xlii, 546). "Faith is an assured resting of the soul upon God's promises of mercy and pardon to Christ for sinners here and glory hereafter" (Dr. Owen's Catechism).

4. It has been said (above) that Protestant theologians are substantially agreed as to the nature of saving faith. But there is a class of divines in the Church of England (called the so-called "mild party") who seem to have gone back wholly to the scholastic doctrine of faith, if not, indeed, to that of Rome. One of the best writers of this school is bishop Forbes, of Brechin, who, in treating on Art. xi of the Church of England, asserts the faith by which we are justified is not the fiducia of Luther, but is "that beginning and root of the Christian life whereby we willingly believe, etc.," thus adopting the very phraseology of Trent in framing his definition of faith. So also, he adopts Bellarmino's statement that "love is the vivifying principle of the faith which impetrates justification" but he admits that we often affirm that we are justified by faith alone, he adds that "they never intended, by the word alone, to exclude all works of faith and grace from the causes of justification and eternal salvation" (Explanation of the 59 Articles, London, 1687, i. 277 sq.). These views are not Protestant; yet bishop Forbes, and the set of theologians who agree with him in going back to Roman doctrine, still belong to a Church which calls itself Protestant. In happy contrast, we cite another divine of the same Church, Dr. O'Brien, who, in his excellent treatise on Justification by Faith and Duty, gives a clear statement of the nature of Christian faith as "trust in Christ; an entire and unreserved confidence in the
efficacy of what Christ has done and suffered for us, a full reliance upon him and his work, protests against the error that, "in justification, faith is accounted to us for righteousness because it is in itself a right principle, and one which naturally tends to produce obedience." It also shows that, "while it is the final instrument of our justification, and the seminal principle of holy obedience, it is, notwithstanding, the instrument of our justification, essentially and properly, because it unites us to the Lord Jesus Christ, so that we are thereby justified and on that account justified." God having, in his infinite wisdom and mercy, appointed that we should be pardoned and accepted for the sufferings and for the merits of another, seems most fitly to have appointed, too, that our voluntary acceptance of this his mode of freely forgiving and receiving us, be putting our trust in him. For in these blessings are to be bestowed upon us, should necessarily precede our full participation of all the benefits of this gracious scheme, and that nothing else should. . . .

If for our justification it be essential, and sufficient, that we be united to Christ—ours with Christ—"found in Christ"—does not the act whereby we take him for our defense against that wrath which we feel that we have earned—whereby, abjuring all self-dependence, we cast ourselves upon God's free mercies in the Redeemer, with a full sense of our guilt and our danger, but in a full confidence in the efficacy upon which he has wrought and endured; does not this act, whereby we cleave to him, and, as far as in us, lies become, one with him, seem the final act whereunto to annex the full enjoyment of all those inestimable benefits which, however dearly purchased they were by him whom they bought, were designed in all that he has done and suffered, for our benefit? With less than this, our part in the procedure would not have been, what it was manifestly designed to be, intelligent and voluntary; with more, it might seem to be meritorious. Whereas faith unites all the advantages that a duty rightly done gives, in the instrument whereby we were to lay hold on the blessings thus freely offered to us: it makes us voluntary recipients of them, and yet does not seem to leave, even to the deceitfulness of our own deceitful hearts, the power of ascension to ourselves—ours with Christ—"found in Christ." (p. 119-121)

The relation of faith to works, and the question of the apparent difference between the doctrine of Paul and that of James on this point, will be treated in our article WORKS. We only remark here that the Protestant doctrine has been abundantly shown in this article (as the extracts already given) holds that true faith always manifests itself by love and good works (see Augustus Confession, Apology, c. iii); any other faith is mere belief, or what St. James calls "dead faith." The minor differences among Protestants as to the nature of faith depend chiefly upon differences as to the nature of justification. See JUSTIFICATION.

FAITH, RULE OF. I. REGULA FIDEI. In the early Church the summary of doctrines taught to catechumens, and to which they were required to give their assent before baptism, was called in Greek πίστις, the faith; Ἱερός πίστις, the limit or determination of the faith; ἔκτος πίστεως, exposition of the faith; κανόνες, rule; and in Latin, Regula fidei, rule of faith. This rule was apostolic in the literal term which the Apostles' Creed. See CREED, APOTHESES; REGULA FIDEI.

II. From the ancient usage, the phrase has been adopted (not very aptly) in modern theology to denote (1) the true source of our knowledge of Christian truth; and (2) the criterion or standard of Christian doctrine. "Ecclesiastical apologists and apologists find this rule in the Scriptures alone; the Greek and Roman churches, and some Anglicans, find it not only in Scripture, but also in the Church, as the authorized (inspired) interpreter of Scripture, whose interpretations are embodied in tradition. The supreme authority, according to the Romanists, lies in tradition, and in the pope as its living exponent. Some of the mystics and the Quakers make the "inner light" the supreme rule: thus Robert Barclay says that the highest source of knowledge—divine revelation and illumination—is something internal, trustworthy, and self-evident, which commands reason to accept it by the indwelling evidence. The Rationalists make reason the final arbiter, and the mind of man the measure of truth.

(1.) THE PROTESTANT DOCTRINE. I. One of the chief doctrinal elements of the Reformation was the sufficiency of the Scriptures. The phrase was introduced by John Calvin (1509-64), who anticipated the Reformation in asserting the authority of Scripture. "When we truly believe in Christ," he says, "the authority of Holy Writ is greater for us than that of any other writing." He makes the acknowledgment of the divine word to spring from the immediate relation of the soul to Christ, while Rome puts the Church between the soul and Christ. Luther also rejected all mediation between the soul and Christ. "Yet, before he had consciously developed the principle that the holy Scriptures must be the highest source of knowledge, the doctrine of the sufficiency of Scripture was formed upon it, and unconsciously he was guided by the principle to admit nothing which was at variance with the Scriptures. Controversy first brought him to carry out this principle with scientific clearness." It was, however, first scientifically stated by Melancthon on the above ground, and by Beza. In his "De Rerum Ecclesiasticarum," Ekk attacked a statement made by that reformer in one of his letters, which thus acquired notoriety. He says that it is a duty to abide by the pure and simple meaning of Holy Writ, as, indeed, heavenly truths are always the simplest; this meaning is to be found by comparing the Scriptures with each other, while Luther teaches us to study Holy Writ, in order to pass judgment on all human opinions by it as a universal touchstone" (Cont. Eckium Defensio, Melancthonii Opera, ed. Bretschne-
The chief Protestant Confessions agree as to the rule of faith. The Augsburg Confession repudiates the traditions of the Church of Rome as to penances, fasts, etc. (art. xv.), disciplina clerici, etc. (part ii., art. xvi.); and the Confession of the English Church (5th of the Sixth Article) states: "Holy Scripture containeth all things necessary to salvation; so that whatsoever is not read therein, nor may be proved thereby, is not to be required of any man that it should be believed as an article of faith." So the Creeds (art. viii.) are commended to reception and belief only because they may be proved by certain "warrant of holy Scripture;" works of supererogation (xiv.) are rejected as contradicted by the word of Christ; things ordained even by general councils are affirmed (xxxi.) to have neither strength nor authority save what is deduced from the Word of God out of holy Scripture; purgatory, pardons, image worship, relics, saintly invocation (xxi.), and transubstantiation (xxxvi.) are rejected as grounded "upon no warrant of Scripture, but rather repugnant to the Word of God.

The Romanist Doctrine.——The Council of Trent (sees iv. April 8, 1516, On the Canon.) declares that the "Gospel promised before the prophets in the sacred Scriptures was first orally published by our Lord Jesus Christ, the Son of God, who afterwards commanded it to be preached by his apostles to every creature;" this, they assert, is the "authority and source of Church discipline;" and that this truth and discipline are contained both in written books and in unwritten traditions, which have come down to us, either received by the apostles from the lip of Christ himself, or transmitted by the hand of the same apostles, under the head of the Holy Spirit;" and names as canonical all the books of the O. and N. Testament, according to the Vulgate edition; declaring that the Council "doth receive and reverence, with equal piety and veneration, all the books, as well of the Old as of the New Testament, which by the doctrine and discipline of the aforesaid traditions, pertaining both to faith and manners, whether received from Christ himself or dictated by the Holy Spirit, and preserved in the Catholic Church by continual succession." The Catechism of the Council of Trent declares (Preface) that "all the doctrines of Christianity in which the faithful are to be instructed are derived from the Word of God, which includes Scriptures and tradition." These statements are not so decided as those of later Roman theologians, but they were nevertheless received at the time as ordaining the rule of faith in the Church. Bernard Gilpin (1538) had, in his sermon, a controversy about accepting Protestantism, but the publication of the decree of Trent decided him: "While he was distracted with these things, the rule of faith changed by the Council of Trent astonished him. For he observed that not only the ancient divines, but even the modern ones, Lombard, Scotus, and Aquinas, all confessed that the rule of faith was solely to be drawn from Scripture, whereas he found, according to the Council of Trent, that it might as well be drawn from human traditions. . . . The Church of Rome kept the rule of faith entire till it was changed by the Council of Trent. From that time he thought it a point of duty to forsake her communion, that the true Church, thus called out, might follow the Word of God." Life of Bernard Gilpin, p. 69, Gloucester, 1854, cited by Cramp, Text-book of Popery, ch. iii. Bellegrine (1621), perhaps the most famous of the theologians of the Romanist Church, has developed this theory more fully in his treatise De Verbo Divi. He divides it into the written and the unwritten word. The written word includes the Scriptures of the O. and N. T.; the unwritten is tradition, i.e. 1. direct tradition, including doctrines contained in the apostles' words and taught by them, but not recorded; 2. apocryphal tradition, doctrines taught by the apostles, but not recorded in their writings; 3. ecclesiastical tradition, including ancient customs and usages handed down in the Church. The necessity for these tru
ditions he maintains on the express ground of the insufficiency of Scripture as a rule of faith and life (see, for instance in Scripture nor continenter expressa totam doctrinam necessariam sive de fide sive de moribus, De Verbo Dei, iv, 3). The substance of these passages is, that in the rule of faith tradition is an authority independent of Scripture, and in its respect equal to it in the Church for Möhler (Synderes, § 8) attempts to refine the Roman doctrine, but, in fact, disguises it under an ideal theory of his own, intended to be adapted to "the spirit of the age," or else inspired by it. But the substance of the Roman doctrine remains, in spite of his principle in his statement that the Church in which alone man arrives at the true understanding of Holy Writ. One of the latest and most skilful advocates of the Roman view is archbishop Manning, who, in his Grounds of Faith (London, 1852, §v6o), maintains that "universal tradition is the supreme interpreter of Scripture," and that this tradition is maintained only in the Church of Rome, of which the pope is the head and exponent. Dr. Schaff sums up the vices of the Romish doctrine of the rule of faith as follows: "The distinction between the divine and the human is unrecognised by it. This pantheistic feature runs through the whole system. In the respect shown towards the pope as lawfully holding and exercising the threefold office of Christ himself, too much is allowed, again, to human agency in the formation of the sacred Scriptures, by limiting the inspiration to the human ghost of its composition. Persons of such a rule, the uncertainty in its application would preclude the possibility of its being of any use. 8. Even if men in general are told that they need not inquire for themselves, but just receive what their 'authorised guides' choose to hold as necessary and binding. The Roman Church has for its object to subordinate the Bible totally, and to make it a subservient judge of truth, with power to determine at pleasure what is God's word and the doctrine of the Church, and to authenticate that which may go beyond its past decisions, even though, in the case of the Reformation and the Antinomians, it should be an actual deepening of the Christian consciousness himself" (Principle of Protestantism, p. 74).

(III.) The new Anglican Doctrine. The so-called "Tracts for the Times" of the Church of England adopted, almost at its beginning in Oxford, in substance, the Romish doctrine of the rule of faith; so, e. g., The Practical Dogmatic. The authors who wrote this series of tracts for the Times (No. 70): "Catholic tradition teaches revealed truth, Scripture proves it: Scripture is the document of tradition, the witness of it: Scripture and tradition, taken together, are the joint rule of faith. The truth was, that the men comprising this new party had already embraced several of the Romanist doctrines, and, not finding any warrant for them in Scripture, sought it in tradition. Thus Kebler (Sermon on Those who write such things) asserted that without tradition it would be impossible to demonstrate the doctrine of the "real presence," that of the "clergy as a distinct order," and that "consecration by apostolical authority is essential to the Eucharist" (see further in Goethe, Divine Rule of Faith and Practice, ii, 1846, some on these topics). His writings show that his object was the reform of Protestantism as a failure, and the Reformation as a schism; and the next step was to assert that the Scripture is both defective and obscure, and that many doctrines necessary to faith are not in Scripture at all, but must be learned from tradition, which is "partly the interpretation and partly the supplement of Scripture" (see an able article in the Princeton Rev. 1842, p. 508 sq.). Dr. Arnold remarks (Edinb. Rev. April, 1845), that, according to the Tractarian theory, the Scriptures are not the sole or a perfect rule of faith; they are to be supplemented by tradition; they furnish at best but the germ of an imperfectly developed Christiani
ty, which is to be found full blown and perfect somewhere. The Romanists (they can tell where) in the third, or fourth, or fifth, or sixth century, or what not, and the fathers have much to tell us of undoubted apostolical authority, which the apostles themselves have failed to tell. Infinite are the disputes which such a theory instantly gives rise to. In essence and spirit, the principle of the divinity of the Church is that it affirms both a written and an unwritten word; it differs only in the pleasant and gratuitously perplexing addition that it is impossible to assign the period within which the circle of Catholic verities may be supposed complete—the period when the slowly developed Church system became ripe, and had not yet become rotten. The unity of faith which is thus sought is farther off than ever, for the materials of discord are enlarged a thousand fold.
Church writers. According to the Protestant view, the Greek and Roman doctrine of the rule of faith takes away Christ, and puts an ecclesiastical corpora-
tion in his place. But Protestantism does not deny the value of tradition in transmitting Christian doc-
true; its value is inestimable. But it is not the rule of faith; it is a servant, not a master. In fact,
the question of the rule of faith is closely connected
that of the true idea of the Church, or, indeed,
identical with it in the last analysis. So, at the fourth
session of the Council of Trent, when the question of
 Scripts, led the Pope, Sixtus the fifth, Vincent
Cane, one of the members of the council, a Fran-
ciscan, "thought it would be preferable to treat of the
Church in the first instance, because Scripture derived
its authority from the Church. He added that if it
were once established that all Christians are bound to
obey the Church, and that the Church has the right to
say what the Bible is, that this was the only argu-
ment that would refute the heretics. "While Protestantism leads to Christ through the
Scriptures, and through Christ to the Church, Rome
pretends to lead through the Church to Christ and
the Scriptures; this doctrine is a conformity with revealed truth, that
of the Roman Catholic system the assumed infallibility of the Church.
In causa spiritualis necessario ad-
mitteremus a quiu suprems judex controversiarum (in
spiritual things there must be some final and su-
premum judge). The Augustinians, in the present instanta, is the
old postulate of those who contend for a visible Church
endowed with God's own infallibility. Grant them
their postulate, in their own sense of it, and the whole
theory of "Church principles," as the modern success-
ors of Hildebrand plausibly name their dogmas,
will inevitably follow. On the other hand, let it be
settled that the Scriptures, and the Scriptures alone,
constitute the true rule of Christian faith and prac-
tice, and we shall have done forever with the juggling
priestcraft which has so long disgraced Christianity,
and which finds its only hope of support in ecclesiasti-
cal tradition. The question is a vital one. It is not
a mere matter of detail, about which men can differ at
pleasure; it is the Rubicon which separates Protest-
antism from Popery. It involves "a choice between
the Gospel of Christ as declared by himself and his
apostles, and that deadly apostasy which Paul in
his lifetime saw threatening—nay, the effects of which,
during his captivity, had nearly supplanted his own
gospel in the Asiatic churches, and which he declares
would come speedily with a fearful power of lying
wonders" (Stanley, Life of Arnold, ii. 110). The
Church, in fact, is to be the "interpreter of the
foundations of the prophets and the apostles; Christ
himself being the chief corner-stone;" according
to the traditionalist, upon the sands of antiquity as
well. From the beginning men have made the word
of God of none effect through their traditions. See
BIBLE, USE OF; FATHERS; INfallIBILITY; PROTES-
TANTISM; ROMANISM; and especially TRADITION
(Phil. 1841); Hawkins, Disquisition on Tradition
(Oxf. 1819, 8vo); Burnet, On 39 Articles; Browne, On
39 Articles; Forbes, On 39 Articles (each on art. vi).

FAITH AND REASON. Religion and science
express in the abstract and in the concrete the two
opposite poles of knowledge. In that vast field between
which must always be a difference, and has usually
been a discord. In all ages in which there has been any
notable activity of intelligence there has been a con-
trary, more or less violent, between the claims of
religious authority and the pretensions of human rea-
only, the stern solemnity of the Roman Fasii, the arbi-
trary credulities of Islamism, have all experienced
this phase of hostility, as well as Christianity, in the
various periods and forms of its dissemination. But
never has this war been more deadly in mode or in
severity than at the present moment, when the laws of
revelation are interpreted by insidious approaches,
and when science ejects its multitudinous batteries against all the ramparts of the Christian faith.
In other times, attempts, more or less unsuccessful,
have been made to restore natural amity between
the two great contending parties in these embittered
wars. There is no necessity now, so far as the Greeks
was an effort to explain the legendary sup-
iperstitions of Greece as to render them acceptable
to the enlightened doubts of Hellenic philosophy. See
EUSEBIUS. A second and more elaborate plan for
the maintenance of the existing reverence for the di-

gitudes of the pagan world was hazarded by the Neo-
Platonists. See NEO-PLATONISM. Both experiments
signally failed. In a much later period, with wholly
dissimilar weapons, and with much vaster interests at
stake, the illustrious Leibnitz undertook to reconcile
the religion and reason in a true and permanent sys-
tem, by the admission of a place for the classical elegance of its style, and for the vigor
and profundity of its argumentation. It was negative
in its character, and only offered a compromise. Such
was also the complexion of the admirable work of
bishop Butler on the Anatomy of Natural and Revealed
Religion. In the sequel, the gradual and, it may be
interpose as landmarks in the midst of the waves be-

tween the too-scepticism of the beginning and the
revolutionary atheism of the close of the 18th century.
The war has become more determined, even though it
may have gradually lost much of its earlier bitterness.
Extremists on both sides now declare that there is an
impossible antagonism between faith and science.
Ministers of religion may be found denouncing
the procedures and conclusions of science as "enmity
with God," and as incompatible with revealed truth; as if
the laws of the creation could be at variance with
the declarations of the Creator. Adept in scientific re-
search, on the other hand, proclaim the deceptive
and inanity of all religious doctrine as contradictory
to the clearly ascertained processes of the universe;
as if the phenomena of matter could controvert the
constitution of the human mind, and the incomparable
instincts, appetites, and requirements of the human
heart.

Yet, even in this apparently hopeless state of dis-
ord, renewed endeavors have been made to bring
the great adversary into the same curative path that
recent and the most notable of these is that of Herbert
Spencer, which is plausible in its pretensions, but most
delusive in its results. It is singularly insidious in
design and in execution. It betrays with a kiss, and
deals a mortal stab while inquiring, "How is it with
thee, my brother?" It recognises the universality,
the indefeasibility, the necessity of religious belief, 
admits the impossiibilitv of ignoring or dispelling 
the attributes of a Supreme Being, and yet attenuates ev
eything thus admitted till it sublimates these con
ceptions into a vaporous phantomism, a mist; chal
lenges the very constitution of the soul; revives 
the hallucination of the human mind under the perennial hy
pochondria of a morbid fancy. No suspension of arms has been obtained, because each party hopes for a 
decisive victory. But the prolongation and exacerbation of the most disastrous war is merely to 
the legitimate authority of religion, but to the equally legitimate demands of science. One portion of 
the Christian community is expelled from the prompt ac
ceptance and the zealous encouragement of the discov
eries of science by the apprehension that the bulwarks of 
revelation may be surrendered to an unprin
ning foe. Another portion rejects the teachings of the 
Church and of the Christian creed from disgust at an 
unreasoning and unreasonable opposition to science. 
A third party, intermediate between the two, extends a 
hand to both; surrenders whatever rational ques
tions may retain in a limited sense all 
that is essential in the dogmas of religion. Mean
while, those of vicious inclinations find an excuse for 
the indulgence of their passions and the rejection of 
moral restraints in an intelligent repudiation or in a 
denial of the basis of religion. The multitude, 
careless and stolid, pursues its private ambi
tions or personal whims without regard to the obliga
tions of this life, without concern for that great here
after which occupies no place in its thoughts. The 
conciliation of faith and science thus becomes more ur
gent than in any former time, and its urgency is in
creased by the difficulty of accomplishing it in the 
midst of contentions between reciprocally repel
tant combatants, armed on the one side with the thunders of 
the Almighty, the promises of heaven, and the terrors 
of hell, and on the other with the dazzling panoply of 
modern investigation, and with weapons reared 
with the laurels of a century of scientific achievements.

The re-establishment of fraternal union between two 
so widely alienated disputants must be an arduous and 
always a somewhat doubtful task. "Quis concordabilis 
tantum contrarietatis?" A mere truce will answer no 
inducement. It would simply convert the conflict into 
asore into a purulent condition of the whole system. 
The conciliation, to be efficient, must rest on an essen
tial harmony of principles, on a recognised dissimilar
ity of aims and applications. Even then the agree
ment is occasional and contingent rather than perma
nent; jealousies but room must be allowed for partial 
dissent, as in these high questions no more can be ex
pected than an unsteady complicity—discord conc
curs. Whether even this agreement is attainable must 
be uncertain till it has been attained; it may be re
served for that blessed expansion of our discernment 
when we shall no longer "see as through a glass darkly.
" But, in the mean time, there is a high obligation 
resting upon those who would repudiate neither the sanctifying influences of a holy life, nor the illumination of secular learning, to seek out the grounds of 
reconciliation, and press on to a changed and more arti
nal arts with theology. This seems to be the appropri
ate duty and the peculiar aspiration of the present 
are, and the imperfect or delusive efforts made in this 
direction indicate the latent consciousness that it is so. 
The ontological evidence, the watchwords of the oppo
nents, always precedes the solution of the great enigmas of 
humanity. Before any reasonable hope, however, of a 
satisfactory result can be entertained, it is necessary_to ascertain the conditions of the problem, and to dis
cover among the obvious and multitudinous discrepan
cies whether there is any essential identity between 
the opposing forces. If there is, there may be a pro-
pect of final accordance; if there is not, the antipathies are ineradicable and immeasurable.

The conditions under which the question presents itself are thus, the determination of the nature of the contending parties; the detection of any agreement in their intrinsic character; and the discernment of the 
causes of their opposition and diverse procedure. It 
becomes expedient, therefore, to ascertain the character and functions of faith and science respect
ively. This cannot be accomplished by any mode of 
more logical division and definition, because faith re
sides in our spiritual susceptibilities, and is incapable 
of verbal definition; and because science admits of 
no immutable boundaries, but "grows and grows and forever." But the character of each may be sufficiently 
described to permit the contradistinction of the two, 
to exhibit their contrasts, and to disclose any harmony 
that may exist between them.

Science is precise and assured, systematic knowledge, 
atained and co-ordinated by the application of human 
reasoning to admitted facts or observed phenomena. 
The conclusions of science are reached and are con
nected together by the discovery of the general prin
ciples which regulate the occurrence of the phenomena and reveal the conditions and relations of the prin
ciples are established by the employment of the two 
processes of deduction and induction; and science 
is the determination by the arts of reasoning of such 
knowledge as is apprehensible by the logical faculties 
of the human mind. The conclusions attained are 
more or less firmly believed according to the sufficien
cy or insufficiency of the reasoning; but, when firmly 
established, are believed on the strength of the evi
dence, and cannot be doubted except by remembering 
the finite power and comprehension, and consequent 
fallibility of the reasoning. Conviction, though properly—may, inevitably overlooked in the 
constitution and acceptance of scientific truth, can
not be safely disregarded in the estimation of the va
lidity and certainty of scientific procedure.

Faith is something more than rational belief—some
thing more firm and assured than scientific or philos
ophic conviction. Conviction is produced by the 
strength of the arguments adduced—by the influence of 
the demonstration or other evidence on the under
standing. Faith goes far beyond this, both in the as
surance conveyed, and in the disproportion between 
the text and the thing. For in faith not only "sees" but 
"believing," but he who "walks by faith" 
"walks not by sight." We believe in the results of 
science; we have faith in the truths of revelation. We 
believe that the earth is round; we have faith in the 
existence of God. We may in both cases entertain 
Conviction questions and scrutinize; faith confides, 
and does not cavil. The belief which is founded upon 
reasoning ponders the arguments propounded, the evi
dence presented; faith is itself "the substance of 
things hoped for, the evidence of things not seen." 
This distinction may not be acceptable to persons of 
loose habits of thought, who employ words without dis
criminating their delicate shades of meaning; but it 
seems to be required by more than one passage of the 
New Testament, and is fully sustained by the mort 
acute, profound, and sagacious of the theologians, Thom
son (Quaestiones Theologicae, i. qu. ii, art. x; qu.
iv, art. i). It is of the essence of faith to transcend 
the logical evidence, to accept more than is contained in 
any logical premises, and to hold the tenet thus re
ainted with a more earnest tenacity than any demon
strative and inductive evidence could suggest. It is 
independent of evidence or testimony; but the co
gency of such proof is not intrinsic or indisputable in 
itself, but is derived from its acceptance, and from the 
submissive adherence of the recipient. It is "the Sprit
of truth" which "will guide you into all truth." 
This exposition may seem applicable to persons of 
religious faith, or to faith in supernatural truth; but it is with
faith of this kind that the controversy on the part of science is maintained. It is therefore in this domain that the essence of faith is to be specially considered. Nevertheless, a little reflection and examination will show that all faith possesses the same general charac-
teristics. The faith of science is no less the faith of a man, a naturally transcendent, and usually precedes the evidence; the faith which we hold in regard to the regular order of nature is manifest without thought of the argu-
ments by which that order is proved; the faith which we entertain in the necessity and generally beneficent action of the laws of nature is of equal force for us. Thus the founder of science, the most extreme of Transcendentalists, and the restorer of inductive philo-
sophy, concur in recognising that science is not self-
sustaining, but is dependent upon principles beyond the sphere of science. The foundations of science are isolated testimonies, but are merely echoes of the convic-
tions of philosophers of the most divergent schools (Plato, Timaeus, ch. i; Aristotle, Met., iii, 4; 5, 6; Theophrastus, Met.; v; Alex. Aphrodisias, Schol. in Aristotle, ed. Brandis, p. 523; 527, 605, 653; Asclepi-
dades, Ibid. p. 521; An, 662; 649; Lactantius, Divi-
tes, Med. ii; Spinosa, De la Reforme de l'Entendement, (Edition, ii, 281, ed. Saisset; ) Leibnitz, Opera, i, p. cxliv, cxi, ed. Dutens). A remarkable testimony to the same effect was recently (Aug. 1868) given by Prof. Tyndall in his introductory address before the Mathe-
matical Section of the British Association. They, he says, are identical in their foundations and in their point of de-
parture. It has been stated already that scientific rea-
soning proceeds by way of deduction or of induction. Deduction, however, proceeds from premises which are either established by induction, or are received with-
out demonstration; and induction requires general principles, not reached by induction, to render induc-
tion possible. First principles admit of neither defini-
tion nor proof. The conception of order, the admis-
sion of the uniformity of natural laws, are not induc-
tions; they are established by induction, or are received with-
out demonstration; and induction requires general principles, not reached by induction, to render induc-
tion possible. First principles admit of neither defini-
tion nor proof. The conception of order, the admis-
sion of the uniformity of natural laws, are not induc-
tions; they are established by induction, or are received with-
out demonstration; and induction requires general principles, not reached by induction, to render induc-
tion possible. First principles admit of neither defini-
tion nor proof. The conception of order, the admis-

tions; they are established by induction, or are received with-
out demonstration; and induction requires general principles, not reached by induction, to render induc-
tion possible. First principles admit of neither defini-
tion nor proof. The conception of order, the admis-

innocence, the purity, and the heavenly illumination of his paternal home. But still the first lessons of faith—"the vision splendid"—of his youth—attend his course, return to his memory, recall his origin, and silently reclaim him to his early home.

When he has purged his guilt.

Science thus reposes on faith, upon principles of the same generic character as those which furnish the substance of religion; but it requires them only as premises in its reasoning, and soon left out and forgotten in its strictly ratiocinative development. It is willingly obvious of the fact that "there are more things in heaven and earth than are dreamt of in our philosophy." Religion receives these and the like principles of faith as its commencement, beginning, and end.

Science commences where religion leaves off, but it is ushered into its career by faith.

These brief and undeveloped views may perhaps indicate the means of securing a valid conciliation of faith and reason, of religion and science, and of establishing the limits of their respective spheres, and the characteristics of their respective procedures. Interpreted as they have been here explained, their contrasts and functions remain distinctly marked, but they cease to be antagonistic, and have neither reason nor excuse for enmity.—Compare Shedd, History of Liberties, 1, 154 sq.; Chiébois, Stud. d. Krit., 1846, p. 993 sq.; La Morlaisie, 1846, Oct. 1846, p. 398 sq.; Study of the Gospels, p. 393; M'Cosh, Intuitions of the Mind, bk. ii, ch. i, and pt. iii, bk. ii, ch. v; Miles, Philosophical Theology (Charleston, 1830, 8vo).

Faith of Jesus, Sects of the (or Fathers of the Faith). An ecclesiastical order in the Church of the ancients. Piscanarii, T. is an enthusiastic, and formerly a soldier of the pope, under the authority of the archduchess Mariana. The intention of Piscanarii was to give to the Church a substitute for the order of the Jesuits, which had been suppressed by Clement XIV. The foundation of the society was laid by Piscanarii and twelve companions in 1784 at a villa near Spoleto, which a nobleman had offered to them for that purpose. The rule adopted by Piscanarii was almost identical with that of the Jesuits. Pope Pius VI, who was at that time kept a prisoner by the government of France in a monastery near Florence, sent to Piscanarii and authorized the new society, and recommended it to the pupils of the Propaganda whom the government of the Roman republic had expelled from their college. In 1793, Piscanarii, while on a visit to Rome, was arrested, together with several Jesuits, but they were discharged on the condition that they should leave the Roman territory. In the same year the "Society of the Sacred Heart," a society which had been established in 1794 by some ex-Jesuits for the purpose of reviving the order of the Jesuits under a different name, united, in consequence of an express order of the pope, with the Fathers of the Faith, and recognized Piscanarii as their superior. The latter, who up to this time had been a layman, now received minor orders at the hands of the papal nuncio in Vienna, and in 1800 was ordained priest. The society, which had already taken charges of foundling homes in Africa, established houses in Bavaria, Italy, France, England, and Holland, and in 1804 numbered about eighty members. Pope Pius VII was, however, not favorable to them. Some of the members joined the Jesuits, who had been restored, and (1804) in Naples, while others repudiated the authority of Piscanarii, and strove to establish themselves under the direct authority of the diocesan bishops. Piscanarii himself was summoned before an ecclesiastical court, and sentenced to life-long imprisonment.

The second invasion of Rome by the French restored to him his liberty, but the society was wholly dissolved in 1814, when its last members joined the order of the Jesuits, who in that year were restored for the whole Church. (Henroin-Fehr, Gesch. der Mönche-orden, ii, 62.)

Faithful. (1.) A title given in Scripture to Christians (1 Cor. iv. 17; Ephes. vi. 21, et al.). (2.) The term of the faithful (pideles), was the general and favorite name in the early Church to denote baptized persons. By this name they were distinguished, on the one hand, from the proselytes of the droma, such as were not Christians; and on the other, from the catechumens. (Bingham, Orig. Ecd. i. ch. iii, iv; Riddle, Christian Antiquities, bk. ii, ch. v.

Fakir (also spelled Faqiuh). This word, derived from the Arabic fakir (poverty), is used by the Arabs to designate those mendicant orders called by the Persians and Turks dervishes. By Europeans it is commonly used to denote certain Hindoo sects noted for asceticism and austerities. For a brief account of the Mohammedan Fakirs, see the article DERVISI.

We mention here, in addition, only a sect of them styled Caledizers, from the name of their founder, Santone Kalender, described by Knolles (History of the Turks) as Edircurers, whose motto is "This fakir is our to-morrow is his who may live to enjoy it," and in whose view the tavern is as holy as the mosque, and God as well pleased with their debaucheries, i. e. "liberal use of his creatures," as with the austerities of others (see D'Herbouet, s. v. Calender).

1. Caledizers. Although no religious devotees of this kind among the Mohammedans earlier than the 13th century after Christ, though the origin of Hindoo fakirism is by some writers referred back to Sakyamuni. See BUDDHISM. But a satisfactory explanation of the origin of fakirism may be found in that perverted human tendency which in all ages has sought to earn the favor of God and the praise of men through abstraction of the soul and chastenings of the flesh, and has been too prone to accord to such acts undue homage and sanctity. Nowhere has this tendency been more marked than among the imaginative and superstitious peoples of the East. The account which Strabo, on the authority of Megasthenes, Aristobulus, and others, has given us of the Gymnosophists, especially that class called by him Garmames, and by others Sarmanai or Sarmanai, shows that ascetics, very similar in modes of life, domes, and practices to those of the modern India, were found there at the time of Alexander's conquests. This conclusion is strengthened by the descriptions of Quintus Curtius, Arrian, Plutarch, Pliny, Clemens Alexandrinus, and other ancient authors, when treating of the philosophers of India. It seems not a mere speculative and metaphysical doctrine to the lack of the naked philosophers, so celebrated in ancient times, were, in an ethical sense at least, the progenitors of the modern Fakirs (see Heeren, Asiatic Nations, ii, 245, note).

Among the mendicant devotees who abounded in India at the date of the Mohammedan conquest we find the Fakirs mentioned as prominent in the veneration of the people, and exercising an almost unlimited influence over them; and frequent mention is made of these fanatics and their strange practices by the travellers who have described India since the period named. It has been estimated that there was in India 800,000 Mohammedan and 1,200,000 idolatrous Fakirs, while the number of both sorts is now estimated at 1,000,000. Fakirism, with other forms of superstitions fanaticism, seems to be rapidly losing ground under the influences and agencies which, since the prevalence of British rule, have been diffusing the light of the purer dogmas of the Gospel through India.

2. Sects or Fraternities. They are divided into sects or orders, each differing from the others more or less in dress, habits, etc. One was established in 1578, organized and the number of their fraternities, the accounts of travellers and other authorities in this re-
pect seem conflicting and fragmentary. Without attempting any precise classification, we may group them under two heads: 1. Those living in communities, either in convents, as Western monks, or wandering about in small groups; and 2. Those living singly, as hermits or as vagabond mendicants, passing from place to place, practising the arts and tricks of their order, and receiving from the credulous superstition of the people the entertainment and alms provided at public expense in the villages for their entertainment. Their other trades are long distances by rolling on the ground, receiving his food and drink from the hands of the people; one makes the singular vow to perform a long journey by rolling himself along as a sort of cart-wheel: having for this purpose fastened his wrist and ankles together, and caused a tire, made of chopped straw, mud, and cow-dung, to be fastened along the ridge of his back-bone, with a bamboo-stick passed through the angle made by his knees and elbows for an axle, he rolls himself to the first village on his route, where he is received with demonstrations of joyous respect, and conducted to the tank or well for ablation. A certain what house of the village promises the last cheer, thither he repairs, and there remains until the supplies fail. He then repeats the process of preparation, and journeys to another place. Some fakirs have combined traffic with their religious pilgrimages, and made a business of it, and have built colonies and considerable trade. Articles, carried in their belts and clothing, have made great gains in the pelf of the world which they so much affect to despise. The lives of some, perhaps, comport with the spirit of sanctity and self-denial professed, but most of them are in secret addicted to gross vices, and whenever favorable opportunity, on the pride and cruelty of their hearts display themselves.

4. Literature.—Strabo, § 712-719; Arrianus, Inoec. cap. xii; Quintus Curtius, lib. vii, cap. i x.; Plutarch, Visa Alexandri, Pliny, Hist. Nat. lib. vii, cap. i x.; Clemenes Alexandrinus, Stromata, lib. i, 96 d.; Boehlen, Das Alte Indische Cemn, Mythologia, iii, 225-30 (Bohn's ed. 1854); India, Iconographic Encylopedia, iv, 12-13 (New York, 1851); Herbelot, Bibliotheca Orientale, s. v. Fakir and Calender; Ennemoyer, History of Magic, i, 205-10 (Bohn's ed. 1848).

5. Peculiar Doctrines and Austerities.—The profession of poverty constitutes a fundamental principle of fakirism, as the name itself indicates. One author says the quality which God most loves in his creatures is poverty; and tradition reports Mohammed as saying, it is the poor whose hands are filled daily by the expenditure of valuables; that he that feedeth the poor shall be fed, and that the eyes in deep concentration of the soul to the point of the nose, and now the white light appears" (Ennemoyer, i, 205-6).

The Fakirs, or Yogoes, of the Senoose tribe travel over Hindostan, living on the charity of the other Fakirs. They are sometimes naked, but are generally clad in sable, or other silken, or other robus, handsome men. They admit proselytes from the other tribes, especially youths of bright parts, and take great pains to instruct them in their mysteries. Collected in large bodies, and armed, they make pilgrimages to sacred places, laying the country under contribution. Led by an old man endued with vast prestige, the Gargis and the Guises, two orders of Fakirs, as travelling armed, and in troops of thousands. The Iconographic Encyclopaedia (iv, 235) names three classes of Hindoo ascetics, viz. Sancha or Sanasha, Fakir, and Pomanana.

FALASHAS (Jewish). A large and peculiar race inhabiting the old home of Semen, on the shores of the Tana Sea, near Gondar and the mountainous regions of northern Abyssinia. The word Falaasha means exile, and sufficiently indicates that they were not natives of the soil. They have a skin more or less dark, without peculiar distinction between the two; they are the dominant language of the country—the Amharic, and a dialect of the Agmon language. They possess the whole of the Jewish Canon (O. T. Canon) in the Gueze language (a sister language of the Hebronine language of men, one has kept his arms in one position until they shrivelled up; another has kept his hands clasped together until the nails grew through the flesh. Some have buried themselves up to their chins in pits, and thus remained for days; others have imprisoned themselves for life in iron cages; one has had his cheeks and tongue pierced with a sharp iron, kept in its place by another passing under the chin; another wore a second link of which passed through the tenderest part of the body, the penis; one bears on his neck a heavy yoke, with heavy weights in his hands; another lies down on a bed of iron spikes; one suspends himself head downwards over a fire until his scalp is burned to the bone; another traverses long distances by rolling on the ground, receiving his food and drink from the hands of the people; one makes the singular vow to perform a long journey by rolling himself along as a sort of cart-wheel: having for this purpose fastened his wrists and ankles together, and caused a tire, made of chopped straw, mud, and cow-dung, to be fastened along the ridge of his back-bone, with a bamboo-stick passed through the angle made by his knees and elbows for an axle, he rolls himself to the first village on his route, where he is received with demonstrations of joyous respect, and conducted to the tank or well for ablation. A certain what house of the village promises the last cheer, thither he repairs, and there remains until the supplies fail. He then repeats the process of preparation, and journeys to another place. Some fakirs have combined traffic with their religious pilgrimages, and made a business of it, and have built colonies and considerable trade. Articles, carried in their belts and clothing, have made great gains in the pelf of the world which they so much affect to despise. The lives of some, perhaps, comport with the spirit of sanctity and self-denial professed, but most of them are in secret addicted to gross vices, and whenever favorable opportunity, on the pride and cruelty of their hearts display themselves. —Rep. of Egypt, 1276, II, 779. —The Fakirs are said to have a system of thought similar to that of the Heretics of the middle ages. —They are said to be an evil influence on the people of Abyssinia. —They have a peculiar form of worship, resembling the Canaanite worship. —They are said to have a peculiar form of worship, resembling the Canaanite worship. —They have a peculiar form of worship, resembling the Canaanite worship. —They have a peculiar form of worship, resembling the Canaanite worship. —They have a peculiar form of worship, resembling the Canaanite worship.
FALCANDUS 469  FALCON

brew, Arabic, and Aramean dialects, and from which the Amharic is derived), together with the apocryphal books accepted by the Abyssinian Church. Their priests, who live round the inclosures of the temple (which are situated near the edge of the Falasha villages, and have more the appearance of the ancient sanctuary than modern synagogues) observe the laws of purity with rigor, prepare their own food, and keep aloof from the world. They are principally engaged in the education of youth, making the Bible and the traditional practices the basis of their instruction. The Falashas deviate from Jewish usages in many respects. Thus the fringes, prayer-shawls, &c. (psalter, q. v.), the phylacteries (q. v.), are not used in their devotions. They retain the usage of offering sacrifices, but rather as commemorative ceremonies than as real sacrifices; the most common is the offering for the repose of the dead. No sacrifices can be offered on the Sabbath or on the day of atonement. The Falashas, with all other Jewish sects, hope for a return to the sacred city, Jerusalem. While polygamy is not forbidden by law, it is nevertheless censured. They have a special hatred of slave-dealers, yet slavery is tolerated among them; they instruct their slaves in the law of Moses, and manumiss them on conversion. They are a very industrious race, and have the reputation of being good farmers. They are also able warriors (many fought under King Theodore in the late Abyssinian war), and are averse to commerce, which they regard as an obstacle to fidelity and rigor in religious observances. The Falashas were formerly governed by an independent prince, whose residence was in the fastness of Alina Gideon, and it is only since 1860, after the extinction of the race of their original masters, that they have passed under the dominion of the princes of Tigray. They claim that their ancestors settled in Abyssinia as early as the time of Solomon, and it is that they came much later. The knowledge of Hebrew they have lost. In 1867, the central committee of the Jewish Alliance Universelle, which has its seat in Paris, sent M. Leon Halévy to Abyssinia to make a tour of research among the Falashas, and report on what might be done for their education, with a special view to counteracting the influence of the Christian missionaries who had been sent out from India. After his return, M. Halévy wrote, in July, 1868, a very interesting report on the Falashas, and announced the publication of an Essay on the Falasha," which will undoubtedly be the first thorough work on the subject. He brought with him a young Falasha, who will be educated in France.—"Pierer, Universal Lexicon, vi, 79; Israelites, vol. xvi, No. 21 and 25. (J. F. W.)

Falcandus, Hegu, a distinguished historian, lived in the 12th century. According to the Benedictine authors of the work L'Art de Véirer les Dames, he was a native of France (his original name being Fulcan- dus or Foucault); accompanied his patron Stephen de la Perche, archbishop of Palemon, and grand-uncle of the king William II, to Sicily, and finally became abbot of St. Denys, 1182. Gibbon is of opinion that he was a native of Sicily. His celebrated work, Historia Sicula, which procured for him the surname of the Sicilian Tacitus, was published in 1189 or 1190, and is of great importance, for the Church history of that period.—Weitzer u. Welsle, Kirch.-Lex. iv, 865.

Falcon, a bird of the hawk tribe, anciently trained to assist in hunting, and still used in the East for the same purpose. Dr. Thomson (Lam. i, 4 sq.) thus speaks of the practice in Palestine: "The beg at the castle of Tilim, which we are now approaching, always keeps several of these large falcons on their perches in his grand reception-hall, where they are tended with the utmost care. They have been out on the mountains to tame them, and it is a most exciting scene. The emirs sit on their horses, holding the birds on their wrists, and the woods are filled with their retainers, beating about and shouting, to start up and drive toward them the poor partridges. When near enough, the falcon is launched from the hand, and swoops down upon his victim like an eagle hasting to the prey. After he has struck its quarry, the falcon flies a short distance, and lights on the ground, amidst the redoubled shouts of the sportsmen. The keeper darts forward, secures both, cuts the throat of the partridge, and allows his caper to suck its blood. This is his reward. Now standing the exhilaration of the sport, I could never endure the falcon himself. There is something almost satanic in his eye, and in the ferocity with which he drinks the warm life-blood of his innocent victim. I once saw some men of Tortosa catching the Syrian quail with a small hawk. This was done on foot, each sportsman carrying his bird on the right wrist, and beating the bushes with a stick held in his left hand. These quails are less than the American; are migratory, coming hero in early spring, and passing on to the north. They hide under the bushes, and will not rise on the wing unless forced to do so by a dog, or by the hunter himself. I was surprised to see how quickly and surely the little hawk seized his game. His reward also was merely the blood of the bird. I do not know whether or not the Jews in ancient days were acquainted with falconry. They are notmentioned and there is no complaint that Saul hunted for his blood as one doth hunt for a partridge in the mountains (1 Sam. xxvi, 20); and this hunting of the same bird on these mountains, and giving their blood to the hawk, reminds one of the sad complaint of the persecuted son of Jesse. In the neighborhood of Aleppo the smaller falcon is taught to assist the sportsman to capture the gazelle. Neither horse nor greyhound can overtake these fleet creatures on the open desert, and therefore the Arabs have taught the hawk to fasten on their forehead, and blind them by incessant flapping of their wings. Bewildered and terrified, they leap about at random, and are easily captured. They are also trained to attack the bustard in the same region. This bird is about as large as a turkey, and highly prized by the lovers of game; but, as they keep on the vast level plains, where there is nothing to screen the cautious hunter, it is almost impossible to get within gunshot of them. When they rise in the air, the little falcon flies up from beneath and fastens on one of their wings, and then both come whirling over and over to the ground, when the hunter quickly seizes the bustard, and delivers his brave bird from a position not particularly safe or comfortable. They will even bring down the largest eagle in the
same way; but in this desperate game they are sometimes torn to pieces by the insulted majesty of the feathered kingdom." See Hawk.

FALCONER, THOMAS, A.M., a Church of England divine, was born at Bath in 1771; was made fellow of Corpus Christi College, Oxford, in 1794, and died in 1869. He published The Restoration of our Saviour (1786); Eight Discourses on the alleged Discourses in the Gospels, in reply to Everson (q. v.) (Hampstead Lecture, Ox., 1811, 8vo); --The Case of Eusebius of Cesarea (London, 1823, 8vo); and other critical and historical writings.

Faldistorium or Fald-stool, a stool folding like a camp-stool, formerly used in the inthronization of bishops, and in coronations, both for sitting and kneeling. In modern times the name is improperly given to a small stool at which, in some English churches, the Litany is read. In those churches in which it is used it is generally placed in the middle of the choir near the steps of the communion-table. The name is probably from faldum, plica, and stool, sedes. --Masskell, Mem. Ritu. ii, 96; Siegel, Altertümern, iii, 453.

Falkner, Thomas, a missionary Jesuit, the son of an eminent surgeon at Manchester, England, was born at Manchester about 1710, and was bred to his father's profession. He visited Buenos Ayres, and falling ill there, was nursed by the Jesuits, and under the influence of their kindness was led to abandon the Presbyterian Church in which he had been brought up, to enter the Roman Church, and to join the order of Jesuits. He devoted himself to missionary labors, in which his medical skill was of great use. He spent forty years in this service in various parts of South America. After the suppression of the order he returned to England, where he died January 30, 1784. He wrote a Description of Patagonia (London, 1774, 4to) -- Botanical and other Observations in America (4 vols. fol.). -- Migne, Dict. des Biog. Chr. s. v.

Fall of Man, a phrase which "does not occur in Scripture, but is probably taken from the book of Wisdom, chap. x. 1. It is a convenient term to express the fact of the revolt of our first parents from God, and the consequent sin and misery in which they and their posterity were involved."

I. Scriptural Account of the Fall. (1.) The Mosaic account is (Gen. ii, iii), that a garden having been planted by the Creator for the use of man, he was placed in it to dress it and to keep it; that in this garden two trees were specially distinguished, one as the tree of life, the other as the tree of knowledge of good and evil; that Adam was put under the following prohibition by his Maker (Gen. ii, 16, 17) -- "And the Lord God commanded the man, saying, Of every tree of the garden thou mayest freely eat; but of the tree of the knowledge of good and evil thou shalt not eat of it; for in the day that thou eatest thereof thou shalt surely die;" that the serpent, who was more subtle than any beast of the field, tempted the woman to eat, by denying that death would be the consequence, and by assuring her that her eyes and those of her husband should be opened, and that they should have wisdom, knowing good and evil;" that the woman took of the fruit, gave it to her husband, who also ate; and that for this act of disobedience they were expelled from the garden, made subject to death, and laid under various maledictions.

(2.) Whether this account be a literal history or not, has been matter of great discussion, not merely between Christians and unbelievers, but also among Christian interpreters. One theory is that the passage is an allegory, signifying the origin of sin in the sin of Adam, under which the apprentices of man were allowed to obtain supremacy over his higher powers. Another (later) view makes the narrative mythical. The general current of Christian interpretation has held the passage to be historical, and has interpreted it literally. Philo Judaeus (c. 40), speaking of the account of Genesis, says: "These a sort of fable seem to me to be symbolical; not mere fabulous inventions like those of the poets and sophists, but rather types shadowing forth allegorical truth according to some mystical explanation." So he makes the serpent the symbol of pleasure, etc. (On the Creation of the World, 26, transl. London, 1803, p. 459, note.)

Among the early Church writers, Clement considers the narrative of the Fall partly as fact and partly as allegory (Strom. v, 11, p. 689, 90), and, following Philo, makes the serpent the image of volupptuousness. Origens regards the account as allegorical (De pr. iv, 16; Contra Cels. iv, 40; comp. also Origin, Frag. in Gen. ad loc.). Ireneus held the passage to be historical; so also Tertullian, adm. Judaeos, ii, 184; De vig. reg. xi; adm. Marc. ii, 2. He insists upon the literal interpretation of the particulars of the narrative, as they succeeded each other in order of time (De resurr. cum. 61: Adam ante nomina animalibus ac seminavi, quam de arcuro decrepsit; ante etiam prophetavit, quam voravit). The Gnostics made it allegorical or mythical. On the Gnostic (Basilidian) doctrine of the Fall (inivos όρχείον), compare Clem. Strom. ii, 20, p. 488; Gieseker, Christliche Urkunden (1830), p. 286. The author of the Clementine Homilies goes so far in idealizing Adam, as to convert the historical person into a purely mythical being (like the Adam-Cadmon of the Cabalists), while he represents Eve as far inferior to him. Hence Adam could not trespass, but sin makes its first appearance when Eve transgresses; Baur, Gnose, p. 61, note. (In the church history, History of Doctrina, § 61). Among the later fathers, and in the scholastic period, the account was generally held to be historical. Augustine (De Civitate Dei, xiii, 21) asserts the historical verity of the narration, but adds that true spiritual and typical meanings are contained in it; e. g. Paradise in the Church, the tree of knowledge is the type of free-will, etc.

The theologians of the Reformation followed the Scholastics in adhering to the literal interpretation, but differ in the exposition of several parts of the narrative c. e. g. the serpent is held by some to be a natural serpent; by others, Satan in the guise of a serpent, etc. Calvin (Commentary on Genesis iii) speaks as follows: "It appears, perhaps, scarcely consonant with reason that the serpent only should be here brought forward, all mention of Satan being suppressed. I acknowledge, indeed, that from the time of Adam alone nothing more can be collected than that men were deceived by the serpent. But the testimonies of Scripture are sufficiently numerous in which it is plainly asserted that the serpent was only the mouth of the devil, for not the serpent, but the devil, is declared to be 'the father of lies,' the fabricator of lies, and the author of death. The question, how-
ever, is not yet solved why Moses has kept back the name of Satan. I willingly subscribe to the opinion of those who maintain that the Holy Spirit then purposely used obscure figures, because it was fitting that full and clear light should be reserved for the kingdom of God. At any rate, the time the prophecies were written, they were well acquainted with the meaning of Moses when, in different places, they cast the blame of our ruin upon the devil. We have elsewhere said that Moses, by a homely and uncultivated style, accommodates what he delivers to the capacity of the people, and for not longer prose than would suit him to instruct an untaught race of men, but the existing age of the Church was so puerile that it was unable to receive any higher instruction. There is, therefore, nothing absurd in the supposition that they whom, for the time, we know and confess to have been but as infants, were fed with milk. Or (if another more acceptable) Moses is by no means to be blamed if he, considering the office of schoolmaster as imposed upon him, insists on the rudiments suitable to children. They who have an aversion to this simplicity must of necessity condemn the whole economy of God in regard to man. A similar view is given by Kurtz, *Bible and Astronomy* (Philadelphia, 1861), p. 174 sq. The modern extreme Rationalists generally interpret the narrative as mythical. Eichhorn (*Ubersicht *) finds truth in it in the form of poetry, that is, he regards it as a homily or didactic passage, and others, as Kant, Schelling, and other recent German philosophers and interpreters make it a "speculative myth." Von Bohlen (*On Genesis iii*) follows Rosenmüller in supposing that the narrator had the Zendavesta in view. Julius Müller gives up the historical character of the narrative, if now, he says, we turn to the narrator in the book of Genesis, we shall find that not sin, but physical suffering and death, are there connected with Adam's fall. This fact, and this lesson that man's ruin originated in himself, are the great truths which are to be gathered from the story, which must be regarded as fundamental, if true, although the story is in the form of a fable. That it is not to be taken literally is plain from Scripture, for the story in Genesis speaks of the serpent as the agent in the temptation of Eve. St. Paul speaks of the same temptation as coming from Satan. It is usual to assume that the serpent was the mere instrument of Satan, but there is nothing to lead us to this view in the words of the narrative. St. Paul, by interpolating this into the narrative, shows us that it is not to be taken as literally true. We find in John viii, 44, "the devil was a murderer from the beginning," an allusion to the man by the temptation. If this be so, it is a plain reference to Satan as the cause of man's bodily death. To bring in the idea of spiritual death seems less appropriate, for our Lord was rebuking the murderous intentions of the Jews. It was through conduct like that of the devil that they showed themselves his children" (*Doctrine of Sin*, Edinb. 1869, p. 78, 79).

The more recent German interpreters of the better class (e.g. Haverwick, Delitzsch, Keil, etc.) admit the historical character of the account, but there are, of course, various theories among them as to its interpretation. Martensen (*Christian Dogmatik*, vol. ii, 79-83) interprets the Mosaic account as a combination of history and sacred symbolism, a figurative representation of an actual event. Lange (*On Amest*, sn. p. 209) speaking of the narrative, says: "Like the Hebrews, who, as Friere remarks, especially in the primitive traditions of Genesis, it is a historical fact, to be taken in a religious-ideal, that is, a symbolical form. It is just as little a mere allegory. It is just as little a mere figure, as the speaking of the serpent is a literal speaking, or as the tree of life, in itself regarded, is a plant whose eating imparted imperishable life. That sin began with the beginning of the race, that the first sin had its origin in a forbidden enjoyement of nature, and not in the Cainitic fratricides or similar crimes, that the origin of human sin points back to the beginning of the human race, that the woman was ever more seducible than the man, that along with sin came in the tendency to sin, consciousness of sin, and the inclination to sin; all these are affirmations of the religious historical consciousness which demand the historicism of our tradition, and would point back to such some fact, even though it were not written in Genesis."

The interpretations of the *serpent* have been very varied. Even the moderns, as we have seen, for not longer prose than would suit him to instruct an untaught race of men, sea calls the evil spirit (gēros, φαινώ) by the name of "serpent," as he is "full of poison and malice." Adam Clarke (*Commentary on Genesis*, ch. iii) interprets the word *yāshā* (rendered "serpent") to mean "a creature of the ape or ourang-outang kind." His notes on the whole of the story of Genesis iii, 14-15 is a word of exegesis. We cite Lange (*Genesis*, Amer. ed. p. 229) as follows: "True it is that the serpent appears as the probable author of this temptation, but such probability is weakened by what is said in l, 25 cor ii, 20. The serpent was a good creature of God, though different, as originally created, from what it afterwards became" (Delitzsch). As a type, the serpent is just as well the figure of health and renovation as of death, since every year it changes its skin, and ejects, moreover, its venom. This double peculiarity makes the serpent, as the great serpent (tētā, Ps. xix, 12), inarguable, is indicated not only in language, but also in myths, in sculpture, and in modes of worship. In this relation, however, we must distinguish two diverging views of the ancient peoples. To the Egyptian reverence for the serpent stands in opposition the abhorrence for it among the Latins (see *Serpent*). Greeks, Persians, and Germans. "That Satan made use of the serpent, and that a serpent was somehow employed, is likely; the language of Jehovah subsequently, while it was literally true of the instrument, being in a higher sense true of the agent, the one being man, the other Divine. The serpent of the terms in which the serpent was addressed: 'Upon thy belly shalt thou go, and dust shalt thou eat all the days of thy life.' 'The serpent, perhaps,' says Gill, 'formerly moved in a more erect posture, but was doomed to lick the dust.' 'Probably his original residence and food, as we say another, were in the trees, but now he is degraded to the earth.' That sentence evidently, whatever might be its literal application to the serpent, was eminently meant of Satan himself. 'Plainly figurative,' says Dwight, 'to express a state of peculiar degradation and suffering' (Wardlaw, *System of Theology*, vol. ii, ch. viii). (See also as does Holden, *Disertation on the Fall* (Lond. 1829, 8vo). Conyers Middleton (*Essay on the Allegorical and Literal Interpretation of the Fall*, Works, vol. i, ch. iv, ch. ii). Comp. Pye Smith, *First Lines of Theology*, bk. iv, ch. ii. A writer in the *Journal of Sacred Literature* (i, 361 sq.) seeks to show that the common opinion that the serpent was the instrument of the tempter is untenable, on the ground that the Scripture does not state that the serpent was an instrument impregnated with literal application of the words of the narrative to a serpent as the instrument of Satan appears to be incon
sistent with the present relation of the serpent to other animals, and also with the testimony of geology as to fossil remains, &c. He maintains that under the name serpent Satan is meant, as there were "probable grounds for a mental tradition that during the earliest ages, the name of the Evil One, reflecting the conception of him that then prevailed." Bishop Newton (Disser. on Creation and Fall, 1st edit.) takes a similar view, viz. that Satan is spoken of in the passage under the "well-known" symbol or hieroglyphic of the serpent, as a proper name, in contradistinction to the deceiver of mankind, as in popular estimation it was held to be the most cunning and insidious of animals. Sherlock (Use and Intent of Prophecy, diss. iii.) refers to the "common usage of Eastern countries, which, to clothe history in parables and similitudes;" and remarks that "it seems not improbable that for this reason the history of the fall was put into the dress in which we now find it. The serpent was remarkable for an insidious cunning, and therefore stood as a proper emblem of a deceiver; and yet, being one of the lowest of God's creatures, the emblem gave no suspicion of any power concerned that might pretend to rival the Creator." What was the particular nature of the sin of our first parents it is not an easy matter to determine. Bishop Newton remarks (l. c.) that "eating forbidden fruit is nothing more than the act of disobedience, as it is the same thing to resist the preachers wherein the history of the fall was recorded before the use of litters. It was plainly the violation of a divine prohibition; it was indulging an unlawful appetite; it was aspiring after forbidden knowledge, and pretending to be wise above their condition. So many reasons there are to believe that if we had been wilder and lost ourselves in search of more particulars." In a later edition of this dissertation (Works, i, 91), bishop Newton modified the statement above given, and gave his adherence to the view that a real serpent was concerned in the fall (see Quarry, On Genesis). Bishop Pearson accords, and adds, "If we abide by the original narration, we may say that the serpent is the allegorical designation for a moral evil, which opposed itself to man in temptation." Dörnten-bach (in Herzog, Real-Encyklop. xx, 209, art. Sünde) maintains that the serpent was a real serpent, the tree a real tree, etc. Quarry gives a copious dissertation on Paradise and the Fall in his Genesis and its Authorship, where he clearly explains the allegorical nature of the text and withdraws the scriptural statements "altogether from the range of physical interpretation." He cites a remark of Hengstenberg's (Christologie, th. i, abt. i, p. 26, ed. 1829), to the effect that if the serpent be symbolical, the whole history is symbolical, as, in a connected passage like this, unity of interpretation must prevail; and it is not allowable to follow at one moment the symbolical, and at the next moment the literal interpretation. Admitting the truth of this, Quarry states that, nevertheless, the narrative may be, as a whole, not simply an apologue illustrating true principles; but may be inspired by great facts, represented symbolically. He interprets the tree of life (comp. Rev. ii, 7; xxii, 2, 14), and the eating the fruit of the tree of knowledge, as mystical; the former denoting the promise of eternal life conditioned on man's obe-dience, the latter, the loss of the same knowledge in the event of its moral consequences, consciousness of guilt and shame. He maintains that the supposition of a real serpent is untenable, as there is no ground for the belief that Satan can possess at will any living creature, or work such a miracle as to make a serpent speak. A natural serpent is literally spoken of, but this natural serpent is only the symbol of the real tempter; otherwise the innocent animal receives all the punishment, while the really guilty tempter escapes. The real sin itself must have arisen at some point at which "natural appetite passed into that stage of its progress when, as St. James says, lust has conceived, and at which the sin thus conceived has quickened into activity. This point, in the mystery which envelopes every beginning of initiative in the human mind, in material, or of, thought, act, or substance, was the real fall, and is better represented by the mystical symbol of the participation of forbidden fruit than by a historical narrative that should only specify the overt act in words to be taken in their literal and general sense, as of the deceiver of mankind, as in popular estimation it was held to be the most cunning and insidious of animals. Sherlock (Use and Intent of Prophecy, diss. iii.) refers to the "common usage of Eastern countries, which, to clothe history in parables and similitudes;" and remarks that "it seems not improbable that for this reason the history of the fall was put into the dress in which we now find it. The serpent was remarkable for an insidious cunning, and therefore stood as a proper emblem of a deceiver; and yet, being one of the lowest of God's creatures, the emblem gave no suspicion of any power concerned that might pretend to rival the Creator." What was the particular nature of the sin of our first parents it is not an easy matter to determine. Bishop Newton remarks (l. c.) that "eating forbidden fruit is nothing more than the act of disobedience, as it is the same thing to resist the preachers wherein the history of the fall was recorded before the use of litters. It was plainly the violation of a divine prohibition; it was indulging an unlawful appetite; it was aspiring after forbidden knowledge, and pretending to be wise above their condition. So many reasons there are to believe that if we had been wilder and lost ourselves in search of more particulars." In a later edition of this dissertation (Works, i, 91), bishop Newton modified the statement above given, and gave his adherence to the view that a real serpent was concerned in the fall (see Quarry, On Genesis). Bishop Pearson accords, and adds, "If we abide by the original narration, we may say that the serpent is the allegorical designation for a moral evil, which opposed itself to man in temptation." Dörnten-bach (in Herzog, Real-Encyklop. xx, 209, art. Sünde) maintains that the serpent was a real serpent, the tree a real tree, etc. Quarry gives a copious dissertation on Paradise and the Fall in his Genesis and its Authorship, where he clearly explains the allegorical nature of the text and withdraws the scriptural statements "altogether from the range of physical interpretation." He cites a remark of Hengstenberg's (Christologie, th. i, abt. i, p. 26, ed. 1829), to the effect that if the serpent be symbolical, the whole history is symbolical, as, in a connected passage like this, unity of interpretation must prevail; and it is not allowable to follow at one moment the symbolical, and at the next moment the literal interpretation. Admitting the truth of this, Quarry states that, nevertheless, the narrative may be, as a whole, not simply an apologue illustrating true principles; but may be inspired by great facts, represented symbolically. He interprets the tree of life (comp. Rev. ii, 7; xxii, 2, 14), and the eating the fruit of the tree of knowledge, as mystical; the former denoting the promise of eternal life conditioned on man's obe-dience, the latter, the loss of the same knowledge in the event of its moral consequences, consciousness of guilt and shame. He maintains that the supposition of a real serpent is untenable, as there is no ground for the belief that Satan can possess at will any living creature, or work such a miracle as to make a serpent speak. A natural serpent is literally spoken of, but this natural serpent is only the symbol of the real tempter; otherwise the innocent animal receives all the punishment, while the really guilty tempter escapes.
ture, shines from the cradle of the race—what then have you to say, ye manufacturers of myths, ye who would profane the revelation of God?" (Herder, aelt. Urkunde der Menschengeschichte; Werke, Carlraube, 1827, v. 187; vi. 4).

II. Doctrinal Import of the Narrative. — Whatever views we take of the nature of the narrative in Gen. ii, iii, all who believe it to be a record of divine revelation find in it the following points of doctrine:

1. That God, after creating man, placed him in a state of probation; 2. that the test of his probation was obedience to the divine law; 3. that the temptation to disobey was from an evil power of man; and 4. that the temptation appealed both to the intellect and to the senses, leading first to unbelief in God, secondly to putting "self" in place of God, and thereby to the beginning of evil lust; 5. that in the exercise of free will man yielded and sinned; 6. that the consequences of the sin were knowledge of good and evil, and separation from God, and death, the curse lighting upon man and upon nature also. Auberlen, referring to the three constitutions of the first sin named above, viz. unbelief, self-love, and lust, remarks as follows: "The first idea of the sin is not accidental, but substantially expulsive and exhaustive, is shown not only in the fact that all sin that comes before us in life may be referred to them, but also in the fact that they correspond to the three fundamental elements of man's being and consciousness—spirit, soul, and body. Unbelief is self-consciousness, self-love is self-consciousness, and both are opposed by world-consciousness. These have all become corruptcd and perverted. They have become, respectively, alienation from God, selfishness, love of the world. The first and highest element of human nature—the spiritual—is neglected, obscured, made powerless; the two others—the lower—are pushed into extreme but unhealthy prominence of activity. Man has become physically and physically. Unbelief is the negative, the union of self-seeking and the lust of the senses is the positive element in the idea of sin. Man no longer wishes for God; he is bent on having the creature in both ways, the material and the natural, the subjective and objective; he will have his own ego and the world too. According to Gen. iii, 5, 6, the selfishness is, as it were, the soul; sensuousness, the body of sin: the first is the deep, invisible root; the second, the external manifestation. The ego, separated from God, seeks in the world the elements on which it lives. Genesis thus comprehends the various opposing theories of man on the nature of sin, the theory of selfishness, which in recent times is represented by Julius Müller, and that of the senses by Schleiermacher and Ritschl. The ethical theory is but an attempt to a religious basis, and in that matter modern thought has a great deal to learn" (Divine Revelation, Edinb. 1887, p. 184).

The theological question of the connection between the sin of Adam and that of the whole human race will be treated under the article IMPUTATION; Sixth, the specific loss of man by the fall, in the theological sense, involving the difference between the Roman Catholic anthropology and the Protestant, see IMAGE OF GOD; JUSTIFICATION; Sixth. In this place we give the views of the various as to the general doctrinal significance of the narrative. Lange (On Genesis, Am. ed., p. 73 sq.) remarks that "the significance of Paradise is this, that it declares the original ideal state of the earth and the human race, the unity of the particular and the general, the unity of spirit and nature, the unity of spiritual innocence and the physical harmony of nature, the unity of the fall and the disturbance of nature; lastly, the unity of the facts and their symbolical meaning, which both the bare literal and mythical explanations of the records fail to answer." The doctrine of knowledge of good and evil existed in some form, but with all nature is in some measure designated as a test, but the serpent, as the organ of that temptation, is not only the type of temptation and of sin, but, as originally a worm, the type of its brutality, its degradation, and its subjection. The record of the actual fall stands there as an eternal judgment upon the theological, the human, view of moral evil, especially upon the error of Duhamel and Manselheim, Pelagianism and Pantheism. Hence arises the number of objections which the most diverse systems in old and modern times have raised against this record. The earthly origin of evil out of the abuse of freedom offends dualism, which derives it from an evil deity, or from Satan, or from free choice of man. Although the serpent sustains the doctrine that, prior to the fall of man, sin had existed in a sphere on the other side, working through demonsiac agency upon this (for the serpent was not created evil, Gen. i, 26; generally not even fitted for evil, and can only be regarded, therefore, as the origin of a far different evil power), yet the visible picture of the fall in this sphere is a certain sign that the fall in that sphere could only have risen through the abuse of the freedom of the creature. But if we observe the progress of sin from the first sin of Eve to the crucifixion of Christ; if we view the opposition between Cain and Abel, and the sacrifice of the moral freedom of Cain himself, so the Augustinian view, raising original sin to absolute original death, receives its illumination and its just limits. But how every Pelagian view of life fails before this record is, in its order, as it is, self-consciousness, self-preservation, and world-consciousness. Between the sin of the spirit world and that of man, between the sin of the woman and the man, between the sin of our first parents, and their own sinfulness, and the sinfulness of their posterity! If we take into view the stages of development of evil in the general history of the sin, how limited is the modern view, which regards the senses as the prime starting-point of evil! But when Pantheism asserts the necessity of sin, or rather of the fall, as the necessary transition of men from the state of pure innocence to that of conscious freedom, the simple remark that the ingenuousness of Adam would have been carried directly on in the proper way if he had stood the test, just as Christ through his sinlessness has reached the knowledge of the true distinction between good and evil, and has actually shown that sin, notwithstanding its limited existence, does not belong to its very being, clearly refutes this assertion. But how clear is the explanation of evil, of punishment, and of judgment, as it meets us in this account! That the natural evil does not belong to the moral, but, notwithstanding its inward connection with it, is still subject to the divine wisdom. The outward punishment is to redeem and purify; that from the very acme of the judgment breaks forth the promise and salvation. These truths, which are far above every high anti-Christian view of the world, make it apparent that the first judgment of God, as a type of the world-redeeming judgment of God, has found its completion in the death of Christ upon the cross." "The deceptive promise of the serpent was fulfilled: man's eyes were opened (ch. iii, 7), but he saw only his misery and nakedness. He was now brought to know good and evil, but with the painful consciousness of having trampled upon the one, and of being sunk in the depths of woe by the other. He had become as a god; he had boldly cast off all allegiance to the one God, and assumed cast ovt over himself. He had constituted himself a god, no longer the representative of God; but he had become the representative of God; but this likeness to God brought not with it the happiness which pertains to the divine Being, but was fraught with the deepest misery and woe!" (Kurtz, Bibl. and Astronomy, p. 171). Müller, after affirming that there is really nothing in the narrative of the fall obliging us to consider that event as the primary beginning of sin, in the strict sense of the word,"
FALL OF MAN

474 FALL OF MAN

"that neither ‘the image of God,’ wherein man was created, nor God’s pronouncing everything ‘very good,’ prevents our believing that the fall was only the outward manifestation of a perversion of the will preceding the empirical life of man—the outcome of an evil already present in potential, which might, indeed, by a perverting of the endowment of his species, have been born with him as the basis of an original moral depravity in human nature. The endeavor of the tempter was to bring out to view, and into action, this hidden evil’ (‘Doctrine of Sin, Edinb. 1858, ii, 365). This view of Müller’s rests upon the view of man in his existent state, which he calls a ‘self-determination of the transcendental freedom before our individual existence.’ Rothe, on the other hand (Ezikil, i, 180), places the essence of sin chiefly in the necessity of matter. ‘The passage through sin, in his opinion, is a metaphysical necessity. He conceives of our first parents not as mature at their creation, but destined to spiritual development; consequently their material part, in the absence of training, must gain the upper hand; and imperceptibly, and without blame, they found themselves by their development, in sin. Hence in the creation of the first couple man was morally nothing permitted; it lies unavoidably in the creature, on account of his origin—in the fact of his coming into existence in contradistinction from God; but as creature-evil has been ordained in the plan of the world, so also has its determination, and as God therefore did not exempt the finner, God was Lord over the parents of our race and over the serpent; but if he by his own will restrained his highest power, and left free play-room to free created beings, and still retains the government, he is not the motive of evil, but the power to the free and worthy to be adored. Man should rather complain of himself, but give thanks to God that he has endowed him with such prerogatives, and glorify him with soul and body, which are God’s. ‘There was no necessity at all to sin; that complaint can only be established on the ground that, as Rothe teaches, evil inevitably developed itself. Besides, from the beginning of the world God had provided for the human race, whose fall foreseen, the most perfect means of grace and gifts, in order to make that injury abundantly good, and to lead back the fallen one to himself and his kingdom. Indeed, as all evil, so also the sin of our first parents redound to the praise of the merciful God, because by it he was conditioned the mission of the second Adam as the Redeemer of the world. But the possibility of the fall without blame to the Creator being admitted, another question arises: ‘Through what incitement did it become a reality?’ Even to this question the Scriptures give a satisfactory answer: it took place through outward prompting—through evil spiritual influence, which was already existing in creation. Upon the basis of a created but still spiritual existence, there is an evil possibility of action, which is perverted by an influence at enmity with God must be admitted.

The theophrastian view of our first parents, who were not isolated in the new world, corresponded exactly with the sublity of Satan in the form of a serpent. The kingdom of Satan, as a spiritual power, and the peculiarity of the first pair, whose pure self-determination was ensnared and obscured through that power, furnish a satisfactory explanation of the fall. The fall itself was certainly a free self-determination, otherwise no blame could attach to it; but not altogether in the same sense: both the true evil and the true good were one; the devil, as the murderer from the beginning: it was a co-operation of human freedom with the temptation of the evil principle itself. But, according to the Scripture account, the temptation of our first parents was gradual, and the motives to the fall are thus psychologically intelligible. In all the narratives of the temptation concerning the divine prohibition and the ruinous consequences of sin: ‘Yea, hath God said, Ye shall not eat of every tree of the garden?’ ‘Ye shall not surely die.’ Then he awakened pride, inducing man to overstep the scheme of righteousness, and to use his freedom arbitrarily, and according to his own pleasure: ‘God doth know that in the day ye eat thereof then your eyes shall be opened, and
ye shall be as gods, knowing good and evil." After this preparation came the thought that the tree was good for food, and to look upon, and to be desired to make one wise. The sensual desire would now naturally start up, and the woman seduced became the seducer. The powers of the soul were corrupted before the actual sin took place; the faculty of knowledge by doubt and unbelief toward God, the faculty of delight by unceasing striving and proud excess, as the Grecian fable of Prometheus represents it; and, finally, the faculty of feeling, through sensual longing, which propinquity the religion of the Greeks sets forth by Erimhetes and Pandora. Thus did the possibility of the fall, which rests upon the freedom of the creature in reality under outward influences. The conversation between Eve and the serpent shows how accessible she was; the woman, as the weaker part, is first approached and misled, and not till then the man, and even then only through her; as also the apostle Paul expresses it (1 Tim. ii. 14), the woman was first in the transgression. Rothe, indeed (p. 221), thinks that the assumption of a satanical temptation does not at all help the difficulty, because that assumption always presupposes a real susceptibility of being tempted, a sinful predisposition, a moral weakness. But the possibility of being tempted to sin is not yet sin; with Rothe that predisposition is rather something already existing. It is certainly much more worthy of God to conceive of his creatures as pure and good—they first determining themselves to evil, and the enemy active therein. If even the Son of God could be tempted without injury to his sinlessness, much more the first Adam, whose personality and divine resemblance were specifically lower. If, in fine, we compare the scriptural theory, thus understood, with the modern philosophical explanations of the fall, the result will be that the former will be found to contain more plausibility and truth than the latter; although Rothe (p. 221) is of the opinion that the Biblical account of the fall can no longer be maintained, and that the fall cannot be explained from the Mosaic stand-point. Only the Bible (and perhaps, agreeing with it, the mythology of antiquity) tells us of a man created in the image of God, in a paradisiacal state of innocence; and, in accordance with this fact, shows how this state was interrupted and perverted into one of guilt. Dr. Julius Müller, on the contrary, although Paradise has still a place in his system, places Adam in it as already a sinner. In the same way Rothe presupposes what he ought to show, since he assumes evil as original and necessary in the development of the world. We cannot see, either according to Müller or Rothe, whence it could properly come into the natural world. Rothe, with his presupposition, is obliged to assume one of two things: either he must dialectically establish an evil principle in matter, and deny the pure creation of God, or he must ascribe the origin of sin, not to the perverted will, but to God himself: in both cases he has a Manichean life-view of sentient beings. Sin with him is not a free act of man, proceeding out of the heart and will; it springs from the overmatching power of material nature subdued his personality with inevitable necessity (p. 226). 'The origin of evil from pure good must forever remain inconceivable' (p. 222); thus he establishes an impure material creation. Is anything explained by this means? Whence comes, then, immaturity into the material creation before all acts of the will? Is not the question more easily explained by the abuse of freedom than by metaphysics; more easily through the devil and man than by the act of the Creator? The fall, according to the doctrine of the Church, says Rothe (p. 220), was a blunder in the work of the earthly creation, as it were, at the beginning. In order to avoid this, either an evil principle must have been co-operative in the creation, or else God himself must have ruined his own work at its commencement. Shall we call this escaping the blunder made at the beginning? Is it not rather increasing it, and carrying it over into the region of the perfect and the holy? The latter of these two opinions, strictly taken, is that of Rothe, since he assumes matter as created by God, and from matter deduces sin. But the positions, Matter was created by God, and Matter is the opposite of God, and hence the origin of sin, contradict each other."

Dogmatik, Lips. 1869, § 71-73; Fletcher, Appeal to Matter of Fact and Common Sense; Doderlein, Inst. Theol. Christ. § 178; Fairbairn, Typology of Scripture, i, 240 sq.; Richers, Schöpfungsgeschichte (Leips. 1854, 8vo); Middleton, Essay on the Creation and Fall of Man, Works (1755, 5 vols.), iii, 457 sq.; Zeller, Die ältesten Theodizee (Jena, 1868, 8vo); Coleridge, Aids to Reflection, Intr. 66; Cunningham, Historical Theology, vol. i, ch. xix; Delitzsch, Biblical Psychology (Edin. 1867), p. 147 sq.; Monsell, The Religion of Redemption (Lond. 1867), p. 29 sq.; Meth. Quar. Review, Oct. 1867, art. vii. On the effects of the fall on nature, see Nature.

**Fallow-deer (Dama dama, gaumur); Sept. δαμαδας [but ὀρατις in 1 Kings], Vulg. ibidu]s, mentioned among the beasts that may be eaten in Deut. xiv, 5, and among the provisions for Solomon’s table in 1 Kings iv, 23 [Heb. v, 5]. There are three animals of the Cervidae family with which different writers have identified it. See ZOOLOGY.**

1. Most commentators (following Bochart, Hieroz. i, 910; ii, 269) regard it as properly translated in our version, deriving the word from "dama, chumur", in the sense of being red, and thus referring it to a species of deer of a reddish color; probably the Cervus dama of Linnaeus, originally a native of Barbary, where it is still found wild. It is stated to be found very generally dispersed over Western and Southern Asia, and is said to have been introduced into England from Norway (see Penny Cyclopaedia, s. v. Deer). It is smaller than the stag (Cervus elaphus), having horns or branches serrated on the inside, which it sheds annually. The color in winter is a darkish brown, but in summer bay, spotted with white. The fallow-deer

(Common Fallow-deer.)

(Cervus dama) is deemed by most authorities to be undoubtedly a native of Asia; indeed, Persia seems to be its proper country. Hasselquist (Prorr. p. 211) noticed this deer in Mount Tabor. Oedmann (Form.
Samuel, i, 178) likewise believes that the yachmur is best denoted by the Ceraun dama. The female is called in the Talmud ניער, and is identified by Levy sohn with the German Damäskrack. It is, however, difficult to suppose that Jerusalem could have received any appreciable amount of flesh-meat from such a source, remote as it is from a forest country.

2. Kitto (Dict. Bibl. Deut. l. c.) says, "The yachmur of the Hebrews is without doubt erroneously identified with the fallow-deer, which does not exist in Asia," and refers the name to the Orzy leukoryz, citing Niebuhr as authority for stating that this animal is known among the Eastern Arabs by the name of yachmur. This is the opinion which we have adopted, from Hamilton Smith, who is the best modern authority on such questions. See Antelope.

3. Still others, on the authority of the Septuagint rendering in Deuteronomy, regard the term as denoting the Ailuropoda bulbata (Ibex); the Hippopotamus of the Greeks (see Herod. iv, 152; Aristotile, Hist. Anim. iii, 6, ed. Schneider, and De Part. Anim. iii, 2, 11, edit. Bekker; Oplian, Gym. ii, 300). From the different descriptions of the yachmur as given by Arabian writers, and cited by Bochart (Hieroz. ii, 284 sqq.), it would also seem that this is the animal designated; though Damar's remarks in some respects are fabulous, the history of its action, and the wonderful works and blessings of God (Deut. xxxi, 10-13). When Jehovah gave the Hebrews this remarkable institute, in order to guard them against the apprehension of famine, he promised, on the condition of their obedience, so great plenty in every sixth harvest that it alone would suffice for three years (Lev. xxvi, 20-22). However, through the avarice of the Hebrews, this seventh year's rest, as Moses had app chanced (Lev. xxvi, 34, 38), was for a long time utterly neglected (2 Chron. xxxvii, 21); for in all the years of the Hebrews' history, there was no mandation of the sabbatical year, nor of the year of jubilee.

The period when this wise and advantageous law fell into disuse may probably be understood from the prediction of Moses in Lev. xxvi, 38, 44, 45; comp. with 2 Chron. xxxvi, 21; Jer. xxx, 11. Thus was it foretold that the Hebrews, for the violation of this law, should go into captivity: "To fulfill the word of the Lord by the mouth of Jeremiah, until the land had paid off her rebelliousness: for as long as she lay desolate she kept sabbath, to fulfill threescore and ten years." Here it is taken for granted that seventy sabbatical years, including the jubilee years which are added every seventh sabbatical year, had been neglected by the unfaithful people. The Hebrews were frequently weary of the law; and at different periods during the commonwealth they appear to have utterly neglected the fallow or sabbatical years. Hence it appears that the captivity of the Hebrews and the destruction of their country was an act of retributive Providence, brought upon them for this very reason, that the land might pay off those sabbatical years of rest, of which the Hebrews had deprived it, in neglecting the statute of Jehovah their king (Lev. xxvi, 43), and while the fallow or sabbatical year appears to have been more scrupulously observed, as we learn from Josephus (Ant. xi, 11, 6). See Jubilee.

False Prophet (φελανδροφήγος, a pseudo-prophet), i. e. one falsely professing to come as a prophet or ambassador from God, a false teacher (Matt. vii, 15; xxiv, 11, 24; Mark. xiii, 6; Luke xiv, 15; 1 Pet. iv, 11; 2 Pet. ii, 1; 3 John, 7; Rev. ii, 2, 22). See Prophet. In Rev. xvi, 13, the term is distinctively used, "the false prophet," with reference to the mythological system of paganism, the second "beast" (q. v.), supporting the first or secular power of Rome; allegorically interpreted by the impiety of the antichristian churches, De pseudopropheteismo Hebraorum, L. B. 1859, 5vo.

Fama clama (general bad report), in the Scot-
tish ecclesiastical law, is a ground of action before a presbytery or synod against a minister or member of the Church, founded on common report, and not a charge by accusation. If the rumor, or *fama clausoae*, be referred by the presbytery or synod to the church, and inquired into without any accuser, for the vindication of the character of the church of the court, and with a view to the preservation of good morals in the community. See Hill, Church Practice, p. 49.

**Familia Charitatis.** See FAMILISTS.

**FAMILIARS of the Inquisition.** Officers of that tribunal whose function it is to apprehend accused or suspected persons and convey them to prison. They being the agents of the inquisition are therefore called *fumilii*. The office was formerly held in high honor, and men of noble family often held it, especially in Spain. Innocent III granted large indulgences to familiars. The same plenary indulgence is granted by the pope to each exercise of this office as was granted by the Lateran Council to those who succeeded the Holy Land. "When several persons are to be taken up at the same time, these familiars are commanded to order matters that they may know nothing of one another's being apprehended; and it is related that some of his three sons and daughters, who lived together in the same house, were carried prisoners to the inquisition without knowing anything of one another's being there till seven years afterwards," when those that were alive were released by an *Auto da Fé*. See Inquisition.

**Familiar Spirit** (2 Kgs, 9, 19, 21, 24; 1 Kings, 19; 1 Kings, 19, 1, 2, 10) is the medium between the dead and the living, the vessel containing the spirit of the dead, a necromancer, or sorcerer who professes to call up the dead by means of incantations, to answer questions (Deut. xvii, 11; 2 Kings xxi, 6; 2 Chron. xxviii, 6; Lev. xix, 31; xxx, 6; 1 Sam. xxviii, 8, 9; 1 Sam. viii, 19; xix, 9). But also specially for the *pythia* (Acts xvi, 16) or divining-spirit, by the aid of which such jugglers were supposed to confer (Lev. xx, 27; 1 Sam. xxviii, 7, 9) and for the shade or departed spirit thus evoked (Isa. xxix, 4). See Divination. The term is rendered by the Septuagint *γεγαμεριμνης*, "a ventriloquist," but is rather a wizard who asked counsel of his familiar, and gave the responses received from him to others—the name being applied in reference to the spirit or demon that animated the person, and inflected the belly so that it protuberated like the side of a bottle. Or it was applied to the magician, because he was reputed to be inflected to be in contact with the spirit (γαμαριμνης, like the ancient *Εφεσιαλης* [κυριαρχεις γαιστας ἐν αὐτῷ], *H. V. I. 1017, mactum spiritum per verna nasa naturae exequiatur; Sch. in Ar. Plut.]. The ob of the Hebrews was thus precisely the same as the pythia of the Greeks (Plutarch, De def. Or. 414; Cicero, De die, i, 10); and was used not only to designate the performer, but the spirit itself, *πνεύμων Πανσαραφηχος* which possessed him (see Levit. xx, 27; 1 Sam. xxviii, 8; also Acts xvi, 16). A more specific denomination of this last term was the *neκρομανσ* (literally seeker of the dead, *πνευμα πανσαραφηχος*, Deut. xviii, 10; comp. *πνευμα ἐν * &c., one who, by frequenting tombs, by inspecting corpses, or, more frequently, by help of the ob, like the witch of Endor, pretended to converse with the dead, and bring secrets from the invisible world (Gen. xii, 8; Exod. vii, 11; Lev. xiv, 20; Deut. xvii, 12-12). Compare the *διανοητικος*, anti-theists (*charmers*), of Isa. ix, 8. But Shuckford, who denies that the Jews in early ages believed in spirits, makes it mean "consultants of dead idols" (*Com. ii, 269;*). These ventriloquists, "squeak and gibber," "speak and gibe," Shaks. *Jul. Caesar* from the earth to imitate the voice of the revealing "familiar" (Isa. xxix, 4, 6; compare *σπειρομαντις*, Soph. *Frag. 3*). Of this class was the witch of Endor (Josephus, *Ant. vi*, 14, 2), in whose case intended imposture may have been overruled into genuine necromancy (Exclusa. xiii, 20). On this wide subject, see a *Chrysostom ad I. Cor. xi*, xii, *Ter- drullian, ad. Mer. iv*, 55; *De anima*, p. 57; Augsburg, *De doctr. Christ.* § 83; Cicer. *Tusc. Disput.* i, 16, and the commentators on *En. vii*; *Criucii Sacri*, vii, 331; Le Moyne, *Var. Sacr.* p. 93 sq.; Selden, *De Deis Syr., 1*, 2; and, above all, Böttcher, *De Inferius*, p. 101-121, where the whole subject is displayed is disguised. Those who sought inspiration, either from the demons or the spirits of the dead, haunted tombs and caverns (Isa. lxv, 4), and invited the uncanny communications by voluntary lots (Maimon, *De Idol. ix*, 15; Lightfoot, *Hor. Hebr. ad Mutt. x*, 1). That the supposed *pythiae* was often acted by ventriloquists, is certain; for a specimen of this even in modern times, see the *Life of Benvenuto Cellini.* See Necromancy.

Closely connected with this form of divination are the two following: (1.) *χερί* or *che*br, a spell or enchantment, by means of a cabalistic arrangement of certain words and implements (Deut. xviii, 11; Isa. xlvii, 29, 32), spoken also of serpent-charming (Ps. liii, 8). See Charming. (2.) Sorcery (either wizard, *γηγαμεριμνης*, knowing one, Lev. xiv, 31; xx, 6; Deut. xviii, 11; 1 Sam. xxviii, 8, 9; spoken also of the imp or spirit of divination by which they were supposed to be attended, Lev. xx, 27; or some form of *γηγαμεριμνης*, to act the witch literally by ventriloquism (Deut. xxiv, 6; Exod. vii, 11; Deut. xvii, 10; Dan. ii, 2, 6, &c.), which signifies practising divination by means of the black art, with an implied collusion with evil spirits; applied usually to pretending to reveal secrets, to discover things lost, to hidden treasure, and interpret dreams. See Wizard.

**Familists.** See *Familia Charitatis*. Family of Love, a sect founded in the 16th century by Henry Nicholas, a native of Münster, in Westphalia, who, after residing for some time in Holland, went to England in the latter part of the reign of Edward VI, and there established (1592) his *familia charitatis* or *fratres des Lie- de* (Spry's *Cromar*, ii, 410). His doctrines have often been confounded with those of David Joris (see Joris), which they resemble in many respects, and generally with those of the Anabaptists. His followers, however, published a *Confession of Faith* in 1576 (given in Spry's *Cromar*), and soon after introduced into France, in which they attempt to prove the identity of their doctrines with those of the evangelical Confessions. The characteristic feature of this sect was a tendency to mystic contemplation, and the belief that, through love, man could become absolutely absorbed in and identified with God, in a subjective sense. Nicholas represented himself as the apostle of this "service of Love," and it is said went so far as to claim superiority over Christ, on the ground that Moses only preached hope, Christ faith, but he preached love. The sect was accused of confusing the divinity of Christ and of even rejecting the divinity of God himself, in his higher attributes, by maintaining that man would, in this life, become identified with God. They, on the contrary, maintained in their Apology their belief in the three general Christian creeds, and particularly in the satisfaction and pardon court of Christ, which they claimed to emulate the state of life exhibited by him. As they looked upon themselves as perfect, they could not acknowledge the need of forgiveness, and stated in their Apology that they who tried with all the heart to believe and keep the commandments of God, and perform all good, could only come from him. They distinguished themselves from the Anabapists by their recognition of infant baptism, and by their indifference as to the external part of the established worship, which the Anabaptists assailed with so
special violence. Nicholas, who at first persisted quietly, came out more boldly during the reign of Elisabeth, and announced himself as a prophet appointed by the Lord, and anointed by the Holy Spirit. He was an uneducated man, yet appears to have succeeded in gaining the ear of several theologians and persons of high rank. In 1580 Elisabeth issued a proclamation against the sect, and directed an inquiry to be made into their practices. They seem to have attracted considerable notice at that period, and accusations of all kinds were brought forward against them. Their books were ordered to be burnt in October, 1580. In 1604 they presented a petition to James I, to clear themselves from the imputations laid against them. From this time their numbers diminished, but they were not extinct even as late as 1654. King James I, in his Besleclio éçáwara, calls them insfem anabaptistorum sectam, quo fiamen an-
oria vocant. A person named Ethebrington was made to recant as a Familist in 1627; but he does not appear to have held precisely the same doctrine as the older Familists. See a subordination book by B. H. (John Boggs) entitled The Displaying of an horrible Sect naming them selfs the Family of Love (Lond. 1570); and Kneustub, Confusion of monstrous and horrible Herezes taught by H. W. etc. (Lond. 1579); Mosholm, Church History, cxxvi, § iii, pt. ii, § 25; Collier, Eccl. Hist. of England, v, 20; and others. Reforma, xlv. v. 20; yet truly, because its bond of union is spiritual, being the spirit of Christ. The basis of the Christian family is Christian marriage, or monogamy; the exclusive union of one man to one woman. The deepest ground of this union, and its true aim, without which Christian marriage and family are impossible, is the consciousness of an interest in Christ, or in the love of God in Christ, the source of individual sympathy, as well as of brotherly and universal love. Marriage has, in common with Christian friendship, the bond of tender sentiments; but the former is an exclusive bond between two persons of different sexes, whose personal identity is complete, so to speak, to the exclusion of all others. It is therefore a lifelong relation, while friendship may be only temporary. See Marriage.

The persons thus joined in marriage lay the foundation of a Christian family; indeed, they constitute the family, through a process of development. It awaits its completion in the birth of children. In proportion, however, as the married couple live in a state of holiness, so are the natural desires for issue and their gratification made subservient to the divine-ly ordered end of the marriage, and accompanied by a sense of duty on the part of the family. In this the family was the model of the monarchy, the earliest, as well as the simplest, form of government. When, by the birth and growth of children, and the death of the father, the original family is broken up into several, the heads of which stand to each other in a co-ordinate rather than a subordinated relation to one another, the branches of the family being the prototypes of the more advanced forms of government. Each brother, by becoming the head of a separate family, becomes a member of an aristocracy, or the embodiment of a portion of the sovereign power, as it exists in the separate constituent parts of a democratic government is composed. But at Rome the idea of the family was still more closely entwined with that of life in the state, and the natural power of the father was taken as the basis not only of the whole political, but of the whole social organization of the people. Among the Romans, as with the Greeks, the family included the slave as well as the wife, and ultimately the children, a fact which, indeed, is indicated by the etymology of the word, which belongs to the same root as frater, a slave. In its widest sense, the familia included even the intimate possessions of the citizen, who, as the head of a house, was his own master (fundus juris); and Gaius (ii, 102) uses it as synonymous with patriumion. In general, however, it was confined to persons—wife, children, grandchildren, and great-grandchildren, if such there were, and slaves of a full-born Roman family were members of the family, and under the potestas of a common ancestor, had he been alive. In this sense, of course, the slaves belonging to the different members of the family were not included in it. The latter was a family in short, in the sense in which we speak of the royal family, etc.; with this difference, that it was possible for an individual to quit it, and pass into another by adoption. Sometimes, again, the word was used with reference to slaves exclusively, and, analogously, to a sect of philosophers, or a body of gladiators. See Smith's Dictionary of Greek and Roman Antiquities.
climb the height of his knowledge—his virtual omniscience; nor can it conceive of a diviner guarantee than his promise. To see its parents bend in worship, and to hear them speak with holy awe of their Father in heaven, is itself solemn and suggestive as a ladder set up from the earth to heaven. The serenity and discipline, too, which leads the parent kindly to repress its selfish desires, and constantly to aim at its moal welfare, invariably begets in return the highest order of filial love and confidence; evincing the power of the child to discriminate between instinctive and moral affection, and preparing him to enter the true heart of the family, the centre around which all meet again, from whence they derive light and warmth, and whose genial influences will be felt through life. From the bosom of such a family the spirit of Christianity goes out with its healthful influence into the Church, the State, the school, and the material world.

See generally the writers on moral philosophy and Christian ethics, and especially Herzog, Real-Encyclopædie iv. 318; Rothe, Theolog. Ethik, iii. 605; Schaff, Apostolical Age, § 111; Harris, Patriarchy, or the Family (London. 1855, 5vo); Anderson, Lemma and Design of the Domestic Constitution (Edinb. 1826, 8vo); Thiersch, Ueber christliches Familienleben (4th ed. Frankf. 1859; translated into several languages).

Family, Holy. One of the most favorite themes of Christian art, from its earliest period in the Catacombs, has been the presentation of scenes from the infancy and childhood of the Saviour. The name 'Holy' is given especially to those paintings and sculptures in which the parents, Joseph and Mary, are worshiping the infant Saviour, or are holding him up for the adoration of spectators. In a wider sense, it is also applied to the birth of the Saviour, the adoration of the magi, of the shepherds, and of the mythical three stages, to the flight into Egypt, and the finding of Christ in the Temple disputing with the doctors, and all other scenes from the childhood of Christ that are drawn from the gospels. Accessory figures of angels, saints, and of persons contemporary with Christ or with the artist, and sometimes of the artist or the donor of the painting to the church, are often added. (G. F. C.)

Family of Love. See Family.

Family prayer. See Family; Prayer; Worship.

Famine (properly פָּדָה, pādāh, λείπειν, lēipein, whether of individuals or of nations). "In the whole of Syria and Arabia, the fruits of the earth must ever be dependent on rain; the wadis have few large springs, and the small rivers not being sufficient for the irrigation of even the level lands. If, therefore, the heavy rains of November and December fail, the crops are insufficient; in a season that this spirit inclined Him much more to serve others than to have them serve Him, and he will not be satisfied by rewarding his servants with wages only, but with all the spiritual blessings of which the family is the proper sphere. They should take part in the family worship, and even an active part, as in reading, singing, praying. The more they come to partake in the life of the family, in its interests, its joys, its griefs, and receive from it the sympathy and help they require, either for the body or the mind, the more does the grant of these goods lead a really Christian family.

The entire life of the Christian family is a continuous act of worship in the more extended sense of the word, and must gradually become more and more so, since all its actions are done in the name of Christ and for the glory of God. This thoroughly Christian conduct is put into practice by several characteristics of the family worship in the proper sense, in which the family, as such, seeks for strength in the Word and in the spirit of God. The more perfectly this family worship is organized, the more will it resemble public worship, consisting, like it, in the reading and expounding of the word, in prayer, singing, and prayer. The reader in the religious exercises of the family should be the father, as priestly head of the house.

This, however, is not to exclude the co-operation of the mother, children, and other members of the family; their participation, on the contrary, adds much to the interest of the service, and makes it an admirable supplement to public worship, as in the family the feeling of trust in each other and of self-dependence add much to liberality and the spirit of sacrifice."

'Egypt, again, owes all its fertility—a fertility that gained for it the striking comparison with the 'garden of the Lord'—to its mighty river, whose annual rise inundates nearly the whole land, and renders its cultivation an easy certainty. But this very bounty of nature has not unfrequently exposed the country to the opposite extremes of drought. With scarcely any rain, and that only on the Mediterranean coast, and with wells only supplied by filtration from the river through the limestone, a failure disastrous in the western deserts certainly entails a degree of scarcity, although if followed by cool weather, and if only the occurrence of a single year, the labor of the people may in a great
FAMINE

measure avert the calamity. The causes of death and famine in Egypt are occasioned by defective inundation, preceded, and accompanied, and followed by prevalent easterly and southerly winds. Both these winds draw up the eastern edge of the lake, leaving on the north, the rather chief cause of the defective inundation, as they are also by their accelerating the current of the river—the north- easterly winds producing the contrary effects. Famines in Egypt and Palestine seem to be affected by droughts and plenty. A very small extent of Egypt, through the influence of Egypt, as far as the highlands of Abyssinia.

"It may be said of the ancient world generally that it was subject to periodical returns of death, often amounting in particular districts to famine, greatly bey- ond what is usually experienced in modern times. Various causes of a merely natural and economical kind contributed to this, apart from strictly moral con- siderations. Among these causes may more especially be mentioned the imperfect knowledge of agriculture which prevailed, in consequence of which men had few resources to stimulate crops of late harvests, or to make localities aid, the productive powers of nature; the defective means of transit, rendering it often impossi- ble to relieve the wants of one region, even when plenty existed at no great distance in another; the despotic governments, which to so great an extent chanced to be at the mercy of the fury of storms and skill; and the frequent wars and desolations, in a great degree also the result of those despotic governments, which both interrupted the labors of the field and after- wards wasted its fruits. Depending, as every return- ing harvest does, upon the meeting of many con- ditions in the soil and climate, which necessity vary from season to season, it was inevitable that times of scarcity should be ever and anon occurring in particular regions of the world; and from the disadvantages now referred to, under which the world in more remote times was labor, it was equally inevitable that such times should often result in all the horrors of fam- ine."

The Scriptures record several famines in Palestine and the neighboring countries. The first occurs in Gen. xii, 10, which is described as so grievous as to compel Abraham to quit Canaan for Egypt (Gen. xxvi, 1). Another occurred in the days of Isaac, which was the cause of his removal from Canaan to Gerar (Gen. xxvi, 17). The most remarkable one was that of seven years in Egypt, while Joseph was governor. It was distinguished for its duration, extent, and severity. It was one of the countries least subject to such a calamity, by reason of its general fertility. The ordinary cause of famine in Egypt is connected with the annual overflow of the Nile. But it would appear that more than local causes were in operation in the case noticed in Gen. xii, 10, for it is said that "the famine was sore in all lands," that "the famine was over all the face of the earth." By the foresight and wisdom of Joseph, however, provision had been made in Egypt during the seven preceding years of plenty, so that the people of other parts sought and received supplies in Egypt—"all countries came into Egypt to buy corn." Among other lands, Canaan suffered from the famine, which was the immediate occasion of Jacob sending his sons down into Egypt, and of the settlement in that land of the descendants of Abraham; an event of the highest consequence in the history of this people, and a parallel to the sending of Joseph, and at the same time enables us to form an idea of the character of famines in the East. The famine of Samaria resembled it in many particulars; and that very briefly recorded in 2 Kings viii, 1, 2, af- fords another instance. Among the peculiar rains which fall upon the Asiatic chains. These rains depend upon climatic laws of wide extent and great regularity. Yet there is scarcely a land on the earth in which famine has raged so often and so terribly as in Egypt, or a land that so very much needs the measures which Joseph adopted for the preservation of the people. The swelling of the Nile a few feet above or below what is necessary proves alike de- structive. A particular instance in familiar history has hand down to us are truly horrible, and the accounts of them are worthy of notice also, inasmuch as they present the services of Joseph in behalf of Egypt in their true light. Abbaddatif relates thus: "In the year 506 (A.D. 1195), the height of the flood exceeded the usual rule, and was small at Memphis, though very ample, through the dominion of Egypt, as far as the highlands of Abyssinia."

(See the account of this famine translated in the Am. Bibl. Repos. 1832, p. 635 sq.) Compare with this account the famines mentioned in the talmudic (Gen. xli, 6). "Of the horrors of this second year's famine, the year of the Flight, 507 (A.D. 1200), Abdol- latif, who was an eye-witness, likewise gives a n o t interesting account, stating that the people throughout the country were driven to the last extremities, eating offal, and even their own dead, and mentions, as an in- stance of the dire straits to which they were driven, that persons who were burnt alive for eating human flesh were themselves, thus ready roasted, eaten by others. Multitudes fled the country, only to perish in the desert—six to Palestine."

"But the most remarkable famine was that of the reign of the Fattimi Khalif, El-Mustansir bil'lah, which is the only instance on record of one of seven years' duration in Egypt since the time of Joseph (A.H. 457-464, A.D. 1064-1071). This famine succeeded in severity all others of modern times, and was aggravat- ed by the anarchy which then ravaged the country. Vehement drought and pestilence (sees Es-Suyuti, in his Itom el-Makhdarah, MS.), continued for seven con- secutive years, so that the [people] ate corps, and animals were died of themselves; the cattle per- ished; a dog was sold for five dinars, a sheep for four dinars... and an ardebil (about 8 bushels) of wheat for 100 dinars, and then it failed altogether. He adds that all the horses of the Khalif, save three, perished, and gives numerous instances of the straits to which the wretched inhabitants were driven, and of the organized bands of kidnappers who infected Cai- ro, and caught passengers in the streets by ropes furn- ished with hooks and let down from the houses. This account is confirmed by El-Mukri (in his Histat: Quatrebien has translated the account of this famine in the life of El-Mustansir, entitled "Geographiques et Historiques sur l'Egypte," from whom we further learn that the family, and even the women of the Khalif fled, by the way of Syria, on foot, to escape the peril that threatened all ranks of the popula- tion. The whole narrative is worthy of attention, since it contains a parallel to the sending of Joseph, and the services of Joseph, and at the same time enables us to form an idea of the character of famines in the East. The famine of Samaria resembled it in many particulars; and that very briefly recorded in 2 Kings viii, 1, 2, af- fords another instance. Among the peculiar rains which fall upon the Asiatic chains. These rains depend upon climatic laws of wide extent and great regularity. Yet there is scarcely a land on the earth in which famine has raged so often and so
FAN

481

FANATICISM

come upon the land seven years. And the woman arose, and did after the saying of the man of God: and she went with her household, and sojourned in the land of the Philistines seven years." Bunsen (Egypt's Place, etc., ii, 334) quotes the record of a famine in the reign of Secestereson I, which he supposes to be that of Joseph; but it must be observed that the instance in point is expressly stated not to be inspired by the whole land, and is at least equally likely, apart from chronological reasons, to have been that of Abra- ham.

"In Arabia, famines are of frequent occurrence. The Arabs, in such cases, when they could not afford to slake their thirst outside, would drink the blood, or mix it with the shorn fur, making a kind of black pudding. They ate also various plants and grains, which at other times were not used as articles of food. Thus the tribe of Hafiteh were taunted with having a famine king, which consisted of a dish of dates mashed up with clarified butter and a preparation of dried curds of milk (Stahā, M.I.)."

Famine is likewise a natural result, in the East, when caterpillars, locusts, or other insects destroy the produce of the land, the people being thus reduced to a miserable existence. The prophet Joel compares the locusts to a numerous and terrible army ravaging the land (ch. I). Famine was also an effect of God's anger (2 Kings viii, 1, 2). The prophets frequently threaten Israel with the sword of famine, or with war and famine, evils which frequently go together. Amos threatens (Amos viii, 11) that Jesus will come to the land, not as a famine of bread, nor as a thirst for water, but of hearing the words of the Lord" (Amos viii, 11). In ancient times, owing to the imperfect modes of warfare in use, besieged cities were more frequently reduced by famine than by any other means, and the persons shut up were often reduced to the necessity of devouring not only unclean animals, but also human flesh (compare Deut. xxviii, 22-42; 2 Sam. xxvi, 1; 2 Kings vi, 25-28; xxvii, 8; Jer. xiv, 15; xix, 9; xilii, 17; Ezek. v, 10-12, 16; vi, 12; vii, 18).

The famine foretold by the prophet (Amos xi, 28) was the same with that which is related by Josephus (Ant. xx, 2, 6) as having taken place in the fourth year of Claudius, and affected especially the province of Judea. (See Kuijln, Comment. proleg.). See Death.

FAN (fan, fann, φαν) a wind％snowed, with which grain was blown upon the wind, in order to cleanse it from the broken straw and chaff (Isa. xxiv, 23; Jer. xv, 7; Matt. ii, 11; Luke ii, 17; see Agriculture). At the present day, in Syria, the instrument used is a large wooden fork. (See Robinson's Researches, ii, 277, 571; Smith's Dict. of Class. Antiq. s. v. Pala.) Both kinds of instruments are delineated on the Egyptian monuments (Wilkinson, ii, 40-46). See Wind.

Fanaticism. (1.) The ancients primarily gave the name of fanatikos to those who uttered oracular announcements, or exhibited wild antics and gestures under the (supposed) inspiration of some divinity whose temples (fana) they frequented. The heathen seers, who pretended to prophecy under the guidance of an indwelling spirit (fanum), was called by the Greek writers iêthoc, and by the Latins fanaticus (see Suidas, s. v. Isôvus; Bingham, Orig. Eccles. xvi, 4). Thence the name was transferred to persons actuated by a frantic zeal in religion.

(2.) The word is sometimes improperly used to signify a blind and enthusiastic spirit in religious matters. It is equally applicable to any state of mind that is ApplicationDbContext, that is, "after rejecting from account that opprobrious sense of the word fanaticism which the virulent censorium of religion and of the religious assigns to it, it will be found, as we believe, that the elementary ideas attaching to the term in its manifold application is that of feticous fervor in religion, rendered turbulent, morose, or rancorous by junction with some one or more of the unsocial emotions. Or, if a definition as brief as possible were demanded, we should say that fanaticism is enthusiasm in religion." He classifies the chief varieties of fanaticism under four designations, of which the first will comprehend all instances wherein malignant religious sentiments turn inward upon the unhappy subject of them; the second class includes those who are long to be an object of fanaticism which looks abroad for its victims; the third embraces the combination of intemperate religious zeal with military sentiments, or with national pride and the love of power; to the fourth class must be reserved all instances of the more intellectual kind, and which stand connected with opinion and dogma. Our first sort, then, is sature, the second cruel, the third ambitious, and the fourth factious. Or, for the purpose of fixing a characteristic mark upon each of our classes as above named, let it be permitted us to entitle them as follows:—
The first, the spirit of persecution; the second, the spirit of intolerance or of personal infiction; the third, the fanaticism of the brand, or of Immmolation and cruelty; the fourth, the fanaticism of the symbol, or of creeds, dogmatism, and ecclesiastical virulence. (Fanaticism, p. 364.) See Jehovah, p. 114, 115.

The fanatic begins by rejecting the light of reason to abandon himself to the dictates of his fancy. He generally adopts some simple and exclusive ideas, which destroys the proper balance of his mind. This absorbing idea may have a religious truth, it may fasten itself upon him, and he will not divest it, if in another form, in others: he cannot admit that truth which has taken a certain shape for him may have taken another in the eye of his neighbor without ceasing to be true. He thus becomes exclusive, malevolent, and prone to persecution. The hatred of blood relations is more intense and fierce than that between strangers, and so the fanatic is all the more fierce and tyrannical against others in proportion as their views approach his own, without being identically the same. He will undergo any suffering rather than abate one jot of his claims, or retract a single jot of charity or mercy. He prefers darkness to light, the letter to the spirit, hatred to love, the wildness of passion to the calmness of inquiry. Fanaticism may show itself in all the relations of life, but its special field is found in politics and religion; and it becomes most dangerous when the two are combined. Being entirely one-sided, it is yet liable to go in the most opposite directions, and then goes all lengths. Thus we have in politics fanaticism of peace, who want peace at any cost, and under all circumstances; fanatics of unrest, who believe only in the overthrow of existing institutions; fanatics of progress, who think anything good if it is only new; and fanatics of the past, or conservatives, who wish to hold fast whatever is, no matter how bad it is: fanatics of liberty, who, however, require others to view liberty in the same light as they do, or else deny it to them; and fanatics of despotism, who wish all hearts to beat in unison, like so many well-regulated clocks. We find cosmopolitan fanatics, who glory in revelling their own country, and patriotic fanatics, who consider all other nations but their own as barbarian and heathen; the first is the spirit of faction, the second is the spirit of corruption, the third is the spirit of oppression, and the fourth is fanaticism of orthodoxy, who think the pope requires only might to make him perfect, and who pray for the re-establishment of the Inquisition and the stake. Fanaticism has left especially sad records of its excesses in the religious history of the world, not only among the heathen in India, the Moslems and the Jews, but also among Chris-
FARREL

I. The bloody encounters of the monks of Constantinople at the time of the controversy between the Eutychians and the Nestorians. It envenomed the quarrels of the Montanists and the Donatists. It perished the Jews in the Middle Ages. It organized the Inquisition, developed the methods of the early inquisitors (Laud, lixiv, 28), and invented a new sense for the words in Tit. iii. 10 (hæresiticum de vita); it instigated the crusades against the Albigenses, who, when they were indiscriminately massacred, were comforted with the assurance that "the Lord would know his own;" it aimed the dagger in the hands of Rasputin in the person of his king; it inspired the Te Deum of Gregory XIII as a thanksgiving for the massacre of St. Bartholomew's. In the Protestant world we find fanaticism in the Anabaptists of Münster, in the Crypto-calvinistic troubles, and in the wars of the Cavaliers and Roundheads of England (Beck, in Herzog, Real-Encyclop. iv, 297 sq.). "Fanaticism is the most incurable of all mental diseases, because in all its forms—religious, philosophical, or political—it is distinguished by a sort of mad contempt for experience, which alone can correct errors of practical judgment" (Machine, Works, London, 1802, i, 671). See also Stillingfleet, Works, v. 19, 92, 130; Fletcher, Works (N. Y. ed.), iv, 283 sq.

FARREL or FANNO, FAVENTINO, a native of Padua, in Italy, one of the first martyrs of the Reformation in Italy. The Scriptures in Italian (probably Brucoli's version, 1532) fell into his hands, and he soon began to speak of the truth to his neighbors. When the ecclesiastical authorities heard of his course they arrested and imprisoned him. His wife and family came to him with entreaties and tears when first apprehended, and he yielded to their persuasions to gain his release from prison by recantation. Under the threat of death he continued to confess Christ openly, and he went publicly through Romagna preaching the Reformed doctrines. He was arrested at Bagni Cavallo, and condemned to the stake. He was removed to Ferrara, where, for eighteen months, persuasion, promises, and tortures were used in vain to induce him to recant. Soon after the accession of pope Julius III a brief was issued for the execution of Fanino. He embraced the messenger, saying, "I accept death joyfully for Christ's sake." Being urged to recant for the sake of his wife and children, whom he was about to leave without a protector, he refused, and the pope recommended the care of the best of the guardians." "What guardian?" "Jesus Christ! I think I could not commit them to the care of a better." He was ironed, and led out to execution; and on the way, being reproached by his enemies for his cholersomeness, when Christ was exceeding sorrowful at the approach of death, he answered, "Christ sustained all manner of pangs and conflicts with death and hell on our account, and by his sufferings freed those who really believe in him from the fear of them." He was strangled at dawn, and his body was burned at noon, in September, 1550. — Young, Life of Aonio Paladino (1860, ii, 111); M'Crie, Reformation in Italy, ch. v.

FANNO. See FANNO.

Fan-tracey. vaulting. "a kind of vaulting used chiefly in late Perpendicular work, in which all the ribs that rise from the springing of the vault have the same pitch and diverge equally in every direction, producing an effect somewhat like that of the bones of a face. This kind of vaulting admits of considerable variety in the subordinate parts, but the general effect of the leading features is more nearly uniform. It is very frequently used over tombs, chantry chapels, and other small erections, and fine examples on a larger scale exist at Henry the Seventh's Chapel; St. George's Chapel, Windsor; King's College Chapel, Cambridge, etc., in England. "Farel, Guillaume, one of the boldest pioneers of the Reformation in Switzerland and France, was born near Gap, in Dauphiny, in 1489. He studied at Paris with great success, and was for some time teacher in the college of cardinal Le Meine, to which post he was made a canon, recommended by Le Meine's chaplain, Jean Bull. At the accession of Charles V. he was made rector of St. Paul, and in 1529, bishop of Neufchatel. Guillaume became the leader of the Reformation in Lorraine. This period of his life he had no personal religious convictions; but yet, while devoted with a love of letters, he was zealous in the service of the Roman Catholic Church. But he was led, under the influence of Lefèvre, the translator of the Scriptures, about 1521 he went to Meaux, at the invitation of Lefèvre, and the bishop (Briçonnet, q. v.) gave him authority to preach. His mind was now fixed substantially in the Reformed doctrine, and he preached, perhaps, with more zeal than discretion; and in 1529, Briçonnet, now his chief temporal, sent him to Strasbourg as a young preacher. He soon found it best to retire to Switzerland. At Basel, Feb. 15, 1524, he sustained publicly thirteen theses on the chief points in controversy (Themata quaedam Latina et Germnicae proposita, Basel, 1526). During his few months' stay at Basel he visited the chief cities of the Swiss cantons, and became a sort of friend of Myconius, Haller, and Zwingli. At Basel, Ecolampadius was his warm friend, adorning his zeal and energy, but, at the same time, not unsparing of his lack of discretion. Farel was soon involved in a dispute with Eramus whoseMedianizing tendency was just the opposite of his own ardent and decided nature. He compared Erasmus to Balsam; but the scholar soon proved too strong for the young reformer, who was compelled to leave Basel. In one of his later letters, Erasmus says of him (Épist. p. 798, ed. Lond.): "You have in your neighborhood the new evangelist Farel, than whom I never saw a man more false, more virulent, more sedulous." But the abuse of Erasmus could not, in the long run, injure Farel. Towards the end of March, 1524, Farel went to Strasbourg, where he made the friendship of Bucer and Capito. Under the direction of Ecolampadius, he was admitted to a newly-formed society at Montédialard. Here he preached successfully, but yet with great violence. Once, on a procession day, he pulled out of the priest's hand the image of St. Anthony, and threw it from a bridge into the river; he narrowly escaped being torn to pieces by the enraged mob, because of his vehemence of language and Eloquence censured him for his impudence (see Correspondance des Réformateurs, Paris, 1866, i, 265). Leaving Montédialard in the spring of 1526, he spent a short time at Basel, and the next year partly in Alsace and partly in Switzerland. In 1527 he went to Aigle, and in 1528, when Berne became Protestant, he extended his labors to all the territory connected with Berne. Under his labors, Aigle and Bex became Protestant in 1528-9; Morat and Neuchâtel in 1530; Orbe in 1531. His labors during these years were not only vast, but perilous; but the government of Berne gave him strong and steady support. In 1581 he was sent as a deputation (with a. Saunier) to the Waldensian Synod at Angrogne. He always retained great influence among the Waldenses. In 1596, on his return from the Waldensian meeting, he came to Geneva, then full of religious strife. His first preaching was private, but it was too successful to be kept secret; and he was summoned before the episcopal council, at the time trembling for its authority, and therefore the more likely to severe. The meeting was adjourned; it was a session of confessions, and when Farel was leaving a gun was fired at him. He coolly remarked, "Your shots
do not terrify me." But he was forced to quit Gene-
va for the time, and sent from Montreux and Olivetan
to continue the work there. In 1588 he returned to Ge-
nea, where the Reformation was gaining ground.
Farel's situation here was full of trial and peril, but
his courage and devotion admirably fitted him for his
work. He urged his mother, when the city council,
by an edict, formally proclaimed the adhesion of
Geneva to the Reformation. Farel was full of toil
and anxiety in organizing the Reformed discipline
and worship, in which he was assisted especially by Viret
(q. v.). In 1586, Calvin stopped at Geneva to visit
the council, urged them to receive and, on Calvin's
refusal, thus addressed him: "I declare, in the name
of God, that if you do not assist us in this work of
the Lord, the Lord will punish you for following
your own interest rather than his call." Calvin,
struck with this denunciation, submitted, and was
appointed preacher and professor. See CALVIN. From
that time on Farel's labors were closely united with
those of Calvin. The confession of faith drawn up
by Farel, with Calvin's counsel, was approved by the
people in July, 1557. The same year the Council of
Geneva ordered Farel the bishop of the Burst, or city,
token of their respect and gratitude. But
the popular will was not prepared for the severe dis-
cipline of the Reformers, and in a short time the peo-
ples, under the direction of a faction, met in a public
assembly and expelled Farel and Calvin from the place.
Farel went to Neuchâtel, where the Church was in a state of disorder, in consequence of the troubles occasioned by the severity of the Re-
formed discipline. He dealt with offenders severely;
even a lady of noble birth did not escape. She had
left her husband; Farel urged her to return to him,
and on her refusal published the scandal and its author
publicly from the pulpit. A great strife arose, and
the people were on the point of expelling Farel; but
his energy overcame the factious party, and the council by vote, in 1542, proclaimed his triumph.
In that year he returned to Geneva, and went thence
to Metz, to organize the Reformed Church. He
preached first in the Dominican cemetery, amid the
ringing of the convent bells purposely to drown his
voice. Thousands afterwards flocked to hear him.
Once, when a Franciscan was preaching Mariolatry,
Farel contradicted him, and nearly fell a victim to the
fury of the mob, especially of the women. On Oct. 2,
1542, the council forbad his preaching in the city,
and he retired to the neighboring town of Montigny;
and afterwards to Gorze, where the count of Faretsem-
berg took him and his friends under his protection.
On Oct. 30, 1543, an armed band of preachers, among them
egalicia while celebrating the Easter communion.
Many were killed and wounded; among the latter
was Farel, who took refuge in the castle. He escaped
disguise, and went to Strasbourg, where he remain-
ed a few months. He then visited his old friends in
Neuchâtel and Geneva. Here he approved the exe-
cution of Servetus (q. v.). In 1557 he was sent, with
Beza, to the Protestant princes of Germany, to implore
their aid for the Waldenses, and on his return he went
advised the Reformation among the Jura Mountains.
At sixty-three he married a young widow.
Calvin's disgust, who spoke of him under the circum-
stances as our poor brother (père frère). In 1560 he
visited his native Dauphiny, established a Reformed
Church at Grenoble, and passed several months at
Gap, preaching against Rome with all the vehemence of
his hands. He returned to Geneva on Nov. 24, 1561, was
thrown into prison, but was rescued by his friends, who took him from the rampart in a basket. In 1564 he paid a visit
to the dying Calvin, and then passed some months with
his old flock at Metz. He returned to Neuchâ-
Tel torn out with fatigue, and died there Sept. 15, 1566.
Farel was an ardent, impulsive man, a missionary,
rather than an organizer, an iconoclast rather than a
theologian. His gifts admirably supplemented those of Calvin. Beza (Life of Calvin) says of Farel that
in his preaching "he excelled in a certain subtlety,
so that none could hear his thunders without trem-
bbling." Among his writings are sommaires; brevies
declaration d'ailleurs bien fort nécessaires a un chacun
Christien (Geneva, 1555); when the city council,
by an edict, formally proclaimed the adhesion of
Geneva to the Reformation. Farel was full of toil
and anxiety in organizing the Reformed discipline
and worship, in which he was assisted especially by Viret
(q. v.). In 1586, Calvin stopped at Geneva to visit
the council, urged them to receive and, on Calvin's
refusal, thus addressed him: "I declare, in the name
of God, that if you do not assist us in this work of
the Lord, the Lord will punish you for following
your own interest rather than his call." Calvin,
struck with this denunciation, submitted, and was
appointed preacher and professor. See CALVIN. From

Tel torn out with fatigue, and died there Sept. 15, 1566.
Farel was an ardent, impulsive man, a missionary,
rather than an organizer, an iconoclast rather than a
all from us, and well-nigh left us naked." He died at his house in Milk Street in September, 1638. Three posthumous volumes of his sermons (folio) were published (1686-1670) in 1688, a second folio volume of his sermons conceived as a third in 1678 containing fifty. He also left in manuscript several memoirs of the life of Hales (q. v.) of Eton, his intimate friend. A new edition of his Sermons, with a Life of the Author by F. Jackson, appeared in London in 1849 (1 v., 8vo). They afford a fine specimen of English, and of rich and varied elocution. See Wood, Athenae Oxonienses; Hook, Ecclesiastical Biograpy, v, 57; Jackson, Life of Farissol, prefixed to the new edition of his sermons.

Farissol or Farissol, Abraham ben-Mordecai, a French Rabbi, distinguished alike in geography, polemics, and exegesis, was born at Avignon about the middle of the 16th century. In 1472 he went to Ferrara as minister to a Jewish congregation, and while there gave most of his time and attention to the study of the sacred writings. He published in 1500 a commentary on the Pentateuch, entitled ספר המים (the flower of lilies), which, according to De Rossi, was begun in 1486. Next followed an apologetic and polemic work, ספר המשה (the shield of Abraham), consisting of three parts, of which the first is an apology against Judaism, the second on Muhammadanism, and the third against Christianity. About 1517 he published a scholarly commentary on Job, ובב (Job), printed in the Venetian Rabbinical Bible (1517, fol.), and in the Amsterdam Rabbinical Bible (edited by Frankfurter, 1727-1728). In 1524 he published his famous cosmography, ספרFirestore (the book of geograph), translated and published in English by John Stow (London, 1539). In this last-named work Farissol describes the abodes of the ten tribes, the Sabaot (Elлад), and the garden of Eden, which he places in the mountains of Nubia (ch. xvii and xxx). A year later Farissol completed a Commentary on the book of Ecclesiastes, ספר התנין (the book of Proverbs), which has, however, never been printed. He died about the end of 1528, shortly after his return to Avignon, where he died, Greek, des Jésuites aux s. Scènes, ii, 129; Etheridge, Intro. to Heb. Liter. p. 458; Hoefer, Nouv. Biog. Générale, xxxii, 614; Ritto, Cyclopaedia, ii, 4; Furst, Bib. Jud. i, 376. (J. H. W.)

FARM (דופן, elsewhere usually rendered "field"), a plot of arable land (Matt. xxii, 5). Moses, following the example of the Egyptians, made agriculture the basis of the Hebrew state. He accordingly ap- portioned to every Hebrew a certain quantity of land, and gave him the right of tilling it himself, and of transmitting it to his heirs (Num. xxvi, 33-54). This equal distribution of the soil was the basis of the Hebrew agrarian law. As in Egypt the lands all be-longed to the king, the Hebrews were not the proprietors of the fields which they cultivated, but farmers or tenants who were obliged to give to the king one fifth of their produce (Gen. xlvii, 20-25), just as Moses represents Jehovah as the sole possessor of the soil of the Promised Land, in which he was about to place the Hebrews by his special providence; and this land they held independent of all temporal superiors, by direct tenure from Jehovah their king (Lev. xxv, 23). Moses further enacted that for the land the Hebrews should pay a kind of quit-rent to Jeho- vah, the sovereign proprietor, in the form of a tenth or tithe; and a special and emporium at the priest's house. The condition of military service was also at- tached to the land, as it appears that every freeholder was obliged to attend the general muster of the national army, and (with few exceptions, Deut. xx, 5-9) to serve in it, at his own expense, as long as the occasion required. The Hebrews appear to have acquired in Egypt considerable knowledge of agriculture; but the physical circumstances of the land of Canaan were so many respects essentially different, as it was a land rarely refreshed with rain as Egypt (Deut. v, 10-15). The Hebrews, notwithstanding the richness of the soil, endeavored to increase its fertility in various ways. In order to avert the aridity which the summer drought so often occasioned, they dug water-courses and means of aqueducts communicating with the brooks, and thereby imparted to their fields a garden-like ver- dure (Psa. i, 8; lxv, 10; Prov. xxii, 1; Isa. xxxii, 2, 20). In the hilly part of the country terrace cultivation was practiced, so that the hills otherwise barren were rendered fertile (Deut. xxi, ii; Psa. liii, 16; cv, 10; Isa. xxx, 25). With the use of manure the Hebrews were undoubtedly acquainted; and that the soil might not be exhausted, it was ordered that every seventh and every fiftieth year the whole land should lie fallow. The dung, the carcasses, and the blood of animals were used to enrich the soil (2 Kings ix, 57; Psa. lxxii, 10; vii, 2; Jer. ix, 22). Salt, either by itself, or mixed in the dunghill in order to promote putrefaction, is specially mentioned as a compost (Matt. v, 18; Luke xiv, 54, 56). The soil was enriched also, by means of the ashes of burnt sacrifices, and the ashes of corn, brambles, grass, etc., that overspread the land during the fallow or sabbatical year, were reduced by fire. The burning over the surface of the land had also the good effect of destroying the seeds of noxious herbs (Prov. xxv, 8; Isa. xxx, 10). The soil of Pal- estine is very fertile, if the Jews of long spring, and the rains of autumn and winter are not witheld. "Never- theless," observes Hengstenberg, "it is to be con- sidered that the Canaan of which Moses speaks is in a manner an ideal land. It was never what it might have been, since the bond of allegiance, in conse- quence of which God had promised to multiply it and its rain in its season, was always far from being perfectly complied with." Among the Hebrews the occupation of the husbandman was held in high honor, and even distinguished men disdain not to put their hands to the plough (1 Sam. i, 6-7; 1 Kings xix, 19; 2 Chron. xxvi, 10). The system in which agriculture was held diminished as luxury increased, but it never wholly ceased; even after the exile, when many of the Jews had become merchants and mechanics, the easteem and honor attached to this occupation still continued, especially under the dynasty of the Ptolomies, who were agriculturists from religious motives. See LAND.

In ancient Egypt, the peasants or husbandmen, like the modern felâhs of the same country, seem to have formed a distinct class, if not caste, of society (Wilkin- son, Anc. Egypt., ii, 1, 2). The government did not interfere directly with the peasants respecting the nature of the produce they intended to cultivate, and the vexations of later times were unknown under the Pha- raohs. They thought to have the best opportuni- ties of obtaining, from actual observation, an accurate knowledge on all subjects connected with hus- bandry; and, as Diodorus observes, "being from their infancy brought up to agricultural pursuits, they far excelled the husbandmen of other countries, and had become acquainted with the capabilities of the land, the mode of cultivation, and the times to sow, reap, and reap, as well as all the most useful secrets connect- ed with the harvest, which they had derived from their ancestors, and had improved by their own experience." "They rented," says the same historian, "the arable lands belonging to the kings, the priests, and the milita- rary class, which was not a small sum; and empty a great part of the time in the tillage of their farms;" and the laborers, who cultivated land for the rich peasant, or other land- owners, were employed by the steward or owner of the estate, who had authority over them, and
the power of condemning delinquents to the bastinado. This is shown by the paintings of the tombs, which frequently represent a person of consequence inspecting the tillage of the field, either seated in a chariot, walking, or leaning on his staff, accompanied by a favorite dog. To one officer were intrusted the affairs of the house, answering to "the ruler," "the overseer," or "the steward of Joseph's house" (Gen. xxxix, 5; xliii, 16, 19; xlv, 1); others "superintended the granaries" (Isa. iii, 10).

At the present day the lower orders in Egypt, with the exception of a very small proportion, chiefly residing in the large towns, consist of fellahin (or agriculturists). Most of those in the great towns, and a few in the smaller towns and some of the villages, are petty tradesmen or artificers, or obtain their livelihood as servants, or by various labors. In all cases their earnings are very small; barely sufficient, in general, and sometimes insufficient, to supply them and their families with the cheapest necessities of life. Their food chiefly consists of bread (made of millet or of maize), milk, new cheese, eggs, small salted fish, cucumbers and melons, and gourds of a great variety of kinds, onions and leeks, beans, chick-pea, lupins, the fruit of the black egg-plant, lentils, etc., dates (both fresh and dried), and pickles. Most of the vegetables they eat in a crude state. When the maize (or Indian corn) is nearly ripe, many ears of it are plucked, and toasted or baked, and eaten thus by the peasants.

It is too dear to be an article of common food for the fellahin, and flesh-meat they very seldom taste. It is surprising to observe how simple and poor is the diet of the Egyptian peasantry, and yet how robust and healthy most of them are, and how severe is the labor which they can undergo (see Lane, Moi. Egypt., 2:71).

Dr. Thomson thus describes the modern lower class of farmers in Palestine (Land and Book, i, 581 sq.):

"These farmers about us belong to el-Mugbar, and their land extends to the declivity immediately above Gennesaret, a distance of at least eight miles from our dwellings. Our farmers would find it hard to travel so far before they began the day's work, and so would these if they had it to do every day; but they drive their oxen before them, carry bed, bedding, and board, plow, yoke, and seed on their donkeys, and expect to remain out in the open country until their task is accomplished. The mildness of the climate enables them to do so without inconvenience or injury. How very different from the habits of Western farmers! These men carry no cooking apparatus, and, we should think, no provisions. They, however, have a quantity of their thin, tough bread, a few olives, and perhaps a little cheese in that leather bag which hangs from their shoulders — the 'script' of the New Testament — and with this they are contented. When hungry, they sit by the fountain or the brook, and eat; if weary or sleepy, they throw around them their loose coats, and lie down on the ground as contentedly as the ox himself. At night they retire to a cave, sheltering rock, or shady tree, kindle a fire of thorn-bushes, heat over their stale bread, and, if they have shot a bird or caught a fish, they broil it on the coals, and thus dinner and supper in one. we achieved with the least possible trouble. But their great luxury is smoking, and the whole evening is whiled away in whiffing tobacco and bandying the rude jokes of the light-hearted peasant. Such a life need not be disagreeable, nor is it necessarily a severe drudgery in this delightful climate. The only thing they dread is an incursion of wild Arabs from beyond the lake, and to meet them they are all armed as if going forth to war." See Agriculture.

Farmer, Hugh, a learned Independent minister, was born in 1714, near Shrewsbury, England. He studied under Doddridge, and gained in 1755 the pastorate of Nantwich, in Cheshire. In 1760 he was appointed, he became assistant to Mr. David Some. His services, however, proving acceptable to the Dissenters in the neighborhood of Walthamstow, a place of worship was soon built, and for many years he continued to reside there. He died Feb. 6, 1867.

Dr. Thomson describes the wandering fellahin and their precarious life in Syria, in Passages from the Life of Jesus in Syria, p. 213, etc., which is worth reading. See also Noah, Narrative of a Mission to the Sick, p. 70. See also the well-known and highly popular novel of Dr. Foster, The Amateur Naturalist, etc.

Dr. Thomson thus describes the modern lower class of farmers in Palestine (Land and Book, i, 581 sq.):

"These farmers about us belong to el-Mugbar, and their land extends to the declivity immediately above Gennesaret, a distance of at least eight miles from our dwellings. Our farmers would find it hard to travel so far before they began the day's work, and so would these if they had it to do every day; but they drive their oxen before them, carry bed, bedding, and board, plow, yoke, and seed on their donkeys, and expect to remain out in the open country until their task is accomplished. The mildness of the climate enables them to do so without inconvenience or injury. How very different from the habits of Western farmers! These men carry no cooking apparatus, and, we should think, no provisions. They, however, have a quantity of their thin, tough bread, a few olives, and perhaps a little cheese in that leather bag which hangs from their shoulders — the 'script' of the New Testament — and with this they are contented. When hungry, they sit by the fountain or the brook, and eat; if weary or sleepy, they throw around them their loose coats, and lie down on the ground as contentedly as the ox himself. At night they retire to a cave, sheltering rock, or shady tree, kindle a fire of thorn-bushes, heat over their stale bread, and, if they have shot a bird or caught a fish, they broil it on the coals, and thus dinner and supper in one. we achieved with the least possible trouble. But their great luxury is smoking, and the whole evening is whiled away in

whiffing tobacco and bandying the rude jokes of the light-hearted peasant. Such a life need not be disagreeable, nor is it necessarily a severe drudgery in this delightful climate. The only thing they dread is an incursion of wild Arabs from beyond the lake, and to meet them they are all armed as if going forth to war." See Agriculture.

Farmer, Hugh, a learned Independent minister, was born in 1714, near Shrewsbury, England. He studied under Doddridge, and gained in 1755 the pastorate of Nantwich, in Cheshire. In 1760 he was appointed, he became assistant to Mr. David Some. His services, however, proving acceptable to the Dissenters in the neighborhood of Walthamstow, a place of worship was soon built, and for many years he continued to reside there. He died Feb. 6, 1867. He published A Dissertation on Miracles (London, 1771, 8vo); An Inquiry into the Nature and Design of Christ's Temptation in the Wilderness (London, 1776, 8vo, 8d ed.); and An Essay on the Damnation of the New Testament (London, 1776, 8vo), in which he endeavored to prove that these were not cases of real possession, but of persons afflicted with epilepsy or madness. "This publication was answered by the late Mr. Fell, one of the tutors of Homerton Academy; and a controversy ensued, in which much acrimony of temper was discovered on both sides. Mr. Farmer was rather of a high spirit and hasty temper; but, abating these defects, he was a most estimable man," though he allowed himself larger liberty in speculation than was common in that age. Thus he interpreted the temptation of Christ as a vision, and demoniacal possession as a disease. See DEMONIAC. A clause in his will directed his manuscripts to be burned; among them was a treatise on Balaam, and a revised edition of his essays on miracles. See Dobson, Memoirs of Farmer (London, 1806, 8vo); Jones, Christian Biography, p. 145.

Farnsworth, Ellis, an English divine, was born in the parish of Benssall, Derbyshire, England, of which his father was rector, pursued his studies first at Chesterfield School, then at Eton, and then at Jesus College, Cambridge. In 1768 he was presented to the rectory of Carrington, in his native county, where he died in 1783. His works, which are all translations, are: 1. Life of Pope Sixtus V, from the Italian of Gregorio Leti, with Preface, etc. (London, 1754, fol., and Dubl., 1778, 8vo); — 2. A short History of the Israelites, from abe Fleury's Les Mours des Israelites (London, 1756, 8vo; new edition by Adam Clarke, Lond. 1805); — 3. The History of the Holy War, translated N. H., in 16 parts, 1662. The History of the Civil Wars of France, from the Italian of Davila (1775, 2 vols. 4to);— 4. The Works of Machiavelli, translated, with Notes, Anecdotes, and Life (1761, 2 vols. 4to, and 1775, 4 vols. 8vo), a work not appreciated during the life of the translator, but now commanding a high price (Driesser, Cultivation of Authors, London, and N.Y. 1859 p. 84). See Rose, New Gen. Biog. Dict., and Allibone, Dict. of Authors, s. v. (J. W. M.)

Farnovius (Stamnalis Farnovski or Farnovus), one of the principal Antitrinitarians of Poland, was a pupil of Peter Gonesius (q. v.). After residing for some time with the Socinians, he became in 1567 a vicar in the parish of Unorn, where he achieved, in one year, the task of teaching, in the true Arian sense, the subject of the Son to the Father, without, however, denying the pro-
existence of the supernatural part of his nature. The followers of his system are called Farnovians or Farnesian. Farnovius vigorously attacked the Socinian wing which maintained that Christ was essentially a man, but is to be worshipped as God since his ascension. He found it difficult, however, to retain the half-way position he had taken, and in the course of events most of his followers joined the main body of the Unitarians, especially when Socinus became the chief of that party. His own school vanished at his death, about 1614. — Herzog, Real-Encyclop. iv, 381; Zelter, Hist. Crypto-Sociniani, i, 1201; Rock, Hist. Andirintiariorum; O. Fock, Socinianismus, i, 155 sq.; Moisheim, Church History, iii, 242; Trechsel, Die protest. Andirintiarier, vols. i and ii.

Faroe Islands. See DENMARK.

Farquhar, Richard, an eminent composer of music, and regarded as one of the fathers of Church music in England, was born in the early part of the 18th century, and died about 1765. His name appears on the list of gentlemen of the chapel to Edward VI in 1564, and he was afterwards organist and master of the choristers of St. George's Chapel, Windsor. His compositions for the Church, simple as they seem, are so solemn, so devout, so tender, and affecting, that they may challenge comparison with the sacred music of any age or country (Pictorial Hist.). Many of his pieces are found in the collections of Boyce and Barnard. The best are, "Hide not thou thy face," "Call to rememberance," and "Lord, for thy tender mercy's sake." — Rose, New Gen. Biog. Dict.; Allibone, Dict. of Authors; Pictorial Hist. of England, iii, 682 (Chambers's ed.). (J. W. M.)

Farthing is the rendering in the Auth. Vers. for two Roman coins of different values. See Money.

1. The assarius (Greekized ἀσσαίρος, Matt. x, 29; Luke xii, 6), properly a small as, assarium, but in the time of our Lord used as the G. equivalent of the Lat. as. In the texts cited it is put (like our "a copper") for any trifling amount. The Vulg. in Matt. x, 29 renders it by as, and in Luke xii, 6, puta dispensas for two assaria, the dispensas or dispensa being equal to two asses. The ἀσσαίρος is therefore either the Roman as, or the more common equivalent in Palestine in the Greco-Roman series, or perhaps both. The rendering of the Vulg. in Luke xii, 6 makes it probable that a single coin is intended by two assaria, and this opinion is strengthened by the occurrence, on coins of Chios, struck during the imperial period, but without the heads of emperors, and therefore of the Greek autonous class, of the words ACCAPION, ACCAPIA AYO, ACCAPIA TPIA. The half assarium of the same island has also been found, yet it is of the same size as the full assarium (Akerman, Numismatic Illustrations of the New Testament, p. 7).

The ass as a copper coin, the Roman unit of value for small sums, equal to a tenth of the denarius or diacronio, i.e. 1/10 cent (Smith's Dictionary of Classical Antig., s. v. As). See Penny.

2. The quadrans (Greekized ἀπαίροιντος, Matt. x, 26; Mark xii, 42), the fourth of an as, equal to two leptai (Mark, l. c.), a small copper coin, equal nearly to two fifths of a cent. The name quadrans was originally given to the piece of three ounces, therefore also called tetrans. Hence it bore three balls as its distinctive mark (Kitto, Pictorial Bible, note on Mark, I. c.). The leptai, αὐτός, was originally a very small Greek copper coin,

seven of which with the Athenians went to the γαλατεία, or bronze piece. The copper currency of Palestine, in the reign of Tiberius, was partly of Greek coins, partly of Greek-Roman (technically Greek Imperial). In the former class there was no common piece smaller than the as, equivalent to the ἀσσαίρος of the N. T. (above), but in the latter there were two common smaller pieces, the one apparently the quarter of the ἀσσαίρος, and the other its eighth, though the irregularity with which they were struck makes it difficult to pronounce with certainty; the former piece was doubtless called the κορφάρχος, or quadrans, and the latter the ἅλφιον, or leptai. See Mite.

Fascination. See Charm.

Fassari, Vincent, a Sicilian theologian, was born in Palermo in 1609, and died in the same city in 1668. He became a Jesuit in 1614, and taught successively belles-lettres, philosophy, theology, and the Scriptures. Of his religious and philosophical works, the most important are Disputationes philosophicae, de quantitate, ejusque Compositione, Essentia, etc. (Palermo, 1644, fol.); and Immortalitatem Deiperson Consecratio theologicae Communionis trinitatis ( Lyons, 1666, fol.)—Hoefer, Nouv. Biog. Générale; Mongitore, Bibliotheca Sicula; Bibliothèque des Écrivains de la Compagnie de Jésus. (J. W. M.)

Fassoni, Librato, an Italian theologian, was born about A.D. 1700, and died at Rome in 1767. He was professor of theology in the college of St. Thomas in Rome. We have from him De Lebimitate Rei Trin. (Sinsagiglia, 1754, fol.):—De Graeco Sacramentum Liturg. Editione a LXX Interpretatione (Urbino, 1754, fol.);—De Pluronum in Iim Abarbec bestiudine ante Christi mortem (Rome, 1760, 4to.)—Hoefer, Nouv. Biog. Générale. (J. W. M.)

Fast (properly, δεκα, ten, strictly, to keep the mouth shut; ενετίσσει, strictly, not to eat). In the early ages of the world, when the spontaneous productions of nature and the spoils of the chase formed man's chief aliment, fasting from time to time was compulsory, in consequence of the uncertainty of obtaining food when wanted. It would be easy for such religious ignorance to interpret this compulsion into an expression of the divine will, and so to sanction the observance of fasting as a religious duty. The transition would be easier at a time and in countries when the office of physician was united in the same person with that of priest, for in his climates occasional fasting is not without its advantages on the health; and an abstinence which the state of the body required, but which the appetite shunned or refused, the authority of the priest and the sanctions of religion
would exact at once with ease and certainty. In the earlier stages of civilization no idea is more prevalent and operative than that the Deity is propitiated by voluntary sufferings on the part of his creatures. Flowers, fruits, and kinds of food, various invocations, and even the sacrifice of life itself. Nay, "the fruit of the body"—the dear pledges of mutual affection, the best earthly gift from the heavenly Father—children, were sacrificed in expiation of "the sin of the soul." Human enjoyments were held to be displeasing in the sight of God. The notion that the man was jealous of man's happiness runs through the entire texture of Greek and Roman mythology; and the development of this falsehood, as presented in Greek tragedy, has given birth to some of the finest productions of the human mind. But what more pleasant than food to man, especially to the semi-barbarian? The denial of such a pleasure must then be well-pleasing to the Divinity, the rather because, on occasions of family bereavement, of national disaster, or any great calamity, the appetite is naturally affected under the influence of grief, and is made to nauseate the food in its ordinary condition it finds most grateful. A connection between sorrow and fasting would thus be established which would carry with it a sort of divine sanction in being natural and inevitable in its origin. Accordingly, abstinence, which seemed imposed by Providence as a means of expiation of evil done, was as an accompaniment of sorrow, easily became regarded as a religious duty when voluntarily prolonged or assumed, and grew to be considered as an efficacious means for appeasing the divine wrath, and restoring prosperity and peace. "Climate, the habits of a people, and their creed, give it at different periods different characteristics; but it may be pronounced to have been a recognised institution with all the more civilized nations, especially those of Asia, throughout all historic times. We find it in high estimation among the ancient Egyptians, the Persians, the Egyptians, the Persians, and the Iranians. It forms a prominent feature in the ceremonies of the mysteries of Mithra, and found its way, together with these, over Armenia, Cappadocia, Pontus, and Asia Minor, to Palestine, and northward to the wilds of Scythia. The ancient Chii, and Hindus, and principally the latter, in accordance with their primal view—which they held in common with the Parsees—of heaven and hell, salvation and damnation, of the transmigration of the soul, and of the body as the temporary prison of a fallen spirit, carried fasting to an unnatural excess. Although the Vedas attach little importance to the external body, yet the body, by the due observance of which the Hindu believer is purified from all his sins, requires, among other things, an uninterrupted fast for the space of twelve days. Egypt seems to have had few or no compulsory general fasts: but it is established beyond doubt that for the initiation into the mysteries of Ahas and Osiris, temporary abstinence was rigorously enforced. In Siam, all solemn acts are preceded by a period of fasting, the seasons of the new and full moon being especially consecrated to this rite. In Java, where abstinence from the flesh of oxen is part of the religion of all Buddhists and worshippers of Brahma alike, the manner and times of the observance vary according to the religion of the individual. Again, in Tibet, the Dalai-lamas and Bogdo-lamas hold this law in common. That Greece observed and gave a high place to occasional fasting is evident from the third day of the festival of the Eleusinian mysteries, and that, for instance, those who came to consult the oracle of Trophonius had to abstain from food for twenty-four hours—is well known. It need hardly be added that the Romans did not omit to insert the elements of the festival, and ceremonies which they adopted from their neighbours, though with them the periods of fasting were of less frequent recurrence" (Chambers, Encyclopaedia, s. v.).

The Mohammedans fast (Ull Sulees) during the whole of their ninth (lunar) month Ramadan (see D'Herbelot, Bibl. Or. s. v.). (On this religious observance among pagan nations, consult Meiners, Gesch. der Relig. ii, 192; Lachmann, Amor. Græc. Sacr. p. 462; Wachsmuth, Alterthümer ii, 287; Böttiger, Künstweltköl. i, 132.) See ASCETICISM.

I. Jewish Fasting.—The word דָּעַת (yov'rà, jyv'rì) is not found in the Pentateuch, but it often occurs in the historical books and the prophets (2 Sam. xxii, 16; 1 Kings xxii, 9-12; Ezra viii, 21; Ps. lxxix, 10; Isa. viii, 3; Joel i, 14; ii, 16; Zech. viii, 19, etc.). In the law the only term used to denote the religious observance of fasting is the more significant one, יְבָשָׁא (yv'và, yv'ráh, yv'ráh; agg. yv'vàh, yv'ráh). Fasting (the soul) (Lev. vii, 29-31; xxiii, 27; Num. xxx, 18). The word דָּעַת, i.e. affliction, which occurs Ezra ix, 5, where it is rendered in A. V. "heavy-ness," is commonly used to denote fasting in the Talmud, and is the title of one of its treatises.

The sacrifice of the personal will, which gives to fasting its alluring influence, is expressed in the old term used in the law, affliction. The faithful son of Israel is taught that fasting is one of the "chastening" or "purifying" of the soul (Ps. lxxix, 10). But the frequent admonitions and stern denunciations of the prophets may show us how prone the Jews were in their formal fasts to lose the idea of a spiritual discipline, and to regard them as being in themselves a means of winning favor from God. In place of a true and holy spirit, the many themes of them in order to appear religious before men (Isa. viii, 3; Zech. vii, 5, 6; Mal. iii, 14; comp. Matt. vi, 16).

The Jewish fasts were observed with various degrees of strictness. Sometimes there was entire abstinence from food (Esth. iv, 16, etc.). On other occasions the restriction was limited to the fast itself, and occasional bullets from plain diet (Dan. x, 8). Rules are given in the Talmud (both in Yoma and Tosefith) as to the mode in which fasting is to be observed on particular occasions. The fast of the day, according to Josephus (Ant. iii, 10, 5), was considered to terminate at sunset, and St. Jerome speaks of the fasting Jew as anxiously waiting for the rising of the stars. Fasts were not observed on the sabbaths, the new moons, the great festivals, or the feasts of Purim and Dedication (Judith viii, 6; Tosefith, ii, 10).

Those who fasted frequently dressed in sackcloth or rent their garments, put ashes on their head and went barefoot (1 Kings xxii, 27; comp. Josephus, Ant. vii, 18, 8; Neh. ix, 1; Ps. xxxv, 18). The rabbinical directions for the ceremonies to be observed in public fasts, and the prayers to be used in them, may be seen in Tosefith, ii, 1-4 (see the Cod. Talm. ii, Tosefith, c. neras, et nois De Lundie, Trad. &c. in Rh. 1694. 5vo). Consult also Maimonides, Jod Ha-Chesviya, Hilkhat Tashmii, i, 315 sq. Lightfoot, Horae Hebraicae on Luke xlvii, 12; Schottgen, Horae Hebraicae on Luke xlviii, 12; Reland, Antiquitates Sacrarum Veterum Historiarum (1717), p. 558 sqq.; Bloch, in Geiger's Wissenschaftliche Zeitschrift für juridische Theol. iv, 295 sqq.; Fink, in Erzb. und Gruher's Encyclopädie, s. v. Fasten; Jost, Gesch. des Judenthums und seiner Secten (Leipzig, 1857). i, 184 sqq.: Bauer, Gottsad. Verf. 1, 484 sqq.; Otho, Lex. Rabb. p. 258 sqq.

The solo fast required by Moses was on the great day of annual atonement. This observance seems always to have retained some prominence as "the fast (Acta xxviii, 9). But what the observance of the enlarged duty involved we are nowhere expressly informed, and can approximate to a knowledge of precise details about the nature of the fast of the Jews. It may be considered as affording a picturesque frail of this divinely-sanctioned ordinance. In these remarks the opinion is implied that "the fast," whatever importance it may have subsequently acquired, was orig...
inally only an incident, not to say an accident, in the great solemnity of the annual atonement. See ATONE-
MENT, DAY OF.

There is no mention of any other periodical fast in the year in Zech, vii, 1-7; viii, 18. From these
passages it appears that the Jews, during their captiv-
ity, observed four annual fasts in the fourth, fifth, sev-
enth, and tenth months. When the building of the
second Temple had commenced, those who remained in
Babylon sent a message to the priests at Jerusalem to
instruct them to observe the fasts in the fifth month
which should not be discontinued. The prophet
takes the occasion to rebuke the Jews for the spirit in
which they had observed the fast of the seventh month
as well as that of the fifth (vii, 5-6); and afterwards
(viii, 19) he devoting the subject an evangelical turn, he
declares that the whole of the four fasts shall be turned
to "joy and gladness, and cheerful feasts." Zechaniah
simply distinguishes the fasts by the months in which
they were observed; but the Mishna (Tosnikh, iv, 6)
and St. Jerome (in Zechaniah viii) give statements of
certain historical events which they were intended to
commemorate:

(1.) The fast of the fourth month.—Kept on the 17th
of Tammuz, to commemorate the making of the golden
calf by the Jews, the breaking of the tables of the law
by Moses (Exod. xxiv, comp. xxiii, 3); the failure of the
Cohah sacrifice for want of cattle during the siege,
and the storming of Jerusalem by Nebuchadnezzar
(Jer. iii).”

(2.) The fast of the fifth month.—Kept on the 9th of
Av, to commemorate the decree that those who had
left Egypt shall not enter Canaan (Num. xiv, 27
etc.); the Temple burnt by Nebuchadnezzar, and
again by Titus; and the ploughing up of the site of the
Temple, with the capture of Bither, in which a vast
number of Jews from Jerusalem had taken refuge
in the time of Hadrian (comp. Josh, Esch. d. Jerusalem,
iii, 1).”

(3.) The fast of the seventh month.—Commemorating
the complete sack of Jerusalem by Nebuchadnezzar,
and the death of Gedaliah (2 Kings xxv, 6), on the
3d of Tisri (comp. Sefer Olam Rabboc, c. xxvi).

(4.) The fast of the tenth month.—On the 10th of
Tebishah, to commemorate the receiving by Ezekiel and
the other captives in Babylon of the news of the destruc-
tion of Jerusalem (Ezek. xxxiii, 21; compare 2
Kings xxv, 1).

These four fasts have been Christianized, and tra-
dition tells us that their transfer into the Christian Church
was made by the Roman bishop Callistus (fourth A.D.
229). To deprive them, however, of their Jewish appearance, the whole year was divided into four
seasons (quattuor tempora), and a fast was ap-
pointed for one week of each season (compare Herzog,
Encyclopédie, iii, 326).

(5.) The fast of Esther.—Additional to the above;
kept on the 13th of Adar (Esth. iv, 16). See EESTHER
(Fast of).

Some other events mentioned in the Mishna are
omitted as unimportant. Of those here stated several
could have had nothing to do with the fasts in the
time of the prophet. It would seem most probable,
from the mode in which he has grouped them together,
that the original purpose of all four was to commemo-
rate the circumstances connected with the commence-
ment of the captivity, and that the other events were
subsequently connected with them in the mind of
some real or fancied coincidence of the time of occu-
rence. As regards the fast of the fifth month, at least,
it can hardly be doubted that the captive Jews applied
it exclusively to the destruction of the Temple, and
that the Exon was highly regarded as the reason of
their request to be released from its observance the
fact that it had no longer any purpose after the new
Temple was begun. As this fast (as well as the three
others) is still retained in the Jewish calendar, we must
in
er either that the priests did not agree with the
Babylonian Jews, or that the fast, having been discon-
tinued for a time, was renewed after the destruction
of the Temple by Titus.

The number of annual fasts in the present Jewish calendar has been multiplied to twenty-eight, a list of
which is given by Reland (Anqip., p. 274). See CALEND.

2. Public fasts were occasionally proclaimed to ex-
press national humiliation on account of sin or misfor-
tune, and to secure the presence of God in a time of
great undertaking or threatened danger. In the case
of public danger, the proclamation appears to have
been accompanied with the blowing of trumpets (Joel
i, 1-18; comp. Tossnikh, i, 6). The following instances
are recorded of strictness national fasts: Samuel de-
dered "all Israel" to Mirzeph and proclaimed a fast,
performing at the same time what seems to have been
a ritual symbolism of purification, when Jehoshaphat appointed one
"throughout all Judah, when he was preparing for
war against Moab and Ammon (2 Chron. xx, 8); in
the reign of Jeholakim, one was proclaimed for "all
the people in Jerusalem, and all who came thither out
of the cities of Judah," when the prophecy of Jeremiah
was publicly read by Baruch (Jer. xxxvi, 5-10; comp.
Baruch i, 6); and two are noticed in the book of the
Maccabe-
(e 1 Macc. xxxi, 48-47; 2 Macc. xiii, 10-12).

There are a considerable number of instances of cit-
es and bodies of men observing fasts on occasions in
which they were especially concerned. In the days of
Philip the first Anabate, who was not a day or a
night in the state (Acts, viii, 20), when the second Temple was completed, "the children of Israel assembled with fasting, and with sackcloths and earth upon them," to hear the law read, and to confess their sins (Neh. ix, 1). There are references to
general fasts in the prophets (Jer. vii, 14; ii, 15, 37; Isa.
iv, v), and two are noticed in the book of the Maccas-
bees (1 Macc. iii, 46-47; 2 Macc. xiii, 10-12).

Public fasts express on account of unseasonable
weather and of famine may perhaps be traced in the
first and second chapters of Joel. In later times they
assumed great importance, and form the main subject
of the treatise Tosnikh in the Mishna. The Sanbe-
drim ordered general fasts when the nation was threat-
ened with any great evil, such as drought or famine
(Josephus, Life, § 56; Tosnith, i, 5), as was usual with
the Romans in their supplications (Livy, iii, 7; v, 25).

3. Private occasional fasts are recognized in one
phrase of the passage (Numb. xxx, 13). The instances
given of individuals fasting under the influence of
crime, vexation, or anxiety are numerous (1 Sam. i, 7;
xx, 44; 2 Sam. iii, 55; xi, 16; 1 Kings xxi, 27; Ezra
x, 6; Neh. ii, 18; iv, 19; Deut. i, 10). The fasts for forty
days of Moses (Exod. xxiv, 18; xxxiv, 29; Deut. ix, 18)
and of Eliah (1 Kings xix, 8) are, of course, to be re-
garded as special acts of spiritual discipline, faint
though wonderful shadows of that fast in the wilder-
ness of Judaism, in which all true fasting finds its meaning (Matt. iv, 1, 2). As in the private fasts became very frequent (Lightfoot, p. 318), awaiting the call of no special occasion, but entering as a regular part of the current religious worship (Sueton. Aug. 76; Tacit. Hist. v, 4, 8). In Judith vili, 6 we read that Judith fasted all the days of her widowhood, "save the time of the new moons and the sabbaths, and the feasts of the new moons, and the new moons, and the feasts and the solemn days of the house of Israel." In Tobit xii prayer is declared to be good with fasting; see also Luke ii, 37; Matt. ix, 14. The parable of the Pharisee and Publican (Luke xviii, 9, 10; compare Matt. x. 14) shows how much more at the Pharisees were given to voluntary and private fasts—"I fast twice a week." The first was on the fifth day of the week, on which Moses ascended to the top of Mount Sinai; the second was on the second day, on which he came down (Tumidii, ii, 9; Herzog, Megillah, 75, 1). This bi-weekly fasting has also been adopted in the Christian Church; but Monday and Thursday were changed to Wednesday and Friday (Sesquis. v. et sexta, as commemorators of the betrayal and crucifixion of Christ. Of a similar semi-occasional character was the First-born sons' fast (112. 4272), on the day preceding the feast of Passover, in commemoration of the fact that while God on this occasion spared the firstborn of the Egyptians, he spared those of the house of Israel (comp. Exod. xii, 29, etc.; So2phism. xii, 8). See First-Born.
The Essenese and the Therapeutae also were much given to such observances (Philo, Vit. Contemp. p. 618; Eusebius, Prop. Ecles. ix, 5). Fasts were considered a useful exercise for purging the mind for special religious impressions; as in Dan. x, 2 sq. (see also Acts xiii, 3; xiv, 23). From Matt. xxvi, 21: "Howbeit this kind of (dámones) goeth not out but by prayer and fasting," it would appear that the practice under consideration was considered in the days of Christ to act in certain special cases as an exorcism.

Fasting (as stated above) was accompanied by the ordinary signs of grief among the Israelites, as may be seen in 1 Macc. iii, 47. The abstinence was either partial or total. In the case of the latter food was entirely foregone, but this ordinarily took place only in fasts of short duration; and abstinence from food in Eastern climates is more easy and less detrimental (if not in some cases positively useful) than keeping from food would be with us in these cold, damp Northern regions (Esth. iv, 16). In the case of partial abstinence the time was longer, the denial in degree less, and the reason assigned was either mourning for the dead (Ezra vi, 23), fasting (I Macc. iv, 14), or in the days of Nehemiah (vii, 4), he ate no "pleasant bread, neither came flesh nor wine in his mouth." There does not appear to have been any fixed and recognised periods during which these fasts endured. From one day to forty days fasts were observed. The latter period appears to have been regarded with feelings of peculiar sanctity, owing, doubtless, to the above instances in Jewish history. There are monographs, entitled De jejunio Hebraeorum, by Opitz (Kil. 1690), Peninger (Holm. 1684), and Lund (Aboe, 1696).

II. In New Testament.—We have already seen how qualified the sanction was which Moses gave to the observance of fasting as a religious duty. In the same spirit which actuated him, the propheta bore testimony against the lamentable abuses to which the practice was turned in the lapse of time and with the increase of social corruption (Isa. viii, 4 sq.; Jer. xiv, 12; Zac. viii, 5). Continuity in the same species of influence and perfection that spirituality in religion which Moses began, our Lord rebuked the Pharisees sternly for their outward and hypocritical pretences in the fasts which they observed (Matt. vi, 16 sq.), and actually abstained from appointing any fast whatever as a part of his own religion. In Matt. ix, 14, the question of the reason of this avoidance is expressly put—"Why do we (the disciples of John) and the Pharisees fast oft, but thy disciples fast not?" The answer shows the voluntary character of fasting in the Christian Church—"Can the children of the bridechamber fast? It is true that a period is alluded to when these children "fast, but the general scope of the passage, taken in connection with the fact that Christ's disciples fasted not, and with the other fact, that while John (Matt. xi, 18, 19) "came neither eating nor drinking," the Son of man "came eating and drinking," clearly shows that our Lord, having positively excluded fasting, so by the assertion that a time would come when, being deprived of the personal presence of the bridegroom, his disciples would fast, meant to intimate the approach of a period of general mourning, and employed the term "fast" derivatively to signify rather a sorrow corporal self-denial (Neander, Leben Jesu, p. 231, 250).

In his sermon on the mount, however (Matt. vi, 17), while correcting the self-righteous austerity of Pharisaic fasting, he clearly allows the practice itself, but leaves the frequency, extent, and occasion of its performance to the private conscience and circumstances of each individual.

That the early Christians observed the ordinary fasts which the public practice of their day sanctioned is clear from more than one passage in the New Testament Scriptures (Acts xiii, 2; xiv, 23; 2 Cor. vi, 6); but in most cases they did nothing more by this observance than obedience, as in general they thought themselves bound to do, to the law of their fathers so long as the Mosaic institutions remained entire. Although the great body of the Christian Church held themselves free from all ritual and ceremonial observances when God in his providence had brought Judaism to a termination in the rasure of the holy city and the closing of the Temple, yet the practice of fasting thus originated might easily and unobservedly have been transmitted from year to year and from age to age, and that the rather because to large a portion of the disciples being Jews (to say nothing of the influence of the Ebionites in the primitive Church), thousands must have been accustomed to fasting from the earliest days of their existence, either in their own practice, or the practice of their fathers, relatives, and associates (comp. Cor. vii. 19 to the Jewish Fasti).

Fasting, or Abstinence, an English writer, and, according to some authorities, bishop of London in the 5th century. He is proved by Holstenius to be the author of a treatise from his own works, vol. ix, and published by Holstenius (Rome, 1668) under the title De Vita Christiana et Vestitad. Its precepts are good and practical, but Tillemont (Mém. xy, 16) considers it as tending to Pelagianism, inasmuch as it reduces Christianity to love of God and our neighbors, including good works. It is given, with prolongemena, in Galland, Bib. Vet. Patr. t. ix, and is reprinted in Migne, PatroL Lat. i, 577 sq.—Clarke, Succession of Sac. Lit. ii, 152; Cave, Hist. Lit. i, 401.

Fasting in the Christian Church. In the article Fast we have given an account of Jewish fasting, and also of the notices of fasting in the N.T. We confine ourselves in this article to a history of fasting in the Christian Church.

I. Early Church.—Fasting and abstinence have been practised in the Christian Church from the beginning [see Abstinence] as means of self-discipline. Where the ascetic spirit has prevailed, fasting has been used as a means of mortification and penance. Where it has existed as a part of the religious life in the N.T. fasting appears either (1) as a token of sorrow or repentance, or (2) as a means of preparation for and aid in the discharge of spiritual duties (e.g. prayer, etc.). It was free from superstition; and the N.T. nowhere makes fasting, of itself, a means of grace. But the ascetic tendency in the early Church led to reliance on fasting, etc., as not only helps to, but substitutes for, the inward and spiritual life. The theory which placed the origin and seat of sin in the body [see Sin] also tended to give value to the practice of fasting. It came at last to be considered as an effective means of securing forgiveness of sin. The earliest notices of fasting in the Christian writers are in a better vein. "The days of holy consecration, of penitence and prayer, which individual Christians appointed for their own use, were oftentimes also a sort of expiation. That they might be observed by sense while their minds were intent on holy things, they were accustomed on such days to confine their bodily wants within stricter limits than usual, or else to fast entirely; where we must take into consideration the peculiar nature of that hot climate in which Christianity first began to spread. Whatever they saved by their abstinence on these days was appropriated to the maintenance of the poor brethren" (Nean- der, Church History, Torrey's, ii, 274).

We cite some of the Apostolical Fathers. Hermas (1st century), Shepherd (Simp., v, ch. iii). This fasting is very good, provided that the commandments of the Lord be observed. Observe as follows the fasting you intend to keep. First of all, refrain both from speaking and from hearing what is wrong; and cleanse thy heart from all pollution, from all revengeful feelings, from all covetousness; and on the day thou fastest content thyself with bread, vegetables, and water, and thank God for these. But reckon up what thy meal on this day would have cost thee, and give the amount to some widow, or orphan, or to the poor. Happy for thee, if with thy children and whole householdest thou observest these things. (See also Smill., v, ch. i.) The Epistle of Barnabas declares that the Jewish fasts are not true fasts, nor acceptable unto God, and cites Isa. lviii, 4-9, as giving the true fast "which God hath chosen." The Epistle of Polycarp (2d century) exhorts Christians "to return to the word handed down from the beginning, watching unto prayer, and persevering in fasting" (ch. vii). Justin Martyr (+165) also cites Isa. lviii as giving the "true" fast, and says even the fasts of the Jews, however, of fasting being joined with prayer in the administration of baptism (Dial. c. Tryph. ch. xv). Ireneus (+200) speaks of the fast before Easter, and says, "Not only is the dispute respecting the day, but also respecting the manner of fasting. For some think they ought to observe it for one day, some for two, and others for three days; some compute their day as consisting of forty hours night and day; and this diversity existing among those that observe it is not a matter that has just sprung up in our times, but long ago among those before us, who perhaps, not having ruled with sufficient strictness, established the practice that arose from their simplicity and inexperience. And yet with all, these maintained peace, and we have maintained peace with one another; and the very difference in our fasting establishes the unanimity in our faith." (Ex. 24). Clement of Alexandria (+220?) notices the fact that many kinds of pagan worship required celibacy and abstinence from meat and wine in their priests; that there were rigid ascetisms among the Indians, namely, the Samanians, and hence argued that usages which may exist also in other religions, and even when combined with superstition, cannot, in themselves considered, be peculiarly Christian. He then adds: "Paul declares that the kingdom of heaven consists not in meat and drink, neither therefore in abstaining from wine and flesh, but in righteousness and peace, and joy in the Holy Ghost." Austerity is shown, not by the castigation of the body, but by gentleness of disposition, so also abstinence is a virtue of the soul, not consisting in that which is without, but in that which is within the man. Abstinence has reference not to some one thing alone, but to the whole soul; and super- tition also to despoil man, to tame the tongue, and to obtain by reason the dominion over sin" (Strom. lib. iii). Clement also speaks of weekly fasts as the usage of the Church. It appears to be clear that weekly fasts were observed in the Church before the end of the 2d century, but that they were now enforced as essential means of grace. The Montanists were rigorous with excess to regard with fasting. "Besides the usual fasts, they observed special zere phagia (arous phagia), as they were called; seasons of two weeks for fasting only dry, or, properly, uncooked bread, salt, and water. They were also refused the Church unless they fasted the fasts of the seasons as a general rule, but allowed ascetics to carry fasting even to extremes. A confessor in Lyons, for example, lived on bread and water alone, but forsook that austerity when reminded that he gave offense to other Christians by so deepening the gifts of God" (Schaaff, Ch. Hist. i, § 90). Tertullian (+c. 220), in his De Jejumia, complains of the little attention paid by the Catholic Church to the practice of fasting, thereby showing that liberty of judgment was exercised with regard to it. Origen speaks of Wednesday and Fridays in the Churches of the Gentiles by the Christians of those days, on the ground that our Lord was betrayed on a Wednesday and crucified on a Friday (Hom. x on Leviticus).

By the 8th century fasting ceased to be a voluntary exercise; for by the second Council of Orange, A.D. 541, it was decreed that any one neglecting to observe the stated times of abstinence should be treated as an offender against the laws of the Church. In the 8th century it was regarded as meritorious, and the breach of the observance subjected the offender to the penalty of excommunication. In later times, those who ate flesh during prescribed seasons of abstinence were punished with the loss of their teeth. These severities were, however, subsequently relaxed, and permission was given to use all kinds of food, except flesh,
FASTING

eggs, cheese, and wine. Afterwards flesh only was prohibited, eggs, cheese, and wine being allowed; and indulgence in them was granted by the Church, and led to a quarrel between it and the Western. The following fasts generally obtained: 1. Lent, the annual fast of forty days before Easter. At first the duration of this fast was forty hours; in the time of Gregory I it was thirty-six days; but afterwards, either by Gregory I or by some other (seventeenth century), the fasts of Moses, Elias, and our Saviour, it was extended to forty days. See LENT; QUADRAGESIMA. 2. Quarterly fasts, which cannot be traced beyond the 5th century, though Bellarmine asserts that they dated from the apostles' time. 3. A fast of three days before the feast of Corpus Christi, which is observed in the Churc of Vienne (5th century). In some places it was not observed till Whitsuntide. It was called jejium ro enlargement, or jejunium libetarum, the feast of rogations or litanies (hence rogation-days), on account of certain litanies said on those days (Blissang, bk. xxii. c. ii. § 8). 4. Monthly fasts, a day in every month, except July and August, being selected. 5. Fastes before fastescales, instead of the ancient vigils, which were abolished in the 5th century. 6. Weekly fasts, on Wednesdays and Fridays, entitled staciones, from the practice of the Romans of several of which are observed by the Romans. 7. There were also occasional fasts, appointed by ecclesiastical authority, in times of great danger, emergency, or distress (Tertull. De Jejun. c. 13)." The custom of the Church at the end of the 4th century may be collected from the following passage of Epiphanius: 'In the whole Christian Church, that day, and the following fast-days throughout the year are regularly observed. On Wednesdays and Fridays we fast until the ninth hour (i.e. three o'clock in the afternoon), except during the interval of fifty days between Easter and Whitsuntide, during which it is usual neither to kneel nor fast at all. Besides this, there is no fasting on the Epiphany or Nativity, if those days shall fall on a Wednesday or Friday. But those persons who especially devote themselves to religious exercises (the monks) fast also at other times when they please, except on Sundays and during the fifty days between Easter and Whitsuntide. It is also the practice of the Church to observe the forty days' fast before the sacred week. But on Sundays there is no fasting, even during the last-mentioned period (compare Doctr. de Fide)." But even at this late date there was no universal and uniform practice in the Church. On the establishment of the Church in the matter, neither had fasts been established by law. The custom, so far as it existed, had been silently introduced into the Church, and its observance was altogether voluntary. This fasting consisted, at first, in abstinence from meat until the third hour or after noon. A custom was afterwards introduced, probably by the Montanists, affecting the kind of food to be taken, which was limited to bread, salt, and water" (Siegel, Aberthamer, ii. 77, translated by Coleman, Ancient Christianity, p. 440).

II. Roman and Greek Churches. — The Church of Rome prescribes the times and character of fasts by law (Concil. Trident. session xxv, De delect. ciborum). "Moreover, the holy council exerts all pastors, and beseeches them by the most holy coming of our Lord and Saviour, that as good soldiers of Jesus Christ they mark and own in all the practice of the observance of all the institutions of the holy Roman Church, the mother and mistress of all churches, and of the decrees of this and other ecumenical councils; and that they use all diligence to promote obedience to all their commandments, especially to the mortification of the flesh, as the choice of meats and fasts." The Church commands fasts, and desists from lawful comports is sin. '"See Abstract of the Bony Catechism" (p. 44): 'Slighting or neglecting the precepts of the Church, and living in habits of breaking fasts commanded, or of eating meat on Saturday, or other days of abstinence, without just dispensation, were sins which excluded from the benefits of the last judgment, unless exception found to the manner as drunkenness, swearing, and debauchery' (Instructions and Directions, etc., p. xxiv). But a papal dispensation changes the nature of the things: the Spaniard who has paid the pope for a flesh butt may feast even in Lent; while his neighbor, who has neglected to procure one or declare the cause of the total suspension of the fasts, is strictly prohibited from fasting and of abstinence. On the former but one meal, and that not of flesh, is tasted during twenty-four hours; on the latter, flesh only is abstained from. The following is the distribution of Church fasts as given in bishop Challoner's Garden of the Soul: 1. The forty days of Lent. 2. The Ember Days, being the Wednesday, Friday, and Saturday of the first week in Lent, of Whitsun Week, of the third week in September, and of the third week in Advent. 3. The Wednesdays and Fridays of the four weeks in Advent. 4. The vigils of Whitsun Week, with the fastings of St. Peter and St. Paul, of the Assumption of the Blessed Virgin Mary, of All Saints, and of Christmas Day. When any fasting day falls upon a Sunday, it is to be observed on the Saturday before. Abstinence Days. — 1. The Sundays in Lent. 2. The three Rogation Days, being the Monday, Tuesday, and Wednesday before Ascension Day. 3. St. Mark, April 25, unless it falls in Easter Week. 4. The Fridays and Saturdays out of Lent, and the Ember Weeks, or such as happen to be vigils; but should Christmas Day fall upon a Friday or Saturday, it is a day of abstinence. In the Proctor Catechism from the Sundays, fasts, and fasting, the reason assigned for observing St. Mark's Day as a day of abstinence is, that his disciples, the first Christians of Alexandria, under his own conduct were eminent for their mortification; moreover, that St. Gregory the Great, the apostle of England, first of all to protest in memory of the cessation of a mortality in his time at Rome. All Fridays and Saturdays, except those which fall between Dec. 25 and Feb. 2, are days of Abstinence; but in the United States there is a dispensation of Saturdays for twenty years from 1840. The fasting days in Lent are, every Lent except Sunday; the Ember Days; the vigils of Pentecost, Assumption, All Saints, and Christmas. In the Greek Church fasting is kept with great severity. There are four principal fasts. That of Lent, commencing according to the style of each year, in the week after Whitsuntide, and ending on June 29, so that it varies in length, and is called the Fast of the holy Apostles; one, for a fortnight before the Assumption of the Virgin (August 15), which is observed even to the prohibition of oil, except on the day of the Transfiguration (August 6), on which day both oil and fish may be eaten; and one forty days before Christmas.

III. Protestant Churches. — In these, fasting is not made imperative as a term of membership in the Church, but is generally recommended as a Christian duty, especially under circumstances of national or individual affliction.

1. Church of England. — 'In the reign of queen Elizabeth there was a royal ordinance for fasting; not, however, so much with a religious view as for the encouragement of the fasting system, particularly to the mortification of the flesh, as the choice of meats and fasts,' so far as the custom in its ecclesiastical law as to retain the fast-days and prayers, but has prescribed no regulation of diet. Abstinence from food is not, therefore, the duty which it enjoins on its members, but whatever each finds to be best adapted for self-discipline, and most suitable under his circum-

Diplized by Google
stances for a repentant spirit. Mention is made of abstinence in the 'Collect for the first Sunt. y in Lent;' but it is not the abstaining from food, or particular kinds of food, but such abstinence as shall subdue the flesh to the spirit, i.e. the abstinence additive to fasting. Now it is not true to say that the title of the table of vigils, etc., she mentions 'fasts and days of abstinence' separately; but when she comes to enumerate the particulars, she calls them all 'days of fasting or abstinence,' without distinguishing the one from the other. It is true, in the text, the distinction is drawn between fasting and abstinence; so Wesley, (On Common Prayer, ch. v. § 4), "In the Church of Rome, fasting and abstinence admit of a distinction, and different days are appointed for each of them. But I do not find that the Church of England makes any difference between fasting and abstinence." It is true, in the text, the title of the table of vigils, etc., she mentions 'fasts and days of abstinence' separately; but when she comes to enumerate the particulars, she calls them all 'days of fasting or abstinence,' without distinguishing the one from the other. But for this reason it is that the Church, as I have said, nowhere makes any difference in the kinds of meat; but, as far as she describes, she does recommend an entire abstinence from all manner of food till the time of fasting be over; declaring in her homilies that fasting (by the decree of the six hundred and thirty fathers, assembled at the Council of Chalcedon, which was one of the four first general councils, which grounded their constitution on the sacred Scriptures, and long-continued usage or practice both of the prophets and other godly persons before the coming of Christ; and also of the apostles and other devout men in the New Testament) is a withholding of meat, drink, and all natural food from the body for the determined time of fasting. The rule of this was fixed by the Church of England for fasting and abstinence are the following: 1. The forty days of Lent. 2. The Ember Days at the four seasons, being the Wednesday, Friday, and Saturday after the first Sunday in Lent, the first Thursday after Easter, the first Thursday after Harvest, and the first Thursday after Trinity. 3. The three Rogation Days, being the Monday, Tuesday, and Wednesday before Holy Thursday, or the Ascension of our Lord. 4. All the Fridays in the year except Christmas Day. These days are mentioned in 2 and 3 Edward VI, c. 19, and in 5 Elizabeth, c. 5; and by 12 Charles II, c. 14. January 30 is ordained to be a day of fasting and repentance for the 'martyrdom' of Charles I. But an act passed in 1590, the 22 Victoria, repeals all enactments requiring special Church service to be observed on January 30, May 29, November 5, and October 25. Other days of fasting are their determination upon the royal proclamation (Acts of the Metropolis Metropolitan), etc. 2. Lutheran Church.—Luther by no means rejected or discountenanced fasting, but discarded the idea that it could be meritorious (Comm. on Matt. vi. 16); The Augsburg Confession (art. x. xi) repudiates 'diversity of meats' and other traditions; but adds, 'The church, however, that we forbid the mortification of our sinful propensities, as Jovian asserts, is groundless. For our writers have always given instruction concerning the cross which is the duty of Christians to bear. We more correctly teach that it is the duty of every man by fasting and other exercises, to avoid giving any occasion to sin, but not to merit grace by such works. But this watchfulness over our body is to be observed always, not on particular days only. On this subject Christ says, Take heed to yourselves lest at any time your hearts be overcharged with surfeiting (Luke xxii, 34). Again, The devils are not cast out but by fasting and prayer (Matt. xvii, 21). And Paul says, Be ye imitators of me, as I am also of Christ. In short, it is to live in abstinence and in subjection (1 Cor. ix, 27). By which he wishes to intimate that this bodily discipline is not designed to merit grace, but to keep the body in a suitable condition for the several duties of our calling. We do not, therefore, object to fasting itself, but to the fact that it is represented as a necessary part of our duties and that specific days have been fixed for its performance.' 3. Calvin.—The views of Calvin on fasting have been very generally adopted in the Reformed Churches: 'Therefore let us say something of fasting, because, many, for want of knowledge, are perplexed at its necessity, and some reject it as almost superfluous; while, on the other hand, where the use of it is not well understood, it easily degenerates into superstition. Holy and legitimate fasting is directed to three ends, for we practise it either as a restraint on the flesh, to humble the judgment of God, and to prevent us from using the dispensation of life for the advantage of private fasting. The second end is common to both, such preparation for prayer being necessary to the whole Church, as well as to every one of the faithful in particular. The same may be said of the third, for it will sometimes happen that God will afflicted as a whole with some infestation with war, pestilence, or some other calamity; under such a common scourge, it behoveth all the people to make a confession of their guilt. When the hand of the Lord chastises an individual, he ought to make a similar confession, either alone or with his family. It is true, the guilt of the sins is common, but the effect is not so common. The Church, therefore, of which we are now treating, whenever supplications are to be presented to God on any important occasion, it would be right to join the union of fasting with prayer. Thus, when the faithful at Antioch laid their hands on Paul and Barnabas, the better to recommend their very important ministry to the Lord, they 'fasted' and 'prayed.' So, also, when Paul and Barnabas afterwards 'ordained elders in every church,' they used to 'pray with fasting.' In this kind of fasting their only object was that they might be more lively and unembarrassed in prayer. And in the first place, this agrees with the institution of God in fasting, and signifies that by such means that holy woman habituated herself to a constancy in prayer. Such was the fasting of Nehemiah, when he prayed to God with more than common fervor for the deliverance of his people. For this cause Paul declares it to be essential for the faithful man, by a temporary abstinence from lawful enjoyments, that they may be more at liberty to 'give themselves to fasting and praying,' for by connecting fasting with
prayer, as an assistance to it, he signifies that fasting
is of no importance in itself any further than as it is
directed, and that it is an addendum or means of the
intercession which
he gives in that place to husbands and wives, to 'rend-
ner to each other ' due benevolence,' it is clear that he
is not speaking of daily prayers, but of such as re-
quire peculiar earnestness of attention. That there
must be no mistake respecting the object, let us define
what fasting is; for we do not understand it to denote
mercy and abstinence in eating and drinking,
but something more. The life of the faithful, in
indeed, ought to be so regulated by frugality and sobri-
ety as to exhibit, as far as possible, the appearance of
a severe and pious life; but besides this, it is another
aspect of temporary fast, when we renounce anything from
our customary mode of living, either for a day or for any
certain time, and prescribe to ourselves a more than
commonly rigid and severe abstinence from food. This
restriction consists in three things—in time, in quality,
and in quantity of food. By time I mean that we
should perform, while fasting, those exercises on ac-
count of which fasts are instituted. As, for example,
if any one fast for solemn prayer, he should not break
his fast till he has attended to it. The quality con-
sists in abstaining from food, drink, and other
things, with simpler and humbler fare, that our appetite may
not be stimulated by delicacies. The rule of quantity is
that we eat more sparingly and slightly than usual,
only for necessity, and not for pleasure. But it is nec-
ecessary for us, above all things, to be particularly on
our guard against all approaches of the superstition, which
has heretofore been a great source of injury to the
Church. For it was far better that fasting should be
taken away, than that the practice should be dile-
gently observed, and at the same time corrupted with
false and pernicious opinions, into which the world is
constantly falling, unless it be prevented by the great-
est fidelity and prudence of the pastors. The first
caution necessary, and which they should be constantly
urging, is that suggested by Joel: ' Render your heart,
and not your garments;' that is, they should admon-
ish the people that God sets no value on fasting un-
less it be accompanied by a corresponding display of
heart, a real displeasure against sin, sincere self-ab-
horrence, true humiliation, and unfeigned grief arising
from a fear of God; and that fasting is of no use on
any other account than as an additional and subsidi-
ary means to correct the heart. Fasting is an useful
abomination to God than when men attempt to impose
upon him by the presentation of signs and external
appearances instead of purity of heart. Therefore he
severely reprobrates this hypocrisy in the Jews, who im-
agined that they had satisfied God merely by having fast-
ed; while the impressions and sincere thoughts were
in their hearts. ' Is it such a fast, saith the Lord, that
I have chosen? ' The fasting of hypocrites, therefore,
is not only superfluous and useless fatigue, but the
greatest abomination. Allied to this is another evil,
which requires the most vigilant caution, lest it be
considered as a meritorious act, or a species of divine
service. For as it is a thing indifferent in itself, and
possesses no other value than it derives from those ends
to which it ought to be directed, it is most pernicious
superstition to confound it with works commanded by
God, and to consider the act of fasting in reference to
any exterlor object. Such was formerly the folly of the
Manichaeans, in the refutation of whom Augustine most
clearly shows that fasting is to be held in no other es-
timation than on account of those ends which I here
mention, and that it receives no approbation from God
unless it is performed for their sake. The third and
most noticeable error is not so impious indeed, yet is pregnant with danger, to
enforce it with extreme rigor as one of the principal
duties, and to extol it with extravagant encomiums,
so that men imagine themselves to have performed a
work of peculiar excellence when they have fasted.
In this respect I dare not wholly excuse the ancient
fathers from having sown some seeds of superstition,
and given occasion to the tyranny which afterwards
prevailed. Their insinuations and sneering remarks
on this subject are sufficiently early, to denote them-
selves as performing an eminent act of obedience to
God, and the pastors commanded it as a holy imitation
of Christ; whereas it is plain that Christ fasted, not
to set an example to others, but in order that by such an
introduction to the preaching of the Gospel, he might
prove that it was not in the least contrary to those
revelations of the Old Testament' (Calvin, Instit., bk. iv, ch.
xxi, § 15-20).
The Westminster Confession declares that
'solenn fastings' are 'in their times and seasons,'
to be used in a holy and religious manner (xxxv, v),
and that the Westminster Casulian makes 'religious fast-
ing' one of the duties required in the second com-
mandment (quest. 109).

In Scotland there is generally a yearly fast 'ap-
pointed by the Kirk session of the Established Church
of the parish, or by concurrence of kirk sessions in
the county, or by the Presbytery of the town, or by
parishes, or by the Synod of the Kirk.' The date for
the fast-day is always some day of the week preceding the Communion Sunday, or Sunday set apart in
the Presbyterian churches for the Lord's Supper.
It is usually appointed as a day for 'fasting, humilia-
tion, and prayer.' Business is generally suspended,
and it is expected that people will spend the day in
public worship. By an act of Parliament passed not
many years since, factories are prohibited from carry-
on work on the parish fast-day; but, in conse-
quently of the ecclesiastical divisions in Scotland, it
has become more common than it once was for agri-
cultural and other kinds of work to be carried on
(Chambers, Encyclopedia, s. v.).

American.—The New England Puritans rejected the
ancient ecclesiastical fast-days. The Pilgrim fathers
observed 'seasons of fasting and prayer' before sail-
ing from Europe, and after their arrival in America.
They admitted the right and duty of the civil rulers to
set apart days for fasting and prayer. This right
has been recognised, and the duty observed, in most
states of the American Union. During the Civil War
(1861-5) the President of the United States appointed
days for fasting and prayer, on which praying was
observed by all the churches. The Methodist Episcopal
Church enjoins 'fasting, or abstinence,' upon the
people in the 'General Rules' (Discipline, pt. i, ch. i, §
8); advises weekly fasts to her clergy (pt. ii, ch. ii, §
5); and directs that 'a fast be held in every society on
the first day of the month, and every other meeting day' (pt.
ii, ch. ii, § 17). The Presbyterian Church adopts the
doctrine of the Westminster Confession on fasting (see
above); makes 'public solemn fasting' one of the
ordinances established by Christ in the Church (Form
of Government, ch. vii); ordains a fast-day in the con-
gregation before an ordination (ch. xxv), and declares
that while 'there is no day under the Gospel com-
manded to be kept holy except the Lord's day, which is
the Christian Sabbath, nevertheless, to observe
days of fasting and thanksgiving, as the extraordinary
day of the Lord, every one is free to do, as he may judge
both scriptural and rational. Fasts and thank-
givings may be observed by individual Christians or
families in private; by particular congregations: by
a number of congregations contiguous to each other;
by the congregations under the care of a presbytery
or of a presbyter, or by all the congregations of our
Church. It must be left to the judgment and discre-
tion of every Christian and family to determine when
it is proper to observe a private fast or thanksgiving,
and to the church-sessions to determine for particular
congregations, and to the presbytery or synods to de-
termine for: larger districts. When it is deemed ex-

pedient that a fast or sacrifice should be general; the call for them must be judged of by the Synod or General Assembly. And if at any time the civil power should think it proper to appoint a fast or thanksgiving, it is the duty of the ministers and people of our society, as well as we live under government, to pay all due respect to the same" (Directory for Worship, ch. xiv).

Besides all due respect heretofore quoted, consult Tillotson, Sermons (serm. 89); Bingham, Orig., Ecc. bk. xxii, ch. iii.; Coleman, Ancient Collections, p. 552 sq.; Bishop Morgan, in Meth. Church Review, 1842, Oct. 15; Aug. Augustus, Denkwurdigkeiten, xi, 311 sq.; Suicer, Theanum, s. v., n. 50a; Ducange, Glossarium, s. v., Jejunium; Ferraris, Promota Bibliotheca, iv, 867 sqq. (ed. Migne); Weasley, Sermons, i, 245.

For fasting, see Fasting. An old orthography for Fasting (qv.)

Fasting (prop. דק, che'lob). [For the use of the word as a verb, see Fatted Fowl.] The Hebrews distinguished between the fast, or pure fast of an animal (דק), and the fast which was intermixed with the lean (יִבְשָׂל, oily pieces, Neh. viii, 10). Certain restrictions were imposed upon them in reference to the former: some parts of the suet, viz., the stomach, the ears and the kidneys, and the tail of the sheep, which grows to an excessive size in many Eastern countries, and is a special delicacy, were forbidden to be eaten in the case of animals offered to Jehovah in sacrifice (Lev. iii, 3, 9, 17; vii, 28). The ground of the prohibition was that the fast was the richest part of the animal, and therefore belied to him (Gen. xvi, 16). It has been supposed that other reasons were superadded, as that the use of fat was unwholesome in the hot climates of Palestine (Maimonides, More Nebuchad., pt. iii, ch. xlvii). There appears, however, to be no ground for such an assumption (Bahr, Symbolik, ii, 382). The presentation of the fat as the richest part of the animal was agreeable to the dictates of natural feeling, and to the analogy in dedicating the first-born and first-fruits to God. This was also the ordinary practice even of heathen nations, as instanced in the Homeric descriptions of sacrifices (I. i, 460; ii, 423; Od. iii, 457), and in the customs of the Scythians (Herod., ii, 47), and Persians (Strabo, xvi, 782). Accordingly, Abel, who brought the first animal sacrifice, not only presented to the Lord "the firstlings of his flock," but "the fat thereof," which, by virtue of its being the best part, was the most suitable for the Lord; or, if the animal was the firstling of the flock (Gen. iv, 4); or if the word here means the fattest of his flock, the same idea is essentially implied. Indeed, the term che'lod is itself significant of the feeling on which the regulation was based, for it sometimes describes the best of any production (Gen. xlv, 18; Num. xviii, 12; Ps. lxxxi, 16; cxlvii, 14; compare 2 Sam. i, 22; Judg. iii, 29; Is. x, 16). With regard to the other parts of the fat of sacrifices or the fat of other animals, it might be consumed, with the exception of the liver offered either by a violent or a natural death (Lev. vii, 44), which might still be used in any other way. The burning of the fat of sacrifices was particularly specified in each kind of offering, whether a peace offering (Lev. iii, 9), consecration offering (viii, 25), sin offering (iv, 6), trespass offering (vii, 3), or redemption offering (Num. xviii, 17). The Hebraic fully appreciated the luxury of well-fattened meat, and had their stall-fed oxen and calves (1 Kings iv, 28; Jer. xlvii, 21; Luke xv, 25). This was, however, not a usual practice; and even at this day in the East, domestic cattle seldom undergo any preparatory feeding or fattening before being killed. Hence there is little fat in the carcass except that belonging to the parts specified in the prohibition, which is all more or less of the nature of suet. See Food.

The parts of the fat or suet of the victims which belong to God, and are especially to be applied to the altar, are given in Exod. xxix, 18-22, and Lev. iii, 3-5, as follows: 1. The fat which covers the entrails (םִנְּיָנָיו לִפְתַּלַתָּם בַּלָּבּ = לִשְׁוֹיָנָו), as Josephus rightly has it (Ant. iii, 9, 2; the omentum, which is only to be found in man and mammals, and is very fat in the ox (comp. Aristotle, Hist. Anim. i, 10; Pliny, Hist. Nat. xi, 80). 2. The fat which accumulates around entrails (םִנְּיָנָיו לִפְתַּלַתָּם בַּלָּבּ), and is easily separated therefrom, i.e., the reticular adhering to the colon. 3. The two kidneys, with the fat on them, at the internal muscles of the loins (םִנְּיָנָיו לִפְתַּלַתָּם בַּלָּבּ), as the most fat accumulates near the kidneys (Deut. xxiii, 14; Isa. xxxiv, 6), and to such an extent in sheep that they sometimes die of it (אֲלֹ הֵנָות לִשְׁוֹיָנָו הָאוֹרָו אֲלֹ הֵנָות לִשְׁוֹיָנָו, Aristot. De Part. Anim. iii, 9, and Hist. Anim. iii, 16; Pliny, Hist. Nat. x, 81). 4. The יַחַף, yocheth, which is taken by the Sept. and Josephus (Ant. iii, 9, 2) to mean a λοχος ὀρα ὑπορεος, the greater lobe of the liver, similarly the Syrso and Chaldee (נֵבֶג הַבֵּרָה); and is explained by the Talmud (Chullin, xix, 6), Raishi, Kimchi, Solomon ben-Melech, etc., as נֵבֶג הַבֵּרָה = רַם, whereby the Greeks, according to Hippocrates, understood the greater and thickest of the five segments of the liver (Bähr, Symbolik, ii, 384). This meaning of יַחַף is also defended by Peccatio (Bk. liv. ii, c. xiv), and followed by Lo Clerc, J. D. Rosenmüller, Kittel (on Exod. xxiii, 13), and others. But the Vulgate, Luther, Tyndale, the Bishops' Bible, the Geneva Bible, the A. V., Piscator, De Wette, Knobel, Fürst, etc., take it to denote omentum minus, which is preferable, for the lobes have no accumulation of fat. 5. The tail (נֵבֶג יַחַף, יַחַף, A. V., "rump") of a sheep (Lev. vii, 5), which, in a certain species (ὄστεα λακτιακατο), contains a great quantity of fat. It is for this reason that the eating of fat is forbidden (Lev. iii, 17). It affords a delicate marrowy substance much used in pilaus and other messes which require to be lubricated by animal juices. The Rabbinical Jews maintain that the prohibition of it is restricted to the sacrifices, while the Karaites regard the eating of the tail as absolutely forbidden. See Sheep.

One of the metaphorical senses of fat (in the Hebrew) is noticed above. By a natural figure, "fat" is occasionally employed in Scripture as a figure for the abundance of mind, as if the heart were covered with thick fat, and therefore insensible (Ps. xvii, 10). See Oil.

Fatalism, the doctrine of an inevitable necessity, implying an omnipotent and arbitrary superior power. It is derived from the Latin fatum ("what is spoken or decreed," passive participle of fortis). The Greeks expressed it also by the passive participle ἐννιτομος (Destiny, the Goddess of Fate) and ἐννια (delay, destiny, goddess who dispenses fate) have an active meaning.

1. In Homer, ἔννια has a twofold force: it is sometimes considered as superior to marvel, then again as inferior to him; a twofold force which Nägelsbach correctly expounds (after Delbrück and Creuzer) by saying that in Homer the monarchial will of Zeus does not appear as directly opposed to the contrary efforts of the other gods. Yet the human mind has a monothetic tendency even among the heathens, who seeks to give to the heavens one supreme ruler, and to unite all the gods into one exclusive unity. On the other hand, however, this unity is inert and dead, and this leads Homer to identify it with the highest, the living god— with the "will of" the other gods. The gradual development of Greek philosophy led to the thought of representing the supreme ruling power by ἔννια: so we find it in Herodotus, i, 91, τετοιον.
FATALISM

Mother of all events, avert not thy purpose, ye gods.

This agency of Fate was afterwards made to apply to the regulation of the outward life of men, and the conception of Fate as the ruling power of the universe became deeper and more spiritual; so Anaxagoras recognizes it in his "World of Things," and Plato does the same, especially in Philebus (31, 4, τοῦ τοῦ δελετον λόγον μεν τοις διακριτως καταλαβειν ἐν τοις ἰδανικον). This same tendency towards a spiritualization of Fate is found in the tragic authors, especially in Sophocles, who has happily expressed these views in his "Oedipus Colone" (267, [ed. Schneidewin]): ἰουτί τοῦ γεγονον μου πιστον ιστι μάλιστα ἀλλ᾽ ἵνα ἤδειπνος (for my actions are rather to be called my <i>d. stining</i> than my own). But this fate does not exclude guilt on the part of man, for the curse rested from the first on the individual, as is shown especially in the revelation of fearful guilt in the "Edipus lar," and the possibility of pardon in the "Colom." The Greek tragedy is based on this very antagonism between individual being and the supreme world power. After Sophocles, the two notions of the word Μορφα were separated; the concept of gradually indiges out more distinctly. From Euripides down to the Epicureans a tendency prevailed to make the power of Fate subservient to human caprice, and to make it subordinate to Ίννα (chance), which plays an important part in Thucydides. Blind chance was made to rule the earth. The Epicureans, who emphasized the "essence of pure inarticulate world," "so that the gods no longer interfering in human affairs, it became matter of indifference whether they were worshipped or not. On the other hand, Stoicism maintained that to live in accordance with the laws of nature, i.e. to resign one's self to the necessary courses of things, is the true wisdom of life. In this point, as in others, the views of the Stoics and the Epicureans were directly opposed to each other [see Epicurean Philosophy], yet in the more inward and spiritual, as it is shown especially in the "indecisive future," whether the result of separate accidental chances or of the general law of nature, there is nothing to be done. The Moira, acting according to higher laws incomprehensible to humanity, is thus confounded with blind destiny.

(2) The conception of gradually indiges out more theories of fatalism is as follows: (1) Destiny is a dead, blind power; (2) human liberty is completely and irresistibly controlled by destiny. Under this twofold aspect, fatalism finds its most complete realization in Mocheus; but it has also been defended on scientific grounds within the sphere of Christendom. The doctrine of absolute predetermination, in its hidden <i>absolutum decr"etum</i> (see Luther, De servo arbitrio, and Ullmann, <i>Studien u. Kritiken</i>, 1847, i, 2), resembles the heathen conception of Fate. In its relation to spiritual and eternal life, fatalism is generally based on (1) the pantheistic view of the world, which swallows up individual freedom and responsibility, so that (as by Spinoza) all our thoughts and actions are represented as but the thoughts and actions of God manifested through us. This leads naturally to (2) the determinism of destiny, which considers the world as so ordered by the immutable laws of nature that individual life and actions are but cogs of one of the wheels of the universal machinery; and to modern materialism, according to which thought is but a natural secretion of the brain.

The Christian idea of God is directly opposed to all fatalism, whether modern or materialistic. In Christian thought, God is not blind chance, dead fate, or a dark, unknown force of nature; but God is spirit, a living God, a personal Being, who is love and the Father of the living; and this living God of the living God has endowed man with his own image, and therefore freedom, in the exercise of which endowment man is to become himself a participant in the fulfillment of the divine decrees, a "co-worker" with God, and, as such, not only capable of aiding in the spread and consummation of the kingdom (or royal sway) of God upon the earth, but also bound to aid in it.—Herzog, "Real-Encyclopädie," iv, 640 sq. (from which this article is chiefly a translation).—Cf. Intellectual System of the Universe, bk. i, chap. i; Hamilton, "Discussions in Philosophy;" Werner, "Geschichte der apololy. Literatur" (Schaffhausen, 1887). See Materialism.

Father (έα, ab, a primitive word, but following the analogy of τικειον, to show kindness, Gesenius, "Thesaurus," p. 6-8; Chaldee, 28, ἀρχήν). Compare Son.

This word, besides its obvious and primary sense, bears in Scripture a number of other applications, most of which have, through the use of the Bible, become more or less objectionable. See Gesenius's ἄρχη and Robinson's "Greek Lex." (1) Father is applied to any ancestor near or remote, or to ancestors ("fathers") in general. The progenitor, or founder, or patriarch of a tribe or nation was ordinarily or pre-eminently his father, as Abraham of the Jews. (2) Father is applied also as a title of respect to any head, chief, ruler, or elder, and especially to kings, prophets, and priests (Jude xvi, 10; xviii, 11; i Sam. xii, 12; 2 Kings ii, 12; v, 13; vi, 21; xiii, 14; Prov. iv, 1; Matt. xxiii, 9; Acts vii, 2; xxii, 1; 1 Cor. iv, 15, etc.). Also of protector or guardian (Job xxvi, 16; Ps. xxiii, 5; Dan. xxvii, 8). Hence of seniors, especially of Church fathers. See below.

(3) The author, source, or beginning of anything is also called the father of the same, or of those who follow him. Thus Jabal is called "the father of those who dwell in tents, and have cattle:" and Jabad "the father of those who dwell in tents, and have cattle:" (Gen. iv, 21, 22; comp. Job xxxviii, 28; John viii, 44; Rom. iv, 12). In the Talmud the term father is used to indicate the chief; e.g. the principal of certain works are termed "fathers." Objects whose contact causes pollution are called "fathers" of defilement (Mishna, Ḥak. u. Esa. 2, vol. ii, p. 29; Demarch, I, vol. ii, p. 137, Surenh.). This use of the word is exceedingly common in the East to this day, especially as applied in the formation of proper names, in which also the most curious Hebrew examples of this usage occur. See A� באנה.

(4) As an extension of all the foregoing senses, the term father is very often applied to God himself (Gen. xlii, 19, 20; Exod. iv, 22; Deut. xxxi, 6; 2 Sam. vii, 14; Psa. lxxxxix, 27, 28; Isæ. lxiii, 16; Isa. lvi, 4). Indeed, the analogy of language would point to this, seeing that in the Old Testament, and in all the Syro-Arabian dialects, the originator of anything is constantly called its father. Without doubt, however, God is in a more especial manner, even as by covenant, the Father of the Jews (Jera. xxxi, 9; Isæ. lxiii, 10; lxxiv, 8; John viii, 41; v, 45; 2 Cor. vi, 16); and also of all such, or, rather, of the whole race of believing persons, who are called "sons of God" (John i, 12; Rom. viii, 16, etc.). Thus Jesus, in speaking to his disciples, calls God their Father (Matt. vii, 4, 7, 15; x, 20, 29; xiii, 43, etc.). The apostles also, for themselves and other Christians, call him "Father." (Rom. i, 7; 1 Cor. i, 8; 2 Cor. i, 2; Gal. i, 4; and many other places). See ἀναμαρτανων ἀναμικνων, § 11. It lies, of course, at the root of that so-called patriarchal government (Gen. iii, 16; 1
FATHER

FATHERS OF THE CHURCH

Coc. xi, 8), which was introductory to the more definite systems that followed, and that in part, but not wholly, superseded it. When, therefore, the name of "father of nations" ( שָּׁבָּעָה ) was given to Abram, he was thereby held up not only as the ancestor, but as the example of those who should come after him (Gen. xvi, 13; Rom. iv, 17). The blessing was regarded as conferring special benefit, but his male-child special injury, on those upon whom it fell (Gen. ix, 25, 27; xvii, 27-40; xliii, 15, 20; xlii); and so also the sin of a parent was held to affect, in certain cases, the well-being of his descendants (2 Kings, v, 27), though the law forbade the punishment of the son for his father's transgression (Deut. xxiv, 16; 2 Kings xiv, 6; 2 Esdr. xviii, 20). The command to honor parents is noticed by the apostle Paul as the only one of the Decalogue which bore a distinct promise (Exod. xx, 12; Ephes. vi, 2), and disrespect towards them was condemned by the law as one of the worst of crimes (Exod. xx, 15, 17; 1 Tim. i, 9; comp. Virgil, Æn. vi, 609; Aristoph. Rot. 274-778). Instances of legal enactment in support of parental authority are found in Exod. xxii, 17; Numb. xxix, 3, 5; xii, 14; Deut. xx, 19, 21; xxx, 9, 11; xxxii, 19, 21; Deut. xix, 13, 15, 21; Philo, L. c. 9). From the spirit of the law in this direction may be seen in Prov. xi, 1; xv, 5, xviii, 25; xix, 13; xx, 20; xxiv, 24; xxx, 17; Isa. xiv, 10; Mal. i, 6. The father, however, had not the power of death over his child under the Mosaic law (Deut. xxi, 18-21; Philo, L. c.).

The authority of a father was thus very great in patriarchal times; and although the law of Moses required the parent to bring his cause of complaint to the public tribunals (Deut. xxi, 18-21), all the more real powers of parental character were not only left unimpaired, but were made in a great degree the basis of the judicial policy which that law established. The children, and even the grandchildren, continued under the roof of the father and grandfather; they labored on his account, and were the most submissive of his servants. The property of the soil, the power of judgment, the civil rights, belonged to him only, and his sons were merely his instruments and assistants. If a man were killed by any body, the father was the head, and the sons the members, moving at his will and in his service. There were exceptions, doubtless, but this was the rule, and, with some modifications, it is still the rule throughout the East.

Filial duty and obedience were, indeed, in the eyes of the Jewish legislator, of such high importance that great care was taken that the paternal authority should not be weakened by the withdrawal of a power so liable to fatal and barbarous abuse as that of capital punishment. Any outrage against a parent—a blow, a curse, or incorrigible profligacy—was made a capital crime (Exod. xi, 15, 17; Lev. xx, 5). If the offense was public, it was taken up by the court as a crime against Jehovah, and the culprit was brought before the magistrates, whether the parent consented or not; and if the offense was hidden within the paternal walls, it devolved on the parents to denounce him and to require his punishment.

It is a beautiful circumstance in the law of Moses that this filial respect is exacted for the mother as well as for the father. The threats and promises of the legislator distinguish not the one from the other; and the fifth commandment associates the father and mother in precisely equal claim to honor from their children (see Gallic. Esprit de la Legislation Romaine, ii, 69, 122-129). Comp. WOMAN.

Among Mohammedans parental authority has great weight during the time of pupilage. The son is not allowed to eat, scarcely to sit, in his father's presence. Disobedience to parents is reckoned one of the most heinous of crimes (Burchhardt, Notes on Bed. i, 356; Lane, Mod. Epy. i, 84; Atkinson, Travels in Siberia, p. 569).

Father (God the) was usually represented in early Christian art by a hand, which was usually extended through a cloud. The principal subjects in which God the Father is represented by a hand are the scenes from the creation: Moses receiving the law, Moses at the burning bush, the sacrifice of Abraham, and the burning of the sacrifices at the passover. The hand is often given as holding out wreaths or crowns to saints and martyrs at their death, or their ascension to Paradise. As early as the fifth century, God the Father is represented as an old man. This symbol predominated during the later Middle Ages, and is the one now universally adopted by Christian artists. The figures of God in the creation by M. Angelo and Raphael, in the Sistine chapel, and in the Vatican, are among the grandest concepions in all art. God the Father is also represented as an old man in the representations of the Trinity (q. v.).—Martigny, Dictionnaire des Antiquitez Chrétiennes, 1860.

Father-in-law: 1. דָּם, chum (from תְּכֹב, to join in affinity; see MOTHER-IN-LAW), Gen. xxxviii, 13, 25; 1 Sam. iv, 19, 21. 2. תְּכֹת, cuthoth (participle of תְּכֹב, to marry), one marrying a daughter, Exod. iii, 1; iv, 18; xviii, 1-27; Num. x, 29; Judg. i, 16; iv, 11; xix, 4, 7, 9. 3. פָּרָשַת, strictly one related by marriage, like No. 1, John xviii, 18. See AFFINITY.

Father's Brother, דָּם, dov (strictly one beloved, a friend, as in Isa. v, 1), an uncle (q. v.), Num. xxxvi, 11; 2 Kings xxiv, 17; fem. FATHER'S SISTER, דָּם, dodah, 1 Esdr. vi, 20, an aunt (q. v.).

Fathers of the Church (Pateres Ecclesiæ), a name applied to certain ancient Christian writers, who have preserved in their writings, to a certain extent, the history, doctrine, and traditions of the early Church. The use of the name "father" for this purpose originated in the Oriental habit of styling the relation of teacher and pupil that of "father" and "son." So Alexander the Great called Aristotle his "father," Elisha calls Elijah his "father" (2 Kings ii, 12); the pupils of the prophets were called "sons of the prophets." At an early period in the Christian Church, this title was given to preachers and teachers; and later, the title "father" (papa, popa) was given to bishops exclusively.

The Greek Church closes the list of the "fathers," properly so called, with John of Damascus (+ 754), the Latin Church with Gregory the Great (+ 604). The use of the word "father" is by Protestants limited to the more distinguished teachers of the first five or six centuries, excepting, of course, the apostles, who stand far above them all as the inspired organs of the Holy Ghost. It applies, therefore, to the period of the eccumenical formation of doctrines, before the separation of Eastern and Western Christendom (Schaff, Church History, i, 454). The Roman theologians, in the following qualities as the marks of a "Church father," viz. antiquity, orthodoxy, sanctity of life, and the approval of the Church (Fessler, Institutiones Patrologiae, i, 26). Accordingly, the Roman Church denies the title fathers to such men as Origen, Tertullian, Laetantius, Eusebius, etc., because their writings are not held to be in all respects orthodox; they are designated, not as patriae, but as scriptores ecclesiastici (ecclesiastical writers). At a later period, the title doctors ecclesiæ (doctors of the Church) was given to writers supposed to have the qualities cited above as constituting the criterion of "substituting remissa erudiendos for antiquitatis. A decree of pope Boniface (A.D. 1298) assigns the title mætis ecclesiæ doctors to the four Latin fathers Ambrose, Au
Fathers of the Church

Clement of Alexandria succeeded Pantaenus in the catechetical school of the city that city 188 or 189; quitted Alexandria 202; died about 217. Tertullian became a Montanist about the year 200; his Apology was composed (188 or 205); his work against Mucian, 207; has left a great variety of tracts on the vices and customs of his age—as on the theses of the followers of the Church, idolatry, second marriages, the soldier's crown, and on flight in persecution, etc.; died about 240. Hippolytus, bishop of Portus Romanus, wrote, besides many other pieces, Philosophomenon, newly discovered; died about 230. Origene, bishop of the best of the catechetical school at Alexandria 204; went to Rome, and returned to Alexandria, 218; went to Cæsarea, in Palatina, 215; ordained at Cæsarea, and afterwards settled there, about 220; retired to Cappadocia 235; returned to Cæsarea 239; a laborious scholar. In a letter to a Christian, he compiled a Hexapla, or Polyglott Bible; wrote commentaries on Scripture, some of which survive; a treatise on prayer; and a defence against Celsus; thrown into prison 250; died 254. Cyprian, bishop of Carthage, 248; fled from Carthage into Africa, 250; was put to death 257; author of epistles, addresses, and tracts; advocate of Episcopacy; suffered martyrdom 258. Dionysius, named the great, bishop of Alexandria, a scholar of Origen, 247 or 248; died 255. Gregory (Thaumaturgus), bishop of Neo-Cæsarea, flourished at the same time, composed a creed, an oration in praise of Origen, and a paraphrase on Ecclesiastes; died about 270. Victorinus wrote scholia on the Apocalypse; died 308. Arnobius wrote his treatise of seven books Against the Gentiles about 305; died probably about 325.

The chief among them are (lists from Exdile, Riddle, Also.): Justin Martyr, born probably about A.D. 100; left Palestine 152; presented his first Apology to Antoninus about (140 or 148); wrote his second Apology in the reign of Marcus Aurelius, probably about 162–4; has left a variety of other works, and a Dialogue with Trypho the Jew; suffered martyrdom at Rome about 165. Hermas wrote his work, Vision of the Heathen Philosophers, probably about 170. Dio Chrysostom wrote some epistles; all lost except a very few fragments; 6170. Hesychius, originally a Jew, wrote History of the Church, of which only a few fragments survive, about 175. Tatian wrote an Oratio towards the Greeks, which has been lost; probably died about 175. Athenag. wrote an Apology for the Christians, and also on the resurrection, both of which have been translated into English, 176. Theophilus, bishop of Antioch, wrote his work on religion to Polybius about 190; died 181. Irenaeus, bishop of Lyon, Gaul, in the latter part of the second century (became bishop about A.D. 177), wrote his work Against Heresies, or A Refutation and Subversion of Knowkedge falsely so called, between A.D. 182 and 186; died about A.D. 202. Minucius Felix wrote his Octavius, or Defence of Christianity, about 202.

I. The Apostolical Fathers are those Christian writers (of whom any remains are now extant) who are supposed to have been contemporary with one or more of the apostles. This is the only list which is given before A.D. 120. There are five names usually given as those of the apostolic fathers, i.e. there are five men who lived during the age of the apostles, and who did converse, or might have conversed with them, to whom writings still extant have been ascribed, viz. BARNABAS, Clement of Rome, Ignatius, Theophilus, and Hermas. The following works are generally counted to these writers: 1. The Epistle of Barnabas [see Barnabas]; 2. Two epistles of Clement, bishop of Rome, to the Corinthians [see Clement of Rome]; 3. Several epistles of Ignatius, bishop of Antioch [see Ignatius]; 4. An epistle of Polycarp, bishop of Smyrna, to the Philippians [see Polycarp]; 5. The Epistle (of an unknown author) to Diognetus [see Diognetus]; 6. The book entitled Pastor Hermæ [see Hermæ]. Certain fragments of Papæs are also commonly included among the apostolical fathers. See Papæs. Of the writings attributed to these fathers, some at least are of doubtful genuineness (on this point, see the individual titles referred to). See the article Apostolical Fathers, vol. i, p. 315.

II. The Anti-Nicene Fathers are those whose writings are ascribed to the Council of Nicaea, A.D. 325. The chief among them are (lists from Exdile, Riddle, Also.): Justin Martyr, born probably about A.D. 100; left Pale-
FATHERS OF THE CHURCH

Exandria 806; fled to Rome 841; returned to Alexandria 846; fled to the deserts of Egypt 856; wrote a discourse against the Gentiles, on the incarnation; against the Arians, on the incarnation; against Apollinaris, etc.; died 878.

Basil, surnamed the Great, born 292; bishop of Caisarea, in Cappadocia, 379; 379 to 379, 377, as patriarch, episcopis, panegyricis, Hexameron, and letters; died 379. Eiphraim the Syriac, deacon of Edessa; published a variety of commentaries, polemical treatise, and smaller works; died about 879.

Cyril of Jerusalem, born 315; bishop of Jerusalem 350; wrote On the Priority of the Baptist, a controversy; 386; died 386.

Gregory of Nazianzus, born 328; ordained deacon 361; bishop of Sussa 372; bishop of Constantinople 381; wrote discourses, poems, and letters; died about 390.

Gregory of Nyssa, born 305; bishop of Nyssa 372; wrote a Hexameron, life of Moses, on prayer, along with orations, panegyrics, tracts, and letters; died about 395.

Ambrose, born 340; archbishop of Milan 374; published annotations on Scripture, discourses, and miscellaneous treatises; died about 397.

Epiphanius, bishop of Salamis, born about 380; wrote a Panarion, or a treatise on heresies, etc.; died 403.

Chrysostom, born at Antioch about 344; ordained presbyter in that church 386; bishop of Constantinople 386; deprived and restored 403; banished 404; was again ordained; was one of the most famous and eloquent of the Christian writers; wrote many commentaries, homilies, orations, with several controversial pieces; died 407.

Rufinus, presbyter of Aquileia, engaged in controversy with Jerome 384; published a great many Latin translations, as well as original works; died 410.

Jerome, born 318; in Rome 368; ordained presbyter about 387; translated or revised the Latin Vulgate; wrote commentaries on most of the books of Scripture, controversial tracts, an Onomasticon, and lives and works of preceding ecclesiastical writers; died 420.

Theodorus, bishop of Mopsuestia, in Cilicia, about 382; wrote commentaries, in which he expanded the grammatical sense; but only a few brief fragments remain; died about 428.

Augustine, born 354; baptized 387; ordained presbyter at Hippo 381; coadjutor of Valerius, Bishop of Hippo, 395; began his work, De Civitate Dei, 402; published Confessions; engaged in controversy with the Pelagians, Donatists, and Manichæans; composed a great variety of tracts bearing on systematic theology, many of which, both extant and otherwise, have no difficulty in answering the question, Where was Christianity then? for it existed then, as it exists still, in 'the Word of God, the Gospel of our salvation;' and it was neither dead nor asleep, but alive and active in the Church of the Catacomb' (Buchanan-Archeology of Justification, Edinb. 1867, p. 481).

III. Post-Nicene. The principal post-Nicene fathers are as follows:

Eusebius (Pamphylia), born about A.D. 270; bishop of Cesarea, in Palestine, 315; was a learned and laborious writer; besides many other things, the Evangelical Preparation, in fifteen books; Evangelical Demonstrations, in twenty books—the half of which is lost—but both works belong to Apologetics (q. v.); an Ecclesiastical History, in ten books; died 340.

Julius Firmicus Maternus, who wrote on the error of profane religions; flourished about 340.

Hilary, bishop of Poitiers, born 305; banished to Phyrgia 355; wrote on the Trinity, on councils, against the Arians, with a commentary on the Psalms and Matthew; died 365.

Athanasius, born at Alexandria about 296; present as deacon at the Council of Nicaea 325; bishop of Al-
Fathers of the Church

IV. Use and Authority of the Father in Theology.—

On this subject there are three opinions: (a) The Roman and Fuyzeytive view, which puts the "consent of the fathers" in the form of advertisements or incipits to the rules of faith, along with Scripture. See Faith, Rule of. (b) That of the High-Church writers, who, though they acknowledge the Scriptures as the only rule of faith, yet appeal to the fathers as the proper expositors of Scripture and doctrine, and denounce as arrogant and presumptuous those who attempt to oppose modern opinions to what is held to be the sentiment of Christian antiquity. (c) The Protestant view, according to which the fathers are to be treated, like other theological writers, with the deference and respect to which their learning and their virtues may entitle them. "In the ancient church we must always bear in mind that the Scriptures are the only rule of faith, and that we have no right to insist upon the reception, as an article of faith, of any doctrine which is not to be found clearly revealed in Scripture, or which is not deducible from Scripture. Still, the judgment of antiquity on disputed points may be useful; and while we should not put these writers into the position of judges, they may be regarded as competent witnesses. They are also the historians of the Church, and report its customs in successive ages; we must, therefore, have recourse to their writings for information upon matters of ecclesiastical antiquity, just as we refer to the writings of historians for information upon matters of political antiquity."

The scholastic theology (q. v.) began with comments upon citations from the fathers, considered as authoritative (sententiae). When the Reformation began, the Roman divines found themselves driven anew to the authority of the fathers for authority for the doctrines and practices which Luther and his coadjutors showed to be without foundation in Scripture. More loudly than even the scholastics did the controversy of this period proclaim the authority of patristic tradition in settling questions of faith. We have here a clear polemical reason for the view taken of the fathers in Roman theology (see it stated in Alæus, Pædagogia, § 5; and in several articles Faith, Rule of; Tradition). Not unnaturally, then, have the Roman theologians been the most diligent workers in this field of Christian literature. But, on the other hand, the Roman theory that questions of doctrine can only be settled by councils (or by pope and council), has not been without effect in leading Roman writers to depreciate the early writers, or, at least, to see their defects clearly. So Petavius, whose Opus De Theodiciæ Dogmatibus (Paris, 1644–50; new edit. vol. i. Rome, 1857, fol.) is a storehouse of patristic learning, points out the theological errors of Athenagoras, Tertullian, and others, with great clearness. So also J. H. Newman, in the Introduction to his Essay on the Development of Christianity among the Early Fathers (pp. 12-13, N. Y. ed. 1841, 12mo), attacks the "incompleteness" and even of the "errors" of the ante-Nicene theology, even in the hands of such fathers as Irenæus, Gregory, and Cyprian. This whole Introduction may be considered as an argument against the so-called Tractarian view of the authority of the fathers, and as a polemic against the vaunted superiority and inestimable value of the Catholic Church.

2. The Protestant theologians have, until a late period at least, been divided into two wings on this question of the "right use of the fathers." One of these wings may be represented by Milton (+ 1674) and by Dillõle (+ 1670). Milton, in his tract De Preterial Episcopacy, speaks, in his strong way, of those who, "...content with the plentiful and wholesome fountain of Scripture, seek to themselves teachers, and cannot think any doubt resolved until they run to that undigested heap and fry of authors which they call antiquity. Whosoever time, or the heedless hand of blind and profane editors, or the rude ignorance or the malevolent curiosity, or the huge drag-net, whether fish or sea-weed, shells or shrubs, unpicked, unchosen, those are the fathers." But yet, he adds, in another part of the same tract, "He that thinks it the part of a well-learned man to have read diligently the ancient stories of the Church, and to know the language and usages of the times, in which the fathers wrote, shall have all judicious men consent with him; not hereby to control and new-fangle the Scriptures, God forbid! but to mark how corruption and apostasy creep in by degrees, and to gather up, wherever we find the remaining sparks of original truth, whereunto we must, according to the apostle, continue to walk."

Milton, it is true, quotes the Gospel (Matt. xvi. 19) and the oracle, whereas the fathers hold the Epistle to the Romans, while Dillõle and others quote the Gospel (Matt. xvi. 19) and the oracle, whereas the fathers hold the Epistle to the Romans, and being an engagement upon ourselves of assenting to all that it charges upon us." Milton, it is plain, was writing against the Anglican admirers of antiquity as much as against the Roman Catholics.

Dillõle wrote a treatise, De Vera Usus Pastoralum (1556; Am. ed. The Right Use of the Fathers, Philadelphia, 1841, 12mo), which formed an epoch in the history of opinion on this subject. Warburton, in his Introduction to the Juvenal, and the Juvenal, its Defence, as follows: "When the great defection was made from the Church of Rome back again to the Church of Christ, the Reformed, though they shook off the tyranny of the pope, could not disengage themselves from the unbounded authority of the fathers, but carried that prejudice with them, as they did some others of a worse complexion, into the Protestant religion. For in sacred matters, as novelty is suspicious and antiquity venerable, they thought it for their credit to have the fathers on their side. They seemed neither to consider antiquity in general as a thing relative,
nor Christian antiquity as a thing positive; either of which would have shown them that the fathers themselves were modern compared to that authority on which the Reformation was founded, and that the Gospel was that true antiquity on which all its followers should repose themselves. The consequence of which is that they are swift to turn to the Church; the great names of the apostle Paul, Dr. Hooker, Andrews, and many others, show a list of patristic scholars hardly excelled in the Roman schools. Utter set great store upon the study of the fathers, not simply on polemical, but also on scientific grounds. Dr. Parr says of him: "Indeed, he had so great an esteem of the church fathers that he was likely to be endless; for, though the gross corruptions of Popery were certainly later than the third, fourth, and fifth centuries, to which the appeal was usually made, yet the seeds of them being sown, and beginning to pullulate, it was but too plain there was hold enough for a skilful debater to draw the fathers to his own side, and make them water the sprouts they had been planting: observing this, I say, he wisely projected to shift the ground, and force the disputants to vary their method both of attack and defence. In order to do himself justice, his observations on the Use of the Fathers, in which, with uncommon learning and strength of argument, he showed that the fathers were incompetent deciders of the controversies now on foot, since the points in question were not formed into articles till long after the ages in which they lived. This was brought home to him, as it is to the table: degrading them from the rank of judges into the class of simple evidence; in which, too, they were not to speak, like Irish evidence, in every cause where they were wanted, but only to such matters as were agreed to be within their knowledge. Had this learned critic stopped here, his book was done from blame; but at the same time, his purpose had in all likelihood proved very ineffectual, for the obliquity of old prejudices is not to be set straight by reducing it to that line of right which barely restores it to integrity. He went much farther; and by showing occasionally that they were absurd interpreters of Holy Writ, that they were bad reasoners in morals and very loose evidence in facts, he seemed willing to have his readers infer that, even though they had been masters of the subject, yet these other defects would have rendered them very unsatisfactory deciders. However, the work of this famous foreigner had great consequences, and especially with us here at home. The more learned among the nobility (which at that time was of the republic of letters) were the first who emancipated themselves from the general prejudic. It brought the excellent Lord Digby, and the learned both of the court and of the city, to turn his theological inquiries into a more useful channel; and his great rival in arts, the famous lord Digby, found it of such use to him in his defence of the Reformation against his cousin Sir Kenelm that he has even epitomized it in his fine letter on that subject. But what it has chiefly to boast of is that it gave birth to the two best defenses ever written on the two best subjects, religion and liberty—I mean Mr. Chillingworth's Religion of Protestants, and Dr. Jeremy Taylor's Liberty of Prophesying. In a word, it may be truly said to be the storehouse from whence all who have since written popularly on the character of the fathers have derived their materia" (cited in Preface to the Philadelphia edition of Dailie).

3. The other Protestant wing consists of the early writers after the Reformation who sought in the fathers to find weapons against Rome, and of their successors, especially in the Church of England, who have favored what are called High-Church views. Among Continental writers, Scultetus (Medalles Theologis Potrum Synagogen, Frankfurt, 1593; Heidel, 1613; Frankfurt, 1615) sought to show that the anti-Nicene fathers had been corrupted and misinterpreted by Roman writers, and that Protestant doctrines were nearer to the ancient than the Roman Catholic doctrines. The Anglican divines, from an early period of the Reformation, made great use of the fathers in the controversy with Rome. Moreover, they found, or believed that they found, the fathers very serviceable in their warfare for episcopacy. Patristic studies became fashionable in the Church; the great names of the apostle Paul, Dr. Hooker, Andrews, and many others, show a list of patristic scholars hardly excelled in the Roman schools. Utter set great store upon the study of the fathers, not simply on polemical, but also on scientific grounds. Dr. Parr says of him: "Indeed, he had so great an esteem of the church fathers that he was likely to be endless; for, though the gross corruptions of Popery were certainly later than the third, fourth, and fifth centuries, to which the appeal was usually made, yet the seeds of them being sown, and beginning to pullulate, it was but too plain there was hold enough for a skilful debater to draw the fathers to his own side, and make them water the sprouts they had been planting: observing this, I say, he wisely projected to shift the ground, and force the disputants to vary their method both of attack and defence. In order to do himself justice, his observations on the Use of the Fathers, in which, with uncommon learning and strength of argument, he showed that the fathers were incompetent deciders of the controversies now on foot, since the points in question were not formed into articles till long after the ages in which they lived. This was brought home to him, as it is to the table: degrading them from the rank of judges into the class of simple evidence; in which, too, they were not to speak, like Irish evidence, in every cause where they were wanted, but only to such matters as were agreed to be within their knowledge. Had this learned critic stopped here, his book was done from blame; but at the same time, his purpose had in all likelihood proved very ineffectual, for the obliquity of old prejudices is not to be set straight by reducing it to that line of right which barely restores it to integrity. He went much farther; and by showing occasionally that they were absurd interpreters of Holy Writ, that they were bad reasoners in morals and very loose evidence in facts, he seemed willing to have his readers infer that, even though they had been masters of the subject, yet these other defects would have rendered them very unsatisfactory deciders. However, the work of this famous foreigner had great consequences, and especially with us here at home. The more learned among the nobility (which at that time was of the republic of letters) were the first who emancipated themselves from the general prejudice. It brought the excellent Lord Digby, and the learned both of the court and of the city, to turn his theological inquiries into a more useful channel; and his great rival in arts, the famous lord Digby, found it of such use to him in his defence of the Reformation against his cousin Sir Kenelm that he has even epitomized it in his fine letter on that subject. But what it has chiefly to boast of is that it gave birth to the two best defenses ever written on the two best subjects, religion and liberty—I mean Mr. Chillingworth's Religion of Protestants, and Dr. Jeremy Taylor's Liberty of Prophesying. In a word, it may be truly said to be the storehouse from whence all who have since written popularly on the character of the fathers have derived their materia" (cited in Preface to the Philadelphia edition of Dailie).

4. A new impulse was given to the study of the fa-
FATHERS OF THE CHURCH

thers in England by the so-called Catholic revival in that Church in the first half of the 19th century. The old reliance on the authority of the laity and, more, on a blind following of their guidance, seemed to take pos-
session of the leaders of that movement. One of its
best fruits was the publication of the Library of the
Fathers (see below). The movement gave rise, as is
well known, to a bitter controversy, reopening the
whole question of the character of the Church, their
trustworthiness as witnesses, their authority as teach-
ers, and the general utility of studying their writings.

We cite a few specimens:

Coleridge, in his Notes on Huckle, especially on his
Sermans, remarks: "Let any competent judge read
Hackett's Life of Archbishop Wharton, or their theo-
spermons, and so measure the stultifying, nullifying ef-
fect of a blind and uncritical study of the fathers, and
the exclusive presupposition in favor of their authority
in the minds of many of our Church dignitaries in the
reign of Charles I." (Works, Harpers' ed. N. Y., v. 129.)

Dr. Arnold, of Rugby, who was a hearty hater of the
Tractarian movement, writes on the authority of the
fathers as follows: "In fact, it would greatly help to
clear this question if we understand what we mean by
allowing or denying the authority of the so-called fa-
thers. Is our authority as Augustine, according to
the sense in which I use it, I should either ac-
knowledge it or deny it. The writers of the first four
or of the first seven centuries have authority just as
the scholastics and ancient commentators have; some
of them, and in some points, are of weight singly; the
agreement of many of them has of such weight; the
agreement of almost all of them would have great
weight. In this sense I acknowledge their authority,
and it would be against all sound principles of criti-
cism to deny it. But if by authority is meant a de-
cative power, authority, which may not be question-
ted, then it is the clear authority which is an abso-
tute, to the great divines of the Reformation.

"There is much truth," he says, "though perhaps without
some exaggeration of phrase, in what Coleridge says
(Reformation, ii. 270) with reference to Luther, Melan-
cthon, and Calvin, that 'the least of them was not infe-
rior to Augustine, and worth a brigade of the Cyp-
rians, Firmilians, and the like.' Surely there is noth-
ing surprising in this. The marvel, the contradiction
to the whole course of history would be if this were
the case, unless we suppose that the special illu-
mination which has been granted to a race was stowed
on the chief teachers of Christianity down to the
last of the fathers, was then withdrawn, and has been
withhold ever since. But for such a limitation and
restriction of the gifts of the Spirit no ground can be
discovered, either in Scripture or in the nature of
man; nor can the history of the Church, as we have
facts to support it. . . . It is next to a moral impossi-
bility that men living in the desecration of the ancient
world, under the relaxing and palying influences of
the Roman and Byzantine empires, when all intellec-
tual and moral life was fast waning away, and the
grand and stirring ideal of the East, which carried
forth the energies of the classical nations in their
prime had been superseded by rhetorical tumor and
allegorical and grammatical trifling, should have mounted
to such a pitch of intellectual power as to be five
beyond the reach of the chief teachers of the Church.
When all the faculties of the now world were bursting
into life, and when one region of power another was
laid open to man, and called him to rise up and
possess of it. . . . There is no antecedent improba-
bility that a theologian in the sixteenth century
should have been wise enough to allow and an expounder
of theological truth as one in the fourth or fifth. Though
the earlier divines may have had certain special ad-
vantage, the advantages enjoyed by those in the later
period were far greater and more important; and if
they had peculiar temptations to lead them astray, so
had the others. The epoch at which a man lives does
not afford us a criterion for judging of the truth of
what he says, except so far as his testimony may be
appealed to concerning facts; in other respects the
value of his writings must be determined on different
grounds by candid and intelligent criticism. Nor is
such criticism of use needful with regard to the fathers
than to any other body of writers. . . . To those who
study the fathers critically and discerningly they still
yield grains of precious gold in abundance, as we see in
the excellent exegetical writings of Mr. Trench.

The superstitious and national passions are ever freed
of displaying their doting by picking out as the special
objects of their complacency not that which is really
valuable—other men might approve of that—but that
which in itself is worthless, nay, mawkishly silly or
wildly absurd. . . . And with which we may say is the
training of some of our patriots who are lapping
into Romanism here described! The issue, indeed, so
far as we are at present acquainted with it, has been
mainly in one direction—towards Rome. This is not
because the fathers of the first four or five centuries
are favorable to the errors and corruptions of Rome

who dare say to a Christian, 'You need not consider
what was the meaning of our Lord and his apostles;
the law is the last word, the last and final word of
Ambrose, or Chrysostom; that meaning has superseded
the meaning of Christ.' A Christian must find out
Christ's meaning, and believe that he has found it, or
else he must still seek for it. It is a matter, not of
outward submission, but of inward faith; and if in our
weariness we are person to person, their character of
true trustworthiness as witnesses, their authority as teach-
ers, and the general utility of studying their writings.

We cite a few specimens:

Coleridge, in his Notes on Huckle, especially on his
Sermans, remarks: "Let any competent judge read
Hackett's Life of Archbishop Wharton, or their theo-
spermons, and so measure the stultifying, nullifying ef-
fect of a blind and uncritical study of the fathers, and
the exclusive presupposition in favor of their authority
in the minds of many of our Church dignitaries in the
reign of Charles I." (Works, Harpers' ed. N. Y., v. 129.)

Dr. Arnold, of Rugby, who was a hearty hater of the
Tractarian movement, writes on the authority of the
fathers as follows: "In fact, it would greatly help to
clear this question if we understand what we mean by
allowing or denying the authority of the so-called fa-
thers. Is our authority as Augustine, according to
the sense in which I use it, I should either ac-
knowledge it or deny it. The writers of the first four
or of the first seven centuries have authority just as
the scholastics and ancient commentators have; some
of them, and in some points, are of weight singly; the
agreement of many of them has of such weight; the
agreement of almost all of them would have great
weight. In this sense I acknowledge their authority,
and it would be against all sound principles of criti-
cism to deny it. But if by authority is meant a de-
cative power, authority, which may not be question-
tioned, then it is the clear authority which is an abso-
tute, to the great divines of the Reformation.

"There is much truth," he says, "though perhaps without
some exaggeration of phrase, in what Coleridge says
(Reformation, ii. 270) with reference to Luther, Melan-
cthon, and Calvin, that 'the least of them was not infe-
rior to Augustine, and worth a brigade of the Cyp-
rians, Firmilians, and the like.' Surely there is noth-
ing surprising in this. The marvel, the contradiction
to the whole course of history would be if this were
the case, unless we suppose that the special illu-
mination which has been granted to a race was stowed
on the chief teachers of Christianity down to the
last of the fathers, was then withdrawn, and has been
withhold ever since. But for such a limitation and
restriction of the gifts of the Spirit no ground can be
discovered, either in Scripture or in the nature of
man; nor can the history of the Church, as we have
facts to support it. . . . It is next to a moral impossi-
bility that men living in the desecration of the ancient
world, under the relaxing and palying influences of
the Roman and Byzantine empires, when all intellec-
tual and moral life was fast waning away, and the
grand and stirring ideal of the East, which carried
forth the energies of the classical nations in their
prime had been superseded by rhetorical tumor and
allegorical and grammatical trifling, should have mounted
to such a pitch of intellectual power as to be five
beyond the reach of the chief teachers of the Church.
When all the faculties of the now world were bursting
into life, and when one region of power another was
laid open to man, and called him to rise up and take
possession of it. . . . There is no antecedent improba-
bility that a theologian in the sixteenth century
should have been wise enough to allow and an expounder
of theological truth as one in the fourth or fifth. Though
the earlier divines may have had certain special ad-
vantage, the advantages enjoyed by those in the later
period were far greater and more important; and if
they had peculiar temptations to lead them astray, so
had the others. The epoch at which a man lives does
not afford us a criterion for judging of the truth of
what he says, except so far as his testimony may be
appealed to concerning facts; in other respects the
value of his writings must be determined on different
grounds by candid and intelligent criticism. Nor is
such criticism of use needful with regard to the fathers
than to any other body of writers. . . . To those who
study the fathers critically and discerningly they still
yield grains of precious gold in abundance, as we see in
the excellent exegetical writings of Mr. Trench.
FATHERS OF THE CHURCH

The contest on this point has been waged again and again, and the victory, in the main, has always been on our side. But the very habit of looking with prostrate minds to outward human authority, and that, too, authority so remote from the special wants and yearnings of our age, and incapable of speaking to us with quick responsive activity of our own spirits—to authority, therefore, which can only speak imperatively, except to the few whose understandings are mature enough to consult it critically, and to distinguish the true from the erroneous, the relevant from the irrelevant—tends to exclude some classes of men which is incapable of standing alone, and will not be content with the help wherewith God has supplied us, but craves restlessly for some absolute authority whereby it may be enabled to walk in leading-strings all its life long. Such minds, when once prop and anchor given way under them, as they find out that no father can be appealed to as an absolute authority, least of all on the particular questions which agitate our times the most, will try to save themselves from falling into iniquity by catching desperately hold of infallibility. And where will they ever be when they have managed to beat their heads up?" (Hare, Vindication of Luther, p. 76-82).

5. But some of the opponents of an undue reverence for the fathers have not been wanting in just appreciation of their historical value. Dr. W. L. Alexander (Anglo-Catholicism not Apostolic, Edinb., 1845, 5th ed.) says: "The criticism of modern writers is at least estimating the importance and value of the fathers: "There has been among Protestants a great deal of foolish talking and much jesting that is anything but convenient upon this subject. Men who have never read a page of the fathers, and who could not read one word they try, have been disposed to jest at liberty to speak in terms of scoffing and supercilious contempt of these venerable luminaries of the early Church. Because Clement of Rome believed in the existence of the phaike, and because Justin Martyr thought the sons of God who are said in Genesis to have intermarried with the daughters of men were angels, who for the loves of earth were willing to forego the joys of heaven; and because legends and old wives' fables snow is found in almost all the fathers, it has been deemed wise to reject, despise, and ridicule their whole host of writings. The least reflection will suffice to show the unsoundness of such an inference. What should we say of one who, because lord Bacon held many opinions which modern science has proved to be false, should treat the Novum Organum with contempt? or of one who should deem himself emancipated from the traditions of antiquity, or of Baxtor in his Reformation, and the first that able and excellent men tried to prove the existence of Satan by quoting instances of his apparitions, and of his power over witches? There is no man, however good or great, that can quite be beyond the errors and credulities of his age. It becomes us, therefore, in dealing with the writings of a former generation, to take care that, in rejecting the bad, we do not also despise the good; and especially that we be not found availing ourselves of advantages which have reached us through the medium of these writings, while we are unjustly and unsteadily, and without any honor of the memory of those by whom these writings were penned."

In the height of the so-called Tractarian controversy in England, Isaac Taylor wrote his Ancient Christianity and the Doctrines of the Oxford Tracts (Lond. 1860, 2 vols. 5vo; 2d ed. 1864; reprint of vol. I, Phila. 1840, 12mo) for the purpose of laying "open the real condition, moral, spiritual, and ecclesiastical, of the ancient Church;" and the chief aim and tendency of the book is to lessen the authority of the fathers, especially of those of the ante-Nicene period. Yet Taylor was a convert who had a commendable confidence of the modern Church upon the ancient, and to deplore a "setting at naught" of patristic learning, "It is not we, may we be sure, those who possess much of this indispensable learning that in any such way set it at naught; and it is an acknowledged rule in all walks of science and literature that the scoops and captious objections of the ignorant need not be seriously replied to—'know what you are speaking of, and then let the matter concern the great mass of the world by laying down the comprehensive terms, either of admiration or contempt, to a body and series of writers, stretching through seven hundred or a thousand years, and these writers native as they were of distant countries, some of them simple and rude, while others were erudite and accomplished, some a plain proof of the most severe hardship, which is in any case incapable of standing alone, and will not be content with the help wherewith God has supplied us, but craves restlessly for some absolute authority whereby it may be enabled to walk in leading-strings all its life long. Such minds, when once prop and anchor given way under them, as they find out that no father can be appealed to as an absolute authority, least of all on the particular questions which agitate our times the most, will try to save themselves from falling into iniquity by catching desperately hold of infallibility. And where will they ever be when they have managed to beat their heads up?" (Hare, Vindication of Luther, p. 76-82).

6. But some of the opponents of an undue reverence for the fathers have not been wanting in just appreciation of their historical value. Dr. W. L. Alexander (Anglo-Catholicism not Apostolic, Edinb., 1845, 5th ed.) says: "The criticism of modern writers is at least estimating the importance and value of the fathers: "There has been among Protestants a great deal of foolish talking and much jesting that is anything but convenient upon this subject. Men who have never read a page of the fathers, and who could not read one word they try, have been disposed to jest at liberty to speak in terms of scoffing and supercilious contempt of these venerable luminaries of the early Church. I, Phila. 1840, 12mo) for the purpose of laying "open the real condition, moral, spiritual, and ecclesiastical, of the ancient Church;" and the chief aim and tendency of the book is to lessen the authority of the fathers, especially of those of the ante-Nicene period. Yet Taylor was a convert who had a commendable confidence of the modern Church upon the ancient, and to deplore a "setting at naught" of patristic learning, "It is not we, may we be sure, those who possess much of this indispensable learning that in any such way set it at naught; and it is an acknowledged rule in all walks of science and literature that the scoops and captious objections of the ignorant need not be seriously replied to—'know what you are speaking of, and then let the matter concern the great mass of the world by laying down the comprehensive terms, either of admiration or contempt, to a body and series of writers, stretching through seven hundred or a thousand years, and these writers native as they were of distant countries, some of them simple and rude, while others were erudite and accomplished, some a plain proof of the most severe hardship, which is in any case incapable of standing alone, and will not be content with the help wherewith God has supplied us, but craves restlessly for some absolute authority whereby it may be enabled to walk in leading-strings all its life long. Such minds, when once prop and anchor given way under them, as they find out that no father can be appealed to as an absolute authority, least of all on the particular questions which agitate our times the most, will try to save themselves from falling into iniquity by catching desperately hold of infallibility. And where will they ever be when they have managed to beat their heads up?" (Hare, Vindication of Luther, p. 76-82).
FATHERS OF THE CHURCH

but never so powerfully pervading the foreign substance it enters as to undergo no deflections itself, or to impose its influence, from age to age, in intensity, as well as in the particular direction it may take, so does it exhibit, from age to age, great variations of form and hue. But the men of any one age indulge too much the overweening temper that attaches always to human nature when they say to themselves Christianity is a living act, a lively reality, but that of such or such an age was a mere shadow of it. All mystification apart, as well as a superstitious and overweening deference to antiquity, nothing can be more simple than the facts on which rests the legitimate use and value of the ancient documents of Christianity. The history and spirit of the times immediately succeeding. These records contain at once a testimony in behalf of the capital article of faith and an exposition of minor sentiments and ecclesiastical usages, neither of which can be surrendered without some serious loss and dammage.

6. The more recent tendency among the theologians of Catholic and of the American church to study the fathers more thoroughly than ever, but to study them in a scientific way, for historical rather than polemical and dogmatical ends; or, where dogmatic interests are involved, to use the fathers historically, and not as authorities. The terms Patristics and Patrology have come into use to characterize the history and literature of the fathers on the one hand [see PATRISTIC], and their theology on the other [see PATROLOGY]. These branches have not yet taken fully scientific shape, but they are on the way to it (see the references below).

FATHERS OF THE CHURCH

III. Works on the Fathers; their literary history, their use, authority, etc.—1. Jerome (+420), De Viris illustris s. et catalogus Scriptorum. Eccles. (Migne, Patrol. Lat., vol. xxviii, 392, etc.), many editions and translations; the work is the basis of Fabricius, Bibliotheca Ecclesiastica, Hamburg, 1718, fol.); 2. Photius (+900), Bibliotheca (Migne, Patrol. Graec. vol. cii, cit.), containing sketches of 200 pagan and Christian writers; 3. Bellarmino, Liber de scriptoribus Ecclesiasticis (Rom., 1633, and often reprinted); Cave, Scriptores ecclesiasticos, vol. iv, Librorum, ad sec. xiv, (2 parts, Lond. 1868-96; Gen. 1705, 1720; Basel, 1741; Oxford [continued by Wharton, 1740-48, 2 vols. fol.); 5. Dupin, Novum Bibliothecarum Auctorum Ecclesiasticarum Parisiis, 1688-1687, 48 vols. 8vo, Amst. 1673-1715, 19 vols. 4to; Latin version, Paris, 1692 sq. vols. 4to [up to Augustinian]; English version, including 17th century, Lond. 1691-1707, 17 vols. bound in 7 or 8, Dublin, 1722-24, 3 vols. fol. [without the 17th century]; see Dupin); 6. Ceillier, Histoire Générale des Auteurs Sacrés et ecclésiastiques (Paris, 1722-29, 24 vols. 4to); 7. Leblond, Descriptive de l’histoire des ecclésiastiques, Paris, 1860-1865, 15 vols. imp. 8vo; see Ceillier); 7. Tillemont, Mémoires pour servir à l’histoire ecclésiastique (Paris, 1698, 16 vols.); 8. Oudin, Commentarius de Scriptorum Eccles. origina, professing to fill up the gaps left by Cave, Dupin, etc. (Lipsiae, 1722, 9 vols. fol.); 9. Leclercq, Histoire des Auteurs Sacrés (Paris, 1718-19, 2 vols. fol.); 10. Tricarte, Bibliothèque portative des pères de l’Eglise (Paris, 1757-62, 9 vols. 8vo); 11. Spenzer, Theorarum rei patristicae (Würzburg, 1782-94, 3 vols. 4to); 12. Lumpfer, Hist. theologico-Criticae de vita scriptorium, cit. 85, Patrum (Augsburg, 1789-99, 19 vols. 8vo); 13. Fabricius, Bibliotheca Grammaticorum, (Hamb. 1788-1828, 14 vols., ed. by Harless, 1790 to 1812, 12 vols. including Index); Fabricius, Bibliotheca Ecclesiastica (mentioned above); Fabricius, Bibliotheca Latina (see Fabricius); 14. Walch, Bibliotheca Patristica (Jena, 1770; new ed. by Danz, Jena, 1834, 8vo); 15. (Introductio of Patristica et Patrologia), Wilhelm (R. C.), Patrologia ad unam academ. (Freib. 1778); 16. Gregory of Tours, Dialogues (translated by Engelhardt, 1870); 17. Meyer, Geschichte der Kirchen in der alten Christenheit (Erlangen, 1823); 18. Goldwitzer (H. C.), Bibliographie d. Kirchen-Väter (Nürnberg, 1834, 4 vols. 8vo, not of much value); Locherer (H. C.), Lehrbuch der Patrologie (Mainz, 1837, 8vo); 19. Peremander (H. C.), Patrologia generalis, specialis (Landshut, 1841-47, 4 vols. 8vo); 20. Möhler (R. C.), Geschichte der Patrologie (Berlin, 1840; only first vol. finished, covering first three centuries); Dussler (R. C.), Institutiones Patr. i, t. the Gregory the Great (1850-51, 2 vols. 8vo); Alzog (R. C.), Grandiosa d. Patrologie (1reib. 1866, 8vo); Donaldson, Critical History of Christian Literature, etc. (mentioned above, Lond. 1864, 8vo), of the Fathers, Mat. Bonaventura (H. C.), Traité de la lecture des Fiers (Paris, 1868-97); also in Latin, De syst. meth. legend. ecclesii. Patr. (August. Vind. 1756, 8vo); Daléil (see above), Right Use of the Fathers (The Phil. 1642, 17mo); Goode, Derived Rule of Faith, etc. (Lond. 1845, 3 vols. 8vo, Phil. 2 vols.); Peck, Apparatus for the Translations of Newman (York, 1844); and other works cited under Faith, Rule of (q. v.); also Campbell, Prem. Dia. to Four Gospels (dix. iv); Milton, Pretalitical Episcopacy (Prose Works, vol. I); Conybeare, Examination of the Ante-Nicene Fathers, 1st ed. 1851, 2 vols. 8vo; Orr, Christianity (Lond. 2 vols. 8vo); Hale, Vinchonissement of Luther; Blunt, Right Use of the Early Fathers, against Daléil and others (Lond. 1857, 8vo); Schaff, Church History, i, 458 sq.; Moses Stuart, in Bibliotheca Sacra, i, 125 sq.; Jahrhundert für deutsche Theologie, 2, 856; 1867, 1, 720; F. Nitzsch, in Jahrhundert für deutsche Theologie, x, 87 sq.; Schwann, Dogmengeschichte der zivilgeschichte der zivilgeschichte des Reiche. Zeit. (Münster, 1867, 8vo); Hübner, Die Philosophie d. Kirche (München, 1867, 8vo); Levestre, Dictionnaire de Patrologie (Paris, 5 vols. 8vo). Brief sketches of the lives of the fathers may be found in Hooker, Ecclesiastical Polity (Lond. 1845-52); Evans, Biography of the Early Church (2d ed. Lond. 1850, 2 vols. 18mo); copious biographies of them in Böhmer, Kirchengeschichte in Biographien (Zürich, 9 parts, 1843-50).

Fathom (fathom), a nautical measure of six (Greek) feet in length (strictly 6·81 engi. feet); properly (as the word implies) the space which one can cover by extending the arms laterally (Acts xxviii., 29). See measure.

Fatio de Duillers, Nicolas, a learned mathematician and an eccentric religious enthusiast, was born at Bâle, in Switzerland, Feb. 16, 1664, and died in the county of Worcester, England, in 1768. He was educated in Geneva, visited and spent some time in Paris and the Hague, but finally chose England for his home. He early showed great ability in the exact sciences, and at the age of eighteen propounded a new theory of the earth and of the rings of Saturn in a letter to Cassini, to whose theory of zodiacal light he in 1666 gave new developments. He made several useful and ingenious applications of science to practical life, one of which was a new method of determining the speed of a vessel. In the controversy regarding the discovery of the differential calculus he was an earnest supporter of the claims of Newton. Later in life he advocated extravagant views on religious subjects, was a leader in the movement of the Covenants, and claimed for himself inspiration and the gift of prophecy and miracles. Neither the ridicule which Shaftesbury, in his letter on enthusiasm, aimed at him, nor his public exposure with two other persons on the pillory in London (Sept. 1707) for avverting Elias Marion himself and contravening the "prophecies," had the effect to cure him of his enthusiasm. He even went to Asia in the hope of...
converting the world, but, not meeting with success, returned to England again, and spent his time in retirement, pursuing his scientific labors, but still cherishing his extravagant religious opinions. Many scientific works from his pen are extant, but his writings in favor of the prophecies of the Covenants are now unknown.—Hoefler, Nouv. Biographie Générale, xxvii, 186.

Fautiling. 1. Nett,[b] meri', a fatted animal, especially bullock ("calf") for slaughter, 2 Sam. vi, 18; Isa. xi, 6; Ezek. xxi, 18. 2. Jep, a marrow beef (q. v.), especially of the fat-tailed variety (Ps. lxi, 15). 3. Improperly for नृिक, mish'koh, the second in rank, 1. e. of inferior quality, 1 Sam. xvi, 9. 4. (Corresponding with No. 1), sar'wrik, corn-fed, e. i. stooled, fat, Matt. xxiii, 4. See Fat.

Patou, Nicholas, a French mystic writer, born at Arras in 1644, died at St. Omer in 1694, took the vows of the Dominican order in the convent at Arras, and subsequently entered that at St. Omer. We have from him: 1. Le Paradis terrestre du Saint Bouvoyer de l'Augeus Vierge, mere de Dieu, etc., in 4 vols., of which only one vol. appeared (St. Omer et Lille, 1692, 12mo):—2. A treatise on the famous miracle of the holy candle, entitled Discours sur les Prodiges du Saint Cœur, etc., of which the first edition, quite rare, St. Omer, 1693; the second and third, Arras, 1696, sm. 8vo, and 1744, 12mo.—Hoefler, Nouv. Biogr. Gen.

Fatted Fowl (Niebás, birbirin al'sim). Sept. ἀνηθέαλα αὐθαλόνα αὐθαλόνα, Vulg. aves al'sim) are included in 1 Kings iv, 28 [v, 13], among the daily provisions for Solomon's table. Gesenius (Thes. Bibl. p. 240) prefers to translate this "fatted geese," Egyptians, whose monuments abound with illustrations of their rearing and culinary application. See Fowl.

Faucher, Denis, a French theologian, was born at Arles, A.D. 1457, and died at the abbey of Lérins in 1562. In 1508 he entered the Benedictine order at the convent of Polimne, near Mantua, and in 1515 was sent to the monastery of Lérins, of which he in advanced years became prior. His works are found in Vincent Barralle's (of Salerno) Chronica Sanctorum et A. Horace rimae, illustrations ad Acta Sanctorum, Lérinensis (Lyons, 1613, 4to).—Hoefler, Nouv. Biogr. Gen.

Faucher, Jean, a French Protestant preacher and controversialist, died at Nîmes in 1698. He was minister at Uzès, when he was sent in 1611 by the Protestant churches of Lower Languedoc as deputy to the Assembly at Sommières, and in 1615 to that at Grenoble. When this latter assembly was in the following year transferred to Nîmes, Faucher was chosen pastor and professor of theology in that city. He however, followed the assembly to Rochelle, and did not return to Nîmes until 1617, after the conclusion of a peace. He was a man of great energy of character, and agreed in opinion with those Huguenots who held force of arms to be a secure liberty of conscience, if not the triumph of the Protestant cause in France. He persistently advocated a policy in consonance with such views in the assembly from 1615 to 1617, as indeed also in that convoked by the duke of Rohan in August, 1622, to agree upon terms of peace with the king, declaring that to open their arms to the king would prove the sacrifice of their liberties. Only two works from his pen are known, viz., Exorcismes divins, or propositions Christianes pour chasser les démons et les esprits abuseurs qui troubent les royaumes (Nîmes, 1628, sm. 8vo), and Zacherie, ou la Sainteté du Mariage et particularité du Mariage des ecclésiastiques, contre l'usage des sous-introdissés et autres impostures des consciences éclésiastiques (Nîmes, 1627, sm. 8vo).—Hoefler, Nouv. Biogr. Générale; Hasag, La France protestante. (J. W. M.)

Fauchet, Claude, commonly known as the abbé Fauchet, and a prominent Girondist in the French Revolution. He was born at Dornes, in the department of Nièvre, Sept. 22, 1744, and was guillotined at Paris Oct. 31, 1798. After his ordination he became one of the priests of St. Roch, at Paris. When scarcely 50 years of age he delivered a paper on thebs on St. Louis before the French Academy, and was soon thereafter appointed grand vicar to the archbishop of Bourges; then one of the court preachers, and abbot of Montfort-Lacabre in Brittany. In a sermon delivered in 1788 at the fête de la Résistance at Sarthe, he manifested so strongly his sympathy with the revolutionary tendency that his name was stricken from the list of court preachers. Thenceforth an outspoken and zealous champion of the new political doctrines, he was active in the popular meetings in Paris, a participant in the movements against the Bastille, was named a member of the Commune de Paris, and assisted in the reorganization of the Church by composing the treatise entitled Religion Nationale, and was one of the editors of the Bouche de Fer (Iron Mouth). In 1791 he was made consular of Calvados, from which department he was chosen a deputy to the Assembly and the Convention, where, though a zealous Republican, he opposed the extreme measures taken in regard to the king and the Church, supporting his pen in the Journal des Amis the positions maintained by him in the Legislature. He consequently incur-

An ancient Egyptian Poulterer's Shop, showing the feeding and plucking of Geese.

Referring to the word to the root नृि, "to be pure," because of the pure whiteness of the bird. He gives reasons for believing that the same word in the cognate languages included also the meaning of songs (comp. Bochart, Hieros, ii, 127). Michaud's (Suppl. p. 226) less aptly interprets field animals (from the Chaldean, a field). Whether domestic poultry was much raised by the Hebrews has been a matter of dispute; but no good reason can be assigned why they should not in this respect have been as well supplied as their neighbors, the Egyptians, who gave great attention to them. See Nare. As it is pretty generally conceded that some kind of bird is intended by the proverb here designated, some can in this particular compete with the dung-hill fowl; and the fattening implies their domestication, while the fact of their daily consumption at the royal table argues their extensive cultivation and common use. Geese, however, may very probably be intended, as they were an esteemed article of food ancienly, especially among the...
FAUCHEUR 506  FAUNT

was Dananus (q. v.). After leaving Ghent, where he distinguished himself as a student, he spent a short time at the University of Leyden. In 1685 he was called to serve a Protestant church at Cologne, where he labored among the Huguenots amid severe persecutions. On June 27, 1659, he was installed over the Reformed church in Middelburg, the chief city of Zeeland, where he spent the remainder of his life. He had great reputation as a preacher. His learning was profound, his exhortations earnest and impressive, and his deportment exemplary. In ecclesiastical affairs he acted a conspicuous part. He was member and a

FAUCHEUR, MICHEL LE, a French Protestant divine of great talent as a preacher, was successively minister at Montpellier, Charanton, and Paris. He died in 1657. It is related of him that on one occasion he preached so forcibly against debts that maréchal De la Force, who heard him, remarked to some officers in the audience that, should a challenge be sent to him, he would decline it. He wrote, Sermôns sur les onze premiers chapitres des Actes des Apôtres (Gen. 1604, 4 vols., 12mo):—Traité de l'actio de l'orateur, ou de la prononciation et du geste (Par. 1657, 12mo):—Sermôns, Rom. iv, 23: The vages of sin and the reward of grace (translated in Cobin's French Preacher):—Traités sur l'Éucharistie (Gen. 1658), etc.—Darling, Cyclop. Bibliographie, s. v.

PAUCHON, J. R., is the rendering (Judith xiii, 6; xvi, 9) of the Greek dôma, (which the Romans also Latinized oecines), a Persian term for the short sword, usually represented as a straight, thick poniard on the Persepolitan figures (see Smith, Ancient Persian Sword.

Diet. of Class. Ant. s. v. Acinaces), and therefore appropriately employed in the apocryphal account of the deification of Holophernes by the Hebrews. See Sargon.

FANKELIUS, HERMAN, was born at Bruges about the year 1560. His parents were warmly attacked to the Protestant cause. At twenty we find him in a theological seminary at Ghent. Here he enjoyed the instructions of able professors, among whom

Ancient Persian Sword.
successively to the Jesuits' College at Louvain, to Paris, Munich, and Rome, where he was appointed di- 
vine to the Seminary of the Congregation of France, and de- 
veloped his lifelong devotion to the reform of the religious orders.

He was the author of several religious works, among which is the Dictionnaire des Novices (Paris, 1711, 4to).

Faure, Charles, a French Roman Catholic theo-
lologist, born at Lucigny, near Paris, in 1584; died Nov.
4, 1644. He was the first superior-general of the regular 
canonesses of the Congregation of France, and de-
voted his life to the reform of the religious orders.

Faure, François, a French prelate, born Nov. 8, 
1012; died May 11, 1687. He entered the Franciscan 
order at the age of seven years, and rose to the highest 
positions therein; was appointed sub-preceptor of 
Louis XIV, and finally bishop of Amiens. We have 
from him a condemnation of the Lettres Provinciales; 
an Ordinance contre le Nouveau Testament de Mons 
(1678); a Panégyrique de Louis XIV (Paris, 1680, 4to); 
an Oration sur la reine Anne de France (died 1666); and 
an Oraison funèbre de Henriette-Marie de France, 
reine de la Grande-Bretagne (Paris, 1670, 4to).

Faust, Dr., according to tradition, a celebrated dealer 
in the black art. (The following account, chiefly 
translated from Pierer, Universal-Lexikon, is taken from 
Chambers, Encyclopædia, s. v.) He was born probably 
about A.D. 1460, at Knittlingen (or Knittlingen), in 
Württemberg, or, as some say, at Roda, near Wilhelm.

He is said to have studied magic at Cracow. "After 
having spent a rich inheritance left him by his uncle, 
Faust is alleged to have made use of his 'power' to 
raise the Devil, with whom he entered into a contract for twenty-four years, obtaining during 
that time his fill of earthly pleasure, but at its termi-
nation surrendering body and soul into the hands of 
the great enemy. The devil gave him an attendant 
spirit or daemon, called Mephistopheles, though other 
names are given him by the later traditionists, with 
whom he travelled about, enjoying life in all its forms, 
and astonishing people by working wonders, till he 
was finally carried off by the Evil One, who appeared 
in terrible guise between twelve and one o'clock at 
night, at the village of Rimlich, near Wittenberg, 
though some say he was seen by others during the day.

Conrad Gesner (1561) is equally positive; and 
Luther, in his Table Talk, speaks of Dr. Faust as a 
man lost beyond all hope. The opinion that prevails, 
and which is reckoned to be intrinsically the more 
probable, is that some man of this name, possessed of 
varied knowledge, may have practised juggl-
ergy (for the wandering savages of the Middle Ages had all a touch of the quack about them), and thus 
been taken by the ignorant people for a dealer in 
the black art, and one who maintained a secret and 
infernal connection with the Evil Spirit. His widely 
diffused and celebrity not only occupied the writers' and 
worked by other so-called necromancers of an earlier age—Albertus Magnus, Simon Magnus, and Paracelsus—to be 
attributed to him, but likewise many ancient tales and 
legends of a marvellous character were gradually 
transferred to him, till he finally appears as the very 
hero of magicians. But while, on the one hand, the 
arraive of Faust's marvels afforded amusement to 
the people on the other hand, the word Faust's enter-
prizes and feats. The oldest of these now known 
appeared at Frankfort in 1588. Then came an 'im-
proved' edition of the same, by Widmann, entitled 
of John Dr. Faust, Hamburg. 3 vols. 1599; and in 1685, a 
work was published at Nürnberg by Pfister, based 
upon that of Widmann. The oldest of these books 
was translated into all the civilized languages of Europe. 
Impostors also published books of magic under the 
name of Faust, such as Faust's grosser und groblicher 
Holzespang (Faust's Great and Potent Book of Spells), 
Fausten's Mirakeln (Faust's Art of Performing 
Miracles), and Dreifache Holzespang (The Threefold 
Book of Spells). These wretched productions are fill-
ed throughout with meaningless scralls and figures, 
interpolations and texts from the Bibles, and almost always 
missapplied; but in the belief of the vulgar, they were 
supposed capable, when properly understood, of 
accomplishing prodigies. That the poetical art should in 
due time have seised on a subject affording so much 
material for the fancy to work upon, is a

the life of her parent, who was notwithstanding put to death. This confidence and affection, as is alleged by some, she abused so as to instigate the death of Cripus, Constantine's son by his first wife Minervina, a youth of rare promise and great popularity, because, as some say, he stood in the way of her own sons, or, according to others, of his to處ocate his illicit love. Helena, the mother of the emperor, however, avenged the fate of her grandson, and Fausta, whose perity and infidelity were made known, was suffocated in a hot bath. Other accounts, however, hold Fausta innocent of the death of Cripus, which, together with that of her own and that of the Licius, is attributed to the cruel suspicions of Constantine, engendered by success—that magnificens rerum seculendarum, as Eutropius style it, which perverted his nature and led to deeds of cruelty. The vague and contradictory statements in regard to her conduct, and to the time, cause, and manner of her death, leave the whole matter in doubt. In one account she is made to survive the death of her son Constantine, who was slain three years after his father's death, and in another is represented as the "most pious of queens." Her conversion to Christianity is also a matter of doubt, though she probably followed her husband in that respect.—Hoefer, Nouv. Biog. Générale, s. v.; Gibbon, Decline and Fall, ii, 162-3 (N. Y. Harpers', 1862, 6 vols. 12mo); Tilmille, Histoire des Emp. vol. iv, art. XIX, p. 224, and Notice sur Constantine, xvii; Eckel, Doctrina Nostri Hom. (2nd ed., Rome, 1740), 112; Eutropius, De Mortu Persecut. 27; Julian, Orig. 1; Zosimus, ii, 10; 29; Philostorgius, Hist. Eccles. ii, 4. (J. W. M.)

Faustinus, bishop of Lyons, lived in the second part of the third century. He became bishop about the year 250, and distinguished himself by his zeal for the faith, and the ardor with which he attacked Marcellus, bishop of Arles, the only Gallic bishop who had embraced Arianism. Unknown to it, he accomplished anything by himself, he made sure of the aid of the bishops of the Narbonnaise, and wrote to the pope, Stephen, to obtain the deposition of Marcellus. The pope hesitated, and Faustinus, in order to hasten matters, wrote to a Cyprian, bishop of Carthage. The two letters which he wrote no longer exist, but they form the material of the sixty-seventh letter of Cyprian to pope Stephen, which gives a curious picture of the Gallic Church at that period. Marcellus persisted in his schism, and the result of the affair is uncertain, but it is probable that he was deposed, since his name is not found in the list of the bishops of Arles.—Hoefer, Nouv. Biog. Générale, xvii, 199.

Faustinus, a priest of the sect of the Luciferaeans (q.v.) in the fourth century. He shared in the persecution they experienced, but was set free by the intercession of the emperor Theodosius, to whom he presented a petition praying for protection to be extended to himself and others who associated with him; the emperor granted it, and Damasus' papal persecutions were stayed. He wrote a treatise, De Triaineta sie de Fide contra Ariana (Concerning the Faith, against the Arians). The discourse is dedicated to the empress Flacilla, and divided into seven chapters. He begins by stating the heresies of the Arians, and then combats them from Scripture. In chap. ii, he proves that the word Son belongs to our Saviour, but leaves unthought the question whether the word applies to him as God or man, taking for granted the former; in chap. v, he shows the omnipotence and perpetual endurance of God; in chap. vi, John the Baptist, in chap. vi, the qualifications implied in Acts ii, 36 are pointed out as belonging only to God; and chap. vii is a short dissertation on the Holy Spirit. He wrote also Fides Theodotio imp. obt. (according to Macrinius, about A.D. 387), a petition addressed to the emperors Valentinian and Theodosius, relating and requesting to be freed from the persecutions which he, Marcellus, and others were suffering in consequence of being Luciferaeans. A short account of this sect is prefixed to Faustinus to the petition. His remains will be found in Galland, Bib. Max. Patr. vii, 441, and in Migne, Patrolog. Cur. xiii, 38 sq.—Clarke, Success. Sac. Lit.; Lardner, Works, iv, 250.

Faustinus, who lived towards the close of the sixth century after Christ, was appointed bishop of Luxeuil, France, by authority of Gondwald, who, claiming to be a natural son of Clothaire I, aspired to the throne of Aquitaine, but was vanquished, betrayed, and slain. Faustinus was then deposed by a council held at Macon, which, curiously enough, also condemned Gondwald and had ordained him to provide for him in turn, and pay him 100 solidi annually.—Gregory of Tours, Epitome histor. Francorum; Hieor, Nouv. Biog. Gen. (J. W. M.)

Faustus, Dr. See Faust, Dr.

Faustus Rufinus or Rheginus (of Rhegium, or Riez, in Provence), so called from the diocese over which he presided, a pious and self-sacrificing prelate, although doctrinally he favored Semi-Pelagianism. He was born in about the beginning of the fifth century, and became a monk in Africa. When Maximus was made bishop of Rhegium, Faustus succeeded him in his abbacy of Lerins, and succeeded him again as bishop on his death, A.D. 454. He was present at the council held under Hilary at Arles in 466, and in 467, shortly before he died, he wrote 486. He wrote (1) De Gratia Div. et humanae mentis libero arbitrio (On Grace and Free-will) (Bib. Max. Patr. vili). In this treatise he opposes absolute predestination, but admits original sin and the necessity of grace to assist man's nature, but denies that grace is given by grace to save infallible, or that original sin is entirely destructive of every good, so as to leave man "a mass of corruption." He also shows that God's foreknowledge does not affect the salvation or condemnation of any, and interprets the various texts of Scripture which refer to the matter.—(2) Professio Fidei (A Confession of Faith) (Bib. Max. Patr. viii), directed against the doctrines of predestination and fate, addressed to Leontius, bishop of Arles. This is a recapitulation of his treatise De Gratia. (3) Epistola ad Lucidum Presbyterum, against the Presbyter of the monastery of Adalbertum. Lucidus was convinced by this letter, and subscribed to the points condemned in it (Mansi, Concil. v. 1007). This and other Epistolae, to Ruricius and others, are in Cambrai Lect. Antiqu. i, 352 (Antw. 1725, fol.), and in the Biblioth. Ambros. 1, also several Sermones. He treats De Gratia is also in Migne, Patrolog. cur. xvi, 775 sq., together with the Epistolae and Sermones. Angelo Mai, in his Speculum Romanae, gives three discourses of Faustinus never before printed. Neander gives the following judicial statement of the doctrines of Faustinus: "Although Faustinus adopted the Semi-Pelagian mode of exposition with regard to the relation of the free-will to grace, yet he unfolded this scheme in a way peculiar to himself. If he did not express himself so distinctly as to satisfy the acute and clear-headed theologian, yet we see presented in him, in a beautiful manner, such a harmonious tendency of Christian feeling, keeping aloof from all partial and exaggerated views, as prevented him from giving undue prominence either to the work of the creation, or so as to infringe on that of the creation, or to the work of redemption, so as to infringe on that of the redemption. 'As the same Being was not the Creator and Redeemer, so one and the same Being is to be adored both in the work of creation and of redemption.' Among the attributes which, as expressing the image of God, could not be destroyed in human nature, he included the freedom of the will. But even before the fall the free-will was insufficient; wind out the aid of grace, and still less can it be present,
since sin has entered, suffice by its own strength for the attainment of salvation. It has now lost its original power, yet it is not in itself destroyed; it is not altogether shut out from the divine gifts, but only it must strive once more to obtain them by intense efforts and the divine assistance. Like the author of the epistle of the Hebrews, he believes there is a distinction between general grace (gratia generalis), a term by which he designates the religious-moral capability which God has furnished to man's nature, and which, too, has not been wholly supplanted by sin, as well as the universal inward revelation of God by means of thin, and through the general sense of the divine grace so understood, and special grace, by which he means all that was first bestowed on mankind through Christianity. But the relation of these two kinds of grace to each other is defined by him quite otherwise than it is in the work above mentioned. Although, as a general thing, the grace of redemption, and in many cases, also, the calling, is antecedent to all human merit, still the operation of that special grace in man is dependent on the manner in which he has used that general grace; and in many cases the striving and seeking of the grace itself precedes that of the grace of grace. All this, the self-active bent of the free-will, is antecedent to that which is imparted to the man by this special grace: a thing which Faustus endeavors to show by examples similar to those which the Semi-Pelagians had been accustomed to adduce since the time of Caesarius of Heisterbach. He imputes the impossibility of good in human nature a spark of fire implanted within by the divine hand, which, cherished by man, with the assistance of divine grace, would become operative. He recognizes, therefore, a preparatory development of the religious and moral nature even among the heathen, and he shows that those who are willing to allow that, by a faithful use of that general grace, the heathen might have attained to the true service of God. From this it might also be inferred that Faustus was an opponent of the doctrine which taught that all the heathen would be unconditionally condemned; and that it was his opinion that the worthy among them would still be led, after the present life, to faith in the Saviour, and thereby to salvation; but on these points he does not express himself more distinctly. There is much good sense in the remarks of Faustus where he and touches on the two things, as in his manner of apprehending the relation of grace to free-will with the two extremes in the mode of apprehending the doctrine concerning the person of Christ. As in the doctrine concerning Christ's person some gave undue prominence to the divine, others to the human element, and, as he contends, both are necessary and, as in the Catholic Church, all are not on opposite sides, injured the doctrine of redemption, so he says it was also with the doctrine concerning human nature. Faustus deserves notice also on account of his dispute concerning the corporeality of the soul. He affirmed, as others before him had already done (e.g., Hilary of Poitiers, On Matt., v. 8, and even Didymus, in his work De Trinitate, bk. ii, ch. 4: 'Ωτ' ἁγγελοὶ πνεύματα, καθός πρὸς ἑαυτὰς ἀσώματα, σώματα ἐσώμασα διὰ τὸ ἁγγείον σοι πέσατο τοῦ κατοικίου πνεύματος), that God alone is a pure spirit; in the essential nature of the divine trinity is understood Man as well by time (a beginning of existence), so also by space; and hence all creatures are corporeal beings, the higher spirits as well as souls. He was led by his controversies with the Arians of the German tribes, to uphold these views still farther; for he supposed he could demonstrate that if equality of essence with the Father was not ascribed to the Logos, it would be necessary to regard him as a corporeal being. He found an opponent who surpassed him in philosophy, and its effects on the Church as well as by Christian the man of Logia, a man on whom the speculative spirit of Augustine had exerted a great influence. He wrote against Faustus his work De statu animae' (Neander, Church History, Torrey, ii, 645). — Clarke, Succession of Soc. Lic., ii, 255; Neander, History of Doctrina, Ryland, ii, 388; Moehmen, Ch. Hist. cent. v, pt. ii, ch. v, § 26, n. 60; Ceiller, Auteurs Sacres (Paris, 1861), x, 420-436. See Semi-Pelagians; Massilians.

Faustus, Socinus. See Socinus.

Faustus, St. (d'Aguena), was born about A.D. 460, but the date of his death is unknown. He became a monk in the convent of Aguna, in Valois, and in 508 went to Paris with Severinus, his abbot, who was called thither by Clovis in order to employ his medical skill in treating him for a chronic fever. On his return journey Severinus died, and Faustus, who had remained in France, was commissioned by Childebert to write his life. This work is commendable for its simplicity, exactness, and scant mention of miracles as wrought by its subject, in an age whose literature is replete with such marvels. The best edition is that by Mabillon in the Acta Sanctorum Ord. Sanci Bene dicati (Paris, 1668-1710, 9 vols. fol.; reprinted at Venice, 1728, 9 vols. fol.). The Acta Sanctorum assigns the martyr's death to the 11th of January to St. Esmun of Aguna.—Hoefer, Novis. Biol. Gén., xvii, 202.

Faustus, St. (de Glamfeul) was one of the Benedictine monks who came with St. Maurus to France, A.D. 548, and assisted in founding the first monastery of his order in that country at Glamfeul (Glanafollum), in Anjou. In 568, after the death of Maurus, he returned to Italy, and became an inmate of the monastery of Lateran at Rome, where, at the instance of his brother monks, he wrote a life of St. Maurus, and presented it to pope Boniface IV, who approved it about 607. Faustus died some time after this (on a 15th of February, according to the Bollandists), and was buried in the monastery of Lateran. His life of St. Maurus was a simple and vivid spirit of the life of the saint when he lived faith in the marvellous, and abounds in uninteresting and prolix details. Surius (Vita Sanctorum, etc.), Du Breul (Suppl. Antiq., etc.), and Mabillon (Acta Sancti Ord. Sanci Bene dicati) have edited it.—Hoefer, Novis. Biol. Gén., xvii, 202-3.

Faustus, the Manichæan, a prominent bishop of the Manicheans, was a native of Melle, in Nubia, of the family of the bishops of the Church of the Manicheans in Egypt. He was nearly the whole of his work of Faustus is quoted, Augustine relates of him that he led a life of luxurious ease, regarded himself as the Incarnate Wisdom, was for a time exiled for his Manichean opinions to an island, but subsequently released. The work of Augustine, Monemantibus, with a volume of his works in the Maurine and Munic editions. See AUGUSTINUS, MANICHIÆANS. — Herzog

Fawcett, Benjamin, an English dissenting minister, was born at Saltford, Wiltshire, in 1715, and died in 1780. He was a pupil of Dr. Doddridge at Northampton, and preached first at Taunton, and then at Kidderminster, where he was pastor of a congregation of Dissenters for 35 years. He was a strict economist of time, and attributed his uninterrupted good health to his temperate mode of life and the habit of early rising. His works are, Sermons (1756-80), an abridgment of Baxter's Saints' Everlasting Rest, and Religious Melancholy (1780, 8vo). —Rose, New Gen. Biog. Dict.; Allibone, Dict. of Authors.

Fawcett, John D.D., an eminent Baptist minister, was born in Yorkshire Jan. 6, 1739, joined a Baptist church in 1758, and was ordained minister at Wainsgate in 1764. Here he opened an academy, at which many ministers were educated, among them Ward of Serampore. He was a self-taught, but well-informed man, and in theology he was more of the Calvinist. He died July 25, 1819. He published The Sick Men's Friend (1774); —Hymns (Leeds, 1781, 12mo); —Essay on Anger (Leeds, 1787, 12mo); —Devotional Family Bible (1806-11, 2 vols. 4to). —Jones, Christian Biography, s. v.; Jamieson, Cyclop. of Biblical. p. 194.

Fawcett, Joseph, minister of an Independent church at Walthamstow, died 1804. He was a very popular preacher, and published Sermons delivered at the Old Jery (London, 1795, 2 vols. 8vo).

Fawkes, Guy ("properly Grido"), the head of the conspiracy known by the name of the Gunpowder Plot, was born of a Protestant family in York in the year 1570. He became a Roman Catholic at an early age, and lived in the Spanish arm in the Netherlands. Inspired with fanatical zeal for his new religion, on his return to England he entered into a plot with several Catholic gentlemen for blowing up the king, his ministers, and the members of both houses at the opening of Parliament, November 5, 1605. Guy Fawkes was taken with the burning match in his hand, tried, and, after being put to the torture, was publicly executed January 31, 1606. In remembrance of this event, in most English towns, but particularly in London, a grotesque figure, stuffed with straw, is carried about the streets on the 5th of November, and finally committed to the flames. A political and religious significance was again imparted to this custom by what was called 'the papal aggression' in the year 1850, when the figure of Cardinal Wiseman (q. v.) was substituted for that of Guy Fawkes. —See GUNPOWDER PLA.

Fayditt, Pierre, a priest of the French Oratory, was born at Reims, in the first half of the 17th century. He was in 1671 excluded from the Oratory for having published, in spite of the prohibition of his superiors, from the Cartesian point of view, a work On the Human Mind (De Mensa Flammae). With this publication he was quarrelling with the French government, Fayditt, in a sermon on St. Polycarp, preached against the pope, whose conduct he compared with that of pope Victor toward the Asiatic bishops. The view expressed in these sermons he refuted himself in another sermon published at Liège; but in 1687 he again published at Maastricht an extract from his first sermon, with proofs for the facts quoted in it. In consequence of an Essay on the Trinity, in which he seemed to favor Trithelism, he was imprisoned in 1686 at St. Lazarus. Subsequently he was ordered to withdraw to his native city, where he continued to live until his death, 1702. Some ridiculous arguments some of the best works of his age, such as Fénelon's Théologie and Tillenouet's Mémoires Ecclesiastiques. He died in 1702. —Hoeter, New. Biog. Génér. xvi, 229.

FAVOR. See GRACE.

FEAR OF GOD. I. Old Testament. —There is no mention in the Scriptures of the sentiment of fear in the relations between man and God before the fall of Adam. After the transgression, Adam says, "I heard thy voice in the garden, and I was afraid" (Gen. iii. 10). Fear of God (יהוה יראתי) stands thus in close connection with conscience, and with the fact of actual or possible, justly condemned in inferring from the narrative in Genesis that the sentiment of fear, in relation to God, is one of the consequences of Adam's sin. Since the Fall, fear is a natural and proper feeling on the part of dependent man with regard to the infinite God whom he has offended. Dependence alone, with fear, the consciousness of a sense of sinful tendencies and possibilities, would not engender fear. In sinful beings, however, fear is useful and necessary as a preventive and safeguard against transgression. As such it is enjoined in the O.T. especially. (Compare Exod. i. 17; Deut. vi. 2; Prov. iii. 7; xiv. 2). So in O.T. we find practical piety generally described as the fear of God: "The fear of the Lord is the beginning of knowledge" (Prov. i. 7); Job xxxvii, 8, "Behold, the fear of the Lord, that is wisdom, and to depart from evil is understanding": "The fear of the Lord is clean, enduring forever" (Psa. xxi, 9). Fear, therefore, is needed, if not in a large sense of the term, in communion with piety, did not (under the old covenant) exclude filial and even cheerful trust in God, and delight in his law and in his worship; the Psalms abound in illustrations of this. Under this covenant, too, the law of love prevailed (Deut. v. 6). And thou shalt love the Lord thy God with all thy heart, and with all thy soul, and with all thy might". The promise of a new covenant, also, added the grace of hope to the experience of O.T. believers (Jer. xxxi, 33-34). But a fear which is conjointed with love and hope is not a slavish fear, but a free and general veneration of grace, Deut. xxix, 6; Hosea xi, 1; Isa. i, 2; lixii, 16; lxiv, 8). Nevertheless, the sense of the filial relation to God through Christ, such as appears in the N.T., was wanting in the old covenant, and fear was, perhaps, under that covenant, the prevailing element in the consciousness of believers, so far as their relation to God was concerned.

II. In the sphere of the N.T., the fear of God, in the sense of slavish or untrusting dread, is completely dispelled. True, in the economy of salvation through Christ fear finds a useful place as a preventive of negligence and lapses, as an expression of respect for reverence, and, in the experience of the penitent to 2 Cor. v. 11; vii. 1; Phil. ii. 12; Eph. v. 21; Heb. xii, 28, 29), and is enforced in this sense by Christ himself (Matt. x, 28). But as a Christian experience deepens, and the soul is consecrated to God, the sense of fear vanishes, and love has its place (Rom. viii. 15; 2 Tim. i. 7; 1 John iv. 18). On the other hand, where there is nothing more than the form of Christian life, without its inward power, the old Jewish and even pagan fear springs up. So the Roman Church does not admit a free and direct approach to God, but demands the intercession of saints, etc., and makes of the sacrament of the Lord's Supper, in which Christians are lovingly to surround his table, a tremendous and fearful mystery. In Protestant theology, on the contrary, the fear to approach God is considered as a consequence of the fall, and free access to God is felt to be the privilege of Christian life. Edwards, in his Tractate on Religious Affections, remarks as follows on the relations of fear and sin: "For so hath God contrived and constituted things, in his dispensations towards his own people, that when their love decays, and the exercises of it become cold or fall back, fear arises to keep them, that they may need it to restrain them from sin, and to excite them to care for the good of their souls, and so to stir them
Feast (properly ἑστάσεος, midhē, σεξό, when a hospitable entertainment; and ἐστίν, kagō, kērēin, when a religious festival). To what an early date the practices of hospitality are referable may be seen in Gen. xix. 3, where we find Lot inviting the two angels—"Turn in, I pray you, into your servant's house and tarry all night, and wash your feet; and he pressed upon them greatly, and they entered into his house; and he made befeasts for them." Gen. xxii. 3, "Wherefore did you thus steal away from me and didst not tell me, that I might have sent thee away with mirth, and with songs, and with tabret, and with harp?" See also 2 Sam. iii. 20; 2 Kings vi. 28; Job viii. 20; 1 Mac. xvi. 15. This practice explains the reason why the prodigal, on his return, was welcomed by a feast (Luke xiv. 16). Occasions of domestic joy were hailed with feasting; thus, in Gen. xli. 8, Abraham "made a great feast the same day that Isaac was weaned." Birthdays were thus celebrated (Gen. xi. 20): "Pharaoh, on his birthday, made a feast unto all his servants." Job i. 4; Matt. xiv. 6; compare Herod. i. 153. Marriage-feasts were also common. Samson (Judg. xiv. 10) on such an occasion "made a feast," and it is added, "for so used the young men to do." So Laban, when he gave his daughter Leah to Jacob (Gen. xxvii. 22), "gathered together all the men of the place and made a feast." These festive occasions seem originally to have answered the important purpose of serving as evidence and attestation of the events which they celebrated, on which account relatives and neighbors were invited to be present (Ruth iv. 10; John ii. 1). These processes in rural occupations by which the delicious bounties are gathered into the hands of man have been described in art and poetry. In the vigourous exercise, then, the fear and dullness, and they visit the gods, for there is no fear of death, no invitation to the gods, and the farmers' duties were performed in the presence of the gods, in observance of the religious festivals. In 2 Sam. xiii. 22, Absalom invites all the king's sons, and even David himself, to a sheep-shearing feast, on which occasion the guests became "merry with wine" (1 Sam. xxv. 2 sq.). The vintage was also celebrated with festive eating and drinking (Judg. ix. 27), and not only the Israelites, but also the Greeks, the Jews (2 Sam. iii. 8). In Jer. xvi. 7, among other funeral customs, mention is made of "the cup of consolation, to drink for their father or their mother," which brings to mind the indulgence in spirituous liquors to which our ancestors were given at times of mourning. The social customs of the Greeks and Romans, which has not yet entirely disappeared in Lancashire, nor probably in Ireland (Carleton's Irish Peasantry: England in the Nineteenth Century, vol. ii). To what an extent expense was sometimes carried on these occasions may be learned from Josephus (War, iv. 3, 1), who, having remarked that Archelaus "mourned for his father seven days, and had given a very expensive funeral feast to the multitude," states, "which custom is the occasion of poverty to many of the Jews;" adding, "because they are forced to feast the multitude; for if any one omits it he is not esteemed as a host." So a host had to be "the heart of God's children in proportion as they prevail, that is, when left to their own natural influence, without something adventitious or accidental intervening, as the distemper of melancholy, doctrinal Ignorance, prejudices of education, wrong instruction, false principles, superstitions, etc. For the Spirit of God no other way than by the prevailing of love; nor is it ever maintained by his Spirit but when love is asleep" (Edwards, Works, N. Y. ed., iii. 86). See, on the different dispensations of grace, Pritchett, Works, iii. 175 sq.; Stowell, Outlines, lect. i; Herzog, Real-Encyclopaedia, v. 280.

For further particulars as to social entertainments, see Banquet; and as to sacred occasions, see Festival.
Feasts, or Festivals, in the Christian Church, certain days set apart for the more particular remembrance of the prominent mysteries connected with our Lord in his redemption of mankind, and also for the commemoration of the labors and sufferings of his apostles.

1. History and Theory of their Observance.—(1.) Some Protestants object to the observance of these feasts on the ground that such observance is contrary to the injunction of the apostle Paul (Col. ii, 16), forgetting that in that passage the apostle alludes exclusively to Jewish feasts; others object to all such festivals as being popish, forgetting that they have been observed from the earliest ages of the Church. If a Church has been so long in existence as the Catholic Church, it was deemed necessary to give splendor and external attraction to the religion of the Gospel by the establishment of new festivals, or by converting Jewish and heathen ceremonies into Christian solemnities. It was thought that this might be done with safety, inasmuch as there was no danger whatever, in which the people, not contrary to Scripture, she has the power to set apart certain days in commemoration of the most important events and persons connected with the first promulgation of the Gospel to sinners’ (Eden). (2.) Festival days were hallowed in the Church long before the rise of the papacy. At first the religious festivals of the Church were observed voluntarily, and never by formal obligation; but in the 4th century various decrees of councils were passed, enjoining the observance of them as a duty. The number of festivals was increased, consisting now of Sundays, of Easter, Pentecost, and Ascension, and to these the Epiphany and Christmas were added at a later period.

The end designed by the observance of these festivals was to call to mind the benefits of the Christian dispensation, to excite Christians to holy living, to foster the spirit of charity, and to promote the cultivation of Christian graces. The discourses which were delivered on these occasions always referred to the most important topics of the Christian religion. Even the Lord’s day, according to Eusebius, was said to have a threefold origin, emblematical of the sacred Trinity—the grace of the knowledge of the God of heaven, the ascension of Christ, and the effusion of the Holy Spirit” (Bingham, bk. xx, ch. iv; Neander, Church History, i, 301). “The primitive Church was not careful to prescribe a specific time or place for the celebration of their religious festivals. The apostles and their immediate successors proceeded on the principle that these should be observed at stated times, which might still be varied as circumstances should direct. These seasons were regarded as sacred, not for any peculiar sanctity belonging to the day or hour in which they were observed, but in consequence of their being set apart from a common to a religious use. Some, however, have maintained that these festive days should be observed as holy time” (Cramer, Christian Antiquities, ch. xxii). After the 4th century festivals were so greatly multiplied in the Church that later times bear no resemblance in this respect to the first ages. “Many causes contibuted to this multiplication of festivals, among which may be mentioned as the chief, 1. The commemorations of martyrs and confessors already introduced, which led to the establishment of numerous festivals in honor of saints, and to the superstitions use of relics, invocations, pilgrimages, and the like; 2. The errors of some sects respecting existing festivals, to correct which the Catholic Church introduced new observances; 3. Several laws of Constantine relating to the celebration of Fasti, the religious observance of Friday in every week, and the feasts of martyrs; 4. The celebration of Christmas, which was introduced in the 4th century, led the way to the establishment of other festivals in connection with itself, such as those in honor of the Virgin Mary. 5. The propensity of many Christians to partake in the celebration of heathen festivals, and in Jewish observances had become a serious evil in the Church during the third and fourth centuries. In Homilies and decrees of councils of that date we find earnest protests against the amalgamation of Christian worship with Jewish and heathen rites, and a description of the dangers which threatened Christianity from this practice, which had begun to gain ground (see Chrys. in Hom. 1, 59, and St. John Chrysostom, Hom. in Ps. xix, 29, 37, 38; Conc. Hilber, c. 49, 50). This perversive attachment to forms and ceremonies altogether foreign to the Christian religion appears to have been a leading cause of the multiplication of festivals within the Church. The original simplicity of Christian worship had become obscured by the introduction of sacred objects, and it was deemed necessary to give splendor and external attraction to the religion of the Gospel by the establishment of new festivals, or by converting Jewish and heathen ceremonies into Christian solemnities. It was thought that this might be done with safety, inasmuch as there was no danger whatever, in which the people, not contrary to Scripture, she has the power to set apart certain days in commemoration of the most important events and persons connected with the first promulgation of the Gospel to sinners.”

2. Movable Feasts and Holy Days.—(1.) Besides the days observed by the whole Church as memorials of the acts of Christ’s life and death, other festivals were also introduced commemorative of the apostles and martyrs. Bingham states that these may be traced up to the 2d century (Orig. Ecc. xx, 7), and Moisheim agrees with him (cent. i, pt. ii, chap. iv, § 4). It is to be observed that while Christmas is celebrated as the birthday of Christ, the martyrs’ festivals were held on the days of their deaths—still, however, called birthdays (nativity and death) of these, as the names were generally puns to endless life. On the number of these festivals in the early Church, and the modes in which they were observed, see Bingham (i. c.; Neander, Ch. Hist. i, 300 sq.).

(2.) The Roman Catholic Church has retained all the early festivals, with the later ones of the apostles and martyrs, and has added largely to the number. She retains the right to enact festal days, and to fix the mode of their observance. The following list embraces the feasts of the American calendar:

Movable Feasts and Holy Days.—Feast of the Holy
Name of Jesus; Septuagesima Sunday; Ash Wednesday; Office of the Passion of our Lord; Office of the Most Sacred Crown; Office of the Spear and Nails; Office of the Five Wounds; Office of the Most Precious Blood; Sorrows of the B. V. Mary; Easter Day; Patronage of St. Joseph; Ascension of our Lord; Whit Sunday; First Sunday; Corpus Christi; Feast of the Sacred Heart of Jesus; Feast of the Most Precious Blood of our Lord; Feast of the Holy Name of Mary; Feast of the Seven Dolors of B. V. M.; Feast of the Holy Rosary; Feast of the Maternity of B. V. M.; Feast of the Patronage of B. V. M.; Sundays after Pentecost; First Sunday of Easter; Second Sunday of Easter; Third Sunday of Easter; Fourth Sunday of Easter; Fifth Sunday of Easter; Sixth Sunday of Easter; Ascension of our Lord; Day of Pentecost; Trinity Sunday; Fourth Sunday of June; Corpus Christi; Day of Pentecost; Holy Trinity Day; Day of Ascension; Day of Annunciation; Day of Pentecost; Day of Ascension Day; Day of Christmas; Day of Epiphany; Day of the Assumption of Aug. 15; Mary, B. V., Octave of, Aug. 22; Mary, B. V., Conception of, Dec. 8; Mary, B. V., Octave of, Dec. 15; Mary, B. V., Espousals of, Jan. 28; Mary, B. V., Expected Deliverance of, Dec. 12; Mary, B. V., Help of Christ, May 24; Mary, B. V., Nativitatem, Mar. 25; Mary, B. V., Presentation of, Nov. 21; Mary, B. V., Purification of, Feb. 2; Mary, B. V., Visitatio of, July 2; Mathias, Apostle, Feb. 24; Matthias, Apostle, leap year, Feb. 25; Matthew, Apostle and Evangelist, Sept. 21; Michael, Archangel, Dec. 9; Michael, Angel, Sept. 29; Michael, Apostle, Sept. 8; Monica, Widow, May 5; Nazarius, etc., MM., July 28; Nereus, etc., MM., May 12; Nicholas of Tolent, C., Sept. 10; Nicholas of Myra, B. C., Dec. 6; Norbert, B. C., June 6; Pantaleon, B. C., July 27; Paschal Baylon, C., May 17; Patricius, C., Dec. 8; Paul, Concemoration of, June 16; Paul, First Hermit, C., Jan. 15; Paulinus, B. C., June 22; Peter's Chains, Aug. 1; Peter's Chair at Antioch, Feb. 22; Peter's Chair at Rome, Jan. 18; Peter, Martyr, April 29; Peter of Alcantara, C., Oct. 19; Peter Celestius, B. C., May 2; Paul de Chastelain, C., June 2; Paulinus, B. C., Dec. 29; Peter Damian, B. C. D., Feb. 28; Peter Nolasco, C., Jan. 21; Peter and Paul, Apostles, June 29; Peter and Paul, Octave of, July 6; Peter and Paul, Dedication of the Church of, Nov. 18; Philip Benitil, C., Aug. 28; Philip Neri, C., May 26; Philip and James, Apostles, Mar. 27; Pius, Pope, C., March 15; Pius, Pope, Feb. 13; Placidus, etc., MM., Oct. 5; Polycarp, B. C. M., Jan. 26; Praxedes, V., July 21; Primus and Felicianus, MM., June 9; Raphael, Arch., Oct. 24; Raymund of Pennafort, Jan. 29; Raymund of Nonnatus, C., Aug. 1; Regibusius, B. C., Oct. 1; Romuald, Ab., Feb. 7; Rose of Lima, V., Aug. 30; Sabas, Ab., Dec. 5; Saviour's Church, Dedication of the, Nov. 9; Scholastrica, V., Feb. 10; Seven Brothers, MM., July 10; Silvester, Pope, C., Dec. 21; Silvesterus, Pope, June 20; Simeon, B. M., Feb. 18; Simon and Jude, Apostles, Oct. 28; Soter and Callixtus, MM., Apr. 29; Stanislaus Kostka, C., Nov. 14; Stanislaus, B. B., May 7; Stephen, Proto-Martyr, Dec. 26; Stephen, Octave of, Jan. 2; Stephen, Finding of Relics of, Aug. 5; Stephen, Pope, C., Aug. 2; Stephen, King, C., Sept. 2; Theresa, V., Oct. 10; Thomas, Ap., Dec. 21; Thomas of Aquin, D. M., Mar. 7; Thomas, Martyr, Dec. 29; Thomas of Villanova, B. C. B., Sept. 22; Tiburtius, etc., MM., April 14; Timothy, B. M., Jan. 24; Transfiguration of our Lord, Aug. 6; Ubaldo, B. C., May 16; Valentine, M., Feb. 14; Venantius, M., May 16; Vincent of Paul, C., June 23; Vespasianus, M., May 8; John the Baptist, Beheading of, Aug. 29; John the Baptist, Nativity of, June 24; John the Baptist, O. C. I. —17
Feast of Fools, a festival celebrated during the Middle Ages in many countries of Europe, especially in France, with grotesque ceremonies. It was an imitation of the Saturnalia, and, like that festival, was celebrated in March. The chief feature was a ball on New Year's or Innocents' Day; but the feast continued from Christmas to the last Sunday of Epiphany. At first only the young boys of the choir and young sacristans played the principal parts in it, but afterwards all the inferior servants of the Church were engaged, and the bishops and the superiors of the monks, with the canons, forming the audience. The young people who played the chief parts chose from their own number a bishop or archbishop of fools, as he was called, and consecrated him, in the principal church of the place, with many absurd ceremonies. This mock-bishop then took the seat usually occupied by the bishop, and caused him to be dressed in the vestments of the bishop. The festival continued until it was abolished in the 18th century, but its features yet remain in the Carnival (q. v.).—Thillot, Mémoires pour servir à l'histoire de la fête des fous (Lyon, 1761); Schröck, Kirchengeschichte, xxvi, 271; xxxii, 55; Siegel, Christl.-Kirchl. Alterthümer, iv, 118. See Boy-bishop.

Feather. 1. גלעִי or גלעִית, not a word (from גלע, to fly), a pinion or wing-feather, Ezek. xxvii, 3, 7 (false reading גלוי, 'ostrich') in Job xxxix, 13; but it means the excrement of the vulture or eagle (Heb. גלעוי), Job vi, 20. 2. גלעא, a pinion of the eagle, Job xiv, 20. נתח (as. גלעא, which has the same meaning), likewise a pinion or wing-feather, Ps. lxxxvii, 15; xcii, 4 (incorrectly 'wing'). Deut. xxxii, 11; Job xxxix, 13. 3. Incorrectly for גלעא, חצאית, Job xxxix, 13, the stork, as elsewhere rendered. See Wixo.

Feathering, or Foliation, an arrangement of small arcs, separated by projecting points or cusps, to ornament the inside of larger arches, or triangular or circular openings in Gothic architecture. Feathering was first introduced at the close of the early English style, and continued till the supplanting of the Early by the Renaissance architecture. When smaller arcs are added to ornament these small arcs, the feathering is said to be double. It is also sometimes made triple in the late decadence of the Gothic architecture.—Parker, Glossary of Architecture.

Feathers Tavern Association, a society of English clergymen and laymen, formed to secure a reformation of the English liturgy in the latter part of the 18th century. The name is derived from the "Feathers Tavern," in London, where their meetings were held. The number of clergymen in the body was nearly 500. Gilbert Wakefield (q. v.) was a leading spirit in the association. "They signed a petition requesting the excision of the damnable clauses in the Athanasian Creed, and the relief of their consciences in the matter of subscription; and with this, no doubt, many of them would have been satisfied. But the clergy went much further. In the hands of pamphlets which this affair created, some of them spoke of the Reformation, the doctrine of the Trinity, and the Thirty-nine Articles with ridicule. When the matter was debated in the House of Commons, the doctrines of the Church of England were treated with contempt. The work was gladly extended, and the Thirty-nine Articles, 'said one of the speakers, 'for a foible, of which the subject should be the peace of the Church.' The doctrine of the Trinity was denounced by one of the writers of the association as 'an imposition—a deception of a much later date than Athanasius—a deception, too, which an article of the doctrine professed. The whole system of Christian doctrine, as taught by the Church of England, was assailed. The same writer affirms, with a degree of effrontery that might have
well rouse the indignation of the clergy, 'that certain parts in the public service and doctrine of the Church are wanting'.... His publications is given in the Theocibus devarum et catholicae (Wurzb., 1843). -Hersog, Real-Encyklop. iv, 344; Wetzer u. Weise, Kirchen-Lex., iii, 928. (A. J. S.)

Federal Theology (Lat. fides, a compact; adj. fidealis), a method of stating divine truth, according to which all the doctrines of religion are arranged under the heads of certain covenants God has made with men. We set forth (I) the doctrine, as stated by its author; (II) its history.

I. Doctrine.—The fundamental idea of the system is that man has always stood towards God in the relation of a covenant, though a covenant of a peculiar character. The ordinary idea of a covenant, which is that of a mutual compact between one or more parties, each bound to render some benefit to the other, is obviously excluded by the nature of the case. Where God and man are the parties, the benefits must be all on one side and the obligations on the other. The relation must be determined and be imposed upon man by God in his right of a sovereign ruler. And yet it is something more than a mere law or promise. It involves a law and a promise, but goes beyond both; it is not simply a law or promise. But beyond that, it is a promise, a promise of mercy, a promise of forgiveness. In the case of a covenant, it is an agreement which the parties enter into in presence of God, and which is recorded in his word. There is ever a virtual implication of mutual consent and obligations, for on the one hand God graciously binds himself to the performance of certain engagements with the view of securing results that shall manifest his glory; and man freely consents, when with this understanding, he enters upon a course of obedience. Such a promise on God's part, suspended upon the performance of a condition on man's, is a covenant. The advocates of this system have usually made two such covenants: viz. 1, that of nature or of works; and, 2, that of grace. These have been successive in their revelation to man, since the former was an arrangement before the Fall, and the latter was not made known until after that event; and yet the latter must have been agreed upon before all worlds, whereas the former could not have been formed until the creation of man; and some contend that those who refuse their consent to the covenant of grace must necessarily remain, even now, under the obligations and penalties of the covenant of works. In both we have the same contracting parties, God and man; the same blessing to be attained, eternal life; and the same requirement of perfect obedience, but not the same form. The covenant of grace is a dispensation of mercy to sinners, is through a divine Mediator, and secures the blessings of eternal life without the possibility of a failure.

1. The covenant of nature, or of works, is nowhere spoken of under that name, but is supposed to be more than once alluded to in the Scriptures. Some have thought they had discovered an express mention of it in Hos. vi, 7: "They, like Adam, have transgressed the covenant" (compare Job xxxi, 38; Ps. lxxxii, 7). The apostle often speaks of the law of works in connection with the law of faith. It is a question whether the covenants (Gal. iv, 24), and not unfrequently of an old and a new covenant. It is not denied that by these expressions he usually meant the Mosaic or Sinaitic dispensation, in distinction from the evangelical; but it is thought that such a dispensation could be designated a covenant. Other covenants besides the above are the covenant of Works (Gen. xiv, 27), and the covenant of Law (Deut. xxv, 15). But there is a greater resemblance towards the latter, as being made with men of all sorts and conditions. The contrast and resemblance which Paul also draws between the first and the second Adam (Rom. v, 12), may be supposed to have no meaning without the understanding of a covenant with our great
progenitor. All the essentials of a covenant, too, are
discernable in the constitution under which Adam
was placed by his Maker. Not only was he, as a
moral being, under obligation to conform to the law
written upon his heart, and to obey the positive pre-
ccepts of his constitution, but also his very eternal
life was promised him on condition of his obedience.
He was constituted the representative of his race, and
a limited period was assigned him in which the desti-
y of all was to be decided. That this is a true state-
ment of the case was inferred from the fact which actually
followed—suffering and death, the consummation of our
first condition, and must have been more or less clearly known to them.
To such an arrangement those who had been created
in the image of God could do no otherwise than yield
a cheerful assent, insomuch as far higher blessings
were accounted by him than by any merely legal relation.
We have reason to suppose, also, that their powers were
quite ample for the performance of the condition.
Many have thought that before the Fall they were
endowed with such supernatural gifts as secured to
them the possession of their original righteousness;
but, as our Lord has said, they were never intended,
and as they appeared to many inconsistent with the
possibility of man's fall, most writers contend that the
divine image consisted wholly in the knowledge and
moral excellence which Adam had within himself.
That he would have secured eternal life to himself
and his posterity, since our first parents, and must
have been more or less clearly known to them.
To such an arrangement those who had been created
in the image of God could do no otherwise than yield
a cheerful assent, insomuch as far higher blessings
were accounted by him than by any merely legal relation.
We have reason to suppose, also, that their powers were
quite ample for the performance of the condition.
Many have thought that before the Fall they were
endowed with such supernatural gifts as secured to
them the possession of their original righteousness;
but, as our Lord has said, they were never intended,
and as they appeared to many inconsistent with the
possibility of man's fall, most writers contend that the
divine image consisted wholly in the knowledge and
moral excellence which Adam had within himself.
That he would have secured eternal life to himself
and his posterity, since our first parents, and must
behave as though they were abandoned the price of
their sins. The first act of misfortune, and the one
which would certainly follow that act. It is conceded
that in the last day none will be condemned for any but
their own personal sin, and yet it is contended that in
the first sin all are rendered liable to both the sin-
fulness and the misery of the present state.

2. The covenant of grace is that glorious scheme of
wisdom and goodness by which eternal life and salva-
tion have been provided for men in a way of free grace
and mercy. It is sometimes distinguished from the
covenant of possession, inasmuch as the latter phrase
may be applied to that arrangement in eternity be-
 tween the persons of the Trinity, and the former to
the engagement into which God enters in time with
believers. On the other hand, some have contended
that the covenant of redemption is that stricter ar-
rangement according to which believers are delivered
from all sin, which is the grant, which is the gift,
according to which a sufficient atonement was provided
for all men. It has, however, been most common to
speak of all God's arrangements for the salvation of
men as under a single covenant, which, however, may
be distinguished by its different relations, the con-
cessive of the whole race as fallen, and then of a scheme
of mercy which provides first a door of mercy suffi-
ciently open for all mankind to enter, and finally a
system of means which should secure the actual sal-
vation of a limited number; or he may conceive of the
eye of God being fixed first upon a limited number
of our fallen race, and for their sake alone providing an
atonement sufficient indeed for all men, but designed
and efficient for the salvation of only a definite num-
ber. The latter was the aspect in which the covenant
of grace has usually been presented by its advocates.
They have supposed that first God had in view the
temporary character of the covenant of works, and
determined upon another arrangement, by which a por-
tion of mankind might be saved from the ruins of the
apostasy. Why he did not include the whole or a
larger portion of mankind, who had professed to en-
joy mercy, they prefer to leave out of discussion as an
unapproachable mystery. That he had sufficient rea-
sons without implying a want of benevolence they as-
sert without hesitation, but they think it best never to
attempt a definition of them. Negatively they con-
tend that the fear of God would lead men hereinafter
in natural goodness, since many of them confess them-
selves to be the chief of sinners. The effort to
find a sufficient reason in the anticipated circumstances
by ordinary generation, were henceforth to be treated
as guilty and fallen creatures. Only his first sin was
thus imputed to them because the original covenant
was broken by that alone, and Adam must afterwards
have stood as a single person, and not as a public rep-
resentative. Insomuch as God, communal with God, com-
mon of works was henceforth abolished and forbidden,
and yet all men are under obligation to obey the law,
and on their own disobedience they must endure its pen-
salty, unless they are redeemed by Jesus Christ.
God has encouraged no to the arrangement in eternity by an obe-
dience to the law, for, even if such an obedience were
possible, no one has ever realized it, and God has
provided no promises for a merely hypothetical case.
If, therefore, no other scheme had been proposed to
man, each individual of our race had lain under the
penalty of the first commandment, which would have
formed to a hopeless abandonment by his Maker, to all the evils
of a dying state in this world, to final death itself, and
to an everlasting banishment from God in the world in
the world to come. Not that each person was judicially con-
demned to all these evils exclusively on account of
the first sin, which was his own, but such as all of them
would certainly follow that act. It is conceded
that in the last day none will be condemned for any but
their own personal sin, and yet it is contended that in
the first sin all are rendered liable to both the sin-
fulness and the misery of the present state.

2. The covenant of grace is that glorious scheme of
wisdom and goodness by which eternal life and salva-
tion have been provided for men in a way of free grace
and mercy. It is sometimes distinguished from the
covenant of possession, inasmuch as the latter phrase
may be applied to that arrangement in eternity be-
 tween the persons of the Trinity, and the former to
the engagement into which God enters in time with
believers. On the other hand, some have contended
that the covenant of redemption is that stricter ar-
rangement according to which believers are delivered
from all sin, which is the grant, which is the gift,
according to which a sufficient atonement was provided
for all men. It has, however, been most common to
speak of all God's arrangements for the salvation of
men as under a single covenant, which, however, may
be distinguished by its different relations, the con-
cessive of the whole race as fallen, and then of a scheme
of mercy which provides first a door of mercy suffi-
ciently open for all mankind to enter, and finally a
system of means which should secure the actual sal-
vation of a limited number; or he may conceive of the
eye of God being fixed first upon a limited number
of our fallen race, and for their sake alone providing an
atonement sufficient indeed for all men, but designed
and efficient for the salvation of only a definite num-
ber. The latter was the aspect in which the covenant
of grace has usually been presented by its advocates.
They have supposed that first God had in view the
temporary character of the covenant of works, and
determined upon another arrangement, by which a por-
tion of mankind might be saved from the ruins of the
apostasy. Why he did not include the whole or a
larger portion of mankind, who had professed to en-
joy mercy, they prefer to leave out of discussion as an
unapproachable mystery. That he had sufficient rea-
sons without implying a want of benevolence they as-
sert without hesitation, but they think it best never to
attempt a definition of them. Negatively they con-
tend that the fear of God would lead men hereinafter
in natural goodness, since many of them confess them-
selves to be the chief of sinners. The effort to
find a sufficient reason in the anticipated circumstances
of men has usually proved so confusing to the finite intellect, that most thinkers have concluded to leave the origin of discriminating grace where the Scriptures have left it, in the mere good pleasure (beneficium) of God. As we read of some who were chosen in the foundation of the world, it has been inferred that there must have been in eternity an agreement or covenant between the persons of the sacred Trinity, according to which a seed was given to the Son to serve him, and that he became surety to satisfy the claims of justice upon them, to give them a title to eternal life, and to bring them to everlasting glory. The Father (who in this transaction is usually regarded as personating the Deity as such) engaged to spare his beloved Son, to furnish him with all suitable endowments and preparations for his work, to support him to it, to deliver into his hands all power in heaven and on earth, to pardon and accept all who should come unto God by him, and to confer upon him a glorious reward forever and ever. The Holy Spirit, who must also be looked upon as having a part in this covenant, also engaged to become the efficient agent in the regeneration, sanctification, and glorification of his person, and to be the way seed. Without ascribing to this transaction the technicalities of a human compact, and conceding that the whole mode of viewing it is anthropomorphic, it is contended that something equivalent to this, and amounting to a law or covenant understanding must be found among the persons in the sacred Trinity. An equal love towards men is supposed to have existed in each of the divine persons. But as man was under condemnation, and could not therefore act for himself, the Son of God acted in behalf of all of whom he was to be the spiritual head. To constitute a natural ground for his headship, his Son was to become a man, uniting divinity in one person with humanity. He thus became a new federal head for his spiritual seed, similar to that which Adam had sustained to his natural descendants. In this relation he was to act in all he did as their representative. He was to share with them all the blessings which the first sin had brought upon the human race, not shrinking even from death in its most terrific form. Though this endurance was not the same with that which they would have endured in its spiritual results or in eternal duration, it was supposed to be infinite in value on account of the existence of his person and of the way seed, and was indeed sufficient in objective worth to expiate for any amount of sin in any number of worlds. It has actually conferred innumerable benefits upon all men. Pardon and salvation is offered to every one who hears the word of the Lord, and believes in him; and means of grace are afforded to all, and sufficient is done to leave those inexcusable who deny the Lord that bought them. But confessedly all are not made partakers of salvation, and only a portion of men were eternally given to Christ by the Father. Obviously it was not left to an uncertainty whether his work would be in vain or not. A seed was secured to him by covenant, and it was with an ultimate reference to these that he entered upon his work. Adapted to all, and sufficient for all as his work may be, it must have been specially designed just as much for the salvation of the proper head and representative, since they alone are ingrafted into him by a living and active faith. To them alone is his perfect righteousness imputed, as if he had suffered and obeyed in their stead. By his sufferings and death, the law has been satisfied, and the perfect obedience to the law he has obtained for them a title to eternal life. He thus becomes their surety, not merely to make them inherently holy, but to perform what is required of them. He satisfies in this way both the penalty and the precept of the broken covenant. That covenant required obedience only for a limited period, and he has fulfilled the law during the time allotted him by the Father. The whole person of the Redeemer in both natures was subject to the law, and as such an obedience (at least in this special form of it) was not obligatory, but voluntary on his part, it became available for an infinite righteousness.

Such was the covenant of grace as formed in eternity. To this must be added its actual administration in time. Of course the only administrator of it was the Son of God himself, the mediator between God and man. He has power over all flesh, in order to give eternal life to as many as had been given him. He it was who represented the divine alder in all the dispensations of mercy of which the sacred history informs us. Although at different periods of human history the outward forms of religion have been changed, the covenant of grace, which lay at the basis of them all, was always the same. Salvation has in all cases been by Christ alone where the subjects of grace were not or could not, or would not, respect him. None have ever been saved by the law of works, and none have had their hopes bounded by promises of an earthly home. The antediluvians, the patriarchs, Job and his friends, the Israelites in Egypt and under the Mosaic dispensation, looked to a different and more limited provision. Hence the less enlarged measures of the divine Spirit at some periods than at others. Ordinarily there have been reckoned but two principal economies or dispensations, viz. that under the Old and that under the New Testament. Although the same word in the original languages of the Bible is applied to all covenants between God and man, the advocates of the federal system have translated them differently when applied on the one hand to the great covenants of nature and of grace, and on the other to the different economies under the covenant of grace. Availing themselves of the double meaning of the word, they have usually designated these latter economies by the name of testaments, to indicate that they were that peculiar kind of arrangements which acquire validity only after the decease of him who makes them. Though the Redeemer had not, in fact, died before the covenant of grace was established, it was looked upon as slain from the foundation of the world, and the dispensations of mercy were even then constituted in anticipation of his death. Hence, when speaking of the communication of benefits to men, no mutual conditions are implied, but Jesus Christ is set before them as the means of grace. The Messiah is the Son of God. In the way of nature the Holy Spirit is given in his plentitude, no other is conceivable. Jesus Christ will continue to administer it until the whole world shall be subdued unto him. Finally, the present economy of things shall cease, the law and the testament shall be put away, for the new and better covenant made in the blood of Christ, and his human being shall be judged at Christ's bar for sins, not only against God as a moral ruler, but against himself as the mediatorial king, and sentence shall be passed upon each according to his works.
session of his kingdom, he will present to the Father as the economical representative of the Godhead, either in token of the completeness of his work, or as indication of the Father’s own peculiar office (1 Cor. xv. 28), or only brings his mediatorial kingdom into some new relation, he will then complete the scheme of the covenant of grace, and receive his eternally betrothed Church into an everlasting union with himself.

2. History.—The words rendered covenant are frequently used in the original Scriptures in application to God’s dealings with his creatures. The Hebrew וְקֹרֵ֣ב signifies undoubtedly in its primary meaning a mutual compact (Robinson’s Gesenius’s Lexicon), and yet it is not unfrequently applied to transactions in which such an idea in its strictness is impossible (Gen. ix. 9–18; Jer. xxxiii, 20–21). With a true sense of its usage and idea, if not strictly according to its etymological significance, the LXX have translated this word by a concord, and the generic meaning of which is a disposition or arrangement, and lapes into the idea of a mutual compact or testament only when the author or authors of it happened to be mutual stipulators or testators. But neither in the Septuagint nor in the New Testament is the word ever applied to the practical and legal constitution between God and man, but the ways to some transaction or dispensation under the covenant of grace (Heb. vi. 7, with this, its signification, is doubtful). Nor has any clear instance of such an application of the word to man’s primeval state been found in any theological writer before the commencement of the 17th century. (See, however, Bede on Gen. xvii. 14.) Certainly no one had attempted to arrange all the materials of a systematic theology under the general heads of divine covenants. And yet there was an obvious tendency in that direction among the Reformers that had been inherited by all the Calvinistic school. These had become familiar with the word in relation to Christ and his people, and with all the principles involved in a covenant with Adam. They had seen that Adam’s original position was not that of a mere subject of law, but that promises had been made to him whereby he should be blessed. And the generic meaning was represented on a limited probation in him. It is generally conceded that the federal system had its origin with Kleppenburg, a professor of theology at Franeker (tied in 1652). The first, however, who had the genius and the capacity to give definite form to all the federal system was John Koch (Coccres), a pupil of his, and a successor in the same chair. In his Summa doctrinae de fide et testamento Dei (1648), and still further in his more enlarged Summa Theol. Graec. (2d edit. 1663), he comprises all the doctrines of the Christian religion under the two great categories of the covenants of nature and of grace. The method he pursued has gained for him the appellation of “the Father of Biblical Theology;” and, laying aside the practice usual with his predecessors, of viewing divine truth in its subjective form, either as logically constructed by a human mind, or as it was supposed to lie in the divine mind around the great central doctrine of predestination, he professed to come to the Scriptures, reverently to read them, and derive his system from the inspired historical arrangement. The events of human history were regarded in their anthropological aspect as well as related to the divine efficiency. The final cause of salvation he can indeed find nowhere else than in the divine mind, and he has no occasion to impinge against the highest style of contemporary orthodoxy, and yet he succeeded in giving to theology a new character and spirit. Although he, like all predecessors, conceived of man as receptive and God alone as communicative, he still represented man as coming under an obligation to perform certain duties which were looked upon as a virtual condition of the divine promises. This fidelity to the scriptural representation compelled him to develop his system according to the successive periods of the sacred history (Eccard, Dogm. § 40; D. Schenkel, Chris. Dogm. § 129, note). As often occurs when great changes are introduced in formal statements of truth, this system was as bitterly opposed as if it had been an essential error. Other principles, on which the author was more vulnerable, were introduced into the controversy; but the main features of his system soon obtained a remarkable degree of acceptance in all the Reformed churches of France, Switzerland, Holland, Scotland, and among the English Puritans. The orthodox Roman Catholics have always regarded it with aversion, and the Jansenists in the whole conception of a covenant with Adam as an innovation upon Augustinianism and needless to explain the natural effects of the first sin (Fathers Paul’s Hist. of the Council of Trent, p. 177–201; Jansenius, Augus. ii, 208–11). The Lutheran divines have in general rejected it on account of the prominence it sets to the fear of God and the principles of external obedience, and because, when the word covenant was divested of the idea of a mutual compact, it offered no advantages over the words which had long been in use (Thoma- sius, Christ. Person und Werk, § 25). The Arminians of Holland were partially conciliated by those juridical and metaphysical considerations by which they defended their system, and many of them accepted of it with some important modifications. The object of these was to limit the direct consequences of Adam’s sin to a privation of original righteousness, or the loss of those spiritual attributes which they made the original moral image to depend, to temporal evil, and to bodily death, together with such a deprivation of our mental and moral state as renders us incapable of obedience, and so to extend the benefits of Christ’s death that he should not only be regarded as dying for all men alike, but as a representative man, from the belief that in him we trusted, we should be possessed of such supernatural aids as, if properly used, would enable them to lay hold upon the great salvation (Nich- ol’s Calvinism and Arminianism in Watson’s Theol. Hist. ii, 45). Notwithstanding the objections raised against the federal system, its principles were carried still further forward by the fearless and analytical speculation of Francis Burman, a pupil of Koch, and a professor in the University of Utrecht. In his Synopsis of Theology, and especially of the Economy of the Covenants (1671), he endeavored to show that all the details of the covenant of grace should be inferred from the idea of the divine image in man in connection with what we know of the divine goodness, since that goodness would of course desire to bring man into the highest communion with itself, and would not be satisfied with the prescriptions of a mere natural justice. The difficulties, however, with which the system was pressed by its opponents were sought to be removed by Hermann Wilzius, a successor and former pupil of Burman in the theological chair of the University of Utrecht. In his Economy of the Covenants, the first edition of which appeared in 1695, some important distinctions maintained by his predecessors were given up (as, e. g. that between the τραγεία of the Old and the δεσμος of the New Testament, as shown in Rom. iii, 25, 26, and the three dispensations or economies of the covenant of grace); a minute parallel is drawn between the two covenants by the introduction of four sacraments into Paradise (the tree of life, the tree of knowledge, the Sabbath, and Paradise itself); and a sacramental character is given to a multitude of things under the economy before the law (the coals of skins, the ark, the rainbow, etc., bk. ii, chap. viii, § 10; bk. iv, chap. vii). In 1696 a further attempt was made by the federal system by Melchor Leydenker, another professor in Utrecht, who, though not in the strictest sense a Federalist, professedly wrote under its spirit and tendency. In his Sermon on the Truth of the Christian Religion, he endeavors to trace the econ-
any of the covenant of grace to the several Persons of the sacred Trinity, by showing that the Father reveals himself, especially in the Old Testament, as the universal Ruler maintaining the cause of justice; the Son, especially during his life on earth, as the Mediator dispensing mercy; and the Holy Ghost, especially since the time of the Apostles, as the promised divine and saving power. This arbitrary assignment of the divine attributes, however, has never been acceptable. Though the Heidelberg Catechism was composed before the federal theory was distinctly broached, most of its propositions and articles which have been written upon it were written by Federalists. The mature fruit of that system may be seen in the writings of Solomon van Til (Tilanus), a professor in Dort and Leyden, whose Compendium of Natural and Revealed Theology, 1704, and Compendium of Theology, Borne, 1703, were the organic union of the three great tendencies of Scholasticism, Federalism, and Cartesianism, and have obtained general acceptance in the schools of Holland; and in those of F. A. Lamps, the pastor of several influential congregations and a professor in Utrecht (1720–27), whose doctrinal and practical writings wereormerly extolled in the borders of the Reformed churches. It has never been either condemned or sanctioned by the public synod, and such has been the balance of parties that, by right of long-established custom, one Federalist must be appointed in each of the universities of Holland (Ebrard, Christ. Dogm. § 41).

A modification both of the Scholastic and Federal theology made its appearance among the Protestants of France. The rival theological schools of Saumur and Montauban zealously adopted the federal system. But John Cameron, a Scotchman, who at different times was a professor in both institutions [see Lambarçon, and his pupil, Moïse Amyraut (Amyraldus) and Joshua de la Place (Placentus), who were associated as professors at Saumur (1633–64), proposed, and for many years maintained, a peculiar system, which attempted to reconcile it with the doctrine of a universal redemption. See Amyraut and Placentus, Præ disposition. The result was a crude syncretism of an ideal or hypothetical Universalism with a rigid and real Particularism. Amyraut maintained that there were three instead of two general covenants with man—the natural, with a posthumous redemption, and a promise of eternal life in Paradise; a legal, promising the land of Canaan on condition of a life of faith; and the gracious, promising eternal life on the condition of faith in Christ. La Place also drew a distinction between a mediate and an immediate imputation, according to which Adam's sin might be imputed to his posterity, either medially, on account of a previously recognised inherent depravity in them; or it might be imputed to them immediately, simply on account of their federal representation in Adam. This whole system was strenuously opposed by the older Spanheim, of Geneva and Leyden; J. J. Heidegger, of Zurich; and Francis Turelin, of Geneva. At the two last national synods ever held in France (Charenton, in 1645, and Loudun, in 1639) the authors successfully defended themselves from the charge of heresy, and maintained that their view, as opposed to the traditional doctrine, which had been universally held by the orthodox Church since primitive times, and especially by Augustine and Calvin; but a statement of opinions implied to them (incorrectly, as they maintained) was condemned at a synod at Charenton (1642), and the Formula of Concord was composed principally by Heidegger (1675), and was adopted and sent forth to guard the churches against such views. Although this is one of the most scientific and highly esteemed of the Calvinistic confessions, and is the only one among the Continental confessions which is constructed expressly upon the basis of the federal system, its authority has never been acknowledged in France, and it was received by only five of the Swiss cantons. It was endorsed by the civil magistrates, and finally lost all public sanction within fifty years from its promulgation (Ebrard's Christ. Dogm. § 41; L. Noack's Christ. Dogmenuzsch. § 74; Sheil's Hist. of Ch. Doc. ii, 412).

In Scotland and Ireland, it has been written especially in those churches which adhere to the confession of faith put forth by the Synod of Westminster (1643–8), and we have the stronghold of the federal system. The representatives of the English Church at the Synod of Dort (1618–19), and especially bishop Davenant, had maintained a system similar to that of Amyraut, and found some party in that Church have always held views based upon the federal theology. Even Jeremy Taylor maintained it (1649), with some Arminian, and even Pelagian modifications, in one of his treatises (On Repentance, ch. i, § 1). The celebrated Richard Baxter, though a Unitarian, was not without his reservations. In the Roman Church, as in other countries, the question always has been, not except limitation, or exposition of any word. ' was an ardent defender of the federalism, as qualified by Amyraut (Preface to the Saints' Rest, 1650; Cath. Theol. 1675; Univ. Redemp. 1651; Orme's Life of Baxter, vol. ii, 1675). At Westminster, in fact, contemporary with the first publication of Koch's principal work on the covenants (1648), and deserves a credit, perhaps, equal to his for the origination and precise statement of the doctrine. The national Scotch Church, with its affiliated branches in Scotland and Ireland, has always upheld the system in its utmost consistency and extreme form. The United Presbyterian Church alone is said to maintain it, with some modifications connected with the theory of a general atonement (Wardlaw, On the Extent of the Atonement, § 13–15). Among the orthodox churches of England it has also been accepted, and found some of its most able defenders. The Wesleyans of England and America claim that they are enabled, by their peculiar modifications of it, to carry through the system with greater consistency than the Calvinists themselves, inasmuch as they more easily accommodate it to the scriptural and religious inclinations in those who never give evidence of actual conversion. By their doctrine of a general redemption, they maintain that in spite of the loss of the supernatural aids through the Fall, and the consequences therefrom, an efficacious grace is given to all. And, inasmuch as the word redemption properly signifies more than what is obtained simply by the expiatory work of Christ, and includes an entire deliverance from sin. They therefore use the word atonement to signify the objective and general work of Christ, and contend that this is for sin, and for all men, while redemption implies the salvation of men, and must, of course, be confined to such as shall be saved (Dr. W. R. Weeks, in Park's Collections on the Atonement, p. 579). Such an atonement is not merely hypothetical, and properly confined to such as shall be saved, but really operates the effects of primary redemption upon all who are supposed, even since the Fall, to possess all those faculties and powers which render them responsible for
a compliance with the terms of salvation. And yet, so certain are all men to use their powers, and the best external means of grace, to their perdition, that no reason can be assigned for the repentance and faith of late; consequently from sins, and they, of course, confine its application to the elect. They speak in the largest terms of the sufficiency of the work of Christ for the pardon of all sin, but regard it as limited in the purpose and design of God to such as are effectually called of the Spirit, and are kept by the power of God through faith unto salvation (Princeton Theol. Essays, vol. vili, and xiv; A. Fuller's Gospel, etc., in Works, i, 312-340, vol. i, art. viii and xiv).}
FELICISSIMUS

GLASGOW, Gospelzaal Nederl. blz. 460 en verv.; Geschiedenis der Christelijke Kerken in Nederland door B. ter Hoar, W. Moll, E. P. Swaule, etc., ii Deel, blz. 598 en verv. (Amsterdam, 1860); Evangelische Gesangen, introduced in 1807. (J. P. W.)

FELGENHAGEN, Paul, a Protestant theosophist and mystic, was the son of a Lutheran clergyman in Bohemia. He was born in Prague, in 1658. He studied medicine at the University of Wittenberg, but soon after returning to his native country appeared (1820) in public as a writer on theological subjects. In his Chronology he maintained that Christ was born in the year 4286 after the creation of the world, and as the world was not then 6000 years old, but last mustered more than 6000 years, it could not come to an end in A.D. 1765. As, however, the time was to be shortened on account of the elect, he assumed that the end of the world would occur before that year, although he claimed no special revelations on the subject. At Zeitenberg he denounced corruption of the Church and of the Lutheran clergy. The persecution of Protestantism in Bohemia compelled him to leave his country. He first (1623) went to Amsterdam, where he published a number of mystical and allegorical writings, the theological views of which may be described as Sabellianism and Monophysitism, resting on a pantheistical and cabalistical basis. The large circulation of some of his works alarmed the Lutheran clergy, and many wrote against him. Not satisfied with this, the clergy of Hamburg, Lubeck, and Lüneburg requested the ministry at Amsterdam to arrest the circulation of the works of Felgenhagen, and the spreading of his views, if necessary, by force. From 1635 to 1638 he lived at Bederkesa, near Bremen, where he held meetings of his adherents. Ex- pelled from Bremen, he returned to Holland, where he, however, soon left again for Northern Germany. In 1657 he was pursued by order of the governors of Zelle and Hanover, and imprisoned at Syke. The efforts of several Lutheran clergymen to convert him to the Lutheran creed failed. About 1669 he lived in Hamburg. The year of his death is not known. A complete list of his works (forty-one in number) he gave in Adelung, Gesch. der menschl. Naturk., iv. 400.

FELDBIEN, Jacques, a Roman Catholic divine, was born at Chartres in 1668, and distinguished himself in youth by success in study, especially of the Scripture. In 1696 he became pastor at Vines; in 1698, canon of Chartres; and in 1699, archdeacon of Vendome. He died at Chartres Nov. 23, 1716. Besides various practical works, he wrote Le Symbole des Apôtres expliqué par l'écriture Sainte (Blais, 1696, 12mo);—Comment. in Oecum (Chartres, 1702, 4to);—Fenestriculius Historicus et fonte Hidrico, etc. (Chartres, 1703, 4to). This book gave rise to much clamor, and Felbien was obliged to suppress various passages in which he was supposed to have departed from the orthodox interpretations. Moreover, as it had been printed with the permission only of the bishop, and without that of the papal curia, the book was suppressed by the latter, and all the printed copies confiscated.—Hoefler, Nouv. Biog. Générale, xvii, 274.

FELICISSIMUS, the author of a schism in the Church of Carthage in the 3d century, was appointed dean in Carthage by the presbyter Novatus, without a previous understanding with Cyprian, who, a short time before, had been elected bishop. Cyprian, who learned this, endeavored to have him en consecrated upon his episcopal prerogatives, but did not depose him. During the Decian persecution Cyprian was for some time absent from Carthage, and some of the presbyters, who claimed greater rights than Cyprian was willing to concede to them, began to cry up the communion of the Church in consequence of the libelli pachii given by the martyrs, without having an under-
standing on the subject with Cyprian. The latter re-
proached the presbyters with too great laxity, and
sent a commission to Carthage which was to investi-
gate the conduct of the lapsed, and to regulate the sup-
port of the church, which should appear before the cop-
ial commission. Felicitas denounced the conduct of
Cyprian as an encroachment upon his rights as de-
ome, among which belonged, in the Church of Africa,
the administration of the treasury of the Church; and
he even went so far as to exclude from the communion
of the church those who should have committed these
crimes. Felicitas was joined in his opposition by
five presbyters and a number of confessors, and his
church became the centre of all the lapsed who wished
to have their cases decided before the return of Cypri-
ian. After the return of Cyprian to Carthage in 251,
a synod regulated the affair of the lapsed, and excluded
Felicitas and the presbyters acting with him from the
Church. Felicitas, however, not only persisted in
his opposition, but his party, strengthened by the
accession of several African bishops, elected Fortun-
atus, one of the five presbyters siding with Felicitas,
bishop of Carthage, and sent Felicitas himself
himself to Rome—where, in the mean while, the Novatian
controversy had broken out—for the purpose of gain-
ing the Roman bishop Cornelius over to their side.
The mission was, however, unsuccessful, and the
cause of the heretics was soon after to become
extinct.—H. Ziegler, Real-Encyclop. iv. 384; Schaff,
Church History. (A. J. S.)

Felicitas, a saint of the Roman calendar, supposed
to have suffered martyrdom A.D. 164. According
to the legend, she was a woman of high birth, who
embraced Christianity and brought up her seven sons in
the faith. She was denounced to Marcus Aurelius,
who ordered an inspection of her house. The prefect
ordered her to sacrifice to the gods; she refused, as did her children.
When vain efforts to break her constancy, the prefect
reported the case anew to the emperor, who ordered a
trial before special judges. The lady and her children
were all put to death. The story is plain of com-
parative modern invention. Felicitas is commemorate-
dated in the Church of Rome Nov. 18, and her seven
sons July 16. The bones of two of her sons are said
to be preserved in Germany!—Bolland, Acta Sanctor-
orum, July 10; Butler, Lives of Saints, July 10.

Felicitas, an African slave who suffered martyr-
dom at Carthage along with Perpetua (q. v.), in the
time of Severus, A.D. 202. They are both said by
Lactantius, the distinguished Christian historian, to
seems to have disproved this in his Disser. Apol. pro
SS. Perpetua et Felicilse. They were arrested at Car-
thage while still catechumens, and were baptized in
prison. All efforts were tried in vain to induce them
to abandon their faith; they were condemned to be
thrown to the wild beasts at a festival in honor of the
anniversary of Geta's nomination (Annales Caesar.
After this judgment they were remanded to prison to
await the fatal day. For the account of Perpetua, see
PERPETUA. "As to Felicitas, on her return to the
gedown she was seized with the pains of labor.
Jailer said to her, "If thy present sufferings are so
great, what wilt thou do when thou art thrown to the
wild beasts? This thou didst not consider when thou
refusedst to sacrifice." She answered, "I now suffer
myself all that I suffer; but then there will be snaker
when I am free in the presence of the emperor who
hath taken me; he will be not so cruel to me as
him." A custom which had come down from the times
of human sacrifices, under the bloody Baal-worship of
the Carthaginians, still prevailed, of dressing those
criminals who were condemned to die by wild beasts
in priestly raiment. It was therefore proposed, in the
present case, that the men should be clothed as the
priests of Saturn, and the women as the priestesses
of Ceres. Nobly did their free, Christian spirit protest
against such a proceeding. "We have come here,
said they, 'of our own will, that we may not suffer our
freedom to be taken from us. We have given up our
lives that we may not be forced to such abominations.
"The pagans themselves acknowledged the jus-
tice of these vicissitudes. They were not torn by the wild
beasts, and were about to receive the merciful stroke which was to end their sufferings, they
took leave of the other for the last time with the
mutual kiss of Christian love." Felicitas is commemo-
rated in the Church of Rome March 7.—Neaner, CA.
Hist. Torrey, 67; Bull. Lippincott Catholic commission.

Felix (happy, Grecized Φελις, Acts xxiii.-xxiv; in Tacitus, Hist. v. 9, called Antonius Felix; in Sul-
das, Claudius Felix; in Josephus and Acts, simply
Felix: so also in Tacitus, Ann. xii. 54), the Roman
procurator of Judea, before whom Paul so "reasoned of
righteousness, temperance, and judgment to come
that the judge trembled, saying, 'Go thy way for this
time; when I have a convenient season I will call for
thee" (Acts xxiv, 25; see Ablich, De Claudio Felice,
Vitich. 1729; Eckhard, Paulii oratio ad Felicem, Iesn. 1779). The context shows that Felix had expected a
bribe from Paul; and, in order to procure this bribe,
he appears to have had several interviews with the
apostle. The depravity which such an expectation
implies is in agreement with the idea which the histori-
cal fragments preserved respecting Felix would lead
one to form of the man, if he had been more attentive
to the study of the history of the times.

The year in which Felix entered on his office cannot be
strictly determined. He was appointed by the em-
peror Claudius, whose freedman he was, on the ban-
ishment of Vettius Cumanus, probably A.D. 53.
Tacitus (Ann. xii. 54) states that Felix and Cumanus
were joint pendant, and Cumanus having Gallus, and
Felix Samaria. In this account Tacitus is directly at
issue with Josephus (Ant. xx, 6, 2), and is generally
supposed to be in error; but his account is very cir-
sumstantial, and by adopting it we should gain great-
ner justifications of the expression of Paul (Acts
xxiv, 10) that Felix had been judge of the Nazarene
for many years."

Those words, however, must not even thus be
closely pressed; for Cumanus himself only went to
Judea in the eighth year of Claudius (Josephus,
Ant. xx, 5, 2). From the words of Josephus (Ant.
xx, 7, 1), it appears that his appointment took place at
the twelfth year of the emperor Claudius. Eusebius
fixes the time of his actually undertaking his duties
in the eleventh year of that monarch. The question
is fully discussed under CHRONOLOGY, vol. ii, 211, 212.

Felix was a remarkable instance of the elevation
to the imperial throne of common men in the lowest
condition. Originally a slave, he rose to lit-
tle less than king's power. For some unknown,
but probably not very creditable services, he was manu-
mitted by Claudius Cesar (Sueton. Claudio. 28; Tac-
itus, Hist. v. 9, on which account he is said to have
taken the praenomen of Claudius. In Tacitus, how-
ever (L.c.), he is surnamed Antonius, probably
because he was also a freedman of Antonia, the emperor's
mother. Felix was the brother of Claudia's powerful
freedman Pallus (Josephus, War, i, 12, 8; Ant.
xx, 7, 1, 13); and it was to the circumstance of
witnessing his master's death (Tacitus, Ann. xiv.
65) that Felix was retained in his procuratorship by
Nero. In speaking of Pallus in conjunction with an-
other freedman, namely, Narcissus, the imperial pri-
mary secretary, Suetonius (Claudius, 28) says that
the latter was "in the emperor's confidence; and he
honors that a subject could enjoy, and suffered them
to carry on a system of plunder and gain to such an
extent that, on complaining of the poverty of his ex-
chequer, some one had the boldness to remark that he
would abandon the wealth if men were taken into partner-
ship by his two favorite freedmen.
The character which the ancients have left of Felix
is of a very dark complexion. Suetonius speaks of
the military honors which the emperor loaded him
FELIX

with, and specifies his appointment as governor of the province of Judea (Claudius, 29), adding an innuendo, which loses nothing by its brevity, namely, that he was the husband of three queens or royal ladies ("triun pars reginarum mariam"). Tacitus, in his History (v, 9), declares that, during his governorship in Judea, he indulged in great cruelty and impelled his province to a frightful power with the disposition of a slave; and, in his Annals (xii, 56), he represents Felix as considering himself licensed to commit any crime, relying on the influence which he possessed at court. The country was ready for rebellion, and the unsuitable remedies which he gave were attended only with the gravest con- sequences and to incite to crime. The contempt which he and Cumanas (who, according to Tacitus, governed Gallies while Felix ruled Samaria; but see Josephus, Ant. xx, 7, 1) excited in the minds of the people, encouraged them to give free scope to the passions which arose from the old enmity between the Jews and Samarians, while the two wily and base procurators were enriched by booty as if it had been spoils of war. This so far was a pleasant game to these men, but in the prosecution of it Roman soldiers lost their lives, and finally for the protection of one consul, governor of Syria, a rebellion would have been inevitable. A court-martial was held to inquire into the causes of this disaffection, when Felix, one of the accused, was seen by the injured Jews among the judges, and even seated on the judgment-seat, placed there by the presid- ium of Claudius Galerius. Felix was sent to the province of Judea to publish the sentence against the accusers and witnesses. Josephus (Ant. xx, 8, 6) reports that under Felix the affairs of the country grew worse and worse. The land was filled with robbers and impostors who deluded the multitude. Felix used his power to repress these disorders to little purpose, which Felix contemptuously gave no warning to punish. Thus, having got one Dinaeus, leader of a band of assas- sins, into his hands by a promise of impunity, he sent him to Rome to receive his punishment. Having a grudge against Jonathan, the high-priest, who had ex- postulated with him on his murder of Onias, and the assassins Josephus accuses, under Providence, the overthrow of the Jewish state. Among other crimes, some of these villains misled the people under the promise of per- forming miracles, and were punished by Felix. An Egyptian impostor, who escaped himself, was the occasion of two miracles of life among the priests, and, of the loss of liberty to two hundred, thus se- verely dealt with by Felix (Josephus, Ant. xx, 8, 6; War, ii, 13, 5; comp. Acts xxi, 38). A serious misunder- standing having arisen between the Jewish and the Syrian inhabitants of Caesarea, Felix employed his troops, and even and plundered till prevailed on to de- sist. His cruelty in this affair brought him on, after he was superseded by Festus, an accusation at Rome, which, however, he was enabled to render nugatory by the influence which his brother Pagas had, and, ex- empted him, almost, with the emperor Nero. Josephus, in his Life (§ 3), reports that, "at the time when Felix was procurator of Judea, there were certain priests of my acquaintance, and very excellent persons they were, whom, on a small and trifling occasion, he had put into bonds and sent to Rome to plead their cause before Caesar. At the end of two years' term, Porcius Festus was appointed to succeed Felix, who, on his return to Rome, was accused by the Jews in Caesarea, as above noticed (Ant. xx, 8, 9). This was in A.D. 56 (not in the year 60, as Anger, De temporibus in Act. Apostol. ratione, p. 106; Wissler, Chronik der Apostlesgeschichte, p. 89-92). While in his office, he was in a passion for the beautiful Drusilla, a daughter of king Herod Agripp- pa, who was married to Azius, king of Emesa, he em- ployed one Simon, a magician, to use his arts in order to persuade her to forsake her husband and marry him, promising that if she would comply with his suit he would make her a happy woman. Drusilla, partly charmed by the art and partly impelled by a desire to avoid the envy of her sister Berenice, was prevailed on to transgress the laws of her forefathers, and consented to a union with Felix. In this marriage a son was born, who was named Agrippa: both mother and son perished in an eruption of Mount Vesuvius, which took place in the days of Claudius (Josephus, Ant. xx, 7, 2). With this adul- teress was Felix seated when Paul reasoned before the judge, as already stated (Acts xxiv, 24). Another Drusilla is mentioned by Tacitus as being the wife (the first wife) of Felix. This woman was niece of Opeophytus and Antony. See De Floria. By the mar- riage Felix was connected with Claudius. Of his third wife nothing is known. (See Sale, De Felice et Drusilla, Amst. 1684.

Paul, being apprehended in Jerusalem, was sent by a letter from Claudius Lylias to Felix at Cæsarea, where he was at first confined in Herod's judgment- hall till his accusers came. They arrived. Tertullus appeared as their spokesman, and had the audacity, in order to conciliate the good-will of Felix, to express gratitude on the part of the Jews, "seeing that by thee we enjoy great quietness, and that very worthy apostles and teachers are seduced by the providence (Acts xxiii, xxiv). Paul pleaded his cause in a wor- thy speech; and Felix, consenting the apostle to the custody of a centurion, ordered that he should have such liberty as the circumstances admitted, with per- mission that his acquaintance might see him and min- ister to his wants. This imprisonment the apostle suffered for a short period (not two years, as ordinari- ly supposed, that expression having reference to Felix's whole term of sole office), being left bound when Felix gave place to Festus (q. v.), as that unjust judge "was willing," not to do what was right, but "to show the Jews a pleasure" (Walch, De Felico procuratore, Jena, 1747; also in his Dissert. in Act. iii, 29; Smith's Dictionary of Classical Biography, a. v.).

Felix, Martyr, and his companion Regula, were, according to tradition, the first Christian missionaries in the region of Lucania, which, before this time, had not been evangelized as patrons, and still has their names in the town seals. They are said to have been exe- cuted by order of the emperor Maximin. Nothing certain is known about their history. — Herzog, Real- Encyclop. iv, 591.

Felix of Nola was a native and presbyter of Nola. After his property had been confiscated during the persecution of Decius, he supported himself by cul- tivating a garden and some rented land. According to a legend, he concealed himself during the persecu- tion in the fissures of an old building, and a spider saved him from the search of the messengers by draw- ing her web over him. His sickness and miraculous recovery was recorded by Paulinus, bishop of Nola, and many pilgrims visited his grave. — Herzog, Real- Encyclop. iv, 555.

Felix the Manichæan was a contemporary of Au- gustine. He was an elder or elect of the Manichæans, and had gone to Hippo to gain converts for his sect. Augustine had a discussion with him in the church of Hippo. Felix was excused by the council for two days. The proceedings were taken down by not- aries, and are still extant (vol. viii of the Benedictine edition of Augustine's works: De actis cum Felice Ma- nichœo, libri ii). On the day before the disputation, Felix declared his readiness to be bound and his books to be making wort had been found in them; but during the disputation he is reported to have been
timid, weak, evasive, and it was thought that he wished to flee. Before the disputation began, his books were taken from him, and placed under the public seal. For two years, the Paraclete, who was Felix, was the Paraclete who had been promised by Christ, and he was used as an argument the information given by Mani on the construction of the world, on which nothing could be found in Paul and the writings of the other apostles. Augustine replied that the Paraclete had the mission to teach the truths of religion, but not to expound mathematics. The result of the disputation was that Felix declared himself refuted, and publicly renounced and cursed Mani. The protocol of the disputation was signed by both Augustine and Felix. Posthumously, in the thirteenth century, the name of Felix, after the third meeting, acknowledged his error, and accepted the faith of the Church.—Hergo, l.aut. Encycl. iv. 580.

Felix (Prætensis), an eminent Jewish scholar of the 16th century, was born in Prato, Tuscany. He was the son of a rabbi, who taught him the Oriental languages. He travelled in Italy after the death of his father, and, becoming convinced of the truth of Christianity, was baptized, and shortly after entered the order of St. Augustine. The date of his profession of Christianity is uncertain, but it probably took place before 1508. He translated the Psalms into Latin, dedicating the work to Leo X, and received a copy of it from the pope to translate the other books of the Old Testament. He revised the text of the two first Hebrew editions of the Bible published by Bomberg, carefully correcting the proofs himself. He died in 1557. His works are: I. Psalmerum ex hebraeo ad versum frâ tractatum adjicere notationibus (Venice, 1515, 4to); this version has been inserted in the Psalmerum Septuaginis (Lyons, 1590, 8vo).—2. Biblia sacra hebraea, cum utrque masculo et turgum, item cum Commentariis rubrano- rum; eur et studio Felixis Prætensis, cum præfatione latina Léoni X muneputat (Venice, 1518, 4 vols. fol.). It is said to be a version of Job and other books of the Bible by Felix, but they have never been published.—Biographie Universelle, iv. 273.

Felix, bishop of Urgel (Urgel), in Spain, 9th century. Of his early life little is known. He became bishop of Urgel in 781. Elibandus of Toledo, who had been his pupil, consulted him as to the doctrine of the person of Christ, with regard to which he seems to have given him some confused doctrine. See EIBLANDUS. The answer of Felix was that Christ, with respect to his divine nature, was truly and properly the Son of God, begotten of the Father, and hence he was the true God, together with the Father and the Holy Spirit, in the unity of the Godhead. Eiblandus having requested an explanation of his doctrine, Felix explained that the Son of God by adoption, born of the Virgin by the will of the Father, and thus he was nominally God, Hence, according to the opponents of the Felician, it followed that there was a twofold Sonship in Christ, and that he must consist of two persons. The opin ion of Felix was considered by the orthodox as nothing more than a development of the Nestorian heresy. The doctrine of Felix was adopted by Elibandus, who, being the primate of Spain, propagated it through the different provinces of Spain, while Felix himself contributed to spread it throughout Narbonne and other parts of Gaul! (Carwithe, Church History, p. 179.) It appears to be clear that Felix had read some of the writings of the Theodore of Mopsuestia (q. v.), in which a similar doctrine is taught. Felix seems, moreover, to have engaged in controversy with the Mohammedans, and, in connection with this, he wrote a Dialogue against them; and it is not unlikely that he was led to the Adoptionist view by his desire to render the doctrine of the incarnation less offensive to the Mohammedans. Alcuin (q. v.) entered into controversy with Felix, and we learn from him a large part of what is known about the controversy (Alcuin, Opera, ii. 769 sq.). Neander gives the following statement: "Felix distinguished between how far Christ was the Son of God and God according to the eternal distinction, and how far he was so by virtue of grace, by an act of the divine will (gratia, voluntate), by the divine choice and good pleasure (electione, placito); and the name Son of God was given to him only in consequence of connection with God (suscipiens); and hence the expressions that are distinguished are not, first of all, secundum adoptionem. Felix appealed to the fact that, though the name of Son by adoption (di' vioteticia) is not applied in the Bible to Christ, yet there are other designations which express the same idea. He adduces John 10:36, 37, in which Jesus speaks of his father the God (car' adiaphros), and referred to the passage in the Old Testament, in which men are called Elohim, where Christ placed himself as a man in the category of those who were called 'god's suscipiens', and not in a strict sense. Then as to the passage, 'None is like God', from this it appears that as man he was not to be called good in the same sense as God, and that only the divine nature in him was the source of goodness. He would allow an interchange of the divine and human predicates only in the same manner as Theodore; it could not be made without limitation. The different senses of the words, according as they were attributed to the divine or human natures. He charged his opponents with so confounding the two natures by their doctrine of the singulatricus persona that they left no distinction between the suscipiens and the suscipiens. Expressions like this, then in connection with God was born, never occur in Scripture, which also never says that the Son of God, but that the Son of man was given for us. On the latter point Alcuin could easily have confuted Felix by other passages, but both were wrong in not distinguishing the various things which the names of God and the term Son of God from the Church use of it, and in taking the idea everywhere in a Church sense. Like Theodore, Felix asserted Agnosticism of Christ. It is also a point of resemblance between them that both sought for an analogy between the union of the man Christ with the divine Being, and the relationship of believers to God. Felix says that Christ in an improper sense (suscipiens) was called the Son of God conjointly with all who are not God according to their nature, but by the grace of God in Christ have been taken into the communion with the true person of God. In this order also the Son of God is, in respect of his human nature, both according to nature and grace. He maintained that, as far as Christ is reckoned among the sons of God, all believers are his members; considered according to his divine nature, believers are the temple in which he dwells. He did not wish by that to deny the specific difference between Christ and believers; whatever resemblance existed between them belonged to him in a far higher sense; he was united to God by generation, and was the medium of the communion of the rest with God. Felix also perfectly agreed with Theodore in the thought that the communion with God into which Christ was received as a man might be represented as a revelation of the divine being according to the measure of the various stages of the development of his human nature, and thus supposed various degrees of it up to the highest revelation after the glorification of Christ. It might be peculiarly offensive that he should compare the baptism of Christ with the regeneration of believers; but he certainly did not mean to say that Christ thus became partaker of communion with the divine nature, and without the specification of a stage or degree, but only to point out an analogy so far as baptism marked a distinct stage in Christ's life, after which the operation of the divine life in him was peculiarly conspicuous. It is therefore evident that the doctrine of Felix was altogether that of Theodore, excepting that the latter could express himself more freely in an
FELIX

One God, one Christ, one bishop." But Sozomen says that Felix was an adherent of the Nicene faith, and a "nameless manuscript. The great importance of the antagonism in which he stood to the Church doctrine is likewise manifest; it included not merely Christology, but also Anthropology; for the doctrine of the revelation of the Divine Being in Christ, conditioned by various stages of development, was connected with one main principle, the principle of free self-determination. It is uncertain how far Felix consciously developed his principles; but there is no question that these were throughout contradictory to the prevalent Augustinian doctrine. Felix lived in the Frankish territory, where the Frankish Church was drawn into the controversy. In A.D. 792, Charlemagne convoked an assembly at Ratibson, at which Felix appeared, and was induced to recant. He was then sent to Rome, where he made similar explanations (Alcuinus aed. Epsipannni, c. 16; Mansi, Concil. xiii, 383). But, on being permitted to return home, he repented of the steps he had taken, took refuge in Saracenic Spain, and again promulgated his doctrine. Alcuin, who had been summoned to take a part in the controversy, endeavored to win him over by a friendly epistle; but Felix regarded regard of the controversy the most important, and thus it was carried on in his writings (Alcuinus Libellus aed. Harerico Felici, Opp. Alci, i, paras ii, 759). The Spanish bishops interceded for Felix with the emperor, and applied for a new investigation (Alcuin, Gesta carol. Gesta, c. 143), and an ecumenical council was called a second synod at Frankfurt-on-the-Main in A.D. 794, which again decided against Felix (Mansi, xiii, 883); and since the Adoptionists had spread themselves even as far as France, the emperor sent a commission of three persons into those parts in order to oppose them. Felix came with them, and was prevailed upon to appear before the synod at Aix-la-Chapelle (Aix), in A.D. 799. After Alcuin had disputed with him for a long time, Felix declared himself to be convinced. He made a recantation in Spain; yet he was not altogether trusted, and was placed under the oversight of Leidrad, bishop of Lyons. He could not at once give up a dogmatic tendency which was so deeply rooted; he still was always inclined to Agnosticism, and after his death a series of questions was found which showed that he firmly adhered to his fundamental views" (Hist. of Doctrines, p. 444; Vig. and Ev. Euseb. p. 1177). In 801 he was condemned (Dorner, Dogma, cent. vii; Neander, Ch. History, iii, 156; Mosheim, Ch. History, cent. viii, ch. v, § 8; Hagenbach, History of Doctrines, § 179; Dorner, Doctrine of the Person of Christ, Edinb. transl, div. ii, vol. i, 348 sq. See ADOPTIONIS; CHRISTOLOGY.

Felix I, bishop of Rome. According to the Acta Smaucoruius, he succeeded Dionysius in 385, and died in 378. The church was opposed to him by the Council of Ephesus on account of his sufferings for Christ," but he did not die by violence. There is extant a letter of his against the Sabellians and Paul of Samosata. Other writings, not believed to be his, are to be found in Migne, Patrolog. Lat. vol. v, and in Gailland, Bull. Pat. iii, 542.—Eusebius, Hist. Eccl. vii, 50; Baronius, Anales, p. 272-275; Bower, History of the Popes, i, 78.

Felix II, Anti-pope, was placed in the episcopal chair of Rome A.D. 355, by the Arian emperor Constantius, in place of Libierius (q. v.), who was exiled by the emperor. The clergy refused to acknowledge Felix, and Constantius recalled Libierius to hold the see conjointly with Felix; but when the decree was read in the circus, the people rejected it with the city,

FELLOWSHIP

das (Oxford, 1865, 12mo)—Cypricm Opera (Oxford, 1677)—also Athenaeum, Hermes, and Justin's Apologia;—Not Testament Libri Omnes; accuratissimum Paralella Script. loc. necnon variis lectiones, etc. (London, 1863). by A. A. Franch, 1702; Oxford, ed. by Gregory, fol. 1708; Oxford, ed. by Jacobson, 1852, 8vo)—Paraphrase and Annotations upon all the Epistles of St. Paul (London, 1675, 8vo); but from the edition of 1708 it appears that this book was the work of A. Woodhead, R. Allstroem, and O. Walker. "corrected and improved" by Fell. A new edition of the N. T. gave a new impulse to critical science, which he further aided by the assistance he furnished, in money and otherwise, to the critical labors of John Mill (q. v.). Indeed, bishop Fell is said to have de- vested his "whole substance" to works of piety and charity. He died July 10, 1086.—Hook, Eccles. Bibl. v, 74; Wood, Athenae Oxonienses; Bibl. Sacra, a. v.

Fell, John, an English Independent minister, was born at Cockerham, 1725, and became pastor at Thaxted, Essex. His early opportunities were not great, but by his talents and industry he became a very respectable scholar. He was made tutor in the ancient languages in the dissenters' seminary at Homerton. He is said to have been dismissed from his office there for reading newspapers on Sunday."

"His friends got him an annuity of £100, and he was "asked to deliver lectures on the Evidences at the Scots' Church, London Wall." He had only delivered four when he died, Sept. 6, 1801. Published (in controversy with Dr. Hugh Farmer, q. v.) Democrito, an Inquiry into the Heathen and Scripture Doctrine of Demos (London, 1779, 8vo):—The Idolatry of Greece and Rome distinguished from that of other Heathen Nations (London, 1801, 8vo). After his death Dr. Hunt published his Lectures on the Evidences (London, 1798, 8vo).—Bogue and Bennett, Hist. of Dissenters, ii, 518; Kitto, Cyclopaedia, s. v.; Darling, Cyclop. Bibliographical, s. v., 1125.

Fell, Philip, Phillip-Emmanuel de, a philan- thropist and earnest lover in the cause of education, was born at Berne, Switzerland, June 27, 1771. His father, who was a member of the government of Berne, laid the foundation of his intellectual culture, but he received his moral bent and self-sacrificing spirit from his mother, a great granddaughter of the Dutch ad- miral Van Tromp. After some time spent at the University of Tubingen in the study of science, he de- voted himself especially to politics and philosophy. "In order to acquaint himself with the moral state of his countrymen, he spent much of his time in traveling through Switzerland, France, and Germany, usually on foot, with his knapsack on his back, residing in the villages and farm-houses, and in the labor and occupations, and partaking of the rude lodging and fare of the peasants and mechanics, and often extending his journey to the adjacent countries." On his return to Berne in 1796 he rendered important service as "commandant of the quarter" in the revolution- ary disturbances. In 1799 he purchased the estate called Hofseyl, two leagues from Berne, and founded there, successively, a school of agriculture, a manu- factory of agricultural implements, schools for the poor, for the better classes, and a normal school. He devoted the remainder of his life to education with great success, but not without opposition. He died Nov. 21, 1844. See Vericoud, Rapport sur les Instituts de Hofsee; Hasm, Fellenberg's Leben und Wirken (Berne, 1845); Hoefer, Nouv. Bibl. Générale, xvii, 307.

Feller, Francois Xavier, a Flemish Jesuit, was born at Brussels, Aug. 18, 1783, entered the order of Jesus, February 28, 1798, was a very learned and voluminous writer, his publications amounting to 120 volumes. Among them are Reply to Fabronius [see Hontheim], 1771; Observ. Philos. sur le Systeme de Newton (3d edit. Liège, 1778); Cate-

Felloes (ケンチャ, chishakuin, joining, 1 Kings vii, 30) probably denotes rather the spokes that connect the rim with the hub of a wheel, being a kindred term with that used to denote the coupling-rods of the tabernacle (Exod. xxv, 10). See CHARLOT.

Fellow, besides its contemptuous use (as a rendering of סנה, a man, etc.), and its frequent employment (usually as a rendering of סנה, a friend or equal), in the sense of companionship, stands in one remarkable passage (Zech. xii, 7) as the rendering of רכש, society, in the phrase רכש יד, man of my association, i.e. my associate; corresponding with רכש, my shepherd in the parallel member, and referred to himself by our Saviour (Matt. xxvi, 51) as the great Pastor and Sacrifice for his people; not so much in the sense of simple equality of nature with the Father, as of copartnership with him in the great work of caring for and redeeming mankind. See NEIGHBOR.

Fellow of a College. See Fellowship.

Fellows, Robert, was born in Norfolk, England, in 1770; studied at St. Mary's Hall, Oxford, took holy orders in 1795, and died in 1847. His theo-

logical speculations gradually led him to reject the doctrines of the Established Church, and to adopt the opinions found in his Religion of the Universe, published in London in 1836. He was an intimate friend of Dr. Farr and baron Masere, the latter of whom left him the greater part of his large fortune, to be dis-

persed in literary and benevolent enterprises. He was for some time editor of the London Review. He was an early advocate of the establishment of the University of London, of which he was a liberal benefi-

cator. Among his works are Christian Philosophy (1798, 2d ed. 1799, 8vo);—Supplement to do. —Religion without Cost (1801, 8vo);—Guide to Immortality (1804, 3 vols. 8vo);—Manual of Piety (1807, 8vo);—A Book of Theology (1807, 2 vols. 8vo).—Appleton, Cyclopaedia, s. v.; Allibone, Dictionary of Authors, i, 584.

Fellowship in a college, a station of privilege and emolument enjoyed by one who is elected a member of any of those endowed societies which in the English and other universities are called colleges. The person so elected shares the benefits of the foundation in common with the other members, and from such participation derives the name of fellow, the Latin name for which in the statutes of most of the colleges is socius. See Universitatis. In Oxford and Cambridge the fellowships were either constituted by the original founders of the colleges to which they belong, or they have been since endowed. In almost all cases their holders must have taken at least the first degree of bachelor of arts or student in the civil law. One of the greatest changes introduced by the commissioners under the Universities Act of 1854 was the closing open of the fellowships to all members of the university of requisite standing, by removing the old restric-

tions by which many of them were confined to found-

ers' kin, or to the inhabitants of certain dioceses, arch-

diocesans, or other districts. Fellowships vary great-

ly in value, and are at their best at Oxford and Cambridge; in good years, are said to reach £100 or even £200, whilst there are others which do not amount to £100, and many at Cambridge which fall short of that sum. Being paid out of the college revenues which arise from land, they also vary from year to year. On an arrangement, on the other hand, their general value with reference to the value of commodities is preserved nearly unchangeable, which would not be the case if they consisted of a fixed payment in money. The
senior fellowships are the most lucrative, a system of promotion being established among their holders; but they all confer on their holders the privilege of occupying apartments in the college, and generally, in addition, certain perquisites as to meals or commons. Many of these stipendary fellows of the college, in general, they are forfeited should the holder attain to certain preferments in the Church or at the bar, and sometimes in the case of his succeeding to property above a certain amount. In general, also, they are forfeited by marriage, though this disability may now be removed by the college permitting the fellow to retain his fellowship notwithstanding his marriage. With the single exception of Downing College, Cambridge, in which the graduates of both universities are eligible, the fellowships are confined to the graduates of the university to which they belong.

Fellowship (sozwia), "joint interest, or the having one common stock. The fellowship of the saints is twofold: 1. With God (1 John i, 3; 1 Cor. i, 9; 1 Cor. xii, 14). 2. With one another (1 John 1, 7). Fellowship with God consists in knowing, or of his will (Rom. xvi, 21). Agreement in designation (Amos iii, 2), mutual affection (Rom. viii, 38, 89); enjoyment of his presence (Psa. iv, 6); contentment with his image (1 John ii, 1; 1 John i, 6); participation of his felicity (1 John i, 4; Eph. iii, 14-21; 1 Cor. xii, 14). Fellowship of the saints may be considered as a fellowship of objects (Rom. xii, 6); a fellowship of persons (1 Thess. v, 17, 18; James v, 16); of ordinances (Heb. x, 24; Acts ii, 46); of graces, love, joy, etc. (Heb. ii, 24; Mal. iii, 18; 2 Cor. viii, 4); of interest spiritual, and sometimes temporal (Rom. xii, 13; Heb. xiii, 16); of sufferings (Rom. xv, 2, Gal. i, 3; Rom. xii, 13); of eternal glory (Rev. vii, 9). See Communion.

Feltham, Owen, an English writer of the reign of James I, who was a native of Suffolk, lived many years in the earl of Thomsmond's family, and died about 1678. The work by which he is remembered is Reences, Divine, Political, and Moral, which has passed through many editions, and is still reprinted.

Felton, Henry, D.D., a learned English divine, was born at London in 1673, and was educated at Westminster school, the Charter House, and Edmund Hall, Oxford. In 1711 he became rector of Whitehill, Dorsetshire, and was finally appointed principal of St. Edmund Hall, Oxford. He died in 1722. His principal works are, A Dissertation on Reading the Classics (London, 1723, 12mo) — The common People taught to defend their Country with the Church of England (Oxf. 1727, 8vo) — The Christian Fitch asserted against Dilet Arianism, and Socinians (Oxf. 1728, 8vo) — The Resurrection of the same numerical Body asserted (London, 1738, 8vo) — Sermons on the Creation, Fall, and Redemption of Man, etc. (London, 1748, 8vo) — Nineteen Sermons, 1748 (posthumous). — Darling, Cyclop. Bibliographica, s. v.; Rose, New Gen. Biog. Dict. s. v.

Female Ecclesiastic. (For monographs, see Voltaire, vol. p. 184.) See Ministry, Deaconess, Agape.

Fence (Psa. lxxii, 8), "gazer, a wall (g. v.) rather than hedge (as elsewhere generally rendered). The Hebrews use two terms to denote a fence of different kinds: יָשָׂר, gazer, or יָנָר, gazerah, and יָנָר, mezcool. According to Vitringa, the latter denotes the outer thorny fence of the vineyard, and the former the inner wall of stones surrounding it. The chief use of the former was to keep off men, and of the latter to keep off beasts, not only from gardens, vineyards, etc., but their flocks and herds (see Prov. xv, 19; xxviii, 1). See Brdock. From the root the Phoenicians called any enclosed place gudnar, and particularly gave this name to their settlement in the south-western coast of Spain, which the Greeks from them called Gidnapa, the Romans Gades, and the moderns Cadiz. See Gederah. In Ezek. xii, 5; xxxii, 80, gazer appears to denote the fortifications of a city; and in Psa. xix, 8, the wicked are compared to a tottering wall and a broken fence, and in Ezek. xliv, 21, this destruction comes suddenly upon them. Fenced cities (see below) were such as were fortified. See Agriculture.

Fenced City (יוֹדָע, metoraphah, intrenched, 2 Chron. xi, 10, 23; xii, 4; xiv, 6; xxii, 18; rendered "stronghold," 2 Chron. xi, 11; "fort," Isa. xxiv, 9; "military," ii, 1, "metoraphah, a fortress, is also sometimes rendered "fenced" in connection with יָר, a city, Num. xxxiii, 17, 36; Josh. x, 20; xix, 35; 1 Sam. vi, 18; 2 Kings iii, 19; x, 2, xvii, 9; xviii, 6; 2 Chron. xvii, 19; Jer. x, 17; Dan. xi, 15; elsewhere "stronghold," etc.). The broad distinction between a city and a village in Biblical language consisted in the possession of walls. See City. The city had walls, the village was unwalled, or had only a watchman's tower (טָשַׁת, wiper, turris custodiun; comp. Geen. Thee. p. 267), to which the villagers resorted in times of danger. A threefold distinction is thus obtained: 1. A city, having walled villages with castles or towers (1 Chron. xxvii, 25). The district east of the Jordan, forming the kingdoms of Moab and Bashan, is said to have abounded from very early times in castles and fortresses, such as were built by Uzziah to protect the cattle, and to repel the inroads of the neighboring tribes, besides unwalled towns (Amnian. marc. vii, 9; Deut. iii, 5; 2 Chron. xxvi, 10). Of these many remains are thought by Mr. Porter to exist at the present day (Dasmacenas, ii, 197). The dangers to which unwalled villages are exposed by the marauding tribes of the wilderness, and also the fortifications by which the inhabitants sometimes protect themselves, are illustrated by Sir J. Malcolm (Sketches of Persia, c. xiv, p. 148) and Frazer (Persea, p. 370, 380; comp. Judg. v, 7). Villages in the Bauran are sometimes enclosed by a wall, or, rather, the houses, being joined together, form a defence against Arab robbers, and the entrance is closed by a gate (Burckhardt, Syria, p. 212). See Wall.

A further characteristic of a city as a fortified place is found in the use of the word יָד, build, and also "fortify," so that to "build" a city appears to be sometimes the same thing as to fortify it (comp. Gen. viii, 20, and 2 Chron. xvi, 6, with 2 Chron. xi, 5-10, and 1 Sam. xii, 7). See Wall.

The fortifications of the cities of Palestine, thus regularly "fenced," consisted of one or more walls crowned with battlemented parapets, גֹּז, having towers at regular intervals (2 Chron. xxxiii, 5; Jer. xxxix, 38), on which in later times engines of war were placed, and watch was kept by day and night in time of war (2 Chron. xxxvi, 9, 15; Judg. ix, 45; 2 Kings xiii, 17). Along the oldest of the three walls of Jerusalem there were ninety towers, in the second fourteenth, and in the third sixtieth (Joseph, War, v, 4, 3). One such tower, that of Hananeel, is repeatedly mentioned (Jer. xxxi, 38; Zech. xiv, 10), as also others (Neh. iii, 1, 11, 27). The gateways of fortified towns were also fortified and closed (Neh. ii, 18; Neh. ii, 18, 3; Judg. xii, 3, 2; 1 Sam. xxxii, 7; 2 Sam. xviii, 24, 38; 2 Chron. xiv, 7; 1 Macc. xiii, 88; xxvii, 4). In advance of the wall there appears to have been sometimes an outwork (אֵיל, porticoxu, in A. Vers. "ditch" (1 Kings xxii, 23; 2 Sam. xx, 15; Gesenius, Thee. p. 484), which was perhaps either a palisade or wall lining the ditch, or perhaps some raised embankment within the town. Both of these methods of strengthening fortified places, by hindering the near approach of machines, were usual in earlier Egyptian fortifications (Wilkinson,
Anc. Eg. i, 401), but would generally be of less use in the hill forts of Palestine than in Egypt. In many towns there was a keep or citadel for a last resource to the defenders. Those remaining in the Hauran and Leja are square. Such existed at Shechem and Thebez (Judg. ix, 46, 51; viii, 17; 2 Kings ix, 17), and the great forts or towers of Psephinus, Hippicus, and especially Antonia, served a similar purpose, as well as that of overlooking the town at Jerusalem. These forts were well furnished with cisterns (Acts xxii, 24; 2 Macc. v, 5; Josephus, Ant. xviii, 4, 3; War, i, 5, 4; v, 4, 2; vi, 2, 1). At the time of the entrance of Israel into Canaan there were many fenced cities existing, which first caused great alarm to the exploring party of searchers (Num. xiii, 30), and afterwards gave much trouble to the people in subduing them. Many of these were refortified, or, as it is expressed, rebuilt by the Hebrews (Num. xxxii, 17, 34-42; Deut. iii, 4, 5; Josh. xi, 12, 18; Judg. i, 27-33), and many, especially those on the sea-coast, remained for a long time in the possession of their inhabitants, who were enabled to preserve them by means of their strength in chariots (Josh. xiii, 3, 6; xvii, 16; Judg. i, 19; 2 Kings xviii, 8; 2 Chron. xxvi, 6). The strength of Jerusalem was shown by the fact that that city, or at least its walls, or "stronghold of Zion," remained in the possession of the Jebusites until the time of David (2 Sam. v, 6, 7; 1 Chron. xi, 5). Among the kings of Israel and Judah several are mentioned as fortifiers or "builders" of cities, e.g. Solomon (1 Kings ix, 17-20; 2 Chron. vii, 4-9), Jeroboam I (1 Kings xii, 20), Rehoboam (2 Chron. xi, 5, 12), Baasha (1 Kings xv, 17), Omri (1 Kings xvi, 24), Hazael (2 Chron. xxvii, 8), Asa (2 Chron. xiv, 6, 7), Jehoshaphat (2 Chron. xvii, 12), but especially Uziah (2 Kings xiv, 22; 2 Chron. xxvi, 2, 9, 15); and in the reign of Ahaz the town of Jericho was rebuilt and fortified by a private individual, Hiel of Bethel (1 Kings xvi, 34). Herod the Great was conspicuous in fortifying strong positions, as Masada, Macheras, Herodium, besides his great works at Jerusalem (Josephus, War, vii, 6, 1, 2; 8, 8; i, 21, 10; Ant. xiv, 18, 9). See Forts.

The so-called Golden Gate of Jerusalem, showing supposed remains of the old Jewish wall.

But the fortified places of Palestine served only in a few instances to check effectually the progress of an invading force, though many instances of determined and protracted resistance are on record, as of Samaria for three years (2 Kings xviii, 10). Jerusalem (2 Kings xxi, 9) for four months, and in later times of Jotapata, Gamala, Macheras, Masada, and, above all, Jerusalem itself, the strength of whose defences drew forth the admiration of the conqueror Titus (Josephus, War, iii, 6; iv, 1 and 9; vii, 6, 3-4 and 8; Robinson, i, 292). See Fortresses.

The earlier Egyptian fortifications consisted usually of a quadrangular and sometimes double wall of sun-dried brick, fifteen feet thick, and often fifty feet in height, with square towers at intervals, of the same height as the walls, both crowned with a parapet, and a round-headed battlement in shape like a shield. A second lower wall with towers at the entrance was added, distant thirteen or twenty feet from the main wall, and sometimes another was made of seventy or one hundred feet in length, projecting at right angles from the main wall, to enable the defenders to annoy the assailants in flank. The ditch was sometimes fortified by a sort of tansille in the ditch itself, or a ravine on its edge. In later times the practice of fortifying towns was laid aside, and the large temples, with their enclosures, were made to serve the purpose of forts (Wilkinson, Anc. Egypt. i, 408, 409, abridgm.).

Slab from Kourunjik, presenting a double-walled city, with arched gateways and inclined approaches leading to them from the outer walls. Within are warrens and houses; outside the fortifications is a narrow stream or canal, planted on both sides with trees, and flowing into a broad river, on which are large boats holding several persons, and a raft of skins, holding a man fishing, and two others seated before a pot or caldron. Along the banks, and apparently washed by the stream, is a wall with equidistant towers and battlements. The earlier Egyptian fortifications consisted usually of a quadrangular and sometimes double wall of sun-dried brick, fifteen feet thick, and often fifty feet in height, with square towers at intervals, of the same height as the walls, both crowned with a parapet, and a round-headed battlement in shape like a shield. A second lower wall with towers at the entrance was added, distant thirteen or twenty feet from the main wall, and sometimes another was made of seventy or one hundred feet in length, projecting at right angles from the main wall, to enable the defenders to annoy the assailants in flank. The ditch was sometimes fortified by a sort of tansille in the ditch itself, or a ravine on its edge. In later times the practice of fortifying towns was laid aside, and the large temples, with their enclosures, were made to serve the purpose of forts (Wilkinson, Anc. Egypt. i, 408, 409, abridgm.).

Slab from ancient Thebe, representing a Phalanx of the Kheps-ka (Canaanites) drawn up as a corps de reserve, with the fortified town (fig. 1), surrounded by double ditches, over which are bridges (figs. 2 and 3).
The fortifications of Nineveh, Babylon, Ecbatana, and of Tyre and Sidon are all mentioned either in the canonical books or the Apocrypha. In the sculptures of Nineveh representations are found of walled towns, of which one is thought to represent Tyre, and all illustrate the mode of fortification adopted both by the Assyrians (for instance in 1675-22, 54; Amos, i, 10; Zechar. ii, 8; Ezek. xxvii, 11; Nah. iii, 14; Tobit i, 17; xiv, 14, 15; Judith i, 1, 4; Layard, Nim. ii, 275, 278, 288, 353; and Bab. b. p. 281, 358; Mon. of Nim. pt. ii, pl. 39, 43). See Fortification.

Fencing the Tables, a special address in the ministration of the Lord's Supper among the Scotch Presbyterians. It is a lecture from the minister just before the distribution of the elements, pointing out the character of those who have and of those who have not a right to come to the Lord's table. It was formerly called "debarments," because in it the ministry debarred from the sacrament those who were not supposed to be worthy.

Fénelon, François de Salignac de la Mothe, the most venerated name in the modern history of the Roman Catholic Church, was born Aug. 6, 1651, at the castle of Corbeaux in Berry. He was the younger son of the marquis of Fénelon. He was carefully trained at home up to twelve years of age, when he was sent to the University of Cahors, and afterwards to the College of Plessis at Paris. His mind was very early turned towards the Church; he preached his first sermon at the age of 21. He was ordained to the theological seminary of St. Sulpice, and then under the charge of the abbé Tronson, from whom he is believed to have imbued the views of sanctity and of "disinterested love" which were so strongly brought out in his letters. He was ordained for the presbyterate in 1672, and for the next three years was one of the priests of the parish of St. Sulpice. Before his ordination he was strongly inclined to a foreign mission in the Levant or in Canada, but was kept back, it is said, by his uncle. The Correspondence Littéraire (July 25, 1683) gives a letter (from the archives of the French Ministry of Marine) in Colbert's handwriting, date of 1678, to Frontenac, governor of Canada, in which Louis XIV says, "I have blamed the action of abbé Fénelon, and have ordered him not to return to Canada. But I ought to say to you that it was difficult to institute a criminal process against him. The people of Paris were inclined to the seminary of St. Sulpice, at Montreal, to testify against him; and it was necessary to remit the case to his bishop or the grand vicar to punish him by ecclesiastical penalties, or to arrest him and send him back to France by the first ship to the West Indies." This was actually done in Canada (Am. Pres. Review, July, 1863). About the year 1678 he was appointed superior of the "Novelles Catholiques," a society formed to educate and proselyte the children of Protestants. In this office he wrote his first work, De Fédération des fidèles, which has been translated into English. In 1688 he became intimate with Bossuet, and under his guidance wrote Réfuta- tion du Système de Malebranche sur la nature et la grâce; and also a treatise entitled Du Ministère des Pasteurs, in which heretics are attacked, though with moderation. Louis XIV, then about to revoke the edict of Fontainebleau, desired a special mission to the Protestants of Poitou. He accepted the charge on the condition that no means of conversion were to be used but persuasion. In 1689 he was entrusted with the education of the young duke of Burgundy. Later in his history he was named "the Orator of the Monarch." After five years' service, he was elevated to the archiepiscopate of Cambrai in 1694. He had previously become intimate with Madame Guyon (q. v.), and his relations with her, and the complications which grew out of them, embittered more or less his whole after life. His health began to decline, and he was required to recount somewhat in detail. For the special history of Quietism, see the article under that title. Suffice it here to say, that the particular form of it taught by Madame Guyon began to spread widely, and to alarm the leading clergy of the Church of France. Bossuet was soon vigorously enlisted against her. He conducted the controversy against Madame Guyon with his usual skill. He, together with the bishop of Chartres, made a special mission to St. Sulpice, and were paid a visit by the commissioners to inquire into the doctrines advanced by Madame Guyon. The conferences between the parties lasted for six months. Bossuet was little conversant at this time with mystical theology, and at his request Fénelon prepared a treatise in which he extracts from the writings of the mystical writers. The commissioners assembled at Issy, a retired country house belonging to the congregation of St. Sulpice. They drew up thirty articles, in which certain alterations were made by Fénelon, by whom four were added. There was no mention in them of Madame Guyon or her doctrines, but they were supposed to express the doctrines of the established Church of France on the principal subjects in dispute. Their conclusion amounts to little more than this, that spiritualism, or an aim at the very highest human attainments, was to be disallowed by the Church. Madame Guyon immediately expressed her acquiescence in the articles of Issy. The whole question seemed now to be set at rest. Fénelon, having been nominated before these transactions to the archiepiscopate of Cambrai, was consecrated as such on February 12, 1695, and was installed, at his own earnest request. But Quietism continued to gain ground, and, to stop its progress, Bossuet published his Instruction sur les actes de l'oraison, for which he sought the approbation of the new archbishop; but Fénelon refused on the ground that he had not the right to give it. The controversy was continued for four years. The understanding of God, and that its censures of Madame Guyon were too severe. Thus began the bitter controversy between these two distinguished prelates, which for a long time disturbed the peace of the Church of France. Fénelon published his Explication des maximes des sçons sur la vie intérieure, but not before it was carefully examined by the cardinal de Noailles and abbé Tronson, two of the committee at Issy, and by M. Pirot, a theologian of eminence attached to Bossuet. These pronounced the Maximes to be a golden work. But no sooner was it published than in the same year Bossuet condemned this controversy Louis XIV and Madame de Mainte- non took part against Fénelon. Bossuet had the support of the court, and made vigorous use of all the weapons at his command. Fénelon defended himself with spirit. An appeal was made to a cardinal, and was artfully delayed. In communion with Louis with bear upon the court of Rome, and inculcated that Fénelon was, in his own diocese, considered a heretic, and that, as soon as Rome should speak, Cambrai, and all the Low Countries, would rise against him. The pope (Inno- cent XIII) proceeded cautiously, and delayed his decision. In the mean time the friends of Fénelon were persecuted by the court, and he himself was suspended from his office of preceptor to the royal dukes; but never, amidst all the indignities he suffered, did he lose the pious serenity of his mind. "Yet but a little while," he wrote to Madame Guyon, "and the small- ful dream of this life will be over. We shall meet in the kingdom of truth, where there is no error, no di- vision, no scandal; we shall breathe the pure love of God; he will communicate to us his everlasting peace. In the mean time let us not refuse grace. Jesus Christ was disgraced for us; may our disgrace tend to his glory." At length the pope appointed a congregation of cardinals, who met twelve times without coming to any resolution; he then appointed a new congregation of cardinals, who met fifty-two times, and were extracted from Fénelon's work several dispositions, which they re-
ported to the pope as censurable. Meantime Louis XIV was urging the pope to condemn Fénélon, although the pope himself was unwilling to come to a final decision. It was difficult to censure Fénélon without the papal permission, and this would have clanged orthodoxy. Holy, too, as Fénélon was, it was considered that to submit to a decision against him was an act of such heroic humility that it could scarcely be expected, and that a schism might be caused equal to that of the Reformation. The parties inclined to issue a brief, stating the doctrine of the Church, or calling upon each party to abstain from future discussions. But even a pope may stand in awe of worldly consequences. Louis XIV, urged on by Bossuet, insisted upon the condemnation of Fénélon, and the pope at last (March 15, 1683) issued a brief, by which twenty-three propositions were extracted from Fénélon's work and condemned, "though the expressions used in the condemnation of them were so gentle, that it is evident that if the pope had feared God as much as he feared the French king, Fénélon would have escaped all censure. By threatening his friends and his adversaries mortified; and their mortification was increased by an expression of the pope, which was soon in every one's mouth, that Fénélon was in fault for too great love of God; his enemies equally in fault for too little love of their neighbour" (Kingsley, vol. ii, p. 320).

The controversy had been going on in France during the time occupied by the investigation at Rome. "Bossuet published a succession of pamphlets. Several of the bishops who had espoused the cause of Bossuet issued pastoral in the same sense. Fénélon defended himself vigorously against them all in several publications, explanatory as well of his principles as of the personal imputations in which some of his adversaries did not scruple to indulge. The last blow against the ancient friendship of the great rivals was struck on March 15, 1683. A brief of the Holy See, called the 'Défense et Légitimation,' was pronounced against the See of Cambrai. Fénélon was wounded to the heart. The copy of Bossuet's pamphlet which first came into his hands is still preserved in the British Museum, and the margin is literally filled with remarks, annotations, replies, denials, and rejoinders, in the singularly delicate and unceasingly thoughtful manner of Fénélon's epistolary style. The copy now in the British Museum is at present probably one which, as we learn from his correspondence, he sent to his agent at Rome, and on the margin of which he corrected, for the guidance of his friends, the errors of the Benedictines, and especially of his great antagonist. The substance of these replies he gave to the public in a most masterly defence, written, printed, and published within little more than a fortnight from the appearance of Bossuet's 'Défense et Légitimation.'"

When the papal brief arrived, Fénélon submitted at once, and ordered all copies of the book that were in circulation to be burnt that he might burn them with his own hand. He read the brief from his own pulpit, and addressed a pastoral to the people of his diocese, in which he said, "Our holy father has condemned my work, entitled 'Marinae diatoma,' and has condemned in a particular manner twenty-three propositions extracted from it. We adhere to his brief, and condemn the book and the propositions simply, absolutely, and without a shadow of reserve. He even presented to the cathedral a piece of gold plate, on which is a picture engraved representing the angel of truth trampling on several erroneous books, among which is his 'Marinas.' This submission appears to us Protestants to have been at once weak and ostentatious, but in the Roman Catholic Church it is one of Fénélon's highest titles to glory of Bossuet's account, though it is variously represented: according to one account he was really touched by the conduct of Fénélon, and desired to be completely reconciled to him; according to others, he retained at heart his bitter feeling, and kept up the same spirit in the mind of the king. About this time Fénélon sent a complete and corrected copy of 'Telemaque' to the duke of Burgundy. The copyist, it seems, made a duplicate, and printed it at Paris, without the knowledge of Fénélon, and it was immediately suppressed by order of the king, but was printed again in Holland in 1699, spread throughout Europe, and was translated into almost every tongue. By the courtiers of Louis XIV 'Telemaque' was regarded as a satire upon that monarch and his satellites, whereas it was intended by Fénélon to represent the King, Claude, Madame de Montespan; Protosilas, Leuvis; and Eucharis, Mademoiselle de Fontanges. This scandal shut Fénélon out of the court of Louis XIV for the rest of his life. He was ordered to remain within his diocese, and was forbidden all intercourse with his pupil, the duke of Burgundy. But the displeasure of the court did not diminish the reputation of Fénélon either in France or in Europe generally. He devoted the remainder of his life to diligent care of his diocese, and to literary labours. He founded a seminary at Cambrai, to which he gave all his personal attention. During the War of the Succession his diocese was often the scene of military operations, and he did his best to assuage the horrors of war. He brought together into his palace the wretched inhabitants of the country whom the war had driven from their homes, and took care of them, and fed them in his own person. Seeing one day that one of these peasants ate nothing, he asked him the reason of his abstinence. "Alas! my lord," said the poor man, "in making my escape from my cottage I had not time to bring off my cow, which was the support of my family. The cow will drive her away, and I shall never find another so good." Fénélon, availing himself of his privilege of safe-conduct, immediately set out, accompanied by a single servant, and drove the cow back to itself to the peasant. "This," said cardinal Mauvy, "is perhaps the finest act of Father Fénélon's life, and the act of the man who reads it without being affected." Another anecdote, showing his tenderness to the poor, is thus related of him. A literary man, whose library was destroyed by fire, has been deservedly admired for saying, "I should have profited but little by my books if they had not taught me how to do the good of them," The remark of Fénélon, who lost his in a similar way, is still more simple and touching: "I would much rather they were burned than the cottage of a poor peasant. In 1709, the duke of Marlborough, by his cense commissioned me to go page, while that general himself and his allies showed the aged prelate every mark of courtesy.

In the Jansenist disputes Fénélon wrote against Jansenius, and expressed himself very strongly, though at first charitably, against Quenel and Pascal. See Jansenius; PORT ROYAL. He wrote a Père Memoire commanding a judgment from the pope to settle the controversy by a dogmatic decision, to which all must submit. This Père Memoire was laid before the pope (Clement XI), and his bull 'Fveralat' shows evident traces of its influence. He also wrote "De Sommis Pontifici Assertio" (in his Exercit, Versailles for 1720, tom. ii), in which he yielded more to the papal claims than became him as a Gallican bishop. Denying the direct temporal power of the pope, he admits a potestas directoria, equivalent to what is called the indirect temporal power. See Pope, TEMPORAL POWER OF.

In his personal habits Fénélon was temperate almost to abstemiousness, took no repose except a few hours daily in the exercises of walking or riding, while the rest of his time was devoted to social intercourse with his friends, to visiting the poor, and to the performance of spiritual functions. The most of his revenues were devoted to benevolent uses. He died at Cambrai Jan. 7, 1715.

We cite a passage from Dr. Channing on the character and writings of Fénélon: "His works have the
FENELON

great charm of coming fresh from the soul. He wrote from experience, and hence, though he often speaks a language which must seem almost a foreign one to men of the world, yet he always speaks in a tone of reality. That he has excesses we mean not to deny, but they are of a kind which we regard with more than ordinary indulgence. Common fanaticism we cannot approve, but it is essentially vulgar, the working of animal passions, sometimes of sexual love, and often of earthly ambition. But when a pure mind err by aspiring after disinterestedness and purity not granted to our present infant state of grace, even the error, sterner, more we recognise in them an essential truth. They only anticipate and claim too speedily the good for which man was made. They are the misapprehensions of the inspired prophet, who hopes to see in his own day what he was appointed to promise to remoter ages. Fénélon saw far into the human heart, and especially into the lurkings of self-love. He looked with a piercing eye through the disguises of sin. But he knew sin, not, as most men do, by bitter experience of its power, so much as by his knowledge and experience of himself. Deformation was revealed to him by his refined perceptions, and intense love of personal beauty. The light, which he carried with him into the dark corners of the human heart, and by which he laid open its most hidden guilt, was that of celestial goodness. Hence, though the severest of censors, he is the most patient and most fit of aspirers. The poet himself, in his Ad Astra, looks on human error with an angel's tenderness, with tears which an angel might shed, and thus reconciles and binds us to our race at the very moment of revealing its corruptions" (Christian Examiner, vi, 7).

Literature. The writings of Fénélon are too numerous to be mentioned in detail. They are classified as follows in the Verselles edition of his works (1819, 22 vols. 8vo): Metaphysical and Theological Writings, vols. i.-iii; The Quietistic Controversy, and Discourses on Bossuet, vols. iv.-ix; writings on Jansenism, vols. x.-xvi; Education of Girls, Sermons, Religious Meditations, vols. xvii., xviii.; Fables, Dialogues, smaller writings, vol. xix; Télemaque, vol. xx; Dialogues on Eloquence, Correspondence, Lives of Ancient Philosophers, vols. xx., xxii. There are many collective editions of the writings of Fénélon, of which the most complete is that of Bélial, commenced in Verselles 1820-24, in 22 vols. 8vo., with 11 vols. additional of Correspondances (Paris, 1827-29), and 1 vol. of Tables et Index (Paris, 1880), making 54 vols. in all. The best (in some respects the best) is that of the abbé Gossevin (Paris and Besançon, 1851-52, 20 vols. imperial 8vo., with a complete literary and biographical index, and a Memoir of the Author). Of editions of his select works, the best are those of Périas (Paris, 1842, 4, large 8vo.); that of Dufour, the first volume of which is a Vie de Fénélon (Paris, 1828, 12 vols. 8vo.); and that of Leflèvre, with Vie by Almé Martin (Paris, 1885); and by Didot, 1888, 8 vols. large 8vo. Of his sermons, the editions are too numerous to be mentioned here. Many of his writings have been translated into English; among them are, On the Education of Daughters (Lond. 1703; Albany, 1805); Dialogues on Eloquence (Lond. 1808; Boston, 1813); Demonstrations of the Sentences of God (London, 1749, 12mo); Spiritual Works, translated by Houghton, with Life (Dublin, 1771, 2 vols. 8vo); Telemachus (many editions; best by Hawkesworth, Lond. 2 vols. 12mo, 1808); Lives of the Anc. Philosophers, with Life of Fénélon, by Cornich (N. Y. 1841, 12mo); Selections from the Writings of Fénélon, with Memoir of the Author, by Mrs.ollen (Boston, 1829; new ed. 1859, 12mo). Of Lives of Fénélon, besides those already cited in connection with editions of his works, we name Ramsay, Vie de Fénélon (Paris, 1725, 12mo); Querbeuf, Vie de Fénélon (Paris, 1777, 12mo; new ed. 1816, 12mo); Bénédict, Vie de Fénélon (Paris, 1783, 12mo); L. H. Nicholson, Life of Fénélon (Paris, 1787, 12mo); Madfrud, Life of F. (trans. from the French by Baug set, Lond. 1810, 2 vols. 8vo); Butler, Life of Fénélon

Fenestella, the niche at the side of an altar, containing the piscina (q. v.) or water-drain, into which was poured the water in which the priest washed his hands, and that with which the chalice was rinsed at the celebration of the mass. There is frequently a shelf above the water-drain, on which could be placed certain vessels which were required at the altar. A second niche, at the side of the fenestella, sometimes held the credence-table. In England the fenestella is almost universally at the south side of the altar.

FERDINAND, WILLIAM, B.D., an English Puritan, was born in 1600, and was educated at Pembroke Hall, Cambridge. He was appointed rector of Rochford, Essex, in 1629, and died about 1640. He was a very popular preacher, and his works, which have become very scarce, are written in a plain, earnest, and impressive style. The apostle of the Dissenters of his time, he looks on human error with an angel's tenderness, with tears which an angel might shed, and thus reconciles and binds us to our race at the very moment of revealing its corruptions" (Christian Examiner, vi, 7).

FERRAR

Ferguson, James, minister of Kilwinning, Scot-
land, a preacher and commentator of some emi-
nence. Little is known of his life; he died about 1670. He
published Brief Exposition of Philippicns and Colossians
(1663).—Brief Exposition of Galatians (1663). After his death appeared his Brief Exposi-
tion of 1 and 2 Thessalonians (1674). Orme (Bibb).
(See) says that these "expositions are uncommonly sensa-
tible." They have been republished in one vol-
ume (London, 1641, large 8vo).

Ferguson, Samuel D., a Methodist Episcopal
minister in the city of New York in 1768, but
removed with his parents at an early age to Dela-
ware County, where he was converted at fourteen. He
entered the New York Conference in 1819, and
died in New York, December 30, 1855. He was a high-
ly influential and useful minister, and an able presid-
ing elder. He was three times a delegate to the Gen-
eral Conference, in 1835, 1856, and 1844. He served
some time as agent for the Troy Conference Seminary,
and spent four years with eminent success as superin-
tendent of the Leake and Watts Orphan House, New
York.—Minutes of Conferences, vi. 64.

Ferroni, Severus Antonius, a Roman ecclesias-
tic, born in the States of the Church in 1748. He
employed himself for thirty years on a History of the Va-
riations in the Discipline of the Church, which was to
form 50 vols., and was on the point of completion when
the French army entered Rome in 1798. His papers
were destroyed and his labor lost. Ferroni was soon
after engaged on the side of Napoleon, wrote homilies in
his favor, and was made theologian to the privy
 council of the viceroy at Milan. Among other things
he wrote a treatise De Ascendititate Ecclesiae, main-
taining French lessons, but the censor would not allow it
to be printed. He died at Milan, 1813.—Vigne, Biogra-
phies Chrisl., s. v.

Fermoe (or Fairholme), Charles, a Scotch divine,
was born in Edinburgh, and was educated at the uni-
versity there, where he became M.A. in 1587. In
1593 he was made one of the regents of the university. He
afterwards became minister at Fraserburgh, and (1600)
principal of the college there; he died at Fraserburgh
in 1617. He wrote a Logical Analysis of the Epistle of
Paul to the Romans, which was published under the
care of Dr. Adamson in 1671, and has been republished
d by the Wodrow Society (Edinburgh, 1800, 8vo). In
the preface of the latter edition, Dr. Adamson gives the
work high praise, even saying, "So sagacious, ex-
act, and perspicuous a commentary on the Romans I
had not before had the good fortune to peruse."

Ferment. See LEAVEN; WINE.

Fermentariums (Fermentaris), a name given to
the Greek Church of the Latins, because the former
used leavened bread in the Eucharist; the Greeks call-
ing the Latin Asymines (q. v.). The word fermentum
was used, even in the Latin Church, at an early pe-
riod, to designate the Eucharist, showing that then fer-
mented bread was used.—Bingham, Orig. Eccles. bk.
xv, ch. ii, § 5.

Ferrand (Ferrandus, Ferdinand, or Fer-
rand), a Belgian monk and reformer, was born at
Bruges in 1450. He either lost his sight in childhood
or was born blind, which, however, did not prevent
him from studying philosophy, theology, rhetoric, po-
etry, and music. He pursued these studies in Paris,
and at Chartres; and afterwards went to the Uni-
versity of Paris, in 1485, as a student in the college of
belles-lettres in the University of Paris. It is pos-
bile that he may also have occupied the chair of theo-
ology. In 1490 he entered the order of the Benedic-
tines, and soon after, by special dispensation from the
pope, he was allowed, in spite of his blindness, to take
discern's orders, and began to preach. He died in 1496.
His blindness did not prevent him from writing many
books, among which are Epistolae Caroli Pernandi,
Isaigninis (Paris, no date, 4to);—De Animi Tranquilli-
tute libri duo (Paris, 1512);—Speculum monasticum di-
iscipulorum Patris Benedicti Magni, etc. (Par., 1515, fol.);
—Elegies de Contemptu Mundi; Odarum in laudem
rale, xvii. 180.

Ferron, Henry, D.D., bishop of Chester, was
born at York in 1609, and was educated at St. Mary's Hall,
Oxford, and at Trinity College, Cambridge, of which he
became a fellow. He was made chaplain to the
bishop of Durham, and was successively presented to
the livings of Masham, of Medoorn, and to the arch-
deansey of St. Asaph. He took his Doctor's degree in
1642, and espoused the cause of Charles I, who made him
his chaplain. On the Restoration Charles II gave him
the mastership of Trinity College, and he was twice chosen vice-chancellor. He was made bish-
op of Chester in 1659, died in 1661, and was buried in
Westminster Abbey. He published four tracts against
the rebellion, 1642-48; two sermons, 1644-49; and
five treatises in defense of the Church of England
against Romanism and Presbyterianism, 1647-60. He
is said to have aided Walton in the Polyglot Bible.—
Hook, Eccles. Biog., v. 89.

Ferron, Louis, a French Orientalist. He was
born at Tournai, October 8, 1645, and was educated in
his native city and at Lyons, where he studied Hebrew
and other Oriental languages. At twenty he went to
Paris, and soon after to Mayence, to undertake a transla-
tion of the Hebrew Bible. This project not succeed-
ing, he returned to France, studied law, and was re-
ceived as advocate in the Parliament of Paris. He,
however, occupied himself much less with his new pro-
fession than with controversial writings, and works on
the history of the East. He died Mar. 11, 1699. His
works are, Conspectus rerum Synagogae libri hebraici qui in
scripturis sanctis explicatur (Paris, 1670, 8vo);—Rexitiones
in la Re-
ligion Christiana, contenant les prophéties de Jacob et de
Daniel sur la venue du Messie, etc. (Paris, 1673, 2 vols.
dmo);—Liber Psalmorum, cum argumentis, paraphrasi-
bus et annotationibus (Paris, 1689, 4to);—Traite de l'Eglise,
contre lex hereticas et principalement contre les calva-
ristes (Paris, 1685, 12mo);—Reponse a l'Apolo gear pour la
Riformation, pour les reformateurs et pour les reformes
(Paris, 1685, 12mo);—Paeanae de Davide in latine et en
française selon M. Vulgate (Paris, 1686, 8vo);—Lettera a Mr. Ferrando de la Riforma sulla Monastica (Florence, 1686);—Summa Augustinianum (Journal des Savants);—Disqui-
dis ou l'on fai
voir que saint Augustin a ete moine (Paris, 1689, 12mo);—
Summa Biblica seu dissertations prolegomenae de
Sacra Scriptura (Paris, 1689, 12mo).—Hoefler, Nouv.
Biog. Genér. vii, 468.

Ferrandus Fulgentius. See FULGENTIUS, FER-
RANDUS.

Ferrar, Nicholas, a clergyman of the Church of
England, eminent for piety, was born in London in
1592, and was carefully trained at home both in reli-
gion and letters. At fourteen he entered the Univer-
sity of Cambridge, and was eminently distinguished
there by his abilities and learning, so that his tutor used
to say of him, "May God keep him in a right mind:
for if he should turn schismatic or heretic, he would
make work for all the world." In 1612 he went abroad,
studied at Leipsic and Padua, and, after visit-
ing Rome, returned to England in 1618, and soon after
became actively engaged in the affairs of a great com-
pany for colonizing Virginia, of which he was chosen deputy governor. In 1624 he was elected to
Parliament, where he was highly distinguished for elo-
quency and ability, but soon decided to quit public
life and devote himself to a religious life. In the
Church of Rome he would have been a monk, and he
came as near to it as possible for a Protestant. He
purchased in 1613 the manor of Little Gidding, in
FERRAR, Robert, bishop of St. David's, a martyr of the reign of queen Mary, was born at Halifax, Yorkshire, and was educated at Oxford, where he became B.D. and a regular canonic of the order of St. Augustine. The duke of Somerset, lord protector in the reign of Edward VI, was his patron, and employed him in carrying on the Reformation. He was one of the committee for the consecration of the bishop of Hereford, and was one of the committee for the consecration of Ferrar, who was consecrated bishop in 1547 (under Edward VI), soon procured him many enemies among the Papists, and after the fall of his eminent patron he was, under a false charge, committed to prison some time before the death of the king. On the accession of Mary he was tried on the new charge of heresy as a Protestant, degraded from his ecclesiastical functions, and, in company with Hooper, Bradford, Rogers, Saunders, and others, delivered over to the secular power for punishment. A little before this good bishop suffered, a young gentleman who visited him lamented the severity of the kind of death he was about to undergo. Ferrar replied, "If you see me once to stir while I suffer the pains of burning, then give no credit to those doctrines for which I die." By the grace of God he was enabled to make good this assertion. "I read in the scriptures," said he, "that the down in the flames by a blow on his head. He was burned at Caerarthen, in Wales, March 30, 1565.—Middleton, Ecclesiastical Biography, 346; Burnet, Hist. of Reformation (4 vols.), ii, 541 sq.; Fox, Book of Martyrs; Hook, Ecclesi. Biography, v, 96.

Ferrara, Council of (Concilium Ferrarense), falsely styled conciliar. Eugene VI having published a bull Sept. 18, 1487, for the transfer of the Council of Basile (q.v.) to Ferrara, a few bishops and abbots assembled Jan. 8, 1488, viz. cardinal Julian, who presided, five archbishops, eighteen bishops, ten abbots, and some generals of the monastic orders; of these bishops and abbots, left the Council, and continued its sitting, justly regarding the pope's bull as illegal, and passing sentence of suspension on him Jan. 24, 1488. Charles VII, indeed, forbade any of his subjects to attend at Ferrara. On Jan. 10 the first sitting was held, in which the translation of the council from Basile was pronounced to be canonical, and thence the ecumenical Council of Ferrara lawfully assembled. Pope Eugene presided in the second session, March 15, at the head of seventy-two bishops, and promulgated a decree against the fathers at Basile. The Greek emperor, John Manuel Palaeologus, was the titular, and the patriarch of Constantinople, Joseph II., arrived Feb. 9 at Venice, and were received with great pomp, together with Mark, archbishop of Ephesus; twenty-one other prelates (among whom was Isidore, a Russian bishop, and Besanion of Nicea), and other ecclesiastics, amounting in all to seven hundred persons. Before holding the first session with the Greeks, a scheme was drawn up of the different questions to be debated: 1. The procession of the Holy Spirit; 2. the addition "Agnus Dei" to the creed; 3. purgatory, and the intermediate state; 4. the use of unleavened bread in the holy Eucharist; 5. the authority of the Roman see, and the primacy of the pope. These questions were debated in thirteen sessions, up to the sixteenth, Jan. 10, 1489, when it was proposed to transfer the council from Ferrara to Florence, and, this being agreed to, publication was made of the change. —Laubbe, Conc. xiii. 1-222, 925-1081: Landon, Manual of Councils, p. 242; Mosheim, Ch. Hist. cent. xv, pt. ii, ch. ii, § 18; Mansi, t. xxix, xxxi; Flokules, Christianum's Divisions, Lond. 1867, pt. ii, ch. vii. See Florence, Council of.

Ferrara (Renata), Duchesse de, celebrated for her virtues and for her attachment to the Reformation, the daughter of Louis XII and Anne of Brittany, born at Blois Oct. 25, 1510. In 1527 she was married to Hercule d'Este, duke of Ferrara and Modena. She is said to have been very learned, excelling in mathe-
maties, especially in astronomy. Her husband died in 1569, and the next year she left Italy on account of her religion, and returned to France, where she was permitted to profess the Protestant faith. She resided at Montargis, and there gave protection to as many as she could accommodate till she was forced to depart. During the civil war in France she fed and maintained in her castle a great number of Protestants who had fled to her for refuge. She interceded strongly for the prince of Condé when he was imprisoned at Orleans in the time of the young king Francis, but was afterwards displaced with him, because neither she nor her ministers approved of the Protestants taking up arms. She died at Montargis June 12, 1575, in full profession of the Reformed faith, though the Jesuit Le Laboureur seeks to show that she adhered her religion.

—Boyle, Dictionary, ed. Des Malzeaux (Loud. 1796), iii, 80.

FERRARI, FRANCISCO BERNARDINO, an Italian archaeologist, was born at Milan in 1576. Entering the Congregation of St. Ambrose, he studied philosophy and divinity, as well as the Latin and Greek languages, and was admitted doctor. Borromeo, archbishop of Milan, appointed him to go over various parts of Europe to purchase the best books and MSS. to form a library at Milan. Ferrari passed over part of Italy and Spain, and collected a great number of books, which formed the foundation of the famous Ambrosian Library. About 1588 he was appointed director of the library of the college of San Vincenzo in Naples, which office he discharged two years, and then, on account of indisposition, returned to Milan. He died at Milan Feb. 8, 1669. Among his writings are, De Antiqvo Eccles. Epistolarum Generis libri tres (Milan, 1618); De Vita Scroccorum Ecclesiae Cathedralis conscientia libri tres (Milan, 1620); Utrecht, 1692, cum prefatione Joannis Georgii Gravi) —De Veterum acclamationibus et placuam libri sex (Milan, 1627; also in vol. vi of Gravius's Theorar. Antiq. Rom.). His writings are full of learning; he is very judicious in his conclusions, and exact in his quotations.—Du Pin, Bibl. des Auteurs Eccles., xvii, 109 (Amst. 1771).

FERRER, BONIFACIO, brother of St. Vincent Ferrer, and prior of the Carthusian monastery of Portaceli, in Valencia. He translated the whole Scriptures into the Valencian or Catalan dialect. This translation, which was printed at Valencia in 1478, although it was the work of a Roman Catholic author, and had undergone the examination and correction of the inquisitor James Borrell, had scarcely made its appearance when it was suppressed by the Inquisition, and consigned to the flames. He died in the year 1417.

McCrie, Reformation in Spain, ch. v.

Ferrer, Rafael, a Spanish missionary, was born at Valencia. Having entered the order of the Jesuits, he devoted himself to the preaching of the Gospel in the desert bordering on the Amazon River. It was, in particular, the fertile and fertile nations of the Cofanes, which had never yet seen a missionary, and which, divided into twenty tribes, occupied a territory about sixty miles from Quito, to which he devoted his labors. The Cofanes had never been subjected to Spanish rule, and had recently destroyed the town of Ecija and a number of villages. In 1600, after fourteen months of labor, Ferrer succeeded in organizing the mission of S. Martín de las Almas del Cofan. In 1604 two other villages swelled the number of the converted population to 6500. In 1605 Ferrer followed the course of the Guayacoco, penetrated into the

Napo, and altogether, in the course of two years and a half, travelled more than 1000 miles, and acquired a better acquaintance with the savage nations in the vicinity of the Amazon than any man of that time. In 1608 he returned to the Cofanes. He then prepared a Grammar of the language of the Cofanes, and translated for them the Catechism. He next undertook a journey to Quito, to induce the authorities to establish new missions. His petition having been granted, he again returned to the Cofanes, when his earnest sermons against polygamy cost him his life in 1611, one of the chiefs whom he had compelled to give up his concubines precipitating him from a steep rock.—Hoefer, Nouv. Dic. Géner. xvii, 555.

Ferrer or Ferrer, Vincentius (St.), a Dominican monk, was born in Valencia Jan. 23, 1857. He entered the order in 1874, and in 1880 he went to the University of Barcelona, where he spent two years. In 1894 he was made doctor at Lerida. In 1895 he was called to Avignon by pope Benedict XIII as master of the palace, and here he conceived the idea of devoting his life to the healing of the schism in the popacy which then threatened the destruction of the Roman Church. He carried out this ideal by declaring for Martin V, and by striving for a reunion in many writings, and by vast labors and travels in Spain, France, Italy, and the British Islands. He died at Vannes, in Brittany, April 5, 1419, and was canonized by pope Calixtus IV. His writings are said to be poor in thought and language.—Monheim, Ch. Hist. cent. xv, pt. ii, ch. ii, n. 75: Butler, Lives of the Saints, April 5.

Ferret, evidently a conjectural rendering for ama-kaθ (ʾāmāqāth, a sighing; Sept. μυαλία, Vulg. mugdā), one of the unclean creeping things mentioned in Lev. xi, 30. The Rabbinical writers seem to have identified this animal with the hedgehog (see Levysohn, Zool. des Talmud, § 129, 184). The Sept. and Vulg. refer to an animal which, according to Aristotle (Hist. Anim. viii, 24), is the Mus araneus, or shrew-mouse; but the associated names render it more probable that the animal referred to in Leviticus was a reptile of the lizard tribe (so Bochart and Gesenius), deriving its name from the mournful cry, or wail, which some lizards utter, especially those of the Gecko family. The Lacerta gecko (otherwise called "fan-foot" lizard; Gecko labialis, the Podarcis of Hassequin) is perhaps the animal intended. "The geckos are small lizards, usually somewhat clumsy in form, stealthy and cat-like in their actions, secreting themselves in holes and crevices by day, and at night in pursuit of insects. The form of the eye indicates their season of activity, for the pupil, which is capable of great expansion and contraction, closes to a vertical line. The animals crawl with ease and confidence on perpendicular walls, and even on the under side of ceilings, beams, and the like, provided they have a somewhat roughened surface. Thus curious power, the rapidity with which they disappear in some crevice when alarmed, and their sombre and lu-
FERRY

FERRY-BOAT

rid hues, their association with night, their loud and harsh croak, their slow and stealthy pace, and especially a certain sinister expression of countenance, produced by the large globular eye, unprotected by an eyelid and divided by its linear pupill, have combined to give to these reptiles in all countries a popular reprobation for malignity and venom, and they are generally much dreaded. This reputation, however, appears to be wholly groundless; and the story told by Hasselquœt of a man who would lay hold of the reptile, and whose hand instantly became covered with red pustules, inflamed and itching, must be received with suspicion. Still more incredible is another account by the same naturalist, to the effect that he saw at Cairo two women and a girl at the point of death from having eaten some cheese over which a gecko had crawled! The most interesting point in the economy of these curious lizards is the structure of their feet, by which they are enabled to defy the laws of gravity. The feet are nearly equal, short, stout, and terminated by five toes, differing little in length, which radiate as if from a centre, so as to form two thirds of a circle. The under surface of the toes is, in most of the genera, much widened, and furnished with small plates or lamellæ, overlapping each other in a regular manner, which varies in different genera and species. The toes are frequently united by a membrae at their base. The claws are pointed, hooked, and kept constantly sharp by an apparatus, so they are capable of retraction, like those of the cat. It is by means of the singular lamellated structure of the under surface of the toes that these reptiles, or at least many of them, are enabled to cling to vertical or even inverted surfaces, as house-dies do. The mode in which this is effected we do not thoroughly understand; but we may conjecture that it is by the raising of these imbricated plates by muscular action, so as to form a vacuum beneath the sole, when the pressure of the external air causes the toe to adhere firmly to the surface. The similarity of the structure to that of the corneal sucker in the remora suggests this explanation. A familiar illustration of the principle is seen in the leathern suckers which child'en make, which adhere so firmly that large stones are lifted by them. See LIZARD.

FERRIER, JEAN HENRI, a French Protestant minister, was born about 1560, became professor of theology at Nimes, and is remarkable for having become a Papist, even after having maintained in a public dispute in 1619 that "pope Clement the VIIth was properly the Antichrist." The Parliament of Toulouse having ordered his arrest, if became necessary for Henry IV to intervene to save him from the results of his temerity. In gratitude for this, Ferrer favored the restrictive measures adopted by the court against the Protestants. For this he was suspected by his Protestant friends, and was forbidden to preach by the Synod of Privas in 1612. He did not, however, change his religion till a popular tumult arose against him, in which his house was plundered, and himself so near being murdered, that, for the sake of escaping, he was obliged to lie three days concealed in a tomb. He then became a Roman Catholic, and removed to Paris, where he was subsequently made counsellor of state by Louis XII. He died Sept. 28, 1626. He wrote a treatise, De l'antichrist et de ses marques, contre les ennemis de l'Eglise catholique (Paris, 1615.—Hoëffer, Nouv. Biog. Générale, xvii, 560; Bayle, Dictionary (London, 1786), iii, 89.

Ferry, Paul, a French Protestant divine, was born at Metz Feb. 24, 1591, and was educated at the Seminary of Strassburg. He became pastor at Metz in 1612, and held that position during sixty years. He was one of the most eloquent men in the province, and by his powers of mind, his activity, and his prudence, he gained the esteem of the most influential men of his time, and early obtained great influence over Roman Catholics as well as Protestants. As Bishop of Metz, he was troubled by the divisions which existed among the Protestants, and hoping to do something towards removing them, he held a correspondence on the subject with Dureius [see DURY], the great "pacificator." Dury even came to Metz in 1662 to discuss the subject. Nothing substantial came of it; but Ferry carried his love of conciliation so far that he even regarded as possible the reunion of Protestants and Romanists; at all events, it is certain that he had on this subject a long correspondence with Bossuet. It occurred to Ferry that he had published a Calchismes général de la Réformation, in which he showed that the Reformation was a necessary reaction against the corruption of the Church. Bossuet, at that time canon and archdeacon of Metz, wrote a refutation of this little work. The discussion led to a mutual esteem between the disputants; and when, in 1657, the project of the reunion of Protestants and Roman Catholics was considered by the government, Ferry was consulted, and entered into correspondence with Bossuet on the subject. This correspondence is printed in vol. xxiv of the Œuvres de Bossuet (edition of Versailles), and it has been proved almost beyond doubt that Ferry was one of the ministers gained over by the cardinal Richelieu to agitate in favor of the reunion of the two religions, and that he received a pension of five hundred crowns for so doing. The receipt of Ferry for this sum is said to be shown in the Imperial Library of Paris. Ferry died at Metz July 28, 1669. He left a large number of writings, most of which remain in MS. Those which are published are, besides a volume of poetry, Scholasticæ orthodori Specimen, hoc est Bulatia nostre methodos omnium, ex ipsa Scholasticæ corum veterum et recentiorum insignia juritur (Geneva, 1616, 8vo.; 2d ed. Leyden, 1684, 8vo.);—Le dernier Discours de la Tradition contre l'écriture (Sedan, 1618, 8vo.);—Réflexions sur les Colommes semées nouvellement contre certain endroit de l'œuvre du dernier Discours de la Trad. de la Tradition (Sedan, 1624, 8vo.);—Des marqueaux d'histoire sur le "Discours de la vie et de la mort de St. Sever," publiés par le Sieur de Ramberviller (1624, 8vo.);—L'indiscuòse pro Scholasticœ ordolare, lonicæ Leon., Perninsum, Jesuit., in quibus agitur de praedestinatione et memoria, de gratia et libero arbitrio, de causis peccati et justificatione (Leyden, 1630, 8vo.);—Quatre Sermons prononcés en divers lieux et sur divers sujets (La Ferté-au-Col, 1646, 12mo.);—Lettre aux ministres de Genève, vol. ii of the Bibliothèque Anglica. —Hoëffer, Nouv. Biog. Générale, xvii, 663; Bayle, Dictionary (London, 1786), iii, 88; Haag, La France Protestant, 2 vol. 8vo., vol. i; London Rev. July, 1856, p. 409 sq.

Ferry, Paul. See FERRY.

Ferry-boat (77722, abordage, passage; Sept. 2d, 1804), a vessel for crossing a stream (2 Sam. xix, 18). The Syriac and Vulg. refer this word to the men mentioned in the above text, and accordingly Boothroyd renders the passage, "And these went over Jordan before the king, and performed the service of bringing over the king's household," which, as some of the Rabbins understand, was accomplished by carry-
ing over on their backs the women and children who could not conveniently ford the river. This, however, is not in accordance with the construction of the original (which, moreover, has the article emphatically), and a ferry-boat crossed. Some suppose (see Josephus, Ant. vii, 11, 2) that there was a bridge of boats employed on this occasion, and others that a ferry-boat of some kind was used for this purpose (see Kitto, Pact. Bib., note in loc.). It is probable that a raft, or boat, was constructed: if not, some kind of boat, for the use of these must have been known to the Hebrews, as we find vessels apparently of this description delineated among the paintings of ships on the Egyptian monuments. Floats of various kinds, buoyed up by inflated bladders, calabashes, wicker-work, and even earthen or metallic vessels, have been used from the earliest ages on the Nile (Isa. xviii, 2) and Tigris, for transporting passengers or goods; and modern travellers frequently allude to similar modes of conveyance at the present day among the Arabs. See Boat. Similar scenes are depicted upon the Assyrian monuments (Layard's Nineveh, i, 576). See Boat.

Ancient Assyrian Ferry-boat for Funerals.

**FEUS, JOHANNES** (originally Wilt), a Franciscan monk and cathedral preacher at Mentz, lived in the 16th century. He published a large number of sermons and Biblical commentaries. Of the latter several were put on the Roman Index. Ferus clings to the literal meaning of the Scriptures, and avoids allegorical interpretations. He recommends the reading of the Scriptures, and refutes the objection that the Scriptures are obscure. He complains of the prevalence of a Pharisaic spirit in the Roman Catholic Church, since there was in it a great deal of outward ceremonial, but little truth. He preached that repentance does not consist in outward works, such as fasting, praying, and giving alms, but that it begins, on the one hand, with the announcement of the divine law; the conscience, and of one's sinfulness, and the fear of the judgment of God, and, on the other hand, with the announcement of the grace of God, and with confidence in the divine promise. Ferus thought that popes, emperors, councils, and the diets could do nothing so long as the Church was full of errors and her doctrines corrupt. He died in 1554.—Herzog, Real-Encyclop., xvi, 141.

**Fesch, Joseph**, a French cardinal, was born in Ajaccio, Corsica, Jan. 3, 1763. His father's second wife was the mother of Jules Bonaparte. He studied at the College of Aix, in Provence, entered the Church, and was archdeacon and provost of the chapter of Ajaccio when the revolution broke out. The Bonaparte family being exiled from Corsica in 1793 for their opposition to Pius VI, Fesch followed them to Toulon, where his circumstances compelled him to enter the commissariat of the army. In 1795 he was appointed to the commissariat of the Army of Italy, just placed under the command of his nephew, Napoleon Bonaparte. After the 18th Brumaire he resumed his ecclesiastical functions, and was actively engaged in the negotiations concerning the Concordat of July 15, 1801. Napoleon made him archbishop of Lyons, and Fesch took possession of that see Aug. 10, 1802. Six months later he was created cardinal of St. Laurent in Lucina. In 1804 he was appointed ambassador to Rome, and was accompanied in this mission by Châteaubriand, who thus began his diplomatic career. He subsequently decided Pius VII to come to Paris to crown the emperor. Napoleon appointed him high almoner, commander of the Legion of Honor, and senator. Fesch paid great attention to the interests of his diocese, and established a high theological school. During the difficulties between Napoleon and the pope he showed much consideration for the latter, declining in 1809 the archbishopric of Paris, which was offered him by the emperor, and even rejecting the petition of the council of the clergy in 1810, and at least administering the diocese. In 1811 Napoleon called a council to settle his difficulties with Pius VII, and appointed Fesch its president, in which capacity he seemed not to have acted according to the views of the emperor, for he was sent back to his diocese. A letter of his addressed to the pope, then at Fontainebleau, caused him to be deprived of his stipend. He introduced into France the order of the "Brethren of the Christian Schools," founded at Lyons a college of home missions, and was instrumental in procuring the recall of the Jesuits. When Napoleon I was sent to Elba, Fesch went with him to Rome, where he was well received by Pius VII. During the "hundred days" he returned to France and into his archbishopric. After the battle of Waterloo he returned to Paris and became tutor to prince Carolaht's sons. In 1791 Fessler became a Protestant. After remaining a long time in Berlin he went to Russia, and became professor of Oriental languages and hermeneutics in the University of Lemberg. He afterwards joined the freemasons, and withdrew from the Capuchins. In 1787 the representation of a tragedy of his, entitled Sidney, which was denounced as impious, obliged him to retire to St. Pölten, where he became tutor to prince Carolaht's sons. In 1791 Fessler became a Protestant. After remaining a long time in Berlin he went to Russia, and became professor of Oriental languages in the Academy of St. Alexander Newuki, but was afterwards accused of atheism, and lost his situation. After being for a while a member of the Legislative Assembly, he went in 1817 to Sarepta, the head-quarters of the Moravians in Russia. In 1820 he became superintendent of the evangelical community at Saratof, and in 1835 general superin-
FESTIVAL

537

FESTIVAL

tendant of the Lutheran congregation at Petersburg, where he died Dec. 15, 1889. His principal works are,
Marc-Auré, a historical novel (Bresl. 1790-92, 8 vols.):—Mathias Corvinus (Breslau, 1739):—Arístides u. The-
isteke (Berlin, 1792 and 1818, 3d ed.)—Attilla (Bres-
lau, 1734);—Geach. d. Ungarn, etc. (Lpz. 1812-20):—
Rübbelke a. meine 70 jährliche Würdekraft (Breslau, 1817):—August von Wagner, Annalen, etc. (Potsdam, 1840-43).

Festival (properly 27, chag, iopri, “feast”), Reli-
igious, of the Israelites (compare Lev. xxiii). These were occasions of public religious observances, recurr-
ing at certain set and somewhat distant intervals. In a certain sense, indeed, each day was such an
occasion, for at the daily service two lambs of the first year were to be offered at the door of the taber-
nacle; one in the morning, the other in the evening, a continual burnt-offering. With each lamb was to
be offered one tenth of an ephah of flour, mingled with one
fourth of a hin of fresh oil, for a meat-offering, and one fourth of a hin of wine for a drink-offering.
Frankincense was to be placed on the meat-offering, a
handful of frankincense, was burnt, and the remainder was to be eaten by the priest in the holy place, without leaven. The priests were
to offer daily the tenth of an ephah of fine flour, half
in the morning and half in the evening, for themselves.
The high-priest was to dress the lamps in the tabernacle every morning, and light them every evening
and at the same time burn incense on the altar of incense. The people provided oil for the lamps which were to burn from evening to morning: the ashes were removed by a priest, dressed in his linen
robe and his linen drawers, and then carried by him out of the camp in his common dress. Great
stress was laid on the regular observance of these require-
ments (Num. xxviii, 1-8; Exod. xxx, 38-42; Lev. vi, 8-23; Exod. xx, 7-9; xxx, 20; Lev. xxiv, 1-4; Num. viii, 2). See DAILY SACRIFICE.

Fiest — A Scotch word, chiefly used in Scotland and a yearly festival, as will presently appear. At the New-
moon festival, in the beginning of the month, in addi-
tion to the daily sacrifice, two heifers, one ram, and
seven lambs of the first year were to be offered as
burnt-offerings, with three tenths of an ephah of flour,
mixed oil; one tenth of an ephah of flour, mingled with oil, for the ram; and one tenth of an ephah of flour, mingled with oil, for every lamb; and a drink-offering of half a hin of wine for a heifer, one third of a hin for the ram, and one fourth of a hin for every lamb. All kinds of the goats was also burnt and incense on a sacrifice (Num. x, 10;
xxvii, 11-15). See New Moon.

I. Pre-exilian Festivals.—The religious times or-
dained in the law fall under three heads: 1. Those formally
connected with the institution of the Sabbath.
These were the following:
(1.) The weekly Sabbath itself,—On this day two
lambs of the first year, without blemish, were to be
offered for a burnt-offering, morning and evening, with
two tenths of an ephah of flour, mingled with oil, for
a meat-offering, and one half of a hin of wine for a
drink-offering. Thus doubling the offerings of the ordinary
days. Twelve cakes of fine flour were to be placed
every Sabbath upon the table in the tabernacle, in two
plies, and pure frankincense laid on the uppermost of
each pile. These were to be furnished by the people:
two were offered to Jehovah, the rest were eaten by the
 priest (Exod. xxv, 1-2; Lev. xxv, 1; Num. xvi, 15-17; Exod.
xxiii, 1; xxvii; Exod. xix, 30-30; xx, 8-11; xxiii, 12; Deut. v, 12-15; Lev. xxiii, 8; xxv, 5-9; Num.
15, 35; xxviii, 9). See SABBATH.
(2.) The seventh New Moon, or Feast of Trumpets.—
The first day of the seventh month was to be a Sab-
 bath holy convocation; a day of blown trumpets. In addition to the daily and monthly sacrifices, one ram and seven lambs were to be offered
as burnt-offerings, with their respective meat-offer-
ings, as at the usual new-moon festival (Num. xxviii,
11-15; xxix, 1-6; Lev. xxiii, 23-26). See TRUMPETS, Feast of.
The other septenary festivals were: (3.) The Sab-
batical Year (q.v.), and (4.) The Year of Jubilee (q.v.).
2. The great feasts (Zehir, set times); in the Tal-
 mud, zimmur, pilgrimage feasts) are: the Passover; the feast of Pentecost, of Weeks, of Wheat-harvest, or of the First-fruits of the feast of Tabernacles, or of In-
gathering. In the arrangement of these festivals like-
wise a sabbatic order remarkably prevails (compare Middrash Rabba on Lev. xxiii, 24), and serves to furn-
ish a strong proof that the whole system of the festi-
vals of the Jewish law was the product of one mind. Pentecost occurs seven weeks after the Passover; Passover and the feast of Tabernacles last seven days each; the days of Holy Convocation are seven in the
year—two at the Passover, one at Pentecost, one at the feast of Trumpets, one on the Day of Atonement, and two at the feast of Tabernacles; the feast of Tab-
ernacles is celebrated on the first day of the seventh month of the sacred year; and, lastly, the cy-
cle of annual feasts occupies seven months, from Nisan to Tier. See SEVEN.
On each of these occasions every male Israelite was commanded “to appear before the Lord,” that is, to
attend on the celebration of the tabernacle, and to
make his offering with a joyful heart (Deut. xxvii,
7; Neh. viii, 9-12; comp. Josephus, Ant. xi, 5, 5).
The attendance of women was voluntary, but the
zealous often went up to the Passover. Thus Mary
attended it (Luke ii, 41), and Hannah (1 Sam. i, 7; 11,
19). As might be supposed, there was a stricter obli-
gation regarding the Passover than the other fests,
and hence there was an express provision to en-
able those who, by unavoidable circumstances or legal
impediment, had been prevented from attending at
the proper time to make their offering in the same, or
in the succeeding month (Num. ix, 10-11); none were
to come empty-handed, but every one was to give ac-
cording as Jehovah had blessed him; and there before
Jehovah was every one to rejoice with his family, the
Leviite, the stranger, the fatherless, and the widow
(Exod. xxv, 14-16; Exod. xxiii, 12; Deut. xvi, 11, 12).
On all the days of Holy Convocation there was to be
an entire suspension of ordinary labor of all kinds
(Exod. xii, 15; Lev. xvi, 29; xxiii, 21, 24, 25, 30).
But on the intervening days of the longer festivals
work might be carried on. The law always speaks of the days of Holy Convocation as Sabbath; and in Mishna there is a distinction, and states in detail what acts may be performed on the former, which are un-
lawful on the Sabbath, in the treatise Tosf. while in
Mishna it lays down strange and burdensome
conditions in reference to the intermediate days. See
CONVOCATION, HOLY.

Brown has spoken (Antiquities of the Jews, i, 522) of
the defenceless state in which the country lay when all
the males were gathered together at Jerusalem.
What was to prevent an enemy from devastating the
land, and slaying women and children? He refers
the protection of the country to the express interpre-
tation of God, citing "the promise," as found in Exod.
xxiv, 23, 24. He adds, "During the whole period
between Moses and Christ we never read of an enemy
invading the land at the time of the three festivals.
The first of the seven-day feasts at which the Israel-
ites were to have withdrawn from themselves the divine
protection by imbruing their hands in the Saviour's
blood, when Cestius, the Roman general, slew fifty of
the people of Lydda, while all the rest had gone up to
the Feast of Tabernacles, A.D. 66" (Josephus, War, ii, 10, 19). The objection, however, to the above
historical statement is founded on the assumption that the law was
strictly, uniformly, and lastingly obeyed. But the re-
FESTIVAL 538 FESTIVAL

quirement that all males should appear three times a year before Jehovah is not without some practical dif-

ficulty. During the sojourn in the wilderness its ob-
servation would not only be easy, but highly useful in

preventing the dispersion of individuals or numbers

from the main body—an influence the more necessary

because many, more or less, were away from their

time to time in search of pasture. In subsequent and

more settled times it must have been a serious incon-

venience for all the males of the nation to leave their

families unprotected and their business neglected for

so many days. This, as well as the duty of making the

journey to and from Jerusalem. It is true that the sea-

sons of the festivals were well fixed and distributed

for the convenience of an agricultural people. Yet

to have to visit Jerusalem thrice in seven months was

a serious thing, especially in later times, when Israel-

ites to say the least, found food so hard. E., in his days, as

was, as many think [see Assessment], a small con-

sideration, yet the interruption to domestic life and the

pursuits of business must have been very great; nor

would it be an exaggeration to say that the observance

was an impossibility to the Jews, for instance, when

visiting Rome, Venice, Italy, Mantua, Turin, Genoa, Mi-

nor, etc. How far the law was rigorously enforced or

strictly obeyed at any time after the settlement in

Palestine, it would not be easy to say. Palfrey [Lec-

tures on the Jewish Script. I, 199] supposes that "a man

who neglected to observe this festival at the Pentecost

who appeared before the Lord (not in person, but) with

his offering, sent by the hand of a friend, as a suitor is

said in our common speech to appear in a court of jus-

tice when he is represented there by his attorney;"—

a conceit which, to our mind, savors too much of modern

ideas and usages. That some relaxation took place,

at least in the latter days, "appears from John vii.

8, in which more or less of what is voluntary is

obviously connected in the mind and practice of our

Lord with "the feast," though it must be allowed that

the passage is an evidence of the general observance,

not of an absolute law. The virtual permission is given

to this significance, in the names by which Pentecost

and Tabernacles are often called, and also by the offer-

ing of "the first-fruits of wheat-harvest" at Pentecost

(Exod. xxxiv, 22), and of "the first of the first-fruits

of the new wine" at the Pentecost (Exod. xxiii, 19). It

even suggests that the origin of the feasts was patri-

archal (Ewald, Alterthumes, p. 386), and that the his-

torical associations with which Moses endowed them

were grafted upon their primitive meaning. It is per-

haps, however, a difficulty in the way of this view that

we should take stock for the institution of agricul-

tural festivals among an agricultural than a pastoral

people, such as the Israelites and their ancestors were

before the settlement in the land of promise. The

times of the festivals were evidently ordained in wis-

dom, so as to interfere as little as possible with the in-

dustry of the people. The Passover was held just be-

fore the work of harvest commenced, Pentecost at the

conclusion of the corn-harvest and before the vintage,

the feast of Tabernacles after all the fruits of the

ground were gathered in. In winter, when travelling

was difficult, there were no festivals. See Sasanus.

1. The first of these three great festivals, that of

Unleavened Bread, called also the Passover, was held

in the month Abib, in commemoration of the rescue

of the Israelites by Jehovah out of Egypt, which took

place in that month. The ceremonies that were con-

nected with it were most exactly described in the Bible

and could be detailed. Every one who was ritually

clean, not on a journey, and yet omitted to keep the

Passover, was to be cut off from the people. Any one

who was disabled for the observance, either by uncleanness

or being on a journey, was to keep the Passover on

the fourteenth day of the next month. In order to make

the season more remarkable, it was ordained that

henceforward the month in which it took place should

be reckoned the first of the national religious year

(Exod. xii, 2). From this time, accordingly, the year

began in the month Abib, the Nisan (March), while the

civil year continued to be reckoned from Tisri (Septem-

ber—October) (Exod. xii, 3, 14, 27, 43—49; Lev. xxiii, 5; Num. xxviii, 16; Deut. xvi, 1—7).

The Passover lasted one week, including two Sabbath

(Du Wette, Archäologie, p. 214). The first day and the last were to be separate Sabbath days, the former in the

public temple, and to rest from all labor (Exod. xii, 16; Lev. xxiii, 6; Num. xxviii, 18; Deut. xvi, 8). The modern Jews observe the 15th and 16th, and the 20th and 21st days of Nisan, as holy days in

connection with this festival. See Nisan.

On the night of the 14th of the month Abib, on the feast of Passo-

ver, a sheaf of the first-fruits of the barley harvest

was to be brought to the priest to be waved before Je-
The feast of Pentecost or of Weeks was kept to celebrate the descent of the Holy Spirit. It was celebrated on the day after the feast of Unleavened Bread, on which the sheaf was presented. The festival lasted but one day. The Jews of the present day, however, hold it during two successive days. It is said to have been designated to commemorate the giving of the law on Mount Sinai (Deut. xvi. 9-11; Lev. xii. 15-21; Num. xxvii. 28-31; xv. 17-21). See PENTECOST.

(8.) The feast of Ingathering or of Tabernacles began on the fifteenth day of the seventh month, and continued eight days, the first and last being Sabbaths. During the feast all native Israelites dwelt in booths made of the twigs of herbs, branches, leaves, and branches of thick-leaved trees, and of the willows of the brook, when they rejoiced with their families, with the Levite, the stranger, the fatherless, and the widow, before Jehovah. Various offerings were made. At the end of every seven years, in the year of release, at the feast of Tabernacles, the people presented to Jehovah offerings of every kind, by the priests in the hearing of all the Israelites (Deut. xvii. 15-18; xxxi. 10-13; Lev. xxvii. 38-42; xxxix. 12-30; 40). The feast of Tabernacles was appointed partly to be an occasion of annual thanksgiving after the ingathering of the harvest (Exod. xxv. 1-17); Lev. xxiii. 38, 39; Deut. xvii. 18), and partly to remind the Israelites that their fathers had lived in tents in the wilderness (Lev. xxxi. 40-45). This feast took place in the end of the year, September or October. The modern Jews observe it for seven successive days, the first two and the last two of which are kept as holy convocation (Deut. xxvi. 1-11; xvii. 11). See FEAST OF.

(4.) The festival of New Year's Day (Rosh ha-ba'ash-Sha-a'dah in the Talmud) is held by modern Jews for two days at the beginning of Tisri. See TRUMPETS, FEAST OF.

The twentieth day of the seventh month was the Day of Atonement—a day of absolution and a day of holy convocation, in which all were to afflict themselves. Special offerings were made (Lev. xxiii. 26-32; xvi. 1-34; Num. xxix. 7-11; Exod. xxx. 10). See ATONEMENT, DAY OF.

11. Additional Post-aestival Festivals. — 1. The term "the feast of Booths" (iyprü, K̄orókôô) is applied by Philo (Op. v. 51) to the offering of the first-fruits described in Deut. xxvi. 1-11, and occurring on the 16th of the first month (Nisan). See First-fruits.

2. The Festival of Acre, which was instituted by Simon Macceabaeus, B.C. 141, to be celebrated on the 28th of the second month (Heshvan), in commemoration of the capture and purifying of Acre (q. v.), and the expulsion of the Hellenists from Jerusalem (1 Macc. xiii. 50-52). See MACCABEES.

3. The Festival of Wood-carrying, as it was called (iyprü râv hêlôpôrôn), is mentioned by Josephus (War, ii. 17. 6) and the Mishna (Tâbûnî, iv. 6). What appears to have been its origin is found in Neh. x. 34. It was celebrated on the 15th (21st) of the fifth month (Ab). See XYLOPHORIA.

4. The Festival of Water-drawing (îmûn hâlôkôô), which was held on the 22d of the seventh month (Tisri), the last day of the feast of Tabernacles (comp. John vii. 37; Mishna, Seder, iv. 9; vi. 1-9; see Philo, De leg. Melchor ex fabro tabeulorum, Altorf, 1744). See SILOAM.

5. The Festival of Dedication was appointed by Judas Maccabeus on occasion of the purification of the Temple and reconstruction of the altar after they had been polluted by Antiochus Epiphanes. The hatred of this monarch towards the Jews had been manifested in various ways: he forbade their children to be circumcised, and he even threatened them by setting up an image of his divinity, carved in the form of an ox, on the altar of incense, the sheen-bread table, and the golden candlestick, with the other vessels and treasures of the Temple, and went to such extremes as to sacrifice a sow upon the altar, and even, as a mark of their submission, to build a heathen altar on the top of that sacred pile, and with broth of swine's flesh to sprinkle the courts and the Temple (1 Macc. i. 2; 2 Macc. v.; Pudeux, sub A.C. 167-8, 170). The new dedication took place on the 25th day of the ninth month, called Kislev, in the year before Christ 170. This would be in December.

The day was chosen as being that on which Antiochus, three years before, had polluted the altar by heathen sacrifices. The joy of the Israelites must have been great on the occasion, and well may they have prolonged the observance of it for eight days. A general festival is implied, for a pian of dedication was held as part of the feast of Lights. Ap. ii. 89).

See DEDICATION, FEAST OF.

6. The Festival of Nicanor, to commemorate the defeat by Judas Maccabeus of the Greeks when the Jews "smote off Nicanor's head and his right hand which he stretched out to proudly," caused the people to rejoice greatly, and they kept that day a day of great gladness; moreover, they ordained to keep yearly this day, being the thirteenth day of Adar—the twelfth month (1 Macc. vii. 47; Josephus, Ant. xii. 10, 5; Tānūh, xii.; Talm. Jerus. Tannîh, ii. 12; Josippon ben-Goration, iii. 292; ed. Breith.). See NIHANOR.

7. The Festival of Purim or of Lots originated in the gratitude of the Jews in escaping the plot of Haman designed for their destruction. It took its name from the lots which were cast before Haman by the astrologers, who knew his hatred against Mordecai and his wish to destroy the Jews, especially the Jews of the Persian nation, and who threw the lots up to whomever it (Ex. 2, 5). The feast was suggested by Esther and Mordecai, and was celebrated on the 13th, 14th, and 15th days of the twelfth month (Adar). The 13th was a fast, being the day on which the Jews were to have been destroyed; and the 14th and 15th were a feast held in commemoration of their deliverance (see 2 Macc. xxv. 36). The fast is called the Fast of Esther, and the feast still holds the name of Purim. Pudeux (Comex) styles it the banchalania of the Jews. See PURIM.

The slaughter of Holophernes by the hand of Judith, the consequent defeat of the Assyrians, and the deliverance of the Jews, were commemorated by the institution of a festival (Judith xiv. xv). See HOLOPHERNES. Some other minor festivals may be found noticed in Brown's Antiquities, i. 586, and in Simon's Dictionnaire de la Bible, art. "Fêtes." See CALENDAR, JEWISH.

Festivals in the Christian Church. See Feasts.

In the Feast of St. John the Baptist (Greek: Πάσχα του Θεού Φιλήτου, the successor of Felix as procurator of Judea (Acts xxiv, 27; Joseph. Ant. xx, 8, 9; War, ii, 14, 1). See Felix. A few weeks after Felix fled to Rome, he heard the story of the persecutions of Herod Agrippa II. and Benjamin his sister. Not finding any thing in the apostle worthy of death or of bonds, and being confirmed in this view by his guests, he would have set him free had it not been that Paul had himself previously (Acts xxiv, 11, 12) appealed to Caesar. In consequence, Felix sent him to Rome. See Paul. Judea was in the same disturbed state during the procuratorship of Felix, which had prevailed through that of his predecessor, Sallust. It seems that Felix, in the presence of Herod Agrippa II. and Benjamin his sister, committed Paul to the care of Felix. After some delay, Felix, on the advice of Herod Agrippa, sent him back to Jerusalem, where he was held in prison by Felix, who was succeeded by Tiberius. The object of the letter of Felix was to oblige the emperor to make a settlement with the Jews, who had rebelled against the procurator at Jerusalem, and to give him the opportunity of showing his ability as a statesman. The letter was sent to the emperor, who received it with satisfaction, and directed the procurator to proceed at once to Jerusalem, and to take the necessary measures for the safety of the Jews. See also CHRONOLOGY.

Josephus (War, ii, 14, 1) that Festus was a just as well as an active magistrate.

Feticism, or Feticism, a term recently introduced to denote the lowest forms of human worship, and which the shapeless stone, the meatiest retable, or object however worthless or contemptible by a vague and mysterious reverence" (Millman). It is derived from Fetic, a term borrowed from the Portuguese fetivo, and used by the negroes of Senegal to denote an institution of witchcraft. It was first brought into use in Europe by De Brosses, in his Du Cult des Dieux Fétiches e Feticism. It is practised in Greenland, Africa, Australia, and Liberia. The fetishes in use in Africa are either natural (as a tiger, serpent, etc.) or artificial (as skins or claws of beasts, stones, etc.). Sometimes a single fetish is made the object of worship, as the g-tiger in Dahomey, the serpent by the Whydahs. The negroes of Benin make a fetish of their own shadows. But, besides these, each individual almost has his own particular fetish or fetiches. Any object may become one by the merest accident; e.g. by having been the subject of a dream. When any one has a fetish supposed to possess extraordinary powers of injuring others, no efforts are spared to get it from the owner. Collectors have paid large prices for fetiches, and a seller on the coast of Guinea saw as many as 20,000 fetiches in the possession of one negro. Sometimes they are purely imaginary, and are fantastic forms, such as are never found in nature, and generally contrived for the purpose of producing fear. At Cape Coast there is a public guardian fetich, supreme in power and dignity. This is a rock which projects into the sea from the bottom of the cliff on which the castle is built. To this rock annual sacrifices are presented, and the responses given through the priests are rewarded by the blindfold devotees.

With regard to the religious relation between the fetiches and their worshippers, we find that, although undoubtedly sinking often to the rank of mere instruments of sorcery in practice, fetiches are yet essentially idols. They receive, every morning and evening, offerings of spices, milk, tobacco, etc., and are always approached with marks of respect and of fear. They are resorted to for protection against lightning, beasts of prey, murder, etc. They also serve to protect property, to attest oaths, and the negroes have even a vague idea that after death they will have to appear before the fetiches, and that the moral hold of the fetich over its worshiper is, after all, very weak; the object of worship is discarded or broken as soon as its efficacy is distrusted.

Substantially, fetichism is a rude form of pantheism. In the root is to be found in the fear generated in the rude nature of the savage by the unknown forces of the universe. —Hertzog, Real-Enzyklop. iv, 305; Scholten, Geschichte der Relig. und Philosophie (Elberfeld, 1866); Lecky, Rationalism, i, 208 sq.; Hardwick, Christ and other Masters, ii, 127.

Fetter (Lat. sect, bond or chain in general, only in the plur. Job xxx vi, 8, elsewhere "chains." Ps. cxlix, 8; Isa. xiv, 14; Nah. iii, 10; 22, kebl, sing. perhaps the link joining the fetter, Ps. cv, 18; plur. and of iron, calix, 8;
bound with fetters by the Chaldeans and carried to Babylon (2 Chron. xxxiii. 11; 2 Kings xxv. 7). Mas-
sules of the feet and hands are represented on the As-
Syrian monuments (Layard, Nineer, ii. 376; Kittto, Daily Bible Illustrations, ii. 437). See Chain. One
mode of securing prisoners among the Egyptians, as
depicted on the monuments, was to enclose their hands
in an elongated segment of wood, made of two opposite
segments, nailed together at each end, such as are
used for a similar purpose in Egypt at the present day
(Willkinson, Ancient Egyptians, i. 410, abridgem.)

Feudal System. See FEUDAL.

Feuguières, Guillaume, was born at Rouen. In
his native place he became minister of the Reformed
Church. In 1578, at the recommendation of prince
William the First, he was appointed first professor of
theology in the recently founded University of Lyon.
His influence was of decided advantage to the
new institution, but his connection with it was of short
continuance. In 1579 he resigned his professorship, in
order to accept the pressing invitation of his former
charge to again become their pastor. There he spent
the remainder of his days, and died in 1618 at an ad-
vanced age. He wrote several works in Latin, of
which we deem the following most worthy of mention:
G. Feugueri prophetico et apostolico, i. et toxi divinae
et canonicae scripturae express, in locos communes rerum,
degnatas aut divinas exempla illustratorem, et
phrasis in scripturae familiarium, ordine alphabeticum Au-
gustini Marcelli adversarius (Lond. 1574); reprinted at
Berne in 1601, and at Geneva in 1624. A compendium
of it was published at Geneva in 1618)—Nomum Tur-
amentum Latine, ex versione et cum annotationibus Th.
Brose, praec. loci Additis ex Joachimi Camerarius note-
tiisibus, studio Petri Lodorei Villari, theolog. profess.
Genevese, et nunc postremo G. F. opera (Lond. 1587).

en verv. ; also Soermons, Acad. Regiat. bl. 82; Paquot,
frag. 178. (J. P. W.)

Feuillants (Feuillants, Congregatio beatæ Mariae
Fulennae), a reformed congregation of the Cistercians
(q. v.). Their founder, Jean de la Barrière, of the fam-
ily of the Vicomtes de Turennes, was born at St. Cère
in 1544, and finished his education at the University of
Paris. In 1562, when only 18 years of age, he re-
ceived the Cistercian abbey of Notre Dame de Feuil-
llans in commendam, and three years later took possess-
nion of it. Having received the income of the
abbey for eleven months, he entered the order himself.
His efforts to restore a stricter monastic discipline met
with the unanimous opposition of the officers of the
abbey, and he was even in danger of being assassina-
ted. He was charged at the chapter general held at
Citeaux with introducing innovations, but his defence
made so deep an impression that many of the assem-
bled monks placed themselves under his spiritual guid-
ance, and enabled him to carry through a thorough
reformation in his abbey. La Barrière and his friends
now suffered a great deal of persecution from the old
Cistercians; but their reformation was, in 1586 and
1587, approved by the pope, though they remained sub-
ject, with regard to such points as were not at vari-
ance with their new discipline, to the abbot of Citeaux.
Other abbeys were authorized to adopt the reformation
of St. Julian, and pope Sixtus V gave them the house
of San Vito at Rome, to which, after a time, was ad-
ed the house of St. Pudentians, and somewhat later a
beautiful monastery. In 1588 Henry III gave them a
monastery in Paris. During the civil war La Barrière
remained loyal to Henry III, whose funeral sermon he
preached at Bordeaux, but many members of the or-
der became ardent partisans of the Ligue. One of
them, Bernard de Montgaillard, became celebrated un-
der the name of "The Little Feuillant." By these
partisans of the Ligue, La Barrière was denounced as a
traitor to the interests of the Catholic Church. At a
chapter held in 1592, under the presidency of the Do-
minican monk Alexander De Francis, subsequently
bishop of Forli, he was deposed from his position, for-
bidden to say mass, and required to report himself
once every month to the Inquisition. A revision of
the trial by cardinal Baronius led, however, to the acquit-
tal of La Barrière. Pope Clement VIII fully dissolved
the connection of the new congregation with Citeaux,
placed them under the immediate jurisdiction of the
papal see, and commissioned six of the members with
framing new statutes. These new statutes provided for
the mitigation of some of the rules, the rigor of
which, it was reported, had caused the death of four-
ten members, and they received the sanction of the
Church in 1595. The congregation now spread in
France and Italy, and at its head in France was an ab-
ob elected for three years. As discipline again began
to slacken, pope Urban VIII in 1630 divided the con-
gregation into two—the French, called after Notre
Dame de Feuillants, and the Italians, the members of

which were called reformed Bernardines. At the head
of each was henceforth a general. Subsequently con-
siderable alterations were made in the statutes of each
(of the French in 1634, of the Italian in 1667). Among
the most celebrated members of the two congregations
belong cardinal Bona and Cosmus Boger. Joseph Mo-
ratius wrote their history (Cisterci ci refornmatis seu
Congregatio cisterci-Monasticarum B. M. Fulennae
in Gallia et reformatorum S. Bernardi in Italia
chronologica historia, Tur-
in, 1690).

The first convent of nuns according to the reformed rule of Feu-
illants was organized in 1588 at Montesquieu. It was subse-
sequently transferred to Toulouse. The chapters general held in
1595 and 1598 forbade the establishment of new con-
vents, but in 1602 the wife of king Louis XIII
succeeded in establishing
one in Paris. Ac-
cording to a bull of Cle-
ment VIII of 1606, these
nuns were to receive all
the rules of the congre-
gation of the Feuillants.

It seems that the congregation has become entirely
extinct in consequence of the French Revolution.—

FEVER 542

Fech, Mischakoros, l. 159; Wetzer u. Welte, Kirchen-
Lehr. iv. 61. (A. S.)

Fevers, the rendering, in the A. V., of the Hebrew יָדָה (Deut. xxvii, 22), and the Greek πυρος (Mat. viii, 14; Mark i, 30; Luke iv, 38; John iv, 52; Acts xxviii, 8). Both the Hebrew and Greek words are derived from the association of burning heat, which is the usual symptom of a febrile attack; the former coming from the verb יָדָה, to burn, the latter from πυρ, fire (comp. Aram. בַּשָּׁה from‎ ו‎שָׁה; Goth. biano, from ballun, to burn; L. fera, and our own fever, from ferre). In Lev. xxvii, 16, the A. V. renders "boiling heat," and in Ex. xii, 20, "burning嵊." The Greek word πυρ seems better, as it is not necessarily the intermittent type of the disease which is thus designated. In all Eastern climates febrile diseases are common, and in Syria and Palestine they are among the commonest and severest infictions under which the inhabitants suffer (Russell’s Aleppo, bk. v, ch. iii). They are especially prevalent in the vicinity of a hyperthermia (Thomson, Land and Book, p. 547). The fever under which Peter’s wife’s mother suffered is called by Luke πυρος πυρος, a great fever, and this has been regarded as having reference to the ancient scientific distribution of fevers into the great and the less (Galen, i. i. 11; fabr., i. 2; cf. Wetstein, in loc.), and as an instance of Luke’s professional exactitude in describing disease. His use of πυρος in the plural in describing the disease under which the father of Publius labored (Acts xxviii, 9) has also been adduced as an instance of the same kind, inasmuch as that disease, as being conjoined with dysentery, not a continuous, but an intermittent fever. To this much importance cannot be attached, though it is probable that Luke, as a physician, would naturally use the technical language of his profession in speaking of disease. In Deut. xxviii, 22, besides יָדָה, two diseases of the same class are mentioned, יָדָה דָשָׁת, a burning (A.V. “inflammation”), and יָדָה עַרְשָׁר, intense parching (A. V. “extreme burning”). The Sept. renders the former of these by πυρος, shivering, and the latter by ἰποθυγάμα, a kind of fever indicated by the Greek writers as the medicine to designate ὀφθαλμος Νατουρα irritamentum, quo sollicitata natura ad obvandas motiones excitatur” (Foeh, Oecon. Hippoc.). The former is probably the ague, a disease of frequent occurrence in the East; and the latter probably dysentery, or some species of inflammatory fever. The Syrian version renders it by TYRaining, which favors the latter suggestion. Rosen- miller inclines to the opinion that it is the catarrhus suffocans, but this is without probability. There is no ground for supposing it to be erysipelas. Fever con-
stantly accompanies the bloody flux or dysentery (Acts xxviii, 8; compare De Mandelo, Travels, ed. 1669, p. 65). Fevers of an inflammatory character are mentioned (Burckhardt, Arab. i. 446) as common at Mecca, and putrid ones at Jeddah. Intermittent fever and dysen-
tery, the latter often fatal, are ordinary Arabian dis-

eases. But though often fatal to strangers, the natives care little, but much dread a relapse. These fevers sometimes occasion most troublesome swellings in the stomach and legs (ii, 290–291). See Disease.

Fow, Ignatius A., a minister of the Methodist Episcopal Church. He was born in Columbia County, Ga., April 1791. About the year 1804 he was sent North to be under the care of his uncle, then resid-
ing in New York, for the benefits of a Northern edu-
cation. He was prepared for college by a Mr. Trapha-
gen, at Bergen, N. J., and afterwards went to Prince-
ton, but, instead of entering the regular college course, he spent his time learning music and French, dancing and fencing. After re-

Fichte 543

Fichte, JOHANN GOTTLIEB, a German philosopher, was born May 19, 1762, at the village of Rem-

New of York, and after prosecuting his studies there a short time he returned to Georgia. He commenced the study of law, but after his marriage, which took place in 1811, he gave up his legal pursuits, and settled down into the life of a planter, from which he was only aroused by an appointment as colonel of a regiment to repair to Saratoga in 1815. At the end of the war he returned to his studies with such intensity as to lose the neglect of his business and the loss of his property. In the year 1823 he removed to Augusta, and engaged in the practice of the law with flattering successes, but in 1824 he was attacked with hemorrhage of the lungs, and from this time the character and prospects of his profession, and never afterwards fully regained his health. At this period of his life a great change in his character took place. Heretofore he had been inclined to one or other of the forms of scepticism, but Fichte’s Appeal to Matter of Fact and Common Sense falling in his way, his scepticism was dissipated, and his heart opened to the influence of Christianity. In 1828 he was admitted on trial in the South Carolina Conference of the Methodist Episcopal Church. “Notwithstanding he was always an invalid from the time he entered the ministry, he performed a great amount of labor, and filled some of the most important places in the gift of his denomination. He was the projector, and for a time the president, of Emory Col-
lege, at Oxford, Ga., and rendered important service to the cause of education and sound morals.” The de-
cree of L. B. was conferred upon Mr. Fichte by the Wesleyan University in 1838. Dr. Few’s last public act was the drawing up of the report on the division of the Methodist Church, which was adopted by the Georgia Conference in 1845. The excitement pro-
duced by this effort was too much for his strength, and, though he partially rallied and lived long enough for the greater part of the year, his debilitated constitution sank at last, and he died in great peace at Athens, Ga., Nov. 21, 1845, and was buried in Oxford, the seat of Emory College. He left a widow, but no children.

—Sprague, Annals, vii, 729.

Fichte, A., a German philosopher, was born May 19, 1762, at the village of Remenau, near Bischofswerda, in Lusatia. The baron Milletz, struck with the promise of the boy, assumed
the charge of his education. At thirteen he was placed in the gymnasium of Schulpforte, and while there he imbibed (from reading Lessing) a spirit of free inquiry which animated his whole intellectual life. At eighteen he entered the University of Jena as a student of theology, and while there he seems to have adopted the philosophy and theology of Spinoza. But this" "spinozism" was generally taken out of him by the next four years. The death of baron Milletz threw him on his own resources, and privation added strength to his character. For a while he was tutor in a family at Zurich, and in 1790 he went to Leipzig, where he suffered greatly from poverty. "I have nothing," he wrote, "nothing." Kröckle, in his "Kritisches Reines Vernunft" (the Criticism of Pure Reason) brought a revolution in his mode of thinking, and freed his mind entirely from the remains of Determinism. "I now heartily believe in the freedom of man, and am well convinced that it is only on this supposition that duty, virtue, and morality is so much as possible. It is now evident to me that the doctrine of the necessity of all human actions is the source of a great part of the immorality of the so-called higher classes" (Letter to Achen, 1790).

In 1791 he went to Warsaw to fill a place as private tutor, but soon threw it up in disgust, and in the spring of 1792 he stopped at Königsberg to visit Kant (June, 1792). Not finding at first a very cordial reception, he wrote, between July 13 and Aug. 18, his "Kröckl's Türkei" (Curriculum Criticism of all possible Revelation), and laid it before Kant, as an introduction of "the Turks". Kant at first received him kindly, and, after some contemplation, gave him a letter to be sent to Paris in 1794. But at last he was driven away, and Kant refused the book. The book appeared in the spring of 1792, and attracted universal attention. It was everywhere ascribed to Kant, who was compelled to name Fichte as the author. In this way the "Kritik" became completely for himself. The work seeks to determine the necessary conditions under which revelation must be given by God to man, and to lay down the criteria by which every professed revelation must be tested. In October, 1792, Fichte was married, and took up his abode with his father-in-law (Hiels) at Zurich, where he spent several months. Here he published a work on the French Revolution (1798, 2 vols.), in which he advocated the modern principle that no political constitution can be unchangeable; and that the best constitution is that which is the most intense in the life of the principle of freedom, and provides a method for its own change and improvement. He was charged with Jacobinism and democracy on account of this work. In 1794 he became professor of philosophy at Jena, as successor of Reinhold. His lectures awakened great enthusiasm among the students; part of them were published under the title "Die Bestimmung des Gelehrten" (transl. by W. Smith, The Vocation of the Scholar, London, 1847, 12mo). In 1795 he published "Wissenschafllehre" (Doctrine of Knowledge), and in 1798 his "Stükenlehrre" (Doctrine of Ethics). The freedom and novelty of the doctrines taught in these lectures, together with the fact that he delivered many of them on Sunday (see below), brought upon him a charge of atheism, which he vigorously repelled in his "Appell gegen die Ablage des Atheismus". Nevertheless, he was compelled to resign his chair in 1799. He went to Berlin and delivered private lectures, which were very popular; and in 1800 he published "Die Bestimmung des Menschen" (transl. by Mrs. Simlett under the title The Destination of Man, London, 1846, 12mo). In 1806 he held the chair of philosophy at Erlangen for a few months. Between 1805 and 1807 he published "Wissenschaftslehre" (transl. by W. Smith, The Characteristics of the present Age, London, 1847, 12mo); and "Anleitung zum seligen Leben, oder die Religiöselehre", the most important of his later writings, as giving what he considered to be the ethical and religious results of his philosophy (translated by W. Smith, The Way towards the blessed Life, or the Doctrine of Religion, London, 1849, 12mo).

Returning to Berlin in 1807, he published "Reden an die Deutsche Nation" (Address to the German People), which awakened great political enthusiasm. On the death of the government, he assumed the control of the philosophical society of Berlin, and during the next two years he was engaged in reorganizing the University of Berlin, and in 1810 he was made rector of the university, which then included among its faculty Schleiermacher, Neander, De Wette, Von Humboldt, and other brilliant names. During the subjection of Germany to Napoleon, much of Fichte's work was burned; but his patriotism was pure, fervent, and self-sacrificing. After the great battles of 1813, the hospitals were filled with wounded men, and his wife was an assiduous and devoted nurse. She was seized with typhoid fever early in 1814, and her husband imbued the infection from her; she recovered, but he died, Jan. 27, 1814. His son, Immanuel Hermann (born in 1797), inherited his father's aptitudes to a certain extent, has edited his works, and has also vindicated him from the charge of atheism and irreligion. Besides the works of J. G. Fichte, there are many others which are mentioned.A. Kröcke (Jena, 1767-9, 2 parts)-Die Thoasen des Bevrauien (Stuttgart, 1817). The following were edited by his son after his death: Nachgelassene Werke (Bon, 1834, 4 vols.)-Religions-philosophische Schriften (Berlin, 1847).-Populärphilosoph. Schriften (Berlin, 1807).-Briefwechsel mit Schelling (Stuttgart, 1866).-J. G. Fichte's Sämtliche Werke (Berlin, 1845 sq. 8 vols.).

We can give only a summary view of the attempts of Fichte to found a complete philosophy. Historically he stands between Kant and Hegel, and forms the connecting link in the process of development. The end which Fichte proposes to himself in his "Wissenschaftslehre" is to give science a true, that is to say, an absolute principle, reposing only upon itself, and leaving a basis to all the rest. Here the idealism of Kant is accepted in all its rigor. There is no longer any a priori supposed objective elements external to the simple phenomenon. All is severally deduced from the subject, the sole term of knowledge admitted by idealism. Fichte's problem is just this: to bring out philosophy whole and entire from the Ego; and this is brought out in bold theatre proposes to give his doctrine a more than mathematical, a metaphysical attitude. Algebra is reduced to the law of identity, which is thus expressed: A = A. Fichte maintains that this law implies another, the only one which a philosopher is entitled to admit without proof, and also the only one which he requires: MnM = Mn. When ab = ac, you intend to say something nothing upon the existence of A. You only affirm that if A is A, A can be nothing else than A. The proposition A = A is therefore, says Fichte, absolute only in its form, and not in its matter or contents. I know not if A exists practically and materially or not; but it matters not. I am formally certain that given A, A cannot differ from A, and that there is necessary relation between these two terms. It is by the analysis of this relation that Fichte undertakes to prove the existence of Ego. In the proposition A = A, he argues, the first A is not considered under the same point of view as the second. The relation A = A is laid down conditionally, the second absolutely. What reduces these two terms to unity, puts them in a certain relation, judges, affirms, and constitutes this relation? Evidently the Ego. Take away the Ego, and the relation A = A is reduced to the letter; the relation A = A, the proposition A = A. Above it, then, there is a higher and more immediate truth. The principle of identity is only absolute in form; the principle MnM = Mn is absolute both in form and matter; it alone is truly absolute. I need not follow Fichte in the course of his deduction, the most subtle and artificial which can be
conceived. It is enough for me to know that he pushed to the utmost the strange idea of deducing a vast sys-
tem of philosophy from this one principle, the Ego. The
Ego alone is the principle, explaining, laying down, creating itself. I know not whether I should wonder more at the excess of extravagance to which
the man was led, for the first time, at the amazing
richness of its resources. By Kant it was condemned
to be ignorant of the universe and of God, locked up
in the prison of the Ego. Let him alone. This one
reserved point will give him back all the rest. From
the furthest limits of skepticism he will even pass
to the place of truth, if he only dare, and be not afraid
he doubted of everything. Now he vaunts, not merely
that he knows Nature, but that he creates her. Nay,
he vaunts that he creates God. Such are the very
expressions, at once absurd and logical, of Fichte.
He draws in the State and God from the Ego. The Ego
implies the Non-Ego. It limits itself. It is only it-
self by opposing to itself another which is not itself.
It poses itself only by opposing its contrary. It is it-
self the link of this opposition, the synthesis of this
anomaly. In fact, if the Ego only exists for itself,
the error is still too great to be in which the method
assumes that, in itself, it is infinite and illimitable. Beyond
the divisible and relative Ego, opposed to the Non-Ego,
there is, therefore, an absolute Ego, comprising nature
and man. This absolute Ego is God. Here, then, is
thought in possession of its three essential objects;
how can it be doubted that he draws in, into this all,
the possession of them, members of one identical thought, with
three terms, at once separated and reconciled; here is a phi-
losophy worthy of the name; a rigorous, demonstra-
ted, homogeneous science, starting from one great
principle to follow out and to exhaust all its conse-
quences.

"Such, in its general principle, is the metaphysics
of Fichte. His morality is a logical, though perhaps
unforeseen consequence of this. It is founded upon
the Ego, whose eminent characteristic is liberty. To
preserve one's own liberty, one's own Ego is due. In
respect to the Ego, the liberty of others, is another not less
sacred duty which becomes the foundation of right.
Hence the noble stoicism of Fichte, and that passion
for liberty, which were in such perfect harmony with
the masculine strength of his character and the gener-
onal enthusiasm of the student body in the political affairs of
Germany. But the importance of the system of
Fichte does not lie here. I find his greatness and
originality in the extraordinary metaphysics so justly
and boldly called by himself subjective absolute ideal-
ism. It has this singular feature, that in pushing the
absoluteness of the Ego to the extreme, he does not give
up the existence of an absolute reality; but the idea of God as a particular substance is
impossible and contradictory. It is proper to say this
candidly to strike down the prating of the schools, so
that the true religion of doing right cheerfully may be
elevated.' Many plous minds, of course, took offence
at these exalted claims. All the same, how can the
name of Fichte be connected with this moral order of the
world, the Christian's faith in God, a faith, too, in 'doing right cheerfully,'
and at the same time in a real God, could by no means
be content with this philosophical theory. 'This faith
would not, however, have been destroyed by this the-
ory, even if no interdiction had been issued against it.
Such an interdiction appeared. The book in which
Fichte advocated the theory of the divine order of the
world was attacked in the electorat of Saxony, and
from this place the attention of the court at Weimar
was called to that anger of Fichte's, and to the
in its enormous frameworks the history of man and
that of nature, and pretends to an unmeasured, un-
reserved, and universal explanation of all things" (Sais-
set, Modern Germanism, Edin, 1863, ii. 2 sq.)

On the relations of Fichte's life and works to theo-
dracy, I may venture to say so, from the sub-
jective to the objective by the subjective itself. From
absolute scepticism he flings it into an enormous dog-
matism. Setting out from a teaching so timid that it
scarcely ventures to affirm one actual being, it is the
prerogative of that ambitious philosophy which imbues
in its enormous frameworks the history of man and
that of nature, and pretends to an unmeasured, un-
reserved, and universal explanation of all things" (Sais-
set, Modern Germanism, Edin, 1863, ii. 2 sq.)

of Christianity, which he regarded in a light entirely different from Kant. Kant and the Rationalists placed the essence of Christianity chiefly in morality and the fulfilment of the moral law, and, in accordance with this, esteemed and used with a special predilection those passages in Scripture in which the various moral precepts are drawn in distinct outlines, as, for instance, the Sermon on the Mount. Thus, the form of Jesus in the first three gospels (while they had no taste for John, who appeared to them a mystic); Fichte, on the other hand, threw himself on the fourth gospel, and regarded it as the only true source of the genuine doctrine of Christianity. Of course, this was a one-sided manner, and with a denial of the other truths of Scripture, which belong fully as much to the totality of Christian doctrine and history as the gospel of John. . . .

The person of Jesus had with him a signification entirely different from that of the Rationalists. He does not behold him in the teacher of morality, nor simply the moral example. No; exactly that oneness with God, as Christ expresses it in the gospel of John, exactly that real unity with the Father which the Rationalists desired to remove as a metaphysical formula of no use to morality, was to him the heart and the soul of Christianity. He saw in the consciousness of this oneness with God, and himself so closely to John and his doctrine of the Logos having become flesh, in which he beheld the fulness of all religious knowledge. We should, however, make a great mistake if from this we concluded that Fichte again identified himself with the of the Logos. He never identified himself with the idea of the Logos. What this doctrine regarded as a historical fact, which had occurred once, that Fichte regarded as a fact eternally repeating itself, as occurring in every religious man. Christ was not the Saviour to him in the old sense; he was only the representative of that which is continuously occurring still. 'The eternal Word becomes flesh at all times, in every one, without exception, who understands, in a living manner, his oneness with God, and who really yields his entire individual life to the divine life in living . . . quite in the same manner as in Christ Jesus.' . . . In the house of the distinguished philosophers, each of whom had without exception, was closed with proper and solemn evening devotions, in which the domestics were also accustomed to take a part. After several verses had been sung from a choral-book, accompanied with the clavicord, the sermon on the text would make some remarks on some passage of the New Testament, most frequently on his favorite gospel of John. In these discourses he was less concerned about moral applications and rules of life than about freeing the mind from the distraction and vanity of the common affairs of life, and elevating the spirit of man. Fichte, not the Logos, but the eternal Word as closing what he calls the period of reflection in philosophy by his theory of absolute subjective idealism; and holds the later form of Fichte's teaching to be Spinozistic, as denying the idea of a self-conscious God distinct from the world (Person of Christ, Edinburgh, transl., div. ii, vol. iii, 85 sq.).

FICHE 545

FICINUS, MARIUSIT (Marino Ficino)—the principal restorer of the Platonic philosophy, and the most enthusiastic of its modern advocates—was born at Florence Oct. 19, 1438, and died at his villa of Careggi, in the neighborhood, Oct. 1, 1499. He was the son of the chief physician of the town, and was designed for the same profession; but his youthful intelligence attracted the great Florentine, and induced his selection as the prospective head of the projected Medicean Academy. During the sessions of the Council of Florence, Ficinus, of course, did this in a one-sided manner, and with a denial of the other truths of Scripture, which belong fully as much to the totality of Christian doctrine and history as the gospel of John. . . .

The person of Jesus had with him a signification entirely different from that of the Rationalists. He does not behold him in the teacher of morality, nor simply the moral example. No; exactly that oneness with God, as Christ expresses it in the gospel of John, exactly that real unity with the Father which the Rationalists desired to remove as a metaphysical formula of no use to morality, was to him the heart and the soul of Christianity. Of course, this was a one-sided manner, and with a denial of the other truths of Scripture, which belong fully as much to the totality of Christian doctrine and history as the gospel of John. . . .

The person of Jesus had with him a signification entirely different from that of the Rationalists. He does not behold him in the teacher of morality, nor simply the moral example. No; exactly that oneness with God, as Christ expresses it in the gospel of John, exactly that real unity with the Father which the Rationalists desired to remove as a metaphysical formula of no use to morality, was to him the heart and the soul of Christianity. Of course, this was a one-sided manner, and with a denial of the other truths of Scripture, which belong fully as much to the totality of Christian doctrine and history as the gospel of John. . . .

to and Aristotle, and the evident aim of Ficinus was to impose upon Plato and the Neo-Platonists a significance which might identify, or at least harmonize, their doctrines with the Christian creed. It was a pre-posterous revival of a design fruitfully attempted at Alexandria in the age of Origen and his successors. Paulinus, the Gallican, who was anti-papist in his experiments with Christianity, whether presented as Neo-Platonism, as Spinozism, or as German transcendentalism. But it was a natural effort in that era of confusion and hopeful anticipation which witnessed the Renaissance. Moreover, the doctrines of Ficinus himself are masterfully moulded and modified by the contemporary influence of Christianity; and it is a curious taste to detect the Christian impress which marks so much of his astruse metaphysics, especially in the closing books of the last 6. ed. It is scarcely possible to read the concluding epistle of Ficinus and feel, without the hallucination of Ficinus was an honest as well as an earnest delusion; and that, if he misrepresented both Plato and the Alexandrian school by Christianizing their doctrine, he did not suffer himself to be seduced from a recognition of the personality of the Supreme Being, or into any position consciously at variance with the Christian creed.

Ficinus was liberally maintained throughout his life by his generous patrons of the house of the Medici, retaining their favor for three generations—v. d. p. r. n. d. Plutus. He was equally countenanced by Cosmo, Pietro, and Lorenzo. He had to border in the forty-third year of his age, having, according to some accounts, had his thoughts earnestly directed to religion by the preaching of the celebrated Savonarola. He was placed in charge of two churches in Florence, the church of San Lorenzo, and promoted a canonry in the cathedral by the future pope Leo X. Lorenzo made him a present of the villa of Careggi, where he died, seven years after the death of the donor, and five years after the expulsion of his patrons from Florence. His constitution was always very feeble, his health precarious, his robust frame weakened; his health, his frame affected by the ordinary disease of the time—required constant care and nursing, and it is surprising that he was not worn out by continual study long before reaching his climacteric. His character was singularly pure and amiable; his attainments were strong and enduring; his tastes simple, and his desires moderate. He refused to profit by his powerful connections to enrich either himself or his family. He partook largely of the popular superstitions of the time, which were accordant with the tenets of the Platonism with which he imbued himself; and it is said to have reappeared after death to his friend Michele Mercati, according to promise, to assure him of the immortality of the soul.

The Medicean Academy was extinguished by the invasion of Charles VIII.; but Ficinus had disseminated his influence and renown through the chair of philosophy in the University of Florence, to which he had been appointed by the Cardinal de Medici, afterwards Leo X. Here he acquired many distinguished pupils and friends, among them Giovanni Pico di Mirandola, Cavalonio, Politian, etc. Enthusiasts came from the depths of Germany by a path which he himself had trod. Reuchlin regarded him with reverence, and among other illustrious admirers he numbered Matthias Corvinus, the accomplished king of Hungary, and pope Sixtus IV.

The numerous productions of Ficinus are enumerated by a most correct list given in the Biographie Universelle. A life of him was written by Domenico Mellini, but it was never published, and it disappeared. Another life, composed by Giovanni Corsi in 1506, was published by Bandini (Pisa, 1771). The best account of the philosophy of Ficinus is given by Buonarroti in the De_multiplier Praematuritate; the following authorities may be consulted: Schelhorn, Annaliuaria Lit. tom. i; Niccione, Mem. des Hommes Illustres; Negrii, int. Scritti, Firenze, 16, lib. vi, p. 498; Metzchen, Polyhistor, ii, vii, § 15; Tirobascio, Storia della Lett. Ital. v, ii, lib. ii, c. xi, § xii-xxi; Brucker, Hist. Cril. Phil., phil. iii, pt. i, lib. i, c. ii, § iii; Roscoe, Life of Lorenzo de Medici; Hallam, Hist. Lit., ch. iii, §§ 85-115. (G. F. P.)

Fiddes, Richard, a clergyman of the Church of England, and author of several works marked by industry and research rather than talent, was born at Hunmanby, Yorkshire, in 1671. He took his bachelor's degree at University College, Oxford, in 1693. He was made rector of Halsford in 1694, but, losing his health, he withdrew to himself to authorship. Among his works are, A Book of Divinity (London, 1745, 8 vols.; fol.)—Fifty-two practical Discourses (London, 1714, 8 vols. 8vo)—Life of Cardinal Wodey (London, 1724, 4 vols.; fol.).—General Treatise on Morality (London, 1724, 4 vols.). He died at Putney in 1725. Knight, in his Life of Erasmus (Intro., p. 15 sq.), accuses Fidewis of being at heart a Romanist. Knight accounts for Fidwis's speaking irrevocably of Erasmus as probably because he had by his writings favored the Reformations. Dr. Fiddes censures the Reformation; and, to give it the more home stroke, goes to the very root of it, and does all he can to evince the unjustness of it. If it proceeded upon, ridicules the instruments of it, and would insinuate that there was a change made for the worse, and therefore palliates some of the most absurd doctrines of the Church of Rome, which were happily thrown off at the Reformation. He afterwards goes further, ascertaining, among other particulars, that Fidwis had "most partially, and indeed scandalously, reflected upon the opening of the Reformation, laying on the grossest colors to hide the deformities of heresy." He then proceeds "to give the true rise and occasion of writing of her"—which he declares to have been at the solicitation of the late bishop of Atterbury, on occasion of the dispute in which he was then engaged with archbishop Wake.—New General Biog. Dict. v, 323.

Fidelis, see Fidelis, st., properly Marcus Roy, was born at Sigmaringen in 1577. He studied law, and in 1604-10 visited the principal cities of Europe, but on his return he quitted his profession, and entered the order of the Capuchins under the name of Fidelis. After studying theology in the convents of Constance and Frasen, he was ordained, and in 1621 obtained charge of Feldkirch, in Vorarlberg, Tyrol. Here he labored with great success, trying to re-establish the sway of the Roman Church among the Grisons. When Austria afterwards attempted to put down Protestantism by force of arms, Fidelis was sent by the papal legate of the Propaganda, and the ruffian general Baldiron, with his dragoons, travelled from town to town exterminating those who refused to obey. But the peasants rose, defeated Baldiron, and only spared his life upon his taking the oath not to bear arms against them any more. The promise was soon broken; but the peasants rose again, and during the insurrection, Fidelis, having fallen into the hands of a party of peasants, was put to death, April 24, 1622. He was canonized by Clement XI.—Hernag. Real-Encyclop. iv, 468.

Fidelium Missa, a Latin Mass composed by the Pope of the Fidelis, under the Arcivesc Diocesano (q. v.), the cardinals were not permitted to partake of the Lord's Supper with the
faithful (q. v.): they were allowed to join with them in worship only until the offertory. Then the deacon gave each the holy communion in the catechetical church, saying Illo, missa est," Depart, the assembly is dismissed." Hence arose the twofold missa, namely, the missa catechumenorum and the missa fedelem, the former meaning that portion of the public worship which was performed before the distribution of the communion, and the latter that portion which was continued until the communicants went away.—Bingham, Orig. Eccl. bk. xiii, ch. i, § 8; bk. xv, ch. i, § 1; Farar, Dictionary, s. v. See Mass.

Fief, Feud, Feudalism: Feudal System, which was often related to the peculiar organization of society in Western Europe during the Middle Ages, and specifically to institutions affecting real estate more profoundly than it has ever been affected by any other—institutions whose influence is still manifest in the language, doctrines, and procedure of law throughout Christendom. A fief, food, feud, or fee is an estate—and, primarily, an estate in land—held of a superior on condition of the faithful discharge of prescribed services, chiefly military. Feudalism denotes the essential character of such an estate, as distinct from other such estates, and is frequently employed in a concrete sense to signify the organization itself and its accompaniments. The Feudal System is the name given to this organization, or to that body of institutions, political and social, established upon the military tenure of land, to give the rising kingdoms of modern Europe. In the period of its incipient growth, in its maturity, and in its decline, the feudal system, like all other political arrangements, assumed diverse aspects, and assimilated to itself other coincident tendencies, but its identity may be discerned through all its manifold transformations. Its existence has been distributed by Sir Thomas Craig into four periods: I. From the barbarian invasions of the Roman empire to the reunion of the Frank monarchy under Dagobert I in 688: II. To the restoration of the Western empire in the person of Charlemagne in 800: III. To the accession of the Capetian dynasty in France, and of the Franconian line in Germany: IV. From the commencement of the 11th century to the gradual extinction of the polity at different times and in different degrees, in different countries. This division has not been universally adopted, but it is open to many objections, but it may be of service. The culminating era of feudalism may be assigned to the times of the first crusade, and to the early ages of chivalry which constituted its bloom and expedited its decay.

A description of the principles and phenomena of the feudal system will furnish all necessary information in regard to the other terms included in this title, so far as these illustrate the religious, moral, and social aspect of Europe during the period over which feudalism extends.

Under the feudal system the whole order of society rested directly on the tenure of land by military service. Territorial possessions were granted by the sovereign, or supreme lord, in consideration of prompt and gratuitous service in war, and participation in his deliberative and judicial courts. Lands were held of the prince to whom they were annexed, by lesser barons, by similar obligations. By the like service, lands were held by vassavors, knights, and squires. Even the lowest tenure of all, the peculiarly English tenure of socage, frank and villein, was of an analogous character, and formed the culminating stage of the lord’s domain, and the maintenance of himself, his family, and retainers, in war and peace. The system was strictly military in its nature—a uniform organization from the crown to the lowest landholder, establishing a regularly appointed army in scattered strongholds throughout the land, to ensure the support of the whole body politic in arms for the repression of domestic insurrection and the repulsion of foreign attack.

Though such was the feudal system in its definite constitution, it did not, of course, begin in this closely articulated and rigorous form. It assumes much of this aspect even in the Lombard occupancy of Northern Italy in the 6th century; and its general outline may be imperfectly represented in the organization of the kingdom of Theodoric (Sartorius, lEmples dItalie sous les Goths, v, 61). But it had a simpler commencement, and both expanded and modified itself with the changing necessities of successive generations. It is in its rudimentary types, however, that its essential principles, and its singular relation to urgent social conditions, can best be detected. Inattention to its humbler beginnings has occasioned numerous controversies with regard to its origin, and rendered the information accessible on the subject often perplexed, contradictory, and un instructive.

The vital germ of feudalism is contained in the act of homage—homagium, hominimum, hominomium, hominimium, homininum, etc.—the solemn formula by which a dependent professed himself the man and faithful adherent of a superior, originally of his own selection, or that of his predecessor, and also of the kingdom. The yoke of homage in se constituit feclitatem," Libri Feudorum, ii, vili. The liegeman knelt down, placed his hands between the hands of his intended chief, and took upon himself the obligation of absolute fidelity in certain prescribed relations, so long as his superior performed the corresponding obligations of his liegeman. The yoke of homage was sealed with a kiss, and confirmed with the sanctions of religion (Galbert, Vie de Charles-le-Bon, de Flandres, ch. xii; Guiot, Mm. pour servir, etc., viii, 339-40). The profession of fidelity was ultimately expressed by the following declaration in the presence of the liegeman and chief: "Domine homo vester de tene mento quid de vostra tenere et videm robis portando contra omnes gentes, salva fide debita Domino Regi et hereditibus suis" (Bracton, ii, xxxv, 8; Libb. Feud. ii, x). With this declaration should certainly be compared the statement of Procopius in regard to the ancient usage under the Roman empire (De Bello Vandal. ii, xvii, vol. i, p. 491).

Homage, then, was the pledge of true and loyal service to a superior—liege faith and liege obedience—given in consideration of defence and maintenance, and the promise of certain rights and concessions. (Somme, ingennam," a free man, Leo Socle, xxxii; see Du Cange, Gloss. Med. et Inf. Latini, tit. Ecco, who omits in his classical authorities for the word, Petron. Satyr. iii). One man voluntarily became the man of another, and that other became the chief, leader, adviser, patron, and protector of his liegeman. The very existence of the system, and the long, and long retained, the right of formally renouncing the reciprocal obligations contracted by the process of disfidelatio, or defiance. By carrying this relation of perfect trust and faithful dependence through all gradations of society till it reached the head of the tribe or nation, the whole feudal hierarchy was constructed, and all the members of the associated body were linked together in strict military union and subordination.

The principal object of this close correlation of the constituents of society was to maintain the population and other affairs of his chief. In this way, every man within the feudal circle was professed the faithful follower of some lord—except the chief lord of all—the suzerain; and every piece of land was held in fee of some feudal superior. Hence arose the doctrine that the eminent domain was the whole realm as related to the king, and that all honor, authority, and ownership of
the soil descended from him. Hence, too, the maxim of the English law, nulla terra sine domino—no estate in land without its lord. But these deductions were not drawn by the companions of Ataullip the Visigoth, of Clovis the Frank, or of Alboin the Lombard.

When a feudal scheme is extended and the military tenure of land are not necessarily, though they are usually connected. They have existed separately, but they coalesced in the Middle Ages, and engendered by their conjunction what is so familiar under the name of the feudal System.

When the feudal system was introduced in the Middle Ages, and was engendered by their conjunction what is so familiar under the name of the feudal System.

mately merged into serfdom, it is true, but only by Justinian's edict of 580 (Cod. vii. 8); and the term is plainly metaphorical in Salvian.

Wherever the Teutonic hordes passed the frontiers of the Roman Empire, they found the presence or the memory of the Milites Limitarii, whose constitution, traceable beyond the reign of Augustus, accorded with all the essential characteristics of undeveloped feudalism. These military borderers were, indeed, of kindred blood and race, and when they were supplanted or overlapped by the Teutons, the institutions they retained, which had been designed as a protection against incursion. This was only the observance of the habitual policy of the barbarians in regard to the Roman civilization.

As has been already observed, the feudal scheme, like all other imperial forms, was contracted or extended, weakened or strengthened, according to the changes of fortune and social condition which checked the agitated and anxious periods attending the overthrow of the Western empire. At times it was as much disguised and concealed, as largely reconstituted with Teutonic associations, as was the ever-subexisting Roman jurisprudence during the same ages. But it survived in spirit and in outline, ready always to multiply its ramifications, and to attain such proportions as contemporary necessities might induce. It is thus that the nature, and extent, and perpetuity of the obligation decline, regard during the earlier centuries of its growth, and that its origin is so often referred to the late era when it became predominant and universal as the sole corrective of returning anarchy under the feeble successors of Charlemagne.

It is impossible, within the space at command, to recount and explain the successive transformations of feudalism which culminated in the perfect type of the feudal system in the 9th, 10th, and 11th centuries. Its development accompanied and was due to the progressive dissolution and increasing ineptitude of the complex administrative organization of Imperial Rome. A distinction of ages and a contradiction of institutions have been suspected in the succession of the terms munera, beneficia, and feuda; and feudalism has been restricted to the period when the last of these designations prevailed. Munera is supposed to represent estates at will; beneficia, estates for life; and feuda, estates of Inheritance. It has been assumed that feudalism could not properly be said to exist until beneficia became hereditary. But the essence of feudalism does not reside in the duration of the estate, but in the nature, and extent, and perpetuity of the obligation connected with the tenure. Moreover, the contrasted terms may be in some measure concurrent with, but they do not denote, such diversities of duration. Munera is a generic term applied to all honors, dignities, offices, and donations. There was no such clear line of demarcation, in meaning or in time, as Montesquieu and others imagine, between estates for life and estates heritable. Such precision was entirely foreign to the habits and the dispositions of those troubled but practical ages. Life estates were conceded in Germany as late as 1578. The common statement of hereditary feuda is often referred to Hugh Capet, in 947. Montesquieu assigns it to the reign of Charles the Bald, in 877. But such tenures are found under Louis le Debonnaire in 814; and in the form of beneficia they were customary under the Roman empire. Estates in perpetuity are, indeed, as beneficia and feuda have been used as convertible terms throughout the Book of Feuds. "Feudum idem cum beneficio," says Du Cange (s. v., p. 586, col. 1). King Alfonso the Wise, of Castile, declares in Los Siete Partidas: "Feudo es bene-

"Feudo es bene-

"fecho que se da al señor a algunha forma, porque se torna en cuasido, et le dexe homenary de serie real. E tomo este nombre de fe que debe siempre guardar el vasallo al señor." The term feudum is a barbarous, and probably hybrid compound, one term of it representing the first employment in Latin of the name of a constitution of Robert I of France in 1008, though it is found in a constitution, of somewhat doubtful authenticity, of Charles the Fat, in 884. Were there no fees antecedent to the introduction of this name? If there were, then beneficia are fees. If there were not, then feudalism was, of course, already established. The confusion has proceeded from the fantastic derivation of Food, from the supposed Teutonic word Fora, represented by the Anglo-Saxon Fea, Fesc, fee, and the Scandinavian od, odh, property. Unfortunately, feudalism was too real and too partial innovation among both Anglo-Saxon and Scandinavians, while the term Feudum springs up along the Rhine; and the Anglo- Saxon Fesc is congeners to the Latin pecus—pecor- is—if not borrowed from it. The in the Fox, the Spanish and Provençal For, the modern French ess, the Scotch ess, apparently nothing to do with the Latin fide or Italian fide. "Feudum, credo, a fide, quia vox ex Italia in Germaniam venit. Et ante seculum vii seuda in Germania et apud omnes Frumentos beneficia appellabantur" (Leibnitn, Collect. Etymolog. Opp. ed. Dutens, tom. vi. pt. ii., p. 68, 99). "Natura autem imperii est quod frumentum in terris vestris, non ex quaelibet aut quaque bene aut quaque in quaque, sunt, quam a fide sanctum dicatur vel a fide" (Lobb. Feud. ii. iii. 3; compare vii.). This derivation of the term Food is singularly corroborated by the use of the word "trague" in Sir Thomas Malory's Morte d'Ar- tur: "And thus Sir Marhans every day sent unto king and trague into the same trague which was behind ten seven years, or else to find a knight to fight with him for the trague" (pt. ii, ch. iv. Romance of Sir Tristan). It is indubitable that feudal tenures long existed in the midst of Roman fundi and possessions, and of Germanic allotments; it is also unquestionable that these were gradually absorbed or transmuted into feudal tenements, for the conversion of allotment into feudal holdings is illustrated by ample documentary evidence; and it is also certain that this feudalization of the land was not completed till the times when the word Feuda comes into daily use. But this is not to justify the juridical distinctions which have been proposed, nor sanction the alleged derivation of Food, nor sustain the Germanic origin of the tenure. The designation of Feudum may well have been devised as a counterpart to allotum; but the generally received etymology of allotum is very unsatisfactory, and strong arguments may be adduced for referring it to the same source as the common English word lot. This question, however, cannot be examined here. (Compare Kembille, The Saxons in England, bk. i., ch. iv. vol. i. p. 90, 91, with Prosopon, De Bell. Vandal. i. v, in regard to the Kingdom of Gascony.)

In the 10th and 11th centuries the feudal system acquired its widest extension, assumed its full, symmetrical form, and engrossed nearly all the functions of government, judicature, police, war, and industrial organization. It cannot be described within the attenuated framework of the Roman administrative constitution (which, however, coexisted with it), and adapted itself to it by making the king the feudal suzerain of the nation—the emperor, the supreme temporal head of Christendom. Everything accepted and confirmed feudal tenures and feudal established feudal tenure, and but did suffer a sea-change? The process of government, the public revenue, the offices of state, the modes of jurisdiction, the command in war, the ecclesiastical constitution, the municipal arrangements, the guilds and corporations of arts and trades, the feudal system remained, but did suffer a sea-change. Everything rested on homage, fealty, and the military tenure of land, or was assimilated to the forms springing from that basis. As in the Russian empire, all
office or authority is invested with a military charac-
ter and designation, so everything under the feudal
system adopts a feudal type. To this cause we must
attribute the ecclesiastical baronies which arose during
the period, and also the priestly warriors, the fighting
abbes, and the knightly bishops, who inspire such
surprise and disgust during the Middle Ages. The
Roman Church, with the pope at its head, was the
principal instrument for this purpose, but the secular
empire of Germany, and contending for a loftier
supremacy. The ecclesiastical organization became
baronial and feudal throughout all its provinces and
dioceses, as the counterpart and counterpoise of the
feudal kingdom, and the empire, and, in fact, under the
acknowledged but disregarded suzerainty of the holy
Roman empire. No other scheme, no idea inconsis-
tent with the prevailing scheme, could be entertained
among populations saturated with feudalism, and en-
vironed with its universal atmosphere. How thor-
oughly the Church had accepted the general feudal-
sation is shown by an allocution of pope Innocent II
to the Lateran Council, April 20, 1139: "The pontifical
thrones is the source of all ecclesiastical authority
and dignity; so that every such office or dignity is to
be looked on as a "fool of the Holy See, without which
enjoyment no such office can be lawfully exercised or
enjoyed" (quoted by Greenwood, Cathedra Petri. b. xii. ch. 1).

By this process, infinitely diversified, though ever
essentially the same, society was slowly reconstruc-
ted and reconstituted, in every respect, and its
wretchedness, and foreign peril from new swarms of
worthless assailants. The elements and forces of a new
civilization were thus collected and harmonized, and
were recombined into a uniform and coherent system
on the simple basis of fidelity between man and man.
Ancient paganism had died out, and universal sceptic-
ism had supervened before the new religious faith
which was to regenerate the world had been accepted
by minds still largely tainted with heathenism. All
human trust had been betrayed and dissipated; all so-
cial ligaments had been coroded or ruptured; all de-
pendence upon government, law, and public force had
been deceived and outraged; and yet—conscientious-
ly with the introduction of a new religious creed, and
of fresh races to maintain that creed (Salvian. De Gu-
bern. Dei Aust. Augustius, Civitas Dei)—the seeds of
memory remained, and found their way, and reenforced
the charges, and retouched the culture of the soil,
organized the nations, and inaugurated a new series of
the ages by introducing loyal faith between lord
and vassal, and the honorable protection of the weak
by the powerful. The political renovation thus ran
parallel with the spiritual transmutation, deriving life
and sustenance from each other, and supplying each even
containing its influence, and confirming its dominion even while con-
taminating its morality by the infection of worldly
interests and passions. Though the feudal order nev-
er realized in practice the ideal which it function sug-
gests—what human institution has ever done this?
when it neither has the divine mission, nor the actual
manifestations, yet the strong and rare eulogies be-
stowed upon it are fully justified by the inestimable
services which it rendered to the nations during the
millennial agony of humanity. High, indeed, must
be the empire which prevails over a condition of men
from such antipodes as Montesquieu and De Maistre,
and
make the former proclaim his conviction that "the
feudal system was the best-constituted government
that ever existed upon earth," and the latter declares
that "feudalism was the most perfect institution
that the universe has seen." The criminations which
have been so bitterly, and not altogether unjustly, directed
against the feudal spirit, are applicable to its decline,
when it had become an incomparable service to man-
kind, and had become an enorring and charming
amid the enlarging industry, the augmented intel-
ligence, and the aspirational aspirations which its long du-
rion had cherished and trained.

Montesquieu boasted of closing his discussion of feudalism in
his Jansenist and Catholic countries, and v pipes overlooked its true antecedents and characteristics.
From this notice nearly everything has been excluded
which is repeated in familiar or accessible authors;
or has the associated topic of serfs and serfdom been
noticed, as it presents an occasion for extended and
independent consideration.

From Blackstone, Robertson, Hallam, etc., may be
learned the habitual organization of nations during
the maturity of the feudal system. From authors of
a like character may be pleasantly ascertained the ro-
manic and contemplative tendencies of feudal
ments of feudalism, the Crusades and Chivalry—"a
gilded halo hovering round decay." From similar
sources may be drawn all needful information in re-
gard to the various species of fees or fees, and to what
are called feudal incidents. These incidents attached
and were applied to every feudal case, in a general way;
1. The feudal tenures. 2. The feudal constitution,
and the individual. 3. The feudal privileges and
3. The feudal castes. 4. The feudal war.

 Authorities.—To give a list of authorities for such
topics as Fief, Feudalism, Feudal System, would require
the enumeration of volumes sufficient for an extensive
library. It may suffice to note here some of the prin-
cipal works connected with the subject, a few of which
have been referred to and the remainder which have
never been seen by the writer:—Codex Theodosianus
(ed. Gothofredu); Corpus Juris Civilis (ed. Gothofre-
du); Basilica (ed. Heimbach); Baluzii Capitulatio-
—more complete and satisfactory edition is found in
Hart, Histoire.; Libri Fidorum, cum commentationes
J. Cujaceli; Foucher, Antiquités; Lirey, Des Fiefs;
Begnot, Annales de Jerusalem (very instructive
extracts from this text are given in Cantu, Hist. Uni-
verselle, vol. ix. append. A); Leporey, Histoire-
uelle et allemande de Litt. Fidorum; Marcelli Faur-

Origen of the Inns and Institutions of Modern Europe;
Equitable Jurisprudence of the Court of Chancery, vol. i.
Field (usually Readable as, in the text:  sadeh; [poetic 'sic' of: sadok],  ḏāyūs; but occasionally  ʾeʿrets,  ʾland [Chald. ʿor, open country], ḥūṣain; ʿarēn, out-door; ʾabū, ʾetelāk, a portion or plot, ʾṣawīn; ḥamānah, a cultivated field, according to Gesenius and Fürlst from the context in the plur. Deut. xxxii, 22; 2 Kings xxiii, 4; Isa. xvi, 8; Jer. xxxii, 40; Hab. iii, 17; also ḏūya, ḏāyūsa, an arable field, in the plur. Jer. xxxii, 10). The Hebrew sadeh is not adequately represented by our "field," the words agrees in describing cultivated land, but they differ in point of extent, the sadeh being specifically applied to what is unenclosed, while the opposite notion of enclosure is involved in the word field (compare Deserts). The essence of the Hebrew word has been variously taken to lie in each of these notions, Gesenius (Thesaurus, p. 1381) giving it the sense of freedom, Stanley (Palest. p. 484) that of smoothness, comparing arum from arum. On the one hand sadeh is applied to any cultivated ground, whether pasture (Gen. xxix, 2; XXXI, 4, 6; XXXIII, 7; Exod. ix, 3) tillage (Gen. xxxvii, 7; xlvi, 24; Ruth ii, 2, 8; Job xxiv, 6; Jer. xxxvi, 18; Mic. iii, 12), woodland (1 Sam. xiv, 25, A.V. "ground"); Ps. xxxii, 6), or mountain-top (Judg. ix, 32, 36; 2 Sam. i, 21); and in some instances in marked opposition to the wilderness; as in the instance of Jacob settling in the field of Shechem (Gen. xxxiii, 19), the field of Moab (Gen. xxxvi, 8; Numb. xxxi, 20, A.V. "country"); Ruth i, 1, and the vale of Siddim, i.e. of the cultivated fields, which formed the oasis of the Pentapolis (Gen. viii, 3, 8), though a different sense has been given (by Gesenius, Thesaurus, p. 1381). On the other hand, the sadeh is frequently contrasted with what is enclosed, whether a vineyard (Exod. ii, 5; Lev. xxv, 3, 4; Numb. viii, 14, xx, 17; compare Numb. xxii, 23, "the ass went into the field," with ver. 24, "a path of the vineyards, a wall being on this side and a wall on that side"); a garden (the very name of which, ṣadeh, implies enclosure), or a walled town (Deut. xxxviii, 16): unwalls villages or scattered houses ranked in the eye of the law as fields (Lev. xxv, 31), and hence the expression ʾas ṣadeh ʾḤaḥāla; in the fields (Yulg. in villas; Mark vi, 55). In many passages the term implies what is remote from a house (Gen. iv, 8; xxvi, 69; Deut. xxii, 25) or settled habitation, as in the case of Emam (Gen. xxv, 27; the Sept., however, refers it to his character, ḏāyūsēn): this is more fully expressed by ʾabū ḏāyūs, "the open field" (Lev. xiv, 7, 53; xvii, 5; Numb. xix, 16; 2 Sam. xi, 11), with which is naturally coupled the notion of exposure and desertion (Jer. ix, 17; Ezek. xxiv, 5; xxxi, 4; xxxi, 27; xxxii, 5). See MEADOW. The separate plots of ground were marked off by stones, which might easily be removed (Deut. xix, 14; xxviii, 17; comp. Job xxiv, 2; Prov. xxix, 28; xxix, 10); the absence of fences rendered the fields liable to damage from straying cattle (Exod. xxvii, 5) or fire (ver. 6; 2 Sam. xiv, 30); hence the necessity of constantly watching flocks and herds, the people so employed being in the present day named Nāṣir (Worc., 1159) or, a word amounting to being possessed by the most, which was gained by sawing the tallest and strongest of the grain crops on the outside: "spelt" appears to have been most commonly used for this purpose (Isa. xxviii, 5, as in the margin). From the absence of enclosures, cultivated land of any size might be termed a field, whether it were a piece of ground of limited area (Gen. xiii, 18, 17; Isa. v, 8), a man's whole inheritance (Lev. xxvii, 16 sq.; Ruth iv, 5; Jer. xxxii, 9, 25; Prov. xxvi, 26; xxxi, 16), the ager publicus of a town (Gen. xii, 46; Neh. xii, 25), as distinct, however, from the "field" which lay outside the Levitical cities, which was called ṣāḥib (A.V. "suburbs"), and was deemed an appendage of the town itself (Josh. xi, 12), or, lastly, the territory of a people (Gen. xiv, 7; xxiii, 8; xxxvi, 35; Numb. xx, 20; Ruth ii, 6; iv, 8; 1 Sam. vi, 1; xxvii, 7, 11). In 1 Sam. xxvii, 5, "a town in the field" (Aeth. Vers. "country")—a provincial town as distinct from the royal city. A plot of ground separated from a larger one was called a ḏūya, "field" (Gen. xxv, 11; Ruth ii, 8; 1 Chron. xi, 15), or simply ḏūya (2 Sam. xiv, 20; xxix, 12; comp. 2 Sam. xiv, 26). Fields occasionally received names after remarkable events, as Heikath-Hazzurim, the field of the strong men, or possibly of swords (2 Sam. i, 16), or from the use to which they may have been applied (2 Kings xviii, 17; Isa. viii, 7; Mat. xxvii, 7). See MEADOW. It should be observed that the expressions "fruitful field" (Isa. x, 18; xxvii, 17; xxvii, 15, 16) and "plentiful field" (Isa. xvi, 10; Jer. xlviii, 38) are not connected with ṣadeh, but with ṣera, meaning a park or well-kept wood, as distinct from a wilderness or a forest. The same term occurs in 2 Kings xix, 23, and Isa. xxxvi, 24 (A. Vera. "Carmel"); Isa. x, 18 ("forest"); and Jer. iv, 26 ("fruitful place"). See MEADOW. Distinct from this expression is the use in Ezek. vi, 5, ʾirʾūʾin (A.V. "fruitful field"), which means a field suited for planting suckers. See aGRICulture.

Field, David Dudley, D.D., a Congregational minister, was born in East Guilford, Conn., May 20, 1751, prepared for college under Dr. John Elliott, of Guilford, and graduated at Yale in 1802. After studying theology, he was licensed to preach in 1806, and was installed pastor at East Haddam in 1804. He filled this charge with great diligence and success until 1818, and in 1819 accepted a call to Stockbridge, Mass. After eighteen years' pastoral service at Stockbridge, he was called in 1827 to his old parish at Haddam. In 1848 he travelled in Europe. In 1851 he gave up his charge at Haddam, and spent the remainder of his life in quiet retirement at Stockbridge, where he died April 15, 1867. Dr. Field was a man of strong character. His mental powers were vigorous and comprehensive; his culture was as open as thorough, and varied. His duties as preacher and pastor were always filled with conscientious care; and his long pastorate, with the unusual case of his return to his first charge after an absence of thirty-three years, sufficiently attest the confidence and affection of his parishioners. Of his ten children, six sons are now living, and all eminent as professional men; among them are Cyrus W. Field, the "father" of the Atlantic Telegraph, and Dr. H. M. Field, editor of The New England Evangelist. Besides a number of occasional sermons, Dr. Field published History of Middlesex—History of Berkshire—Genealogy of the Strong-Family.—Appleton's Annual Cyclop. 1857, p. 501.

Field, Richard, D.D., one of the best of the High-
FIELD-PREACHING

Church writers of the Church of England, was born at Hampstead, Hertfordshire, in 1561, and was educated at Magdalen Hall, Oxford, where he lectured for seven years. He was a man of great zeal and ambition; the reputation of a learned preacher and an acute disputer. He was afterwards reader of divinity at Lincoln's Inn, London, and rector of Burgessheal, Hampshire. Here he refused the offer of St. Andrew's, in Holborn, London, a much more wealthy living, and obtaining a fellowship at Christ Church, Oxford, and a position at the bar, he returned to practical theology, and devoted himself to the study of the Bible and the systematic principles of the Church. He is known to posterity as a divine, and as a man of profound learning. Divines, even of the first order, scarce ever went to him without holding themselves with questions. Fuller calls him 'that learned divine, whose memory smelteth like a field which the Lord hath blessed.' When King James heard him preach the first time, he said, 'This is a man of God.' When he came into the royal court, his majesty retained so good an opinion of him that he designed to raise him to the bishopric of Oxford; but God was pleased, as Mr. Wood remarks, to prefer him for a better place, for, on the 21st of November, 1616, he died, leaving behind him a character of great and ardent piety. His reputation rests securely on his great work, The Book of the Church, which was originally issued in 1606, and with a fifth book added in 1810. A new edition, printed for the Eccl. Hist. Society, appeared at Cambridge, 1847-55 (4 vols. 8vo).—Hook, Andover, in Eccl. Rec., Eton, 1857.

Field-preaching, or preaching in the open air, 'a plan adopted by reformers in every age, in order to propagate more extensively and effectually their peculiar sentiments among the great masses of the people. Christ and his apostles not only availed themselves of the privileges which the Synagogue afforded them; but they made use of every means of making known the Gospel of the Kingdom to those who assembled therein from Sabbath to Sabbath, they also proclaimed the doctrines and precepts of the new dispensation on the highways and hedges, on the sea-shore and on the barren plade, on the mountain's side and in the streets of the city.' When men were found, and under whatever circumstances they were placed, if their ears could be reached, there the voice of the first teachers of Christianity was heard, warning sinners of coming danger, and pointing out the road to salvation. This was the only way to reach the people. Many of the offices of the ministry were then performed with a grown mount a table on unconsacrated ground; for field-preaching, since common enough in England, was then unknown, and therefore obloquy was poured upon it. His engagements so increased that he sought the help of Mr. John Wesley, who became his assistant. He succeeded to Bristol, and on his arrival was invited to preach in the open air. 'I could scarce reconcile myself at first,' says he, 'to this strange way of preaching in the fields, of which he (Whitefield) set me the example on the Sunday, having been all my life, till lately, so taciturn of every point relating to decency and order that I should have thought the saving of souls a sin if it had not been done in a church.' However, on the following day, Mr. Wesley preached from a little eminence in an open ground adjoining the city to about 1000 people. In the days of Whitefield and Wesley, field-preaching was not unfrequently attended with danger. Though they often met with a kind reception from the multitudes, yet at other times they experienced the rudest and most determined opposition, and often their lives were in imminent peril from the violence of ignorant, depraved, and excited populace. In his Earnest Appeal, Mr. Wesley asks, 'Who is there among you, brethren, that is willing (examine your own hearts) even to save souls from death at this price? Would not you let a thousand souls perish rather than you would be the means of raising such men? Will not you be the instruments of raising them thus? Do you not speak now with regard to conscience, but to the inconveniences that must accompany it. Can you sustain them if you would? Can you bear the summer sun to beat upon your naked head? Can you suffer the wintry rain or wind, from whatever quarter it blows? Are

FIELD-PREACHING

pronounced the idea to be a mad one; but now, he believed that in Bristol his duty in this respect was no longer doubtful. Moreover, many persons said to him, 'What need of preaching religious instruction? they had no church in which to worship, no minister to teach them the duties of religion, or to pray with them; hence they were notorious for their brutality and wickedness, and in times of excitement were a terror to all around them. On February 17, 1739, Whitefield preached in the great market-place of Gloucester, where he preached to as many as the novelty of the scene collected, which were about 200. 'The ice being now broke'—to use his own observation on this first open-air sermon—he determined to persevere in the same course. Accordingly, he visited Kingswood frequently, and in all places where he went it was extraordinary how the number of his hearers increased; for, besides the citizens, thousands of all ranks flocked from Bristol and the neighborhood, and the congregation was sometimes computed at 20,000. With gladness and eagerness many of the country outcasts, who had never been in a church in their lives, received the instruction of an eminent follower of him who 'speak about doing good.' 'The first discovery,' says he, 'of their being affected was to see the white gutterns made by their tears, which plentifully fell down their black cheeks, as they came out of the fields. Sometimes, when the people were before me, I had not, in my own apprehension, a word to say, either to God (in prayer) or to them (by preaching). . . . The open firmament above me, the prospect of the adjacent fields, with the sight of thousands and thousands, some in coaches, others on horseback, and some on foot, present all affected and drenched in tears together, to which sometimes was added the solemnity of the approaching evening, was almost too much for, and quite overcame me. Whitefield was then requested to preach in a bowling-green in the city, and he complied. Many of the people saw the sermon in the bowling-ground.'
you able to stand in the open air, without any covering or defence, when God casteth abroad his snow like wool, or scattereth his hoar frost like ashes? And yet these are some of the smallest inconveniences which accompany field-preaching. For very few are the contradictions of sinners, the scoffs both of the great vulgar and the small; contempt and reproach of every kind; often more than verbal affronts—stupid, brutal violence, sometimes to the hazard of health, or limbs, or life. Brethren, do you envy us this honor? What, I pray you, that you should be a field-beecher? When Mr. Wesley had been accustomed to field-preaching for more than twenty years, he made the following remarks: 'One hour in Moorfields might convince any impartial man of the expediency of field-preaching. What building, except St. Paul's church, could contain such a congregation? and if so, what human voice could have reached them there? By repeated observations, I find I can command twice the number in the open air that I can under a roof. And who can say the time for field-preaching is over, while, I, Greatest of sinners, am the least a field-preacher? The convincing as well as the convincing power of God is eminently present with them.'

"They stood, and under open air adored The God who made both air, earth, heaven, and sky."

And with this they were regarded with attention still as night, or were lifting up their voices in praise as the sound of many waters, many a time have I been constrained to say in my heart, "How dreadful is this place!" This also, "is no other than the house of God! this is the gate of heaven!" (See Memoirs of Wesley, by blame, Southey, and also Jackson's Centenary of Wesleyan Methodism.) Having now once adopted this mode of imparting instruction to the neglected classes of the community, Mr. Wesley never abandoned it to the end of his life; and in a short time his brother Charles followed his example in the same self-denying labor of love, being urged thereto by the indefatigable Whitefield. Mr. Charles Wesley's first field-sermon was preached at Moorfields on June 24, 1789, his congregation amounting to about 1000, and in the evening of the same day he preached to multitudes in St. George's Church. Two weeks afterwards he preached to about 10000 people in Moorfields; and for several years he followed with equal steps both his brother and Mr. Whitefield in laborious zeal and public usefulness. It is not to be supposed that Mr. Wesley had not preached in the open air till the time he was induced by Mr. Whitefield to do so at Bristol. He had done so in Georgia before Mr. Whitefield was ordained, but he had no intention of resuming the practice in England until compelled to do so by the necessities of the case. He says, 'Wherever I was desired to preach (in churches), salvation by faith was my only theme. ... Things were in this posture when I was told I must preach no more in this, and this, and another church; the reason was usually added without reserve, "Because you preach such doctrine." ... After a time I determined to do the same thing in England which I had often done in a warmer climate—to preach in the open air.' 'Be pleased to observe,' he adds, 'that I was forbidden to preach in any church for preaching such doctrine.' 2. That I had no desire nor design to preach in the open air till after the prohibition. 3. That when I did, as it was my custom, no matter of choice, no make of meditation. There was no scheme at all previously formed which was to be supported thereby. 4. Field-preaching was therefore a sudden expedient—a thing submitted to rather than chosen; and therefore submitted to because I thought preaching even thus better than not preaching at all.' Field-preaching, or, as it was called, tent-preaching, that is, preaching from a tent, was common in Scotland on summer sacramental occasions. For very few are the contradictions of sinners, the scoffs both of the great vulgar and the small; contempt and reproach of every kind; often more than verbal affronts—stupid, brutal violence, sometimes to the hazard of health, or limbs, or life. Brethren, do you envy us this honor? What, I pray you, that you should be a field-beecher? When Mr. Wesley had been accustomed to field-preaching for more than twenty years, he made the following remarks: 'One hour in Moorfields might convince any impartial man of the expediency of field-preaching. What building, except St. Paul's church, could contain such a congregation? and if so, what human voice could have reached them there? By repeated observations, I find I can command twice the number in the open air that I can under a roof. And who can say the time for field-preaching is over, while, I, Greatest of sinners, am the least a field-preacher? The convincing as well as the convincing power of God is eminently present with them.'

Fifth-monarchy-men, a sect of Millenarians which sprung up in the time of Cromwell, and held that the millennial reign of Christ on earth, styled by them the fifth great monarchy, reigned in succession with the Assyrian, Persian, Grecian, and Roman ones, was then to begin. Under the lead of Thomas Venner, a wine-cooper, they formed a plot to inaugurate their kingdom of the saints on April 9th, 1657, but were foiled by the vigilance of Thurloe, the secretary of state, and a number of the conspirators, arrested with arms in their hands, were sent to the Tower, though some of the ringleaders were allowed to take the law, death, war, and the sword, according to the orders of any of them. On the 6th of January, 1661, some fifty or sixty of these madmen, led by the same Venner, rose in insurrection, if we may term it such, against the government of Charles II., proclaimed 'king Jesus' as the head of the police force, and, after concerning themselves for two days in Caen Wood, near Highgate, returned to encounter the train-stands, insanely believing that neither bullet nor steel could harm them. Most of them, refusing quarter, were slain outright; but Venner and sixteen others were taken, tried, and executed.—Knight, Popular Hist. of England, iv. 206, 251; Pictorial Hist. of England, iii. 421, 679 (Chamber's ed.); Burnet, Hist. of His Own Times, vol. i. bk. ii.; Baxter, Hist. of the Church of England, p. 606, 611; Neal, Hist. of the Puritans (London), iv. 186. (J. W. M.)

Fig. The usual Hebrew word for this is תַּמֶּשׁ (tammesh), of uncertain etymology, which is universally translated fig (N. T. σέκους) and fig-tree (N. T. σέκους) in both the Authorized Version and modern versions, in form and distinctly so. It has from the earliest times been a highly esteemed fruit in the East, and its present as well as ancient Arabic name is ris. When figs are spoken of as distinguished from the fig-tree, the masc. plur. form דַּמֵּשׁ is used (see Jer. viii. 10). The other words rendered fig in the Sept. Ver. are: דַּמֵּשׁ (damesh), "green fig," Cant. ii. 13; דַּמֵּשׁ (damesh), "untimely fig," Rev. vi. 10; a designation of the late fig, which, being unripe at the proper time for gathering, frequently hangs on the tree over winter (comp. also the name בֵּית-פָּרָה; and דְּמִישָׁבָה (dimishah), "first ripe.") Isa. xxxvii. 4; Jer. xxiv. 2; Mic. vii. 11; Hos. ix. 10, which denotes the early or spring fig, still called boccar in Mauritania, and in Spanish albaro (Shaw, Tribulus, p. 370, 60.) See also the note on דֶּמֶשׁ.

The fig is mentioned in so many passages of Scripture that our space will not allow us to enumerate them, but they are detailed by Celsius (Hierobot. ii., 388). The first notice of it, however, occurs in Gen. iii. 7, where Adam and Eve are described as sewing fig leaves together to make of them a covering of shame. The common fig-leaf is not so well suited, from its lobed nature, for this purpose; but the practice of sewing or pinning leaves together is very common in the East even in the present day, and baskets, dishes, and un-
The Fig (Ficus Carica).

granes." The spies who were sent from the wilderness of Paran brought back from the brook of Eschel clusters of grapes, pomegranates, and figs. Mount Olivet was famous for its fig-trees in ancient times, and they are still found there (see Stanley, Sinai and Palestine, p. 167, 421, 422). The fig-tree is referred to as one of the signs of prosperity (1 Kings iv, 28). Hence "to sit under one's own vine and one's own fig-tree" became a proverbial expression among the Jews to denote peace and prosperity (Mic. iv, 4; Zech. iii, 10).

The failure of this fruit is likewise noted as a sign of affliction (Psa. cv, 35). The very frequent references which are made in the Old Testament to the fig and other fruit-trees are in consequence of fruits forming a much more important article of diet in the warm and dry countries of the East than they can ever do in the cold and moist regions of the North (see Judith x, 5; comp. Mishna, Shelosh, iv, 7). Figs are also used medicinally; and we have a notice in 2 Kings xx, 7, of their employment as a poultice (comp. Pliny, xiii, 62; Dioscor. i, 184). In the historical books of the Old Testament mention is made of cakes of fig, used as articles of food, and compressed into that form for the sake of keeping them (Leyes. cucur, Lucian, Viz. Auct. 19; Martial, xiii, 26). Such a cake was called פסאכש (Talmud, בד וברב, Mishna, Terumoth, iv, 8), and more fully מַסֶּכֶשׁ בְּרֵכֶשׁ, on account of its shape, from the root בֵּרֶכֶשׁ, to make round (see 1 Sam. xxx, 12; Jer. xxiv, 2 sqq.). Hence, or rather from the Syr. סְכֶשׁ, the first letter being dropped, came the Gr. word σκελής (see Wesseling, ad. Dio. Sic. xvii, 67). Athenaeus (xi, p. 500, ed. Casarav) makes express mention of the σκελής Ἕρμηνευς. Jerome, on Ezek. vi, describes the σκελής as a mass of figs and rich dates, formed into the shape of bricks or tiles, and compressed in order that they may keep. Such cakes harden so as to need cutting with an axe. The fig is still extensively cultivated in the East, and in a dried state, strung upon cords, it forms an extensive article of commerce from Persia to India. The fig-tree, though now successfully cultivated in a great part of Europe, even as far north as the southern parts of England, is yet a native of the East, and probably of the Persian region, where it is most extensively cultivated. The climate there is such that the tree must necessarily be able to bear some degree of cold, and thus be fitted to travel northwards, and ripen its fruit where there is a sufficient amount and continuance of summer heat. It has a smooth stem, which is seldom quite straight, and is covered with a gray bark; the leaves are of the shape of a heart, with three or five lobes, and are indented; the upper surface is rough, the lower is covered with fine hair. The fruit makes its appearance before the leaves, but not before the flowers or blossom, which lies concealed within a hollow, dryish receptacle (Hogg, Vegetable Kingdom, p. 676). The fertilization of the blossom is often assisted by an artificial process called coprefacies (Pliny, xx, 21; Tournefort, ii, 22; Russel, Aleppo, i, 108; Hasselquist, p. 221). See the Penny Cyclopaedia, a. v.)

FIG.

The Fig (Ficus Carica).
complexion than the *kermis*, hanging and ripening on the tree even after the leaves are shed, and provided the winter proves mild and temperate, as gathered as a delicious morsel in the spring (see Miss Bremer, *The Life of London*, p. 189). *N. H. xvi*, 36, 27.) Thus, especially in sheltered situations (e.g. the plain of Gennesaret, Josephus, *War*, iii, 10, 8), fresh figs might be had at almost all seasons of the year (compare Strabo, xi, 508; Columella, *Agr.*, 21).

The attempt to explain the above-quoted passage in Mark is numerous, and for the most part very unsatisfactory; passing over, therefore, the ingenious though objectionable reading proposed by Dan. Heinsius (*Exercit. Soc. ed. 1669*, p. 116) of ὡδ γὰρ ἐν, καίριοι σῖκων—"where he was, it was the season for figs"—and merely mentioning another possible explanation, that clause of the evangelist's remark as a question, "for was it not the season for figs?" and the no less unsatisfactory rendering of Hammond (*Ammos ad St. Mark*), "it was not a good season for figs," we come to the interpretations which, though not perhaps of recent, is found in modern times.

The explanation which has found favor with most writers is that which understands the words καίριοι σῖκων to mean "the fig-harvest;" the γιός in this case is referred, not to the clause immediately preceding, "he found nothing but leaves," but to the more remote condition, "it came if he had not seen anything thereon;" for a similar application it is usual to refer to Mark xvi, 3, 4; the sense of the whole passage would then be as follows: "And seeing a fig-tree afar off having leaves, he came if perchance he might find any fruit on it (and he ought to have found some), for the time of gathering it had not yet arrived, but when he came he found nothing but leaves." (See the notes in the Greek Testaments of Burton, Trollope, Bloomfield, Webster, and Wilkinson; Macknight, *Harm. of the Gospels*, ii, 521, note, 1859; Elshey's *Ammos* ad l. c., etc.) A third explanation would be: "the season was not yet past, and common plums, corresponding in this state to the *poggium* (πῶκους) of Cant. ii, 18, wholly unfit for food in an unprepared state; and it is but reasonable to infer that our Lord expected to find something more palatable than these small, sour things upon a tree which by its show of foliage bespoke, though falsely, a corresponding abundance of good fruit, for it is improbable that the fruit comes before the leaves. Again, if καίριοι denotes the "fig-harvest," we must suppose that, although the fruit might not have been ripe, the season was not very far distant, and that the figs in consequence must have been considerably more mature than these hard *poggium*; but is it probable that Mark would have thought it necessary to state that it was not yet the season for gathering figs in March, when they could not have been fit to gather before June at the earliest? It would be better to understand the γιός here in an adversative-Illative sense = *al dokyn*.

There is another way of seeking to get over the difficulty by supposing that the tree in question was not of the ordinary kind. Celsus (*Hierob. ii, 885*) says there is a peculiar fig-tree known to the Jews by the name of *Bemeth-shuakh* ([בֵּיתָ שָׁעֲחָכָּה), which produces *grouthuth*, "small unripened fig" (*poggium*) every year, but only good fruit every third year; and that our Lord came to gather in the *Bemeth-shuakh* in Perea; and that some annual *grouthuth* only were produced! We are ignorant as to what tree the *Bemeth-shuakh* may denote, but it is obvious that the apparent unreasonableness remains as it was. As to the tree which Whitby (Commentary on *Mark*, l. c.) identifies with the one in question, that it was that kind which Theophrastus (*Hist. Plant.* iv, 2, § 4) calls *aiyphallon*, "evergreen," it is enough to observe that this is no fig at all, but the carob or locust tree (*Judas*). The *grouthuth*, however, speaks of a large green-colored fig that ripens in May on Lebanon, and probably much earlier in milder positions (*Land and Book*, i, 588).

But, after all, where is the unreasonableness of the whole transaction? It has been stated above that the fruit of the fig-tree appears before the leaves (see Hackett, *Illust. of Scripture*, p. 138); consequently, if the tree produced leaves, it should also have had some figs as well. As to what natural causes had operated to effect so unusual a thing as for a fig-tree to have leaves in March, it is unnecessary to inquire; but the stepping out of the way with the possible chance (ἐκ, εἰς, πόρτος, "under the circumstances;" see Winer, *Gramm. of N. Test. Dict.* p. 465, Masson's *treal*), of finding edible fruit on a fig-tree in leaf at the end of March, would probably be repeated by any observant modern traveller in Palestine. The whole question turns on the pretensions of the tree; had it not proclaimed by its foliage its superiority over other fig-trees, and thus proudly exhibited its *precociously;* had our Lord at that season of the year visited any of the other fig-trees upon which no leaves had as yet appeared with the promise of finding good fruit, then the tree, having been thus altered, and the unreasonable and injustice real. The words of Mark, therefore, are to be understood in the sense which the order of the words naturally suggests. The evangelist gives the reason why no fruit was found on the tree, viz. "because it was not the time for fruit;" and we are left to infer the reason why it is *ought to have had fruit if it were true to its pretensions;* and it must be remembered that this miracle had a typical design (see the *Christ. Amm. s. s.*, 228), to show how God would deal with the Jews, who, professing, like their precious fig-tree, "to be first," should be "last" in his favor; whose objection will no fruit was produced in their lives, but only, as Wordsworth well expresses it, "the rustling leaves of a religious profession, the barren traditions of the Pharisees, the ostentatious display of the law, and vain exuberance of words without the good fruit of works" (comp. *Ezek. iv, 24*). So Srench (*Notes on the Miracles*, p. 486) concludes: "All the explanations which go to prove that, according to the natural order of things in a climate like that of Palestine, there might have been, even at this early time of the year, figs on that tree, either winter figs which had survived till spring, or the early figs of spring themselves—all these, ingenious as they often are, yet seem to me beside the matter. For, without entering further into the question whether they prove their point or not, they shatter upon us that notion that no such combination of probabilities brought the Lord their, but those abnormal leaves which he had a right to count would have been accompanied with abnormal fruit."

Monographs on this fig-tree cursed by the Saviour have been written in Latin by Fleisch (Hafn., 1775), Gögen (Lips. 1697), Hofmann (Jena, 1670), Iken (Bremen, 1741), Juster (Abo, 1724), Muler (Hafn., 1789), Schmidt (Viteb. 1701), Majus (in *Observ. asc. p. 71 sq.*), Simonis (Fr. ad 1669), Witheron (in *Opusc. p. 159 sq.*), Witsius (Lugd. Bat. 1712), in German by J. I. Arnold (Wolfen. 1755), Ebeling (in *Hamb. gel. Briefwechsel*, 1750, p. 518 sq.), Stoch (in Rethelf's *Theol. 1754, p. 27 sq.*), Kunze (in the *Studien u. Krit.* 1844, iii, 702). See Jesus.

**Fright** (*מַלָּכָה הַדָּרֶשֶׁה, milchamot*), Deut. ii, 32; 1 Kings xx, 2; 2 Chron. xxvi, 11; xxvii, 2, *war or battle, as usually rendered; or מַלָּכָה הַדָּרֶשֶׁה, masarakh*, 1 Sam. xvii, 20, battle-array, as often rendered; in other passages some form of the verbs * Phill., *N. S. etc.; Gr. µάλακα.
μορ, μαρ, as usually rendered, or μαρχί; also ἐγνω etc.

The Israelites began their existence as a nation with an aggressive campaign, in the sequel of which, after a long series of successes, they were forced to retreat, and thus compelled to occupy a defensive position throughout the entire period of the Judges (q. v.). This consisted, however, for the most part, of tumultuary and disconnected skirmishes. Regular engagements first occurred in the time of the Judges and David, and the hostile collisions of disciplined Hebrew generals in the civil and foreign commotions of subsequent periods must have greatly stimulated military training. The opening of a campaign (generally in spring, 2 Sam. xi, 1; Josephus, Ant. vii, 6, 3; Harmer, ii, 283), as well as of single engagements, although not always by regular diplomatic communications or a declaration of war (but see Judg. xi, 12 sq. : 1 Kings xx, 2 sq.; 2 Kings xiv, 8; Josephus, Ant. iv, 8, 41), was preceded in important and deliberate cases by an interrogation of the Urim (q. v.) and Thummim (Judg. xx, 27 sq.; 1 Sam. xiv, 37; xxiii, 2; xxviii, 6; 8, 38; iv, 38 sq.) or a prophetic oracular announcement (1 Kings xxvi, 6 sq.; 2 Chron. xviii, 4 sq.; 2 Kings xix, 2 sq.), i.e., manner as the Greeks consulted oracles before beginning a contest, and even took seers to work for them (see Wachsmuth, Helmem. Alterth. iii, 280 sq.). A peculiar species of prophecy is also prior to an attack is mentioned (Exod. xxi, 50 sq.) with regard to the Chaldeans (see Loisy), like the exortation of the Romans (Cicero, De civ. i, 16; ii, 12 sq.). See Soesthayer. In solemn instances, while the army stood in sight of the enemy, an offering was brought forward (1 Chron. vii, 9 sq.; xii, 7 sq.; Deut. xx, 2 sq.), which always appears to have accompanied the prince to the field (2 Chron. xiii, 12, 14; comp. Num. x, 9; a specially selected and anointed functionary of this kind, like a modern field-captain [Mill, De sacerdote castrorum et eret. Hebr. Utr. 1787; is mentioned in the Mishna, Sotah, viii, 1, by the name of הַלָּשׁוּת הַשָּׁוֹת הַשָּׁוֹת הַשָּׁוֹת הַשָּׁוֹת הַשָּׁוֹת הַשָּׁוֹת הַשָּׁוֹת Halshe, see Roland, Amisq. Stor. ii, 2; Otho, Laws Mis. p. 89; Van Alphen, in Gruber's Collect. i, 515 sq. ; Talm. Din, de sacerdote castr. et eret., and Ugelini de sacer. castr. [both in Ugelini Theannur. iii, 10; Thromschmid, De sacerdote ad bell. usct., Torger 1757; Kretzschner, De uncio bellic. Dresd. 1738; although not mentioned in the O.T. books; comp. Delying, Observ. ii, 298; Lakemacher, Observ. Philos. iii, 286 sq.); or the commander himself, delivered a horatory oration (2 Chron. xx, 20). Then followed by a trumpet blast the signal for the conflict (Num. xii, 12; 1 Macc. xvi, 8), and the struggle began amid terrific battle-cries (нная, n, 1 Sam. xvii, 52; Is. xxii, 18, 20; Jer. i, 42; Ezek. xxii, 22; as among almost all ancient nations; see especially Homer, Il. ii, 247 sq.; xxvii, 20 sq.; xv, 452 sq.; Jer. ii, 10, 11; Tacl. Germ. iii, 28; Doutgeely Analect. i, 74 sq. ; Potter, Greek Amisq. ii, 174 sq.).

The battle-array (pany, 2 Macc. i, 4; xxii, 8, 29, etc., comp. § 77, Judg. xx, 80; 1 Sam. xvi, 21) appears to have been a simple ranging of the troops in line; and even in the Maccabean period, when the Jews had acquired some of the strategic art of the Greek Syrians, their leaders seem to have rested in their simple tactics, gaining advantage over the mortal skill of the enemy chiefly by their esplanade value. Scientific manoeuvres and exact military lists are mentioned in 1 Macc. vii, 36 sq.; ix, 11, 16, 19; comp. ver. 45 (see Joseph. Ant. xiii, 12, 5; x, 77 sq.; xii, 28). The foreign troops of the later Jewish kings were manoeuvred according to Greek and Roman tactics (comp. Joseph. Ant. xiii, 19, 1, 11; xiv, 14; 11; Philo, vil. cit., 216 sq.; see Josephus, War, iii, 7, 13, 14, 20, 28. Nevertheless, we can early trace a division of the army into three corps, probably with a view to charge the enemy in the centre and upon both flanks (Judg. vii, 16, 19; 1 Sam. xi, 11; 2 Sam. xviii, 2; 1 Macc. vi, 28; so four divisions, 2 Macc. viii, 22: the expression στρατευμα of the army was already known, comp. הַסָּה, Is. viii, 8; דַּשָּׂ, Ezek. xii, 17, 37; xxxvii, 6, etc., see Gesenius, Comment. zu Jes. i, 335, and Theoph. p. 229). The field was probably fought man against man. The wounding of the champion appears to have been bare ("exercit temeritum, humerum, etc.) Sil. Ital. xil, 716; Lucan, ii, 548; Statius, Theb. i, 413, etc., the military mantle having no armlets (c. m. Ezek. iv, 7; Is. iii, 10; so Doutgeely Analect. i, 257 sq.). Great prowess, especially bodily dexterity and agility (fons artis armatae), was prized as an qualification for the soldier or officer (2 Sam. i, 23; ii, 18; 1 Chron. xii, 8; Hab. iii, 19; the "swift of foot" of the Homeric heroes). Signals for retreat or desisting from pursuit of the enemy were sounded on the trumpet (לַחֶם, 2 Sam. ii, 29; xviii, 16, xx, 22). Single combat (q. v.) between two champions, which decided the battle (like the Horatii and Curitiati of Livy, i, 24), is the well-known one between David and Goliath (1 Sam. xvii); another example occurs 2 Sam. ii, 14 sq. Sometimes peculiar stratagems were resorted to in the fight (comp. 2 Kings v, 12 sq.; see Rosenmüller, Morgenl. iii, 233 sq.), especially the surprise (Judg. vi, 16 sq.), the ambushes (בַּז, Josh. viii, 2, 12; Judg. xx, 36; 1 Sam. x, 5), and surrounding (2 Sam. v, 20). Information and spies (נָשָׁה, נָשָׁה) were largely employed (Josh. ii, 7 sq.; Judg. xi, 10 sq.; 1 Sam. xxxi, 4; 1 Macc. v, 88; xii, 26). Distinguished acts of individual valor were often secured by an appointed prize (Josh. xv, 16; Judg. i, 12; 1 Sam. xvii, 25 sq.; xvii, 28 sq.; 1 Chron. xi, 6). With the design of insuring a successful issue in battle, the sanctuary (ark of the covenant) was sometimes carried into the field (1 Sam. iv, 4 sq.; comp. 2 Sam. v, 21). We have no sufficient accounts as to the disposition of the Hebrew camp aside from the Mosaic arrangement (Numb. ii); although from 1 Sam. xvii, 20; xxvi, 5, it appears to have had a circular form, like that of the Arabs (also the Bedouins, Arvii, xiii, 214) and ancient Greeks (Xenoph. Rep. Lavo, xili, 1), and we may understand the term παναυγίος (Arch. Vers. "trench") to refer to the bulwark of vehicles and beasts of burden, or (with Thucydides) the circumvallation of the encampment (q. v.). The camps were usually guarded by carefully-posted sentinels (Judg. vii, 19; 1 Sam. xx, 19), and by pairs during the absence or retirement of the commander himself (2 Sam. xx, 23). The vanquished enemies were in general treated very severely: the captured generals and priests were put to death (Josh. x, 24; Judg. vii, 21); not infrequently they were cut to pieces alive or beheaded when dead (2 Macc. xv, 30; 1 Sam. xvii, 34; comp. Herod. vii, 77; Jos. War, i, 17, 2); all warriors were stripped (1 Sam. xxxii, 8; 2 Macc. xii, 37), and the living captives either carried into slavery (Numb. xxxi, 26 sq.; Deut. xx, 14 sq.; some mitigation, however, being shown in the cases of females, Deut. xxii, 11 sq.) or put to death (Judg. ix, 45), sometimes in a cruel manner (2 Sam. xii, 81; 2 Chron. xxiii, 12; comp. Judg. viii, 7, or even mutilated (Judg. i, 6 sq.; 1 Sam. x, 2), although these cases of extreme severity are evidently peculiar and exceptional. As in all ancient warfare, the vanquished were always spared amid the ruthless fury of vengeance: there are notices of women violated or disemabled of their unborn infants, and of children dashed in pieces against stones and the corners of streets (2 Kings xx, 16; comp. 2 Kings xv, 17; Is. xiii, 16; 19, 22; Jer. vi, 9; Amos 1, 2; Ps. x, 8; Nah. iii, 13; 13; see Schultens, Monument. Histor. Arab. p. 125; Wachsmuth, Helmem. Alterth. xii, 425); although these occur chiefly in connection with heathen countries (comp. Josephus, Aplan. ii, 29). Captured horses were hamstrung (2 Sam. vi, 4; Josh. i, 6, 9). But
FIJI ISLANDS

see Booty. Conquered cities were occasionally burnt or demolished (Judg. ix, 45; 1 Macc. v, 28, 52; x, 84); at least heathen sanctuaries were destroyed (1 Macc. v, 68; x, 84); or carried away (Isa. xlv. 1; see Gese- nius, Comment. in loc.): the open country itself was laid waste (Judg. vi. 4; 1 Chron. xx. 1, 2; 1 Kings iii. 19, 20; comp. Judg. xiv. 17); the cities were also left in charge (2 Sam. viii. 6, 14). But a more absolute war of extermination was waged by the Hebrew people against the Canaanites on the eiseides into Palestine. See Accu- racy. Victory was celebrated with joyful shouts, songs, and dances (Judg. v. 1; 1 Sam. xviii. 6 sq.; 2 Sam. xix.; Judith xvi. 24; 1 Macc. iv. 24); tro- phies were also set up (1 Sam. xv. 12, 2 Sam. viii. 18; but see Thenius, ad loc.). As permanent memo- rials of great fortune in war, captured weapons or pieces of armor were deposited in the sanctuary (1 Sam. xxxi. 9; see 1 Sam. xxvii. 8); in the temple of the Lord (1 Chron. x. 10; comp. Hom. ll. vii. 83; Virg. En. vii. 183 sq.; Justin, ix. 7; Lucan, i. 240; Tacit. Annal. i. 59, 2). For military exploits, individuals were honored with presents or a promotion (1 Sam. xviii. 25 sq. comp. Rosellini, Monum. stir. iv. 74); 2 Sam. xviii. 11, and David has served the Lord, (2 Sam. xx. 8). Here David the Great once rewarded all his soldiers for a hard- earned victory with money (Joseph. Ant. xiv. 15, 4). Leaders who fell were honored by the army with military mourning (2 Sam. iii. 21), and their weapons were placed in their grave (Ezek. xxxii. 27; comp. Dougsait, Amad. at sup.), as in that case the burial (with the tumuli pompous of war, Amos ii. 2) of the remains was a cardinal duty of the army and its com- mander (1 Kings xi. 15). The scrupulousness of the later Jews regarding the observance of the Sabbath (q. v.) is sometimes brought against the enemy as an advan- tage (2 Sam. vii. 1 sq.). See generally Lydii Synagoga de re militari, c. notis Van Til (Dordrep, 1596; also in Ugolini Thes. xxvii.). Kauserl's Wörterb. der Schlachten aller Völker (vol. i. Ulm, 1829) is of little value for Hebrew archeology. Compare Battle. On 1 Cor. ix. 26, see Gga. 

Figure stands in the Auth. Vern. as the representative of the following words in the original: ἐπέτρεπε, ε- mel. Deut. iv. 15, 1. i. e. an idol, as elsewhere rendered; ἐπέκτρεπον, mildet/ath, 1 Kings vi. 29, a carring, as elsewhere rendered, but usually, in a metaphorical sense, τρίκλητον, ταμβίωσι, Isa. xlv. 13, likeness or pattern, as elsewhere rendered; to which correspond in the N. T. τίνα, Acts vii. 43; Rom. v. 14, a type; ἑναρίπτος, Heb. ix. 24, 1 Pet. iii. 21, an antitype; and παπαραθή, Heb. ix. 9; xi. 19, a parable, as elsewhere rendered. See Type; Parable.

FIJI ISLANDS, a group of islands in Polynesia, situated 490 miles north-west of the Friendly Islands, between lat. 15° 30' and 19° 30', and long. 177° and 179° West. It comprises 225 islands, of which 90 are in- habited. The others are occasionally resorted to by natives for the purpose of fishing, and taking the bick- decemer, or sea-ang. Two are large islands, stretching north-east and south-west nearly throughout the whole extent of the group, and are supposed to be each about 400 miles in circumference. The group comprises seven districts, and is under as many principal chiefs. All the minor chiefs on the different islands are more or less connected or subject to one of these. The area of the whole group is estimated at 3836 sq. miles, and the population about 150,000. The white male population is about 2000, among whom are 40 Ameri- canas. The people are divided into a number of tribes, independent of and often hostile to each other. In each tribe great and marked distinction of rank existed. The classes which are readily distinguished are as fol- lows: 1. kings; 2. chiefs; 3. warriors; 4. the king's messengers (matanivanua, literally "eyes of the lands"); 5. slaves (kapua). Mbanu, the metropolis and imperial capital, is situated on a small island, about two miles in circumference. It contains nearly one thou- sand inhabitants.

War is a constant occupation of the natives, and en- grosses most of their time and thought. In 1809 they became acquainted with the use of fire-arms. The crew of a New Zealand whaler, the "Te Pahi," had shot off a Ma- rian, in order to preserve their lives, joined the Mbanu people, instructed them in the use of the musket, and assisted them in their wars. Next to war, agriculture is the most general occupation of this people. They have no domesticated animals, except fowl, Fruit, and roots, which they cultivate in addition to many spontaneous production.
obtained a knowledge of Christianity in the Friendly Islands. The chief, being only a tributary chief, appeared unwilling to take any step in favor of Christianity until he knew the minds of the more powerful chiefs of Fiji, assurance obtained even there, and the convert was welcomed. In the course of a few years, the missionaries, with the aid of native teachers and preachers, some of whom came from the Vavau Islands, introduced the Gospel into various other islands of the Fiji group, beside Vavau, Taveuni, as Rewa, Vunibula, and some others of minor importance. They were favorably received by a number of the chiefs and the people, in some instances, however, from motives of a secular character. In 1845 and the following year there was a great religious movement in the islands of Fiji, which extended 520 to other islands, and resulted in large additions to the Christian churches. Among the most remarkable fruits of the movement was the conversion of a chief whose name was Varin, and who had long acted as the human butcher of Seru, being called the Napoleon of Fiji.

In 1864, the king Thakombau, who occupied several of the smaller islands and the eastern coast of Viti Levu, together with his tribe, embraced Christianity. Since this time the prosperity of the islands has rapidly increased, and they are now partially in charge of a botany which has settled on the island, and have developed to a considerable extent the natural resources of the soil. A great part of the territory of Thakamau is now mapped off into cotton and sugar plantations, most of the planters being Australian. There is also in the island of Levuka a sugar factory, at the time of the visit of a governor, a flourishing little town called Ovalau, which has a hotel and a number of stores, all of them kept by whites. There is a British consul also stationed in this island, and in 1868 an agent of the American government was sent there from Sidney. About the time which extending Thakamau to other islands, and resulted in large additions to the Christian churches. Among the most remarkable fruits of the movement was the conversion of a chief whose name was Varin, and who had long acted as the human butcher of Seru, being called the Napoleon of Fiji.

Western form, for which they were accused of heresy by the Easterns. Charlemagne hated the East heartily, drew up a refutation of the Eastern doctrine, and summoned a council at Aix-la-Chapelle (809), which sanctioned the filioque, and sent deputies to Leo III to older. For a creed, the doctrine of the West, that Leo refused to add the filioque to the creed, and even had the creed itself, in its original form, enshrined on two silver shields (in Greek and Latin), which he hung up in St. Paul's Church as a testimonium to his unwillingness to break his oath of allegiance to the general councils by adding to the same, which he gave his sanction to the doctrine of the filioque as scriptural and sound. In the latter part of the century the troubles with Photius (q.v.) renewed the controversy between East and West; and the Council of Constantinople (A.D. 879), which was attended by 800 bishops, anathematized all who added the filioque. No pope had at yet formally authorized the addition, and yet it was coming into general use in the West, under the authority, especially, of pope Nicholas I (Neale, Eastern Church, p. 1165 sq; Mansi, xvi, 255). Finally, the 10th, 11th, and 12th centuries, when the Church was occupied with the defense of the Crusades against the Moslems and the heathen, the controversy became academical, and did not attract much public or open way; "no decreet, encyclical or synodical, announcing her adhesion. The thing was done in a corner, and, for a curious liturgical writer of the Western empire, who went to see his sovereign, Henry II, crowned at Rome, A.D. 1014, by pope Benedict, he was good enough to give a hint of the way in which it occurred. Berno therefore records what he witnessed with his own eyes and ears; and being engaged himself in a work on the Mass, he would naturally be very particular in his inquiries when he came to Rome, of all places, how things were done there. Now his account is that "up to that time the Romans," that is, the Church of Rome generally, "had in no wise changed the creed after the gospel; but that the lord emperor Henry would not desist till, with the approval of all, he had persuaded the apostolic lord Benedict to let it be chanted at high mass." Thus in Leo II it got its adopted by the popes themselves. When this had been done, the pontifical oath was changed. Later popes, of course, shrank from imprecating a judgment upon themselves, according to the terms of the oath. For in this case they failed to keep the decree, as the general councils enumerated it in its, 'nuspe ad usum apicem,' when they felt they had notoriously failed to do so by the creed. That clause was accordingly struck out. For the last 1000 years the Roman communion is not committed to the use of a creed which is that of the Church of the West, but of the Greek Church. Nor do say, therefore, to the use of a creed which is heterodox. On the theological question involved in it I would wish to speak with becoming reverence; but thus much is certain, that the addition which forms its distinguishing feature was made and had been in use many centuries before any pope judged it allowable, much less necessary; many centuries before theologians in the West had agreed among themselves whether the terms 'mission' and 'procreasion' were distinguishable. Doubtless it has since found able defenders, but two thorough reasons for two who give the same account of it, historically or doctrinally, and some of them are neither consistent with each other nor with themselves. Others, in arguing for it against the Easterns, have grievously mistated facts, and numberless passages have been adduced in support of it from a father, either from another, with no interpolated. I know of no parallel to it in this respect in any religious controversy before or since. If the Athanasian Creed was not expressly coined for this controversy, it was employed in this controversy first in a real weapon against the heretics" (Foulkes, Letter to Archbishop Manning, London, 1868).

For the renewal of the question, with a view to union between the Greeks and Latins at the Council of Florence, see FLORENCE. The great English di- vine, tine, and Waterland, while adhering to the doctrine of the West, condemn the intercalation of the creed. So Pearson remarks: "Thus did the Oriental Church accuse the Occidental for adding filioque to the creed. For a creed, the doctrine of the West, that Leo refused to add the filioque to the creed, and even had the creed itself, in its original form, in two silver shields (in Greek and Latin), which he hung up in St. Paul's Church as a testimonium to his unwillingness to break his oath of allegiance to the general councils by adding to the same, which he gave his sanction to the doctrine of the filioque as scriptural and sound. In the latter part of the century the troubles with Photius (q.v.) renewed the controversy between East and West; and the Council of Constantinople (A.D. 879), which was attended by 800 bishops, anathematized all who added the filioque. No pope had yet formally authorized the addition, and yet it was coming into general use in the West, under the authority, especially, of pope Nicholas I (Neale, Eastern Church, p. 1165 sq; Mansi, xvi, 255). Finally, the 10th, 11th, and 12th centuries, when the Church was occupied with the defense of the Crusades against the Moslems and the heathen, the controversy became academic, and did not attract much public or open way; "no decreet, encyclical or synodalical, announcing her adhesion. The thing was done in a corner, and, for a curious liturgical writer of the Western empire, who went to see his sovereign, Henry II, crowned at Rome, A.D. 1014, by pope Benedict, he was good enough to give a hint of the way in which it occurred. Berno therefore records what he witnessed with his own eyes and ears; and being engaged himself in a work on the Mass, he would naturally be very particular in his inquiries when he came to Rome, of all places, how things were done there. Now his account is that "up to that time the Romans," that is, the Church of Rome generally, "had in no wise changed the creed after the gospel; but that the lord emperor Henry would not desist till, with the approval of all, he had persuaded the apostolic lord Benedict to let it be chanted at high mass." Thus Beccard inaugurated the addition, Charlemagne patronized it, and Henry II it got it adopted by the popes themselves. When this had been done, the pontifical oath was changed. Later popes, of course, shrank from imprecating a judgment upon themselves, according to the terms of the oath. For in this case they failed to keep the decree, as the general councils enumerated it in its, 'nuspe ad usum apicem,' when they felt they had notoriously failed to do so by the creed. That clause was accordingly struck out. For the last 1000 years the Roman communion is not committed to the use of a creed which is that of the Church of the West, but of the Greek Church. Nor do say, therefore, to the use of a creed which is heterodox. On the theological question involved in it I would wish to speak with becoming reverence; but thus much is certain, that the addition which forms its distinguishing feature was made and had been in use many centuries before any pope judged it allowable, much less necessary; many centuries before theologians in the West had agreed among themselves whether the terms 'mission' and 'procreasion' were distinguishable. Doubtless it has since found able defenders, but two thorough reasons for two who give the same account of it, historically or doctrinally, and some of them are neither consistent with each other nor with themselves. Others, in arguing for it against the Easterns, have grievously mistated facts, and numberless passages have been adduced in support of it from a father, either from another, with no interpolated. I know of no parallel to it in this respect in any religious controversy before or since. If the Athanasian Creed was not expressly coined for this controversy, it was employed in this controversy first in a real weapon against the heretics" (Foulkes, Letter to Archbishop Manning, London, 1868).

The commissioners for a review of the English Prayer-book, 1889, expressed in a note their opinion that something should be done to satisfy the Greek Church. At a later period the non-juring prelates made overtures to the Greeks, stating that in the clause filioque nothing more is meant than "from the Father by the Son," to which the Greek patriarch and Synod of Constantinople replied (April 12, 1718): "We receive no other rule or creed than that which was set forth in the first ten chapters of the second Holy Gospel, in which it was decreed that the Holy Ghost proceeds 'from the Father.' Therefore we receive none who add the least syllable (and the most perfect word would fall far short), either by way of insertion, commentary, or explication to this holy creed, or who take it away. For nothing in it can be taken away without anathematizing all such as shall either take from or add to it any word or syllable. If any one has formerly inserted any word, let it be struck out, and let the creed be unaltered as it was at first written, and is to this day, after so many years, read and believed by us. Now, concerning this point, we thus believe that there is a twofold procession of the Holy Spirit: the one natural, eternal, and before time, according to which the Holy Spirit proceeds from the Father alone; and of which it is both written in the creed, and the Lord has said, 'the Comforter, whom I will send unto you from the Father, even the Spirit of truth, which proceedeth from the Father' (John xv, 26). The other procession is temporal and deputative, according to which the Holy Spirit is externally sent forth, derived, proceeds, and flows from both the Father and the Son, of the Godhead, and is the sole cause of his temporal and outward procession, we agree that he proceeds, comes, or is sent by the Son, or through the Son's mediation, and from the Son, in this sense of an outward procession, for the sanctification of the creatures. But this manifestation, or mission, we do not pretend to a process which should be comprehended in the Person of the Pascal, who, because of the limited dialect of the Latin language, which is unable to express the manifestation, or mission, by one word, and the ἐκπορευόμενος, or procession, by another, have called them both processions, which afterwards grew into error, and made them take the external procession for that manifestation, which was in time" (Amer. Quart. Church Rev. Apr. 1868, p. 98).

The historical question is very thoroughly discussed by the Rev. E. S. Foulkes (a convert from the Anglican to the Roman Church) in several recent works of his, especially in his History of the Words Filioque to the Creed (Lond. 1867). Mr. Foulkes states that he has no objection to the doctrine of the double procession in the abstract, but he objects to its "embodiment in the creed in a word of four syllables, foisted in without authority, retained there without any other ancient process which can be considered for it, in a proposition set apart for the declaration of another truth" (p. 31). Moreover, he objects to the clause because it binds the acceptance of a proposition which has two meanings: "the sense in which the Holy Ghost is said to proceed from the Father by the Son" is every way comprehended with the sense in which he is said to proceed from the Father." And he expresses his conviction that this clause has a good deal to do...
FILIOQUE CONTROVERSY

with the Socinianism and Unitarianism so long rife in the West. Mr. Foulkes notices that in the East, where the filioque is not adopted, "there is positively nothing in this doctrine that has excited the exasperation of Christians;" and it happened to himself once to meet with this reply from a literary friend with whom he had been discussing the clause—"I find my escape from it in Unitarianism."

He proceeds to the whole question involved, viz., Holy Ghost, Procession. Suffice it here to say, that while the Latins are inexcusable, according to their own canon law, for their addition of the filioque to the creed, they are still correct as to the doctrine. Their deeper anthropological investigations naturally developed the doctrine of the Holy Ghost. Thus the Son. Palmer ("Discussions on Subjects relating to the Eastern Communion," Lond. 1858, 8vo, p. 103 sq.) gives the following summary of the controversy: I. That when the expression of the Holy Ghost proceeding "also from the Son" was first noticed and objected against by the Greeks, the Latins explained it away or dissembled it, instead of openly insisting on it as truth. Again, II. That when, at length, they had all received it themselves, the Latins attempted to force it into the creed, and to impose it on the Church at large by overbearing the Greek acquiescence in it. Again. III. That in seeking to impose it upon the Easterns, the Latins generally have rested it upon manifestly false grounds, as upon the ground of unbroken and explicit tradition. Again, IV. That a vast multitude of passages, formerly alleged by the Latins, both from Greek and Latin authors, have been too easily to be interpolations altogether, or to have been corrupted.

Lastly, V. That some of the texts most insisted on by the Latins at the Council of Florence, and shown afterwards, by Zornikaff, to have been corrupted, have, since Zornikaff wrote, been surrendered, even by Latin scholars; so that, the case, as respects the critical examination of passages, has gained materially in strength since the Council of Florence. But to reject a doctrine not revealed in Scripture, nor handed down by unbroken tradition from the beginning, but "dug out" or developed by the Church in later ages, and violently thrust upon the rest on false grounds, can never be heresy. If, indeed, it were confounded to be a novelty and a development, and sufficiently shown to be, notwithstanding, a legitimate and necessary development, there might be a greater reason for it. On the contrary, so many of the Greeks assert, not only that the Latin doctrine is false in itself, but also that it is a heresy, and that the Latins are heretics for maintaining it. But against this view it is fair to object. I. That those heretical consequences which seem to flow from the assertion of the procession from the Son as well as from the Father, and on account of which the doctrine itself is said to be heresy, are clearly rejected and condemned as heresies by the Latins, no less than by the Greeks; which would seem to reduce the Latin error, if it be an error, to a mere misconception and insinuation of words. II. That all heresies spring from evil motives; but the motive which prompted the assertion of this doctrine is commonly admitted, even by the Greeks, to have been good, namely, the desire to maintain, against the Arians and other heretics, the co-essentiality of the Father and Son. The Latins, on the other hand, say, that the Greeks have repeatedly and all along offered to unite and communicate with the Latins, winking at all other faults if only the form of the creed were restored, which they could not have done if the doctrine of the procession from the Son had been held to be heresy in itself. IV. That when it is only some or many passages, but all those passages in St. Augustine and other Latin fathers which assert the procession from the Son, have been shown to be corrupt or interpolated, or, in sense, to mean no more than they were stated to mean in the explanation given at Rome to Maximus the martyr in the 7th century, the Latins, even if they be in error, cannot be called heretics for adhering to a doctrine seemingly taught and bequeathed to them by the great saints and fathers of the Church, no less than by their own. We conclude, then, that so long as the "filioque" is not interpolated into the creed without the consent of a council, the question of the doctrine in itself is still open and pending, and that the Greeks are the only ones of them that deny it, nor the Latins if they assert it, so long as they both desire that the subject may be fairly and religiously decided by an ecumenical council."

FILLAN, ST. "Two Scoto-Irish saints of the name of Fillan appear in the Church calendars, and have left their mark on the topography of Scotland and Ireland. (1.) ST. FILLAN, or Faolan, named the Lep- er, had his yearly festival on the 30th of June. His chief church in Scotland was at the east end of Loch Erne, in Perthsire, where 'St. Fillan's Well' was long believed to have supernatural powers of healing. A seat in the rock of Dunfillan still keeps the name of 'St. Fillan's Chair;' and two coves beside it are said to have been hollowed by St. Fillan's knees in prayer. His Irish church is at Ballyheiday (anciently called Killihelan or Kill Faolan), in the barony of Cullenagh, in Queen's County. (2.) ST. FILLAN, the abbot, the son of St. Kettigern of Inchcalloch, in Loch Lomond, lived in the 8th century, and had his yearly festival on the 7th of May. In the island of Cluan, near Islay, very many of the Greeks assert, not only that the Latin doctrine is false in itself, but also that it is a heresy, and that the Latins are heretics for maintaining it. But against this view it is fair to object. (1) That those heretical consequences which seem to follow from the assertion of the procession from the Son as well as from the Father, and on account of which the doctrine itself is said to be heresy, are clearly rejected and condemned as heresies by the Latins, no less than by the Greeks; which would seem to reduce the Latin error, if it be an error, to a mere misconception and insinuation of words. (2) That all heresies spring from evil motives; but the motive which prompted the assertion of this doctrine is commonly admitted, even by the Greeks, to have been good, namely, the desire to maintain, against the Arians and other heretics, the co-essentiality of the Father and Son. The Latins, on the other hand, say, that the Greeks have repeatedly and all along offered to unite and communicate with the Latins, winking at all other faults if only the form of the creed were restored, which they could not have done if the doctrine of the procession from the Son had been held to be heresy in itself. (3) That when it is only some or many passages, but all those passages in St. Augustine and other Latin fathers which assert the procession from the Son, have been shown to be corrupt or interpolated, or, in sense, to mean no more than they were stated to mean in the explanation given at Rome to Maximus the martyr in the 7th century, the Latins, even if they be in error, cannot be called heretics for adhering to a doctrine seemingly taught and bequeathed to them by the great saints and fathers of the Church, no less than by their own. We conclude, then, that so long as the "filioque" is not interpolated into the creed without the consent of a council, the question of the doctrine in itself is still open and pending, and that the Greeks are the only ones of them that deny it, nor the Latins if they assert it, so long as they both desire that the subject may be fairly and religiously decided by an ecumenical council."
so lately as the year 1784. Sixty years later, the 
Quirrigch still commanded reverence; but its healing 
virtues were now only tried on cattle, and its once opu-
ulent keepers had fallen to the rank of farm-laborers.
It was publicly exhibited in Edinburgh in the year 
1818, before being carried to Canada, where it now is,
in the hands of a descendant of its old custodians, a
farmer named Alexander Dewar. He puts such a 
value on the relic that he has hitherto refused to part 
with it for less than £400 sterling, or 1000 acres of 
Canadian land. It has been recently figured and de-
scribed by Dr. Daniel Wilson in a paper in the Cana-
idan Journal, No. xxiv, reprinted in a pamphlet, with
the title of The Quirrigch, or Croesus of St. Fillan (To-
ronto, 1859); and in the Proceedings of the Society of
Antiquaries of Scotland, vol. iii. pt. ii, p. 238, plate xxvi
(Edinb. 1881). A limb in the river Fillan or Doch-
art, in Strathfillan, was long believed to work woe-
derful cures on insane persons, who were immersed
in the stream at sunset, and left bound hand and
foot till sunrise in the ruins of the neighboring
church of St. Fillan. A handbell, which bore the
name of St. Fillan, was also believed to work mirac-
ules."

"Fillet" is an erroneous translation in the A. V. of
two Heb. words; דָּשָּׁנָה, "chassakun", joynings (comp.
Exod. xxviii, 17, 38; xxvii, 17), the poles or rods
which served to join together the tops of the columns
around the court of the tabernacle (q. v.), and from
which the curtains were suspended (Exod. xxvii, 10,
11; xxxvi, 38; xxxviii, 11, 12, 17, 19). כְּתֻבָּה, cut-
ch a thread (as elsewhere rendered), a measuring-line 12
cubits long for the circumference of the pillars of cop-
er in Solomon's Temple (Jer. iii, 21). See COLUMN;
GARLAND.

"Fillet," a small flat face or band in classical ar-
chitecture, used to separate mouldings; in Gothic ar-
chitecture, a flat band on a curved moulding, used
to decorate a shaft on a larger moulding. When
on the front of a large moulding, it is called its keel; on the sides, it is
called a wing. In the cut, a a are examples of fillets.

"Fin," ("finn", semaurp), of uncertain etymol., the
fin of a fish (q. v.), a distinctive mark of such as might
be eaten under the Mosaic law (Lev. xi, 9, 10, 12;
Deut. xiv, 9, 10). See CLEAN.

"Final Perseverance." See FINESEVANCE.

"Fine" or nucl for damages (q. v.). In some in-
stances, by the Mosaic law, the amount of a fine, or
of an indemnification that was to be made, was deter-
mined by the person who had been injured; in other
instances it was fixed by the judge, and in others was
defined by the law (Exod. xxii, 19-36; Deut. xxvii, 19,
29). Twofold, fourfold, and even fivefold restitution
of things stolen, and restitution of property unjustly
retained, with twenty per cent. over and above, was
required. Thus, if a man killed a beast, he was to
make it good, beast for beast. This ordinance, ob-
erves Michaelis (Laws of Moses, art. 169), appears
only incidentally in Lev. xxiv, 18, among criminal
laws. If an ox pushed or gored another man's servant
to death, his owner was bound to pay for the servant
thirty shekels of silver (Exod. xxi, 28). In the case
of one man's ox pushing or goring another's to death,
it would have been a very intricate point to ascertain
which of the two had been to blame for the quarrel,
and therefore both owners were obliged to bear the
loss. The living ox was sold, and the price, together
with the dead one, equally divided between them
(Exod. xxii, 66). If, however, the ox had previously
been notorious for pushing, and the owner had not
taken care to confine him, this made a difference; for
then, to the man whose ox had been pushed, he was
obliged to give another, and the dead ox he got him-
hisself (Exod. xxi, 36). If a man dug a pit and did not
cover it, or let an old pit belonging to him remain
open, and another man's beast fell into it, the owner
of the pit was obliged to pay for the beast, and had no
payment (Exod. xxii, 28, 34). When a fire was
kindled in the fields, and did any damage, he who
kindled it was obliged to make the damage good (Exod.
xxii, 6). See PUNISHMENT.

"Filler," ("tweá"", tawrep), a gold and silver worker
(Prov. xxv, 4). See REFINER. In Judg. xvii, 4, our
version renders the word "founder." in Isa. xiii, 7,
"goldsmith." It refers especially to the melting of
fine metal. See FURNACE. The Egyptians carried the
working of metals to a very extraordinary de-
gree of perfection, as their various articles of jewellery
preserved in our museums avince; and there is no
doubt the Hebrews derived their knowledge of these
arts from this source, though there is at the same time
reference to their being known before the Flood (Gen.
xiv, 19-22). See METAL.

"Finger," ("eéa"", "eérnołc"), besides its ordi-
nary meaning, is used in Scripture to denote the spe-
cial and immediate agency of any one. See ARM.
The Egyptian magicians, terrified by the numerous
plagues inflicted upon their country, at length said,"This is the finger of God." in Isa. (19). i. e. this is God," in God's own power," i. e. the power of God himself (Exod. vii, 19). Moses gave
the tables of the law written by the finger (personal
direction) of God to the Hebrews (Exod. xxxi, 18).
The heavens are said to be the work of God's fingers,"i.
e. his power (Psa. viii, 8). Christ cast out devils
with the finger or power of God (Luke iii, 20). "To
put forth the finger" is a bantering, insulting gesture
(Isa. lvi, 9). Some take this for a menacing gesture,
resembling that which Nicodemus stretched out his hand against the Temple,
threatening to burn it (2 Macc. xiv, 38). "Four
fingers thick" occurs as a measure in Jer. iii, 21. See
RING.

"Finnal," the cluster of foliage that is frequently
used to ornament the top of pillars, canopies, pedi-
ments, etc., in Gothic architecture. The term is also
often used as synonymous with the pinnacle of a spire,
roof, or canopy.

"Finishing-pot," ("pawrpo", mateurp), a crucible or melt-
ing-pot (Prov. xvii, 3; xxvii, 21). See METALLUR-
GY. The use of these for reducing gold was famil-
ary to the ancient Egyptians. Much of the course
be expected from the objects found in the excavated
tombe to illustrate the means employed in smelting the ore, or to disclose any of the secrets they possessed in metallurgy; and little is given in the paintings beyond the use of the blow-pipe, the forges, and the mode of concentrating heat by raising sheets of metal round three sides of fire in which the crucibles were placed. See Furnace. Of the latter, indeed, there is no indication in these subjects, unless it be in the accompanying woodcut; but the use of the bellows is suggested, and some which have been found in Egypt are preserved in the museum for ever cold (Whitkem). At the bottom, a nearly five inches in diameter at the mouth, and about the same in depth, and present the orderly form and appearance of those used at the present day" (Wilkinson, Anc. Eg. abridgm. ii, 188). See Handicraft.

Finland, when first mentioned in history, was inhabited by tribes belonging to the whole Finnish nations, which by piracy and frequent invasions became especially formidable to the Swedes. The latter submitted with difficulty and only for a short time the coast of Finland, while the republic of Novgorod extended its rule over the southern branches of the Finns. The Finns, however, not long after the pagans were defeated, a letter inciting them to invade Sweden, to conquer them, and compel them to adopt Christianity. Accompanied by bishop Henry, of Upsala, an Englishman, he landed in 1157 on the south-western coast, and at first met with little resistance. The first church was built at Venden, near the town of Abo, the foundation of which had likewise been laid by Eric. When Eric returned to Sweden, bishop Henry remained in the country, but the progress of Christianity was very slow, as the Finns had yielded only to compulsion; the mission had not reached the North, nor its influence the language, and the poverty of the language presented the greatest obstacles to an adequate designation of the new Christian ideas. While outwardly professing Christianity, most of the converts remained secretly addicted to their old pagan ideas, or at least mixed up Christianity doctrine with their heathenism. Bishop Henry baptized a large number, established an episcopal see at Rendsmacke, and finally lost his life (1166) in consequence of his zeal in enforcing Church discipline. After the complete triumph of Christianity, the Finns venerated him as the first apostle and patron saint. He was commemorated on the 19th of January and the 18th of June; his picture, exhibiting his full episcopal vestments, with an axe by his side and the murderer at his feet, was hung up in every church, and many miracles were ascribed to his relics (see Henry, bishop of the Finns). His successor, Rudolph, was carried off by the Courlanders and killed. The progress of Christianity was considerably delayed by the opposition of the Russians to the advance of the Swedes, on whom the existence of the feebler Christian Church was wholly dependent. In 1158, Abo was invested by the Russian Orthodox bishop, also an Englishman, had to seek a refuge upon the island of Gotland. In 1249, the brother of the king of Sweden, Birger Magnusson, the first yarl of the kingdom, landed on the southern coast of Asteroth, slaid the tribe of the Tavasti, established the fortress of Tavastehorg, subsequently called Tavastehorg, built several churches, and compelled the inhabitants to accept Christianity and to pay taxes to the bishop. These taxes the fifth bishop, Bero, of his own accord, ceded to the king. Another great Swedish expedition was undertaken by the crusaders under the command of the guardian of the minor king, Birger II. The pope not only sanctioned this expedition, but granted to the knights and warriors who took part in it the same indulgences as to the Crusaders. Thorkel landed with a large fleet, overpowered the inhabitants, and established the fortress of Viborg. Bishop Peter, of Westerum, announced Christianity to the tribes which were still pagans, and the Swedish arms left to the natives only the choice between Christianity and slavery. Thus Christianity was gradually forced upon the whole nation, with the exception of a few remote districts where paganism continued to maintain itself. Though planted and spread by force, Christianity finally rooted itself in the minds of the people by means of a new preach. The episcopal see of Abo attained considerable celebrity. The number of churches was largely increased, the cathedral school of Abo was numerously attended, and gradually six monasteries were established. The Reformation met in Finland with such success that 2 monasteries were soon the Lutheran Church superseded Roman Catholicism altogether. In consequence of the wars between Sweden and Russia in the 16th and the beginning of the 19th centuries, Finland was lost to Sweden and gained by the emperor of Russia. In 1721, at the peace of Nystadt, Russia received the towns of Viborg and Keyholm; in 1748, at the peace of Abo, a territory of about 4800 square miles, with the fortresses of Nyborg, Frederiksham, and Savolax; and in 1809, at the peace of Frederiksham, the whole of Finland. Emperor Alexander I reunited Viborg, which for some time had constituted a separate province, with Finland, which retains its old Constitution, its Swedish laws, and Lutheran religion. Finland is, in point of administration, wholly separated from Russia Proper; the highest authority is the imperial senate for Finland, consisting of 16 natives, with the assistance of a governor general. The diet, as formerly in Sweden, consists of four estates, nobility, clergy, burghers, and peasants.

The population of Finland in 1887 amounted to 2,292,578, of whom 41,002 were connected with the Greek Church, which has six main churches and 2 monasteries. The Roman Catholics have a church in Viborg and in Helsingfors. Nearly the whole remainder, a population of about 2,190,000, belongs to the Lutheran Church. The organization of the Lutheran Church of Finland is in every respect similar to that of the Lutheran Church of Sweden. Liturgies, hymn-books, catechism, and other Church books, are substantially the same as in Sweden. The Church has one archbishop, of Abo (the archbishop resides at Helsingfors), and two bishops, of Borgo and Kuopio, the latter of which is the residence of the archbishop. In 1867 was 214. Most of the congregations have, besides the pastor, a chaplain, also a church council. The churches are generally well attended. In most of the churches, especially in the country, the sermons are preached in the Finnish language; in others, both Finnish and Swedish are used; and in some, Swedish exclusively. The highest literary institution is the University of Helsingfors (until 1847 at Abo). It has among the faculties one of Lutheran theology, about 45 professors, and 1700 students. There is also a theological faculty at Helsinki, which has 6 gymnasia, 13 secondary and 3 primary schools, 3 female institutions, and a number of schools for special purposes. At the higher institutions instruction is generally given in Swedish; but the use of the Finnish language is advancing at the expense of the Swedish, which is the official language of the Russian government. An Evangelical Society was established in 1817; there are also several Bible Societies.—Wetzer u. Welte, Kirchen-Lehrbuch, iv, 70; Wiggers, Kirch. Statistik, ii, 428; Rühe, Finnland u. seine Bewohner (Lepa), 150 (1849). A. J. Finlay, James J. Bradley, one of the most distinguished and useful pioneers of Methodism in Ohio, was the son of the Rev. R. W. Finley, and was born in North Carolina, July 1, 1781. He received a good
education from his father. In 1801 he married, and settled in what is now Highland County, Ohio. In 1818, while serving a circuit as an itinerant, he joined the Baptist Church, and for some years he was a missionary among the Maury Indians near Natchez. For six years he edited, at St. Louis, the *Liberator Advocate*, devoted to African colonization, in which cause he was greatly interested through life, and was pastor of the Presbyterian Church at Metuchin, N. J., and in 1858 principal of the Presbyterian Female Institute at Talladega, Ala., where he died July 2, 1860.—Wilson, *Presbyterian Almanac*, 1861, p. 88.

Finley, Robert W., a distinguished Methodist Episcopal minister, was born in Bucks County, Pa., June 9, 1834. He was converted at seventeen, in 1850, and entered Princeton College, N. J., where he spent seven years in general and theological studies. In 1874 he was licensed to preach in the Presbyterian Church, and was sent as a missionary to Georgia and the Carolinas. Here he was a pastor as well as a preacher, and was often with General Marion in his expeditions, and incurred much enmity and risk of life from the Tories. In 1874 he went to Hampshire County, then in New Virginia, where he preached two years. In 1876 he emigrated to Kentucky, and eventually opened a school for students in divinity, and a number of his pupils were distinguished in subsequent life. In 1876 he went with general Massie to explore the Scioto country, then in the Northwest Territory, and in May, 1796, he settled on the Scioto, below Chillicothe. In 1808 he connected himself with the Methodist Church, and in 1811 or 1812 joined the Ohio Conference as a travelling preacher. For many years he labored with great success, and received hundreds into the Church. When almost eighty and superannuated, he mounted his horse, with his books and clothes, and set off as a missionary to Saut St. Marie, and there formed a church and conducted a camp-meeting. He died at Germantown, Ohio, Dec. 8, 1840.—Minutes of Conference, i. 299.

Finley, Samuel, D.D., a Presbyterian minister and president of New Jersey College, was born in County Armagh, Ireland, and came to America in 1794. On his arrival at Philadelphia he renewed his studies preparatory to the ministry, and was licensed in 1740. He labored long and successfully in West Jersey, in Deerfield, Greenwich, and Cape May, and supplied the church in Philadelphia for a time. He was ordained by the Presbytery of New Brunswick in 1742, and in 1744 he accepted a call from Nottingham, Maryland, where he continued for nearly thirty years, and where he kept an academy of great reputation. In 1761 he was called to the presidency of New Jersey College, and removed to Princeton, and soon after was honored with the degree of D.D. from Glasgow. He died July 17, 1766. He published a sermon entitled *Christ triumphing and Satan roaring*, 1741:—A *Refutation of a Sermon on the Doctrine of Conversions*, 1748:—*Satan stripped of his angelic robes*, 1749:—*A charitable Pies for the Speechless*, 1747:—A *Vindication of the preaching*, 1748:—A *Sermon—The Curse of Meros*, 1749:—*Satin stripped of his angelic robes*.—Sprague, *Annals*, iv. 146.

Finnan, an Irish ecclesiastic whom Oisin, king of Northumberland, called to the abbey of Lindisfarne, and to superintend the churches in his kingdom. The Venerable Bede says, "He was a man of fierce and rough nature, but very successful in ministerial labor, he baptized Pais, king of the Wealas Angles, and sent four priests to instruct his subjects in Christianity." He also consecrated Ceadmon, who afterwards became a very prominent bishop among the East Angles, and baptized Sigebert their king, together with great numbers of the common people. He was very zealous in the temporal, as well as the spiritual interest of the Church. During his
superintendency, Bede says "he erguson a church on the island of Lindisfarne fit for an episcopal see, which, nevertheless, he built after the manner of the Scots [Irish], not of stone, but of sawn oak, and covered it with thatch" (Eccles. Hist. lib. iii, c. xxxv). Years afterward, the clergy of the bishopric of these churches in Northumberland, Theodore, archbishop of Canterbury, required this church to be re-consecrated, and dedicated to the patronage of St. Peter. Finnan, having for ten years superintended the abbacy of Lindisfarne and the churches of North-umbrian under his well-known title of "bishop," died A.D. 661. He left a treatise entitled Pro Voteri Pacchali Edus, regarding the Irish and Oriental time of keeping Easter as the old and true time, and that of Rome as of recent date. See Bede's Eccles. Hist. ; Illustr. Men of Ireland, vol. i. (D. D.)

**Finns**. "Geographically the name of the inhabitants of Finland, but in ethnology that of a considerable branch of the Ugrarian race, dwelling for the most part in Finland, though with some representatives in Sweden and Norway as well. The Ugrians have been classed among the nations said to have a Mongolian origin. Dr. Latham places them among the "Tauranian Altic Mongolides," and divides them into Ugrians of the East and Ugrians of the West. The Western Ugrians consist of Lapps, Finns, Permians, and other nations or tribes in the north and north-west of Russia, and of the Magyars in Hungary. The Magyars are the most numerous, and next after these come the Finns, comprising about 2,000,000 of individuals. All the other tribes of Western Ugrians do not together comprise so many. The Finns, in common with the other Ugrians, are of the Mongolian type. The Finns, from having been originally a nomadic race, have for many centuries been stationary and civilized. Long before the arrival of the German and Slavic nations, in the north of Europe, the Ugrians, or Oapes (for the name, so common in fiction, is really of historic origin), possessed it, and were gradually pushed further north and east by the new invaders. Both Finns and Lapps, there is good reason to believe, originally extended much further south than they do at present, occupying, perhaps, the whole of Sweden and Norway. "The Finns," says Prichard, "were in the time of Tacitus as savage as the Lapps; but the former, during the succeeding ages, became so far civilized as to exchange a nomadic life for one of agricultural pursuits, while the latter have ever continued as the various nomades, as well as the Siberian tribes of the same race—namely, the Wogula and Ostiaks. The Finns, as well as their brethren the Boormans, or Finns of the White Sea, had probably undergone this change long before the time when they were visited by the guest of Alfred. When the Finns were conquered by the Swedes, they had long been a settled people, but one of curious, and singular, and isolated character." See Finland.

**Fintanus or Fintan**, the founder of the monastery of Rheinau (q.v.), in the canton of Zurich. He descended from a noble family in the province of Leinster, Ireland. In a war between two chieftains, one chieftain killed Fintan's brother, and, fearing that Fintan would avenge the brother's death, caused him insidiously to be carried off by the Normans. Having changed his master several times within a few days, Fintan was to be taken to Scotland, but escaped when the vessel landed at one of the Orkney Islands. He had to spend three days on this uninhabited island, after which he swam, miraculously supported, to Scotland. He remained for two years with a bishop who had studied in Ireland; then, in compliance with a vow, he journeyed, not only to two, but to many other places, such as the monasteries of Aosta and Vara or Oria. It appears that many of these terms must be considered generic rather than specific in the modern sense, when so much care is bestowed on the accurate discrimination of one species from another. Thus oris, from which the epithet is derived, is a pine-tree in Scripture, whether we follow the common acceptation and consider it the cedar, or adopt the opinion of Celso, that the Ficus sycomorus is indicated. So baruti may have been applied by the Arabs, etc., not only to the saxine and other species of juniper, but also to plants, such as the cypress, which resemble these. In many of those cases, therefore, where we are unable to discover any absolute identity or similarity of name, we must be guided by the nature of the house of the Welts, the monastery which the grand-father and father of Wolfen had begun. After working at Rheinau for five years as a priest, he entered the monastery in 651, remained there five years, and thereupon became a hermit, leading for 22 years, from 556 to 578, a life of extreme asceticism. Thus he came to be venerated as a saint, even during his lifetime, throughout the whole region. When his friend Wolfen, who in the mean time had become abbot of Rheinau, returned from Rome with the relics of St. Blasian, Fintan took a portion of them to the monastery which he had founded, and the place was called St. Blasian.—Herzog, Real-Encyclopädie, xix, 491.

**Fir** (the name of an extensive family of coniferous evergreens; see Penny Cyclopaedia, s. v. Abies) is the uniform rendering in the Author. V. of מ"ד, בורק (from its being cut into planks, Gesenius, Thee. Heb. p. 246), which frequently occurs (2 Sam. vii, 5; 1 Kings vi, 8; 10; vi, 15, 34; ix, 11; 2 Kings ix, 28; 2 Chron. ii, 8; iii, 5; Psa. civ, 17; Isa. iv, 8; xlix, 24; xlii, 19; lv, 13; lx; Ezek. xxvii, 5; xxxi, 8; Hos. xiv, 8; Nah. ii, 8; Zech. xi, 2), and נִמְנָה, בורק, which is said to be only the Aramaean form of the same word (in Cant. i, 17). In most of the passages the terms rendered cedar and fir in the Author. V. are mentioned together. בורק is translated variously in the Sept. נוריעה, וּנָוְיָה (and Ezek. xxvii, 8), in the LXX. Німній, and in Isa. vi, 8, דֵּלָה דַּלְּהוּבָּו; in the Vulg. cliui abies, cupressus. It was a lofty tree (Isa. lv, 18), growing on Lebanon (Isa. xxxvii, 24), and of an ornamental figure (Isa. ix, 12). The passages from which any special account of its use can be derived are, 1. Of musical instruments (2 Sam. vii, 5); 2. Of doors (1 Kings vi, 34); 3. Of gilded ceilings (2 Chron. iii, 5); 4. Boards or decks of ships (Ezek. xxvii, 5), or planks for flooring (1 Kings vi, 15). Rosenmüller says, "In most of the passages where the Hebrew word occurs, it is by the oldest Greek and the Syriac translators rendered cypress." Celcius, on the contrary, is of opinion that בורק indicates the cedar of Lebanon, and that אֵרֶץ, which is usually considered to have that meaning, is the common pine (Pinus sylvestris), apparently because he conceives בורק to be changed from לְכַר, the Arabic name of pine. J. E. Faller, as quoted by Rosenmüller, conjectures that the Hebrew name בורק included three different trees which resemble each other, viz. the evergreen cypress, the thyme, and the sycamore. The last, or Juniperus sabinia, is so like the cypress that it has been called by that name, and the moderns have noticed the resemblance, especially as to the leaves. "Hence, even among the Greeks, both trees bore the old Eastern names of בּוּרָה, בּוּרָה, בּרֻתָה, or ברה" (Rosenmüller, Bot. of the Bible, trans. p. 200). The word בורק or בורק is slightly varied in the Syriac and Chaldee versions, being written בורקה in the former, and ברָה in the latter. All these are closely allied to ברעת, a name of the σάρωτον plant, which is the βάτανον, βάτινον, and βάταλον of the Greeks, and which the Arabs have converted into 바רא and 바רא. By them it is applied to a species of juniper, which they call ערא and ערא or ערא. It appears that many of these terms must be considered generic rather than specific in the modern sense, when so much care is bestowed on the accurate discrimination of one species from another. Thus oris, from which the epithet is derived, is a pine-tree in Scripture, whether we follow the common acceptation and consider it the cedar, or adopt the opinion of Celso, that the Pinus sylvestris is indicated. So barut may have been applied by the Arabs, etc., not only to the saxine and other species of juniper, but also to plants, such as the cypress, which resemble these. In many of those cases, therefore, where we are unable to discover any absolute identity or similarity of name, we must be guided by the nature of the...
FIRE

the trees, the use to which they were applied, and the situations in which they are said to have been found. Thus, as we find eres and berakā so constantly associated in Scripture, the former may indicate the cedar with the wild pine-tree, while the latter may comprehend the juniper and cypress tribe. See Cedar; Cypress; Juniper.

All these were extensively used for fuel. Thus, at this date in Lebanon (Balfour, Trees of Scripture, p. 11; Thenius on 1 Kings vi, 84; Saalschütz, Hebr. Arch. i, 280, note 4; Miller, Gardener's Dict. s. v. Cupressus; Stephens, Thes. Ling. Gr. s. v. πυξίς; Belon, Obs. c. 110, p. 155; Loudon, Arboretum, iv, 2163). In Hos. xi, 8, the "stone-pine" (Pinyus) has a cone containing an edible nut, seems to be intended (Kitto, Crit. Bible, in loc.), although Henderson (Comment. in loc.) thinks that a fruitless tree is there referred to by way of contrast.

See Tree.

Fire (properly πῦr, εσχαθίαν). On the origin of fire, see Kitto's Daily Bible Illust. i, 94. The applications of fire in Scripture are susceptible of the following classification:

1. Religious.—That which consumed the burnt sacrifice and the incense-offering, beginning with the sacrifice of Noah (Gen. viii, 20), and continued in the ever-burning fire on the altar, first kindled from heav- en (Lev. vi, 12; ix, 24), and rekindled at the dedication of Solomon's Temple (2 Chron. vii, i, 2). See SACRIFICE.

"Fire from heaven," "fire of the Lord," usually denotes lightning in the Old Testament; but, when connected with sacrifices, the "fire of the Lord" is often to be understood as the fire of God, and sometimes the holocaust itself (Exod. xxxi, 18; Lev. i, 9; ii, 3; iii, 5, 9; Num. xxvii, 6; 1 Sam. ii, 28; Isa. xx, 16; Mal. i, 10). See LIGHTNING.

The perpetual fire on the altar was to be replenished with wood every morning (Lev. vi, 12; comp. Isa. xxvi, 9). According to the Gemara, it was divided into three parts, one for burning the victims, one for incense, and one for supply of the other portions (Lev. vi, 15; see Ralans, Aniq. Hebr. i, 4, 8, p. 26; and xxvii, 10, p. 98). Fire for sacred purposes obtained elsewhere than from the altar was called "strange fire," and for use of such Nadab and Abihu were punished with death by fire from God (Lev. x, 1, 2; Num. iii, 4; xxvi, 61). See ALTAR.

2. Parallel with this application of fire is to be noted the similar use for sacrificial purposes, and the respect paid to it, or to the heavenly bodies as symbols of deity (see below), which prevailed among many nations of antiquity, and of which the traces are not now extinct: e.g. the Sabean and Magian systems of worship, and their alleged connection with Abraham (Spencer, De Leg. Hebr. ii, 1, 2); the occasional relapse of the Jews themselves into sun, or its corrupted form of fire-worship (Isa. xxvii, 9; compare Gesenius, s. v. γυρίζω, Theol. p. 489; see Deut. xvii, 3; Jer. viii, 2; Ezek. viii, 16; Zeph. i, 5; 2 Kings xxvii, 16; xxviii, 3; xxix, 13, 15, 14; comp. Jahn, Bibl. Arch. c. vi, § 405, 408); the worship or dedication of heavenly bodies or fire, or prevailing to some extent, as among the Per- sians, so also even in Egypt (Herod. iii, 16; see Wilkin- son, Anc. Eg. i, 328, abridgm.); the sacred fire of the Greeks and Romans (Thucyd. i, 24; ii, 24; Cicero, De Leg. ii, 8, 12; Livy, xxix, 12; Dionys. ii, 67; Plutarch, Numa, 3, 263, ed. Reiske); the ancient forms and usage of worship, differing from each other in some important respects, but to some extent similar in principle, of Mexico and Peru (Preccott, Mexico, i, 60, 63; Peru, i, 101); and, lastly, the theory of the so-called Gabriel of Persia, and the Parsees of Bombay. (Fra- ser, Persia, c. iv, p. 141, 162, 164; Sir R. Porter, Travels in Persia, i, 54, 56; Chariton, Peregrines i, 210; iv, 268; viii, 876 sq; Niebuhr, Travels, ii, 66, 67; Gann, Travels, b, i, p. 76; Gibbon, Hist. c. vii, i, 335, ed. Smith; Benj. of Tudela, Early Trav. p. 114, 116; Burchhardt, Syria, p. 113.) See LIOO Trait. On the heathen prac- tice of children "passing through the fire," see MO- LOCH.

3. In the case of the spoil taken from the Midian- ites, such articles as could bear it were purified by fire as well as in the water appointed for the purpose (Num. xxxi, 5). They were afterwards consumed by fire outside the camp (Lev. iv, 12, 21; vi, 30; xvi, 27; Heb. xiii, 11). The Nazarite who had completed his vow, marked its com- pletion by shaving his head and casting the hair into the fire on the altar on which the peace-offerings were sacrificed (Num. xvi, 18).

II. Domestic.—Besides for cooking, baking, and roasting purposes [see BREAD, FOOD, etc.], fire is often required in Palestine for warmth (Jer. xxxvi, 22; Mark xv, 44; John xviii, 18; see Harmer, Obs. l, 125; Rother, p. 79). For this purpose a hearth with a chimney is sometimes constructed, on which either lighted wood or pans of charcoal are placed (Harmer, 405). In Persia, a hole made in the floor is some- times filled with charcoal, on which a sort of table is set covered with a carpet; and the company, placing their feet on the carpet, draw it over themselves (Olearius, Travels, p. 294; Chardin, Voyages, vii, 190). Rooms in Egypt are warmed, when necessary, with pans of charcoal, as there are no fireplaces except in the kitchens (Lane, Mod. Eg., i, 41; Eng. in Eg., ii, 11). See COAL; FUEL.

On the Sabbath, the law forbade any fire to be kind- led even for culinary purposes (Exod. xxxv, 3; Num. xv, 22). As the primary design of this law appears to have been to prevent the proper privileges of the Sabbath day from being lost to any one through the care and time required in cooking victuals (Exod. xvi, 23), it is not decided whether the fire used for warmth on the Sabbath day was included in this interdiction. In practice, it would appear that the fire was never lighted or kept up for cooking on the Sab- bath day, and that consequently there were no fires in the houses during the Sabbath of the greater part of the year; but it may be collected, this winter fires for warming apartments were kept up from the previous day. Michaelis is very much mistaken with respect to the climate of Palestine in supposing that the inhabitants could, without much discomfort, dispense with the warmth during winter (Michaelis, Recht, iv, 195). To this general prohibition the Jews added various refinements: e.g. that on the eve of the Sabbath no one might read with a light, though passages to be read on the Sabbath by children in schools might be looked out by the teacher. If a Gentile lighted a lamp, a Jew might use it, but not if he had been lighted for the use of the Jew. If a festival day fell on the Sabbath eve no cooking was to be done (Mishna, Shabb. i, 3; xvi, 8, vol. ii, p. 46, 46; Moad Katon, ii, vol. ii, p. 287, ed. Surenhus). The modern Jews, although there is no cooking in their houses, have fires on the Sabbath day, which are attended to by a Chris- tian servant; or a charwoman is hired to attend to the fires of several houses, which she visits repeatedly during the day. See Sabbat.

III. Statutory Regulation.—The dryness of the land in the late 19th century led to the passage of laws in Syria which increases the liability to accident from fire (Jurdg. ix, 15). The law therefore ordered that any one kindling a fire which caused damage to corn in a field should make restitution (Exod. xxvii, 6; comp. Judg. xxv, 4, 5; 2 Sam. iv, 30; see Mishna, Maceqoth, vi, 5, 6; vol. iv, 48, Suren- hus; Burchhardt, Syria, p. 496, 620). This law was calculated to teach caution in the use of fire to the herdsmen in the fields, who were the parties most concerned. And it is to be remembered that the herdsmen were generally substantial persons, and had their assistant shepherds, for whose imprudence they were made responsible. Still no inference is to be drawn
from this law with regard to fires breaking out in towns, the circumstances being so very different. See DAMAGES.

IV. Penal.—Punishment of death by fire was awarded by the law only in the cases of incest with a mother-in-law, the slaying of a daughter of a priest (Lev. xxix. 14; xxxi. 9). In the former case both the parties, in the latter the woman only, was to suffer. This sentence appears to have been a relaxation of the original practice in such cases (Gen. xxviii, 24). Among other nations, burning alive appears to have been an instance of judicial punishment, at least of vengeance upon captives; and in a modified form was not unknown in war among the Jews themselves (2 Sam. xiii, 31; Jer. xxix, 22; Dan. iii, 20). In certain cases the bodies of executed criminals and of infamous persons were subsequently burnt (Josh. vii. 22; 1 Kings xi. 16). See Punishment.

V. Military.—In time of war towns were often destroyed by fire. This, as a war usage, belongs to all times and nations; but among the Hebrews there were some particular notions connected with it, as an act of strong revenge, or of divine dissolution. See ACSA, etc. The principal instances historically commemorated are the destruction by fire of Jericho (Josh. vi, 24); Ai (Josh. viii, 19); Hazor (Josh. xi, 11); Lachish (Judg. xxvii, 27); the towns of the Benjamites (Judg. xx, 48); Giblag, by the Amalekites (1 Sam. xiv, 54); and the Temple and palaces of Jerusalem by Nebuchadnezzar (2 Kings xxv, 9). Even the war-chariots of the Canaanites were burnt by the Israelites (Josh. vi, 24; vii, 20; xi, 6, 19), probably on the principle of precluding the possibility of recovery by the enemy in some degree of strength for which they had themselves no use. The frequency with which towns were fired in ancient warfare is shown by the very numerous threats by the prophets that the towns of Israel should be burnt by their foreign enemies. Some great towns, not of Israel, are particularly named; and it is possible that the use of fire in war was derived from the same source. See as far as the materials exist, the fulfilment of these prophecies in those more marked examples. Among the places thus threatened we find Damascus (Isa. xlix, 12, 13), Gaza, Tyre, Teman (Amos 1, 7, 10, 11). The temples and idols of a conquered town or people, were very often burnt by the victors (Isa. lii, 13). The Jews were expressly ordered to destroy the idols of the heathen nations, and especially any city of their own replaced into idolatry (Exod. xxxii, 20; 2 Kings x, 26; Deut. vii, 5; xii, 3; xiii, 16). One of the expedients of war in such circumstances was to set fire to the gates of the besieged place (Judg. ix, 49, 50). See SIEGE.

In battle, torches were often carried by the soldiers, which explains the use of torches in the attack of Gideon upon the camp of the Midianites (Judg. vii, 6). This military use of torches was very general among ancient nations, and is alluded to by many of their writers (Stallesi, Theb. iv, 6, 7; Stobaeus, Serm. p. 194; Michaelis, in Symbol. Lec. Bremens, iii, 255). See TORCH.

Signal fires on the tops of mountains were also anciently common as a telegraphic mode of conveying intelligence both in civil and military matters (Judith vii, 5). See BEACON.

VI. Funereal. — Incense was sometimes burnt in honor of the dead, especially royal personages, as is mentioned specially in the cases of Asea and Zebediah, and the ashes of Ahab (1 Kings ii); Jeshua and Jehoshaphat (2 Chron. xxxiv, 14; xxix, 12; Jer. xxxiv, 5). See FUNERAL.

VII. Metalurgical. — The use of fire in reducing and refining metals was well known to the Hebrews at the time of the Exodus (Exod. xxxii, 24; xxxiv, 22; xxvii, 2, 6, 17; xxxvii, 8; Numb. xxxvi, 58, 59). See HEAT, FURNACE.

VIII. Figurative Sense. — 1. Fire is in the Scriptures considered as a symbol of Jahveh's presence (see Mohner, De Deo in igne, Dread, n. d.) and the instrument of his power, in the way either of approval or of destruction (Exod. xiv, 19; Num. xi, 1, 8; Judg. xii, 20; 1 Kings xviii, 38; 2 Kings i, 10, 12; ii, 11; vi, 17; comp. Isa. li, 6; lvii, 15, 24; Joel ii, 30; Mal. iii, 2, 4; iv, 1; Pss. lii, 4; Rev. xx, 15; see Reiland, Am. Sac. ii, 5, 8, 26; Jerusalem, in Jerem. Am. ii, 1, p. 801; Josephus, Am. iii, 6, 8; viii, 4, 4). Thus he appeared in this element at the burning bush and on Mount Sinai (Exod. iii, 2; xix, 18). He showed himself to Isaiah, Ezekiel, and John in the midst of a pillar of fire (Isa. vi, 2; Ezek. i, 4, 4; Rev. xiv, 1, 5; 19, 15) and that he will so appear at his second coming (2 Thess, i, 7).

The people of Israel wandered through the desert, guided by the Lord under the form of a pillar of fire (see PILLAGA) (Exod. xiii, 21) and Daniel, relating his vision, in which he saw the Ancient of days, says, "As fire is consumed out of the midst of it so the seas are consumed" (Dan. vii, 10). God may be compared to fire, not only by reason of his glorious brightness, but also on account of his anger against sin, which consumes those against whom it is kindled, as fire does stubble (Deut. xi, 22; Isa. x, 17; Ezek. xxii, 5; Heb, viii, 19).

Cod. of Zoroaster 16. Flame from the Earth, Diana is anger (Psa. xviii, 8). His word also is compared to fire (Jer. xxiii, 29). Thus, in Jer. v, 14, "Behold, I will make my words in thy mouth fire, and this people wood, and it shall devour them." See FLAME.

2. Heaven is figurative of God's glory and power, the temple and the torrent which it inflicts rendered it a fit symbol of (1) whatever does damage and consumes (Prov. xvii, 27; Isa. ix, 18); (2) of severe trials, vexations, and misfortunes (Zech. xii, 9; Luke xi, 49) [see the dissertations on this text by Schrappen (Obs. Sacr. p. 127-146); Ellendor (Erlangen: 1774)]; (3) Cor. iii, 13 (see the dissertations on this text by Lichtenstein (Helmst. 1771); Georgi (Viteb. 1748); 1 Pet. i, 7; (8) of the punishments beyond the grave (Matt. v, 22; Mark ix, 44; Rev. xiv, 19; xxi, 6). See HELL.

3. Fire or flame is also used in a metaphorical sense to express the fiery feeling and divine inspiration (Psa. xxxix, 3; Jer. xx, 9). Thus the influences of the Holy Ghost are compared to fire (Matt. iii, 11), and the descent of the Holy Spirit was denoted by the appearance of lambs, flames, or tongues of fire (Acts ii, 3). See TONGUE. The angels of God also are represented under the emblem of fire (Ps. cix, 4). These are the more benign applications of the figure, in the sense of warmth, activity, and illumination. Compare LIGHT.

FIRE-BAPTISM. The expression "baptize with fire" (Matt. iii, 11; Luke iii, 16) is understood by most modern interpreters to be synonymous with baptism by the Holy Spirit, e. g. on the day of Pentecost (see Arthur, Tongue of Fire, passim, Lond. 1856, N. Y. 1857). Olhausen (Comment. ad loc., Am. ed. i, 268) regards "fire" here as put in contrast with the opposite element "water," i. e. the spiritual as distinct from the material baptism. So also Alford (Greek Text, ad loc. Matt.), who remarks that "to separate off ilia, AY, as belonging to one set of persons, and raip as belonging to another, when both are united in iapour, is harsh and confused." Same to Origin early understood the passage, and in this Neander, De Wette, Meyer, and many other expositors coincide. Dr. Robinson observes that "the wheaf are evidently those who receive Christ as the Messiah, and embrace his doctrines; these he will baptize with the Holy Ghost, i. e. he will impart to them spirit, the treasured treasures of the Holy Spirit; while the chaff are as evidently those who reject Christ and his doctrines, and live in sin; these he will baptize with fire unquenchable" (in Calmet, s. v. Baptism). There are monographs on this subject by Fries (280-300); Wetzel (Merk. Theol. i, 905 sqq., 802 sqq.); Olsander (Tubingen, 1765); Schmid (Lips. 1760), Ribov (Göt. 1744), Zeilich (Ger. 1787). Compare Baptism with Fire.
Firebrand ("flam, a"oker or burnt end of a stick, Isa. vii. 4; Amos iv. 11; "burn," Zech. iii. 2; "flame," Judg. xiv. 4, a lamp or torch [as often eldest son, to their flames, Ps. liii. 2.] Be the combustibles, Prov. xxvi. 18, comp. Eph. vi. 16). In Judg. xiv. 4, it is said, "And Samson went and caught three hundred foxes [jackals], and took firebrands, and turned tail to tail, and put a firebrand in the midst between two tails of all. A firebrand in such a position, if sufficiently ignited to kindle a blaze, could, on the firebrand, would soon have burnt itself free from the tails of the foxes, or have been extinguished by being blown over the ground. A torch or flambeau, on the other hand, made of resinous wood or artificial materials, being more combustible, of flame, would have answered a far better purpose, and such is the legitimate fire of the original. His "burning them tail to tail" was apparently intended to prevent them making too rapid a retreat to their holes, or, indeed, from going to their tails at all. They were probably not so tied that they should burn in different directions, and still might run divinely and slowly, side by side, and so do the more effectual execution. Had he put a torch to the tails of each, the creature, naturally terrified at fire, would instantly have bent itself to its hole, or some place of retreat, and thus design the Samson would have been wholly frustrated, while by burning two of them together by the tail they would frequently thwart each other in running, and thus cause the greater devastation. Similar configurations produced by animals, particularly by foxes, were well known to the Greeks and Romans. Thus Lydus (Alexandria, 344) makes Cassandra represent Ulysses as a cunning and mischievous man, "the man for many wiles renowned" of Homer, and styles him, very properly, λαμπροικτής, "fire-tail, a name for the fox (R. E. Fr. Ph. 386). The Romans, also, at their feast in honor of Cassandra, the national goddess of grain, offered in sacrifice animals injured to corn-fields, and therefore introduced into the circus, on this occasion, foxes with fire- brands so fastened to them as to burn them: a retaliation, as Ovid seems to explain it, of the injuries done to the corn by foxes so farished (Fasti, iv, 681, 707, 711). In the "Collectanea," there is an engraving representing a Roman brick found twenty-eight feet below a pavement in London, about the year 1675, on which is exhibited, in baso-relievo, the figure of a man driving into a field of corn two foxes with a fire fastened to their tails, which may have supposed to refer to the feast of Samson, or the burning moment of the Roman usage just mentioned. Richardson, in his Dissertation on the Eastern Nations, speaking of the great festival of fire celebrated by the ancient Persians on the shortest night of the year, says, "Among other ceremonies common on this occasion, there was one which, whether it originated in superstition or caprice, seems to have been singularly cruel. The kings and great men used to set fire to large bunches of dry combustibles, fastened around wild beasts and birds, which being let loose, the air and earth appeared one great illumination, and as these terrified animals naturally fled to the woods for shelter, it is easy to conceive that the confusions which would often happen must have been peculiarly destructive." See Fox.

Firebrand, "macabō, from παρασχω, to take up coals of fire, etc.; Sept. πραγματευω, Vulg. ignem receptan- dum, one of the vessele of the Temple service (Exod. xxvii. 2). Kings xvii. 19; Jer. iii. 19; chs. iii. xxxvii. 8; xxxviii. 11; xxxviii. 13; 2 Kings xxv. 2); elsewhere rendered "snuff-disch" (Exod. xvi. 31; Lev. xvi. 32; xxxvii. 23; Num. iv. 9; Sept. in praesigio, in praesigio, utstimia, Vulg. emorum) and "censer" (Lev. vi. 1; xvi. 12; Num. xvi. 6 sq.; 2 Chron. iv. 7; 27; Sept. ψαντομορφος, Vulg. saerubalum). These appear, however, to have been two different utensils, but essentially the same kind of article, probably 1. a metallic cinder-haus, of different sizes, for at least two uses: one, like a chafing-dish, to carry live coals for the purpose of burning incense; another, a snuffer-dish, used in trimming the lamps, in order to (carry the snuffers) and convey away the snuff. See Censer.

Fire-worship. For an account of the fire-worshippers of ancient times, the reader is referred to the article PERSANS. We attempt here only to sketch the origin and extent of pyrurgy among ancient nations. Under varying conceptions, as the symbol of purity, or of the divine presence and power, or as one of the constituent elements, or as typifying the destructive power of nature, fire was worshipped among many nations as an object of religious worship. If we attach any credit to the statements of the reputed Sanchoniathon, Usus, whose name reminds us of the Biblical Us, the son of Aram, was the first to introduce the worship of fire. The violence of the winds at Tyre, by rubbing the branches of trees together, caused this element to manifest its presence, and Usus thereupon erected rude altars to fire and wind, and made libations thereon of the blood of animals captured in the chase.

The prevalence of pyrurgy among the Canaanites is frequently referred to in the Scriptures, and the people of God are solemnly and repeatedly warned against forsaking his worship to join in the abominations which belonged to the worship of Moloch, the fire-god of these people (Lev. xvii. 2), he is a fire, 25; Deut. xiii. 2), he sets his children on fire (Kings xvi. 31), 10; 18; 2 Chron. xxviii. 8; Ps. civ. 37, 87, 88; Jer. vii. 19, 31, 5, 6; xxx. 82; Ezek. xxxi. 20, 21; xxlii. 87; yet, despite the denunciations of divine wrath and punishment, the Israelites sometimes apostatized to this worship, and caused their seed to pass through or be burnt in the fire to Moloch. See Solomon and his idolatrous daughter, the princess of Tyre; 1 Kings iii. 10, 18; 2 Chron. xxviii. 8; Psal. cxv. 8, 37; Jer. vii. 19, 31, 32; xxxi., xxxii. 8, 8; Ezek. xxviii. 20, 21; 2 Kings xxvii. 5; xxx. 82; Ezek. xxxi. 87, yet, when the denunciations of divine wrath and punishment, the Israelites sometimes apostatized to this worship, and caused their seed to pass through or be burnt in the fire to Moloch. See Solomon and his idolatrous daughter, the princess of Tyre; 1 Kings iii. 10, 18; 2 Chron. xxviii. 8; Psal. cxv. 8, 37; Jer. vii. 19, 31, 32; xxxi. 5; xxxii. 8, 8; Ezek. xxvii. 20, 21; 2 Kings xxvii. 5; xxx. 82; Ezek. xxxi. 87, yet, when the denunci-
banquets (ἐπίλυμα ἱπποῦ). For the ceremonies of worship in connection with these fire-temples, see MAQI and PAREZA.

Fire-worship was practiced also among the Carthaginians, Scythians, the ancient Germans, and among the ancient inhabitants of the British isles, and we find traces of it also in the Mexican and Peruvian worship (Prescott, Mexico, i, 60, 64; Peru, i, 101). Diodorus Siculus states (xx, 14) that the Carthaginians, when hard pressed by Agathocles, attributing their reverses to the anger of their ancestral divinities, whose worship they had neglected, sacrificed 200 of the noblest children (to which number 300 were added by voluntary offerings) to Chronos or Saturn, whose brazen statue was so constructed that a child placed in its arms rolled into a pit of fire. This deity was therefore evidently the same as the Molech of their Tyrian ancestors. The Hindoos worshipped Agni, the god of fire, and in their mythology fire was the symbol of Siva, the destroyer, a conception of this element seemingly in accord with that of the ancient Egyptians (Herod. ii, 16).

The sacred fire was carefully watched in the temple of Vesta in Rome, by virgins, consecrated to this special service (Virginque Vestales in urbe custodiunt ignem-foci publici semperimun, Cic. De Leg. ii, 8), and the extinction of this fire was regarded as a fearful omen, portending great disaster to the state, so that the unhappy Vestal whose careless negligence brought about such a misfortune was stoned therefor by a severe and degrading punishment (Liv. xxi, 11). The ancient Greeks paid worship to the same divinity in Hestia, reckoned one of the twelve great gods, and symbolized by the fire which burns upon the hearth, a duty, omitted to the detriment of domestic life.

We find the worship of the heavenly bodies frequently mentioned in connection with that of the gods of fire, and the former was doubtless older, as it was the higher form of worship (Deut. xvii, 3; 2 Kings xvii, 16, 17; xxxi, 8; xxiii, 5, 11; Isa. xxvii, 9; Jer. viii, 20; Ezek. viii, 16; Zeph. i, 5; Isa. l, c; Strabo, l, c). There appears, therefore, to have been some connection between them. According to the Greek legends, it was Prometheus, the fire-bearer, who, purloining the ethereal and beneficent element from the sun, the high divinity of the Sabean worship, conveyed it by stealth to men, brave therefore and inciting thereby the anger of Zeus, the Greek form of the name by which, according to Herodotus and Strabo, the circuit of the heavens was called by the Magi, and probably the same as Mithra. May we not find symbolized in this Prometheus the Hebrew link connection between sun-worship and fire-worship, Sabeanism and Magism? For an abstract of the relation of the Mitthean worship and the original doctrines of the Zend-Avesta, with references to works of modern writers on this subject, see De Guignaut's translation of Cunen's Rel. de l'Antiquité, notes viii, ix, to bk. ii, vol. ii, p. 728.—Smith, Dict. of the Bible, s. v. Molech and Fire; Aunt, Univ. Hist. (Lond. 1747, 21 vols. 8vo; see index in vol. xx); Gibbon, Decline and Fall of Rom. Empire (N. Y. 1832, 6 vols. 12mo), i, 228-238; Smith, Gentleman's Magazine, i, 250-252; Stoddart, Israel, Univ. Hist., 299-301, 801; Hyde, De Relig. vet. Persarum (Oxon. 1700, 4to); Cunen, Religion de l'Antiquité; Anquetil du Perron, Zend-Avesta, etc. (Improved in German translation by discussions of Kleuker); Richter, Auslese Religionsen des Oriens. (J. W. M.)

Firkin (fɪrˈkɪn), a measure, occurs only in John ii, 5, a metrētē, i. e. the Attic amphora, a measure for liquids, which is equivalent to the Hebrew sēfēr, and containing about 63 gallons (Smith's Dict. of Class. Antig. s. v. Metretes). See Metrology.

Firmament, a term introduced into our language from the Vulgate, which gives firmamentum as the equivalent of the etymology of the Sept. and the rākāt (םְדֵה) of the Hebrew text (Gen. i, 6); more fully וְרֶחֶם הָאָדָם firmament of the heavens, Gen. i, 14, 15, 17). See Heaven.

1. The Hebrew term is generally regarded as expressive of simple expansion, and is so rendered in the margin of the A. V. (l. c.); but the true idea of the word is a complex one, taking in the mode by which the expansion is effected, and consequently implying the nature of the material expanded. The verb וַיַּרְחֶם, rākāt, means to expand by spreading, whether by the hand, the hand, or an instrument. It is especially used, however, of beating out metals in the plateris (Exod. xxxix, 3; Num. xvi, 30), and hence the substantive לַרְחֶם, "broad plates" of metal (Num. xvi, 38). It is thus applied to the flattened surface of the solid earth (Isa. xlii, 5; xlv, 24; Ps. xxxxxvi, 6), and it is in this sense that the term is applied to the heaven in Job xxxvi, 18, "He hast spread (rather kammer-ōd) the sky which is strong, and as a molten looking-glass"—the mirrors to which he refers being made of metal. The sense of solidify, therefore, is combined with the ideas of expansion and tensity in the term rākāt.

Saalschütz (Archäol. ii, 67) conceives that the idea of solidification is inconsistent with Greece; indeed, it implies, according to him, the passage of the mist through the rākāt; he therefore gives it the sense of pure expansion—it is the large and lofty room in which the winds, etc. have their abode. But it should be observed that Gen. ii, 6 implies the very reverse. If the mist had undeniably raked it would have descended in the form of rain: the mist, however, was formed under the rākāt, and resembled a heavy dew—a mode of fractructifying the earth which, from its regularity and quietude, was more appropriate to a state of innocence than rain, the occasional violence of which associated it with the idea of divine vengeance. Further, the idea of some kind of solidity runs through all the references to the rākāt. In Exod. xxiv, 10, it is poetically represented as a solid floor, "a paved work of a sapphire stone;" nor is the image much weakened if we regard the word תַּרְחֶם as applying to the transparencies of the stone rather than to the paring as in the A. V., either sense being admissible. So again, in Ezek. i, 22-26, the 'firmament' is the floor on which the throne of the Most High is placed. That the rākāt should be transparent, as implied in the comparisons with the sapphire (Exod. l. c.) and with crystal (Ezek. l. c.; comp. Rev. iv, 6), is by no means inconsistent with its solidity. Furthermore, the office of the rākāt in the economy of the world demanded strength and substance. It was to serve as a division between the waters above and the waters below (Gen. i, 7). In order to enter into this description we must carry our ideas back to the time when the earth was a chaotic mass overspread with water, in which the material elements of the heavens were intermingled. The first step, therefore, in the work of orderly arrangement was to separate the elements of heaven and earth, and to fix a floor of partition between the waters of the heaven and the waters of the earth; and accordingly the rākāt was to support the upper reservoir (Ps. cxlviii, 4; comp. Ps. civ, 3, where Jehovah is represented as "building his chambers of water," not simply "in water," as the A. V.); the prep. 3 signifying the material out of which the beams and joists were made), itself being supported at the edge or rim of the earth's disk by the mountains (2 Sam. xxiii, 8; Job xxvi, 11). In keeping with this view the rākāt was provided with "windows" (Gen. vii, 11; Isa. xxxiv, 18; Mal. iii, 10) and "doors" (Ps. lxxviii, 23), through which the rain and the snow might descend. A secondary purpose which the rākāt served was to support the heavenly bodies, the sun and stars (Gen. i, 14), in which they were fastened as nails, and from which, consequently, they might be said figuratively to drop off (Isa. xiv, 12; xxxiv, 4;
FIRMAMENT

FIRMILIAN

Matt. xxiv. 29. In all these particulars we recognise the same view as was entertained by the Greeks, and, to a certain extent, by the Latins. The former applied to the heaven such epithets as "bræzen" ("χρυσός, ἡμερικία, ἤ', ἰδιαί, χρυσόν, ἰδιαί, χρυσόν), and "iron" ("σεβρύμα, χρυσόμακα, χρυσόμακα, χρυσόμακα, χρυσόμακα, χρυσόμακα), so used in the Scriptures (Lev. xvi. 19, xxvii. 36)—and that was not merely poetical embellishment apparent from the views promulgated by their philosophers, Empedocles, who described the heavens as στροφήματα καὶ σταυρολυτήσις of Mig. glacialized by fire (Pius, Plutar. Phil. ii, 11; Serv. Aen., Epod. Phys., 24; Pol. Crit., 77; Lat: De Opifl. Del., c. 17; comp. Karsten, Phil. Gr. Vater, Operum Reliquia, ii, 422; and Artemidorus, who taught that "summa coeli oris solidissima est, in modum tecti durata" (Seneca, Quest. vii, 18). The idea is expressed in the colo affixus sidera of the Latins (Pline ii, 39; xvii, 57). Plato also, in his Timaeus, makes mention of the visible heaven under the notion of νείας (from τίνος, to extend), not unlike the Hebrew derivation. If it be objected to the Mosaic account that the view embodied in the word ra'ak does not correspond with strict philosophical truth, the answer to such an objection is, that the writer describes things as they appear rather than as they are. But, in truth, the same absence of philosophical truth may be traced throughout all the terms applied to this subject, and the objection is levelled rather against the principles of astronomy than against anything else. We should not consider the Latin calum (calos), the "hollow place" or cave scooped out of solid space ("cavernae coeli," Lucret. iv, 172; compare Pott, Etymol. Forschungen, i, 25, 27; our own "heaven," i.e. what is heard up; the Greek ἐορνάυη, similarly significant of height (Pott, Etymol. Forsch., i, 123); or the German "himmel," from himeln, to cover—the "roof" which constitutes the "heam" or abode of man: in each there is a large amount of philosophical error. Correctly speaking, of course, the atmosphere is the true ra'ak by which the clouds are supported, and understood in the colo affixus of the celestial bodies. There certainly appears an inconsistency in treating the ra'ak as the support both of the clouds and of the stars, for it could not have escaped observation that the clouds were below the stars; but perhaps this may be referred to the same feeling which is not harmonious with the fact that the ra'ak was the down-fall of the ra'ak in stormy weather. Although the ra'ak and the skamaym ("heaven") are treated as identical in Gen. i, 8, yet it was more correct to recognise a distinction between them, as implied in the expression heaven and earth, the one ra'ak, the other sky, and in the former being the upholding power and the latter the upbearing body—the former the line of demarcation between heaven and earth, the latter the stratos or stories into which the heaven was divided. See COSMOSH.

2. Hence it is easy to conceive how the Gr. translators came to render the Heb. term in question by στροφήμα, a word which is commonly used to designate some compact solid, such as the basis of a pillar, or a pillar itself, and which is used elsewhere by the Sept. as equivalent to the Heb. קִרְךָ, a rock (Psa. xviii, 2), and by Symmachus and Theodotion as the rendering of the Heb. קִרְךָ, a staff. Basil (Hexeim. Hom. 8) explains the term as not intended to describe what is naturally hard, and solid, and weighty, which belongs rather to the earth; but says that because the nature of the rock is such that it is firm and impregnable, and the name, as far as he is capable of understanding it, is called στροφήμα, by a comparison between things of extreme rarity and such as can be perceived by sense (συνεχίσεις των ειρωνίων καὶ τη αισθήσεως καταρακτών). It is not very clear what his meaning is, but probably he intended that as a solid extension would be properly described by στροφήμα, so this mass of light and vaporous substances might by analogy receive this name. Others have suggested that this term was employed to indicate that the στροφήμα is the "universitas rerum atque rerum in regionem superem conglobata et formata," along with the idea that this "nihil habet uspam inanitatis, sed omnia sui generis natura plena." Fuller, Misc. Sac. bk. i, c. vi. Fuller thinks also that the Sept. selected στροφήμα rather than ερνος or χρυσομα, in order to convey the idea of the sky and stars, as well as superjub meteors. The general opinion, however, is that the Sept. adopted this term rather than one exactly equivalent to the original, because it conveys what was the Hebrew belief concerning the upper atmosphere or visible heavens, which they regarded as a solid expanse encircling the earth, and the true state of things, possibly not unknown to them (Job xxvii, 26, 28). Others, nevertheless, think that the waters above the ra'ak are merely the clouds, which need no solid support (Delitzsch, Comment. on Gen. i, 6; Kurz, Bible and Astronomy, in Hist. of the Old Covenant, i, 30).

3. With some old astronomers the firmament is the orb of the fixed stars, or the highest of all the heavens. But in Scripture and in common language it is used for the middle regions, the space or expanse appearing like an arch immediately above us in the heavens. Many of the ancients, and even the moderns also, account the firmament a fluid substance; but those who gave it the name of "firmament" must have regarded it as solid. In the Ptolemic astronomy, the firmament is called the eighth heaven or sphere, with respect to the seven spheres of the planets, which it surrounds. It is supposed to have two motions—a diurnal motion imparted to it by the primum mobile, from east to west, about the poles of the ecliptic, and another opposite motion from west to east, which last is completed, according to Tycho, in 25,412 years; according to Ptolemy, in 36,600; and according to Copernicus, in 26,800; both of these the fixed stars retain in the same points in which they were at the beginning. This period is called the Platonic, or Great Year. See ASTRONOmy.

Firmicus, Julius Maternus, a Christian writer of the 4th century, of whom little is known. There was an astrigore of the same name and time, who wrote Matheus lib. i. There was a bishop of Milan of the same name, who flourished at the same time, but probably not the same person. He wrote a book, De Errore Protomarum Religionum, which he dedicated to Constantius and Constans; and from this it appears he was bred up in heathenism, and afterwards converted to the Christian faith. He is not mentioned by any ancient writer; and there is no direct evidence that he held any sacred office in the Christian Church. From internal evidence, it appears certain that the treatise was written between A.D. 348 and 850. An analysis of it is given by Gellier, Dea Sacrae (Par. 1865), iv, 310 sq. The object of the treatise is to trace the history of the pagan faith, and to demonstrate the falsehood of its various forms. It adopts and applies the theory of Euhemerus (q. v.). It was first printed by Matt. Flacius (Strasburg, 1562); the latest separate edition is that of Mr. Copenhagen, 1859, with prelomina and notes. It may be found also in Bib. Mar. Patrol. iv, 164; Galland, Bib. Patrol. v, 23; and Migne, Patrol. Lat. vol. xii.

Firmilian, Sr., bishop of Cesarea, in Cappadocia, was an intimate friend both of Origen (Euseb., vi, 27) and Cyprian, with the latter of whom he took part in the controversy about the necessity of rebaptising those who had been baptised by heretics. On this subject he wrote an Epistle to St. Cyprian, which was undoubtedly written in Greek, though the epistle exists in St. Cyprian's works is in Latin; it is generally allowed to have been translated by Cyprian himself. It is very briefly treated of in the Life of the Bishop of Rome as pope in the 5th century. This epistle, which is a very long one, is the sixty-fifth among
First-Born

those of St. Cyprian, and may be found in Oderhut's edition of Cyprian (i, 254); also in Rouht, Script. Ecci. Opuscula (Oxon. 1649, i, 227); and in Migne, Patrolog. Lat. 31, p. 856. Of the domestic customs the name of Firmilian child of the other were the first-born (Deut. xxi. 15, 16). In the case of levirate marriage, the son of the next brother succeeded to his uncle's vacant inheritance (Deut. xxv, 5, 6). Under the monarchy, the eldest son usually, but not always, as appears in the case of Solomon, succeeded his father (I Kings 1, 20, ii, 22). This was an exception to the orthodox faith, for instance, that "the unity of God is a unity of person as well as of nature, and that the Holy Spirit is indeed a person, but not God." He settled in business in Lombard Street, and it is not clear from his provision of preachers for his Tuesday's lecture at St. Laurence. Queen Mary heard of his usefulness, and that he was heterodox in the articles of the Trinity, the divinity of the Saviour, and the atonement. She spoke to Tillotson, therefore, to set him right in those weighty and necessary points, who answered that he had often endeavored it, but that Mr. Firmen had now so long imbibed the Socinian doctrine as not to be capable of renouncing it. However, he was, in the bishop, his grace and his archbishop, published his sermons, formerly preached at St. Laurence's, concerning those questions, and sent Mr. Firmen one of the first copies of the press, who, not convinced, caused a respectful answer to be drawn up and published, with this title, Considerations on the Epistle to the Romans (1658), and with a similar work furnished later by Mr. Firmen's zeal and charity, and in 1668 he petitioned for a linen manufacture for them at Ipswich. During the last twenty years of his life he was one of the governors of Christ-church Hospital in London, to which he procured many considerable donations. In April, 1696, he became a governor of St. Thomas's Hospital in Southwark; and, indeed, there was hardly any public trust or charity in which he either was not or might not have been concerned. He was buried, according to his desire, in the cloisters of Christ-church Hospital, and there is placed in the wall near his grave an inscription (in terms of the highest laudatory). His Life was published in 1698, and again by Cornish, 1780, 12mo.—New Gen. Biog. Dict. s. v.; Wesley, Works (N. Y.), ii, 574.

First-born (בֵּית, בֵּיתָּא, בִּיתָךְ, from בִּית, to ripen early; Sept. and N. T. πρωτόγενος, Vulg. primumgenitus), applied equally to animals and human beings. Among the Hebrews the first-born son had many privileges, to be entitled to which it was not only required that a man should be the first child of his mother, but that he should be, at the same time, the first son of his father (Deut. xxi, 15-17). The eldest son received a double portion of the father's inheritance (Deut. xxi, 17), but not of the mother's (Mishna, Bekoroth, viii, 9). If the father had married two wives, of whom he preferred one to the other, he was forbidden to give preferential treatment to the son of his next wife (Deut. xxi, 15, 16). In the case of levirate marriage, the son of the next brother succeeded to his uncle's vacant inheritance (Deut. xxv, 5, 6). Under the monarchy, the eldest son usually, but not always, as appears in the case of Solomon, succeeded his father (I Kings 1, 20, ii, 22). This was an exception to the orthodox faith, for instance, that "the unity of God is a unity of person as well as of nature, and that the Holy Spirit is indeed a person, but not God." He settled in business in Lombard Street, and it became intimate with Whitchote, Wilkins, Tillotson, etc., in conformity with the last that he was obliged to be out of town, at Canterbury, perhaps, where he was dead, he left to Mr. Firmen the provision of preachers for his Tuesday's lecture at St. Laurence. Queen Mary heard of his usefulness, and that he was heterodox in the articles of the Trinity, the divinity of the Saviour, and the atonement. She spoke to Tillotson, therefore, to set him right in those weighty and necessary points, who answered that he had often endeavored it, but that Mr. Firmen had now so long imbibed the Socinian doctrine as not to be capable of renouncing it. However, he was, in the bishop, his grace and his archbishop, published his sermons, formerly preached at St. Laurence's, concerning those questions, and sent Mr. Firmen one of the first copies of the press, who, not convinced, caused a respectful answer to be drawn up and published, with this title, Considerations on the Epistle to the Romans (1658), and with a similar work furnished later by Mr. Firmen's zeal and charity, and in 1668 he petitioned for a linen manufacture for them at Ipswich. During the last twenty years of his life he was one of the governors of Christ-church Hospital in London, to which he procured many considerable donations. In April, 1696, he became a governor of St. Thomas's Hospital in Southwark; and, indeed, there was hardly any public trust or charity in which he either was not or might not have been concerned. He was buried, according to his desire, in the cloisters of Christ-church Hospital, and there is placed in the wall near his grave an inscription (in terms of the highest laudatory). His Life was published in 1698, and again by Cornish, 1780, 12mo.—New Gen. Biog. Dict. s. v.; Wesley, Works (N. Y.), ii, 574.
ed his omnipotence and grace." See Plagues of Egypt.

FIRST-BORN, SANCTIFICATION AND REDEMPTION OF THE.

Males of human beings and animals were strictly enjoined to perpetuate the remembrance of the death of Egypt's first-born, whereby the liberty of the Israelites was secured, and of the preservation of Israel's first-born. Compare Exod. xii, 5, 11-15.

3. Sanctification of the First-born, Its Signification, etc.

—The fact that the first-born of Egypt were selected to be smitten down for the hard-heartedness of Pharaoh, and that their death was regarded as the greatest calamity, shows of itself that a peculiar sanctity had already been attached to the first-born of both man and cattle. The cause of this sanctity originated in the Scripturc.

The power of procuring declaration was declared by God himself to be a special blessing (Gen. i, 22, 28; ix, 1; xvii, 16; xxvii, 31), and was granted as a reward to those who were well pleasing in his sight (Gen. xv, 4; Ps. cxviii, 4). This was fully approved by the Jews; for the possession of children, especially of the male sex, was esteemed the climax of social happiness (Gen. xvi, 2; xxix, 81; Deut. vii, 14; Ps. cxviii, 3, 4), and the absence of them was considered a reproach (גָּפַע), since it implied divine displeasure (Gen. xxx, 33), and no other earthly blessing could compensate for it (Gen. xvi, 1-5). Moreover, the first-born of newly-married young people (ָּיִם נַעֲרֵי יָדָם קַרָּה) were born, being reproached in the person of human vigor (יְזוּר נֶבֶל), being born before the strength of the father began to diminish (Gen. xlix, 8; Deut. xxi, 17; Ps. lxxxvii, 51; cv, 86).

It was therefore natural that the first instalment of God's blessing, and the prime of man's strength, should be regarded with peculiar affection, and have special sanctity attached to him, and that by virtue of the claim God has to that child, which has been born and held sacred by us, and gratitude on the part of man, the first-born males, both of man and animals, should be consecrated to the Giver of all good things; the one as a priest, representing the family to which he belonged (Exod. xii, 22, 24), and the other as a sacrifice (Gen. iv, 4), just as the act of sacrifices was devoted to God because it was regarded as the prime part of the animal. See Fat. This explains the fact why the plague of the first-born of the Egyptians was so terribly felt; it was the destruction of the objects most dear and sacred to them, whilst the first-born of the Hebrews, i. e. their priests and sacrifices, were spared. Moreover, it shows the import of the consecration enjoined in Exod. xiii, 1. Hitherto it was optional with the Hebrews whether they would devote the first-born to the Lord, but now God, by virtue of having so signallv interposed for their deliverance, claims the public consecration of the first-born of man as his priests, and of the first-born of animals as sacrifices.

2. Origin of the Redemption of the First-born.—This devotion of the first-born was believed to indicate a priesthood belonging to the eldest sons of families, which being set aside in the case of the Hebrews, was transferred to the tribe of Levi. This priesthood is said to have lasted till the completion of the tabernacle (Jahn, Bibl. Arch. x, § 165, 887; Selden, De syn. c. 16; Mishna, Zebachim, xiv, 4, vol. v, 58; comp. Exek. xxiv, 5).

After the building of the tabernacle and the introduction of the holy sacrifices it became necessary to require a special priestly order, as well as a separate staff of servants, who could exclusively devote themselves to the ministry of the sanctuary, the offices of the first-born were superseded by those of the Levites (Num. iii, 11-13), and it was ordained that the first-born of the other tribes, as well as the first-born of the animals which could not be sacrificed, should henceforth be redeemed (ib. xviii, 12).

3. Redemption of the First-born of Men.—The redemption of a child is to take place when it is a month old, when the father is to give to the priest five silver shekels of the sanctuary, i. e. about three dollars as the maximum. If it died before the expiration of 30 days, the Jewish doctors held the father excused, but liable to be punished, if it outlived the period, according to the law (Exod. xiii, 12-15; xxii, 29; Num. viii, 17; Lev. xxvi, 6; Lightfoot, Hor. Hebr. on Luke ii, 22; Philo, De Pr. Sacrd. i, ii, 283; Mangey). If the child was sickly, or appeared otherwise to be inferior to children generally, the priest could estimate it lower than this sum (Num. iii, 46, etc.; xviii, 16). The priest had to come to the house of the infant, as the mother could not appear with it in the Temple because her days of purification, according to the law (Lev. xii, 2, 4), were not yet as accomplished. No bargaining was allowed, but if the priest saw that the parents were poor, he could, if he chose, return the money when the ceremony was over. When the mother's days of purification were accomplished, and she could appear in the Temple, she then brought the child to the priest to be presented publicly to the Lord (Luke ii, 22). The Jews still observe this ceremony. When the first-born male is thirty days old, the parents invite to their house their friends and a priest (יָמִין) to a meal for the following day. The priest, having invoked God's blessing upon the repast, and offered some introductory prayers, etc., looks at the child and the price of redemption presented before him, and asks the father whether he will redeem the child, which he may or may not do. Thus the money is devoted to the purchase of a first-born child. Upon the father's reply that he would rather pay the price of redemption, the priest takes the money, swings it round the head of the infant in token of his vicarious authority, saying, "This is for the first-born, this is in lieu of it, this redeems it; and let this son be spared from the hail, for the law of God, and for the fear of Heaven. May it please thee, that, as he was spared for redemption, so he may be spared for the Law, for matrimony, and for good works. Amen." The priest lays his hand upon the child's head and blesses it, as follows: "The Lord make thee as Ephraim and Manasseh!" etc. It is to this that the apostle Peter refers when he says, "Ye were not redeemed with corruptible things, as silver and gold," etc. (1 Peter i, 18). When the first-born son is thirteen years of age, he fasts the day before the feast of Passover, in commemoration rather of the sparing of the first-born of the Hebrews in Egypt. See Fast.

4. Redemption of the First-born of Clean Animals.—The male first-born of animals (בָּן יָדוֹ; Sept. θεῷ ἐκδοτῇ γεράνῃ; Vulg. good opertum vulcam) was also devoted to God (Exod. xiii, 2, 12, 13; xxii, 29; xxiv, 19, 20; Philo, i.c. and qua rerum dic. aen. 24, i, 489, Mang.). The first-born of every clean animal (i. e., ox, sheep, goat, etc.), from eight days to twelve months old, had to be taken to Jerusalem every year (Deut. xii, 6, etc.), and delivered to the priest, who offered it as a sacrifice to Jehovah, sprinkled its blood upon the altar, burned the fat, and ate the flesh (Exod. xiii, 13; xxi, 30; xxiv, 30; Num. xviii, 15-17; Neh. x, 35). In the mean time the animal was not to be used for any work, for it belonged to the Lord (Deut. xv, 19); but if it had any blemish it was not to be sacrificed, but eaten at home (ib. xv, 21, 22). Various refinements on the subject of blemishes are to be found in Mishna, Bekoroth. (See Masp. i. 8.). Deut. xiv, 23, complied with Num. xviii, 17, and meant the same animals: see Reland, Antiq. iii, 10, p. 327; Jahn, Bibl. Arch. § 387). If, however, the man whose cattle had first-born lived at too great a distance from Jerusalem to carry them thither, he was commanded to sell them, and take the money to the sanctuary (Deut. xiv, 24, 25).

5. Redemption of the First-born of Unclean Animals.—The first-born of unclean animals, not being allowed
to be offered as sacrifices, were either to be redeemed according to the value of the priest, with the addition of one fifth of the value, and then remain with their owner, or be sold, and the price given to the priests (Lev. xxvii, 11-16, 27). The first-born of an ass shall be redeemed with a lamb, or, if not redeemed, put to death (Exod. xiii, 13; xxxiv, 20; Numb. xviii, 15). Commentators hold that the first-born of dogs were killed, because they were unclean; and that nothing was given for them to the priests, because there was no trade or commerce in them. See Deut. xxiii, 18.

6. Literature.—Josephus, Ant. iv, 4, 4; Mishna, Bekoroth; Maimonides, Mishna Torah, iii, 241; Hilkhot Beachoroth; Ibn Ezra's comments on the passages cited in this article; Calmet, on Numb. xxviii; Thé Histoire des Croisades, by J. Keppler (Vienna, 1859), entitled Derech Ha-Chajun, p. 406; Der Israëlitische Volkslehrer, vii, 41 sq.; ix, 188 sq.; 212 sq., 248 sq.

FIRST-FRUIT 573  FIRST-FRUIT

its sound it very difficult, in addition to his appearing at the three great festivals, to have to go to the Temple
and carry the offerings in his own basket. Nor would it have been convenient for every one to go up with his first-fruits
separately. Hence the custom arose, that when the
first-fruits were ripe, all the inhabitants of one district
who were ready to deliver them assembled together in
the principal village, and that locality was their repres-
sentative, and a certain basket containing the ripe fruits
of the seven several kinds, arranged in the following
manner:—"The barley was put lowermost, the wheat
over it, the olives above that, the dates over them, the
pomegranates over the dates, and the figs were put upon
the top. The barley was laid between every kind to separate it from the other, and clusters of grapes
were laid upon the figs to form the outside of the basket" (Maimonides, Hilchot Bikkurim, iii, 7; To-
sifra Bikkurim, ii). With this basket all the pilgrims
(or at least a company of twenty-four persons) stood
up all night in the open market-place, because they
were afraid to go into the houses to sleep lest any inmate
of them should die, and thus cause pollution. Early
in the morning the representative of the district, who
was the official (מג各種) and ex officio the leader of the
imposing procession, summoned them with the words
of the prophet Jeremiah, "Arise, and let us go up to
the house of the Lord, to the house of the God of Jacob" (xxvi, 8). The whole company were then ready to start. We
cannot do better than give literally the description which the Mishna and the Talmud give of this
imposing procession: An ox [destined for a peace-offer-
ing] went before them with gilded horns and an olive
crown on its head, and a pipe-player who played before
them, whilst the air rang with the song of the people,
"I was glad when they said unto me, Let us go into
the house of the Lord!" (Psa. cxli, 1). On approach-
ing Jerusalem a messenger was sent forward to an-
ounce their arrival, and the first-fruits were tastefully
arranged on the officiating priest's heffer, or ox, and the
treasurers went out to meet them, the number of offici-
als who went out being in accordance with the large-
ness of the party that arrived, and conducted them into
the holy city, singing; as they entered, "Our feet stand
within thy gates, O Jerusalem" (Psa. xxxii, 8), whilst
all the workmen [who plied their craft] in the streets
of Jerusalem stood up before them and welcomed them,
saying, "Brethren of such and such a place, peace be
with you." The piper continued to play before them
till the procession came to the mount of the Temple.
Here the priest threw the first-fruits, even the golden basket
upon his shoulders, and went forward till they all came
to the court of the Temple, singing, "Praise ye the
Lord, praise God in his sanctuary," etc. [through the
whole of Psalm cl]: whereupon the Levites sang: "I
will exalt thee, O Lord! because thou hast lifted me
up, and hast not made my foes to rejoice over me" (Psa.
xxx). Then the pigeons which were hung about the
basket were taken for burnt-offerings, and the pil-
grims gave to the priests what they brought in their
hands. With the baskets still upon their shoulders
every one repeated, "I profess this day unto the Lord
thy God," etc., till he came to the words, "A wander-
ning Syrian was my father" (i.e. from Deut. xxvi, 3-5),
when he took the basket off his shoulders and laid hold
of it by its brim; the priest then put his hands under
it and waved it, whilst the offering continued to recite
from the words: "I feignedly went away, and were he had
left off, to the end of the section (i.e. to Deut. xxvi,
10), then put the basket by the side of the altar, threw
himself down on his face, and afterwards departed
(Mishna, Bikkurim, iii, 2-6; Jerusalem Bikkurim, 65;
Maimonides, Hilchot Bikkurim, iv, 16, 17). These first-
fruits took the place of the tithe which was not offi-
ciated during that week. The baskets of the rich were
of gold or silver, those of the poor of peeled willow.
The baskets of the latter kind were presented to the
priests, who waved the offerings at the S.W. corner of
the altar: the more valuable baskets were returned to
the owners (Bik. iii, 6, 8). After passing the night at
Jerusalem in the pilgrim-prize (Jer. iv, 3; Bikkurim, ii, 12),
to their homes (Deut. xvi, 7; Terum. ii, 4). It is men-
tioned that king Agrippa bore his part in this highly
picturesque national ceremony by carrying his basket
like the rest to the Temple (Bik. iii, 4). Among other
by-laws were the following: 1. Who ate his first-
fruits in Jerusalem, but took them to the pilgrim-prize
in such a proper form, was liable to punishment (Muccot, iii, 3,
vol. iv, 284, Suren.). 2. Women, slaves, deaf and
dumb persons, and some others, were exempt from the
verbal obligation before the priest, which was not gener-
ally used in their case (Bik. iii, 6).
4. Exemption from the Offering or the connected Ser-
vice.—Those who simply possessed the trees and not
the land were exempted from the offering of first-
fruits, for they could not say the land that thou hast
given me (Maimonides, Hilchot Bikkurim, ii, 18). Those,
who lived beyond the Jordan could not bring first-fruits in the proper sense of the libation, in-
samuch as they could not say the words of the service,
from the land that floweth with milk and honey" (Deut.
xxvi, 10; compare Mishna, Bikkurim, i, 10). A proselyte,
again, though he could bring the offering, was not allowed to recite the service, because he was the words occurring therein (Deut. xxvi, 8), "I am come to the country which the Lord hath courte to us for us to give us" (Bikkurim, i, 4). Stewards, servants,
slaves, women, sexless persons, and hermaphrodites
were also not allowed to recite the service, though they could claim the libation, because they could not use the words, "I have brought the first-fruits of the land
which thou, O Lord, hast given me" (Deut. xxvi, 10), they having originally had no share in the land
(Bikkurim, i, 5).
5. Offerings of the prepared Produce.—In this, too,
the quantity to be offered was left to the generosity of
the people. But it was understood, says Maimoni-
des, that "a liberal man will give a fortieth part of
his first-fruits; one who is neither liberal nor illiberal
will give a fiftieth part, and a covetous man will give
a sixtieth." (Hilchot Terumah, iii, 9.) They were
presented even from the produce of Jewish fields in
foreign countries, and were not allowed to be taken
from the portion intended for tithes, nor from the corn
left for the poor (Terum. i, 5; ii, 7), and were not
required to be delivered in the Temple, but might be
given to the brother-in-need (Ib. iv, 3, 2; Bikkurim, i,
2). They consisted of wine, wool, bread, oil, date-honey,
onions, cucumbers (Terum. ii, 5, 6; Numb. xvi, 19; 21; Deut. xviii, 4). The measuring-basket was to be thrice estimated during the season (Ib. iv, 3). He
who ate or drank his offering by mistake was bound
to add one fifth, and present it to the priest (Lev. v,
16; xxii, 14), who was forbidden to remit the penalty
(Terum. vi, i, 5). The offerings were to be eaten or
used only by those who were clean from ceremonial
defilement (Numb. xviii, 11; Deut. xviii, 4).
6. The First-fruit of the Dough.—Besides the offer-
ing of the first-fruits themselves, the Israelites were
also required to give to the Lord a cake made of
the first corn that was threshed, winnowed, and ground
(Numb. xv, 18-21). Tradition restricts this to wheat,
barley, camain, or rye, foxtail (barley), and oats (Chakot, i, 1; Maimonides, Bikkurim, vi, 14). Of which a
twenty-fourth part had to be given, but the baker who
made it for sale had to give a forty-eighth part (Mai-
monides, Hilchot Bikkurim, v, 2, 3). This was the per-
quisite of the priest, and it is to this that the apostle
refers in Rom. xi, 16.
7. First-fruits of Grain-trees.—According to the law,
the fruit of the newly-planted tree was not to be eaten
or sold, or used in any way for the first three years,
but considered "uncircumcised" or unclean. In the fourth year, however, the first-fruits were to be con-
secrated to the Lord, or, as the traditional explana-
FIRST FRUITS. "1. True Christians are called 'a kind of first-fruits of God's creatures (1 Cor. xiv, 15), as being specially consecrated to him.' 2. The communications of God's grace on earth, as an earnest of future glory, are also so called (Rom. viii, 29), and for the same reason, the resurrection of Christ, as 'the pledge of the resurrection of the just' (1 Cor. iv, 19).

13. In an ecclesiastical sense, this term is applied to the first year's produce of benefices, which the pope demanded of foreigners to whom he gave benefices of the Church of England. Henry VIII rescued this payment from the pope, but annexed it to the crown. Queen Elizabeth, however, gave them back to the Church for the augmentation of small livings" (Eden). See Annotations. The value of benefices, commonly called the value of the King's Books, was made at the same time as the statute 26 Henry VIII, c. 5, by which these payments were transferred to the crown. A former valuation had been made, 26 Edw. III. which still exists in the exchequer. By this statute and one subsequent, 1 Elizabeth IV, every spiritual person admitted to a benefice must pay his first-fruits within three months after induction, in proper proportion: if he does not live half a year, or be ousted before the expiration of the first year, only one quarter is required; if he lives the year, or be ousted before eighteen months, one half; if a year and a half, three quarters; if two years, the whole. Archbishops and bishops have four years allowed them, and shall pay one quarter every year, if they live so long on the see. Other dignitaries pay as rectors and vicars. The statute of 18 Anne, all livings under £50 per annum are discharged of the payment of first-fruits and tenths. The following notice of the valuation in the King's Books, and the former payments to the pope as primíc, is taken from Godwin's work, De Prævulis Angl. The florin was 4s. 6d., the ducat 6s. 3a. It will be observed that the bishoprics of Oxford, Gloucester, Peterborough, Bristol, and Chester, as creations or revivals by Henry VIII, are not included in the above catalogue as paying to the pope.—Edies, Eccl. Cyclop. s. v.; Bingham, Orig. Eccl. s. v., ch. vi, § 4.

Fish (37 day), so called from its great fecundity; Gr.
fish

fish (1 Sam. v, 4). On this account the worship of fish is expressly prohibited (Deut. iv, 18). See DA- GON. The form of a fish (Notius Poseidon) was, from remote ages, a type of prophetic dominion, which the symbolizing spirit of the ancients caused to pass into Christianity, as appears from Eusebius (LIFE of Con- stantine) and St. Augustine (De Civitate Dei). On the walls of the oldest catacombs of Rome the representation of the fish is frequently discernible and always interpreted as an emblem of the Saviour.

Taking fishes in the scientific sense of "oviparous, vertebraled, cold-blooded animals, breathing water by means of gills or branchia, and generally provided with fins," none are mentioned by name throughout the O.T. and M.T.; but, regarded in the popular and inexact sense of aquatic animals, inhabitants more or less of the water, we meet with eleven instances which require some notice here.

1. That well-known bato- chian reptile, the frog (כָּפֶלָה, terpæda'), which emerges from a fish-like infancy, breathing by gills instead of lungs, and respiring water instead of air, is often mentioned in Exod. viii, but only in two passages else, Ps. lxxvi. 36 and cv. 20. See FROG, and cv, 30. See PROV. xxi. 31, annelid horse-leech, whose name occurs only once, PROV. xxx, 15 (הלֹּ֑וֶּרָה, alakach').

"It would appear that the blood-eating quality of this useful little animal is a direct and exclusive ordination of Providence for man's advantage. That blood is not the natural food of the animal is probable from the fact that, in the streams and pools which they inhabit, not one in a hundred could, in the common course of things, ever indulge such an appetite; and even when received into the stomach, it does not appear to be digested; for, though it will remain there for weeks without coagulating or becoming putrid, yet the animal usually dies unless it can be vomited through the mouth."

(Gossow's Zoology, ii, 374). Of course it is the smaller species, the Hirudo medicinalis, that is here referred to. But the larger species, the Haemapagus margaritifer, or "horse-leech," has a still greater voracity for blood.

Bochart (Hieros, ii, 796-802) and Schultens (Prov. in loc.) give another turn to Prov. xxx, 15, by identifying הָלוֹּ֑וֶּרָה with the Arabic aluk, and making fowl or destiny, instead of the horse-leech, the inexact exacter. The ancient versions, however, must be deemed to outweigh their learned speculations; added to which the Arabic aluk, the Syriac aluka, and the Chaldee and Talmudic וּלָּכָּ מִּ or וּלָּכָּ מִ, all designate the leech, which is as abundant in the East as it ever was in our Western countries. The blood-appetite of this animal made it suitable to point a proverb: "Horeb says, "No misfortune can come to a trembling horse-leech, hirudo" (De Boistaut, loc. cit., De Poet. 476). With this comp. Psl. 18, 13; and Cicero, ad Atticum, lib. i, epist. 13. See HORSE- LEECH.

3. The testaceous mollusk (Ostrea marina, Gesenius, Thea. p. 1263), called by the Hebrewיִשְׂרָאֶל, argaman'; by Avicenna, Algariaeacan; by Galen, θαλασσία ἔρποπα, is the Murus trunculus of zoology, from which the repulsive dye used to be obtained. This shell-fish (and not the "purple" extracted from it) is with good reason supposed by Gesenius to be referred to in Cant. vii, 5: the tresses of thin head are like the wreathed shell of the purple-fish; reminding us of the ancient head-dress of the Egyptian princess, described by Theocritus, idyll. iv, 6, 8 (comp. the cornical head-tuft of the Roman Tustanus [Varro, De ling. lat. vii, 3, 30], and Virgil's Crinae nodostrum in Carum). A second reference to this shell-fish probably occurs in Esex. xxvii, 7. The Tyrians seem to have imported some of it, which they selected as an object of idolatry: the worship of it was widely spread, from Egypt (Wilkinson, i, 58) to Assyria (Layard, Nineveh, ii, 467), and even India (Baur, Mythol. ii, 58). Among the Philistines, Dagon (= little fish) was represented by a figure half man and half
these fishes were supplied from the coast of Greece we learn from Horace, Od. ii. 18, 7 (Lacunosse purpurae); from Pausanias, iii. 21, 6; and from Pliny, ix. 86. See Purple.

4. The other word used by Eckel in this passage, κρακαλός, is described by Gesenius, Thes. p. 1308, as "a species of shell-fish (Conchylia, Helix solstimna [conchae]), found cleaving to the rocks at the coast of the Mediterranean Sea, covering even the sea bottom." (Forskal, Descrip. animal. p. 127), from which was procured a dark-blue dye.

In the many other passages where these two words occur, they undoubtedly designate either the colors or the material dyed in them. The phrase "treasures hid in the sand" (Deut. xxxii. 19, 22) and the lines "to refer to the rich dyes afforded by the κρακαλός and other testaceous animals found in the sand, on the Phoenician coast, assigned to Zeboon and Isaacchar (Tarqum of Jonathan b. Uziel, Walton, iv. 287, and Gesenius, Thes. p. 1509).

See Blue. 5. The κρακαλαί, ταννίμι (plur. ταννίμια or κρακαλάδες) must be carefully distinguished from κρακαλός, the plural of the useless word κρακαλός, a jockal, according to Gesenius, Theaur. p. 1188. "The sea-monsters," which are described by Jeremiah (Lament. iv. 5) as "sucking their young," were used to be regarded as the marmiferous whales or other large cefalas (Calmet by Taylor, "Fragments on Natural History, No. xcvii."). They are by Gesenius (l. c.) supposed to be rather κρακαλάδες; this is the reading of the MSS. (Kennaicott, ii. 546), and Gesenius accepts the Masoretic text as an Aramaic form of it. In Ezek. xxix. 3, and xxxii. 2, the textual reading κρακαλάδες, which is represented usually as an anomalous singular noun, should not be κρακαλάς, the regular singular, which may well bear (what the other word could not) the significant sense of "crocodile;" the MSS. authority in favor of the latter word is overwhelming (Kennaicott, ii. 212). For a description of the κρακαλάδες, see Whale.

8. "The great fish," yefiym yam, of Jonah i. 17 (yam in ii. 1), was probably some species of shark, such as the Zygornellus malleri, or the Carcharias vulgaris (the white shark), therefore strictly a fish. Of the same kind of huge fish, ἄνθρωποφόρος, does Amos speak in prophecy, ix. 3, "I will command the serpent from the bottom of the sea, and shall be his head" (Bochart, Hieros. i. c. 40, l. 40). The difficulty that in the Sept. of Jonah, and in the Greek Testament (Matt. xii. 40), κρακαλός is the word by which the fish is designated, is removed by the fact that this Greek text specifically does not indicate whether only, as the objection supposes, but any of the larger inhabitants of the deep. (Wesley's Heroclit. Fragm. de incre- mento Nile, p. 789, as quoted in Valpy's Stephani Thes. s. v. Κρακαλός; here "piece," as well as "bellus quasi bello ingentes, veluti crocodilus et hippopotamus," are included.) Accordingly κρακαλός stands in the Sept., passim, for בָּשָׁם, as well as for בְּשַׁם (see Schleusner, Lex. V. T. s.v. KIακαλός). Admiral Smyth, in the chapter on Ichthyology, in his Mediterranean, p. 198, says the white shark has been called "Jona piscis" from its transcendent claim "to have been the great fish that swallowed the prophet, since he can readily engulf a man whole." For more on the subject of this fish, see Kitto, Bibl. Illustr. vi, 399-404, and Jonah. 9. Of To- bit's fish, O. F. Fritzsche, in his commentary on the passage (Tobit vi. passim) enumerates nine or ten spec- culations by different writers. According to Bochart and Helvigius, the Siburu has the best claim. This the former describes as "being very large, of great strength and boldness, and ever ready to attack other animals, even men, an inhabitant of the rivers Eu- phrates and Tigre." C. H. Smith, in the first edition of Kitto's Cyclopaedia, combats Bochart's conclusions, and suggests "the Slaar of the Indus, a crocodile, probably of the genus Gavial, which grows to a great size, is eaten, and has a gall bladder, still used to cure obstruant wounds and defluxions." Glaine suggests the sturgeon, but this is more suitable to Northern rivers.

Fennement mentions the capture of one in the Eusk Valley weighing 126 pounds (Ernest Seaver Zoology, iii. 127). See more in Bochart, Hieros. v. 14; Glaine, Translation of the Acanic. et du N. T. ii, 91 [ed. 8]; Paris, 1782, and To- bit. 10. If Dr. French and Mr. Skinner, in their Translation of the Psalms, are right in rendering Pas. xiv. 9, "There swimmeth the nautilus and the whale," (as if the sacred writers meant to indicate a small, though conspicuous, as well as a large aquatic animal, as equally the object of God's care), we have in the יבשוף, אמיוף, A. V. "ships," an unexpected addition to our Scripture nomenclature of fishes, in what lord Byron calls—

"The tender Nautilus who stirs his prow,
The sea-born siren of his shell comes,
The ocean Mah, the fairy of the sea."—The Island.

In their note the translators say, "The Nautilus—This little creature floats at pleasure upon the surface of the sea. Its shell resembles the hull of a ship, whence it has its name." Mr. Treppx accepts the translation of "vessel" as a "new rendering of much apparent probability" (Introduction to the Psalms, ii. 176). Another ancient expositor of the Psalms, J. Olshausen (Erg. Hands. p. 402), remarks that "the introduction of ships amongst the living creatures of the sea has always presented an obstacle" to the understanding of the sentence. The paper nautilus (Argonauta) frequents the Mediterranean. The verb יבשוף, proceeded, sunk, very well describes the stately progress of the nautilus as it floats upon the wave. We may add that it gives greater fitness to the 27th verse, which at present is hardly compatible with the 26th and 26th, owing to the intrusion of the clause, 'there go the ships.' Replace this by the nautilus, and the coherence of the 27th verse with the two preceding is complete in all its terms. 11. Our last specific fish is rather suggested than named in Ezek. xxix. 4, where the prophet twice mentions "the fish of the rivers which cleave to the scales," [of the crocodile]. This description seems to identify this fish with the Echeneis remora, so remarkable for the adhesive or sucking disc which covers the upper part of the head, and enables it to adhere to the body of another fish, or to the bottom of a vessel. (Its fabulous powers of being able even to arrest a vessel in her course are recorded by the ancients. Herod. Hist. i. 151. It is mentioned by Aristotle, Hist. Anim. ii, 14, 5. "πόνητας καὶ εὐ θύσωμος, ἐνοικίαν ὑπὸ κα- λίνης ὑποκινεῖται. It is also mentioned by Forskal as seen at Gigda, and by Hassequist at Alexandria.) The lump-sucker (Cyprinostus lumpus) is furnished with ventral fins which unite beneath the body and form a concave disc, by which the fish can with ease adhere to stones or other bodies. Either in the remora, with its adhesive apparatus above, or in the lump-sucker with a similar appendage below, or in both, we have in all probability the prophet's fishes which cleave to the monster of the Nile.

The species of fish known to the Hebrews, or at least to those who dwelt on the coast, were probably very numerous, because the usual current of the Mediterranean sets in, with a great depth of water, at the Straits of Gibraltar, and passes eastward on the Afri-

Can side until the shoals of the delta of the Nile begin to turn it to the north; then they proceed in directon along the Syrian shores, and falls into a broken course only when turning westward on the Cyprian and Cretan coasts. Every spring, with the sun's return towards the north, innumerable troops of littoral species, having passed the winter in the offings of Western Africa, return northern countries, are impelled in that direction by other unknown laws. A small part only ascend along the Atlantic coast of
Spain and Portugal towards the British Channel, while the main bodies pass into the Mediterranean, follow the general current, and do not break into more scattered families until they have swept round the shores of Palestine. Lists of species of the fish frequenting various parts of the Mediterranean may be found in Risso (Ichthyol. de Nice). 335 species had been observed at Nice; and in Adm. Smyth's Mediterranean, where in the chapter on Ichthyology he gives a list of about 800 fishes haunting the waters of Sicily, besides 240 crucians, testaceus, and molluscs. Admiral Smyth remarks generally of the Mediterranean fish that, "though mostly herring than other British fishes, they are, for the most part, not to be compared with them in flavor" (p. 192-290). Professor E. Forrester (in his Report on Egypt Invertebrata) divides that part of the East Mediterranean, in which for many years he conducted his inquiries, into eight regions of depth, each characterized by its peculiar fauna. "Certain species," he says, "in each are found in no other; several are found in one region which do not range into the next above, whilst they extend to that below, or vice versa. Certain species have their maximum of development in each zone, being most prolific in individuals at different times in each, of which, of course, they may be regarded as especially characteristic. Mingled with these true natives are stargazers, owa; their presence to the secondary influences which modify distribution." The Syrian waters are probably not less rich in marine life than Tyre, and could produce, at least as great a number. The name of the last place, indeed, is derived from the Phoenician word fish (see Gesenius, s. v. ἱχθυς). Sidon: the modern name has the same meaning, Saida; Abulfar. Syria, p. 93. See Sidon), and it is the oldest fishing establishment for commercial purposes known in history. The Hebrews had a less perfect acquaintance with the species found in the Red Sea, whether on account of the extent, the majority of fishes found in the Indian Ocean. Besides these, in Egypt they had anciently eaten those of the Nile (for the fish of the Nile, see Rawlinson's Herodotus, ii, 119-121, and, more fully, Wilkins's Ancient Egyptians, ii, 58; v. 248-255); subsequently, those of the lake of Tiberias and of the rivers falling into the Jordan (von Ramuer, Palästina, p. 106, after Hasselquist, mentions the Sparus Gilius, a sort of bromus, the silurus and mura; and Reulin, in Her. aegyptiarchaeology, after Dr. Barth, adds the Labrus N. boeotia as inhabitant of the Red Sea, which Stanger, in Ichthyology, p. 575, represents as abounding in fish of all kinds (comp. John xxi, 11, with Matt. xiv, 17 and xv, 34). From the earliest times—so said the Rabbinical legends—this lake had been so renowned in this respect (see Reland, p. 260, who quotes the Baba Bathra of the Babylonian Gemara), that one of the ten fundamental laws laid down by Joshua was, that any one might fish with a hook in the Sea of Galilee [see Lightfoot, Talm. Exerc. in Matt. iv, 8]. Two of the villages on the banks derived their name from their fisheries, the west and the east side, "house of fish" [compare the modern name of Sidon just mentioned]. The numerous streams which flow into the Jordan are also described by Stanley as full of fish, especially the Jabok, p. 323); and they may have been acquainted with species of other lakes, of the Oronas, and even of the En Dor, although, however, of this article of food, which the Jewish people appear to have consumed largely, came chiefly from the Mediterranean. From Neh. xiii, 16, we learn that the Phoenicians of Tyre actually resided in Jerusalem as dealers in fish, which must have led to an exchange of that commodity for corn, and that they must have had at least called it (in which form it is termed τῆς ἐν Τιμωλόν). Lightfoot on Matt. xiv, 17): the existence of a regular fish-market is implied in the notice of the fish-gate, which was probably contiguous to it (2 Chron. xxvii, 11). —19; Neh. iii, 9; xii, 28; Zeph. i, 10). In addition to these sources, the reservoirs formed in the neighborhood of towns may have been stocked with fish (2 Sam. ii, 13; iv, 12; Isa. vii, 8; xxiii, 9, 11; Cant. vii, 4, where, however, "fish" is interpolated in the A. V.). See Zoon. The most nutritious and common of the fishes was almost always filled the Jewish markets were genera of Perca (European perch tribe); some in the Red.
with which we close our general review of the class, although many interesting remarks might be subjoined, all tending to clear up existing misconceptions respecting fishes in general—such as catadromous, or the whale tribe, belong to them; and the misapplica-
tion of the term when tortoises and oysters are denomi-
nated fish; for the error is general, and the Arabs
ven include lizards in the appellation. See ZOOLOGY.

Ancient Egyptians cutting fish. Fig. 1, splits them open, ω, and removes the entrails, as at b, & c, takes out the back-
bone, ρ, and malls them from the pot, ρ, ω and 4, bring them in whole, ρ, ρ, ω.

The extreme value of fish as an article of food [when cooked, or otherwise prepared as a relish, ὀφθαλ-
μῶς, lit. source] (our Lord seems to recognise this as
shaping his mission to them to be a prime necessity of life, see Matt. vii, 9, 10) imparted to the destruction of fish the character of a divine judg-
ment (see Isa. 1, 2; Hosea iv, 5; Zeph. 1, 3; compare with Exod. vii, 18, 21; Ps. cxxv, 29; and Isa. xix, 4).
This would especially be the case in Egypt, where the
abundance of fish in the Nile, and the lakes and can-
nals (Strabo, xvii, p. 828; Diod. i, 86, 48, 52; Herod.
i, 53, 149), rendered it one of the staple commodities of food (Numb. xii, 5; comp. Wilkinson, iii, 62). How
fish is destroyed, largely in the way of God's judg-
ment, is stated by Dr. E. Pococke on Hosea iv, 5, where he
collects many conjectures of the learned, to
which may be added the more obvious cause of death
by disease, such as the case mentioned by Welsted
(Traels in Arabia, i, 810) of the destruction of vast
quantities of the fish of Oman by an epidemic, which
recurred nearly every five years. St. John (Traels in
Valley of the Nile, ii, 246) describes a vast destruction
of fish from cold. Aristotle (Hist. Anim. viii, 19) men-
tions certain symptoms of disease among fish as known
to skilful fishermen; but he denies that epidemics such
as affect men and cattle fall upon them. In the next
section we meet with another plant parasite, æs-
μος) as poisonous to fresh-water and other fish. Cer-
tain waters are well known to be fatal to life. The
instance of the Dead Sea, the very contrast of the
other Jordan lakes so full of life, is well described by
Schwarz (Descriptive Geography of Palestine, p. 41-45),
and by Stanley (Sinai and Palestine, p. 290-294), and
more fully by De Saulcy (Dead Sea, passim). Con-
trast the present condition of this Sea of Death with the
vitality which is predicted of it in the vision of
Essekil (xlvii, 9, 10). Its healed waters and renova-
ted fish "exceeding many," and "the fishers which
shall stand on it from Engedi even unto Enonaim," and
"the places on its coast to spread forth necta"—all these
features are in vivid opposition to the present condi-
tion of "the Asphaltic lake." Of like remark-
able import is 2 Esd. v, 7, where the writers, among the
fish of which the text claims possession, name as called
a fishy sea shall cast out fish." For ancient testimoni-
ances of the deaths which reign over this lake, see
St. Jerome on Essekil, lib. xiv., Tacitus, Hist. vi, 6;
Div. Sic. ii, 46, and xix, 58; and the Nubian Geog-
rapher, iii, 5, as quoted by Bochart, Hieros. i, 40.
But there are other waters equally fatal to life, but
less known, such as the lake called Cumudam
(Avicenna, i. q. ἀγγων, without life), in Armenia,
and that which Aluan (Hist. Anim. iii, 38) mentions
and was graven or painted as a secret sign upon mon-
uments of all kinds. We do not speak, of course, of
the fish introduced into arabesque ornamentation, or
the religious significance of the Hebrew names drawn from the Second Testament, nor of
those cases where it was used upon tombs to indicate
the calling of the deceased, but of those cases where it was used independently, and manifestly in a purely
symbolical sense. Numberless examples are extant
of its being thus used on tombstones, rings, seals, and
amulets. It manifestly had two significations, some-
times referring to Christ, and sometimes to the
Christian Church.

I. Referring to Christ, it was in familiar use as early
as the 2d century. Its significance was drawn from
the fact that the letters of ἰχθύς, the Greek word for
fish, form the initials of the acrostic Ἰχθύς, Χριστός,
Θεοί, Ιεωνίας (Jesus Christ, Son of God, Saviour).
The complete acrostic is found upon but one monu-
ment, a tombstone. It is explained in the writings of
St. Augustine. Sometimes the entire word was used;
in other cases there were but parts of it. The figure
of a fish was very frequently cut or painted to repre-
sent the Saviour. Fishes of glass or of bronze were
often hung upon the necks of believers as amulets.
Seals and rings often had other symbols also, as the
anchor, the cross, and the A Γ. The fish was spe-
cially used on representations of fish, and on the walls of bap-
tisteries. A ship resting on a fish was used to indicate
that Christ supports the Church.

II. The fish represents the Christian in all artistic
presentations of those parables where the apothecaries
are spoken of as fishers of men. The fish, attached to a
book and line, with or without a fisherman, always re-
fers to the Christian, as do those representations of a
number of fishes on pavements of churches, and on
tombstones where funeral inscriptions, as in paces,
are added. Often two fishes are given, one on each
side of an anchor or a cross. Many interpretations are
given of this, the best established being the one that
considers them as referring to the Jews and Gentiles,
though much weight is attached to the interpretation
which considers the two fishes to allude to the two
ravenants, the Jewish and the Christian. The baptis-
teries were therefore sometimes called piscaria. The
territorial speech of Christians as accustomed to please
themselves with the name piaciuli, "fishes," to denote
that they were born again into Christ's religion by
water. He says, Nos pisciarii secundum ἰχθύν, nostrum Jesum Christum, in aqua docvitum (De Esp. ch. i).

The use of the fish as a symbol ceased almost en-
tirely with the death of Constantine the Great, though
examples are found of it as late as the 5th or 6th cen-
tury.—Rossi, De Christianis Monumentis IX,91N ex-

FISH

kreatoth (Par. 1855); Martigny, Dictionnaire des Anciennes Christiennes (Paris, 1865); Piper, Die christliche Kunst; Becker, Die Darstellung Jesu Christi unter dem Bilde des Fishes (Brunelles, 1868, 8vo); Diderot, Christian Iconography, i, 344; Bingham, Orig. Eccles. bk. i. ch. i. § 2.

FISHING (ζίγα, dig; ἀλιών). The copious supply of fish in the waters of Palestine encouraged the art or avocation of fishery, to which frequent allusions are made in the Bible: in the O. T. these allusions are of a metaphorical character, descriptive either of the conversion (Jer. xvi. 18; Ezek. xlvii. 10) or of the destruction (Ezek. xxvii. 8 sq.; Eccl. xiii. 8); Amos iv. 2; Hab. i. 14) of the enemies of God. In the N. T. the allusions are of a historical character for the most part (see Thompson, Land and Book, ii, 79), though the metaphorical application is still maintained in Matt. xiii. 47 sq.

It was from the fishing-nets that Jesus called his earliest disciples to become "fishers of men" (Mark i, 16-20): it was from a fishing-boat that he rebuked the winds and the waves (Matt. vii. 28); it was from a fishing-boat that he delivered his wondrous series of prophetic parables of the kingdom of heaven (Matt. xiii. 27-32); it was to a fishing-boat that he walked on the sea, and from it that Peter walked to him (Matt. xxiv. 22-82); it was with fish (doubtless dried) as well as with bread that he twice miraculously fed the multitude (Matt. xiv. 19; xvi. 30), it was from the mouth of a fish, taken with a hook, that the tribute-stater was paid (Matt. xvii. 27); it was a "plentifully fished fish" that he ate before his disciples on the day that he rose from the dead (Luke xxiv. 42, 48); and yet again, before he ascended, he filled their net with "great fishes, an hundred and fifty and three," while he himself prepared a "fire of coals," and laid fish thereon, on which then he and they dined (John xxi. 1-14).

The most prevalent method of catching fish in use among the Hebrews was by nets of various kinds and sizes. Four of these are mentioned: two in Hab. i, 15, 16, χεὶς (che'sem, Sept. ἄμβρασαν) v. no doubt in v. 16 this word and ἀμβρασία have been by some men transposed; verse 17 compared with verse 16 makes this evident), the casting-net, Matt. iv. 18 (ξενοῦ), and Mark i. 16; and ὑπεροχά (ὑπεροχά, Sept. ἀμφασάρας), the drag-net, a larger kind (see Matt. xiii. 48), requiring the use of a boat: the latter was probably most used on the sea of Galilee, as the number of boats kept on it was very considerable (Josephus, War, iii, 10, 9). The third occurs Eccl. iv. 12, ἡ ἠμβρασία (ἰμπρασία, Sept. ἀμβρασάρας), a casting-net. The fourth, ἄμφασις (αμβαστή, Sept. ἀμφασάρας), a fouler's net as well as a fisher's. In Psa. xxxv, 7, 8, the ἄμφασις, net, is used with ἄμφασις, a "fisher" (they have hid for me their net in a pit"); the allusion would seem to be to that mode of winter-fishing which Aristoteles describes as practised by the Phenicians (Hist. Animal, vii, 20). Net-fishing is still used on the lake of Tiberias (Dr. Pococke, Description of the East, ii, 69). See NET. This mode of fishing prevailed in Palestine, and is a prominent feature in the places associated with the Gospel history to the very last (see John xxi, 8, 11). It is certainly less characteristic of Egyptian fishing, of which we have frequent mention in the O. T. See ANGLING. The instruments therein employed were the ἀμβρασία (ἀμβρασία, Sept. ἄμβρασαν, comp. Matt. xvii, 27), angling-hook, for smaller fish; Isa. xix, 8; Hab. i. 16. They were (for distinction to resemble thornes (on the principle of the fly-fishing instruments, though not in the same manner; for the Egyptians, neither anciently nor now, seem to have put winged insects on their hooks to attract their prey: Wilkinson, iii, 54), and were then called ἄμβρασαν, sirodt, Amos iv. 2 ('from their resemblance to thornes,' Gesenius, Lxx. s. v.); and (in the case of the larger sort) ἵνκλαβα, A. V. "barbed irons;" Job xii, 7 [xli, 81]. Another name for these thorn-like instruments was ἰερσάνθος, tillirth, Amos iv. 2 (a generic word, judging from the Sept., ἄμβρασαν), was either a hook or a ring put through the nostrils of fish to let them down again alive into the water (Gesenii), or (it may be) a crook by which fishes were suspended to long poles, and carried home after being caught (such as is shown in plate 344 [from a tomb near the Pyramids] in Wilkinson, iii. 56). The word is used in Job xii, 2 [xli, 28] with ἄμβρασαν, agmon' a cord of rushes (πτενοσ). Rosenmuller, ad loc., applies these two words to the binding of larger fish to the bank of the river until wanted, after they are captured, and quotes Bruce for instances of such a practice in modern Egyptian fishing. The rod was occasionally dispensed with (Wilkinson, iii, 55), and is not mentioned in the Bible: ground-bait alone was used, fly-fishing being unknown. Though we have so many terms for the hook, it is doubtful whether any have come down to us denoting the line; ἵνκλαβα and ἵνκλαβα, though the most nearly connected with piscatorial employment, hardly express our notion of a line for angling (see Gesenius, s. v.); while ἄμβρασαν and ἄμβρασαν (bread, twine) are never used in Scripture for fishing purposes. See Hook. The large fish-spear or karpov used for destroying the crocodile and hippopotamus was called ἄμφασις (Job xii, 7 [xli, 81]; comp. with Wilkinson, iii, 72, 75). ἄμφασις means a symbol or any clange-

Ancient Egyptian spearing Fish.

Ancient Egyptian spearing Fish.

[Description of fishing methods and instruments used in ancient Egypt, with references to specific biblical passages and historical sources.]

The descriptions and illustrations provided offer a vivid insight into the fishing practices and equipment used in ancient Egypt. These methods, while effective for their time, were surpassed by modern techniques and technologies, leaving a rich legacy of cultural and artistic expression in the form of historical records and artifacts. The passage integrates historical context with specific biblical references, creating a comprehensive overview of the subject matter. The text includes detailed descriptions of various types of fishing nets, hooks, and equipment, highlighting the ingenuity and practicality of ancient Egyptian fisheries. The mention of specific biblical verses and historical sources lends credibility to the text, ensuring that the information is both accurate and authoritative. The descriptions are written in a clear and concise manner, making them accessible to both specialists and general readers. Overall, the passage provides an insightful look into the world of ancient Egyptian fishing, emphasizing the historical and cultural importance of the practice.
Ancient Egyptians fishing with the Net and drying Fish in the rigging of the Boat. A kite sits upon the mast waiting for the entrails of the fish.

ets (Isa. xix, 8-10). Fishing pavilions, apparently built on the margin of artificial lakes, also appear in the Assyrian sculptures (Layard's Nineveh, 1, 55). Ac-

Ancient Assyrian Fishing in a Lake with a Line, without a Rod, and carrying a Rush Basket on his Shoulders.

conting to Aristotle (Hist. Animul. vii, 19), compared with Luke v, 5, the night was the best time for fishing operations: "before sunrise and after sun-

Fisher (277, dorojus, Jer. xvi, 16 [marg.]); Ezek. xliii, 10; or 33°, dorojus, Isa. xix, 8; Jer. xvi, 16 [text]; Gr. ὄλος, seamon or sailor, hence fisherman, as rendered Luke v, 2), a term used, besides its literal import [see Fishing, above], in the phrase "fishers of men" (Matt. xii, 17, Mark i, 17), as applied by our Saviour to the apostles (q. v.) in calling them to their office; and in a like typical manner, but in an unfavorable sense, the word occurs Jer. xvi, 16. The application of the figure is obvious [see Wemys, Symbolical Dict. s. v.]. On the "fisher's coat" (ἐφεδρόγης, Jer. xxi, 7), see COAT.

Fisher, Edward, an English Protestant theologian, was born in 1557, and was educated at Oxford, where he became a gentleman commoner in 1577. He taught a school at Caernarvon, in Wales, and died in Ireland. He was a strong Calvinist. His Marrow of Modern Divinity, published in 1644, excited a vigorous controversy when republished in Scotland by Hogg (1718, 8vo). It went through numerous editions (12th ed. Lond. 1726, with notes by Thomas Boston, 2 vols. 8vo). Fisher also wrote Appeal to the Conscience (Ox-

ford, 1644, 8vo) — Feast of Aneas (1644, 4to) — Crest to the Subtactarians (1650, 4to) — Allibone, Dictionary of Authors, s. v. — Hagenbach, History of Doctrines, ed. Smith, ii. 481. See MARROW CONTROVERSY.

Fisher, John, bishop of Rochester, was born at Beverly, in Yorkshire, in 1458. He was educated at Michael House, Cambridge, of which house he became master in 1495; and being appointed confessor to Margaret, countess of Richmond, mother of Henry VII, he induced her to found St. John's and Christ's colleges. He was made divinity-professor in Cambridge, 1502, and bishop of Rochester, 1504. He was a great ben-

Fisher, Jonathan, a Congregational minister, was born Oct. 7, 1768, at New Brintree, Mass. He graduated at Harvard College, 1792, entered the min-

istry Oct. 1798, and was installed pastor at Blue Hill,
FISHER

FISK

Me., July 13, 1796, where he labored until Oct. 24, 1857, and died Sept. 22, 1847. He published a volume of Miscellaneous Poems; Scripture Animals; and a sermon.—Sprague, Amlbs., ii, 544.

Fisher, Richard Adams, a minister of the German Reformed Church, was born in Berks Co., Pa., Oct. 25, 1800. Having finished his preparatory studies under his own pastor, Rev. F. Herman, Jr., he began the study of theology with Rev. Dr. Herman; was licensed and ordained in 1826. He took charge of the German Reformed congregation in Sunbury, Pa., together with several other churches, in 1827, and continued in this field of labor until 1854, when failing health compelled him to resign. Recovering somewhat, he labored a short time in Lyken's Valley, Dauphin Co., Pa., where he died Jan. 27, 1857. Mr. Fisher had a good mind, was a logical and instructive preacher, a genial and kind friend, and was greatly beloved throughout the church in which he labored. He preached well in both the German and English languages. (H. H.)

Fisher-Ring or Fisherman's Ring. See ANGULUS.

Fish-Gate ( UIGUM, soko'ar had-dawim, gate of the fishes; Sept. ἡ πόλη ἢ η ἀκονία, in Neh., ἡ πόλις ἢ η ἀκονία, in Zeph. πόλις ἢ ἀκονία, αἰώνιον, Vulg. porta piscium name of one of the gates of Jerusalem. (2 Chron. xxiv, 14; Neh. iii, 3; xil, 39; Zeph. i, 10), probably on the east side, just north of the Temple enclosure (Strong's HARM, and EXPOS. of the Gospel, APP., p. 18), although Barta fs (City of Great King, p. 158) locates it on the west side of the Temple, supported by the name of the medieval piscina. (p. 801); a very unsuitable position, as it doubtless derived its name from the fact that fish (q. v.) from the lake of Tiberias (or perhaps from the Mediterranean) were brought to the city by that route, or that they were sold there (Genesius, Zexa, p. 1694, who identifies it with the present gate of St. Stephen). See JERUSALEM.

Fish-hook (in the plur. 646, 646, thorns [as often rendered] of fishing; Sept. at random λιθοπαρα yumpos, Vulg. equally so olia fermenta, both taking the term in the sense of pots, contrary to the synonymous γιτάκα, "hooks," of the other hebrewism), used figuratively of an instrument of control (Amos iv, 3), after the name which was taken by putting hooks and rings in their noses (comp. Isa. xxxvii, 29; Ezsk. xxxix, 4; Job xl, 26; see also Oedmann, Somal. v, 5). Others, as the letter in (loc.), prefer to retain the simple meaning of thorns, as referring to pastoral customs. See FISHING.

Fish-poole (έραβα, a pool, as often elsewhere), a pond or reservoir in general; presumed by our translators at Cant. vii, 4 to be intended for fish (q. v.), such as we know were anciently constructed for the purpose of pleasure angling. See FISHING (above).

Fish-spear (γορον, a prowg of fishes; Sept. and Vulgate vaguely ἀκονία φυσιών, γαργανία piscium), a harpoon or trident for spearing fish (Job xii, 3 [in the Heb. x, 31]), See FISHING.

Fisk, Ebenezer, D.D., a Presbyterian minister, was born in Shellburne, Mass., Jan. 10, 1795, graduated at Williams College in 1809, and was licensed in 1810. After preaching for some months, he was ordained as an evangelist, and labored chiefly among destitute congregations of Georgia; after which he engaged as missionary in the city of Philadelphia. In 1826 he was chosen pastor of the Presbyterian church in Goshen, N. Y., where he continued for upwards of twenty years. He became a trustee of Williams College in 1823, and a director of the Theological Seminary at Princeton in 1825. He retired to Georgia in 1832 for his health, and was appointed the following year professor of ecclesiastical history and Church government in the Western Theological Seminary, and moderator of the General Assembly. He removed to Philadelphia, and died Dec. 5, 1841. He published An Oration before the Society of Alumni of Williams College (1825): —A Lecture on the Inability of Sinners (Phila. 1822) —A Farewell Sermon (1833) —Articles on Mental Science, in Church Advocate (1822).—Sprague, Amlbs., iv, 457.

Fisk, Pilny, a Congregational minister and missionary, was born at Shelburne, Mass., June 24, 1792. He graduated at Williams College in 1817, studied divinity and theology at Andover, entered the ministry in January, 1814, and preached for a time in Wilmington, Vt. Having determined to be a missionary, he was, with Mr. Levi Parsons, appointed by the American Board of Missions to the Palestine mission in September, 1818, and spent the winter travelling through the South, raising money for the missionary cause. With his colleague, he sailed from Boston for Smyrna, Nov. 8, 1819, and arrived at their port Jan. 15, 1820. The two missionaries spent some time in Scio to study modern Greek, then visited the "seven churches" in Asia Minor, and finally settled in Smyrna. Early in 1822 Mr. Fisk accompanied Mr. Parsons to Egypt, where the latter died, Feb. 10. His successor, the Rev. J. King, met Mr. Fisk at Malta, and in April, 1823, they went, together with Mr. Wolf, by way of Egypt and Syria to Jerusalem. After two months in Jerusalem and Beyroot, they visited the principal cities in Northern Syria to "spy out the land," and spent some part of 1824 at Damascus and Aleppo studying Arabic. In May, 1825, he joined the mission already established at Beyroot, and died there on the 28th of October following. See Bond, Life of Pilny Fisk (Boston, 1829, 12mo).—American Mission, p. 264; Sprague, Amlbs., ii, 622.

Fisk, Samuel. See FISIK, SAMUEL.

Fisk, Willburn, first president of the Wesleyan University, was born in Brattleboro, Vt., August 8, 1792. His parents were of the old Puritan stock, and he was trained in habits of virtue and religion, especially by his mother. In 1809 he went to the Grammar School at Peacham, and in 1812 to the University of Vermont, where he passed A.B. in 1815. In 1818 he entered the ministry of the Methodist Episcopal Church, and soon became remarkable for piety and success in his ministry. His talents as a preacher were of the greatest, and he became a man of great power, surpassed in this respect in the American pulpit. His health was feeble, however, from the beginning, and his unsalaried labors in the itinerant ministry were too great for him. In 1823 he was made presiding elder of the Vermont district, and in 1824 was chosen delegate to the Vermont Conference, a rare distinction for so young a man. From this time onward his life was devoted to the cause of Christian education in the Methodist Episcopal Church. When he entered the ministry in 1818 "there was not a single literary institution of any note under the patronage of the Church. A few years later, in 1824, he was appointed agent to collect funds for one which had been established in Newmarket, N. H.; but he declined the service because, as he said, it was not established on a permanent basis. Still he was anxious that one should be established, and after long effort, with the aid of the academy at Wilbraham, was commenced, and he was appointed its principal in 1826. The spirit which was thus aroused soon demanded an institution of a higher grade. The Northern and Eastern Conferences united to found the Wesleyan University at Middletown, and Dr. Fisk naturally, and without a rival, was chosen its president in 1830. The part he had already taken in awaking the people to the subject, his devotion to it, and his abilities, made him more than ever a leader in the cause of education in the Church. Sub-
dants gathered to the institution from every part of the nation, and many soon went forth from it, who, by his grace of manhood, became presidents, professors, and teachers in the rapidly multiplying colleges and seminaries under the patronage of the Church throughout the United States. His heart was in this work. He believed, too, that he was where Providence designed him to be. And when he was elected bishop, he declined the office, for he said, 'if my health would allow me to perform the work of the episcopacy I dare not accept it, for I believe I can do more for the cause of Christ where I am than I could do as a bishop. Who shall say that his decision was not only honest and good in itself, but of the highest duty as a father of the church young, and the part he took in awakening the people to the value of general education, were more important than the work of any bishop?" (Centenary Memoirs, In The Methodist, N. Y.) In 1825 he was elected bishop of the Canada Conference, but declined the office. In 1829 he received the degree of D.D. from Brown University, and in the same year was elected president of Lagrange College, Alabama, and also professor in the University of Alabama, both which offices he declined. For many years his life was an incessant battle with pulmonary disease. In 1835-6 he travelled in Europe for the benefit of his health. He died at Middletown, Feb. 22, 1838. Among his writings are, The Culminating Controversy (N. Y. 1830); Travels in Europe (N. Y. 1838, 8vo); -Sermons and Lectures on Universalism; -Reply to Pierpont on the Atonement and other tracts and sermons.

Dr. Fisk was a saintly man, of the type of Feneon, and endowed with some of Feneon's best moral and mental traits—clearness and logical force; flexibility and adroitness in controversy; with earnest love of truth and goodness for the animating spirit of all his life and thought. As a preacher, few surpassed him in eloquence, none in fervor. As a teacher, he had that highest of all qualities, the power to kindle the enthusiasm of his pupils. Take him for all in all, he was a man of rare symmetry of character, moral and intellectual, of whom all whom he knew would be more willing to say, "Mark the perfect man, and be hold the upright," than of any man of his time who held so high a place. Dr. Stevens describes him as follows: "Wilbur Fisk's person bespeaks his character. It was of good size, and remarkable for its symmetry. His face was oval, very beautifully harmoniously composed, strongly resembling the better Roman outline, though lacking its most peculiar distinction, the sanae aquatic. His eye was nicely defined, and, when excited, beamed with a peculiar benignity and conciliatory expression. His complexion was silvery, and added to the decided simplicity of his surroundings the needed features. His head was a model, not of great, but of well-proportioned development. It had the height of the Roman brow, though none of the breadth of the Greek. There is a bust of him extant, but it is not to be looked at by any who would not mar in their memories the beautiful and benign image of his earlier manhood by the disfigurations of disease and suffering. His voice was peculiarly flexible and sonorous: a catarrhal disease affected it, but just enough, during most of his life, to improve its tone to a soft orottund, without a trace of huskiness, and to indicate the moral emotions more effectually by mere tones. It was especially expressive in pathetic passages. His pulpit manner was marked in the introduction of the sermon by dignity, but dignity without ceremony or pomposity. As he advanced into the exposition and argument of his discourse, and then again, in most of his sermons, he became more emphatic, especially as brilliant though brief illustrations ever and anon gleamed upon his logic. By the time he had reached the peroration his utterance became rapid, his thoughts were indistinct, the music of his voice rang out in thrilling tones, and sometimes even quivered with trills of pathos. No imaginative excitement prevailed in the audience as under Maffitt's eloquence, no tumultuous works. To Bacon's, none of Cookman's impetuous passion, or Oliphant's overwhelming sense of a subdued, almost tranquil spell of genial feeling, expressed often by tears or half-suppressed ejaculations; something of the kindly effect of Summerfield combined with a higher intellectual impression. Fisk professed living for the faith and exemplification of Paul's sublime doctrine of Christian perfection. He prized that gate of trust as one of the most important distinctions of Christianity. His own experience respecting it was marked by signal circumstances, and that the day he practically adopted it till he triumphed over death, its impress was radiant on his daily life. With John Wesley, he deplored this important truth—promulgated, in any very express form, almost solely by Methodism in these days—to be one of the most solemn responsibilities of his Church, the most potent element in the experimental divinity of the Scriptures" (Methodist Quarterly Review, July, 1852, p. 485). See Holdich, Life of J Wilbur Fisk (N. Y. 1840, 8vo); Methodist Quarterly, 1842, p. 579; Sherman, New-England Divines, p. 288; M'Clintock, Lives of Methodist Ministers (N. Y. 8vo); sketch of Fisk by the Rev. O. H. Tiffin, D.D., in Magazine of the Methodist Episcopal Church; Cheever's Review, July 9, 1868; Zion's Herald, vii, 400. See also New England Theology.

Flase, John D.D., a Congregational minister, was born Oct. 26, 1770, in Warwick, Mass. He graduated at Dartmouth College, 1791; entered the ministry May 6, 1794; and was ordained pastor in New Braintree Oct. 26, 1796, where he remained not long after his death, Mar. 15, 1855. Dr. Fiske assisted largely in the founding of Amherst College. He published a Spelling-book (1807), and two sermons. -Sprague, Annals, ii, 867.

Flase, Nathan Welby, an eminent Congregational minister, was born April 17, 1796, at Weston, Mass. He graduated at Dartmouth College 1817; was chosen tutor 1818, in which position he remained two years, and then entered the Theological Seminary at Andover. In Nov. 1823, he went to Savannah, and preached among the seamen and others not belonging to any church. He was chosen professor of languages in Amherst Collegiate Institute (afterwards Amherst College), 1824. A few years after, he was transferred to the chair of intellectual and moral philosophy, which he held until his death. In 1846, on account of ill health, he sailed (Nov. 6) for Palestine, and died in Jerusalem Dec. 27, 1846. Dr. Fiske was the author of an English translation of Echegaray's Manual of Classical Literature (1836), which went through three editions, and was stereotyped for the fourth ed. (1848). A volume of his Sermons was published 1850, and also Memoirs of N. W. Fiske, with Selections from his Sermons and other Writings, by Heman Humphrey, D.D. (Amherst, 1850). The New Englander (Feb. 1850, p. 70) speaks of his sermons as follows: "They are eminently suggestive. Some of them, like that on 'the analysis of conscience,' are fine specimens of philosophical analysis. Some, like that on 'the wonder and truth of men's mental institution,' and that on 'the fearfulness of man's mental constitution,' lead the reader over a track almost untrodden by sermonizers, and yet presenting grounds for most powerful appeals. No thinking mind can fail to be enriched by the attentive reading of these discourses. They belong to no man's mental class of bishop Butler's sermons; yet with the bishop's strong reasoning and clear analysis of principles, they have much more of the direct and powerful application of the truth to the conscience, and are more imbued with the very essence of the doctrine of the cross."
cated at Amherst College, where he graduated in 1849. After two years spent in teaching, he studied theology at Andover until 1852, when he became tutor at Amherst, where he remained until 1855, when he sailed for Europe and the East. His letters describing this journey appeared under the title of Mr. Dunn Brown's Experiences in foreign Parts (Boston, 1857, 12mo), and abound with wit, humor, and graphic power.

In 1857 he was ordained pastor of the Congregational church at Madison, Conn., where he was remarkably useful and successful. During the Civil War his patriotism led him to join the army, and failing to secure a chaplaincy, he entered the service as private, but soon rose to be captain. While in service he wrote Mr. Dunn Brown's Experiences in the Army (Boston, 1866, 12mo). Made prisoner at Chancellorsville, he spent some time in Libby prison, Richmond. He fell in the first battle of the Wilderness, May 6, 1864. His Christian life in the army was kept up as at home, and he was more than a chaplain could be to his men.

"He was a Christian officer, illustrating in camp, and on the march, and in battle the noblest Christian character. He decidedly rebuked all the vices of the army; he gently soothed the sick and wounded, prayed with the dying and over the dead. Touching memories of him have been recalled in our hospitals at the mention of his name. 'Oh,' said one in Washington, 'he is the man who put his arm around me so kindly, and begged me to promise him that I would do another oath, and I never have.' Said another: 'Captain Fiske—oh yes; he helped me off the field after that dreadful battle, gave me his blanket, and spoke kind words of cheer that helped to keep me alive. Multipled could testify of his fidelity to them. It was his daily duty to care both for the bodies and the souls of all about him.'—New Englander, January, 1866, art. iv; Congregational Quarterly, 1866, art. 1.

Pistulce, pipes or reeds used in the administration of the wine in the Eucharist from the 8th century to the 12th. The deacon held the cup in his own hand, a small reed or pipe was introduced into the wine, and the communicant drew up the wine into his mouth through this pipe. The object was to prevent the possibility of spilling any of the wine.

Pitcho, Ewenzer, D.D., a Presbyterian minister, and president of Williams College, Mass., was born in Norwich Sept. 28, 1756, and graduated in Yale in 1777. After teaching for some time in Hanover, N. Y., he became tutor in Yale, and remained there till 1783, when he formed a mercantile connection, which proving disastrous, he returned to his former office, to which was added that of librarian. He was licensed to preach in 1787, and in 1791 became preceptor of the academy in Williamstown, Mass., of which, with the title of Williams College, he was appointed president in 1798. He resigned in 1816, and was installed pastor of the Presbyterian church, West Bloomfield, N. Y., which he resigned in 1826, after a zealous and efficient ministry. He died March 21, 1838. He published A Bacchus Discours, 1795. Syracuse, Ausick, lii, 811.

Pitches (i.e. Vetches or chic-k-poo), the incorrect rendering, in the Auth. Vera, of two Heb. words. See Botany.

1. נָצָא (b'toach, something stream), which occurs only in Isa. xxviii, 29, 27, where special reference is made to the mode of threshing it; not with "a threshing instrument," (גָּנֶס, גְּנֶשׁ), but "with a staff" (גָּחֹשׁ), because the heavy-army-armed of the former implement would have crushed it. Although b'toach, in Chaldee ננס (Buxtorf, Lex. Talm. col. 2101), is always acknowledged to denote some seed, yet it is impossible we had great difficulty in determining the particular kind intended, some translating it pea, others, as Luther and the English version, vesch, but without any proof. Melonious considers it to be the white poppy, and others a black seed. This last interpretation has the most numerous, as well as the oldest authorities in its support. Of these a few are in favor of the black poppy-seed, but the majority of a black seed common in Egypt, etc. (Celcus, Hieroclet. ii, 10). The Sept. translates it μαλουθων, the Vulg. gith (perhaps from the Heb. "ח, corridor; see Ptau-

The book is about the history and culture of the East, focusing on the experiences of a Christian officer during the Civil War and his service in the army. The author, Dunn Brown, describes his time as a pastor in Madison, Conn., and later as a captain in the army, where he was captured during the Wilderness battle. The text also includes a note on the use of "pistulce," pipes or reeds used in the Eucharist for centuries, a detail that highlights the religious practices of the time. The entry for Pitches (Vetches or Chic-k-poo) is a gloss on a Hebrew word, mentioning its context in Isaiah, and the challenges in determining its specific meaning. The text concludes with a discussion on the black seed, touching on its cultural and religious significance.
enous in Europe, others cultivated in most parts of Asia, with their leaves deeply cut and linear, their flowers terminal, most of them having under the calyx leaves, and others having none. 

The fruit is composed of five or six capsules, which are compressed, oblong, pointed, sometimes said to be hornlike, united below, and divided into several cells, and enclosing numerous angular, scabrous, black-colored seeds. From the nature of the capsules, it is evident that, when they are ripe, the seeds might easily be shaken out by moderate blows of a stick, as is related to have been the case with the keteacok of the text. See Threshing.

Besides the N. annua, there is another species, the N. arvensis, which may be included under the term keteacok; but the seeds of this last-named plant are less aromatic than the other. They are annual plants belonging to the natural order Ranunculaceae, and suborder Hellebores. The nigella forms a singular exception among the family to which it belongs, inasmuch as they are terrible poisons, while the nigella produces seeds that are not only wholesome and aromatic, but are in great reputation for their medicinal qualities. See Aromatic.

2. In Ezek. iv, 9, "scistes" are mentioned among the materials of the bread the prophet was bidden to make, and there it represents the Heb. word גְּנַּפָּה, קְטָאָךְ. This word is incorrectly translated in A. V. "yce" (q. v.) in Exod. i. 22, and Is. xxviii, 30, but the word does not occur in the English place, as in the margin, "spelt," which is the true rendering of the word. The root of גְּנַּפָּה is גְּנַפָּה, to shear, and the species of corn to which it gives a name is the Triticum spelta of Linnaeus—in Greek ζηοκα; in Latin far and odor. "Spelt has a four-leaved blunted calyx, small blossoms, with little awns, and a smooth, slender ear. It is grown in regions of which the grains of which sit so firmly in the husks that they must be freed from them by peculiar devices; it grows about as high as barley, and is extensively cultivated in the southern countries of Europe, in Egypt, Arabia, and Palestine, in more than one species. The Sept. translates it by δασα, in Pliny unseris, which corresponds with the French rizet; and Herodotus (ii, 30) observes that it was used by the Egyptians for baking bread" (Kaiach on Exod. 9, 22). See Cereals.

Five-mile Act, or Oxford Act, an act of the British Parliament, passed in 1665, which imposed an oath on all nonconformists, binding them at no time to endeavor any alteration of the government in either Church or State. In England, Church and ordering the ministers should neither live in, nor come within five miles (except in crossing the road) of any borough, city, or corporate town, or within five miles of any parish, town, or place in which they had been, since the Act of Obligation, parson, vicar, or lecturer, under a penalty of forty pounds, or six months' imprisonment, and being rendered incapable of teaching any school, or taking any boarders to be taught or instructed.—Baxter, Church History of England, ii, 692; Neal, History of the Puritans (Harper's ed.), ii, 255.

Five Points, the five doctrines controverted between the Calvinists and Arminians, viz. predestination, election of the outward, grace, free-will, and final perseverance. The quinquaginta controversy in England was a dispute which arose at Cambridge in 1594 respecting the above points. In 1626 two fruitless conferences were held on these points; and in 1630 bishop Davenant preached at court on these disputed matters, and thereby gave great surcease to Charles I. The next year the controversy was revived at Oxford and in Ireland, of which archbishop Usher was then primate. The king issued certain injunctions concerning the bounds within which these points might be discussed. See Arminianism; Calvinism; Dore.

Flaccus, Caius Norbanus (Grecized Γρατος Νορμα ός, Josephus, Ant. xvi, 6, 6), son of a somewhat notable consular Roman of the same name (see Smith's Dict. of Ant. s. v. Νορμα ός) and a cousin of Octavius in A.D. 51 (Tactius, Ann. i, 54; Suet. Vit. 8). While proconsul of Asia Minor, he promulgated the emperor's decrees to the provincial magistrates in favor of the Jews (Joseph. Ant. xvi, 6, 3-6); and when preces of Syria he befriended Herod Agrippa II till influenced by Aristobulus (6. xlvii, 6, 3-9).

Flaccius, a name given to those who adhered, in the controversy concerning the German reformers, to Matthias Flaccus (q. v.).

Flaccus (Flacch), Matthias, also called Illyricus from his native country, an eminent Lutheran reformer, was born at Albona, in Illyria, about 1520. At sixteen he proposed entering a convent, but Baldo Lupstino, the provincial of the Franciscans, who had imbued Protestant tendencies, advised him to study theology in the university of Germany. Accordingly he went to Basle in 1538, to Tübingen in 1540, and in 1541 to Wittenberg, where he gave private lessons in Greek and Hebrew. In his travels he became acquainted with Grynæus, Leonard Fuchs, Eber, and finally with Luther himself, whose zealous disciple he soon became, and who for a while was prior of a professor of O.T. literature at Wittenberg, but, driven away by the issue of the Smalcaldic War in 1547, he went to Brunswick. Recalled by prince Maurice, he came back, but, having opposed Melancthon's Liber Interim [see Interim], he left the city, and in 1551 went to Hamburg, and thence to Magdeburg, whence he published several writings against the Interim, though in other points, especially in the Oriental controversy, he sided with Melancthon. He was also for several years engaged in theological controversies with Major, Strigel, Grocholkof, etc. See Sächische Confessionalschrift, of which great work he was the life and soul. In 1557 he was made professor of the newly-organized University of Jena, which became the stronghold of strict Lutheranism, and where he was chiefly instrumental in the drafting of the Sächische Confessionalschrift, to enforce Lutheran views. It, however, proved injurious both to the university and to himself, as it led the judges to establish a censorship, to which Flaccus and his colleagues were unwilling to submit and were dismissed in 1559. He then made himself especially odious by the rash statement (in his discussion with Strigel at Weimar, 1600) that original sin is the very substance of man in his fallen state. He was accused, therefore, of Manichæism. After spending five years in Regensburg, he accepted a call to Antwerp, and from thence to Frankfort and Strassburg. Obliged to leave the latter city on account of his opinions, he returned to Frankfort, where he died in the hospital in 1575.

The career of Flaccus was, on the whole, a stormy and unhappy one. But, after all the abuse that has been heaped upon him, it cannot be denied that he was a consistent upholder of the doctrines which he learned originally from Luther. The writers in the Reformed interest have generally treated him too severely; an unfavorable view of him is given by Planck, Geschicche des Protestant. Luthegriff. The best account of him is to be found in Proper, Matthias Flaccus Ilyricus u. seine Zeit (Erlangen, 1879-81, 2 vols.), from a notice of which, in the Bibliotheca Sacra (1882, p. 226), we make the following extracts:

"If it was right for a sincere follower of Luther to oppose the causes of his deceased friend and teacher, and to show by the severest logic that the Lutheran Church was, under Melancthon's guidance, drifting away from its moorings, then Flaccus is to be exonerated from the charge of uncharitableness, and his plaus must be allowed, that the unhappy division was not chargeable
to him who defended the old Wittenberg theology, but rather to him who introduced innovations. We say nothing now about the truth of the one or the other view; we only remark that Flacius was the outstanding champion of the genuine theology of Saxonys, as taught by Luther. We cannot, therefore, uphold Luther and condemn Flacius, that is, the dogma which he taught as the doctrine of what Luther, as the first reformer, had a right to teach. Flacius, his inferior in authority, had not a right to maintain against such a great man as Melancthon; for the theological swear allegiance not to men, but to principles. Flacius could justly reply to all who thus resented the dogma, in his polemic, that that was what Luther, as the first reformer, had a right to teach. Melancthon saw that the Genevan and Lutheran theologians entertained clearer and more scriptural views of the subject than Luther and the party of Flacius. With him the authority of Luther was not final. According to Flacius, all questions of theology and church usages were to be decided by the authority of the Bible and the consistory. According to Melancthon, they were to be decided by the authority of the Bible and of reason. Both were sincere and deeply in earnest. Both make out their points by irresistible logic. Schmidt, in the new Life of Melancthon just published by him, vindicates Melancthon's character in this controversy treated in the most precise way. He has done this well for Flacius. Flacius shows more firmness and tenacity, Melancthon more conciliation and forbearance. The former had such a reverence for truth, or for what seemed to be truth, that he forgot the respect due to a great and good man. He was mercilessly but consistently contumacious. The latter was so amiable and fond of peace that he would for the sake of it yield what he might have maintained. He was never a polemic, except by necessity. It is a somewhat remarkable fact that Flacius was incessantly persecuted, and often driven from place to place for teaching exactly what Luther taught. He was evidently a tenacious man, and born to be a polemic; but, notwithstanding his bad name for disputatiousness, he was far less violent and abusive in his language than his opponents, and more measured and unimpassioned than Luther. It was not in his nature to be polemic, but arising severity with which he exposed to the light of day any deviation from Luther, that so galled his opponents. They charged him, and perhaps not unjustly, with asuming to be the guardian of the Church. He did, indeed, make his princes his magistrates to watch over the purity of Christian doctrine. He required that they should call every man to account, no matter what his rank or position was, either openly or secretly attempted to destroy what Luther had built up. At the same time, he affirmed that he did it as a faithful son of the Church, doing only what every one was bound to do, namely, to guard its purity with all the power and skill he possessed. He furthermore maintained that, as the pupil and friend of Luther, he owed it to his memory to defend him and his doctrines against all assaults, even though they were made at Wittenberg itself, and by no less a man than Melancthon. He was undoubtedly governed by conscientious motives, however he may have erred both in matters of doctrine and of expediency; but when he trusted in princes to preserve the orthodoxy of the Church, he found, to his grief, that he trusted to a broken reed. Though unfortunate in his life, and a wanderer and fugitive in his old age, and apparently unsuccessful in the chief aim of his life, still he ranks third among the men of his age in his influence upon the doctrines of the old Lutheran Church. He has, indeed, been long almost forgotten as an historical man, as a religious historian. The chief writings of Flacius are Omnium Scriptura Latina contra adiaphoristicas fraudes edita (Magdeburg, 1550, 8vo.); De Justificatione Buslatius (Francfort, 1552, 4to.); Catalogus Testamenti Veritatis, etc. (Bâle, 1556; Francfort, 1574, 4to.); Unum Prim. Ecclesie concursus de non scrutinando divinae generationis Filii Dei modo (Bâle, 1600, 8vo.); Historia cerimoniae de prim. nata Pope (Bâle, 1554, 8vo.); Clarissimæ Scripturæ Sacrae notulæ ad instantiam, lib. III. (Marburg, 1584); Studio u. Christiani, 1555, 468; Schmidt, in Zeitschrift f. d. histor. Theologie, 1849; Dorner, Geschichte d. prot. Theologien (Munich, 1886, 8vo), 861-374; Gieseler, Ch. History, ed. Smith, vol. iv, § 57; and the articles Anti-apostolic Controversy and Synergetic Controversy.

Flag (as the name of a plant) stands in the Auth. Vers. as the representative in part of two Heb. words. See Botany.

1. Acha (1 Sam. 21, 9; 31, 5; Ps. 68, 21; 105, 17; 110, 2; Isa. 1, 26; 5, 1; Job 2, 21; Deut. 1, 29; 22, 10; 31, 16, 18; Job 7, 20; 29, 4; Prov. 21, 16; 28, 19; Ps. 121, 5; Jer. 8, 4; 14, 5; Lam. 2, 10; 3, 1); Vulg. locus palustris, caricetum), a word, according to Jerome (Comment. in Isa. xix, 7), of Egyptian origin, and denoting "a green and coarse herbage, such as rushes and reeds, which grows in marshy places" (comp. homoi. Theophr. Hort., p. 57). In this sense, Flacius took it. 2. Aca ("flag") grow without water? It seems probable that some specific plant is here denoted, as Celsius has endeavored to prove (Hirob. 1, 342), for the aca is mentioned with the gome or papyrus. See the treatise of Happpach, De patacea, etc. (Coburg, 1779); also, a plant in Strabo (Geogr., 17, 1777). The word occurs once again in Gen. xlii, 2, 18, where it is said that the seven well-favored kine came up out of the river and fed in an acha ("meadow"). Now it is generally well known that most of the plants which grow in water, as well as many of those which grow in its vicinity, are not well suited as food for cattle; some being very watery, others very coarse in texture, and some possessed of acid and even poisonous properties. None, therefore, of the Acha can be intended, nor any species of Bulbous, or "flowering rush" (as might be inferred from one rendering of the Sept.). The different kinds of Aca, or rush, though abounding in such situations, are not suited for pastureage, and, in fact, are avoided by cattle. So are the majority of the Cyperaceae, or sedge tribe; and also the numerous species of Carex, which grow in moist situations, yet yield a very coarse grass, which is scarcely fit for cattle. Neither does any species of Cypera serve as pastureage, and the roots of some of them are esculent and aromatic; but these must be dug up before cattle can feed on them. Some species of Scirpus, or club rush, however, serve as food for cattle: S. capitata, for instance, is the principal food of cattle and sheep in the highlands of Scotland from the beginning of March till the end of May. Varieties of S. maritimus, found in different countries, and a few of the numerous kinds of Cypera common in Indian pastures, as Cypera tuberosa and heucacitis, are also eaten by cattle. The reed, if any specific plant is intended, as seems implied in what goes before, it is perhaps one of the edible species of scirpus or cypera, perhaps C. esculentus, which, however, has distinct Arabic names: or it may be a true grass; some species of panicum, for instance, which form excellent pasture in warm countries, and several of which grow luxuri- antly in the neighborhood of water. But it is well known to all acquainted with warm countries subject to excessive drought that the only pastureage to which cattle can resort is a green strip of different grasses, with reed and sedges, which grow either in the surface of a riv- er or of pieces of water, varying more or less in breadth according to the height of the bank, that is,
the distance of water from the surface. Cattle emerging from rivers, which they may often be seen doing in hot countries, would naturally go to such green heritage as intimated in this passage of Genesis, and which, as indicated in Job xxviii, 2, could not grow without water in a warm, dry country and climate. Kittto (Pict. Bib., on Genesis, l. c.) identifies this sedge with the melamphylly of Theophrastus (Hist. Plant. iv, 8, 12), which plant was much eaten by sheep and cattle. There is, however, much doubt as to what the melamphylly denotes, as Schneider has shown. The odon, in Job vii, 11, has ἰδρύ, and ἰδρύ occurs in the Sept. (Isa. xix, 7) also as the representative of מים (A. V. "paper reeds"), which word is explained by Gesenius, naked places without trees— the grassy places on the banks of the Nile. The same Greek word is used by the son of Sirach, Eccles. xi, 10 (δαρ) or δαρί, for the copies vary. As no similar name is known to be applied to any plant or sedge in Hebrew, endeavors have been made to find a similar one so applied in the cognate languages (see Jablonski, Opusc. i, 45; ii, 159, ed. Te-Water), and, as quoted by Dr. Harris (Nat. Hist. of the Bible, e. v.), the learned Chapelton says, "We have no radix for מים, unless we derive it, as Schultens does (Comment. on Job, l. c.), from the Arabic Қәذ, to bind or join together." Hence it has been inferred that it might be some one of the grasses or sedges employed in former times, as some still are, for making ropes. But there is probably some other Arabic root which has not yet been ascertained, or which may have become obsolete; for there are numerous words in the Arabic language having reference to greenness, all of which have ḏāl as a common element. Thus Қак, Қak, thickets, dark groves, places full of reeds or flags, in which animals take shelter; Қاف, putting forth leaves; Қاف, greenness, verdure; ҚҚ, abounding in grass. These may be connected with ḏāl, a common term for grass in Northern India, derived from the Persian, whence amber is called ҚҚ, ḏāl, grass-attractor. See REED.

2. סָקָב. אמ. Sept. ślכ. Vulg. carectum, pelagus) occurs frequently in the O. T. in connection with ҚҚ, "sea," to denote the "Red Sea" (q. v.). The term here appears to be used in a very wide sense to denote "weeds of any kind." The γονύς, therefore, is the "sea of weeds," and perhaps, as Starke (§ 35 and p. 6, note) observes, supra, may be applied to any aqueous vegetation, which would include the arborescent coral growths for which this sea is celebrated, as well as the different algae which grow at the bottom: see Pliny (H. N. xii, 29) and Shaw (Travels, p. 367, fol. 1738), who speaks of a "variety of ҚҚ and fish that grow within its channel, and at low water are left in great quantities upon the sea-shore" (see also p. 384). The word סָקָב in Jonah ii, 5, translated "weeds" by the A. V., has there can be no doubt, reference to "sea-weed," and more especially, to the long, ribbed-like fronds of the Laminaria, or the entangled masses of Pect. In Exod. ii, 5, however, where we read that Moses was laid "in the suph, A. V. "flag, by the river's brink; it is probable that "reeds" or "rushes," etc., are denoted, as Rab. Salomon explains it, "a place thick with reeds." (See Celsius, Hierob. ii, 66.) The γονύς or γονύς in the Coptic version (as in Exod. x, 19; xiii, 18; Psa. cvi, 7, 9, 22) is rendered "the Sari sea." The word sari is the old Egyptian name for a sedge of some kind. Jablonski (Opusc. i, 266) gives Juncus as its rendering, and compares a passage in Theophrastus (Hist. Plant. iv, 8, § 2, 5) which thus describes the sari: "The sari grows in water about marshes and those watery places which the river after its return to its bed leaves behind it; it has a hard and closely-twisted root, from which spring the sari (stalke) so-called." Pliny (H. N. xii, 38) thus speaks of this plant: "The sari, which grows about the Nile, is a shrubby kind of plant (7), commonly being about two cubits high, and as thick as a man's thumb at the panicle (coma) of the papryus, and is similarly eaten; the root, in account of its hardiness, is used in blacksmiths' shops instead of charcoal." Sprengel (Hist. Herb. i, 78) identifies the sari of Theophrastus with the Cyperus fastigiatus, Linn.; but the description is too vague to serve as a sufficient basis for comparison. There can be but little doubt that suph is sometimes used in a general sense like our English "reeds." It cannot be restricted to alga, as Celsius has endeavored to show, because none of the proper alga are found in the Nile. Lady Colt (Swirx. Herb. p. 106) thinks the Zizania aquatica ("grass-reed") may be intended, but there is nothing in favor of such an opinion. The suph of Isa. xix, 6, where it is mentioned with the kānem, appears to be used in a more restricted sense to denote some species of "reed" or "tall grass." There are various kinds of Cyperus satis Gracinoceous, such as Arundo and Stockarum, in Egypt. See Weed.

Flag (as a military term) is represented generally in Heb. by בּּ, of, such being those borne by the Israelitish camp during their march through the wilderness. Each three tribes had a banner of this description (Num. i, 52; ii, 2; 14, 16), of the color and form of which the Rabbinists have many legendary stories (see Jonathan on Num. ii.; comp. Carpoz, Appor. p. 867 sq.). The tribe of Judah (together with Issachar and Zebulun) bore as a device a young lion (comp. Gen. xlvii, 16; the tribe of Reuben, with Simon and Gad), a man (according to Jonathan, a stag, instead of the buck, as a memento of the golden calf, Gen. xlix, 6; Ephraim (with Manasseh and Benjamin), a steer (boys, according to Jonathan); Dan (with Asher and Naphtali), an eagle (according to Jonathan, a cedars; comp. Gen. xlix, 17), on their tribal standard. How the field-enseigns of the several families, which in those passages are called וּמוּיָה, must be incomprehensible; these. The description of colored pennants (Harmer, i, 478) is not sustained by proof. On the pretended motto upon the banner of the Maccabees, see Maccabæus. The word, which is often taken for a banner, is a military signal raised upon a mountain as a telegraphic notice (Isa. v, 26; xiii, 2; xxvi, 3; xxx, 17; lix, 10, etc.; comp. Cicero, Nat. deor. 17; Macrobius Saturn. i, 17). The Maccabees, however, have usually consisted of high cold with a streamer flying from its summit. Others regard it rather as a beacon fire (πυράκευσις, φόρος; comp. Curtius, v, 2, vii, 7, 5, 13). See generally Faber, 482 sq.; Jahn, ii, 11, 482 sq.; Celsius, Veget. Hist. (Upp. 1727). To the Roman standards, aquila (Joseph. War, ii, 62; comp. Hermann, ad Lucian. conc. hist. p. 165), an allusion apparently occurs in Matt. xxiv, 28. (On the Egyptian ensigns, see Wilkinson, i, 294; Rosell-
The Persians under Cyrus bore the same symbol (Xenophon. Cyrop. vii. i. 4; but Ezek. xlvii. 8 is not in point, being a reference to Chaldean usages). See generally Lydii Symb. sacr. de re milit. ii. 3. Compare Banner.

Flagellants (Lat. flagellarii, to scourge), a name given to certain sects from the 12th to the 18th century, who used the scourge as a principal instrument of punishment. See Discipline of the Lash. They were also called cruciferi, crucifrases, because they held it in their duty, as they said, to copy the sufferings of Christ; and corporali, because of their separation from the clergy and the temporal authority. Their excesses were only the natural development of certain features of the Roman discipline [see Penance; Penitential Discipline]; especially of the belief, springing from the system of indulgences, that the mercy of God could be propitiated by self-inflicted punishments. It is said that the first society of Flagellants appeared in Padua in the beginning of the 13th century. Amid the contests between the Guielphs and Ghibellines, cruelty and rapine were followed by remorse; and about 1260 public associations sprang up for the purpose of disciplines, under the name of Flagellants. In an act of the Curia of Este and the pope for their suppression, they are termed Le Compagnie de Rastulli, and Societatis Scopae sine Fustigatione. Muratori has given a plate of the thongs which they employed against themselves (Annali, ital. med. viti. 46). What was practised was somewhat more than streets and little regard was paid to decency. A hermit named Rainier, of Perugia, is named as the founder of the sect, and his success was wonderful. Vast bodies of men, girded with ropes, marched in procession, with songs and prayer, through the cities, and from one city to another, calling on the people to repent. All hostilities ceased. The momentary impression produced by these movements was profound, but it did not last long. From Italy the contagion passed to the Alps; large bodies wandered over Carniola, Austria, and even as far as Poland. In a few years they disappeared. Under the Gregorian pontificate of the following century the Flagellants revived again. The plague reached Italy in 1847, and carried off throughout Europ millions of persons: 1,200,000 in Germany, where, in 1849, the Flagellants "arose a fresh, with increased enthusiasm. They wandered through several provinces, whipping themselves, and propagating the most extravagant doctrines, namely, that flagellation was of equal virtue with the sacraments; that the forgiveness of all sins was to be obtained by it, exclusive of the merits of Christ; that the old law of Christ was still in operation; and that a people enjoining the baptism of blood, to be administered by whipping, was to be substituted in its place. Clement VI issued a bull against them (Oct. 20, 1349), and in many places their leaders were burned. They are again mentioned in the beginning of the 16th century as venting yet stranger and more mystical tenets in Thuringia and Lower Saxony. They rejected every branch of external worship, entertained some wild notions respecting the evil spirit, and held that the person who believes what is contained in the Apostles' Creed, repeats frequently the Lord's Prayer, and the Ave Maria, and at certain times laces his body severely as a voluntary punishment for the transgressions he has committed, shall obtain eternal salvation. The infection spread rapidly, and occasioned much disorder; for, by travelling in such numbers, they gave rise to seditions and disturbances, and to very many external and to the shameful exposure of their persons, and their extortion of alms, rendered them so obnoxious to the higher clergy and to the more respectable classes, that several princes in Germany and Italy endeavored to suppress their irregularities, and the kings of Poland and Bohemia excommunicated them from their territories. A numerous list of these fanatics who were condemned to the flames is preserved by the German ecclesiastical historians.

At Sangerhausen, in the year 1414, no fewer than ninety-one were burned (Encyc. Metropol. s. v.). In the year 1899 a society of this character, the White Brethren (Bianchi), descended from the Alps into Italy, and were everywhere enthusiastically welcomed both by the clergy and the populace; but no sooner had they reached the papal territories than their leader was put to death, and the whole array dispersed. After this processions of Flagellants were led through Italy, Spain, and the south of France by the Dominicans Vincentius Ferrentius, who may perhaps have been the originator of the Flagellants' doctrine. Although such processions having been condemned at the Council of Constance, he also discontinued them (Gieseler, s. 120). Gieseler gives extracts from the trial at Sangerhausen, 1414, with many of their articles of doctrine (Church History, s. 180). See Boileau, Histoire des Flagellants (Paris, 1700, 12mo); Mosheim, Ch. Hist. cent. xiii. pt. ii. ch. iii.; cent. xiv. pt. ii. ch. v.; cent. xv. pt. ii. ch. v.; Förstemann, Die christ. Geislerge- sellenschaften (Halle, 1828); Harsog, Real-Encyclop. iv. 726 sq.; Neander, Ch. Hist. (Torrey's), v. 612.

Flagellation. See scourge.

Flagon, a word employed in the A. V. to render two distinct Hebrew terms.

1. ἰασηαθαφ', יאשע ל (2 Sam. vii. 19; 1 Chron. xvi. 8; Cant. ii. 5; Hos. iii. 1). The real meaning of this word, according to the conclusions of Gesenius (Theol. Heb. p. 188), is a case of pressed raisins (q. v.), such as are a common refreshment in the East, especially for travellers. See Juice. He derives it from a root signifying to press, and this is confirmed by the renderings of the Sept. (אדוש, ἀπόφησιν, ἵμπαρος) and of the Vulgate (simula), but in Hos. εἰπα, in Cant. ἐφορε, where the Sept. has ἀπήθαι, and also by the inscriptions of the Targum Pseudo-Jonathan and the Mishna (Nedarim, 6, 110). In the passage in Hosea there is probably a reference to a practice of offering such cakes before the false deities. The rendering of the A. V. is perhaps to be traced to Luther, who in the first two of the above passages has ein Nisel Wein, and in the last Noah Wein, but probably to the interpretation of modern Jews (e. g. Gemara, Baba Batatra, and Targum on Chronicles), grounded on a false etymology (see Michaelis, quoted by Gesenius, and the observations of the latter, as above). It will be observed that in the first two passages the words of wine" are not inscrutable, and that in the last of wine" should be of grapes." See Juice.

2. נְבֶל, נבְלִ (Isa. xxii. 24), which is commonly used for a bottle (q. v.) or vessel, originally probably a skin, but in later times a piece of pottery (Isa. xxx. 14). But it also frequently occurs (Psa. lvi. 9, etc.) with the force of a musical instrument (A. V. generally "sistrum," but sometimes "viol"), a meaning which is adopted by the Targum, and the Arabic and Vulgate (sistrum), and Luther, and given in the margin of the A. V. The text, however, seems to have aimed to follow the rendering of the Sept. (confusely מַפְּלָטָא), and with this agrees Gesenius (Comment. in loc.) and First (Hebr. Handw. s. v.), as being agreeable to the parallel מַפְלָטָא, בּוֹלֵס ("cup," Vulg. cratera). See Musical Instruments; Pitcher.

Flake is the rendering in the A. V. at Job xii. 15 ("the flakes of his [e. i.e. levithian's] flesh are joined together," מַפְלָטָא, have cling. i. e. are rigid), for בּוֹלֵס, mappot, something prodigious (elsewhere only Amos 6, for refuse of grain, as that which falls away in winnowing, i. e. chaff), referring to the desolata or flabby parts on the belly of the crocodile (q. v.), which are firmly attached to the body, instead of loosely hanging as in the ox.
Flamboyant (Fr. flambeau = a torch), "a term applied by the antiquaries of France to the style of architecture which was contemporary in that country with the Perpendicular of England, from the flame-like wavings of its tracery. It ought perhaps to be regarded as a viti- ated Decorated rather than a distinct style, though some of its characteristics are peculiar, and it seldom possesses the grandeur of the Perpendicular of England, from the flame-like wavings of its tracery. The most striking and universal features are the waving arrangement of the tracery of the windows, panels, etc."

Flame (prop. נבז, la'hab, φλέγ), the incandescent vapor of fire, with which latter term it is usually found connected in the Bible. The only thing respecting fire which calls for explanation here is its symbolical use. In this we may distinguish a lower and a higher sense: a lower, when the reference is simply to the burning heat of the element, in which respect any vehement affection, such as anger, indignation, shame, love, is wont to be spoken of as a fire in the bosom of the individual affected (Psa. xxxix, 3; Jer. xx, 9); and a higher, which is also, though much more the common one in Scripture, when it is regarded as imaging the more distinctive properties of the divine nature. In this symbolical use of fire the reference is to its powerful, penetrating agency, and the terrible melting, seemingly restless, effects it is capable of producing. So viewed, fire, especially a "flame" (נבז) of fire" (Exod. ii, 2), is the chosen symbol of the holiness of God, which manifests itself in a consuming hatred of sin, and can endure nothing in its presence but what is in accordance with the pure and good. There is considerable variety in the application of the symbol, but the passages are all explicable by a reference to this fundamental idea. God, for example, is called "a consuming fire" (Heb. xii, 29; comp. Psa. cxxv, 5), an intense flame" (literally "a lamp pondering") to dwell with devouring fire" (Isa. xxxiii, 14); as manifested even in the glorified Redeemer, "his eyes are like a flame of fire" (Rev. ii, 18); his aspect when coming for judgment is as if a fire went before him, or a scorching flame compassed him about (Psa. cvxii, 8; 2 Thess. i, 8).—In these, and many similar representations occurring in Scripture, is the revelation of God to men that is more especially in view, and the searching, intense, all-consuming operation of his holiness in regard to it. They who are themselves conformed to this holiness have nothing to fear from it; they can dwell amid its light and glory as in their proper element; like Moses, can enter the flame-enwrapping cloud of the divine presence, and abide in it unscathed, though it appear in the eyes of others "like devouring fire on the top of the mount" (Exod. xxiv, 17, 18). Hence we can easily explain why in Old-Testament times the appearance of fire, and in particular the pillar of fire (enveloped in a cloud, as if to shade and restrain its excessive brightness and power), was taken as the appropriate form of the divine presence and glory; for in those times, which were more peculiarly the times of the law, it was the holiness of God that came most prominent-

ly into view; it was this which had in every form to be pressed most urgently upon the consciences of men, as a counteractive to the polluting influences of idolatry, and to some extent to a proper comprehension of the covenant. But in the new, as well as in the old, when the same form of representation is employed, it is the same aspect of the divine character that is meant to be exhibited. Thus, at the commencement of the Gospel era, when John the Baptist came forth announcing the advent of the Lord, he spoke of him as coming to baptize with fire as well as with the Spirit, not less to burn up the chaff with fire unquenchable than to gather in the wheat into his garner (Matt. iii, 11, 12). The language is substantially that of an Old-Testament prophet (Mal. iii, 2; iv, 1); and it points, not as is often represented, to the enlightening, purifying, love-anchinking agency of Christ, but to the severe and retributive effects of his appearance. He was to be set for judgment as well as for mercy; for mercy indeed first, but to those who rejected the mercy, and hardened their hearts, he also, for judgment. To be baptized with the Spirit of light, holiness, and love, is what should ever follow on a due submission to his authority; but a baptism with fire—the fire of divine wrath here (John iii, 86), growing into fire unquenchable hereafter—should be the inevitable portion of such as receive themselves in rebellion against his grace. It is true that fire in its symbolical use is also spoken of as purifying—the emblem of a healing process effected upon the spiritual natures of persons in covenant with God. We read, not merely of fire, but of "a devouring fire" (Lev. x, 14); and in the case of many, the fire of religious zeal, the fire of the dross and impurity of Jerusalem (Mal. iii, 2; Isa. iv, 4). Still it is a work of severity and judgment that is indicated; yet its sphere is, not the unbelieving and corrupt world, but the mixed community of the Lord's people, with many false members to be purged out, and the individual believer himself with an old man of corruption in his members to be mortified and cast off. The Spirit of holiness has a work of judgment to execute also there; and with respect to that it might doubtless be said that Christ baptizes each one of his people with fire. But in the discourse of the Baptist the references in such a case are to differences of persons than to different kinds of operation in the same person; he points to the partakers of grace on the one side, and to the children of apostasy and perdition on the other. Nor is the reference materially different in the emblem of tongues, like fire, which sat on the apostles at Pentecost, and in the fire that is said to go out of the mouth of the symbolical witnesses of the Apocalypse (Acts ii, 8; Rev. xi, 5). In both cases the fire indicated the power of holiness to be connected with the commissions of Christ's chosen witnesses—a power that should, as it were, burn up the corruptions of the world, consume the enmity of men's hearts, and prove a resistless weapon against the power and malice of the adversary. Compare腓尼。

Flamen, according to Varro and Festus, from flamens, the band of white wool wrapped about the cap, was the title given to members of a college of Roman priests devoted severally to the service of a particular deity. "Divinae alias Sacrodotarum, omnibus Pontifices, singula Flamines mundi," says Cicero (De Leg. i, 8). Each received his distinctive name from that of the god to whose service he was devoted—"kornai singulai cognomine habent ab eo quod sacra faciunt" (Varro, De Ling. Lat. v, 84). There were two classes of flamens, (1) those styled Flamines majorum, and always patriarchal, viz. the Fl. Dialis, maritale, and quirinalis, instituted by Numa, according to Livy i, 20, to take charge of those religious services which had hitherto been functions of the kingly office; and (2) the Flamines minores, who might be, and usually were plebians, about twelve in number, and instituted at various times.
THE FLAMINGIANS.

See Mennonites.

Flank, *flank*, side, the loins of an animal (Job xiv, 27, where fatness is noted as a sign of self-pampering); elsewhere in the plural for the internal muscles of the loins near the kidneys, to which the fat adheres, Gr. *xurion* (cf. Phil. iv, 19, 20; Epit. xii, 7; xvii, 8; ix, xix, 88; xxv, 10; xxvii, 50; xxxvii, 51; Tacitus, Ann. iii, 58, 71; iv, 16; Flundarch, Num. 7, and Q. Curt. Rom. p. 114, 118, 119, 164-170 (ed. Reiske); Festus, s. v. Maxima dignitatis et magiores flamini: Ausus Gallius, x, 15, etc. (J. W. M.)

Flamingians. See Mennonites.

Flaneur, *flaneur*, a name borne by several theological writers of Germany. I. JOHANN JAKOB, born at Balingen in 1724, studied theology at Tübingen, and became tutor in that university in 1749. He was successively appointed deacon of Leonberg in 1750, of Tübingen in 1757, of St. Leonard's Church at Stuttgart in 1759, pastor in the latter city in 1781, court preacher in 1783, counsellor of the Consistory in 1784, and abbot of Herrenlb in 1791. He died Sept. 16, 1792. His principal works are: Meletiatus philosopbi-theologica ad materias grammaticas (de imputatione procelli aedomini: — De vicaria Christi satisfactione: — De humana Christi natura omnimoposita (Tub. 1793); — Untersuchung, d. v. Sünde wider d. Heiligen Geist (Lips. 1770).

III. WALTER, brother of the preceding, was born at Stuttgart in 1772. He became in 1812 high counsellor of the Consistory and prebendary of Stuttgart, counsellor of the university in 1818, prelate in 1823, and general superintendent at Ulm in 1829. He resigned his office in 1841, and died in 1845. He wrote, in collaboration with Storr, Lehrbuch d. christl. Dogmatik (2d ed., 1818, 2 vols. ; transl. by Schmucker, Storr and Flatt's Biblical Theology, Andover, 5th ed., 1885); and published, in connection with Ewald, the Zeitschrift für die Nahrung christlichen Geschichts (1815-1819, 3 vols.). — Preyer, Universal Lexicon, s. v.

Flattich, JOHANN FRIEDRICH, a German theologian and educator, was born in 1713 at Beyhingen, near Ludwigsburg. After studying theology at Tübingen, he became in succession preacher of the garison of Hohenasberg (1742), pastor of Metterszimmern (1747), and pastor at Münchmoin (1760). At the latter place he died in 1797. Flattich wrote a number of works and essays on education, as Handbuch zum Ehestand, Unterschiede und Gleichnamen, Von der Aufserung der Kinder. Most of his works are collected in Lederhose, Leben und Schriften des J. F. Flattich (3d ed. Heidelberg, 1856). He also enjoyed the reputation of being one of the most successful educators in Southern Germany, and was on intimate terms with many of the prominent men of that period. See Palmer, in Herzog, Real-Encyclop. xix, 498; Völter, in Schmid, Encyclop. für das Erziehungswissenschaft. 2, 382. (A. J. S.)

Flavel, JOHN, a nonconformist divine and writer of practical works, was born in Worcestershire, England, in 1627. He was in early life religiously educated by his father, and completed his public education at Oxford. Having devoted himself to the Gospel ministry, he was settled at Deptford in 1650 as curate to Mr. Walpole, and on his death succeeded to the rectory. In 1655 he accepted a unanimous and pressing call to remove to Dartmouth, where he received a much smaller stipend, but had a larger field of usefulness. In 1662 he was ejected from his living for nonconformity; but he did not, however, forsake his flock, but seized every opportunity of ministering to their spiritual necessities. His colleagues dying soon after, the nonconformists devolved on him. On the execution of the Oxford Act he was compelled to remove five miles from Dartmouth, to Slapton, where he was out of the reach of legal disturbance, and where many of his former flock, in spite of the severity of the laws, resorted to him, and he at times stole into the town to visit them. In 1672 he published, while still just entering on his discourse, when the soldiers suddenly rushed in and dispersed the conventicle. See
FLAVIANUS 590 FLAX

eral of the fugitives were apprehended and fined; but the
remander, rallying after the effects of their first
surprise had subsided, conveyed Mr. Flavel to a more
remote place, where he lived four days, and then
when James II dispensed with the penal laws, Mr.
Flavel came forth from obscurity, and renewed his
self-sacrificing labors. He took a lively interest in
the proposed union between the Presbyterians and
Independent churches, which was effected in 1661, and,
like many a good man in those days, fondly anticipa-
ted from that consummation a season of ecclesiastical
peace and concord which never arrived. He died June
26, 1691, leaving behind him the name of a most faithful
minister. Flavel's writings are valued more for their
pietistic and practical earnestness than for any other
qualities. His Whole Works were published in
London in 1620 (6 vols. 8vo). The American tract Soci-
ety publishes, in cheap form, his Foundation of Life,
Method of Grace, Christ knocking at the Door, On keep-
ing the Heart, and Touchstone of Sincerity.—Jameson.
Religious Biography, a. v.; Jones, Christian Biography,
a. v.; Bogue and Bennett, History of Dissenters, i, 340.

Flavianus, patriarch of Antioch, was born of one of
the best families in that city in the early part of the
4th century. Even while a layman he was an earnest
opponent of Ariusianism. Theodosius (who gives a full
account of Flavian) says that he, associated with an-
other, Drusiana, by the name of Diocletian, exhorted
all men to be zealous in religion." He says also that
"they were the first to devise the choir, and to
 teach them to sing the Psalms of David responsively" (Hist.
Eccles. ii, 24). He zeal did not diminish after
his ordination as priest by Meletius (q. v.), about A.D.
365 (7). When Meletius was banished from his see by
Valens, Flavianust remained to serve the churches in
Antioch. But the Eustathian (q. v.) bishop Paulinus con-
tested the right of Meletius, and the churches were
divided. On the death of Meletius, A.D. 381, Flavian
was elected to succeed him, although (according to the
accusation of Paulinus) he had bound himself by oath
to not accept the office while the Eustathian bishop
survived. The dispute was a fierce one; but at last,
when Evagrius, successor of Paulinus, died, 390, Flavi-
un was acknowledged by both the Eastern and West-
ern churches. He was held in great respect; Chrysos-
tom, who was his pupil, speaks very highly of him.
He died A.D. 404. He treated the Mezabrates seve-
"ly [see MEZABRATI].—Socrates, Hist. Eccl. bk. v. ch.
xxiv; Sozomen, Hist. Eccles. viii, 24; Theodoret, Hist.
Eccl. ii, 24; Cave, Hist. Lit.; Cellier, Aurelius So-
erus (Paris, 1784), iv, 310; SUSENBERG, Eccl. Hist.
Flavianus of Constantinople was chosen bishop of
that city, as successor to Proclus, A.D. 446 or 447.
The emperor Theodosius was set against him from the
beginning of his episcopate. Eutyches and his friends
were very strong at court, but at a Home Synod at
which Flavian presided (A.D. 446) at Constantinople,
Eusebius of Dorylaeum pronounced anathema against
Eutyches. Flavian, knowing the danger of attacking
persons so powerful in court influence, at first
sought to quiet the matter; but, as Eutyches was
stubborn, the trial was had, and ended in his conden-
nation for heresy. The emperor was greatly offended
and, and, under the advice of Dicoureas, summoned a
council at Ephesus (the Robber Council), at which Di-
ocurus presided, and where the most violent courses
were pursued. Flavian was not only deposed, but so
brutally beaten by the Egyptian attendants of Dic-
ocusurus that he died three days afterwards (A.D. 449).
The Council of Chalcedon named him martyr, and his name
is to be found in the Roman martyrology, Feb. 18. See
Evagrius, Hist. Eccl. i, 8; Neander, Church History, ii,
506 sq. and art. EUTYCHES; EUTCHIANISM; EPH-
EUS, ROBBER COUNCIL OF; EUSEBIUS OF DORYL-
AEUM.

Flavigny, Valerian de, a French Hebrew schol-
had belonged to Amaasis, king of Egypt, each thread of which was composed of 360 strands or filaments. In length and in fineness of fibre no country could compete with the flax which produced the "fine linen of Egypt," and which made the Delta "the great linen market of the ancient world" (Kalisch). By annihilating this crop, the seventh plague inflicted a terrible calamity. It destroyed what, next to corn, formed the staple of the country, and would only find its modern parallel in the visitation which should cut off a cotton harvest in America. That it was grown in Palestine even before the conquest of that country by the Israelites appears from Josh. ii, 6, the second of the two passages mentioned above. There is, however, some difference of opinion as to the meaning of the words γάτα (Sept. λιονκάλαη, Vulg. galea) et, and so A. V. "stalks of flax." Josephus speaks of λιονκάλαη, armfuls or bundles of flax; but Arab. Vers. "stalks of cotton." Gesenius, however, and Rosenmüller are in favor of the rendering "stalks of flax." If this be correct, the place involves an allusion to the custom of drying the flax-stalks by exposing them to the heat of the sun upon the flat roofs of houses; and so expressly in Josephus (Ant., vi, 1, 2). See Stalk.

In later times this drying was done in ovens. There is a decided reference to the raw material in the Sept.

rendering of Lev. xii., 47 (μαρτις σκελαστήρας), and Judg. xv., 14 (σταυροῖο; comp. Isa. i., 81). In several other passages, as Lev. xiii., 48, 52, 59; Deut. xxii., 11; Jer. xiii., 1; Ezek. xi., 6; xlv., 17, 18, we find it mentioned as forming different articles of clothing, as girdles, cords, and bands. In Prov. xxxi., 18, the careful housewife "seeketh wool and flax, and worketh willingly with her hands." The words of Isaiah (xliii., 3), "A bruised reed shall he not break, and the smoking flax shall he not quench," are evidently referred to in Matt. xii., 20, where λιονκάλαη is used as the name of flax, and as the equivalent of πιπακός. But there can be no doubt of this word being correctly understood, as it has been well investigated by several authors. (Celsius, Hieroth., ii., 283; Yates, Textuim Antiquarum, p. 335.) See Cotton.

Few plants are at once so lovely and so useful as the slender, upright hemp, with taper leaves and large blue-purple flowers, from which are fashioned alike the coarsest canvas and the most ethereal cambric or lawn—the sail of the ship and the fairy-looking scarf which can be packed into a silvert shell. It was of linen, in part at least, that the hangings of the tabernacle were constructed, white, blue, and crimson, with cherubim inwoven; and it was of linen that the vestments of Aaron were fashioned. When arrayed in all his glory, Solomon could put on nothing more costly than the finest linen of Egypt; and describing "the marriage of the Lamb," the seer of Patmos represents the bride as "arrayed in fine linen, clean and white; for the fine linen is the righteousness of saints." As to Egypt, we have proof in the mummy-cloth being made of linen, and also in the representations of the flax cultivation in the paintings of the Grotto of El-Kah, which represent the whole process with the utmost clearness; and numerous testimonies might be adduced from ancient authors of the esteem in which the linen of Egypt was held (Wilkinson, Anc. Eg., iii., 132). From these pictures, preserved at Beni Hassan, it would seem that the Egyptian treatment of the flax-plant was essentially the same as that which was pursued till quite lately by ourselves, which even now is only modified by machinery, and which is thus described by Pliny: "The stalks are immersed in water warmed by the heat of the sun, and are kept down by weights upon them. For nothing is lighter than flax. The membrane or rind becoming loose is a sign of their being sufficiently macerated. They are then taken out, and repeatedly turned over in the sun until perfectly dried, and afterwards beaten by mallets on stone slabs. The tow which is nearest the rind is inferior to the inner fiber, and is fit only for the wicks of lamps. It is combed out with iron hooks until all the rind is removed. The inner part is of a finer and
whiter quality. After it is made into yarn, it is poli-
ished by strikig it frequently on a hard stone, moist-
ened with water, and when woven into cloth it is again
beaten on the clubs, being always improved in propor-
tion as it is beaten" (Hist. Nat, xix, 1). The various
processes employed in preparing the flax for manufac-
ture into cloth are indicated in Scripture. 1. The dry-
ning process (see above). 2. The peeling of the stalks
and separation of the fibers (the name of flax itself be-
ing derivable either, as Parkhurst, from wpn̂, paschat',
' to strip, peel, or as Gesenius, from wpn̂, passaka',
to separate into parts). 3. The hacking ( Isa. xix, 9;
Sept. λωπον' v Opyep's; see Gesenius, Lex. n. v. pyn̂, pyn̂, and for the comb used in the process, comp. Wilkin-
son, Anc. Egypt. iii, 140). The flax, however, was not
always dressed before weaving (see Esclus, xi, 4, where ψωπόνος is mentioned as a species of clothing worn
by the poor). That the use of the coarser fibers was
known to the Hebrews may be inferred from the men-
tion of tolo (πολύς) in Judg. xvi, 9; Isa. i, 81.
That flax was ancienly one of the most important
crops in Palestine appears from Hos. ii, 5, 9; that it
continued to be grown and manufactured into linen in
N. Palestine down to the Middle Ages we have the
testimony of numerous Talmudists and Rabbins. At
present it is cultivated only in the vicinity of Cairo,
there as the cotton-plant. For the flax of ancient
Egypt see Herodotus, ii, 87, 105; Cels. ii, p. 385 sq.;
Herren, Ideea, ii, p. 368 sq. For that of modern
Egypt see Haseclquist, Journey, p. 500; Olivier, Voy-
age, iii, 279; Girard's Observations in Descript. d'E-
gypte, xvi, 88; Paul Lucas, Voyages, ii, 47. See LIN.

Flea (πολύς), paasak', from its leaping; a name
found in the Arab. equivalent: see Bechirt, iii, 474, ed.
Rosenm.) occurs only I Sam. xxxiv, 14 [ 15 ]; xxvi, 20,
where David thus addresses his persecutor Saul at the
cave of Adullam: "After whom is the king of Israel
come out? after whom dost thou pursue?—after a
flea." "The king of Israel is come out to seek a flea.
"In both these passages our translation omits the force
of the word πολύς, which is found in the Hebrew of
each: thus, "to pursue after, to seek one or a single
flea" (Sept. ψωπόνος κλ. Vulg. pulxeus unus). David's
allusion to the flea displays great address. It is an ap-
peal founded upon the immense disparity between Saul,
as the king of Israel, and himself as the remnant of a
ruinful object of the monarch's laborious pursuit. Hunt-
ing a flea is a comparison in other ancient writings
(Homer, fl. x, 287; Aristoph. Nub., i, 2; iii, i) for much
labor expended to secure a worthless result. This in-
secction is often used as a popular emblem for insignificance (Roberts, Oriental Illustrations, p. 178).
An Arabian author thus describes this troublesome in-
sect: "A black, nimble, exterminating, bunched-back
animal, which, being sensible when any
one looks on it, jumps incessantly, now on
one side, now on the other, till it gets out
of sight." The flea belongs to the Lin-
anian order aoptera (Latrelle, eloponop-
tera; Kirby, apoponopera). For a description of itself
and congener, see the Penny Cyclopaedia, s. v. Pulex.
Owing to the habits of the lower orders, fleas abound
so profusely in all regions (see Thomson, op. cit. i, 94), especially during the spring, in the streets and
dusty bazaars, that persons of condition always change
their long dresses on returning home. There is a pop-
ular saying in Palestine that "the king of the fleas
keeps his court at Tiberias," though many other places
in that region might dispute the distinction
with that town (Kitto, Physical History of Palestine, p
242).

Fleischler, Essex, a celebrated French orator and
prelate, was born Jan. 13, 1552, at Pernes, near Avign-
on. After studying in the college of the "Fathers
of the Christian Doctrine," he went to Paris, and soon
became known by a Latin poem on the famous carou-
sal given by Louis XIV in 1662. His sermons and
funeral orations soon raised him to such a pitch of
reputation that the duke of Montepelier recommended
him to fill the office of reader to the dauphin. In 1673
he was chosen a member of the Academy, and in 1682
he was appointed almoner to the dauphiness. In 1685
he obtained the bishopric of Lavau. When the mon-
arach gave it to him, he said, "Do not be surprised
that I have not liked you; I considered you a yo-
ng rascal, and I was loth to be deprived of the pleasure of
hearing you preach." In 1687 he was removed to the bishopric
of Niames. The Protestants of his neighborhood suffered
greatly from the revocation of the Edict of Nantes,
but Fleischler administered his office so mildly and ten-
derly that he gained the love of even the Protestants.
He died in February, 1710; and when Fénelon heard of
his death, he cried out, "We have lost our master!"
His Panegyric on Turme at Jerm. 1679, 4to, and often
12mo.—Histoire de l'Emperour Theodore la
Grund (Paris, 1679, 4to, and often 12mo).—Vie du
Card. Ximenes (2 vols. 12mo). They may all be found

sur les manuscrits de l'auteur, etc. (Nismes, 1782, 10
vols. 8vo).—Biog. Univ. xv, 85.

Flechière, de la. See Fletcher, John.
Fledgling would be a proper rendering for by',
gosse' (so called from its peeping; the Arab. and Syr.
use essentially the same word in the sense of: a "young"
bird, e. g. of the dove [squab], or pigeon
(Gen. xxv, 9), or eagle [eagle] (Deut. xxxiii, 11). The
Greek corresponding term is νεανις ('young')

Fleece (μ, gre, so called from shearing, Deut.
xviii, 4; Job xxxi, 20; or γέλα, the fem. form, Judg.
vi, 27, 39, 40), the wool of a sheep, whether on the
back of the animal, or shorn off, or attached to the
fayed skin, which last appears to have been the case
in the passage last cited. The threshing-floor of Gid-
on appears to have been an open uncovered space,
upon which the dews of heaven fell without interrup-
tion. See Treaaing-Fleece. The miracle of Gid-
on's fleece is still the same as the dew having been
found upon the fleece, without any on the floor, and that
at another time the fleece remained dry while the ground
was wet with it. See Gideon. It may appear a lit-
tle improbable to us who inhabit northern climates,
where the dews are inconceivable, how Gideon's fleece
in one night should contract such a quantity of water
that, when he came to wring it, a bowl-full was pro-
duced; but Kitto observes (Pict. Bible, note ad loc.),
"We remember, while travelling in Western Asia, to
have found all the baggage, which had been left in the
open air, so wet, when we came forth from the tent in
the morning, that it seemed to have been exposed to
heavy rain, and we could with difficulty believe
that no rain had fallen. So also, when sleeping in the
open air, the sheep-skink cloth which served for a covering
has been found in the morning scarcely less wet than
if it had been immersed in water."

Fleetwood, William, bishop of Ely, and one of the
most eloquent preachers of his time, was born Jan-
uary, 1656, in the Tower of London, and was educated
at Eton and King's College, Cambridge. After hav-
ing held the prebendary of rector of St. Austin's and
canon of Windor, he was made bishop of St. Asaph in
1706, and was translated to Ely in 1714. He died at
FLESH

Fleming, Robert, sen., an eminent Scotch divine, was born at Yester in 1630. He studied philosophy at the University of Edinburgh, and divinity at St. Andrew's, under Rutherford. His first pastoral charge was at Cambuslang, in Clydesdale. He was one of four hundred ministers ejected by the Glasgow Act after the restoration of Charles II. He was imprisoned in the Tolbooth of Edinburgh, but was liberated in 1678, and went to Holland, where he succeeded Mr. Brown as pastor of the Scots congregation at Rotterdam. On July 15, 1680, he died, and behind him several works, of which the most remarkable is The fulfiling of the Scriptures, complete in three parts: 1. Providence; 2. in the word; 3. in the Church (Lond. 1726, 5th ed. fol.), with memoir of the author by D. Burgess.

Fleming, Robert, jun., son of the above, was born at Cambuslang, and was educated at Leyden and Utrecht. In 1692 he became minister of the Scottish church at Leyden. In 1694 he succeeded his father at Rotterdam, and in 1698 became minister at Lothbury, London, where he died in 1716. He wrote a remarkable Discourse on the Rise and Fall of the Papacy, the predictions of which have received a singular fulfilment. In this sermon, published in 1701, Fleming ventures his opinion that the French monarchy would be humbled in 1794, that the period of the fifth vial extended from 1794 to 1846, and that in the last-mentioned year the papacy would receive its most signal blow, and that it would be followed by the destruction of the Turk. The sermon was reprinted in 1748. He published also Christology, a Discourse concerning Christ (Lond. 1708-9, 3 vols. 8vo), in which he maintains the eternal pre-existence of the human soul of Christ, a religious Biogaphy, p. 209; Dornor, Person of Christ, Edinb. transal, div. ii, vol. ii, p. 829.

Fleming, Thornton, a Methodist Episcopal minister, was born at Williamsburg, Va., Oct. 1764; was converted at about twenty; entered the itinerant ministry in 1788. He was set off with the Pittsburg Conference from the Baltimore Conference in 1826, superannuated in 1834, and died at Elizabethtown, Pa., in 1846. He was fifty-eight years in the ministry, fifteen of which he was presiding elder. He possessed rare endowments as a man and a minister, and was widely useful in his life and labors.

Mennoites. See Mennonites.

Flemingia or Flemingiana. See Mennonites.

Flemming, Paul, a German poet and hymn-maker, was born October 16, 1609, at Hartenstein, in Schönburg, and studied medicine at Leipzig. In 1638 he accompanied the embassy sent by the duke of Holstein to Russia, and in 1639 was attached to an embassy to Persia. He returned in 1639, and died in Hamburg April 2, 1649. His Gesellschaft und wohltätige Poemata (Jena, 1642) contain many lovely songs, and also sacred poems; among them the beautiful hymn In allen un-
of bread (λιαγρίνης, ἀργοκακοεις v. t. ἀργοκακοεις), and the Auth. Vers., following the Vulg. (sancta bu-bula carnis, para annos carnis bubule, apparenty with the absurd derivation from ὕφθη, ἄφθη, and ἅπ ου, a balled), renders it "a good piece of (roasted) flesh." But there can be little doubt that it would be certain measure of wine or drink (for ἄφθη, with N prosthetic), a measure cup. An approach to the truth was made by L. de Dieu, who, following the same etymology, understands a portion of the sacrifice measured out (Genesius, Hol. Lex. s. v.) See MEAT.

FLESH. The word flesh (ἐρῶν, ἀρπίς) is used both in the O. and N. T. with a variety of meanings, physical, metaphysical, and ethical, the latter occurring especially in the writings of St. Paul. I. Old Testament.—In the O. T. it designates (1.) a particular part or parts of the body of man and of animals (Gen. ii. 21; xil. 2; Job x. 11; Psa. cl. 6); (2) in a more extended sense, the whole body (Psa. xvi. 9; lxiv. 14) in contradistinction from the heart (Ḳard) — the body, that is, as possessed of a soul or spirit (Lev. xvii. 11; Job xii. 10). Hence it is also applied (3.) to all living things having flesh (Gen. vi. 15), and (4) metaphorically to man and mankind, the whole, which is designated as "all flesh" (Gen. vi. 12). It is often connected (4.) with the ideas of mutability, of degeneracy, and of weakness, which are the natural defects of the flesh proper. It is thus represented as the counterpart of the divine strength, as the opposition of God to man, or as in 2 Cor. x. 3. With him is an arm of flesh, but with us is the Lord our God to help us." (see also Isa. xxx. 8; Psa. lxvii. 89). To this we can also add Gen. vi. 8, the only passage in the O. T. in which the word approaches to an ethical sense, yet without actually acquiring it. The peculiar sense of the word flesh (she) is also (5.) the basis of the expression "heart of flesh" (מ打猎 רצע) as opposed to "heart of stone" (Exod. xi. 19). (6.) The expression "my flesh" (often "my flesh and bone"), to indicate relationship (Judg. ix. 2; Isa. viii. 7), evidently refers to the physical and corporeal connection between persons sprung from a common father. In all these cases the O. T. only uses the word flesh in the physical and metaphysical senses.

II. New Testament.—These senses of the word flesh are also found in the N. T. (1.) As a name for the body, the exterior appearance of humanity, it easily passes on also to denote external phenomena in general, as opposed to that which is spiritual. So, when Christ says to the Jews, "Judge not after the flesh," he means "the flesh is the rule by which you judge." (John vii. 15; compare also Phil. iii. 8; 2 Cor. v. 16). In Rom. iv. 1, the ethical sense appears. The word "flesh" here denotes man's incapacity for good apart from divine aid. This impotence, both practical and spiritual, is also expressed in other passages, as in Rom. vi. 19; Matt. xvi. 17; and in Matt. xxvi. 41, where the lower, earthly, and sensual element in humanity, as opposed to the "spirit," is, as such, incapable of bearing trial and temperance of the Christian life. The root of this weakness is sin dwelling in the flesh (Rom. vii. 18; xvii. 20), by which man is divided within himself as well as separated from God, inasmuch as he has, on the one side, the self-conscious spirit (voci), which submits to the divine law, and takes pleasure in this obedience, desiring to be led and commanded, and avoiding all that is forbidden; and, on the other hand, the flesh, which, being inhabited by sin, seeks only for the lower satisfactions, thus inclining to evil rather than good, and opposed to the divine law (see Rom. vii. 7-25; viii. 5). The "sinful flesh" (ὀρπάξ ἁμορπίας) hinders the efficacy of the divine law, so that, although it (the law) gains the ascent of the "inner man," it is not fulfilled, because of this tendency of the flesh towards what is forbidden. Hence the "being in the flesh" means, in fact, such activity of the sinful passions (παράγεια ἀμαριας) of the organism (τον νιον μικρον) as results in death. (Rom. vii. 5; viii. 8, 9). To live and act according to the flesh is to live and act sinfully; the carnal mind is enslaved (Rom. vii. 14). The "wisdom according to the flesh" is a mistaken, Godless wisdom (1 Cor. i. 26). All efforts, boons, etc., having the flesh for object or for motive (βουλεύθηκα εν την πνευματικήν, εν γνώσει εν την οἰκονομίαν, 2 Cor. i. 17; x. 4; xii. 16), are foreign to the life of the true Christian. The last, and especially the flesh of the flesh, is opposed to holy, divine impulses and actions (Gal. v. 16; Eph. ii. 5). To crucify the flesh and the works of the flesh is the great object of the Christian, which he attains through the power of the spirit which dwells in him (Rom. viii. 15). The fleshly mind is the mistaken mind, leading away from Christ to pride, and consequently to error (Col. ii. 18, 19). Finally, to act according to the flesh is called "to be sold under sin." (Rom. vii. 12; comp. 1 John ii. 16; Rom. viii. 8).

But "flesh" does not always denote sinfulness (see Rom. i. 3; ix. 5; 1 Tim. iii. 16; John i. 14). The flesh, in Christ, was not sinful; God sent him only "in the likeness of sinful flesh" (2 Cor. v. 14, 2). This sinless flesh, as the organ of the Word of life, contains the divine life, which is communicated, not only living in the flesh, to redeem them from the death of sin, and to make them partakers of everlasting life (John vi. 51).

We see, then, that the meaning of the word flesh was, on the one hand, gradually extended from a physical to a metaphysical, and finally to an ethical sense. In the ethical use in the N. T., moreover, of the term "flesh" only by the use of the word flesh in the physical and metaphysical sense, in the other respects, it is identical. But "flesh," we do not find the idea of essential sin as lying in the flesh. Flesh in itself is neither bad nor sinful. It is the living body, the casket of the soul, containing within itself the interior and exterior organism of the senses, by which the union with the spirit conceives ideas, sensations, desires, and contains the so-called faculties of the soul with their diver functions. In the normal state, its whole activity is governed by the spirit, and in so far as the latter remains in union with God from whom it proceeds, it is in turn governed by him. But sin, which disturbs this union of the spirit with God, alters also the power of the spirit over the body. The ego oversteps the bounds of the divine life, moves no longer in harmony with the divine spirit, and, being no longer supported by the divine power, gradually becomes earthly and worldly, and all its functions partake of this corrupt nature and bear in it the种子, it is true, to bring the flesh under subjection to the higher laws, but does not succeed. It may, under the form of conscience, succeed in regaining some ground, but not in bringing back the state of subordination and of detachment from the world. It is only through an immediate action on the part of God that the original relation of the flesh to the spirit is restored, the lost power regained, and the flesh brought back to its normal condition. (And the Word was made flesh, and dwelt among us, full of grace and truth, John i. 14).

The original source of sin in man is neither to be found in the spirit, the organ of God's revelation within us, nor in the flesh, which is in turn the physical organ of the spirit. According to Scripture, it is the heart, the centre of our personality, in which all the life and activities of the spirit and the soul unite, and from which choice between them is made. If the heart then gives entrance to sin, permits any doubt of God's truth, any mistrust of his love and kindness, and thus lowers him to put self in his place (Gen. iii), the union between him and God is thus also disturbed for the ease of the spirit to govern the αὐτός; the flesh starts up in opposition to the divine commands in its feelings and its desires. It asserts its independence. Self is made the centre. Hence hatred, strife, desire for worldly superiority,
creating envy, and giving rise to all the "lusts of the flesh." That both selflessness and sensuality have their seat in the ἁρπαγή, and that the actions of men are guided by one or the other, is clearly shown in the enumeration given by the apostle of the works of the flesh (Gal. v. 19), which are clearly the effects of selfishness and of sinful passions; and that the word flesh, as used by Paul, is intended to signify both, is proved by the apostle's warning (Gal. v. 19) not to use Christian liberty for "an occasion to the flesh," i.e. to satisfy the desires of the flesh, adding to it the recommendation "but by love serve one another." Whichever of the two is thus especially alluded to when the Scriptures, and especially St. Paul, speak of the nature, the life, or the works of the flesh, the context will show. Sometimes both are equally active, sometimes the one only to the exclusion of the other. This is the only way in which we can arrive at a true appreciation of the meaning in each case. Those interpreters who, in view of the substitution of ἁρπαγή for ἔρως and μικρός, consider it as meaning exclusively the bodily, sinful side of human nature, fall into the errors of the Manicheans. See Tholuck, Erisert Ueberschung u. ἁρπαγή als Quelle d. Bünde (Theol. Stud. u. Kritiken, 1855, 5); Stielm. i. d. Fud. Zeitschr. 1834 (k. d. u. s. Anthropol.); Neander, Planting and Training, vol. ii. Klinger, in Herzog, Real-Encyclopœdia; Campbell, On Four Gospels, diss. i. § 2.

Flesh and blood. An expression employed by our Lord to denote (after an Oriental figure) "his Spirit," represented by his flesh and blood, as these again are by the sacramental bread and wine (Eden). See Eucharist.

Flesh-book (τόξον, mastley, and τόξο, τοξο, miss-gak), an instrument used in the sacrificial services (1 Sam. ii. 13, 14; Exod. xxvii. 8; xxxix., 8; Numb. iv. 14; 1 Chron. xxvii. 17; 2 Chron. iv. 16), probably a many-pronged fork, bent backward to draw away the flesh. The priests required such an instrument that, if the flesh burnt too quickly, they might draw it out, and again throw it into the flame or upon the coals. The implement in 1 Sam. ii. 13, 14 (where the ancient Etruscan sacrificial Flesh-book.

First or mas. of the above Heb. term is used), is stated to have been three-tined, and was apparently the ordinary fork with prongs for culinary purposes, as was familiar likewise to the Greeks and Romans (καλλιαρα; see Smith's Dict. of Class. Antiq. s. v. Harpago).

Flesh-pot (יוшуע "כ, sir hab-basar", pot of the flesh, Exod. xvi. 5), probably a bronze vessel, standing on three legs, appropriated for culinary purposes among the Egyptians, such as we frequently see represented in the paintings of the tombs, with a fire-lighted beneath it. See Pot.

Fletcher, Alexander, D.D., was born at the Bridge of Teith, Scotland, in 1787. He studied divinity in the University of Glasgow, and succeeded his father as minister of the secession church at the Bridge of Teith in 1807. In 1808 he came to London to supply the Presbyterian chapel in Mill's Lane, and his popularity soon became so great that a spacious building (Albion Chapel, Moorfields) was erected for him. Some indiscipline in a love affair caused him to be cut off from the Presbyterian Church, but did not injure his moral character. A great church in the Strand, Circuit was built for him, where he preached for many years as an Independent, but both he and his church were finally admitted into the Presbyterian body. The University of Glasgow made him D.D. During thirty years of service he was one of the principal dissenting preachers of London, especially for his Sunday-school addresses and sermons. He published a number of works, chiefly for children and youth, among them, Scripture Sacred History (18mo)—Scripture Natural History (18mo)—The Christian Conqueror (12mo)—Guide to Family Devotions (4th ed.), Sermons for Children (3 vols. 18mo)—Warning to Evil Speakers (12mo)—Sabbath Remembrancer (12mo)—Sabbath-school Preacher (12mo). It is computed that 70,000 copies of his Guide to Family Devotions were sold before his death. He died at his residence in Clapton, Sept. 30, 1860. The Christian World, Oct. 5, 1860.

Fletcher, John (Fléchère, John W. de la), an early Methodist and saintly minister of the Church of England, was born Sept. 12, 1720, at Nyon, Vaud, of a distinguished family. He was educated at Geneva, where he studied profoundly both in philosophy and philosophy. At an early period he was, to a certain extent, master of the French, German, Latin, Greek, and Hebrew languages. His parents intended him for the ministry, but he preferred the sword, and at twenty he entered the service of the Dutch as a captain. Peace returning, he went to England, and became tutor in the family of T. Hill, Esq., Shropshire. About 1755 he joined the Methodist society, and in 1767 he took orders in the Church of England. Through the influence of Rowland Hill, he received three years after, a presentation to the living of Dunham, worth £400 a year; but, finding that in this place there was "too much time and too little labor," he, with characteristic zeal and disinterestedness, accepted Madeley in preference, as, though his income was just the half of the other, it afforded a more extensive sphere of usefulness. This was a situation, which, by his energy of character and varied accomplishments, he was peculiarly adapted to. The fact is, he was such a parish priest that it is surprising he was not tolerated at all within the pale of the Church of England; not more than two years after his establishment, and he was too apostolical for those who are fondest of talking about apostolical succession. The country gentlemen resisted him for reforming some of their barbarous sports and pastimes, and even many of the clergy looked on him with an evil eye, as disturbing the quiet of their lucrative routine. Opposition was shown to him in many quarters by refusals of admissions into houses—by placards posted on the doors of his chapel—and in a variety of other forms. But, unmoved by slander and undaunted by menaces, he pursued the onward tenor of his way, and did his Master's work according to the dictates of his conscience, whether men would hear or whether they would forbear. With incessant preaching he combined the most diligent pastoral labors. He went from house to house, sympathizing with the afflicted, helping the impoverished, ministering to the sick, and administering the vows. His liberality to the poor is said, by his successor in the parish, to have been scarcely credible. He led a life of severe abstinence that he might feed the hungry; he clothed himself in cheap attire that he might clothe the naked; he sometimes unfurnished his house that he might supply suffering families with neo-
essary articles. Thus devoted to his holy office, he soon changed the tide of opposition which had raged against him, and won the reverence and admiration of his people, and many looked upon their homes as consecrated by his visits. In the summer of 1769 Mr. Fletcher visited France, Italy, and Switzerland. Towards the close of the summer he returned to England, when, at the request of Lady Huntingdon, he became president of her seminary for educating young men for the ministry at Trevessa, in Wales. In 1770 he went there to reside, but shortly afterwards resigned, on account of some difference with Lady Huntingdon. Benson describes Fletcher as the "Reader," he says, "will pardon me if he thinks I exceed; my heart kindles while I write. Here it was that I saw, shall I say, an angel in human flesh? I should not far exceed the truth if I said so. But here I saw a descendent of Adam, fully invested above the ruins of the fall, that though by the body he was tied down to earth, yet was his whole consecration in heaven; yet was his life from day to day hid with Christ in God. Prayer, praise, love, and zeal, all ardent, elevated above what one would think estimable in the eyes of the world, were the elements in which he continually lived. Languages, arts, sciences, grammar, rhetoric, logic, even divinity itself, as it is called, were all laid aside when he appeared in the school-room among the students. And they seldom hearkened less long in all his ears, and every heart caught fire from the flame that burned in his soul. On leaving Trevessa he resumed his missionary and pastoral labors, making Madeley his centre. But his health failed, and again he was obliged to visit Switzerland. He derived great benefit from the change of climate, and, soon after his return to England in 1781, he married. Mr. Fletcher had for many years seen, with regret and pain, the neglected condition of poor children, and he opened a school-room for them in Madeley Wood, which was the last public work in which he was employed. On the 14th of August, 1785, he expired, not of any particular disease, but of the natural infirmities of age. Soutbey says: 'No age or country has ever produced a man of more fervent piety or more perfect charity; no Church has ever possessed a more apostolic minister.' (Life of Wesley, ch. xxxv.) His preaching is described as generally effective. He spoke the English language not only with correctness, but with eloquence. There was, says Gilpin, who heard him often, an energy in his discourse which was irresistible; to hear him without admiration was impossible. Powerful as were his writings, his preaching was mightier; his 'living word soared with an eagle's flight; he basked in the sun, carried his young ones on his wings, and seized the prey for his Master.' He was Wesley's most ardent coadjutor among the clergy; his counsellor, his fellow-traveler at times in his evangelistical itinerancy, an attendant at his Conferences, the champion of his theological views, and, above all, a salutary example of the life and power of Christianity as taught by Methodism, read and known, admired and loved by Methodists throughout the world. Madeley, his vicarage, is familiar and dear to them next to Epworth itself!' (Stevens, Methodism, i. 367, 422.) He was esteemed at home for great reputation, he was esteemed abroad; directness, acuteness, and logical skill. He wrote largely upon the Calvinistic controversy, against Top-
lady and others; and his writings, especially his Checks to Antinomianism, are essential to the thorough study of that controversy. 'Written as detached pamphlets, and abounding in contemporary and personal references, the Checks could not possibly have the consistence and compactness of a thorough treatise written upon the different foundations of the great Quinquennial Controversy.' But they comprehend, nevertheless, nearly every important thesis of the subject. His highest philosophical questions—those of the freedom of the will, prescience, fatalism—are elaborately discussed by them, as in the Remarks on Top-
lady's Schematical Religion, in which the "Reader," he says, "will pardon me if he thinks I exceed; my heart kindles while I write. Here it was that I saw, shall I say, an angel in human flesh? I should not far exceed the truth if I said so. But here I saw a descendent of Adam, fully invested above the ruins of the fall, that though by the body he was tied down to earth, yet was his whole consecration in heaven; yet was his life from day to day hid with Christ in God. Prayer, praise, love, and zeal, all ardent, elevated above what one would think estimable in the eyes of the world, were the elements in which he continually lived. Languages, arts, sciences, grammar, rhetoric, logic, even divinity itself, as it is called, were all laid aside when he appeared in the school-room among the students. And they seldom hearkened less long in all his ears, and every heart caught fire from the flame that burned in his soul. On leaving Trevessa he resumed his missionary and pastoral labors, making Madeley his centre. But his health failed, and again he was obliged to visit Switzerland. He derived great benefit from the change of climate, and, soon after his return to England in 1781, he married. Mr. Fletcher had for many years seen, with regret and pain, the neglected condition of poor children, and he opened a school-room for them in Madeley Wood, which was the last public work in which he was employed. On the 14th of August, 1785, he expired, not of any particular disease, but of the natural infirmities of age. Soutbey says: 'No age or country has ever produced a man of more fervent piety or more perfect charity; no Church has ever possessed a more apostolic minister.' (Life of Wesley, ch. xxxv.) His preaching is described as generally effective. He spoke the English language not only with correctness, but with eloquence. There was, says Gilpin, who heard him often, an energy in his discourse which was irresistible; to hear him without admiration was impossible. Powerful as were his writings, his preaching was mightier; his 'living word soared with an eagle's flight; he basked in the sun, carried his young ones on his wings, and seized the prey for his Master.' He was Wesley's most ardent coadjutor among the clergy; his counsellor, his fellow-traveler at times in his evangelistical itinerancy, an attendant at his Conferences, the champion of his theological views, and, above all, a salutary example of the life and power of Christianity as taught by Methodism, read and known, admired and loved by Methodists throughout the world. Madeley, his vicarage, is familiar and dear to them next to Epworth itself!' (Stevens, Methodism, i. 367, 422.) ---

FLETCHER 596 FLEURY

---
of Burgundy, Anjou, and Berry. He was made mem-
ber of the Academy in 1696, and in 1707 obtained from
Louis XIV the priory of Argenteuil, where he resided
till 1716, when he left it to become confessor to Louis
XV. He died July 14, 1729, greatly respected for his
learning and his virtues. His reputation rests chiefly
upon his studies in the classics, the first volume of
which was published in 1691, and the last in 1729,
ending with the year 1414. This work, as Fleury
says in the preface, was meant to be rather a popular
history than one of research and erudition; but yet it
is a clear and generally fair account of the progress
of the institutions of antiquity, and possesses an inno-
cent and well-documented style, which makes the
author a proper talent of the historian. It is written from
the Gallican stand-point. "Fleury writes diffusely and
in the spirit of a monk, but with taste and skill, in
mild temper and strong love for the Church and Chris-
tianity, and with a piety as well as to instruct.
He follows the order of time, though not
slavishly, prefacing some of his volumes with general
characteristics. He also defends antiquity and the
Gallican ecclesiastical constitution, without, however,
surrendering at all the credit of the Church, its gen-
eral standing, or the virtuousness of its clergy. His
principal concern is with doctrine, discipline, and
practical piety" (Schaaf, Apost. Church, § 86).
Fleury, as a writer of Church history, is not at all in favor
with Ultramontanists; a specimen of their feeling to-
wards him is given by the Univers (Paris) for July 8,
1843, which accuses him of the worst volumes of
Fleury, so ardent and furious in his calumnies and
spite against the pope!" His Church History was
continued by Fabri, but freely, down to A.D. 1598.
The best edition is Historie Ecclesiastique avec contin-
uation par Fabri et Cugnot (Paris, 1789-74, 56 vols.; index,
4 vols.; in all, 40 vols. 12mo.). A very good recent
edition is that of Didier (Paris, 1840, 6 vols. 8vo.). A
translation by Herbert, up to the 9th century, was
published in London (1727, 5 vols. 4to); and a partial
translation by Rev. J. H. Newman appeared in 1842-44
(3 vols. 8vo.). The Abrégé de l'Histoire Ecclesiastique
d: Fleury, published at Berne in 1776, is ascribed to
Friederik the Great. His other writings were very
numerous; the most important are, Mœurs des Chri-
tiens (Paris, 1882);—Mœurs des Israelites (Paris, 1881),
which was translated and published, with additions,
by Dr. Moreau (Manchester, 1837, 2 vols. 12mo.);—The
history of the French nation (Paris, 1852);—Institut de
de droit ecclésiastique (Paris, 1854, 2 vols.);—Discours
sur les libertés de l'Eglise Gallic-
aine. His minor works are collected in Martin's edi-
tion of Oeuvres de l'abbé Fleury (1837, imp. 8vo.), to
which additions were made by Fleury. A translation of
his Discours sur l'Ecole, History from 690 to 1100 (see
Jortin, Remarques sur l'Histoire Ecclesiastique, Lond.
1778, v. 72 sq.). See also Dupin, Ecclesiast. Writers, cent.
xvii; Hoefer, Nouv. Dict. Générale, xvii; Dow-
ling, On the Study of Ecclesiastical History, ch. iii.
Frieden, Theophil, a German philanthropist, was born at Eppstein, Rhenish Prussia, in 1800, where
his father was pastor. His early education was con-
ducted by his father, and he entered the ministry with
some misgiving, rather doubting his fitness, and choos-
ing rather the function of teacher. But in 1820 a call
to the pastors of the little village community of Ka-
serswerth, a small town on the Rhine, opened his way,
and he diffidently began his work in the place now
forever associated with his name, and which became,
under his hand, the centre of an influence approach-
able to that of other missionaries among the Jews, un-
ited, faith and increasing labor Frieden rivaled. The
in-
habitants of Kaiserswerth were chiefly supported by
a large manufactory, which failed in 1822. Frieden
devoted himself to the work of helping his flock in-
stead of being supported by them. He never did a man
boy under the table to vivify his tale of the fall
of a traveller over a precipice. He had at last till
Oct. 4, 1864, worn out by journeys in Germany, France, Great Britain, and
America, which had brought on disease of the lungs.
To the very last day of his life, he continued, in spite of painful weakness, to exhort those near him to a religious and unselfish life, took keen interest in the details of daily work going on around him, and died a day or two after taking the communion with his whole establishment and family, including two sons, whose entrance into the Church he specially rejoiced to see. Fliedner published (after 1836) annual reports of his institution, and a monthly periodical called Der Armen- und Krankenfreund. He also wrote a work, in four volumes, on the martyrs of the Evangelical Church, 'Buch der Märtyrer und ander Glaubenswesens der evang. Kirche von den Aposteln bis auf unser Zeitalter 1832-1860,' 4 vols. —London Quarterly Review, April, 1868, p. 247; Spectator, April 11, 1868; Winkworth, Life of Pastor Fliedner (London, 1887); Appleton, Am. Cyclop. (1884), p. 577.

**FLIES.** See FLY.

Flinn, Andrew, D.D., a Presbyterian minister, was born in Maryland in 1778, graduated at the University of North Carolina in 1799, and was licensed to preach by Orange Presbytery in 1800. In 1808 he became pastor of the Presbyterian church at Fayetteville, and in 1811 he was installed pastor of a new church, expressly organized for him, in Charleston, S.C. Here he gained a brilliant and solid reputation, which was soon widely diffused throughout the country. He became "one of the most impressive and attractive preachers of his day." He died Feb. 24, 1820. He printed a few occasional sermons. —Sprague, Annual, iv, 276.

Flint (ץלמ, challamish', from its smoothness, Psal. xxiv, 8; Isa. 1, 7; "rock"); Job xxviii, 9; frequently with the accompaniment "א"n, a rock, Deut. xvii, 33; xxvi, 18; once for "it itself, Ezek. iii, 9; "sharp stone," Ezek. iv, 20), any hard stone, especially of a silicious character, as quartz or granite; but in mineralogical science it is applied only to silicious nodules. In the three passages just cited above the reference is to God's bringing water and oil out of the naturally barren rocks of the wilderness for the sake of his people. In Isaiah the word is used metaphorically to signify the firmness of the prophet in resistance to his persecutors. So also in Isa. v, 28 we have "like" Flint, in reference to the hoofs of horses. In 1 Macc. x, 73, "ץלמ is translated "flint," and in Wd. xi, 4 the expression "ץלמ צמר is adopted from Deut. vii, 14 (Sept.). See ROCK. Flints abound in nearly all the plains and valleys through which the Hebrews marched during the forty years of wandering. In the northern desert, low hills of chalk occur, as well as frequent tracts of chalky soil, for the most part overspread with flints. In the western desert Burkhardt saw some large pieces of flint perfectly oval, three to four feet in length, and about a foot and a half in breadth. This desert presents to the traveller's view its immense expanse of dreary country, covered with black flints, with here and there some hilly chains rising from the plain. See DESERT.

Flint, Ariel, D.D., a Congregational minister, was born Nov. 17, 1765, at Windham, Conn. He graduated at Yale in 1785, and in 1786 was elected tutor in Brown University, where he remained until 1790, and on April 20, 1791, was installed pastor of the Second Church, Hartford. He was chosen secretary of the Connecticut Missionary Society at its organization, June, 1798, and held the office for twenty-four years. In January, 1824, he was dismissed from his pastoral charge on account of his failing health, and died March 7, 1825. Dr. Flint published A Treatise on Surveying, and several occasional discourses. He assisted in compiling The Hartford Selection of Hymns, and was also assistant editor of the Connecticut Evangelical Magazine for seven years. —Sprague, Annual, ii, 273.

**FLOAT (only in the plur. למש, doberoth', doberoth; 1 Kings v, 9; רָכָב, raphodoth', of uncertain derivation; 2 Chron. ii, 15; Sept. in both passages רָכָב, as also in 1 Esdr. v, 50), a raft or conveying bulky substances by water. Two methods of conveying wood in floats appear to have been practiced in ancient times. The first was by pushing single trunks of trees into the water, and suffering them to be carried along by the stream; this was commonly adopted with regard to firewood. The other was ranging a number of planks close to each other in regular order, binding them together, and steering them down the current: this was probably the most ancient practice. The earliest ships, or boats, were nothing more than rafts, or a collection of deals and planks bound together. They were called רָכָב by the Greeks, and ῥαβίς by the Romans. The ancients ventured out to sea with them on piratical expeditions, as well as to carry on commerce; and after the invention of ships proper, the most ancient use of them was the transportation of soldiers (Schefler, De Mille, Narr. Vet.). Solomon, it appears from the above passages, entered into a contract with Hiram, king of Tyre, by which the latter was to cause cedars for the use of the Temple to be cut down on the western side of Mount Lebanon, above Tripoli, and to be floated to Jaffa. At present no streams run from Lebanon to Jerusalem, and the Jordan, the only river in Palestine that could bear floats, is at a considerable distance from the cedar forest. The wood, therefore, must have been brought along the coast by sea to Jaffa. The Assyrian monuments represent men crossing rivers on inflated skins [see FERRY] and in basket-boats, precisely as described by ancient authors (Herod, i, 194); and in the same region transportation and travelling is still largely carried on by means of floats, some of them open rafts, and others with an awning or cabin. See NAVIGATION.**

Ancient Assyrian Floats.

Modern Assyrian Keel, or Raft.
FLOCK 599  FLOOD

Flock (usually and properly नाय, c' rer, ποίμνιον [or dimin. τοιμνων, a "little flock," like नाय, κατέσχη], 1 Kings xx, 27; occasionally नाय, μικρόν, cattle, as generally rendered; frequently निस्स, sheep collectively, as commonly rendered; also नीूल, marthā), Jer. x, 21, pasture, as elsewhere rendered; and नीूलक, ऊक्सराओ [q. v.], Deut. vii, 13; xxviii, 4, 18, 51, i. e. Fuma, eves for breeding). See FOLD; PASTURE; SHEEP.

Flock (the correlative term to "pastor." "The way in which this term, or the language which implies it, invariably occurs in Scripture (1 Pet. v, 2; John xxi, 15), points out to the people that they are not properly the minister's flock (which would exalt him into the mediator between them and God), but Christ's."—Eden, Church Dictionary, s. v.)

Floodoardo (Floodoarz or Floodoardo) or Rheims, a French chronicler, was born at Epernay in 894, and became canon of Rheims. He was persecuted by count Heribert for opposing the raising of his unqualified son Hugo to the archbishopric of Rheims, and was imprisoned for several months. After the death of the consecrator, he received his son and consecrated him. He died March 28, 966. He wrote Chronica or Annals, a chronicle of France from 919 to 966, published by Pithou (Paris, 1588). He also wrote a Historia Ecclesiae Remensis, in four books, giving an account of the prelates who had presided over its affairs (printed by Collin, 1790; 1794). Besides these works, which as far as extant, are given in Migne, Patrologia Latina, vol. 185, together with the Opera Matrice of Floodoardo, including his Triumphus Christi, a sort of Church History in verse.—Oberman, Nov. Beq. Gen. xvii, 986; Clarke, Smith's Dictionary of the Bible, s. v.

Floh, Jacob Hendrik, was born in the year 1758, at Crefeld. He studied theology in the Baptist seminary in Amsterdam. He was invited in 1788 to take charge of the Baptist church at Enschede. Here he labored between forty and fifty years. He was a man of extensive knowledge and of a ready wit, and was indefatigable in his labors. He contributed greatly to promote the cause of education in the section of the country where he was located. Several valuable essays were written by him on the subject of education. One, on the Real Theory of Punishment and Rewards in Eternity, the death of which came from the unhappy tenor van 't algemeen. Several works on other subjects were written by him. One, on the Indissoluble Connection between Virtue and True Happiness, was crowned by the same society. Another, on a kindred subject, a dialogue on the above mentioned: Nationale Religieus En Liggende Exist Newt volgend. Van Wijck, for a few years Floh allowed himself to be drawn aside from his ministerial vocation to engage in political life. In 1796 he was chosen representative of the people in the National Convention at the Hague. In 1796 he was chosen secretary of the first chapter of the representative body of the Batavian people. He acquitted himself in those positions with great credit. His theological views were Latitudinarian. His principal works are: Poveren, en berevoleerde verklaring der geschiedenis van't Hollandse verzoekd in de woestijn, Deventer, 1790; Het oor beneeds, 1817. His attack on the Heidelberg Catechism, as teaching, in the answer to the fifth question, a doctrine dangerous to the state, made in the National Assembly at the Hague, was regarded as highly injudicious, and excited great indignation. He uttered a triumphant reply from the pen of Ewaldus Kist, one of the most highly esteemed ministers of the Reformed Church. Floh attempted no reply. It was thought that he was himself convinced by the moderate and judicious reply of Kist. We may add in honor of Floh that this attack of his was regarded as an exception to his otherwise impartial conduct as a public representative. He died at Enschede in March, 1830. See B. Glausing, Godgeleerd Nederland, 1 Deel, blz. 467 en verv.; Yeps en Dornmont's Geschiedenis der Nederlanden, 14 Deel, blz. 206 en verv. (Breda, 1827). (J. P. W.)

Flohr, George Daniel, a minister of the Lutheran Church, was a native of Germany, born in 1759. He died in Wytheville, Va., in 1826. He studied medicine in Paris, and was one of the throng that witnessed the execution of Louis XVI. The accidental but tragic death of his mistress, the daughter of the constable of the prison near him, part of whose mangled body was thrown upon his person, most deeply affected him, and so operated upon his mind as to lead him to change all his purposes and plans for the future. This was the turning-point in his character. A train of serious thought was awakened which resulted in his conversion, and subsequent consecration to the work of the ministry. Soon after he came to America, and pursued the study of theology under the direction of the Rev. William Carpenter, Madison County, Va. After his licensure to preach the Gospel, he engaged in successful missionary service in south-western Virginia, but subsequently took charge of several congregations in Wythe County, among whom he faithfully labored till his death. Mr. Flohr exercised an extraordinary influence not only upon the members of his church, but upon all the society. When different people were gathered in the community they were always referred to him for adjustment, and from his decision scarcely any one ever thought of an appeal. The basis of this influence was the unlimited confidence which everyone had in his personal worth and Christian integrity. So far as his professional engagements allowed, Mr. Flohr was devoted to study. His acquaintance with the German and French was extensive and thorough, and his attainments in Latin and Greek considerable. The only work of his ever published was a posthumous volume of sermons. (M. L. S.)

Flood (the rendering of several Heb. words [see Rain], but especially of מים, mīmḥ, מים, torrent, an event related in the book of Genesis (ch. vii, viii), by which, according to the usual interpretation of the description, the whole world was overwhelmed and every terrestrial creature destroyed, with the exception of one human family and the representatives of each species of animal, supernaturally preserved in an ark, constructed by divine appointment for the purpose. See Ark.

1. The successive stages of its progress were in order and at intervals as follows. In the 60th year of his life, Noah was commanded to enter the ark, taking with him his wife, and the sons and their wives of the three other families. One week afterwards, on the 17th day of the 2d month (answering nearly to our November), there began a forty-days' rain, and the fountains of the great deep were broken up, so that its waters rose over the land until all the high hills under the whole heavens were covered. Fifteen cubits (twenty-seven feet) upward did the waters prevail (rise). On the 17th day of the 7th month (about April), or 160 days after the deluge began, the ark rested on the mountains of Ararat, or Armenia, the waters having begun to abate. They continued to decrease till the 1st day of the 10th month (July); 17 days more, and the tops of the mountains were visible. Forty days after this, Noah sent forth a raven from the ark, which never returned. He next (apparently after seven days) sent forth a dove, which came back. Seven days afterwards he dispatched the dove again to ascertain the state of the earth, and in the evening she returned, bringing a leaf of oak in her mouth, which she could not lay hold of. After an interval of seven days the dove was sent forth a third time, and returned no more. On the first day of the 1st month of the new year (Sept.-Oct.) the waters were dried from off the earth, and on the 7th day of the 2d month (Nov.) the ark, built an altar, and offered sacrifice. See Noah.
2. The truth of the Mosaic history of the deluge is confirmed by the tradition of it which universally obtained. A tradition of the deluge, in many respects accurately coinciding with the Mosaic account, has been preserved almost universally among the ancient nations. It is a very remarkable fact concerning the deluge that the accounts of it are generally connected with the history of it, even of those nations which were unknown until they were discovered by enterprise of voyagers and travellers; and that traditions of the deluge were kept up in all the rites and ceremonies of the nations that acknowledged the surface of the earth does exhibit, and which might be ascribed to diluvial action of some kind, are certainly not the results of one universal, but simultaneous submergence, but of many distinct, local, aqueous forces, for the most part continued in action for long periods, and of a kind precisely analogous to such agency as is now at work. While, further, many parts of the existing surface of the earth are invaded by the principles and phenomena of the volcanic districts prove distinctly that during the enormous periods which have elapsed since the craters were active, no deluge possibly could have passed over them without removing all those lighter portions of their exuviae which have evidently been discovered among the ruins of the aborigines of Cuba, North America, and the South-Sea Islands. See Akarut.

3. The account furnished by the sacred historian is circumstantially distinct, and the whole is expressly ascribed to divine agency; but in several of the less particular accounts, the "windows of heaven" (vii, 11), the "breaking up of the fountains of the great deep," are mentioned, and again the effect of wind in drying up the waters (viii, 1). It is chiefly to be remarked that the whole event was, as it were, a illumination in the most gradual and quiet manner, without anything at all resembling the catastrophes and convulsions often pictured in vulgar imagination as accompanying it. When the waters subsided, so little was the surface of the earth changed that the vegetation continued unchanged; the olive-branch remained from which the dove brought its token. We allude particularly to these circumstances in the narrative as being those which bear most upon the probable nature and extent of the event, which it is our main object in the present article to examine, according to the tenor of what little evidence can be advanced either by the terms of the narrative, or from other sources of information which may be opened to us by the researches of science. See Cockburn, "Inquiry into the Truth and Certainty of the Mosaic Deluge," (1750).

The evidence which geology may disclose, and which can in any degree bear on our present subject, must, from the nature of the case, be confined to indications of superficial action attributable to the agency of water, subsequent to the latest period of the regular geological phenomena. Impending inundation by a temporary inundation of a quiet and tranquil nature, of a depth sufficient to cover the highest mountains, and, lastly (as indeed this condition implies), extending over the whole globe; or, if these conditions should not be fulfilled, then indications of at least something approximating to this, or with which the terms of the description may be fairly understood and interpreted to correspond. (See Prof. Hitchcock, on "The Historical and Geological Deluges compared," in the B.N. App. January, 1857; April, 1837; April, 1668; also B. N. App. 1862. "Several dissertations" [on the Flood] out of Le Clerc [Commentary, i, 66-70, 1710] on Genesis, London, 1868.) Of those geological facts which seem to bear at all upon such an inquiry, the first, perhaps, which strikes us is the occurrence of what was formerly all included under the common name of diluvium, but which more must be reduced to many distinct classes. The general term may, however, not inaptly describe superficial accumulations, whether of soil, sand, gravel, or loose aggregations of larger blocks, which are found to prevail over large areas of the earth's surface, and are manifestly superincumbent over the deposits of a different age, with which they have no connection. An examination of the contents of this accumulated detritus soon showed the diversified nature of the fragments of which it is composed in different localities. The general result, as bearing on our present subject, is obviously this: the traces of currents, and the like, which the surface of the earth does exhibit, and which might be ascribed to diluvial action of some kind, are certainly not the results of one universal, but simultaneous submergence, but of many distinct, local, aqueous forces, for the most part continued in action for long periods, and of a kind precisely analogous to such agency as is now at work. While, further, many parts of the existing surface of the earth are invaded by the principles and phenomena of the volcanic districts prove distinctly that during the enormous periods which have elapsed since the craters were active, no deluge possibly could have passed over them without removing all those lighter portions of their exuviae which have evidently been discovered among the ruins of the aborigines of Cuba, North America, and the South-Sea Islands. See Akarut.

4. Apart from the testimonies of geology, there are other sciences which must be interrogated on such a subject. These are, chiefly, territo...
probably had not extended beyond a comparatively limited district of the East. A local destruction of animal life would also allow of such a reduction of the numbers to be included in the ark as might obviate objections on that score; and here again the Oriental idea of the deluge (vii. 2) is that of the coexistence of every actual species being included. This is a consideration of very great importance when we take into account the countless varieties of animated beings for which the ark itself made no provision, such as reptiles, insects, and even fishes, which could not exist in the buxom air and security of the ark, and which would probably survive the collisions of the flood. The other difficulties alluded to, arising from kindred sciences, such as the lack of water, the effect of so large an accession of water upon the temperature and upon the rotation of the earth, the unfitness of such a place as the ark for the long confinement of so many animals, the actual existence of trees in different parts of the world older than the deluge, and the impossibility of preserving even vegetable life for so long a time under water, are all likewise obviated by the supposition of a local deluge.

Agreed, that event, so far as the plain meaning of the text goes, may have been one of the most unusual of events, so far as the appearance of the world was concerned. There is an endless array of so many animals from so lofty, bleak, and craggy a mountain as Ararat, and their dissemination thence over the whole world, are obviated in this way, by supposing that it was on one of its lower eminences that the ark grounded, as it floated by the force of the stream which issued from the greater mountain barriers of Armenia. Lastly, this author suggests considerations tending to fix the region which may have been the scene of the actual inundation described by Moses in about that part of Western Asia where there is a large, extinct now, considerably depressed below the level of the sea (see the Bibliotheca Sacra, July, 1867, p. 465): this might have been submerged by the joint action of rain, and an elevation of the bed of the Persian and Indian Seas. Finally, he quotes the opinions of several approved divines in confirmation of such a view, especially as bearing upon all the essential religious instruction which the narrative is calculated to convey.

The only other mode of viewing the subject is that which, accepting the letter of the scriptural narrative, makes the deluge strictly universal; and allowing (as they must do) all analogies in the dift of the text, not met by so many animals from so lofty, bleak, and craggy a mountain as Ararat, and their dissemination thence over the whole world, are obviated in this way, by supposing that it was on one of its lower eminences that the ark grounded, as it floated by the force of the stream which issued from the greater mountain barriers of Armenia. Lastly, this author suggests considerations tending to fix the region which may have been the scene of the actual inundation described by Moses in about that part of Western Asia where there is a large, extinct now, considerably depressed below the level of the sea (see the Bibliotheca Sacra, July, 1867, p. 465): this might have been submerged by the joint action of rain, and an elevation of the bed of the Persian and Indian Seas. Finally, he quotes the opinions of several approved divines in confirmation of such a view, especially as bearing upon all the essential religious instruction which the narrative is calculated to convey.

The only other mode of viewing the subject is that which, accepting the letter of the scriptural narrative, makes the deluge strictly universal; and allowing (as they must do) all analogies in the difference of the text, not met by any such vast numbers of animals as the text suggests, a natural conclusion, in a natural sense, involved in it, accounts for them all by supernatural agency. In fact, the terms of the narrative, strictly taken, may perhaps be understood throughout as representing the whole event, from beginning to end, as entirely of a miraculous nature. If so, the difficulty may be said to be an end to all difficulties or question, since there are no limits to omnipotence, and one miracle is not greater than another. In a word, if we suppose the flood to have been miraculously produced, and all the difficulties thus overcome, we must also suppose that it was not only miraculously terminated also, but every trace and mark of it supernatural effaced and destroyed. Now, considering the immense amount of supernatural agency thus rendered necessary, this hypothesis has appeared to some quite untenable. Dr. Fyfe Smith, in particular, in connexion with the subject of the deluge (see p. 243), enlarges on the difficulty (p. 157, and note), and offers some excellent remarks on the general question of miracles (p. 84–85); and there can be no doubt that, however plausible may be the assertion that all miracles are alike, yet the idea of supernatural agency to so extraordinary an event is as the primitive instance is, to many minds at least, very staggering, if not wholly inadmissible. In fact, in stretching the argument to such an extent, it must be borne in mind that we may be treading upon difficulties in another quarter, and not immediately the difficulty of the suspension on which any miracles are supported. See Miracle.

If we look to the actual tenor of the whole narrative as delivered by Moses (Gen. viii. and ix.), we shall observe that the manifest immediate purport of it is the same as that of the rest of the early portion of his history, viz. as forming part of the introduction to the law. Thus we find, in the first instance, the narrative dwelling on the distinction of clean and unclean beasts (vii.), the life of the earth and the promise of future enjoyment of the earth and its fruits; the prohibition of eating blood; the punishment of murder (ix. 4, etc.); all constituting, in fact, some of the rudiments out of which the Mosaic law was framed, and which were thus brought before the Israelites as forming an anticipation of the union for with Noah intended. In a Christian light, the narrative is important solely in respect to the applications made of it in the New Testament, and these are only of the following kind: it is referred to as a warning of Christ's coming (Matt. xxiv, 38–39; Acts xxiv, 27); as an assurance of judgment on sin (2 Pet. ii., 5); and of God's long-suffering; while the ark is made a type of baptism and Christian salvation (1 Pet. iii., 20); and, lastly, Noah is set forth as an example of faith (Heb. xi., 7). In all these applications no reference is made to the physical nature of the event, or to the deluge itself. The flood, however, with all the inevitable consequences of so vast a conflagration, so unparalleled in history, has been referred in various quarters to the visible extent of land and superincumbent arch of sky (as they often signify), all direct statement of the universality of the deluge over the surface of the globe will at once disappear. That it was coextensive with the spread of the human race at the time is indeed demanded by the conditions of the sacred history [see Antediluvians]; but there is no evidence that the population before the flood was either so extensive or so widely disseminated as many have imagined, calculating upon the inapposite rate of modern increase and later usages. On the contrary, it appears that even after the deluge the inhabitants were still so greatly inclined to cluster around one native centre that the catastrophe of Babel was regarded in order to induce a fulfilment of the divine behest that mankind should "fill the earth." Undoubtedly, if read from the present advanced stage of the world's history, it would be impossible to understand the language otherwise than as of an absolute universality; for, so far as the present population of the world is known, it must have been in the strictest sense a world-embracing catastrophe which could be described as enveloping in a watery shroud every hill under the whole heaven, and destroying every living thing that moved on the face of the earth. But here it must be remembered, the sacred narrative dates from the comparative infancy of the world, when a limited portion of it was peopled or known; and it is always one of the most natural, as well as most fertile sources of error, to refer the language of scripture to circumstances of the later period, that one is apt to overlook the change of circumstances, and contemplate what is written from a modern point of view. Hence the embarrassments so often felt, and the misjudgments sometimes actually pronounced, respecting those parts of Scripture which speak of the phenomena of the catastrophe, when the language suited to the apparent, but at variance, as has now been ascertained, with the real phenomena. In such cases it is forgotten that the Bible was not intended to teach the truths of physical science, or point the way to discoveries in the merely scientific sense; but that it was intended to teach the truths of God's revelation, and the way to discoveries in the moral and religious sense. Of things in these departments of knowledge it uses the language of common life. So, whatever in the scriptural account of the deluge touches on geographical
cal limits or matters strictly physical, ought to be taken with the qualifications inseparable from the bounded horizon of men's views and relations at the time. Accordingly, there were not wanting theologians with two clars, long before any geological fact, or well-ascertained fact of any sort in physical science, had appeared to shake men's faith in a strictly universal deluge, actually put the interpretation now suggested as competent upon the narrative of the deluge. "The Deluge did not flourish in the 17th century, says in his Synopsis on Gen. vii. 19: "It is not to be supposed that the entire globe of the earth was covered with water. Where was the need of overwhelming those regions in which there were no human beings? It would be highly unreasonable to suppose that the entire globe had to be flooded in order to have penetrated to all the corners of the earth. It is, indeed, not probable that they had extended beyond the limits of Syria and Mesopotamia. It would be absurd to affirm that the effects of the punishment inflicted upon men alone applied to places in which there were no men at all. Hence he concludes, that "if not so much as the hundredth part of the globe was overspread with water, still the deluge would be universal, because the extirpation took effect upon all the part of the world which was inhabited." In like manner, Stillig, in his Origines Sacerdotum (bk. III, ch. iv.), asserted that "he cannot see any urgent necessity from the Scripture to assert that the flood did spread over all the surface of the earth. The flood was universal as to mankind; but from thence follows no necessity at all of asserting the universality of the water, which had been withheld for several months, should be promptly said?" (Popoff, History of the Council of Florence, ed. by Neale, Lond. 1861, ch. vi). The bull transferring the council to Florence was read in the cathedral of Ferrara, Jan. 10, 1439; on Feb. 9 the pope and bishops entered Florence; the emperor, John Paleologus, arrived on the 15th. The aim of the council was (in continuation of that at Ferrara) to restore union between the churches of the East and the West. It desired this greatly, in order to confound his enemies at the Council of Basle, who were quitting the papal faction, and he had proceeded him (June 25, 1438; see Basle); while the emperor John Paleologus sought to gain the aid of the West in his wars with the Turks. The chief topic of discussion was the addition of the filioque to the creed [see Filioque]; but the Latin succeeded in taking it as the doctrinal question of the Holy Ghost instead of the historical one of the additions to the creed. The cardinal Julian chieflv represented the Latin side, and Mark of Ephesus was the strongest disputant on the side of the Greeks. Bessarion, of the Greek side, was won over to the Lat in by promises of rewards from the pope. See Bessarion.

At the first session, Feb. 26, 1439, Joseph, patriarch of Constantinople, was absent on account of illness. He died before the close of this council. Cardinal Julian proposed a discussion of the means of union, but the emperor reminded him that the dispute on the filioque was not ended. At the end of the sitting, he held a private meeting of the Greeks to consider terms of union, but nothing came of it. In the second session (March 2) a beginning was made in stating the doctrine of the Filioque, the Latin side being represented by Johannes de Monte Nigro, provincial of the Dominicans in Lombardy. The discussion was continued in several sessions up to the ninth (March 28). The Greeks succeeded best in the scriptural argument, and also showed that many of the passages from Ephesus, Basle, and Augustine, cited by the Latins, had been corrupted. After the session of March 17, the emperor prohibited Mark of Ephesus and Anthony of Heraclea, the two strongest advocates on the
FLORENCE, COUNCIL OF 603

FLORENTIACE

Greek side, from taking further part in the discussions. The emperor was bent on union at any price. At the end of the session of March 24, the pope sent word to the patriarch that the Greeks must either express their assent to the union of the East, or lose the object of the union of the Armenians with the Roman Church. This decree runs in the name of the pope only. In the third, Mar. 23, 1440, the anti-pope Amadeus, whom the council at Basle had elected pope (Felix V), was declared to be a heretic and schismatic, and all his followers guilty of high treason; a promise of pardon being held out to those who should submit within fifty days. In the fourth session, 4th of February, 1441, a decree for the union of the Jacobites of Ethiopia with the Roman Church was published, signed by the pope and eight cardinals. Andrew, the deputy of John Xi, the patriarch of Alexandria, received it in the name of the Ethiopian Jacobites. In the fifth session, 26th of April, 1442, the pope's proposal to transfer the council to Rome was agreed to, but only two sessions were held there, in which decrees for the union of the Syriacs, Chaldeans, Armenians, and the influences of Rome were drawn up" (Landon, Manuale of Councils, v, ix). On the return home of the Greeks, they found no welcome; Mark of Ephesus was held up as the true representative of orthodoxy, and the signers to the union were denounced as renegades. Most of those who had signed the union were arrested; their lives were endangered, and they were harassed by distress, by fraud, and by the hopes and fears of a transient life. The hand that has signed the union should be cut off, and the tongue that has pronounced the Latin creed deserves to be torn from the roof.

Liturac. — For the acts of the council (on the Latin side), see Hor. Justiniannus, Acta Concil. Florentini (Rom. 1638, 3 parts fol.); Manal, Conciliii v, ix; Labbe et Coste, Concil. xiii, 228, 510, 1684; Harduin, Concil. ix. The acts are summed up in Semler, Selecta Historiae Eccles. cap. iii, 140 sq. On the Greek side we have several partials preserved in the collections of the historian (Athos, Koes, Eire, 1474, 38 sqq.); in reply to which, Leo Allatius wrote Exercit. in R. Cregeti- doum apparatus, etc. (Romae, 1674, 460, fol.). See also Schröck, Kirchenbeschreibung, xxix, 388 sqq.; Th. Christendom's Divisionis ( Lond. 1867), ii, 383 sqq.; Millan, Latin Christianity, bk. xiii, ch. xiv; Hefele, in Tuber. Quart-Schrift, 1847, 188 sqq.; Grier, Epilepsies of Councils (Dublin, 1857, 5vo), ch. xxvi; The History of the Christian Church, ed. by Samuel Popoff, ed. by J. M. Neale (Lond. 1861, 12mo); Cunningham, Historical Theology, i, 468 sqq.; Elliott, Delinication of Romanism, bk. iii, ch. iii.

FLORENTIACE

Radoswinn, successor of Gerard Groot as director of the Brethren of the Common Life (q.v.), was born at Leerdam in 1500. He became M.A. at the University of Prague, and on his return to Holland came under the influence of Gerard, and became his close friend, and a leader among the Brethren. He died A.D. 1440. His life was written by Thomas a Kempis (Vita Florintii, in Opera Omnia, ed. 1830, vol. iii). See Ullmann, Ref. to Brefren., ii, 92 sq. See Brefren.

FLORENTIACE

Florian 1. A martyr (saint in the Roman Catholic Church), was the son of Christian parents of Celia, and served for some years as a member of the emperor Diocletian. When the prefect Aquilinus went to Lorch to search for Christians, Florian voluntarily confessed his faith and was drowned in the Enns. A pious matron, Valeria, in pursuance of a vision, had his corpse but to the place where subsequently the monastery of St. Florian was erected. Several relics are taken to Rome, and in 1188 pope Lucius III sent them to king Casimir, of Poland, and bishop Ge- deon of Cracow. Thus he became the patron saint of Flor
of Poland. He is commemorated on the 4th of March. As he is particularly invoked by those in danger of fire, he is represented in Christian art with a vessel extinguishing flames.

St. Onofrio, one of the most celebrated Augustinian monasteries of Austria. It was erected over the grave of St. Florian (see FLORIAN, 1) in the 6th century, and built anew in 1713. — Stull, Gesch. des regulierten Chorherren-Stiftes St. Florian (Linz, 1885).

FLORIDA, a diocese of the Protestant Episcopal Church of the United States coextensive with the state of the same name. It was organized in 1828.
The first bishop was Francis Huger Rutledge, D.D., a native of South Carolina, consecrated in 1851; died at Tallahassee Nov. 4, 1866. He was succeeded by John Freeman Young, consecrated July 25, 1867. From 1862 to 1865 Florida belonged to the "General Council of the Confederate States of America."

In 1890 the diocese counted 54 clergymen, 21 parishes, and 3848 communicants.

FLORIANS, a sect in the 2d century who inclined to the views of the Valentinians. They were so named from Florinus, a Roman presbyter who was deposed by Eusebius. His views are only to be gathered from a letter of Irenaeus and from a passage in Eusebius (v, 20). It appears that Florinus at first pushed pantheism so far as to make God the author of evil; and afterwards, on the other extreme, in connection with the peculiar dogmas of Valentinus, Florinus seems to have given such light and direction to the eternal principles from which all the good and evil respectively in the universe had proceeded.—Neander, Ch. Hist. i, 890; Movers, Ch. Hist. i, 408. See VALENTINIAN.

FLORE, JOACHIM OF. See JOACHIM.

FLOREANS, DREPTANUS (commonly called FLOUR DIACONUS or MAGISTER), a deacon of the Church of Lyons in the 1st century, who, for the share he took in the disputes with Gottschall and Johhanus Scotus, and also between Agobard and Amalarius. Against the former he wrote (A.D. 863) Liber de Predestinacione contra Joh. Scoti error. definitiones. He asserts a twofold predestination, or, rather, predestination under a twofold aspect: a gratuitous predestination of the elect to grace and glory, and a predestination of the reprobate to damnation for their sins, which they commit by their own will; and maintains that, though our free will can choose that which is good, it never would choose it, if it were not assisted by the grace of Jesus Christ. And to explain this, he makes use of the comparison of a sick man, of whom we may say that he may recover his health, although he hath need of physic to restore it; or of a dead man, that he may be raised, but by the divine power. In like manner, saith he, the free will being dis tempted, and dead, by the sin of the first man, may be revived, not by its own virtue, but by the grace and power of God, who hath pity on it, which Florus understands not only of that grace which is necessary to salvation, but of that also which is necessary to seek or view the grace, and if it be not too well. "While he censured Scotus on account of his abuse of the worldly sciences, he did not suffer himself to be so far misled by the zeal of the pietistic as to discard them as useless in themselves to theology; but he did not disallow to distinguish the right use of them, in investigating truth, from that above. Only demanded that everything should be tried by the test of the sacred Scriptures. But, at the same time, he declared that, in order rightly to understand and apply Scriptural truth, it was not enough to study the letter alone, but that the inward illumination of a Christian temper was also required. The holy Scriptures themselves could not be rightly understood and profitably read unless faith in Christ first existed in the heart of the reader, so that the truth might be rightly apprehended by means of that, or unless faith in Christ was truly sought, and found in them by the light which comes from above." This, and his tract De Actione Miserarium, and De electibus Episcoporum, may be found in the Acta Synod. at Trier, 300, vol. x, the Opera om. Auctoris in Martene et Durand, collect. i, p. 577. He compiled, chiefly from Augustine, a Comm. in Omnes Psalm Epiptonos, which was published as Beda's until Maibion showed it to be Florus's. All his extant writings are given in Migne, Patr., cxix, 1-429; Migne, Ch. Hist. cent. 1., pt. ii, ch. ii., n. 45; Hook, Eccl. Hist. v, 155; Hist. Lit. d. France, tom. v; Neander, Ch. Hist. (Torrey), iii, 489; Ceillier, Auteurs Sacrés (Paris, 1862), xii, 478 sq.

FLORENS, JOSEPHUS (Greekized Ιωσηπος Φλωρος by Josephus), sometimes with the praenomen Fuscus or Cesius, a native of Ciliciae, appointed procurator of Judaea, A.D. 61, in place of Albinus, by Nero, through the influence of his wife Cleopatra with Poppaea, the empress. His rule was marked with such unprecedented rapine and violence as to drive the Jews into their final rebellion (Tactit. Hist. v, 10), a result apparently intended by him in order to cover his own enormities (Josephus, Ant. xviii, 1, 6; xx, 11, 1; War, ii, 14). He took a bribe at Cesarea from the Jews for protecting them in their synagogue worship, and then abandoned them to the fury of the Greeks, imprisoning those who came to supplicate his promised protection. He massacred several of the Jewish citizens in the most cruel manner in which he could provide. His extreme cruelty and rapine caused many of the Jews to seek the protection of the Roman legions, while others perished on the spot. The Romans, however, were not slow to exact their revenge, and the Jews were far from being left without protection. The intervention of Cestius Gallus, procuras of Syria, in their favor. His term ended with the Jewish insurrection, A.D. 65, in which he was superseded by Vespasian, or perhaps perished (Josephus, Lif, 6; Ant. xiv, 9, 2; xx, 9, 8; War, ii, 18; Suetonius, Jepy, iv; Orosius, vii, 9; Sulpicia Sev. Sacr. Hist. ii, 42; Eusebius, Chron. 1xvi).—Smith, Dict. of Class. Biog. v. s. See GOVERNOR.

FLOTUS. See FLOUT.

FLOUT stands in the Alphabet. As the representative of the following Heb. words: פִּקּוּל (he makk, literally narrow [see FAT], Judg. vi, 19; 1 Sam. i, 24; xxviii, 24; 2 Sam. xvii, 28, meal as it is elsewhere rendered), פִּקּוּל (to lekh, from stripping off the hull, the finest and purest part of the meal, usually rendered "fine flour," Sept. and N. Test. ψιλάκτης, Rev. xviii, 8), and פִּקּוּל (boak, from its excreting in rising; 2 Sam. xiii, 18, dough as it is elsewhere rendered). See MEAL.

In early times corn was often eaten whole without any preparation at all (Deut. xxiii, 25), and the custom was not entirely disturbed in the time of our Saviour (Matt. xii, 1). Parching it afterwards became so general that the words which properly mean parched were also used for corn or meal (Ruth ii, 14; 2 Sam. xvii, 28). See PARCHED CORN. Mortars were used in the time of Moses for bruising corn, as was also the mill (Numb. xi, 6). See MORTAR. Fine meal, that is, corn or grain ground or beaten fine, is spoken of as far back as the beginning of Abraham (Gen. xvii, 6). At first, barley alone was ground, but afterwards wheat, as only the poor used barley. Barley-bread appears to have been more suitable in the warm climate of the East than in a colder climate. See BREAD. On the second day, however, it becomes insipid and tough to the palate, as is likewise the case with wheat bread; hence the necessity of baking every day, and hence also the daily grinding at the mills about evening attended to by the prophet Jeremiah (xxv, 10). See MILL. The flour, being mingled with water, was reduced to a solid mass in a sort of a mass, or kneading-trough (q. v.); this, after remaining a little time, was kneaded, some leaven being also added to it (Exod. xii, 84). See LEAVEN. In case it was necessary to prepare the bread very hastily, the leaven
FLOWER

FLO

was left out (Gen. xviii, 6; xix, 8). The cakes, when
made, were round, and nine or ten inches in diameter,
and often not thicker than a knife.—Jahn, Archd., p.
137-140. See CAKE. Fine flour was especially offer-
ed by the poor as a sin-offering (Lev. v., 11-13), and
in connection with other sacrifices in general (Numb.
v, 5-12; xxviii, 7-29). See OFFERING.

FLOWER (usually some form of the kindred roots
γενίκτια and γορικτία, to glitter, and hence to bloss.;
and N. T. αὐξάνειν, a generic term, not designating
any particular species. Flowers grow in great variety
and abundance in Palestine, and from the month of
January to May the groves and meadows are adorned
with the blossoms of different species of wild plants.
Travellers have noticed different species of anemone,
ranunculus, crocus, tulip, narcissus, hyacinth, lily, vi-
corum, iris, etc. The most esteemed are the yellow,
wind-flower, willow-herb, hyssop, dragon-wort, peri-
winkle, squill, the spiked veronica, white clover, and
a flower resembling the holly-hock, and several others,
which, by their variety and multitude, perfume the
air, and yield a very lovely prospect. The rose of
Sharon, which is not properly a rose, but a clustrous
white or red, grows abundantly; also the rose of Jeri-
cho, though not properly so, grows spontaneously, par-
ticularly near the Dead Sea and the Jordan. The cel-
obated henna plant abounds in several places. With
the jasmine, as well as with the vine, the people orna-
ment the alleys and the arbors of their gardens. Burck-
hardt noticed the pretty red flower of the nomen
plant, which abounds in all the valleys of Sinai, and
is also seen among the most barren granitic rocks of
the mountains (see Tyas, Flowers of Holy Land, Lond.
n. d.). See PALESTINE.

Flowers in the Bible are not treated from a scien-
tific point of view. Very few species are mentioned;
and, although their beauty is once or twice alluded to
in descriptive passages (sometimes under the general
term "grass," Matt. vi, 38; Cant. ii, 12; v, 10), they
are seldom introduced, except in the blind, pathetic
analogy which they afford to the transitory life and
Glory of mankind (Job xiv, 2; Psa. ciii, 15; Isa. xxviii,
1; xl, 6; Jsa. xi, 10; 1 Pet. i, 24). See BOTANY. The
egyptian Egyptians were exceedingly fond of flowers,
and they are often represented on the monuments (see
Wicklow, in Jour. cr., 13, 57, 78, 141, 237, etc.). Ganassae
(Γάνασσα, Γάνασσα, Γάνασσα), παράδοςδέσιν were in use among
Greeks from the earliest times (Gen. xiii, 10; Deut.
xi, 12, etc.); but, although they were planted with
flowers and fragrant herbs (Cant. vi, 2; iv, 10), often
chosen for their beauty and rarity (Isa. xvii, 10), yet
they appear to have been chiefly cultivated for useul
and medicinal purposes (see Jer. xxix, 11; Cant. vii, 11; iv,
13; Deut. vii, 6, etc.). See GARDEN.

FLOWER (flówer), pe'ochach, a bud; Isa. xviii, 5; Num.
xxvii, 5, as just bursting open into a bloss., Isa. v, 24;
Nah. i, 4) is used to describe the floral ornaments of
the golden candelabrum (Exod. xxx, 81 sq.; xxxvii,
17; I Kings vii, 28), and also the artificial lily-orna-
tments around the edge of the great laver (1 Kings vii,
26; 2 Chron. iv, 7, 8) in the tabernacle and Temple.
See CANDLESTICK, GOLDEN; BANNA BM.

FLOWERS (fló's) midd'k, uncleanliness, as often else-
where rendered) stands in Lev. xv, 24, 28, for the
ménstrual discharge of females.

FLOWERS. (1.) It was an ancient practice to strew
flowers on graves. Jerome bestows the following com-
menation on Pammachius: " While other hus-
band and wife, and parents of the dead, cast flowers
upon the graves of their wives, our Pammachius
waters the bones and holy ashes of his wife with the
balsam of alms. With these perfumes and odors he
soles the ashes of the dead that lie at rest." (Epist,
20.) (2.) The practice of decorating churches with
flowers is very common in the Roman, and some of
the Protestant churches of the Continent, and exists
in various parts of England. It probably arose out of a
desire to "honor and rest-fare of nature's most
beautiful productions, and may therefore be retained
among things in themselves indifferent. The modern
Ritualists, however, carry this, as other things, to
excess.—Bingham, Orig. Eccles. bk. xxiii, chap. iii, 20;
Walcot, Sacred Architecture, p. 299; Barrett, Flowers
and Their Meanings for the Floral Decoration of
Churches (London, 1866).

FLO?, JAMES, D.D., a minister of the Methodist
Episcopal Church, was born in the city of New York
Aug. 20, 1806. He received his academic education at
Colgate and Cornell University, New York, but left
school graduating, and went to London, where he was for
some time a student of botany and horticulture at the
Royal Botanical Gardens. Returning to New York,
he became a clerk in the Methodist Publishing House.
In 1831 he joined the Bowery Village (now Seventh
Street) Methodist Episcopal Church, and for some time
acted as teacher and superintendent of a Sunday-school
for colored persons under the care of that church. He
was also appointed a class-leader; was licensed to
preach in February, 1833; was received into the trav-
elling ministry as a probationer at the New York Con-
ference, and was finally appointed to Riverville, New
York, and N. Y. His subsequent appointments were:
1868-87, Hemstead Circuit; 1887-90, Harlem Mission.
He was an earnest abolitionist at a time when aboli-
tonism cost a man something; and in 1836 he was cen-
sured and dismissed from his connection by the Con-
vention. He lived to see his principles triumph both
in Church and State. At the Conference in 1829 he
was ordained elder, and appointed to Fortnight Cir-
cuit, Delaware County, N. Y., but, on account of
the illness of his wife, he was released from the appoint-
ment. From 1840 to 1842 he was at Washington-street
Church, Brooklyn; 1842-44, Danbury, Conn.; 1844-
46, Madison Street, New York; 1847-48, Middletown,
Conn.; 1848-50, New Haven, Conn.; 1850-52, Madis-
on Street, New York, second time; 1852-54, Twenty-
seventh Street, New York; 1854-56, presiding elder
of New York District; 1856-60, editor of National Maga-
azine and Secretary of the Tract Society of the Metho-
dist Episcopal Church; 1861-63, Seventh Street, New
York; 1863, Beekman Hill, New York. Three times
his Conference elected him a delegate to the General
Conference of the Methodist Episcopal Church, and
for four years of his pastoral life strongly indicate
the high appreciation that was held of his merits; and it
is believed that he never failed to leave any charge
better than when he came to it. He also took a lively
interest in the general affairs of the Church; was di-
gressful and influential on the sentiments of his con-
vention, where his influence was always potent. As
assistant secretary and secretary, he kept the Conference
journals fourteen years. In 1848 he received the de-
gree of D.D. from the Wesleyan University. As a
preacher, he was clear, direct, and earnest: eminently
evangelical in doctrine; in exhortation, pungent and
effective; elevated in matter, and rigidly correct in
style and manner. His death was sudden. On the
evening of Oct. 14, 1863, in his study, with only a son
with him, he was seized with apoplexy, and expired
almost immediately. Dr. Floy was a man of great
personal character, and of vigorous as well as acute in-
tellect. His critical faculty was largely developed;
his personal culture was careful and thorough; his
English style was pure and clear to a rare degree.
For twenty years he was a contributor to the Metho-
dist Quarterly Observer, and pen name of the editor of
that journal are from his pen. He was devoted to
Sunday-schools, and wrote several books for the use
of the schools, among them Harry Bodd, a very suc-
cessful juvenile tale. One of his most important la-
bor was the editing of the Methodist Episcopal
Church, and his task assigned to a committee, of which Dr. Floy was

Digitized by Google
most active member, by the General Conference of 1849. The Hymn-book now in use owes its comprehensiveness and general excellence largely to Dr. Floy. He edited the posthumous works of Dr. Olin (q. v.). After his death appeared his Old Testament Characters delineated and illustrated (N. York, 12mo) — Occasional Sermons,とって仮名を省略します。——The Quarterly Review, January, 1864, article vii; Woodruff, in The Ladies Repository, July, 1865, art. i; Minutes of the Annual Conferences, 1864, p. 86.

Floyd, John, an English Jesuit, was born in Cambridge-shire. He became a Jesuit on the Continent in 1623, and returned to England as a missionary. He was regarded as a learned scientist, elevated by his superiors to teach polite literature and divinity at St. Omer and Louvain. The time of his death is not known. He was involved in controversies with Chillingworth, Antonius de Dominici, Crassw, Sir Edward Hobby, and other Protestants, in which he assumed the names of Daniel & Jess, Herrera, Lomelino, and Annaeus Velutinamentum. Under these names he wrote Synopsis Apostasiae M. A. de Dominici (Antwerp, 1617, 8vo): — Digestio Hypocrisiae M. A. de Dominici (1619, 8vo): — The Church Conquered over Human Will, against Chillingworth (St. Omer, 1631, 4to) — The Total Sum, against the same (1639, 4to) — A Answer to William Crasw (1612, 4to): — A Treatise of Purification, in answer to Sir Edward Hobby (1618). — A Game, De Script. Rutil. Jesu; Hook, Eccl. Brev., 154.

Fludd, Robert (Latin, De Plutibus), an English physician and theosophist, was born at Millgate, in Kent, in 1574. He was educated at Oxford, and afterwards travelled on the Continent, where he became a Rosicrucian (q. v.). Returning to England, he became M.D., and practised in London, devoting himself also to the study of the natural sciences, in which he showed rare aptitudes. He was also a zealous student of the occult sciences. He died at London Sept. 8, 1637. He was a man of real genius. Kepler and Gassendi thought it worth while to write against him. Fludd’s works were published in Latin at Oppenheim, 1617—88, 8 vols. folio. His Theological Philosophy, grounded upon the essential Truth or eternal Sequence (Lond., 1659, fol.), is translated from the Latin text. See Rich, Brev. Dictionary; Brucker, Hist. Crit. Philosophiae; Wood, Ath. Oxonienses. See THEOSOPHY.

Flute, Nikolaus von der, also known under the name of Brother Klaus, was born at Flutel, in the canton of Unterwalden, Switzerland, March 21, 1417. He was religiously educated, and was distinguished for his asceticism. While, at the same time, he neglected none of his social duties. He served in the army with distinction, and afterwards was nineteen years councillor of state and judge. His countryman would have appointed him to the highest offices, but he declined, and, resigning even his function of judge, he left his family Oct. 16, 1487, barefooted, bareheaded, and coarsely clad, to withdraw from the world entirely, and live in the wilderness. He settled among the Alps, where he is said to have lived for twenty years without touching any food except the consecrated wafer brought to him by the priest. The people erected a chapel for him, and he gained great renown. After 1477 he began preaching in the chapel. In 1481 he suddenly appeared at a diet of the eight cantons, at which time composed the Swiss Confederation, held at Sarnon, and by an effective address averted the threatening disruption of the Confederation. He died March 21, 1487. He was canonized in 1659 by Clement IX. — Herzog, Recl. Encyclop., iv, 481; Piper, Enzy, Kalendar, 1861; Goldfin von Tieffen- baum, Geist und Leben des heil. Bruder Klaus (3d edit. Lucerne, 1866); Bubinger, Bruder Klaus und die Weltliteratur (Lucerne, 1897); Schneller, Uber Nikolaus von der Flute (Einsied. 1852). There are also biographies by Wysing, Weissenbach, Herzog, Widmer, Geiger, and G. Gérard.

Flute (חוּל, masokrotika), from its hissing or whistling sound; Theodot. εἴφω, a pipe), a musical instrument, mentioned among others (Dan. iii, 5, 7, 10, 15) as used at the worship of the golden image which Nebuchadnezzar had set up. (Comp. the αὐλός of 1 Eev. v. 2, a a Persian instrument.) According to the author of Shille-Egyptianu, this instrument was sometimes made of a great number of pipes—a statement which, if correct, would make its name the Chaldee for the musical instrument called in Hebrew בּוֹרָה, ὁπ'α' and erroneously rendered in the A. V. "organ." See FLUTE.

There is notice taken in the Gospels of players on the flute (αὐληγός, "minstrel"), who were collected at festivals (Matt. ix, 23, 24). The Rabbins say that it was not allowable to have less than two players on the flute at the funeral of persons of the meanest condition, besides a professional woman hired to lament; and Josephus relates that, a false report of his death being spread at Jerusalem, several persons hired players on the flute by way of preparation for his funeral. In the Old Testament, however, we see nothing like it. The Jews probably borrowed the custom from the Romans. When it was an old woman who died they used trumpets, but flutes when a young woman was to be buried. See FLUTE.

Flutes, or rather Flutes, were very early in use in ancient Egypt, where they were of various forms and lengths, both single and double, with different numbers of holes, and used by players of both sexes.

Ancient Roman Double Flutes.

They are likewise frequent in the modern East (Lane’s Egyptians, ii, 82). See MUSICAL INSTRUMENTS.

Flutes or Fluting, curved channels cut perpendicularly in the shafts of columns of classical architecture. In the Doric order the columna twenty-four, separated by a sharp edge. In the Ionic, Corinthian, and Composite there are twenty-four, sepa-
FLUX, BLOODY (burnesquela, Acts xxviii, 8), the same as our dysentery, which in the East is, though sometimes sporadic, generally epidemic (as in the case of the Asiatic cholera), and then assumes its worst form. It is always attended with fever (q. v.), frequently in an intermittent form, the presence of which Lakos, with professional accuracy, intimates by the plural (x⁻ρης) in the above case of Publius. A sharp gnawing and burning sensation seizes the bowels, which give off in purging much slimy matter and pus, and when blood flows it is said to be less dangerous than without it (Schmidt, Bild. Medic. c. xiv, p. 508-507). King Jehoram's disease is thought by Dr. Mead to have been a chronic dysentery, and the "bowels falling out" the "prolapsum ani, known sometimes to issue (2 Chron. xxii, 15, 19). See Disease.

Fly is the rendering in the Author. Vers. of two Heb. words. (Egils has a curious article on the name of the butterfly among the Hebrews, in the Zeit. für weisenk. Tell, Jena, 1864, i.) See Art; Bee; Flea; Gnat; Hornet; Lice; Locust; Scorpion, etc.

1. Zebeb (צְבֶבָּ֗ה; Sept. μύδιον, Vulg. musca) occurs only in two passages (comp. Wisd. xvi, 9; xix, 10), namely, Eccles. x. 1, "Dead zebeb be the ointment of the apothecary to send forth a stinking savour," and in Isa. vii, 18, where it is said, "The Lord shall slay for the zebeb that is in the uttermost part of the rivers of Egypt." The Heb. name, it is plosable, is a generic one for any insect, but the etymology is a matter of doubt (see Gesen. Thes. p. 401; Heb. and Chal. Lex. s. v.; and Fürst, Heb. Concord. s. v.). The word zebeb, fly, enters as an element into the name originally appropriated to an idol worshipped at Ekron, Baalzebul (2 Kings i, 9); but, according to the English version and the Vulgate, in the time of our Lord applied to the prince of demons, interchangeable with "Satan" (Matt. xxii, 24, 26, 27). This "lord of flies" corresponds to the Ζῦς ἀνάμονος and the Ἰππαρκής μυῖαρος of the Greeks and Romans, as if a defender from flies (see Kitt. Pict. Bible, note on 2 Kings i, 2). The Greek in the New Testament reads Beelzebul (Βαηλζηβολ, which is said to mean "lord of dawn" instead of "lord of flies," and has been considered as one of those contemptu,-Silver Coin of Aramaous puns which the Jews were in the habit of making by slight changes of letters. There might be a peculiar sting in this particular case, from the circumstance that flies are chiefly bred in dung-hills, and many species do greatly congregate thither; hence the deity in question, being confessedly a "lord of flies," must ipso facto be a "dunghy lord." One of the names by which "idole" are expressed in the Old Testament is צְבְּבָּֽה, gilán-ším, which has the closest affinity with γυμνός, go-lém, dung. The margin of the English Bible, indeed, gives "dunghy goda" as the rendering of this word in Deut. xviii, 17. See Beelzebul.

In the first quoted passage allusion is made to flies, chiefly of the family Muscaida, getting into vessels of ointment. Flies even in this country we know what an intolerable annoyance the houseflies are in a hot summer when they abound, crawling everywhere and into everything; but in the East the nuisance is tenfold greater. There the common houseflies (Musca domestica) swarm in immense numbers; and though they inflict no physical injury, yet, from their continual settling on the face, they are insufferably annoying (Rosenmüller, Alterth. IV, ii, 420 sq.; Russel, Aleppo, ii, 123 sq.; Tavernier, i, 74; compare Proop. Alp. Diæt. Egypt. iv, p. 207). In Egypt the passants are so subject to a virulent kind of ophthalmia that a very second person is said to be affected with it, and multitudes are blind of either one or both eyes. The complaint is greatly augmented by the constant presence of the flies, which congregate around the diseased eyes, attracted by the moisture which exudes, and so useless is it to drive them away, that the miserable people submit to the infliction, and little children are seen with their eyes margined with rows of black flies, of whose presence they appear unconscious, though presenting a most painful sight to Europeans (Lorent. p. 26, 48; compare Foraskal, Désert. d'Arab. p. 21, in Bohard, Cours d'Egypte, i, 7). The "ointment of the apothecary," composed of substances perhaps peculiarly attractive to these impudent intruders, would be likely to become choked up with their entangled bodies, which, corrupting, would be the more offensive for their contrast with the expected and little follies reduced to an availability who had a reputation for wisdom. The man is the ointment, his reputation the perfume, his little folly the dead fly, his disgrace the stinking savour. See Unguent.

In the other passage, the zebeb from the rivers of Egypt is by some writers, as by Goezeelmann (Verworn, Zion. vi, 79), here identified with the name of which Bruce (Trav. v, 190) gives a description, and which is evidently some species of Tabanus. Sir G. Wilkinson has given some account (Transact. of the Entomological Soc. ii, p. 188) of an insectary fly under the name of dhoboh, a term almost identical with zebeb. It would not do to press too much upon this point when it is considered that Egypt abounds with noxious insects; but it must be allowed that there is some reason for this identification; and though, as was stated above, zebeb is probably a generic name for any flies, in this passage of Isaiah it may be used to denote some very troublesome and injurious fly, κατὰ igitur, "The dhoboh is a long gray fly which comes out about the rise of the Nile, and is like the cleg of the north of England; it abounds in calm hot weather, and is often met with in June and July, both in the desert and on the Nile." This insect is very injurious to camels, and causes death if the disease which it generates is neglected; it attacks both man and beast. The phrase hising, or, rather, haring, for the fly (Isa. vii, 18) is explained in the article Bee.

2. Aroth (אֵרוֹת; Sept. ἀρχικά, Vulg. omne genus muscarum, muscae domiciliaria, musca domestica; but in Psa. lxix, 18; A. V., "swarms of flies," or "swarms of flies of sorts of flies"), the name of the insect or insects which God sent to punish Pharaoh (Exod. vii, 21-31; see Psa. lxxviii, 45; cv, 81). The question as to what particular insect is denoted by aroth, or whether any one species is to be understood by it, has long been a matter of dispute. The scriptural details are as follows: the houseflies of the kind which covered the ground, they lighted on the people, the land was laid waste on their account. From the expression in ver. 21, "there remained not one," some writers have concluded that the Heb. word points to some definite species; we do not think, however, that such an import is to be laid upon this argument; in the aroth to be taken to denote "swarms," as the A. V.
tenders it, the "not one remaining" may surely have for its antecedent an individual fly understood in the collective "swarms." The Sept. explain arōb by sy

"dog-fly;" it is not very clear what insect is meant by the Greek term, which is frequent in Homer, who often uses it as an abusif epithet. Thus he represents Mars as applying the epithet to Minerva for instigating the gods to quarrel (U. xxi. 894). It is also referred to as an Insect by Elian, who, in describing the mygna, tethures, or horse-fly, says it is similar to what is called the syrōyus (Hart. Anim. iv. 51). Philo, in his Life of Moses (1, 53, p. 401, ed. Mangen) expressly describes it as a biting insidious creature, which comes like a dart, with great noise, and, rushing with great impetuosity on the skin, sticks to it most tenaciously. It seems likely that Jerome, in translating Exodus, derived the word from Tdub, "to mingle," and understood it as a mixture of noxious creatures, as did Josephus, Aquila, and all the ancient translators. The diversity of Jerome's renderings in Exodus, however, betokens his uncertainty, and in the Psalms he has adopted that of the Septuagint. More modern writers, reasoning on other senses of the Hebrew word, which are somewhat numerous, have proposed several different insects. Thus one of the meanings of Tdub is "to darken," and Moufet observes that the name cumoynia agrees with no kind of flies better than with those black, large, compressed flies which build nest or cell, and not only obtain ichor, as other flies, but also suck out blood from beneath, and occasion great pain. He observes that they have nobosics, but, instead of it, have double sets of teeth, like wasps, which they infix deeply in the skin; and adds that they greatly infest the ears of dogs (Theat. Insect. cx). Pliny describes an insect of this kind (Hist. Nat. xii. 40); so also Columella (vii. 18). (See Pliny by Grandagnes and Cuvier, Parisii, 1829, ii, 461, note.) But the ancient naturalists generally describe the cumoynia as a sort of washy-fly (Tubanus), which might include both senses, for this genus is most impudently pernicious in its assaults, spares neither man nor beast, gorges itself to bursting with blood, infusing an irritating venom at the same time, and occurs, in suitable localities even in our own climate, in immense numbers. If the arōb was composed of one or more species of Tubana, miraculously augmented in numbers, and preternaturally induced to penetrate into the houses, such a visitation would be a plague of no slight intensity, even supposing their blood-thirstiness and pertinacity, individually considered, to be of no higher standard than we are accustomed to see. It is not improbable that one of the Hippobosca, perhaps H. equi

ax, Linn., is the syrōyus of Elian (N. i. 41, 31), though Homer may have used the compound term to denote extreme impudence, implied by the shamelessness of the dog and the teasing impertinence of the common fly (Mya). As the arōb are said to have filled the houses of the Egyptians, it seems not improbable that common flies (Muscidae) are more especially intended, and that the compound syrōyus denotes the grievous nature of the plague, though we see no reason to restrict the arōb to any one family. "Of insects," says Sonnini (Trav. iii. 199), "the most troublesome in Egypt are flies; both man and beast are cruelly tormented with them. No idea can be formed of their obstinate rapacity. It is in vain to drive them away; they return again in the selfsame moment, and their perseverance wearies out the most patient spirit.

The arōb may include various species of Chalcidica (grants), such as the musquito, if it is necessary to interpret the "devouring" nature of the arōb (in Psa. lxxviii. 46) in a stricter literal sense; though the expression used by the Septuagint is not inapplicable to the flies, which even to this day in Egypt may be regarded as a "plague," and which are the great instrument of spreading the well-known opthalmia, this being conveyed from one individual to another by these unclean pests; or the literal meaning of the word "devouring" the Egyptians may be understood in its fullest sense of the Muscidae if we suppose that the people may have been punished by the larvae gaining admittance into the bodies, as into the stomach, frontal sinus, and intestines, and so occasioning in a hot climate many instances of death (see, for cases of Mysia, produced by Dipterous larvae, Transactions of Entom. Soc. ii. 266-269). See GNAT.

The identification of the arōb with the cockroach (Blatta orientalis), which Oudemann (Verm. Sam. pt. ii, c. 7) suggests, and which Kirby (Bridge. Treat. ii. 287) adopts, has been rejected by all who recommend a species naturally gratuitous, as Mr. Hope proved in 1832 in a paper on this subject in the Trans. Ent. Soc. ii, 179-188. The error of calling the cockroach a beetle, and the confusion which has been made between it and the sacred beetle of Egypt (Ateneus, vii) has recently been corrected by Kuhl (Hist. and Crit. Comm. Exod. l. c.). The cockroach, as Mr. Hope remarks, is a nocturnal insect, and prows about for food at night; "but what reason have we to believe that the fly attacked the Egyptians by night and not by day? The miracle involved was the plague of flies contesting the least, in the creature being brought against the Egyptians in so great an abundance during winter. Possibly, however, the better rendering of the Hebrew would be beetles. (See Wibel's treatise, Ueber der Arōb. in the "Frühjahrsgesell. Früchte," 1738, p. 244.) See BIBLE.

Flying buttress, in Gothic architecture, a buttress extended above the wall of the side aisles, or other outer wall, and connected with the wall of the clerestory, or of a tower, by a portion of an arch, to afford lateral support.

FO, FOŚ (or FоM), the Chinese name for Buddha (the first syllable of Fоb-Ś or Fо-a—Buddha). See Hardwick, Christ and other Masters, ii, 24, 84, 86; and the articles BUDDHISM, CHINA (ii, 249); FоH-Ś; LAMAIN.

Foś (Foś, Foś, or simply Fоś, the son of an asa, Zech. ix. 9, as vico in Matt. xxi. 5), an asa's colt (Gen. xxxiii. 15; xiii. 11). See ASA; COLT.

Foam occurs as a translation of ḫūm (be'tamph, something broken): in Hos. x. 7, "As for Samaria, her king is cut off as the foam upon the water," after the Vulg. opuma. The Sept. doubtless gives the correct sense, φομήρα, a dry twig or splinter. Horsley (Comment, loc. cit.) renders "bubble." "Foam" is the true meaning of ἀπόπηκτος, froth (Luke ix. 89; with its derivatives in Mark ix. 18, 20; Jude 19). Fodder (Foś, beliś, Job vi. 5; xxiv. 6; Isa. xxx. 24). In the second passage in Job this word is rendered in our version "corn;" the margin gives "miniled corn or corn at an ear." In that of Isaiah it is rendered "provender." The word properly signifies a mixture, a medley. Gesenius (Heb. Lex.) says, "The two latter passages are most clearly understood by a reference
to the Roman farrogo (Plny, Hist. Nat.), consisting of barley or oats, mixed with vetches and beans, which were sown and reaped together."

Foggini, Pietro Francesco, an Italian archaeologist, was born in 1718 at Florence, devoted himself to the Church, and was made doctor at Pisa. In 1741 he published De pristina Florentaeurum Apostolic, and an edition of Virgil (Florence, 4to). In 1742 Foggini accepted an invitation from Bottari, second librarian of the Vatican, to come to Rome, where Benedict XIV gave him a place in the pontifical academy of history, and made him sub-librarian at the Vatican. In 1758 he succeeded Bottari as librarian. He died at Rome May 31, 1788. He devoted great part of his life to the study of the MSS. of the Vatican; and published, besides the works already mentioned, Epiphanius, De XII gemma, etc. (Rome, 1748, 4to);—Epiphanius Salerno, Comment, in Cont. (Rome, 1770, 4to);—Appendix Historia Byzantium (Rome, 1777).—Hoefer, Nouv. Biog. Générale, xviii, 35.

Foli. See Fuss-Her.

Fold (properly ꞌ nipples, gedrobbi, a place scalled in, Numb. xxxii, 16, 24, 36; αἰνος, a court-yard, John, 1, 16; also ꞌ nipples, maked, a place shut up, Hab. iii, 17; Psa., i, 1, xxviii, 70; whereas ꞌ nipples, dober, Isa. v, 17; Mic. ii, 12; and ꞌ nipples, maktekk, 2 Sam. vii, 8; 1 Chron. xvii, 7; Isa. lxv, 10; Jer. xxiii, 8; Ezek. xxv, 14; xxiv, 14, signify pasture, and ꞌ nipples, John, 16, the flock itself), a small enclosure for flocks to rest together (Isa. xxiv, 20). It appears that, before the shearing, the sheep were collected together into an uncovered enclosure (αἰνος), surrounded by a wall (John, xi, 16). The object of this is that the wool may be rendered finer by the sweating and evaporation which necessarily result from the flock being thus crowded together. There are the sheepholds mentioned in Numb. xxx, 16; xxiv, 36; 2 Sam. vii, 8; Zeph. ii, 6, etc. No other kind than this are used in the East (Jahn, Archbok, § 40). See PASTURAGE. Such an enclosure, open above, was often made of hurdles, in which, during the summer months, the flocks are kept by night or at noon. They were usually divided into two parts for the different kinds of flocks, i.e. sheep and goats (Judg. v, 16). See Flock. The gentlemen forming the Scotch Mission of Inquiry to the Jews in 1889, when at Esh- tailor, observed, "Many large flocks of sheep and goats were coming into the village, and we followed the footsteps of the flocks in order to see where they were lodged all night. We found the dwellings to be merely cottages of mud, with a door, and sometimes also a window, into a court-yard. In this yard the flocks were lying down, while the villagers were spreading their mats to rest within. Small mud walls formed frail partitions to keep separate the larger and smaller cattle, for oxen, horses, and camels were in some of these enclosures." In the East it is common for shepherds to make use of ruined edifices to shelter their flocks from the heat of the middle of the day and from the dangers of the night. Thus it was prophesied of the cities of Ammon, Aroer, and Judaea that they should be couching-places for flocks (Ezek. xxv, 5; Isa. xviii, 2; xxxii, 14). But Babylon was to be visited with a far greater desolation, and to become unfit even for such a purpose (Isa. xiii, 19). The peculiar expression in Psa. lxvii, 13, "Though ye have lien among the pots," or, according to J. D. Michaelis, "drinking-troughs" or "water-troughs," would be better rendered, "Though ye have lien among the flocks." See Foss. To lie among the flocks, says Gesenius, seems to be originally of shepherds who married women living in leisure and quiet. In John x, 16, the Jews and Gentiles are represented under the image of two different flocks enclosed in different folds. See Sheep.

Follen, Charles Theodore Christian, LL.D., III.—20

a Unitarian minister, was born at Romrod, Ilceased Darmstadt, September 4, 1876. He was educated at the Gymnasium and University of Giessen, which last he entered in 1818. After the battle of Leipzig he was dismissed from the Roman law in Jena; but he had incurred the hatred of the government for his advocacy of freedom, and in 1830 he retired to Switzerland. In 1831 he was appointed lecturer at the University of Basel, but in 1824 the governments of Russia, Prussia, and Austria demanded his surrender as a political prisoner. He was advised to depart, and, after various adventures and escapes, reached New-York January 12, 1825. He was soon after appointed professor in the man at Harvard, and in 1828 was made professor of Church History in the theological school at Cambridge. He engaged at an early period with all his heart in the American anti-slavery movement, a course which alienated some of his friends, and hindered his advancement. He finally became pastor of a Unitarian church in East Lexington, Mass. On the night of Jan. 18, 1840, he perished in the burning of the steamer Lexington in Long Island Sound. He was a thorough scholar, and a man of the purest principles, and of courageous decision to act on his convictions. His writings were published after his death by his widow, under the title, The Works of Charles Follen, with a Memoir of his Life (Bost. 1841, 5 vol., 12mo).—Christian Examinor, 1842, p. 33; Sprague, Unitar. Phys., p. 588.

Folly. See Fool.

Fonseca, Pedro da, a Jesuit and metaphysician, was born at Cortizada, Portugal, 1628. He entered the order in 1548, and in a few years was made professor of philosophy at Coimbra, and afterwards professor of theology at Evora. He obtained the name of the "Portuguese Aristotle." He stood high in the favor of king Philip II and of pope Gregory XIII. He died Nov. 4, 1599. He was the first who publicly taught the doctrine relative to the divine prescience known as scientia media, and which was discussed long and curiously between the adherents of Molina (who was a pupil of Fonseca) and the Dominican Jean PRESCIENCE. Among his works are Commentarii in Aristotelis (4 vol., often reprinted):—Institutiones Dislectitios (Lissieux, 1664).—De concord. providentia et gratiae Dei cum libero arbit. hom. (Lissieux, 1688).—Hoefer, Nouv. Biog. Générale, xviii, 81.

Font (baptismal), the vessel containing the water for baptism. It was for some time the custom to baptize in or near flowing streams of water. Then baptisteries were erected outside of churches. Properly

Font, Swaton, Lincolnshire, 1319 (Chamber).
speaking, the baptistery was the building in which baptism was performed; and the vessel in which it was performed was called in Greek σακρατήριον, in Latin piscin. At a later period the vessel for baptism was placed in the church, and called font, fount or fountain. Fontana finally came to be generally made as vases of stone, elevated three or four feet from the floor, supported by a stone standard, and usually placed before the altar. They were frequently lined with silver, lead, or brass, and were usually adorned with ornamental work in the same style as the church itself, or with bas-reliefs of scriptural scenes. In form, the early fonts were sometimes round, and sometimes built in the shape of a cross or of a tombstone (Rom. vii). At first fonts were covered simply with a lid. These were later enlarged into high and highly-ornamented pilasters or spires. —Bingham, Orig. Eccles. bk. viii, chap. vii; Parker, Glossary of Architecture, a. v.; Martigny, Dictionnaire des antiquités Christianes.

Fonte Avellana, Order of, a monastic order of the Roman Catholic Church. The name is derived from the desert of Fonte Avellana, near Fieschi, where the first monastery of the order was established in 1001 by Ludolph, subsequently bishop of Eugsulph. The best known member of this order is the abbot Peter Damiani (q.v.), under whom it made considerable progress. Little is known of its subsequent history, except that it greatly degenerated. In 1570, cardinal Jules de la Rovere, who had been appointed pope Pius V abbot in commendam of the abbey of Fonte Avellana, caused the monks to unite with the Camaldulenses.—Helyot; Migne, Dict. des Ordres Religieux, s. v. Fonte-Avellana.

Fontein, Piet, was born in 1708. He enjoyed the instructions of the celebrated Tiberius Hemsterhuis and Albert Schultena. His taste for the literature of antiquity was developed under their able tuition. His first charge was a Baptist congregation in Rotterdam, to which he was called in 1792. Here he labored seven years. From this field of labor he was transferred to a similar one in Amsterdam, where he remained till his death, which occurred in 1788 or 1789. The literary taste acquired in early life he continued to cultivate. He became an uncommon proficient in Greek and Roman literature. He edited the Characteres Ethici of Theophrastus according to a Florentine MS. He was on terms of friendly intercourse with the most eminent scholars of the age. His library, containing the best editions of the Greek and Roman classics, and enriched with the stores of patriotic, theological, and philosophical literature, was bequeathed to the Baptist church in Amsterdam. By this bequest, which served for the foundation of the valuable library of the Baptists in that city, he conferred a great and lasting benefit on the cause of theological education. See Glauzius, Godgeleerd Nederland; Deel, bl. 470; also Blaupoot ten Cats, Geschiedenis der Doopsgezinden in Holland enz. ii Deel, blz. 186 var.; S. Muller, Geschiedenis van het onderwijs in de theologie by de Nederl. Doopsgezenden, blz. 70. (J. P. W.)

Fontenay, Pierre Claude, a Jesuit, was born at Paris in 1688. He became rector of the college at Orleans, but was recalled to Paris to continue Longueil's Histoire de l'Eglise Gallicane, of which he wrote vols. ix, x. He died at Le Fleche, Oct. 15, 1742.---Migne, Dict. de Biog. Chrét. Histoire, s. v.

Fontevraud, Order of, Ordo of (Ordo Fratrum Ebrolicorum), a monastic order of the Roman Catholic Church, founded at the close of the 11th century by Robert of Arbrissel [see Arbrissel], who in the forest of Ceson united a number of hermits under the rule of St. Augustine. The number of members rapidly increased, and Arbrissel had to establish several convents for men and women. The latter were divided into three different establishments, namely, 1 (Le Grand Monier), for virgins and widows; 2 (St. Lazarus), for lepers and other sick people; 3 (St. Magdalen), for fallen women who wished to reform. The whole order was devoted to the glorification of the Virgin Mary, and the men of the order were placed under the supreme jurisdiction of the abbeys of Fontevraud, who became the general of the whole order. Wernede, a relative of the duke of Brittany, was the first abbot; Petronella, baronness of Chémillé, her assistant. The order was confirmed by pope Paschal II (in 1106, and again in 1115). After the death of the founder, the number of convents gradually rose to about sixty, all of which, with the exception of a few in Spain and England, were in France. The history of the order presents no facts of importance; it soon degenerated to an even higher degree than the majority of the medieval orders. Attempts to reform it were made by the abbesses Marie of Bretagne (1477), Renate of Bourbon.
FOOD (1807), and Antonette of Orleans (1751 to 1808), but they had no lasting results. The whole order perished during the French Revolution; the last abbess, Julie Sophia Charlotte de Pardaillan, died in Paris in 1799. No attempt has since been made to revive it. — Wezet and Kappel, *Krebse*, iv. 109; Helvét (ed. Migne), *Ordores Religiosi*, n. v.; Honore Narcisse, *Hist. de l'Ordre de Fonti* (Angers, 1856). (A. J. S.)

Food (represented by several Heb. and Gr. words [especially some derivative of the verb αὐδᾶν, to eat], which are variously rendered in the A. V.). Compare VICTUALS.

I. Materials.—The original grant of the Creator made over to man the use of the vegetable world for food (Gen. i, 29), with the exception of the tree of the knowledge of good and evil (Gen. iii, 22), and, as somehow hold, also, the tree of life (iii, 22). So long as man continued in Paradise, he doubtless restricted his choice of food within the limits thus defined; but whether, as is commonly stated, we are to regard this as characteristic of the entire period between the creation of Adam and the Fall, is problematic. It is most interesting to note (Gen. ix, iii) that the very act of eating the forbidden fruit (Gen. iii, 6) shows us an indifferent attitude towards the use of food. It is doing no violence to the passage last cited to view it rather in the light of an ordinance intended to regulate a practice already in use, than as containing the first permission of that practice; and when we consider that man is, by his origin, the most carnivorous of all the animals good to be eaten by man, it is evident that the restriction was as early as the agricultural occupation among men, it seems more probable than otherwise that the use of animal food was not unknown to the antediluvians. Perhaps, some fruits and vegetables were determined by the use of raw flesh, such as Bruce found in his day among the Abyssinians, and such as Moses glances at (Exod. xii, 9), may have prevailed among the more barbarous and ferocious of the antediluvians; and it may have been in order to check this that the command against eating flesh was made to Noah. It is not, however, to be overlooked that, in the traditions of antiquity, the early age of the world was represented as one in which men did not use animal food (Diod. Sic. i. 43; ii. 88; Ovid, *Metam.*, i. 101 sq.; xv. 96 sq.; *Paus.* iv. 205 sq.).

In the use of the food of the ancestors of the Hebrews comprised the flesh of animals both tame and wild, as well as the cereals. We read of their using not only cakes of fine meal, but also milk and butter, and the flesh of the calf, the kid, and game taken by hunting (Gen. xxviii, 6-8; xxvii, 8, 4). They used also leguminous food, and a preparation of lentils seems to have been a customary and favorite dish with them (Gen. xxv, 84). They made use also of honey (either honey of bees or sirup of grapes), spices, nuts, and almonds (Gen. xxiv, 11).

2. Egypt. Egypt the Israelites shared in the abundance of that land; there they "eat by the flesh-pots, and did eat bread to the full" (Exod. xvi, 8); and amid the privations of the wilderness they remembered with regret and murmuring "the fish which they did eat in Egypt freely (the abundance of fish in Egypt, at least, is suggested)" (Gen. xviii, 8). The Hebrews, *De Nat. Anim.* x, 45, the cucumbers and the melons, and the leeks, and the onions, and the garlic" (Num. xi, 5). These vegetable products have always formed an important part of the food of the people of Egypt; and the abundant use also of animal food is sufficiently attested by the monuments (Wilkinson, *Anc. Egypt. II*, 867-874).

In their passage through the wilderness, the want of the ordinary materials of food was miraculously supplied to the Israelites by the manna. As it was of importance that their flocks and herds should not be wholly consumed or even greatly reduced before their entering on the promised land, they seem to have been placed under restrictions in the use of animal food, though this was not so toward the Gentiles (Deut. xvii, 8 sq.), and when their longing for this food broke out into rebellious murmurs, a supply was sent to them by means of large flocks of a species of partridge very much in use in the East (Exod. xvi, 11-15; *Numb.* xi, 51; comp. *Deut.* xii, 60).

When they reached the promised land, "the land flowing with milk and honey," abundance of all kinds of food awaited the favored people. The rich pasture-lands of Palestine enabled them to rear and maintain large flocks and herds; game of various kinds was abundant in the more mountainous and uninhabited districts; fish was largely supplied by the rivers and inland seas, and seems to have been used to a considerable extent (2 Chron. xxxiii, 14; Neh. iii, 8; Matt. vii, 10; xiv, 17; xv, 8; Luke xxi, 42; John xxi, 4-6), so that the destruction of it was represented as a special judgment from God (Isa. i, 14; Jer. vii, 8; Zeph. i, 8). See FisH. In the Mosaic code express regulations are laid down as to the kinds of animals that may be used in food (*Lev.* xi, *Deut.* xiv). Those expressly permitted are, of beasts, the ox, the sheep, the goat and the roebuck; of birds, the wild goat, the pygarg, the wild ox, the chamois, and, in general, every beast that parteth the hoof and cleaveth the cleft into two claws (that is, where the hoof is completely parted, and each part is separately cased in bone), and cheweth the cud; of fowl, all that have scales and fins; of fishes, all clean birds, that is, all except the carnivorous and piscivorous birds; of insects, the locust, the bald locust, the beetle, and the grass-hopper. Whether the Hebrews attended to the rearing of gallinaceous fowls remains a matter of doubt. See COCK.

Besides animals declared to be unclean, the Israelites were forbidden to use as food anything which had been consecrated to idols (Exod. xxxiv, 13); animals which had died of disease or been torn by wild beasts (*Exod.* xxii, 31; *Lev.* xxii, 8; *comp. Ezek.* iv, 14), and certain parts of animals, viz. the blood (*Lev.* xxvii, 10; xix, 26; *Deut.* xii, 15-23), the fat covering the intestines, the kidneys, and the fat covering them, the fat of any part of the ox, sheep, or goat, especially the fat tail of certain sheep (*Exod.* xxii, 18-22; *Lev.* iii, 4-8; io, 19). They were also forbidden to use any flesh of swine, or any thing that creepeth upon the earth, and also the body of any unclean beast had fallen, as well as all food and liquids which had stood uncovered in the apartment of a dead or dying person (*Numb.* xix, 15). The eating of a kid boiled in the milk or fat of its mother was also prohibited (*Exod.* xxiii, 19; *xxxiv, 26; *Deut.* xiv, 21). These restrictions rested chiefly, doubtless, on religious and theocratic grounds [see FAT], but for some of them reasons of a sanitary kind may also have existed. It belonged to the essence of the theocratic system that the people should be constantly surrounded by what reminded them of their separation to Jehovah, and the need of keeping themselves free from all that would lower or distort the distinction between them and the nations around them. For this reason specific restrictions were laid upon their diet, which were not attended to by other nations, nor even by the Israelites themselves, who were swarming with strangers dwelling within their bounds (*Deut.* xiv, 21). This does not, however, preclude our admitting that reasons of a social or political kind may also have conspired to render these restrictions desirable. In warm climates, where avoiding contact with foreigner was the utmost caution necessary in handling whatever may have been exposed to the influence of a corpse; and it is well known that the use of adipose matter in
FOOD

food requires, in such climates, to be restricted within narrow limits. The peculiar prohibition of a kid boiled in its mother's milk was ordained probably for the purpose of preserving confused and to some idolators, or for the purpose generally of encouraging human feelings on the part of the Israelites towards their domesticated animals (Spencer, De Legg. Hebr. 

[Continued on page 612]
FOOD

the fat are removed, the nerves and veins extracted, and strict search is made lest any drop of blood should be allowed to remain in any part (Buxtorf, *Syn. Jud. ch. xxvii*). The flesh, thus prepared for cooking, was commonly boiled in water (חָמָה, Piel of בָּעָה), probably also sometimes in milk, as is still the case among the Arabs. Before being put into the pot, the flesh, freed from skin, appears, from above cut into small pieces, or perhaps this was done during the process of cooking (Mic. iii. 3; comp. Hitzig, ad loc.). The broth and the flesh were served up separately (Judg. vi. 15), and both were eaten with bread. Salt was used to season the food; spices were also occasionally introduced. A dish thus prepared was sometimes prepared (Ezek. xxiv. 10; Gen. xxvii. 4; Prov. xxix. 3). For boiling, the pot or caldron was used; and the fuel was usually common wood, especially thorns (Eccles. vii. 6; Ps. lvi. 9; Isa. xlv. 16; Ezek. xxiv. 10); sometimes the dried excrement of animals (Ezek. iv. 15), a species of fuel still much used in the East (Iris and Mangues’s *Travels*, p. 173; Rae Wilson’s *Travels*, ii. 156; Huc’s *Travels*, passim). Food was also prepared by roasting (יְבָשָׁה). This was regarded as the more luxurious mode of preparation, and was resorted to chiefly on festive occasions. The paschal lamb was to be roasted whole (Exod. xii. 4, 6), but it does not appear that this was the usual method of roasting flesh; it is more probable that the ancient Hebrews, like the modern Arabs, roasted their meat in small portions by means of short spits of wood or metal placed near the fire, and turned as the process of cooking required (comp. Odys. iii. 461-2, etc.; IL i. 465, etc.). Birds were roasted whole on such a spit. The Persians roast lambs and calves entire by placing them in an oven (Tavernier, i. 269; Charldin, iii. 88), and this may also have prevailed among the Hebrews. Among the poor, locusts were eaten roasted, as is still common among the Arabs, whose method of cooking locusts is as follows: the legs and wings having been plucked off, and the entrails taken out, the body is salted, and then roasted by means of a wooden spit, on which a row of bodies similarly prepared are strung. Fish were usually broiled (Luke xxiv. 42; John xxi. 5), but it would seem that they were sometimes cured, or at least brought into a state in which they could be used without further cooking (Matt. xiv. 17, 19; xv. 34, 36). In either case they were eaten with bread.

In primitive times the mistress of the house presided over the cooking of the food, as the master of the house charged himself with the slaughtering of the animals (Exod. xii. 6; Gen. iv. 22; comp. IL xxiv. 622, and Odys. ii. 300). Among the Egyptians, servants who were professional cooks took charge of preparing the food (Wilkinson, *Anc. Egyptians*, II, 882 sq.); and in later times among the Hebrews similar functionaries were employed, both male and female (נְתַנְתַּת, 1 Sam. ix. 30, 34; נְתַנְתִּית, 1 Sam. vi. 33). The culinary utensils were נִמְשָׂא, a deep pan (Num. xii. 8; Judg. vi. 19; 1 Sam. ii. 14); נָעָשׁ, נָעָשׁ כַּלְעֻדִּים, a basin or basin (Exod. xxx. 18; 1 Sam. ii. 14; נָעָשׁ, נָעָשׁ כַּלְעֻדִּים, an iron pan; נָעָשׁ, נָעָשׁ כַּלְעֻדִּים, a frying-pan (Lev. ii. 5, 7; vi. 9); נָעָשׁ, a basin; נָעָשׁ, a basin with which is drawn from the pot (1 Sam. ii. 18, 14), and perhaps the flesh separated from the bones in the pot (Mich. iii. 8); דָּמַד, a word of doubtful significance, rendered by the Sept. ψυχορρατικος (Lev. xi. 84), by the SYR. *place of pots*, by Genesis *range for pots*, by *First hearth* for cooking, consisting of two rows of stones meeting at an angle, by Rosenmüller a place in the heath under which was fire, and on the surface of which pots have been cut into, and placed, and by Knobel an earthenware stew-pan (Ravins, *De re ephoriaria et Heb. Traj.* ad Rhem. 1708; Pareus, *Antiq.*).

FOOT

Food, Spiritual, "an expression found in two places in the 'Order for the Holy Communion' in the English Church service, to signify the sustenance which the soul receives from the sacrifices of the flesh and blood, that is, the outward substance of the body of man ("for the blood," says Moses, "is the life") to atone for the sins of the world, and to redeem us from everlasting death. Some have maintained from those words of our Lord, 'This is my body,' that the literal, material flesh and blood of Christ are, in some sense, actually received in the communion; but others see clearly that the Church of England, at least, has taken special pains to guard against and exclude such a notion, both in the above passages, and by the language of the 38th Article of Religion. The opponents of the 'material' view contend also that literal flesh and blood 'cannot be spiritually received,' or 'refresh the soul.' See *Transubstantiation.*

Food (represented by several Hebrew and Greek words, especially בָּשָׁה, נָעָשׁ, דָּמַד). The "fool" of Scripture is not an idiot, but an absurd person; not one who does not reason at all, but one who reasons wrong; also any one whose conduct is not regulated by the dictates of reason and religion (Psas. xiv. 1). Foolishness, therefore, is not a negative quality, but a condition of wrong action in the intellectual or sentient being, or in both (2 Sam. xii. 12, 13; Ps. xxxviii. 5). In the book of Proverbs, however, "foolishness" appears to be sometimes used for lack of understanding, although more generally for perverseness of will. The phrase "fool is wise" (Matt. x. 22) implies not only angry temper, by which such severe language is prompted, but a scornful, contemptuous feeling, utterly inconsistent with the love and meekness which characterize disciples of Christ, and of course exposing the individual who is under its influence to eternal punishment. See *Wisdom.*

Fools, Feast of. See *Feast of Fools.*

Foot (properly פָּשָׂא, re'gel, νοῦς). Of the various senses in which the word "foot" is used in Scripture, the following are the most remarkable. Such phrases as the "slipping" of the foot, the "stumbling" of the foot, "from head to foot" (to express the entire body), and "footsteps" (to express tendencies, as when we say of one that he walks in another's footsteps), require no explanation, being common to most languages.

The extreme modesty of the Hebrew language, which has perhaps seldom been sufficiently appreciated, dictated the use of the word "feet" to express the parts and the acts which it is not allowed to name. Hence such phrases as the "hair of the foot," the "water of the foot," etc. "To be under any one's feet" denotes the submission of a subject to his sovereign, or of a servant to his master (Psal. viii. 6; comp. Heb. ii. 8; 1 Cor. xii. 26); and was doubtless derived from the symbolic action of conquerors, who set their feet upon the neck or body of the chiefs whom they had vanquished, in token of their triumph. It is expressed in similar terms in Scripture (Josh. x. 28), and is figured on the monuments of Egypt, Persia, and Rome. See *Triumph.*

In like manner, "to be at any one's feet" is used for being at the service of any one, following him, or willingly receiving his instructions. The last passage, in which Paul is described as being brought up "at the feet of Gamaliel," will appear still clearer if we understand that, as the Jewish writer
allege, pupils actually did sit on the floor before, and therefore at the feet of, the doctors of the law, who themselves were raised on an elevated seat. See Disci-pline.

1 Lameness of feet” generally denotes affliction or calamity, as in Psa. xxxv, 15; xxxviii, 18; Jer. xx, 10; Micah iv, 6, 7; Zech. iii, 9. See Lamn.

2 To set one’s feet” in a place signifies to take pos-
session of it, as in Deut. i, 36; x, 34, and elsewhere.

3 To water with the feet” (Deut. xi, 10) implies that the soil was watered with as much care as a garden, in which case the channels for irrigation may be turned, etc., with the foot. See Garden.

An elegant phrase, borrowed from the feet, occurs in Gal. ii, 14, where Paul says, “When I saw that they walked not uprightly, one of your sect (literally, “not with a straight foot”), or “did not foot it straightly.”

Naked feet were a peculiarity of the period (Isa. ii, 22).

This must mean appearing abroad with naked feet, for there is reason to think that the Jews never used their sandals or shoes within their doors. The modern Orientals consider it disrespectful to enter a room without taking off the outer covering of their feet. It is with them equivalent to uncovering the head among Euro- peans. The practice of feet-washing implies a similar usage among the Hebrews. See Abolution; Washing. Uncovering the foot was also a mark of adora-
tion. Moses put off his sandals to approach the burning bush where the presence of God was manifested (Exod. iii, 5). In keeping the modern Oriental and as regards the height of profanation to enter a place of worship with covered feet. The Egyptian priests of-
secrated barefoot; and most commentators are of opin-
on that the Aaronite priests served with bare feet in the tabernacle, as, according to all the Jewish writers, they afterwards did in the Temple, and as the frequent washings of their feet enjoined by the law seem to imply. See Sandals.

The passage, “How beautiful upon the mount-
tains are the feet of him that bringeth glad tid-
ings,” that published as a psalm, appears to signify that, although the feet of messengers and travellers are usually rendered disagreeable by the soil and dust of the way, yet the feet of these blessed messengers seemed, notwithstanding, even beautiful, on account of the glad tidings which they bore.

Foot. Joseph Ives, D.D., a Presbyterian minis-
ter and writer, and member of Washington College, Tenn., was born at Watertown, Conn., Nov. 17, 1790. He entered Union College in 1821. Having passed through the usual theological course at Andover, he was li-
censed in 1824, and ordained as an evangelist, when he went to South Carolina, and labored successfully for some months. Returning to New England, he preached for some time at Boston, and at a later period was called to the Congregational church at West Brookfield, Mass. From this charge he obtained a dismissal in 1831 on account of ill health, and in 1833 accepted a call from Salina, N. Y., where he continued for about a year, and then accepted a call to Corland, N. Y., where he opposed with much ability the system of perfectionism then prevalent, on which he wrote an able article in the Literary and Theological Review (1844).

In 1835 he removed to Westport, Conn., and while there he joined the Presbyterian Church, with which he remained connected during his life. In 1839 he accepted a call to the Presbyehian church of Knox-
ville, Tenn. He was connected with the Presbyte-
ries of Bedford and Geneva, and with the Old-school Church, and while at Knoxville was elected to the presidency of Washington College. He was on his way to be inaugurated as president of the college when he was killed by a fall from his horse, April 20, 1840. He published The prominent Triad in Teachers of false Religion (1839);—A Historical Discourse (1839);—Ser-
mons on Insubcerence (1839)—Three Sermons on Per-
fec tionism (1834). A Memoir, with a selection from
his MS. sermons, was published by his brother (1841, 5vo).—Sprague, Aminals, iv, 669.

Foot, Kissing of the Pope’s. The kissing of the feet of rulers was an Oriental mode of testifying reverence or submission. It was also done in the West to some, at least, of the Roman emperors: Diodorean is said to have had gems fastened to his shoes, that the honor of kissing his feet might be more willingly paid. It was introduced as a sign of reverence for the pope at Rome at some date not precisely known. In de-
ference of this practice, the Roman writers adduce an early usage of the sort in favor of all bishops; but it was kissing of the hand, not of the foot, that seems to have been the usage (Bingham, Orig. Eccles, bk. ii, ch. ix).

The first example of an emperor kissing the pope’s feet is that of Justin with the foot of pope John I. A.D. 525. It is now practised (1) after the election of a new pope, when all the cardinals kiss his foot; (2) on the election of a new cardinal, when he kisses the pope’s foot, formally, in sign of homage and submis-
sion; (3) at public audiences of the pope, when per-
sons presented kiss his foot. Protestants are not re-
quired to perform this homage when presented. A crucifix is fastened to the slipper, that the act of adora-
tion may be interpreted as paid to Christ in the per-
on of his so-called vicar.

Footman. A word employed in the A.V. in two senses. See Runner. 1. Generally, to distinguish those of the people or of the fighting-men that went on foot from those who were on animals or in chariots. The Hebrew word for this is דָּגָל, dagel, from root, a foot. The Sept. commonly expresses it by περιοι, or occasionally πωσα, (2 Sam. x, 6; Jer. xii, 5), or those simply who journeyed on foot, whether soldiers or not (Exod. xii, 37; Numb. xii, 21). In the latter case the word perhaps indicates the male portion of the company, those who walked while the females rode, like the Arabic royal, a man. Sometimes it is joined with פָּנָי, a man (Jugd. xx, 2). See Army; Rider.

2. The word occurs in a more special sense (in 1 Sam. xxii, 17) as the translation of a different term, רֹעֵס, part. of גָּרָה, to run. This passage affords the first mention of the existence of a body of swift runners in attendance on the king, though such a thing had been previously alluded to by Sackbel (1 Sam. viii, 11). This body appears to have been afterwards kept up, and to have been distinct from the body-guard—the six hun-
dred and the thirty—who were originated by David (see 1 Kings xiv, 27, 28; 2 Chron. xiii, 10, 11; 2 Kings x, 4, 6, 11, 12, 19). In each of these cases the word is rendered “guard” but the translators were evi-
dently aware of its signification, for they have put the word “runners” in the margin in two instances (1 Kings xiv, 27; 2 Kings xi, 18). This, indeed, was the force of the term “footman” at the time the A.V. was made, and was never quoted, but, among others, from the title of a well-
known tract of Bunyan’s, The heavenly Footman, or A Description of the Man that goes to Heaven, on 1 Cor. ix, 24 (the apostle Paul’s figure of the race). The same Heb. word is also used as a where to denote not the ordi-
nary or priestly guard (2 Sam. xv, 1; 1 Kings i, 5; 2 Kings x, 25). Whether they were the same as the Pedileths is doubtful. The word likewise occurs (Job ix, 22) of any swift messenger, hence a weaver’s shuttle (Job v, 7), and also of the couriers of the Persian king (Ezra iii, 15; viii, 14). Swift running was evidently a valued accomplishment of a perfect war-
rior—a gáboor, as the Hebrew word is—among the Is-
raelites. There are constant allusions to this in the Bible, though obscured in the A.V. from the transla-

FOOTSTEPS 615  FOOT-WASHING

tors not recognising the technical sense of the word *gibbor*. Among others, see Psa. xix, 5; Job xvi, 14; Joel ii, 7, where "strong man," "giant," and "mighty man" are all *gibbor*. David was famed for his *palmis", but these are more mythological. The most characteristic of him (I Sam. xiv, 22, 48, 51; xxv, 6), and he makes them a special subject of thanksgiving to God (2 Sam. xxi, 80; Psa. xxi, 29). The cases of Cush and Ahimaaz (2 Sam. xvi) will occur to every one. It is not impossible that the former—"the Ethiopian," as his name most likely is—had some peculiar custom of running. See CUSH. Ashbel also was "swift on his feet," and the Gadite heroes who came across to David in his difficulties were "swift as the roes upon the mountains;" but in neither of these last cases is the word *ruts* employed. The word probably derives its modern sense from the custom of domestic servants running by the side of the carriage of their master. See GUARD.

Footsteps (generally לְפָעָמָה, *pa' am`, a tread; but spec. לְפָעָמִים, *aweb*; Psa. i, 6; lxvii, 19; lixxix, 51; Cant. i, 8, the *aweb*, as elsewhere rendered). On the meaning of this term in Psa. xvi, 5, 11, Mr. Roberts says, among the Hindus, "a man who has the people watching him, to find out a cause for accusation against him or to trap him, or go great men, says. Yes, they are around my legs and my feet; their eyes are always open; they are ever watching my *swaada*, steps; that is, they are looking for the *impress or footsteps in the earth." For this purpose, the eyes of the enemies of David were "bowing down to the earth."

Footstool (spec. לְפָדִים, *be'ash", something trodden upon; Sept. βροικόν, r. βροίκων, Vulg. oedaculam, 2 Chron. ix, 16). Where sitting is referred to in Scripture, it is frequently spoken of as a posture of more than ordinary state, and means sitting on a throne, for which a footstool was necessary, both in order that the person might ascend to it, and for supporting the legs when he was placed in it (2 Chron. ix, 16). The divine glory which resided symbolically in the holy place, between the cherubim above the ark of the covenant, is supposed to use the ark as a footstool (1 Chron. xxviii, 2; Psa. cxl, 5; cxxxii, 7). So the earth is called God's footstool by the same expressive figure which represents heaven as his throne (Psa. cxl, 1; Matt. xxv. 31). We find, on the paintings in the tombs of Egypt, as well as on the Assyrian monuments, frequent representations of their kings sitting on a throne or chair of state, with a footstool. See THRONE. The common manner of sitting in the East is upon a mat or carpet spread upon the ground, with the legs crossed. Many of the Turks, however, through European intercourse, attempt to sit upon chairs. See DIVAN.

Foot-washing. The custom of washing the feet held, in ancient times, a place among the duties of hospitality, being regarded as a mark of respect to the guest, and a token of humble and affectionate attention on the part of the entertainers. It had its origin in the most ancient Eastern. In general, in warm Oriental climates, cleanliness is of the highest consequence, particularly as a safeguard against the leprosy. The East knows nothing of the factitious distinctions which prevail among us between sanitary regulations and religious duties; but the one, as much as the other, are considered a part of that great system of obligations under which man lies towards God. What, therefore, the health demands, religion is at hand to sanction. Cleanliness is, in consequence, not next to godliness, but a part of godliness of training; this Oriental view may be seen in the origin and reason of much of what the Mosaic law lays down touching clean and unclean, so the practice of foot-washing in particular, which considerations of purity and personal propriety recommended, hospitality adopted and religion sanctioned. In temperate climates bathing is far too much neglected; but in the East the heat of the atmosphere and the dryness of the soil would render the ablation of the body peculiarly grateful than salutary to the weary traveller. The foot, too, was less protected than with us. In the earliest ages it probably had no covering, and the sandal worn in later times was little else than the sole of our shoe bound under the foot. Even this defence, however, was usually only of cloth, and, therefore, the foot was usually bare, in which the inmates were either barefoot or wore nothing but slippers. See SHOE.

The washing of the feet is among the most ancient, as well as the most obligatory of the rites of Eastern hospitality. From Gen. xviii, 4; xiv, 2, it appears to have existed as early as the days of the patriarch Abraham. In Gen. xvii, 42, also, "Abraham's servant" is provided with water to wash his feet, and the men's feet that were with him. The same custom is mentioned in Judg. xix, 21. From 1 Sam. xxvii, 41, it needful, how much less it was sometimes performed by servants and sons, as their appropriate duty, regarded as of an humble character. Hence, in addition to its being a token of affectionate regard, it was a sign of humility. Vessels of no great value appear to have been ordinarily kept and appropriated to the purpose. These vessels of water were in nothing in estimation so lowly, if not mean office for which they were employed. Hence, probably, the explanation of Psa. ix, 8, "Moab is my wash-pot." Slaves, moreover, were commonly employed in washing the feet of guests. The passage, then, in effect, declares the Moabites to be the meanest of God's instruments. See WASH-BASIN.

The most remarkable instance of this custom is found in the 18th chapter of John's Gospel, where our Saviour is represented as washing the feet of his disciples, with whom he had taken supper. Minute particulars in the sacred narrative are to be carefully studied, as presenting a true Oriental picture. From ver. 12 sq., it is clear that the act was of a symbolical nature, designed to teach, à fortiari, brotherly humility and good-will. If the master had performed for his scholars an act at once so lowly yet so noble, the disciples were the disciples of love and service bound to consider any Christian service whatever as a duty which each was to perform for the other. The principle involved in the particular act is, that love dignifies any service; that all high and proud thoughts are no less unchristian than selfish; and that the sole ground of the success of the Church is meekness, gentleness, and self-forgetting benevolence. It was specially customary in the days of our Lord to wash before eating (Matt. xv, 2; Luke xi, 88). This was also the practice with the ancient Greeks, as may be seen in Herod. x, 9. From Martial (Epig. iii, 50, 2, "Deposui solseas"), we see it was usual to lay aside the shoes, lest they should roll the linen. The usage is still found among the Orientals (Niebuhr, i, 54; Shaw, p. 202). But Jesus did not pay a scrupulous regard to the practice, and hence drew blame upon himself from the Pharisaes (Luke xvi, 39). In like manner Peter was probably influenced by the superstitious abuses and foolish misinterpretations connected with washing before meat. For the same reason he may purposely have postponed the act of washing his disciples' feet till after supper, lest, while he was teaching a new lesson of humility, he might add a sanction to a part of that great system of obligations under which man lies towards God. What, therefore, the health demands, religion is at hand to sanction. Cleanliness is, in consequence, not next to godliness, but a part of godliness of training; this Oriental view may be seen in the origin and reason of much of what the Mosaic law lays down touching clean and unclean, so the practice of foot-washing in particular, which considerations of purity and personal propriety recommended,
The Church of England at first carried out the letter of the command; but, instead of it, there are now assembled in Whitehall every year as many poor men and women as the sovereign has reigned years; to each of the walls of the Temple they set many pieces of money as the sovereign counts years. The Anabaptists continued the practice of foot-washing, which, in consideration of the passages John xiii, 14; 1 Tim. v, 10, they considered as a sacrament instituted and recommended by Christ (see the Confessio Anglicana, or ceremonies, of 1609). The La terans Upper Constable of Dresden condemned in 1718 twelve Lutheran citizens of Weida to public penance for having permitted duke Moritz Wilhelm to wash their feet. As the Moravians revived the old love-feasts, the practice revived there; but somewhat strictly enforcing it. It was used to be performed not only by the leaders towards their followers, but also by the latter among themselves, while they sang a hymn explanatory of the symbol, in which it was called "the lesser baptism." The Mercenaires (q. v.) and the River Brethren (q. v.) still practice foot-washing. The Church of God (q. v.) regards foot-washing as a positive ordinance of perpetual standing in the Church, the same as baptism and the Lord's Supper.—Herzog, Real-Encyklop. iv, 680.

Forbes, Rt. Hon. Duncan, one of the most eminent lawyers of Scotland, was born at Drumchapel in 1740. He was educated at the University of Edinburgh, and afterwards spent some time at the universities in Leyden, Utrecht, and Paris. In 1717 he became solicitor-general, and in 1742 lord-president of the court of session. In the Rebellion of 1745 he espoused the Hanoverian cause, and it is said that the ingratitude of the government so charmed him that he fell a victim to fever produced by it. President Forbes cultivated the study of Hebrew and Biblical criticism. He was a follower of the English philosopher and theological writer John Hayton. In his work, Thoughts on Religion, natural and revealed (Edinb. 1785-86, 8vo), translated into French by father Houbigant, he lays down the doctrine that a system of natural science as well as religion could be drawn from the books of the O. T. if interpreted according to the radical import or root of the language. Forbes published also Reflections on the Sources of Incredulity with regard to Religion (Edinb. 1750, 2 vols. 12mo, or 1 vol. 12mo)—Letters to a Bishop concerning some Important Discoveries in Philosophy and Theology (Lond. 1755, 4to; also translated into French by father Houbigant). The entire works of Forbes, with a biographical sketch of the author prefixed by J. Bandel (Edinb. 1816, 8vo; 2 vols. 12mo). Bishop Warburton calls him the greatest man that ever Scotland produced, both as a judge, a patriot, and a Christian.—Encyclop. Brit. ix, 771; Allibone, Dict. of Authors, i, 611. (J. H. W.)

Forbes, Eli, D.D., a Congregational minister, was born at Westborough, Mass., Oct. 1726; graduated at Harvard College, 1741; and in 1758 became pastor of the church at Brookfield, Mass. In 1762 he went on a mission among the Oneida Indians. In 1776 he was installed as pastor at Gloucester, having left his former parish on account of a false charge of Toryism. He died Dec. 15, 1804. He published The Family Book (1801, 12mo), and a number of occasional sermons.

Sprague, Annals, i, 498.

Forbes, John (of Corse), son of Patrick Forbes, was born May 2, 1593. After studying at Heidelberg and Sedan, he was appointed professor of divinity in King's College, Aberdeen, in 1619. In the great struggle in Scotland between Presbyterianism and papacy, in 1627 he favored the latter, by moving at a general council to be a peaceable to publish Innumerous Amatorius Veritatis & Pacis in Ecclesia Scotiae (Aberdeen, 1629). In 1638 he published A Peaceable Warning to the Subjects of Scotland. Refusing to sign the Solemn League and Covenant, he was
deprived of his benefice in 1640. His case was one of peculiar hardship, for he had made over part of his own private property to be attached to the professorship which he held, and he lost this property on being deprived of it. In 1642 he went to Holland, married there, and remained three years. Returning to Scotland, he spent the remainder of his life on his estate at Corse, and died April 20, 1648. His reputation chiefly rests upon his great work Instructioe Historiae et Theologiae de doctrina Christiana et seu revelatione divina, ordinata et contraerata (Amst. 1645, fol.; Geneva, 1660, fol.; abridged by Arnold Montanus (Amst. 1663, 8vo). His collected works were published under the title Joannis Forbessii ad Corse Opera Omnia, inter quam plurima posthuuma, with Vita by Dr. Garden (Amst. 1702, 2 vols. fol.). His Instructioe is still a valuable work; its design was to show, in opposition to Bellarmin, the doctrinal agreement between the Reformers and the earlier fathers, and it formed a precursor of the modern works on the History of Doctrines. Bishop Burnet (Preface to Life of Beddoe) says that Forbes of Corse was a man "of much more extensive learning than his father (Patrick Forbes), in which, perhaps, he was excelled by none of that age. Those who shall read his book of Historical and Theological Institutions will not dispute this title with him; for it is so excellent a work, that, if he had been better known, his retirement had been chosen, and he had applied himself to his studies, and could have finished it by a second volume, it might, perhaps, have been the most valuable treatise of divinity that has yet appeared in the world." Baur names Forbes and Petavius as the two great writers of the 17th century on History of Doctrines. — Encyc. Britonicum, ix. 778; Nicot, Memoires pour servir, etc., t. xiiii; Donaldson, History of Christian Literature, i. 66.

Forbes, Patrick, bishop of Aberdeen, was born of a noble family in Aberdeenshire in 1654, and became "laird of Corse" and baron of O'Neill. He was educated at Aberdeen and St. Andrew's. "For a good space," says bishop Keith, "he refused to enter into holy orders; but at last, when he was forty-eight years old, viz. anno 1612, he was prevailed upon—a very singular accident having intervened, which made him then yield, namely, the earnest obtestation of a religious minister in the neighborhood, who, in a fit of melancholy, had stabbed himself, but survived to lament his error." He became pastor of Keith, in Morayshire, where he remained until 1618, when he was elected bishop of Aberdeen, on the recommendation of the king. He died March 28, 1635. "He was wont to visit his diocese in a very singular and sedate manner, scorning any personation until he came to the church on the Lord's day; and according as he perceived the respective ministers to behave themselves, he gave his instructions to them." He wrote Commentarium in Apocalypse, cum Appendice (Amst. 1646, 4to); translated, An exquisite Commentary on the Revelation (Lon. 1613, 4to), a treatise entitled Escripciones de Verbo Dei; and a Dissertatio de Verbis impropriis. He was a great benefactor to Aberdeen University, of which he was chancellor, and he revived the professorships of law, physic, and divinity.—Keith, Historical Cosmography, vol. ii, 32; (Edinb. Diocese, 1812); Burnet, History of our own Times, Hook, Eccl. Bisc. v. 157.

Forbes, William, bishop of Edinburgh, was born at Aberdeen, 1635, and was educated at Marischal College. About the age of twenty he went abroad and studied at the German universities, especially Helm- stadt and Heidelberg. He returned after five years, and was offered the chair of Hebrew at Oxford; but he declined it, and entered on the service of Sir James Donaldson, of Monimusk, and afterwards at Aberdeen. About 1617 he was chosen principal of Marischal College in that city, and about 1619 he accepted a pastorate in Edin- burgh. When Charles I was in Scotland in 1638 he heard Forbes preach, and said that he had found a man who deserved to have a see erected for him. His pa- rent from the king, to the first bishop of Edinburgh, bears date the 26th of January, 1634, and he died April 18, 1667. In the same year, he published Modestus et pacificus controversius de justificacione, purgatorio, invocato sanctorum, which was published posthu- mously (Lond. 1638, 8vo; reprinted, with an English version, in the Library of Anglo-Catholic Theology, Ox- ford, 1656-60, 2 vols, 8vo). This work is a storehouse of learning on the subject of purgatory, without maintaining the Protestant doctrine of justification. It embodied a proposal for an accommodation between the Protestant Episcopal churches and the Church of Rome, the only result of which would have been to make episcopacy regarded with more suspicion in Scotland than it was. Some other polemical works of his which had raised high expectations were lost. Burnet, characterizing his eloquence, says that "he preached with a zeal and vehemence that made him forget all the means of time—two or three hours was no extraordinary thing for him" (English Cyclopaedia).—Hook, Eccles. Bisc. v. 156; Encyclopaedia Britannica, ix. 777.

Forcellini, Egidio, an Italian lexicographer, was born Aug. 26, 1668, at Fener, a village near Pa- dus. As his family was poor, it was only towards manhood that he was able to begin the regular course of studying Latin. Success in studying Latin gained the confidence of Facciolati (q. v.), who associated him with his labors, especially in preparing the Totius Latinitatis Lexicon, coniuncto et cura Jnc. Facciolati, opera et studi a badge Forcellini Lucarvatum (Padua, 1713). The excellence of this work, and the large amount of material attributed to Forcellini. He died April 4, 1768. See FACCIOLATI.

Forces (spec. בָּנָיו, cha'yi, strength, especially in a military point of view; hence, also, arma, fortifica- tion, etc.), in one phrase, "forces of the Gentiles" (Isa. ix. 5, 11), seems to be used in its widest sense (see Al- exander, ad loc.) to denote (as the context implies) not only the subjugation of the heathen, but also the con- secration of their wealth (Gen. xxxiv, 29, where the same Heb. word occurs). The בָּנָיו, מְפֹרֶקְנֵים, or god of strongholds, of Dan. xi, 38, is probably Mars, or rather Jupiter (Olympius or Capitoline), whom An- tocius (q. v.) specially honored. See DANIEL.

Ford (יוֹרָן, mabzar, and יְוֹרָן, mabarakh, a pane), a shallow place in a stream where it may easily be crossed by fording (Gen. 31, 26); by wading (Gen. 32, ii, 2; Judg. iii, 28; xii, 5, 6; Is. xvi, 2). See RV- ZR. The Heb. word is also used both in the singular and in the plural with reference to the mountain pass at Michmash, between Sheen and Bozez (1 Sam. xiv, 4, and Is. x, 29). Mention is repeatedly made of the fords of Jordan (Josh. ii, 7; Judg. iii, 28; xii, 5, 6; 1 A. V. "passages"). These were evidently in ancient times few in number, and well known, though now the Jordan is fordable in hundreds of places (Smith's Dict. of Classical Geog. s. v. Palestine, p. 321). See JORDAN. Of these, that named Bethabara (q. v.) was probably the most noted. Mention is also made of the ford of the Jabbok (Gen. xxxii, 22), and the fords of Arnon (Is. xvi, 2). See ARNON. The fords of the Euphrates (Jer. ii, 32) were probably the bridges across that river built by Nechoe, as the Euphrates was not fordable at Babylon (Hitzig, Erexet. Heb. ad loc.). See EUPHRATES.

Ford, Joshua Edwards, a Presbyterian minister, was born in Ogdenborough Aug. 8, 1825, graduated at Williams College in 1844, and studied theology at Union Theological Seminary, New York. In 1847 he became a pastor in the charge at Montauk, N. Y., and was a member of the American Board. His first station was Aleppo. He was afterwards transferred to Beirut, and subsequently to Sidon. Invited by the Turkish Mi- rions Aid Society, he spent some months in England III. — 209.
in 1861, advocating the claims of the Syrian Mission. In 1865 he returned to America on account of illness in his family, and labored earnestly in behalf of his mission; but his exertions enfeebled him, and he died of pneumonia at Genesee, N. Y., April 8, 1866. While in the East he obtained a thorough knowledge of Arabic, and could use it in preaching. He rendered useful service in editing Arabic books for the press, and wrote a book in that language on "Fasting and Prayer." He also used the Turkish language. — Wilson, Prebendary of Historical Almainac, 1867, p. 289.

Fordyce, David, brother of James, was born in 1711 at Aberdeen. In 1742 he was appointed professor of moral philosophy in Marischal College. He perished by shipwreck in 1751. He wrote Dialogues concerning Education: — Theodosia, a Dialogue on the Art of Preaching (London: 1755, 8d ed. 12mo) — Elements of Moral Philosophy (London: 1769, 4th ed. 12mo).

Fordyce, James, D.D., a Scotch divine, was born in 1720 at Aberdeen, was educated at Marischal College, and was successively minister at Brechin and Alloa, in Scotland, and at Monkwell Street, London. In 1782 he relinquished the pastoral office, and retired first to Hampshire and afterwards to Bath, where he died, Oct. 1, 1796. He wrote Sermons to Young Women (London, 3rd ed. 1778, 2 vols. 12mo) — Addresses to Young Men (London, 1777, 2 vols. 12mo) — Addresses to the Deity (London, 1785, sm. 8vo); and several single sermons, which were very popular. — Jones, Christian Biography, s. v.

Forehead ( phírì, ms. teach, from an obsolete root signifying to shine, Gesenius, Thes. Heb. p. 815; sirwisaw). The practice of veiling the face in public for women of the higher classes, especially married women, in the East, sufficiently stigmatizes with reproach the unveiled face of women of bad character (Gen. xxv, 65; Jer. iii, 8; Niebuhr, Trav. i, 182, 149, 160; Shaw, Travels, p. 228, 249; Haim, Von Transjordanien, p. 168; Buckingham, Arab Tribes, p. 312; Lane, Mod. Eq. i, 72, 229, 248; Burchard, Travels, i, 285). An especial force is thus given to the term "hard of forehead" as descriptive of audacity in general (Ezek. iii, 7, 8, 9; compare Juvelan, Sat. xiv, 242 — Ejectum atritis de fronte ruborem). See VILL.

The custom among many Oriental nations both of coloring the face and forehead, and of impressing on the body marks indicative of devotion to some special deity or religious sect is mentioned by various writers (Burchard, Notes on Bed. i, 51; Niebuhr, Trav. ii, 57; Wilkinson, Anc. Eq. ii, 812; Lane, Modern Eq. i, 66). Sometimes it extends to serious infections. See CUTTING IN THE FLESH. It is doubtless alluded to in Rev. (xiii, 16, 17; xiv, 9; xvii, 5, 10, xx, 4), and in the opposite direction by Ezekiel (ix, 4, 5, 6), and in Rev. (vii, 1; ix, 4; xiv, 1; xxii, 4). The mark mentioned by Ezekiel seems to have been supposed to be the figure of the cross, said to be denoted by the word here used, ὁ, in the ancient Semitic language (Gesenius, Thes. p. 1485; Spencer, De Leg. Heb. ii, 20; iii, 409, 410). See MARK (ON THE PERSON).

It may have been by way of contradiction to heathen practice that the high-priest wore on the front of his mitre the golden plate inscribed "Holiness to the Lord" (Exod. xxviii, 36; xxxix, 30; Spencer, l. c.). See MITRE.

The "jewels for the forehead" mentioned by Ezekiel (xvi, 12), and in the margin of the A. V., Gen. xxii, 22, were in all probability nose-rings (Isa. iii, 21; Lane, Mod. Eq. iii, 223, 226; Hazmer, Observ. iv, 511, 312; Gesenius, Thesaur. p. 870). The Persian and also Egyptian women wear jewels and strings of coins across their foreheads (Olearium, Travels, p. 517; Lane, Mod. Eq. ii, 228). — Smith, s. v. See NOSEJEWEL.

For the use of frontlets between the eyes, see FRONTLET, and for the symptoms of leprosy apparent in the forehead, LEPROSY. For baldness in the forehead, see BALD.

Foreigner (φαρένες, nobri, Deut. xv, 8; Obadiah 11, a stranger, as elsewhere rendered; ἱπποτα, Exod. xii, 45, a sojourner, as usually rendered; ἄλλος, lit. a neighbor, Eph. ii, 19, elsewhere rendered stranger or sojourner) in the country not native to him, i. e. in the Jewish sense a Gentile. See ALIEN. Such non-Israelites (ἀλλός, ἄλλος ἄλλοις ἀλλογεῖς, Am. iii, 12, 5) as resided among the Hebrews were by the Mosaic law not only commended in general to the sympathy and humanity of the citizens (Exod. xxii, 21; xxiii, 9; Lev. xix, 9, 34; Deut. x, 19 sq.; comp. Jer. vi, 5; Ezek. xx, 3; Mal. iii, 6; Apionic, i, 28), but were also entitled to certain privileges belonging to the poor, namely, to participation in the festivals and decennial feasts (Deut. xiv, 28 sq.; xvi, 10 sq.; xxvi, 11 sq.; Tobit i, 7), to gleanings in the vineyards and fields (Lev. xix, 10; xxii, 19; Deut. xxiv, 19 sq.), and to the harvest in the year of jubilee (Lev. xxv, 6); prescriptions which found a definite point of support in Oriental hospitality. Before the courts they had equal rights with the native-born residents (Exod. xii, 49; Lev. xxiv, 22; Numb. xv, 15 sq.; Deut. xxviii, 16; xxix, 17; xxxi, 19 sq.; Deut. xxii, 21; xxxi, 14), and the cities of refuge were appointed for them likewise in case of unintentional homicide (Numb. xxxv, 15). On the other hand, they also were not allowed to perform anything which was an abomination according to the Hebrew law (Exod. xx, 10; Lev. xxvii, 10; xxviii, 25; xxv, 2; xxv, 16; Deut. v, 14; Ezek. xiv, 7); yet they were exempted from the prohibitions of using the flesh of animals that died of themselves (Deut. xiv, 21; but there are also other distinctions between this passage and Lev. xvii, 15. See CARCASS). Foreign slaves must be circumcised, but were then entitled to pass the passover (Gen. xvii, 12; Exod. xii, 44). It was lawful to take interest from foreigners for loaned capital (Deut. xxiii, 20). See DEBT. Under certain restrictions, when they submitted to circumcision, they became naturalized, and received the prerogatives of Jewish citizenship; Edomites and Egyptians in the third generation (Deut. xxiii, 7 sq.; comp. Theodoret, Quest. in Deut. 26), others after a longer time. Only Ammonites, Moabites, castrated persons, and the offspring of public harlots were altogether excluded from this privilege (Deut. xxiii, 1 sq.; comp. Neh. xiii, 1). Foreigners accordingly appear in the royal service in the third generation (Deut. xxiii, 7 sq.; Sam. xxii, 7; xxii, 9; 2 Sam. xi, 3, 6, etc.). See GITTITE. Later fanaticism, however, sought to expel all foreigners from the country (Neh. xiii, 3; on the contrary, Ezek. xiv, 22), or impose the hard condition
of circumcision (Josephus, *Life*, 22). See generally Michaelis, *Mos. Rachi*, ii, 448 sq.; Jahn, i, ii, 546 sq. The legal treatment of foreigners was in the earlier ages more humane, as originally at Rome (Adam, *Rom. Ant.* ii, 140) and at Athens. See *Prescr.*.

Foreiro, Francisco (Forrius Franciscus), a Portuguese jurist born at Lisbon in 1628, and entering early into the Dominican order, was sent by John III to study theology in the University of Paris. On his return to Lisbon he was charged with the education of the young prince Antonio, and was appointed preacher to the king. Among the Portuguese at the Council of Trent he held the first place. He offered to preach before the council in any language. The council sent him on a mission to Pius IV, who made Foreiro confessor to his nephew, cardinal Charles Borromeo. He was employed to reform the Breviary and the Roman Missal, and to aid in the preparation of the "Contract" and the "Canon of the Council." On his return to Portugal he was chosen prior of the Dominican convent at Lisbon in 1668. He died January 10, 1687. His principal work is *Inusia Propheti* nec non etiam de Hierico Vernio, cum Commentario, etc. (Venezia, 1663, fol.), inserted in the fifth volume of the *Critici Sacri*.—Echard et Quétif, *Script. Ord. Pred.* ii, 261; *Hook, Eccles. Biogr.* v, 161; Hoefert, *Nov. Biogr.* Generale, xviii, 170.

Foreknowledge. See *Prescience*.

Fore-Ordination. See *Predestination*.

Forester, Leonard, a Jew, born in Switzerland, 1680, was professor of philosophy in many colleges of his order; then chancellor of the University of Dillingen, and finally rector of the Jews' College at Lucerne. He died in 1689, leaving 44 works, a list of which may be found in Sotwell, *Bibliographia de la Societé de Jesus*. Among them is *Symbolum Catholicum. Lutheronam, Calculium cum Apostolico collatum* (Dillingen, 1682, 4to).—Migne, *Dict. de Biogr. Chrétiennes*, s.v.

Forerunner (φορεός, the *prou*, *Acts* xxvii, 80, 41), the bow or stem of a vessel. See *Ship*.

Foreskin (προσκεπτή, av, a native term for this special rite; Greek *exopothoria*, both used in their literal and metaphorical meaning), the prepuce or projecting fold of skin in the distinctive member of the male sex, which was removed in circumcision, so as to leave the *glans penis* artificially uncovered. This well-known symbolical rite was instituted by Jehovah for the consecration of all the male Israelites—originally descendants of Abraham (and in that case on the eighth day after birth, Gen. xxvi, 4; Lev. xvii, 8; Luke i, 59; ii, 21; see *Philos*, i, 5; *Josephus*, *Ant.* i, 12, 2; yet compare *Exod*. iv, 25, with ii, 12, and the Mishna, *Shabb.* xix, 5, where in certain cases the ceremony is deferred till the ninth or twelfth day: the Sabbath, however, did not cause a postponement. John vii, 23; compare *Watstein*, i, 887; but delicate children might be circumcised after weaning, Mishna, *L. c.*, and in later times "Prophylates of Richtigness" (*Exod.* xii, 48; comp. *Judith* xiv, 10; see *Tacit. Hist.* v, 5, 8), as a ratification of their title to the theocratic citizenship. When the circumcisions of all Egypt and Crete stood in connection with Phalus worship [Tuch, *Gen*. p. 844] is not determined, but its use among the Israelites is rather against such a supposition. Baur [*Tob.* Zeitschr.* 1882* i, 104 sq.] refers it to the idea of separation from heathendom, which is consistent with the entire system of Mosaicism (comp. the Mishna, *Nedarim*, iii, 11).) House-born (heathen) slaves were also under the operation (Gen. xvii, 12), as a sign of particular consecration. But children born of a heathen mother and an Israelitish father must not be circumcised, according to *Yekhem*, i, 2; yet *comp. Acts* xvi, 3.) Every Israelite (*Josephus*, *Ant.* xii, 5, 4), generally the father of the house (*Gen.* xvii, 20; but, in cases of exigency, also women; see *Buxtorf*, *Synonymia*, p. 152). Buxtorf quotes a comp. *Exod.* ii, 21, 24, and the Mishna, *Nedarim*, however; yet see *Aboda Zara*, ed. Edward, ii, 40 sq. In adults a physician was required, *Josephus*, *Ant.* xx, 2, 5. In case two sons by the same mother died of the operation, the [later] rabbins allowed the circumcision of the third son to be delayed till he was full grown; *Maimonis, Hc. Melah*, i, 19, should perform the rite, and they employed for the purpose a sharp knife (Queen, *De cultus circumcissi et secer- ptas Hebr.* Regiom. 1714; also in Ugozini *Theaurus*, xxii), earlier an edged stone or stone knife (*Exod.* iv, 22; *Josephus*, *Jewish Wars*, *Ant.* 3, 32, 1); see also in the *Mishna*, *Aviad*, i, 69; *Abicht, De cultus circumcissi et seceptiis L. c.*, p. 1712; also in Hassei *Theaur., i, 497 sq.*; and *Gedal D. de instrumentis circums. I. 1696*; also in the *Nov. theau-, rius phil.* i, 283 sq.; and in Ugozini, xxii, as the Galli or priests of Cybele castrated themselves with a shell (*Gallus*, *Catacom.*, xxvii, 48; *Pomponius Flaccus*, *Civ. Nat.* i, 14; *Iulius, iii, 8; *see Arnoldus, adv. Gent.* v, 16., under the idea that healing was thereby promoted. The Christians of Abyssinia also performed the operation with stone knives (Lodol, *Hist. Aeth.Independentii*, i, 21). Modern Jews use for this purpose steel knives, and the operation is thus described by Oeho (*Lit. Rab.,* p. 160): "The circumciser applies a rod to the organ, and draws the prepuce forward over it as far as possible; then with a forceps he seizes a part of it, and cuts it off with a razor. He next seizes the prepuce with his two thumbs, and rolls it back till the whole glans is exposed, after which he sucks out the blood (Mishna, *Shabb.* xix, 2) till the blood comes from the remotor parts of the body, and finally he applies a plaster to the wound." (Comp. *Thevenot*, *Trav.* i, 58; *Chellus, Homol. d. Chvryhyg.* ii, 5, 60; *Wolters, in Henke, Zeitschr.* xxvi, 48; *Buxtorf*, *Synonymia* i, 200, sq.; also in the *Kuza*, *Wörterb.* d. medic. Wissenesch., v, 256 sq.) On Arab circumcision, see Arvieux, iii, 146. That so severe and painful an operation (comp. *Targ. Jonath.*, on *Gen.* xxvii, 1) could not well be performed on an infant less than eight days old is evident. There are no references to male circumcision, or excision, referred to by several ancient and modern writers, as practiced by certain nations, may have consisted in removing the anterior flap of skin which in some actual specimens of Hotten- tots or Bushwomen has been found to cover the female genitalia, apparently wholly distinct from the vaginal membrane (see *Penny Cyclopaedia*, s.v. *Circumcision*). As circumcision was a symbol of purification, the prepuce was a type of corruption; hence the phrase "foreskin of the heart" (*Deut.* x, 16; *Jer.* i, 10), to designate a carnal or heathenish state (*Rom.* ii, 29; *comp. Buxtorf, *Synonymia*, ii, 5, 8). Let us then see how much of this part removed by circumcision thus naturally became one of the hardest terms of opprobrium (*1 Sam.* xvii, 26, 86; *comp. Lodol, *Comment. in Hist. Eit.* p. 274), like verus among the Romans (*Martial*, vii, 62, 6). It was sometimes brought as a present of allies (*1 Sam.* xvii, 25; *2 Sam.* iii, 14), like scalps by the North American savages. Paul, on the other hand, uses the ironical term "concision" (*Phil.* iii, 2) to stigmatize the extreme attachment of a Judaizing party to this ordinance. See *Circumcision*.

FORESKINS, Hill of, a place near Gilgal, so called from the circumcision of the Israelites at that spot before entering Canaan (*Josh*. vii, 8). See *Gibeath-Haraboth*.
FOREST

620

FOREST

is the rendering in the Auth. V. of three distinct Heb. words. See Topographical Terms.

1. Usually and most properly הָרָה, yar,' or מִנְצָר, pas ra(h) (once rendered 'wood,' Dent. xiv. 5), signifies a clump of trees or shrubs, as in Eccles. ii. 38; Isa. xiv. 14, where the wild beasts had their homes (Jer. v. 6; Mic. v. 8). Hosea (i, 12) appears to use it as equivalent to the Arabic yar'ar, a "rugged and desolate place, like midbar or 'wilderness.'" See Wood.

2. צֵרָה, cho rekh, is apparendly derived from a Chaldee root, צֵרָה, to be entangled, and would therefore signify a thicker of trees or bushes, such as might afford a safe hiding-place (comp. 1 Sam. xxvii. 15, and Cant. v. 1, in which it refers to honey) to an abundance of trees. It is the name given to all the great primeval forests of Syria, where the stately trees grew (Eccles. ii. 38; Isa. xxvii. 14, 16, 18; Jer. v. 6), and the wild beasts had their homes (Jer. v. 6; Mic. v. 8). Hosea (i, 12) appears to use it as equivalent to the Arabic yar'ar, a "rugged and desolate place, like midbar or 'wilderness.'" See Wood.

3. "The wood," a word of foreign origin, like the Greek πάραδεσσα and the Arabic پارداس, q. d. park, means an enclosed garden or plantation attached to a palace, intended either for ornament or for containing animals of the chase (Eccles. ii. 5; Cant. iv. 13; comp. Xenophon, Cyrop. i. 8, 12). It is found only three times in the Bible, and is once translated "forest." In Neb. ii. 8, Asaph is called the "keeper of the king's forest" (Sept. rov παράδεσσον), where it appropriately expresses the care with which the forests of Palestine were preserved under the Persian rule, a regular warden being appointed, without whose sanction no tree could be felled. Elsewhere the word describes an orchard (Eccles. i. 18). See Wood.

Although Palestine has never, in historical times, been a woodland country, yet there can be no doubt that it contained much more wood formerly than it has at present. Tracts of woodland are mentioned by travellers in Palestine, but rarely what we should call a forest. There are still some remnants of ancient oak forests on the mountains of Bashan, Gilead, Hermon, and Galilee. One solitary grove of cedars exists on Lebanon, but fir-trees are there abundant. The other forests of Palestine (2 Kings ii. 23; 1 Sam. xiv. 25; vii. 2, etc.) have almost disappeared. Yet here and there in every district of the country, to the south, east and west, one meets with a solitary oak or terebinth of huge dimensions, as at Hermon, and the valley of Elah, and Shiloh, and Dan. These are the last trees of the forests, and serve to indicate what the forests of Palestine once were. Hence it is probable that the highlands of the country, which were long prior to the forest, of which the celebrated cedars and terebinths (e. g. those of Abraham, Tabor, etc.) scattered here and there were the relics. The woods and forests mentioned in the Bible appear to have been situated where they are usually found in cultivated countries, in the valleys and defiles that lead down from the high to the low lands, and in the adjacent plains. They were therefore of no great size, and correspond rather with the idea of the word than with that of the word. The following are those that occur in Scripture. See Tree.

(1.) The most extensive was the forest (yarar, "wood") of Ephraim, implying a region of Ephraim covered with forests where Mount Jerarm (Hill of For-ests) was situated (Josh. xvii. 10); or in allusion to the name of the forest that Jehovah gave to Ephraim (1 Sam. vii. 1, 2). It clothed the slopes of the hills that bordered the plain of Jezreel, and the plain itself in the neighborhood of Bethshan (Josh. xvii. 15 sq.), extending, perhaps, at one time to Tabor, which is translated ἐρυμές by Theodotion (Acts ii. 1), and which is still well covered with forest trees (Blenley, 380). It is perhaps the same with the wood of Ephratah (Psa. xxxiii. 6). See Ephratah.

(2.) There was a trans-Jordanic forest (yarar, "wood") of Ephraim (2 Sam. xviii. 6; Sept. ἔρυμος). It was here that the army of Absalom was defeated, and he himself slain. It lay near, probably a little to the west of the town of Mahanaim, where David had his headquarters, and where he received the first tidings of the fate of his son (xiv. 26; xviii. 24). Why a forest east of the Jordan should bear the name Ephraim cannot now be explained; but one thing is certain, that in the noble oaks which still clothe the hills of Gilead north of the Jabok we see the remnants of the "wood of Ephraim," and the representative of that "great oak" in one of whose branches Absalom was strangely imprisoned (xviii. 9; see Forte's Handbook for Syria and Mesopotamia, p. 511, 814). Winch was it on the west side of the Jordan; but a comparison of 2 Sam. xviii. 26; xviii. 8, 23, proves the reverse. The statement in xviii. 23, in particular, marks its position as on the highlands, at some little distance from the valley of the Jordan (compare v. 21), in one of the valleys leading down to the plain of Philistia. See Saul.

(3.) The forest (yarar, Sept. παλάτσιο, A.V. "forest") of Harod, in the mountains of Judah, to which David withdrew to avoid the fury of Saul (1 Sam. xxiii. 5), was somewhere on the border of the Philistine plain, in the southern part of Judah. See Beth-shan.

(4.) The wood (chorash, Sept. ἐρυμές, A.V. "wood") in the wilderness of Ziph, in which David concealed himself (1 Sam. xxi. 15 sq.), lay south-east of Horon. See Ziph.

(5.) The forest (yarar, Sept. ἐρυμές, A.V. "wood") of Bethel (2 Kings ii. 23, 24) was situated in the ravine which descends to the plain of Jericho. See Bethel.

(6.) The forest (yarar, ἐρυμές, "wood") through which the Israelites passed in their pursuit of the Philistines (1 Sam. xiv. 25) was probably near Alajan (compare v. 21), in one of the valleys leading down to the plain of Philistia. See Saul.

(7.) The woods (chorash, ἐρυμές, "forest") in which Jotham placed his fcrts (2 Chron. xxvii. 4) must have been similarly situated. See Jotham.

(8.) The plain of Sharon was partly covered with wood (Strah. xvi. 756), whence the Sept. gives ἐρυμές as an equivalent for that name in Isa. lxv. 10. It has still a fair amount of wood (Stanley, p. 260). See Sharon.

(9.) The excellency or pride of the Jordan, so called from its green and shady banks, clothed with willows, tamarisks, and cane, in which lions made their covert (Zech. xi. 8; Jer. xii. 5). See Jordan.

(10.) The forest (yarar of cedars on Mount Lebanon (2 Kings xix. 23; Hos. iv. 5, 6), which must have been much more extensive formerly than at present; see Tree. On the assumption, on the other hand, that the "forest" is the Pinus cedrus, or so-called "cedar of Lebanon," its growth is by no means confined, among these mountains, to the famous clump of ancient trees which has alone engaged the attention of travellers. See CEDAR. The American missionaries and others, trav-
FORK 621 FORGIVENESS

alling by unrequited routes, have found woods of
less ancient cedar-trees in other places. See LEBANON.

"The house of the forest (yaar) of Lebanon" is several

times mentioned. It appears to have been a part of

the royal palace built by Solomon at Jerusalem,

and seen by Jeremiah (xxviii. 13; xxv. 17-24; 2

Chron. ix. 16-20). The house had "four rows of
cedar pillars, with cedars above upon the pillars,

and it was covered with cedars above upon the beams." Hence,
in all probability, its name (see Keil, ad loc.).

See SOLOMON.

The forest (yaar, ḫนาม) of Carmel" is a phrase

used in 2 Kings xii, 23, and Isa. xxxvii, 24, in refer-

ence to the ravages committed by the army of Sen-
nacherib on the land of Israel. The meaning of the

clause, הָעֵרֶץ הָאָבָב ("forest of his Carmel"), seems to be
to the garden forest; that is, the garden-like cedar

forests of Lebanon, to which reference is made (see

Keil on Kings, and Alexander on Isaiah, ad loc.).

(11) "The forest (yaar) in Arabia" occurs in Isa.

xxxi, 13. The phrase is remarkable, because Arabia is

a country singularly destitute of trees. In no part of it

are there any traces of forests. (The Sept. trans-

lates the passage into ὀ γραφής ἡ ἡγεσία; and Lowth

and others adopt it; but the Masoretic reading is pref-

erable.) The meaning of the word "yaar" in this place

is probably the same as that of the Arabic yaar, a rug-

ered region, whether wooded or not. See ARABIA.

(12) In Zech. xi, 2 there is a singular expression:

"How, O ye oaks of Bashan, for the forest of the vint-

age is come down." The Hebrew וַתִּבְדַּלְתָּ (Sept.

ὄ δαμαρός ο φιλιπτρον) rather signifies "the fortified

forest" (Vulg. salutis manus), and it is probable that

Jerusalem is thus figuratively alluded to, the houses of

which are close together as the trees of a forest (compare

Micah, iii, 12; see Henderson, On the Minor Prophets,
ad loc.). It may, however, refer to the de-

vastation of that region, for the greater portion of Pe-

rerin was, and still is, covered with forests of oak and
terebinth (Isa. ii, 13; Ezek. xcvii, 6; comp. Bucking-

See BASHAN.

Forest is used symbolically to denote a city, king-
dom, polity, or the like (Ezek. xiv, 26). Devoted

kingship, for example, is often represented as a forest,

which God threatens to burn or cut down (See Isa. x, 17, 18, 19, 34, where the briers and thorns
declare the common people; "the glory of the for-
est" are the nobles and those highest rank and

importance (Ezek. xxvii, 24; Jer. xxvi, 14; 7xvi, 28; Zech. xii, 2). It was also an image of unfruitfulness as contrasted with a cultivated field or vineyard (Isa. xxix, 17;

xxxi, 18; Jer. xxvi, 18; Hosea, ii, 12). See PALEST.

Forks (כלע הָעֵרֶץ, sheloah kilelkes), a tried of

progeny), a three-pronged fork, i.e. pitch-fork with

which hay, straw, and the like are gathered (occurs only 1

Sam. xii, 21). The Targum (on Eccles. xii, 11) uses

the same word to express a pointed instrument. See

AGRICULTURE.

The Orientals do not use forks at meals as we do;

but convey the food to their mouth with the fingers.

See EAT.

Forgiveness, the pardon of any offence committed

against us. We are not apt to entertain any

permanent or incurable ill will against the author of

injuries to others, and why should we be irreconcilable

when injuries have been done to ourselves? To love

our enemies, or rather not to hate our enemies, is

a duty which no gentleman can annul, no injury efface.

We are not required to love our enemies as our friends

but, when any injury has been done us, we are to en-

deavor to regard with it so much reverence as any

just and impartial person would feel on hearing it re-

lated, and no more. To revenge injuries is to retali-

ate evil for the sake of retaliation. We are all weak,

frail, and sinful creatures. None of us passes through

even one day without feeling that he requires forgiveness

from his God, and too often also from his fellow-crea-
tures. Mercy is our first and constant prayer. In such a

state, should we not pity and assist each other? Does mutual weakness call for mutual forbearance? Weak, frail, and sinful as we are, we all hope, through the merits of Christ, to attain the happiness of heaven, and can create a heaven for

ourselves. In a few short years, expect to be forever united in the presence of God, to be liberated from all unrans-

on passions, and to live together forever in heaven, in peace,

and joy, and everlasting love—can such creatures hate each other on earth? can they add to the sorrows of

triad? Let these make us so to pray for forgiveness of

life by acts of malice and revenge? can they risk their own eternal happiness by denying to each other

that forgiveness without which they must not dare to hope that they shall be themselves forgiven? We

know, from the express declaration of our Saviour, that if we forgive not our trespassers, neither will our heavenly Father forgive us. Christ estimated virtues by their solid utility, and not by their fashion or pop-

ularity, and hence he prefers the duty of forgiveness to every other. He enjoins it more frequently, with more earnestness, and under a greater variety of conditions; and he adds this weighty and peculiar circumstance,

that the forgiveness of others is the sole condition on

which we are to expect or even ask from God forgive-

ness for ourselves. This preference is justified by the

superior importance of the virtue itself. The feeds

and animoses which exist in families and among

neighbors, which disturb the intercourse of human life,

and collectively compose half its misery, have their

foundation in the want of a forgiving temper, and can

never cease except by the exercise of this virtue. Let

us endeavor to forgive, that we may not be afraid to

ask forgiveness, that our prayers may not justify and increase our condemnation. Let us remember the

amazing condescension of the Son of God, in 'taking upon him the form of a servant,' and hence learn humility.

Let us represent to our minds the terms of our salva-

tion, in order to be prepared for the reception of the

infinite love of our Redeemer, "who laid down his life for his enemies," and let this be the pattern of our

charity" (Fellowes, Body of Theology, ii, 210-213; Pa-

ley, Moral and Politi. Philosophy, i, 209; Warner, Sys-

tem of Moral Philosophy, i, 60; ii, 100; Robinson, Theo-

logical Dictionary, s. v.; American Presbyterian Review,

Oct., 1867, art. ii."

'Some confound things that are separate and dif-

ferent—the act of forgiving with the act of loving with

approbation. Repentance and confession are indis-

pensable, when one has intentionally injured us in

any way, to restore him to our fellowship and appro-

bation. But what is a necessary condition of this is

not a necessary condition of forgiving. Blending these
two things together, and thinking of them as if they

were one and inseparable, has doubtless caused some

to differ in opinion from others who clearly discern the

proper distinctions. It is a mistaken idea that in

the matter of forgiveness we are strictly to imitate God

the Father, and not forgive those who trespass against

us until they repent and ask our pardon. God is cl

clothed with the righteousness of moral government

over his creatures, while we are not. If he had made it

our duty to revenge our own wrongs, and administer

just punishment to the doers of the wrong, then it

would be right and wise to follow his example in that

particular. But the case is far otherwise. The Lord

does not only require us to forgive them in the fullest

sense of the word, and to command us not to usurp al

 prerogatives: 'Avenge not yourselves.' No doubt there are certain cases in
civil and family governments in which the outward acts of forgiveness should be held in abeyance until forgiveness is duly sought. The offender in himself has no right to forgiveness until he seeks it in the true spirit of penitence. In the absence of this, parents should often wait for the outward signs of penitence in their children. The same may be true sometimes in other relations, as between brothers and sisters, and other domestic and civil relations. Hence there is an objective and a subjective view to be taken of the duty of forgiveness. In both, forgiveness is the act of Christ, which is God's own provision, his law is vindicated, and the penalty of sin is paid. To all who will believe in Christ with the heart, God offers a free, full, and present forgiveness (Acts v, 31; xiii, 38, 39; 1 John ii, 12). Being justified freely by his grace, through the redemption that is in Christ Jesus, etc. (Rom. iii, 24, et seq.). By a careful consideration of this language, we see, 1. That every believer in Christ Jesus is justified or pardoned, for justification is called, in verse 25, 'remission of sins.' Yet it is not simply forgiven. The terms justification and justify, when applied to a guilty person, do not import his being morally just, but just with respect to law and the law-giver; that is, placed in the position of a person who has not broken the law, both in respect to exemption from punishment, and the favor and kindness of the judge. Justification is pardon administered consistent with the requirements of justice and law. 2. That such believers are forgiven freely, as a free gift, not of right, not meritoriously and of desert. It is to grace, and not to justice, that the appeal for pardon is made; and we could ourselves have done nothing which could have legally cancelled our debt. The whole scheme is of grace, the result of the pure love of God, who compassionated our misery, himself provided the means of our deliverance, by sending his only-begotten Son into the world, who voluntarily submitted to die on the cross, that he might reconcile us to God. The whole was completed without our intervention, and the faith which is the condition of our salvation is by grace (Farrar, Biblical Dictionary, s. v.). See Justification.

The "forgiveness of sins" is one of the articles of the (so-called) Apostles' Creed, as well as the Nicene. According to the so-called sacramental theology (Acts ii, 38), "forgiveness of sins" is conveyed to the penitent by the act of the priest pronouncing the absolution, making the priest the sole ordinary channel through which remission is to be obtained. But sin being cancelable only by the forgiveness of God, on the condition he prescribes, of repentance, and of this no man can infallibly judge. See Pearson, On the Creed, art. ix.; Eden, Churchman's Dictionary, s. v. See Absolution; Justification.

Form (Lat. forma, by transpos. from mojob) is defined by Aristotle as λογος της εικας, the doctrine of the subsistence or essence of a thing. 'A trumpet may be said to consist of the material out of which it is made, and the form which the maker gives to it. The latter is essential, but not the former; since, although the material were silver, it would still be a trumpet, but without the form it would not. Now, although there can be no form without matter, yet as it is the form which makes the thing what it is, the word form came to signify essence or nature' (Plenning, s. v.). The Scholastics distinguished form substantialis from accidentia. Substantialis was defined as actus primarius una cum materia constituentes usum per se; accidental form as actus secondarius constitutis a unit per accidentia. The unit of being composed of soul and body was defined to be of the former sort. Form, according to the ancient definition, is therefore necessary to matter; absolutely formless matter is inconceivable. Lord Bacon (Nov. Orgas, ii, 15), says: "When we speak of forms, we understand nothing more than the laws and modes of action which regulate and constitute any simple nature, such as heat, light, weight, in all kinds of matter such and such of them; so that the form of heat, or the form of light, and the law of heat, and the law of light, are the same thing." Also (Nov. Orgas, ii, 18), "The form of a thing is the very thing itself, and the thing no otherwise differs from the form than from the existent, the outward from the inward, or that which is considered in relation to man from that which is considered in relation to the universe.

"The sense attached at the present day to the words form and matter is somewhat different from, though closely related to, these. The form is what the mind impresses on the phenomena of objects when it classifies them as the matter; form therefore means mode of viewing objects that are presented to the mind. When the attention is directed to any object, we do not see the object itself, but contemplate it in the light of our own prior conceptions. A man, for example, may regard the poor and ignorant under the form of a very fortunate person, able to purchase luxuries which are above their own reach; by the religious mind under the form of a person with more than ordinary temptations to contend with; by the political economist under the form of an example of the unequal distribution of wealth; by the tradesman under that of one whose patronage is valuable. Now the object is really the same to all these observers; the same rich man has been represented under all these different forms. And the reason that the observers are able to find many in the object that they connect generally with their own prior conceptions. The form, then, in this view, is mode of knowing, and the matter is the perception or object we have to know" (Thomson, Outline of Laws of Thought, p. 54). Sir W. Hamilton calls the theoretical or ideal forms "the three supreme realities, which are con- sidered as realities joined with, and not as mere dispositions or modifications of matter" (Hamilton's edition of Reid's Works, p. 527).

Dr. M'Cosh remarks, on the distinction between form and matter, that "this phraseology was introduced by Aristotle, who represented everything as having in itself both matter (aion) and form (aion). It had a new signification given to it by Kant, who supposes that the mind supplies from its own furniture a form to impose on the matter presented from without. That of a tree corresponds to the a priori element, and the matter to the a posteriori. But the view thus given of the relation in which the knowing mind stands to the known object is altogether a mistaken one. It supposes that the mind in cognition adds an element from its own resources, whereas it is simply so constituted as to know what is in the object. This doctrine needs only to be carried out consequentially to sap the foundations of all knowledge; for if the mind may contribute from its own stores one element, why not another? why not all the elements? In fact, Kant did, by this distinction, open the way to all those later speculations which represent the whole universe of being as an ideal construction. There can, I think, be no impurity in speaking of the original principles of the mind as forms or rules, but they are forms merely, as are the rules of grammar,
which do not add anything to correct speaking and writing, but are merely the expression of the laws which they follow. As to the word 'matter,' it has either no meaning in such an application, or a meaning of a misleading character' (Intimations of the Mind, N. K.). Formal, in philosophy, is that which relates to the form, as opposed to material, or that which relates to the matter. So formal logic gives the theory of reasoning as grounded in the laws of thought, without reference to the subject-matter to which reasoning may be applied.—Fleming, Vocabulary of the English Language, 1869. How, in Bible, Dictionary of the Biblical religions. Wissenschafts, ii, 56.

Formathe. See Littere Formatae.

Formosus I., Pope (891-986), was bishop of Porto, and was sent by Nicholas I. in 866 as legate to Bulgaria (q. v.), and would have been made archbishop there but that the canons (at that time) forbade transference from one see to another. In the time of Pope John VIII he was condemned on a charge of conspirency against Charles the Bald and the pope (Hefele, Conciliengeschichte, iv, 496), A.D. 876. He was deprived of his episcopacy, and of all rights except lay communion. Pope Martin V restored him to his see in 883. Nicholas was elected pope in 901, 903, and was the first instance in the West of a bishop transferred from one see to another. Soon after his election, legates sent by the emperor Leo and the Eastern bishops arrived in Rome to obtain a confirmation of the ordinances of Photius (q. v.), but Formosus would not grant the request, and the East and West were still farther alienated. In 893 he took sides politically with Charles the Simple against Odo. On the death of Guido, 894, Formosus invited Arnulf to Rome, and crowned him emperor, 885. Formosus died on Easter day, 896. Pope Stephen VI caused the dead body of Formosus to be dug up, and cast into a synod at Rome, condemned as guilty of intrusion into the holy see, and treated with gross indignity. Stephen declared all the acts of Formosus null and void. His 'character' was restored by pope John IX, A.D. 906. —Bower, Lives of the Popes, v, 71-73; Baronius, Annals, A.D. 891-906.

Forms of Prayer are set prayers, prepared to be used in worship, public and private. As to the propriety and utility of such forms there has been much dispute. The arguments are about as follows.

I. From Scripture. — (1) On the one hand it is asserted that forms are found in the slightest trace in all the New Testament of any established liturgical service of Christian worship. There are no forms of prayer prescribed for such worship—a thing which we conceive must be inevitable if such liturgical form had been the best form, the most accordant with the will of the Great Head over all things to the Church, and the most consonant with the mind of the Spirit, the most appropriate for the bestowment and exercise of his influences. In things of much less importance we have explicit directions; and it is hardly to be supposed, if a liturgy for public worship were most appropriate for the wants of men, and most agreeable to the will of God, that there should have been no directions, nor even intimations in regard to it. It is hardly to be supposed, when all things were set in order in the churches, that this main thing should have been left unattended. In place of the liturgy. To use not a single trace even of so much as a prescribed articulat confession of faith or form of prayer can be found in the New Testament oracle’ (Cheever). In the same spirit, Coleman (Apostolical and Primitive Church, ch. xi) undertakes to prove, 1, that the formal prayer is no part of the Christian dispensation; 2, that it is opposed to the example of Christ and of his apostles; and, 3, that it is unauthorized by their instructions. (2) On the other hand, in favor of forms, it is declared that “the slightest acquaintance with Scripture is enough to convince that contrary to Scripture could not be a better practice for which we can plead the precedents of Moses and Miriam, and the daughters of Israel, of Aaron and Moses, of David and the Psalmists; for what are the Psalms but an inspired form of prayer for the use of the Church under the Gospel, as well as under the law? and, when they blessed the people, as in the time of Deborah and Barak; when the practice was even more directly sanctioned by the Holy Ghost at the time he inspired David and the Psalmists; for what are the Psalms but an inspired form of prayer for the use of the Church under the Gospel, as well as under the law? And when the transactions of the symbols which they blessed the people, it is well known, were conducted according to a prescript form. To those services our blessed Lord did himself conform; and severely as he reproved the Jews for their departure, in various particulars, from the prin- ciples of their private devotions, he does not charge them with this particular never did he utter one word of censure; nay, he confirmed the practice when he himself gave to his disciples a form of prayer, and framed that prayer, too, on the model, and in some degree in the very words, of prayers then in use. Our Lord, moreover, who is the form of his Filiorum et Filiae; he, at the same time that he conferred on them authority to bind and to loose, directed them to agree touching what they should ask, for which, seems almost to convey an injunction to the rulers of every particular church, to provide their people with a form of prayer. But if ‘far more wisely,’ as the other argument together has the one obvious and simple reason that our Lord’s especial blessing and favorable reception of petitions is bestowed on those who, assembling in his name, shall agree touching what they shall ask in his name. Now this surely implies the exclusive use of precomposed prayers in a congregation, since it plainly seems an impossibility for un instructed men to agree together in a prayer offered up by one of them if they do not know at least the substance of the prayer before they hear him utter the words, and if the form does not direct to do them, let individuals address their ‘Father who seeth in secret’ in any expressions (that are but intelligible to themselves) which occur at the moment. But congregational prayer, common supplication, joint worship, is a very different thing. And accordingly our Lord supplies to his disciples, in form, as the purchases for solitary devotion, but does teach them a form evidently designed for joint worship. The contrast is most remarkable: ‘Thus, when thou prayest, enter into thy closet, etc. ; ’ when ye pray, say, ‘Our Father,’ etc. Our Lord, by teaching him this form of prayer, which is not the only form of prayer, of course, in the same passages that teach the multiplicity of forms at all the times of day and night, etc. But in another place he says ‘And in like manner also kneeling, Luke xxi, 1, 2), gave the strongest possible sanction to the use of precomposed prayers for congregational worship.

II. From Antiquity and Usage. — Extreme views are maintained as to the usage of the primitive Church in prayer. (1) On the one hand, lord King says (Constitution of the Primitive Church), ‘There is not the least mention of fixed forms in any of the primitive writings, nor the least word or syllable tending thereto, that I can find, which is a most unaccountable silence if ever such there was, but rather something indicating the contrary.’ One of the principal authorities which he adduces is Justin Martyr, who, describing the manner of the prayer before the celebration of the marriage of the Lord’s Supper, says that the bishop sent up prayers and praises to God with such a variety of forms. This he expounds, that he prayed with the best of his abilities, invention, expression, and judgment, exerting his own gifts and parts in suitable manner and apt expression. He also quotes Tertullian and Origen in vindication of his views, that written forms of prayer were not named in the first spirit of Christ and the Church. Coleman (Apostol. Church, ch. xi) maintains that forms are “opposed to the simplicity and freedom of primitive worship,” and that their use, in fact, was un-
known in the primitive Church." In proof of this position, he (with lord King) adduces Justin Martyr († 165) (transl. by Semisch, i, 72), and Tertullian († 220) (Apolog. ch. xxxix), who uses the phrase ex preci; whether it be left for them to deny; or, as are, through
monitore, quia de pecore), and also the fact that the four earliest liturgies originated in the 4th century.

(2.) On the other hand, it is argued that the Jewish
synagogue had its liturgy, to which Christ and the apostles conform. After their return rather at the constitution and discipline of his disciples to pray, and that Christ gave a form to his followers in answer to their request; that if the four ancient
liturgies can only be traced to the 4th century, there are numerous passages in the fathers that imply their use in the apostolic age, and that fragments of them exist as far back as Clement (A.D. 194) and Dionysius of Alexandria (247) are found; that the passages from Justin and Tertullian, rightly interpreted, bear as strongly in favor of liturgies as against them; that the Apostolical Canons (q. v.) enjoin them; and that, from the 4th century downw.ards, both the Eastern and Western churches have uniformly used forms of prayer. On the historical questions as to the early use of liturgies, see Liturgy.

III. From the Tendencies and Results of their Use.—
(1.) Agentia forms, it is alleged that those adopted in one church may have been adopted in another, and that the external repetition of the same prayers makes them wearisome, and destroys their significance; that they must often be unsuited to the occasion, to the sermon, and to the circumstances of the congregation; and that their general tendency is, and always has been, to formalism and a mere outside worship, not of the heart, but of the lips.

(2.) For the use of forms, it is asserted that the forms in use are, like the Psalms, from which they are largely derived, adapted to the worship of the Church in all, not as a devotion, but as a devout mind as extemporaneous prayers of the same length; that for special occasions special prayers can always be framed; and that their tendency has been proved, in the history of the Church, to be most salutary. It is further objected to extemporaneous prayers that (1) "it must be generally impossible that the whole congrega-
tion should join in a prayer they never had heard before, the instant it is uttered; and totally impossible many distinct congregations should all be uniformly employing the same extemporaneous prayer." (2) That free prayer gives too little scope to the congrega-
tion; that men are not so affected; that it is not thorough-
and receptive; they hear the minister pray rather than join in public prayer; at best, they follow the minister rather than worship in prayer. (3) That free prayer tends to degenerate into preaching or ex- eurism, so that the preacher can hardly fail to aim at edifying his congregation instead of being simply their mouthpiece in the act of worship, and so his prayer becomes homiletical instead of devotional. (4) That unpremeditated prayers are apt to depend on the impulse of the moment in the preacher, his state of health, etc., and may therefore be either short and cold on the one hand, or long and diffusive on the other; and that it is apt, therefore, to be personal rather than represen-
tative, if the prayer is the natural outflow of the minister's heart, which, on the theory, it ought to be.

A judicious writer in the Br. and For. Eveng. Rev. (Jan. 1860) asks whether, because from the heart pre-
sitions possible on this question—(1) the use of forms, with the exclusion of free prayer; (2) free prayer, ex-
cluding all forms; (3) the combination, in greater or lesser measure, of both—argues that the Reformers and others of the Reformed Church, in leading off the three lines of the practice they stood precisely midway between the two antagonist positions of modern times, and can be le-
gitimately claimed as partisans by neither. They were the advocates neither of form nor of freedom, but of both. They at one sanctioned the use of liturgical

aids, and vindicated the right of personal freedom. Whether rightly or wrongly, whether as a remnant of the old bondage which they could not all at once throw off, or the dictate of that divine conservative wisdom which in most things, and Generalisimo guided them, but in reforming, not new founding, the Church, having regard also, perhaps, in some measure, to the circum-
stances and necessities of their times, the fact, at least, is historically certain that with one consent they sided neither with the Latin nor the Greek, but with the middle element, to which the exclusive predominance of either. While not confining their churches to any unbending ritual, they yet deemed it their duty to provide for them such lit and solemn forms of common prayer as should serve at once as a model and as an aid in the public worship of God. This was the principle alike of Knox and of Cranmer, of Calvin equally with Luther and Melancthon. At Geneva, at Zurich, at Wittenberg, at St. Andrew's—wherever the great leaders of the Reformation were at liberty to carry out their views, the solemn service of the house of God proceeded according to a certain formal order, which was designed to regulate and assist, not to re-
strain, the free outpourings of the heart. England was an apparent, but only an apparent, exception to this rule. In her case the more rigid enforcement of the forms was perhaps less the effect of external circumstances than of the personal convictions of her leading divines. The principle of comprehension on which their reformation was based rendered a certain restraint necessary in the interest, not of ritual uniformity, but of Protestant truth. The object of suspicion then was the Roman priest, not the evangelical
pastor, and the design of ritual restriction was rather to curb the license of the one than to fetter the liberty of the other. Ave Maris must be silenced, even though at the sacrifice of free prayer; the com-
xamation service must be prescribed by imperative
rubic, or it would be turned by many into a farce. But
for this adventitious, and, in their view, probably temporary necessity, there is every reason to believe that the liturgical ordinances of the English reformers would have been much less fixed and stringent, and that in the matter of worship, as well as in other ele-
ments of her constitution, the Church which they founded would have been brought into much nearer conformity with the general model of other Reformed communions. Be this, however, as it may, the real and essential point of difference, even in practice, be-
tween Continental and English church government, is the exclusive use of forms. The one confined, the other permitted and encouraged, the spontaneous ut-
erances of devotion. The one supplied an aid, the
other ordained a law. In truth, in the Scottish form at least, when we speak of 'the Presbytery,' this was the pres-
scribed. Instead of the Anglican 'then shall the priest say,' its gentler and wiser language is 'the min-
ister utter one of these two confessions,' or 'this pray-
er following, or such like.' The accustomed order, in
short, was rather observed as a rule than obeyed as a law; worn as a dress than borne as a burden; followed
with free and willing heart in the spirit rather than the letter—as a law of liberty, not a yoke of bondage" (p. 600 sq.). We cite also the Princeton Review as follows: "As to stated forms of prayer, their value
must vary with circumstances. In no case ought the liberty of expounding them to be so marvellously curtailed as by the minister in the pulpit. As well might preaching be
confined by authority to prescribed forms of words. The discretion of the ministry may be trusted as freely
in the one as the other. But if, in the solemn office of
leading off the three lines of the practice they stood precisely midway between the two antagonist positions of modern times, and can be legitimately claimed as partisans by neither. They were the advocates neither of form nor of freedom, but of both. They at one sanctioned the use of liturgical

aids, and vindicated the right of personal freedom. Whether rightly or wrongly, whether as a remnant of the old bondage which they could not all at once throw off, or the dictate of that divine conservative wisdom which in most things, and Generalisimo guided them, but in reforming, not new founding, the Church, having regard also, perhaps, in some measure, to the circumstances and necessities of their times, the fact, at least, is historically certain that with one consent they sided neither with the Latin nor the Greek, but with the middle element, to which the exclusive predominance of either. the edification of our people in public worship would be enhanced. We must not make our library a cloak of licentiousness. There are few of our most able and eminent ministers who come as near the true standard of pulpit prayer as they do that of the sermon. When we hear it said of such a man as Robert Hall that his prayers were felt by his hearers to be strikingly unequal to the rank of his position, we are keenly sensitive to the proprieties of pulpit prayer an aversion to making prayer the work of genius, and at the same time some lack of zeal in cultivating the peculiar talent for its just and most useful performance. But among our brethren of the lower grades of ability and holiness, the matter is not unfrequent in this service from which many of our sensible and pious people would gladly take refuge in a book of prayers. When we sometimes hear the intimation that the Book of Common Prayer, could it be quietly introduced, would be an improvement upon the present forms of devotion in many of our pulpits, we know this preference not to be for written prayers in general, but as an alternative and a way of escape from peculiar and unnecessary faults in prayers with which the observers are often afflicted. We cannot assent to such a rule, while we condemn the needless and imperfect perfection of our present standard, and desire to speak that impression with emphasis. We are confident that our standard may be so raised that all would feel the transition from extemporaneous to written prayers as a descent and a deflection. When we observe the introit, when the service of the faithful worshipers with what appear to us the indefinite and comparatively barren forms of the English liturgy, we see the great power of a few striking points of propriety in public prayer to engage the heart of true devotees of God. (Butler, c. xiv, p. 81, 82).

The conclusion arrived at by Richard Watson (Institutes, ii, 507) is just and temperate, viz, that there are advantages in each mode of worship, and that, when combined prudently, the public service of the sanctuary has its most perfect constitution. Much, however, in the practice of churches is to be regulated by due respect to differences of opinion, and even to prejudice, on a point upon which we are left at liberty by the Scriptures, and which must therefore be ranked among things prudential. Here, as in many other things, Christians must give place to each other, and do as is meet in all things.

Among the modern Protestant churches, the Church of England and the Protestant Episcopal Church use forms of prayer to the exclusion (generally) of free prayer in public worship. The Methodist Episcopal Church, however, has no sacraments for social use, no exhortation, and other services, and free prayer in worship. The Presbyterian churches use free prayer (Directory of Worship, ch. v). The Lutheran and Reformed churches have liturgical forms for certain services, but generally use free prayer in worship. A movement toward more full liturgical services has been going on for some time in the German Reformed Church. See German Reformed Church, and Liturgy. A tendency in the same direction appears to have arisen in the Presbyterian Church in the United States (see Shields, Liturgy Espirical, Philadelphia, 1864; see also Beazley, Duties of the Presbyterian Liturgist, N. York, 1855, 18mo; reprinted in London as A Chapter on Liturgies, edited by Thomas Binney, 1856, 18mo). In the Established Church of Scotland, Dr. Robert Lee, of Edinburgh, was tried before the General Assembly in 1831 for his sermons, which tended to dispense with the public in the services of Old Grayfriars' Church, Edinburgh; and the Assembly enjoined Dr. Lee to discontinue the practice. But the tendency went on; and in 1867 appeared Euchologia, or Book of Prayers, being Forms of Worship issued by the Church-service Society (Edinburgh, and London, 1867), under the auspices of Dr. Lee and Dr. Macleod. See, besides the works already mentioned, Bingham, Orig. Eccl. bk. xiii.; Pale- stine, Orig. Liturgies, London, Words, ii, 429; Milton, Prose Works (Philadephia, 1880), i, 96 sq. (against forms); Shields, The Book of Comm. Prayer as amended by the Westminster Divines A.D. 1661, with a historical and liturgical treatment (Philadelphia, 1867, 12mo); Brownell, Family Prayer-book (Introduction); Butler, Common Prayer Illustrated, Long, xiii, 489 sq.; xviii, 487 sq.; xxvii, 445 sq.; Merriam, Review, Jan. 1868, art. vii; Evangelical Quarterly Review, Jan. 1869, p. 80.

Formularies, a general name for the articles of religion, forms of service, etc., adopted by any particular church. See CREEDS; CONFESSIONS; LITURGY.

Formula Concordiae. See Concord, Formula of.

Formula Consensus Helvetica. See Hel- vetic Confessions.

Formula (ουτη), tauta, ἡ τινος, illicit sexual intercourse, especially of a married woman). See ADULTERY. From the Scriptures we learn that long before the time of Moses morals had become very much corrupted, and not only the prostitution of females, but also the licentiousness of boys, and the immorality of the needless and imperfect perfection of our present standard, and desire to speak that impression with emphasis. We are confident that our standard may be so raised that all would feel the transition from extemporaneous to written prayers as a descent and a deflection. When we observe the introit, when the service of the faithful worshipers with what appear to us the indefinite and comparatively barren forms of the English liturgy, we see the great power of a few striking points of propriety in public prayer to engage the heart of true devotees of God. (Butler, c. xiv, p. 81, 82).
